71. WHT is reduced to 10% if the recipient is a Dutch company with at least a 50% direct interest in the paying company or if the recipient holds 25% of its capital and another Dutch company holds at least the other 25%.
72. No WHT is levied on capital gains from sales of assets/rights when they are considered to be a royalty.
73.
 - a. No WHT is levied on fees paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
 - b. A 5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 50% of voting shares of the company paying the dividends; a 7.5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 25% of voting shares of the company paying the dividends.
74. Levied if the recipient is a shareholder of the paying company holding voting rights with at least a 10% direct interest; otherwise, a 15% rate is levied.
75. A 10% WHT rate is levied on interest paid for bonds or similar securities generally offered to investors and related to transfers of industrial, commercial, or scientific equipment. No WHT is levied on interest from bonds or similar securities issued by the state or a local entity or from loans given or guaranteed by either of the two contracting states, Central Banks, or financial institutions as agreed between the contracting states.
76. A 20% WHT rate is levied on royalties for films or audio or TV tapes.
77. No WHT is levied on interest from loans granted or guaranteed by a contracting state.
78. If the recipient has invested more than EUR 100,000 in the company that pays the dividend or the dividend is tax exempt in its country of residence, the WHT rate levied is 10%. If both of these requirements are fulfilled, the rate applicable is 5%.
79. Interest on loans with a maturity period of over seven years is tax exempt.
80. A 10% WHT rate is levied on any patents, trademarks, designs or models, plans, secret formulae, or processes and computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experiences. A 5% WHT rate is levied on any copyright of literary, artistic, or scientific work, excluding computer software and including cinematographic films or tapes used for radio or television broadcasting.

81. No WHT is levied on interest paid to a contracting state, one of its political subdivisions, or one of its local entities or interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or interest paid on any long-term loan (seven years minimum) granted by a bank resident in a contracting state.
82. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment or merchandise.
83. No WHT is levied on dividends when they are paid to a shareholder with at least a 10% interest held for at least one year, provided that the company distributing the dividends is effectively taxed.
84. No WHT is levied on dividends when they are paid to a shareholder with at least 10% direct interest.
85. No WHT is levied if the royalties are paid between associated companies, affiliated by at least a 25% direct interest held for at least two years or both held by a third company with at least a 25% interest in both companies held for at least two years, and CIT is levied on all of the companies.
86.
 - a. A 10% WHT rate is levied on interest received by financial and insurance entities. No WHT is levied on interest from loans granted by the government, Central Bank, or certain institutions.
 - b. A 5% WHT rate is levied on royalties for any copyright of literary, artistic, theatrical, musical, or scientific work (excluding cinematograph films and films or tapes for radio or television broadcasting); an 8% WHT is levied on financial leasing related with the use or the right to use industrial, commercial, or scientific equipment.
87.
 - a. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 75% of whose shares are directly or indirectly held by non-residents and such income is not subject to taxation in such contracting state.
 - b. Levied if the recipient is a shareholder of the paying company with at least a 50% interest; otherwise, a 15% rate is levied.
88. A 5% WHT rate is levied for long-term loans (more than seven years).
89. The WHT rate is 10% if the interest arises from a loan granted by a bank or is related to a credit acquisition of merchandise or equipment.
90. Levied if the recipient is a shareholder of the paying company with at least a 10% interest; otherwise, a 15% rate is levied.
91.
 - a. No WHT is levied on royalties paid for the use or licensing of containers used in international trade.
 - b. No WHT is levied on dividends when they are paid to a company holding at least a 75% direct interest in the paying company.
92. No WHT is levied if the interest is paid on a long-term loan (more than three years) to finance investment projects if the interest is paid to a pension fund that meets certain requirements or if the interest is paid in relation to a credit acquisition of merchandise, equipment, or services.
93. A 5% WHT is levied on royalties for any copyright of literary, artistic, or scientific work.
94. No WHT will be applicable on any interest due to the application of the most favoured nation clause.
95. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the interest is paid by one contracting state or its political divisions, (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state to promote exports and development, (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income generated from the fund is tax exempt in the contracting state paying the dividend, or (v) the interest is paid in relation to the credit acquisition of industrial, commercial, or scientific equipment.
96. Levied if the recipient is a shareholder of the paying company with at least a 50% interest. A 5% WHT is levied if the recipient is a company with at least a 70% interest. A 10% WHT rate is levied if the recipient is a company with at least a 25% direct interest; otherwise, a 15% rate is levied.
97. No WHT is levied on interest arising from loans granted or guaranteed by qualifying public institution or interest paid to public financial institutions.
98. No WHT is levied if the recipient is a company (other than a partnership) with at least a 25% direct interest in the paying company; otherwise, a 5% rate is levied.
99. No WHT is levied if the recipient is a company with at least a 10% direct interest in the paying company; otherwise, a 10% rate is levied.
100. 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise, a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least an 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents in third countries, provided that a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.
101. Reduced rates/exemptions are not applicable when a Panama tax-resident company pays dividends, interest, or royalties to a Spanish tax resident and such income has been obtained either in Spain or in a country that has not signed a tax treaty for the avoidance of double taxation with Spain.
102. Levied if the recipient is a company (excluding partnerships) with at least a 10% direct interest in the paying company; otherwise, a 5% rate is levied. In the case of distributions made out of a real estate investment trust, 5% is levied if the beneficial owner holds, directly or indirectly, less than 10% of the value of the capital in such trust.
103. No WHT is levied on interest if: (i) the recipient is a contracting state of the treaty, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the payer is a financial

- institution of a contracting state and interest is paid to a financial institution of the other contracting state; (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend; (v) the interest is paid in respect of a loan, debt-claim, or credit that is owed to, made, provided, guaranteed, or insured by an export financing agency of a contracting state or political division, or guaranteed or insured by that state or political division; (vi) the recipient is an institution wholly or mainly owned by a contracting state as may be agreed from time to time between the competent authorities; or (vii) the recipient is the government of Singapore Investment Corporation Pte Ltd.
104. No WHT is levied on dividends if the beneficial owner is a company resident in the other contracting state whose capital is wholly or partly divided into shares and it has held at least 25% of the capital of the company paying the dividends for at least two years before the date of such payment and such dividends are not subject to profit tax in the other contracting state.
 105. 5% WHT rate is levied on royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films or films and tapes used for radio or television broadcasting.
 106. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 15% rate is levied.
 107. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions, or one of its local collectivities; (ii) the interest is paid to the government of the other contracting state or one of its local collectivities or to a body (including financial institutions) fully owned by such contracting state or its local collectivities; (iii) the interest is paid to another body (including financial institutions) in relation to loans granted under an agreement signed between both contracting states for a term of at least five years; or (iv) the interest is paid in relation to the acquisition of industrial, commercial, or scientific equipment.
 108. (i) 3% WHT is levied on royalties paid for the use of, or the right to use, news; (ii) 5% WHT is levied on royalties paid for the use of, or the right to use, copyright on literary, theatrical, musical, or artistic works; and (iii) 10% WHT is levied on royalties paid for the use of, or the right to use, patents, designs, models, plans, secret formulae, processes or computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experiences or technical assistance services.
 109. 15% WHT is levied if the dividends are paid out of income generated, either directly or indirectly, from immovable property through an investment vehicle that distributes most of its income annually and whose income is tax exempt. In addition, no WHT is levied if the recipient is a company that directly or indirectly holds at least a 10% interest in the paying company or if the recipient is a pension plan of the other contracting state.
 110. Levied if the recipient is a company with at least a 10% direct interest in the paying company; otherwise, a 5% rate is levied.
 111. No WHT is levied on dividends if the beneficial owner is a company (excluding unlimited liability companies) that directly holds at least 75% of the capital of the company paying the dividends.
 112. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state, its political divisions, or an export credit agency; (iv) the interest is paid in relation to the acquisition of any equipment, goods, or services; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
 113. No WHT is levied on interest if: (i) the interest is paid by a contracting state or one of its political divisions or (ii) the interest is paid to the government of the other contracting state or one of its political divisions or to a body (including financial institutions) fully owned by such contracting state or its political divisions.
 114. 7.5% WHT rate is levied if the recipient is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend.
 115. No WHT is levied on interest if the recipient is the beneficial owner and it is the government of the other contracting state, one of its political subdivisions, one of its local entities, the Central Bank, or a financial institution controlled by the other contracting state.
 116. 7.5% WHT is levied on royalties if the recipient is a company.
 117. If under any agreement or arrangement between Nigeria and a member state of the OECD Nigeria declared exempt from taxation the dividends, interest, or royalties from a Nigerian source, or limited the tax charged in Nigeria on such dividends, interest, and royalties at rates below those established in the DTT with Spain, such exemption or lower rate shall automatically apply to dividends, interest, or royalties from the Nigerian source beneficially owned by a Spanish resident.
 118. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; or (iii) the interest arises from a loan or credit granted by a contracting state or its political divisions.
 119. The provision in this article shall not apply if: (i) a company of a contracting state paying dividends, interest, or royalties to a company resident in the other state has generated its income from a jurisdiction that does not have a double taxation agreement with that other contracting state; and (ii) that income is exempt from or not subject to tax in the first contracting state.
 120. No WHT is levied if the beneficial owner is a company that directly holds at least 20% of the capital in the paying company; otherwise, a 10% rate is levied.
 121. 5% rate is applicable if the beneficial owner is a company that directly holds at least 10% of the capital in the paying company; otherwise, a 15% rate is levied.

Spain

122. Notwithstanding:

- a. Interest arising in a contracting state and paid to a resident of the other contracting state shall not be taxable in the first-mentioned contracting state if the beneficial owner of the interest is a resident of the other contracting state and is dealing at arm's length with the payer. This shall not apply where all or any portion of the interest is paid or payable on an obligation that is contingent or dependent on the use of or production from property or is computed by reference to revenue, profit, cash flow, commodity price, or any other similar criterion or by reference to dividends paid or payable to shareholders of any class of shares of the capital stock of a company.
- b. Interest arising in Spain and paid to a resident of Canada shall be taxable only in Canada if it is paid in respect of a loan made, guaranteed, or insured, or a credit extended, guaranteed, or insured by Export Development Canada.
- c. Interest arising in Canada and paid to a resident of Spain shall be taxable only in Spain if it is paid in respect of a loan, debt-claim, or credit that is owed to or made, provided, guaranteed, or insured by Spain or a political subdivision, local authority, or export financing agency thereof, provided the loan, debt claim, or credit is in respect of exports.

123. 5% WHT is levied on interest received by assurance institutions.

124. 5% WHT is levied on interest received by banks or paid to banks.

125. Interest paid on loans granted (three years) by public institutions are tax exempt.

126. Interest paid by Pension Funds is tax exempt.

127. 5% WHT is levied on interest received by an assurance institution (beneficial owner).

128. 5% WHT is levied on bond interest.

129. 10% WHT is levied on interest paid by a bank.

130. 10% is levied on interest paid in connection with the sale on credit of merchandise or equipment.

131. WHT is reduced to 5% if the recipient is a Spanish company with at least a 50% direct interest in the paying company or if the recipient holds 25% of its capital and another Spanish company holds at least the other 25%.

132. No WHT is levied if the interest is paid on a long-term loan (more than five years).

133. A 10% WHT rate if royalties are paid by a company registered with the Philippine Board of Investments.

134. Levied if the recipient is a company holding at least a 25% interest in the paying company; otherwise, a 10% rate is levied.

135. 5% WHT is levied on royalties paid for the use of, or the right to use, patents, designs, models, plans, secret formulae, processes, and industrial or scientific experiences (not commercial).

Tax administration

Taxable period

The tax year for CIT purposes is the company's accounting year. The tax year cannot exceed 12 months. Incorporation, change of accounting year, or dissolution of a company can give rise to a period of less than one year.

Tax returns

The tax system in Spain is a self-assessment system, and tax returns may be inspected by the tax authorities.

Annual CIT returns must be filed within 25 calendar days following the six months subsequent to the end of the tax year (i.e. if the tax year coincides with the calendar year, the return must be filed between 1 July and 25 July of the following calendar year).

Payment of tax

For CIT, three advance payments of the annual tax payment must be made during the first 20 calendar days of April, October, and December. The final CIT payment must be made with the annual CIT return.

For companies whose turnover, in accordance with Spanish VAT law, for the 12 months prior to the beginning of a tax period exceeds EUR 6,010,121.04, the advance payments are calculated by applying 17% to the taxable income (reduced by any applicable tax-loss carryforwards) for each advance-payment period, i.e. at 31 March, 30 September, and 30 November (percentage applicable to companies that are taxed at the general CIT rate).

Small and medium-sized companies can opt to calculate their advance payments in the same way as large companies (applying a percentage of 17%) or to apply a rate (currently 18%) on the tax liability of their last advance CIT return filed on 1 April, 1 October, or 1 December.

Variable capital investment companies, financial investment funds, real estate investment companies, real estate investment funds, mortgage market regulation funds, and pension funds that meet certain requirements and are taxed at a 1%, or even a 0%, tax rate should not make advance payments and are not required to file the corresponding tax return.

EUR 2,500 limit on cash payments

Payments in cash over EUR 2,500 are not allowed for transactions in which at least one of the parties is a person carrying on a business or professional activity, and fines of up to 25% of the amount of the transaction can be imposed on both the payer and the recipient of these cash payments.

Tax inspections

The Spanish tax authorities have a tax inspection department that is responsible, amongst other things, for verifying that taxpayers' obligations are correctly complied with and, if necessary, for making adjustments to their tax affairs by issuing one or more tax assessments.

As part of its responsibilities, the tax inspection department may investigate a taxpayer's tax affairs to ensure that they are correct and verify the accuracy of filed tax returns.

Taxpayers' tax returns to be examined by the tax inspection department are chosen on the basis of different criteria, such as: (i) by random sample, (ii) if debt push down restructuring transactions have been carried out that involve Spanish companies with material debt levels, (iii) if companies have recurring tax-loss carryforwards, or (iv) if companies are related to a family group and lack a production or commercial structure and where their personal and business assets are not clear.

If taxpayers disagree with a tax assessment issued by the tax inspection department as a result of a tax inspection, they may file an appeal firstly with the Spanish economic-administrative tribunal for tax appeals and then, if the appeal is not upheld by the tribunal, with the ordinary courts.

If taxpayers have paid incorrect amounts of tax to the tax authorities, they may claim a refund of any excess tax paid from the authorities within the statute of limitation period (four years) by means of a special procedure that commences with the filing of a request with the tax authorities.

Statute of limitations

The statute of limitations for taxes in Spain is generally (with some exceptions) four years starting from the day following the date of termination of the voluntary tax filing period.

This four-year period may re-start for a tax if the tax authorities carry out any actions or procedures, with the formal acknowledgement of the taxpayer, to acknowledge, adjust, review, inspect, guarantee, or collect all, or any part of, a tax obligation, or due to actions by the taxpayer, such as the filing of a new or late tax return, that alters

Spain

or rectifies a previous tax return or the filing of an appeal or claim by the taxpayers regarding the tax.

The tax authorities' entitlement to verify or investigate tax-loss carryforwards, tax relief availed of for carrying on certain activities, and deductions for the avoidance of double taxation is time barred after ten years.

At the end of the ten-year period, evidence of the origin and amount of tax losses must be given by presenting the relevant tax assessment or self-assessment and accounting records and, in addition, giving evidence that such assessments and records were filed and deposited with the Companies Registry during this period.

This amendment will apply to verification and investigation proceedings ending after 1 January 2015, provided that no tax assessment has been formally proposed for such proceedings before that date.

Topics of focus for the tax authorities

Every year, the Spanish tax authorities issue general guidelines on the authorities' annual tax and customs control plan. These guidelines identify areas where the tax authorities intend to adopt a greater role of verification, inspection, and monitoring during a certain tax year.

Obligation to disclose assets located overseas

Assets, such as accounts, shares, or real estate, that are located overseas must be disclosed. Severe fines are imposed (a minimum of EUR 10,000) for breaching this obligation.

In addition, assets regarding which the information disclosure obligation is not complied with by the established time limits are treated as unreported income for CIT payers and allocated to the earliest tax period of those that are not statute barred. Breaches of the obligation to declare this income are a very serious infringement, and fines of 150% of the gross tax liability are imposed.

Other issues

Automatic and standardised exchange of tax information agreements

The US Foreign Account Tax Compliance Act (FATCA) was enacted in 2010 to detect and prevent offshore tax evasion. Although, due to its name, it may seem that FATCA is for financial institutions, many global companies outside the financial services industry may be affected by FATCA if companies of their worldwide network fall under the purview of FATCA or have operational areas that make or receive payments subject to FATCA.

Multinational companies that are withholding agents are already required to report, withhold on payments, and record payees, but FATCA requires that changes be made to these activities. FATCA has established that multinational businesses should assess company payees differently, engage in withholding on certain gross proceeds transactions (a change from historic processes), and report other information to the US Internal Revenue Service (IRS).

The withholding provisions of FATCA came into effect on 1 July 2014. Compliance with FATCA may require changes to existing systems and processes across business units and

regions, the renewal of policies and day-to-day practices, as well as other new tasks, such as registering with the IRS.

Spain and the United States have signed an intergovernmental agreement (IGA) aimed at improving compliance of international tax laws and enforcing FATCA. Under this agreement, published in the Spanish Official State Gazette on 1 July 2014, financial institutions in Spain and the United States are required to provide their tax authorities with information on taxpayers from the other signatory country. This information will then be automatically exchanged between those tax authorities through a standardised procedure.

Special tax regime applicable in the Basque Country

The three provinces that make up the region of the Basque Country (Álava, Guipúzcoa, and Vizcaya) have an 'economic agreement' with Spain's central government (laid down in and regulated by Law 12 of 23 May 2002) in accordance with which these provinces are entitled to establish their own tax regimes.

There are certain provisions in Law 12 of 23 May 2002 regarding CIT that make this region of Spain more attractive for companies, and three CIT Acts have come into effect for each of the three provinces for tax periods beginning on or after 1 January 2014.

General tax rate

The general tax rate is 28%.

Lower tax rates and other tax benefits

Small companies

A reduced rate of 24% is levied on small companies. A small company is considered to be a company that meets the following requirements in the year prior to the application of the special tax regime:

- It carries on a business activity.
- Its net turnover or assets is under EUR 10 million.
- Its average number of staff is under 50.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

Other benefits are as follows:

- Free depreciation for new tangible fixed assets (except buildings).
- General bad debt provision of up to 1% of credit sales and services.

Micro companies

A reduced rate of 24% is levied on micro companies. A micro company is considered to be a company that meets the following requirements in the year prior to the application of the special tax regime:

- It carries on a business activity.
- Its net turnover or assets is under EUR 2 million.
- Its average number of staff is under 10.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

Spain

Other benefits are as follows:

- General bad debt provision of up to 1% of receivables.
- Total depreciation/amortisation charges of up to 25% of net tax value or free depreciation for new tangible fixed assets (except buildings).
- General tax relief of 20% of prior positive taxable income given as a 'tax compensation' for the difficulties faced by companies of this size.

Holding companies

For holding companies, including, amongst others, real estate companies, the tax rates are as follows:

Taxable income (EUR)	Tax rate (%)
0.00 to 2,500.00	20
2,500.01 to 10,000.00	21
10,000.01 to 15,000.00	22
15,000.01 to 30,000.00	23
30,000.01 and over	25

The requirements to be taxed under these rates are as follows:

- The company's shareholders representing at least 75% of its capital are persons, holding companies, or other companies associated with such persons or companies. This requirement should be met throughout the tax period.
- For at least 90 days of the tax period, over half of the company's assets are made up of securities or are not used to carry on business activities. Leased real estate is not considered to be used to carry on a business activity when the company does not have at least five employees on average in a year who work exclusively for the company on a full-time basis.
- Companies where at least 80% of their income is generated from assignments of use of real estate that is not considered to be a real estate leasing business activity (*see previous paragraph*) or is generated from transfers of own capital to third parties or from provisions of services to associated parties and that do not have sufficient personal and material resources may also be taxed under this tax regime.

This tax regime establishes the following rules, which are applicable to these types of companies:

- All expenses, excluding those stated below, cannot be considered tax deductible.
- An amount equal to 20% of gross income generated from leases of housing and their financial expenses may be considered tax deductible.
- An amount equal to 30% of gross income generated from leases of other real estate and their financial expenses may be considered tax deductible.
- Net income for each leased property cannot be negative.

Tax-loss carryforwards

Tax losses may be carried forward for the following 15 years. Tax-loss carryforwards pending offset in the first tax period beginning as of 1 January 2014 may be carried forward for the following 15 years as of such tax period.

Tax deductibility of amortisation of goodwill and intangible assets

According to a recent amendment of the Audit Law, intangible assets should be considered to have a definite useful life.

Amortisation recorded for intangible assets is considered tax deductible over the assets' useful lives. However, if the useful life cannot be determined, amortisation would be tax deductible up to a maximum annual limit of 10% if the following requirements are met:

- The assets have been acquired for consideration.
- The acquiring and transferring companies are not associated companies.

Furthermore, due to the above-mentioned amendment of the Audit Law, goodwill is amortisable assuming a useful life of ten years. However, this accounting amortisation would not be tax deductible, and the corresponding book-to-tax adjustment should be made.

From a tax perspective, goodwill amortisation is tax deductible up to a maximum annual limit of 12.5% if the following requirements are met:

- The goodwill has been acquired for consideration.
- The acquiring and transferring companies are not associated companies.

It is not required to recognise an unavailable reserve for this purpose.

However, if an impairment loss is recognised or if the goodwill is transferred, the tax amortisation should be reversed.

Financial goodwill

Financial goodwill is tax deductible up to a maximum annual limit of 12.5% when at least a 5% interest is acquired in a company and the shares are not quoted on a stock exchange or at least a 3% interest if the shares are quoted on a stock exchange.

If the company from which the shares have been acquired has an interest in another company, the equity, assets, and rights recorded in the group's consolidated annual accounts must be taken into consideration when calculating the financial goodwill. The part of the financial goodwill for income obtained by previous owners that have availed of a double tax exemption for income obtained from transfers of shares will not be tax deductible. Amounts deducted for this concept will increase taxable income if there are impairment losses (*see Impairment losses below*).

The requirements for the shares are as follows:

- A 5% interest (or 3% in the case of quoted companies) should be held for one year.
- The subsidiary should be subject to and not exempt from CIT or a similar tax.
- At least 85% of the subsidiary's income should be generated from business activities.

If the shares are not acquired on a stock market, the company that acquires the shares must not be in any of the situations provided for in Article 42 of the Spanish Commercial Code in relation to the transferring company.

Depreciation/amortisation periods

Depreciation/amortisation periods for assets are shorter than those established by state CIT law.

Reinvestment of extraordinary income

Income obtained from the sale of tangible fixed assets or intangible assets can be deducted from taxable income if the following requirements are met:

- The amount obtained from the sale is reinvested in similar types of assets or in the acquisition of shares that comply with certain requirements within a four-year period (as of one year prior to the sale up to three years after the sale).
- The asset in which the reinvestment is made is held for five years (three in the case of movable assets) or, if less, the asset's useful life.

Income generated from intellectual or industrial property

From 1 July 2016, companies may deduct 70% of income (revenue less amortisation and expenses) obtained from transfers of intellectual or industrial property rights from taxable income upon complying with certain requirements only if the company has created the intellectual or industrial property itself.

If the intellectual or industrial property has been partially acquired or developed by related companies, this 70% reduction can only be applied if the ratio of expenses incurred with related parties does not exceed 30% of the expenses incurred in the development carried out by third parties or by the company on its own. However, if this ratio exceeds 30%, the reduction will be reduced proportionally.

The following features regarding this reduction have also been introduced:

- The income to be reduced will be determined as the difference between the revenues obtained and the amortisation and expenses directly related to the intellectual or industrial property that is transferred.
- This reduction is no longer applicable to the income obtained as a consequence of the transfer of trademarks.
- Certain limitations are applicable if a company applies this reduction and obtains negative income in previous or future years.
- A transitional regime is envisaged for the transfers of intellectual or industrial property rights carried out before 1 July 2016. This transitional regime is applicable until 30 June 2021 and its application is optional.

In addition, in Bizkaia and Alava, companies may reduce taxable income by 5% of the acquisition price or production cost of intellectual or industry property assets used to carry on their own business activities if they fully own such assets. This reduction cannot exceed 0.5% of income obtained from the business activity in which these assets are used.

The additional reduction envisaged in the last paragraph is not applicable in Gipuzkoa.

Limit for tax relief for financial expenses (thin capitalisation rules)

A general thin capitalisation tax system is established to restrict the tax deductibility of financial expenses, which establishes a 3:1 debt-to-equity ratio for tax purposes.

This limit applies to borrowings with any associated companies, whether they are resident in Spain, the European Union, or any other countries. The limit does not apply

when a company's net borrowing with associated companies does not exceed EUR 10 million at any time during the tax period.

Companies may ask the tax authorities to propose a different ratio that they can apply.

Limit for tax relief for expenses incurred for representation, gifts, and certain transportation

Expenses incurred for representation, gifts, and certain transportation are tax deductible, with certain limits.

In addition to these limits, the allocation rule is maintained for 50% of vehicles used for both business activities and private purposes. In addition, for passenger and other similar cars, the maximum amount of what is understood to be a reasonable acquisition price (EUR 25,000) is maintained, and only expenses for vehicles that do not exceed this acquisition price will be tax deductible.

Impairment losses

Losses for impairment of shares in companies are tax deductible in accordance with the following regulations:

- If an interest of less than 5% is held in unquoted companies or, otherwise, in quoted companies that are group companies, jointly-controlled companies, or associates, then the difference between shareholder's equity at the beginning and the end of the year in proportion to the interest held is tax deductible, taking into account any capital contributions or reimbursements made.
- If an interest of 5% or more is held in unquoted companies or 3% in quoted companies, then the difference between the acquisition price and shareholder's equity is deductible in proportion to the interest held, adjusted for tacit capital gains at the valuation date.

Shareholder's equity shall be the shareholder's equity recorded in the consolidated annual accounts (*see Financial goodwill above*).

Elimination of double taxation for dividends and income obtained from transfers of shares in resident and non-resident companies in Spain (exemption mechanism)

Dividends or shares in profits

To apply the tax exemption for interests in companies resident in Spain, the following requirements established for interests in non-resident companies should be met:

- A 5% interest (or 3% in the case of quoted companies) should be held for one year.
- The subsidiary should be subject to and not exempt from CIT or a similar tax.
- At least 85% of the subsidiary's income should be generated from business activities.

Notwithstanding, for dividends generated from resident subsidiaries that do not comply with these requirements, 50% of the amount of the dividends may be deducted from taxable income. This rule therefore applies to:

- Interests below 5% (or 3% in the case of quoted companies) in companies resident in Spain.
- Interests in companies resident in Spain that do not comply with the requirement that 85% of their income is generated from business activities.

For companies taxed at a tax rate lower than 10%, except for residents in a country that has an international DTT, the tax exemption for double taxation does not apply.

Income obtained from transfers of shares

Capital gains obtained from disposals of interests in resident and non-resident companies are not included in taxable income. The requirements to be met to not include them are the same as the requirements for the application of dividend exemption, which should be met for all financial years when the interest is held, except for the requirement regarding the percentage of the interest (5%, or 3% in the case of quoted companies), which should be met on the day when the transfer is made.

If any of the requirements are not met, the part of the income corresponding to a net increase of undistributed profits will not be included in taxable income in proportion to the profits generated in financial years when the requirements are met, and the part that does not correspond to such net increase will be presumed to be generated linearly during the time when the interest is held. In the case of resident subsidiaries that do not comply with the requirements of being subject to CIT or a similar tax and of carrying on business activities, an amount equal to the net increase of undistributed profits that may be allocated to the interest in the subsidiary generated during the time when the interest is held (excluding the part that would not have been included in taxable income with the offsetting of tax-loss carryforwards) will not be included in taxable income (up to the limit of calculated income).

Participating loans to carry out new business activities or projects

Income generated from variable interest on participating loans is not included in taxable income if it is related to the borrower's profits. The exemption does not apply to remuneration generated from fixed interest.

The following requirements should be met in this case:

- The lender should have a 25% direct or indirect interest in the borrower (15% for quoted subsidiaries, and this participation should be held for one year).
- The loan should be used to finance new business activities or projects.
- The exempt income not included in taxable income should be used to grant new participating loans, with the same requirements, or be set aside to the special reserve to foster business capitalisation or the special reserve to boost entrepreneurship and production activities (*see below*).
- The variable interest may not exceed the following limits:
 - 20% of profits (before interest on the participating loan) of the borrower for the percentage of the lender's interest.
 - 1.5 times the late payment interest on the average balance of the loan during the tax period.

The withholdings made on interest not included in taxable income are not deductible (general 19% tax rate).

Measures to foster companies' capitalisation

Some measures were introduced to improve the tax treatment of structures based on an increase in shareholder's equity and a reduction of the need to resort to borrowing. These measures are:

Reserve to foster business capitalisation

Companies may reduce their taxable income by an amount equal to 10% of the amount by which shareholder's equity is increased for tax purposes compared to the shareholder's equity of the previous year, and this amount should be set aside to a non-distributable reserve for at least five years. During this five-year period, the company's shareholder's equity should remain the same or be increased unless it is decreased due to accounting losses.

The application of this deduction may not give rise to a negative taxable income or an increase in negative taxable income although amounts not deducted due to insufficient taxable income may be deducted in the following tax periods.

Special reserve for levelling-off of profits

Companies may reduce taxable income by the amount of accounting results set aside to the special reserve for 'levelling-off of profits' up to a maximum amount of 10% of the part of these results that may be freely distributed under company law and up to the limit of 15% of taxable income for the financial year. In addition, the balance of the special reserve may not exceed 20% of shareholder's equity for tax purposes at all times.

This reserve will be allocated to offset tax-loss carryforwards, in which case such tax-loss carryforwards cannot be offset in future years. Consequently, this is a way to offset tax-loss carryforwards earlier. If, within a period of five years, the company does not generate tax-loss carryforwards, the reserve will be treated as taxable income. In this case, the effect will be a temporary deferral of tax.

Special reserve to boost entrepreneurship and production activities

Companies may reduce taxable income by 60% of the accounting profit of the year, which should be set aside to the special reserve to boost entrepreneurship and production activities, up to a maximum amount of 45% of their taxable income. In addition, the balance of this reserve may not exceed 50% of shareholder's equity for tax purposes at all times.

This reserve is not freely distributable and should be used within a period of three years for, amongst others, new non-current assets, assets that give rise to a tax credit for environmental investments, or for investments in companies under development.

Investments in new tangible fixed assets

A 10% tax credit can be applied for investments in new tangible fixed assets upon complying with certain requirements. The minimum depreciation period for the assets, excluding computer equipment, is five years. The tax credit is 5% for investments in non-current assets that are considered to be improvements or investments in leased assets carried out by lessees.

The investment should exceed 10% of the carrying amount (less depreciation/amortisation) of the company's tangible fixed assets, buildings, and software recorded for the previous year.

Research and development (R&D)

A 30% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average expenses incurred by the company during the previous two years, the tax credit is 50% on the excess amount.

Spain

An additional tax credit of 20% can be availed of for the following expenses:

- Staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.
- Expenses incurred for projects contracted from certain universities and public organisations.

A 10% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets that are exclusively assigned to R&D activities.

Technological innovation

A 20% or 15% tax credit can be availed of for certain expenses incurred for technological innovation.

Expenses incurred for environmental conservation and improvement and for conservation of energy

Companies are eligible for a 30% tax credit for investments made in the equipment listed in the Basque List of Environmental Technologies upon complying with certain requirements.

Companies may also qualify for a 15% tax credit for investments made and expenses incurred in respect of tangible fixed assets upon complying with certain requirements.

Job creation

The following tax credits can be availed of for job creation upon complying with the requirements stated:

- EUR 4,900 for each job created, provided that a permanent employment contract is signed with the employee.
- EUR 9,800 for each job created, provided that a permanent employment contract is signed with the employee and a person who has special difficulties in finding employment is contracted.

The company's average number of staff with permanent employment contracts must be increased by at least the same number of contracts that generated the tax credit, and this increase must be maintained by the company for two years.

Time limits for the application of tax credits

Tax credits can be carried forward for a period of 15 years as of the date on which the company qualifies for them. For tax credits generated before 1 January 2014, the 15-year period starts as of this date.

Limits on the amount of tax credit applied

For a tax year, the combined sum of all investment tax credits, excluding tax credits for R&D and technological innovation, may not exceed 45% of a company's CIT liability.

Effective tax rate and minimum tax

The CIT reform establishes a minimum tax to determine a company's effective CIT liability. Tax credits applied in the tax period cannot reduce effective CIT liability below this minimum although this limit does not apply for R&D and technological innovation tax credits.

The application of tax credits to determine the effective tax liability of a company that obtains positive taxable income (except for R&D and technological innovation tax credits) cannot give rise to an effective CIT liability that is lower than the following rates:

	General tax rate (%)	Minimum tax rate (%)	Minimum reduced tax rate (%)
General companies	28	13	11
Small and micro companies	24	11	9

The minimum reduced tax rate applies to companies that maintain or increase their average number of staff of the previous year indefinitely.

Advance CIT payments

There is no obligation to make advance CIT payments.

Tax groups

The economic agreement establishes that the same rules should apply to the Common Territory and Basque companies regarding the composition of tax groups, the definition of controlling and subsidiaries, and the tax treatment of internal operations carried out in tax groups.

Therefore, the recent tax reform for the Spanish Common Territory would apply to Basque tax groups. On this matter:

- A non-resident company or company resident in the Spanish Common Territory may be the controlling company of a Basque tax group (horizontal consolidation).
- The incorporation in a Basque tax group of companies indirectly owned by companies that do not form part of the group (non-resident or resident in the Spanish Common Territory) is permitted.

As established in the Spanish Common Territory regulations, when the controlling company is a non-resident company, one of the companies that makes up the group is appointed as their representative and is responsible for complying with the group's statutory requirements and formalities. Under Basque regulations, the representative company of a Basque tax group should be:

- The controlling company if this company is resident in the Spanish territory, or
- The Basque company of the tax group with the highest turnover in the previous tax year (if no other company resident in the Spanish territory complies with the requirements established in the tax regulations to be considered the controlling company).

However, the non-resident controlling company may appoint any other company of the Basque tax group of companies as the group's representative as long as the appointed company is subject to the tax regulations applicable to the company of the tax group with the highest turnover in the previous tax year.

Obligation to disclose assets located overseas

The obligation to disclose assets located overseas, such as accounts, shares, real estate, or vehicles, is also established in the three Basque territories. Taxpayers in these territories should file a tax return (Form 720) annually between 1 January and 31

Spain

March to disclose these assets. Severe fines are imposed (a minimum of EUR 10,000) if CIT payers fail to comply with this obligation.

In addition, assets regarding which the information disclosure obligation is not complied with by the established time limit will be treated as unreported income for CIT payers and allocated to the earliest tax period of those that are not statute barred. Failure to comply with the obligation to declare this income is a very serious infringement and fines of 150% of the gross tax liability are imposed.

Significant developments

Note that the following proposals have been made but are yet to be enacted into law by Parliament.

Effective 1 April 2017, the corporate income tax (CIT) rates will be revised to a three tier structure consisting of a lower rate of 14%, standard rate of 28%, and a higher rate of 40%.

The lower rate of 14% will be applicable on the profits and income of small and medium enterprises (SMEs) where the turnover does not exceed 500 million Sri Lankan rupees (LKR), export of goods or services, agriculture, and education.

The higher rate of 40% will be applicable on the profits and income of betting and gaming, liquor, and tobacco.

The standard rate of 28% will be applicable on the profits and income of all the other sectors.

The rates of capital allowances will be revised as follows:

- 20% for plant, machinery, or equipment for a period of five years.
- 5% for qualified building for a period of 20 years.

Withholding tax (WHT) on specified fees will be reintroduced. Where such fees exceed LKR 50,000 per month, WHT will be deductible at 5%.

WHT on dividends distributed by resident companies will be increased from 10% to 14%, effective from 1 April 2017.

Taxes on corporate income

Resident companies and public corporations are liable for CIT on their worldwide taxable income. Non-resident companies are liable for CIT of their Sri Lanka-source taxable income.

CIT rates are based on the nature of the income and the institution earning the income, as follows:

Sri Lanka

Income/Institution	CIT rate (%)	
	2016/17	2017/18 (proposed)
Undertaking for manufacture of any product for export or for supply to an exporter for export, being a product having domestic value addition over 65% and a Sri Lanka brand name with patent rights received in Sri Lanka	10	14
Undertaking for operation and maintenance of facilities for storage, local development of software, or supply of labour	10	28
Agricultural undertakings referred to in Section 16 of the Act	10	14
Educational services	10	14
Undertaking (not being a holding company, subsidiary company, or any associate company of a group of companies) with an annual turnover not exceeding LKR 750 million, other than buying and selling activities	12	-
Undertaking (not being a holding company, subsidiary company, or any associate company of a group of companies) with an annual turnover not exceeding LKR 500 million, other than buying and selling activities	-	14
Unit trusts and mutual funds *	10	14
Unit trust management companies	10	14
Profits on poultry farming	10	-
Shipping agents approved by the Director of Merchant Shipping in respect of profits attributable to agency fees connected to transshipment activity and received in foreign currency	12	28
Companies engaged in non-traditional export (other than exempt), including deemed exporters and suppliers of specified services to garment exporters; performance of any service of ship repair, ship breaking, and refurbishment of marine cargo containers; and provision of computer software, programmes, systems, or recording of computer data paid for in foreign currency	12	14
Undertakings engaged in agriculture, manufacture of animal feed, promotion of tourism, or construction work carried on by a resident person	12	28
Venture capital companies	12	28
Petroleum exploration	12	28
Local manufacture of handloom products	12	28
Healthcare services	12	28
Joint venture between a grower cum manufacturer or a manufacturer of tea with a tea exporter for exporting Sri Lanka tea in value added form, on the manufacturing income attributable to the quantum of tea purchased	12	28
Profits from operating any mini hydropower project or other alternative energy source	12	28
Profits on supply of goods manufactured in Sri Lanka or provision of services to foreign ships for payment in foreign currency	12	28
Profits on sale of any product manufactured in Sri Lanka for payment in foreign currency through a foreign exchange earning account	12	28
Profits on export of organic tea in bulk	12	28
Undertaking for the manufacture of sugar	12	28
Sale of goods manufactured in Sri Lanka by an export-oriented Board of Investment (BOI) enterprise, up to the quantity approved by the BOI, to:	12	28
<ul style="list-style-type: none"> any BOI enterprise enjoying tax holiday under Section 16C, 16D, or 17A of the Inland Revenue Act or the Strategic Development Projects Act that is permitted to import project-related goods or raw materials on a duty-free basis during the project implementation period, or any person eligible to import specific goods on a duty-free basis under any government authority. 		
(Treated as deemed export of the manufacturer.)		

Income/Institution	CIT rate (%)	
	2016/17	2017/18
Profits and income of any company listing its shares on or after 1 April 2013 and issuing more than 20% of its shares to the general public for the tax year in which such shares are listed and for two years of assessment immediately succeeding that year of assessment	50% of the applicable rate	28
Research and development (R&D) activities	20	28
Branch of commercial bank dedicated to development banking	24	28
Banking and financial services, insurance industries, trading activities (including any primary preparation for the adapting for sale of any article)	28	28
Manufacture and sale, or import and sale, of liquor or tobacco products	40	40
Business of lottery, betting, or gaming activity	40	40
Profit and income from business, other than stated above	28	28
Other sources (e.g. dividends, interest income, royalties)	28	28

* Unit trusts and mutual funds are treated like resident companies for CIT purposes. Units of investment are treated like company shares, and returns to investors are treated like company dividends.

Dividend tax

A dividend tax, which is currently at 10%, will be payable at 14% as per budget proposals on the gross dividends distributed by a resident company, other than such dividends distributed out of any dividend received from another resident company (and few other exceptions).

Deemed dividend tax

A deemed dividend tax of 15% is payable by any resident company in any tax year if the said company has, in the preceding tax year, distributed dividends of less than 10% of the distributable profits (duly defined) for that preceding tax year.

The tax base for the 15% deemed dividend tax is the book profits of the company reduced by the aggregate of the CIT payable by that company for that tax year, the cost incurred by the company in that tax year in the acquisition of any land or any capital asset, and any notional profit computed on the basis of a revaluation of any capital asset included in such book profit and increased by the aggregate of the allowance for depreciation deducted in respect of any capital asset acquired in that tax year and any notional loss computed on the basis of a revaluation of any capital asset included in such book profit.

Special tax on public corporations

In the case of a public corporation, where not less than 75% of the capital is provided by the government (other than via a loan), a tax of 25% of the balance profits, after deducting CIT payable, will be charged. However, where the total gross dividends distributed are not less than 25% of such balance, no special tax will be charged in the relevant years. Where the total gross dividends distributed are less than 25% of such balance, the tax chargeable will be the difference between such balance and the dividends distributed.

Remittance tax

Where profits of a non-resident company are remitted in a tax year, a remittance tax of 10% of the remittances is payable.

Sri Lanka

Local income taxes

There is no local or provincial income tax in Sri Lanka.

Corporate residence

A company is treated as resident for tax purposes in Sri Lanka if its registered or principal office is in Sri Lanka or if the control and management of its business is exercised in Sri Lanka.

Permanent establishment (PE)

PE is only a treaty concept in Sri Lanka. If a non-resident company creates a PE in Sri Lanka in terms of a double tax treaty (DTT), then such company is liable to Sri Lanka CIT. In the absence of a DTT, the domestic tax laws will apply.

Other taxes

Value-added tax (VAT)

VAT is payable on imported goods and on the supply of goods (including wholesale and retail trade where the turnover liable supplies per quarter is not less than LKR 3 million) and services in Sri Lanka. Provisions are made for filing returns monthly or quarterly, based on specified criteria. Even where returns can be filed quarterly, the tax payments are required to be made on a monthly basis by manufacturers and on a half-monthly basis by others. Certain specified imports and domestically supplied goods and/or services are exempt.

VAT is payable on the prescribed valuations of imports and domestic supplies at a standard rate of 15%. Exports and certain specified international services are zero-rated.

Registration for VAT arises only if the quarterly value of taxable supplies exceeds LKR 3 million or the annual value of taxable supplies exceeds LKR 12 million.

The input tax paid on the imports and supplies of goods (including capital goods) and services in a month, and used in the business of making taxable supplies in that month, can be deducted from the tax payable (output tax) on such supplies, subject to a limitation of the lesser of 100% of output tax or the actual input tax paid.

Refunds of excess VAT paid are available to zero-rated supplies and to new businesses registered under Section 22 (7) of the VAT Act. A simplified VAT scheme is in place to relieve zero-rated suppliers and other qualified suppliers from the burden of paying input VAT, thereby obviating the need for the issue of refunds. It is proposed that this scheme will be withdrawn once the legislation is enacted by Parliament.

Customs duties

Customs duty is levied on the value for customs duty (i.e. transaction value). World Trade Organization (WTO) rules on customs valuations are implemented. Sri Lanka has a simplified three-tier tariff structure. The rates are published in the government gazettes. The current rates are 15%, 30%, and 0% (applies to few goods).

Special Commodity Levy

Special Commodity Levy is imposed on certain commodity items at the rate specified by the Minister by order published in the gazette at the point of importation of such commodities. The collection of Special Commodity Levy is undertaken by the Director General of Customs.

Special Commodity Levy is a composite levy, and no other tax, duty, levy, cess, or other charge is imposed in terms of any other laws specified as applicable in respect of the commodities specified in any such order.

Excise duties

Excise duties and special excise levies are charged on tobacco, cigarettes, liquor, motor vehicles, selected petroleum products, paints, air conditioners, dishwashers, household washing machines, and other products at various rates and at unit rates.

Stamp duty

Stamp duty is payable on specified instruments and documents at rates prescribed in the Gazette.

Payroll taxes**Employees Provident Fund (EPF)**

Employers and employees are required to contribute specified percentages (employer 12%, employee 8%) of each employee's monthly emoluments/salary to the EPF established by the government. Alternatively, employers and employees can contribute to certain private provident funds approved by the labour authority.

Employees Trust Fund

Employers are also required to contribute a specified percentage (currently 3%) of each employee's monthly emoluments/salary to the Employees Trust Fund established by the government.

Share transaction levy

Share transaction levy at the rate of 0.3% is chargeable from both the buyer and the seller on the sale value of listed shares transacted through the Colombo Stock Exchange (CSE).

Economic Service Charge (ESC)

ESC is payable quarterly by all businesses at 0.5% of the aggregate turnover of the trade, business, profession, or vocation if the total turnover exceeds LKR 12.5 million for that quarter. ESC so paid is deductible from the CIT payable for that tax year. ESC is not refundable but can be carried forward for two immediately succeeding tax years to be set off against CIT payable.

Nation Building Tax (NBT)

NBT is chargeable at 2% from every person (a person includes a company) who imports any article on the 'liable turnover' from such importation, who carries on the business of manufacture of any article, who provides a service of any description, or on the wholesale or retail sale of any article (other than such sale by the manufacturer of that article) on the liable turnover of the relevant quarter. Certain specified articles or services are exempt from NBT.

The threshold for NBT is LKR 3 million per quarter, or LKR 12 million *per annum*.

Sri Lanka

Liable turnover means:

- In the case of importers, the value of any article ascertained under Section 6 of the VAT Act for the purpose of importation.
- In the case of manufacturers, the proceeds receivable, whether received or not, from the manufacture and sale of goods in Sri Lanka.
- In the case of service providers, the proceeds receivable, whether received or not.
- In the case of wholesale or retail traders, the proceeds receivable, whether received or not, other than pharmaceuticals, gems and jewellery sold for payment in foreign currency, and any article subject to the Special Commodity Levy sold by an importer.

In case of wholesale and retail traders, 50% of the liable turnover will be taxed at a zero rate and the remaining 50% will be taxed at 2%. In the case of a distributor as defined in the ESC Act, 75% of the liable turnover will be taxed at a zero rate and the remaining 25% will be taxed at 2%.

Bad debts, VAT, excise duty (other than such excise duty paid on importation) rebate under export development, or services in relation to an international event should not be included in the liable turnover.

Tourism development levy

Tourism development levy is payable by tourist hotels and institutions licensed under the Tourist Development Act on the turnover of such institutions at the rate of 1%.

Local taxes

Taxes (more usually called rates) are currently assessed and collected annually from the owners of land and premises by the local authorities of the areas in which the properties are located. These authorities also charge and collect annual licence fees from certain businesses.

Branch income

Foreign companies are permitted to register a place of business as an 'overseas company' in Sri Lanka under local company law, where the business carried on conforms to the stipulations made under the Exchange Control Law.

An overseas company registered under the Companies Act may also carry on in Sri Lanka any non-commercial, non-trading, or non-industrial activities, such as the activities undertaken or carried on by a liaison office, representative office, regional office, or other similar office, provided such activities do not directly or indirectly provide any income to the company.

In addition to paying the standard CIT, a trading branch is also subject to the 10% remittance tax on remittance of its after tax profits to its foreign head office.

The Sri Lanka-source income of foreign companies from a local 'place of business' is taxed at the CIT rate. However, under most DTTs that Sri Lanka has entered into, the income of a project carried out will not be liable for CIT if its duration is less than the period specified in the treaty concerned.

Where branch or project income is liable for CIT but the income is not readily ascertainable, the tax authority may prescribe that the income be computed on a fair percentage (not less than 6%) of the branch or project turnover in Sri Lanka.

Income determination

Business accounting for CIT purposes should, unless otherwise specified by the tax statute, conform to Sri Lanka Accounting Standards.

Inventory valuation

Inventories should be measured at the lower of cost and net realisable value.

Capital gains

Capital gains are not taxed currently; however, as per the 2017 budget proposals, which have not yet been enacted into law by Parliament, capital gains from transfer of immovable properties will be chargeable to CIT at a flat rate of 10%.

Dividend income

Resident company dividends paid on shares held by resident or non-resident persons are not assessable to the recipients if income tax is withheld on such dividends (*see the Withholding taxes section*), the dividends are exempt from income tax, or the dividends are paid out of dividends received from resident companies.

Stock dividends

Stock dividends (bonus shares) are not taxable in the hands of a shareholder at the time of issue; however, where such shares are capitalised out of company profits and there is a return of this capital to the shareholder within six years from the date of issue, the amount of capital returned to the extent of the paid-up value of the bonus shares is treated, by definition, as a dividend and is taxable in the hands of the shareholder. However, if the shareholder is a company, this dividend may not be assessable, as explained above.

Interest income

Interest income forms part of the total statutory income, provided it is not exempt under the tax statute.

The interest income exempt from taxes includes interest accruing on money lying in a foreign currency account in any commercial bank; interest accruing to any person or partnership outside Sri Lanka in respect of any loan granted in a foreign currency by that person or partnership to the government of Sri Lanka, any public corporation, any government institution, any commercial bank, or any other undertaking if the loan is granted on or after 1 April 2012; or interest accruing to any person on moneys invested in government bonds denominated in a foreign currency.

Royalty income

Royalty income is a separate source of income that forms part of the total statutory income, which is liable to income tax at the standard rate of 28%.

Foreign income

Foreign income of a resident person forms part of the total statutory income, provided it is not exempt under the tax statute.

Deductions

In ascertaining the total income liable to CIT from the financial accounts filed by a company, deductions from revenue are permitted for outgoings and matching expenses incurred in producing the income, including special deductions.

Depreciation

An annual allowance for depreciation for wear and tear is calculated at:

- 100% for software developed in Sri Lanka.
- 25% of the cost of any information technology for a period of four years.
- 20% for plant, machinery, or equipment for a period of five years.
- 20% of the cost of acquisition of any motor vehicle or furniture for a period of five years.
- 5% of the cost of any qualified building for a period of 20 years.

The cost of renewal of any capital asset, if no allowance is available, is deductible for the purpose of ascertaining profits and income.

Goodwill

Amortisation is not allowed on the acquisition of goodwill.

Formation or liquidation expenses of a company

In the case of a company, expenses incurred in the formation or liquidation of that company are allowed in computing the taxable income.

Interest expenses

Interest paid or payable on borrowings for purposes of business are deductible, subject to the thin capitalisation rules (*see the Group taxation section*).

Bad debts and doubtful debts

A sum equal to the bad debts incurred in any trade, business, profession, or vocation that have become bad debts during the period for which the profits are being ascertained is allowed for tax purposes.

In the case of a bank or financial institution, deductibility of a specific bad debt provision is restricted to the lesser of the actual amount of the provision or 1% of the aggregate debts as of the end of the period for which profits are ascertained.

Charitable contributions

Relief is available as a deduction from assessable income for contributions in money to an approved charity, provided the charity is established for the provision of institutionalised care for sick or the needy, and contributions in money or in kind to the government of Sri Lanka. The deduction for the former is subject to a ceiling of one-fifth of the assessable income of the company. In the case of the latter, there is no limit to the deduction, and any un-recouped excess of such contributions over the assessable income can be carried forward and deducted from the following year's assessable income and so on.

Termination gratuities

Termination gratuities paid to employees on cessation of business and annual payments made to an approved fund, held for payment under compulsory legislation of gratuities to employees upon termination of their services, are deductible.

Royalties and ground rents

Any royalty or ground rent payable is deductible.

Fines and penalties

Fines and penalties, paid or payable, are not deductible for tax purposes.

Taxes

Sri Lanka income tax payable or any income tax or other similar tax payable in any country with which Sri Lanka has a DTT is not deductible, other than the excess of the foreign-country tax over the maximum amount of the credit allowed for the Sri Lanka income tax on that income.

Taxes paid in a foreign country that does not have a tax treaty with Sri Lanka may be deducted.

NBT paid/payable is fully deductible.

Input VAT is not deductible from CIT if it is creditable against output VAT.

Any other prescribed tax or levy is not deductible.

Non-deductible expenses

Deductions not permitted for certain expenses or allowances, in the determination of total income, are itemised below:

- Business entertainment expenses incurred or entertainment allowances paid to executive officers.
- Any expenditure of a capital nature or any loss of capital, including book depreciation of capital assets.
- Depreciation allowances, rentals, annual payments, or renewals in respect of vehicles used for purposes of business travel, or capital assets provided for the use of employees at their places of residence, other than motorcycles or bicycles used by non-executive staff and motor coaches used to transport employees to and from their places of work.
- The excess of management fees paid over LKR 2 million or 1% of turnover, whichever is lower, or such amount as may be determined by the tax authorities. This restriction does not apply to a venture capital company, unit trust, or mutual fund.

Other significant items

Expenses incurred solely in connection with the promotion of the export trade or the provision of any services for payment in foreign currency or in carrying out an approved programme for the promotion of tourism are fully allowed.

Any foreign travel or foreign training expense incurred in the production of income of any trade, business profession, or vocation is also deductible, subject to a maximum limit of 2% of the previous year's statutory income from the respective trade, business, profession, or vocation.

Deductions from the total income from all sources of a company are allowed in respect of any interest payable on loans used for the construction or purchase of any building or the purchase of any site for construction of a building; for any annuity payable; or for a business loss.

Net operating losses

No deduction from total income is allowed in a tax year for a business loss if, at any time in that year, more than one-third of the issued share capital of the loss-making company is held by persons who did not hold such share capital at any time in the year in which the loss was incurred. In such circumstances, the loss is deferred for deduction only from profits of the particular business in which the loss was incurred.

Any loss incurred in any business of life insurance can be deducted to the extent of any profits from such business included in such total statutory income. Similarly, any loss incurred in any business of finance leasing can be deducted to the extent of any profits from such leasing business included in such total statutory income.

Losses incurred in the conduct of a trade or business, including any such loss brought forward, may be deducted only up to 35% of statutory income of a given tax year. The loss balance may be carried forward indefinitely.

Carryback of losses is not permitted.

Payments to foreign affiliates

Any payment made to an affiliate is allowed for tax purposes, provided such payment is in the nature of revenue and is incurred in the production of income.

Group taxation

There are no special provisions for taxation of companies in a group in Sri Lanka. Each company is taxed independently of others in the group.

Transfer pricing

Any profits and income arising, derived, or accruing from, or any loss incurred in, any transaction entered into between two associated undertakings shall be ascertained with regard to the arm's-length price.

Thin capitalisation

Deductible interest payments made between members of a group of companies, including holding companies, are restricted to the debt-to-equity ratio of 3:1 for manufacturing companies and 4:1 for other companies.

Controlled foreign companies (CFCs)

There are no provisions in the tax statute regarding CFCs.

Tax credits and incentives

Pursuant to the Strategic Development Project Act, projects that are identified and receive strategic development project status qualify for exemption in part or full from the applicability of the following taxes: CIT, VAT, ESC, customs duty, NBT, and PAL. These projects are large-scale projects, mainly infrastructure projects. The tax concessions include exemption from income tax (to be negotiated) for a period not exceeding 25 years.

The other tax incentives are discussed below.

Tax holidays

Exemptions for new enterprises in which the sum invested in the acquisition of fixed assets occurred prior to 1 April 2015

Qualifying enterprises	Qualifying criteria		Tax holiday (years)
	Specified activities	Investment criteria	
Small scale enterprises	Agriculture and/or agro processing, animal husbandry and/or processing, fisheries and/or fish processing, and creative work, including art work	Minimum investment of LKR 25 million, but less than LKR 50 million	4
		LKR 50 million to LKR 100 million	4
Medium scale enterprises	Any specified activity	LKR 100 million to LKR 200 million	5
		More than LKR 200 million	6
		LKR 300 million to LKR 500 million	6
		LKR 500 million to LKR 700 million	7
Large scale enterprises	Agriculture or forestry, animal husbandry, specified manufacture, specified services, processing and solid waste management, and any other activity approved by the Minister of Finance	LKR 700 million to LKR 1,000 million	8
		LKR 1,000 million to LKR 1,500 million	9
		LKR 1,500 million to LKR 2,500 million	10
		More than LKR 2,500 million	12
		LKR 6,500 million	
New enterprises in specified activities	Cement	LKR 6,500 million	5 and a 12% concessionary tax rate thereafter
	Pharmaceuticals	LKR 1,300 million	
	Fabric	LKR 650 million	
	Milk powder	LKR 3,900 million	

Large-scale investors must have invested in the acquisition of fixed assets prior to 1 April 2016 and commenced commercial operation prior to 1 April 2017 to qualify for the tax exemptions.

- A five-year tax holiday is available to a new venture capital company satisfying specified criteria.
- A five-year tax holiday is granted for the profits from the new undertaking of a company that is engaged solely in R&D in the field of science or technology with the objective of using the results thereof for the production or improvement of products with a minimum investment of LKR 2 million prior to 1 April 2014.
- Tax holidays outside the purview of the tax statute are also available in specified areas of investment to companies that enter into agreements with the BOI and to any strategic development projects identified in accordance with the provisions of the Strategic Development Projects Act No 14 of 2008. The specified areas include non-traditional export-oriented manufacturing and thrust industries, export-oriented services, and large-scale projects of which the project cost exceeds LKR 500 million. Generous waivers of import duties on specified imports and other concessions are also available for these companies.
- Profits and income derived from the sectors of fishing, cultivation, and primary processing of agricultural seeds or planting materials were exempt from CIT for

Sri Lanka

a period of five years reckoned from the tax year commencing from 1 April 2006. From 1 April 2011, but prior to 1 April 2016, a concessionary rate of 10% was applicable. From 1 April 2016, the applicable rate is 17.5%.

- A ten-year tax exemption is granted on profits and income of an undertaking from cultivation of renewable energy crops in agricultural land.
- Profits and income from all transactions connected with manufacturing, distribution, and marketing of organic fertilisers and pesticides are exempt from CIT.

Inbound investment incentives

- Exemption from CIT is granted on the profits and income earned in foreign currency prior to 1 April 2017 by any resident company in Sri Lanka from any services, excluding commissions, discounts, or similar type of receipt, rendered in or outside Sri Lanka, provided such profits and income (less such amounts expended outside Sri Lanka as are considered by the Commissioner General to be reasonable expenses) were remitted to Sri Lanka through a bank.
- Exemption from CIT is granted in respect of dividends, interest, or royalties received on investments made outside Sri Lanka, provided that dividends, interest, and royalties are remitted to Sri Lanka through a bank.

Other incentives

- New or existing companies that export non-traditional goods were entitled to be taxed on the profits from these exports at a concessionary rate of 12%. However, from the tax year commencing from 1 April 2017, the applicable rate is 14%.
- Exemption from CIT is granted on the profits arising from trading in shares, rights to any share, bonus, or share warrants in respect of which the share transaction levy has been charged.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any non-resident person or to any licensed commercial bank in Sri Lanka by the issuer of any sovereign bond denominated in foreign currency, issued on or after 21 October 2008, by or on behalf of the government of Sri Lanka and on the profits and income from the sale of such sovereign bond.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any person on or after 1 April 2009, on any Sri Lanka Development Bond denominated in United States dollars, issued by the Central Bank of Sri Lanka and on the profits and income from the sale of such Sri Lanka Development Bond.
- Exemption from CIT is granted on the profits and income derived by or accruing to any person or partnership from investment in Economic Resurgence Certificates, utilising money lying to credit of any account opened in any commercial bank or in any specialised bank with the approval of the Central Bank of Sri Lanka from and out of monies deposited in such account on or after 1 February 2009.

Foreign tax credit

Where any DTT is entered into between the government of Sri Lanka and the government of any other territory outside Sri Lanka, a credit is to be granted in respect of any tax paid or payable outside Sri Lanka in respect of profits or income arising outside Sri Lanka. Such credit should not exceed the amount of the Sri Lanka tax payable in respect of such profits or income.

Where any non-resident person or any partnership registered outside Sri Lanka providing certain services is liable to pay income tax in Sri Lanka and income tax in any

other country, then such person or partnership shall be entitled to relief from income tax payable in Sri Lanka of an amount equal to the excess, if any, of the income tax in respect of such income payable in Sri Lanka over the income tax in respect of such income payable in such other country.

Withholding taxes

As proposed, resident companies are entitled to withhold income tax at 14% of gross dividends payable to any shareholder that is chargeable with CIT, excluding any dividend received from another resident company and any dividend that is exempt from CIT.

Fees for technical services paid to persons overseas directly or indirectly by a person in Sri Lanka are deemed to be profits and income arising in, or derived from, Sri Lanka, and WHT at 20% is deductible at source.

Any person in Sri Lanka who pays or credits to a person or partnership outside Sri Lanka any sum due as interest, rent, ground rent, royalty, or annuity is required to withhold income tax at a rate of 20% of the sum, but the requirement to withhold income tax does not apply to (i) interest not sourced in Sri Lanka, (ii) interest on any loan or advance made by a banker, (iii) interest paid in foreign currency held in an account with a foreign currency banking unit, or (iv) any interest that is exempt from income tax under any provisions of the Inland Revenue Act.

In particular instances, the tax authority may prescribe that CIT be withheld at a rate other than 20%, or the rate may be reduced for sums falling due as interest or royalties in respect of persons resident in countries with which Sri Lanka has DTTs in force. Sri Lanka-source income from loan interest or royalties accruing to a non-resident company is taxed at a flat 15% in the absence of a lower rate in the tax treaty with the home country of the non-resident.

However, interest accruing to any overseas lender from a loan granted by that overseas lender to the Sri Lanka government or institution, public corporation, any commercial bank, or to any other undertaking, if such loan is granted on or after 1 April 2012, is exempt from income tax.

Every bank and financial institution is required to withhold income tax at 10% on the amount of any interest paid to a company on any sum of money deposited with it. The depositor is entitled to receive a certificate setting out the gross amount of interest, the amount of tax withheld, and the net amount of interest paid. With respect to Treasury bills and Treasury bonds issued by the Central Bank, the WHT rate of 14% is deductible at the time of the sale of the Treasury bills and Treasury bonds by the Central Bank in the primary market.

Notes

- 0% for copyright royalties.
- 0% in certain circumstances.
- 50% of normal tax, which is 7.5%.
- These treaties are limited to the avoidance of double taxation of income from international transport by air.
- 10% applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends. In all other cases, the rate is 15%.
- 10% applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends. In all other cases, the rate is 15%.
- 7.5% applies if the owner is a company.

Tax administration

Taxable period

A tax year is any period of 12 consecutive months reckoned from 1 April in any calendar year to 31 March of the following year.

Tax returns

CIT returns are due on 30 November, immediately following the end of the tax year.

Statement of accounts

Where any trade, business, profession, or vocation is being carried on or exercised by any quoted public company, any company that is a member of a group of companies of which at least one company is a quoted public company, or any other company having a turnover of not less than LKR 250 million or net profit of not less than LKR 100 million, such quoted company, member of the group, or such other company should furnish a statement of accounts in support of a return of income. Such statement of accounts is to be prepared by an approved accountant on the basis of an audit carried out by such approved accountant.

Payment of tax

Sri Lanka has a pay-and-file system under which the CIT payable for each tax year is required to be paid in four instalments, on or before 15 August, 15 November, and 15 February of the tax year and 15 May immediately following the end of the tax year. If each instalment is not less than one-quarter of the CIT payable for the tax year immediately preceding, the balance of any CIT payable may be paid on or before 30 September immediately following the end of the tax year without incurring penalties.

Tax audit process

The tax authority may select tax files for an audit on a random basis or if there is any specific information relating to a taxpayer that warrants investigation.

Statute of limitations

No assessment of the income tax payable by any person:

- a. who has made a return of one's income on or before the 30th day of November of the tax year immediately succeeding that tax year shall be made after the expiry of a period of:
 - 18 months in respect of any tax year commencing on or after 1 April 2013 and prior to 1 April 2017, and
 - nine months in respect of any tax year commencing on or after 1 April 2017 from the 30th day of November of the immediately succeeding tax year, or
- b. who has failed to make a return on or before such date as referred to in paragraph (a) shall be made after the expiry of a period of four years from the 30th day of November of the immediately succeeding tax year.

However, such limitation shall not apply where any fraud, evasion, or wilful default has been committed.

Topics of focus for tax authorities

Tax authorities, in their audit, primarily focus on whether disallowable expenses have been added back to taxable profits and on profit margins reported. With the requirement to obtain tax clearance for remittance of fees and other payments abroad,

Sri Lanka

increasing attention is paid to remittance of royalties, fees, and other payments to non-resident persons.

Significant developments

There have been no significant corporate tax developments in Swaziland during the past year.

Taxes on corporate income

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

All companies generating income within Swaziland are taxed on that income at a flat rate of 27.5%.

Corporate residence

Permanent establishment (PE)

PE in Swaziland is determined according to physical presence.

Other taxes

Value-added tax (VAT)

VAT is charged at the standard rate of 14%.

Customs duties

Swaziland has a provision for customs duties for various goods imported into the country. Details are available in the Harmonized Tariff Schedule (HTS).

Excise duties

Swaziland has an excise duty provision for various goods manufactured in the country.

Goods	Excise duty rate (%)
Cigarettes	6.34
Cigarette tobacco	8.00
Cigars	6.19
Other tobacco products	16.10
Spirits	8.90

Swaziland

Goods	Excise duty rate (%)
Beer	8.20
Alcoholic fruit beverage	8.30
Wine	8.10

Property taxes

There are no property taxes in Swaziland.

Transfer taxes

Transfer taxes are applied on a variable rate basis to property transfers based on the fair market value of the property being transferred.

Stamp taxes

Swaziland has a provision for stamp taxes on various documents. The tax is determined either by way of a set fee or on a sliding scale percentage basis.

Payroll taxes

Pay-as-you-earn (PAYE) is to be deducted from employees on a monthly basis and according to the tax tables applicable to individuals, *which are provided in the Taxes on personal income section of Swaziland's Individual tax summary at www.pwc.com/taxsummaries.*

Social security contributions

There are no social security contributions in Swaziland.

Branch income

Income tax on registered branch profits is calculated as for a resident company, and a branch profits tax of 15% is assessed for deemed repatriated income. In practice, however, branches are rare since most foreign companies incorporate local subsidiary companies.

	SZL*
Net profit before tax	100.00
Tax @ 27.5%	(27.50)
Repatriated income	72.50

* Swaziland lilangeni

Income determination

Inventory valuation

Inventory valuation is not specific but is effectively at the lower of cost (i.e. first in first out [FIFO] or average cost) and net realisable value.

Capital gains

Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e. not recurring transactions).

Dividend income

Dividend income is taxable via withholding tax (WHT) for non-residents (*see the Withholding taxes section*). No tax is due if received from another local company.

Inter-company dividends

Inter-company dividends are not subject to income tax.

Stock dividends

Stock dividends are paid out of taxed profits. Such dividends are not subject to income tax when received by a local company, but they are subject to taxation in the hands of local individual taxpayers at the rate of 10%.

Interest income

Interest income sourced in Swaziland is taxable.

Foreign income

Foreign income is not subject to income tax unless it is deemed to be from a Swaziland source.

Deductions**Depreciation**

Depreciation (wear-and-tear) allowances calculated by the net-reducing-balance method are available as follows:

Asset	Depreciation rate (%)
Aircraft	25
Casino equipment	15
Construction equipment	25
Computer hardware	33.33
Computer software	33.33
Furniture and fittings	10
Hotel soft furnishings, including carpets	10
Legal and professional libraries	5
Lifts and elevators	25
Motor vehicles:	
Buses	33.33
Cars	20
Light delivery vehicles	25
Lorries	33.33
Office equipment	10
Plant and machinery	10
Sound and projection equipment	20
Television sets	20
Tractors	25
Trailers	20
Video recorders	33.33
Videotapes	25

Swaziland

For the first year after the addition of an asset, the wear-and-tear allowance is calculated on a monthly basis. With respect to leased assets, the lessor's claim for wear-and-tear allowance is usually spread over the lease period.

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

Goodwill

The write-off of any goodwill is not allowed for tax purposes.

Start-up expenses

It is departmental practice to not allow the deduction of any start-up expenses.

Interest expenses

Interest is deductible as long as it is incurred in the production of income.

Bad debt

Swaziland does allow a deduction for bad debts, subject to the Commissioner's approval and provided that the debts were included in the taxpayer's income in the year of assessment or in years past.

Charitable contributions

Subject to the Commissioner's approval in regard to the amount allowable as a deduction in the year of grant and subsequent years, Swaziland allows a deduction for, among other things, grants made to the government for the building of schools and hospitals.

Fines and penalties

Fines and penalties resulting from late payment of any tax or levied as payable under any Act administered by the Commissioner will be a non-deductible expense.

Taxes

Taxes are not deductible.

Net operating losses

Losses may not be carried back but may be carried forward for as long as trading continues (i.e. indefinitely). If any break in trading occurs, however, the losses are forfeited.

Payments to foreign affiliates

Deductions may be claimed for payments of management service fees, interest, and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable, and receive exchange control approval for transfers outside the rand monetary area. Note that this approval is routinely given without any significant delay for *bona fide* transactions.

Group taxation

Swaziland does not have group taxation legislation. All companies are assessed on their individual profits and losses.

Transfer pricing

Swaziland does not have transfer pricing legislation; however, under the anti-avoidance provision, the Revenue Authority will look for arm's-length transactions.

Thin capitalisation

Swaziland does not have thin capitalisation rules.

Controlled foreign companies (CFCs)

Swaziland does not have any legislation regarding CFCs.

Tax credits and incentives

Foreign tax credit

Swaziland does not have a foreign tax credit regime.

Development Approval Order

The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e. a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, such as a lower corporate tax rate.

Withholding taxes

Non-resident WHTs are levied as follows.

Dividends

WHT for dividends is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho, and the Republic of South Africa). The rate drops to 10% under the double taxation agreement (DTA) with South Africa where the holding company owns more than 25% of the shares. Non-resident shareholders' WHT is payable within 30 days of the date on which the dividend is payable.

Interest

WHT for interest is payable at the rate of 10%. Non-resident WHT on interest is payable within 14 days of the date of the accrual of the interest.

Royalties and management fees

WHT for royalties and management fees is payable at the rate of 15%. Upon application, 5% may be refunded if there is a DTA in place.

Entertainers and sportsmen

WHT is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

Contractors or professionals

WHT is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to

Swaziland

non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

Tax administration

Taxable period

The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year-end unless another year-end date is approved by the Commissioner of Taxes; such approval is routinely given.

Tax returns

Income tax returns should be submitted within 120 days of 30 June, unless an extension of time for submission is granted, which also is routinely given if all tax requirements for the prior year are up to date and the provisional tax has been paid in accordance with the law. The extension of time is usually granted for a further 60 days, which effectively gives the taxpayer six months to submit their income tax return.

Payment of tax

Notice of the date of payment is usually given on the tax assessment.

Provisional tax payments

With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company's financial year-end, and the other payment is due no later than the last day of the company's financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment for which an assessment has been issued that is not less than 21 days before the date the estimate is made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is found to be both less than 90% of the taxable income as finally determined and less than the taxable income as assessed for the immediately preceding tax year.

Tax audit process

All assessments are subject to a tax audit. Current departmental practice is to perform tax audits going back four years.

Statute of limitations

There is no statute of limitations in Swaziland.

Topics of focus for tax authorities

Currently, the tax authorities are conducting full tax audits.

Significant developments

Interest deductibility matters

In June 2014, a governmental committee presented a first proposal on further strengthened interest deductibility restrictions. The new proposal has suffered heavy criticism. New rules limiting interest deductibility can be expected to be introduced by 2017 at the very earliest, perhaps with applicability only in 2018, but more likely in 2019. If this timing expectation is true, the international business community would have to continue to rely on the vague applicability status of the current, 2013, interest deductibility regime, which is litigated heavily in the tax courts and, furthermore, is subject to European Union (EU) infringement procedures.

Country-by-country (CbC) reporting

In line with base erosion and profit shifting (BEPS) action points, new CbC reporting legislation entered into force on 1 April 2017. A multinational group with a Swedish parent company, with annual group consolidated revenue exceeding 7 billion Swedish kronor (SEK) shall, within 12 months after the closing of the financial year, submit certain financial data about their business for each tax jurisdiction in which the group operates, on an annual basis. A CbC report shall, for the first time, be provided for the financial year beginning after 31 December 2015. All Swedish entities and foreign permanent establishments (PEs) within a multinational group shall notify the Swedish Tax Agency which entity within the group is submitting the CbC report.

For the first financial year covered by the CbC legislation, the Swedish Parliament has extended the notification period to 30 April 2017, for financial years ending before the legislation becomes effective.

Taxes on corporate income

State (national) income tax

Resident legal entities are liable for tax on their worldwide income unless tax treaties or special exemptions apply. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

Taxable income is subject to corporate tax at a flat rate of 22%. All income of corporate entities is treated as business income.

Local income taxes

No municipal or local income taxes apply to Swedish corporations.

Corporate residence

A company is considered to be a tax resident in Sweden if it is incorporated in Sweden.

Permanent establishment (PE)

The term 'permanent establishment' is defined in Sweden as a fixed place of business through which the business is carried on from a specific establishment, such as a place of management, branch, office, factory, or workshop. Places where construction work is carried on are also regarded as PEs, as well as if an agent who is dependent upon the foreign company habitually exercises authority in Sweden.

Other taxes

Value-added tax (VAT)

The Swedish VAT system is harmonised with the EU rules. The general VAT rate of 25% is chargeable on most goods and services. Reduced rates apply to a few goods and services, such as hotel accommodation, foodstuffs (excluding alcoholic beverages), restaurant meals, and low or non-alcoholic drinks (12%), as well as newspapers, magazines, books, passenger transport, maps, musical notes, some cultural services, transport in ski lifts, etc. (6%). Certain financial and insurance services are exempted from VAT.

VAT returns are filed and tax is paid monthly or quarterly. VAT returns must be filed monthly if the VATable turnover is estimated at more than SEK 40 million (estimated yearly sales excluding any reverse charge or import acquisitions). Companies with VATable turnover below SEK 40 million report VAT quarterly or may choose to report VAT on a monthly basis. For companies with a turnover of less than SEK 1 million, VAT is reported on a yearly basis in the VAT return, and these companies may also choose to report VAT quarterly or on a monthly basis.

New definition of 'property'

A new definition of the term 'property' was implemented in the Swedish VAT Act and entered into force on 1 January 2017. The new definition is based on an EU regulation (no. 1042/2013) and will affect the VAT liability regarding letting and transfer of properties, reverse-charge mechanism in the building sector, as well as the provisions regarding adjustment of investment made on properties.

In connection hereto, the provisions stating that electricity, gas, water, and heat supplied as part of a letting of property are exempted from VAT have been removed.

New amounts for deductions regarding business entertainment with food and beverage

In case of external and internal business entertainment, the new provisions allow reasonable VAT deductions; however, not on a tax base exceeding SEK 300 per person.

Customs duties

As a member of the European Union, Sweden is also part of the Customs union enforcing the Community Customs code. Most EU Customs duties are calculated as a percentage of the value of the goods being imported. All imported goods must be classified according to the EU Customs tariff (TARIC), and the duty rates applied depend on the economic sensitivity of the goods. The actual duty rate to be applied

also depends on other factors, such as the country of origin of the product and any free trade agreements that may be applicable.

Excise duties

The three main Swedish excise duties are harmonised with EU rules. These are the alcohol tax, the tobacco tax, and the tax on fuels and electricity. There are, however, still differences in local legislation between the member states, and the taxation of fuels is partly EU harmonised, partly national. Fuels are subject to energy tax, carbon dioxide tax, and sulphur tax. Depending on the use of fuels, taxes may be partly or fully reduced. For bio-fuels, certain exemptions may also apply.

Real estate tax

The annual real estate tax rate on business premises is 1% of the tax assessed value. For industrial property, the tax rate is 0.5%. Other rates exist for special property.

Stamp tax

Stamp tax at 4.25% is payable on a direct transfer of real estate. The tax base consists of the highest of the purchase consideration or the tax assessed value of the real estate. Stamp tax on an intra-group transfer of real estate may be deferred as long as the real estate remains within the group.

Payroll taxes

Social fees

Mandatory social security charges payable by employers on remuneration to employees (or by the self-employed) are levied at approximately 31%. A reduced rate is applicable for very old people. Social security charges are deductible for corporate tax purposes.

Pension benefits beyond the mandatory system are customary amongst most Swedish employers. A special salary tax is levied at approximately 24% on these additional pension premiums/commitments and is deductible for corporate tax purposes.

Branch income

Branch income (i.e. PE income) is taxed at the corporate tax rate of 22%, and general corporate tax rules apply for branch offices in Sweden. No withholding tax (WHT) is levied on the outbound repatriation of taxed profits.

The receipt of Swedish-source royalties or fees for use of tangible or intangible assets by a foreign resident is also (subject to treaty restrictions) regarded as a special form of PE income.

Income determination

Inventory valuation

Inventories (stock-in-trade) are valued at acquisition cost or market value, whichever is lower. As an alternative, inventories may be valued at 97% of the total acquisition cost, which is determined on a first in first out (FIFO) basis. The last in first out (LIFO) method is not permitted. Generally, inventories should be stated at the same amount for tax and accounting purposes.

Sweden

Capital gains

There is a capital gains tax exemption for Swedish corporate entities on gains related to the disposal of shares held for business reasons.

Shares in Swedish corporations can qualify as shares held for business reasons. Unquoted/unlisted shares will always be considered as held for business reasons. Quoted/listed shares are considered held for business reasons if the company has a holding corresponding to at least 10% of the voting rights or the shares are held in the course of the business. An additional condition regarding quoted/listed shares is that the shares must be held for a period of at least one year. Under certain conditions, tax exemption also applies to shares in foreign companies.

Note that non-tax-exempt capital gains are included in business income and taxed at the corporate tax rate of 22%.

Shares in partnerships (tax transparent entities) and indirect holdings via partnerships are also included in the participation exemption regime.

An exception from the capital gains tax exemption applies for the sale of shares in a 'shell company', which is a company or partnership where the market value of cash, shares and other marketable instruments (other than shares held for business reasons), and similar assets exceeds 50% of the consideration paid for the shares. The sale of a shell company results in harsh taxation of the gross consideration. Provided certain formalities are fulfilled, however, it is possible to avoid such taxation.

A consequence of the participation exemption is that capital losses on shares or participations held for business reasons are not deductible.

Capital losses on portfolio holdings of shares, share options, convertible debentures, and similar financial instruments are allowed only as an offset to capital gains on the same group of financial instruments.

Certain special rules apply to computation of capital gains and losses on real estate.

Dividend income

A participation exemption applies for dividends received on shares held for business reasons (*see above*) and on qualifying holdings via partnerships. A tax deductible dividend paid by a foreign company (i.e. not only EU/European Economic Area [EEA] companies) under a hybrid arrangement is though subject to Swedish corporate tax for the recipient Swedish company.

Interest income

Interest received by a corporation is included in the corporate tax basis.

Royalty income

Royalty received by a corporation is included in the corporate tax basis.

Foreign income

Companies resident in Sweden are taxed on their worldwide income. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

A Swedish corporation is taxed on foreign branch income. Double taxation normally is avoided by means of either a deduction of foreign tax, or a foreign tax credit.

Dividends and capital gains from foreign subsidiaries are generally exempt from taxation according to the participation exemption provisions applicable to shares held for business reasons (*see above*).

Deductions

Depreciation, amortisation, and depletion

Depreciation on fixed assets

Land improvements may be depreciated at the rate of 5% per year of the acquisition cost. The maximum allowance is 100% of the tax basis of the improvement.

Buildings may be depreciated at rates between 2% and 5% per year of the taxable basis, depending on type and usage of the building. The maximum allowance is 100% of the tax basis of the building.

For machinery and equipment, the depreciation for tax purposes should correspond to the depreciation charged in the books and accounts, as long as the total net value of the assets is not less than the 70% of net value in previous accounts plus additions less proceeds of sales (i.e. 30% declining-balance depreciation) or cost less 20% per year (i.e. 20% straight-line depreciation on remaining assets). An alternative 25% declining-balance method without correspondence to the books also exists.

Immediate deduction of certain assets

The cost of assets having an expected life of no more than three years and the cost of assets not exceeding certain limits, depending on size of operations, may be deducted immediately. Certain costs for repairs, maintenance, and modifications of buildings may also be deducted immediately.

Amortisation of intangibles and goodwill

The amortisation of patents, leaseholds, and acquired goodwill follows the same rules as depreciation for machinery and equipment, provided these assets have been acquired from another party (*see above*).

Depletion of mines and quarries

The entire cost of mines and quarries may be depleted over their expected exploitation period. These depletion amounts may be deducted annually but are limited to 100% of the acquisition cost of the mine or quarry.

Start-up expenses

General start-up expenses for generating and maintaining business income are, as a rule, deductible for Swedish tax purposes.

Interest expenses

Interest expenses on external loans are fully deductible, whereas interest paid to affiliated companies are deductible only if an exception applies under the Swedish interest stripping restrictions and to the extent that the arm's-length principle is complied with. Under the interest stripping restrictions, and in brief, a deduction is not allowed for interest accruing on an intra-group loan unless the true creditor within the affiliated group (i.e. the person entitled to the interest) is taxed on the interest income at a rate of at least 10% or it is shown that the debt is based on commercial reasons.

Sweden

Regardless, a deduction may be refused if the debt structure has been put in place mainly for the group to achieve a substantial tax benefit.

Bad debt

Business bad debts are deductible if they are proven wholly or partially worthless.

Charitable contributions

Purely charitable contributions are generally non-deductible.

Fines and penalties

Fines and penalties are non-deductible for Swedish tax purposes.

Taxes

Generally, Swedish taxes are not deductible for tax purposes. However, specific taxes, fees, and foreign taxes may be deductible. Recoverable VAT is not treated as an expense or cost.

Net operating losses

Tax losses may be carried forward indefinitely but may become subject to restrictions and/or forfeiture upon ownership changes, mergers and demergers, dispositions with creditors, and certain other reorganisations. No carryback of losses is possible.

Payments to foreign affiliates

Transactions with affiliates not liable to tax in Sweden must be at arm's length. Formal transfer pricing documentation requirements apply.

Group taxation

Swedish companies are not taxed on a consolidated basis. However, it is possible for qualifying groups (i.e. a holding greater than 90% of the capital, which must have been upheld during the whole fiscal year) to effectively offset operating losses of one Swedish company against operating profits of another Swedish company by way of group contributions, which are tax deductible for the contributor and taxable for the recipient. EEA companies are regarded as Swedish companies for these purposes if the recipient is taxable in Sweden.

A similar Swedish deduction is, under certain circumstances, also available for cross-border group relief at the Swedish parent's level within the EEA for final foreign subsidiary losses.

Transfer pricing

The Swedish transfer pricing regime is generally an Organisation of Economic Co-operation and Development (OECD) type of regime. Sweden has formal transfer pricing documentation requirements in place.

Thin capitalisation

There are no thin capitalisation rules for tax purposes in Sweden; however, interest stripping restrictions exist (*see Interest expenses in the Deductions section*).

Controlled foreign companies (CFCs)

Sweden's CFC provisions aim at taxing a Swedish resident shareholder for shareholdings in low-taxed foreign entities. A Swedish resident shareholder with a

holding in a CFC entity will annually be taxed for its ownership portion of the CFC's income, according to provisions applicable to a Swedish corporation. For a corporation, the portion will be taxed at the Swedish corporate tax rate. Only holdings, direct or indirect through other foreign entities, corresponding to at least 25% (capital or voting rights) in the foreign entity could lead to CFC taxation. A foreign company is considered low taxed if the income in the company, calculated in accordance with Swedish provisions, is taxed at a rate below 12.1%. However, if the foreign entity is resident in an 'approved country', CFC taxation should not arise. Approved countries appear in an official 'black/white' list. Active EEA entities are, under certain circumstances, not considered low taxed.

Tax credits and incentives

There are no specific tax incentives in Sweden for corporations. However, some generally applicable regimes exist.

For example, Sweden has an accruals reserve regime. The accruals reserve regime allows for a tax-deductible appropriation for corporations of 25% of the taxable profit before appropriation to a reserve. Each year's appropriation forms a separate reserve that must be reversed to income no later than the sixth year following the appropriation. However, a standardised interest income is imposed on former years' appropriations at 72% of the interest rate on governmental debt notes.

Foreign tax credit

A foreign tax credit is generally available, provided certain conditions are fulfilled, and the tax credit allowed is limited to an amount corresponding to the Swedish tax on the foreign income. Unutilised foreign taxes may be carried forward for five years. Tax treaty implications may exist.

Withholding taxes

There are no Swedish taxes on interest and service fees paid to non-resident corporations or individuals. Such payments to resident corporations and individuals are taxed as ordinary income.

WHT on dividends, royalties, and certain rentals vary according to domestic law and tax treaties, as shown below.

Pursuant to the amendment of the Parent Subsidiary Directive (EU general anti-avoidance rule [GAAR]), a minor change in the Swedish WHT Act (for outbound dividends) has been made, targeting structures put in place to obtain WHT exemption through the use of decoy arrangements. This anti-avoidance provision has long existed under current Swedish law, but an explicit clarification is made as of 1 January 2016 that the provision can also be applicable in cases covered by the Parent Subsidiary Directive.

Apart from the highlighted treaties, Sweden has concluded agreements on exchange of information in tax matters and partial tax treaties. Since 1 April 2017, when the tax information exchange agreement (TIEA) with the United Arab Emirates entered into force, Sweden has information exchange agreements with all the world's tax jurisdictions. It could also be noted that amendments to the EU Directive on

Sweden

administrative cooperation in the field of taxation have been implemented in Swedish legislation with effect as of 1 January 2017.

Notes

- According to domestic law, there is no WHT on dividends to a foreign company on shares held for business reasons (*for the definition of shares held for business reasons, see Capital gains in the Income determination section*), provided that the foreign company is similar to a Swedish limited liability company (and some other legal entities) and is subject to income tax at a level similar to that imposed on a Swedish company. Further, there is no tax liability for a legal entity of a member state of the European Union if the entity owns 10% or more of the share capital in the distributing company and fulfils the conditions of the Directive (90/435) regarding a parent company and subsidiaries.
- The reduced rate shown before a stroke (/) refers to payments to corporations having requisite control. Where appropriate, the particular treaty should be consulted to see whether the reduced rate is applicable.

Sweden

3. Swedish-source royalties and certain rental fees are treated as a special form of PE, taxable at the corporate tax rate, subject to treaty reduction or waiver. Royalties paid from Sweden to a company within the European Union should not be taxed in Sweden if one of the companies holds at least 25% (capital) of the other or, where there are two companies concerned, at least 25% are held by another company within the European Union. Indirect participation does not benefit from the legislation. Both the payer and the recipient must be legal entities under the EU directive.
4. Payments to resident corporations and individuals are taxed as ordinary income. Only resident banks and similar entities are required to withhold tax on payments of cash dividends to resident individuals.
5. Royalties and certain rentals paid by Swedish licensees are treated as business income taxable in Sweden and do not incur WHT (see Note 3).
6. Note also the domestic provision stating a 0% WHT on dividends distributed to qualifying entities based on EU Directive (90/435) and/or where the shares are held for business purposes (see Note 1).
7. Dividends: 10% of the gross amount if the company receiving the dividends owns at least 25% of the foreign company's capital.

Royalties: of the gross amount paid for the use of, or the right to use:

- News: 3%.
 - Copyright of literary, dramatic, musical, or other artistic work: 5%.
 - Any patent, trademark, design or model, plan, or secret formula or process; industrial or scientific equipment or information concerning industrial, commercial, or scientific experience; payments for the rendering of technical assistance: 10%.
 - All other cases: 15%.
8. Royalties are normally taxable only in the recipient's home country. However, where the royalty is paid by a Swedish legal entity that is more than 50% owned by one Austrian recipient, entity or individual, the tax in Sweden is a maximum of 10%.
 9. Literary, artistic, or scientific royalties: 0%; other royalties: 5%.
 10. Royalties for use of industrial, commercial, or scientific equipment: 5%; with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 3%; other royalties: 10%.
 11. Royalties for use of copyright and literary, dramatic, musical, and artistic royalties: 0%. Other royalties: 10% (treaty should be consulted).
 12. The treaty has effect on income derived on or after 1 January 2006.
 13. The double taxation treaty does not include Hong Kong.
 14. The same treaty is applicable to the Czech Republic and the Slovak Republic.
 15. According to the Nordic multilateral tax treaty.
 16. Dividends are exempt from tax if the recipient of the dividends is a company directly owning at least 10% of the capital of the company paying out the dividends. Certain rentals are subject to tax if there is a PE in a country other than the home country and the claim is connected with the business carried on from the PE. Concerning Iceland, dividends are normally exempt from tax for companies, but the tax rate is 15% if the dividends have been deducted from the income of the distributing company.
 17. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.
 18. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 5%; other royalties: 12.5%.
 19. Royalties for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience: 10%; other royalties: 15% (treaty should be consulted).
 20. Literary, artistic, or scientific royalties including films: 15%; other royalties: 10% (treaty should be consulted).
 21. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial or scientific experience: 5%; other royalties: 15%.
 22. Commercial royalties, including films: 20%; copyright, literary, dramatic, musical, or artistic royalties: 0%.
 23. Commercial royalties, including films: 15%; literary, dramatic, musical, or artistic royalties: 5%.
 24. Literary, artistic, scientific, or film royalties: 10%; other royalties: 7%.
 25. Royalties with respect to patents, designs or models, secret formulas or processes, or for information concerning industrial or scientific experience or for the use of industrial, commercial, or scientific equipment involving a transfer of know-how: 5%; other royalties: 15%.
 26. Former Yugoslavia refers to the countries of Bosnia and Herzegovina, Croatia, Macedonia, Montenegro, Serbia, Slovenia, and the autonomous province of Kosovo. The treaty is applicable to all republics and autonomous provinces of the former Yugoslavia with the exception of Macedonia, with which Sweden has concluded a bilateral treaty.
 27. Royalties arising from the use or the right to use trademarks: 25%; other royalties: 15%.
 28. The first tax treaty between Sweden and Armenia was signed on 9 February 2016 and has been approved by the Swedish Parliament as per 12 October 2016. The Swedish legislation implementing the treaty will enter into force as per the date the Swedish government will decide.
 29. The first tax treaty between Sweden and Azerbaijan entered into force on 31 December 2016.
 30. Dividends are exempt from tax if the beneficial owner is a company that controls at least 10% of the voting power of the paying company. For other cases, dividends are taxable at a maximum rate of 5%. A maximum rate of 15% applies to dividends paid out of income (including gains) from immovable property by an investment vehicle that distributes most of the income annually and whose income from the immovable property is tax exempt.

31. Royalties for the use of, or the right to use, industrial, commercial, or scientific equipment: 5%; other royalties: 10%.
32. Royalties for the use of, or the right to use, industrial, commercial, or scientific equipment: 5%; other royalties: 7%.
33. Royalties for patents relating to industrial know-how of manufacturing methods and royalties attributable to agriculture, pharmaceuticals, computers, computer software and construction, secret formula or processes, or for information concerning industrial, commercial, or scientific nature: 0%. Other royalties: 10%.
34. Royalties paid for the use of, or the right to use, patent, trademark, design or model, plan, or secret formula or process, or information concerning experience of industrial, commercial, or scientific nature: 5%. Other royalties: 10%.

Tax administration

Taxable period

If the income is derived from business, the basis for tax assessment is the financial year. The year-end for a company may be fixed at any calendar month ending, provided it comprises 12 calendar months and ends on the last day of a month. Swedish subsidiaries of foreign parents may generally be permitted to adopt the same year-end as the parent company.

Tax returns

Every corporate entity or registered branch must file an annual corporate tax return. The applicable due date for tax return submissions depends on the month in which the financial year ends: tax returns for financial years ending in January through April are due on 1 November in the same year; tax returns for financial years ending in May or June are due on 15 December in the same year; tax returns for financial years ending in July or August are due on 1 March in the following year; and tax returns for financial years ending in September through December are due on 1 July in the following year. The financial year of most Swedish companies follow the calendar year; consequently, most tax returns are subject to the 1 July due date.

The annual assessments are made by the Swedish Tax Agency during the calendar year following the income year and should be completed about a year after the expiry of the financial year.

Payment of tax

Income taxes are collected during the year in which the income is earned, under a preliminary tax system. A corporate entity's preliminary tax liability is determined by a preliminary tax assessment based either on the latest available final tax assessment or on a preliminary tax return filed by the company. The preliminary taxes are payable in monthly instalments. Interest surcharges on underpayment of preliminary taxes, however, generally apply after two months from the end of the fiscal year (the end of a fiscal year is one of 30 April, 30 June, 31 August, or 31 December).

Once a tax assessment decision has been made by the Swedish Tax Agency, any balance owed by the taxpayer is payable in 90 days. Any balance owed to the taxpayer is automatically refunded within a year from the end of the fiscal year.

Tax penalty

A taxpayer that submits incorrect or insufficient information in a tax return is charged a penalty of up to 40% of the tax that, if the incorrect information had been accepted, would have been imposed or credited. The penalty and the rate may vary depending on the type of the shortcoming. Late filing fees also apply.

Sweden

Appeals

Taxes are assessed by the Swedish Tax Agency. Depending on the circumstances, reassessments and/or appeals generally can be initiated within two and/or six years after the expiry of the calendar year during which the financial year ended. The extended six-year period can generally be applied by the Swedish Tax Agency to the disadvantage of the taxpayer in cases of erroneous or misleading information having been provided by the taxpayer or the taxpayer's omission of information. Appeals can be made to the Administrative Court, onwards to the Administrative Court of Appeal and, in case granted trial dispensation, onwards to the Supreme Administrative Court.

Topics of focus for tax authorities

The Swedish Tax Agency has, for quite some time, focused on challenging interest deductions on inter-company loans made under the view that the interest rate deviates from the arm's-length rule. This particular focus has resulted in a number of court cases. The Swedish Tax Agency is currently also focusing on interest deduction restrictions under current limitation rules.

Another focus of the Swedish Tax Agency has been to challenge individual owners of private equity companies on the taxation of carried interest.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 8 August 2014, Sweden signed a Model 1A FATCA agreement with the United States. The intergovernmental agreement (IGA) has been implemented through legislative means that entered into force as of 1 April 2015.

EU state aid

There is no Swedish-specific legislation regarding EU state aid.

Base erosion and profit shifting (BEPS)

Amendments to the Swedish tax legislation, due to the BEPS action points, are currently being prepared by the Swedish government. However, there is no official information on how the new rules may be designed available yet.

Significant developments

Base erosion and profit shifting (BEPS)

Based on the results of the BEPS project, Switzerland has launched several actions in order to implement BEPS measures into the Swiss tax law, in particular:

- **Country-by-country (CbC) reporting:** In April 2016, the Federal Council launched the consultation process with respect to the multilateral agreement and the respective Swiss act in order to implement the exchange of CbC reports. On 23 November 2016, the Federal Council approved the corresponding dispatch, including a draft of the federal law, both subject to parliamentary discussions. It is expected that multinationals, which are required to prepare a CbC report, will have to draw up a first CbC report in the year 2019 for the year 2018. The automatic exchange of these reports between the partner states shall start in 2020.
- **Spontaneous exchange of information:** In April 2016, the Federal Council launched the consultation with respect to the implementation of the legal framework and the procedures required for the spontaneous exchange of information. The new rules shall be based on the Organisation for Economic Co-operation and Development (OECD)/Council of Europe Convention on Mutual Administrative Assistance in Tax Matters and the revised Swiss Tax Administrative Assistance Act. The new law entered into force as of 1 January 2017. The spontaneous exchange of information will start as of 1 January 2018.

The implementation of further BEPS actions into the Swiss tax law and double tax treaties (DTTs) is an ongoing process. Switzerland is further expected to sign the Multilateral Instrument (MLI).

Corporate tax reform III / Tax proposal 17

After having implemented two favourable corporate tax reforms, the Swiss people, on 12 February 2017, voted on the so-called 'corporate tax reform III', and 59.1% rejected this initial reform package.

The need for a reform remains, however, undisputed by all political parties. Consequently, right after the poll, the Federal Department of Finance decided to draft a new corporate taxation proposal, called 'tax proposal 17' (TP17) with the aim to align Switzerland's tax laws to the latest intentional developments and to strengthen Switzerland's fiscal competitiveness as a business location with a focus on innovation and value creation.

The federal government has already announced that the Federal Council will determine the cornerstones of TP17 in June 2017. The new cornerstones will be fully aligned with the latest international tax standards and will ensure replacement of

Switzerland

the current tax privileges (*see Privileged cantonal tax regimes in the Tax credits and incentives section*) with new state of the art measures, including, for example, a patent box at the cantonal and communal level as well as the possibility for cantons to apply super deductions for research and development (R&D) expenditures.

Value-added tax (VAT) law changes

A partial revision of the Swiss VAT act is currently subject to parliamentary debates. The draft law contains, amongst others, the following suggested changes:

- Foreign companies generating a total taxable turnover of at least 100,000 Swiss francs (CHF) per year in Switzerland and abroad shall be subject to Swiss VAT. This will, however, allow them to recover related Swiss input VAT.
- Foreign online retailers generating a turnover of more than CHF 100,000 per year with tax exempt deliveries to Switzerland due to the low value of the goods (i.e. less CHF 200 per shipment) shall be subject to Swiss VAT.

The suggested changes are likely to enter into force no earlier than 2018.

Taxes on corporate income

Resident companies are subject to Swiss corporate income tax (CIT) on their taxable profits generated in Switzerland. CIT is levied at the federal, cantonal, and communal level. Foreign-source income attributable to foreign permanent establishments (PEs) or real estate property located abroad is excluded from the Swiss tax base and only taken into account for rate progression purposes in the cantons that apply progressive tax rates.

Non-resident companies may be subject to Swiss CIT if they are (alternatively) partners of a Swiss business, have a PE in Switzerland, own real estate property in Switzerland, have loan receivables secured by a mortgage on Swiss real estate property, or deal with or act as a broker of Swiss real estate property. Non-resident companies are taxed on their income generated in Switzerland only (*see the Branch income section*).

Federal level

Switzerland levies a direct federal CIT at a flat rate of 8.5% on profit after tax. Accordingly, CIT is deductible for tax purposes and reduces the applicable tax base (i.e. taxable income), resulting in a direct federal CIT rate on profit before tax of approximately 7.83%. At the federal level, no corporate capital tax is levied.

Cantonal/communal level

In addition to the direct federal CIT, each canton has its own tax law and levies cantonal and communal income and capital taxes at different rates. Therefore, the tax burden of income (and capital) varies from canton to canton. Some cantonal and communal taxes are imposed at progressive rates.

Overall tax rates

As a general rule, the overall approximate range of the maximum CIT rate on profit before tax for federal, cantonal, and communal taxes is between 11.5% and 24.2%, depending on the company's location of corporate residence in Switzerland.

Corporate residence

A company is considered resident in Switzerland if its domicile is in Switzerland. Residency is also linked to the place of effective management, which may be the centre from which day-to-day activities are directed or the place from which managerial decisions are taken.

Permanent establishment (PE)

For Swiss tax law purposes, the term 'permanent establishment' means a fixed place of business through which the business activity of an enterprise is wholly or partly carried on. In particular, PEs are branches, factories, workshops, sales agencies, permanent representations, mines and other places of extraction of natural resources, as well as building or construction sites that last at least 12 months. This definition is generally in line with the criteria according to the current Article 5 paragraph 2 of the OECD Model Tax Convention on Income and Capital.

Other taxes

Value-added tax (VAT)

As a matter of principle, proceeds of sales and services conducted in Switzerland are subject to VAT at the standard rate of 8%. Goods for basic needs are subject to VAT at the rate of 2.5%. These rates include a temporary increase that went into effect on 1 January 2011 and will at least remain applicable until 31 December 2017. Furthermore, services in connection with the provision of lodging are subject to VAT at the rate of 3.8% (also technically limited until 31 December 2017). All above rates are expected to remain unchanged going forward.

Any person, regardless of legal form, objects, and intention to make a profit, is liable to VAT if that person carries on a business and is not exempt from the tax liability. A person carries on a business if one independently performs a professional or commercial activity with the aim of sustainably earning income from supplies and acts externally under one's own name. Persons who are taxable must register with the Swiss Federal Tax Administration of their own accord in writing within certain deadlines. Anyone who in Switzerland generates less than CHF 100,000 in turnover within a year from taxable supplies is exempt from the aforementioned liability. A registered taxpayer generally is entitled to offset the amount of VAT charged by suppliers or paid on imports against the VAT payable.

The VAT rates are dependent on the goods sold or the services provided. Some supplies are exempt from the tax without credit (e.g. hospital treatment, cultural services, insurance and reinsurance turnovers, specific turnovers in the field of money and capital transactions) and some supplies are fully exempt from the tax (e.g. supply of goods that are transported or dispatched directly abroad). The difference relates to the fact that the input VAT related to supplies exempt from the tax without credit cannot be deducted, whereas supplies exempt from the tax are fully eligible for input VAT deduction.

Customs duties

All goods arriving in Switzerland from abroad are generally subject to customs duty and import VAT. The customs duty is calculated on the gross weight of imported goods, where category-specific weight rates apply. Products like alcoholic drinks, tobacco products, food, and textiles are typical categories of higher duty rates. Furthermore,

Switzerland

imported goods are subject to import VAT of generally 8%. A reduced rate of 2.5% applies on certain goods (e.g. food, non-alcoholic beverages, books, magazines, pharmaceutical products).

Excise taxes

In Switzerland, various excise taxes are levied. To name a few, the following excise taxes are levied at the federal level:

- VAT (*see above*).
- Petroleum tax.
- Performance-related Heavy Vehicle Fee.
- National road tax (motorway tax sticker).
- Beer excise tax/Tax on alcohol.
- Tobacco excise tax.

Property taxes

With regard to the ownership and the transfer of real estate property in Switzerland, property taxes may apply. Depending on the location of the real estate property, ownership related property taxes are levied at the cantonal and/or communal level or do not exist at all.

In case of the sale of real estate property, real estate transfer tax and taxes on the capital gain may apply.

At the federal level, capital gain realised on the sale of real estate property is subject to ordinary CIT. At the cantonal and communal level, depending on the canton concerned, capital gain realised is either subject to the ordinary CIT (dualistic method) or subject to a special real estate capital gain tax (monistic method).

It is at the discretion of the authority of the cantons to decide how real estate capital gains shall be taxed within their territory.

Securities transfer tax

Swiss securities transfer tax (often known as 'securities turnover tax' or 'transfer stamp tax') is levied on the transfer of Swiss or foreign securities, in which Swiss security dealers participate as contracting parties or as intermediaries. The ordinary tax rate of Swiss securities transfer tax is 0.15% for securities issued by a tax resident of Switzerland and 0.3% for securities issued by a tax resident of a foreign country.

Swiss security dealers are defined as any person professionally engaged in the buying or selling of securities for one's own account or for another person, including Swiss banks and other Swiss bank-like institutions. The definition also includes companies holding taxable securities whose book value exceeds CHF 10 million and remote members of a Swiss stock exchange.

Taxable securities include, but are not limited to, shares and bonds. Options and many other derivative instruments are not subject to Swiss securities transfer tax. However, the exercise of such financial instruments or derivatives may result in a taxable transfer of a security.

Various transactions are exempt from the Swiss securities transfer tax. Generally, no Swiss securities transfer tax is levied in the case of a merger or a reorganisation in which a Swiss security dealer is involved and taxable securities (including

participations) are transferred. Furthermore, the like-kind exchange of a participation by a Swiss security dealer is also exempt from the Swiss securities transfer tax. This is particularly important for holding companies, which may qualify as Swiss security dealers.

Issuance stamp tax

Issuance stamp tax (often known as ‘capital duty’) on the issuance and the increase of the equity of Swiss corporations is levied at the rate of 1% on the fair market value of the assets contributed, with an exemption on the first CHF 1 million of capital paid in, whether it is made in an initial or subsequent contribution.

A multitude of transactions qualify for an issuance stamp tax exemption. In particular, special tax provisions allow for most reorganisations to take place on a tax neutral basis. In addition, an existing non-resident company may generally transfer assets to Switzerland without incurring Swiss issuance stamp tax. However, if the company was formed abroad and re-domiciled to Switzerland exclusively or mainly in order to avoid Swiss stamp taxes, issuance stamp tax may apply.

The issuance of Swiss bonds and money market instruments is not subject to Swiss issuance stamp tax.

In addition, the conversion of certain contingent convertible bonds (CoCos) into equity will also not trigger Swiss issuance stamp tax on the newly created equity. In more detail, this relief applies to CoCos according to the Swiss banking law only; other convertible bonds will still trigger Swiss issuance stamp tax if converted into equity.

Capital tax

Corporate capital tax is only levied at the cantonal and the communal level (not at the federal level). It is based on a corporation’s equity (i.e. the taxable equity corresponds to the sum of nominal capital, paid in surplus, retained earnings, other equity reserves, and, according to Swiss thin capitalisation rules, potential deemed equity). The ordinary capital tax rates vary between 0.001% and 0.525%, depending on the company’s location of corporate residence in Switzerland. Reduced capital tax rates usually apply for companies subject to a special cantonal tax regime (e.g. holding companies, domicile companies, mixed trading companies).

The cantons are allowed to foresee in their tax law that CIT is creditable against a corporation’s capital tax. As of 1 June 2017, the following cantons have implemented such credit system: Argovie, Appenzell Innerrhoden, Bern, Basel-Land, Geneva, Neuchâtel, St. Gallen, Solothurn, Schwyz, Thurgau, and Vaud.

Payroll taxes

Wage tax withholding (tax at source)

Employees meeting certain criteria (e.g. Swiss tax resident foreign nationals without a permanent residence permit, non-Swiss tax resident individuals) are subject to wage tax withholdings. In such case, it’s the employer’s obligation to withhold the appropriate wage tax on the employee’s gross salary. The wage taxes cover the employee’s federal, cantonal, and communal taxes as well as church tax (if applicable) (see the *Taxes on personal income section of Switzerland’s Individual tax summary* at www.pwc.com/taxsummaries).

Switzerland

Social security contributions

Employers, in general, are required to account for social security contributions on the salaries of their employees. If the employee is subject to the Swiss social security system, the following compulsory social security contributions are concerned (*see the Other taxes section of Switzerland's Individual tax summary at www.pwc.com/taxsummaries*):

- Old age, survivors', and disability insurance (10.25%; the employee's share is one half).
- Unemployment insurance/supplementary unemployment insurance (approximately 2.2%; the employee's share is one half).
- Family compensation fund (0.1% to 4%; usually fully employer financed).
- Occupational accident insurance (approximately 0.17%; fully employer financed).
- Occupational pension scheme (2nd pillar) (contributions depend on pension plan; the employee's share is usually half of the total contribution, where the employer bears the other half).

Branch income

Foreign legal entities having a branch in Switzerland become subject to limited taxation in Switzerland. Such branches generally qualify as PEs in line with the OECD Model Tax Convention on Income and Capital. The branch's income is, in general, subject to the same CIT rules that apply for Swiss corporations. It is worth noting that there is no Swiss withholding tax (WHT) on profit transfers from the Swiss branch to its foreign head office.

Income determination

The statutory accounts of a Swiss company (or in the case of a non-resident company, the branch accounts) serve as the basis for determining taxable income. There are generally very few differences between statutory profit and taxable profit apart from the participation relief for dividend income and capital gains (*see below*), adjustments required by the tax law, and the usage of existing tax loss carryforwards (*see Net operating losses in the Deductions section*).

Inventory valuation

Swiss CIT treatment does, in principle, follow underlying Swiss statutory accounting treatment. Inventory valuation is therefore determined according to the accounting rules of the Swiss code of obligations. As the Swiss code of obligations, hence the Swiss accounting rules, favour the prudence principle, a valuation allowance is allowed to be recorded on the inventory in excess of the actual devaluation of the inventory due to a lower market value (*see Obsolete inventory provision in the Deductions section*). Such valuation allowance is accepted for tax purposes at up to a maximum of one-third of the inventory's acquisition costs or its productions costs, respectively its lower market value.

Accordingly, the maximum inventory value represents the inventory's acquisition costs or its production costs. In case these costs exceed the inventory's market value at the balance sheet date, the latter lower market value must be applied. In order to determine the inventory's acquisition or production cost, various methods exist.

It is at the corporate taxpayer's discretion to determine which method shall apply (e.g. weighted average method, first in first out [FIFO], last in first out [LIFO], highest in first out [HIFO]).

Participation relief

Participation relief is the name generally attributed to the tax relief on qualifying dividend income and capital gains from the disposal of a subsidiary. Participation relief is not an outright tax exemption, but rather a tax abatement mechanism. It is therefore also commonly referred to as 'participation deduction' or 'participation exemption'.

Participation relief is a percentage deduction from CIT that is equal to net participation income divided by taxable income. Net participation income consists of the gross participation income from qualifying dividends and (usually) qualifying capital gains less related administration and financing costs and any depreciation of the participation that is linked to the dividend distribution. In most cases, participation relief results in a full exemption of participation income from CIT, or one close thereto. Note that participation relief may be diluted in certain cases (e.g. if tax loss carryforwards are offset).

The participation relief on dividend income is mandatory at the federal CIT as well as at the cantonal/communal level. The participation relief on capital gains is voluntary for cantonal/communal tax purposes, but nonetheless implemented by all cantonal tax acts. Specific privileged cantonal/communal tax regimes may foresee more favourable rules for dividend income and capital gains than the participation relief (*see Privileged cantonal tax regimes in the Tax credits and incentives section*).

Dividend income

Dividends qualifying for participation relief are those from participations representing at least 10% of the share capital or 10% of profits and reserves of another company or those having a market value of at least CHF 1 million. Note that there is neither a minimum holding period nor a requirement that the dividend paying subsidiary is liable to income tax in its jurisdiction of residence.

Capital gains

Capital gains derived from the disposal of a qualifying participation are generally entitled to participation relief if the following conditions are cumulatively met:

- The participation sold was owned by the company for a period of at least one year.
- The participation sold constitutes at least 10% of the share capital or 10% of profits and reserves of the underlying subsidiary. If a residual participation is less than 10% due to a previously qualifying partial sale, further participation relief on a capital gain is only possible if the residual participation's market value at the beginning of the year amounted to at least CHF 1 million.

It is noteworthy that capital gains are only entitled to participation relief to the extent the sales price exceeds the original investment costs (commonly also referred to as 'acquisition costs') of the participation, whereas the so-called 'recaptured depreciation' (i.e. the amount of former depreciations) is taxable.

Interest income

Interest income earned is taxable income. It is of no relevance whether the payment of the interest was made by a related party (affiliated company or shareholder) or by a third party (*see Interest expense in the Deductions section*).

Switzerland

Royalty income

Royalty income represents taxable income. It is generally subject to ordinary CIT at the federal, cantonal, and communal level. As an exception to the rule, the canton of Nidwalden has introduced a patent box regime. This regime provides for a lower taxation of royalty income from the exploitation of intangible property at the cantonal and communal level.

Foreign exchange gains

Realised foreign exchange gains in relation to a transaction (transaction gains) are included in the tax basis of a corporation as taxable. Realised and, as a result of the prudence principle of the Swiss accounting rules, unrealised transactional foreign exchange losses are tax deductible. Based on a federal court decision in 2009, foreign gains (or losses) resulting from the translation of financial statements in a foreign (functional) currency to Swiss franc (presentation currency) are not taxable (respectively tax deductible).

Foreign income

Swiss tax resident corporations are basically taxed on their worldwide income. However, income attributable to a foreign PE (i.e. a PE outside of Switzerland) is not taxed in Switzerland. It may only be taken into account to determine the applicable tax rate, in case progressive tax rates apply. The same rule applies for income from real estate property situated abroad.

Dividends, interest, and royalties from Swiss or foreign sources are included in taxable income. However, in certain cantons, special methods of assessment may apply for dividend and other income originating outside Switzerland. For dividend income, a relief generally is available at the federal income tax level as well as at the cantonal/communal level (*see Participation relief above*). The irrecoverable portion of foreign WHT of most treaty countries can be credited against the related Swiss income taxes on the same income. Foreign WHT of non-treaty countries generally is not creditable, but is deductible for income tax purposes.

There are no controlled foreign company (CFC) rules in Switzerland. Consequently, undistributed income of foreign subsidiaries is usually not taxed in Switzerland (*see Controlled foreign companies [CFCs] in the Group taxation section*).

Deductions

The statutory accounts of a Swiss company are the basis for determining taxable income. To be tax deductible, an expense has to be booked in the statutory accounts accordingly.

Generally, all business expenses that are booked in the statutory accounts are tax deductible, assuming they are economically/commercially justified from a tax perspective. If an expense is not a justifiable business expense in the sense of the tax law, it will be added back to taxable income. Examples typically include excessive depreciation, non-justified payments to related parties (e.g. hidden profit distributions), etc.

Depreciation and amortisation

Maximum depreciation/amortisation rates allowed for tax purposes are issued by the Swiss Federal Tax Administration. Higher depreciation/amortisation is allowed for

tax purposes if the taxpayer can prove that such higher depreciation/amortisation is required (not only allowed) from a statutory accounting perspective. Some cantons follow the federal guidelines, whereas some cantons apply their own (more liberal) depreciation/amortisation rates.

The following summary of the rates specified by the Swiss Federal Tax Administration provides the general range of tax-accepted depreciation:

Assets	Declining-balance (%)	Straight-line (%)
Commercial buildings:		
Buildings alone	4	2
Buildings and land combined	3	1.5
Equipment:		
Office furniture and equipment	25	12.5
Computer hardware and software	40	20
Other assets:		
Motor vehicles	40	20
Intangible assets	40	20

Some cantons (e.g. Basel-City, Bern, Grisons, Zurich) take a more liberal approach and even permit, for tax purposes, an immediate write-down of certain assets (including fixed assets) to 20% or nil of the purchase price in the first year, provided that such write-downs do not, in the aggregate, result in a drastic decline in taxable income or even a tax loss. For tax purposes, such immediate write-downs must be booked in the statutory accounts and generally disclosed in the tax return. As the cantonal tax authorities are responsible for assessing not only cantonal/communal CIT but also federal CIT, the immediate write-down will typically be accepted for federal CIT purposes as well.

Goodwill

Only acquired goodwill (derivative goodwill) may be capitalised in the statutory accounts and be amortised. Amortisation is generally allowed straight-line over five years. Special limitations apply to acquired shares, where the purchase price for these shares partly represents inherent goodwill.

Start-up expenses

The Swiss code of obligations does not contain any specific Swiss statutory accounting provision with regard to start-up expenses. For Swiss statutory accounting purposes, start-up expenses shall be expensed as incurred. For Swiss CIT purposes, business related start-up expenses as booked in the statutory profit and loss statement are likely fully tax deductible.

Interest expense

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliated company or shareholder) has to reflect the fair market rate and is subject to limitations (*see Thin capitalisation in the Group taxation section*).

With respect to related parties, the Swiss Federal Tax Administration annually issues safe harbour interest rates to be used on loans denominated in Swiss franc on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove with hard facts that the rates used are

Switzerland

at arm's length and more appropriate in the present case. The cantons usually follow these federal guidelines.

The safe harbour rules for loans denominated in Swiss franc applicable as of 1 January 2017 are as follows:

For loans to related parties	Minimum interest rate (%)
Financed from equity	0.25
Financed from debt (actual costs plus at least):	
On amount up to and including CHF 10 million	0.50
On amounts of more than CHF 10 million	0.25
But in all cases at least	0.25

For loans from related parties	Maximum interest rate (%)	
Type of loan	Home construction/agriculture	Industry and business
Real estate loans:		
A loan up to the amount generally acceptable for mortgages (i.e. $\frac{2}{3}$ of the market value of the real estate)	1.00	1.50
Rest, whereby the following maximum interest rates for debt are applicable:		
Land, villas, condominiums, vacation homes, business premises up to 70% of the market value	1.75*	2.25*
Other real estate up to 80% of the market value		
Operational loans up to CHF 1 million:		
Granted to trading and production companies	-	3.00*
Granted to holding and asset administration companies	-	2.50*
Operational loans above CHF 1 million:		
Granted to trading and production companies	-	1.00*
Granted to holding and asset administration companies	-	0.75*

* In calculating the amount of the maximum interest permissible from a tax perspective, any potentially existing hidden equity (under Swiss thin capitalisation rules) has to be considered.

Bad debt provision

Based on a longstanding practice in Switzerland, it is admissible to set up a statutory accounting provision for specific impaired receivables, which will be accepted for income tax purposes. Unlike most other countries, it is also possible to account for an additional ('lump sum') bad debt provision of 5% on all domestic and 10% on all foreign receivables (i.e. a provision in addition to the provision for specific impaired receivables), except for inter-company receivables and receivables to the public, enabling the taxpayer to defer the related tax liability until this provision has been released. Some cantons, such as Zurich, accept an even higher reserve (i.e. 10% on domestic and 20% on foreign receivables). This additional bad debt provision may have the character of a 'hidden' (i.e. undisclosed) reserve and is appropriate because the Swiss statutory accounting standards favour prudence over true and fair view accounting principles.

Obsolete inventory provision

Similarly to the bad debt provision, it is possible to account for a 'hidden' (i.e. undisclosed) reserve on a company's inventory. This provision, which must also be booked in the statutory accounts, is accepted for tax purposes (similar to the bad debt

provision). Specifically, a company may book a provision for specific obsolete inventory as well as a general provision of 33.3% of the inventory value after deduction of the obsolete inventory.

Charitable contributions

At the federal level, charitable contributions of up to 20% of the net profit (after tax) of a company are tax deductible, provided certain criteria are met. In particular, the charitable contribution has to be remitted to (i) Swiss legal entities that are exempt from taxation based on their public welfare or exclusively charitable objective or to (ii) the Swiss Federation, a Swiss canton or municipality, or their agencies (*Anstalten*). The cantons usually apply the same rules and similar thresholds.

Sponsoring contributions are only tax deductible if commercially justified (without specific thresholds).

Royalties

Royalty payments are generally deductible for tax purposes as long as the royalty rate is at arm's length.

Costs of employee share plans and stock option plans

The cost of employee share plans and stock option plans are generally deductible, assuming the employees eligible for the plan are employed by the Swiss company. The same holds true for the recharge of costs for plans covering local employees.

Costs for job-related training and continuing education of employees

As far as they are recognised as an expense in the statutory books, costs incurred for job-related training and continuing education of employees are generally tax deductible.

Fines and penalties

Under Swiss tax law, tax fines are not tax deductible. The potential tax deductibility of other fines or penalties has to be analysed with respect to the specific case.

Tax expenses

Corporate income and capital taxes paid to the federal government, as well as to the cantons and the municipalities, are tax deductible. Indirect taxes (e.g. real estate transfer tax) are tax deductible as well.

Net operating losses

Tax losses can be carried forward for a maximum of seven years and can be offset against the taxable income of the following seven years. There is no carryback of tax losses in Switzerland.

Payments to foreign affiliates

Management and services fees paid by a Swiss company to a related party are generally tax deductible as long as the fees are at arm's length.

Group taxation

Tax is levied on each corporation as a separate entity. A parent company and its Swiss subsidiaries are taxed separately, and only the dividends from the subsidiaries (but not their profits) are taxable in the parent company's hands. However, usually for

Switzerland

dividend income, participation relief is available (*see Participation relief in the Income determination section*). For corporate income and capital taxes, no rules on group taxation exist.

Transfer pricing

So far, Switzerland has not introduced specific transfer pricing regulations. There is, however, an increasing awareness of the issue and concern on the part of the Swiss tax authorities that taxpayers may transfer profits without sufficient economic justification either to countries with strict transfer pricing rules and documentation requirements in order to avoid challenges by the respective local tax authorities or to offshore locations. In this context, Swiss tax authorities take an increasing interest in a company's transfer pricing position in order to defend their own position. Some cantonal, as well as the federal, tax authorities have started to particularly focus on low risk/low profit entities located in Switzerland.

Switzerland follows the OECD Guidelines as closely as possible and recognises the arm's-length principle based on interpretation of actual legislation. To clarify transfer pricing issues, Switzerland offers an informal procedure for agreeing to pricing policies in advance. Such agreements are subject to the spontaneous exchange of information (*see Automatic information exchange in the Other issues section*).

Thin capitalisation

Swiss thin capitalisation rules are, in general, only applicable for related parties. In case of a thin capitalisation, the related party debts can be treated as taxable equity. The respective circular letter issued by the Swiss Federal Tax Administration provides for debt-to-equity ratios as safe harbour rules. As an example, the debt-to-equity ratio is generally fixed at 6:1 for finance companies (safe harbour). Interest paid on loans that exceed the relevant ratios are generally not tax deductible; further, such interest may be deemed as a hidden distribution subject to Swiss WHT. There are no limitations on the financing of Swiss corporations by independent third parties (e.g. banks).

Interest rates paid to affiliated companies are also subject to periodically fixed safe harbour interest rates (*see Interest expense in the Deductions section*). The tax deduction of interest in excess of the permitted safe harbour rate may be disallowed and treated as a hidden distribution subject to Swiss WHT.

Controlled foreign companies (CFCs)

In Switzerland, no CFC or 'subject to tax' rules exist. Foreign companies are therefore recognised for Swiss tax purposes if they are managed and controlled offshore and are not set up purely for the reason of avoiding Swiss taxes.

Tax credits and incentives

Generally, cantons offer competitive CIT rates for cantonal and communal tax purposes. Depending on the specific cantonal and communal tax location in Switzerland, the ordinary overall (federal, cantonal, and communal) CIT rates applicable on profit before tax may vary between 11.5% and 24.2% (*see the Taxes on corporate income section*). The cantons continually try to improve their attractiveness as business locations. It is at the sole discretion of the cantons to credit CIT against the capital tax to reduce the overall tax burden (*see Capital tax in the Other taxes section*). As a further example, the canton of Nidwalden introduced a tax relief for certain licence income (so-called 'patent box'), whereupon net licence income from the use

of intangible assets is taxed separately at a reduced CIT rate of one-fifth of the regular cantonal/communal rate (*see Royalty income in the Income determination section*).

In addition, many cantons offer tax incentives for newly established companies or for expansion investments, such as tax holidays or significant tax relief for cantonal and communal tax purposes for up to ten years. In some specific economic development regions and regional centres, a tax holiday may even be granted for federal CIT purposes if certain conditions are met.

Privileged cantonal tax regimes

Many cantons offer privileged corporate tax regimes. Upon request, it is usually possible to get an up-front confirmation from the relevant cantonal tax authorities that the planned business activities of an entity are meeting the requirements as foreseen by the relevant cantonal tax laws for a specific privileged tax regime.

One can expect that 'tax proposal 17' (TP17) will abolish the privileged cantonal tax regimes, replacing them with other measures. Furthermore, transitional rules will be available (*see Corporate tax reform III / Tax proposal 17 in the Significant developments section*). The content of TP17 is still in the drafting process, and it has not yet been defined by when TP17 shall enter into force. The federal government has, however, announced that the Federal Council will determine the cornerstones of TP17 in June 2017 and decide on the next steps.

Holding company tax regime

A qualifying holding company is exempt from all cantonal/communal CIT (with the exception of income from Swiss real estate, which is subject to tax after deduction of typical mortgage expenditures on such real estate).

Consequently, a holding company is, in principle, only subject to an effective CIT rate of 7.83% (i.e. federal CIT rate) prior to participation relief for qualifying dividends and capital gains. Further, usually a reduced capital tax rate at the cantonal/communal level applies.

Companies that meet the following conditions are eligible for the holding company tax status:

- The primary purpose of the company must be to hold and to manage long-term equity investments in subsidiaries, and this purpose must be stated in the by-laws.
- The company must not be engaged in a commercial activity in Switzerland.
- The company must pass an alternative asset or income test, whereby either two-thirds of the company's assets must consist of substantial shareholdings or participations or two-thirds of total income of the company must consist of participation income (dividend income or capital gains) from such shareholdings and participations.

An advance confirmation is obtainable from the cantonal tax authorities clarifying that a specific company will qualify for the criteria of the holding company status as foreseen by the relevant cantonal tax laws prior to forming such holding company.

Domicile company tax regime

Companies that only carry out administrative functions in Switzerland but have no commercial activities are typically eligible for the domicile company tax status.

Switzerland

Insofar as a company fulfils the above-mentioned criteria, it may apply with the cantonal tax authorities for taxation based on the domicile company tax regime, which, if applicable, has the following implications at the cantonal/communal CIT level:

- A modest portion of foreign-source income (i.e. from 0% to 15%) is subject to tax in accordance with the importance of the administrative function in Switzerland.
- Income from qualifying participations (including dividends, capital gains, and re-evaluation gains) is usually tax exempt (whereas losses deriving from qualifying participations usually are not tax deductible).
- All income from Swiss sources is taxed at ordinary rates.
- Expenditures that are justified for business purposes are deductible from the income to which they have a business correlation.
- Reduced capital tax rates usually are applicable.

The conditions to qualify as a domicile company vary from canton to canton. This is particularly the case with regard to determining the percentage of income from foreign sources subject to tax in Switzerland and to the definition of exactly what type of income is considered foreign-source income.

A domicile company can be expected to be subject to an effective tax rate of 7.83% to 11% on foreign-source income.

Mixed trading company tax regime

The mixed trading company tax status, which is very similar to the domicile company tax status, was given different names by the cantons. Internationally, it is most often referred to as the 'mixed trading company' tax status.

Contrary to a company benefiting from the classical domicile company tax status, a company benefiting from the mixed trading company tax status is allowed to undertake limited commercial activities in Switzerland. As a general rule, at least 80% of the income from commercial activities of a mixed trading company must derive from non-Swiss sources (i.e. a maximum of 20% of income may be linked to Swiss sources). Many cantons additionally require that at least 80% of the costs must be related to activities undertaken abroad.

Insofar as a company will fulfil the above mentioned criteria, it may apply with the relevant cantonal tax authorities for an advance confirmation that it will be entitled to the mixed trading company tax status. Depending on the concrete Swiss activity and infrastructure, the portion subject to cantonal and communal income taxes generally varies between 5% and 25% of the foreign-source income and is normally higher than it is for domicile companies. The exact portion, based on the specific business activities of a company, needs to be clarified with the responsible cantonal tax authorities.

Foreign tax credit

Swiss tax resident corporations may suffer foreign non-recoverable WHTs on dividend, interest, and royalty income derived from foreign sources. As such foreign-source income is generally subject to corporate income taxation in Switzerland, a double taxation occurs. In case a DTT exists and in order to reduce or to eliminate double taxation, Switzerland usually applies the credit method. Specific conditions and formalities will need to be met to benefit from foreign tax credits.

Withholding taxes

This section shall provide a general overview and an indication of the residual WHT on outbound payments from Switzerland. There might be certain exceptions or further reductions available in the DTT, which, for the sake of clarity, are not reflected in the table below. Accordingly, the table below does not replace a thorough assessment of a specific case based on the applicable DTT in force.

The statutory rate of Swiss WHT is 35%. Relief, if any, is generally granted by refund. With respect to dividends between qualifying related companies, a mere notification/reporting procedure may be requested for the fraction of the Swiss WHT exceeding the residual WHT. The table further below shows the residual/remaining tax for the recipient. Credit for the unrelieved portion of Swiss WHT may be available in the country of the recipient.

In Switzerland, there is no WHT on interest deriving from regular loan agreements. Swiss WHT of 35% is only levied on interest paid by banking institutions (or paid by entities tax-wise qualified as 'banking institutions') to non-banks, interest on bonds, and interest on bond-like loans. The residual rates in the table below show the standard treaty rates and do not reflect further reliefs available in certain DTTs (e.g. on traded bonds or other traded securities).

Many of the DTTs concluded between Switzerland and other jurisdictions contain a full relief if dividends or interest is paid to governments (including political subdivisions and other governmental institutions), central banks, or pension funds.

Note that in the DTTs concluded between Switzerland and other jurisdictions, the reduced WHT for substantial holdings usually is only available if the recipient of the dividend is a corporate body (e.g. not taxed as a partnership).

Interest paid on CoCos and on write-off bonds (bonds with claim waiver) of systematically important banks is exempt from Swiss WHT. The WHT exemption is restricted to bonds issued by the respective institutions between 2013 and 2021. Additionally, interest of certain bail-in bonds issued by the respective institutions between 2017 and 2021 is not subject to WHT. These bonds must, furthermore, fulfil specific criteria in order to benefit from the WHT exemption.

Capital contribution principle

The capital contribution principle allows the repayment of qualifying shareholders' capital contributions without deduction of Swiss WHT at the level of the distributing company and without income tax implications at the level of Swiss individual shareholders (holding the shares as private wealth). In general, the capital contribution principle applies for premiums, additional paid-in capital, and contributions into the reserves of a company without increasing the nominal share capital.

Switzerland

Treaties in force (as of 1 June 2017)

Recipient	Dividends			Interest (%)	Royalties (%) (1)
	Substantial holdings				
	Portfolio (%)	(%)	Minimum shareholding (%)

* Switzerland and the European Union (EU) signed an Agreement regarding the Introduction of the Global Automatic Exchange of Information Standard on 27 May 2015, applicable as of 1 January 2017. The Agreement signed is a protocol of amendment that replaces the Savings Agreement between Switzerland and the European Union, which has applied since 1 July 2005. Article 9 of the Automatic Exchange of Information Agreement provides the same benefits as the former Savings Agreement, as follows:

Upon request, Swiss WHT on dividends paid by a Swiss subsidiary company to its EU parent company may be reduced to 0% (reduction at source) and is only subject to a notification/reporting procedure, provided the following key conditions are cumulatively met:

- Direct minimum holding of 25% of the subsidiary's capital for at least two years.
- Both companies are subject to CIT.

Upon request, WHT on interest and royalty payments made between associated companies or their PE resident, respectively situated in Switzerland and the European Union, may be reduced to 0% (reduction at source) in the source state, provided the following key conditions are cumulatively met:

- Direct minimum holding of 25% for at least two years (parent/subsidiary) or direct holding by a third company of minimum 25% in the capital of both companies for at least two years (sister companies).
- Both companies are subject to CIT.

The application of the Bilateral Agreement is subject to foreign and Swiss misuse conditions.

DTTs between Switzerland and EU countries with more favourable tax treatment of dividend, interest, and royalty payments remain unaffected.

Notes

1. There is no Swiss WHT on royalties, licences, and similar fees payable by Swiss individuals or corporations (provided that the dealing at arm's-length principle is met).
2. The statutory Swiss WHT rate of 35% is levied but refunded, provided that the respective earnings are declared as income for tax purposes.
3. Between Swiss group companies, Swiss WHT of 35% is usually fully refundable. Furthermore, in many cases, the tax liability can be met by the notification/reporting procedure. For this purpose, a direct investment of at least 20% in the share capital of the payer of the dividend is required.
4. 20% minimal shareholding plus foreign investment of at least 200,000 United States dollars (USD).
5. Only applicable if holding period is at least 12 months.
6. 15% residual tax for companies with more than 10% shareholding if the company receiving the dividend is directly or indirectly controlled by a shareholder not resident in the European Union or Switzerland and cannot prove that the company is not set up only to benefit from the 0% WHT on dividends.
7. 0% WHT if minimum shareholding is at least 50% for at least six months. 5% WHT if minimum shareholding is at least 10% for at least six months.
8. 5% WHT if the shareholding of 10% was held less than two years; 0% WHT if the shareholding of 10% was held longer than two years.
9. Only applicable if holding period is at least 24 months.
10. 5% WHT if dividend recipient is a corporate body; 10% WHT if dividend recipient is an individual.
11. 20% minimal shareholding plus foreign investment of at least CHF 200,000.
12. 10% WHT for shareholdings between 20% and 50%; 7% WHT for shareholdings of more than 50%.
13. Full relief if paid to a related entity in the form of a corporation.
14. 0% WHT if certain criteria are met.
15. New DTT between Switzerland and Liechtenstein, in force since 22 December 2016 and applicable as of 1 January 2017.

16. New DTT between Switzerland and Oman, in force since 13 October 2016 and applicable as of 1 January 2017.
17. Switzerland levies a WHT on interest paid on bonds issued in Switzerland and on bank accounts with Swiss banks. Generally, no WHT is levied on interest paid on loans. However, from a Swiss WHT perspective, a loan may be requalified as a bond under certain circumstances.

Tax administration

Taxable period

The tax year is the business year. Thus, the basis for corporate taxation is the applicable accounting period, which may end at any date within a calendar year.

Tax returns

The tax system for corporate income and capital taxes is based on taxpayers' declarations, with subsequent assessments being issued by the tax authorities on the basis of the tax returns filed. The tax return has to be filed annually (an exemption exists in the first business year in case an extended business year shall apply). The filing deadlines vary from canton to canton (usually between six and nine months after the close of the business year). Companies are initially assessed on a provisional basis, with the final assessments being issued after the tax base was either subject of a tax audit or declared final by the authorities.

Payment of tax

Unless instalment payments are specifically requested, federal, cantonal, and communal taxes on income and capital are, in most cantons and for federal tax purposes, payable only upon receipt of a demand based on a provisional or final assessment.

Note that cantonal exceptions apply. As an example, based on the date of maturity of the respective tax year (30 September), the canton of Zurich levies late payment interest to the extent that the full (final) tax amount had not been paid in time (independent from any earlier provisional tax invoices). About one month before the due date, a (provisional) tax bill based on the latest tax return filed or the assessment of the preceding period is sent to the taxpayer. Payment is usually made in two or three instalments. If the entire amount is paid up front, a discount may be granted.

The provisional federal CIT is usually due by 31 March of the year following the tax period at question. The due date of the final federal CIT and the provisional or final cantonal CIT varies.

Tax audit process

Swiss CIT law does not outline specifics of the tax audit process. At first, the tax authorities review the tax return and its enclosures as filed by the taxpayer. Such review is usually desk-related work. The competent tax authorities are obligated and entitled to clarify all relevant information necessary to assess taxpayers on a true and complete base. The tax authorities may request further information/documentation or may inspect the taxpayer's premises.

Statute of limitations

As a general rule, the right to assess a taxpayer in relation to corporate income and capital taxes expires five years after the end of the corresponding tax period (relative statute of limitations). Under certain conditions (e.g. where the relative statute of limitations is interrupted), the absolute statute of limitations of 15 years applies.

Switzerland

In case of tax fraud ('*Steuerbetrug*') or tax evasion ('*Steuerhinterziehung*'; e.g. where specific information was not available to the tax inspector at the time of the assessment), finally assessed tax periods can be reopened. The statute of limitations to reopen finally assessed tax periods is ten years after the end of the corresponding tax period.

Topics of focus for tax authorities

The Swiss tax authorities do not communicate specific topics of focus. The tax authorities do normally start their assessment with reviewing the tax return and its enclosures as filed by the taxpayer (*see Tax audit process above*).

Other issues

Reorganisations

Most corporate reorganisations (e.g. mergers, de-mergers, transfer of business assets within a group of companies, vertical and horizontal spin-off of business or part of business, share-for-share transactions and cross-border reorganisations where the Swiss tax residence is maintained, and like-kind exchange of participations) are typically possible without triggering adverse Swiss tax consequences (tax neutrality). In addition, special rules provide for a legal framework to tax neutrally substitute assets and qualifying shareholdings. For reorganisations, it is best practice to apply for advance tax rulings with the competent tax authorities.

Foreign Account Tax Compliance Act (FATCA)

In 2013, Switzerland and the United States (US) signed a bilateral FATCA agreement. The FATCA agreement will help Swiss financial institutions by means of simplifications in the implementation of the US FATCA legislation. The FATCA agreement and the implementing Swiss act entered into force on 2 June 2014 and 30 June 2014, respectively.

The FATCA agreement shall ensure that accounts held by US persons with Swiss financial institutions are disclosed to the US tax authorities either with the consent of the account holder or through ordinary administrative assistance channels (no automatic information exchange).

Automatic information exchange

In view of the OECD's developments on a new standard for the automatic exchange of information, Switzerland will switch to an automatic exchange of information between the competent authorities on a reciprocal basis.

Switzerland has agreed on the automatic exchange of information in respective agreements with numerous partner states (e.g. the EU member states, many offshore countries, as well as most of the OECD member states).

The first automatic exchange of information between Switzerland and its partner states shall occur in 2018.

WHT agreements

Switzerland has concluded WHT agreements with the United Kingdom and Austria that define a WHT procedure for the future and a tax-related regularisation of the past related to investment income of foreign bank clients. On 1 January 2017, these two WHT agreements were repealed. This repeal is a result of the agreement with the

European Union on the automatic exchange of information, which entered into force on 1 January 2017.

Significant developments

New value-added tax (VAT) regime on cross-border sales of business-to-consumer (B2C) electronic services

Starting 1 May 2017, foreign corporate sellers without a fixed place of business in Taiwan that sell electronic services to Taiwan individual consumers will need to perform tax registration, file VAT returns, and pay corresponding VAT payable if their annual sales exceed the promulgated threshold of 480,000 new Taiwan dollars (TWD).

Anti-tax avoidance rules

The Income Tax Act was amended in July 2016 to include anti-tax avoidance rules in Article 43-3 (Controlled Foreign Company [CFC]) and Article 43-4 (Place of Effective Management [PEM]) of the Income Tax Act.

In general, profits retained at the CFC level, which is located in a low tax rate jurisdiction and without commercial substance, will be taxed in advance at the Taiwan parent company level. In the past, taxation of foreign investment income is deferred until the Taiwan parent company receives dividend income. Going forward, qualified investment income will be deemed distributed and taxable in Taiwan in advance. As of 31 May 2017, the Ministry of Finance has announced draft 'Regulations Governing Controlled Foreign Companies', but the final version has yet to be promulgated.

For PEM rules, under this new tax regime, if a foreign company meets all three criteria triggering the PEM definition, including (i) decision making location, (ii) record keeping and maintenance location, and (iii) actual operating location are all in Taiwan, the foreign enterprise will be deemed as having its head office in Taiwan and will be subject to tax assessment in accordance with the Taiwan Income Tax Act and other tax regulations. The 'Regulations Governing Places of Effective Management' was announced by the Ministry of Finance in May 2017.

The CFC and PEM taxation mechanisms have yet to take effect, and it is currently anticipated that the new mechanisms will not take effect until at least 2018.

Tax treaties

Within the past year, Taiwan's tax treaty network has increased to include treaties with Canada, Japan, and Poland, all of which entered into effect starting 1 January 2017. Taiwan has also signed a treaty with China; however, this tax treaty has not yet come into effect.

Taiwan

Taxes on corporate income

The corporate income tax (CIT) rate in Taiwan is 17%.

Resident companies in Taiwan are taxed on their worldwide income as follows:

Taxable income (TWD)	Tax thereon
Up to 120,000	Exempt
120,001 and over	17% of total taxable income

A non-resident company is taxed on income derived from Taiwan sources. A non-resident company with a fixed place of business (FPOB) or business agent in Taiwan is taxed similarly to a resident company (i.e. subject to filing of an annual CIT return based on the same CIT rate provided above). A non-resident company having no FPOB or business agent in Taiwan is subject to withholding tax (WHT) at source on its Taiwan-sourced income. WHT rates on dividends, interest, and royalties may be reduced if the recipient is a tax resident of a tax treaty country and the relevant treaty provides for a reduced rate. *See the Withholding taxes section for more information.*

Tonnage tax system

A qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system, where a lump sum tax is calculated on the net tonnage of their fleet. Once the application is approved, the enterprise must remain under the tonnage tax system and cannot switch to the regular tax system at its discretion for ten consecutive years. Furthermore, loss carryforwards and tax incentives are not eligible under the tonnage tax system.

Profit retention tax

An additional 10% profit retention tax is imposed on any current earnings of a corporation that remain undistributed by the end of the following year. Taiwan branches of foreign companies are not subject to profit retention tax.

Imputation tax system

Taiwan operates an imputation tax system to eliminate double taxation on earnings of a corporation. The 17% CIT and 10% profit retention tax already paid by the corporation can be distributed to the resident individual shareholders as tax credits to offset against their individual income tax. However, the tax credits distributable to shareholders are subject to certain limitations. Currently, the imputation tax credit is reduced by one-half.

Non-resident shareholders may credit the 10% profit retention tax previously paid by the investee company against the dividend WHT where the dividends are distributed from retained earnings that have already been subject to the 10% profit retention tax. Please note that credit for profit retention tax from dividend WHT is calculated based on a prescribed formula and subject to a ceiling. The ceiling is one-half of the original amount. That is, the ceiling of 10% profit retention tax creditable against dividend WHT is computed as 'dividends distributed from retained earnings where 10% profit retention tax has already been levied' x 10% x 50%.

Income basic tax (IBT)

All Taiwan resident companies, as well as non-resident companies with an FPOB or business agent in Taiwan, should calculate IBT if they earn certain income that is tax-

exempt. The basic income of a company is the amount calculated in accordance with a formulae stipulated by the government, with a deduction of TWD 500,000. The IBT rate is 12%. If the IBT amount is greater than the regular CIT amount, taxpayers must pay income tax based on the regular CIT amount plus the difference between the IBT amount and the regular CIT amount. On the other hand, if the regular CIT amount is greater than the IBT amount, no special action is required.

Corporate residence

A company is a resident of Taiwan for CIT purposes if it is incorporated in Taiwan. A non-resident company that has an FPOB or business agent in Taiwan is obligated to file a CIT return in Taiwan on its Taiwan-sourced income.

Permanent establishment (PE)

The term 'permanent establishment' only exists in the underlying double tax agreements (DTAs) signed with Taiwan. Taiwan domestic tax regulations only refer to an FPOB and business agent, which generally follows the definitions of an FPOB and agency PE in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Business tax

All sales of goods and services in Taiwan, as well as the importation of goods into Taiwan, are subject to business tax. There are two types of business tax systems: value-added tax (VAT) and gross business receipts tax (GBRT).

Sellers and service providers are generally obligated to pay business tax for the sales of goods or services within Taiwan unless the law provides otherwise. For importation of goods, the business tax will be paid by the goods receivers or buyers via customs. For importation of services sold by foreign companies to Taiwanese buyers, business tax shall be paid by the service buyers. However, the service buyer (corporate entity) will not be required to pay business tax if it is exclusively engaged in taxable transactions subject to either 5% or 0% VAT.

Despite the above, Taiwan has formally implemented a new VAT mechanism starting 1 May 2017 for cross-border sales of B2C services. Under the new mechanism, sales of cross-border services by corporate sellers to individual buyers require the foreign companies to register for VAT purposes in Taiwan and pay VAT.

Value-added tax (VAT)

VAT is applicable to general industries, and the VAT rate is 5%. Under the VAT system, each seller collects output VAT from the buyer at the time of sale, deducts input VAT paid on purchases from output VAT, and remits the balance to the tax authority.

Gross business receipts tax (GBRT)

GBRT is applicable to specified industries (e.g. financial institutions, small businesses). For investment trust companies, securities and futures firms, short-term commercial paper enterprises, and pawnshops, the rate is 2%. The GBRT rate on revenues derived from the core business operations of banks and insurance enterprises is 5%. For re-insurance enterprises, the rate is 1%.

Taiwan

Customs duties

Taiwan uses the Customs Cooperation Council Nomenclature (CCCN) to classify goods and set duty rates. The customs duty is payable by the consignee or the holder of the bill of lading for imported goods, and is based on the dutiable value or the volume of goods imported.

Commodity tax

Commodity tax (excise duty) is levied on certain commodities, as specified in the Commodity Tax Act (including rubber tyres, beverages, cement, plate glass, oil and gas, electrical appliances, and vehicles), at the time when such goods are dispatched from a factory or when imported. Tax rates vary from 8% to 30% and are applicable to different types of commodities based on the value of the goods or its volume in specific circumstances.

Type of commodity	Tax rate
Rubber tyres	10% or 15%
Beverages	8% or 15%
Cement	TWD 280 to TWD 600 per ton
Plate glass	10%
Oil and gas	TWD 110 to TWD 6,830 per kilolitre or TWD 690 per ton
Electrical appliances	10% to 20%
Vehicles	15% to 30%

Property tax

Land and buildings are annually assessed for tax based on their officially assessed values as determined by the government authorities at the applicable rate. The land value tax rate ranges from 1% to 5.5% of the assessed land value. The building tax rate for commercial properties is 3% to 5% of the assessed value, and the rate for non-commercial properties is 1.2% to 3.6% of the assessed value.

Land value increment tax (LVIT)

The sale of land is currently subject to LVIT and payable by the seller. The tax is levied on the increase in the government-assessed value of the land during the ownership period, adjusted for inflation, at regular progressive rates ranging from 20% to 40%, or a special rate of 10%.

Real property transfer tax

The new real property transfer tax regime is applicable to all properties acquired on or after 1 January 2016, as well as those bought on or after 2 January 2014 if held for less than two years. The taxable base is the market value of the properties reduced by related costs, expenses, and the increase in government-assessed land value for LVIT purposes. A rate of 17% will apply on Taiwanese corporate taxpayers; whereas, a tax rate of 35% or 45% will apply on profit-seeking enterprises with foreign head offices located outside of Taiwan (i.e. Taiwan branch), depending on whether the property is held for more than or less than one year.

LVIT will remain unchanged by the implementation of the new real property transfer tax regime on property transactions. The total amount of land value increment is deducted from real estate transaction income to avoid double taxation. The old property tax regime still applies to properties purchased prior to 2 January 2014, or those bought on or after 2 January 2014 if held for more than two years, where only gain from sale of buildings is subject to CIT assessment, while gain from sale of land is

exempt from CIT assessment, and LVIT applies to increment in government-assessed value of land instead.

Deed tax

Currently, transactions of immovable property involving sale, creation of *Dien*, exchange, bestowal, partition, or acquisition of ownership by virtue of possession are subject to deed tax. The deed tax rates range from 2% to 6%, depending on the types of transactions involved.

Stamp tax

Stamp taxes are imposed on each copy of the following documents executed within the territory of Taiwan (with the following respective tax rates):

- Monetary receipts must have a revenue stamp of 0.4% of the amount received per piece. However, a receipt for the money deposited by the bidder requires a revenue stamp of 0.1% of the amount received per piece.
- Contract or deed for the sale or purchase of movable property must have a revenue stamp of TWD 12 per piece.
- Contractual agreement under which one party agrees to complete a specific piece of work for the other party for consideration must have a revenue stamp of 0.1% of the contract price.
- Contract for the sale, transfer, and partition of real estate must have a revenue stamp of 0.1% of the contract price.

Securities transaction tax

Tax is levied on securities transactions at the rate of 0.3% on gross proceeds from the sale of domestic shares. Trading in corporate bonds and financial bonds issued by Taiwan companies is temporarily exempt from securities transaction tax assessment.

Luxury tax

A 10% luxury tax applies to the sale of passenger cars, private jets, and helicopters valued at TWD 3 million or more, as well as to the sale of yachts that are at least 30.48 metres (100 feet) long. Preserved wildlife products (including turtle shells, hawksbill, coral, ivory, furs, and their products), high-end furniture, and non-refundable memberships worth TWD 500,000 or more are also taxed at 10%.

As of 1 January 2016, luxury tax is no longer levied on sales of real estate properties.

Payroll taxes

There are no payroll taxes other than those for social security contributions outlined below.

Social security contributions

There are compulsory social security programs that require contributions from employers and employees based on monthly insured salary, which is capped at various amounts for labour insurance, health insurance, and pensions. Taiwan social security programs include the following:

- Labour Insurance Program: Where a company hires five or more employees, it is obligated to insure all employees (including domestic and foreign employees) under the labour insurance program run by the government. Companies with less than five employees may also apply for labour insurance coverage for their employees. The premium rate for ordinary insurance is 9.5% on the employee's monthly

Taiwan

insured salary up to TWD 45,800, with an additional 1% levied for unemployment insurance. The employer is required to contribute 70% of this premium.

- **National Health Insurance (NHI) Program:** The premium rate for each insured person is set at 4.69% of a domestic/foreign employee's monthly insured salary up to TWD 182,000. The employer is required to contribute 60% of this premium. Further, the employer bears the cost of both the employee itself and that of the average dependant, which amounts to 1.61 headcount per employee. Further, when the 'monthly taxable salaries actually paid by the employer' exceeds the 'monthly insured salaries' (e.g. due to bonus paid), a 2% supplementary NHI premium will also be imposed on the excess amount and borne by the employer.
- **Labour Pension Program:** An employer needs to make monthly contributions to a domestic employee's individual pension account set up with the Labour Insurance Bureau. The monthly contribution rate borne by the employer should be at least 6% of the employee's monthly insured salary up to TWD 150,000.

Branch income

A non-resident company whose head office is located outside of Taiwan must keep separate books for its branch in Taiwan. A head office or regional headquarters' general and administrative expenses may be allocated to the branch under certain conditions. CIT is assessed only on the branch's profits. A Taiwan branch should complete an annual CIT return.

A Taiwan branch of a foreign company may remit after-tax profits to its foreign head office without further tax due.

Motion picture leasing

A foreign motion picture's branch in Taiwan can deem 45% of its revenue from leasing of motion pictures as cost. However, if a foreign enterprise with no branch office in Taiwan leases motion pictures through agents, 50% of the revenues can be deemed as taxable income.

Deemed profit method

A non-resident company that is engaged in international transportation, construction contracting, provision of technical services, or machinery and equipment leasing within Taiwan, and where the cost and expenses are proven to be difficult to calculate, may apply for advance approval from the National Tax Administration (NTA) to adopt the deemed profit method to determine the taxable income as 10% or 15% of the gross revenues. This will effectively reduce the WHT rate to 2% or 3% on gross revenues once the approval is obtained from the NTA.

Income determination

A Taiwan resident company is taxed on its net income, which is defined as gross annual income after deduction of costs, expenses, losses, and taxes. Except for certain exempt items, income from all sources, including offshore and onshore, is subject to CIT.

A non-resident company is only taxed on its Taiwan-sourced income. Article 8 of the Income Tax Act and the related Guideline defines the types of income that should be regarded as sourced from Taiwan. For example, fees received by a non-resident

company for service performed entirely outside of Taiwan are exempt from income tax assessment, subject to supporting evidentiary documents.

Inventory valuation

Inventory must be valued at cost. If cost exceeds the net realisable value, the latter may be used as the valuation basis. Cost may be determined by the first in first out (FIFO), moving average, weighted average, specific identification, or any other method approved by the tax authorities. Conformity between financial and tax reporting is not required.

Capital gains

Gains on the disposal of fixed assets are taxable as current-year income of the company, with the exception of gains on the sales of land under the old real estate taxation regime. Capital gains on disposal of Taiwanese marketable securities and futures by resident companies and non-resident companies with an FPOB or business agent in Taiwan are exempt from CIT assessment, but are liable for IBT of 12%, with an exemption amount of TWD 500,000. Capital losses may be deducted against capital gains and carried forward for five years. 50% of capital gains can be tax exempt should the securities be held for more than three years. In addition, securities transaction tax is levied on the sales proceeds (*see the Other taxes section*).

Dividend income

Dividends received from resident investee companies by a resident corporate shareholder are not included in taxable income. In addition, the imputation tax credit derived from the dividend income of the investee corporation can be distributed to domestic corporate shareholders, but this tax credit cannot be used to offset the domestic corporation's income tax liability; rather, the tax credits must be recorded in a separate book until they are further distributed to the resident individual shareholders of the domestic corporation.

Dividends received from foreign subsidiaries are taxable, but credits are given for the WHT paid offshore, limited to the incremental tax liability that would result if the dividends were added to the Taiwan corporate shareholder's taxable income and taxed at the Taiwan CIT rate.

Interest income

Interest received on commercial paper and certain other interest-bearing financial instruments is subject to WHT of 10% and 15%/20% for resident and non-resident taxpayers, respectively (*see the Withholding taxes section*). This income should be reported as current-year income, and the WHT paid can be deducted against the income tax payable.

Royalties and technical service fees

Non-resident companies who receive royalties for licensing patents both registered in Taiwan and overseas, trademarks registered in Taiwan, and computer software copyright licensed to Taiwan companies, or who receive technical service fees in relation to construction of factories/plant/power plants to Taiwan companies incorporated as companies limited by shares, can apply for income tax exemption by obtaining advance approval from both the Industrial Development Bureau and the tax authorities. For licensing of patents and technical service fees, the Taiwan licensee company needs to be engaged in designated industries. The amendments to the relevant regulation governing the applicable criteria are effective retroactively for contracts concluded after 1 January 2011.

Taiwan

Foreign income

Taiwan adopts a worldwide tax system to tax its resident companies (including the Taiwan subsidiaries of foreign companies). In theory, taxation on foreign investment income of a Taiwanese company is deferred until cash is repatriated to Taiwan. However, given Taiwan also taxes undistributed profits based on net income shown on the income statement (*see Profit retention tax in the Taxes on corporate income section*), foreign investment income may still be taxed in Taiwan before cash is repatriated back to Taiwan.

Deductions

Depreciation

Depreciation on all fixed assets other than land, including premises, plants (buildings), and equipment, which are used to generate income, is allowed as a deduction. The straight-line, fixed percentage on diminishing book value, sum-of-years-digit, unit-of-production, and working-hour methods are acceptable depreciation methods to the tax office. The useful lives of typical assets are shown below:

Asset category	Useful life (years)
Computer equipment	3
Furniture and fixtures	5
Automobile	5
Building	50

With the approval of the tax authority, a company may revalue its fixed assets each time the government's wholesale price index increases by 25% over the base period. A company's base period is established at the time of purchase of fixed assets or at such time when a company revalues its fixed assets. Any increase in fixed assets may then be depreciated for tax purposes.

Goodwill

Goodwill is commonly realised from merger and acquisition, which should follow the purchase method as defined under Taiwan Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS). Goodwill should be amortised for 15 years if a valuation report is issued by a creditable professional valuation firm and the net identifiable assets are valued separately. However, in practice, the amortisation of goodwill is frequently challenged by the Taiwan tax authority.

Start-up expenses

Start-up expenses during the start-up period can be deducted in the year incurred. The start-up period is from the preparatory stage to the date the business starts to generate significant revenue from its primary business operation.

Interest expenses

Interests on loans that are used for business purposes are deductible in the year incurred. However, for a loan from a non-financial institution, the interest rate shall not exceed 15.6% *per annum*. As for interest on inter-company loans, the deductible amount is subject to the thin capitalisation rule and transfer pricing regulations (*see the Group taxation section*).

Bad debt

Actual losses on bad debts are allowed for deduction when certain legal proceedings or time requirements have been satisfied. The loss should first be charged against the bad debt provision, which should not exceed either 1% of accounts receivable and notes receivable outstanding, or the actual average bad debt ratio for the past three years.

Charitable contributions

Charitable contributions to support national defence, troop morale, contribution to government of any level, and donation made with special approval of the Ministry of Finance (MOF) are not subject to any tax limit. Donations to other parties are subject to prescribed limits under the relevant regulations.

Fines and penalties

Fines and penalties arising from violation of various tax laws are generally not deductible.

Taxes

All taxes, other than income tax, are generally deductible, unless where such taxes are related to tax-exempt income. The tax associated with the acquisition of real estate should be included in the cost of the land or building.

Net operating losses

A company's net operating losses can be carried forward for ten years. Losses cannot be carried back.

Payments to foreign affiliates

Royalties, interest, and service fees paid to a foreign affiliate are subject to WHT. Royalties or service fees paid to a foreign entity may be tax-exempt if certain requirements are met and prior approval is obtained.

Group taxation

Group enterprises meeting certain criteria under the Financial Holding Company Act and Business Mergers & Acquisitions Act may file consolidated tax returns for the Taiwan parent and its first tier Taiwan subsidiaries. For other enterprises, group taxation is not permitted. The Taiwan parent is eligible to file consolidated tax returns if it continuously holds over 90% of the shares of the subsidiaries for 12 months in a tax year.

Transfer pricing

Transfer pricing regulations were established to constrain multinational corporations from leaving their profits in countries with lower tax rates. For applicable companies, the disclosure of related-party transactions in the CIT return and the preparation of a transfer pricing report is required. Upon request, the transfer pricing report will have to be submitted to the Taiwan tax authority within one-month of notice. The transfer pricing report must demonstrate the company's good faith effort to comply with the assessment rules. Without proper reason, failure to comply with such rules will result in additional tax payable and financial penalties. The types of transactions governed by these regulations include the following: transfer of tangible assets, use of tangible assets, transfer of intangible assets, use of intangible assets, rendering of services, use of funds, business restructuring, and other types of transactions prescribed by the MOF.

Taiwan

If related-party transaction amounts exceed certain thresholds laid out below, an advance pricing agreement (APA) with the tax authority may be obtained to eliminate risk of inter-company prices being challenged. The criteria for applying for an APA are as follows:

- The total amount of the controlled transaction covered under the APA is at least TWD 500 million or the annual amount of such controlled transaction is at least TWD 200 million.
- There has been no significant act of tax evasion in the past three years.
- The required documentation for the APA application has been well prepared, including the transfer pricing report.
- Other criteria specified by the MOF are satisfied.

Thin capitalisation

Deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio of 3:1. The thin capitalisation rule generally applies to profit-seeking enterprises, except banks, credit cooperatives, financial holding companies, bills finance companies, insurance companies, and securities companies.

Controlled foreign companies (CFCs)

Currently, profits of overseas subsidiaries held by Taiwan companies are not subject to 17% CIT in Taiwan until such profits are repatriated to Taiwan as dividend income. However, under the new CFC mechanism expected to take effect in the future, qualified investment income will be deemed distributed and taxable in Taiwan in advance, even if profits have not actually been distributed.

Place of effective management (PEM)

Under the new tax regime, if a foreign company meets all three criteria triggering PEM definition, including (i) decision making location, (ii) record keeping and maintenance location, and (iii) actual operating location are all in Taiwan, the foreign enterprise will be deemed as having its head office in Taiwan and will be subject to tax assessment in accordance with Taiwan Income Tax Act and other tax regulations. A foreign enterprise may voluntarily apply to be subject to the PEM taxation mechanism, or the tax authorities may determine whether the PEM taxation mechanism should apply after conducting appropriate audits.

Tax credits and incentives

Certain tax incentives are provided to investors if they are located in prescribed areas, such as science parks, economic processing zones, free-trade-zones, etc. Other tax credits are granted to qualifying companies that invest in specific businesses or industries promoted by the government, such as biotech.

Research and development (R&D) tax incentives

Under the Statute for Industrial Innovation (SII), R&D credits are available for up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses were incurred, including the 10% profit retention tax.

Effective from 1 January 2016 to 31 December 2019, amendments to the SII provide another alternative for companies to claim an R&D credit of 10% of qualifying R&D expenses against income tax payable within a period of three years, starting from the

current year. In addition, to facilitate the circulation and application of innovative R&D results, and to promote industrialisation of innovative technologies, where individuals/companies derive income from transfer or license of their self-developed intellectual property (IP), the amendments also allow the individuals/companies to either deduct qualifying R&D expenses of up to 200% (capped at corresponding income received) within the current year or claim R&D tax credits against income tax payable.

Moreover, according to the Statute for Development of Small and Medium Enterprises (SMEs), enterprises qualifying as SMEs may elect one of the following methods to calculate R&D credits, subject to the 30% cap mentioned above:

- 15% of qualified R&D expenses for the current year, with credits limited to the same year, or
- 10% of qualified R&D expenses for the current year, which can be carried forward for two ensuing years if the 30% cap mentioned above is exceeded.

According to Regulation Governing R&D Investment Tax Credit (ITC) Available to Profit-seeking Enterprises, a single annual application for R&D ITC should be made with the central competent authorities within four months prior to the CIT return filing due date. Information relating to R&D ITC should be provided with the CIT return.

Tax concessions on merger

A number of tax incentives are available under the Mergers and Acquisitions (M&A) Act to encourage M&A activities in Taiwan. Certain taxes, including business tax, deed tax, LVIT, securities transaction tax, and stamp tax, may be exempted or deferred in case of acquisitions, mergers, or corporate divisions (including spin-offs) that meet certain conditions.

After the merger, spin-off, or acquisition, any tax concession previously enjoyed by the merged entities will continue to be applicable to the surviving or newly-created company. However, it is required to manufacture the same products or provide the same services that were originally approved for tax concessions by the merged entities in order to continue the concessions obtained previously.

The unexpired and unutilised net operating losses of the participating entities prior to the merger or spin-off may be carried over to the surviving or newly-created entity according to the percentage of shareholding in the surviving or newly-created company held by all shareholders of the participating entities.

Income tax exemption is available if the shares acquired by a company as a result of transfer of its entire or substantial portion of business or assets to another company, or due to spin-off, is greater than 80% of the consideration of the entire transaction, and all the shares so acquired have been transferred to the shareholders of the transferor.

Free-trade-zones

According to the Statute for the Establishment and Management of Free-trade-zones, foreign companies or their branch offices in Taiwan that apply for establishment in the free-trade-zone or delegate companies already established in the free-trade-zone to store and/or perform simple processing in the free-trade-zone and sell goods to customers within and outside of Taiwan shall be exempted from CIT. However, in the event that the annual domestic sales exceed 10% of the total annual domestic and foreign sales, the portion in excess shall not be exempted from CIT.

Taiwan

Foreign tax credit

Taiwan uses the credit method to avoid double taxation of income. Foreign taxes paid on foreign-sourced income may be credited against a company's total Taiwan income tax liability. However, the credit is limited to the incremental taxes derived from the foreign-sourced income.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations and individuals	N/A	10	10
Non-treaty	20	15/20 (1)	0/20 (2)
Treaty:			
Australia	10/15 (3)	10	12.5
Austria	10	10	10
Belgium	10	10	10
Canada	10/15 (15)	0/10 (16)	10
Denmark	10	10	10
France	10	10	10
Gambia	10	10	10
Germany	10	0/10/15 (10)	10
Hungary	10	10	10
India	12.5	10	10
Indonesia	10	10	10
Israel	10	7/10 (4)	10
Italy	10	10	10
Japan	10	0/10 (14)	10
Kiribati	10	10	10
Luxembourg	10/15 (13)	10/15 (13)	10
Macedonia	10	10	10
Malaysia (5)	12.5	10	10
Netherlands	10	10	10
New Zealand	15	10	10
Paraguay	5	10	10
Poland	10	0/10 (17)	3/10 (18)
Senegal	10	15	12.5
Singapore	(6)	Not prescribed	15
Slovakia	10	10	5/10 (8)
South Africa	5/15 (7)	10	10
Swaziland	10	10	10
Sweden	10	10	10
Switzerland	10/15 (9)	10	10
Thailand	5/10 (11)	0/10/15 (12)	10
United Kingdom	10	10	10
Vietnam	15	10	15

Notes

1. For non-resident enterprises, a 15% WHT applies to interest income derived from short-term bills, securitised certificates, corporate bonds, government bonds, or financial debentures, as well as interest derived from repurchase transactions involving these bonds or certificates. The rate in all other cases is 20%, unless reduced under a tax treaty.
2. Royalties received by foreign enterprises that are specially approved in advance by the government are exempt from income tax.
3. A rate of 10% applies for shareholders that are companies (other than partnerships) with at least a 25% shareholding.
4. 7% of the gross amount of the interest arising in a territory and paid on any loan of whatever kind granted by a bank of the other territory.
5. The WHT rate on technical service fees is reduced to 7.5%.
6. The total tax burden of CIT and dividends tax is not to exceed 40% of the total profits of the company.
7. A rate of 5% applies for shareholders with at least a 10% shareholding.
8. A rate of 5% applies for the use of (or the right to use) industrial, commercial, or scientific equipment.
9. A rate of 10% applies for shareholders with at least a 20% shareholding.
10. A rate of 10% applies to all types of interests, except a rate of 15% applies for interest derived from real estate investment trusts and real estate asset trusts in Taiwan. Tax exemption applies to interests paid to public institutions of the other territory as mutually agreed between the competent authorities of both territories.
11. A rate of 5% applies for shareholders with at least a 25% shareholding.
12. A rate of 15% applies to all types of interests, except a rate of 10% applies for interest received by any financial institution (including an insurance company). Tax exemption applies to interests paid to the authority of the other territory as mutually agreed between the competent authorities of both territories.
13. A rate of 15% applies for shareholders/creditors that are a collective investment vehicle and treated as a body corporate for tax purposes.
14. A rate of 10% applies to all types of interests; however, tax exemption applies to certain interests paid to public institutions of the other territory or paid with respect to debt-claims guaranteed, insured, or indirectly financed by government institutions.
15. A rate of 10% applies for shareholders that are companies with at least a 20% shareholding percentage.
16. A rate of 10% applies to all types of interests; however, tax exemption applies to certain interests paid to public institutions of the other territory or paid in respect of a loan made, guaranteed, or insured by certain institutions.
17. A rate of 10% applies to all types of interests; however, tax exemption applies to certain interests paid to public institutions of the other territory or paid in respect of a loan granted, guaranteed, or insured by certain institutions.
18. A rate of 3% applies to royalties paid as a consideration for the use of industrial, commercial, or scientific equipment.

Tax treaties

Tax treaties entered into with Australia, Austria, Belgium, Canada, Denmark, France, Gambia, Germany, Hungary, India, Indonesia, Israel, Italy, Japan, Kiribati, Luxembourg, Macedonia, Malaysia, Netherlands, New Zealand, Paraguay, Poland, Senegal, Singapore, Slovakia, South Africa, Swaziland, Sweden, Switzerland, Thailand, the United Kingdom, and Vietnam relate to corporate and individual income tax.

Treaties with Canada, the European Union, Germany, Israel, Japan, Korea, Luxembourg, Macau, Netherlands, Norway, Sweden, Thailand, and the United States (US) relate to certain earnings from the operation of ships and/or aircraft.

Tax administration***Taxable period***

The tax year in Taiwan runs from 1 January to 31 December. Businesses may request approval from the local collection authority to file CIT returns using a fiscal year-end other than 31 December.

Tax returns

Tax returns are filed on a self-assessment basis. CIT returns are due no later than five months after the end of the tax year.

Taiwan

Payment of tax

Tax is paid on a self-assessment basis in two instalments. The first payment is based on 50% of the tax liability of the prior year's tax return and is made in the ninth month of the enterprise's fiscal year. However, if the taxpayer meets certain requirements, it may self-assess the provisional tax based on the taxable income of the first half of the current fiscal year and deduct income taxes paid overseas against the provisional income tax payable if corresponding income is consolidated in the provisional tax return. The second payment is made at the time of filing the annual tax return. The returns are subsequently reviewed by the tax authorities, and a final assessment is issued.

Any overpaid tax as a result of the tax collection authority's mistake shall be refunded to the taxpayer within two years of the tax authority's acknowledgement of such mistake, and shall not be subject to the original five-year period for applying for refund where the taxpayer is responsible for the mistake.

Tax audit process

Taiwan does not have a fixed audit cycle. Tax audit can be carried out any time prior to the expiration of the statute of limitations. Companies may be selected for audit if certain criteria are met.

Statute of limitations

The statute of limitations in Taiwan is five years from the tax return filing date if the return is filed on time. Where a taxpayer fails to file an annual tax return within the statutory deadline or evades tax by fraud or any other unrighteous means, the statute of limitations is extended to seven years.

Tax ruling system

Corporate taxpayers may file an advance tax ruling application with the tax authorities, together with the relevant supporting documents, to clarify their tax position before initiating the specific transaction. The tax authorities are obligated to issue a response within six months after submitting the application.

Recent focus of Taiwan tax authorities

The tax authorities have developed sophisticated and comprehensive tax audit techniques and approaches over the years. The following sets out some of the common items frequently challenged or audited by the tax authorities:

- Management fees allocated from the foreign parent company or affiliates: The tax authorities frequently question the economic substance of the services rendered, the allocation method, and the availability of sufficient documents to support the tax deduction claim.
- Amortisation of goodwill: The tax authorities frequently challenge the valuation report supporting the calculation of goodwill and whether the transaction itself should give rise to goodwill.
- Amortisation of business rights: The tax authorities have taken a more conservative view, which limits 'business rights' to those explicitly authorised by laws (e.g. those regulated under certain public utilities act).
- Eligibility for R&D tax credits.
- WHT compliance.
- Transfer pricing compliance.
- Business tax audit.

Other issues

US Foreign Account Tax Compliance Act (FATCA)

A Model 2 Intergovernmental Agreement (IGA) was signed in December 2016. As such, financial institutions are to make relevant registration with and disclosure to the US tax authority.

Significant developments

Starting from 1 January 2017, withholding tax (WHT) exemption on dividends paid by a resident to another resident is eliminated. WHT exemption can only be applied to dividends paid as part of net income distribution to the government budget.

Application of 1.1 coefficient to the base for corporate income tax (CIT) advance payments was eliminated effective from 1 January 2017.

The value-added tax (VAT) registration threshold has been increased from 500,000 Tajikistan somoni (TJS) to TJS 1 million. The new limit is also applicable for the obligatory shift from the simplified to general tax regime.

Sales tax on raw cotton was eliminated starting from 1 January 2017.

The new vehicle tax rates for light motor vehicles were introduced, varying from 7.5% to 15%, depending on horse power of the vehicle's engine.

Road tax cancellation is postponed until 2018. Previously, road tax was planned to be eliminated starting from 1 January 2017.

The tax authorities may apply market price for tax purposes in case the price of goods (services, works) differs from the market price for identical (homogeneous) goods (services, works) by more than 15% (previously, the deviation limit was equal to 30%).

The Tax Code introduced the requirements for maintaining accounting documentation in the Tajik language.

Taxes on corporate income

All Tajik legal entities are subject to CIT in Tajikistan. Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. Non-residents operating through a permanent establishment (PE) are generally subject to the same CIT provisions.

As part of the gradual decrease of the CIT rate, starting from 1 January 2017, CIT is computed by applying the statutory 23% rate to taxable income (13% for enterprises producing goods), which is calculated based on gross income decreased by allowed deductions and losses carried forward from previous periods. CIT liability may not be less than 1% of aggregate income.

Tajikistan

Simplified tax system

The simplified tax system for small business entities (hereinafter ‘tax under the simplified system’) is a special tax regime under which income tax for small business legal entities or income tax for individual entrepreneurs shall be paid under a simplified procedure. The simplified tax regime is applied by small businesses with aggregate annual income that does not exceed TJS 1 million.

Taxpayers who pay the tax under the simplified system are not liable for:

- Income tax, except for WHT.
- Road tax.
- Income tax from revenues of the individual entrepreneur, functioning according to the certificate, except for WHT.
- VAT, except for the import VAT and reverse-charge VAT.

The tax base for applying tax under the simplified system is the aggregate income. For activities related to production of goods, the tax rate is 5%; for other activities, the tax rate is 6%.

Local income taxes

There are no provincial or local income taxes in Tajikistan.

Corporate residence

Legal entities formed under Tajik law, as well as legal entities whose effective control (management) is in Tajikistan, are recognised as residents for CIT purposes.

Permanent establishment (PE)

Under general provisions of the Tax Code, any activity carried out through a fixed place on the territory of Tajikistan, including activity performed through a dependent agent, regardless of duration of such activities, will create a PE of a non-resident.

Further, a non-resident legal entity having business activities in Tajikistan may also create a PE in the following cases:

- ‘Services PE’: A non-resident enterprise renders services in Tajikistan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 90 calendar days within any consecutive 12-month period.
- ‘Construction PE’: A construction site, assembly facility, performance of supervisory activities (connected with such objects), or project works/design works.
- ‘Agency PE’: A non-resident will be considered as having a PE in cases where a resident or non-resident has the contractual authority to represent the non-resident’s interests in Tajikistan (i.e. act and/or sign contracts on behalf of the non-resident).

Other taxes

Value-added tax (VAT)

VAT is generally assessed on taxable turnover, which includes goods and services. The VAT rate is 18%. Individuals and businesses are required to register as VAT payers if

the taxpayer's taxable turnover exceeds a threshold of TJS 1 million for the preceding 12-month period.

Generally, the Tax Code exempts the following from VAT: goods and services that are not provided in Tajikistan under the place of supply rules; sale, transfer, or rent of real property; financial services; certain medical services; and certain other goods and services.

Additionally, professional participants who carry out activity on the Tajikistan stock exchange are exempt from VAT.

For goods, the place of supply is determined as the initial point of transportation. Services are generally considered to be provided at the place of business of the service provider or the actual place where services are rendered. However, certain types of services are considered to be provided at the location of the buyer. Such services include legal, marketing, consulting, accounting, etc.

A VAT refund is generally available for qualified exporters if input VAT exceeds assessed VAT.

VAT returns, together with issued and received invoices, are filed monthly, not later than the 15th day of the month following the reporting month. Payments are due by the same date.

Customs duties

The tariff rates established by the government, ranging from 0% to 15%, are applied on an *ad valorem* basis, at a specific rate, or via a combination of the two. The tax rate of 0% is granted to certain types of goods (e.g. some types of printed publication, unwrought wool, gaseous hydrocarbons, electricity).

Note that Tajikistan is signatory to several free trade agreements, primarily among the following Commonwealth of Independent States (CIS) countries: Russia, Belarus, Kazakhstan, and Kyrgyzstan.

Customs fees

Customs clearance can't be performed without certification of goods, for which the importer should pay a fee based on the time spent by a certification specialist. Fees for customs clearance range from approximately 10 United States dollars (USD) to USD 450, depending on customs value.

Excise taxes

Excise tax is assessed on beverages, tobacco products, fuel, tyres, passenger automobiles, jewellery, and mobile communications. Excise tax rates are established by the government.

Property taxes

Property tax is divided into two taxes, which are paid based on the taxable base.

Land tax

A tax on land plots is paid annually based on the rates established by the Tajikistan government applied to the area of the land plot, which vary depending on the location of the land plot.

Tajikistan

Real estate tax

Tax on real estate is paid annually and applies to immovable real property, such as buildings, houses, and flats. The real estate tax rate varies from 3% to 12% and also depends on territory coefficients.

Transfer taxes

There are no transfer taxes in Tajikistan.

Stamp taxes

There are no stamp taxes in Tajikistan.

Payroll taxes

There are no payroll taxes borne by an employer other than social tax (*see below*).

Social tax

An employer is obligated to make social tax payments at the rate of 25% of salary. In addition to an employer's portion, 1% social tax is withheld from employee's income.

Road tax

The formula for calculating road tax is total deductions of the reporting year multiplied by the 1% tax rate (0.25% for trade companies). If actual deductions do not exceed 70% of gross income, the tax base for road tax is 70% of gross income. It is contemplated that the tax will be eliminated in 2018.

Vehicle tax

Vehicle tax is computed as a percentage of the calculation index applied for horsepower of the vehicle engine. The percentage ranges from 2.5% to 15%.

Branch income

In addition to CIT, PEs are subject to branch profit tax at the rate of 15% of net profit after CIT, unless a lower rate is prescribed by an applicable double tax treaty (DTT).

Income determination

Income tax is assessed on taxable income, which is the difference between gross income and allowed exemptions and deductions.

Professional participants who carry out activity on the Tajikistan stock exchange are exempt from income tax.

Inventory valuation

Inventory accounting for tax purposes follows inventory accounting for financial reporting purposes. Public companies are required to apply International Financial Reporting Standards (IFRS). Other legal entities may apply IFRS or National Accounting Standards.

For tax purposes, the following inventory methods are permitted: last in first out (LIFO), first in first out (FIFO), and weighted average. For public companies, there can be a mismatch between the tax method and the book method, as LIFO is not permitted

under IFRS. For other legal entities, the tax method will match the book method if the tax accounting follows National Accounting Standards.

Capital gains

In general, capital gains on securities are taxed as business profits.

Exemption is available for capital gains on the sale of securities on the Tajikistan stock exchange.

Dividend income

In general, dividends are subject to 12% income tax withheld at source. WHT exemption can only be applied to dividends paid as part of net income distribution to the government budget. Dividends withheld at source are not included in aggregate annual income.

In case dividends were not taxed at source, then such dividends should be included in annual aggregate income of a person receiving the dividends and taxed at the standard CIT rate.

Dividends received by residents and non-residents (investors) from securities listed on the Tajikistan stock exchange are exempt from taxation.

Interest income

The Tax Code defines interest income as income received from any fees associated with a debt obligation, including tax liability, payments for any loans, and contributions on deposit (accounts). Interest income is subject to CIT in Tajikistan and should be included in annual aggregate income.

Royalty income

Royalty income received by a resident entity should be included in the aggregate annual income and taxed at the standard CIT rate.

Royalty income received by a non-resident from a Tajikistan source is subject to WHT at the rate of 15%.

Foreign income

Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. There are no provisions in the Tax Code for tax deferral.

For information about Controlled foreign company (CFC) provisions, see the Group taxation section.

Deductions

In general, all business expenses (e.g. materials, payroll) are allowed as a deduction if the expenses are connected with the earning of income, not of a capital nature, and supported by proper documentation.

Depreciation

The deduction for costs related to fixed assets generally is made through depreciation at rates ranging from 7% to 20% using the declining-balance method.

Tajikistan

Goodwill

There are no special provisions for goodwill deduction in the Tax Code; however, goodwill is not deductible in accordance with the general rules on intangible assets amortisation.

Start-up expenses

Start-up expenses are not deductible. However, in case of registration of a branch, the head office can deduct expenses related to the creation of such branch.

Interest expenses

Interest deductibility is generally limited to three times the refinancing rate of the National Bank of Tajikistan (currently 8%). For certain entities, additional limitations may apply.

Bad debt

A taxpayer is allowed a bad debt deduction in cases where the income associated with such bad debt is already recognised for CIT purposes. Bad debts are deductible when they are written-off in the accounting books. Special provisions apply for banks and other financial institutions.

Charitable contributions

Charitable contributions are limited to 10% of taxable income.

Fines and penalties

Fines and penalties paid to the budget of Tajikistan and other states are not deductible.

Taxes

Taxes paid to the budget of Tajikistan and other states are deductible, except for CIT and individual income tax.

Other significant items

Among other deductions specifically mentioned in the Tax Code are research and development (R&D), repair expenses, and geological and geophysical expenses.

Non-deductible expenses

Non-deductible expenses specifically mentioned by the Tax Code include meals and entertainment, personal expenses, passenger vehicles, and non-business expenses.

Net operating losses

Net operating losses may be carried forward for three years but may not be carried back.

Payments to foreign affiliates

No special provisions for deduction of payments to foreign affiliates exist in the Tax Code; consequently, general rules for deductibility of expenses should apply.

Group taxation

There are no rules permitting grouping for tax purposes in Tajikistan.

Transfer pricing

Under Tajikistan market pricing (transfer pricing) provisions, tax authorities have the right to adjust prices. The following transactions are subject to control and further feasible (potential) adjustment:

- Transactions between related parties.
- Barter transactions.
- Foreign trade agreements (contracts) where one of the parties is resident of a tax haven.
- Transactions where one of the participants receives tax benefits or tax incentives.
- Where the price of goods (services, works) deviates by more than 15% from the market price for identical (homogeneous) goods (services, works).

Thin capitalisation

There are no thin capitalisation rules in Tajikistan; however, interest deductibility is limited *as described in the Deductions section*.

Controlled foreign companies (CFCs)

The Tax Code contains CFC provisions, according to which, income received by the resident's subsidiary (more than 10% ownership) registered in countries with privileged taxation should be included in the income of the resident.

Tax credits and incentives**Foreign tax credit**

Taxes paid outside Tajikistan may be credited against the same types of taxes in Tajikistan if appropriate supporting documents are provided. The amount of credit may not exceed the amount of tax assessed in respect of such income at the rates applicable in Tajikistan.

Free Economic Zones (FEZs)

Four FEZs were established by the government of Tajikistan to offer reduced taxes and customs fees to both foreign and domestic businesses located in these zones. Tax incentives include FEZs of Sogd, Panj, Ishkoshim, and Dangara. The legislation for the FEZs has been modified several times since the start of the process, but current law requires a minimum investment of USD 500,000 for manufacturing companies, USD 50,000 for trading companies, and USD 10,000 for consulting and service companies, before being eligible for the preferential tax treatment.

CIT exemptions

An exemption from CIT is available for taxpayers that have made a certain amount of investments into chartered capital of a production company, as follows:

- Two-year exemption if volume of investments is from USD 200,000 up to USD 500,000.
- Three-year exemption if volume of investment is from USD 500,000 up to USD 2 million.
- Four-year exemption if volume of investment is from USD 2 million up to USD 5 million.
- Five-year exemption if volume of investment exceeds USD 5 million.

Tajikistan

Professional participants who carry out activity on the Tajikistan stock exchange are exempt from CIT for five years.

Tax benefits for specified taxpayers

Tax benefits for poultry farms and combined feed producers

Tax benefits are available for poultry farms and producers of combined feed for birds and animals if such producers will attract foreign investments of not less than USD 16 million. Tax benefits include a 12-year exemption from:

- Income taxes.
- VAT.
- Road tax.
- Property tax.
- Import VAT and customs duties.

The statute of limitation period is extended for the period of use of tax benefits.

Tax benefits for construction of a hydroelectric power plant

Under certain conditions, the construction project owner and the general contractor of a hydroelectric power plant can enjoy tax exemptions from the following taxes:

- VAT.
- Road tax.
- Income taxes.
- Vehicle tax.
- Property tax.
- Social tax with respect to foreign citizens involved in construction.
- Import VAT and customs duties.

Tax benefits for enterprises operating in full-cycle processing of raw cotton

Newly established enterprises operating in full-cycle processing of raw cotton can obtain tax exemptions from the following taxes if certain conditions are met:

- VAT.
- Income taxes.
- Property tax.

Tax benefits under production sharing agreements

An investors that satisfies the conditions of a production sharing agreement concluded with the government of Tajikistan Republic can enjoy the following tax benefits during the period when such production sharing agreement is effective:

- VAT (under certain conditions).
- Excise tax.
- Income taxes.

Withholding taxes

New requirements on tax residency certificates have been introduced and are effective from 1 January 2016. Thus, the tax residency certificates should be apostilled and legalised for the purpose of application of the DTTs.

Tajikistan-source income of non-residents is subject to WHT at its source at the rates shown in the following table:

Types of income at source of payment	Tax rate (%)
Dividends and interest	12
Insurance and reinsurance premiums	6
International transport and telecommunications	5 to 6
Royalties, rent, lease income, management fees, and other income	15

In accordance with the DTTs, the rate of WHT may be reduced as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	12	12	15
Treaty:			
Armenia	10	10	10
Austria	5/10 (1)	8	8
Azerbaijan	10	10	10
Bahrain	8	8	8
China	5/10 (2)	8	8
Czech Republic	5	7	10
Finland	5/15 (3)	10	5
Germany	5/15 (4)	0	5
India	10	10	10
Iran	10	10	8
Kazakhstan	10/15 (5)	10	10
Kyrgyzstan	5/15 (6)	10	10
Latvia	0/5/10 (7)	7	5/10 (8)
Luxembourg	15	12	10
Moldova	5/10 (9)	5	10
Pakistan	5/10 (9)	10	10
Poland	5/15 (3)	10	10
Romania	5/10 (10)	10	10
Russia	5/10 (11)	10	15
Saudi Arabia	5/10 (9)	8	8
South Korea	5/10 (9)	0/8 (12)	10
Switzerland	5/15 (13)	10	5
Turkey	10	0/10 (14)	10
Turkmenistan	10	10	10
Ukraine	10	10	10
United Kingdom	5/10 (15)	0/10 (16)	7

Notes

1. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
2. A rate of 5% of the gross amount of the dividends if the recipient is an enterprise (except a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
3. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

Tajikistan

4. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
5. A rate of 10% of the gross amount of the dividends if the beneficial owner is a legal entity and directly holds no less than a 30% stake in the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
6. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds at least 50% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
7. A rate of 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 75% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
8. A rate of 5% of the gross amount of the royalties paid for the use of or the right to use software, or industrial, commercial, or scientific equipment; 10% of the gross amount of the royalties in all other cases.
9. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
10. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
11. A rate of 5% of the gross amount of the dividends if the beneficial owner is a person who directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
12. Interest received by the government of the Republic of Korea, including political or administrative-territorial subdivisions or local authorities, as well as the Central Bank of the Republic of Korea or any financial institution performing functions of a government nature, shall be exempt from tax. Interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or paid in connection with the sale on credit of any merchandise by one enterprise to another enterprise shall be taxable only in the contracting state of which the recipient is a resident if such recipient is the beneficial owner of the interest.
13. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
14. Interest arising in Tajikistan and paid to the government of Turkey or to the Central Bank of Turkey shall be exempt from Tajikistan tax; interest arising in Turkey and paid to the government of Tajikistan or to the National Bank of Tajikistan shall be exempt from Turkish tax.
15. Different rates apply depending on the beneficial owner.
16. Interest can be exempt if the beneficial owner of the interest is a bank or pension scheme, subject to certain conditions.

Tax administration

Taxable period

The Tax Code prescribes a calendar year as the tax year.

Tax returns

Annual CIT declarations are due by 1 April in the year following the tax year-end.

Taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

Payment of tax

With respect to CIT, advance payments are due every 15th day of the month. Payment of any outstanding CIT liabilities is required not later than 10 April following the reporting tax period.

The settlement of minimum income tax should be made by 10 April following the reporting tax period in cases where it exceeds CIT liability.

Fines and interest penalties

The fine for failure to file a tax return ranges from a minimum amount of 1 calculation index (CI), which is currently TJS 40, to a maximum fine of 100 CI, or TJS 4,000. The amount of the fine depends on the taxpayer's category and should be assessed based on each ten days of delay. In the absence of tax returns, the tax authorities are entitled to assess taxes based on any information available.

Fines may be assessed in the amount of 10% to 20% of the understated tax liabilities. In severe cases, a violation may be considered a criminal offence.

A fine for failure to withhold and remit tax may be assessed in the amount of 3 to 200 CI (approximately TJS 120 to TJS 8,000) of the tax not withheld.

Interest penalties may apply to late tax payments in the amount of 0.08% of the underpaid tax amount for each day of tax underpayment.

Tax audit process

Tajikistan tax authorities have the right to conduct regular tax audits (once per year for planned tax audits). Generally, there are two types of audits:

- **Planned tax audits.** Planned tax audits are conducted according to the list of entities that fall under tax audit, published by the competent authority.
- **Unplanned tax audits.** Reorganisation or liquidation of a legal entity, the expiration of the contract on subsoil use, validation of the VAT amount that is charged for a return, etc., may trigger an unplanned tax audit.

Documentary tax audits may be further subdivided into comprehensive (i.e. covering all taxes), thematic (covering only specific type of taxes), or cross-check (covering only transactions with a particular counterparty). Comprehensive and thematic audits may be conducted once a year.

The first planned documentary tax audit of a small business, implementing the simplified tax system, can be carried out only after 24 full calendar months from the date of its registration.

The tax authority sends or presents a notice of a tax audit to a taxpayer no later than ten working days before the start of the documentary tax audit unless otherwise provided in the Tax Code.

The period of tax audits, specified in issued orders, shall not exceed 30 working days from the date of receipt of the order, unless otherwise provided in the Tax Code.

Statute of limitations

Taxpayers are allowed to make changes to prior period tax returns within the statute of limitations (three years). No fines should apply to corrections in this case.

Topics of focus for tax authorities

The tax authorities are currently paying particular attention to deals involving sale of shares and participation interests.

Other issues

Adoption of IFRS

In accordance with the governmental Resolution of the Republic of Tajikistan concerning International Standards of Financial Statements, the Ministry of Finance of the Republic of Tajikistan shall adopt IFRS through a step-by-step approach. Starting from 2011, juridical legal entities should apply IFRS; however, National Accounting Standards may still be applicable by companies, except for public companies.

Accounting policies and practices are being revised in light of the legal requirement that companies adopt IFRS and International Accounting Standards. Such revised accounting policies should be adopted by companies' boards of directors and disseminated to all the accounting units with clear instructions on how to introduce and follow the new policies and procedures.

Significant developments

The change in control rule has been changed back to three years from two years by the Finance Act 2016. The Finance Act 2015 had reduced the reference period from three years to two years.

Taxes on corporate income

A Tanzanian resident is taxed on worldwide income, irrespective of source. Non-residents are taxable on income with a source in Tanzania.

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation or 5% of turnover for technical and management service providers to mining, oil, and gas entities (deducted by way of withholding tax [WHT]). Certain payments to non-residents are subject to tax at the relevant non-resident WHT rates (*see the Withholding taxes section for the relevant rates*).

Gain from the disposal of investments in Tanzania is subject to income tax where such investments fall within the source rules, and, in such a case, the gain will be taxed at a rate of 30%.

Reduced rate for newly listed companies

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the Dar es Salaam Stock Exchange (DSE). To qualify, at least 30% of the company's shares must be issued to the public.

Alternative minimum tax

Alternative minimum tax applies at a rate of 0.3% to the turnover of companies with perpetual unrelieved tax losses for the current and preceding two income years. Exemption applies to (i) agricultural companies and (ii) companies engaged in provision of health or education.

Local income taxes

There are no local income taxes levied by local authorities. *Please see Local taxes in the Other taxes section for a description of the local service levy based on turnover.*

Corporate residence

A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

Tanzania

Permanent establishment (PE)

A non-resident entity has a PE in Tanzania if it carries on business in Tanzania. This includes a place where a person (i) is carrying on business through a dependent agent; (ii) has used or installed, or is using or installing, substantial equipment or machinery; and (iii) is engaged in a construction, assembly, or installation project for six months or more, including a place where a person is conducting supervisory activities in relation to such a project.

Other taxes

Value-added tax (VAT)

VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. The standard rate of VAT is 18%, but the export of goods and certain services is eligible for zero rating. Businesses with an annual taxable turnover of more than 100 million Tanzanian shillings (TZS) must register for VAT.

There is also mandatory registration for professional services providers (e.g. lawyers and accountants) and government entities/institutions carrying on economic activity. A non-resident who carries on economic activity in mainland Tanzania without a fixed place and makes taxable supplies in excess of the VAT registration threshold is required to appoint a VAT representative.

For imported goods, VAT is payable at the time of importation together with any customs and excise duties. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be deferred, subject to certain procedures being followed. The Commissioner for VAT has the discretion to register (as intending traders) investors whose projects have not commenced production but who wish to be VAT-registered in order to reclaim the tax they incur on start-up costs.

For imported services, VAT is accounted for by registered businesses through a 'reverse-charge' mechanism, such accounting is only relevant where a taxpayer has exempt supplies of 10% or more of total supplies.

Depending on the industry, there are a number of exempt supplies. These include (this list is not exhaustive):

- Agricultural implements, agricultural inputs, livestock, basic agricultural products and foods for human consumption; implements for fisheries and bee-keeping; dairy equipment, maize flour, and wheat flour.
- Food, clothing, and shoes donated to non-profit organisations for free distribution to orphanages or schools for children with special needs in mainland Tanzania.
- Goods imported by non-profit organisations for the provision of emergency and disaster relief (conditional).
- Goods imported by religious organisations for the provision of health, education, water, and religious services (conditional).
- Educational services provided by a relevant approved educational institution; education materials.
- Laboratory equipment and reagents imported by a registered educational institution and to be used solely for educational purposes.
- Goods eligible for relief under the East African Customs Management Act (where imported by a registered and licensed explorer or prospector for exclusive use in oil, gas, or mineral exploration or prospecting activities).

- Various goods imported by a natural gas distributor (including compressed natural gas [CNG] plants equipment, natural gas pipes, transportation and distribution pipes, CNG storage cascades, CNG special transportation vehicles, natural gas metering equipment, CNG refuelling of filling, gas receiving units, flare gas system, condensate tanks and leading facility, system piping and pipe rack, and condensate stabiliser).
- Healthcare, medicine, or pharmaceuticals products, not including food supplements or vitamins; articles designed for people with special needs; funeral services.
- Firefighting vehicles imported by the government and firefighting equipment.
- Sale of vacant land.
- Lease, license, hire, or other form of supply, to the extent that it is a supply of the right to occupy and reside in residential premises.
- Water (except bottled or canned water or similarly presented water).
- Solar equipment (in particular, solar panels, modules, solar charger controllers, solar inverters, solar lights, vacuum tube solar collectors, and solar batteries). Wind generators and liquid elevators are no longer included in the list of exemptions (unlike the 1997 Act).
- All unprocessed vegetables and unprocessed edible animal products, including live fish, fruits and nuts, cereals, and seeds, as well as raw soya beans.
- Vitamins and food supplements (micronutrient compound) that have been approved by the Minister for Health, Community Development, Gender, Elderly, and Children.
- Water treatment chemicals, as approved by the Minister responsible for health.
- Aviation insurance.
- Bitumen.
- Dam liner.
- Insurance for workers compensation.
- Pasteurised goat and cow milk, excluding milk with additives and long-life milk.

A business that only makes exempt supplies is unable to register for VAT and, consequently, unable to recover the VAT incurred on inputs.

Export of goods and certain services is zero-rated (i.e. taxable at a rate of 0%).

Registered businesses must submit VAT returns, and pay any tax due, on a monthly basis.

The new VAT Act has broadened restrictions on claiming input tax. For example, one cannot claim VAT paid on entertainment, sporting, social, or recreational clubs or associations, nor on spare parts and repair or maintenance costs in respect of passenger vehicles.

The input tax claim time limit is six months. However, this time limit starts to run not only by reference to the date of the tax invoice/fiscal receipt but also by reference to the date of the time of supply.

Input tax incurred in the six months prior to VAT registration can be claimed no later than in the third VAT return submitted following registration.

A company with taxable supplies of more than 90% of total supplies is entitled to full input tax credit.

A company with taxable supplies less than 10% of total supplies is not entitled to claim any input tax incurred.

Tanzania

A company with taxable supplies between 10% and 90% of total supplies is entitled to partial input tax recovery. Only one apportionment method, namely the average method can be used. Imported services are not taken into account as supplies when determining the allowance of input tax for partial exemption purposes.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor's certificate. Businesses in a consistent refund position (e.g. exporters) can apply for approval to lodge their refund claims on a monthly basis.

Zanzibar has its own VAT Act, but it is similar to the Mainland Tanzania Act.

Customs duties

Tanzania is a member of the East African Community, which became a Customs Union on 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for a common external tariff (CET), elimination of internal tariffs, rules of origin, anti-dumping measures, a common customs law, and common export promotion schemes.

The import duty rates applicable under the CET are as follows:

Category	Rate (%)
Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines	0
Semi-finished goods	10
Finished final consumer goods	25
Machinery and spare parts imported by licensed mining companies and used in mining activities	0
Machinery, spares, and inputs imported by licensed company for direct use in oil, gas, and geothermal exploration	0

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc, such as the SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.

Excise duties

Excise duty rates apply as follows:

Item	Rate for FY 2016/17 (TZS)
Sugared mineral water, sugared carbonated drinks, and sugared aerated water	58 per litre
Other not containing sugar, including club soda	58 per litre
Malt beer	694 per litre
Clear beer (with 100% local unmalted barley)	429 per litre
Wine with more than 25% imported grapes	2,236 per litre
Wine with domestic grapes content exceeding 75%	202 per litre
Spirits, vodka, and whiskies	3,315 per litre
Cigarettes without filter containing more than 75% domestic tobacco	11,854 per mil
Cigarettes with filter containing more than 75% domestic tobacco	28,024 per mil
Other cigarettes not mentioned above	50,200 per mil
Cut rag/filler	25,608 per kg

Item	Rate for FY 2016/17 (TZS)
Motor spirit (gasoline) premium	339 per litre
Motor spirit (gasoline) regular	339 per litre
Gas oil (diesel)	215 per litre
Jet fuel	0 per litre
Illuminated kerosene	425 per litre
Other medium oil and preparation	9.32 per litre
Industrial diesel oil	392 per litre
Heavy furnace oil	0 per litre
Lubrication oil	669 per m ³
Lubrication greases	0.79 per kg
Music and film products	44 per unit

Item	Rate for FY 2016/17 (%)
Satellite and cable television broadcasting	5
Electronic communication services	17
Charges or fees by a telecommunication service provider for money transfer service	10
Charges or fees by a financial institution for services provided by such institution	10
Disposable plastic bags	50
Liquefied petroleum gas (LPG)	0
Motor car with cylinder capacity exceeding 1,500cc but not exceeding 2,000cc	5
Motor vehicle with engine size greater than 2,000cc but not exceeding 3,000cc	5
Old passenger motor vehicles (more than five years)	10
Old motor vehicles (eight years but not more than ten years)	15
Old motor vehicles (more than ten years)	30
Imported used spare parts (for vehicles, motorcycles, domestic and electrical appliances)	25
Imported furniture (per unit)	20
Aircraft (including helicopters, aeroplanes) but excluding commercial aircraft, yachts, and other vessels for pleasure or sport	20

Fuel levy

Fuel levy is charged on petroleum and diesel at a rate of TZS 313 per litre.

Petroleum levy

Petroleum levy is charged on petrol and diesel at TZS 100 per litre and on kerosene at TZS 150 per litre.

Stamp duty

Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, and issue and transfer of debentures. For most of these instruments, the applicable stamp duty rate is 1% of the consideration.

Infrastructure levy

The 'infrastructure levy' applies at the rate of 1.5% of the value of imported goods (cost, insurance, and freight [CIF]). The levy is not applicable to imported goods that have relief or exemption under the East African Community Customs Management Act 2004 (EACCMA 2004) and goods in transit.

Tanzania

Payroll taxes and social security contribution

Apart from individual income tax (deducted at source by the employer), payroll taxes include:

- Skills and development levy at 4.5% of payroll cash costs.
- 20% social security contribution, which is normally split equally between employer and employee (i.e. 10% each).
- Workers compensation fund tariff charged at 1% or 0.5% of cash sums paid to employees. The tariff is payable on a monthly basis (1% for private sector and 0.5% for public sector).

Gaming tax

Under the recently introduced gaming tax, gaming prize winners are taxed at 18% of the prize offered.

Local taxes

Property taxes

The local government levies a property tax based on the value of a premises. The rates vary depending on the value and location of the property.

Service levy

The local government is entitled to charge a 0.3% service levy based on turnover generated in the relevant district.

Cess levy

For agricultural produce and livestock, there is a cess levy, currently capped at 5% of the producer price.

Branch income

The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30% on net income or 5% of turnover for technical and management service providers to mining, oil, and gas entities.

The PE is also subject to a tax on 'repatriated income', which applies at a rate of 10% (the same rate as a company would withhold on dividends).

In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised, other than the transfer of an asset or liability between the two. Amounts derived (or payments received) and expenditures incurred (or payments made) that relate to assets held by, or liabilities owed by, the business of the PE are attributed to the PE.

Income determination

Subject to any provision to the contrary in the Income Tax Act, income is to be calculated in accordance with generally accepted accounting principles (GAAP). Local GAAP is in accordance with International Financial Reporting Standards (IFRS). Corporations must apply an accrual basis of accounting.

Inventory valuation

Trading stock is valued at the end of the year at the lower of cost and market value. No explicit method is stated for determining inventory cost, and, so far, for tax purposes, such cost will match the cost determined in accordance with GAAP. Special rules apply for the valuation of long-term work in progress.

Capital gains

There is no separate capital gains tax in Tanzania. Instead, income tax is charged on the taxable profit arising on a gain arising from the realisation of an 'investment asset' (a term that [subject to certain exceptions] includes shares, interests in land and buildings, and a beneficial interest in a non-resident trust). The gain is determined as the difference between costs incurred and sale proceeds.

Dividend income

Dividend payments are taxed by way of WHT, and this is a final tax. The normal rate of WHT on dividends is 10%.

Where a dividend is paid by a resident corporation to another resident corporation holding 25% or more of shares and voting rights in the corporation paying the dividend, the WHT rate is 5%.

Dividends paid by a company listed on the DSE are subject to 5% WHT (regardless of whether they are paid to a resident or non-resident).

Interest income

Interest income is treated as income from investment. The term 'interest' is defined as payment for the use of money and includes payment made or accrued under a debt obligation that is not a repayment of capital, as well as any gain realised by way of a discount, premium, swap payment, or similar payment.

Interest income is taxed by way of WHT at 10%.

Royalty income

Royalty income is treated as income from investment and is taxed by way of WHT at 15% (regardless of whether it is paid to a resident or non-resident). WHT on royalty payments to a non-resident is final tax.

The term 'royalty' means any payment made by the lessee under a lease of an intangible asset and includes payments for:

- i. the use of, or the right to use, a copyright, patent, design, model, plan, secret formula or process, or trademark
- ii. the supply of know-how, including information concerning industrial, commercial, or scientific equipment or experience
- iii. the use of, or right to use, a cinematography film, videotape, sound recording, or any other like medium
- iv. the use of, or right to use, industrial, commercial, or scientific equipment
- v. the supply of assistance ancillary to a matter referred to in paragraphs (i) to (iv), or
- vi. a total or partial forbearance with respect to a matter referred to in paragraphs (i) to (v), but excludes a natural resource payment.

Tanzania

Foreign income

A resident person's foreign-source income or loss (from employment, business, and investment) is calculated as that person's worldwide income or loss less any income sourced in Tanzania and plus any loss sourced in Tanzania.

A resident person may claim a foreign tax credit on any foreign tax paid by the person on foreign income. However, such credit should not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to 'change in control' provisions *as detailed in the Group taxation section*). An election may be made to relinquish foreign tax credit and claim a deduction for the amount of foreign income tax.

There are no provisions for the deferral of the taxation of foreign income.

Deductions

In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

There are special rules with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

There is ring-fencing of mining or petroleum operations by reference to the relevant mining or petroleum licence area.

Depreciation

The categories of depreciable assets and their tax depreciation rates are set out in the table below.

Expenditures on plant and machinery are generally written off on a reducing-balance basis at rates of 37.5%, 25%, or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming, and tourist hotels benefit from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.

Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land, excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock, or fish farming are written off on a straight-line basis over five years.

A 100% capital deduction applies to capital expenditure (i) by mining companies on prospecting, exploration, and development and (ii) on petroleum prospecting and exploration.

Depreciation allowances rates

Class	Depreciable assets	Rate (%)
1	Computers and data handling equipment, together with peripheral devices; automobiles, buses, and minibuses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than seven tonnes; construction and earth-moving equipment.	37.5
2	Buses with a seating capacity of 30 or more passengers, heavy general purpose or specialised trucks, trailers, and trailer-mounted containers; railroad cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft, other self-propelling vehicles; plant and machinery (including windmills, electric generators, and distribution equipment) used in manufacturing or mining operations; specialised public utility plant and equipment; and machinery or other irrigation installations and equipment.	25
3	Office furniture, fixtures, and equipment; any asset not included in another class.	12.5
4	Natural resource exploration and production rights and assets in respect of natural resource prospecting, exploration, and development expenditure. (However, note that the Income Tax Act 2004 does provide for predecessor capital deduction provisions in the Income Tax Act 1973 to continue for the holders of mining rights.)	20
5	Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock farming, or fishing farming.	20
6	Buildings, structures, and similar works of permanent nature other than those mentioned in Class 5.	5
7	Intangible assets other than those in Class 4.	1 divided by the useful life of the asset in the pool and rounded down to the nearest half year
8	Plant and machinery (including windmills, electric generators, and distribution equipment) used in agriculture; electronic field devices purchased by a non-VAT-registered trader; equipment for prospecting and exploration of minerals or petroleum.	100

Interest in land

Interest in land does not qualify for depreciation allowance as it is excluded from the definition of 'depreciable asset'.

Goodwill

Goodwill does not qualify for depreciation allowance as it is excluded from the definition of 'depreciable asset'.

Start-up expenses

Start-up expenses are deductible to the extent that they meet the general deduction criteria (i.e. they are revenue in nature and were incurred wholly and exclusively in the production of income). The definition of 'business' includes a prospective business.

Interest expenses

Interest expenses are deductible on an accrual basis, subject to thin capitalisation rules as detailed in the Group taxation section.

Tanzania

Bad debt

In order to claim relief for a bad debt, it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied.

Charitable contributions

The Income Tax Act allows deduction for contributions made:

- i. to charitable institutions (approved by the Commissioner to operate as such) and social development projects
- ii. under Section 12 of the Education Fund Act 2001, or
- iii. to local government authorities under statutory obligations to support community developments projects.

The deduction available under item (i) above is restricted to 2% of the company's taxable income before such deduction.

Fines and penalties

Fines and similar penalties payable to a government or a political subdivision of any country for the breach of any law or subsidiary legislation are not deductible.

Taxes

Taxes payable under the Income Tax Act 2004 are not deductible.

Net operating losses

There is no limit on the carryforward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Losses from one mining licence area can only be offset against profits from the same mining licence area.
- Losses from one petroleum licence area can only be offset against profits from the same petroleum licence area.
- Foreign-source losses can only be offset against foreign-source profits.
- Losses on investments can only be offset against investment income.
- Foreign-source losses on investments can only be offset against foreign-source investment income.

In addition, based on the Finance Act 2016, the deductibility of the losses carried forward is restricted (for holders of a petroleum exploration licence, mineral licence, and licence in respect of midstream and downstream activities) such that only 70% of the taxable profits of the company can be sheltered by losses brought forward (with any excess losses carried forward to future years).

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.

Tax losses can be carried back only in long-term contracts in a case where a contract is completed and a person has unrelieved losses for that period or a previous period that is attributable to the long-term contract. These losses can then be carried back to a previous year of income and treated as unrelieved loss for that year.

Payments to foreign affiliates

Payments to foreign affiliates are deductible to the extent they are wholly and exclusively incurred in the production of the company's income. The deduction is subject to transfer pricing provisions *as detailed in the Group taxation section*.

Group taxation

There are no provisions for tax consolidation or group relief in Tanzania.

Transfer pricing

With respect to transactions between related parties, there is an obligation to 'quantify, apportion, and allocate amounts' for income tax purposes on an arm's-length basis. The Transfer Pricing Regulations and Guidelines require a taxpayer with related-party transactions to have transfer pricing documentation in place at the time of filing the tax return and provide this within 30 days from the date of request by the Tanzania Revenue Authority (TRA).

Thin capitalisation

There is a thin capitalisation restriction on the amount of deductible interest for what are termed 'exempt-controlled resident entities', where the debt-to-equity ratio exceeds 7:3. There are specific definitions of 'debt' and 'equity' for the purposes of thin capitalisation.

Controlled foreign trusts and corporations

There are provisions that relate to the treatment of unallocated income of controlled foreign trusts and corporations.

Change in control provisions

The change in control provisions are triggered at the moment the underlying ownership of an entity changes by more than 50% as compared to any time during the previous three years. Where there is such a change, the consequences are that:

- the accounting period of the entity is split at the point of such a change, so that the parts of the year of income before and after the change are treated as separate years of income, and
- there is deemed realisation of assets and liabilities at market values.

In certain cases, such a change can also result in the forfeiture of unutilised tax losses and tax credits.

The Commissioner has to be notified immediately before and after the change in control has occurred.

Other anti-avoidance provisions

Other anti-avoidance provisions exist to address the following:

- Income or dividend stripping arrangements.
- Income splitting.

Tanzania

Tax credits and incentives

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Agriculture, manufacturing, mining, and tourism incentives

Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining, petroleum, and tourism. See the Deductions section for more information.

Export processing zones (EPZs) and special economic zones (SEZs)

There are special benefits for EPZs and SEZs. Included in the benefits available to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a ten-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

Withholding taxes

WHT rates

Payment	Resident (%)	Non-resident (%)
Dividend:		
To a company controlling 25% or more of the voting power and holding 25% or more of the shares	5	10
From a DSE listed company	5	5
Otherwise	10	10
Interest	10	10
Rent:		
Land and buildings	10	10
Aircraft lease	10	10
Other assets	0	10
Royalty	15	15
Natural resource payment	15	15
Service fees	5	15
Director fees (other than full time service)	15	15
Insurance premium	0	5
Money transfer commission paid to money transfer agent	10	N/A
Payments for goods by government institutions	2	N/A

Double tax treaty (DTT) rates

Recipient	WHT (%)			
	Dividend	Interest	Royalties	Management / technical fees
Domestic rate (1)	10	10	15	15
Treaty:				
Canada	20/25 (2)	15	20	20
Denmark	15	12.5	20	20
Finland	20	15	20	20
India	5/10 (3)	10	10	0
Italy	10	15	15	15 (6)

Recipient	WHT (%)			
	Dividend	Interest	Royalties	Management / technical fees
Norway	20	15	20	20
South Africa	10/20 (2)	10	10	0
Sweden	15/25 (4)	15	20	20
Zambia	0 (5)	0 (5)	0 (5)	0

Notes

1. The domestic WHT rate applies unless the DTT rate is lower, in which case the lower DTT rate applies.
2. The lower rate applies if the beneficial owner is a company that controls, directly or indirectly, at least 15% of the voting power in the company paying the dividends; otherwise, the higher rate applies.
3. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company paying the dividends; otherwise, the higher rate applies.
4. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company paying the dividends during the six month period immediately preceding the date of payment of the dividends; otherwise, the higher rate applies.
5. The domestic rate applies if income is exempt from tax in Zambia.
6. The domestic rate applies in the absence of a rate specified in the DTT.

Tax administration

Taxable period

While the year of income for tax purposes is the calendar year, an entity may apply to use its own accounting period rather than the calendar year.

Tax returns

A statement of estimated tax payable, which contains an estimate of the chargeable income and the tax payable thereon, is due for submission within three months from the beginning of the accounting period. A final tax return must be furnished within six months from the end of the accounting period.

WHT returns must be submitted every half year. The due date for filing the WHT return is 30 days after each six-month calendar period (e.g. the January to June return is due by 30 July).

A late filing penalty applies monthly at an amount equal to the higher of (i) TZS 225,000 or (ii) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty may also apply.

Payment of tax

Instalment tax is payable in four equal instalments not later than three months, six months, nine months, and 12 months from the beginning of the accounting period. Final tax is payable on the date on which the final return is due for submission, namely six months after the end of the accounting period.

WHT is due seven days after the month of deduction.

Interest on late payment is charged at the Bank of Tanzania discount rate.

Tax audit process

The normal practice is for the TRA to carry out a review every two or three years.

Tanzania

Statute of limitations

There is a five-year time limit for the TRA to adjust an income tax return filed by a taxpayer. The five years runs from the due date of filing the final tax return.

Topics of focus for tax authorities

Currently, the topics of particular focus for the TRA include transfer pricing, VAT compliance, WHT on payments to both residents and non-residents, and compliance on payroll taxes.

Functional currency

Taxable income and deductible expenditure is quantified in Tanzanian shillings. Upon request by the taxpayer, the Commissioner has the power, by notice in writing, to permit quantification in a foreign currency convertible to Tanzanian shillings.

Significant developments

The Thai government has recently announced the promotion of new investments in targeted core technology and enabling services as well as strategic investment projects, which include biotechnology, advanced materials technology, digital technology in automation, research and development (R&D), electronic design, calibration services, etc. The main incentives include a maximum of 15 years' corporate income tax (CIT) exemption and a 10 billion Thai baht (THB) subsidy without any conditions for qualified activities.

In addition, the Thai Cabinet has approved the Eastern Economic Corridor (EEC) project, an area-based development, which will become a major project helping to accelerate the future growth of the country. It aims to promote new technology and innovation in targeted industries in new economic cities. Industries in the EEC will receive a higher incentive promotion package beyond the current tax incentives.

Taxes on corporate income

Thailand-incorporated companies are taxed on worldwide income. A foreign-incorporated company is taxed on its profits arising from or in consequence of the business carried on in Thailand.

The CIT rate is 20%.

A foreign company not carrying on business in Thailand is subject to a final withholding tax (WHT) on certain types of assessable income (e.g. interest, dividends, royalties, rentals, and service fees) paid from or in Thailand. The rate of tax is generally 15%, except for dividends, which is 10%, while other rates may apply under the provisions of a double tax treaty (DTT).

Rates for companies with low paid-in capital and income

For accounting periods beginning on or after 1 January 2017, companies and juristic partnerships with paid-in capital not exceeding THB 5 million at the end of any accounting period and income from the sale of goods and/or the provision of services not exceeding THB 30 million will be subject to tax at the following rates:

Net profit (THB)	Tax rate (%)
0 to 300,000	0
300,001 to 3 million	15
Over 3 million	20

Thailand

Reduced rates for certain banking transactions

Banks are subject to tax at the rate of 10% on their profits derived from lending to non-Thai residents from foreign currency funds obtained from non-Thai sources (so-called 'out-out' business).

Petroleum income tax

Taxation on income from petroleum operations is imposed on petroleum concessionaire companies by the Petroleum Income Tax Acts (PITA). Companies taxed under the PITA are exempt from taxes and duties on income imposed under the Revenue Code and under any other laws. The exemption applies so long as the company pays taxes and duties on income subject to the PITA or on dividends paid out of income subject to the PITA.

Petroleum companies are taxed at the rate of 50% of their annual net profit from petroleum operations, including profit from the transfer of their concession interests and other activities incidental to the petroleum operations. Deductions are allowed for 'ordinary and necessary' business expenses, as well as depreciation of capital expenditure, petroleum royalties, and other charges. Certain types of expenses are specifically disallowed for deduction, including interest.

Recently, the Petroleum Act and the PITA have been amended and approved by the National Legislative Assembly (NLA), and they are now in the process of becoming law.

The amendment of the Petroleum Act introduced two new structures for oil and gas development. In the past, international oil companies could engage in exploration and production activities in Thailand only by way of a concession. While the amendment will retain the concession option, it would also allow for exploration and production activities to be carried out through a production sharing contract (PSC) or a service contract.

The PITA has also been amended to tax the net profit shared under a PSC. Petroleum companies under a PSC will be taxed at the rate of 20% of their annual net profit from petroleum operations, including profits from the transfer of their interests and other activities incidental to their petroleum operations.

On the other hand, petroleum companies under a service contract will not be taxed under the PITA but under the Revenue Code.

Local income taxes

There are no local government taxes on income in Thailand.

Corporate residence

Corporate residence is determined by the place of incorporation. A company incorporated under the laws of Thailand is a resident company.

A company incorporated abroad is subject to CIT in Thailand if it is considered to be carrying on business in Thailand. The term 'carrying on business in Thailand' is broad and, subject to the provisions of a DTT, includes the presence of an employee, representative, or go-between that results in the foreign company deriving income or gains in Thailand.

Other taxes

Value-added tax (VAT)

The standard rate of VAT is 10%, but the rate is currently reduced to 7% until 30 September 2017 (unless further extended by the government). VAT is levied on the sale of goods and the provision of services. Exports are zero-rated, while a number of goods and services are exempt (e.g. basic groceries, education, healthcare, interest, leasing of immovable property, sale of real estate).

Customs duties

Basis of taxation

Customs duties are imposed under the Customs Act and the Customs Tariff Decree. Customs duties are collected on both imports and a limited number of exports. Classification of imports is based on the Harmonized Commodity Description and Coding System (the so-called 'Harmonized System'). Thailand has adopted the Association of Southeast Asian Nations (ASEAN) Harmonized Tariff Nomenclature ('AHTN') 2017, which is based on the Harmonized System 2017, as its import tariff nomenclature.

Duties are levied on a specific or an *ad valorem* basis, whichever is higher, and the applied *ad valorem* duties range between 0% and 80%. Exemptions from import duties are available on particular items of goods as prescribed in the Customs Tariff Decree. Preferential duty rates are available on imported goods from countries that have a preferential free trade agreement (FTA) with Thailand.

Currently, Thailand has FTAs with the following countries:

- ASEAN member states (Singapore, Vietnam, Malaysia, Indonesia, Philippines, Cambodia, Laos, Myanmar, and Brunei)
- Australia
- Chile
- India
- Japan
- New Zealand
- Peru

Also, as a member of ASEAN, Thailand has preferential trade agreements with the following countries:

- Australia and New Zealand
- China
- India
- Japan
- Korea

Generally, the value of imports is based on their cost, insurance, and freight (CIF), whereas exported goods are based on their free on board (FOB) amount.

Thailand has implemented the World Trade Organization (WTO) Valuation Agreement. The primary basis for the customs value is the transaction value, which is the price actually paid or payable for the goods when sold for export, subject to adjustments for certain elements that are considered to form a part of the value for customs

Thailand

purposes or that can be deducted from the value of the imported goods (e.g. the cost of transportation after the importation, duties and taxes associated with the import).

Elements that may need to be added include royalties and licence fees that are related to the goods and paid as a condition of sale, proceeds from subsequent resale in the importing country, and the value of goods or services supplied by the buyer, such as design or development fees related to the imported goods. If the declared price is evidently low or is unlikely to be the true value of such goods, Thai Customs will likely dispute the declared price.

Customs controls and procedures

Customs procedures for goods arriving in Thailand in any manner are similar to those existing in most other countries. An importer is required to file an entry form together with other requisite documents, including a bill of lading, invoice, and packing list via the e-Customs system.

Customs duties are due upon the arrival of the vessel carrying the imported goods, and goods may be stored in a Customs bonded warehouse for up to 45 days with no submission of import entry and 60 days in the case of submission of import entry. Landing and storage charges must be paid before the goods are released.

Customs incentives schemes

Various customs incentives schemes, each with its own specific conditions and duty privileges, are available, including the following:

- Duty and tax compensation ('tax coupons').
- Duty drawback for imported raw materials used in export production.
- Duty drawback for re-export in the same state.
- Free zones (Customs or Industrial Estate Authority of Thailand Free Zones).
- Manufacturing bonded warehouses.
- General bonded warehouses.
- Board of Investment (BOI) promotion.
- Preferential import duties under FTAs.

Offences and penalties

Although, technically, an offence against the customs law is a criminal offence, in practice, legal procedures are usually concerned with the recovery of tax arrears and fines. Offences include non-compliance with customs procedures, false declarations, and the most serious offence of smuggling and evasion of customs duties. Statutory penalties are as prescribed by the relevant provisions of the Customs Act. Where Customs and the offender agree to settle the case at the Customs level (i.e. waiver of prosecution), the penalties would be in accordance with the settlement criteria as prescribed by the Director-General of the Customs Department. Currently, this is typically two times the duty and one times the VAT shortfall. For import licensing errors and offences related to smuggling, the penalties are based on a multiple of the value of the goods.

A new Customs Act was promulgated on 17 May 2017 and is scheduled to enter into force on 13 November 2017.

Some of the key amendments are:

- Revision of the current bribes and rewards regime (e.g. introducing caps per case).

- Introduction of 'wilful intent' or 'negligence' to be considered for duty evasion offences.
- Limiting the period for Customs to carry out post-clearance audits to five years from the date of import or export (to be aligned with the record retention requirements).
- Introduction of a timeline (180 days) for Customs' Board of Appeal to consider appeal cases.
- Capping of the monthly duty surcharges at the amount of the duty shortfall.
- The duty refund period will be extended from two to three years.
- Reduction of statutory penalties and fines for duty evasion offence to be in the range of between 0.5 to four times the duty shortfall and imprisonment not exceeding ten years, or both.
- Changes to licensing requirements for goods consigned into free zone areas as specified in the relevant Ministerial Regulations.

In addition, the settlement criteria for customs cases are also expected to be revised following the implementation of the new Customs Act.

Excise tax

Basis of taxation

Excise tax is a form of consumption tax that is imposed on the sale of a selected range of services and goods (whether manufactured locally or imported) that are considered 'luxuries'. The tax liability arises on locally manufactured goods when leaving the factory and at the time of importation for imported goods.

Below is an outline of the formula for the *ad valorem* rate on commodities subject to excise tax in Thailand. However, specific rates apply on some commodities. Tax rates are based on *ad valorem* or a specific rate, whichever is higher.

Excise tax payable for imported goods = $(CIF + ID) \times ((ETR) / (1 - (1.1 \times ETR)))$

Excise tax payable for locally produced goods = $EXP \times ((ETR) / (1 - (1.1 \times ETR)))$

Where:

- CIF: Landed CIF price.
- EXP: Ex-factory price.
- ID: Amount of import duty.
- ETR: Excise tax rate % (in schedule).

Note that the above formula does not apply to alcoholic beverages, for which a different specific calculation will apply.

The excise tax computation method will be changed as a result of the latest announcement under the new Excise Tax Act, dated 20 March 2017. Once it becomes effective (scheduled to be on 16 September 2017), the excise tax computation for all goods (including imported goods) will be based on the suggested retail price (SRP). The formula will then be:

Excise tax payable = $SRP \times ETR$

Thailand

Taxable goods and services

Commodities	Ad valorem rate (%)	Specific rate
Petroleum and petroleum products	50	THB 20 per litre or kilogram
Certain non-alcoholic beverages	30	THB 20 to THB 100 per litre
Certain electrical appliances	30	-
Batteries	30	-
Crystal glassware	30	-
Motor vehicles	40 to 80	-
Motorcycles	30	-
Boats	30 to 50	-
Perfume products and cosmetics	20	-
Woollen carpets	30	-
Marble and Granite	30	-
Ozone depleting substances/CFCs	30	-
Alcoholic beverages	30	THB 1,000 to THB 3,000 per litre of pure alcohol
Cigarettes containing tobacco	90	THB 5 per piece or gram
Playing cards	60	THB 500 per 100 cards
Entertainment services	30	THB 3,000 per square metre or round
Race courses and lotto	30	-
Golf courses	30 to 50	-
Telecommunications business	30	-

Note that the above excise tax rates are the statutory rates under the new Excise Tax Act. The rates will be subject to further announcements by the Excise Department after the new Act has come into force.

In addition to the excise tax, an interior tax is also levied by the Excise Department at the rate of 10% of the excise tax payable. Other taxes, such as the health tax and Thai Public Broadcasting Service (TPBS tax or TV tax), may apply to certain specified products in the categories of cigarettes and alcoholic beverages.

The manufacturer of the products must file a return and remit the tax due prior to taking the goods from the factory or bonded warehouse. If a VAT liability arises before the goods are taken out of such locations, the manufacturer must file a return and remit the excise tax to the Excise Department within 15 days from the end of the month.

Stamp duty

Stamp duty is levied on 28 different types of documents and instruments, including contracts for hire of work, loans, share transfers, leases of land or buildings, and insurance policies. The rate of stamp duty varies depending on the type of agreement, but ranges from THB 1 per THB 1,000 of value on most contracts and agreements to a fixed amount per instrument on most commercial and other documents.

Stamp duty is generally paid by way of affixing stamps on the instrument and crossing them out. However, certain instruments now require the stamp duty to be paid in cash to the Revenue Department instead, such as agreements for the lease of land and buildings, other construction or floating rafts with a rental of THB 1 million or more, and hire of work agreements with a remuneration of THB 1 million or more.

Unstamped documents are not admissible as evidence in a civil lawsuit, and the surcharge can be as high as 600% of the duty for failure to pay the stamp duty on a timely basis.

Specific business tax

Specific business tax is collected at fixed rates on the gross revenue of certain businesses not subject to VAT, such as commercial banking, similar financial businesses, and the sale of immovable property, which are taxed at 3%, and life insurance, which is taxed at 2.5%.

The rate of specific business tax has been reduced to 0.01% for certain revenue derived by commercial banks and finance, securities, and credit foncier businesses, as well as businesses that have regular transactions similar to commercial banking.

An additional 10% of the tax is levied as municipality tax.

Capital taxes

There are no capital taxes in Thailand.

Payroll taxes

An employer is responsible for withholding personal income tax (PIT) from all salaries and benefits paid to or on behalf of an employee and remitting such tax to the Revenue Department within seven days from the end of the month in which the salaries and benefits were paid.

Social security contributions

Contributions are levied at the rate of 5% of the monthly salary of each employee, subject to a maximum levy per employee of THB 750 per month. These contributions are payable by both the employer and employee.

Local taxes

There are currently three major local taxes. However, it should be noted that the house and land tax and the local development tax below are planned to be revoked and replaced by a new land and building tax. A draft of the new law was approved by the Thai Cabinet on 21 March 2017 and is currently under the consideration of the NLA. The taxes currently in effect are as follows:

House and land tax

House and land tax is levied annually at the rate of 12.5% of the assessed economic rental income.

Local development tax

Local development tax is levied annually at rates ranging between 0.25% and 0.95% of the value of land assessed by local authorities. This tax does not apply if the property is subject to the house and land tax.

Signboard tax

Signboard tax is levied annually on certain commercial signs or billboards at varying rates according to size and language used. The rates per 500 square centimetres are THB 3 if all words are in Thai, THB 20 if both Thai and foreign words are used, and THB 40 if only foreign words are used or if the Thai words are below the foreign words.

Thailand

Branch income

Branches of foreign corporations are subject to CIT on locally earned profits only. Branch profits remitted to the foreign head office are subject to an additional tax at the rate of 10%. However, this is a tax on the disposition of profits abroad and is not limited to remittances. For example, a credit of profit to the head office account in the books is held to be a disposition of profit abroad even though no remittance of funds takes place.

Income determination

Inventory valuation

Inventory is valued at the lower of cost or market price. Any recognised method of ascertaining the cost price may be used, but a change in the method may only be made with the prior approval of the Director-General of the Revenue Department.

Capital gains

There is no specific legislation governing capital gains. All capital gains earned by a Thai company are treated as ordinary revenue for tax purposes. Capital gains on the sale of investments derived from or in Thailand by a foreign company not carrying on business in Thailand are subject to a tax of 15%, withheld at source by the purchaser, unless otherwise exempt under a DTT.

The following income earned by a foreign company not carrying on business in Thailand is subject to 15% WHT:

- Interest on bonds/debentures issued by state enterprises.
- Difference between the redemption price and the initial sale price of bonds issued by the government, state enterprises, and specified institutions.
- Gains on the transfer of bonds issued by the government, state enterprises, and specified institutions.

Dividend income

Dividends received from a Thai company by a company listed on the Stock Exchange of Thailand are exempt from tax. Dividends received by a non-listed company from other Thai companies are also exempt from tax, provided that the company receiving the dividends holds at least 25% of the total voting shares without any cross-shareholding in the company paying the dividend and that the shares have been held for at least three months before and three months after the dividends were received.

In other cases, where one Thai company receives dividends from another Thai company, one-half thereof is exempt from tax also on the condition that the shares have been held for at least three months before and three months after the dividends were received.

Dividends received from a company incorporated abroad are exempt from tax if the Thai company receiving the dividends holds at least 25% of the shares with voting rights of the company paying the dividends for a period of not less than six months before the date on which the dividends are received and the dividends are derived from the net profit in the foreign country taxed at a rate of not less than 15%. In the event that a 'special law' in a particular foreign country provides a reduced tax rate or

exemption for the net profit, the limited company that receives the dividends is still eligible for the tax exemption.

The share of profits received by a Thai company or a foreign company carrying on business in Thailand from an unincorporated joint venture carrying on business in Thailand is exempt from tax.

Stock dividends

Stock dividends are taxable to the recipient as ordinary income.

Interest income

Interest is taxable as income on the accrual basis.

Royalty income

Royalties are taxable as income on the accrual basis.

Foreign income

Thailand-incorporated companies are taxed on worldwide income. The foreign income received by a Thailand-incorporated company is taxable on the accrual basis. Double taxation is relieved by way of a credit against the tax chargeable in Thailand (see *Foreign tax credit in the Tax credits and incentives section*).

Deductions

Depreciation, amortisation, and depletion

Deductions for depreciation are allowed as a percentage of cost. If the rate of deduction adopted by a company under its own accounting method is lower than the maximum percentage of cost permitted, a deduction will be allowed only at the rate adopted by the company. The straight-line basis is the method most commonly used by companies, but any generally accepted basis, such as sum-of-the-years-digits or double-declining method, is permitted. The maximum permitted rates are shown below:

Asset	Maximum permitted rate (%)
Buildings:	
Durable buildings	5
Temporary buildings	100
Cost of acquisition of depletable natural resources	5
Cost of acquisition of lease rights:	
If there is no written lease agreement or if there is a written lease agreement containing a renewal clause whereby continual renewals are permitted	10
If there is a written lease agreement containing no renewal clause or containing a renewal clause but restricting renewable periods to a definitely limited duration	Percentage rate equals 100 divided by the sum of years of the original and renewable lease periods
Cost of acquisition of the right in a process, formula, goodwill, trademark, business licence, patent, copyright, or any other right:	
If the period of use is unlimited	10
If the period of use is limited	Percentage rate equals 100 divided by the number of years of use
Other assets not mentioned above, excluding land and inventory	20

Thailand

Special depreciation methods for certain assets

- Machinery and equipment for R&D may initially be depreciated at 40% of cost, with the remaining balance being depreciated at the above maximum rate of 20% *per annum*.
- Computer hardware and software may be depreciated within three accounting periods.

Special depreciation method for small companies

Companies and juristic partnerships with fixed assets, excluding land, with a value of no more than THB 200 million and with no more than 200 employees are entitled to use the following special depreciation methods:

- Machinery and equipment may initially be depreciated at 40% of cost, and the remaining balance will then be depreciated at the maximum rate of 20%.
- Computer hardware and software may initially be depreciated at 40% of cost, and the remaining balance can then be depreciated within three accounting periods.
- Factory buildings may initially be depreciated at 25% of cost, and the remaining balance will then be depreciated at the maximum rate of 5%.

Start-up expenses

Start-up expenses, such as incorporation expenses and registration fees, are deductible when incurred.

Interest expenses

Interest on money borrowed for the purpose of acquiring profit or for the purpose of the business is deductible. Interest incurred in respect of the construction or installation of fixed assets that require a period of time before they are ready for their intended use is considered to be capital expenditure and deductible in the form of depreciation.

Bad debts

Bad debts written off are deductible, provided that they are consistent with the rules, procedures, and conditions prescribed by the Ministerial Regulations.

Charitable contributions

Donations to specified charities or for public benefit are deductible in the amount actually paid but not exceeding 2% of net profit. Donations for education or sport are also deductible in the amount actually paid but not exceeding 2% of net profit.

Donations to support certain educational or recreational programmes are allowed a double deduction for tax. Donations made to educational institutions and to sports entities from 1 January 2016 to 31 December 2018 are also allowed a double deduction for tax.

Fines and penalties

Fines, penalties, and surcharges imposed under all tax laws are not deductible.

Taxes

In general, all taxes are deductible except CIT and VAT (in certain cases).

Other significant items

Non-deductible expenses include, but are not limited to, the following:

- Expenses in the nature of provisions.
- Contributions to any fund (except for registered provident funds).

Net operating losses

Losses may be carried forward to offset against the profits of the following five accounting periods. The carryback of losses is not permitted. A change in control of a loss-making company does not impact its loss carryforward status.

Payments to foreign affiliates

A Thailand-incorporated company may claim a deduction for royalties, management service fees, and interest charges, provided they are expended exclusively for the purpose of generating profit or for the purpose of the business in Thailand and are determined on an arm's-length basis.

Group taxation

Group taxation is not permitted in Thailand.

Transfer pricing

Thailand is planning to introduce specific transfer pricing provisions into the income tax law. One of the expected provisions is to make transfer pricing disclosure mandatory at the time of tax filing.

At present, related-party transactions are governed under the general provisions of the tax law, which require companies to transact on an arm's-length basis, as well as the transfer pricing guidelines.

The transfer pricing guidelines are in the form of a Departmental Instruction (no. Paw 113/2545) and do not have the status of legislation. This instruction provides internal directives to Revenue officials to adhere to when conducting transfer pricing audits, reviews, or investigations. It also provides guidelines to taxpayers on setting arm's-length prices for their transactions with related parties.

The instruction authorises the use of both traditional transaction methods (i.e. comparable uncontrolled price, resale price, and cost plus methods), as well as transactional profit methods, in order to determine the market price of a transaction. Although taxpayers are technically expected to consider using traditional transaction methods before resorting to using a transactional profit method, no one method is preferred in practice.

The instruction also defines the term 'market price', describes the transfer pricing documentation requirements, and allows taxpayers to apply for advance pricing agreements (APAs) in respect of any related-party transaction.

To address the APA process, the Revenue Department has issued separate APA guidelines. At present, Thailand accepts only bilateral APAs and limits the period covered to three to five accounting periods. Only a company or partnership incorporated in Thailand, which enters into intra-group transactions with affiliates who are residents of Thailand's treaty partners, may apply for an APA.

Thailand

Once the specific transfer pricing provisions are enacted, it is expected that there will be additional subordinate regulations to provide further details of the transfer pricing requirements in Thailand.

Thin capitalisation

There are no thin capitalisation rules. However, for certain businesses or as part of the conditions for granting tax incentives, a certain debt-to-equity ratio may be required.

Controlled foreign companies (CFCs)

There are no tax provisions in respect of CFCs.

Tax credits and incentives

Board of Investment (BOI) tax incentives

The BOI, by virtue of the Investment Promotion Act (including its amendment no. 4 [2017]) and the Competitive Enhancement Act (2017), provides tax incentives to certain activities within the following categories:

- Agriculture and agricultural products.
- Mining, ceramics, and basic metals.
- Light industry.
- Metal products, machinery, and transportation equipment.
- Electronic industry and electrical appliances.
- Chemicals, paper, and plastics.
- Services and public utilities.

The tax incentives available include the following:

- Exemption from import duties on imported machinery.
- Exemption from import duties on raw and essential materials imported for manufacturing for export.
- Exemption from CIT equal to or more than the amount of the investment, excluding the cost of land and working capital, for up to 15 years, depending on the promoted activity.
- Exclusion of dividends received from promoted enterprises from taxable income during the period of exemption from CIT and within six months from the date of expiry of any tax holiday period.
- THB 10 billion subsidy under the Competitiveness Enhancement Fund, without any conditions.

Incentives by category

Under the 2017 BOI promotion scheme, focus is placed on the activities and the importance of the activities. Tax incentives are categorised under four categories (A1 to A4) and non-tax incentives under two categories (B1 and B2), as below:

Group	CIT exemption	Import duty exemption on machinery	Import duty exemption on raw materials for export	Non-tax incentives
A1	8 years (without cap) + merit	Yes	Yes	Yes
A2	8 years + merit	Yes	Yes	Yes
A3	5 years + merit	Yes	Yes	Yes
A4	3 years + merit	Yes	Yes	Yes

Group	CIT exemption	Import duty exemption on machinery	Import duty exemption on raw materials for export	Non-tax incentives
B1	Merit (some activities)	Yes	Yes	Yes
B2	Merit (some activities)	No	Yes	Yes

The following tax incentives are granted for certain eligible activities categorised as B1 or B2:

- 50% CIT reduction for a maximum of ten years.
- Deduction from net profit for ten years of up to 70% of the investment amount in addition to the normal depreciation deductions.

In addition, tax incentives are granted to the following new categories of activities:

Targeted core technologies and enabling services

CIT exemption	Import duty exemption on machinery	Import duty exemption on raw materials for export	Non-tax incentives
10 years (without cap) + merit	Yes	Yes	Yes

Strategic based activities

CIT exemption	Import duty exemption on machinery	Import duty exemption on raw materials for export	Non-tax incentives
15 years	Yes	Yes	Yes

Additional incentives based on the value of a project (merit-based incentives) have been launched in order to motivate investors to invest or spend on activities that will benefit the country or the industry as a whole.

Merit on research and development (R&D)

R&D merit-based incentives will depend on the investment made or expenses incurred by investors in R&D for their business, the provision of advance training to employees, or the development of local suppliers. The investment or expenses permitted are as follows:

Investment in	Additional investment cap (% of investment or expenses incurred)
R&D, whether in-house, outsourced in the country, or in cooperation with educational or research institutions abroad	300
Donations to the Technology and Human Resources Development Fund as approved by the BOI	100
Licence fees paid for technology developed in the country	200
Training in advance technology	200
Development of local suppliers with not less than 51% Thai shareholding in advance technology training or technical assistance	200
Product or packaging design, whether in-house or outsourced in the country as approved by the BOI	200

Thailand

Additional years of tax exemption will be added to the standard tax incentives received as follows:

Investment/expenditure based on the sales revenue in the first 3 years	Additional period of tax exemption with cap based on amount of investment (in total, maximum period is 8 years)
1% or ≥ THB 200 million	1 year
2% or ≥ THB 400 million	2 years
3% or ≥ THB 600 million	3 years

Merit on decentralisation

As the previous zoning scheme has been abolished, investment promotion zones have been included as a decentralisation merit to businesses that have operations in any of the following 20 provinces with low average income:

Kalasin, Chaiyaphum, Nakhon Phanom, Nan, Bung Karn, Buriram, Phrae, Maha Sarakham, Mukdahan, Mae Hong Son, Yasothon, Roi Et, Sisaket, Sakhon Nakhon, Sa Kaew, Sukhothai, Surin, Nong Bua Lamphu, Ubon Ratchatani, and Amnatcharoen.

Additional incentives for enterprises located in these 20 provinces include the following:

- Three additional years of CIT exemption. However, a reduction of 50% of CIT for five years after the end of the tax holiday will be granted to projects with activities in Groups A1 and A2.
- Double deduction from taxable income of the cost of transportation, electricity, and water supply for ten years from the date on which revenue was first derived from the promoted activity.
- Deduction from net profit of 25% of the project's infrastructure installation or construction costs in addition to normal depreciation; such deduction can be made from the net profit of one or several years within ten years from the date on which revenue was first derived from the promoted activity.

Merit on industrial area development

One additional year of CIT exemption will be granted to projects located within an industrial estate or promoted industrial zone. However, the total period of CIT exemption will not exceed eight years.

Research and development (R&D) incentives

Tax incentives given to R&D contractors

R&D is a promoted activity under the Investment Promotion Act, which prescribes the criteria and conditions to be followed by an R&D contractor.

Tax incentives given are as follows:

- CIT exemption on income derived from the provision of R&D services as stated in the investment promotion certificate (qualified R&D services) for eight years with no cap.
- Exemption from import duty on imported machinery and raw materials for manufacturing for export.
- Exclusion of dividends derived from promoted enterprises from taxable income during the period of CIT exemption.

The R&D services must be of a description that is:

- Basic research: Activities that are conducted to explore new knowledge from basic natural phenomena and factual observation.
- Applied research: The application of basic knowledge to solve or develop a concept for commercial purposes.
- Pilot development: Activities performed to magnify a production scale from basic research and applied research.
- Demonstration development: To verify a technology and production process and to demonstrate the level of integrity of such process and viability on a commercial scale production in both quality control and cost estimation.

Tax benefits under the Revenue Code

The Revenue Code provides for an additional 100% deduction for tax in respect of expenditure incurred in Thailand on R&D for technology and innovation (including product and process innovation) when hiring government agencies or the private sector, as approved by the Director-General of the Revenue Department.

In addition to the above, a further 100% tax deduction is granted for R&D expenses paid from 1 January 2015 to 31 December 2019 with threshold amounts depending on the revenue of the company.

Eastern Economic Corridor (EEC)

Currently, the draft EEC law is under consideration by the relevant government authority.

The EEC project will consist of the three Eastern provinces of Rayong, Chonburi, and Chachoengsao, and investment will be promoted in targeted industries, such as smart electronics, automotive, automation and robots, aviation, digital, etc., with incentive promotion packages.

Regional operating headquarters (ROH)

ROH means a company organised under the Thai law providing administrative, technical assistance, or supporting services to its domestic or overseas affiliated enterprises or branches in at least three countries other than Thailand.

Tax incentives available to ROH are under two packages. However, the privileges under the second package are no longer available to new applicants.

The criteria for ROH are:

- Company formed under Thai law with a minimum paid-up capital of THB 10 million.
- Provision of qualified services to qualified affiliates (companies with at least 25% common group ownership) in at least three countries other than Thailand.
- Income from services provided to, or royalties received from, overseas affiliates must be at least 50% of the total income of the ROH company (reduced to one-third for the first three years).

The following tax incentives are still available to existing and new applicants under the first package, provided all of the criteria are met:

- 10% income tax on net profit from ROH services provided to foreign and domestic affiliates.

Thailand

- 10% income tax on net profit from qualified royalties and interest income from lending borrowed funds to domestic and foreign affiliates.
- Corporate and domestic WHT exemptions on dividends received from affiliates.
- Exemption from WHT on dividends paid to foreign corporate shareholders on net profit arising from ROH qualified income.
- Expatriates employed by the ROH can choose to be taxed at a flat rate of 15% for four consecutive years.

International headquarters (IHQ)

An IHQ is defined as a company incorporated under the law of Thailand for the purpose of providing managerial, technical, or supporting services or financial management to its associated enterprises or branches situated in Thailand or abroad. This includes carrying on a business as an international trade centre (*see International trade centre below*), which has been approved as an IHQ.

The criteria for an IHQ are:

- A company formed under Thai law with the minimum paid-up capital of THB 10 million.
- Managerial, technical, or supporting services (and financial management in the case of treasury centres, *as stated below*) must be provided to foreign affiliates (companies with at least 25% common group ownership, directly or indirectly).
- Operating expenses related to IHQ activities of at least THB 15 million per year.

The tax concessions are:

- 10% CIT on the net profit from qualified services provided to domestic affiliates and royalties derived from domestic affiliates.
- Full CIT exemption on the net profit from qualified services provided to foreign affiliates, royalties and dividends derived from foreign affiliates, and capital gains from the transfer of shares in foreign affiliates (under conditions).
- WHT exemption on dividends paid to foreign corporate shareholders from the net profit derived from the income exempt from tax.
- Expatriates employed by the IHQ can choose to be taxed at a flat rate of 15% from the date on which the IHQ becomes qualified until the date on which the IHQ is no longer qualified or the employment is terminated.

Please note the following:

- A qualified IHQ will be granted tax privileges for 15 accounting periods.
- The total income subject to tax at the 10% rate must not exceed the total income from qualified services and royalties that are both exempt from tax.
- If an IHQ lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

Treasury centre (TC)

An IHQ that has obtained a TC licence from the Bank of Thailand can request approval from the Revenue Department for the tax concessions available when carrying on the business of financial management for its associated enterprises or branches situated in Thailand or abroad.

Financial management includes:

1. Financial management of a TC permitted under the exchange control law.
2. Borrowing and lending of Thai currency ('Baht') in the following cases:
 - a. Funds borrowed from Thai financial institutions or affiliates in Thailand.
 - b. Lending of funds obtained from operations under 1 or 2 (a) in Thai currency to affiliates in Thailand.

The tax concessions are:

- WHT exemption on interest paid to foreign companies not carrying on business in Thailand on loans borrowed for re-lending to affiliates.
- Exemption from specific business tax on all remuneration received from financial management services provided to affiliates.
- Other tax concessions available for the TC activities are the same as for IHQ noted above.

A qualified IHQ will be granted tax privileges for 15 accounting periods.

The criteria are the same as noted above for an IHQ.

If a TC lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

International trade centre (ITC)

An ITC is defined as a company established under the law of Thailand and engaged in the business of buying and selling goods, raw materials, and parts, including providing services relating to international trade to foreign juristic entities. Services relating to international trade include procuring goods, maintaining goods awaiting delivery, packaging, transporting goods, providing insurance for goods, providing advice, including technical services and training relating to goods, and providing other services as prescribed by the Director-General of the Revenue Department.

An IHQ is entitled to obtain approval to carry on a business as an ITC and enjoy the same tax concessions.

The criteria for ITC are:

- Company formed under Thai law with a minimum paid-up capital of THB 10 million.
- Operating expenses related to ITC activities of at least THB 15 million per year.

The tax concessions are:

- Exemption from CIT on income from buying and selling goods abroad without importing such goods into Thailand (out-out), including income from services relating to international trade provided to foreign juristic entities and received in or from a foreign country.
- WHT exemption on dividends paid to foreign corporate shareholders from the net profit derived from the income exempt from tax.
- Expatriates employed by the ITC can choose to be taxed at a flat rate of 15% from the date on which the ITC becomes qualified until the date on which the ITC is no longer qualified or the employment is terminated.

Thailand

A qualified ITC will be granted tax privileges for 15 accounting periods.

If an ITC lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

Foreign tax credit

A Thai company can use foreign tax paid on business income or dividends as a credit against its CIT liability. However, the credit cannot exceed the amount of Thai tax on the income.

Notes

1. The zero rate applies to a recipient company listed on the Stock Exchange of Thailand and any other limited company that holds at least 25% of the total shares with voting rights in the company paying the dividend without any cross shareholding.
2. The 1% rate applies to interest paid to all resident corporations other than banks or finance companies, except where interest arises from bonds or debentures.
3. The progressive rates refer to the PIT rates.
4. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
5. The 10% rate applies to interest paid (i) to a recipient that is a bank or financial institution (including an insurance company) or (ii) with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services.
6. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
7. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematograph films and films, tapes, or discs for radio or television broadcasting.
8. The 5% rate applies to copyright royalties and other like payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work, excluding royalties with respect to motion picture films and works on film or videotape for use in connection with television.
9. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.

Thailand

10. The 10% rate applies to interest paid (i) to a recipient that is a bank or financial institution (including an insurance company); (ii) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (iii) in connection with the sale on credit of any merchandise by one enterprise to another enterprise.
11. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, dramatic, musical, artistic, or scientific work, including software, cinematograph films or films, or tapes used for radio or television broadcasting; and the 10% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience.
12. The 5% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.
13. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment. The 10% rate applies to royalties paid in all other cases.
14. The 3% rate applies to interest paid on loans or credits granted for four years or more with the participation of a financing public institution to a statutory body or to an enterprise in relation to the sale of any equipment or to the survey, the installation, or the supply of industrial, commercial, or scientific premises and of public works. The 10% rate applies to interest paid to any financial institution.
15. The zero rate applies to royalties paid to a contracting state or state-owned company with respect to films or tapes, and the 5% rate to royalties for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work.
16. The zero rate applies to interest paid to any financial institution wholly owned by the other contracting state, a 'land', a political subdivision, a local authority, or a local administration thereof, and in particular, in the case of the Federal Republic, by the Deutsche Bundesbank or the Kreditanstalt für Wiederaufbau, and in the case of Thailand, by the Bank of Thailand. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
17. The 10% rate applies to (i) interest paid to any financial institution (including an insurance company) and (ii) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
18. The 5% rate applies to royalties paid for the use or the right to use any copyright of literary, artistic, or scientific work and the 10% rate for the use or the right to use any patent, trademark, design, or model, plan, secret formula, or process.
19. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, and the 10% rate for the use of or the right to use industrial, commercial, or scientific equipment or any patent.
20. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting.
21. The zero rate applies to interest paid to any financial institution wholly owned by the other contracting state, an administrative subdivision, or a local authority thereof. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
22. The zero rate applies to interest paid to any financial institution wholly owned by the government. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
23. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, including software and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, and the 10% rate for the use of or the right to use any patent, trademark, design, or model, plan, secret formula, or process.
24. The 5% rate applies to royalties paid for the use of, or the right to use, any copyrights of literary, artistic, or scientific work, while the 10% rate applies to royalties for the consideration for any services of a managerial or consultancy nature, or for information concerning industrial, commercial, or scientific experience.
25. The 10% rate applies to royalties paid for the use of or the right to use any copyright; or the use of, or the right to use, any industrial, scientific, or commercial equipment; or the use of, or the right to use, any motion picture film, or film or videotape or any other recording for use in connection with television, or tape or any other recording for use in connection with radio broadcasting; or the reception of, or the right to receive, visual images or sounds, or both, transmitted to the public by satellite or, cable, optic fibre, or similar technology; or the use in connection with television or radio broadcasting, or the right to use in connection with television or radio broadcasting, visual images or sounds, or both, transmitted by satellite or cable, optic fibre, or similar technology.
26. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, and the 10% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.
27. The 10% rate applies to (i) interest paid to a bank or financial institution (including an insurance company) and (ii) interest from a loan or debt claim that is guaranteed by the government.
28. The zero rate applies to royalties paid to a contracting state or a state-owned company with respect to films or tapes, and the 10% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work.

29. In case of interest arising in Thailand, the 10% rate applies to interest paid to a Philippines financial institution (including an insurance company). In the case of interest arising in the Philippines, the 10% rate applies in respect of public issues of bonds, debentures, or similar obligations.
30. The zero rate applies to royalties paid to a contracting state or a state owned company with respect to films or tapes. The 5% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or tapes used for television or broadcasting.
31. The 10% rate applies to interest paid to the following recipients (i) in the case of a resident of Russia, any institution having a licence to carry on banking operations; and (ii) in the case of a resident of Thailand, any financial institution (including an insurance company).
32. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films, or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
33. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary or artistic work, including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment.
34. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties in consideration of financial leasing for the use of, or the right to use, industrial, commercial, or scientific equipment.
35. The 5% rate applies to royalties paid for the alienation or the use of, or the right to use, any copyright, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design or model, plan, secret formula, or process.
36. The 5% rate applies if the recipient holds at least 25% of the capital of the company paying the dividend.
37. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
38. The zero rate applies to interest paid to any other financial institution established and owned by the government to promote trade and investment. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
39. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including software, motion pictures, and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment.

Tax administration

Taxable period

The tax year for a company is its accounting period, which must be of 12 months' duration. However, it may be less than 12 months in the case of the first accounting period after incorporation, the accounting period of dissolution, or after approval for a change in the accounting period has been received from the Revenue Department and the Business Development Department.

Tax returns

The tax system is one of self-assessment. A company prepares and files its tax returns by the due dates and at the same time pays the taxes calculated to be due. The annual CIT return is due 150 days from the closing date of the accounting period.

Payment of tax

CIT is paid twice in each year. A half-year return must be filed within two months after the end of the first six months of an accounting period. The tax to be paid is computed on one-half of the estimated profit for the full accounting period, except for listed companies, banks, certain other financial institutions, and other companies under prescribed conditions where the tax is based on the actual net profit for the first six months. The balance of the tax due is payable within 150 days from the closing date of the accounting period, together with the annual tax return. Credit is given for the amount of tax paid at the half-year.

Thailand

Tax audit process

If, within a period of two years from the date of filing a tax return, the assessment officer has reason to believe that false or inadequate information has been declared in a return, the assessment officer has the power to issue a summons requesting the presence of the person responsible, or a witness, for examination, and to order either of them to produce accounts or other relevant evidence, provided that advance notice of seven days is given. The subsequent examination of the books and records is normally carried out at the company's offices if it is inconvenient to transfer all the documents to the tax office. After completion of the examination, the assessment officer has the power to adjust the amounts previously assessed or included in a return on the basis of the evidence, and issue a further assessment for tax together with penalties and surcharges, or adjust the amount of losses available for carryforward.

Tax audits may cover the previous five accounting periods from the date of filing a tax return with the approval of the Director-General if the assessment officer has evidence of an intention to evade tax or in the case of a claim for a refund of tax. However, under the Civil and Commercial Code, the Revenue Department can assess tax for up to ten years.

Statute of limitations

The statute of limitations for tax is ten years.

Topics of focus for tax authorities

Topics of focus for tax authorities currently include the following:

- Deductibility of management service fees or expenses allocated to Thailand by foreign affiliates.
- International inter-company transactions and transfer pricing.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

The intergovernmental agreement (IGA) between the United States and Thailand regarding the US FATCA was signed on 4 March 2016. The agreement will enter into force on the date of Thailand's written notification to the United States that Thailand has completed its necessary internal procedures for entry into force.

The US Treasury has previously treated the IGA to be 'in effect' since 30 June 2014 when the United States and Thailand reached an agreement in substance and Thailand consented to disclose this status. In accordance with this status, financial institutions in Thailand were allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect.

Significant developments

In November 2016, Timor-Leste introduced a Social Security scheme for employees (and their families) working in Timor-Leste, including funding obligations for both employers and employees. Implementing regulations remain outstanding.

On 9 January 2017, the Timor-Leste government unitarily terminated the 2006 Treaty on Certain Maritime Agreements on the Timor Sea (CMATS) with Australia, with termination effective on 10 April 2017. CMATS was relevant to the fiscal and other arrangements impacting oil and gas activity in disputed waters outside of the Joint Petroleum Development Area (JPDA) (and predominantly the large but undeveloped Greater Sunrise gas field). This termination leaves a considerable regulatory/fiscal vacuum around developing hydrocarbon resources in this area.

In April 2017, Timor-Leste signed its first onshore Production Sharing Contracts (PSCs) (x2) with an Australian investor.

In March and April 2017, Timor-Leste passed a new Commercial Companies Law and an amended Private Investment Law.

Taxes on corporate income

Timor-Leste residents are subject to income tax on worldwide taxable income, where taxable income is essentially the difference between gross income and allowable deductions. Non-residents are generally subject to income tax on Timor-Leste-source income attributed to a permanent establishment (PE) (*see the Branch income section for more information*). Non-residents without a PE may be subject to a 10% withholding tax (WHT) (*see the Withholding taxes section for more information*).

The income of companies is generally subject to corporate income tax (CIT) at a flat rate of 10%.

Industry-specific CIT rates

The rate of CIT for oil and gas contractors is 30%, while sub-contractors are subject to CIT at the flat rate of (generally) 6%.

Supplemental Petroleum Tax (SPT) also applies for oil and gas contractors and is imposed on 'accumulated net receipts' using a specific formula. SPT is deductible for CIT calculation purposes.

Separate tax arrangements apply for petroleum activities in the JPDA (*see the Other issues section*).

Timor-Leste

Local income taxes

There are no local taxes on income in Timor-Leste.

Corporate residence

The definition of a corporate resident (resident legal person) covers a wide range of entities, such as companies, partnerships, trusts, governmental institutions, and unincorporated associations incorporated, formed, organised, or established in Timor-Leste.

Permanent establishment (PE)

A PE is defined as a fixed place of business through which the business of a person is wholly or partly carried on, including:

- A place of management.
- A branch.
- A representative office.
- An office.
- A factory.
- A workshop.
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, including any place of drilling for mineral exploration.
- A fishery, place where animal husbandry is conducted, farm, plantation, or forest.
- A construction, installation, or assembly project.
- The furnishing of a service through employees or other personnel if conducted for more than 60 days in any 12-month period.
- A natural or legal person acting as a dependent agent.
- An agent or employee of a non-resident insurance company if the agent or employee collects premiums or insures risks in Timor-Leste.

Other taxes

Sales tax

Sales tax is imposed on the sales tax value of:

- taxable goods imported into Timor-Leste and
- taxable goods sold or taxable services provided in Timor-Leste on or after the date specified by Parliament.

Taxpayers liable for sales tax include the following:

- A taxpayer who imports taxable goods into Timor-Leste.
- A taxpayer who sells taxable goods in Timor-Leste.
- A taxpayer who provides taxable services in Timor-Leste.

The rates of sales tax are 2.5% for taxable goods imported into Timor-Leste and 0% for the sale of taxable goods and provision of taxable services in Timor-Leste.

Services tax

Services tax is imposed at 5% on any gross consideration of more than 500 United States dollars (USD) received by a taxpayer for the provision of hotel, restaurant and bar, or telecommunication services.

Import duties

Import duty applies to imported goods (except for specifically exempted goods) at 2.5% of the 'customs value' of the goods. Customs value is the fair market value, including cost, insurance, and freight (CIF), as stated in the General Agreement on Tariffs and Trade (GATT) rules.

The following goods are exempted from import duty:

- Goods accompany a person arriving in Timor-Leste from another territory (limitations apply).
- Imports of the type exempted under specific international conventions.
- Goods re-imported in the same condition as when they were exported.
- Goods, other than alcohol or tobacco, imported by registered charitable organisations, registered under any law of Timor-Leste, provided the goods are to be used for charitable purposes of humanitarian assistance and relief, education, or health care.
- Other goods for temporary admission if the importer has provided security for the import duty in the prescribed manner.
- Goods for consumption by international staff of the United Nations Integrated Mission in East Timor or members of peace keeping forces from contingent countries, provided the goods are sold in conformity with prescribed rules of sale.
- Certain infant and female hygiene products.
- Other goods imported into Timor-Leste as personal goods accompanying a traveller and where the import duty that would be imposed on the import would be USD 10 or less.

Excise tax

Excise tax is imposed on excisable goods where removed from a warehouse by a registered manufacturer for consumption in Timor-Leste or imported into Timor-Leste.

Below is the list of excisable goods and the respective rates of excise tax:

Goods	Excise tax rate
Beer	USD 1.90/litre
Wine, vermouth, fermented beverages (such as cider)	USD 2.50/litre
Ethyl alcohol (other than denatured) and other alcoholic beverages	USD 8.90/litre
Gasoline, diesel fuel products, and other petroleum products	USD 0.06/litre
Tobacco and tobacco products	USD 19.00/kg
Cigarette lighters	12% of the excise value
Smoking pipes	12% of the excise value
Arms and ammunition	200% of the excise value
Motor cars and small passenger vehicles (with an excise value exceeding USD 70,000)	35% of the excise value
Private boats and aircraft	20% of the excise value

Note that the excise value of excisable goods imported into Timor-Leste is the total of the customs value and any import duty imposed. The excise value of excisable goods

Timor-Leste

manufactured in Timor-Leste is their fair market value at the time of removal from the manufacturer's warehouse.

Goods on the above list are excisable goods, other than:

- goods imported into Timor-Leste that are exempt from import duty, or
- goods exported from Timor-Leste within 28 days after their production or import, as long as the taxpayer liable to excise tax submits to the Banking and Payments Authority documentary proof of the export of goods.

Property taxes

There are no taxes on property in Timor-Leste.

Transfer taxes

There are no transfer taxes in Timor-Leste.

Stamp duties

There is no stamp duty in Timor-Leste.

Payroll taxes

An employer paying taxable wages shall withhold Wage Income Tax (WIT) at a rate of 10% from those wages and remit the WIT on a monthly basis.

An annual WIT return is due by the last day of the March following the end of the relevant tax year. Information on WIT withheld must also be provided to each employee on an annual basis or on termination of employment.

Social security contributions

A Social Security scheme was introduced in November 2016, with both employers and employees required to make contributions. The scheme provides cover for loss of income/benefits due to work-related accidents, maternity, old age, and death. It would appear that Social Security contributions should be deductible to employers. Implementing regulations for this scheme are still outstanding.

Branch income

The taxable income of a non-resident carrying out business activities through a PE is calculated by reference to:

- the income attributable to the PE
- any sales of goods or merchandise of the same or similar kind as those sold through the PE, and
- any other business activities carried on in Timor-Leste of the same or similar kind as those effected through the PE.

Other principles for determining the taxable income of a PE in Timor-Leste include the following:

- Profit is calculated as if the PE was a Timor-Leste entity engaged in the same or similar activities under the same or similar conditions and dealt with wholly independently from the non-resident person of which it is a PE.

- Subject to this, deductions may be claimed for expenses incurred for the purposes of the business activities of the PE, including head office expenditures, whether incurred in Timor-Leste or elsewhere.
- No deductions may be claimed for amounts paid or payable by the PE to its head office or to another PE of the non-resident person, other than towards the reimbursement of actual expenses incurred by the non-resident person to third parties, by way of:
 - royalties, fees, or other similar payments
 - compensation for any services (including management services) provided to the PE, and
 - interest on money lent to the PE (except for banking businesses).

Income determination

Taxable business profits are determined on the basis of net profit for financial accounting purposes in accordance with International Financial Reporting Standards (IFRS), subject to certain modifications in the Tax and Duties Act (TDA). In general, income is assessable when 'receivable', while expenses are deductible when 'payable'. A taxpayer with turnover of less than USD 100,000 may, however, elect to pay tax on a cash basis.

Gross income is defined widely to mean "any realised increase in economic capacity in whatever name or form which can be used for consumption or to increase the wealth of the taxpayer other than wages that are subject to Wages Income Tax (WIT)".

The gross income for a tax year is the total amount earned by the taxpayer, including, but not limited to, business income, property income, lottery prizes or awards, and refunds of tax payments previously deducted as an expense.

Inventory valuation

There are no specific provisions dealing with inventory valuation in Timor-Leste. This is because a deduction is allowed for the cost of inventory incurred during the tax year even if the inventory is on hand at the end of the year.

Capital gains

Gains and losses arising from the alienation of assets are generally assessable and deductible as ordinary income and subject to tax at the standard CIT rate.

Dividend income

Dividends are tax exempt in the hands of Timor-Leste residents.

Interest income

Interest income is generally assessable as ordinary income and subject to tax at the standard CIT rate.

Royalty income

Royalty income is subject to a 10% WHT.

If the royalty payment is to a resident non-individual, the WHT is creditable for income tax purposes.

If the royalty payment is to an individual, the 10% WHT constitutes a final income tax.

Timor-Leste

Exempted income

The following income is tax exempt:

- Any aid or donations, provided that the donor and recipient do not have any business or control relationship.
- Gifts received by a religious, educational, or charitable organisation, provided that the donor and recipient do not have any business or control relationship.
- Assets (including cash) received by a resident in exchange for shares or a capital contribution.
- Any amount paid by an insurance company to a resident in connection with accident or life.

Foreign income

Under the worldwide income principle, a resident taxpayer is required to calculate income that is not only Timor-Leste sourced but also foreign sourced. In the case that the foreign-sourced income is taxed at source, Timor-Leste allows a foreign tax credit for the particular tax year (*see Foreign tax credit in the Tax credits and incentives section*).

With regard to profits retained in controlled foreign companies (CFCs), Timor-Leste does not currently have any arrangements to otherwise deem the repatriation of the profit.

Deductions

The taxable income of residents and non-residents who have a PE in Timor-Leste shall be determined on the basis of gross income reduced by:

- expenditure and losses incurred from the alienation of assets or the discharge of debt in the conduct of a taxable business activity
- expenditure incurred in deriving any other amounts included in gross income
- any loss on disposal of an asset other than assets held on personal account
- contributions to an approved pension fund, and
- bad and doubtful debts (subject to various tests - *see Bad debt below*).

Depreciation and amortisation

'Depreciable assets' include any tangible movable property with a useful life exceeding one year that is wholly or partly used for taxable business activities. 'Intangible assets' include property, other than tangible movable property or immovable property, with a useful life exceeding one year that is used for taxable business activities.

There are provisions for election of either straight-line or double-declining methods, the pooling of assets, and *de minimis* exceptions. However, the rate of tax depreciation/amortisation (for non-petroleum operations) is set at 100%, meaning that taxpayers are, in effect, entitled to a full and up-front deduction. In circumstances where the asset is only partly used for the conduct of taxable business activities, the deduction is reduced by the proportion of its non-taxable business use.

Goodwill

There are no specific provisions dealing with the treatment of goodwill. We expect that the treatment should follow that under IFRS.

Start-up expenses

There are no specific provisions dealing with the treatment of start-up expenses. However, assuming that the start-up expense is incurred to derive income, we expect that start-up expense should be deductible.

Interest expenses

Interest expenditure is not deductible unless incurred by a financial institution.

Bad debts

Bad debts are not deductible without passing all of the following tests:

- The debt was previously included in taxable income.
- The debt was written off in the accounts during the relevant tax year.
- There are reasonable grounds for believing that the debt will not be recovered.

The above tests do not apply to banks, which are entitled to deduct provisions for doubtful debt where determined in accordance with the prudential requirements prescribed by instruction of the Banking and Payments Authority.

Charitable contributions

Donations are not deductible if the donations are exempt from income tax in the hands of the recipient.

Fines and penalties

Penalties for violation of law and regulation are not deductible.

Taxes

Timor-Leste or foreign income tax is not deductible.

Deductions not allowed or conditional deductions

The following expenses are also not deductible to a resident or non-resident with a PE in Timor-Leste:

- The distribution of profits in whatever name or form.
- Expenses incurred for the personal benefit of a taxpayer, a taxpayer's dependents, shareholders, partners, or members.
- Reserves, other than as provided for under the TDA.
- Excessive compensation paid by a legal person to a member of the legal person, or paid between associates.
- Salaries paid to a partner in a partnership.
- A bribe, or any similar payment.
- Expenditure or losses incurred to the extent recoverable under an insurance policy or a contract of indemnities.

Net operating losses

Losses from previous years may be carried forward indefinitely. However, the carried forward loss from the disposal of assets may only be utilised against gains arising from the disposal of assets. Foreign-sourced losses may only be offset against foreign-sourced income of that particular country.

The carryback of losses is not allowed.

Timor-Leste

Payments to foreign affiliates

Excessive payments or compensation to 'members of a legal person' or payments between associates for work performed should not be deductible. The TDA, however, does not elaborate on the meaning of 'excessive'.

Group taxation

Companies, etc. are taxable on a stand-alone basis (i.e. there is no grouping or ability to transfer tax losses).

Transfer pricing

Excessive payments or compensation to 'members of a legal person' or payments between associates for work performed should not be deductible. The TDA, however, does not provide specific guidance on how to determine arm's-length pricing on related-party transactions or any other general transfer pricing principles.

Thin capitalisation

Currently, there are no 'thin capitalisation' or similar rules in Timor-Leste (noting that interest is not deductible, except for financial institutions).

Controlled foreign companies (CFCs)

Timor-Leste does not have any CFC regulations.

Tax credits and incentives

Foreign tax credits

A resident taxpayer is entitled to a credit for any foreign income tax paid in respect of foreign-source income. The foreign tax credit is calculated separately for each foreign country from which income is derived by a taxpayer. The value of such tax credits is limited to the value of the Timor-Leste income tax payable on that income. There is no deduction or carryforward of any excess foreign tax credit.

Withholding taxes

WHT is imposed on the following payments by residents to a resident:

Type of payment	WHT rate (%)	Final/non-final tax
Dividends	0	Final
Interest	0	Not final
Royalties	10	Not final, except where paid to an individual
Rent (land and building)	10	Not final, except where paid to an individual
Prize and winnings	10	Final
Construction/building activities	2	Final *
Construction consulting services	4	Final *
Air and sea transportation	2.64	Final *
Mining and mining support services	4.5	Final *

* The default position is that such amounts will be a final tax. The income recipient can elect to have these payments for services not subjected to final tax by submitting a notification letter to the Timor-Leste Revenue Service.

Payments of Timor-Leste-source income made by a resident to a non-resident are subject to WHT at 10%. Timor-Leste has entered into a double taxation treaty (DTT) with Portugal (although elements of DTT relief are also embedded in the Timor Sea Treaty (TST), *see Taxation of petroleum operations in the Other issues section*).

Where WHT is applied as a final tax, the taxed income is not included in the recipients' taxable income for income tax purposes. Accordingly, expenses incurred in deriving income that is subject to final tax are not deductible for income tax purposes.

Tax administration

Taxable period

The standard tax year is the calendar year, although different accounting year-ends can be granted upon application.

Tax returns

CIT returns are to be filed annually by the 15th day of the third month following the year end.

Service tax, excise tax, sales tax, and WHT are to be filed monthly by the 15th day of the following month.

Payment of tax

CIT due shall be settled to the Banking and Payments Authority or another entity nominated by the Timor-Leste Revenue Service by the date of filing (*see above*).

Service tax, excise tax, sales tax, and WHT should be settled to the Banking and Payments Authority or another entity nominated by the Timor-Leste Revenue Service by the 15th day after the end of the following month.

Penalties

If a taxpayer fails to deliver the tax form on time, it shall be liable to an additional tax of USD 100. If a taxpayer fails to deliver all or part of any tax due by the due date, that taxpayer shall be liable to an additional tax of 5% of the amount due plus an additional 1% of the tax due on the 15th day of each month following the due date and:

- if the failure was due to gross carelessness on the part of the person, further additional tax of 25% of the tax that remains unpaid, or
- if the failure was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax that remains unpaid.

If a taxpayer has understated the tax due in the tax form, that taxpayer shall be liable to an additional tax of 15% and:

- if the understatement was due to gross carelessness on the part of the taxpayer, further additional tax of 25% of the tax understated, or
- if the understatement was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax understated.

Timor-Leste

Tax audit process

Assessments may occur upon the following:

- The delivery of a tax return form and payment.
- After receipt of a return where the Commissioner believes a return is incorrect.
- Where a taxpayer fails to file a return.

Assessments may be amended according to the following events:

- By the taxpayer upon delivery to the Commissioner of an amended assessment.
- Via a taxpayer request to the Commissioner.
- Via specific amendment by the Commissioner.

Statute of limitations

The Timor-Leste Revenue Service may issue an assessment notice or amend an assessment notice only within five years from the date of filing of the return. In the event of a deliberate tax evasion or fraud, there is no time limit for the issuance of an assessment notice.

Topics of focus for tax authorities

Based on our experience, the Timor-Leste tax authorities are focussing on the timely remittance of the tax obligations. From an industry perspective, the oil and gas sector continues to be a focus. Finally, there have been numerous challenges of tax concessions granted on a contractual basis, including by government agencies.

Other issues

Taxation of petroleum operations

The taxation of petroleum operations in Timor-Leste is partly covered by the TDA. However, the TDA operates only to modify the taxation of petroleum activities pursuant to a number of legacy tax regimes. These modifications apply to contractors, sub-contractors, and any other parties receiving income from the supply of goods or services to a contractor or sub-contractor.

A contractor is defined as a person with whom the responsible Ministry or Designated Authority, as the case may be, has made a petroleum agreement. A sub-contractor includes any person supplying goods or services directly or indirectly to a contractor in respect of petroleum operations.

Specific provisions for the taxation of petroleum operations include:

- A CIT rate for contractors of 30% on taxable income, while sub-contractors will generally be taxed on a final WHT basis at a rate of 6% (*although see JPDA below*).
- No tax on branch profit remittances (*although see JPDA below*).
- Where 'net receipts' exceed specified levels, an SPT can apply.
- The 'ring fencing' of income and expenditure within the contract area.
- Modified deductibility rules, including around the deductibility of interest for contractors and a modified depreciation regime.
- A specific WHT regime.
- A specific transfer pricing and associated anti-avoidance provision.

Special tax regime for the Joint Petroleum Development Area (JPDA)

The JPDA is a geographical area in the Timor Sea known to be rich in hydrocarbon deposits. The JPDA covers the 'Annex F' Production Sharing Contracts (PSCs) (*see below*) known as *Bayu-Undan* (including the Elang Kakatua and Kakatua North fields) PSCs, and Greater Sunrise. The JPDA also covers a number of non-Annex F PSCs.

Pursuant to the Timor Sea Treaty (TST), the JPDA is technically within the taxation jurisdiction of both Timor-Leste and Australia and therefore falls under the joint control and management of Timor-Leste and Australia. 'Annex F' of the TST refers to the PSCs with commercial discoveries at the time of the TST signing and so imbeds a number of historical tax principles.

Control of the JPDA is exercised by a 'Joint Authority' containing representation from Australia and Timor-Leste. The petroleum activities covering the exploration, development, processing, transportation, and marketing of hydrocarbons are carried out pursuant to PSCs entered into between the designated authority and the oil company in question.

Under the TST, revenue from the JPDA PSCs is split 90% for Timor-Leste and 10% for Australia. Accordingly, for tax calculation purposes, business profits or losses of an entity carrying on business in the JPDA are reduced by the 'reduction percentage' of 90% for Timor-Leste and 10% for Australia. This effectively means that the tax rates applied by Timor-Leste and Australia are at 90% and 10% of their respective national level.

For Timor-Leste, these income tax rates are effectively 27% (i.e. 30% x 90%) for all participants with PEs with an effective 18% (i.e. 20% x 90%) final WHT applying on most payments for services or passive income to non-residents (according to the PSC). A 10% value-added tax (VAT) also applies to first tier sub-contractors.

The tax regime *as outlined under 'Taxation of petroleum operations' above* also applies in the JPDA (except for 'Annex F' PSCs). This is, however, with a number of important modifications, including the exclusion of the service tax, excise tax, sales tax, import duty, and WIT.

Significant developments

Finance Act No. 7 of 2016 introduced an amnesty that waived interest and penalties due on the late payment of income tax, corporation tax, value-added tax (VAT), business levy, green fund levy, withholding tax (WHT), and petroleum profits tax for periods up to and including income year 2015 where such taxes were paid by 16 September 2016. It also waived the penalty on late filing of income tax returns, corporation tax returns, petroleum tax returns, VAT returns, annual returns, and other filings due under the Companies Act.

The Act also contains the following measures:

- Extended the income tax exemption to the year 31 December 2025 for profits earned on the sale of residential house sites and premiums/rents and gains/profits from the letting and sale of newly constructed commercial buildings or multi-storey car parks.
- An income tax exemption until 31 December 2025 on premiums/rents and gains/profits from letting and sale of a multi-family dwelling constructed on or after 1 July 2016 (certification from the Minister must be obtained to claim exemption).
- A 25% wear and tear allowance on sensor and measurement equipment, diagnostic equipment, venting equipment, gas detectors, handheld gas detectors, and machine shop equipment.
- VAT zero-rating of new and used (not older than four years) compressed natural gas (CNG), electric, and hybrid motor vehicles (expires on 31 December 2020).
- Import duty exemption on new and used (not older than four years) electric and hybrid vehicles (expires on 31 December 2020).
- Import duty exemption on CNG injectors, air/fuel mixer, ECU of CNG kit, coalescing filter, CNG refuelling receptacle, high pressure piping, and CNG cylinder.
- Motor vehicle tax exemption for the period 1 January 2016 to 31 December 2020 on new and used (not older than four years) CNG, electric, and hybrid motor vehicles.

Taxes on corporate income

A Trinidad and Tobago resident corporation is taxed on worldwide income. A non-resident company engaged in business in Trinidad and Tobago is taxed only on income directly or indirectly accruing in or derived from Trinidad and Tobago.

The standard corporation tax rate is 25%, but this varies in the case of certain classes of companies. The current corporation tax rates are as follows:

Type of company	Corporation tax rate (%)
Ordinary companies	25
Petrochemical companies	35

Trinidad and Tobago

Type of company	Corporation tax rate (%)
Life insurance companies	15
Petroleum production companies (petroleum profits tax)	50
Petroleum production companies (deep sea)	35

Business levy

Corporations are subject to a business levy at the rate of 0.6% of gross revenue or receipts where the levy exceeds the corporation tax liability. Exemption is available for certain companies, including petroleum companies and companies whose annual turnover is less than 360,000 Trinidad and Tobago dollars (TTD). The levy is a non-deductible expense for corporation tax purposes.

Green fund levy

A green fund levy of 0.3% on gross income is applicable to companies and partnerships doing business in Trinidad and Tobago. This levy is payable quarterly and is neither a deduction in computing chargeable income nor a credit against corporation tax due.

Unemployment levy

Only petroleum companies remain liable to the unemployment levy, at the rate of 5% of taxable profits. No set-off for prior-year losses is permitted in computing the liability.

Supplementary petroleum tax (SPT)

SPT is chargeable on the gross income (derived from the sale of crude oil) less royalties and overriding royalties paid on the crude oil sold. The tax is computed separately in respect of land and marine operations and is a quarterly tax based on the actual gross income for each quarter.

The SPT is deductible in arriving at profits subject to petroleum profits tax.

Corporate residence

Corporate residence is determined by reference to the location of the central management and control of the business of a company.

Permanent establishment (PE)

A non-resident company is subject to corporation tax on its income derived from trading within Trinidad and Tobago. A company is deemed to be engaged in or carrying on trade or business in Trinidad and Tobago if it has an office or place of business or has a branch or agency within Trinidad and Tobago. The local legislation does not make any reference to the term 'permanent establishment'; however, this term is used generally in the treaty context. Subject to the terms of specific double taxation treaties (DTTs), a non-resident company will have a PE in Trinidad and Tobago where:

- it has a fixed place of business in Trinidad and Tobago through which the business of the company is wholly or partly carried on, or
- it has an agent acting on behalf of the company and that agent has the authority to bind the company.

The term 'fixed place of business' has been generally defined to include a place of management, a branch, office, factory, a workshop, an installation or structure for the exploration of natural resources, or a building, construction, or installation project.

Most treaties outline circumstances under which a company will not be deemed to have a PE, and these include where the activities of the company are merely of a preparatory or auxiliary nature.

Other taxes

Value-added tax (VAT)

VAT is applicable to a wide range of goods and services. The standard rate applicable to commercial supplies is 12.5%.

Basic food items and agricultural supplies are zero-rated, as are crude oil, natural gas, and exported goods and services. Hotel accommodation and yachting services to non-residents are zero-rated.

A number of services, including financial services, real estate brokerage, residential rentals, and educational services, are exempt. However, certain financial services are subject to a transaction tax at a rate of 15%. Imported inputs of highly capital-intensive manufacturers are exempt from VAT.

The VAT registration threshold for companies making commercial supplies is TTD 500,000 for a 12-month period.

Customs duties

Customs duties are imposed at varying rates on imports and manufactured goods according to classification in Schedules to the Customs Act. The basis is the cost, insurance, and freight (CIF) value of the goods at the time of import. However, there is a provision for exemptions in relation to specific goods.

Excise taxes

Excise taxes are imposed at varying rates on certain manufactured goods, including tobacco, alcohol, and petroleum products.

Property taxes

The Property Taxes Act, which was amended by Finance Act 2 of 2015 to place a moratorium on the payment of the tax from 1 January 2010 to 31 December 2015, became fully operational on 1 January 2016. The Minister of Finance has indicated that the current land and property valuation assessment rolls are incomplete. The government is currently in the process of updating the assessment rolls, which should be completed by 2017; consequently, the Property Taxes Act will be fully implemented in that year.

In the interim, the Minister has advised that property taxes payable for income year 2016 will be at the old rates and values under the Land & Building Taxes Act (prior to 2010). Therefore, all 2016 property tax liabilities will be the same as in 2009.

Stamp duty

Stamp duty is levied on instruments of all types (e.g. deeds of conveyance, mortgages, debentures, trust deeds, leases, insurance policies, annuity policies, agreements, share transfers). The rate of stamp duty varies from TTD 25 on a trust deed to up to 10% on property conveyances.

Trinidad and Tobago

Payroll taxes

Under the pay-as-you-earn (PAYE) system, an employer is required to deduct income tax on emoluments paid to employees. 'Emoluments' is widely defined to include all salary, wages, overtime, bonus, remuneration, perquisites, lodging, stipend, commission or other amounts for services, directors' fees, retiring allowance, and pensions.

Social security contributions

There is a social security tax, referred to as National Insurance, that is deducted at source at varying rates. The maximum rate is TTD 414.30 per week for monthly income over TTD 13,600, which is payable TTD 276.20 by the employer and TTD 138.10 by the employee.

There is also a health surcharge that is deducted at source. The maximum liability is TTD 8.25 for every week worked.

Hotel accommodation tax

Hotels are subject to a hotel accommodation tax at a rate of 10% of the value of the accommodation.

Insurance premium tax

A tax at the rate of 6% has been imposed on insurance premiums in respect of general insurance contracts. Life insurance and reinsurance premiums are exempt.

Branch income

A branch is subject to Trinidad and Tobago taxation on all income directly or indirectly accruing in or derived from Trinidad and Tobago. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporation tax and reinvestments, are subject to WHT at the rate of 5%. This may be varied by the provisions of any applicable DTTs.

Income determination

Inventory valuation

Inventories are generally stated at the lower of cost or market value. Cost may be determined by the first in first out (FIFO) or the average cost method. The last in first out (LIFO) and base stock methods are not generally accepted for tax purposes.

Capital gains

Gains on the disposal of chargeable assets within 12 months of acquisition are subject to tax at standard corporation tax rates. Capital gains are not otherwise taxable, except for the application of the balancing allowance on depreciable assets. *See Depreciation in the Deductions section for capital gains information on the sale of tax-depreciable assets.*

Dividend income

Dividends received by a Trinidad and Tobago company from both domestic subsidiaries and other domestic corporations are exempt from corporation tax and business levy but are subject to green fund levy.

Stock dividends

A Trinidad and Tobago corporation can distribute a dividend of common stock (bonus issue) proportionately to all resident common stockholders on a tax-free basis.

Interest income

Interest income received by a Trinidad and Tobago company is generally taxable.

Foreign income

A company resident in Trinidad and Tobago is subject to tax on its worldwide income. There is no deferral regime in Trinidad and Tobago.

Deductions

Depreciation

Tax depreciation rates (wear-and-tear allowances) have been standardised by statute. Fixed assets are to be classified into one of four classes:

Asset class	Depreciation rate (%)
Class A: Buildings and improvements	10
Class B: Motor vehicles, furniture and fittings, plant and machinery	25
Class C: Heavy equipment, motor lorries, trucks, and computer equipment	33.3
Class D: Extra heavy equipment, airplanes	40

The allowance is calculated at the rate applying to aggregate expenditure incurred on assets within the class on a declining-balance basis.

Accelerated tax depreciation is allowed to manufacturers in the form of an initial allowance at the rate of 90% on capital expenditure on plant and machinery. The allowance is to be claimed in the year that the asset is first brought into use. For those companies engaged in the production of sugar, petroleum, or petrochemicals, or enjoying concessions under the Fiscal Incentives Act, the rate is 20%.

Gains on the sale of tax-depreciable assets are taxable as ordinary income (i.e. a balancing charge) but only when the written-down value of the assets of a class goes into credit. Prior to this, the proceeds of sale are credited to the particular class, thereby reducing the written down value of the class. Tax depreciation is not required to conform to book depreciation.

Petroleum operations

A company engaged in the petroleum production business is entitled to capital allowances on tangible costs and intangible drilling and development costs as follows:

- Tangible and intangible capital exploration expenditure incurred during 1 January 2014 to 31 December 2017 may be deducted in full (100%) in the year incurred.
- Tangible and intangible exploration and development expenditure is granted an initial allowance at 50%, a year-two allowance at 30%, and a year-three allowance at 20% computed on the expenditure incurred.
- A company engaged in exploration activities in a deepwater block is granted an uplift of 140% of capital expenditure incurred on drilling of exploration wells, on which capital allowances can be computed.

Trinidad and Tobago

There is no timing in respect of claiming of allowances (e.g. on achievement of commercial production). A claim for capital allowances cannot be deferred.

Goodwill

Goodwill expense is generally not allowable in arriving at chargeable income.

Start-up expenses

No specific rules exist in respect of start-up expenses, but, generally, these expenses are not deductible.

Interest expenses

Interest expenses incurred by a company in the production of its income are generally allowed as deductions. However, in the case of interest payable or paid by the company, there are certain restrictions that exist in the taxing Acts, as well as in practice by the tax authority, that could restrict a company's ability to deduct interest paid or payable in its computation of tax for a particular year of income. The criteria laid down by the legislation for the deductibility of interest are:

- The sums borrowed are wholly and exclusively incurred in the production of income.
- The interest is revenue in nature.
- The interest income earned is either chargeable to tax or exempt under the Trinidad and Tobago legislation.
- Where the interest payment is being made to a non-resident, the payer has accounted for and paid over WHT to the Board of Inland Revenue (BIR).

Bad debt

A specific provision for bad debt will be deductible for tax purposes where:

- it is in respect of a revenue expenditure
- it is made in accordance with acceptable accounting principles
- it is specific, and
- it becomes bad in the year in which the claim is made.

Charitable contributions

Charitable contributions under deeds of covenant to approved charities are deductible, up to a maximum of 15% of total income.

Fines and penalties

Fines and penalties are not generally deductible.

Taxes

Other than SPT, taxes or levies are not generally deductible in arriving at taxable profit.

Other significant items

Contributions by local insurance companies to 'catastrophe reserve funds' are deductible for tax purposes, up to the value of 20% of net premium income from property insurance business.

Net operating losses

A trading loss may be carried forward indefinitely to be set-off against future profits. Loss carrybacks are not permitted.

A limited form of group loss relief exists, whereby current year losses may be surrendered to a claimant company within a group, except that the claimant's tax liability cannot be reduced by more than 25%. Such companies must be resident in Trinidad and Tobago.

Payments to foreign affiliates

A corporation engaged in business in Trinidad and Tobago may claim a deduction for royalties, interest, and service charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted for. For interest to be deductible for tax purposes, the funds borrowed must have been utilised in the production of income and the recipient must be subject to tax in Trinidad and Tobago or otherwise specifically exempt from local tax.

Deduction for management charges (as this term is defined) paid to a non-resident is restricted to the lower of the management charges or 2% of deductible outgoings and expenses, exclusive of the charges. Tax depreciation allowances may not be treated as an expense for this purpose. WHT may also be applicable to management charges paid to non-resident persons.

Group taxation

There is no provision for group taxation in Trinidad and Tobago; however, a limited form of group loss relief is available (*see Net operating losses in the Deductions section*).

Transfer pricing

There are no specific transfer pricing rules in Trinidad and Tobago. However, the legislation empowers the tax authority to disregard any transactions that it views as artificial or fictitious. This general power has been utilised by the tax authority in dealing with related parties and large multinational companies to evaluate whether transactions are at arm's length.

Thin capitalisation

There are no thin capitalisation rules in Trinidad and Tobago.

Controlled foreign companies (CFCs)

There are no CFC rules in Trinidad and Tobago.

Tax credits and incentives

Foreign tax credit

Double taxation is avoided or mitigated by means of foreign tax credits.

Tax holidays

Fiscal Incentives Act, 1979

An approved enterprise, which must be a locally incorporated resident corporation, may be granted an exemption from corporation tax for a period of up to ten years, depending on the category under which it is approved. Exemption may be total or partial. Subject to approval, profits may be distributed tax free to shareholders, except in the case of certain non-resident shareholders, where the relief is restricted to the amount of tax that exceeds their liability in their country of residence. Net losses during the tax holiday period (i.e. the excess of total losses over total profits) may

Trinidad and Tobago

be carried forward for set-off without limitation for five years from the end of the tax holiday period, after which the normal set-off provisions for losses apply. As of 1 January 2007, the tax holiday in respect of corporation tax is no longer granted.

Approved tourism projects

Under the Tourism Development Act 2000, approved tourism development projects, including hotels, are granted a tax holiday for periods of up to seven years. In addition, a carryover from a tax exemption period is permitted of any loss arising out of the operation or renting of an approved tourism project to be written off against profits in accordance with normal income tax loss provisions, subsequent to the tax holiday period. An approved tourism project means a project declared to be so by the government.

Approved mortgage and other companies

The profits of an approved company are exempt from corporation tax. The exempt profits, when distributed to shareholders, are exempt from corporation tax and income tax. Expenses incurred in the course of the approved mortgage business remain fully deductible.

Free Zone

The profits of an approved company operating in a designated Free Zone are free from corporation tax. In addition, payments to non-residents are free of WHT. Approved activities include manufacturing.

Other allowances/incentives

Promotional expenses

Promotional expenses incurred by local firms to promote the expansion of existing markets and/or the creation of new ones for the export of specified services or locally produced goods are tax deductible as an expense at 150% of the actual outlay. Tax-deductible promotional expenses are defined as those expenses incurred in respect of specified services or goods produced in Trinidad and Tobago. This includes such items as advertising in foreign markets and participation in trade fairs and missions.

Scholarship allowance

Companies can deduct the actual expenses incurred in granting scholarships to nationals who are not employees, directors, or associates of directors of the company for tertiary education.

Production company allowance

An allowance equal to 150% of actual expenses incurred in respect of the company's own audio, visual, or video productions for educational or local entertainment, or local culture, is available.

Allowances are granted in respect of each of the following activities, based on the actual expenditure incurred but not exceeding TTD 2 million in aggregate:

- Art and culture allowance.
- Sportsman/sporting activity allowance.
- Audio, visual, or video production allowance.
- Promoting the fashion industry.

Child care/Home work facility

A deduction is allowed for the actual cost incurred in setting up a facility for dependents of employees who are minors, up to a maximum of TTD 500,000 for each facility, subject to an aggregate sum of TTD 3 million in any year.

Wear and tear allowances

A 130% wear and tear allowance is available for expenditure incurred in CNG-related initiatives.

A 150% wear and tear allowance is available on the expense incurred in relation to solar heaters, wind turbines, and photovoltaic systems.

Training allowance

A company is allowed to claim as a deduction 150% of expenses incurred in the training and retraining of the employees of the company.

Allowance for engagement of energy service companies

Where a company incurs expenditure in engaging another company certified as an energy service company for the purpose of carrying out an energy audit for the design of energy saving systems and the installation of the energy saving systems, the company shall be entitled to an allowance equal to 150% of the expenditure actually incurred.

Where the certified energy service company has acquired plant and machinery for the purpose of conducting energy audits, they shall be allowed an allowance of 75% of the cost incurred in the year of acquisition.

Withholding taxes

WHT is imposed at varying rates up to 15%, depending on the nature of the payment, the status of the payee, and the applicability of DTTs. The tax treaty rate in some instances is now higher than the statutory rate. In such cases, the lower statutory rate applies. The rates below have been adjusted to reflect these reductions:

Recipient	Dividends (%)			Interest (%)
	Portfolio	Substantial holdings		
Resident corporations and individuals	0	0		0

Notes

1. Individuals.
2. Corporations. The lesser rate applies to parent companies.
3. The lesser rate applies to companies, other than investment companies, that control at least 10% of the voting power.
4. The rate is 10% of the gross amount if interest is paid to a resident of France; it is 0% if the interest is paid to the French government or to any agency or instrumentality of the French government.
5. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Germany, 0% where interest is paid to certain stated governmental institutions, and 15% of the gross amount in all other cases.
6. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Sweden, 0% where interest is paid to certain specified governmental institutions, and 15% of the gross amount in all other cases.
7. The rate is 15% of the gross amount if the interest is paid to a bank or financial institution in the United States (US) that does not have a PE in Trinidad and Tobago, 0% where the interest is paid to the US government or to any agency or instrumentality wholly owned by the US government, and 20% of the gross amount in all other cases.
8. The rate applies to patent royalties.
9. The rate applies to copyright royalties and similar payments.
10. The rate applies to royalties paid in respect of the operations of mines or quarries or of the extraction or removal of natural resources.

Tax administration

Taxable period

The tax year is the calendar year. Companies are assessed by reference to their accounting period, which for tax purposes cannot exceed 12 months other than in the year of cessation of the business.

Tax returns

The taxpayer is required to file a tax return with the BIR by 30 April following the end of the fiscal period. An automatic six-month grace period is allowed, following which a penalty is imposed of TTD 1,000 for every six months or part thereof that the return remains unfiled.

Payment of tax

Corporation tax, business levy, and green fund levy are payable quarterly in advance on 31 March, 30 June, 30 September, and 31 December. Any balance of tax due is payable on or before 30 April of the following year. Instalments of corporation tax are based on an estimate of the current year's liability or on the actual chargeable profits for the previous year, whichever is greater. If the current year's estimate is lower, the company may apply to the BIR to reduce its quarterly instalment. The levy liabilities are based on the actual receipts for the quarter.

Tax audit process

Tax audits are conducted by the BIR. There is no specific timeframe to conduct an audit, but, generally, companies are selected for varying reasons, including where large refunds are claimed. The BIR usually notifies the company of the intended audit and

Trinidad and Tobago

requests that the books and records be made available for inspection. An assessment is generally raised after the audit.

Statute of limitations

A company carrying on business in Trinidad and Tobago is required to keep proper accounts and records and is required to retain these accounts for a period of at least six years after the completion of the transactions, acts, or operations to which they relate or three years after the filing of its return (whichever is later).

Topics of focus for tax authorities

The following issues are currently the focus of the tax authorities:

- Transfer pricing.
- CARICOM tax planning structures.
- Management and other fees paid to non-resident persons.

Other issues

US Foreign Account Tax Compliance Act (FATCA)

Trinidad and Tobago is a signatory to FATCA and is due to commence compliance in 2016.

Significant developments

A new law ruling investments in Tunisia was promulgated at the end of 2016 (Investment Law n° 2016-71 of 30 September 2016), which replaced the major part of the Tax Incentives Code.

A new law was promulgated in 2017 (applicable starting from 1 April 2017) ruling tax incentives (Law n° 2017-8 of 14 February 2017).

The main developments under these laws are included in the Tax credits and incentives section.

Taxes on corporate income

Tunisian-resident companies are subject to corporate tax in Tunisia on the basis of profits generated from permanent establishments (PEs) located in Tunisia and those attributable to Tunisia by virtue of a double tax treaty (DTT). Non-Tunisian-resident companies are subject to corporate tax on the basis of their Tunisian-sourced income.

PEs of non-Tunisian-resident companies are subject to corporate tax in the same way and under the same conditions as Tunisian-resident companies. However, certain particularities, related mainly to deductions, exist (*see the Branch income section*).

Corporate tax is also due by non-resident, non-PE companies on Tunisian-sourced income through withholding taxes (WHTs).

Corporate tax is broadly levied on the total net income resulting from the statutory financial statements of the company, duly adjusted according to the specific tax rules.

Positive/negative items of income are taxed/deducted based on the accrual basis. Income items accruing in a tax period where the above principle is not met are not allowed for tax deduction nor taxed in that tax period. Tax deduction/taxation is correspondingly deferred to the future tax periods where the principle will be met.

Income items have to be certain in their occurrence and objectively determined or determinable in their amount.

Corporate tax rates

The general corporate tax rate is 25%. However, specific rates are foreseen for specific sectors of activity. Indeed, corporate tax is due at the rate of:

Tunisia

- 10% for:
 - companies carrying out craft activities, agricultural and fishing activities, and fitting out fishing boats
 - trading groups of retail businesses organised as service cooperatives, governed by the general cooperation legislation
 - service cooperatives formed between producers for the wholesale of their production
 - consumer cooperatives governed by the general cooperation legislation, and
 - benefits derived from exports for revenues realised starting from 1 January 2014 (except wholly exporting companies where the ten year tax holiday period has not expired).
- 35% for:
 - certain domestic financial institutions
 - offshore financial institutions governed by the code related to financial services destined to non-residents, and this only for the benefits derived from services provided to non-resident persons
 - investment companies
 - insurance and reinsurance companies
 - debt collection companies
 - telecommunication companies
 - companies rendering services to companies operating in the oil and gas field
 - companies operating in the production and the transport of hydrocarbons and governed by particular conventions, as well as companies operating in the transfer of hydrocarbons via pipeline, and
 - companies operating in the oil refining sector and the wholesale of hydrocarbon products.

Minimum corporate tax

A minimum corporate tax is due at the rate of 0.2% of the local turnover, including value-added tax (VAT), in case:

- the company realises losses or
- the corporate tax due at the rate of 25% or 35% is less than the minimum corporate tax of 0.2% of the local turnover, including VAT.

However, the minimum corporate tax is reduced to 0.1% of the turnover of companies subject to corporate tax at the rate of 10% (e.g. exporting companies after expiry of the ten-year tax holiday period) and companies selling products subject to the government homologation of prices with a gross margin not exceeding 6%.

The minimum corporate tax is not due by companies benefiting from the whole exemption of profits deriving from operations (e.g. companies established in the regional development zones, companies operating in the agricultural sector) during the period of tax holidays. These latter are fixed by decree.

Local income taxes

For a description of local taxes, see Vocational training tax, Local authority tax (LAT), and Hotels tax in the Other taxes section.

Corporate residence

A company is tax resident in Tunisia if it is registered or has its effective place of management therein.

Permanent establishment (PE)

No definition of PE is given by the Tunisian domestic law. In practice, the Tunisian tax authorities refer to the definitions given by DTTs.

Other taxes

Value-added tax (VAT)

VAT scope and rates

VAT is levied under the Tunisian VAT Code and is due on all transactions taking place in Tunisia.

The sale of goods is considered as taking place in Tunisia, and subject to VAT, if the goods sold are delivered in Tunisia. The sale of services is considered as taking place in Tunisia, and subject to VAT, if the services sold are exploited or used in Tunisia.

The standard rate of VAT is 18%. Lower rates of 6% and 12% apply to specifically designated operations.

Some operations, products, or services are out of the scope of VAT in Tunisia, and some others are expressly exempt from VAT.

Some goods and services may be acquired VAT free, based on a certificate delivered for the purpose by the relevant tax authorities. This exemption is granted mainly to wholly exporting companies, oil and gas companies, their contracts, and their subcontractors.

Registration for VAT purposes may be either obligatory or optional.

Voluntary registration is allowed where persons:

- carry out activities that are outside the scope of the Tunisian VAT, in which case the option has to be a full option, which means that all the activities carried out by these persons will be subject to VAT, or
- carry out operations that are exempt from VAT and that are destined for export, or supply products and services that are exempt from VAT to persons liable to VAT, in which case the option may be a partial or a full option.

Output VAT

Output VAT is calculated on the basis of the amount of the invoice excluding VAT.

Input VAT

Individuals and companies that are subject to VAT may deduct the input VAT incurred on the purchase of goods and services necessary to carry out activities subject to VAT.

VAT declaration

VAT is declared and paid on a monthly basis.

Refunds

If the input VAT exceeds the output VAT, the VAT credit resulting from the difference between the input VAT and the output VAT may be reimbursed on the basis of a written request made to the tax authorities.

The VAT credit is refundable if it arises from:

- exportation operations of goods and services, sales made to clients allowed to acquire goods and services VAT-free, and WHT made on the remunerations paid to companies that are neither resident nor established in Tunisia (such VAT credit is refundable if it is shown on one monthly tax return)
- investments destined for the carrying out of new projects under the conditions set out by the new Investment Law (such VAT credit is refundable if it is shown on at least three successive monthly tax returns), or
- other operations (such VAT credit is refundable if it is shown on at least six successive monthly tax returns).

In order to benefit from the refund of VAT credits, the taxpayer has to file supporting documents, such as declarations relating to exportation of goods, documents proving that the service rendered by the Tunisian taxpayer was used or consumed outside Tunisia, authorisations to sell VAT-free, and WHT certificates.

To benefit from the refund of VAT credits, the taxpayer must already have submitted all tax returns and paid all taxes due at the time of submission of the request for the refund.

An advance payment of 15% of the VAT credit is to be paid to the taxpayer as soon as the taxpayer presents the request for refund if the VAT credit arises from operations other than export, suspension of activity, and operations of companies that are neither resident nor established in Tunisia. This rate is to be increased to 50% if the taxpayer is a company of which the financial statements are subject to legal audit, and to 100% if the VAT credit is originated from exports.

Time limits

The taxpayer may claim the VAT credit within three years starting from the date from which the VAT credit becomes refundable.

Customs duties/Import tariffs

Import VAT

Importation of goods and services are subject to import VAT unless:

- the imported good is expressly exempt, such as for:
 - fresh milk, uncondensed and unsweetened, whether skimmed or full-fat
 - milk flour
 - devices intended for use by physically disabled persons
 - pure-bred breeding animals
 - equipment with nothing similar manufactured locally, expressly designated, or
 - boats destined to maritime navigation and fishing, and other pleasure boats, or
- the importer benefits from the acquisition of goods necessary to its activity VAT-free (e.g. oil and gas companies).

Customs duties

Customs duties are due on importations other than those made from the European Union (EU).

Some equipment expressly designated by the Tunisian domestic law is exempt from customs duties, whether imported from EU countries or not.

Customs duties are not due in cases where the importer is expressly exempt, even if the goods are imported from outside the European Union.

For temporary importation of equipment, the customs duties due are to be calculated in proportion to the period spent in Tunisia. 1/60 of the total customs duties are due per month spent in Tunisia.

Excise taxes

There are no provisions for excise taxes in Tunisia.

Property taxes

A real estate tax (RET) is calculated by the relevant municipalities and is notified annually to the taxpayers at the beginning of the civil year.

For companies subject to the payment of the local authority tax (LAT) (*see below*) and in case the LAT paid over the year is less than the RET notified by the municipalities, then the differential is due and is payable as complementary LAT. In other words, the RET constitutes a minimum of due LAT per year.

Transfer taxes

The registration of some operations is compulsory. In these cases, the registration fees are expressly determined by the Registration and Stamp Fees Code.

Registration remains optional for certain operations. In case of optional registration, the registration fees due to be paid are equal to 20 Tunisian dinars (TND) per page and per copy.

In case of compulsory registration, the fees due depend on the nature of the transaction and the goods involved.

Some transactions are subject to proportional registration fees, for example:

- 5% on the transfer of immovable properties. However, this rate is reduced to 3% for the acquisition of social housing from real estate developers for the portion exceeding TND 200,000. An additional registration fee is due at the rate of 2% for the transfer of immovable properties (other than immovable properties used for business purposes and subject to a favourable tax regime) which value ranges between TND 500,000 TND and TND 1 million and 4% for immovable properties which value exceeds TND 1 million.
- 2.5% for the transfer of goodwill (*fonds de commerce*).

Transactions that are not subject to proportional registration fees, as well as transactions for which registration is optional, are subject to insignificant fixed registration fees (TND 20 per page).

Tunisia

Stamp duties

Stamp duties are due, in general, on certain contracts expressly designated, as well as invoices, unless the customer is expressly exempt.

In general, stamp duties are TND 0.5 for invoices, subject to exemptions provided for by the law, including invoices related to export operations.

Certain documents are expressly exempt from stamp duties, mainly judgments, checks, etc.

Payroll taxes

There are no payroll taxes applicable in Tunisia other than those mentioned *below*.

Social security contributions

The Tunisian social security system is financed by contributions from both employers (16.57%, reduced to 0.5% for wholly exporting companies) and employees (9.18%) based on salaries. Employers collect and pay the social security contributions from each wage-earner.

Contributions for Accident and Professional Insurance are collected in the same manner.

Social logging tax

Employers established in Tunisia, regardless of being liable or not to income tax, are subject to a social logging tax, calculated at 1% of the gross amount of salaries paid to its employees, including benefits in kind.

The social logging tax is filed on the monthly tax return through which VAT and other direct taxes, except corporate tax, are filed.

This tax is payable monthly before the 28th day of the following month.

Vocational training tax

Entities subject to corporate tax are subject to vocational training tax, calculated at 2% of the gross amount of salaries paid to its employees, including benefits in kind. The rate of this tax is 1% for manufacturing industrial companies.

This tax is payable monthly before the 28th day of the following month.

Local authority tax (LAT)

LAT is payable by entities subject to corporate tax, except entities operating in the tourism sector. The tourism sector is defined as accommodation, entertainment, tourist transportation, thermals, congressional tourism, companies managing hotels and entertainment centres, and travel agencies.

If a company is engaged in several activities, some of which are subject to LAT and the remaining are not subject to LAT, the taxable base to be considered is constituted only by the turnover of the activities that are subject to LAT.

The LAT is paid to the local authority at the rate of:

- 0.2% of the total turnover of the entity, with a minimum calculated on the basis of the number of square metres of construction used by the entity.

- 0.1% of the turnover deriving from exportation as defined by the legislation in force.

LAT is payable monthly before the 28th day of each month.

Hotels tax

The hotels tax is due by entities that work with tourists; provide accommodation, food, and beverages; or organise leisure activities for clients. The tax is calculated at 2% of the gross turnover generated from the tourism and relating activities.

This tax is payable monthly before the 28th day of the following month.

Tourism Sector Development Fund (FDCST) tax

The FDCST tax is a tax that is paid by entities operating in the tourism sector. The tax is calculated at 1% of the turnover, excluding VAT, generated from tourism and relating activities.

Branch income

The income attributable to a PE corresponds to:

- the revenues generated directly by the PE further to the exercise of its activity
- the revenues corresponding to works carried out by it, even if invoiced by the head office, and
- the revenues that would have been realised by an independent company carrying out the same business, in case the activity of the PE is provided for free.

The following charges are deductible for the purpose of the determination of the taxable results of a PE:

- All the charges incurred directly by this PE and necessary for its proper functioning. These charges have to be supported by proper documentation.
- Direct charges incurred by the head office exclusively for the PE and supported by proper documentation.
- A proportion of the indirect charges (real central administration costs) incurred by the head office. The proportion admitted for deduction is most often calculated on the basis of the turnover of the Tunisian branch against the global turnover of the head office. The deduction is limited to 10% of the Tunisian turnover in case the head office is resident of a state that did not conclude a DTT with Tunisia.

Income determination

Inventory valuation

Inventory is valued at cost.

Capital gains

According to the provisions of article 11 of the Income and Corporate Tax Code, “the net income of a company is determined as the result of all the operations undertaken by the company, including mainly the transfer of assets...” Consequently, capital gains, if any, arising from the transfer of assets will be considered as taxable income and will be subject to corporate tax.

Tunisia

Capital gains are calculated as the difference between the sale price, which is supposed to be equal to the fair market value, and the net book value.

In the particular case of goodwill (*fonds de commerce*) generated internally, capital gains will be equal to the total sale price, as goodwill, other than derived from acquisitions, has no value on the books of the company.

All tangible and intangible transaction assets have to be valued at their fair market value.

The goodwill (*fonds de commerce*) generated internally, even if not booked as an asset of the company, also has to be valued at fair market value.

Particular case of capital gains resulting from mergers

Capital gains arising from the transfer of assets, other than inventories, on the occasion of a merger operation are deductible from the taxable income of the merged company and are to be added back to the taxable income of the absorbing company at up to 50% of their amount, spread out over five years.

Dividend income

Dividends distributed by Tunisian-resident companies to non-resident, non-establishment companies, to non-resident individuals, and to resident individuals are subject to corporate tax paid through a discharging WHT at the rate of 5% of its total amount.

Dividends distributed by non-resident companies are subject to tax in Tunisia, unless otherwise provided for by the DTTs concluded by Tunisia.

Interest income

Interest income arising from Tunisia or outside is part of the taxable results of the company, unless expressly exempt by the law (e.g. interests on deposits in foreign currencies).

Royalty income

Royalty income, except that derived from exports, is part of the taxable results of the company.

Foreign income

Foreign income derived from services that are realised outside Tunisia are part of the taxable income (*see the Tax credits and incentives section*).

Deductions

Depreciation

Depreciation expenses of fixed assets that are owned by the company and within the limit of the depreciation expense calculated according to the straight-line method are deductible for the purpose of determination of taxable income at a maximum depreciation rate fixed by decree.

Buildings may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated

at a maximum depreciation rate of 5%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

Equipment and machinery may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

The equipment and machinery depreciation rate may be increased by 50% if the equipment is used at least 16 hours a day, or doubled if used 24 hours a day, but the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method, multiplied by 1.5 or by 2, depending on whether the equipment will be used 16 or 24 hours a day.

Depreciation expenses of assets exploited under leasing contracts are also deductible for the purpose of determination of taxable income. In fact, even if assets exploited under leasing contracts are not owned by the company, they are booked as assets in the balance sheet and depreciated accordingly over a minimum period fixed by decree, as follows:

Asset exploited under leasing contracts	Minimum period (years)
Constructions	7
Machinery and equipment	4
Transportation equipment	3

Goodwill

Goodwill (*fonds de commerce*) amortisation expenses are not tax deductible for the purpose of the determination of taxable income.

Start-up expenses

The maximum amortisation expense allowed for deduction is equal to 100% of the start-up expenses.

Interest expenses

Interest expenses (commissions, bank charges, interest loans, etc.) relating to loans contracted by the company and necessary for its proper functioning are tax deductible.

Interest expenses on shareholders current account are tax deductible within the limit of the maximum rate of 8%, provided that the capital is fully paid and the amount to be remunerated shall not exceed 50% of the capital; the rate of 8% is not applied to banks.

Bad debt

Provisions for bad debts are tax deductible within the limit of 50% of the taxable result (after deduction of non-taxable revenues and add-back of non-deductible charges).

The deduction of bad debts is subject to the presentation of a detailed statement of the concerned creditors while filing the annual corporate tax return, as well as court cases against the creditors in order to claim payment.

Tunisia

Provisions for bad debts that are initially constituted tax-free and become groundless during an exercise (e.g. by the covering of the debt totally or partially) are taxable.

Charitable contributions

Charitable contributions are either deductible:

- totally, in cases where they are granted notably to the state, local authorities and state-owned companies, and to organisation dedicated to disability promotion, or
- within 0.2% of the revenue, in other cases.

The deduction of charitable contributions is subject to the presentation of a detailed statement of the beneficiaries while filing the annual corporate tax return of the year during which these charitable contributions were granted.

Fines and penalties

Transactions, fines, and any other penalties for violating legal provisions are not tax deductible. However, contractual penalties (for late payment for example) remain tax deductible.

Taxes

All taxes due by the company are considered as tax-deductible charges, except corporate tax.

Note that when the tax due by non-resident, non-PEs on royalties is borne by a Tunisian-established company (the debtor), then the correspondent charge is not tax deductible.

Net operating losses

Under the Tunisian tax legislation, tax losses are divided into two categories: operating losses and deferred depreciation.

Operating losses are to be carried forward for five years, starting from the year following the one during which they were booked.

Deferred depreciation is to be carried forward indefinitely, starting from the year following the one during which they were booked.

With regard to the Tunisian tax legislation, operating losses cannot be carried back.

Payments to foreign affiliates

See Transfer pricing in the Group taxation section.

Group taxation

Transfer pricing

According to the Tunisian tax legislation, where there is evidence for the tax authorities of the existence of commercial or financial business transactions between a company and other dependent companies, which, for the determination of their value, are based on rules that differ from those governing relations between independent companies and which result in the reduction of taxable benefits, the tax department is allowed to add back to the taxable result of the invoicing company the differential between

the benefits that would have been realised if the practiced prices were in line with the arm's-length principle and those actually accounted for by the company.

The burden of proof is on the tax department.

Thin capitalisation

Projects may be financed by shareholders' equity, shareholders' loans, or external debts.

Interest due on shareholders' loans is tax deductible within the limit of an interest rate of 8%, provided that the following conditions are met:

- The capital is fully paid-up.
- The amount of the sums put at the disposal of the company must not exceed 50% of the capital.

In case shareholders' loans exceed 50% of the share capital, then interests due in the part exceeding 50% are not tax deductible.

Controlled foreign companies (CFCs)

There is no provision in Tunisia for CFCs.

Tax credits and incentives

Two new laws have been promulgated in order to promote investment in Tunisia, the Investment Law and the Tax Incentives Law.

Investment Law n° 2016-71 of 30 September 2016

Objectives of the new Investment Law

The purpose of the new Investment Law is to promote investment and to encourage the creation of enterprises, notably through:

- Increasing the added value, competitiveness, and export capacity of the national economy, and technological development at the regional and international levels.
- Job creation and promotion of human resources competence.
- Achieving an integrated and balanced regional development.
- Achieving sustainable development.

Main features of the Investment Law

The Investment Law defines the legal regime for investment promoted by persons, resident or non-resident, in all sectors of economic activities, fixed by decree.

Under the new Investment Law, investors benefit from the below incentives:

- Right to acquire, lease, or operate non-agricultural immovable property.
- Possibility of recruiting executives of foreign nationality for up to 30% of the total number of managers; this rate is reduced to 10% as from the fourth year. In all cases, the company can recruit four executives of foreign nationality (even if the limit of 30% or 10% is less than four).
- Free transfer of the profit, dividends, and capital abroad in foreign currency, in accordance with the applicable foreign exchange legislation. Indeed, the Investment Law specifies that the investor is free to transfer one's capital and profits abroad in foreign currency (in compliance with the applicable foreign exchange legislation). In

Tunisia

case the transfer requires authorisation from the Tunisian Central Bank, any refusal must be in writing. The failure to reply within the time limit to be set by decree is considered as an acceptance (except for activities excepted to be defined by decree).

- Investment subsidies for direct investment operations, as follows:
 - Subsidies for the increase in value added and competitiveness.
 - Subsidies for the development of employability capacity.
 - Subsidies for regional development.
 - Subsidies for sustainable development.

Conditions and modalities to benefit from subsidies are defined by decree.

- Possibility to benefit from arbitration in case of dispute with the Tunisian State. The Investment Law provides rules for settlement of disputes between the Tunisian State and foreign investors. These shall be settled by conciliation and otherwise the dispute may be submitted to arbitration under a specific agreement between the two parties. In case the dispute is not settled through conciliation and in the absence of an arbitration agreement, the dispute falls within the jurisdiction of Tunisian courts.

Also, as per the Investment Law, foreign investors have the same rights and obligations provided for by the Investment Law as Tunisian investors, in comparable situations.

The Investment Law provided for the need to comply with response deadlines for each authorisation requested by the investor and the obligation to justify each refusal in writing. Failure to reply within the time limit constitutes acceptance under article 4 of the Law (except for activities excepted to be defined by decree).

Investors' properties and intellectual property (IP) rights are protected in accordance with the legislation in force. Investor's property may not be expropriated except for public interest reasons, without discrimination between Tunisian and Foreign investors, subject to fair and equitable compensation.

Tax Incentives Law n° 2017-8 of 14 February 2017

The major tax incentives provided for by the new law are mainly relating to:

- Export operations.
- Investments in regional development zones.
- Agricultural development.
- Support and depollution activities.
- Newly created companies.

Wholly exporting activities

The following are considered as wholly exporting companies:

- Companies with products manufactured in Tunisia, totally destined to be sold outside Tunisia.
- Companies providing services totally used/exploited outside Tunisia.
- Companies operating in agriculture and fisheries, manufacturing, and craft industries that sell all their products to wholly exporting companies, as well as companies established in business parks, provided that such products and goods constitute components of the final product to be exported, and to international trade wholly exporting enterprises.
- Companies that carry out all their services for the benefit of wholly exporting companies, companies established in the economic activity parks, and international trade totally exporting companies, in the subcontracting operations, within the

same sector or within the framework of services directly linked to production (set by decree).

Note that wholly exporting companies may commercialise locally, during a given year, up to 30% of the turnover of the previous year without losing the status of a wholly exporting company.

Tax incentives at the exploitation phase

Profits derived from the exportation activity are subject to corporate tax at the rate of 10%, and all other revenues will be subject to corporate tax at the rate of 25%.

The rate of 10% is also applicable to the below auxiliary and exceptional profits related to operations:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted to enterprises in the framework of the National Employment Fund.
- Capital gains derived from the sale outside Tunisia or to other wholly exporting companies of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (*fonds de commerce*).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.

The wholly exporting company whose total deduction period (ten years) has not expired on 31 March 2017 will continue to benefit from the said deduction until the expiry of that period.

Tax incentives at the creation and capital increase phases

Profits/revenues invested in the subscription to initial capital or to capital increases of totally exporting companies are deductible from taxable profits/revenues at up to 100% of the taxable result, subject to the minimum tax of 15% of the taxable result before the said deduction for companies subject to CIT at the rate of 25% (20% for companies subject to CIT at the rate of 35%) and 45% for individuals. However, the deduction is subject to the conditions listed below:

- The deposit of an investment declaration to the concerned authorities.
- The annual tax return must be accompanied by a certificate issued by the competent authorities certifying the effective start of activity.
- The status of the company must be compliant with regard to the National Social Security Funds.
- The implementation of an investment financing scheme investment with a minimum rate of equity capital.

Other incentives

Wholly exporting companies also benefit from:

- VAT exemption on the import operations and local acquisitions of goods, products, equipment, and services necessary for its operations.
- Exemption from other indirect taxes, including customs duties.
- Exemption from professional training tax, registration fees and stamp duties, and social logging tax.

Also, foreign employees recruited by totally exporting companies may benefit from the payment of personal income tax (PIT) at the reduced rate of 20% of gross revenues.

Regional development zones activities

The new tax incentives law provides that investments in certain activities (except for some sectors listed by decree) carried out by entities established in regional development zones (fixed by decree) benefit from a number of tax incentives, detailed as follows:

Tax incentives at the exploitation phase

Income tax

Revenues derived from direct investments in regional development zones are totally deductible from the taxable income until the expiry of the period of five years (Group 1 zones listed by decree) or ten years (Group 2 zones listed by decree).

After the expiry of the exemption period, 2/3 of revenues derived from direct investment in development zones are deductible from the taxable income.

CIT

Profits derived from direct investments in regional development zones are totally deductible from the taxable income until the expiry of the period of five years (Group 1 zones listed by decree) or ten years (Group 2 zones listed by decree).

After the expiry of the exemption period, benefits derived from direct investment in development zones will be subject to CIT at the rate of 10%.

Tax of exceptional or auxiliary revenues/profits

Enterprises that invested in development zones may also benefit from the deduction and the taxation at the reduced rate (after the expiry of total deduction period) for other profits in connection, with the same limits and conditions. The profits in question are detailed as follows:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and the allowances granted to enterprises in the framework of the National Employment Fund.
- The capital gain derived from the sale of fixed assets allocated to the main activity of enterprises, with the exception of buildings, unbuilt buildings, and goodwill.
- Realised exchange profits in connection with the principal activity.
- Remission of debt for the benefit of the companies.

Tax incentives at the creation and capital increase phases

Profits/revenues invested in the subscription to initial capital or to capital increases of companies located in development areas are deductible from taxable profits/revenues at up to 100% of the taxable result. However, the deduction is subject to the conditions listed below:

- The deposit of an investment declaration to the concerned authorities.
- The annual tax return must be accompanied by a certificate issued by the competent authorities certifying the effective start of activity.
- The status of the company must be compliant with regard to the National Social Security Funds.

- The implementation of an investment financing scheme investment with a minimum rate of equity capital.

Other incentives

Enterprises that invested in development zones may also benefit from the exemption from social logging tax and vocational training tax.

Agricultural activities

The new Tax Incentives Law provides that investments in the agricultural sector benefit from a number of tax incentives, detailed as follows:

Tax incentives at the exploitation phase

Income tax

Revenues derived from direct investments in the agricultural sector are totally deductible from the taxable income during a period of ten years.

After the expiry of the exemption period, 2/3 of revenues derived from direct investment in the agricultural sector are deductible from the taxable income.

CIT

Profits derived from direct investments in the agricultural sector are totally deductible from the taxable income during a period of ten years.

After the expiry of the ten-year exemption period, benefits derived from direct investment in the agricultural sector will be subject to CIT at the rate of 10%.

Taxation of exceptional or auxiliary revenues/profits

Enterprises that invest in the agricultural industry may also benefit from the deduction and the taxation at the reduced rate (after the expiry of total deduction period) for other profits in connection, with the same limits and conditions. The profits in question are detailed as follows:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and the allowances granted to enterprises in the framework of the National Employment Fund.
- The capital gain derived from the sale of fixed assets allocated to the main activity of enterprises, with the exception of buildings, unbuilt buildings, and goodwill.
- Realised exchange profits in connection with the principal activity.
- Remission of debt for the benefit of the companies.

Conditions for the benefit of the tax incentives:

- The deposit of an investment declaration to the concerned authorities.
- The annual tax return must be accompanied by a certificate issued by the competent authorities certifying the effective start of activity.
- The status of the company must be compliant with regard to the National Social Security Funds.
- The implementation of an investment financing scheme investment with a minimum rate of equity capital.

Tax incentives at the creation and capital increase phases

Profits/revenues invested in the subscription to initial capital or to capital increases of agricultural companies are deductible from taxable profits/revenues at up to 100% of the taxable result. However, the deduction is subject to the conditions for the benefit of the tax incentives listed above.

Other incentives

The direct investments in Agricultural activities give entitlement to the following tax incentives (conditions and equipment listed by decree):

- Exemption from customs duties and taxes with a similar effect for imported equipment necessary for the investment.
- Suspension of VAT and consumption duty for imported equipment and equipment acquired locally that are necessary for the investment.

Also, registration duties paid on the transfer of agricultural land used for direct investment in the agricultural industry could be refunded on request (to be submitted within a three-year period).

Support and depollution activities

The supporting investments activities are defined as being the following:

- Child and elder care institutions.
- Education, teaching, scientific research, and professional training institutions.
- Cultural production and cultural industry establishments.
- Youth entertainment and leisure facilities.
- Health and hospital facilities.
- Private accommodation projects for students.

The list of activities is set by decree.

The depollution activities are defined as being the collection, transformation, recovery, recycling, or treatment of waste and residues.

Tax incentives at the exploitation phase

Income tax

2/3 of the income derived from direct investment in support and depollution activities are deductible from the taxable income (subject to the below conditions).

CIT

Profits derived from direct investments in support and depollution activities are subject to CIT at the rate of 10% (subject to the below conditions).

Conditions for the benefit of the tax incentives:

- The deposit of an investment declaration to the concerned authorities.
- The annual tax return must be accompanied by a certificate issued by the competent authorities certifying the effective start of activity.
- The status of the company must be compliant with regard to the National Social Security Funds.
- The implementation of an investment financing scheme investment with a minimum rate of equity capital.

Other incentives

The direct investments in support and depollution activities give entitlement to the following tax incentives (conditions and equipment listed by decree):

- Exemption from customs duties and taxes with a similar effect for imported equipment necessary for the investment.
- Suspension of VAT and consumption duty for imported equipment and equipment acquired locally that are necessary for the investment.

Newly created companies

Tax incentives at the exploitation phase

Companies/enterprises newly created (except for those incorporated in the on-site consumption, trade, financial, energy other than renewable energy, and mining industries, telecommunication operators, and real estate developers) may benefit from the deduction of a portion of their taxable profits/revenues up the fourth year of activity as follows (subject to the below conditions):

- 100% for the first year.
- 75% for the 2nd year.
- 50% for the 3rd year.
- 25% for the 4th year.

Conditions for the benefit of the tax incentives:

- The deposit of an investment declaration to the concerned authorities.
- The annual tax return must be accompanied by a certificate issued by the competent authorities certifying the effective start of activity.
- The status of the company must be compliant with regard to the National Social Security Funds.
- The implementation of an investment financing scheme investment with a minimum rate of equity capital.

Tax incentives at the extension

Companies/enterprises newly created (except for those incorporated in the on-site consumption, trade, financial, energy other than renewable energy, and mining industries, telecommunication operators, and real estate developers) may benefit from the deduction from their taxable income of 30% as depreciation of machinery and equipment (excluding cars other than those constituting the main object of the company) acquired or manufactured in the context of extension operations for the first year from the acquisition, manufacturing, or use starting date.

Foreign tax credit

In the absence of DTTs, corporate tax (or any WHT in connection with) paid outside Tunisia is not deductible from the tax due in Tunisia.

However, in the presence of DTTs, in cases where profits derived from outside Tunisia were subject to corporate tax in Tunisia, the foreign tax, if any, is deductible, but only up to the corresponding Tunisian tax on these profits.

Withholding taxes

The payments of certain remunerations are subject to corporate WHT in Tunisia.

The WHT is an advance payment of corporate tax and is thus deductible from the corporate tax due by the invoicing entity. To this end, the paying entity shall withhold the tax at the appropriate rate. It shall then issue a WHT certificate to the invoicing company to enable the latter to use the certificate as proof of the payment at the moment of filing its corporate tax return. The paying entity subsequently pays the withheld amount to the tax authorities.

The withheld tax is to be declared and repaid by the paying entity each month before the 28th day of the following month.

The rates of the WHT differ according to the nature of the goods/services and the rates applicable within the framework of the DTTs.

Applicable WHT rates in Tunisia are as follows:

- 15% of the gross amount of the invoices related to fees, commissions, brokerage fees, rentals, payment of non-commercial activities (non-commercial activities include especially independent scientific, literary, artistic, educational, or teaching activities, such as independent activities of physicians, dentists, lawyers, consultants, architects, engineers, accountants, etc.).

This rate is reduced to 5% for fees (including those paid for non-commercial activities) and hotel rentals when these amounts are paid to entities subject to corporate tax and individuals who keep proper accounts in accordance with the Tunisian accounting principles.

This rate is reduced to 2.5% for fees, commissions, rentals, and non-commercial remunerations deriving from exportation, in accordance with the legislation in force.

- 15% on performance bonus paid to distributors of goods.
- 20% on interest and director's attendance allowance. This does not include interest on deposits and bonds in foreign currency or convertible dinars.
- 5% on bank loans extended by non-Tunisian resident banks.
- 2.5% on the sales price indicated in a real estate sale, in case the seller is an individual.
- 1.5% on payments exceeding TND 1,000 (including VAT) made for the acquisition of goods and services necessary to the activity and that are not subject to a specific WHT rate.

This rate is reduced to 0.5% in case the remunerations are derived from exportation, in accordance with the legislation in force, or payment is made to companies subject to corporate tax at the rate of 10%.

- 15% on other payments made to non-Tunisian tax resident persons.
- Dividends distributed by Tunisian-resident companies to non-resident, non-establishment companies, to non-resident individuals, and to resident individuals are subject to corporate tax paid through a discharging WHT at the rate of 5% of its total amount.
- 25% on payments made to persons resident in tax havens.
- 25% on lottery and gambling gain.

DTT rates

Note that the following interest WHT rates are applicable to interest payable to non-resident, non-PE companies and financial institutions according to DTTs concluded by Tunisia.

The DTT rate is applicable in case it is lower than the domestic law, provided that the beneficiary of the payment provides the corresponding tax residency certificate. In case of failure, the domestic law will be applied.

Notes

- 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 15% of the gross amount of the royalties for cinematographic films and TV films, patents, trademarks, designs or models, plans, secret formulae, or processes; technical and economical studies; information concerning industrial, agricultural, commercial, or scientific experience; and the use of or the right to use industrial, commercial, or scientific equipment.
- 11% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; and economical and technical studies, and technical assistance realised in the state of source.
- 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical assistance and studies in all fields.
- 20% of the gross amount of the royalties for the use of, or the right to use, licences, trademarks, cinematographic films, and films and discs for radio or television broadcasting and the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied. 15% of the gross amount of the royalties for all the other cases, mainly technical and economical studies; the use of, or the right to use copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; and information concerning industrial, commercial, or scientific experience. However, royalties paid for the use of, or the right to use, copyrights of literary, dramatic, musical, or artistic work, except royalties in respect of cinematographic films and films and discs for TV broadcasting, are taxable in the state of residency and thus cannot be subject to tax nor to any WHT in connection with the state in which they arise.
- 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and information in respect of industrial, commercial, or scientific experience. 5% of the gross amount of the royalties for technical and economical studies and technical assistance.
- 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic and films for TV and radio broadcasting. 15% of the amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies and technical assistance rendered in the state in which they arise.
- 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies.
- 15% of the gross amount of royalties for the right to publish any literary, artistic or scientific work, patents, trademarks, designs or models, plans, secret formulae or processes; information in respect of industrial, commercial or scientific experience; the use of or the right to use industrial, commercial or scientific equipment; and cartoons, films, and videos for TV broadcasting.
- 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

10. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 15% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 20% of the gross amount of the royalties for the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities and licences, trademarks, cinematographic films, and films for TV broadcasting. However, payments made to public entities for the use of cinematographic films or the broadcasting on radio and TV are exempt from WHT; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied.
11. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work; information concerning agricultural, industrial, commercial, or scientific experience; and technical and economical studies. 15% of the gross amount of the royalties for patents, trademarks, designs or models, plans, secret formulae, or processes, and cinematographic films or films for television.
12. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities, except remunerations for chartering of vessels and aircraft; and technical and economical studies.
13. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation, at a maximum rate of 12%.
14. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical services, such as technical and economical studies and technical assistance.
15. 8% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities, except remunerations for the chartering of vessels and aircraft used for international transport.
16. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 12% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 16% of the gross amount of the royalties for the use of, or the right to use industrial, commercial, or scientific equipment, and licences, trademarks, cinematographic films, and films for TV broadcasting; however, since the 16% treaty rate is higher than the 15% common law rate, the latter will be applied.
17. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation and according to the legislation of that state for the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
18. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and information in respect of industrial, commercial, or scientific experience.
19. 5% of the gross amount of royalties for the use of, or the right to publish, any literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, a transmission by satellite or optical fibre transmission or similar means of transmission, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
20. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience, except remuneration for vessels and aircraft chartering in respect of international transport; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and technical services, such as technical and economical studies and technical assistance, carried out in the state of source.
21. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films recording for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
22. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use,

- industrial, agricultural, commercial, or scientific equipment; and technical and economical studies and technical assistance.
23. 2.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, except remunerations for the chartering of vessels and aircraft used for international transport.
 24. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation; but if the recipient is the beneficial owner of the royalties, the tax so charged shall not exceed 11% of their amount. However, this rate is reduced to 7.5% in case royalties received by a resident of Tunisia are not subject to WHT in the Netherlands and as long as the Netherlands does not proceed to the modification of its tax legislation. Remunerations paid for the following are considered royalties: the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment, except remunerations paid for the exploitation of vessels and aircraft in respect of international transport; and technical and economical studies and technical assistance rendered in the state from which royalties are paid.
 25. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, except cinematographic films and films for TV broadcasting. 15% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 20% of the gross amount of the royalties for the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities, and the use of, or the right to use, trademarks and cinematographic films and films for TV broadcasting; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied.
 26. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities, except remuneration for vessels and aircraft chartering in respect of international transport; and technical and economical studies and technical assistance.
 27. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities; and technical and economical studies and technical assistance.
 28. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical and economical studies and technical assistance in respect of the use of, or the right to use, the equipments, rights, and information mentioned above.
 29. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of or the right to use industrial, commercial, or scientific equipment.
 30. Royalties are subject to tax in the state of residency of the beneficiary. However, the non-exclusive taxation right attributable to the state of residency does not prohibit the taxation of such royalties in the state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation. Remunerations paid for the following are considered royalties and thus are subject to tax in the state in which they arise: the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment that is not considered as an asset in the meaning of Article 6 of the present treaty.
 31. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and information in respect of industrial, commercial, or scientific experience. 12% of the gross amount of the royalties for technical services, such as technical and economical studies and technical assistance.
 32. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and economical and technical studies and technical assistance.
 33. 10% of the gross amount of royalties for copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; studies and information in respect of industrial, commercial, or

- scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and cinematographic films and video tapes for TV broadcasting.
34. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of or the right to use industrial, agricultural, commercial, or scientific equipment, except chartering of ships and aircraft used for the international transport.
 35. 5% of the gross amount of royalties for remunerations paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, software, designs or models, plans, secret formulae, or processes.
 36. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic and films for TV and radio broadcasting. 15% of the amount of the royalties for the use of, or the right to use, cinematographic films, films for TV and radio broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment, and technical and economical studies.
 37. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience, and technical and economical studies and technical assistance related to these information; and the use of, or the right to use, industrial, commercial, or scientific equipment.
 38. 18% of the gross amount of royalties for the use of, or the right to use patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment; however, since the 18% treaty rate is higher than the 15% common law rate, the latter will be applied.
 39. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
 40. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
 41. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and technical and economical studies.
 42. Royalties are only taxable in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment or port facilities; and economical and technical studies and economical assistance.
 43. 15% of the gross amount of the royalties for copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and profits from any ownership, depending from the productivity, the use, or the alienation of that ownership. 10% of the gross amount of the royalties for the use of, or the right to use, industrial, commercial, or scientific equipment other than vessels and aircraft used for international transport, and technical studies paid from public funds or political subdivisions or local authorities or technical assistance for the use of the ownership of the rights above mentioned, in case the technical assistance is realised in the state of source.
 44. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and the use of, or the right to use, industrial, commercial, or scientific equipment and port facilities, except remunerations paid for vessels and aircraft used in international transport.
 45. These rates are applicable, in certain cases, to the loans extended by the Central Bank.
 46. 5% for loans extended by banks and not represented by bonds or other debt securities.
 47. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the Chinese state.
 48. 0% for loans granted by financial institutions, the capital of which is held at least up to 50% by the Ethiopian state, its political subdivisions, or local authorities.
 49. 0% for loans granted by the Deutsche Bundesbank, Kreditanstalt für Wiederaufbau, and the Deutsche Gesellschaft für wirtschaftliche zusammenarbeit GmbH. (*Entwicklungsgesells*).

Tunisia

50. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Iran.
51. 0% for loans granted by financial institutions, the capital of which is totally held by the Italian state or its local authorities.
52. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Kuwait.
53. 0% for loans granted by financial institutions, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.
54. 0% for loans granted by companies, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.
55. 7.5% for loans guaranteed or granted by financial institutions and the reimbursement period of which exceeds five years.
56. 7.5% as long as the tax legislation of the Netherlands provides that interest paid by a company resident in the Netherlands to a company resident in Tunisia is exempt from any WHT.
57. 0% for loans, the reimbursement period of which exceeds seven years.
58. 5% for loans, the reimbursement period of which exceeds seven years, and 10% in the other cases.
59. 5% for bank loans since the Tunisian domestic tax legislation provides that interest on bank loans extended by non-established banks is subject to a 5% WHT rate.
60. 0% for loans granted by financial institutions, provided that the reimbursement period exceeds seven years.
61. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematography and films for TV and radio broadcasting; the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use industrial, commercial, or scientific equipment.
62. According to the DTTs concluded by Tunisia, dividends are subject to the listed WHT tax rates, knowing that the rate provided by the domestic law is fixed at 5%.
63. The lower rate applies in cases where the beneficiary has equity participation of 25%.
64. The lower rate applies in cases where the beneficiary has equity participation of 10%.
65. The lower rate applies in cases where the beneficiary has equity participation of 50%.
66. The lower rate applies in cases where the beneficiary has equity participation of 25%, except for investment companies and real estate investment companies.
67. Certain DTTs foresee that in case companies resident of a contracting state have a PE in the other contracting state (state of source), the latter may levy WHT on profits made by the PE as a taxation on dividend.

Tax administration

Taxable period

Under Tunisian law, both the accounting year and tax year follow the calendar year. However, derogation is possible if prior authorisation is obtained from the Ministry of Finance.

Tax returns

Tunisian-established companies have the obligation to file monthly tax returns, an annual corporate tax return, and an annual Employer's Declaration.

Monthly tax returns include WHTs, VAT, LAT, social logging tax, and professional training tax, and must be filed each month before the 28th day of the following month. Filing and payment take place simultaneously.

The annual tax return is the corporate tax return, which must be filed before 25 March of the following year. The deadline for filing the corporate tax return is moved to 25 June for public liability companies and private liability companies subject to statutory audit. Filing and payment take place simultaneously.

The Employer's Declaration has to be filed each year before 30 April of the following year. This declaration must list all fees and salaries paid or incurred, even if not yet

paid, to service suppliers and employees during the concerned year. No payment is due in connection with this filing, but fees not listed on this declaration are not recognised as deductible costs.

Payment of tax

Corporate tax is paid through:

- WHTs applied on certain payments and operated by the debtor on behalf of the taxpaying entity.
- Beginning from the second year of activity, three provisional instalments, each calculated at 30% of the total corporate tax due for the previous year. The instalments fall due on 28 June, 28 September, and 28 December.
- An annual tax return.

Both WHTs and provisional payments of income tax are creditable against the annual/final tax due.

Filing and payment take place simultaneously.

The most common process is the filing in person at the tax office. In this case, payment is made in cash or by check.

However, companies with turnover exceeding TND 1 million are constrained to file their tax returns electronically. Electronic filing remains optional for other companies. In this case, payment is made through bank transfer.

Tax audit process

Tax controllers may proceed either with a preliminary tax audit or an in-depth tax audit.

Preliminary tax audit

In case of a preliminary tax audit, the taxpayer under control is not notified prior to starting the audit. However, the tax authority has the obligation to send an information request concerning the tax findings. The taxpayer has to reply within 20 days.

The tax audit is conducted in the offices of the tax administration and deals with the documents made available to them (tax returns, registered contracts, etc.). However, preliminary tax audits can never deal with the taxpayer's accounts.

The results of the tax control are notified in writing to the taxpayer within a tax audit report, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated. The tax report is to be notified to the taxpayer within 90 days from the expiry date to reply to the information request (*see above*).

Indeed, the taxpayer has the possibility to answer to the tax audit report within 45 days starting from the day following the date of receipt of the report. Failing that, the taxpayer will receive a tax assessment notice that brings forth requests for payment of taxes and penalties to the taxpayer. In cases where the taxpayer answers to the notification of the results of the tax audit and brings additional explanations, clarifications, and documents to the tax auditors, they will be constrained to examine the evidence provided by the taxpayer and answer to the taxpayer's opposition within six months from the day following the notification date.

Tunisia

Once the taxpayer receives the answer of the tax authorities to the taxpayer's opposition, the taxpayer will have the possibility to file a second opposition within 15 days from the day after the notification day in cases where the taxpayer still disagrees with some or all the points raised by the tax controllers.

Once the second answer is filed by the taxpayer, there will be no other written correspondences with the tax auditors.

In cases where the tax administration agrees to the clarifications, explanations, arguments, and documents provided by the taxpayer, then the tax audit will be closed. However, in cases where the tax administration still disagrees with some or all the evidence provided by the taxpayer, then the taxpayer will receive a tax assessment notice and will have to pay the notified taxes. The tax assessment notice has to take into consideration the taxpayer's observations enclosed in the first and the second opposition filed by the taxpayer.

Further to the receipt of the tax assessment notice, the taxpayer may make an appeal to the relevant court.

A preliminary tax audit does not prevent an in-depth tax audit of the same period and the same taxes.

In-depth tax audit

In case of an in-depth tax audit, the taxpayer under control is notified 15 days prior to starting the audit. This period may be extended to a maximum period of 60 days.

In-depth tax audits deal with the accounts of the taxpayer under control (in cases where the taxpayer has the obligation to maintain accounts according to the accounting legislation into force) as well as any other evidence (presumptions, registered contracts, etc.).

In-depth tax audits take place, as a general rule, on the business premises of the taxpayer. However, and upon the request of the taxpayer or the tax controllers, the tax audit can be conducted in the tax authorities' office. In this case, books, records, and any other documentation deemed necessary to the tax auditors to complete the audit have to be moved to the tax auditors' office.

In-depth tax audits last for:

- six months, in case the taxpayer under control is constrained by the law to maintain accounts, and
- one year, in the other cases.

At the end of this period, the tax audit must come to an end and the tax auditors must draw up a tax audit report to be sent to the taxpayer, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated.

Once the tax audit report is sent to the taxpayer, the procedure of response and deadlines are the same as for preliminary tax audits.

Statute of limitations

The period open for tax audit, unless it was subject to a previous in-depth tax audit, is:

- Four years in case of partial omission; an omission is considered as partial in cases where the tax return is filed but the taxable base is not determined properly or in cases where the WHT rates applied to payments made to third parties are lower than the rates provided by the law.
- Ten years in case of total omission; an omission is considered as total in cases where the tax return is not filed at the date when the company becomes under tax control.

The four-year period and the ten-year period begin to run from 1 January (in cases where the fiscal year coincides with the calendar year) of the year following the completion of sales, earnings, receipt, or disbursement of any sum to be taxed.

Topics of focus for tax authorities

The tax authorities primarily focus on extraordinary transactions (e.g. mergers, restructuring, suspension of business). After introducing a transfer pricing provision as a part of the 2009 law, the tax authorities are increasing their attention towards transactions concluded between affiliated companies.

Significant developments

New Action Plan

There was an Action Plan that was published by the Turkish government in 2016, and the following changes were expected to be made by the end of 2016:

- The New Income Tax Law, which combines the Corporate Income Tax Law and the Income Tax Law, will become effective.
- The Tax Procedure Law will be revised.
- New tax incentives related to energy efficiency will be implemented.
- The Value-added Tax (VAT) Law will be revised. However, it is expected that the changes will not be as major as the Tax Procedure Law.

However, due to the unexpected political situations, the above Action Plan is now expected to be executed by the end of 2017.

Taxes on corporate income

Corporations are liable for corporate income tax (CIT) at a rate of 20% on net profits generated, as adjusted for exemptions and deductions and including prior-year losses carried forward, to a limited extent.

According to Turkish tax legislation, income taxation differs significantly based on the taxpayer's place of residence. Resident entities are subject to tax on their worldwide income, whereas non-resident entities are taxed solely on the income derived from activities in Turkey.

Local income taxes

There are no provincial or municipal taxes on corporate income in Turkey.

Corporate residence

If both the legal and the business headquarters of a company are located outside Turkey, the company is regarded as a non-resident entity for Turkish tax purposes. If one of these headquarters is located within Turkey, the company is regarded as a resident entity for Turkish tax purposes.

Note that there is no distinction between CIT and VAT registration in Turkey. Therefore, corporations or permanent establishments (PEs) are liable for all taxes (e.g. CIT, VAT, withholding tax [WHT], stamp tax) once they are registered for tax purposes in Turkey.

Turkey

Permanent establishment (PE)

Unlike the provisions of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, there is no minimum period of presence in Turkey before a presence is regarded under the Turkish tax legislation as a PE. In this regard, we believe that the PE evaluation should be made for each case depending on the merit of the cases, both from a local legislation perspective and from a treaty (if applicable) perspective.

Other taxes

Value-added tax (VAT)

Deliveries of goods and services are subject to VAT at rates varying from 1% to 18%. The general rate is 18%.

VAT payable on local purchases and on imports is regarded as 'input VAT', and VAT calculated and collected on sales is considered 'output VAT'. Input VAT is offset against output VAT in the VAT return filed at the related tax office. If output VAT is in excess of input VAT, the excess amount is paid to the related tax office. Conversely, if input VAT exceeds output VAT, the balance is carried forward to the following months to be offset against future output VAT. With the exception of a few situations, such as exportation and sales to an investment incentive holder, there is no cash refund to recover excess input VAT.

Turkish VAT principles contain a 'reverse-charge VAT mechanism', which requires the calculation of VAT by resident entities on payments to persons in foreign countries. Under this mechanism, VAT is calculated and paid to the related tax office by the resident entity. The resident entity treats this VAT as input VAT and offsets it in the same month. This VAT does not create a tax burden for the resident or non-resident entity, except for its cash flow effect on the former if there is insufficient output VAT to offset the input VAT.

VAT is also collected at the point of import. The VAT rate is the same rate as the one that is applied for transactions in the country of origin. The base for VAT is the value of the goods for customs tax purposes plus any kind of tax payable at the point of import and all the expenses incurred until the single administrative document is registered.

Reduced rates

For the deliveries and services mentioned in List No. I (e.g. agricultural products such as raw cotton, dried hazelnuts, supply and leasing of goods within the scope of the Finance Leasing Law), the reduced rate is 1%.

For the deliveries and services mentioned in List No. II (e.g. basic food stuffs, textiles, books and similar publications), the reduced rate is 8%.

Foreign trade: imports and exports

Importation of goods and services is a taxable transaction, whether or not the importation is made for business purposes. Export transactions are exempt from VAT, and credit and refund is available for input VAT for the export goods.

Importation of goods and services

For VAT purposes, any importation of goods or services into Turkey is a taxable transaction, regardless of the status of the importer or the nature of the transaction.

To equalise the tax burden on importation and domestic supply of goods and services, VAT is levied only on the importation of goods and services that are liable to tax within Turkey. Accordingly, any transaction exempt in Turkey may also be exempt on import. The VAT on importation is imposed at the same rates applicable to the domestic supply of goods and services. In the case of importation, the taxable event occurs at the time of actual importation. Importation of machinery and equipment under an investment incentive certificate (IIC) is exempt from VAT.

Banking and insurance transactions tax (BITT)

The transactions being performed by licensed banks and insurance companies are generally exempt from VAT but are subject to BITT at a rate of 5% in general (although some transactions are subject to 1% or 0% BITT), which is due on the gains of such corporations from their transactions.

The purchase of goods and services by banks and insurance companies are subject to VAT, but this is considered an expense or cost item. Therefore, it is not recoverable (i.e. for VAT purposes by offsetting against the output VAT) in the hands of these corporations.

Special consumption tax

There are four main product groups that are subject to special consumption tax at different tax rates, depending on the GTIP numbers (tariff numbers):

- Petroleum products, natural gas, lubricating oil, solvents, and derivatives of solvents.
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts.
- Tobacco and tobacco products, alcoholic beverages.
- Luxury products.

Unlike VAT, which is applied on each delivery, special consumption tax is charged only once (except for some activities, such as production).

Customs and foreign trade

Following the changes in Turkish economic policy in the 1980s, there has been rapid growth in the foreign trade volume of Turkey.

Turkey is a member of the World Trade Organization (WTO) and World Customs Organization (WCO). Turkey signed a 'Customs Union Agreement' with the European Union (EU) on 1 January 1996 and has amended its customs code and legislation in line with those of the EU customs code.

According to the Customs Union Agreement, with the exception of certain goods (e.g. agricultural products), no customs tax is incurred on trade between Turkey and the European Union as long as the goods are imported to Turkey with an A.TR movement certificate proving that the goods are in free circulation in the European Union.

In order to harmonise its foreign trade, Turkey has also signed several Free Trade Agreements (FTAs) with the trade partners of the European Union.

The Turkish Customs Code is very similar to that of the EU, and its aim is to harmonise the customs practices of Turkey with EU customs practices.

Turkey

The Turkish Customs Code defines the ‘Turkish Customs Territory’ as the territory of the Republic of Turkey including the territorial waters, the inland maritime zone, and the airspace of Turkey.

The Turkish Customs Code has also brought into force the customs regimes with economic impact that have been in use in the EU countries for a long time. The import taxes, VAT, other taxes, and funds are collected at the time of importation. The main tax collected at customs is the import tax. The import tax differs according to the classification of the commodity and to the country of origin.

VAT is also collected at the point of import. The VAT rate is the same rate as the one that is applied for the transactions in the country of origin. The base for VAT is the value of the goods for customs tax purposes plus any kind of tax payable at the point of import and all the expenses incurred until the single administrative document is registered.

The VAT rates are 1%, 8%, and 18%, varying according to the type of goods imported.

In addition, if the import transaction is not conducted in cash, there is a special Resource Utilisation Support Fund (RUSF), which should be also paid during importation. RUSF is a special kind of fund applied to importations on a credit basis. According to the RUSF legislation, any importation conducted on credit (if the payment related to the importation is not paid before the actual importation) is subject to a special payment of 6% of the value of the goods to be imported. The important criteria are payment term and whether it is a cash payment or payment on credit.

Dumping and anti-dumping duties are collected at the point of import.

In certain cases, such as temporary importation or inward processing, the customs administration shall require a kind of guarantee letter to secure the taxes. The amount of this guarantee shall cover all the taxes payable in the case of an importation.

There is no customs tax on trade between the EU and Turkey except for certain products (e.g. agricultural products). However, it is crucial that the imported goods are imported together with an A.TR Movement Certificate proving that the goods are in free circulation.

In the case of FTAs, the goods must be imported with a EUR.1 certificate, giving proof of their country of origin in order to benefit from the FTA.

Turkey applies the Common Customs Tariff of the EU to third countries, except for agricultural products.

Property taxes

Buildings and land owned in Turkey are subject to an annual real estate tax at different rates.

Stamp tax

Stamp tax applies to a wide range of documents, including, but not limited to, agreements, financial statements, and payrolls. Stamp tax is levied as a percentage of the value stated on the agreements at rates varying between 0.189% and 0.948%.

Salary payments are subject to stamp tax at a rate of 0.759% over the gross amounts, whereas a lump-sum stamp tax is calculated for certain types of documents, such as the printed copies of the financial statements.

Resource Utilisation Support Fund (RUSF)

According to the RUSF legislation, any importation conducted on credit (if the payment related to the importation is not made before the actual importation) is subject to a special payment of 6% of the value of the goods to be imported.

Additionally, foreign loans obtained by Turkish resident individuals or legal entities (except for banks or financial institutions) are subject to RUSF, depending on the currency denomination and the maturity. RUSF is applicable at the following rates:

- 3% over the interest amount for the Turkish lira (TRY) denominated loan, regardless of the maturity of the loan.
- Varies between 0% and 3% over the principal amount of the foreign currency denominated loan and gold-based loans, depending on the maturity.
- 0% in the case of locally obtained loans.

Note that special exemptions may apply in cases where one is investing in certain industries.

Payroll taxes

In accordance with the Turkish tax regulations, all employees working under a resident employer are included into the local payroll. The employer withholds taxes and other duties on income at source, and the employees receive the net amount after the deductions. The income tax and the stamp tax should be declared by the employers filing the withholding tax return. *The tax tables applicable to individuals are provided in the Taxes on personal income section of Turkey's Individual tax summary at www.pwc.com/taxsummaries.*

The social security premium and the unemployment premiums should be declared by the employers filing the social security premium declaration on a monthly basis.

Income tax, stamp tax, social security contribution, and unemployment premiums are the legal deductions from the salary.

Social security contributions

Social security contributions for both the employer and the employee total 34.5% of an employee's salary; 14% for the employee and 20.5% for the employer. In addition to social security payments, unemployment contribution is 3% of the salary, 1% for the employee and 2% for the employer.

The social security ceiling is determined as TRY 13,331.40 for the period 1 January 2017 through 31 December 2017.

Branch income

Branches are taxed solely on the income derived from activities in Turkey since they are regarded as non-resident entities for Turkish tax purposes. Branch profits are subject to Turkish CIT at the rate of 20%.

Turkey

The branch profit transferred to headquarters (i.e. upstream income repatriation) is subject to dividend WHT at a rate of 15%, which might be reduced if there is a bilateral tax treaty between Turkey and the country of which the principal is a resident for income tax purposes. *See the Withholding taxes section for a list of countries with which Turkey has an applicable tax treaty.*

Income determination

Inventory valuation

The weighted average and first in first out (FIFO) methods are allowed for calculating the value of year-end stock or goods sold. Last in first out (LIFO) is not permitted. Stock-count deficits are recorded as disallowable expenses, whereas stock-count surpluses are treated as income at year-end for CIT purposes. Necessary VAT adjustments should also be made accordingly.

Capital gains

No separate rules exist with respect to capital gains taxation in Turkey. Capital gains and losses are included in the determination of taxable corporate income.

See Capital gains exemption in the Tax credits and incentives section for information about an incentive that can reduce the effective CIT rate on capital gains in certain instances.

Dividend income

In dividend distribution's between Turkish resident companies, the dividend payer is exempt from WHT and the recipient is exempt from CIT.

Interest income

In principle, all interest income is subject to tax. Interest income on bank deposits denominated in both Turkish lira and foreign currency is subject to WHT. Interest income is recorded at gross, and any WHT incurred on this income is offset against CIT calculated.

Royalty income

In principle, royalty income (e.g. on patents, copyrights, licence) derived by non-resident individuals or corporations not constituting a PE in Turkey is subject to WHT at the rate of 20%. However, the bilateral tax treaty between Turkey and the country of residence of the foreign company may reduce the local tax rate.

Foreign income

In principle, foreign-sourced income is taxable in Turkey. However, foreign-sourced dividend income may also be subject to a participation exemption if certain conditions are fulfilled. A participation exemption for capital gains generated from a foreign subsidiary may also be available in Turkey, under certain conditions.

Other foreign-sourced income, such as royalties and interest, is fully taxable in Turkey. Partial relief from taxation is granted insofar as the foreign tax paid does not exceed the rate of tax payable for the same income in Turkey.

Although undistributed income of foreign subsidiaries should not be taxable in Turkey, controlled foreign company (CFC) rules should also be taken into consideration in this respect. *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Deductions

Turkish CIT legislation allows a deduction for all the “ordinary and necessary expenses paid or incurred for the generation and sustenance of income during the taxable year in carrying on any trade or business”.

The general principle for tax deductibility is that the payment should be a necessary business expense and it should be properly documented in accordance with the relevant provisions of the Turkish transfer pricing regulations and those in the local tax procedural law.

Depreciation and amortisation

Fixed assets are subject to depreciation at rates determined by the Turkish Ministry of Finance (MoF), based on their useful life.

Intangible assets (i.e. licence, franchise, copyright, etc.) and goodwill are depreciated over 15 years and five years, respectively. Additionally, leasehold improvement is depreciated based on lease period.

Depreciation can be calculated by applying either the straight-line or declining-balance method (limited to 50%), at the taxpayer’s discretion. The taxpayer may also change the option from declining-balance to straight-line (but not vice versa) at any time during the life of the asset. The applicable rate for the declining-balance method is twice the rate of the straight-line method, subject to certain limitations. Furthermore, in special cases, the tax authorities may determine higher depreciation rates.

Intangible assets are amortised by the straight-line method over their estimated useful lives, if objectively determinable.

Profits or losses on disposal of fixed assets (i.e. the difference between the proceeds and the written-down values) are included in taxable income in the year of disposal. If the renewal of disposed-of assets is considered necessary by the owners of the business concern, the profit accrued may be retained for a certain amount of time. After the purchase of new fixed assets, the profits may be offset against the depreciation of the new assets.

Start-up expenses

Start-up expenses are considered as deductible expenses as incurred. Also, the taxpayer has the option to capitalise such expenses and to depreciate them over five years at equal amounts.

Interest expenses

According to the amendments to the Corporate Tax Law (CTL), it is envisaged to make some changes regarding the deductibility of the finance expenses of companies.

A portion, yet to be determined by the Council of Ministers, of interest and similar expenses incurred on foreign resources will not qualify for deduction for CIT purposes. According to the arrangement:

- credit institutions, financial institutions, financial leasing, factoring, and financing companies shall not be subject to finance cost restrictions
- cost restrictions shall apply exclusively to the portion of liabilities that exceed a company’s shareholder’s equity

Turkey

- restrictions shall not exceed 10% and the rate may be amended per industry by the Council of Ministers, and
- restrictions shall not apply to interest rates and similar payments added to investment costs.

Deemed-interest deduction on cash injection as capital

The Law No: 6637, which has been published in the Official Gazette dated 7 April 2015, introduced a concept of tax incentives where Turkish resident companies are allowed a deemed-interest deduction on cash injection as capital from the corporate tax base of the relevant year.

Turkish resident companies, except for those that operate in banking, finance, and insurance sectors, will be able to benefit from such incentive.

According to the incentive, the deductible interest amount is calculated as follows:

- The latest 'annual weighted average interest rate applied to loans provided by banks' that is announced by the Central Bank of Turkey (13.57% for 2016) will be applied to the capital increases paid in cash and cash part of initial capital for newly established entities.
- Only 50% of the calculated amount can be deducted from the CIT base.

In order to benefit from this deduction, the company should have taxable profit (i.e. the companies that have carryforward tax losses or current year tax losses are not able to benefit from this deduction).

The following capital increase alternatives are not included on the calculation or determination of the deduction amount:

- Capital increase made from capital in kind items (e.g. via real estate).
- Capital increase made during mergers, acquisitions, or spin-offs.
- Capital increase made from internal sources (e.g. legal reserves) that are booked under shareholders' equity.
- Capital increase made via borrowing from shareholders.

By the Decree of Council of Ministers (no: 2015/7910), the Council of Ministers has re-determined the deemed interest deduction rate for the following cases:

- a. Publicly traded companies (listed in Borsa Istanbul [BIST]): For the companies that are publicly traded in BIST at the last day of the year in which the 50% interest deduction is benefited, the rate would be increased by:
 - 25 points if the publicly traded rate of nominal/value or the amount of registered shares of the company is 50% or less (totally 75%).
 - 50 points if more than 50% of the nominal/registered shares of the company is traded in BIST (totally 100%).
- b. Capital increase for investments with investment incentives: In case the capital increase made in cash has been used for investments on manufacturing or industrial plants, purchase of machines or equipment required for such plants, or lands or states for building of such plants, the 50% rate has been increased by 25 points.
- c. Other companies: Any company that is not subject to 0% or falls under category (a) and (b) will benefit from a 50 points deduction.

The Decree reduced the rate to 0% for the capital increases made for the following cases:

- The income of company consists at least 25% of passive income (e.g. interest, dividends, rental income, license fees, capital gains obtained from sales of marketable securities).
- At least 50% of the total assets of the company consists of affiliate marketable securities, shares, and subsidiary companies.
- Invest capital or provide a loan to another company, which are limited only with the corresponding capital increase made in cash amount.
- Investment in real estate companies (limited only with the corresponding investment amount).

Bad debt

Bad and doubtful accounts receivable are deductible under certain conditions. Amounts of the receivables collected afterwards are added to the profits of the year in which they are collected.

Charitable contributions

Donations to listed charities and for construction of schools, hospitals, and scientific research organisations are deductible at up to 5% of the company's gross profit.

Pensions and employee termination benefits

Payments for pensions and employee termination benefits are deductible for CIT purposes under certain conditions.

Fines and penalties

In principle, fines and penalties incurred due to the wrong-doings of the taxpayer or its employees are not tax deductible.

Taxes

Essentially, the CIT itself and VAT are, subject to certain exceptions, not deductible for CIT purposes.

Fees and duties paid in relation to assets of the company are, in principle, deductible in determining taxable corporate income.

Net operating losses

Corporate losses may be carried forward for five years. Losses cannot be carried back.

Payments to foreign affiliates

Charges for royalties and interest by foreign affiliates may be deductible for CIT purposes, provided that transfer pricing and thin capitalisation rules are followed (see *the Group taxation section for more information*).

Group taxation

Consolidation of the accounts of group companies for tax purposes is not allowed in Turkey since each company is regarded as a separate taxpayer.

Turkey

Transfer pricing

The CTL includes transfer pricing regulations, using the OECD's guidelines as a basis. If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties in which prices are not set in accordance with the arm's-length principle, the related profits are considered to have been distributed in a disguised manner through transfer pricing. Such disguised profit distribution through transfer pricing is not accepted as deductible for CIT purposes. The methods prescribed in the law are the traditional transaction methods described in the OECD's transfer pricing guidelines.

Thin capitalisation

According to local thin capitalisation regulation, if the ratio of the borrowings from shareholders or from persons related to the shareholders exceeds triple the shareholders' equity of the borrower company at any time within the relevant year, the exceeding portion of the borrowing will be considered thin capital and the corresponding interest will not be deductible. Accordingly, the ratio of loans received from related parties to shareholders' equity must be no more than 3:1 in order to eliminate Turkish thin capitalisation issues.

Controlled foreign companies (CFCs)

A CFC is a company established abroad with at least 50% of the organisation controlled directly or indirectly by tax-resident companies and real persons by means of separate or joint participation in the capital, dividends, or voting rights. A CFC also must meet certain conditions (e.g. 25% or more of its gross revenue must be comprised of passive income, it must be subject to an effective income tax rate lower than 10% for its commercial profit in its home country, gross revenue of the subsidiary established abroad must be more than the foreign currency equivalent of TRY 100,000 for the related fiscal year).

The CFC's profit is included in the CIT base of the controlling resident corporation at the rate of the shares controlled, irrespective of whether it is distributed.

Tax credits and incentives

Foreign tax credit

A partial relief from income taxation is granted for the foreign tax paid that does not exceed the rate of tax payable for the same income in Turkey.

Participation exemption for dividends

There is an unconditional CIT and dividend WHT exemption for dividend income between Turkish companies. If a Turkish company has a shareholding in a foreign company, this dividend income is exempt from CIT, under certain conditions.

Exemption for income from foreign construction and repair activities

The profit from construction and repair activities carried out by Turkish corporations in foreign countries may be exempt from CIT in Turkey under the Turkish CTL. It should be noted that if loss occurs from these activities, it is not possible to deduct this loss amount from the income generated through domestic activities since deduction of a loss relating to foreign activities that are exempt from CIT in Turkey is not allowed for deduction.

Capital gains exemption

For capital gains generated from the sale of shares in a company, a 75% CIT exemption is applicable under certain conditions. This partial exemption may also be applicable for the capital gains derived from the alienation of real estate investments under certain conditions.

In the event a foreign subsidiary is sold by a Turkish company, a CIT exemption at the rate of 100% is applicable under certain conditions.

Investment incentives

The investment incentive system comprises the following elements.

Priority Investment Projects

Based on the investment incentive system, certain investment projects (e.g. testing centres; research and development (R&D) projects; pharmaceutical, tourism, cultural, education, and railway investments) are deemed as 'Priority Investment Projects'.

General incentive practices

Excluding the subjects of investments that do not meet the requirements, all investments above the minimum fixed investment amount will benefit from incentive elements, regardless of regional location.

Regional incentive practices

The industries categorised by region in the relevant Decree will benefit from incentive elements under the conditions determined for each relevant region.

Large-scale investments

Incentives are granted to all large-scale investments, although incentive size will vary depending on the investment's regional location.

Strategic investments

The related legislation defines strategic investments as well as different incentive ratios and periods for strategic investments. A new committee to be established will decide which investments are strategic within the scope of the defined criteria.

Based on the related legislation, investments in production of products that are highly dependent on imports and meet all the following criteria will be regarded as strategic investments:

- Minimum fixed investment amount should be more than TRY 50 million.
- Total domestic production capacity for a given product that is the matter of investment should be below the import amount.
- Added value to be generated with the investment should be at least 40%.
- The total import amount realised related to the invested product within the prior year should be more than 50 million United States dollars (USD).

There are six main components of the investment regulation:

- Reduced CIT rate.
- VAT exemption.
- Exemption for social security premium (employer's portion).
- Customs duty exemption.
- Interest support.

Turkey

- Allocation of land for investments.

A new investment incentive model supports investments on a project basis. The supportable investments and incentive items will be decided by the Council of Ministers.

Minimum investment amount should be USD 100 million.

The incentive items are as follows:

- Reduction of CIT rate up to 100%.
- Investment contribution rates up to 200%.
- Employee income tax withholding incentive.
- Customs tax exemption.
- Social Security Institution employer share support for ten years.
- Provision of free treasury land for 49 years.
- During the operating period, 50% of the energy consumption expenditure for the investment should be met up to ten years.
- Up to ten years interest support for investment loans.
- For qualified personnel of special importance, minimum wage support up to 20 times wage support for five years.
- Capital support up to 49%.
- Guarantee of purchase for the goods produced through the investment supported.

Free trade zones

Free trade zones are special sites that lie geographically within the country but are deemed to be outside the customs territory. In these regions, the normal regulations related to foreign trade and other financial and economic areas are either inapplicable, partly applicable, or superseded by new regulations.

In general, activities such as manufacturing, storage, packing, general trading, banking, insurance, and trade may be performed in Turkish free trade zones. Goods moving between Turkey and the zones are treated, for all purposes, as exports or imports. However, operations within the zones are subject to the supervision of the zone management (and customs authorities), to whom regular activity reports must be submitted. Consequently, there is a requirement for zone users to maintain full accounting records (in Turkish) with respect to their activities. These accounting requirements extend to inventory records. Customs duty is levied on any unexplained inventory losses as though the goods had been imported into the country.

The right to operate in a free trade zone is conferred by an operating licence obtained from the Undersecretariat for Foreign Trade, which reviews the application for conformity with the objectives and types of activity specified by the Economic Affairs Coordination Council.

Portfolio investment income

Under the WHT regime introduced on 1 January 2006, certain portfolio investment income (e.g. capital gains derived from listed equities acquired after 1 January 2006 or capital gains or interest from Turkish local government bonds issued after 1 January 2006) derived by eligible entities are subject to 0% WHT. However, the WHT rate is 10% for other resident and non-resident entities. In the case of repo income, 15% WHT should be applied for all non-resident investors (the provisions of double tax treaties [DTTs] are reserved).

Furthermore, 0% WHT is applicable for all type of investors with respect to capital gains derived from listed equities on the Istanbul Stock Exchange (ISE) purchased after 1 January 2006 (excluding securities investment trust shares), income derived from transactions on equity index futures carried out under Turkdex, warrants with underlying of equities traded on ISE, and participation shares of investment funds that intensively invest in listed shares (equity intensive funds).

Under the *Communiqué* No: 277 of Income Tax Law, the following qualify for the eligibility criteria for 0% WHT:

- Turkish resident capital corporations (limited liability companies, joint stock companies, and commandite companies whose capital is divided into shares).
- Non-resident corporations that have the same characteristics as Turkish capital corporations.
- Turkish investment funds (regulated in accordance with the Capital Markets Board).
- Non-resident investment funds similar to Turkish investment funds.
- Those non-residents similar to Turkish investment funds and trusts that engage in investment in securities and other capital markets instruments as their only business in Turkey to derive income and capital gains from these instruments and to exert the rights attached to these instruments.

Under the aforementioned *Communiqué*, the investor should be an institutional portfolio investor. However, what is meant by ‘institutional’ is not crystal clear. It seems to us that the intention of the MoF is to treat all non-resident portfolio investors (other than the individuals) as institutional portfolio investors. The *Communiqué* does not have a principle based approach; rather, it enlists a number of ‘institutional investor’ examples, such as limited liability partnerships (LLPs), sovereign funds, investment funds, investment institutions, and investment companies.

In terms of interest income from deposits, the WHT rates on interest income from bank deposits (excluding interbank deposits and money market operations of intermediaries) differ depending on the currency (Turkish lira or the foreign exchange) and maturity, which are as follows:

- Interest income derived from foreign exchange deposit:
 - In current call accounts and deposit accounts with maturity of less than six months (including six months): 18%.
 - In deposit accounts with maturity of less than one year (including one year): 15%.
 - In accounts with maturity of more than one year: 13%.
- Interest income derived from a Turkish lira deposit:
 - In current call accounts and deposit accounts with maturity of less than six months (including six months): 15%.
 - In deposit accounts with maturity of less than one year (including one year): 12%.
 - In accounts with maturity of more than one year: 10%.

The withholding will be applied by local intermediary banks, brokerage houses, or local custodian banks, instead of the conventional self-declaration mechanism, and this withholding will be the final taxation in Turkey for both non-residents and Turkish individuals.

Turkey

On the other hand, certain portfolio investment income (e.g. capital gains from unlisted shares) is taxed under permanent tax rules. In some cases, a non-resident fund may need to file a tax return within 15 days following the sale of securities and subject to a 32% effective tax rate. However, DTTs may provide relief except in special cases. Certain income, such as interest and dividends, are usually taxed via the WHT regime, so no filing is required for a non-resident investor.

Moreover, Turkish corporate bonds that are issued after 1 January 2006 and sold outside of Turkey are not taxed under the WHT regime, and rather taxed as per permanent tax rules. The WHT rates on interest income from such corporate bonds issued by all type of resident corporations (including Turkish banks and corporations) vary depending on the maturities of the bonds and are regressive. The WHT rates are as follows (please note that DTT provisions are reserved):

- 10%, if maturity is under one year.
- 7%, if the maturity is between one and three years (including one year).
- 3%, if the maturity is between three and five years (including three years).
- 0%, if the maturity is five or more than five years (including five years).

The interest income derived from bonds that are issued by the Turkish Treasury outside of Turkey (i.e. Eurobonds) is subject to a 0% WHT. Capital gains derived by non-residents from Turkish Eurobonds issued by the Treasury are exempt from capital gains taxation.

The responsibility to apply this WHT belongs only to the issuer of the corporate bond, regardless of the fact that a payment agent exists or not, and the WHT liability of the issuer is not disregarded even if the payment agents make any withholding.

Research and development (R&D) activities

In the last decade, the Turkish Parliament has enacted several regulations to provide incentives for R&D activities in Turkey. Tax incentives and support mechanisms that are provided to companies carrying out R&D and innovation activities in Turkey are as follows:

- R&D legislation:
 - Law No. 5746 on Support of R&D Activities.
 - Law No. 4691 on Technology Development Zones.
- Institutions providing cash supports on project basis:
 - Scientific and Technological Research Council of Turkey (TÜBİTAK).
 - Turkish Technology Development Foundation (TTGV).
 - Ministry of Science, Industry, and Technology.
 - Small and Medium Industry Development Organization (KOSGEB).
 - Development Agency.
 - European Commission.

Law No. 5746 on Support of R&D Activities

R&D deduction (100%)

All eligible innovation and R&D or design expenditures made in technology centres, R&D centres (which must employ at least 15* full-time equivalent R&D personnel), design centres (which must employ at least 10 full-time equivalent design personnel), R&D and innovation or design projects supported by governmental institutions,

foundations established by law, or international funds can be deducted from the CIT base at a rate of 100%.

* With the Council of Ministers' decision, the minimum number of full-time equivalent R&D personnel that should be employed in R&D centres is reduced to 15 according to Law No. 5746 on Supporting Research, Development and Design Activities. However, the aforementioned number will continue to be considered as 30 for sectors (all classes under 29 and 30.30, 30.40, 30.91, 30.99 under the C – Manufacturing section) according to the Statistical Classification on Economic Activities for European Community (NACE Rev. 2).

Income tax exemption (80%-90%-95%)

The salaries of R&D, design, and support personnel, at a rate of 95% for the personnel with a PhD degree or master's degree on basic sciences, 90% for the personnel with a master's degree or undergraduate degree on basic sciences, and 80% for others, is exempt from income tax.

Social security premium support (50%)

Half of the employer portion of social security premiums for R&D, design, and support personnel (maximum of 10% of the number of full-time R&D and design personnel) will be funded by the MoF for each R&D and support personnel.

Stamp tax exemption

The documents prepared for the R&D and design activities, including the payrolls of R&D, design, and support personnel, are exempt from stamp tax.

Customs duty exemption

Goods imported for the usage of studies in R&D, innovation, and design projects are exempt from customs duties. Additionally, any funds, held papers, and applied transactions are exempt from stamp tax and fees.

Additional support for personnel graduated from basic sciences

The minimum gross wage portion of monthly salaries of each R&D personnel that have at least a bachelor's degree in basic sciences (mathematics, physics, chemistry, or biology) employed in R&D centres will be financed from the budget of the Ministry of Science, Industry, and Technology for two years, under the specific circumstances stated in the R&D legislation.

Law No. 4691 on Technology Development Zones

CIT exemption

The profits derived from the software activities or products developed as a result of the R&D activities in technoparks are exempt from CIT.

Income tax exemption (100%)

The salaries of R&D and support personnel carrying out R&D and software development activities in technoparks are exempt from income tax until 31 December 2023. The salary for the activities other than software development and R&D activities cannot benefit from income tax exemption.

Turkey

Social security premium support (50%)

Half of the employer portion of social security premiums for R&D and support personnel (maximum of 10% of the number of full-time R&D personnel) will be funded by the MoF for each R&D and support personnel.

Stamp tax exemption (only on payrolls)

The payrolls prepared for the R&D activities are exempt from stamp duty.

VAT exemption

Deliveries of software and services (system management, data management, business applications, Internet, mobile and sector applications, military command control applications) arising from software development activities by the companies operating in the technoparks are exempt from VAT until 12 December 2023.

Customs duty exemption

Goods imported for the usage of studies in R&D, innovation, and design projects are exempt from customs duties. Additionally, any funds, held papers, and applied transactions are exempt from stamp tax and fees.

Withholding taxes

There is no WHT on payments to resident corporations by other resident corporations, except for a 3% WHT on progress payments to contractors, both domestic and foreign, within the scope of construction work spanning more than one calendar year.

The local WHT rates are as follows:

Income derived by non-resident individuals or corporations not constituting a PE in Turkey		WHT (%)
Rental from immovable assets		20
Leasing of goods (within the scope of the conditions regulated under Turkish Financial Leasing Law No. 3226)		1
Royalties (e.g. on patents, copyrights, licence)		20
Professional services		20
Petroleum services		5
Wages & salaries (progressive rates are applied for employees' income taxes)		15 to 35
Interest on loan arrangements:		
Interest payments made to foreign banks and corporations that are authorised in their own jurisdictions and customarily lend not only to related parties but also to third parties		0
Interest payments made in relation to securitisation loans and subordinated loans		1
Other loans		10
Interest on time deposits ***		10 to 18
Reverse-repo income derived from bonds		15
Income derived by resident eligible entities *		WHT (%)
Capital gains on Treasury bills and domestic government bonds issued after 1 January 2006		0
Interest income on Treasury bills and domestic government bonds issued after 1 January 2006		0
Capital gains from listed equities purchased after 1 January 2006		0

Income derived by other entities and individuals	WHT (%)
Capital gains on Treasury bills and domestic government bonds issued after 1 January 2006	10
Interest income on Treasury bills and domestic government bonds issued after 1 January 2006	10
Income derived by non-resident individuals or corporations not constituting a PE in Turkey	WHT (%)
Capital gains from listed equities purchased after 1 January 2006 (excluding capital gains from securities investment trust shares)	0
Capital gains from equities of securities investment trusts purchased after 1 January 2006	10
Participation shares of Turkish investment funds	WHT (%)
Eligible entities * (both residents and non-residents)	0
Other entities and individuals ** (both residents and non-residents)	10

* See *Portfolio investment income in the Tax credits and incentives section*.

** Income derived from the redemption of participation certificates that continuously invest at least 51% of their assets in equities that are registered on the ISE are not subject to WHT if they are held for at least one year.

Income derived from participation shares of investment funds that intensively invest in listed shares (equity intensive funds) are subject to 0% WHT.

*** WHT on interest income derived from time deposits depends on the currency (i.e. Turkish lira or foreign currency deposits) and the maturity (see *Portfolio investment income in the Tax credits and incentives section*).

Please refer to the following tables for local WHT on dividends, interest, and royalties, respectively.

Turkish WHT on dividends

Dividend distributions to individuals and to non-resident persons who are shareholders are subject to WHT at a local rate of 15%. This rate might be reduced for non-resident shareholders in the presence of a tax treaty. Please note that dividend distributions to resident entities and branches of non-resident entities are not subject to WHT.

Notes

- The local rate is 15% for dividends. Unless a lower rate is stated in the Agreement, the local rate is applied.
- As per the provisions of the protocol amending the agreement, the rate may be (partially or wholly) reduced;
 - For the Netherlands: to 10%, as long as, under the provisions of the Netherlands Company Tax Act and to the future amendments thereto, a company that is a resident of the Netherlands is not charged tax with respect to dividends the company receives from a company that is a resident of Turkey.
 - For Belgium: to 10%, as long as, under the provisions of the Belgian laws and of the future amendments thereto, a company that is a resident of Belgium is not charged tax with respect to dividends the company receives from a company that is a resident of Turkey.
 - For Austria: to 5%, if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends, provided that such dividends are exempt from tax in Austria.
 - For Ireland: to 5%, where the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the voting power of the company paying the dividends. 15% in all other cases.
- Subject to 5% of the gross amount of the dividends if the recipient is the government, or a public institution that is wholly owned by the government or its political subdivisions, or local authorities of the United Arab Emirates.
- The tax rate shall be 15% where the amount of the Turkish tax imposed on the income of the company paying dividends is less than 40% of such income derived in the accounting period ending immediately before the date when such dividends become payable.
- The income should be subject to full corporate taxation in the hands of the Turkish tax-resident subsidiary.
- The provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
- If the beneficial owner of the dividends is a resident of Saudi Arabia, the tax so charged shall not exceed 5% of the gross amount of the dividends provided: (i) the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the Turkish company paying the dividends or (ii) the beneficial owner is a central bank or an entity that is wholly owned by the government.

8. In case of Turkey, the tax rate shall not exceed 5%, to the extent that they are paid out of profits that have been subject to full rate of CIT in Turkey (i.e. without benefiting from tax exemption).
9. The rate of the income tax shall not exceed 5% if it is derived by the Government Pension Fund (*Statens Pensjonsfond*) or by the Government Social Security Fund (*Sosyal Guvenlik Fonu*), provided that such dividends are exempt from tax in the contracting state where the beneficial owner is a resident.
10. The treaty-reduced rate of 5% shall apply if such dividends are exempt from tax in the contracting state of which the beneficial owner is a resident.
11. As per the provisions of the agreement, the rate may be reduced to 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends, provided that a relief from Swiss tax is granted for such dividends by way of an abatement of the profits tax in proportion corresponding to the ratio between the earnings from participations and the total profits or by way of an equivalent relief.
12. As per the provisions of the agreement, the rate may be reduced to (i) 5% of the gross amount of the dividends if the Turkish company (other than a partnership) that directly holds at least 10% of the capital of the Australian company receives the dividends or (ii) 5% of the gross amount of dividends that are subject to Turkish Corporate Income Tax at the full rate if the Australian company (other than a partnership) that directly holds at least 25% of the capital of the Turkish company receives the dividends. Regardless of these, if the dividends are taxed in Australia, Turkey could tax the dividends at a rate not exceeding 15%.
13. As per the provisions of the agreement, the dividends paid by a company that is a resident of Malta to the Turkish resident beneficial owner shall be exempt from any tax in Malta that is chargeable on dividends in addition to the tax chargeable in respect of the profits of the company. Furthermore, Malta tax chargeable with respect to distributed profits of the company shall not exceed 15% of the gross amount if the distributed profits consist of gains or profits earned in any year in respect of which that company is in receipt of any benefit under the provisions regulating aids to industries in Malta, provided that the receiving company submits returns and accounts to the taxation authorities of Malta in respect of its income liable to Malta tax for the relative year of assessment.

Notes

- The local rate of 10% will be applied in the event a higher rate is stipulated in the agreement.
- Provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
- A rate of 10% if the loan or other debt claim is for a period exceeding two years; 15% in all other cases.
- A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases.
- A rate of 10% if the loan/credit is taken from a financial institution; 15% in all other cases.
- A rate of 10% if the loan is taken from a bank or a financial institution; 15% in all other cases.
- A rate of 10% if the credit/loan is taken from a bank, financial or savings institution, insurance company; 15% in all other cases.
- A rate of 7.5% if the loan is taken from a financial institution; 10% in all other cases.
- A rate of 10% if the interest is the result of a loan provided/given by a bank or if the interest is paid in return for an article of merchandise, or equipment given to the contracting state on credit; 15% in all other cases.
- A rate of 10% if the loan is taken from a financial institution, including insurance companies; 15% in all other cases.
- A rate of 10% for the use of, the right to use, or the sale (contingent on the productivity, use, or disposition) of any copyright of literary, artistic, or scientific work, including royalties in respect of motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process, or for information concerning industrial, commercial, or scientific experience; 5% for the use of or the right to use industrial, commercial, or scientific equipment.
- A rate of 5% for the use of industrial, commercial, or scientific equipment; 10% in all other cases.
- A rate of 15% for patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
- A rate of 5% in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by the *Oesterreichische Kontrollbank AG* or a similar Turkish public entity the objective of which is to promote the export; 10% if the interest is derived by a bank; 15% in all other cases.
- If the beneficial owner of the 'income from debt claims' is a resident of Saudi Arabia, the tax so charged shall not exceed 10% of the gross amount of income.
- A rate of 10% in respect of a loan or other debt claim for a period exceeding two years or if the interest is received by a financial institution; 15% in all other cases.
- Interest arising in one of the contracting states and paid to the government of Turkey or the Central Bank of Turkey shall be exempt from income taxes in the contracting state. Similarly, interest arising in the Republic of Turkey and paid to the government or the Central Bank of the other contracting state shall be exempt from income taxes in Turkey.
- Interest arising in Turkey and paid to the government of Canada or to the Bank of Canada shall be exempt from Turkish tax. Similarly, interest arising in Canada and paid to the government of Turkey or to the Central Bank of Turkey (*Türkiye Cumhuriyet Merkez Bankası*) shall be exempt from Canadian Tax.
- The rate of the income tax shall not exceed (i) 10% if the interest is paid to a bank (also note that in the case of Turkey, a lower rate of 0% may apply for eligible financial institutions' and banks' loans under the domestic regulation) or (ii) 5% if the interest is paid to the Norwegian Government Pension Fund (*Statens Pensjonsfond*), the Norwegian Guarantee Institute for Export Credits (*Garantiinstituttet for Eksportkreditt*), the Turkish Social Security Fund (*Sosyal Güvenlik Fonu*) and the Eximbank of Turkey (*Türkiye İhracat Kredi Bankası*); 15% in all other cases.
- The rate of the income tax shall not exceed 10% if the interest is paid to a bank (also note that in the case of Turkey, under the domestic regulation, a lower rate of 0% may apply for the loans provided by eligible financial institutions and banks); 15% in all other cases. The interest shall be exempt from income taxes in the contracting state where it arises, if the payment is made to the government of Turkey, to the Central Bank of Turkey (*Türkiye Cumhuriyeti Merkez Bankası*), to the government of New Zealand, or to the Reserve Bank of New Zealand.
- A rate of 5% of the gross amount of the interest paid in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by an Eximbank or similar institution, the objective of which is to promote the export; 10% if the interest is derived by a bank; 10% in all other cases.

Turkey

22. A rate of 15% from the use of, or the right to use, trademarks; 10% in all other cases.
23. A rate of 5% in respect of loans or credits that are guaranteed, insured, and provided for the purposes of promoting export by the Finnish Export Credit or FINNVERA and the Turkish public institutions the objective of which is to promote exports; 10% if the interest is derived by a bank; 15% in all other cases.
24. A rate of 10% if the payment is made to a bank; no taxation arises if the payment is made to the Central Bank of Mexico; no taxation arises if the payment is made to Banco Nacional de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C., or Banco Nacional de Obras y Servicios Publicos S.N.C where the maturity of loan is more than three years; 15% in all other cases.
25. For the interest income derived by governments or central banks of the contracting states, no WHT applies.
26. The 15% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting.

Anti-tax haven provisions

According to the law, all sorts of payments made to corporations (including branches of resident corporations) that are established or operational in countries that are regarded by the Turkish Council of Ministers to undermine fair tax competition (through taxation or other practices) may be subject to taxation in Turkey through withholding at a rate of 30%.

In the meantime, the Turkish Council of Ministers has not yet determined which countries receiving payments are considered 'tax havens'.

Tax administration

All Turkish taxes are imposed under laws drafted by or with the involvement of the Turkish MoF and are promulgated by the Turkish Parliament. The central government, acting through the MoF, imposes most of them, although local authorities have certain rights over some minor transaction charges. Tax procedures are governed by the Turkish tax procedural law.

Taxable period

The taxable period is the calendar year. Note that a different fiscal year is also allowed.

Tax returns

A self-assessment system is used in Turkey.

In principle, residents and non-resident entities having a PE in Turkey are obligated to be registered for all taxes in Turkey (e.g. CIT, VAT, WHT, stamp tax) and file annual CIT returns.

The last date of submission of the CIT return is the 25th day of the fourth month following the fiscal year-end. This date will be 25 April if CIT returns are filed on a calendar-year basis.

Payment of tax

Taxable income is declared on a quarterly-basis as advance tax on the 14th day of the second month following each quarter, and corresponding tax is payable on the 17th day of the same period. Advance CIT paid is offset against the final (i.e. fiscal year-end) CIT calculated in the annual CIT return.

The last date of payment of CIT is the 30th day of the fourth month following the fiscal year-end.

Tax audit process

The tax authorities in Turkey do not have a regular audit cycle for every taxpayer. Tax audits are usually performed based on selection through risk assessment software, where they can conduct either sector-specific or issue-specific audits.

Statute of limitations

The Turkish tax system is based on self-assessment, and there is no procedure to agree the filed tax returns with the tax authorities that can prevent further inspections. Tax returns filed by companies remain open to tax inspection until the end of the five-year statute of limitations according to the provisions of Turkish Tax Procedural Law.

Topics of focus for tax authority

The tax authority has recently inspected companies for the following topics:

- Transfer pricing.
- Capital decrease.
- Loss compensation fund.
- Partial spin-off.
- Thin capitalisation.

Corporate income tax certification

In Turkey, a special kind of tax control mechanism is established called ‘corporate income tax certification’. Under this mechanism, the tax authority accepts accounts and tax returns of taxpayers whose accounts are audited and certified by Sworn Fiscal Advisors (SFAs) to be true and correct unless proved to be incorrect. On the other hand, the MoF has announced that those companies that do not have their tax returns certified as such will be on the priority list for tax inspection. The Ministry sets standards of work to be done for any taxpayer wanting to use an SFA. At the end of each year, SFAs have to prepare a comprehensive report to be submitted to the MoF and to certify the accuracy of the CIT return.

The work is carried out over the statutory financials that are subject to tax calculations. Note that this service is not of a ‘statutory audit’ nature, technically it is ‘non-audit assurance’ work.

The tax certification process helps to identify and take corrective measures against erroneous applications that may otherwise be detected only upon a tax investigation by the Turkish MoF.

Other issues***Intergovernmental agreements (IGAs)***

Following the negotiations between Turkey and the United States, Turkey has been included on the list of jurisdictions that have reached agreement in substance as of 3 June 2014, and Turkey was regarded among the countries that will sign the Model 1 IGA. On and after 3 June 2014, Turkey and the United States had further negotiations and infrastructure tests, which were finalised by the beginning of July 2015, and the agreement was signed on 29 June 2015.

The IGA entered into force by the Council of Ministers Decision No. 9229 and dated 19 September 2016, which is published in the Official Gazette dated 5 October 2016 and numbered 29848.

Turkey

Tax authorities are currently working on finalising the Draft Secondary Legislation. Turkish financial institutions are waiting for the secondary legislation to be finalised and come into force to be fully Foreign Account Tax Compliance Act (FATCA) compliant. It is expected that the Draft Secondary Legislation will be published by July 2017 at the latest, by which the Turkish financial institutions would be able to make the reporting for FY14, FY15, and FY16 to the tax authorities. Following that, the tax authorities will make the reporting to the US Internal Revenue Service (IRS) by 30 September 2017 at the latest.

Turkey, as a member of G-20 and OECD, has officially stated that it will be in compliance with the OECD's Common Reporting Standards (CRS). As of 20 May 2017, the agreement has been published in the Official Gazette and has entered into force. Simultaneously, the tax authorities shared a draft version of the CRS Secondary Legislation with Turkish banks to request their comments. As per the draft Secondary Legislation, the CRS will become effective by 1 July 2017, and the first reporting would be made by 30 September 2018, but only for the period between 1 July 2017 and 31 December 2017.

For up-to-date information

For up-to-date information on the most recent and significant developments in Turkish tax regulations, please refer to the tax bulletins added to our tax portal, *Vergi Portali*, which can be accessed at Vergiportali.com.

Significant developments

Starting from 1 January 2017, non-resident entities that enjoy double tax treaty (DTT) benefits in Turkmenistan are obligated to provide renewed tax residency certificates by 1 March on an annual basis in order to continue using DTT benefits. Tax agents are required to facilitate the timely submission of the tax residency certificates of its non-resident suppliers; otherwise, they should apply withholding taxes (WHTs) on Turkmenistan-sourced income of non-residents as per the domestic regulations. Non-residents are allowed to resume utilising the DTT benefits once they submit the renewed tax residency certificates to the tax authorities.

Taxes on corporate income

Residents of Turkmenistan are subject to corporate income tax (CIT) on worldwide income; non-residents are subject to CIT only in respect of their Turkmenistan-sourced income. The CIT base is determined as gross income less allowable deductions.

Branches of foreign legal entities are subject to a 20% CIT, whereas Turkmen legal entities are subject to an 8% CIT (or 2% CIT in cases where the company qualifies as a small or medium enterprise).

Companies involved in oil and gas operations are subject to a 20% CIT, irrespective of the legal status/ownership structure.

Entities where the government holds more than 50% of shares are subject to CIT at the rate of 20%.

Special purpose duty for improvement of urban and rural territories

A special duty aimed at improving urban and rural territories is imposed on registered entities (e.g. legal entities and branches). The duty applies at 1% of the taxable base for CIT purposes. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this duty.

Contributions to Agriculture Development and Ashgabat City Development Funds

The contributions to the Agriculture Development Fund and Ashgabat City Development Fund are outside of the general tax legislation (Tax Code) and are provided for by specific decrees. Permanent establishments (PEs)/branches of foreign legal entities are subject to these contributions on the same terms as local legal entities.

Turkmenistan

Contribution to the Ashgabat City Development Fund only applies to entities located in Ashgabat City.

The base for the contributions is comprised of the accounting income. The contribution rate for the Agriculture Development Fund is 3%, and the contribution rate for the Ashgabat City Development Fund is 0.5%.

Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from these contributions.

Corporate residence

Legal entities are treated as residents for CIT purposes if they are established in accordance with Turkmenistan law or their place of effective management is located in Turkmenistan.

Permanent establishment (PE)

The general definition of a PE under domestic legislation is similar to the one per the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention. A PE is a permanent place of the foreign legal entity in Turkmenistan through which it, fully or partially, conducts entrepreneurial (commercial) activity, including that through an authorised person.

Other taxes

Value-added tax (VAT)

VAT is generally payable at the rate of 15%. A zero-rate applies to exports of goods (except for oil and gas) and international transport services. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this tax.

The tax base is sales turnover including excise tax. If a sale is made by state-fixed prices, then the tax base is the respective sales turnover including VAT and excise tax. The amount of input VAT incurred may be offset against the amount of output VAT. The amount of input VAT related to capital expenditures should be capitalised.

Customs duties

The import of goods into Turkmenistan is generally subject to 2% customs duty. The taxable base is determined as the customs value of imported goods. There is a list of certain items that are subject to specific customs duty (i.e. around 50 items), and the rates of specific customs duties may vary from 5% (e.g. products from cement) to 100% (e.g. carbonic acid) depending on the type of imported goods. In most cases, the customs duty is set on an *ad valorem* basis. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

Excise taxes

Excise tax is paid on goods or products that are considered in the list of excised goods or products. Normally, excised goods consist of alcoholic beverages, tobacco products, and automobiles. Excise rates vary based on the type of goods as well as by domestic production or import.

Property tax

Property tax in Turkmenistan generally applies at the rate of 1% on the average annual net book value of fixed assets and average annual value of tangible assets used for business purposes and located in Turkmenistan. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this tax.

Transfer taxes

There are no transfer taxes in Turkmenistan.

Stamp taxes

Although state duties of various amounts set forth by the government may apply to certain actions (e.g. branch registration), there is no unified stamp tax/duty mechanism as normally practiced in other countries.

Payroll taxes

Employers are obligated to withhold 10% personal income tax (PIT) as well as 2 manats (TMT) special purpose duty for improvement of urban and rural territories from employees' salaries and compensations and pay it to the State Budget on monthly basis.

Pension insurance payments

Pension insurance is payable by employers at 20% of the total remuneration provided to local employees. Additional 3.5% obligatory professional pension insurance is levied on employers with respect to employees who work under hazardous conditions. Employees may participate in a voluntary pension insurance, the minimum rate for which is established at 2% of total remuneration. Income paid to expatriate employees should not be subject to the pension insurance payments.

Subsurface-use tax

Subsurface-use taxpayers are legal entities and individual entrepreneurs extracting natural resources and using land or subsoil waters for the extraction of chemical products. This tax does not normally apply to contractors and subcontractors operating under the umbrella of the petroleum law.

Taxable operations include the sale of natural resources extracted by taxpayers and utilisation of natural resources for consumption. Tax rates vary depending on the goods being extracted. Natural or associated gas extraction is taxed at 22%, and crude oil extraction is taxed at 10%. Tax rates for other mineral resources vary depending on profitability (internal rate of return) from 0% to 50%.

Advertising levy

An advertising levy is imposed on the amount of expenses on commercial advertising and is to be paid quarterly at the rate of 3% to 5%, depending on the location of the payer within Turkmenistan. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this levy.

Branch income

Branches pay CIT at the rate of 20%.

Turkmenistan

Branches are taxed on profits received from activities in Turkmenistan. The gross income is reduced for expenses incurred (both inside and outside of Turkmenistan) in relation to the activities in Turkmenistan. The procedure for determining the taxable base for branches is generally similar to the one for Turkmen legal entities.

Branches subject to the standard tax regime also pay and file returns with respect to the other taxes described in this summary.

Income determination

Inventory valuation

Inventory is valued at cost, including costs relating to its acquisition. The law permits the use of the weighted average or first in first out (FIFO) methods for tax purposes.

Capital gains

Capital gains are taxable as normal business income in Turkmenistan.

Dividend income

Generally, dividend income received by residents and non-residents from Turkmen taxpayers is subject to taxation at the source of payment at the rate of 15%.

Dividend income received by residents from non-Turkmen taxpayers is subject to CIT.

Inter-company dividends

The Tax Code provides for relief from economic double taxation of inter-company dividends.

The WHT rate on dividends payable by Turkmen legal entities to their foreign shareholders may be reduced under applicable DTTs.

Technically, Turkmen branches of foreign legal entities may also be subject to 15% WHT on repatriation of income to their head offices. However, if the head office collects the income from its clients directly to its bank account abroad, the mechanism of collecting the dividend tax is unclear.

Interest income

Turkmenistan-sourced interest income received by non-residents that do not have PEs in Turkmenistan is subject to WHT of 15%. The above rate may be reduced under the applicable DTTs.

Interest income received by residents is subject to CIT.

Royalty income

Turkmenistan-sourced royalty income received by non-residents that do not have PEs in Turkmenistan is subject to WHT of 15%. The above rate may be reduced under the applicable DTTs.

Royalty income received by residents is included in the taxable income and is generally subject to 10% CIT rate.

Foreign income

A resident company is subject to tax on its worldwide income (including capital gains). There are no provisions for tax deferrals in Turkmenistan tax legislation.

Deductions

In general, taxpayers may deduct expenses paid or accrued during the year in connection with their business and aimed at income generation. All expenses must be substantiated by documentary proof.

The deduction of certain expenses is subject to specific ceilings. Such expenses include representation expenses, which are deductible at up to 1% of gross income. Furthermore, deductible norms for business travel expenses are established periodically by the government.

Depreciation

Tax depreciation is based on accounting depreciation. Depreciation is accrued based on the straight-line method. Accelerated depreciation is also allowed based on specific consent of the Ministry of Finance. A Presidential Decree establishes the maximum depreciation rates, ranging from 5% to 25%, for five different groups of assets.

Generally, for the purposes of CIT, depreciation accrued is deductible. Fixed assets acquired free of charge, as well as assets of non-commercial legal entities, budget organisations, and public associations, should be excluded from depreciable assets for CIT purposes, even if they are used for generating income.

Fixed assets provided under operational lease shall be depreciated by the lessor. Fixed assets provided under financial lease shall be depreciated by the lessee.

Goodwill

There are no provisions for goodwill in Turkmenistan tax legislation.

Start-up expenses

Pre-incorporation costs are generally non-deductible.

Interest expenses

Interest expense occurring from debt instruments of any kind should be deductible for CIT purposes, provided that the purpose of the underlying debt relates to the entrepreneurial activity of the taxpayer.

Interest expense incurred by a foreign legal entity abroad and recharged to its branch in Turkmenistan is generally not deductible unless specifically addressed by applicable DTTs.

Bad debts

The Tax Code permits a taxpayer to include provisions for uncollectable debts as well as losses incurred as a result of expiration of the collection period for accounts receivable.

Charitable contributions

There are no specific restrictions on deductibility of charitable contributions. However, they may be disallowed under the general restriction of non-business-related deductions.

Repair and maintenance expenses

Deductible expenditures for the repair of fixed assets shall be comprised of the cost of spare parts and consumable materials used for repair, remuneration of employees

Turkmenistan

carrying out the repairs, and other expenditures associated with such repairs, including payments to third parties for the purpose of such repairs.

Research and development (R&D) expenses

R&D costs (including those that produced no positive result) shall be subject to deduction from gross revenue, except for costs associated with the purchase of fixed assets, their installation, and other costs of a capital nature.

Fines and penalties

Fines, penalties, and other financial sanctions (except for tax-related ones) are deductible for CIT purposes.

Taxes

For CIT purposes, the following taxes are deductible: property tax; subsurface-use tax; levies established by the Tax Code (except the special-purpose duty for the improvement of urban and rural territories); accrued amounts of VAT in selling goods, performing work, and rendering of services; and amounts of excise tax included in the price of sold excisable goods by manufacturers of such goods.

Net operating losses

Loss is defined as excess of allowable deductions over gross revenue. Losses shall be carried forward and deducted in subsequent tax (reporting) periods, but not for more than three years. Losses cannot be carried back.

Payments to foreign affiliates

Administrative and management expenses incurred by the head office of a branch in Turkmenistan are not deductible at the branch level.

Group taxation

There is no group taxation in Turkmenistan.

Transfer pricing

The Turkmenistan Tax Code contains provisions concerning state supervision of transfer pricing. According to these rules, the tax authorities monitor and control transfer pricing of certain types of transactions, including transactions between related parties, foreign trade operations, and transactions where the tax authorities during tax audits perceive considerable deviation from the market price (i.e. more than 20%).

Thin capitalisation

There are no provisions for thin capitalisation in Turkmenistan tax legislation.

Controlled foreign companies (CFCs)

Turkmenistan tax legislation does not have provisions covering CFC rules.

Tax credits and incentives

Tax and investment incentives may be negotiated on a case-by-case basis. The President has often issued special decrees granting taxation exemptions and other privileges to specific investors. However, since adopting a new edition of the Tax Code in 2004, such practice has been significantly reduced.

Foreign tax credit

Foreign tax credits are available to tax residents of Turkmenistan based on the provisions of the respective tax treaties. The tax credited shall not exceed the tax liability computed in accordance with Turkmenistan regulations.

Withholding taxes

Turkmenistan-source income generated by a foreign legal entity that has no PE in Turkmenistan generally is subject to WHT at the source of payment at 15% (6% for income from the lease of sea vessels and aircraft).

Relief may be available for WHT if a foreign entity is a resident of a country that has a valid DTT with Turkmenistan and if the foreign entity complies with certain administrative procedures.

Currently, Turkmenistan has only a few DTTs in force. Turkmenistan is a successor to a number of DTTs concluded by the USSR, while some treaties were concluded and ratified by the government of Turkmenistan. The countries listed below are considered to have valid tax treaties with Turkmenistan:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Armenia	5/15 (1)	10	10
Austria	15	10	10
Bahrain	10	0/10 (6)	10

Notes

- 5% where the beneficial owner holds at least 25% of the authorised capital of the company paying the dividends.
- 0% where one of the following conditions is met: (i) interest paid to the government of the other contracting state or interest paid in respect of a loan guaranteed by that other state or by an institution authorised by that state; (ii) interest from commercial debt-claims relating to instalment payments for supplying merchandise, goods, or services; (iii) interest on loans, not represented by bearer instruments, from banks; or (iv) interest on cash deposits, not represented by bearer instruments, with banks, including public credit institutions.
- 5% where the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
- Interest arising in a contracting state and paid to, or on loans guaranteed or insured by, the government or a local authority thereof, the Central Bank, or any financial institution wholly owned by the government of the other contracting state, shall be exempt from tax in the first-mentioned state.
- Interest on bank credits and loans and interest on commercial credits arising from sources located in one of the states and received by a resident of the other state shall not be taxable in the first state.
- 0% where interest is paid by the government, Central Bank, or National Bank of the contracting states.
- 0% where the loan has been guaranteed by the state or by an organisation authorised by it for that purpose.
- 0% where interest is paid by the government, a political sub-division, or a local authority of the other contracting state.
- Interest paid by the government, ministries, other governmental institutions, municipalities, Central Bank, and other banks wholly owned by the government of the other contracting state shall be exempt from tax.
- 0% where the recipients of the interest are governments of contracting states or any governmental body, as well as the Central Banks ('the bank of banks' of a contracting state), a state export or import credit underwriting organisation, or another similar organisation to which, in accordance with the law of a contracting state, the relevant rights were delegated.

Tax administration

Taxable period

The taxable period comprises a calendar year (i.e. 1 January to 31 December).

Tax returns

Reports are generally filed quarterly within the month following the reporting quarter. Annual income tax declaration and financial statements of branches of foreign legal entities are due by 20 March of the year following the reporting one.

Tax agents must file WHT reports not later than the 20th day of the month following the one when the respective tax liability occurred.

Payment of tax

Advance CIT payments under the standard tax regime are made before the 13th and 28th days of each month (unless agreed otherwise with tax authorities). Final payments upon results of the first quarter, first half-year, nine months, and tax year are made within five days from the reporting deadlines.

Under the petroleum law tax regime, CIT is reported and paid once annually based on dates indicated in the respective Product Share Agreement (PSA).

Tax audit process

Tax audits may be of two types: ‘cameral’ (preliminary) and ‘documentary’.

Cameral tax audits are performed at the location of tax authorities within 30 days after submission of tax returns and financial statements with the aim of monitoring their accuracy and completeness. The tax authorities may request the taxpayer to amend the tax return(s) if they have revealed mistakes or inconsistencies therein.

Documentary tax audits are conducted based on a tax authorities’ order aimed at verification of the tax returns submitted by the taxpayer. During such audits, the tax authorities review the accounting records, copies of tax returns, and source documents as required. The tax authorities are to notify the taxpayer about the upcoming tax audits at least five days prior to the start of the audit. However, in cases when there is sufficient evidence of tax evasion, the tax authorities may initiate the tax audit without prior notice.

Scheduled documentary tax audits are usually carried out once in three years. There can also be un-scheduled tax audits (e.g. in case of liquidation of the enterprise) and counter tax audits (to review transactions with the enterprise’s supplier/customer, which is under the scheduled tax audit).

In cases when tax violations are revealed during tax audits, taxpayers should make necessary corrections to address those and pay respective taxes/obligatory payments and late payment interest within five days after the tax authorities’ decision is released. If accomplished within the deadline, the tax authorities’ decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from the (i) taxpayer’s bank accounts (by issuing a tax liability claim without acceptance), (ii) taxpayer’s debtors (by issuing a tax liability claim on the debts payable to taxpayer), or (iii) taxpayer’s property (by issuing a tax liability claim upon decision of the court).

Statute of limitations

The statute of limitations for tax purposes is five years.

Topics of focus for tax authorities

The tax administration environment in Turkmenistan is form-driven; consequently, the quality of documentation supporting the deductions should be of particular importance.

Cross-border transactions are normally scrutinised by tax authorities during statutory tax audits in view of WHT and reverse-charge VAT implications.

Another area of focus for tax authorities is the deductions taken by Turkmenistan branches of foreign legal entities in respect of expenses incurred by their head offices abroad.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

An intergovernmental agreement (IGA) with the United States is treated as ‘in effect’ by the US Treasury as of 3 June 2014. The United States and Turkmenistan have reached an agreement in substance, and Turkmenistan has consented to disclose this status. In

Turkmenistan

accordance with this status, the text of such IGA has not been released, and financial institutions in Turkmenistan are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that Turkmenistan continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

Effective 1 July 2016, the following amendments were made to the Income Tax Act (ITA), Value-added Tax (VAT) Act, Excise Duty Act, Finance Act, and Stamp Duty Act.

Income tax

The Act introduces an amendment to Section 38 of the ITA to clarify that the ability to carry forward tax losses is subject to change in control provisions. Generally, tax losses can be carried forward indefinitely. However, for a company, this is restricted where there has been a change in control (i.e. a 50% or greater change in the underlying ownership) unless for a period of two years thereafter the company continues to carry on the same business and does not engage in a new business or investment with the primary purpose of utilising the losses against the resultant income. The amendment to Section 38 clarifies that the change in control restriction takes precedence over the general loss carryforward provisions. This has generally been the approach applied in practice, so the amendment represents a confirmation rather than a significant change.

Rent derived by a non-resident from a source in Uganda was previously included on the list of payments that are subject to withholding tax (WHT), but the Act omitted to impose a specific tax rate under Section 83 of the ITA. The amendment of Section 83 now remedies this omission by including rent amongst the payments to non-residents that are subject to the tax rate of 15%. This means that, for example, a tenant paying rent to a non-resident landlord in respect of land and buildings in Uganda is now required to deduct WHT on the gross payments at a rate of 15%.

The Act amends the previous Section 88(5) of the ITA to introduce the principle of beneficial ownership and economic substance. Previously, the limitation of benefit was based on the concept of underlying ownership. Following the amendment, the benefit of the exemption or reduction of tax shall not be available to any person who:

- receives the income in a capacity that is other than that of a beneficial owner, within the meaning accorded to that term by the relevant international agreement, and who does not have full and unrestricted ability to enjoy that income and to determine its future uses, and
- does not possess economic substance in the country of residence.

This does not apply to public listed companies.

Uganda

A specific WHT requirement is introduced in relation to payments to non-residents who derive income from sources in Uganda from international carriage and telecommunications services. The ITA imposes tax at the rate of 2% on every non-resident person carrying on the business of ship operator, charterer, or air transport operator who derives income from the carriage of passengers or cargo that is embarked in Uganda, and on road transport operators who derive income from the carriage of cargo or mail embarked in Uganda. However, this does not apply to payments for international air transport because the income of air transport operators is exempt from tax. Where the tax of 2% was already a requirement, the mode of collection is now confirmed to be in the form of withholding.

The Act also imposes a specific withholding obligation in respect of tax at the rate of 5% on a non-resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite in respect of income from the transmission of messages by an apparatus located in Uganda or the provision of direct-to-home pay television or Internet connectivity services to Ugandan subscribers. In each case, the tax is applied on the gross income and is a final tax.

The International Centre for Research in Agroforestry (ICRAF) and the International Potato Centre have been included as listed institutions in the First Schedule to the ITA. This means that the income of these entities is exempt from income tax.

The Act removes clinics as a separate category of business subject to specific rates of presumptive tax on turnover below 50 million Ugandan shillings (UGX). Presumably, the purpose of the amendment is to ensure consistency with Section 4(7), which prevents the use of the presumptive tax system by persons in the business of providing medical or dental services. There is also a small adjustment to the presumptive tax amount payable by drug shops with a turnover between UGX 10 million and 20 million.

Furthermore, the Act makes the following changes to Part IXA of the ITA in relation to mining and petroleum operations.

Meaning of licensee

The definition of 'licensee' for the purposes of petroleum and mining operations is re-worded to cover persons undertaking upstream and midstream petroleum activities by reference to the correct respective piece of legislation.

Allowable deductions for petroleum exploration

For petroleum exploration licences issued after 31 December 2015, a new provision now limits the deduction of expenditure against petroleum operations to the extent such limitation is specified in the petroleum sharing agreement (PSA). This enables the government to agree and enforce special deduction terms in each individual PSA.

Surplus from decommissioning fund returned to a licensee

The Act repeals Section 89GD(4)(b), which provided that a surplus in a decommissioning fund that is returned to the licensee upon completion of decommissioning is included in the licensee's gross income. This provision is redundant as such returns are already captured as income under sub paragraph (a).

Petroleum exploration information

The definition of 'petroleum exploration information' is repealed. This definition is redundant as it is not applied anywhere else in Part IXA of the Act.

Value-added tax (VAT)

Persons undertaking midstream operations in the petroleum sector (such as refining, conversion, transmission, and storage) are entitled to apply for voluntary VAT registration regardless of whether they are making taxable supplies or not.

LED lamps and bulbs, which are exempt from import duty in accordance with the Fifth Schedule of the EAC Customs Management Act, have been specifically excluded from the normal parallel exemption for import VAT. This means that the import of LED lamps and bulbs is subject to VAT at the standard rate of 18%.

The Act introduces a special treatment for VAT on taxable supplies made by a supplier to a contractor executing an aid-funded project, whereby:

- The VAT on supply is deemed to have been paid by the contractor to the supplier.
- The supplier and contractor do not account for the deemed VAT payment as output tax and input tax, respectively.

The term ‘aid-funded project’ is not defined, but the same term is used in determining exemption from import duty under the East African Community (EAC) Customs Management Act. To qualify for the special VAT treatment, the supply must be used by the contractor solely and exclusively for the aid-funded project.

A person providing business process outsourcing (BPO) services is now entitled to claim input tax credit for VAT incurred on imported services. The Act does not define the term BPO, but it is generally taken to mean the contracting out of a specific business process to a third party.

The Act extended the current exemption from VAT on unprocessed agricultural products to unprocessed wheat grain. Since 2013, the supply of unprocessed wheat grain was subject to VAT at 18%, as the VAT exemption did not apply to unprocessed wheat grain.

The Act removed the supply of solar power from the list of exempt supplies in the Second Schedule to the VAT Act. This means that the supply of solar-generated power is now subject to VAT at the standard rate of 18%, in the same way as other sources of electricity (such as hydro and thermal). This will enable suppliers of solar power to register for VAT purposes and claim the input VAT on their purchases.

The Act extended the current VAT exemption for supplies to the contractors and subcontractors of hydro power projects to also encompass solar power, geothermal power, and biogas and wind energy projects. This means that VAT does not apply to the supply of construction and other pre-operation goods and services procured by such projects up to the point that they commence commercial production. Given that the VAT Act currently does not permit such projects to be VAT registered until the start of production, this will prevent the pre-operation VAT from becoming an additional cost.

In addition, the Act added hullers, oil presses, grain dryers, manure spreaders, fertiliser distributors, transplanters, juice presses and crushers, seed and grain shellers, silage chopper machines, colour sorters for coffee, and coffee roasters to the list of agricultural items exempt from VAT.

Uganda

Excise duty

Effective 1 July 2016, a manufacturer can claim a refund of excise duty that was previously paid on excisable goods that are converted into approved healthcare or medical products.

Approved healthcare or medical products are products that have been approved by the Minister responsible for finance in consultation with the Minister responsible for health, in accordance with specific regulations. This may include items such as un-denatured spirits converted for medical use or furniture converted for specialised use in a hospital.

Further, the table below shows goods where excise duty was amended:

Goods	Excise duty
Soft cap cigarettes	UGX 50,000 per 1,000 sticks
Hinge lid cigarettes	UGX 80,000 per 1,000 sticks
Cigars, cheroots, and cigarillos containing tobacco	200%
Smoking tobacco, whether or not containing tobacco constituents in any portion	200%
Homogenised or reconstituted tobacco	200%
Other cigarettes	200%
Other spirits	80%
Motor spirit (gasoline)	UGX 1,100 per litre
Gas oil	UGX 780 per litre
Motor vehicle lubricants	10%
Cane or beet sugar and chemically pure sucrose in solid form	UGX 100 per kg
Sugar confectioneries (chewing gum, sweets, and chocolates)	20%
Creams used by persons with albinism in the treatment of their skin	0%
Specialised hospital furniture	0%
Other furniture	10%

Stamp duty

The Stamps Amendment Act has increased the fixed rate of stamp duty to UGX 10,000 for all instruments that were previously chargeable with stamp duty of UGX 5,000. This means that all transaction costs on instruments that were subject to stamp duty of UGX 5,000 have now been adjusted upwards to UGX 10,000 effective 1 July 2016.

Stamp duty that is applicable on an exchange of property has been increased from 1% to 2% of the total value. This provision applies to exchange of property such as land, buildings, shares, etc.

Similarly, stamp duty on a transfer of property increased from 1% to 1.5% of the total value of the property. This means that any property transfers concluded on 1 July 2016 and after will be subject to the stamp duty of 1.5% on the value of the property that is being transferred. This marks a significant increase from 1%, which has been in place for many years.

Finance (Amendment) Act

The Finance (Amendment) Act imposes import duty on lubricants, un-denatured alcohol, steel, steel products, electronics (including fridges, washing machines, radios, DVD players, and television sets), paper, and paper products diapers.

The Finance (Amendment) Act also waived all tax arrears owed by savings and credit co-operative organisations (SACCOs) as of 31 December 2015. SACCOs that engage in investment of membership funds derive investment income that is subject to income tax, and they also have obligations in respect of other taxes, such as withholding and employment taxes. However, in practice, the level of tax compliance by SACCOs has varied and some have accrued significant tax arrears. This waiver offers an opportunity for SACCOs to begin complying with their tax obligations from 1 July 2016 on a clean slate.

There are over 200 registered SACCOs in Uganda, and their compliance is expected to make a positive contribution to government revenue.

Further, the Finance (Amendment) Act repealed the fees under the Mining Act 2003 to the extent prescribed under the Finance Acts of 2013 and 2014. In line with this amendment, the Ministry of Justice and Constitutional Affairs issued the Mining (Amendment) Regulations, 2016 to give effect to the amendment to the Finance Act and to introduce new fees under the Mining Act.

The Tax Procedures Code Act

The Tax Procedures Code Act, which was published on 19 October 2014, became effective on 1 July 2016. The Act regulates the procedures for the administration of specified tax laws in Uganda. The main purpose of the Act is to:

- harmonise and consolidate the tax procedure under existing tax laws, and
- provide for related matters.

Amendment Bills for the Financial Year 2017/18

The Tax Amendment Bills for the Financial Year 2017/18 were presented by the Minister of Finance to Parliament. Some of the proposed changes in the tax laws are summarised below. These changes, if passed into law, will be effective 1 July 2017.

Income tax

The Income Tax Act (Amendment) Bill 2017 proposes to:

- Include a body established by law for the purpose of regulating the conduct of professionals on the list of exempt organisations and therefore exempt their income from income tax. This includes bodies like Uganda Law Society, Institute of Certified Public Accountants, etc.
- Give power to the Minister of Finance to prescribe estimates of rent based on the rating of the rental property in a specific location. The proposed amendment is to be applied to persons who fail to file a return of rental income or whose return is misleading on the face of it and has been contested by the Commissioner.
- Exempt the income of Bujagali Hydro Power Project from tax up to 30 June 2033.
- Re-introduce initial allowance deduction at 50% of the cost base of plant and machinery wholly used in the production of income included in gross income. The initial allowance deduction is applicable to plant and property placed into service for the first time during a year of income outside a radius of 50 kilometres from Kampala.
- Re-introduce initial allowance on industrial buildings at 20% of the cost base of a new industrial building or extension of an industrial building on which construction was commenced on or after 1 July 2000 and placed into service for the first time during the year of income. Previously, the initial allowance provisions were repealed in July 2014.

Uganda

- Re-introduce the WHT at 15% on gross payments for winnings of sports betting or pool betting, which had been repealed with effect from 1 July 2016.
- Require for providers of passenger transport service or freight transport service where the vehicle used has a loading capacity of at least 2 tonnes, to pay advance tax at UGX 50,000 per tonne per year for goods vehicles and UGX 20,000 per seat per year for passenger service vehicles.
- Require financial institutions, micro-finance institutions, forex exchange bureaus, and money transferring institutions to report to the Commissioner any transaction exceeding UGX 20 million not later than 15 days after the end of the month in which the transaction was undertaken or as may be required by the Commissioner.
- Allow for waiver of interest on unpaid tax that is in excess of the aggregate of the principal tax and penal tax.
- Amend the formula for determining the value of a benefit that accrues to employees who are provided with a company motor vehicle for private use by taking into account depreciation of the vehicle.
- Limit deduction of costs by petroleum companies to cost oil rather than gross income. Cost oil is the licensee's share of the total oil production that is set aside for recovery of their costs.

VAT

The VAT (Amendment) Bill 2017 proposes to:

- Extend the special VAT treatment for aid-funded projects to include taxable supplies made to a government ministry, department, or agency by a contractor executing an aid-funded project where the supply is for use solely or exclusively for the aid-funded project. Previously, the special treatment only applied to supplies made to contractors.
- Disqualify a claim for input VAT in respect of taxable supplies amounting to UGX 100 million (excluding VAT) or more that are paid or payable in cash.
- Reinstate within the principal VAT Act the due dates for the payment of VAT as follows:
 - In the case of a taxable supply by a taxable person in respect of a tax period, on the date the return for the period is lodged.
 - In the case of an assessment, on the date specified in the notice of assessment.
 - In any other case, on the date the taxable transaction occurs.
- Reinstate provisions for the payment and recovery of tax payable or due under an assessment where an objection to or notice of appeal has been lodged against an assessment.
- Cap the interest payable on unpaid tax to a maximum of the aggregate of the principal tax and penal tax.
- Reinstate the VAT at 18% on the supply of wheat grain.
- Provide for VAT exemption of certain goods and services, including the supply of animal feeds and premixes, the supply of crop extension services, the supply of irrigation works, sprinklers, and ready to use drip lines, the supply of deep cycle batteries and lanterns, the supply of tourist arrangement services, access to tourist sites, tour guide, and game driving services, and the supply of menstrual cups.

Excise duty

The Excise Duty (Amendment) Bill 2017 proposes to:

- Increase excise duty on soft cup cigarettes from UGX 50,000 to UGX 55,000 per 1,000 sticks and on furniture imported or assembled in Uganda from foreign materials (excluding specialised hospital furniture) from 10% to 20%.

- Introduce a new specific rate regime for certain beverages where excise duty will be calculated as the higher of a specific rate (i.e. based on volume) and an *ad valorem* rate (based on value). These items are currently subject to an *ad valorem* rate. The proposed changes are as follows:
 - A specific rate of excise duty of UGX 1,860 per litre on malt beer as an alternative to the *ad valorem* rate of 60%, whichever is higher.
 - A specific rate of excise duty of UGX 700 per litre on beer whose local raw material content, excluding water, is at least 75% by weight of its constituent as an alternative to the *ad valorem* rate of 30%, whichever is higher.
 - A specific rate of excise duty of UGX 950 per litre on beer produced from barley grown and malted in Uganda as an alternative to the *ad valorem* rate of 30%, whichever is higher.
 - A specific rate of excise duty of UGX 5,000 per litre on spirits made from locally produced raw materials as an alternative to the *ad valorem* rate of 60%, whichever is higher.
 - A specific rate of excise duty on non-alcoholic beverages (excluding fruit or vegetable juices) of UGX 240 per litre as an alternative to the *ad valorem* rate of 13%, whichever is higher.
- Introduce excise duty on fruit juice and vegetable juice, except juice made from at least 30% of pulp from fruit and vegetables grown in Uganda at 13% or UGX 300 per litre, whichever is higher.
- Revise the excise duty rate on un-denatured spirits from UGX 1,000 per litre or 100%, whichever is higher, to UGX 2,500 per litre or 100%, whichever is higher.
- Revise the *ad valorem* rate and introduce an alternative specific rate of excise duty on other wines from 80% to 60% or UGX 6,000 per litre, whichever is higher.
- Reduce excise duty on sugar confectionaries (chewing gum, sweets, and chocolates) from 20% to 0% and furniture manufactured in Uganda using local materials, excluding furniture which is assembled in Uganda, from 10% to 0%.

Tax administration

The Tax Procedure Code (Amendment) Bill 2017 proposes to:

- Clarify the due dates for filing of provisional returns as follows:
 - Individuals are required to file four provisional returns on or before the last day of the third, sixth, ninth, and 12th months of the year in respect of their tax liability for the respective periods.
 - Taxpayers other than individuals are required to file two provisional returns on or before the last day of the sixth and 12th months in respect of their tax liability for the respective periods.
- Amend the due date of filing provisional returns by persons licensed under the Lotteries and Gaming Act as follows:
 - A weekly return by Wednesday of the following week.
 - A monthly return by the 15th day of the following month.
- Introduce a requirement for persons dealing in locally manufactured and imported goods to affix on the goods a tax stamp to be prescribed by the Minister of Finance with a penalty for failure to affix a tax stamp.
- Clarify the hierarchy of payment of taxes where a taxpayer is liable for penal tax and interest in relation to a tax liability and the taxpayer makes a payment less than the total amount of tax, penal tax, and interest. The amount paid will be used to first offset the principal tax, then the penal tax, and the balance is applied to the interest due.

Uganda

- Introduce a penal tax of UGX 50 million for failure to provide records requested by the Commissioner in respect of transfer pricing and UGX 20 million in respect of other information (other than transfer pricing) within 30 days after the request.

Lotteries and gaming

The Lotteries and Gaming (Amendment) Bill 2017 proposes to revise the rate of tax on operators of casinos and gaming and betting activities from 35% to 20%.

Taxes on corporate income

A resident company is taxed on its income from all geographical sources. A non-resident company is only subject to Uganda income tax on income derived from sources in Uganda.

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of resident companies whose turnover does not exceed UGX 150 million, to whom presumptive tax applies (*see below*).

Chargeable income is gross income for the year less the total deductions allowed under the ITA.

Resident companies with turnover of less than UGX 150 million

A rate of 1.5% of turnover is used to determine income tax payable by a resident company whose turnover is between UGX 50 million and UGX 150 million, subject to certain thresholds.

However, on application to the Commissioner, a resident company with a turnover of less than UGX 150 million may be taxed at 30%.

This category excludes professionals, public entertainment services, public utility services, or construction services.

Local income taxes

There are no other income taxes in Uganda.

Corporate residence

A company is resident in Uganda for a year of income if it meets one of the following criteria:

- Is incorporated or formed under the laws of Uganda.
- Has its management and control exercised in Uganda at any time during the year of income.
- Undertakes the majority of its operations in Uganda during a year of income.

Permanent establishment (PE)

A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such.

- A place where a person has, is using, or is installing substantial equipment or substantial machinery.
- A place where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.
- The furnishing of services, including consultancy services, by an enterprise of a contracting state through employees or other personnel engaged in the other contracting state, provided that such activities continue for the same or a connected project for a period or periods aggregating more than four months within any 12-month period.

Other taxes

Value-added tax (VAT)

VAT is governed by the VAT Act and administered by the Uganda Revenue Authority (URA). VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services, as well as exports outside of Uganda, attract a zero rate of tax.

Some supplies are exempt from VAT, the main categories being government subsidies, some unprocessed foodstuffs, financial services, health and life insurance, re-insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, and petroleum products subject to excise duty.

Zero rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while those incurred in making an exempt supply cannot be recovered.

The zero-rated supplies include the supply of goods and services exported from Uganda; the supply of drugs and medicines; the supply of seeds, fertilisers, pesticides and hoes; the supply of leased aircraft, aircraft engines, spare engines, spare parts for aircraft, and aircraft maintenance equipment.

The annual threshold for VAT registration is UGX 150 million. Persons who make supplies that are VATable and whose turnover exceeds UGX 150 million are required to register for VAT with the URA. VAT-registered persons are required to:

- Charge VAT whenever they make supplies that are VATable.
- File monthly returns before the 15th day of the month following the reporting month.

Credit for input tax

A person making exempt, zero-rated, and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

Imported services

The VAT Act defines a supply of service to mean any supply that is not a supply of goods or money, including the performance of services for another person.

Uganda

There is no definition of imported services in the local legislation. However, the tax authorities generally consider an imported service to be one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to Regulation 14 of the VAT Regulations 1996, any person who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service to account for the VAT at the time when performance of the service is completed, when payment for the service is made, or when the invoice is received from the foreign supplier, whichever is earliest.

The tax on such imported services is computed at the rate of 18% of the cost of the service. VAT-registered companies are no longer required to prepare self-billed tax invoices, thus they are unable to claim the VAT paid as input tax; however, a contractor or licensee in the petroleum and mining industry is able to claim an input tax credit for the reverse charge VAT paid on imported services. Also, persons provided BPO services are allowed to claim credit for input tax for VAT paid on imported services. Further, if the importer of the services is not registered for VAT, the importer is required to calculate and pay the VAT to the URA.

Failure to pay VAT on non-exempt imported services is tantamount to lack of compliance with the law, and a penalty of 2% per month, compounded, may apply.

VAT representative for non-resident persons

The Tax Procedure Code Act now provides for a role of tax representative for a non-resident person being the individual controlling the person's affairs in Uganda, including a manager of a business of that person or any representative appointed in Uganda.

The VAT Act previously provided for the appointment of a VAT representative by a non-resident person who may have been required by the Commissioner to register for VAT in Uganda but had no fixed place of business. It also provided that if the non-resident person did not appoint the VAT representative within 30 days after being required to register for VAT, the Commissioner could appoint the representative for the non-resident person.

A tax representative under the Tax Procedure Code Act is responsible for performing any duty obligation imposed by a tax law on the taxpayer, including submission of tax returns and payment of tax.

Customs duties

Many goods imported into Uganda are subject to customs duties. However, exemptions are available to various classes of plant and machinery imported into Uganda. The rates of duty are provided by the East African Community common external tariff code. Certain products imported from the East African Community and the Common Market for Eastern and Southern Africa (COMESA) region enjoy special custom duty rates. Imported items are classified according to the nomenclature established under the international convention on the harmonised commodity description and coding system. Duties range from 0% to 60%, depending on the item imported.

Excise duties

Excise duties are imposed on goods considered luxuriant. Examples include locally manufactured soft drinks, cigarettes, alcoholic drinks, and spirits. A schedule of some of the rates is provided below:

Goods	Excise duty
Soft cap cigarettes	UGX 50,000 per 1,000 sticks
Hinge lid cigarettes	UGX 80,000 per 1,000 sticks
Cigars, cheroots, and cigarillos containing tobacco	200%
Smoking tobacco whether or not containing tobacco substitutes in any proportion	200%
Homogenised or reconstituted tobacco or other tobacco	200%
Beer made from malt	60%
Beer made from local raw material	30%
Beer produced from barley grown and malted in Uganda	30%
Spirits produced from local raw materials	60%
Other spirits, except undenatured spirits, which are subject to duty up to 100%	80%
Wine produced from local raw materials	20%
Other wine	80%
Air time applicable to mobile cellular devices	12%
Air time applicable to landlines and public pay phones	5%
Fuel and oils	Between UGX 200 and UGX 1,000 per litre, depending on the type of fuel/oil. Nil for gas oil and thermal power generation to the national grid.
Motor spirit (gasoline)	UGX 1,100 per litre
Gas oil (automotive, light, amber for high speed engine)	UGX 780 per litre
Motor vehicle lubricants	10%
Chewing gum, sweets, and chocolates	20%
Other furniture	10%
Specialised hospital furniture	0%

Other goods and services	Excise duty
Banking fees	10% of the fees charged
Money transfers (other than transfers by banks)	10% of the fees charged
Cosmetics and perfumes (except creams used by persons with albinism in the treatment of their skin, which attract no excise duty)	10%
Incoming international calls (other than calls from the Republic of Kenya, the Republic of Rwanda, and the Republic of South Sudan)	USD* 0.09 per minute
Cement	UGX 500 per 50 kg
Cane or beet sugar and chemically pure sucrose in solid form	UGX 100 per kg

* United States dollars

Property taxes

Property taxes are administered by the local authorities annually. They are based on the value of the property as assessed by the local authorities.

Stamp duties

Stamp duty is charged on a number of transactions at varying rates. Stamp duty is charged at 1% of the total value for a number of instruments, including hire purchase agreements, composition deeds, leases, conveyance, transfers, share warrants, gifts, and agreements relating to deposit of title deeds.

Stamp duty of 0.5% is incurred on formation of a company, capital-raising activities (e.g. increase of share capital), debentures, equitable mortgages, and mortgage deeds.

Uganda

Stamp duty of 1.5% applies on all transfers, including transfer of shares and property.

Stamp duty of 2% applies on exchange of property.

No stamp duty is charged on the increase of share capital where it is in fulfilment of a condition precedent for acquiring loan funds for a development project or where it is made on becoming public through the stock exchange.

Stamp duty of UGX 10,000 is also charged in a number of various other instruments.

Environmental levies

Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item, depending on the nature of the item.

Payroll taxes

The employer is required to withhold tax on employment income from their employees and pay it to the tax authorities. The tax is normally borne by the employee. Where the employer fails to withhold tax as required, the employer becomes liable for the taxes but may recover the same from the employees.

Social security contributions

An employer is obligated to make contributions to the national social security fund for each employee, amounting to 10% of their gross pay.

Branch income

Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of allowable expenses.

In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the $A + (B - C) - D$ approach. Where A is the net assets at the beginning of the year, B is the net profit for the year, C is the tax charge for the year, and D is the net assets at the end of the year.

Income determination

In arriving at chargeable income (taxable income), one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed.

Inventory valuation

A taxpayer is allowed a deduction for the cost of trading stock disposed of during the year, which is determined by adding to the opening value of the trading stock the cost of trading stock acquired during the year and subtracting the closing value of stock. The opening value of the stock is the closing value for the previous year or, where the taxpayer commenced business during the year, the market value at the time of

commencement of the business of the trading stock acquired prior to commencement. The closing stock valuation method is the lower of cost or market value. Trading stock is allowed to be valued using either the absorption costing or prime cost method. The stock valuation method chosen may not be changed, except with written permission of the Commissioner.

Capital gains

Capital gains are included in and taxed together with the business income at a rate of 30%. There is no separate capital gains tax. Capital gains arise on disposal of non-depreciable business assets as well as sale of shares.

Dividend income

The general rule is that dividend income is taxable as part of business income at a rate of 30%. Dividend income is also subject to WHT at the rate of 15%. The WHT paid in respect of the dividend income is creditable where the income is subject to the corporation tax rate of 30%. The WHT rate for dividend payments to resident persons is 15%. For dividends paid out by companies listed on the stock exchange to individuals, the rate is 10%.

Dividend income is exempt from tax if the recipient company directly or indirectly controls the paying company through ownership of 25% or more of the voting power of the paying company.

Interest income

The general rule is that interest income is taxable as part of business income at a rate of 30%. Interest income is also subject to WHT at the rate of 15%. The WHT paid in respect of the interest income is creditable where the income is subject to the corporation tax rate of 30%. Also, interest income earned with respect to government securities is subject to tax at 20% as a final tax.

Royalty income

The general rule is that royalty income is taxable as part of business income at a rate of 30%. Royalty income is also subject to WHT at the rate of 15%. The WHT paid in respect of the royalty income is creditable where the income is subject to the corporation tax rate of 30%.

Rental income

Companies are required to disclose their rental income separately from other business income. Taxable rental income is the net income after allowing for any expenditures and losses in respect of the rental income derived. The rate of tax applicable is 30%.

Foreign income

Foreign income is taxable on resident recipients, and tax suffered in the country where it is sourced (if any) is creditable, subject to the provisions of any double taxation agreements (DTAs). This credit is limited to the amount of Ugandan tax payable on that income.

There are no provisions for deferring tax on income earned abroad by tax residents.

Deductions

The ITA sets out the following conditions for deductibility of an expense:

- There must be an expenditure or loss.
- The expenditure or loss must be incurred by a person during the year of income.
- The expenditure must be incurred in the production of income included in gross income.

A taxpayer who is accounting for tax purposes on an accrual basis derives income when it is receivable by the taxpayer and incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

- with respect to the acquisition of services or property, at the time the services or property are provided
- with respect to the use of property, at the time the property is used, or
- in any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

Contingent liabilities are not tax-deductible in Uganda.

Depreciation

A deduction is allowed for the depreciation of the person's depreciable assets, other than minor assets, in accordance with the appropriate applicable rates. The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing-balance basis. Depreciable assets are classified in four classes as follows:

Class	Assets included	Rate of tax depreciation (%)
1	Computers and data handling equipment.	40
2	Automobiles, buses, and mini-buses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tonnes; construction and earth moving equipment (cost of motor vehicle sealed at approximately UGX 60 million for non-commercial vehicles).	35
3	Buses with a seating capacity of 30 or more passengers; goods vehicles designed to carry or pull loads of 7 tonnes or more; specialised trucks, tractors; trailer-mounted containers; plant and machinery used in farming, manufacturing, or mining operations.	30
4	Rail cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft; specialised public utility plant, equipment, and machinery; office furniture, fixtures, and equipment; and any depreciable asset not included in another class.	20

Industrial building allowance

A company is eligible for an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% *per annum* on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

An industrial building is defined to mean any building that is wholly or partly used, or held ready for use, by a person in manufacturing operations, research and development into improved or new methods of manufacture, mining operations, an approved hotel business, an approved hospital, or approved commercial buildings.

Goodwill

An intangible asset is amortisable over its useful life. To the extent that the useful life of the underlying asset that gives rise to goodwill can be determined, then the goodwill maybe deductible over the useful life of the asset.

Start-up expenses

A company setting up business for the first time or engaged in the initial public offer at the stock market will be entitled to a tax deduction for all its start-up costs that are of capital nature that would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years on a straight-line basis at the rate of 25% *per annum*.

Interest expenses

Interest is deductible if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company's gross income. Interest arising from non-trade-related debt obligation is not deductible. Deferred interest is deductible when paid.

Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of one and a half times the company's equity will not be allowed (*see Thin capitalisation in the Group taxation section for more information*).

Bad debt

A deduction is allowed for bad debt only if:

- the amount was included in the person's income in the year of income
- it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income, or
- the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry, or similar operations.

For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken and that the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses that subsequently materialise, has been made.

Charitable contributions

Charitable donations are deductible if made to amateur sporting associations; religious, charitable, or educational institutions of public character; trade unions; and other similar associations that have been issued with a written ruling by the Commissioner currently in force stating that it is an exempt organisation. The donations should not exceed 5% of the person's chargeable income.

Uganda

Meals, refreshments, and entertainment

Expenses for meals, refreshments, and entertainment are deductible only where the value is included in the employment income of the employees or is excluded from employment income owing to the fact that it is provided on equal terms to all workers.

Pension expenses

Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand, do not get a deduction for the contributions they make to pension funds.

Payment for directors

Directors are treated as employees, so expenses incurred in respect of directors are deductible expenses.

Bribes, kickbacks, illegal payments

Non-business expenses are not tax-deductible, including those of a private nature.

Fines and penalties

No deduction is allowed for any fine or similar penalty paid to a government or its subdivision for breach of any law.

Taxes

No deduction is allowed for income tax payable in Uganda or in a foreign country.

Other significant items

No deduction is allowed for the following other expenditures:

- Any expenditure or loss of a domestic or private nature.
- Any expenditure or loss of a capital nature.
- Any expenditure or loss recoverable under insurance contract or indemnity.
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person (e.g. National Social Security Fund [NSSF] contributions).
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person.
- Any income appropriated to a reserve fund or capitalised in any way.
- The amount of pension paid to any person.

Net operating losses

A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:

- Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change,:
 - continues to carry on the same business after the change as it carried on before the change and

- does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.
- In cases where losses relate to farming, the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

There is no provision for carryback of losses in Uganda.

Payments to foreign affiliates

Payments to foreign affiliates are deductible as long as they are charged at an arm's length and incurred in the production of income.

Group taxation

There are no specific provisions in the law covering groups, so companies in a group do not get any special treatment for tax purposes in Uganda.

Transfer pricing

The transfer pricing regulations apply to controlled transactions if a person who is a party to the transactions is located in and is subject to tax in Uganda and the other person who is a party to the transaction is located in or outside Uganda.

The URA Practice Note issued on 14 May 2012 gives details on the transfer pricing documentation to be maintained by the taxpayer. These include company details and transaction details, including agreements and the pricing methodology used in determining the arm's-length price.

In addition, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at an arm's-length. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda.

Thin capitalisation

Where a company intends to finance some of its Uganda operations by use of foreign debt, the ITA provides for thin capitalisation rules in Uganda, and the safe harbour debt-to-equity ratio is 1.5:1.

The thin capitalisation rules are provided for in Section 89(1) of the ITA. According to this Section, where a foreign-controlled resident company, other than a financial institution, has a debt-to-equity ratio in excess of 1.5:1 at any time during the year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt that exceeds the 1.5:1 ratio for the period the ratio was exceeded.

These provisions do not apply if, at all times during the year, the amount of the debt does not exceed the arm's-length debt amount. Arm's-length debt amount is defined as the amount of debt that a financial institution that is not related to the company would be prepared to lend to the company having regard to all the circumstances of the company.

Uganda

Controlled foreign companies (CFCs)

Uganda does not have a CFC regime.

Tax credits and incentives

Foreign tax credit

A resident taxpayer is entitled to a foreign tax credit for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The foreign tax credit allowed is subject to the income tax rate (i.e. 30%) in Uganda.

Tax holidays for exporters

A tax holiday of ten years is available to exporters who export at least 80% of their produce of finished goods, subject to certain conditions.

Scientific research expenditure, training expenditure, and mineral exploration expenditure

A 100% allowance is available for scientific research expenditure, training expenditure, and mineral exploration expenditure in the year of expenditure.

Incentives for the importation of plant and machinery

Plant and machinery is exempt from customs duty on importation. Additionally, a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

Employment incentives

A deduction of 2% of income tax payable is granted to any employer who can prove to the URA that at least 5% of their employees on a full-time basis are people with disabilities.

Other incentives

Income derived from agro processing is exempt from income tax, subject to certain conditions.

Withholding taxes

Payments to non-resident persons

According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment, or management charge from sources in Uganda. WHT at a rate 15% therefore applies on gross dividend payments, interest, management fees, and royalty payments in respect of non-treaty countries.

Rent for this purpose means a payment for the use of land and buildings. This means that a tenant paying rent to a non-resident landlord in respect of land and buildings in Uganda is now required to deduct WHT on the gross payments at a rate of 15%.

However, Section 83(5) exempts interest paid by a resident company in respect of debentures that:

- were issued by the company outside Uganda for the purpose of raising a loan outside Uganda
- were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character, and
- the interest is paid outside Uganda.

A 'debenture' is defined in the ITA as any form of debt, including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured. The term 'widely issued' is also specifically defined.

Also, the rate of WHT on interest derived by a non-resident person from government securities is 20%.

Payment of re-insurance premiums to non-resident persons is subject to WHT at a rate of 10%. The requirement to withhold tax does not apply to the African Reinsurance Corporation and PTA Reinsurance Company.

Non-resident air transport, shipping, and some telecommunications services

Non-resident ship operators, charterers, and air transport operators who derive income from carriage of passengers who embark, or cargo or mail that is embarked, in Uganda, as well as road transport operators who derive income from carriage of cargo or mail that is embarked in Uganda, are taxed at the rate of 2%.

A non-resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite communication and derives income through transmission of such messages by apparatus established in Uganda, whether or not such messages originated from Uganda, is taxed on one's gross income at a rate of 5%. Similarly, a non-resident person who derives income from providing direct-to-home pay television services to subscribers in Uganda is taxed on one's gross income at a rate of 5%.

Payments to resident persons

The rate of 15% also generally applies to payments of dividends and interest to resident persons, except in the following circumstances, where different rates apply:

- Dividends paid to a company controlling 25% or more of the voting powers: 0%.
- Dividends paid by companies listed on the Ugandan Securities Exchange to individuals: 10%.
- Interest on government securities: 20%.
- Interest paid by a natural person, paid to a financial institution (other than from government securities), paid by a company to an associated company, and interest that is exempt in the hands of the recipient: 0%.

There is no WHT on royalty payments to resident persons unless the payments are made by a government institution, local authority, company controlled by the government, or a 'designated payer'.

Double taxation agreements (DTAs)

A taxpayer may benefit from the provisions of a DTA that Uganda has with another country.

Uganda

According to Section 88(2) of the ITA, the terms of the international agreement to which Uganda is a party prevails over the provisions of the ITA in case the terms of the international agreement are inconsistent with the provisions of the Act.

According to Section 88(5) of the ITA, where an international agreement provides that income derived from sources in Uganda is exempt from Ugandan tax or the application if the treaty results in a reduction in Uganda tax, the benefit of that exemption or reduction shall not be available to any person who:

- receives the income in a capacity that is other than that of a beneficial owner, within the meaning accorded to that term by the relevant international agreement, and who does not have full and unrestricted ability to enjoy that income and to determine its future uses, and
- does not possess economic substance in the country of residence.

Please find below a table showing the countries with which Uganda has DTAs and the applicable WHT rates on various categories of income.

Recipient	WHT (%)					
	Dividends	Interest	Royalties	Management fees	Taxation of branch profits	Repatriation of branch profits
Denmark	10/15 (1)	10	10	10	30	15
India	10	10	10	10	30	15
Italy	15	15	10	10	30	30
Mauritius	10	10	10	10	30	15
Netherlands	0/5/15 (2)	10	10	NA	30	15
Norway	10/15 (3)	10	10	10	30	15
South Africa	10/15 (4)	10	10	10	30	15
United Kingdom	15	15	15	15	30	15

Note

1. With respect to the Uganda/Denmark DTA, the rates applicable on dividends are:
 - 10% if the beneficiary holds at least 25% of the capital of the company paying the dividends.
 - 15% in all other cases.
2. With respect to the Uganda/Netherlands DTA, the rate applicable on dividends is 15%, except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).

For new investments and expansions of current investment, the rates are:

- 0% if the beneficiary holds at least 50% of the shares in the company paying the dividends.
 - 5% if the beneficiary holds less than 50% of the shares in the company making the payment.
3. With respect to the Uganda/Norway DTA, the rates applicable on dividends are:
 - 10% if the beneficiary is a company that directly holds at least 25% of the capital of the company paying the dividend.
 - 15% in all other cases.
 4. With respect to the Uganda/South Africa DTA, the rates applicable on dividends are:
 - 10% if the beneficiary holds at least 25% of the capital of the company paying the dividends.
 - 15% in all other cases.

Tax administration

Taxable period

A normal period of 12 months is known as a year of income. This spans from 1 July to 30 June. On application, a taxpayer may be allowed to use a substituted year of income, which is a 12-month period other than the normal year of income.

Tax returns

The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the 12th month of the accounting year.

The Self-Assessment Return (SAR) is due by the end of the sixth month after the end of the accounting year.

Electronic filing has been introduced for all tax returns.

Payment of tax

For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment of 50% is due by the end of the sixth month of the accounting period and the second payment is due by the end of the 12th month. The balance is expected to be paid together with the SAR.

Tax audit process

In most cases, audits are initiated by the URA, which notifies the taxpayer of the records they need to prepare before commencement of the audit. The URA then reviews the records. This is normally done at the premises of the taxpayer, where the URA can obtain the necessary clarifications from the bookkeepers.

The audit findings are then communicated to the taxpayer subsequent to whom an assessment is raised. If the taxpayer does not agree with the objection decision, they may appeal to the Tax Appeals Tribunal or to the high court.

Statute of limitations

The Tax Procedures Code Act provides for a five year check of records.

The individual provisions in the ITA and VAT Act were repealed and updated accordingly.

Topics of focus for tax authorities

The focus of the URA keeps shifting but is generally based on the risk analysis of the information availed to them. Currently, the focus is on transfer pricing and the application of reduced tax rates in respect to DTAs.

Significant developments

New tax rules

In December 2016, the Parliament of Ukraine passed laws on improvement of tax legislation. As a result, a number of changes to the corporate income tax (CIT), value-added tax (VAT), and tax administration became effective starting from 1 January 2017. Some changes and new regulations were enforced later in 2017. The most important developments are listed below.

Taxes on corporate income

- A number of new tax differences for CIT base calculation purposes are introduced.
- A special 5% withholding tax (WHT) rate on qualifying Eurobond yield is introduced.
- Real estate tax paid by legal entities is no longer available as a credit against CIT liabilities.
- Until 2021 'tax holidays' are introduced for taxpayers with annual income less than 3 million Ukrainian hryvnias (UAH), provided they meet certain requirements.

Transfer pricing

- Changes in respect of determination of transfer pricing methods took place.
- Specific rules for application of certain transfer pricing methods for particular transactions as well as rules for benchmarking study performance are introduced.
- The list of controlled transactions for transfer pricing purposes and thresholds for recognition of transactions as controlled are changed.
- Deadline for submission of a report on controlled transactions is shifted from 1 May to 1 October of the year following the reporting year.
- Penalties for late submission of the transfer pricing report and/or transfer pricing documentation are introduced.

VAT and excise tax

- VAT refund procedure was improved.
- Mechanism for temporary suspension of VAT invoice registration by the tax authorities is introduced (it becomes fully operational from 1 July 2017).
- Special VAT regime for agricultural producers is cancelled.

Tax administration

- A unified database of individual tax consultations is established.
- An electronic taxpayer's cabinet is to replace the 'single window for filing electronic reporting' within the first half of 2017.

Ukraine

- Procedure of conduction of tax audits was changed (e. g. the State Fiscal Services will be required to release a schedule of planned audits for the following year on its official website; the grounds for conducting an unscheduled documentary audit were expanded).

Other changes

- The mandatory contribution to the Pension Fund on purchase of foreign currency is abolished.
- The National Bank of Ukraine continues removing certain currency control restrictions.

Professional advice is recommended before deciding on the actual impact of any of the tax provisions.

Taxes on corporate income

CIT applies to taxable profits earned by resident entities in Ukraine and abroad and non-residents with a permanent establishment (PE) in Ukraine. Resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Ukrainian-source income.

Ukraine's standard CIT rate is 18%.

WHT, at a rate of 15%, applies to the majority of income payments for non-residents, unless an exemption is given under a double taxation treaty (DTT). Ukraine has 72 effective DTTs in place. *See the Withholding taxes section for more information.*

Special CIT rates for insurance and gambling activities

Insurance activities

In addition to general CIT at the 18% rate, insurance companies also pay special CIT of 0% and 3% on their income. Long-term life insurance premiums, insurance premiums under voluntary pension programmes, and voluntary medical insurance premiums are subject to the 0% rate; the 3% rate applies to all other insurance premiums (excluding reinsurance contributions, premiums, and payments) received by the company. Such amounts of CIT due at 0% or 3% paid from insurance premiums reduce taxable profit of an insurance company, which is subject to the standard 18% rate.

Gambling activities

Organisation of lotteries and operating of gambling machines are subject to a 10% rate; an 18% rate applies to bookmaker and other gambling activities (including casinos). Contrary to CIT for insurance companies, amounts of CIT of 10% or 18% paid from gambling income do not reduce taxable profit of a company engaged in gambling activities (standard 18% rate is applied to the full amount of the taxable profit).

Local income taxes

No CIT is levied at the regional or local level, except simplified (unified) tax (*see the Tax credits and incentives section for a description of simplified [unified] tax*).

Corporate residence

Corporate residence is determined by the place of incorporation.

Permanent establishment (PE)

The Ukrainian definition of a PE generally follows the PE definition from the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, but with stronger agency tests.

In particular, a non-resident's PE is defined as a fixed place of business through which the business activity of a non-resident entity is wholly or partly carried out in Ukraine. A PE includes, among other things, a place of management, affiliate, office, server, etc.

The Tax Code contains the concept of a service PE whereby the provision of services (apart from the provision of personnel), including consultancy services, by a non-resident through its employees or other personnel in Ukraine, shall constitute a Ukrainian PE of this non-resident, provided such activities (within the framework of one project) last more than six months in any 12-month period.

A construction site in Ukraine may also give rise to a taxable presence of a non-resident in Ukraine in the form of a PE if the length of the construction activities exceeds six months.

The Tax Code also provides for the concept of a non-dependent agent, which means, specifically, a Ukrainian agent acting on behalf of more than one non-resident in the ordinary course of its business should not constitute a PE in Ukraine.

Still, there is a list of exclusions from the PE definition. In particular, according to the Tax Code, auxiliary and preparatory services of a non-resident should not result in the creation of a PE. However, in practise, the Ukrainian tax authorities usually interpret the term 'business activity' in a very broad sense, and, without the DTT protection, may consider any type of activity as giving rise to a taxable presence (i.e. a PE) of a foreign entity in Ukraine.

Other taxes

Value-added tax (VAT)

There are three VAT rates: 20%, 7%, and 0%.

The rate of 20% applies to almost all transactions subject to VAT except specific transactions subject to 7% and 0% VAT.

The reduced rate of 7% applies to supply and import of registered medicines and specific medical goods, as well as medicines, medical goods, and medical equipment allowed to be used in clinical trials.

The 0% VAT rate applies to the export of goods. The 0% rate also applies to the supply of international transport services (confirmed by a single international shipping document), toll manufacturing services (if the finished goods are then exported from Ukraine), and certain other services.

Ukraine

Provision of services to a non-resident is not considered to be zero-rated. Such services are subject to 20% VAT or considered to be outside the scope of VAT (effectively exempt with no input VAT recovery), depending on the place of supply as determined by the legislation.

Transactions that are subject to VAT include the following:

- The supply of goods and services when the place of supply is in Ukraine, including when the supply is made free of charge without consideration.
- Transfer of the object of a financial lease to the lessee.
- The importation of goods into Ukraine.
- Exportation of goods.
- International transportation services.

Transactions that are not subject to VAT include the following (among others):

- The issue, sale, and exchange of securities.
- Assignment of claims, transfer of debt.
- The transfer of property from a lessor to a lessee under an operating lease and the return of property upon expiration of the operating lease (other than in the course of import operations).
- Transfer of property right of finance leasing object from one lessor to another.
- Interest/commission element of lease payments under financial lease agreements.
- Provision of financial loans and bank guarantees.
- Insurance and reinsurance services supplied by licensed insurers and services of insurance/reinsurance agents and brokers.
- Payment of royalties.
- Reorganisation of a legal entity (merge, spin-off, accession, division, and change of legal form).
- Transit of cargo and passengers through the Ukrainian territory and services related to such transit.
- Supply and import of goods and services within international technical assistance projects or import of humanitarian aid.

VAT registration

Tax registration as a VAT payer is compulsory if the volume of an entity's taxable transactions exceeds the compulsory registration threshold. The current registration threshold is UAH 1 million for the past 12 consecutive months. An entity qualifying as a taxable entity should register with the tax authorities at the place of its location and obtain a VAT registration number.

Voluntary VAT registration is available prior to achievement of the mentioned threshold. The application for VAT registration may be submitted simultaneously with the application for the state registration of the business entity.

There is no mechanism for a non-resident to register for VAT purposes without a PE in Ukraine. Accordingly, any Ukrainian VAT incurred by a non-resident is non-recoverable.

Electronic VAT administration

A special electronic administration system, which includes VAT accounts for all VAT payers in the State Treasury, is used for settlement of VAT to the budget. Both VAT output and VAT input should be reflected in this system. For these purposes, VAT

accounting documents (VAT invoices) are issued electronically and are subject to mandatory registration by tax authorities.

The aim of this system is to make VAT input of the customers (i.e. VAT payers) guaranteed by payment of VAT liabilities by the suppliers. VAT input on domestic purchases can be recognised by the taxpayer only if the supplier issued a duly registered VAT invoice. In order to register a VAT invoice, the supplier should have sufficient balance in the electronic VAT administration system (e.g. sufficient amount of input VAT). Otherwise, it may be required to transfer cash to the VAT account (i.e. to prepay its VAT liabilities).

Starting from 1 July 2017, a special procedure for temporary suspension of VAT invoice registration by the tax authorities enters into force. This procedure allows the tax authorities to suspend registering VAT invoices that match certain risk criteria. Also starting from this date, registration of VAT invoice is a sufficient condition to recognise input VAT.

VAT recovery and refunds

Generally, VAT incurred by a registered entity on the purchase and/or importation of goods and services used for the purpose of its own business (except for VAT incurred in relation to exempt supply) may be recovered by way of a credit against output VAT. If the VAT credit exceeds VAT output, a VAT refund is available in the form of a cash payment.

VAT refunds should be performed in a chronological order based on sequence of claims reflected in a registry maintained by the tax authorities and published on their official website. Such registry contains claims submitted starting from 1 February 2016.

Older claims (i.e. submitted before 1 February 2016) are included into a separate Temporary Registry of VAT refund claims.

A VAT refund should be provided within 36 calendar days following the deadline for submission of the VAT return unless a documental tax audit has been assigned. In this case, the term for provision of VAT refund is extended for at least 30 days.

VAT returns

VAT returns must be filed by the taxpayer on a monthly basis in electronic form. Monthly tax returns are due within 20 calendar days following the end of the reporting month. The amount of tax payable is assessed on the basis of tax returns and is due within ten calendar days following the deadline for filing the relevant tax returns.

VAT liabilities are paid to the budget through a special VAT account based on the registers submitted to the State Treasury by the tax authorities.

Customs duty

Customs duty is payable by the importer upon import of the goods into Ukraine. Customs duty rates are established by the Customs Tariff. Currently, there are two duty rates: relieved and full rates. Relieved rates of duty apply to goods originating from World Trade Organization (WTO) countries and countries that have granted Ukraine 'most favoured nation' trade status. Full rates of duty apply to the goods originating from all other countries or where the country of origin cannot be determined (is unknown).

Ukraine

Ukraine has concluded free-trade agreements (FTAs) with all countries/members of the European Union (EU), Commonwealth of Independent States (CIS), European Free Trade Association (EFTA) countries, and such countries as Georgia, Macedonia, and Montenegro. These agreements allow many goods to be imported into Ukraine duty-free (or with reduced rates of duty), subject to compliance with preferential rules of origin.

Due to political issues, Russia and Ukraine currently suspended the FTA between each other and introduced an embargo on import of selected goods (mostly on agrarian products and foods).

Russia also introduced some transit restrictions on goods coming from Ukraine.

Ukraine has no export duties except on natural gas, scrap metal, livestock, rawhide, barley, and certain oil seeds.

Excise taxes

Excise tax applies to certain goods imported to or produced in Ukraine. Excisable goods include ethyl alcohol, alcoholic beverages, beer, tobacco and tobacco products, cars, car bodies, motorbikes, electricity, liquefied gas, petrol, diesel fuel, other fuel material, and electric power.

The rates of excise tax can be *ad valorem* (a percentage of the value of the goods), specific (in monetary units per unit of goods), or combined. A significant increase of rates on a majority of excisable goods was introduced in 2017. A special local 5% excise tax applies to retail sales of alcoholic drinks, beer, and tobacco products.

Ukraine has a special electronic administration system for excise tax on fuel. This system is aimed to control income and outcome flows of fuel in the market. The system requires entities to issue and register excise accounting documents (excise invoices) electronically on each operation of fuel sale, its usage for the company's needs, and for manufacturing non-excisable goods.

Tax on real estate other than land plots (real estate tax)

Owners of residential and non-residential property in Ukraine (both individuals and legal entities, including non-residents) are subject to local real estate tax (RET). The tax base is determined based on the size of the living space of a real estate asset.

Some types of property are exempt from RET, for example:

- Industrial buildings (i.e. production buildings, workshops, storehouses of industrial entities).
- Buildings and facilities of agricultural producers, which are intended for use in agricultural activity.
- Non-residential premises that are used by small and medium-sized businesses, conducting their activities at 'small architectural structures' (e.g. kiosks, stalls, pavilions) and markets.
- Property owned by government agencies and the non-profit organisations established by them, etc.

The RET rates are set by the local government but cannot exceed 1.5% of the minimal salary as of 1 January of the reporting year per square metre (for 2017, the maximum is UAH 48 per square metre).

RET paid by legal entities is not available as a credit against CIT liabilities starting with the 2017 reporting year.

Land tax

Land tax is a local tax and assessed annually for the following year, paid monthly in equal instalments by the owners or users of the land. The rate of land tax depends on the category, location, and the existence of a state valuation for each particular land plot.

Transport tax

Starting from 1 January 2017, a local transport tax shall be charged on owners of passenger cars with an average market value exceeding 375 minimal salaries as of 1 January of the reporting year (i.e. UAH 1.2 million) and not older than five years.

The Ministry of Economic Development and Trade of Ukraine is obligated to publish (on an annual basis, before 1 February of the reporting year) on its web-site a list of vehicles that are subject to the transportation tax (including brand, model, year of production, engine displacement, fuel type).

A tax of UAH 25,000 for each car per year shall be paid by the car owner.

Stamp duty

Stamp duty is imposed on certain actions, including the notarisation of contracts and filing of documents with courts. In most cases, the amounts involved are nominal.

Operations carried out at commodity exchanges and real estate sales incur a stamp duty of 1%.

Payroll taxes

Employers and other business entities that pay income to individuals are defined as tax agents and are responsible for withholding personal income tax (PIT), military tax, and mandatory unified social contribution (USC) and remitting them to the state.

Unified social contributions (USCs)

Employers (including representative offices of foreign companies in Ukraine) are required to pay USC in respect of their employees. USC applies to all salaries paid through the payroll of a Ukrainian entity or a Ukrainian representative office of a foreign entity, as well as remuneration paid to individuals under civil agreements.

Starting from 2017, the general USC rate (payable by the employer) is 22% (except for special decreased rates for contributions regarding disabled people, etc.), which applies to gross remuneration. The USC accrued by the employer is deductible for CIT purposes.

The taxable base for contributions is capped. For 2017, the cap is set at 25 times the subsistence minimum set for able-bodied individuals: from 1 January till 30 April 2017, the cap is UAH 40,000 per month; from 1 May till 30 November 2017, the cap is UAH 42,100 per month; from 1 December till 31 December 2017, the cap is UAH 44,050 per month.

Employees are relieved from paying USC.

Ukraine

Special Pension Fund charges

The following special charges are payable to the State Pension Fund:

- 3%, 4%, or 5% charge on the value of a new car, which is first subject to registration with the government agency (state traffic inspectorate), depending on the said value (for the year 2017, the following criteria is applicable: up to UAH 264,000, 3%; above UAH 264,000, but not more than UAH 464,000, 4%; above UAH 464,000, 5%).
- 1% charge on the acquisition of real estate payable by individuals and legal entities that purchase real estate.
- 7.5% charge on mobile communication services.
- 10% charge based on the value of precious metal contained in jewellery during its marking on the public enterprises of assay control.

The mandatory contribution to the Pension Fund on purchase of foreign currency was cancelled starting from 1 January 2017.

Charges on environmental pollution

Environmental pollution charges (ecological taxes) are imposed on any legal entity that discharges contaminants into the environment (air or water) or disposes of waste. The actual rate depends on the type and toxicity of each contaminant.

Charges on environmental pollution are deductible for CIT purposes.

Charge for subsoil usage (rent)

Companies engaged in extracting mineral resources in Ukraine, regardless of the form of their ownership, are liable for a charge for use of subsoil.

Rent payment for subsoil use is calculated as follows:

= Value of extracted mineral resource * Cost of respective unit of extracted mineral resource * Tax rate (%) * Adjustment coefficient

The value of extracted mineral resources is determined as the greater of the following two calculation methods:

- The actual taxpayer's selling prices.
- The taxpayer's costs increased by the established profitability coefficient.

Specific rules apply in determining the selling prices for extraction of oil, condensate, natural gas, and iron ore.

Adjustment coefficients may apply to the rent payment for subsoil use rates depending on the type of minerals and conditions of extraction. For example, coefficient 0.25 will be applied to the tax rate for iron ore extracted by underground mining methods with a depth of over 300 metres for the enrichment of magnetite iron content of less than 35%.

In 2017, tax rates for oil/condensate are 29%/45% (if extracted from a depth of less than 5,000 metres) and 14%/21% (if extracted from a depth of more than 5,000 metres), for natural gas are 29% (if extracted from a depth of less than 5,000 metres) and 14% (if extracted from a depth of more than 5,000 metres), and for iron ore are 8%.

Charges for the use of subsoil are deductible for CIT purposes.

Other local taxes

According to the Tax Code, there are other local taxes that may be levied at the discretion of the local authorities (i.e. vehicle parking place duties, tourism duty).

Branch income

Domestic branches or other separate units are not treated as separate taxpayers for CIT purposes.

In Ukraine, it is not currently possible to register a branch of a foreign legal entity. A foreign company may set up a representative office in Ukraine, which is similar to an unincorporated branch. A non-resident company conducting business activities via a representative office is deemed to carry out business in Ukraine through a PE and may be subject to CIT at the standard rate unless protected by a DTT.

When a foreign company conducts business in Ukraine through a PE, the taxable income should be determined on the same basis as for domestic entities.

The Tax Code provides for three methods for computing taxable profits for a representative office engaged in commercial activities (i.e. a PE of a non-resident in Ukraine): the direct method, the notional margin method, and the shared-balance method.

PEs using the direct method should calculate their taxable profits in the ordinary way as net profits before tax (NPBT) as per accounting records and adjusted for 'tax differences' (*see the Income determination section*).

The notional margin method for calculation of CIT liability of the PE involves applying a notional margin of 30% to *income* derived in respect of activities in Ukraine without taking into account any expenses the PE might incur in the course of its activities. This method is applied by the tax authorities if the PE has no separate accounts from its parent company.

The shared-balance method for the calculation of CIT liability of the PE is based on data provided by the parent company about the PE's share of worldwide expenses, number of employees, and fixed assets. It is applicable to non-resident entities that operate both in Ukraine and other countries, which do not determine profits from activities carried through a PE in Ukraine. The Tax Code requires for the shared-balance to be prepared by the non-resident and agreed with the Ukrainian tax authorities.

Distributions made by a PE (from after-tax income) to its head office should not trigger any further taxation in Ukraine, provided that the head office is in a jurisdiction that has an effective DTT with Ukraine.

Income determination

The Tax Code determines taxable profits as net profits before tax (NPBT) as per accounting records, either Ukrainian statutory or International Financial Reporting Standards (IFRS), and adjusted for 'tax differences'.

Ukraine

Taxpayers with prior year annual income equal to or less than UAH 20 million (net of indirect taxes) may opt out of making the adjustments. Note that they do remain eligible for loss carryforward allowances (*see the Deductions section*).

Inventory valuation

A taxpayer is entitled to adopt any of the methods of inventory valuation prescribed by financial accounting rules, namely: the first in first out (FIFO) method, weighted average methods, identified cost of unit of goods, normative cost, or sale price. The last in first out (LIFO) method does not apply in Ukraine.

Capital gains on the sale of property

Income from the sale of property (including buildings and land plots) should be recognised according to financial accounting rules.

Income from securities

Profit from trading in securities is taxable at the standard CIT rate. Incurred losses are non-deductible, but may be carried forward to offset future profits from trading in securities without any limitations.

Dividend income

Dividends received by a Ukrainian entity from another Ukrainian entity (CIT payer or person operating within group 4 of the simplified [unified] tax regime) are exempt from CIT. Dividends received by Ukrainian companies from foreign companies are not exempt from CIT.

Companies paying dividends are required to pay advance CIT on payment of dividends (ATD) at the standard CIT rate, unless the dividends are paid to individuals or out of received dividends (with some other exceptions). ATD applies only to the portion of dividends that exceeds profits of the respective dividend year for which CIT is already paid.

If the amount of the paid ATD exceeds the amount of the accrued CIT of the taxpayer-issuer of corporate rights, the excess amount will be applied to reduce the taxpayer's CIT obligations in the following periods. In case the taxpayer is in a loss-making position, the said amount will be applied to reduce the CIT obligations in the following periods until it is fully utilised. Collective investment vehicles are released from ATD.

Interest income

Interest received by taxpayers is included in their taxable income on a general basis according to financial accounting rules.

Rent/royalties income

Income from rent/royalties received by taxpayers is included in their taxable income on a general basis according to financial accounting rules.

Foreign exchange gains/losses

Realised and non-realised foreign exchange gains/losses are generally treated as taxable income/deductible expenses, similar to financial accounting rules.

Other significant items

Ukrainian tax legislation does not provide special tax treatment for bribes, kickbacks, or illegal payments.

Income received as payment for goods (works, services) shipped (provided) while the taxpayer used the simplified tax system will increase the NPBT.

Foreign income

Foreign income is taxed under the general rules, and there are no special rules regarding anti-deferral or unremitted earnings.

Deductions

Depreciation and amortisation

Assets whose values are more than UAH 6,000 that have a useful life exceeding one year are required to be depreciated for tax purposes. Depreciation is determined on a monthly basis and computed using the following methods:

- Straight-line.
- Reducing balance.
- Method of accelerated reduction of a residual value.
- Cumulative.

The production-based method of amortisation is not allowed for tax purposes.

Fixed assets are divided into 16 groups according to their statutory minimal useful life. The useful life of fixed assets may be extended by a taxpayer.

The application of a reduced statutory minimum useful life to machines and equipment purchased during the period between 1 January 2017 and 31 December 2018 is allowed, on the condition that the taxpayer employs such assets in its business activity and applies the straight-line method of depreciation thereto.

There are no special rules prescribed for tax accounting of repair costs in respect of production fixed assets and intangible assets. Ukrainian accounting principles or IFRS rules should apply. Expenses on repairs and reconstruction of non-production fixed assets and intangible assets are not deductible.

The following intangible assets may be amortised using one of the above-mentioned methods over the period of an asset's lifetime as defined in the documents certifying the rights to the intangibles and considering the minimum period set by the law:

- Rights to use natural resources.
- Rights to use property.
- Rights on intangible assets.
- Technology, know how (not less than five years).
- Copyrights (not less than two years).
- Other intangible assets.

Taxpayers are entitled to set the amortisation period of the intangible assets on their own, but it must not be less than two years and not more than ten years of continuous operation (this only applies when the documents establishing the right to use do not specify a term for the use). Starting from 2017, NPBT is adjusted by the amount(s) of residual value of written-off non-production equipment and intangible assets as per accounting data.

Ukraine

Goodwill

Amortisation of goodwill is not permitted (i.e. not deductible) for tax purposes.

Organisational and start-up expenses

There is no limitation for deduction of organisational and start-up expenses incurred prior to the entity's registration (accounting rules should apply).

Research and development (R&D) expenses

R&D expenses are deductible according to financial accounting rules.

Interest expenses

Interest paid is generally deductible for CIT purposes, but the deduction of interest expense in favour of non-resident related parties is limited according to the thin capitalisation rules (*see Thin capitalisation in the Group taxation section*).

Bad debt

NPBT can be reduced by the amount of written-off debts that qualify as bad debts under the Tax Code (including the write-off, performed within the amount of bad debts provision). The Tax Code contains the detailed list of criteria for debts to be qualified as bad ones.

Loan loss provisions (LLPs) for banks and other financial institutions

Banks and other financial institutions create LLPs according to IFRS.

The deductibility of the LLPs is restricted to 20% (25% through 31 December 2018) of the total value of assets subject to provisioning under the IFRS.

Only debts that qualify as bad debts under the Tax Code can be written-off at the expense of the LLPs for tax purposes.

In particular, loans (in part or in whole) overdue for more than 360 calendar days may be treated as bad and, as such, written-off for tax purposes. Exceptions are debts of related parties or those of current and/or former employees of the creditor. The amount of the LLPs used for the write-off of non-qualifying debts should be added back to increase the taxable profits (decrease the loss).

The Tax Code also prescribes the transitional provisions for the LLPs (for banks only). The positive (negative) difference between the LLPs calculated according to the edition of the Tax Code as of the end of 2014 and under the rules effective as of 1 January 2015 can be carried forward over three years in equal parts.

Other reserves (provisions)

Provisions for vacation and salary payments are allowed. Other provisions for future costs (i.e. warranty, contingent liabilities, etc.) are disallowed. Respective expenses covered by these provisions (except vacation and salary payments) are deductible when actually incurred.

Charitable contributions

Only 70% of payments for goods or services to non-profit organisations (except budgetary ones) is tax deductible.

The deductibility of the costs of goods or services supplied for free to non-profit organisations is limited by 4% of the previous year's net profit.

Pension expenses

The obligatory Ukrainian social security insurance contributions, including state pension contributions charged on payroll expenses, are deductible for employers.

There are no limitations prescribed for the deduction of the employer's payment to non-state pension organisations (financial accounting rules should apply).

Payment for directors

Payments (including bonuses) relating to business are normally deductible payments.

Fines and penalties

Starting from the 2017 year and onwards, fines, penalties, and forfeits, which were accrued in accordance with civil legislation for the benefit of entities that are not CIT payers (except for private individuals) or that are taxed at a 0% CIT rate, are not tax deductible.

Taxes

CIT, PIT, WHT/remittance taxes, and VAT incurred on purchases are not deductible. VAT is deductible if it cannot be recovered. Other taxes are generally deductible in full.

Other significant items

There is no requirement to prove the connection of costs to the company's 'business activities'. The exception is the need to differentiate between business and non-business fixed assets.

General requirements for the documentation of the transactions for accounting needs (i.e. contracts, acts of acceptance, etc.) will also apply for the substantiation of expenses for tax purposes.

Non-repayable financial aid (goods, services), which was provided free of charge for the benefit of its recipients (other than duly registered non-profit organisations) that are not CIT payers or that are taxed at a 0% CIT rate, are not be deductible starting from 1 January 2017.

Net operating losses

Losses can be carried forward without limitations. Ukrainian tax legislation does not provide for refunds for losses carried back.

Payments to foreign affiliates

The following rules need to be followed with regard to payments to foreign affiliates:

- Only 70% of payments for goods or services to residents of low tax jurisdictions is tax deductible.
- Deduction of royalties paid to a non-resident is limited to royalty income plus 4% of net income of the previous year.
- Royalties paid to (i) non-beneficial owners, (ii) low tax jurisdictions, (iii) non-residents that are exempt from tax on royalties in the country of their residence, and (iv) non-residents for trademarks originated from Ukraine are not tax deductible.

The first and the second of the above limitations can be waived if a taxpayer confirms the arm's length level of payments in accordance with the transfer pricing rules (even if the transactions are not controlled for transfer pricing purposes).

Ukraine

The latter one should apply at any case (even if the payments are at ‘arms length’ level) unless a beneficial owner grants the right to receive the royalties to other parties.

Group taxation

In Ukraine, each legal entity is taxed individually.

Transfer pricing

The transfer pricing rules apply for CIT purposes only. The list of controlled transactions for transfer pricing purposes includes business transactions that have an impact on taxable profits and that are:

- Business transactions with related parties that are non-residents of Ukraine.
- Cross-border business transactions on sale and/or purchase of goods and/or services through non-resident commissionaires.
- Business transactions with non-residents that are registered in or are residents of jurisdictions determined by the Cabinet of Ministers of Ukraine (CMU) that meet the following criteria:
 - States (territories) where the CIT rate is less than Ukraine’s CIT rate by 5%.
 - Countries with no DTT with Ukraine containing provisions on exchange of information.
 - States the competent authorities of which do not accomplish timely and full exchange of tax and financial information upon request of the Ukrainian tax authorities.
- Transactions with non-residents that do not pay CIT, including on revenues received outside of the state of registration of such non-residents, and/or that are not tax residents of the country where they are registered as legal entities. The list of organisational and legal forms of such non-residents in terms of states (territories) is established by the CMU.
- If within a chain of business transactions between related parties (tax resident of Ukraine with non-residents), the ownership of the subject matter of the transaction (or its result) before being transferred from one of the counterparties to another was transferred to one or more unrelated intermediaries, these cross-border transactions between the related parties are considered to be controlled if the intermediary performs no significant functions, employs no significant assets, and/or bears no significant risks in respect of the transactions.

Transactions with the same counterparty are considered to be controlled if the total annual amount of the transactions with any counterparty (calculated according to accounting rules) exceeds UAH 10 million (net of indirect taxes), provided the total annual income (calculated according to the accounting rules) of the taxpayer received as a result of any type of activity exceeds UAH 150 million (net of indirect taxes).

Some transactions are considered to be at arm’s length (i.e. transactions in which prices are subject to state regulation, transactions subject to mandatory valuation, transactions in which prices are determined by mandatory auction, transactions on forced sale of collateral) if the conditions of transactions meet the respective legislation requirements.

The Tax Code of Ukraine provides five methods for determining the arm’s-length nature of the controlled transactions:

- Comparable uncontrolled price (CUP) method.
- Resale price method.
- Cost plus method.
- Net profit method.
- Profit split method.

According to the Tax Code, the selected transfer pricing method should be the one that the taxpayer reasonably considers as being most appropriate according to the facts and circumstances of the case.

The main criteria for the most appropriate transfer pricing method selection are:

- The nature of the controlled transaction, which is determined, in particular, based on the functional analysis of the controlled transaction (including the functions performed, assets employed, and risks assumed).
- The availability of complete and accurate information, which is necessary for the application of the selected transfer pricing method(s).
- The level of comparability between the controlled and non-controlled transactions, including the reliability of comparability adjustments, if any, that can be used to eliminate differences between such transactions.

The CUP method is the primary transfer pricing method to be used over all other methods. If this method is not feasible to apply, the taxpayer can use other methods, specified by the Tax Code. However, if there is an equal reliability of the resale price method or the cost plus method as well as the net profit method or profit split method, the first two methods are given priority. In addition, the Tax Code also provides the possibility for the use of several transfer pricing methods (combination thereof) to substantiate the arm's-length nature of controlled transactions. The application of other methods that are not prescribed by the Tax Code (*see above*) is prohibited.

The CUP method should be applied for cross-border transactions (with the residents of the jurisdictions included on the list established by the CMU) with commodities quoted on the commodity exchange; otherwise, the profitability of all counterparties involved in the chain of business transactions should be disclosed.

For the purposes of application of the transfer pricing methods, the following information may be used:

- Information on comparable transactions of the taxpayer as well as its counterparty with non-related parties.
- Any publicly available sources of information that provide data on comparable transactions and parties.
- Other sources from which information was received by the taxpayer in compliance with the law, if such information was provided to the tax authorities.
- Information received by the tax authorities under the effective international agreements concluded by the Parliament of Ukraine.

All taxpayers performing controlled transaction should file a report on controlled transactions by 1 October of the year following the reporting year.

All taxpayers performing controlled transactions should prepare and maintain transfer pricing documentation for each reporting period. Transfer pricing documentation, substantiating the arm's-length nature of prices/profitability, should be submitted

Ukraine

only upon request of the tax authorities within 30 calendar days upon its receipt. The request on the provision of transfer pricing documentation can be sent to the taxpayer not earlier than on 1 May of the year following the calendar year in which the controlled transaction was performed.

Transfer pricing documentation should be prepared in Ukrainian only in any format (either a single document or a set of documents); however, the precise rules regarding the content of the documentation should be followed.

The Tax Code of Ukraine contains a detailed list of information to be included in transfer pricing documentation.

If the prices/profitability of the controlled transaction do not correspond with the arm's-length principle, the taxpayer should perform the respective transfer pricing adjustment and pay additional tax. The other party to the controlled transaction is entitled to perform a proportional transfer pricing adjustment. The proportional adjustment is also allowed in case of transfer pricing assessments by the tax authorities. The proportional adjustment should be made in accordance with the provisions of the effective DTTs.

The Tax Code also provides for a specialised transfer pricing audit as the tax authorities are not allowed to examine pricing in controlled transactions during normal full-scope tax audits. The audit duration cannot exceed 18 months, although extension is possible for another 12 months.

The tax authorities cannot conduct more than one transfer pricing audit within one calendar year, although other (non-transfer pricing) tax audits can be conducted during this period. The statutory limitation period for transfer pricing assessments is seven years.

The Tax Code defines the following penalties for non-compliance with the transfer pricing rules for non-submission of the report on controlled transaction and/or transfer pricing documentation, or omission of certain controlled transactions in the report on controlled transaction:

- 3% of the controlled transaction value for failure to file transfer pricing documentation (limited to 200 statutory subsistence minimums [UAH 320,000 as of 1 January 2017] for all controlled transactions).
- 1% of the controlled transaction value for failure to declare the controlled transaction in the report on controlled transactions (limited to 300 statutory subsistence minimums [UAH 480,000 as of 1 January 2017] for all unreported controlled transactions).
- 300 statutory subsistence minimums (UAH 480,000) for failure to file the report on controlled transactions.

In addition, there are the following penalties for late submission of the report on controlled transaction and/or transfer pricing documentation, according to the Tax Code:

- In case of non-submission of the report on controlled transaction (specifying report) and/or transfer pricing documentation within 30 calendar days following the last day of the fine (for non-submission of the report on controlled transaction/transfer

pricing documentation), five statutory subsistence minimums for each calendar day (UAH 8,000).

- Two subsistence minimums (UAH 3,200) for each calendar day, but no more than 200 subsistence minimums (UAH 320,000), in the case of late submission of transfer pricing documentation.
- One subsistence minimum (UAH 1,600) for each calendar day, but no more than 300 subsistence minimums (UAH 480,000), in case of late submission of the report on controlled operations or late declaration of the controlled transaction in such report when submitting an adjusting report.

Payment of such penalties does not exempt the taxpayer from the obligation to file the report on controlled transaction and/or transfer pricing documentation.

Large taxpayers have the right to enter into Advance Pricing Agreements (APAs) with the State Fiscal Services of Ukraine in order to agree on certain terms of controlled transactions in advance.

Thin capitalisation

The following rules apply to legal entities whose debts to non-resident related parties exceed equity by 3.5 times (10 times for financial institutions/leasing companies):

- The deduction of interest expense under transactions with non-resident related parties for these taxpayers is limited by the amount of 50% of earnings before interest, taxes, depreciation, and amortisation (EBITDA).
- The non-deductible portion of interest can be carried forward indefinitely. However, each following year the residual amount of such interest should be reduced by 5%.
- For the purposes of thin capitalisation rules, debt includes any loan, deposit, repo transactions, financial leasing, and any other indebtedness, regardless of its legal form.

Controlled foreign companies (CFCs)

There are no specific CFC rules in Ukraine, but significant development of local legislation in this area is expected in the coming years in implementing some initiatives from the Base Erosion and Profit Shifting (BEPS) Action Plan.

Treatment of inter-company items

Ukrainian tax legislation provides the following treatment for inter-company items:

- Dividends received by a Ukrainian entity from another Ukrainian entity (CIT payer or person operating within group 4 of the simplified [unified] tax regime) are exempt from CIT. Dividends received by Ukrainian companies from foreign companies are not exempt from CIT.
- There is no limitation for the deduction of expenses in relation to the financing of management bodies, including holding companies.
- The deduction of cost-sharing and similar intra-group payments, other than remuneration for services actually rendered, is not specifically limited for CIT purposes (accounting rules should apply).

In addition to the above:

- Certain limitations apply to deduction of royalties paid to non-residents (see *Payments to foreign affiliates in the Deductions section for more information*).

Ukraine

- Royalties paid to (i) non-beneficial owners, (ii) low tax jurisdictions, (iii) non-residents that are exempt from tax on royalties in the country of their residence, and (iv) non-residents for trademarks originated from Ukraine are not tax deductible (even if the payments satisfy the 'arm's length' criteria). This limitation does not apply when a beneficial owner grants the right to receive the royalties to other parties.
- Transactions for the receipt (provision) of financial aid between a taxpayer and its branches and other separate units without legal entity status located in Ukraine shall not affect their taxable income or deductible expenses (except for non-repayable financial aid that was provided free of charge for the benefit of its recipients that are not CIT payers or that are taxed at a 0% CIT rate).
- Interest on loans is limited (*see Thin capitalisation above*).

Tax credits and incentives

Starting from 2017, 'tax holidays' until 2021 are introduced for taxpayers with annual income less than UAH 3 million, provided they meet the requirements on (i) payroll amount (not less than two statutory minimum wages monthly per each employee), (ii) defined average number of employees in the preceding periods (for the entities established before 1 January 2017), and (iii) are compliant with limitations on types of activities (according to the specific list).

Simplified (unified) tax regime

Entities and individuals (i.e. private entrepreneurs) are entitled to use a simplified (unified) tax regime (with exemption from CIT) if certain requirements are met.

Groups 1 and 2 of the simplified (unified) tax regime are available for private entrepreneurs only, and group 3 for both private entrepreneurs and legal entities (depending on the types of activities, the level of income [only up to UAH 5 million, except agricultural producers], and the number of employees' criteria).

These regimes foresee low effective tax rates (up to 10% of the subsistence minimum set for able-bodied individuals as of 1 January of the reporting year for group 1 per month; up to 20% of the minimal salary set as of 1 January of the reporting year for group 2 per month, or up to 5% of turnover for a private entrepreneur/an entity of the third group) and easier reporting for small businesses. However, specific types of business activities are prohibited under this tax regime (*inter alia*, transactions with certain excisable products, exploration/production/sale of precious metals and stones, company management and communication services).

Taxpayers of group 1 may not use cash recorders in their activity. Taxpayers of group 2 and 3 are obligated to start using cash recorders from the quarter following the one when their turnover exceeds UAH 1 million.

The group 4 classification of the simplified (unified) tax regime is available for qualified agricultural producers.

Agricultural producers are entitled to use a very favourable tax regime (with exemption from CIT), provided certain requirements are met. The main criterion requires that income from the sale of their own agricultural products constitutes not less than 75% of their total gross revenue of the previous tax (reporting) year.

Under this regime, the amount of tax due depends on the size of the agricultural land plot owned or rented by the agricultural producers. Starting from 1 January 2017, the tax rates vary from 0.19% to 6.33%, apply to the normative monetary value of one hectare of agricultural land, and depend on the type of such land.

Foreign tax credit

Tax residents are allowed a credit for foreign taxes paid on income received abroad, provided there is a DTT between Ukraine and the relevant foreign state. The amount of foreign tax credit is limited to the amount of Ukrainian tax that would arise from the equivalent income in Ukraine. To claim a tax credit, the taxpayer requires an official confirmation of payment issued by the relevant foreign tax authority.

Withholding taxes

WHT must be remitted to the authorities no later than the date when the payment is made to the income recipient.

Passive income (dividends, interest, royalties) from Ukrainian sources that is paid to non-resident entities is generally subject to 15% WHT. Other payments, including payments for engineering services, lease payments, and agency and brokerage fees, are also subject to 15% WHT, but payments for most other services are not subject to withholding. WHT rates may be reduced under a relevant tax treaty.

The 15% WHT rate applies to income (rather than capital gain) on the sale of real estate and on profits from the sale of securities.

Capital gains from disposal of interest-free (discounted) bonds and treasury bills are taxed at an 18% rate.

Payments for freight services (including sea freight) are subject to 6% WHT.

Starting from 1 January 2017, a special 5% WHT rate on qualifying Eurobond yield applies.

The non-resident recipient of income sourced in Ukraine must also be considered the beneficial owner of such income in order to benefit from the reduced tax rates under relevant tax treaties. According to the Tax Code, agents, nominee holders, and other intermediaries in respect of received income cannot be beneficial owners of income sourced in Ukraine, and, therefore, are not entitled to favourable treaty provisions.

Payments to non-resident persons for advertising services are not subject to withholding. However, the resident payer is required to pay, from its own funds, a 20% remittance tax based on the value of such services.

A resident payer is similarly required to pay, from its own funds, a 12% remittance tax if a payment is made to a foreign insurer or reinsurer whose rating of financial reliability does not meet the requirements set by the authorised state agency. Otherwise, 0% or 4% rates apply.

As taxes on advertising and insurance are levied on a resident party, they cannot be relieved using a tax treaty.

Notes

1. The ownership threshold for the non-portfolio rate is 10%, 20%, 25%, or 50%, depending on the specific provisions in the treaty.
2. Several treaties contain a rate of 0% on interest paid to or guaranteed by a government or one of its agencies.
3. If more than one rate is shown, this means that the rate will depend on the type of royalties paid.
4. The 18% rate applies to dividends from privileged shares or other fixed payments on shares, as well as to disguised employment income. Dividends received from a Ukrainian legal entity CIT payer (other than collective investment arrangement) are subject to the 5% rate.
5. The lower rate applies to interest paid on certain credit sales and on loans granted by a financial institution.
6. The treaties with Japan, Malaysia, and Spain were entered into by the USSR before it dissolved. Ukraine will continue to honour these treaties, unless they are superseded.
7. The lower rate applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, unless the indebtedness is between associated enterprises.
8. The 0% rate applies if the investor holds at least 50% of the capital of the company paying the dividends and the capital invested is at least 1 million United States dollars (USD); the payer of dividends should not operate in the field of gambling, show business or an intermediation business, or in auctions.
9. The 0% rate will apply if a French company or companies hold, directly or indirectly, at least 50% of the capital of the Ukrainian company, and the aggregate investments exceed 5 million French francs.
10. The lower rate applies to interest paid on any loan granted by a bank.
11. The 0% rate applies if the investor directly holds at least 50% of the capital of the company paying the dividends, and the capital invested is at least USD 300,000.

Ukraine

12. The 10% rate applies if the company receiving the dividend has, for an uninterrupted period of two years before the dividend is paid, owned at least 25% of the capital stock of the company paying the dividends.
13. The 5% rate applies if the capital invested is at least USD 50,000.
14. The 0% rate applies if the Swedish company directly holds at least 25% of the voting power of the company paying the dividends and at least 50% of the Swedish company is held by Swedish residents.
15. The 0% rate applies only if the royalties are taxable in the United Kingdom.
16. The 10% rate applies if the company receiving the dividend directly owns at least 25% of the capital stock of the company paying the dividends.
17. The 5% rate applies if the investor (other than partnership) being a beneficial owner holds at least 25% of the capital of the company paying the dividends.
18. The 5% rate applies if the investor, being a beneficial owner, holds at least 20% of the capital of the company paying the dividends.
19. The 5% rate on dividends applies if the investor holds at least 20% of the capital of the company paying the dividends or the capital invested is at least 100,000 euros (EUR). The 5% rate on royalties applies in relation to royalties on trademarks, patents, or know-how.
20. The 5% rate applies in the case of interest paid in connection with the sale on credit of industrial, commercial, or scientific equipment or on any loan granted by a bank.
21. On 14 March 2017, the Ukrainian Parliament passed a law ratifying the DTT between the Government of Ukraine and the Government of the Grand Duchy of Luxembourg. Luxembourg has already ratified the DTT. For the DTT to enter into force, Ukraine and Luxembourg must exchange the ratification letters. If the DTT enters into force before 31 December 2017, taxpayers engaged in transactions with residents of Luxembourg will be able to enjoy DTT benefits starting from 1 January 2018. Specifically, the DTT introduces the following reduced WHT rates: dividends - 5% (if the 20% ownership threshold is met)/15%; interest - 5%/10%; royalties - 5%/10%.

On 13 April 2017, the Ukrainian Parliament passed a law ratifying the DTT between the Government of Ukraine and the Government of the Republic of Malta. For the DTT to enter into force, it must be also ratified by Malta. Based on available information, Malta has yet to do it. After that, Ukraine and Malta must exchange ratification letters. If the DTT enters into force before 31 December 2017, taxpayers engaged in transactions with residents of Malta will be able to enjoy DTT benefits starting from 1 January 2018. Specifically, the DTT introduces the following reduced WHT rates: dividends - 5% (if 20% ownership threshold is met)/15%; interest - 10%; royalties - 10%.

Tax administration

Taxable period

The reporting year for companies generally follows the calendar year. The exception is for qualified agricultural manufacturers (other than on simplified [unified] tax), whose reporting period starts from 1 July of the current reporting year and ends on 30 June of the next reporting year.

Tax returns

Tax returns for CIT should generally be submitted on a quarterly basis, but some taxpayers will have to submit them annually (newly established, agricultural producers, and taxpayers with prior year annual income equal to or less than UAH 20 million [net of indirect taxes]).

Monthly returns (e.g. VAT) must be filed within 20 calendar days following the end of the respective reporting month.

Quarterly returns (including fourth quarter CIT returns on a quarterly reporting period basis) are due within 40 calendar days following the last day of the reporting quarter.

Annual returns (i.e. CIT returns on an annual reporting period basis) are due within 60 calendar days following the last day of the reporting year.

Taxpayers also have to submit financial statements to the tax authorities.

Resident companies and non-resident entities with a PE in Ukraine must keep records that comply with the tax rules.

Payment of tax

Taxes payable assessed on the basis of tax returns are due within ten calendar days following the deadline for filing the relevant tax returns.

Penalties

The tax authorities will charge significant penalties for late filing, late payment, or understating tax liabilities.

Late payment of tax may result in a penalty in the amount of 10% of the underpaid amount for delays of up to 30 calendar days (20% if the delay exceeds this).

If the tax liabilities are understated, the amount of penalty depends on the frequency of violations (i.e. understatement of CIT and VAT liabilities, overstatement of VAT refunds) during a period of 1,095 consecutive calendar days. In particular: 25% for the first violation, 50% for the second violation and each subsequent violation related to the same taxes.

In addition to these penalties, late payment interest (LPI) is calculated by the application of a rate of 120% *per annum* of the prime rate of the National Bank of Ukraine, effective from the actual date of underpayment on the amount of additionally assessed tax liabilities for the whole period of underpayment.

If a taxpayer fails to withhold tax when required, a penalty of up to 75% of the deficient tax is imposed.

Potential criminal responsibility could be claimed against the taxpayer's management if the total amount of additional tax liabilities assessed by the tax authorities during the tax audit exceeds 1,000 (500 for 2017) times the subsistence minimum (UAH 1.6 million, UAH 800,000 for 2017). There are several options to close such criminal proceedings (the procedure should be properly managed from the legal perspective).

Tax audit process

The tax authorities may carry out scheduled audits once a year. Taxpayers must be notified of the audit in writing at least ten days in advance. The State Fiscal Services is required to release a schedule of planned audits for the following year on its official website by 25 December of the year preceding the year when such audits are to be conducted. In addition, the tax authorities may perform out-of-schedule audits in certain circumstances (e.g. if a taxpayer does not file tax returns on a timely basis, it is reorganised or liquidated, during the counter-check it fails to provide the tax office with all documents specified in the request).

A desk audit of a tax return or adjusted tax return may be conducted within 30 calendar days following the deadline for its submission; if such documents have been filed after such deadline, the 30-day term will be calculated starting from the date of submission.

The tax authorities have the right to audit a taxpayer's accounting, correctness, and completeness of the calculation of NPBT according to the Ukrainian statutory or IFRS rules.

Transfer pricing audits are conducted on a separate basis.

Ukraine

Statute of limitations

Under Ukrainian tax legislation, a three year statute of limitations applies (1,095 days) on any outstanding Ukrainian tax liability, starting from the date a tax return is due to be filed and/or the date the tax is due to be paid, if assessed by the tax authorities. There is no limit on the statute of limitations in which an assessment may be made if a taxpayer has deliberately evaded taxation (if proven in court) or when a taxpayer fails to file a return.

The statute of limitations for transfer pricing controlled operations is seven years (2,555 days).

Tax advice

The Ministry of Finance of Ukraine is authorised to issue summarising tax consultations in cases of inconsistency among various tax law provisions. Additionally, tax advice may be sought from the tax authorities, who are required to issue such clarifications.

Tax advice is not legally binding and may be challenged in court. A taxpayer may use the tax advice as guidance on the methodology to be applied by the taxpayer. In practise, the tax advice often does not provide solid protection against future assessment of tax, but does protect from penalties.

A unified database of individual tax consultations will be established in 2017 and administered by the Ministry of Finance of Ukraine with free unobstructed access to its records. From 1 April 2017, all individual tax consultations issued by the tax authorities are to be entered into the database.

Topics of focus for tax authorities

Currently tax authorities are focusing on the following areas:

- Proper calculation of taxable profits as per accounting records (including timely documenting of expenses and their proper allocation between the periods), and correct application of tax differences, prescribed by the Tax Code.
- Compliance with beneficial ownership requirements for the purposes of CIT and WHT. The Ukrainian tax authorities started analysing the issues related to the beneficial ownership test, where prescribed by the tax legislation, with more scrutiny than before.
- Compliance with transfer pricing rules and reporting requirements.
- Analysis of taxpayer's rights for recognition of input VAT in the chain of transactions, where one of the preceding participants (e.g. a supplier of goods or services) fails to comply with requirements of VAT legislation (i.e. such transaction is considered as 'sham' according to the approach, followed by the tax authorities).

Electronic taxpayer's cabinet

An electronic taxpayer's cabinet replaced the 'single window for filing electronic reporting' during the first half of 2017. The electronic taxpayer's cabinet features the following functions:

- Access to the taxpayers' information, which was collected and accumulated by tax authorities.
- Ability to reconcile tax payments made to the state and local treasuries by obtaining the reconciliation statements.
- Ability to manage overpaid or mistakenly paid monetary obligations and penalties.

- Electronic submission of tax returns and other reporting, registration of VAT, and excise invoices.
- Access to the electronic system of VAT administration.
- Informs taxpayers on scheduled audits, ability to file administrative appeals against decisions taken by the tax authorities.
- Informs on status of counterparties using information supplied by publicly available information sources maintained by the Ministry of Finance of Ukraine, other registries and databases that are maintained according to the Tax Code of Ukraine, etc.

Other issues

Exchange controls

The key issues regarding Ukraine's current exchange control regulations are as follows:

- Trade-related settlements between residents and non-residents can be made in foreign currency and Ukrainian hryvnia.
- Payments in foreign currencies in the territory of Ukraine are subject to a National Bank of Ukraine (NBU) licence, except for payments for goods, works, services, and payment of salaries in the temporarily occupied territory of Ukraine.
- Salaries to Ukrainian staff must be paid in Ukrainian currency (but expatriate employees can be paid in hard currency). Expatriates are unable to receive hard currency (local) salaries in Ukrainian bank accounts.
- Foreign loans must be registered with the NBU before funds are remitted to Ukraine.
- The maximum allowable interest rates for foreign fixed rate loans in hard currency (inclusive of any fees and charges due under the loan agreement) are 9.8% *per annum* for loans up to one year; 10% *per annum* for loans for one to three years; and 11% *per annum* for loans over three years. For loans with floating interest rates, the maximum allowable interest rate is three months of the USD London Interbank Offered Rate (LIBOR) plus 7.5%.
- Proceeds from exports must be credited to the exporter's Ukrainian bank account in general within 180 days (within 120 days until 16 June 2017, we expect this to be extended) from the date of customs clearance (for goods) or the date of signing the act of acceptance (for services). Starting from 3 January 2017, the mentioned rule does not apply to export of services (except for transport and insurance services) and intellectual property (IP) rights. Similarly, prepaid goods must be imported and cleared through customs in general within 180 days (within 120 days until 16 June 2017, we expect this to be prolonged) of payment. Failure to do so will result in a fine of 0.3% of the amount due or paid for each day of delay, but not more than the debt itself.
- Until 16 June 2017 (with possible prolongation), Ukrainian companies are generally obligated to exchange at the local market 50% of their foreign currency proceeds received from abroad (this restriction does not apply to making foreign investments into Ukraine starting from 11 May 2016). In order to enforce this limitation, the NBU introduced a ban on offsetting receivables/payables in (i) hard currencies (e.g. US dollars, euros, Russian rubles [RUB]) regardless of the amount and (ii) other foreign currencies in the amount exceeding USD 500,000 under one agreement.
- Advance payments under import contracts exceeding USD 5 million generally may be performed only via a letter of credit, confirmed by a first-grade bank.
- Ban on purchase of hard currency at the expense of UAH loan funds (except purchase by individuals in order to repay a debt under retail hard currency loans).

Ukraine

A number of foreign currency transactions may be undertaken only if an individual licence has been obtained from the NBU. At the same time, the NBU introduced a ban on the transfer of foreign currency under most of the NBU's individual licences. This restriction will remain in force until it is cancelled by the NBU. As an exception, legal entities are still allowed to transfer funds under an NBU individual licence in the amount not exceeding USD 50,000 per month per licence.

Additionally, the following key limitations continue to apply until adoption of a new resolution by the NBU:

- The NBU introduced a ban on remittance of funds to foreign investors due to:
 - proceeds from the sale of corporate rights, decrease of the charter capital, or withdrawal from legal entities
 - the sale of Ukrainian securities (except state bonds and other bonds via a stock exchange), and
 - the payment of dividends (except for dividends for 2014 through 2016). Monthly dividend payments for 2014 through 2016 may not exceed USD 5 million.
- The NBU prohibited remittance of foreign currency by resident guarantors (except based on an NBU individual licence).
- Residents may not undertake early repayment of loans/financial aid in foreign currency under agreements with non-residents with certain exemptions (e.g. early redemption of loans in case of conversion of their principal amount into the [authorised] share capital of the debtor, if a loan was provided by a top-rated bank [rated not lower than 'A3/A-']).
- Ukrainian residents (except for individuals) cannot purchase foreign currency if they have more than USD 100,000 on their current and/or deposit accounts as well as on special balance accounts as a security under warranties/letters of credit in all banks (with certain exceptions).
- The purchase of cash foreign currency is allowed in an amount not exceeding the equivalent to UAH 150,000 per day in one bank (with certain exceptions).
- The transfer of foreign currency abroad by individuals is allowed in the amount not exceeding (with certain exceptions):
 - UAH 15,000 per day without opening a bank account.
 - UAH 150,000 per month from a bank account.
- Withdrawal of cash from bank accounts is limited to the equivalent of UAH 250,000 in foreign currency.
- Transfers from abroad may be paid in foreign currency in the amount not exceeding the equivalent to UAH 150,000 per day. If the amount of transfer exceeds this threshold, it should be credited to the bank account in foreign currency.

Choice of business entity

Generally, a limited liability company is the most widely used corporate vehicle in Ukraine for both residents and non-residents. A limited liability company has a simple registration procedure, is inexpensive, and is easy to maintain. It also provides more flexibility in terms of repatriating dividends from Ukraine.

There is no statutory fee for the state registration of newly established legal entities and individual entrepreneurs.

Business and tax treatment of intellectual property (IP)

Ukrainian laws concerning IP rights provide for a rather developed background for IP usage. Economic rights of authors and neighbouring rights owners may be assigned or licensed. Moral rights are not transferable. Tax treatment for IP transactions is subject

to separate analysis on a case-by-case basis since the Ukrainian tax legislation provides different approaches depending on the nature of the concluded agreement. For instance, the transfer of IP may be treated as a sale of non-tangible assets, the provision of services, or a royalty agreement.

For tax purposes, the term ‘royalty’ does not include payments for the use of computer programs by the end user or for purchasing electronic copies of IP for final consumption.

Mergers and acquisitions (M&A) from a business and tax perspective

There are no specific laws regulating public takeovers or mergers in Ukraine.

The Ukrainian Tax Code provides some guidance on the tax regime for corporate mergers and acquisitions. CIT consequences of such transactions will depend on their accounting in accordance with the financial accounting rules.

Legal regime of the Occupied Territory

Temporarily (for ten years), there is an established free customs zone on the territory of Crimea, which means that all goods delivered to/from Crimea will be subject to customs clearance by the Ukrainian customs authorities.

The general rules are as follows:

- Goods delivered from the mainland of Ukraine to Crimea are subject to customs clearance with payment of export duty (if any) and 0% VAT. For tax purposes, such supplies will be considered as an export.
- Goods delivered from Crimea to the mainland of Ukraine are subject to general import procedures with payment of import duty and VAT.
- Delivery of goods in both directions is subject to veterinary, phytosanitary, ecological, and other state control measures.

Legal regime of the anti-terrorism operation

Temporarily, for the period of the anti-terrorism operation, there are certain specific regulations in respect of legal entities and individuals residing and/or doing business in the territory of the anti-terrorism operation (certain areas of Donetsk and Luhansk regions). These rules include, in particular:

- Moratorium on penalties under loan obligations.
- Moratorium on audits by the state authorities.
- Release from payments for state and/or municipal property.
- Release from penalties for non-obtainment of foreign currency under export transactions within 180 (120) days (*see Exchange controls above*).

United States (US) Foreign Account Tax Compliance Act (FATCA) rules compliance

The United States and Ukraine have reached an agreement in substance with regard to implementing the US FATCA under a Model 1 Intergovernmental Agreement (IGA), and Ukraine has consented to disclose this status. Ukraine is included into the US Internal Revenue Services (IRS) list of the countries with the IGA being treated ‘as effective’ until it is officially signed by the parties. In accordance with this status, the text of such IGA has not been released, and financial institutions in Ukraine are allowed to register on the FATCA registration website consistent with the treatment of having

Ukraine

an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

These developments further follow the Resolution of the Cabinet Ministers dated 9 November 2016 approving the text of the IGA and authorising the Ministry of Finance to sign it.

Under the IGA between Ukraine and the United States, Ukrainian financial institutions are obligated to annually report to the local competent authorities information about financial accounts held in Ukraine by US taxpayers or foreign entities in which US taxpayers hold a substantial ownership interest. This information will be further transferred to the US IRS.

Significant developments

There is a growing trend of tax reforms in the Middle East region, and this may result in changes to the tax laws in the United Arab Emirates (UAE).

Excise taxes

The United Arab Emirates announced the introduction of excise taxes during the fourth quarter of 2017. *See Excise taxes in the Other taxes section for more information.*

Value-added tax (VAT)

The Gulf Cooperation Council (GCC) (of which the United Arab Emirates is a member state) has agreed, ratified, and released the Unified Agreement for the introduction of VAT in the GCC region. *See Value-added tax in the Other taxes section for more information.*

In this respect, in October 2016, a decree was issued by the President of the United Arab Emirates for the establishment of the Federal Tax Authority, which will be responsible for management, collection, and implementation of federal taxes and related penalties, the distribution of tax revenues, and the application of tax laws.

Taxes on corporate income

The United Arab Emirates is a federation of seven Emirates: Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al-Qaiwain, Ras Al-Khaimah, and Fujairah.

Currently, the United Arab Emirates does not have a federal corporate income tax (CIT) regime; however, most of the Emirates introduced income tax decrees in the late 1960s, and taxation is therefore determined on an Emirate-by-Emirate basis.

Under the Emirate-based tax decrees, CIT may be imposed on all companies (including branches and permanent establishments [PEs]) at rates of up to 55%. However, in practice, CIT is currently only enforced in respect of corporate entities engaged in the production of oil and gas or extraction of other natural resources in the United Arab Emirates.

In addition, some of the Emirates have their own specific banking tax decrees, which impose CIT on branches of foreign banks at the rate of 20%.

United Arab Emirates

Corporate residence

Tax residence under the tax decrees of the various Emirates is based upon the French concept of territoriality. Basically, the French territoriality concept taxes profits based on territorial nexus and does not tax profits earned outside the country.

Permanent establishment (PE)

For non-resident companies, the CIT liability will depend on the existence of any kind of PE. Most of the Emirate tax decrees include a definition of a PE that generally includes a branch, management or other fixed place of business, and presence through an agent that has and habitually exercises authority to conclude contracts on behalf of such corporation. The definitions need to be considered on a case-by-case basis under the relevant and applicable tax decree.

Other taxes

Value-added tax (VAT)

There is currently no VAT or similar tax system in the United Arab Emirates.

The GCC (of which the United Arab Emirates is a member state) has agreed, ratified, and released the Unified Agreement for the introduction of a VAT system in the GCC region. Each member state will issue its own national VAT legislation and regulations in due course in accordance with the common principles outlined in the Unified Agreement. These regulations will provide guidance to taxpayers in each GCC member state on the interpretation of the national VAT legislation in that member state.

The UAE VAT law is currently being finalised and is expected to be published shortly. The UAE Ministry of Finance has launched an awareness campaign to educate various stakeholders on the application of VAT and excise tax through awareness and information workshops.

The introduction of VAT across the GCC will take effect from 1 January 2018 (although we expect some of the members states to delay implementation until mid-2018 or early 2019). We expect that companies will be able to start registering for VAT in the United Arab Emirates from October 2017 onwards. The registration threshold is currently set at 375,000 dirham (AED).

The VAT regime in the GCC has all the normal characteristics of a VAT regime in terms of differentiation of goods and services, place of taxation rules, reverse-charge mechanism, periodic filing of returns, concept of a valid VAT invoice, etc.

The VAT rate is set at 5%. In the United Arab Emirates, although VAT will apply on most goods and services, there are some likely exceptions, such as petroleum products, essential medicines, the exports of goods and services, and the healthcare and education sectors, which are expected to be subject to 0% VAT. The financial services and (residential) real estate sectors are expected to be exempt from VAT (with certain exceptions).

Customs duties

Generally, a customs duty of 5% is imposed on the cost, insurance, and freight (CIF) value of imports. Other rates may apply to certain goods, such as alcohol and tobacco, and certain exemptions may also be available.

Excise taxes

The United Arab Emirates has announced the introduction of excise tax to implement the GCC Unified Agreement on Excise Tax into its national legislation.

Excise tax is expected to be imposed on tobacco products, carbonated drinks, and energy drinks, and potentially on other 'special purpose' goods. The expected rate will be between 50% and 100%, depending on the product.

The UAE Ministry of Finance has informally communicated that excise tax will be introduced during the fourth quarter of 2017; the exact implementation date is yet to be confirmed.

Municipal or property tax

Most Emirates impose a municipality tax on properties, mostly by reference to the annual rental value. It is generally the tenants' obligation to pay the tax. In some cases, separate fees are payable by both tenants and property owners. For example, in the Emirate of Dubai, the municipality tax on property is currently imposed at 5% of the annual rental value for tenants or at 5% of the specified rental index for property owners.

Further, a registration fee may also be levied on transfer of ownership of land or property. For example, a land registration fee is levied in the Emirate of Dubai at a rate of 4% of the sale value of the property (a cost generally shared between the buyer and seller), payable to the Dubai Land Department. In Dubai, the registration fee may also apply on the transfer of shares in real property holding companies.

These levies are imposed and administered differently by each Emirate.

Stamp taxes

Currently, there are no separate stamp taxes levied in the United Arab Emirates.

Payroll taxes

Since there is currently no personal income tax (PIT) or payroll tax regime in the United Arab Emirates, there is no withholding obligation of PIT on the employers.

Social security contributions

There is a social security regime in the United Arab Emirates that applies to UAE and GCC national employees only. In most Emirates, and for a UAE national employee, social security contributions are calculated at a rate of 17.5% of the employee's gross remuneration as stated in the employment contract, regardless of free trade zone (FTZ) tax holidays. Out of the 17.5%, 5% is payable by the employee and the remaining 12.5% is payable by the employer. For other GCC nationals working in the United Arab Emirates, employee contributions are determined in accordance with social security regulations of their home country.

The liability to withhold is on the employer.

These levies and rates may be administered differently by each Emirate, and the Emirate government may also make additional contributions.

United Arab Emirates

Hotel tax and tourism levies

Most Emirates impose a hotel tax of 5% to 10% on the value of hotel services and entertainment. In addition, there may be tourist fees/charges of up to 10% levied for undertaking certain tourist/entertainment activities (e.g. events and shows).

These levies are imposed and administered differently by each Emirate.

A Tourism Dirham fee is levied in the Emirate of Dubai. This is a charge on hotel guests and tenants of hotel apartments ranging from AED 7 to AED 20 per room per night.

In addition to a charge of AED 15 per room per night, the Emirate of Abu Dhabi has introduced a municipality fee that is levied on hotel stays at a rate of 4% on the total value of the invoice. Hotels and similar establishments are responsible for collecting and remitting such fee to the Abu Dhabi Tourism and Culture Authority.

Branch income

As each Emirate has a different CIT decree, the decree of each Emirate must be consulted to determine the treatment of branches of foreign corporations.

In certain Emirates, branches of foreign banks are governed by special banking tax decrees, where they are taxed at 20% of their adjusted taxable income.

Income determination

The tax decrees of the various Emirates levy taxation on financial accounting profits. The tax decrees may provide for additional adjustments in specific situations. Currently, these adjustments may not be too relevant given that CIT is not imposed for most companies (except for upstream oil and gas companies and branches of foreign banks having operations in the Emirate) in the United Arab Emirates.

Deductions

Deductions are determined based on accounting principles and the tax decrees of the various Emirates. Currently, these deductions may not be too relevant given that CIT is not imposed for most companies (except for upstream oil and gas companies and branches of foreign banks having operations in the Emirate) in the United Arab Emirates.

Group taxation

The United Arab Emirates does not currently permit group taxation.

Tax credits and incentives

The United Arab Emirates has many FTZs that offer numerous incentives in the form of tax holidays/exemptions from CIT, PIT, and customs duties.

Free trade zones (FTZs)

Currently, there are over 30 FTZs (and business parks) in the United Arab Emirates, each having its own regulations. Businesses (and their employees) established in FTZs are generally eligible for guaranteed tax holidays for 15 to 50-year (generally renewable) periods. The FTZs also offer exemption from customs duties. The laws granting these holidays and exemptions are not consistent across the various FTZs. Each FTZ therefore needs to be considered separately.

Withholding taxes

There are currently no withholding taxes (WHTs) applicable in the United Arab Emirates.

Tax treaty network

UAE national individuals and UAE resident corporate taxpayers have access to an extensive and growing tax treaty network. These treaties may not be immediately relevant for obtaining relief from UAE taxation (as the UAE does not levy WHT or other forms of non-resident taxation); however, they may continue to allow for relief from tax in foreign countries. For completeness, the treaties currently in force are listed below. A number of other treaties are at various stages of negotiation and ratification.

Significant developments

Extensive and far reaching reforms to the United Kingdom's (UK's) corporate tax system have been made in recent years. The reforms have a stated aim of "creating a tax system that is easy to understand, simple to engage with, and hard to evade, [and] successfully supports investment in business, as well as those who work hard and save" (Financial Secretary to the Treasury, December 2015). The reforms are also intended to maintain the UK's competitive position. The main areas of reform have included:

- Reductions in the rate of corporation tax.
- Redefining the corporate tax base, including aspects of the Organisation for Economic Co-operation and Development (OECD) base erosion and profit shifting (BEPS) project.
- Policy and practice concerning tax evasion and unacceptable tax avoidance.
- Administration and collection, including plans for increased use of digital systems.

Because the UK legislative process can lag behind the announcement of proposals, certain changes are already law, others are very likely, or practically certain, to become law, whilst others are issues announced for wider consultation and future enactment into law.

Most of the reforms to tax rules are typically announced in November/December and March each year before becoming law in the Finance Act, usually in the following July. This pattern is disrupted in years of a general election. So, a truncated Finance Act 2017 became law in April 2017 ahead of the June 2017 general election. A second, and more extensive, Finance Act is expected to become law in September/October 2017. This will likely include enactment of a range of reforms previously announced, possibly together with other measures, but possibly with amendments to the original proposals. Several of those reforms are intended to be effective from 1 April 2017. Any reforms of significance, and proposals for important reforms, included in those processes, are discussed below.

In a referendum on 23 June 2016, voters in the United Kingdom chose to leave the European Union (EU) (so-called 'Brexit'). The United Kingdom invoked Article 50 of the Treaty on the Functioning of the European Union (TFEU) in March 2017, and this triggered a two year exit procedure. The implications will depend to a substantial extent on the terms on which exit is agreed and, therefore, remain unclear at this stage. The information included below assumes, for now, the continuance of the UK's membership in the European Union. Comments on the impact of leaving the European Union would be entirely speculative.

United Kingdom

Changes that have taken effect in the past year

Reforms that took effect in the past year include:

- Reduction in the rate of corporation tax to 19% with effect from 1 April 2017.
- Introduction of the apprenticeship levy of 0.5% of total payroll costs of employers in excess of 3 million pound sterling (GBP) *per annum* with effect from 1 April 2017.
- Introduction of anti-avoidance provisions in respect of hybrid mismatches from 1 January 2017.
- Introduction of UK withholding tax (WHT) on a wider range of royalty payments, and consequential amendments to the diverted profits tax rules, for payments made on or after 28 June 2016.
- The patent box rules are amended with effect from 1 April 2017 to address cases where research and development (R&D) is developed under a cost sharing arrangement.
- The extension of the scope of corporation tax to non-UK resident companies that carry on a trade of dealing in or developing UK land with effect from 5 July 2016.
- Introduction, with effect from 1 April 2017, of a corporate criminal offence of facilitating tax evasion.
- Double taxation treaty passport (DTTP) scheme was extended from 1 April 2017 to all borrowers, and provides a simplified procedure to obtain approval for the payment of interest overseas without deduction of WHTs.

Changes enacted but not yet in force

Changes enacted but not yet in force include:

- A reduced rate of corporation tax for businesses based in Northern Ireland may be introduced. This is subject to joint approval by the Northern Ireland government and the UK Treasury. The commencement date is uncertain.
- Introduction, from April 2018, of a levy on producers of soft drinks.

Consultations and proposals - ongoing

The most significant proposals, which include announced proposals and those in draft legislation, and those subject to consultations include:

Measures focused on domestic matters

- The rate of corporation tax is proposed to reduce to 17% from April 2020.
- Revised loss utilisation rules from 1 April 2017 to allow more flexible use of losses carried forward, but with a restriction on the utilisation of carried forward losses to 50% of the relevant profits. The restriction will apply only to profits in excess of GBP 5 million. For banks, the maximum loss offset will be limited to 25%.
- Relaxation of the conditions for the substantial shareholding exemption to make it simpler, more coherent, and more internationally competitive. It was originally proposed that such changes are effective from 1 April 2017.
- Continued reform of the collection of unpaid or disputed tax liabilities.
- Additional tax incentives for the creative sectors.
- A range of specific and narrow anti-avoidance rules.
- Further reforms regarding collection of taxes, application of penalties, and related issues focused on tax evasion. This includes the introduction of a 60% automatic penalty for transactions subject to the general anti-abuse rule (GAAR).
- Plans to move all tax reporting, compliance, and payments onto a digital platform by 2020.

Measures focused on international measures

- Proposed introduction from 1 April 2017 of new interest deductibility rules (BEPS Action 4), including a fixed expense ratio of 30% of UK earnings before interest, taxes, depreciation, and amortisation (UK EBITDA), a group ratio rule for highly geared groups, and an overall cap that will limit UK net interest deductions to the worldwide group's net interest expense.
- Introduction of secondary adjustments to the UK's transfer pricing legislation. In June 2016, the European Union adopted an anti-tax-avoidance Directive (ATAD), which sets out minimum standards for rules to address key international tax and BEPS-related issues: (i) deductibility of interest, (ii) exit taxation, (iii) a GAAR, (iv) controlled foreign company (CFC) rules, and (v) a framework to tackle hybrid mismatches. Member states have until 31 December 2018 to implement these provisions to come into effect from 1 January 2019 (with one additional year for exit charges and the potential for some countries to delay the interest deduction restrictions). The United Kingdom already has a GAAR and CFC rules, and, as noted above, rules to address hybrid mismatches and interest deductibility will likely enter into effect during 2017. It remains to be seen whether the United Kingdom will introduce legislation to implement the exit tax requirements of the ATAD.
- In October 2016, the European Commission (EC) published four draft directives as part of an EU corporate tax reform package. The proposals include: a common corporate tax base (CCTB) to harmonise the corporate tax base across the European Union from 1 January 2019; a consolidation of the results of entities in a corporate group in the European Union under a single filing and apportionment of the aggregate profits to individual member states via a common consolidated corporate tax base (CCCTB) from 1 January 2021; measures to address hybrid mismatches in relation to non-EU countries from 1 January 2019; and extending existing double taxation dispute resolution mechanisms in the European Union by 31 December 2017. It remains to be seen whether these proposals will be adopted, and, if so, whether there will be amendments to the content or timetable, and how this will interact with the UK's negotiations for leaving the European Union.

Taxes on corporate income

Resident companies are taxable in the United Kingdom on their worldwide profits (subject to an opt-out for non-UK permanent establishments [PEs]), while non-resident companies are subject to UK corporate tax only on the trading profits attributable to a UK PE plus UK income tax. In practice, for many companies, the application of a wide range of tax treaties, together with the dividend exemption, makes the UK corporate tax system more like a territorial system.

General corporation tax rates

The normal rate of corporation tax is 19% for the year beginning 1 April 2017. It is proposed that this rate will fall to 17% for the year beginning 1 April 2020.

Where the taxable profits can be attributed to the exploitation of patents, a lower effective rate of tax applies. The rate is 10% from 1 April 2017. Profits can include a significant part of the trading profit from the sales of a product that includes a patent, not just income from patent royalties. This scheme was revised from June 2016 (see *Patent box in the Tax credits and incentives section for more information*).

United Kingdom

Special corporation tax regimes

Apart from the four specific exceptions noted below, there are no special regimes for particular types or sizes of business activity; in general, all companies in all sectors are subject to the same corporate tax rates and rules. However, certain treatments and reliefs do vary according to size, including transfer pricing, R&D credits, and some targeted anti-avoidance rules.

For large companies, there are some additional compliance and reporting requirements. Some elements of Her Majesty's Revenue and Customs' (HMRC's) organisational structure and approach to avoidance and compliance are arranged by size of business (e.g. Large Business Strategy).

Oil and gas company regime

Profits that arise from oil or gas extraction, or oil or gas rights, in the United Kingdom and the UK Continental Shelf ('ring-fence profits') are subject to tax in the United Kingdom in accordance with rates applicable in 2006, i.e. a full rate of 30% and a small profits rate of 19%. Such activities also attract 100% capital allowances on most capital expenditure. A supplementary tax charge of 10% applies to 'adjusted' ring fence profits in addition to normal corporation tax.

Petroleum revenue tax is now set at 0% but is retained for technical and historic reasons in relation to certain old oil fields.

Life insurance company regime

Life insurance businesses are also taxed under a special regime, which effectively includes different corporate tax rates as well as special rules for quantifying profits.

Tonnage Tax regime

Companies that are liable to corporation tax and operate qualifying ships that are strategically and commercially managed in the United Kingdom can choose to apply Tonnage Tax in the place of corporation tax. Tonnage Tax is an alternative method of calculating corporation tax profits by reference to the net tonnage of operated ships. The Tonnage Tax profit replaces the tax-adjusted profit/loss on a shipping business and certain related activities, as well as the chargeable gains/losses made on Tonnage Tax assets. Any other profits are taxable under the normal corporate tax regime.

Banking sector

A supplementary tax is applicable to companies in the banking sector at 8% on profits in excess of GBP 25 million. Also, loss utilisation is restricted for banks; it is proposed that, from 2017, carried forward trading losses can be set against only 25% (previously 50%) of profits in a period.

Income tax for non-resident companies

A non-resident company is subject to UK corporation tax only on the trading profits of a UK PE. Any other UK-source income received by a non-resident company is subject to UK income tax at the basic rate, currently 20%, without any allowances (subject to any relief offered by a double tax treaty [DTT], if applicable). This charge most commonly arises in relation to UK rental income earned by a non-resident landlord (NRL). The United Kingdom therefore operates an NRL scheme that requires the NRL's letting agent or tenants to withhold the appropriate tax at source unless they have been notified that the NRL has applied for and been given permission to receive gross rents.

Diverted Profits Tax (DPT)

DPT is separate from other corporate taxes. It is levied at 25% (or 55% in the case of UK ring fence operations, i.e. broadly oil extraction operations) on diverted profits (as defined) and may apply in two circumstances:

- where groups create a tax benefit by using transactions or entities that lack economic substance (as defined), and/or
- where foreign companies have structured their UK activities to avoid a UK PE.

Companies are required to notify HMRC if they are potentially within the scope of DPT within three months of the end of the accounting period to which it relates (extended to six months for the first year). The legislation is complex and subjective in places, and has the potential to apply more widely than might be expected.

Local income taxes

There are no local or provincial taxes on income, although legislative powers are in place to introduce a reduced rate of corporation tax in Northern Ireland. It is not clear when the reduced rate will be introduced or at what rate.

Corporate residence

UK incorporated companies are generally treated as UK resident. However, companies resident in the United Kingdom under domestic law, but treated as solely resident in a different country under that country's DTT with the United Kingdom, are not treated as UK resident for the purposes of UK domestic tax law.

Additionally, subject to the above exception, companies incorporated overseas are also treated as UK resident if their central management and control is situated in the United Kingdom. This means if the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business, is in the United Kingdom.

Permanent establishment (PE)

For non-resident companies, the liability to corporation tax depends on the existence of any kind of PE through which a trade is carried on. The meaning of PE for UK tax purposes is set out in statute; it is largely based on the OECD Model Tax Convention definition, but is not identical in all respects. Subject to the terms of the relevant DTT, a non-resident company will have a PE in the United Kingdom if it either:

- has a fixed place of business in the United Kingdom through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in the United Kingdom.

A fixed place of business includes (but is not limited to) a place of management; a branch; an office; a factory; a workshop; an installation or structure for the exploration of natural resources; a mine, oil or gas well, quarry, or other place of extraction of natural resources; or a building, construction, or installation project. However, a company is not regarded as having a UK PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

United Kingdom

The OECD, under Action 7 of its BEPS Action Plan, has recommended a widening of the scope of the PE definition in Article 5 of the OECD Model Tax Convention. It is intended that the amended definition will be incorporated into bilateral double taxation conventions via a multilateral instrument. The United Kingdom has not yet, however, announced any changes to the domestic statutory definition of PE to reflect the OECD recommendations.

Special rules exist to explain how the PE's profits should be evaluated for UK tax purposes (*see the Branch income section for more information*).

Other taxes

Value-added tax (VAT)

The standard VAT rate of 20% applies to most goods and services, apart from domestic fuel and power and certain other reduced-rate supplies, which are subject to VAT at 5%.

Certain small traders (supplies less than GBP 150,000 *per annum*) with a limited range of expenses may adopt a special flat rate scheme, which computes VAT at a sector-specific flat rate.

Most exports, most food, most public transport, books and publications, and certain other essential goods and services are zero-rated. Some supplies are exempt, the main categories being the grant of certain interests in land, insurance, financial services, betting and gaming, education, certain sports services, cultural services, and health and welfare. Zero-rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while that incurred in making an exempt supply cannot.

VAT is chargeable on the supply of most goods and services made in the United Kingdom by 'taxable persons' in the course of business, when their taxable turnover exceeds the registration thresholds. Taxable persons include individuals, companies, partnerships, clubs, associations, or charities.

Taxable persons who are not normally resident in the United Kingdom, do not have a business establishment in the United Kingdom, and, in the case of companies, are not incorporated in the United Kingdom, but who make taxable supplies, sales to unregistered persons in the United Kingdom, or acquisitions of goods in the United Kingdom above the relevant limits, may be required to register and account for VAT in the United Kingdom.

If the value of taxable supplies is over a specified limit, registration for VAT is compulsory unless the taxable supplies made are wholly or mainly zero-rated, in which case it is possible to apply for exemption from registration. A zero VAT registration threshold applies for businesses not established in the United Kingdom.

The rules applying to VAT and territoriality are different to those applying to direct tax in that they derive from the principles of the place of supply in EU law, as enshrined in EC VAT Directives. Having determined that a supply of goods or services has taken place, the second condition to be determined, if the transaction is to fall within the scope of UK VAT, is whether the supply takes place within the United Kingdom. The place of supply rules are different for goods and for services. A person or business

belonging outside the United Kingdom, with no place of business in the United Kingdom, may, nevertheless, be liable to UK VAT registration where the place of supply of those goods or services is in the United Kingdom.

For goods, the basic rule is that a supply of goods is taxable in the territory where those goods are physically located at the time of supply. Hence, if goods are supplied in the United Kingdom by a non-established taxable person, there will still be a liability for VAT purposes, and the person must register for VAT in the United Kingdom if the taxable supplies exceed the current UK VAT registration thresholds. A zero VAT registration threshold applies for businesses not established in the United Kingdom.

For services, the basic rule is that services are treated as made where the customer 'belongs' or is established for VAT purposes, and the customer is responsible for accounting for the VAT due via the reverse-charge procedure. However, this is subject to a number of special rules and exceptions. Determining where a business is established for VAT purposes is based on EU law criteria.

For business-to-consumer (B2C) supplies, the basic rule is that services are treated as made where the supplier 'belongs' or is established for VAT purposes. B2C supplies of telecommunications, broadcasting, and electronic services are taxed where the customer is located or is normally resident.

VAT returns and payments

VAT returns must be completed at pre-set intervals (usually every three months). Larger companies may be required to file monthly returns or make monthly payments on account. All businesses are required to file VAT returns online and make electronic payments. Smaller enterprises can apply for annual returns. VAT returns are usually required to be filed 30 days after the end of the period.

Annual accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

Cash accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

In addition, a flat rate scheme operates for small businesses and is intended to simplify VAT accounting procedures.

Customs and excise duties

Many goods imported into the United Kingdom from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in the United Kingdom. Examples include the following:

Products	Excise duty (GBP)
Road fuels	0.5795 per litre
Cigarettes	207.99 per thousand (plus 16.5% of the retail price) or 268.63 per thousand if greater
Tobacco (hand rolling)	209.77 per kg
Wines (5.5% to 15%)	2.89 per litre

United Kingdom

Products	Excise duty (GBP)
Spirits	28.74 per litre of pure alcohol included

Soft drinks industry levy

The government has introduced legislation in Finance Act 2017 to encourage the reformulation of drinks that are high in added sugar by levying a unit charge on UK producers and importers of such drinks. There will be an exemption for smaller producers. The levy will come into effect in April 2018.

Stamp taxes

Stamp duty is charged at 0.5% on instruments effecting sales of shares. Agreements to sell shares usually attract stamp duty reserve tax (SDRT) at 0.5%. The liability to SDRT may be cancelled by paying the stamp duty due on a stock transfer form (or other transfer instrument) executed in pursuance of the agreement. Stamp duty is not usually charged on an issue of shares. Issues or transfers of shares to clearance services or depositary receipt systems may attract SDRT at 1.5% (stamp duty at 1.5% may be payable on instruments effecting transfers of shares to such services or systems). Transfers of bearer shares also attract stamp duty at 1.5%.

Acquisitions of non-residential or mixed land and buildings in England, Wales, and Northern Ireland are charged stamp duty land tax (SDLT) at rates of up to 5%. Acquisitions of residential property by companies and similar non-natural persons and by individuals acquiring second homes are charged at rates of up to 15% (whereas acquisitions by individuals who do not own any other properties or who are replacing their main residence are capped at 12%). Grants of new commercial leases are charged SDLT at 1% of the net present value of the rents payable in excess of GBP 150,000 up to GBP 5 million and 2% of the net present value in excess of GBP 5 million. SDLT is also payable at up to 5% on any premium paid. Grants of residential leases are charged at 1% of the net present value of the rents payable in excess of GBP 125,000 plus up to 15% on any premium paid.

Land and buildings in Scotland are subject to Scottish land and building transactions tax (LBTT) in place of SDLT. Rates are graduated up to 12%, which applies to a transaction value for residential properties in excess of GBP 1 million (or up to 15% where the additional 3% for second homes or buy-to-lets applies).

Annual tax on enveloped dwellings (ATED) and related capital gains tax charge

An annual tax on enveloped dwellings is charged on the acquisition and holding of high-value residential properties (property over GBP 500,000) through a company or other 'non-natural' person. Broadly, this will be based on the 1 April 2012 value, in bands starting at GBP 500,000 and increasing to GBP 20 million. The charge on a property worth GBP 20 million or more cannot exceed GBP 220,350 *per annum*. The minimum charge is GBP 3,500 for a property valued at GBP 500,000.

In addition, a disposal of such a property or an interest in such a property by a company or other non-natural person will be subject to capital gains tax at 28% on any gains accruing after 5 April 2013. Relief will be available from ATED and the capital gains tax extension for most property used for commercial, charitable, or public use.

Payroll taxes

Other than employers' national insurance contributions (NICs) (*see below*), there are no other payroll taxes, the burden of which falls on the employer. Employers are, however, responsible for deducting the employees' income tax liability at source, through the pay-as-you-earn (PAYE) system. The employer may also be required to deduct other amounts from pay (e.g. court orders).

Employers' national insurance contributions (NICs)

Employers are obligated to pay NICs based on a percentage of each employee's earnings. For the year ending 5 April 2018, the rate is 13.8% on all earnings above GBP 157 per week. Businesses are exempt from the first GBP 3,000 *per annum* (maximum) of this liability.

Apprenticeship levy

From 1 April 2017, employers will pay 0.5% of their total payroll in excess of GBP 3 million to create a fund to support apprenticeships.

Pension protection fund levy

All defined benefit pension schemes pay a levy, based on pension fund liabilities and the financial risk of the employing company. This levy funds a compensation fund for pensioners and employees of failed schemes.

Bank levy

A bank levy takes the form of an annual tax on certain liabilities of most UK-based banks and building societies. The tax is levied at the following annualised rates (for 2017):

- 0.17% of a bank's short-term relevant liabilities.
- 0.085% of long-term equity and liabilities.

Staged reductions down to 0.105% and 0.05% by 2021 are proposed.

The levy is not charged on the first GBP 20 billion of chargeable liabilities and is not deductible for corporation tax purposes.

Bank profits are also subject to an 8% supplementary corporation tax charge on profits above GBP 25 million from 1 January 2016.

Insurance premium tax (IPT)

IPT at the standard rate of 10% (increasing to 12% from 1 July 2017) applies to premiums for most general insurance, such as for buildings and contents and motor insurance, where the insured risk is in the United Kingdom. Life assurance and other long-term insurance remain exempt, though there are anti-avoidance rules surrounding long-term medical care policies. As an anti-avoidance measure, a higher rate of 20% applies to insurance sold by suppliers of specified goods or services, e.g. mechanical breakdown insurance, travel insurance (irrespective of supplier), insurance sold with TV and car hire, and 'non-financial' guaranteed asset protection (GAP) insurance sold through suppliers of motor vehicles or persons connected with them. Further anti-avoidance rules affect administration or similar fees connected with contracts of insurance, charged under separate contracts by brokers and other intermediaries.

United Kingdom

Airport passenger duty

Individuals leaving the United Kingdom by air are obligated to pay a duty, which, in practice, is invariably included in the cost of the air ticket. Typically, such taxes are borne by employers in respect of employee's business travel. Further, significantly higher rates apply for travel in certain 'executive jets'.

Environmental taxes

There are several environmental taxes, including the following.

Landfill tax

The landfill tax is a tax on waste disposal in landfill sites. The standard rate increased to GBP 86.10 per tonne from 1 April 2017. The reduced rate for inert waste is GBP 2.70 per tonne.

Climate change levy

The climate change levy is a tax on energy used in the United Kingdom, such as electricity, gas, coal, etc., and is charged at rates that depend on the nature of the fuel used. There are reduced rates and exclusions from the charge, e.g. supplies to domestic or charitable users, renewable source energy, and energy-intensive sectors committing to specific emissions/energy-saving measures.

Aggregates levy

The aggregates levy is a tax on the extraction or importation of sand, gravel, and crushed rock for commercial exploitation in the United Kingdom. The rate of tax is GBP 2.00 per tonne.

Carbon Reduction Commitment

The Carbon Reduction Commitment is a mandatory scheme for large businesses with financial, reputational, and behavioural drivers aimed at improving energy efficiency.

Local municipal taxes

Local taxes are not based on income, but rather are levied on the occupiers of business property by reference to a deemed annual rental (or 'rateable') value for the property concerned. These taxes (known as 'business rates') are administered by regional local government authorities rather than central government. The amounts paid are deductible for corporation tax purposes, provided they meet all the usual requirements for deductibility.

Branch income

Tax rates on the profits of UK PEs of non-resident corporations are the same as for domestic corporations.

There are specific rules setting out how the PE's profits should be evaluated for UK tax purposes, which broadly seek to treat the business as if it were a standalone company. Financing arrangements between the PE and head office must be disregarded, and there are special rules for banks to stop under-performing loans being allocated to the UK PE in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

Tax is not generally withheld on transfers of profits from a UK PE to the head office. However, Finance Act 2016 amends the rules for deduction of UK income tax as tax at

source on royalty payments made after 15 September 2016, which could result in tax being withheld on royalty payments made by a foreign company in connection with activities carried on through a UK PE.

Taxable income determination

A UK resident company is taxed on its worldwide total profits.

Total profits are the aggregate of (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets.

The main sources of income are (i) profits of a trade, (ii) profits of a property business, (iii) non-trading profits (or losses) from loan relationships, mainly interest receivable or payable, (iv) non-trading gains (or losses) on most intangible fixed assets, and (v) non-exempt dividends or other company distributions. The amount of income for sources (i) to (iv) is measured based on the company's accounts, with specific adjustments. Taxable income from non-exempt dividends and calculating chargeable gains or income from other sources is based on actual amounts.

The rules for measuring the gross income are different for each category, and there are subtle differences in the rules about tax deductions and how gains are calculated. Because of this continuing reliance on taxing companies on a 'source-by-source' basis, it is difficult to explain the rules about income determination and deductions as two wholly separate topics.

Basic rules for accounts-based sources

The main source of profits is often from trading. A company's trading profits are based on its worldwide profit before tax in its accounts. Adjustments are made for non-trading receipts (such as dividends from other companies and income from property) and non-deductible expenditure (such as capital expenditure). Depreciation for tax purposes (known as capital allowances) is calculated and substituted for the depreciation charged in the accounts. A number of other statutory adjustments are made; three important ones are that pension contributions, deferred pay, and benefits in kind are broadly deductible only when paid, that a deduction is available for the notional cost of certain share awards to employees, and that, where certain acquired intangibles (but, in particular, not goodwill and customer-related intangible assets acquired on or after 8 July 2015) are not depreciated in the accounts, a 4% flat-rate deduction can usually be claimed. There are many other adjustments.

Similar principles apply in relation to the calculation of profits of a property business.

Financial profits from a company's trading and non-trading loan relationships and related matters are usually based on the accounts, and the distinction between 'capital' and 'revenue' receipts and deductions is not relevant. Instead, all credits and debits in the accounts are aggregated in order to find the net profit or deficit. Certain statutory adjustments have to be made, which include an interest capping limitation ('debt cap').

For traders, any profit or loss on loan relationships, and/or on intangibles, is generally included within the trading profits. If the company doesn't have a trade, then loan relationships and intangibles are treated as a separate source of income or loss.

United Kingdom

Income losses

Where a loss arises in respect of a particular source of income, there are detailed rules regarding the possible offset of the loss. Carryback and sideways reliefs are often allowed within limits; carryforward is generally allowed and carried forward losses do not time expire. Losses can also be utilised by other group companies (*see the Group taxation section*).

More specifically, dealing with the main sorts of income losses,

- trading losses may be set off against any other source of profit or gains in the same year, may be carried back one year (three years on the cessation of the trade) against any other source of profit or gain, or may be carried forward without time limit against profits of the same trade only
- property losses may also be set off against any other source of profit or gains in the same year, or may be carried forward without time limit against profits of any sort; they cannot, however, be carried back, and
- non-trading deficits (i.e. interest and financing losses) can again be set off against any other source of profit or gains in the same year, may be carried back one year against non-trading credits (i.e. interest and financing profits), or may be carried forward without time limit against non-trading profits.

Non-trading companies may deduct non-capital management expenses incurred in managing their investments from their total profits. Any excess management expenses can be carried forward without limit to set against profits in future years.

While income losses can generally be offset against capital gains of the same accounting period, capital losses are never available for offset against any type of income.

There are complex anti-avoidance rules that restrict the utilisation of all types of losses where there is a change in ownership of the company. Specific rules can also deny or limit loss relief or deductions arising from brought forward losses or potential losses where certain conditions are met.

Proposals were made in March 2016 for significant reform to the treatment of losses from April 2017. Whilst these proposals are not yet law (because of delays in the legislative process), it is anticipated that these reforms are likely to be implemented, and that the effective date will be 1 April 2017. However, further changes to the provisions may be made before implementation. The reforms include:

- allowing losses to be more flexibly set off against other income, including setting carried forward loss against taxable income of other UK group companies, and
- for companies with profits over GBP 5 million, restricting the utilisation of losses brought forward to GBP 5 million plus 50% of the current year profits in excess of that amount.

Inventory valuation

In general, the book and tax methods of inventory valuation will conform. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

Capital gains

Gains on capital assets are taxed at the normal corporation tax rates. The chargeable gain (or allowable loss) arising on the disposal of a capital asset is calculated by deducting from gross proceeds the costs of acquisition and subsequent improvements, plus the incidental costs of sale and indexation allowance. Indexation allowance compensates for the increase in costs based on the percentage rise (if any) in the UK retail prices index to the date of disposal. Indexation allowance is, however, limited; it cannot create or increase a capital loss, it can only reduce or eliminate a chargeable gain. Generally, these calculations must be done in sterling, so any foreign exchange gains and losses will be taxed (or relieved) on disposal.

Special rules apply to assets held at 31 March 1982.

Most acquisitions and disposals between UK group companies are treated as made on a no gain no loss basis (i.e. at base cost plus indexation). Otherwise, acquisitions from, or disposals to, affiliates are treated as made at fair market value, as are other acquisitions or disposals not at arm's length.

Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a company's accounting period may be carried forward without limitation but may not be carried back. There is no ability to surrender capital losses to fellow group members, but gains or losses arising on a particular asset can be allocated to another group member. So, the capital losses of one company can sometimes be set against the gains of a fellow group member in the same or subsequent period.

There is a good deal of anti-avoidance legislation concerning the computation of chargeable gains, notably to stop losses being created or gains avoided where assets are depreciated by intra-group transactions, or where losses are 'bought in' from third parties.

Gains realised on certain types of assets can be deferred where all or most of the proceeds are reinvested in other assets of those types within a specified period (generally three years). The 'rolled-over' gain then crystallises as and when the latter assets are sold. At present, the main asset categories qualifying for roll-over are land and buildings used for a trade.

Most disposals by trading groups of shareholdings of 10% or more are exempt from tax. The main exceptions will be those of non-trading subsidiaries or subgroups, or of companies acquired within the previous year. Note that gains on goodwill and other intangibles acquired after March 2002 are taxed as income, not as capital gains.

Dividend income

Most foreign and UK dividends received by UK companies are exempt from corporation tax; however, one of several criteria has to be met, but these are widely drawn (one test, for example, is that the recipient controls the payer). For non-exempt, foreign-source dividends, double tax relief (DTR) will be available on a dividend-by-dividend basis. It is unusual for companies to be taxed on UK dividends because of the breadth of the exemption; however, where they are taxed, there is no concept of DTR for UK dividends.

Royalty income

Royalty income received by corporates will normally be taxed in the same way as other forms of income. To the extent it arises from a trade, it is taxed as trading profits.

United Kingdom

Royalties from intellectual property (IP) not comprising a trade will be taxed as income from intangible fixed assets.

Realised and unrealised exchange gains/losses

Unrealised exchange gains and losses tend to arise on debts and derivatives; they are then taxed or allowed, together with realised amounts, on an accounts basis in the same way as other debits and credits arising out of loan relationships. Where gains or losses arise on other payables or receivables, to a trader or property investor, they will again generally be taxed or allowed on an accounts basis. For a trader, the taxable or allowable amount will become simply part of the trading profit or loss; for other companies, it will become a separate source of taxable profit (a 'non-trading credit') or loss (a 'non-trading deficit').

Where unrealised differences arise on other capital assets, they will not generally be taxable or allowable at that stage; instead, the exchange difference becomes part of the computation and is effectively taxed or allowed when the asset is disposed of and any difference is realised.

Partnership income

In broad terms, if companies participate in UK partnerships (whether general partnerships, limited partnerships, or limited liability partnerships [LLPs]), they will be taxed on a flow through basis. This will, in very broad terms, mean that UK corporate partners will be taxed on trading, property, or financing income as it arises in the partnership accounts, and on non-exempt dividends on a receipts basis. There are specific anti-avoidance provisions in respect of LLPs with both corporate and individual partners.

When considering overseas entities, the UK authorities will not be bound by how the entity is classified in its country of origin. Case law has determined a number of matters that should be considered when establishing whether a non-UK entity should be taxed in the United Kingdom as if it were a company or a partnership. HMRC also maintains a public list of non-UK entities and the decisions it has previously made regarding their classification. However, if the parties have flexibility regarding the constitution of such entities, then their classification may be viewed differently, either by HMRC or the courts. This area is complex; consequently, specialist advice should be sought.

Foreign income

In principle, the United Kingdom taxes on a worldwide basis, although non-UK PE profits can be exempted from UK taxation by election. The election applies to all accounting periods starting after the election is made and to all the PEs of the company (so it cannot be made on a PE-by-PE basis). The election is irrevocable and has the effect of exempting all profits of the PE, including gains, subject to certain adjustments. Equally, relief for PE losses will be denied. Profits will be measured by reference to DTTs, or, in absence, OECD principles. The adjustments include:

- Gains attributable to a foreign branch of a close company are not exempt.
- Profits attributable to a foreign branch of a small company are not exempt if the PE is in a territory other than a 'full treaty territory' (broadly, a territory that has a DTT with the United Kingdom that has an exchange of information article).
- If the branch concerned has previously been in a loss making position, loss transitional rules may prevent the exemption being available immediately.

- To the extent the branch profits are considered to have been artificially diverted from the United Kingdom, the anti-diversion rule will stop them qualifying for the exemption (akin to the CFC rules that apply to profits of subsidiaries).

Where no election is made, profits from non-UK PEs are computed and taxed in the normal way for UK tax resident companies. However, UK tax will generally be reduced by credit for local direct taxes paid, either under a treaty or via the UK's unilateral relief rules (*see Foreign tax credit in the Tax credits and incentives section for more information*).

General rules for deductions

As noted above, the UK tax system requires taxable profits to be calculated by aggregating (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets. This approach gives rise to a particularly complicated regime so far as deductions are concerned. Expenses are usually allocated to the source of income (or occasionally by reference to income generally) or to the particular gain to which they relate. The rules governing their deductibility differ according to whether the expense relates to a capital gain or to income, and, indeed, according to the particular source of income concerned. For example, there is a considerable difference in the manner in which tax relief is given for expenses incurred by companies trading in property as compared to those that invest in property. The regime also has a large number of specific rules dealing with particular types of deductions that take priority over the more general rules for each type of income.

We have therefore set out the general rule for trading expenses, being the most common category, and, following that analysis, considered some specific common exceptions.

General rules for trading expenses

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for the purposes of the company's trade, provided those costs are not capital in nature and are charged to the profit and loss account. There is a significant amount of case law surrounding whether expenses have been incurred wholly and exclusively for the purposes of a company's trade and whether they are capital or not.

Relief is generally given in the period the expenses are accrued in the accounts, subject to some specific exceptions. In particular, contributions to a registered pension scheme are only allowed on a 'paid' basis, with some further provisions under which some contributions may be spread over a number of years; and if bonuses and other staff costs are paid out more than nine months after the end of the accounting period in which they are accrued, they are only allowed on a paid basis.

The general rule is made subject to a range of specific statutory provisions, some of which allow deductions and others of which limit them; some of the more important of these are discussed below, but there are many others. One example is that the costs of business entertainment cannot generally be deducted.

Depreciation and amortisation

Depreciation of fixed assets (other than of goodwill and other assets within the intangible fixed asset regime, *see below*) is not allowable as a deduction from any source of income. However, traders, and most non-traders, are instead allowed specified rates of annual deduction in respect of specified classes of assets, together referred to as

United Kingdom

'capital allowances', that are deducted in calculating trading income for traders and (broadly) against income derived from the use of the fixed assets for non-traders.

Capital allowances for machinery and equipment can be disclaimed in whole or in part, thereby deferring allowances.

In the period of expenditure, capital allowances are available, generally at 18% of the cost of machinery and equipment acquired for use in a trade or property rental business; thereafter, capital allowances are taken generally at 18% *per annum* on the reducing-balance basis. With some exceptions, the rate of capital allowances for machinery and equipment with an expected useful life when new of at least 25 years is 8%. This 8% rate also applies to certain integral features in buildings and thermal insulation.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 200,000 per year of most qualifying expenditure. This is restricted to a single allowance for groups of companies or associated businesses.

Capital allowances are given on cars at rates dependent on emission levels.

Enhanced allowances, typically at a rate of 100%, are available for expenditure on certain energy saving plant and other specific categories. The products and technologies supported by this regime are reviewed and updated regularly.

No capital allowance is normally allowed on buildings, apart from certain machinery and equipment embodied in the fabric of the buildings. In some buildings (e.g. hotels, retail, offices), such deductions may be significant.

Capital allowances may also be available in respect of the cost of the acquisition of mineral assets and extraction, generally at the rates of 10% and 25%.

Excess capital allowances are generally recaptured on disposal. The recapture is calculated on a 'pool' basis for most machinery and equipment, in which case there is no recapture unless the sale proceeds exceeds the total tax written down value of the pooled assets.

Where assets are leased, capital allowances are generally available to the lessor rather than the lessee. The rate of capital allowance of most plant or machinery leased to non-residents is generally restricted to 8%, but in some cases to nil.

Intangible fixed assets

A special regime applies to intangible assets, such as patent rights, know-how, and trademarks, and (prior to 8 July 2015) goodwill. Royalties are generally deductible on an accounts basis, and, except in relation to 'grandfathered' assets owned by the group on 31 March 2002, the accounts' amortisation of intangible assets is also deductible (with an option to take a flat 4% deduction even if not amortised in the accounts). Traders will take the deductions in computing trading income; non-traders will create a 'non-trading loss on intangible fixed assets' that can be relieved as a loss against any profits of the year, carried back one year, or carried forward indefinitely.

With effect for acquisition of goodwill and customer-related intangibles on or after 8 July 2015, amortisation, impairment, and certain other charges will not be deductible

for tax. Subsequent profits and losses on disposals of such goodwill remain taxable/deductible.

Income costs relating to R&D are normally deductible in any event, but there is a special incentive connected with R&D that generally allows additional tax relief (*see the Tax credits and incentives section for more information*).

Management expenses

Holding companies and companies with investment business can deduct expenses if they are expenses of managing the company's investment business and are not capital in nature. Such costs would typically include audit fees, directors' costs, rent, local rates, and office costs. These costs can be set against any sources of profit the company may have, including gains and financing income.

If the company has inadequate income, excess expenses can be surrendered as group relief or carried forward to set against future income, with no time limit.

Many of the specific rules on the deduction of trading expenses also apply to management expenses. Many rules giving traders specific deductions for certain costs also apply, but this is not always the case.

Employee share schemes

The actual and deemed costs of an employing company for the deemed cost of providing shares or options to employees is usually deductible, depending on the nature of the share plan and the accounting. This will generally allow a deduction to a subsidiary company whose employees receive shares or options in the parent company.

Funding costs

Funding costs (primarily fees and interest) are broadly deductible on an accounts basis, even if capital in nature, but subject to thin capitalisation constraints (with no explicit safe harbours) and a worldwide interest cap based on the group's external debt levels (*but see the proposal to replace this from April 2017 below*). This extends to foreign exchange deductions relating to debts owed and receivable.

Traders will generally take the deductions in computing trading income (which is also accounts based). Deductions relating to loans not used for trading purposes will give rise to 'non-trading deficits' that, if not group relieved, can be offset against profits of that year generally, carried back one year (against that year's funding profits), or carried forward indefinitely against non-trading profits.

There are complex and specific rules dealing with financial instruments, derivatives, cross-border transactions, etc.

There is a proposal to introduce, from 1 April 2017, a fixed ratio limiting corporate tax deductions for net interest expense to 30% of UK EBITDA, and a group ratio rule for highly geared groups. This will replace the worldwide interest cap and will often operate to reduce the amount of tax deductions achieved by UK taxpayers. Whilst these proposals are not yet law (because of delays in the legislative process), it is anticipated that these reforms are likely to be implemented, and that the effective date will be 1 April 2017. However, further changes to the provisions may be made before implementation.

United Kingdom

Bad debts, provisions, and reserves

Provisions for future costs can be deducted for tax purposes if they:

- are in respect of allowable revenue expenditure
- are made in accordance with acceptable accounting practice
- do not conflict with any statutory rule governing the timing of relief (e.g. in relation to payment of staff costs), and
- are estimated with sufficient accuracy.

This rule extends to bad debts on trading account. Generally, however, bad debts are dealt with under the 'loan relationships' rules for financing costs and financing income. The rules there, however, are broadly the same; if the bad debt can be identified specifically enough to allow a bad debt provision that satisfies UK accounting standards, it should be deductible.

Charitable donations

Most donations to charities by companies are deductible.

Fines, penalties, and bribes

Any payments that constitute a criminal offence (e.g. a bribe) are not deductible for tax. Fines and penalties imposed for breaking the law are also not deductible, although a deduction is usually available for legal costs incurred in defending such an action. Usually, there is no deduction for civil penalties, interest, and similar surcharges (e.g. relating to VAT). Fines for regulatory breaches are not allowed for tax, but the costs of compensating customers, etc. are usually deductible.

Damages that are compensatory rather than punitive (e.g. damages for defamation payable by a newspaper company) are often deductible, as are payments for breach of contract. Payments to employees for wrongful dismissal, etc. are usually deductible.

Taxes

Local municipal taxes (business rates) may be deducted from taxable income.

Net operating and capital losses

See Income losses above for a description of the treatment of income losses and capital losses.

Payments to foreign affiliates

There are no special rules for payments to foreign affiliates, so their tax treatment follows the basic rules for deductions set out above. The transfer pricing rules will impose an arm's-length price.

Group taxation

Each individual corporate group member is required to submit their own tax return on a stand-alone basis, with the exception of the election available with respect to VAT (*discussed below*). However, there are a variety of ways in which one's relationship with fellow group members is recognised in the UK tax system for the purposes of corporation tax, VAT, SDLT, and stamp duty.

Corporation tax

The corporation tax system includes a number of measures that advantage UK members of qualifying groups, all of which are subject to anti-avoidance measures.

Operating taxable profits and losses arising in the same period can usually be offset between UK resident 75% affiliates within a worldwide group. This extends to offsetting the UK profits attributed to a UK PE of a non-UK resident group member. There are some restrictions, primarily where one of the two companies is not an economic 75% subsidiary of the group or is subject to arrangements under which it might leave the group.

Intra-group transfers of capital assets between UK companies, including UK PEs, are normally tax-free, though the definition of group for these purposes is slightly different than the definition of group relief for losses. This treatment is also extended to intra-group transfers of loan relationships, derivatives, and intangibles. There is generally a 'degroupping' charge if the transferee company leaves the group within six years.

There is no automatic offset of capital gains and losses where these arise in different group companies, but it is normally possible for offset to be arranged either by actual transfer of the asset prior to disposal or by election.

A UK resident group company is potentially able to claim group relief for income losses of a non-UK subsidiary that is resident in the European Economic Area (EEA) or has incurred the relevant losses in a PE within the EEA, provided that all possibilities of non-UK relief for the losses have been exhausted and future relief is unavailable.

In addition, the corporation tax system also has a number of measures that seek to prohibit groups unfairly manipulating the tax system by shifting profits between group members (either internationally or within the United Kingdom) in a way that is considered unacceptable.

A debt cap limits the aggregated UK tax deductions group members may claim for finance costs to the level of a group's external finance expense, although proposals have been made to replace this with a fixed ratio interest expense limit. *This is discussed under Funding costs in the Taxable income determination section.*

VAT

Group companies can, subject to certain requirements, elect to account for VAT as if they were one taxable person; where this is done, no VAT is charged on intra-group supplies of goods or services. The registration is made in the name of the representative member, who is responsible for completing and rendering the single return on behalf of the group. All the companies are jointly and severally liable for any VAT debts. VAT grouping is subject to detailed anti-avoidance provisions.

Stamp duty and SDLT

Transfers of shares or real estate within worldwide 75% groups are generally exempt from stamp duty or SDLT, respectively. For SDLT, the relief can be retrospectively withdrawn in certain circumstances, primarily where the transferee leaves the group within three years of the transfer.

United Kingdom

Transfer pricing and thin capitalisation

The United Kingdom has widely drafted transfer pricing rules that are intended to apply to almost any kind of transaction made or imposed between related parties that gives rise to:

- a provision that differs from one that would have been made between third parties and
- a UK tax advantage (potential or actual) to one or more of the parties.

These rules apply to UK-to-UK transactions as well as cross-border transactions.

The regime therefore applies not only to the provision of products and services but also to finance arrangements, including both the rate of return charged and the amount of loan principal (or equivalent) made available. It is therefore the mechanism by which the UK's revenue authorities address the issue of thin capitalisation. Currently, unlike many other territories, the United Kingdom does not currently operate any 'safe harbours' of any kind in relation to the amount of debt or interest (or equivalents) it considers demonstrates that a UK company or group is not thinly capitalised. However, HMRC have announced the introduction of a new UK interest deductibility rule, effective from April 2017. *This is discussed under Funding costs in the Taxable income determination section.*

Parties are considered related for the purpose of transfer pricing rules where either one controls the other or both are under common control. Control here is not confined to situations in which one party is the majority shareholder in the other. Effectively, control exists where one party has the power to ensure that the affairs of another party are conducted in accordance with the first party's wishes. The concept is also subject to two important extensions:

- The rules apply to many joint venture companies where two parties each have an interest of at least 40%.
- There are attribution rules to trace control relationships through a number of levels in determining whether parties are controlled for the purposes of the transfer pricing rules.

In addition, the regime restricts interest deductions to an arm's-length basis where a financier and persons who collectively control a company or a partnership have 'acted together' in relation to the financing arrangements of that company or partnership. The financier (usually a bank) can then be taken as controlling the company or partnership, and the loan becomes subject to transfer pricing limitations.

There are a number of exemptions that essentially exclude small or medium-sized enterprises (SMEs) and dormant companies from the regime.

The effect of the rules is to require an arm's-length provision to be substituted for the actual one, thereby increasing the party's UK tax liability and cancelling out the UK tax advantage that would otherwise have arisen.

Where both parties to the transaction are UK taxpayers, the disadvantaged party will generally be entitled to claim a compensating adjustment (except where the transaction falls within the transfer pricing regime because of the 'acting together' provisions), but only after the UK adjustment has been made. The legislation also provides that parties may make balancing payments to each other in such circumstances, of any amount up

to the transfer pricing adjustment, which will neither be taxable for the recipient nor tax deductible for the payer.

Where the disadvantaged party is outside the UK tax net, they can pursue a claim for relief under the relevant DTT if it provides a mechanism for such relief; where the adjustment in the United Kingdom is to reduce a deduction for an amount paid under deduction of UK tax, the compensating adjustment rules should allow the overseas party to reclaim any WHT paid on the disallowed amount, subject to time limits and other criteria.

UK taxpayers are required to self-assess their compliance with this arm's-length principle. Companies and partnerships must therefore identify and make transfer pricing adjustments when submitting their tax returns. This is the case even where the disadvantaged party would be entitled to claim a compensating adjustment equal to the transfer pricing adjustment. An important implication of this approach is the potential for interest and penalties if the adjustment made is subsequently held to be wrong.

Controlled foreign companies (CFCs)

Under the CFC regime, a UK resident company may be taxed on a proportion of the profits of certain UK-controlled, non-resident companies in which the resident company has an interest. The overall intention is to tax profits that have been artificially diverted from the United Kingdom.

Broadly, profits of a non-UK resident CFC will be taxed, using normal corporation tax rates and rules, on the persons controlling the CFC if (i) the profits pass through the CFC 'gateway' and (ii) are not exempt.

The 'gateways' are a series of tests that identify profits that are, broadly, artificially diverted from the United Kingdom. For example, where profits are attributable to UK significant people functions, those profits will be taxed in the United Kingdom unless one of four conditions are satisfied (the first of which is that obtaining a tax advantage is not the main purpose or one of the main purposes of the arrangement). A range of other tests may capture other profits.

Various exemptions exist for certain types of companies, those coming into the regime for the first time, CFCs with low profits or low margins, CFCs in excluded territories, or others with corporation tax rates similar or above UK rates.

There is a special exemption for intra-group financing profits that can result in an exemption of between 75% and 100% of the financing profits on qualifying loans.

Tax credits and incentives

Foreign tax credit

The United Kingdom has an extensive network of DTTs. Unilateral relief is generally available, in any event, to credit overseas tax paid on non-UK source profits against the UK tax on the same profits; while the relevant treaty might sometimes extend that relief, their main function for UK companies is to limit overseas WHTs that would otherwise be payable on passive income.

The United Kingdom has a complex regime allowing 'underlying' tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved (at least in part)

United Kingdom

where dividends flow to the United Kingdom via a chain of companies. This exemption is of limited application because most foreign dividends are exempt from tax.

Enhanced capital allowances

A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances, *see Depreciation and amortisation in the Taxable income determination section*). Some of these incentives are given by reference to the expenditure concerned and others by reference to the size of the company incurring that expenditure.

For example, a full write-off can be claimed in the year of expenditure on a range of 'green' products and technologies. The list of items supported in this way is reviewed annually. It includes designated energy saving equipment, designated environmentally beneficial plant and machinery, and cars with low emissions.

Annual investment allowance

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 200,000 tranche *per annum* of capital expenditure incurred on most qualifying expenditure. This is restricted to a single allowance for groups of companies or associated businesses.

Research and development (R&D) incentives

SMEs, as defined, are entitled to a deduction equal to 230% of the qualifying expenditure on R&D in the year in which it is incurred, which can be surrendered for a cash payment (at a rate of GBP 33.35 for each GBP 100 of qualifying R&D spend) by companies that are trading at a loss or have not yet started to trade.

Large companies are granted an 'above the line' tax credit of 10% of their qualifying expenditure.

Patent box

Where the taxable profits can be attributed to the exploitation of patents, a lower effective rate of corporation tax applies. For 2017/18, the rate is 10%. Profits can include a significant part of the trading profit from the sales of a product that includes a patent, not just income from patent royalties. This scheme closed to new entrants from June 2016 (but will continue until 2021 for existing taxpayers), when a new arrangement was introduced. The new scheme retains several of the features of the earlier scheme, but will focus more on UK-based activities and meet revised OECD principles.

Other incentives

A deduction equal to 150% of the qualifying expenditure on the remediation of contaminated or derelict land is given in the year incurred, which can be surrendered for a cash payment (at a rate of GBP 24 for each GBP 100 of qualifying land remediation spend) by companies that are trading at a loss.

There are special tax reliefs available for certain expenditure on UK film production, high-end television, animation, video games, and proposals for additional deductions and tax credits for certain theatre and other creative sector activities.

There are no tax holidays and no foreign investment incentives in the United Kingdom.

Withholding taxes

Under UK domestic law, a company may have a duty to withhold tax in relation to the payment of either interest or royalties (or other sums paid for the use of a patent). The circumstances in which such a liability arises are discussed below.

There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable DTT.

Please note, however, that this is not an exhaustive list of all the deductions that might be required to be made in respect of UK tax from payments made to or by companies. In particular, non-resident companies that are subject to UK income tax on UK-source rental profits (*see the Taxes on corporate income section for more information*) will find their letting agent or tenants are obligated to withhold the appropriate tax at source (currently 20% without any allowances) from their rental payments unless the recipient has first applied and been given permission to receive gross rents under the NRL scheme. Two other important examples are the UK's deduction at source regime for entertainers and sportsmen, and the scheme under which payments to unregistered subcontractors working on big building projects may need to have tax deducted at source.

Interest WHT

As a general rule, UK domestic law requires companies making payments of interest to withhold tax at 20%. However, there are a number of exceptions to this general rule. The key exclusions are:

- Payments of interest by UK resident companies if the beneficial owner of the interest is also a UK resident company, or a UK PE, provided the interest concerned will be taxed in the United Kingdom as part of the PE's trading profits.
- Payments of interest on a quoted Eurobond.
- Payments of interest that qualify for exemption under the EU Interest and Royalties Directive.
- Payments of interest paid to or by a UK bank (or a UK PE of a foreign bank).
- Payments of 'short' interest. This is, broadly speaking, interest on loans that will not be in place for more than a year. However, the definition can be contentious, and detailed advice should be taken on this if intending to utilise this exemption.
- Payments of interest that do not 'arise' in the United Kingdom. Whether a payment constitutes UK-source interest is a complex issue, and specialist advice needs to be taken if seeking to use this exception.
- Payments of interest on private placement debts (widely defined) of UK companies.

If none of these exceptions apply, a payment of interest must be made after the deduction of WHT unless (or until) HMRC has given authorisation that the payment may be made gross (or with a reduced rate of WHT) because of the applicability of treaty relief for the recipient.

Royalties WHT

UK domestic law requires companies making payments of patent, copyright, and design royalties that arise in the United Kingdom to deduct WHT at 20%. In addition, there is also the possibility that other royalties that arise in the United Kingdom may also be subject to the same rate of WHT if they constitute 'qualifying annual payments', so specialist advice will be needed to clarify this. However, certain types of royalties, such as film royalties and equipment royalties, will generally not be subject to UK WHT.

United Kingdom

Unlike the rule regarding interest, a company may make a royalty payment gross of WHT (or subject to a reduced rate of WHT under a treaty) without prior clearance having been given by HMRC if they reasonably believe at the time the payment is made that the payee is entitled to relief under the treaty. However, if that belief is later found to be incorrect, HMRC may direct that the payment must be made net of WHT, with the WHT paid to HMRC, and the payer may be subject to interest and penalties in respect of the WHT that should have been withheld (even if their belief was reasonable).

From September 2016 (and earlier for cases involving avoidance), a wider class of royalties, including trademarks and brand names, have been subject to deduction of income tax at source.

Double taxation treaties (DTTs)

The tables below set out the rates of WHT applicable to the most common payments of dividends, interest, and royalties under UK domestic law where such a liability arises and the reduced rates that may be available under an applicable DTT. Please refer to specific treaties to ensure the values are up to date.

Dividends

There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable DTT.

Interest

WHT applies only to 'annual interest' (i.e. excluding interest on certain short-term loans). Banks and similar financial institutions are also normally able to pay annual interest to non-UK residents free of WHT. In addition, most of the UK treaties provide for a zero-rate of withholding on interest paid to governmental and quasi-governmental lenders. Such exemptions are not separately indicated in the tables below.

Notes

UK domestic law generally charges WHT on patent, copyright, and design royalties, although there can be definitional uncertainties. Many treaties allow reduced rates for a wider range of royalties. These are mentioned in this table, even though there may be no UK WHT applied under domestic law.

1. 3% for news; 5% for copyright; 10% industrial; 15% other royalties.
2. Lower rate for loans from banks and financial institutions.
3. Higher rate applies if recipient controls more than 50% of payer.
4. Lower rate applies to copyright royalties.
5. 0% on loans between businesses.
6. Lower rate applies to industrial, commercial royalties.
7. Specific additional conditions apply for lower rate.
8. Lower rate applies for equipment royalties.
9. Lower rate applies to films, TV, and radio.
10. Higher rate applies to certain profit related interest.

Tax administration

Taxable period

Companies are assessed by reference to accounting periods. Normally, the accounting period is the period for which the company makes up its accounts. However, an accounting period for corporation tax purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one corporation tax return.

Tax returns

Companies must file their statutory accounts and tax return within one year from the end of the accounting period; the return must include a self-assessment of the

United Kingdom

tax payable, eliminating the need for assessment by HMRC (though HMRC retains assessing powers for certain cases where it is not satisfied with the return, or where the company fails to make a return).

Electronic filing requirements

Returns must be filed online, and such returns must be filed in a specified format that is machine readable by the tax authorities. The accompanying accounts must also be in iXBRL format.

Payment of tax

For smaller companies, corporation tax is payable nine months and one day after the end of the accounting period to which it relates (i.e. before the return must be filed). For larger companies and groups, a system of quarterly payments on account (based on estimated profits) is in place, with the first payment being due in the seventh month of the accounting period concerned. A company will generally be considered large for this purpose in any accounting period in which it has taxable profits in excess of GBP 1.5 million (that limit being reduced by reference to the number of companies under common control, where relevant).

It has been proposed, although the present status of the proposal is unclear, that from 2019 the largest companies with profits over GBP 20 million will have earlier quarterly payments dates, with tax due in the third, sixth, ninth, and 12th months of the period concerned.

Penalties

The UK tax system can impose numerous penalties for failing to adhere to the self-assessment system. These include penalties for late filing of returns, failing to maintain appropriate records, submitting an incorrect return, making errors in certain documents sent to HMRC, unreasonably failing to report errors in assessments by HMRC, and failing to respond to a notice of enquiry from the tax authorities within the specified time limit.

Other filing requirements

Large companies (those with turnover greater than GBP 200 million or balance sheet assets over GBP 2 billion) are required to notify HMRC of the identity of their senior accounting officer, who must certify annually that the accounting systems are adequate for the purposes of accurate tax reporting. Penalties are chargeable on the officer and the company for careless or deliberate failure to meet these obligations.

Certain tax planning and structuring transactions and arrangements must be disclosed to HMRC either before or on implementation of the transaction under the Disclosure of Tax Avoidance Schemes (DOTAS) regime. This scheme covers most taxes and is a reporting system only, with responsibility placed on taxpayers and advisors to report. HMRC are not required to respond to the reporting, and this is not an advance clearance or approval process. It is a reporting mechanism only, and, on occasions, new legislation has been introduced to block specific arrangements reported.

Tax audit process

The UK corporate tax process is one of self-assessment. Following filing of the tax return, HMRC has a period of (usually) 12 months in which to raise formal enquiries. These can range from simple information requests to detailed technical challenges over treatments adopted in the tax return.

These enquiries are often settled between the taxpayer company and HMRC by exchange of information and correspondence. Where agreement cannot be reached, arbitration or litigation may be necessary.

HMRC has certain powers to demand information and, in some circumstances, to enter premises to obtain documents, etc. These powers are rarely used, and there are no routine visits by HRMC officials to taxpayer premises.

General anti-abuse rule (GAAR)

The GAAR applies to income tax, corporation tax, capital gains tax, petroleum revenue tax, inheritance tax (IHT), SDLT, and ATED, but not VAT. It is targeted at changing behaviour of taxpayers who enter what might be considered to be abusive tax avoidance arrangements. The process includes a quasi-judicial review of the arrangements, the outcome of which must be used as evidence in any related tax litigation.

The government has stressed that the GAAR is only intended to apply to abusive tax avoidance arrangements, which are measured by reference to various indicators, some of which are subjective.

Statute of limitations

For companies that are members of medium or large groups, there is generally a period of one year after the statutory filing dates for the tax authorities to start an enquiry into any aspect of the return. For other companies, enquiries can be started up to 12 months after the date of actual filing. These periods are extended for returns submitted after the filing deadline, that are amended by the taxpayer, or where an issue is subsequently discovered that was not sufficiently disclosed within the standard period. Longer periods apply in the event of inadequate disclosure or deliberate misfiling.

Other issues

Adoption of International Financial Reporting Standards (IFRS)

IFRS is mandatory for the consolidated financial statements of listed UK companies.

All companies have the choice of adopting IFRS or adopting the new UK Generally Accepted Accounting Principles (GAAP) - FRS 102 - for their non-consolidated (solus) accounts. Many groups therefore continue to apply UK GAAP in their solus accounts.

UK companies have a choice of either using full IFRS or the FRS 102 for their accounts. UK companies that are subsidiaries will also have an option to prepare accounts under either IFRS or FRS 102 methodologies with reduced disclosures. There are also additional accounting options available for small companies and micro entities. However, the options available to a company are subject to the requirements of the UK Company Law framework for consistency of GAAP within a group.

Intergovernmental agreements (IGAs) and cooperation

The United Kingdom has a wide range of international agreements, alongside DTTs, for the exchange of information about taxpayers. In addition, the United Kingdom seeks to take a participative role in the European Union and within the OECD with regard to the development of international tax principles.

United Kingdom

The United Kingdom has implemented the United States (US) Foreign Account Tax Compliance Act (FATCA) arrangements with effect from June 2014. The FATCA legislation is being introduced by the US authorities to prevent tax evasion by US citizens who use offshore accounts, and UK-based financial institutions must comply with its requirements or face suffering WHTs on interest or dividends from US corporations.

UK tax legislation

Announcements of proposed new legislation generally occur at least once a year. The main announcement is made on Budget Day (previously, generally in March, but it is anticipated this will move to October from 2018), when tax rates are set for the coming year. Other announcements can be made at other times and, subject to becoming approved and adopted law, can apply from a specified date. The new legislation is then included in an annual Finance Act, which is normally finalised in July. Much of the legislation introduced in recent years has been due to challenges under the EC treaty, or as a result of the tax planning being notified under the UK's tax avoidance disclosure regulations. In the year of a general election (like 2017), there may be additional Budget Days and Finance Acts.

Significant developments

In 2016, the Treasury Department released final and temporary regulations under Section 385, addressing whether certain instruments between related parties are treated as debt or equity, and final regulations under Section 987, providing tax accounting rules for a branch or other qualified business unit (QBU) that conducts business using a functional currency that is different from that of its owner.

President Trump signed an executive order on 21 April 2017, directing Treasury to identify significant tax regulations that “impose an undue financial burden on United States taxpayers; add undue complexity to the federal tax laws; or exceed the statutory authority of the Internal Revenue Service” issued on or after 1 January 2016. Anti-corporate-inversion regulations will be examined as part of this executive order, including final and temporary regulations issued under sections 385. At the time this summary was published, there have been no changes to the regulations.

Taxes on corporate income

In the United States, resident corporations are taxed based on worldwide income. Generally, a foreign corporation engaged in a US trade or business is taxed at regular US corporate tax rates on income from US sources that is effectively connected with that business and at 30% on US-source income not effectively connected with that business.

The US corporate income tax (CIT) rate is based on a progressive rate schedule; however, an alternative minimum tax (AMT) provides for a flat rate with fewer deductions.

2017 taxable income		CIT		
Over (USD)*	But not over (USD)	Pay (USD) +	% on excess	of the amount over (USD)
0	50,000	0	15	0
50,000	75,000	7,500	25	50,000
75,000	100,000	13,750	34	75,000
100,000	335,000	22,250	39	100,000
335,000	10,000,000	113,900	34	335,000
10,000,000	15,000,000	3,400,000	35	10,000,000
15,000,000	18,333,333	5,150,000	38	15,000,000
18,333,333			35	0

* United States dollars

United States

The 39% tax rate applies to taxable income between USD 100,000 and USD 335,000 to eliminate the benefit of the 15% and 25% rates, and the 38% tax rate applies to taxable income between USD 15,000,000 and USD 18,333,333 to eliminate the benefit of the 34% rate. Special rules apply to personal service corporations and personal holding companies.

Alternative minimum tax (AMT)

An AMT is imposed on corporations other than S corporations (*see below*) and small C corporations (generally those with no three year average annual gross receipts exceeding USD 7.5 million). The tax is 20% of alternative minimum taxable income (AMTI) in excess of a USD 40,000 exemption amount (subject to a phase out). AMTI is computed by adjusting the corporation's regular taxable income by specified adjustments and 'tax preference' items. Tax preference or adjustment items could arise, for example, if a corporation has substantial accelerated depreciation, percentage depletion, intangible drilling costs, or non-taxable income.

S corporations

Corporations with 100 or fewer shareholders, none of whom may be corporations, that meet certain other requirements may elect to be taxed under Subchapter S of the Internal Revenue Code (IRC or 'the Code') and are thus known as S corporations. S corporations are taxed in a manner similar, but not identical, to partnerships (i.e. all tax items [e.g. income, deductions] flow through to the owners of the entity). Thus, S corporations generally are not subject to US federal income tax.

Gross transportation income taxes

Foreign corporations and non-resident alien individuals are subject to a yearly 4% tax on their US-source gross transportation income (USSGTI) that is not effectively connected with a US trade or business. Transportation income is any income derived from, or in connection with, (i) the use (or hiring or leasing) of any vessel or aircraft, or (ii) the performance of services directly related to the use of any vessel or aircraft.

Local income taxes

CIT rates vary from state to state and generally range from 1% to 12% (although some states impose no income tax). The most common taxable base is federal taxable income, which is modified by state provisions and generally is allocated to a state on the basis of a three-factor formula: tangible assets and rental expense, sales and other receipts, and payroll. State and municipal taxes are deductible expenses for federal income tax purposes.

Corporate residence

A corporation organised or created in the United States under the law of the United States or of any state is a domestic corporation. A domestic corporation is a resident corporation even though it does no business or owns no property in the United States.

Permanent establishment (PE)

A PE generally is defined as a fixed place of business.

Other taxes

Sales taxes

No provisions exist for a sales tax or value-added tax (VAT) at the federal level. However, sales and use taxes constitute a major revenue source for the 45 states that impose such taxes and the District of Columbia. Sales and use tax rates vary from state to state and generally range from 2.9% to 7.25% at the state level. Most states also allow a 'local option' that permits local jurisdictions, such as cities and counties, to impose an additional percentage on top of the state-level tax and to keep the related revenues.

In general, a sales tax is a tax applied to the retail sale of tangible personal property and certain services. Although the form of the tax may vary, it is usually imposed either directly upon the retail sale of the taxable item, on the gross receipts from the sales of taxable items, or on the person engaged in the business of making retail sales of taxable items. The use tax complements the sales tax and is usually assessed on purchases made out of state and brought into the jurisdiction for use, storage, or consumption. Typically, either a sales tax or a use tax can be assessed on a transaction, but not both.

Customs duties and import tariffs

All goods imported into the United States are subject to entry and are dutiable or duty-free in accordance with their classification under the applicable items in the Harmonized Tariff Schedule of the United States. The classification also identifies eligibility for special programs and free trade agreement preferential duty rates.

When goods are dutiable, *ad valorem*, specific, or compound duty rates may be assessed. An *ad valorem* rate, which is the type of rate most often applied, is a percentage of the value of the merchandise, such as 7% *ad valorem*. A specific rate is a specified amount per unit of weight or other quantity, such as 6.8 cents per dozen. A compound rate is a combination of both an *ad valorem* rate and a specific rate, such as 0.8 cents per kilo plus 8% *ad valorem*. Customs requires that the value of the goods be properly declared regardless of the dutiable status of the merchandise.

Liability for the payment of duty becomes fixed at the time an entry is filed with US Customs and Border Protection (CBP). The obligation for payment is upon the person or firm in whose name the entry is filed, the importer of record.

Excise taxes

Excise taxes are generally imposed by the federal and state governments on a wide range of goods and activities, including gasoline and diesel fuel used for transportation, air travel, manufacturing of specified goods, and indoor tanning services.

The excise tax rates are as varied as the goods and activities upon which they are levied. For example, the excise imposed on indoor tanning services is 10% of the amount paid for the services while the excise imposed on the sale of coal mined in the United States is the lower of USD 1.10 per ton or 4.4% of the sale price.

Property taxes

Most states, and some cities, impose a variety of property taxes on both real and personal property.

United States

Stamp taxes

No provisions exist for a stamp tax at the federal level. However, state and local governments frequently impose stamp taxes at the time of officially recording a transaction based upon the value of real estate. The sales tax on real estate may be a stamp tax on the documents recording the transfer of the real estate.

Capital gain taxes

On current transactions, the long-term capital gains tax rate is the same as the tax rates applicable to ordinary income. Thus, the maximum rate is 35%, excluding the additional phase out rates. However, differences may arise where AMT is imposed.

Accumulated earnings tax

Corporations (other than S corporations, domestic and foreign personal holding companies, corporations exempt from tax under Subchapter F of the Code, and passive foreign investment companies) accumulating earnings and profits for the purpose of avoiding shareholder personal income tax (PIT) are subject to a penalty tax in addition to any other tax that may be applicable. The accumulated earnings tax is equal to 20% of 'accumulated taxable income'. Generally, accumulated taxable income is the excess of taxable income with certain adjustments, including a deduction for regular income taxes, over the dividends paid deduction and the accumulated earnings credit. Note that a corporation can justify the accumulation of income, and avoid tax, based on its reasonable business needs.

Personal holding company tax

US corporations and certain foreign corporations that receive substantial 'passive income' and are 'closely held' may be subject to personal holding company tax. The personal holding company tax is 15% of undistributed personal holding company income and is levied in addition to the regular tax.

Payroll taxes

Employers are subject to federal unemployment insurance tax (FUTA) of 6.2% on the first USD 7,000 of wages paid to employees meeting certain criteria. In addition, states impose workers' compensation insurance tax at varying rates depending on state law and the nature of employees' activities. For 2017, employers also are subject to social security contributions tax of 7.65% (including 1.45% Medicare tax) on the first USD 127,200 (up from USD 118,500 in 2016) of wages paid to employees and 1.45% of Medicare tax on any wages in excess of USD 127,200 (up from USD 118,500 in 2016).

Environmental tax

Importers, manufacturers, and sellers of petroleum or other ozone-depleting chemicals (ODC) are subject to an environmental tax calculated per weight of the ODC used in the manufacture of the product. The tax is determined under an exact or table method provided in the instructions to Form 6667. If the weight cannot be determined, the tax is 1% of the entry value of the product.

Other state and municipal taxes

Other taxes that states may impose, in lieu of or in addition to taxes based on income, include franchise taxes and taxes on the capital of a corporation. State and municipal taxes are deductible expenses for federal income tax purposes.

Branch income

Tax rates on branch profits are the same as on corporate profits. The law also imposes a 30% branch profits tax in addition to US corporate level income taxes on a foreign corporation's US branch earnings and profits for the year that are effectively connected with a US business. The taxable base for the branch profits tax is increased (decreased) by any decrease (increase) in the US net equity of the branch. The branch profits tax on profits may be reduced or eliminated entirely if a relevant treaty so provides (subject to strict 'treaty shopping' rules). The purpose of the branch profits tax is to treat US operations of foreign corporations in much the same manner as US corporations owned by foreign persons.

With certain exceptions, a 30% (or lower treaty rate) branch profits tax also will be imposed on interest payments by the US branch to foreign lenders. In addition, the tax will apply if the amount of interest deducted by the branch on its US tax return exceeds the amount of interest actually paid during the year.

Income determination

Inventory valuation

Inventories generally are stated at the lower of cost or market on a first in first out (FIFO) basis. Last in first out (LIFO) may be elected for tax purposes on a cost basis only and generally requires book and tax conformity.

The tax law requires capitalisation for tax purposes of several costs allocable to the manufacturing process that frequently are expensed as current operating costs for financial reporting (e.g. the excess of tax depreciation over financial statement depreciation).

Capital gains

Gains or losses on the sale or exchange of capital assets held for more than 12 months are treated as long-term capital gains or losses. Gains or losses on the sale or exchange of capital assets held for 12 months or less are treated as short-term capital gains or losses. The excess of net long-term capital gain over net short-term capital loss is considered net capital gain. Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a tax year may be carried back three years and carried forward five years to be used against (offset) capital gains.

For dispositions of personal property and certain non-residential real property used in a trade or business, net gains are first taxable as ordinary income to the extent of the depreciation/cost recovery, with any remainder generally treated as capital gain. For other trade or business real property, net gains generally are taxed as ordinary income to the extent that the depreciation or cost recovery claimed exceeds the straight-line amount, with any remainder treated as capital gain.

An exception to capital gain treatment exists to the extent that losses on business assets were recognised in prior years. A net loss from the sale of business assets is treated as an ordinary loss. Future gains, however, will be treated as ordinary income to the extent of such losses recognised in the five immediately preceding years.

United States

Dividend income

A US corporation generally may deduct 70% of dividends received from other US corporations in determining taxable income. The dividends received deduction is increased from 70% to 80% if the recipient of the dividend distribution owns at least 20% but less than 80% of the distributing corporation. Generally, dividend payments between US corporations that are members of the same affiliated group (*see the Group taxation section*) are deferred or eliminated until a transaction with a third party occurs. With minor exceptions, a US corporation may not deduct dividends it receives from a foreign corporation.

Stock dividends

A US corporation can distribute a tax-free dividend of common stock proportionately to all common stock shareholders. If the right to elect cash is given, all distributions to all shareholders are taxable as dividend income whether cash or stock is taken. There are exceptions to these rules, and extreme caution must be observed before making such distributions.

Interest income

Interest income is generally includible in the determination of taxable income.

Rental income

Rental income is generally includible in the determination of taxable income.

Royalty income

Royalty income is generally includible in the determination of taxable income.

Partnership income

The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income.

Foreign income (Subpart F income) of US taxpayers

Generally, a US corporation is taxed on its worldwide income, including foreign branch income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credits. Alternatively, a deduction may be claimed for actual foreign taxes that are paid. In the case of foreign subsidiaries that are more than 50% owned (by vote or value) by US shareholders (commonly known as controlled foreign companies or CFCs), certain types of undistributed income will be taxed currently to the US shareholders (Subpart F income). Generally, Subpart F income includes income that is easily transferred to a low-tax jurisdiction.

Income from certain passive foreign investment companies (where 75% or more of the income is passive or at least 50% of the assets held produce passive income) also is subject to current taxation. Current taxation occurs if the corporation elects to be a qualified electing fund (QEF) or there are actual distributions. If a QEF election is not made and the corporation makes an actual distribution, the distribution will be treated as an excess distribution to the extent it exceeds 125% of the average of the distributions made with respect to the stock over the three immediately preceding years. The excess distribution is spread over the taxpayer's holding period, and the amount allocated to each year in the holding period is subject to tax at the highest marginal tax rate in effect for that year. This deferred tax amount also is subject to an interest charge. The interest charge is designed to pay the benefit of the tax deferral that arises out of having an overseas investment that pays no US income taxes.

Deductions

Depreciation and amortisation

Depreciation deductions are allowances that may be taken for capital outlays for tangible property. For property placed in service after 1986, capital costs must be recovered by using the modified accelerated cost recovery system (MACRS) method. Depending on the type of tangible property, the general cost recovery periods are three, five, seven, ten, 15, 20, 27.5, and 39 years (31.5 years for property placed in service before 13 May 1993). The cost recovery methods and periods are the same for both new and used property. Most tangible personal property is in the three, five, or seven year class. Property placed in the three, five, seven, or ten year class is depreciated by first applying the 200% declining-balance method and then switching to the straight-line method at such a time as when use of the straight-line method maximises the depreciation deduction. Property in the 15 or 20 year class is depreciated by using the 150% declining-balance method and later switching to the straight-line method. An election may be made to use the alternative depreciation system (basically, the straight-line method over prescribed lives). Residential rental property generally is depreciated by the straight-line method over 27.5 years. Non-residential real property is depreciated by the straight-line method over 39 years (31.5 years for property placed in service before 13 May 1993).

An election to use the straight-line method over the regular recovery period or a longer recovery period also is available. Alternatively, taxpayers may elect to use the 150% declining-balance method over the regular recovery period for all property other than real property. This method is required for AMT purposes.

For most tangible personal and real property placed in service in the United States after 1980 but before 1 January 1987, capital costs were recovered using the accelerated cost recovery system (ACRS), which applied accelerated methods of cost recovery over periods specified by statute. The general ACRS recovery periods were three, five, ten, 15, 18, and 19 years.

Special rules apply to automobiles and certain other 'listed' property. Accelerated depreciation deductions can be claimed only if the automobile is used 50% or more for qualified business use as defined in related regulations. Further, for automobiles placed in service after 1986, the allowable yearly depreciation deduction cannot exceed specific dollar limitations.

Separate methods and periods of cost recovery are specified by statute for certain tangible personal and real property used outside the United States.

Rapid amortisation may be allowable for certain pollution control facilities.

Tax depreciation is not required to conform to book depreciation. Tax depreciation generally is subject to recapture on the sale or disposition of certain property, to the extent of gain, which is subject to tax as ordinary income.

The cost of most intangible assets is generally capitalised and amortisable rateably over 15 years.

United States

Section 179 deduction

Corporations can elect to expense, up to a statutory amount per year, the cost of certain eligible property used in the active conduct of a trade or business. This is commonly referred to as the Section 179 deduction.

The 2003 tax cuts temporarily increased the maximum dollar amount that may be deducted under Section 179 from USD 25,000 to USD 100,000. The 2003 tax cuts also increased the phase-out amount from USD 200,000 to USD 400,000. These amounts have been further modified and extended several times on a temporary basis, increasing up to a high of USD 500,000 and USD 2 million, respectively, for tax years beginning in 2010 and 2011, and then to USD 125,000 and USD 500,000, respectively, for tax years beginning in 2012, before reverting to the permanent amounts of USD 25,000 and USD 200,000, respectively, for tax years beginning in 2013 and thereafter. The American Taxpayer Relief Act of 2012, signed into law on 2 January 2013, increased the maximum amount and phase-out threshold in 2012 and 2013 to the levels in effect in 2010 and 2011 (USD 500,000 and USD 2 million, respectively). The Tax Increase Prevention Act of 2014, signed into law on 19 December 2014, extended the USD 500,000 and USD 2 million amounts to tax years beginning in 2014. The Consolidated Appropriations Act, 2016, signed into law on 18 December 2015, extended the USD 500,000 and USD 2 million amounts permanently, retroactive to 1 January 2015; beginning in 2016, the limitation amount is indexed for inflation.

In addition, the deduction under this election is limited to the taxable income of the business.

Bonus depreciation

A 50% special first year depreciation allowance (i.e. bonus depreciation) applies (unless an election out is made) for new MACRS property with a recovery period of 20 years or less, certain computer software, water utility property, and certain leasehold improvements acquired after 31 December 2007. The special allowance applies for regular income tax and AMT purposes. No AMT adjustment is made if the special allowance is used. The special allowance does not apply to property that must be depreciated using the alternative depreciation system or to 'listed property' not used predominantly for business. The special allowance reduces basis before regular depreciation is figured. Additionally, claiming bonus depreciation on automobiles may affect the first year depreciation limits on such automobiles.

The Tax Increase Prevention Act of 2014, signed into law on 19 December 2014, extended 50% bonus depreciation through 31 December 2014 (31 December 2015 for long-production-period property [LPPP] and certain aircraft).

The Act extended for one year, to property placed in service before 1 January 2015 (1 January 2016 in the case of certain longer-lived property and transportation property), the provision allowing a corporation to elect to accelerate AMT credits in lieu of bonus depreciation.

The Consolidated Appropriations Act, 2016, signed into law on 18 December 2015, extended bonus depreciation as follows:

- 30% for property acquired and placed in service during 2015, 2016, and 2017.
- 40% for property acquired and placed in service during 2018.
- 30% for property acquired and placed in service during 2019.

The Act also modified the AMT rules beginning in 2016 by increasing the amount of unused AMT credits that may be claimed in lieu of bonus depreciation.

Depletion

For natural resource properties other than timber and certain oil and gas properties, depletion may be computed on a cost or a percentage basis.

Cost depletion is a method of depletion applied to exhaustible natural resources, including timber, which is based on the adjusted basis of the property. Each year, the adjusted basis of the property is reduced, but not below zero, by the amount of depletion calculated for that year. The current year cost depletion deduction is based on an estimate of the number of units that make up the deposit and the number of units extracted and sold during the year.

Percentage depletion is a method of depletion applied to most minerals and geothermal deposits, and, to a more limited extent, oil and gas. Percentage depletion is deductible at rates varying from 5% to 25% of gross income, depending on the mineral and certain other conditions. Percentage depletion may be deducted even after the total depletion deductions have exceeded the cost basis. However, percentage depletion is limited to 50% (100% for oil and gas properties) of taxable income from the property (computed without allowance for depletion). Generally, percentage depletion is not available for oil or gas wells. However, exceptions exist for natural gas from geopressurised brine and for independent producers of oil and gas.

Goodwill

The cost of goodwill generally is capitalised and amortisable rateably over 15 years.

Start-up expenses

Generally, start-up expenditures must be amortised over a 15-year period; however, certain taxpayers may elect to deduct some expenses in the tax year in which the trade or business begins.

US manufacturing deduction

Over the last several decades, various tax incentive systems have been enacted in the United States to encourage exports and were later repealed, including the extraterritorial income (ETI) regime, which was repealed as a result of a World Trade Organization (WTO) ruling that the ETI regime favoured US goods and violated the national treatment provisions of the General Agreement on Tariffs and Trade. In response, the United States enacted the American Jobs Creation Act of 2004, which introduced a phase-out repeal of ETI and introduced the domestic production activities deduction under Section 199, seeking to compensate US manufacturers for the loss of ETI benefits.

Under Section 199, taxpayers are allowed a 9% deduction for qualified production activities (QPA) income (subject to a taxable income limitation). The deduction is available to all taxpayers actively engaged in QPA. For corporate taxpayers, the deduction generally will mean a federal income tax rate of 31.85% on QPA income. Importantly, the deduction also applies in calculating the AMT. There is a limit on the amount of the deduction equal to 50% of W-2 wages allocable to QPA (subject to a specific effective date), and the deduction is not allowed for taxpayers that incur a loss from their production activities or have an overall loss (including a carryover loss) from all activities.

United States

A taxpayer's QPA income is calculated using the following formula: domestic production gross receipts less the sum of cost of goods sold allocable to such receipts and other expenses, losses, or deduction that are properly allocable to such receipts.

Interest expenses

Interest expenses generally are deductible but may be limited by thin capitalisation rules (*see Thin capitalisation in the Group taxation section*).

Bad debt

Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless. Determining the date the debt becomes worthless may present difficulty.

Charitable contributions

Deductions for allowable charitable contributions may not exceed 10% of taxable income computed without regard to certain deductions, including charitable contributions themselves. Deductions for contributions so limited may be carried over to the five succeeding years, subject to the 10% limitation annually.

Employee benefit plans (pension plans and expenses)

Through the Code, the government provides incentives for employers to provide retirement benefits to workers, including employee benefit, qualifying profit-sharing, or stock bonus plans. Usually, the employer will be allowed a current deduction for any contributions made to the fund, and the employee's tax liability will be deferred until the benefit is paid. For-profit, non-government employers generally have two types of available plans, which generally are subject to the reporting and disclosure requirements set forth under the Employee Retirement Income Security Act of 1974 (ERISA).

The first category of employee benefit plans is the defined benefit plan, or more commonly known as a pension plan, to which an employer contributes money, on an ongoing basis, to cover the amount of retirement income owed to retired employees under the plan (which will vary based on years of service, average salary, and/or other factors). Any investment gains or losses will not affect the amount of benefits paid to participants but will affect the amount an employer needs to contribute in order to cover its obligation.

The second category of employee benefit plans is the defined contribution plan, or more commonly known in the United States as a '401(k) plan', to which an employer's contributions (if any) are allocated amongst the separate accounts of participating employees, who also may contribute to their respective accounts. Investment gains or losses and the history of contributions will affect the value of a participant's account at retirement but will not affect an employer's contributions since the employer is not obligated to ensure any specified level of benefit in the plan.

Non-profits, including churches and government entities, have similar employee benefit plans, except different requirements apply. Small employers and self-employed individuals also have similar options available but are subject to different requirements.

Fines and penalties

No deduction generally is allowed for fines or penalties paid to the government for violation of any law.

Bribes, kickbacks, and illegal payments

An amount paid, directly or indirectly, to any person that is a bribe, kickback, or other illegal payment is not deductible.

Taxes

State and municipal taxes are deductible expenses for federal income tax purposes.

Other significant items

- No deduction generally is allowed for a contingent liability until such liability is fixed and determinable.
- Costs incurred for entertainment must meet strict tests in order to be deductible. The deduction for business meal and entertainment expenses is 50% of the expenses incurred. There are also limitations on the deductibility of international and domestic business travel expenses.
- Royalty payments, circulation costs, mine exploration and development costs, and other miscellaneous costs of carrying on a business are deductible, subject to certain conditions and limits.
- Depending on the taxpayer's tax accounting method, research and experimental (R&E) expenditures may be deducted as incurred or treated as deferred expenses and amortised over a period of not less than 60 months; however, in general, the method used must be consistently applied.

Net operating losses (NOLs)

An NOL is generated when business deductions exceed gross income in a particular tax year. Depending on current tax law, an NOL may be carried back to offset past income and possibly obtain a refund or carried forward to offset future income. Generally, a loss may be carried back two years and, if not fully used, carried forward 20 years. For state tax purposes, carryback and carryforward provisions are often similar to the federal provisions, except that several states do not permit any carrybacks or carryforwards.

Special rules surrounding NOLs may apply if a taxpayer is located in a qualified disaster area.

Special rules also apply relating to specified liability losses.

Complex rules may limit the use of NOLs after a reorganisation or other change in corporate ownership. Generally, if the ownership of more than 50% in value of the stock of a loss corporation changes, a limit is placed on the amount of future income that may be offset by losses carried forward.

Payments to foreign affiliates

A US corporation generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates to the extent the amounts are actually paid and are not in excess of what it would pay an unrelated entity (i.e. are at arm's length). In addition, US withholding on these payments may be required.

Group taxation

An affiliated group of US 'includible' corporations, consisting of a parent and subsidiaries directly or indirectly 80% owned, generally may offset the profits of one

United States

affiliate against the losses of another affiliate within the group by electing to file a consolidated federal income tax return. A foreign incorporated subsidiary may not be consolidated into the US group, except for certain Mexican and Canadian incorporated entities. A partnership may not be included in a consolidated return, even if it is 100% owned by members of an affiliated group, since a partnership is not a corporation. However, a member's earnings that flow through from a partnership are included as part of the consolidated group's taxable income or loss. Filing on a consolidated (combined) basis is also allowed (or may be required or prohibited) in certain states.

Sales, dividends, and other transactions between corporations that are members of the same group generally are deferred or eliminated until such time as a transaction occurs with a non-member of the group. Losses incurred on the sale of members of the group are disallowed under certain circumstances.

Transfer pricing

Transfer pricing regulations govern how related entities set internal prices for the transfers of goods, intangible assets, services, and loans in both domestic and international contexts. The regulations are designed to prevent tax avoidance among related entities and place a controlled party on par with an uncontrolled taxpayer by requiring an arm's-length standard. The arm's-length standard generally is met if the results of a controlled transaction are consistent with results that would have been realised if uncontrolled taxpayers had engaged in a similar transaction under similar circumstances. If a company is not in compliance with the arm's-length standard, the Internal Revenue Service (IRS) may raise taxable income and tax payable in the United States. After a transfer pricing adjustment, a multinational company may face double tax, paying tax twice on the same income in two countries. Multinational companies may request competent authority relief from double taxation through a tax treaty.

In order to avoid potential transfer pricing penalties, one avenue available to companies may be to obtain an advance pricing agreement (APA) with the IRS, unilaterally, or with the IRS and another tax authority, bilaterally, covering inter-company pricing.

Thin capitalisation

Thin capitalisation rules may apply to disallow interest payments related to excess debt and to re-characterise such payments as dividends. The interest expense deduction can be limited and suspended if more than 50% of the adjusted taxable income of a thinly-capitalised corporation (with similar rules for a corporate partner in a partnership) is sheltered by interest paid to a related party (or paid to a third-party but guaranteed by the related party) who is not subject to US tax on the income.

Controlled foreign companies (CFCs)

Under the Subpart F regime, a CFC is any foreign corporation with respect to which more than 50% of either the voting power of all classes of stock entitled to vote or the total value of all classes of the corporation's stock is owned by US shareholders on any day during the foreign corporation's tax year.

Tax credits and incentives

Foreign tax credit (FTC)

Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income, war profits, and excess profit taxes paid or accrued during the tax year to any foreign country or US possession. An FTC reduces

US income tax liability dollar for dollar, while a deduction reduces the US income tax liability at the marginal rate of the taxpayer. For taxpayers with NOLs, the FTC is of no value in such year. However, a benefit might be received either in an earlier year (through a refund of previously paid taxes) or a later year (through a reduction of future taxes). It also should be noted that a taxpayer has an ability to switch from credit to deduction (or from deduction to credit) at any time in a ten-year period commencing when the foreign taxes were paid or accrued. Generally, an FTC may be carried back one year and, if not fully used, carried forward ten years.

In addition, the FTC goes beyond direct taxes to include foreign taxes paid 'in lieu of' a tax upon income, war profits, or excess profits, which would otherwise generally be imposed. It also includes deemed-paid (indirect) taxes paid for certain US corporate shareholders of non-portfolio foreign corporations when actual or deemed dividends are received. Furthermore, the FTC system has numerous limitations to mitigate the potential abuses of the credit by the taxpayer.

General business credit

Various business credits are available to provide special incentives for the achievement of certain economic objectives. In general, these credits are combined into one 'general business credit' for purposes of determining each credit's allowance limitation for the tax year. The general business credit that may be used for a tax year is limited to a tax-based amount. In general, the current year's credit that cannot be used in a given year because of the credit's allowance limitation may be carried back to the tax year preceding the current year and carried forward to each of the 20 years following the current year.

In general, the current year business credit is a combination of the following credits, some of which were extended, retroactively to 1 January 2015, for two years, five years, or permanently as part of the Consolidated Appropriations Act, 2016, and others of which expired at the end of 2014, but still may be renewed retroactively by Congress:

- Investment credit.
- Work opportunity credit.
- Alcohol fuels credit.
- Research credit.
- Low-income housing credit.
- Enhanced oil recovery credit.
- Disabled access credit for certain eligible small businesses.
- Renewable electricity production credit.
- Empowerment zone employment credit.
- Indian employment credit.
- Employer social security credit.
- Orphan drug credit.
- New markets tax credit.
- Small employer pension plan start-up cost credit for eligible employers.
- Employer-provided child care credit.
- Railroad track maintenance credit.
- Biodiesel fuels credit.
- Low sulphur diesel fuel production credit.
- Marginal oil and gas well production credit.
- Distilled spirits credit.
- Advanced nuclear power facility production credit.
- Non-conventional source production credit.

United States

- New energy efficient home credit.
- Energy efficient appliance credit.
- A portion of the alternative motor vehicle credit.
- A portion of the alternative fuel vehicle refuelling property credit.
- Hurricane Katrina housing credit.
- Hurricane Katrina employee retention credit.
- Hurricane Rita employee retention credit.
- Hurricane Wilma employee retention credit.
- Mine rescue team training credit.
- Agricultural chemicals security credit for eligible businesses.
- Differential wage payment credit.
- Carbon dioxide sequestration credit.
- A portion of the new qualified plug-in electric drive motor vehicle credit for vehicles that will vary based on the date of purchase.

Employment credits

A 'work opportunity tax credit' is available through 2019 for employment of certain types of workers. 'Creditable' wages generally are the first USD 6,000 of wages paid to each qualified employee for the year. The credit is 40% of creditable wages, for a maximum credit of USD 2,400.

Research credit

The research credit under Section 41 is available for companies that make qualified research expenditures (QREs) to develop new or improved products, manufacturing processes, or software in the United States. The credit was enacted in 1981 on a temporary basis to help increase R&E spending in the United States. Since then, the research credit has been extended on a temporary basis about 16 times, but was extended, retroactively to 1 January 2015, on a permanent basis as part of the Consolidated Appropriations Act, 2016.

The research credit generally is computed by calculating current-year QRE over a base. The base is calculated using either the regular research credit (RRC) method or the alternative simplified credit (ASC) method. Under the RRC method, the credit equals 20% of QREs for the tax year over a base amount established by the taxpayer in 1984 to 1988 or by another method for companies that began operations after that period.

The ASC equals 14% (for the 2009 tax year and thereafter) of QREs over 50% of the average annual QREs in the three immediately preceding tax years. If the taxpayer has no QREs in any of the three preceding tax years, the ASC may be 6% of the tax year's QREs. The taxpayer must make a timely ASC election on Form 6765 attached to an originally filed return filed by the due date for that return (including extensions), or, pursuant to final regulations published in February 2015, an amended return (subject to certain limitations).

Taxpayers using the RRC also may take a 20% credit for incremental payments made to qualified organisations for basic research. For tax years ending after 8 August 2005, taxpayers also may take the Energy Research Consortium Credit, which provides a 20% credit for expenditures on qualified energy research undertaken by an energy research consortium.

The deduction for R&E expenditures under Section 174 must be reduced by the entire amount of the credit unless an election is made to reduce the amount of the credit.

Inbound investment incentives

There generally are no specific incentives related to inbound investment at the federal level, other than certain portfolio debt and bank deposit exceptions. The portfolio debt exception enables non-residents and foreign corporations to invest in certain obligations (which must meet certain statutory requirements to qualify as 'portfolio debt') in the United States without being subject to US income (or withholding) tax on the interest income. Certain state and local benefits may also be available.

Qualified private activity bonds

Interest income received on certain qualified private activity bonds generally is exempt from federal income tax. This enables a business enterprise to issue the bonds at a lower interest rate.

Other tax incentives

State and local governments provide numerous incentives to encourage business and, thus, employment in their jurisdictions.

Withholding taxes

Under US domestic tax laws, a foreign person generally is subject to 30% US tax on its US-source income. US persons making payments ('withholding agents') to foreign persons generally must withhold 30% of the payment amount as tax withheld at source on payments, such as dividends and royalties, made to foreign persons. In other situations, withholding agents may apply reduced rates or be exempted from withholding tax (WHT) at source when there is a tax treaty between the foreign person's country of residence and the United States.

The United States has entered into various income tax treaties with countries in order to avoid double taxation of the same income and to prevent tax evasion. The table below, from the IRS website, summarises the benefits resulting from these treaties.

Recipient	Dividends paid by US corporations in general (%) (1)	Dividends qualifying for direct dividend rate (%) (1, 2)	Interest paid by US obligors in general (%)	Royalties* (%)

Notes

* Please note the tax rates and associated footnotes appearing in the 'Royalties' column in the table address five types of royalties, as denoted in the most recent IRS publication. These five are industrial equipment royalties, know-how/other industrial royalties, patent royalties, motion picture and television royalties, and copyright royalties. The slashes '/' between each figure and associated footnote(s) are meant to demarcate these five types of royalties, respectively. For rates indicated as 'NA', if the enterprise earns income from the leasing of equipment in the conduct of a trade or business, it is covered by the Business Profits article. For passive income from the leasing of equipment, and not in the Royalty article, it is covered by the Other Income article, if any.

1. No US tax is imposed on a dividend paid by a US corporation that received at least 80% of its gross income from an active foreign business for the three-year period before the dividend is declared.
2. The reduced rate applies to dividends paid by a subsidiary to a foreign parent corporation that has the required percentage of stock ownership. In some cases, the income of the subsidiary must meet certain requirements (e.g. a certain percentage of its total income must consist of income other than dividends and interest). For Italy, the reduced rate is 10% if the foreign corporation owns 10% to 50% of the voting stock (for a 12-month period) of the company paying the dividends. For Japan, dividends received from a more than 50% owned corporate subsidiary are exempt if certain conditions are met.
3. The exemption or reduction in rate does not apply if the recipient has a PE in the United States and the property giving rise to the income is effectively connected with this PE. Under certain treaties, the exemption or reduction in rate also does not apply if the property producing the income is effectively connected with a fixed base in the United States from which the recipient performs independent personal services. Even with the treaty, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States under IRC Section 894(b).
4. The exemption or reduction in rate does not apply if the recipient is engaged in a trade or business in the United States through a PE that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States to apply the reduced treaty rate to that item of income.
5. Interest determined with reference to the profits of the issuer or one of its associated enterprises is taxed at 15%.
6. Contingent interest that does not qualify as portfolio interest is treated as a dividend and is subject to the rates under those columns, as appropriate.
7. The exemption applies only to interest on credits, loans, and other indebtedness connected with the financing of trade between the United States and the CIS member. It does not include interest from the conduct of a general banking business.
8. The tax rates in the US treaty with the former USSR still apply to the following countries: Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, and Uzbekistan.
9. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or a real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest (25% in the case of Portugal, Spain, and Tunisia) in the REIT.
10. The rate is 8% for copyrights of scientific work.
11. The rate is 5% for interest (i) beneficially owned by a bank or other financial institution (including an insurance company) or (ii) paid due to a sale on credit of any industrial, commercial, or scientific equipment, or of any merchandise to an enterprise.
12. The rate is 10% if the interest is paid on a loan granted by a bank or similar financial institution. For Thailand, the 10% rate also applies to interest from an arm's-length sale on credit of equipment, merchandise, or services.
13. This is the rate for royalties for the use of, or the right to use, industrial, commercial, and scientific equipment. The rate for royalties for information concerning industrial, commercial, and scientific know-how is subject to the rate in column 5 ('other royalties').
14. The rate is 15% for copyrights of scientific work.
15. Exemption or reduced rate does not apply to an excess inclusion for a residual interest in a real estate mortgage investment conduit (REMIC).
16. The rate in column 2 applies to dividends paid by a RIC. Dividends paid by a REIT are subject to a 30% rate.
17. An election can be made to treat this interest income as if it were industrial and commercial profits taxable under article 8 of this treaty.
18. The rate is 4.9% for interest derived from (i) loans granted by banks and insurance companies and (ii) bonds or securities that are regularly and substantially traded on a recognised securities market. The rate is 10% for interest not described in the preceding sentence and paid (i) by banks or (ii) by the buyer of machinery and equipment to the seller due to a sale on credit.
19. The rate is 15% (10% for Bulgaria; 30% for Austria, Germany, and Switzerland) for contingent interest that does not qualify as portfolio interest.
20. The rate is 15% for interest determined with reference to (i) receipts, sales, income, profits, or other cash flow of the debtor or a related person, (ii) any change in the value of any property of the debtor or a related person, or (iii) any dividend, partnership distribution, or similar payment made by the debtor to a related person.
21. Interest received by a financial institution is tax exempt. For Venezuela, the rate is 4.95% if the interest is beneficially owned by a financial institution (including an insurance company).

United States

22. The rate in column 2 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual (or pension fund, in the case of France or New Zealand) holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.
23. Interest paid or accrued on the sale of goods, merchandise, or services between enterprises is exempt. Interest paid or accrued on the sale on credit of industrial, commercial, or scientific equipment is exempt.
24. Dividends received from an 80%-owned corporate subsidiary are exempt if certain conditions are met.
25. Exemption does not apply to amount paid under, or as part of, a conduit arrangement.
26. Interest is exempt if (i) paid to certain financial institutions, or (ii) paid on indebtedness from the sale on credit of equipment or merchandise.
27. Amounts paid to a pension fund that are not derived from the carrying on of a business, directly or indirectly, by the fund are exempt. This includes amounts paid by a REIT only if the conditions in footnote 22 are met. For Sweden, to be entitled to the exemption, the pension fund must not sell or make a contract to sell the holding from which the dividend is derived within two months of the date the pension fund acquired the holding.
28. The exemption does not apply if the recipient of the gain is an individual who is present in the United States for more than 119 days during the year.
29. The rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual holding less than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

Tax administration

Taxable period

US corporate taxpayers are taxed on an annual basis. Corporate taxpayers may choose a tax year that is different from the calendar year. New corporations may use a short tax year for their first tax period, and corporations may also use a short tax year when changing tax years.

Tax returns

The US tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual tax return (generally Form 1120) by the 15th day of the fourth month following the close of its tax year. A taxpayer can obtain an additional six month extension of time to file its tax return. Failure to timely file may result in penalties.

Important tax return due dates

Form No.	Title	Purpose	Due date
W-2	Wage and Tax Statement	Employers must provide employees with statements regarding total compensation and amounts withheld during year.	Must be sent to employees on or before 31 January.
1099 series	Various	Information returns to be provided to recipients of dividends and distributions, interest income, miscellaneous income, etc.	Must be sent on or before 31 January.
1120 series, including 1120S (for S Corps)	US Corporation Income Tax Return	Income tax returns for domestic corporations or foreign corporations with US offices.	15 April for C corporations, 15 March for S corporations (Form 7004 may be filed to obtain an automatic six-month extension)

Form No.	Title	Purpose	Due date
Schedule K-1	Partner's Share of Income (Loss) from an Electing Large Partnership	Information returns to be provided to partners by large partnerships.	15 March
1065	US Return of Partnership Income	Information returns to be filed by large partnerships.	15 March (Form 7004 may be filed to obtain an automatic six-month extension)
State tax returns	Various	Income tax returns for states where corporation carries on trade/business.	Varies, often 15 April

Payment of tax

A taxpayer's tax liability generally is required to be prepaid throughout the year in four equal estimated payments and fully paid by the date the tax return is initially due for that year. However, because a corporation that expects its tax liability for the tax year to exceed the small sum of USD 500 (based on its tax liability for the preceding year), almost all corporations are required to pay their full estimated tax liability for the year in their four estimated tax payments. For calendar year corporations, the four estimated payments are due by the 15th day of April, June, September, and December. For fiscal year corporations, the four estimated payments are due by the 15th day of the fourth, sixth, ninth, and 12th month of the tax year. Generally, no extensions to pay are allowed. Failure to pay the tax by the due dates as indicated above can result in estimated tax and late payment penalties and interest charges.

The instalment payments must include estimates of regular CIT, AMT, environmental tax, and, for foreign corporations, the tax on gross transportation income. To avoid a penalty, corporations must calculate the instalment payments based on at least 25% of the lesser of (i) the tax shown on the current tax return or (ii) the prior year's tax liability, provided that the tax liability was a positive amount in the prior year and that such year consisted of 12 months. However, corporations with taxable income of at least USD 1 million (before use of NOLs or capital loss carryforwards) in any of the three preceding years are not permitted to calculate the instalment based payment on the prior year's tax liability, except in determining the first instalment payment. Instead, such corporations must calculate the instalment payments based on the tax shown on the current tax return.

Penalties

Civil and criminal penalties may be imposed for failing to follow the Code when paying US taxes. The civil penalty provisions may be divided into four categories: delinquency penalties; accuracy-related penalties; information reporting penalties; and preparer, promoter, and protester penalties. Many, but not all, have exception provisions to cover reasonable cause. In addition, many have provisions directing how the penalties interact with the other penalties.

These four main civil penalty categories may further be divided. First, the delinquency penalties may be divided into failure to file, failure to pay, and failure to make timely deposits of tax. Failure to make timely deposits of tax applies to taxpayers required to make instalment payments and WHT payments.

Second, the penalties relating to the accuracy of tax returns are divided into the negligence penalty, the substantial understatement penalty, substantial overstatement

United States

of pension liabilities, substantial estate or gift tax valuation underestimate, and the valuation penalties. These penalties are also coordinated with the fraud penalty to eliminate any stacking of the penalties. Again, like other provisions, the fraud penalty is not intended to be imposed as a stacked penalty.

The third category of penalties is the information reporting penalties. These penalties may be imposed upon those who only have a duty to report information to the IRS.

The fourth and final major categories of civil penalties are the preparer, promoter, and protester penalties. Currently, the most notable of these is the return preparer penalty for which there is a penalty for a position on a return for which the preparer did not have substantial authority. Also included in this provision is a penalty for wilful or reckless attempt to understate the tax liability of another person. Additionally, return preparer penalties may be imposed for failure to furnish a copy of a return or claim for refund to the taxpayer, sign the return or claim for refund, furnish one's identifying number, or file a correct information return.

Other promoter and protestor penalties include a penalty for promoting abusive tax shelters, aiding and abetting the understatement of tax liability, and filing frivolous income tax returns. Additionally, a court may award sanctions and costs if a person institutes or maintains a proceeding primarily for delay, takes a position that is frivolous, or unreasonably fails to pursue available administrative remedies.

In addition to these major civil penalties, international tax-related penalties for failures other than timely and accurate filing (e.g. wilful failure to report international boycott activity, failure of an agent to furnish a notice of a false affidavit relating to the WHT on dispositions of US real property interests, failure of a US person to furnish information relating to CFCs and controlled foreign partnerships, failure of a US person to report foreign bank accounts) exist. Pension and employee benefit related tax penalties exist that protect the policy reasons for the tax incentives, including, most notably, early withdrawal of pension funds. Another group of specialised penalties apply to exempt organisations.

Criminal penalties exist for situations when the failures to stay within the tax system are more egregious. Although applicable to corporate taxpayers, they are applied more frequently to individuals.

In addition to the penalty provisions, interest at statutory rates generally applies to underpayments of tax.

Tax audit process

Generally, the US tax system is based on self-assessment; however, many large and mid-size businesses are under continuous audit by the IRS and state tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller business and persons with lower incomes are generally subject to audit on a random basis.

Statute of limitations

The IRS generally has three years after an original return is filed to assess income taxes. A return will be deemed to have been filed on its due date, even if the return is actually filed on an earlier date.

Topics of focus for tax authorities

Currently, the IRS is focused on abusive payments related to contribution to capital of a corporation, domestic manufacturing deduction, foreign earnings repatriation, FTC generators, repairs vs. capitalisation change in accounting method, research credit claims, transfer of intangibles/offshore cost sharing, WHTs, and employee classification.

Tax shelter

Treasury regulations require taxpayers to disclose transactions determined to be abusive or possibly abusive. Current information on these transactions, known as listed and reportable transactions, is available from the IRS website (www.irs.gov).

Accounting for income taxes

For US federal tax purposes, the two most important characteristics of a tax method of accounting are (i) timing and (ii) consistency. If the method does not affect the timing for including items of income or claiming deductions, it is not an accounting method and generally IRS approval is not needed to change it. In order to affect timing, the accounting method must determine the year in which an income or expense item is to be reported.

In general, in order to establish an accounting method, the method must be consistently applied. Once an accounting method has been adopted for federal tax purposes, any change must be requested by the taxpayer and approved by the IRS. Changes in accounting methods cannot be made through amending returns. The two most common methods of accounting are the accrual basis and cash basis methods.

Other issues

Tax accounting and internal controls

Accounting Standards Codification (ASC) 740, Income Taxes (formerly known as Financial Accounting Standards Board [FASB] Statement No. 109, Accounting for Income Taxes) addresses how companies should account for and report the effects of taxes based on income. ASC 740's principles and requirements apply to domestic and foreign entities in preparing financial statements in accordance with US generally accepted accounting principles (GAAP), including not-for-profit entities with activities that are subject to income taxes. This scope includes: (i) domestic federal (national) income taxes (US federal income taxes for US enterprises) and foreign, state, and local (including franchise) taxes based on income; and (ii) an enterprise's domestic and foreign operations that are consolidated, combined, or accounted for by the equity method.

In recent years, controls around the accounting for income taxes have been a critical source of material weaknesses in companies' internal controls over financial reporting. Accounting for income taxes also has been a primary reason for restating financial statements. Management should ensure that its judgments and estimates are reasonable (e.g. assessing the need for a valuation allowance on deferred taxes) and that the underlying internal control processes are reliable.

The adoption of International Financial Reporting Standards (IFRS) in the United States is set by the Securities and Exchange Commission (SEC). The timeline included in the SEC's roadmap provides for adoption of IFRS in the United States between 2014 and 2016.

United States

Corporate reorganisations

In general, a corporate reorganisation involving a merger, acquisition, or consolidation is a taxable event under the general recognition provisions of the Code. However, a corporate reorganisation that meets certain statutory and judicial requirements may qualify as a tax-free transaction, with gain or loss generally not recognised or deferred to a later date.

Foreign Account Tax Compliance Act (FATCA)

FATCA was enacted in 2010 to prevent and detect offshore tax evasion. While the name may imply that FATCA is directed at financial institutions, many global companies outside the financial services industry may be affected if they have entities in their worldwide network falling under the purview of FATCA, or have operational areas that make or receive payments subject to FATCA.

Multinational enterprises that are withholding agents were already obligated to report, withhold on payments, and document payees, but FATCA requires changes to these activities. FATCA mandates that multinational businesses evaluate entity payees differently, engage in withholding on certain gross proceeds transactions (a change from historic processes), as well as report different information to the IRS.

The withholding provisions of FATCA began 1 July 2014. Compliance with FATCA may require changes to existing systems and processes across business units and regions, the renewal of policies and day-to-day practices, and new tasks, such as registering with the IRS.

To mitigate certain foreign legal impediments to FATCA compliance, intergovernmental agreements (IGAs) also have been negotiated (with more to come) between the US Treasury and foreign governments. Under certain IGAs, including most of the IGAs signed thus far, information will be exchanged directly between the IRS and local governments. This obligates entities in IGA jurisdictions to report information to their government that may not have been required or permitted in the past.

Assessing FATCA's impact will require identifying whether an IGA may apply to the entity or payment stream at issue. Provisions in the final FATCA regulations or, if applicable, an IGA that provides more favourable results may be utilised. This likely will increase the complexity of the process, due in part to the multiple paths to compliance (e.g. regulations or an IGA). The regulators have focused on having consistent requirements in each IGA, but there are noticeable differences in the agreements signed to date.

US possessions

Puerto Rico, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the US Virgin Islands have their own independent tax departments. Accordingly, they have their own rules. *See the Puerto Rico summary for more information about Puerto Rico taxation.*

Significant developments

2015 Law of Accountability

On 14 October 2016, the Uruguayan Congress passed the law for the accountability of the national budget for the year 2015. The law includes tax amendments that became effective from 1 January 2017, except in case a different enforcement is expressly provided. The most relevant tax provisions refer to the following matters:

- The net operating loss (NOL) deduction will be limited. Currently, losses can be carried forward and can be fully deducted from the annual taxable income (for a five-year period). This deduction is now limited to 50% of the net annual taxable income.
- Non-distributed earnings will be subject to 7% dividend withholding tax (WHT) after three years of being generated and not distributed. The reinvestment of the non-distributed earnings in certain types of assets and under certain conditions, as well as the increase in gross working capital, are deductible for the determination of the deemed dividend.
- Corporate income tax (CIT) inflation adjustment shall be carried out only if inflation is over 100%, accumulated in the 36 months prior to the close of the fiscal year end. This is effective for fiscal years ending 31 December 2016.
- Income obtained by entities resident, domiciled, or located in low or no-tax jurisdictions (LNTJs) will be subject to non-residents income tax at a rate of 25%.
- An additional 2% of value-added tax (VAT) reduction applies to transactions made with debit cards or electronic money instruments (transactions up to an amount of approximately 14,000 Uruguayan pesos [UYU]).

Tax Transparency Law

Late in December 2016, the Congress passed a law that includes a set of provisions aimed to enhance the achievement of international standards on tax transparency and prevention of money laundering. The law has four well-defined chapters:

- Provisions that regulate the automatic information that the financial entities must submit to the Uruguayan Tax Office.
- Provisions that seek the identification of final beneficiaries of local and foreign entities with a relevant nexus with the country.
- Tax rules aimed to discourage the use of entities of LNTJs:
 - The bill introduces a change from the 'exhaustive list' approach by which a jurisdiction is considered a tax haven towards a substantive criterion. The rules to be issued by the Ministry of Finance will determine the conditions (minimum effective CIT rate, minimum levels of cooperation and transparency) that countries, jurisdictions, or entities must meet to be considered as LNTJ.

Uruguay

- Income derived from the transfer of shares or participations in entities from LNTJs whose assets located in Uruguay exceed 50% of their total investments is deemed to be Uruguayan sourced (thus taxable) for CIT purposes. Similar provisions apply to resident individuals and to non-resident taxpayers.
- Discouraging the use of intermediary entities that reside in LNTJs, when a resident individual participates in their capital, passive income and/or capital gains received by these entities will be assigned as deemed dividend, thus taxed in the hands of the individual beneficiaries.
- In line with this through the 2015 Tax Accountability Law, rates are increased from 12% to 25% for Uruguayan-sourced income obtained by entities resident in LNTJs.
- Adjustments to the transfer pricing regime:
 - Includes the adoption of the Organisation for Economic Co-operation and Development's (OECD's) recommendations for a country-by-country (CbC) report and the Master File concept for transfer pricing documentation. It is expected that this will be effective for fiscal years commencing after 1 January 2017.
 - Introduces the possibility that taxpayers obtain bilateral and multilateral advance pricing agreements (APAs).

Tax incentives: Decree Nbr. 329/016 and 330/016

The following tax incentives were granted through the Decree Nbr. 330/016, published on 13 October 2016:

- Extension of benefits granted for the Shared Services Center (SSC) regime. *See the Tax credits and incentives section for more information.*
- Enabling free zone (FZ) users to render a wider variety of services to non-FZ Uruguayan territory. *See the Tax credits and incentives section for more information.*

Decree Nbr. 329/016 established exemptions under the Investment Promotion Law for the construction and sale of permanent or sporadic housing corresponding to projects of great economic dimension.

Taxes on corporate income

Net income derived from business activities conducted in Uruguay, obtained by legal entities resident in Uruguay and non-residents operating through a permanent establishment (PE) in Uruguay, is taxed at a CIT rate of 25% under the source principle (i.e. the territorial system of taxation). Accordingly, Uruguay taxes only income that is derived from activities conducted within its borders, income generated from property located in Uruguayan territory, or income derived from the economic use of rights within its territory (*see Foreign income in the Income determination section for an exception to this principle*).

In order to determine the net taxable income, all accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, taxpayers are able to deduct expenses from their gross income if such expenses are subject to taxation (either foreign or local taxation) in the hands of their counterpart. A compulsory proportional deduction must be calculated when the taxation in the hands of their counterpart is lower than 25% (CIT rate).

A 12% WHT is imposed on Uruguayan-sourced income obtained by non-residents, except in cases where the income is obtained through the operations of a PE in Uruguay (see the *Withholding taxes* section for more information).

Trading companies

Uruguayan corporations that sell and buy foreign goods and/or services from Uruguay (which are not physically introduced to the country, in the case of goods; or which are not economically used in Uruguay, in the case of services) may determine the net Uruguayan-source income on a notional basis of 3% of the gross margin (difference between the selling price and the purchase price). This gross margin has to be compliant with transfer pricing rules (in line with OECD guidelines). The applicable effective CIT rate is 0.75% (25% x 3%).

Local income taxes

No taxes on corporate income may be levied by municipal authorities or other local governments.

Corporate residence

Legal entities are deemed to be resident in Uruguay when they are incorporated according to the local legislation.

Permanent establishment (PE)

The concept of PE in the Uruguayan tax legislation follows, in general terms, the definition provided in the OECD Model Tax Convention, although it has some special clauses that may be found in the United Nations (UN) Model Tax Convention. From a Uruguayan law perspective, the term PE means a fixed place of business through which the business of an enterprise is wholly or partly carried on in Uruguay. The term PE especially includes: (i) places of management; (ii) branches; (iii) offices; (iv) factories; (v) workshops; (vi) mines, oil or gas wells, quarries, or any other place of extraction of natural resources; (vii) buildings, constructions, installation projects, or the management activities associated to them, when they last more than three months; and (viii) services, including consultancy services, rendered by a non-resident through employees or other hired personnel by the company for that purpose, to the extent that such activities are developed (in relation with the same or a connected project) during a period or periods exceeding, in total, six months within any 12-month period. Please note that item (viii) constitutes an exception to the OECD model and is based on the provisions of the UN model.

Other taxes

Value-added tax (VAT)

Uruguayan VAT is levied at a general rate of 22% on the provision of services and on the circulation of goods within the limits of the Uruguayan territory. The import of goods and value-added in regard to the construction of immovable assets are also within the scope of this tax.

The following items are either subject to a reduced 10% VAT rate or exempt from VAT entirely.

Uruguay

Items subject to the 10% VAT rate:

- Food and medicines.
- Hotel services.
- Health services.
- The first sale of immovable assets.

Items exempt from VAT:

- Milk.
- Books.
- Magazines.
- Agricultural machinery.
- Certain bank services.
- Accessories.

Exports are zero rated for VAT purposes. VAT on purchases of the exporters can be recovered in the form of credit certificates that can be (i) used to pay other taxes, (ii) used to pay social security contributions, or (iii) endorsed to suppliers who can pay their own national taxes or their own social security contributions.

According to Law N° 19,210 of financial inclusion and electronic payment means and its regulations, the VAT rate has been reduced for the disposal of goods and services made to final consumers, provided that payment is made through debit cards or electronic money instruments. The current rate reduction results in a VAT rate of 18% when the transaction does not exceed approximately UYU 14,000, and for operations above this value, a 20% rate.

VAT requires monthly payments and may require monthly or annual tax returns, depending on the qualification of the taxpayer.

Customs duties

- Consular duty: 2% (applied to customs value). Capital goods with a destination in the industrial, agricultural, and fisheries sectors are exempt.
- Customs services duty: A scale flat duty, with a limit of 50 United States dollars (USD).
- Customs extraordinary duty: A scale flat duty, with a limit of USD 600.
- Global customs duty (TGA): Depends on the origin of goods. If they come from Mercosur, the TGA is generally zero (some goods still apply the payment of the TGA). If not, it varies depending on the type of product, with a maximum rate of 20%, with exceptional levels that range from 23% to 35% (corresponding mainly to certain types of shoes, sugar, and automobiles). For goods classified as capital goods or information and telecommunication goods, there is a special regime.

All imports and exports duties are applied on the 'customs value' (in general, in imports it is considered as cost, insurance, and freight [CIF] and in exports as free on board [FOB]).

On imports, VAT is also applicable according to the following detail:

- Goods subject to the general VAT rate (22%):
 - ‘Import VAT’ at the rate of 22%.
 - ‘Advanced payment import VAT’ at a rate of 10%.
- Goods subject to the reduced VAT rate (10%):
 - ‘Import VAT’ at the rate of 10%.
 - ‘Advanced payment import VAT’ at a rate of 3%.

The tax base of VAT on imports is the customs value plus the customs duties.

Additionally, some goods are also subject to an ‘advanced payment import on account of CIT’ at a rate of 4% or 15%, depending on the type of good, which can be deducted from the amount of CIT for the fiscal year.

Export duties

Exports are not subject to any taxes, and there are almost no prohibitions regarding the type of goods to be exported. On the contrary, several instruments are offered to promote exports, such as the reimbursement of taxes. *For VAT on exports, please see VAT above.*

The exporter may also recover internal taxes that are added to the cost of the products exported. The amount to be reimbursed is a percentage of the FOB value set by the Executive Power for each product.

Additionally, temporary admission consists of the import of raw materials, pieces, motors, package material, and other industrial input without import duties or taxes. To be subject to this customs duties exemption, the company has to export the finished goods within 18 months from the introduction of the exempt goods or materials. The subsequent local sale of such finished goods is not entitled to this benefit.

Excise tax (IMESI)

In general, excise tax applies on the first transaction effected in the domestic market by manufacturers or importers of goods. Exports are not taxable.

Excise tax rates vary for each item, and they are generally fixed by the government within maximum parameters established by law.

Goods subject to the highest rates are alcoholic beverages (from 20.20% to 80%, depending on the alcohol degree), tobacco (from 28% to 70%), lubricants (from 5% to 39%), and gasoline, fuel, and other petroleum products (from 5% to 133%).

This tax requires monthly payments and/or tax returns.

Net wealth tax (NWT)

All types of legal entities and business enterprise owners are subject to an annual NWT at a rate of 1.5% on the value of net assets. This tax also follows the source principle, whereby only assets located or economically used in Uruguay are taxable. Taxpayers may deduct from the NWT the CIT of the same fiscal year; however, the deduction is currently capped at 1% of the NWT.

The deduction of liabilities from the amount of taxable assets to determine the NWT basis is limited to: (i) the average of debts with local financial institutions, (ii) debts with suppliers of goods (except imports) and services, (iii) taxes not yet due, (iv) debts with governments, international credit offices of which Uruguay is a member and with

Uruguay

foreign state financial institutions that lend funds for long-term productive projects, and (v) debts documented in debentures and obligations if their emission is done in a public offering and such papers are quoted in a stock exchange.

Property taxes

Regarding taxes of relevance for those doing business in Uruguay, *please see Net wealth tax (NWT) above*. There are additional property taxes of less significance, levied by Municipal authorities (e.g. *Contribución Inmobiliaria*) and by National authorities (e.g. Primary School Tax *Impuesto de Primaria*).

Note that the Primary School Tax levied on rural assets has been re-established.

Tax on real estate transfer (ITP)

A tax on real estate transfer applies to the transfer of immovable assets. Transfer is defined in an ample sense, as a sale, a cession of the right to use, a transfer of inheritance rights, etc.

Both parties to the transfer contract are subject to this tax at a rate of 2% on the property's tax value (according to a National Register, a value generally lower than market value). When the property is transferred without payment, the beneficiary pays tax at a rate of 4% on the property tax valuation, except in instances where the property is transferred to direct heirs or legatees, who pay this tax at a rate of 3%.

The transmissions of taxable assets that take place as a result of the replacement or removal of trustees is excluded from this tax.

Stamp taxes

Stamp taxes are not applicable in Uruguay.

Tax of control of corporations (ICOSA)

Upon the set-up of a corporation, a tax is payable at a 1.5% rate on a notional basis amount, which is determined annually by the authorities. For fiscal year 2017, the amount of this tax (lump sum) is UYU 30,434.

This tax is also due annually for corporations at the end of each fiscal year, at a rate of 0.75% on said notional amount. Even though this tax can be deducted from the NWT, the excess cannot be refunded, acting as a minimum NWT payment. For fiscal year 2017, the amount of this tax (lump sum) is UYU 15,217.

Payroll taxes

Individual income taxes applicable on employees' remunerations must be withheld by the employer.

Social security contributions

The Uruguayan Social Security regime states that hiring personnel under a dependency relationship implicates the obligation (both for employer and employee) of making contributions over the compensations that constitute the taxable basis.

Taxable basis consists of all earning that in a regular and permanent basis, in cash or kind, susceptible to pecuniary appreciation, is perceived by the dependant personnel, in concept of remuneration and product of its personal activity, in the frame of the working relationship. As a general rule, any compensation originated in activities carried out in Uruguay is subject to social security contributions.

The social security contribution rates are applicable on gross remunerations, according to the following percentages:

Contribution	Employer contributions (%)	Employee contributions (%)
Retirement contributions *	7.5	15
Health insurance	5	3/4.5/5/6/6.5/8 **
Labour restructuring fund	0.125	0.125
Total social security contributions	12.625	18.125 to 23.125

* Both employer and employee retirement contributions rates are applicable, up to the monthly amount of UYU 146,859 (until 31 December 2017); the exceeding amount will be exempt.

** May vary depending on whether the employee is married and whether they have children.

Branch income

CIT is imposed at a rate of 25% on net income derived from business activities carried out in Uruguay. A 7% WHT is imposed on profits remitted or credited to a home office. Profits paid or credited to a non-resident home office will not be subject to WHT when they are paid out of non-taxable income for CIT purposes.

Furthermore, those profits and/or losses derived from financial operations between the branch and its home office will be disregarded for Uruguayan tax purposes (i.e. not taxed in case of income or not deductible in case of costs and/or expenses).

Income determination

Inventory valuation

Replacement cost is permitted for tax purposes, as well as the first in first out (FIFO), last in first out (LIFO), or average cost methods, irrespective of the inventory valuation method used for accounting purposes.

Capital gains

Capital gains are treated as ordinary income for CIT purposes.

As a general rule, capital gains are calculated as the selling price minus the fiscal cost (usually acquisition cost updated by certain inflationary indexes) of goods being sold. In certain cases, not all the fiscal cost may be deductible, depending on the application or not of the compulsory proportional deduction *mentioned previously in the Taxes on corporate income section*.

Furthermore, for certain capital gains, there are special ways of determining the taxable income (e.g. based on notional income).

Bearer title transfer capital gains are subject to a 12% tax rate, applicable to a notional 20% of the transfer price (or 20% of market value of the titles transferred if there is no price). The same tax treatment applies to capital gains derived from the transfer of nominative titles.

Uruguay

Dividend income

Dividends received from local subsidiaries are exempt. Dividends received from foreign subsidiaries are out of the scope of this tax since they are considered foreign-sourced, thus non-taxable, income.

Interest income

Uruguayan-sourced interest income, derived by companies resident in the country, is subject to CIT under the general regime (i.e. taxed at 25%).

Royalty income

Uruguayan-sourced royalty income, obtained by companies resident in the country, is subject to CIT under the general regime (i.e. taxed at 25%).

Foreign income

Uruguayan legal entities (CIT payers) and non-residents operating through a PE in Uruguay are only subject to tax on income from Uruguayan sources under the territorial system of taxation. Hence, foreign-source income is not subject to tax.

However, there is an exception to this principle, as follows. When a CIT payer obtains income as a consequence of rendering technical services outside the limits of Uruguayan territory to another CIT payer and such technical services are used by the recipient to obtain its income subject to CIT, the income obtained by the company rendering the services will be subject to CIT, even when foreign sourced. Technical services are those rendered in the fields of management, technical administration, or advice of any kind.

The following will also be considered Uruguayan-source income:

- Advertising services rendered from outside Uruguay to CIT payers.
- Mediation, leasing, use, transfer of use, or transfer of federate rights, image rights, and similar of athletes registered in resident sports entities, regardless of the registration period or permanence in Uruguay.

Income derived from activities performed, assets located, or rights utilised outside Uruguay, regardless of the nationality, domicile, or residence of the parties participating in the transactions and the place where the transaction agreements are subscribed, is not subject to CIT.

Income adjustment for inflation

An income adjustment for inflation has been in force since 1 January 1981 and is calculated by multiplying the variation in the wholesalers' price index for the financial year by the difference between:

1. total assets at the beginning of the year (excluding fixed assets) and
2. total liabilities at the beginning of the year.

Under an inflation scenario, if (1) is higher than (2), then an inflation loss adjustment is deducted from gross income. However, if (2) is higher than (1), then an inflation gain adjustment is added.

New tax regulations disallow Uruguayan taxpayers to calculate tax inflation adjustment in their CIT return if inflation is below 100% (accumulated in the 36 months prior to the close of the fiscal year end).

Deductions

As a general rule, accrued and duly documented expenses that are necessary to obtain and preserve gross taxable income are tax deductible. On the contrary, those expenses associated with deriving or preserving income not subject to CIT are not deductible from the taxable basis. Furthermore, for CIT purposes, all costs and expenses will be subject to the compulsory proportional deduction *mentioned in the Taxes on corporate income section* (with some exceptions).

Depreciation and depletion

Straight-line depreciation over useful life is mandatory. Specific rates exist for the following cases: (i) 2% per year for urban buildings, (ii) 3% per year for rural buildings, and (iii) not less than 10% per year for new vehicles. Other rates are accepted if economically justified. No conformity between book and tax depreciation is required.

Percentages for depletion computed on the cost of natural resource properties are allowed in accordance with generally accepted criteria.

Depreciation and depletion percentages are computed on the historical cost of fixed assets revaluated at year-end, based on the variation of the wholesalers' price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

Goodwill

When transferring a business or a business unit, the difference between selling price and fiscal costs of the assets being transferred constitutes 'goodwill'. This goodwill constitutes an asset for the buyer and must not be depreciated, neither for CIT nor NWT purposes.

Start-up expenses

Start-up expenses should be depreciated within a period of three to five years. The taxpayer may elect the number of years to depreciate those expenses within those period limits.

Interests expenses

Interests expenses, as well as other costs and expenses, are subject to the compulsory proportional deduction *mentioned in the Taxes on corporate income section*.

When companies derive both income subject to CIT and either income exempt or not included in CIT (e.g. from a foreign source), interest expenses associated to the former (i.e. deductible interest) will be determined by applying a proportion based on assets.

Bad debt

As a general rule, only those debts that are at least 18 months old will be deductible as 'bad debts'. However, national rules allow deductions under some other special situations.

Charitable contributions

Deductibility of charitable contributions will depend on the organisations receiving them.

Furthermore, there is a special regime to certain charitable contributions under which the contributor may deduct 25% of the contribution and the other 75% will

Uruguay

be recovered through credit certificates that may be used to pay taxes (with certain limitations).

Fines and penalties

Fines and penalties generated from unduly paid taxes are not deductible for CIT purposes.

Taxes

CIT and NWT are not deductible.

Net operating losses

Losses may be carried forward and deducted from the net taxable income of the following five years, once adjusted for inflation. For fiscal years initiated on or after 1 January 2017, this deduction will be capped at 50% of net annual taxable income.

There is no loss carryback.

Payments to foreign affiliates

All accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer may deduct expenses from its gross income if such expenses are subject to taxation (either via foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated when the taxation in the hands of the counterpart is lower than 25% (CIT rate).

Group taxation

Group taxation is not permitted in Uruguay.

Specific dispositions regarding the existence of an ‘administrative economic unit’ are included in NWT law, but only for agricultural and/or farming investments for determining the application of NWT exemption and corresponding NWT rates (i.e. group taxation is still not permitted).

Tax Transparency Law N° 19,484 introduced a set of provisions aimed to enhance the achievement of international standards on tax transparency and prevention of money laundering. The Law introduces the following:

- Provisions that regulate the automatic information that the financial entities must submit to the Uruguayan Tax Office.
- Provisions that seek the identification of final beneficiaries of local and foreign entities with a relevant nexus with the country.
- Tax rules aimed to discourage the use of entities resident, domiciled, or located in low or no-tax jurisdictions (LNTJs):
 - The bill introduces a change from the ‘exhaustive list’ approach by which a jurisdiction is considered a tax haven towards a substantive criterion. The rules to be issued by the Ministry of Finance will determine the conditions (minimum effective CIT rate, minimum levels of cooperation and transparency) that countries, jurisdictions, or entities must meet to be considered as LNTJ.
 - Income derived from the transfer of shares or participations in entities from LNTJs whose assets located in Uruguay exceed 50% of their total investments

is deemed to be Uruguayan sourced (thus taxable) for CIT purposes. Similar provisions apply to resident individuals and to non-resident taxpayers.

- Discouraging the use of intermediary entities that reside in LNTJs, when a resident individual participates in their capital, passive income and/or capital gains received by these entities will be assigned as deemed dividend, thus taxed in the hands of the individual beneficiaries.
- In line with this through the 2015 Tax Accountability Law, rates are increased from 12% to 25% for Uruguayan-sourced income obtained by entities resident in LNTJs.
- Adjustments to the transfer pricing regime (*see below*).

Transfer pricing

As a general principle, transfer pricing rules are applicable to international transactions between related parties. However, Uruguayan legislation has extended the scope of these regulations to transactions carried out with LNTJs (either international or domestic) and to certain operations through third-party intermediaries. Domestic transactions with Uruguayan FZ users fall under this category.

The definition adopted by the law for related parties is quite broad. Such a relationship is configured when both parties are subject (directly or indirectly) to the management or control of the same individuals or legal entities, or when they have power of decision to direct or define the taxpayer's activities due either to their participation in capital interest, the level of their credit rights, or their functional or any other type of influence (whether contractual or not).

Regarding transfer pricing administration rules, the Executive Power can enter into APAs with taxpayers, which cannot cover more than three fiscal years. Furthermore, strong penalties are provided for failure of compliance with transfer pricing formal duties and with other formal documentation requirements.

As to transfer pricing, the Tax Transparency Law includes the adoption of the OECD's recommendations for a country-by-country (CbC) report and the Master File concept for transfer pricing documentation. It also introduces the possibility that taxpayers obtain bilateral and multilateral advance pricing agreements (APAs).

Thin capitalisation

There are no thin capitalisation rules in Uruguay.

Controlled foreign companies (CFCs)

There are no CFC rules in Uruguay other than those applicable to individuals.

Tax credits and incentives

Foreign tax credit

There is no foreign tax credit regime in Uruguay for CIT purposes, except for that provided in the double tax treaties (DTTs) currently in force.

CIT reduction for income reinvested in fixed assets

40% of income reinvested in the purchase of (i) industrial and agricultural machinery, (ii) vehicles and installations, (iii) computers, (iv) telecommunications equipment, and (v) some assets for the tourism industry is exempt from CIT.

Uruguay

20% of income reinvested in the construction and expansion of industrial, agricultural, and tourism buildings is exempt from CIT (limited to 40% of net taxable income in the year of expenditure).

The joint amount of said investments can be deducted from the taxable basis, with a limit of 40% of the annual net profit, once the amount of other exemptions has been deducted. The excess can be deducted (with the same limitations) in the following two tax periods. It is important to mention that income exempt by these provisions cannot be distributed and must be retained as a reserve account, which ultimately can only be capitalised.

Note that the above-mentioned CIT benefit will be exclusively applicable to taxpayers whose income in the immediately preceding fiscal year to which the investment is executed does not exceed approximately UYU 30 million. This limitation is not applicable to professional cargo transport companies.

NWT exemption

Movable fixed assets directly connected to the industrial cycle and equipment for data processing are exempt from NWT.

All assets directly associated to the development of agricultural and/or farming activities will be exempt from NWT as long as the owners are individuals or companies with nominative shares also owned by individuals. As a consequence of the elimination of the Rural Real Estate Concentration Tax (ICIR), this NWT exemption has been modified. According to Law N° 19,088, this exemption will apply only in cases where the referred assets do not exceed 12 million 'index units' (approximately UYU 43,500,000 as of 31 May 2017).

Investment Law (IL) - Law N° 16,906

Uruguay has modified the IL, achieving a better framework for local and foreign investments carried out in the country. To obtain tax benefits, the IL requires that enterprises obtain a government statement in this regard. The Bureau of Investor Assistance is in charge of monitoring the correct compliance of these projects.

The IL grants two types of benefits:

Automatic benefits

This kind of benefit is only for manufacturing, extractive, or farming/ranching activities, and includes:

- Exemption from NWT for chattel property directly engaged in the production cycle and data-processing equipment.
- Exemption from VAT and CIT paid on the importation of such goods, and reimbursement of VAT in the case of locally purchased items.

Discretionary benefits

Benefits that may be obtained at the discretion of the Executive Power for any type of business activity (not cumulative with automatic benefits) include:

- VAT and CIT exemptions (among other taxes) on importation of fixed assets items.
- NWT exemptions: Permanent for chattel property items, for a period of eight years for construction work in Montevideo (capital city), and for a period of ten years in the rest of the country.

- VAT reimbursement on local purchase of goods and services for civil construction work.
- Increased deductions for CIT in respect of fees and remunerations related to technological developments.
- Exemption from CIT, depending on the nature and size of the project to be carried out. The Executive Power takes into account the following criteria to grant this benefit:
 - Addition of technology to improve competitiveness.
 - Contribution to export growth and diversification.
 - Contribution to geographic decentralisation.
 - Improvement of technological investigation, innovation, and development.
 - Generation of employment.

Transitory increase of tax benefits

Based on the IL and its regulations (by way of decree), the government decided to temporarily increase the benefits granted under such regime. This provides an excellent opportunity for tax savings for companies making investments in fixed assets.

In particular, it increased by 10% the exemption of CIT, based on the matrix of indicators for investment projects submitted between 1 December 2015 and 31 December 2016, provided that 75% of the project's committed investment is executed before 31 December 2017. In addition, 120% of the investment amount made between 1 December 2015 and 31 December 2016 may be used for the purpose of computing the exempt CIT amount.

Auto-saving 'direction' benefit

The auto-saving 'direction' benefit allows a company to deduct from the CIT basis the amount of the capital increase that occurred as a consequence of the reserves capitalisation or of the in-kind distribution of shares, for an amount equivalent to the investment carried out with the investor's own funds. The amount of the CIT deduction and the period(s) to which said exemption will apply is granted by the government through a statement issued by the Executive Power.

Free zones (FZs)

Following the approval of the FZ law in 1987, this system has become an important tool for attracting investments to Uruguay.

It has been utilised for carrying out traditional activities in the FZs (warehousing, logistics, and distribution), for the provision of services (software, finance, call centres, etc.), and for manufacturing activities such as cellulose pulp and leather production. In a clear sign of stability, none of the administrations in office over the last three decades has modified the basics of the FZ system.

The law defines FZs as privately or publicly owned isolated and fenced off areas of Uruguayan territory determined by the Executive Branch with the purpose of carrying out all types of manufacturing, commercial, and service activities within the zone, while enjoying tax exemptions and other benefits envisaged in the law.

Companies in these areas cannot carry out industrial, trading, or service activities in the non-FZ Uruguayan territory, except for services expressly authorised by the government (listed below), but are allowed to render all types of services within the FZs or to third countries.

Uruguay

FZ users are allowed to render the following services to the non-FZ Uruguayan territory:

- International call centres, except for those whose main destination is the non-FZ Uruguayan territory.
- E-mail, distance learning, electronic signature certificate issuance.
- Software production, technology consulting, and related training services. (*)
- Accounting, administration, and management services rendered to related companies, provided these services do not exceed 5% of the total income of the fiscal year, granted by Decree 330/016. (*)
- Processing of film material and data. (*)

(*) The provision of these services is subject to the general tax system, not to the tax holidays.

In order to operate in/from the FZ, certain requirements must be fulfilled from an 'economic substance' perspective (i.e. there must be an actual economic activity developed in the FZ). In this sense, some modifications were introduced to the FZ Law to determine which substantial activities can be developed outside the FZ.

FZ users are exempt from all current and future national taxes, including those taxes for which a specific legal exemption is required, in connection with the activities performed within the FZs. The Uruguayan government guarantees all the exemptions and benefits granted by the law for the term of their contracts. FZs can be located outside or inside the cities; it depends on the kind of FZ.

Social security taxes, as well as certain WHTs, are excluded from the exemption. WHT on payments of dividends made by these companies to their non-resident shareholders are exempt.

CIT exemption widened for trading activities with transit of goods through Uruguay

The CIT Act establishes a tax exemption for non-residents on income derived from activities performed in Uruguayan customs areas, port customs areas, customs deposits, and FZs, with goods of foreign origin declared in transit or stored in the referred areas. This exemption applies to the extent that such goods are in transit (not having as origin or as destination the Uruguayan customs territory). This exemption also applies on a percentage of the sales that have as final destination the Uruguayan internal market. This tax benefit has been widened and, while originally applicable only to non-residents, is now available for tax residents in Uruguay. In addition, these activities with goods deposited in the country can be performed from outside Uruguay.

Industrial park incentives

Individuals or legal entities that establish industrial parks within Uruguayan territory, as well as companies located within such industrial parks, are entitled to CIT exemption for their industrial equipment, excise tax and VAT exemption on the acquisitions of such goods, and other benefits.

Holding companies

Uruguayan legal entities holding shares in non-resident entities or investing in assets not located in Uruguay are not subject to tax (due to the application of the source principle).

Tax benefits for Shared Service Centre (SSC) activities

Activities carried out by SSCs are granted relevant tax benefits under certain conditions.

For these purposes, an SSC is defined as a subsidiary of a multinational group that provides to its related parties, on an exclusive basis, advisory and data processing services, management or administration (strategic planning, business development, advertising, management, and staff training), logistics and storage, financial management, and research and development (R&D) support used exclusively outside Uruguay.

Tax benefits granted include the exemption of CIT of 90% of the income derived from the promoted activities and exemption of NWT on the assets involved for five or ten fiscal year-ends, depending on specific compulsory requirements that must be fulfilled. To have access to the five year-end tax benefits, an SSC must comply simultaneously with the following conditions:

- Generate at least 150 new direct qualified jobs at the end of the first three year-ends, jobs that must be preserved until the end of the fifth year-end.
- Implement a training plan with a minimum budget of 10 million ‘index units’ (approximately UYU 35,037,000) for the Uruguayan citizen employees during the whole first three year-ends, which must be for new projects.

The tax exemption period will be extended to ten years when (i) the minimum number of jobs exceeds 300 at the end of the first five year-ends and remains until the end of the exemption period and (ii) the referred training expense exceeds twice the aforementioned amount in the course of the first six year-ends.

Tax benefits under the SSC regime have been extended through Decree Nbr. 330/016. Making benefits more accessible, a CIT exemption of 70% of the income derived from the promoted activities by complying with the following conditions is available:

- Generate at least 100 new direct qualified jobs at the end of the first three year-ends (fulfilling the same conditions that are required for the original benefits).
- Implement a training plan with a minimum budget of five million ‘index units’ (approximately UYU 17,518,500) for the Uruguayan citizen employees during the whole first three year-ends (fulfilling the same conditions that are required for the original benefits).

The possibility of providing services to related residents is maintained with the ceiling of 5% of the total amount of services. Although they are not included in the exoneration, they do not affect the applicability of the exemption on the promoted activities.

Regarding NWT, the exoneration of the assets affected by the activity promoted by the CIT exemption period remains unchanged.

Industry-specific incentives

Printing industry incentives

Companies that print books and educational material are exempt from the NWT and VAT.

Uruguay

Long distance services and call centres

Companies developing long distance services and call centre activities have special benefits regarding CIT (from 70% to 100% exemption).

Condo Hotels

Companies running a Condo Hotel have special benefits regarding CIT (from 70% to 100% exemption), among other taxes. There are also exemptions and other tax benefits granted on behalf of the promoting company.

Electric power industry incentives

Companies that generate electric power from non-traditional energy sources have special benefits regarding CIT (from 40% to 90% exemption).

Machinery industry incentives

Companies that build and/or assemble (under certain conditions) machinery with agricultural purposes have special benefits regarding CIT (from 50% to 90% exemption).

Shipping industry incentives

Imports of material, supplies, and equipment required for the construction, maintenance, and repair of shipyards or vessels are exempt from VAT. The shipbuilding industry has special benefits regarding CIT (from 50% to 100% exemption).

Water and air transportation incentives

The income of water and air transportation companies is tax exempt. In the case of foreign companies, the exemption is subject to reciprocal treatment. The government may exempt from CIT companies engaged in transportation by land, subject also to the conditions of reciprocal treatment.

Forestry plantation incentives

Income derived from forestry plantations made before July 2007 is tax exempted. For income derived from forestry plantations made since July 2007, stricter conditions, such as 'quality wood', are required to be exempted from CIT.

Software industry incentives

Software production and related services are exempt from CIT as long as either the final product or the related services are entirely used in a foreign country.

Electronic industry incentives

The production of electronic devices has special benefits regarding CIT (from 50% to 100% exemption).

Tourism industry incentives

Investments in the tourism industry have tax benefits related to CIT, VAT, and NWT, as follows:

- Deduction of up to 40% of CIT in investments made in the fiscal year in hotel equipment and equipment for improving entertainment and information services to tourists and deduction of up to 20% of CIT in investments made in construction and expansion of hotel buildings, with the limits mentioned in previous sections (40% of the annual net profit, once the amount of other exemptions has been deducted).
- VAT refund included in local acquisitions of goods and services for construction, improvement, or expansion of tourist complexes.

- VAT exemption on import of goods for construction, improvement, or expansion of tourist complexes.
- The list of operations included in the concept of exports of services for VAT purposes (thus zero-rated and with the possibility to recover input VAT) was broadened to include, among others, services related to accommodation that hotels, apartments, and rural tourism establishments provide to tourists, as well as for international event organisation services.
- NWT exemption for ten years on investments in infrastructure and civil work for construction, improvement, or expansion of tourist complexes.
- NWT exemption for four years on fixed assets investment for tourist complexes.
- 50% exemption of import duties on materials and goods for construction, improvement, or expansion, as well as fixed assets, of tourist complexes.

Withholding taxes

All Uruguayan-sourced income obtained by non-residents (other than those obtained through a PE in Uruguay) is taxed at flat rates of up to 12% on gross income, with some exceptions. This tax is basically collected by way of WHT.

The exceptions are as follows:

- Interest on deposits in local currency for terms exceeding one year is taxed at 7%.
- Interest on public bonds is not taxed.
- Dividends paid or credited by CIT payers are taxed at 7%, provided they are derived from taxable income (under certain circumstances, non-distributed earnings will also be subject to 7% dividend WHT after three years of being generated).
- Income obtained by entities resident, domiciled, or located in LNTJs is taxed at 25%.

Although the Uruguayan tax law follows the source principle, technical services (defined as services rendered in the fields of management, technical administration, or advice of any kind) rendered in another country by non-residents but associated with taxable income obtained by the local user in Uruguay are considered to be Uruguayan sourced for tax purposes and subject to WHT. However, when the taxable income obtained by the local user of the service does not exceed 10% of its total income, then only 5% of the service fee paid or credited abroad will be subject to non-resident WHT. Therefore, in these cases, the effective WHT rate is only 0.6% (5% x 12%). In those cases where the local taxpayer receiving the service does not obtain any taxable income, the service received will be entirely associated to foreign-source income and thus not subject to WHT.

This WHT should be declared and paid to the Tax Office on the month following the one in which the tax is withheld.

For those countries with which Uruguay has entered DTTs, the maximum WHT rates are the following (in those cases where the maximum WHT provided by the DTT is higher than the internal law WHT, the latter will be applicable):

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Under internal law	0/7	0/12	0/12
Treaty:			
Ecuador	10/15 (7)	15	10/15 (2)
Finland	5/15 (3)	0/10	5/10 (2)

Uruguay

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Germany	5/15 (4)	0/10	10
Hungary	15	15	15
India	5	0/10	10
Korea	5/15 (8)	0/10	10
Liechtenstein	5/10 (5)	0/10	10
Luxembourg	5/15 (4)	0/10	5/10 (2)
Malta	5/15 (3)	10	5/10 (2)
Mexico	5	0/10	10
Portugal	5/10 (6)	10	10
Romania	5/10 (9)	0/10	10
Singapore	5/10 (4)	0/10	5/10 (2)
Spain	0/5 (1)	0/10	5/10 (2)
Switzerland	5/15 (3)	0/10	10
United Arab Emirates	5/7 (10)	0/10	5/10 (2)
United Kingdom	5/15 (4)	0/10	10
Vietnam	5/10 (11)	10	10

Notes

1. Source country may tax at a rate not higher than 5%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 75% of the capital of the company distributing dividends, then the WHT will be 0%.
2. Will depend on the kind of royalty paid.
3. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.
4. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.
5. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is an entity, other than an individual, resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.
6. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.
7. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and directly holds at least 25% of the capital of the company distributing dividends, then the WHT will be 10%.
8. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 20% of the capital of the company distributing dividends, then the WHT will be 5%.
9. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is an entity, other than partnerships, resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.
10. Source country may tax at a rate not higher than 7%. In some special cases mentioned in the DTT, the source country may tax at a rate not higher than 5%.
11. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is an entity, other than partnerships, resident in the other contracting state and holds at least 70% of the capital of the company distributing dividends, then the WHT will be 5%.

Tax administration

Taxable period

The taxable period may be chosen by the company. However, certain sectors or industries have mandatory fiscal year closing dates.

Tax returns

CIT and NWT are self-assessed and their tax returns are filed by the end of the fourth month following the date of the year-end.

Payment of tax

Income and capital taxes are paid monthly by way of advanced payments, which are calculated on the basis of the previous year's tax. The difference between the advanced tax payments and the total annual tax calculated at fiscal year-end is paid by the end of the fourth month after the fiscal year-end.

Tax audit process

The taxpayer has the right to appeal an Administrative Act to the Tax Bureau and, simultaneously, to the Executive Branch in an administrative process. Both appeals must be filed jointly within ten days from the notification of the administrative act. If both appeals are tacitly (not expressly resolved within a period of 150 days) or expressly rejected, the taxpayer has the right to appeal to a special court through a judicial proceeding.

Statute of limitations

The statute of limitations in Uruguay is five years, which can be extended to ten years in the case of: (i) tax fraud, (ii) not complying with Tax Office registration, (iii) lack of communication of a taxable event, or (iv) not submitting a tax return (among other cases).

Topics of focus for tax authorities

There are several topics the tax authorities are currently focusing on.

One of the newest topics of interest for the tax authorities concerns 'transfer pricing' rules and their impact on multinational companies operating in Uruguay.

During the last few years, important investments have been made by the government to automate processes and improve assistance to taxpayers.

Other issues**Bank secrecy and identification of title holders**

The inclusion of the request of information by a treaty partner is approved as one of the hypotheses under which banking secrecy can be lifted.

The identification of holders of bearer titles representing the capital of entities domiciled or doing business in Uruguay is mandatory. In this regard, Law N° 18,930 includes the compliance of certain obligations for identification purposes. This obligation relies on the holders, who must identify themselves with the Central Bank of Uruguay, providing not only their identity but also the percentage of their participations in the entity.

Information shall be kept by the Central Bank of Uruguay and subject to secrecy, although the National Tax Office, anti-money laundering authorities, penal and family courts, and related entities may access them in certain cases.

Uruguay

The duty of identification applies to all entities domiciled in Uruguay and to companies incorporated abroad, provided that they act in Uruguay through a PE or if their management is carried out in Uruguay.

Tax treaties

A tax information exchange agreement (TIEA) with The Netherlands entered into force (as of June 2016), as well as one subscribed with Chile (as of August 2016) and with the United Kingdom (UK) (as of October 2016).

With regard to DTTs, treaties entered into force with the United Arab Emirates (UAE) (as of June 2016), Vietnam (as of July 2016), the United Kingdom (as of November 2016), Luxembourg (as of January 2017), and Singapore (as of March 2017).

Furthermore, a TIEA with Brazil is ratified by the Uruguayan government as well as a DTT with Belgium. TIEAs signed with South Africa and Guernsey are under Uruguayan Parliament discussion, similar to the status of the DTT with Chile.

These agreements will enter into force once the contracting states exchange the corresponding ratification notes.

Significant developments

The following notable changes were introduced to Uzbek legislation as of 1 January 2017.

- Imputed taxable income from receipt of interest-free loans or financial aid shall be calculated based on the refinancing rate set by the Central Bank of Uzbekistan as at the date of issue of the loan/financial aid. If the interest charged under the interest-bearing loan is below the refinancing rate, the difference shall also be imputed as taxable income of the recipient of the loan. The above requirements shall not apply to loans provided by credit institutions (e.g. banks), loans under decisions of the President or Cabinet of Ministers of Uzbekistan, as well as loans from non-residents.
- Double tax treaty (DTT) benefits (i.e. withholding tax [WHT] exemption or rate reduction) on all types of non-residents' Uzbekistan-sourced income is automatically applied, provided the tax agent is supplied with an appropriate tax residency certificate. Such exemption/rate reduction for certain types of income previously required preliminary approval by the Uzbek tax authorities.
- The list of taxes payable by taxpayers under the simplified tax regime was supplemented by VAT in respect of construction projects under competitive tenders and financed from centralised sources (i.e. state budget, designated funds, etc.).
- The criterion for qualifying as a small enterprise (i.e. annual average headcount) was amended to exclude employees of subsidiary companies in calculation of the enterprise's annual average headcount.
- Taxpayers may be subject to a scheduled tax audit due to regular non-payment of taxes and other obligatory payments during a fiscal year.
- Scheduled tax audits of private banks and other private financial institutions are to be carried out not more than once in five years.
- Unified tax and customs regime was introduced for free economic zones operating in Uzbekistan.

Revised rates of certain taxes were introduced to the tax legislation effective as of 1 January 2017:

- Land tax rates for legal entities are raised by approximately 15%.
- The monthly fee payable by mobile operators for each customer number is increased from 1,500 Uzbekistani som (UZS) in 2016 to UZS 2,000.
- Excise tax rates for production and import of alcoholic drinks and cigarettes (and certain other goods) are increased.
- Rates of compensation payments for pollution of the environment are increased by approximately two times.

Minimum monthly wage (MMW) is set as UZS 149,775 as of 1 October 2016.

Uzbekistan, Republic of

Taxes on corporate income

Resident corporations pay corporate income tax (CIT) on their worldwide income, whereas non-residents (i.e. foreign legal entities that have a permanent establishment [PE] in Uzbekistan or have income from sources in Uzbekistan not associated with a PE) pay CIT on income resulting from activities/sources in Uzbekistan.

Non-resident corporations are taxed directly at the level of their Uzbek PE, if there is one, or via WHT at the source of payment of the Uzbek-source income.

CIT is charged on taxable profit calculated as a difference between gross income and deductible expenses reduced by applicable incentives granted by the Tax Code, other laws, or presidential decrees.

The CIT rate is set annually by presidential decree. In 2017, enterprises (i.e. legal entities) are generally subject to CIT at the rate of 7.5%. Commercial banks are subject to CIT at the rate of 15%.

Companies providing mobile services are taxable on excess profits through differentiated CIT rates as follows:

- If profitability is lower than 20%, the CIT rate is 7.5%.
- If profitability is higher than 20%, 50% of the CIT rate is charged on profits exceeding the 20% level of profitability.

See the Withholding taxes section for WHT rates applicable in Uzbekistan.

Simplified tax regime

An optional simplified tax regime is available for micro-firms and small businesses, which prescribes payment of one of the following taxes: unified tax payment (UTP), unified land tax (ULT), or fixed tax for certain types of entrepreneurs. For these taxpayers, the UTP, ULT, or fixed tax replaces the CIT, value-added tax (VAT), water-use tax, IDT (*see Local income taxes below*), property tax, and other local taxes and duties.

Excise and customs duties remain applicable for this group of taxpayers (unless a specific exemption applies). However, micro-firms and small businesses producing excise-liable goods or engaged in subsurface extraction may not opt for the UTP regime.

UTP is obligatory for companies engaged in catering, retail, and wholesale, irrespective of headcount.

The general UTP rate is 5%.

ULT is payable by agriculture companies, and the rate is 0.95% of normative value of agricultural land.

Local income taxes

There is a local tax on accounting profit (less CIT), an infrastructure development tax (IDT), which is charged at a maximum rate of 8%.

IDT is reported jointly with CIT on a quarterly basis.

Corporate residence

For Uzbek tax purposes, corporations are classified as resident or non-resident. A resident corporation is a legal entity that passed state registration in Uzbekistan (i.e. Uzbek legal entity). Other legal entities are regarded as non-resident corporations for tax purposes.

Permanent establishment (PE)

PE is defined by the Tax Code as “any place through which a non-resident carries out entrepreneurial activity in the Republic of Uzbekistan, including activity carried out through an authorised person. PE is also existent where a non-resident carries on entrepreneurial activity for 183 days (or more) in any consequent 12-month period”.

Other taxes

Value-added tax (VAT)

Legal entities are subject to VAT, which is applied to taxable turnover and taxable imports. The rate for taxable turnover is 20%. This rate also applies to taxable imports, for which the tax base is determined as the customs value plus import duties and excise tax (on excise-liable goods). Export of goods for hard currency is generally zero-rated. Insurance and most types of financial services are exempt from VAT.

VAT is reported quarterly by micro-firms and small enterprises and monthly by other categories of taxpayers.

Customs duties

Import of certain goods to Uzbekistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Rates of customs duties vary from 5% to 70%, depending on the type of imported goods. There is also a customs clearance fee of 0.2% from the customs value of imported goods, but not less than 25 United States dollars (USD) and not exceeding USD 3,000.

Excise taxes

Legal entities producing or importing excise-able goods (e.g. cigarettes, jewellery, petrol, alcohol drinks) are subject to excise tax. Rates vary from 2% to 200%, depending on the type of goods produced/imported. The taxable base is determined as the value of produced/imported goods, excluding VAT. Excise tax is reported monthly.

Property taxes

The property tax rate is 5% for legal entities. The tax is computed annually, based on the net book value of the fixed assets, adjusted for the effect of revaluation, which should be performed annually on 1 January, and the value of overdue construction-in-progress. The rate is doubled for equipment not installed in due time.

A charge of 0.25% of the historic value of outdated equipment is collected from legal entities (except for micro-firms and small enterprises) for exploitation of fully depreciated equipment.

Newly opened enterprises are exempt from property tax for a period of two years from their date of registration, unless such enterprises have been created on the basis of production facilities or assets of existing enterprises. There is also a rate reduction

Uzbekistan, Republic of

benefit available to companies engaged in production and export of goods (work, services).

Property tax is reported annually.

Obligatory revaluation of fixed assets is to be performed by micro-firms and small enterprises once every three years (other categories of enterprises that are subject to this requirement should perform revaluation every year).

The Tax Code provides for the list of certain non-taxable property, mostly including public service facilities (e.g. waterwork facilities), gas and heat distribution lines, railways and highways, and machinery and equipment in use for more than ten years.

Land tax

Enterprises, including foreign legal entities operating in Uzbekistan via a PE, owning land plots or rights of their use are subject to land tax or land lease payment annually. Land tax is charged at fixed fees that vary depending on the quality, location, and level of water supply of each land plot. Land lease payment is charged at negotiable rates; however, the minimum amount cannot be less than the land tax rate for the respective land plot. Land tax and land lease payment are computed based on the area of the land in use.

Transfer taxes

There are no transfer taxes in Uzbekistan.

Stamp duties

According to Uzbek legislation, stamp duty (state due) is an obligatory payment charged for performance of legal actions and/or issuance of legal documents. The following actions, among others, are subject to stamp duties: filing claims, performing notary actions, civil registration, state registration of a legal entity, obtaining licences/permits to carry out certain activities, etc.

The rates of stamp duties generally vary from 0.5 to 20 times MMW, depending on the type of action executed. For instance, duty for filing a claim depends on the amount of claim. If the amount is less than 20 MMW, the duty comprises 5% of this amount; if the amount exceeds 80 MMW, the duty is 20% of this amount. Duty for notarisation of copies of documents for legal entities is 2% of the MMW per each page of the document. Duty for registration of legal entities with foreign investment comprises five times the MMW plus USD 500 if submitted in person and 50% of this (i.e. 2.5 MMW plus USD 250) if submitted through the automated online registration system.

Turnover taxes

There are three mandatory contributions that are charged on the enterprise's gross annual turnover (less VAT and excise tax):

- Road fund to be imposed at a rate of 1.4%.
- Pension fund at a rate of 1.6%.
- Educational and medical institutions fund (for reconstruction, capital repair, and equipment) at a rate of 0.5%.

The taxable base (and tax rate in exceptional cases) for these mandatory contributions may differ depending on the type of activity of a company. Turnover taxes are reported quarterly.

Micro-firms and small enterprises paying taxes under the standard tax regime (except enterprises producing excisable goods and extracting mineral products subject to subsurface use tax) are no longer subject to obligatory contributions to the above-designated funds.

Unified social payment (USP)

Employers are subject to USP assessed on total payroll cost related to local and expatriate staff. This payment is collected by the tax authorities. The rate of USP is 25% (15% for micro-firms, small enterprises, and farms).

Income of foreign personnel paid to non-resident legal entities as part of secondment fees under personnel provision agreements is subject to USP. The taxable base for calculation of USP on such income shall be the income of foreign personnel provided, but not less than 90% of the secondment fee payable under the personnel provision agreement. USP is reported monthly.

Payroll taxes

In addition to USP, employers are responsible for withholding personal income tax (PIT) and pension fund contributions from salaries and remitting them to the state budget.

Water-use tax

Enterprises (including PEs) using water in their production are subject to water-use tax. The tax rate is set by the Cabinet of Ministers and depends on the source of water consumption (i.e. surface or underground). Water-use tax is calculated based on the volume of the water consumed. Water-use tax is reported annually.

Taxes of subsurface users

In addition to standard taxes, subsurface users (i.e. legal entities and individuals exploring and extracting natural resource) are subject to subsurface users' specific taxes, as listed below:

Subsurface use tax (royalty)

Subsurface use tax is charged on volume of produced (extracted) natural resources that are ready for sale or transfer (including free of charge) and consumption for internal purposes. The taxable base is determined as the average weighted sales price.

Business activity	Tax rate examples
Extraction of natural resources	natural gas 30%, precious stones 24%, oil 20%, gold 5%, silver 8%
Utilisation of by-products received during the extraction of natural resources	30% of tax rate applicable to main natural resources extracted

Subsurface use tax is reported quarterly.

Excess profits tax

Excess profits tax is assessed on the difference between the selling price of the extracted natural resources (as per the list) and the statutory price set by the legislation. Excess profits tax is not payable by entities operating under production sharing agreements.

The list of natural resources and goods subject to excess profits tax includes copper, cement, natural gas, polyethylene granules, and clinker. Excess profits tax is paid at 50% of the taxable base.

Uzbekistan, Republic of

Signing and commercial discovery bonuses

Signing and commercial discovery bonuses are one-off payments to the state budget. The signing bonus is payable for the right to engage in exploration and extraction of natural resources and range from 100 to 10,000 times the MMW, depending on the type of minerals. The commercial discovery bonus is paid for each field where a subsurface user discovers the natural resources and comprises 0.1% from the cost of the proved reserve volume.

Branch income

The Civil Code of the Republic of Uzbekistan provides that enterprises can establish and operate branches. However, the by-laws governing procedures for establishing entities with foreign investments do not provide sufficient guidance on establishing branches of foreign legal entities, creating a practical problem with registering of branches of foreign legal entities. Instead, such entities use a PE registration to perform business activities without establishing an Uzbek company.

In addition to CIT, non-residents operating in Uzbekistan via PE pay so-called 'net profits tax' assessed at 10% on accounting profit less CIT.

Income determination

Inventory valuation

Uzbek legislation permits the application of the weighted average cost method (AVECO) and the first in first out (FIFO) method for the valuation of inventory for tax purposes.

Capital gains

Capital gains arising from the disposal of tangible and intangible assets are calculated as the difference between the selling price and the net book value of an asset. The capital gain is included in taxable profits (unless specifically exempt), and the capital losses are deductible (only if the disposed asset had been used for business purposes for three or more years). This is applicable to Uzbek legal entities and PEs of foreign legal entities.

Capital gains of non-resident companies are subject to WHT at 20% as 'other' income. The obligation to withhold and pay the tax on income of a non-resident of the Republic of Uzbekistan is levied on the buyer of the property, a tax agent.

In the absence of the documents supporting the acquisition price, WHT on capital gains from the sale of property shall be assessed based on the sales price.

Dividend income

Dividends paid by a domestic subsidiary are subject to 10% WHT at the source. The net dividends received by its domestic parent company are then excluded from its CIT base. Such net dividends received by a foreign parent company are taxed in accordance with the respective country's internal legislation or DTT provisions (if Uzbekistan has a DTT with this country).

Income of non-residents subject to WHT (including income in the form of dividends, interest, and royalties) is to be paid without withholding of WHT at source or with

application of a reduced WHT rate as provided by a tax treaty, provided that there is a tax certificate confirming that non-residents are registered for tax purposes in the state with which Uzbekistan has the effective tax treaty (with certain exemptions). Such WHT exemption/rate reduction used to be granted through a preliminary approval by the Uzbek tax authorities.

See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

Interest income

Interest income is subject to 10% WHT at the source. The net interest income received by companies is then excluded from its CIT base. Such net interest income received by foreign companies is taxed in accordance with the respective country's internal legislation or DTT provisions (if Uzbekistan has a DTT with this country). Similar to other types of income of non-residents subject to WHT (including income in the form of dividends and royalties), interest income is to be paid without withholding of WHT at source or with application of a reduced WHT rate by automatic application of a DTT, provided that there is a relevant residence certificate.

See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

Royalty income

Royalty income includes payments for:

- usage and granting of the right to use works of science, literature, and art, including software programs, audio-visual production, and objects of related rights, including performances and soundtracks, and
- usage of a patent (certificate) confirming the right to an industrial property object, a brand (service mark), a trademark, design or model, plan, secret formula or process, or information (know-how) concerning industrial, commercial, or scientific expertise.

Royalty income of Uzbek legal entities and PEs of foreign legal entities is included in taxable profits.

Royalties paid to non-resident companies with no PE are subject to WHT at 20% as 'other' income. The obligation to withhold and pay the tax on income of a non-resident of the Republic of Uzbekistan is levied on the payer of royalty, a tax agent.

Foreign income

Gross foreign income of a resident corporation (e.g. income from its foreign branch) should be included in its aggregate income on an accrual basis, regardless of remittance date. Expenses incurred abroad in relation to such foreign income can be deducted, subject to provisions of the Uzbek Tax Code. Foreign income tax paid on such income should be credited against the Uzbek CIT only if this branch is registered in a country with which Uzbekistan has a DTT. There are no deferrals for foreign income to be recognised for Uzbek tax purposes.

Uzbekistan, Republic of

Deductions

The tax base for CIT purposes varies significantly from the computation of taxable profits in most Western jurisdictions. Expenditures such as entertaining, benefits in-kind, and business trip allowances exceeding the statutory norms (that are generally low) are non-deductible.

There are additional costs that cannot be deducted by PEs of foreign legal entities, such as interest on head office loans; commission fees charged by the head office; and royalty, administrative, and management expenses of the head office incurred outside Uzbekistan. However, PEs are eligible to deduct expenses incurred outside of Uzbekistan if they directly relate to their business in Uzbekistan.

Depreciation and amortisation

For tax purposes, depreciation/amortisation is calculated with application of rates defined by the Tax Code. If depreciation for accounting purposes is charged at higher rates (compared with the Tax Code rates), the difference is treated as a temporary difference for CIT purposes (i.e. deducted in future periods).

Depreciation is calculated from a month following the month when the asset was put into use until it is fully depreciated, disposed, or written off. The maximum annual depreciation rates applicable to different types of fixed assets are outlined in the table below.

Depreciable item	Rate (%)
Buildings and other structures	5
Cars, tractors, special equipment, computers and related hardware	20
Lorries, buses, special cars and trucks, industrial machinery and equipment, agricultural machinery and equipment, oil extraction and mining equipment, office furniture	15
Railway, river and air transport vehicles, thermo-technical equipment, turbines, electric and diesel drives, power supply and communication lines, pipelines	8
Depreciable assets not mentioned above	15

For statutory accounting purposes, fixed assets can be depreciated using one of the following methods:

- Straight-line method.
- Production method.
- Double-declining-balance method.
- Sum-of-the-years' (cumulative) method.

Intangible assets, including leases and other property rights, are amortised over the shorter of an asset's useful life or the period of activity of the enterprise. Where an asset's useful life cannot be determined, the asset can be amortised over five years.

Expenses related to geological exploration and developmental works necessary for the extraction of natural resources are deductible for CIT purposes through depreciation at the rate of 15% *per annum*.

Goodwill

For tax purposes, expenses incurred for acquisition of goodwill should be deductible through monthly amortisation charges at norms calculated by the taxpayers based on historical cost of goodwill and its useful life.

Start-up expenses

Current legislation does not provide specific guidance on tax treatment of start-up expenses. However, as per Uzbek accounting legislation, certain types of start-up expenses (e.g. expenses for acquisition of right for production, right for rendering services and carrying out works, right to use economic or other privileges) can be considered as expenses for procurement of intangible assets and, respectively, can be deducted through monthly depreciation charges.

Interest on short-term loans

Interest is deductible, except for interest on overdue/delayed loans (i.e. 'penalty interest') and interest capitalised in the value of fixed assets (i.e. in cases where a loan was obtained to purchase fixed assets).

Bad debt

Bad debts are deductible for tax purposes in cases where they are recognised in accordance with Uzbek accounting legislation. Otherwise, such expenses should be considered as non-deductible. According to the current Uzbek legislation, arrears are recognised as bad debts upon expiration of three-years from their due date.

Charitable contributions

Charitable contributions are generally treated as non-deductible expenses and added-back to the taxable base.

However, taxable income can be reduced for the amount of charitable contributions to ecological and charitable foundations and cultural, medical, educational, and municipal institutions, not exceeding 2% of the taxable income.

Fines and penalties

Fines and penalties are considered as non-deductible expenses.

Taxes

Generally, taxes are deductible for CIT purposes. The exceptions are the IDT based on after-tax profits and the 'net profits tax' for PEs.

Other tax losses

In cases where goods or services are sold below cost (or given for free), the revenue should be adjusted for tax purposes to the cost or purchase price of the goods or services.

Production wastes and defects within statutory norms, and losses resulting in *force-majeure* circumstances, are generally deductible.

Losses from the disposal of fixed assets also may be deducted if the fixed asset has been used for three or more years.

Net operating losses

Tax losses may be carried forward for a period of five years, allowing a reduction of taxable income of the respective year by up to 50%. Loss carrybacks are not permitted.

Payments to foreign affiliates

There are no special tax provisions regarding deductibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met (*see Transfer pricing in the Group taxation section*).

Uzbekistan, Republic of

Group taxation

There is no provision for consolidation of income or losses by related companies for tax purposes in Uzbekistan. A foreign legal entity that has several PEs in Uzbekistan may not consolidate those for tax purposes.

Transfer pricing

The transfer pricing concept in the Uzbek Tax Code is limited to a couple of paragraphs stating that tax authorities may adjust prices used by interrelated parties if these prices differ from the prices that would have been used in transactions with independent parties. There is no further guidance for application of this rule, which gives rise to different interpretation by tax authorities and taxpayers.

Thin capitalisation

Effective legislation does not provide for thin capitalisation rules, except for debt-to-equity ratios set up by the Central Bank of Uzbekistan (CBU) for commercial banks.

Controlled foreign companies (CFCs)

Uzbek tax legislation currently does not provide for any CFC rules or regulations.

Tax credits and incentives

The current tax legislation offers tax incentives for enterprises in oil and gas exploration/development projects, enterprises engaged in the production and export of goods for foreign currency (when export share exceeds 15%), and companies rendering certain services.

Before 2017, three economic zones have been operating in Uzbekistan. Namely, the Free Industrial Economic Zone in the Navoi region (established in 2009), Special Industrial Zone in Angren (established in 2012), and Special Industrial Zone in Djizzak (established in 2013).

In 2017, four new free economic zones, namely 'Urgut' in Samarkand region, 'Gijduvan' in Bukhara region, 'Kokand' in Ferghana region, and 'Khazarasp' in Khorezm region of Uzbekistan were established. Free economic zones will operate for 30 years, with possibility of prolongation.

In accordance with the unified tax and customs regime introduced in 2016 for free economic zones operating in Uzbekistan, participants of free economic zones are exempt from:

- land tax, CIT, property tax (for legal entities), IDT, UTP for micro-firms and small enterprises, as well as mandatory contributions to the road fund and educational and medical institutions fund (for reconstruction, capital repair, and equipment), and
- customs payments (except for fees for customs clearance) for equipment, raw materials, and components imported for own production needs, as well as construction materials not produced in Uzbekistan and imported for implementation of projects as per the list approved by the Cabinet of Ministers of Uzbekistan.

The duration of the above incentives differs depending on the size of investment, as described below.

- From USD 300,000 to USD 3 million: Exemption is valid for three years.
- From USD 3 million to 5 million: Exemption is valid for five years.
- From USD 5 million to USD 10 million: Exemption is valid for seven years.
- More than USD 10 million: Exemption is valid for ten years; in the following five years, the income tax and unified tax rates are set at 50% of then effective tax rates.

The following incentives are extended to participants of operating free economic zones (previously, applicable only in respect to the 'Navoi' free economic zone):

- Exemption from customs payments (except customs clearance fees) on imported raw material and components for products required for production of exported goods for the whole period of free economic zones functioning.
- Payments in foreign currency within the free economic zones.
- Payments in foreign currency to Uzbek suppliers for goods, works (services), as well as use of preferable conditions and means of payment for exported and imported goods.

Incentives for oil and gas exploration and extraction companies

Foreign companies carrying out oil and gas exploration works, as well as their foreign contractors/subcontracts engaged in such works, are exempt from payment of all forms of taxes and contributions to non-budget funds during the exploration period. Additionally, import by these companies of equipment, material, and technical resources and services necessary for the exploration and related works is exempt from customs duties.

Resident corporations supplying materials and rendering services to foreign companies carrying out oil and gas exploration are exempt from VAT.

Furthermore, if foreign companies carrying out oil and gas exploration form joint venture companies for extraction of oil and gas at respective fields, such companies are granted a seven-year CIT holiday starting from the date of commencement of extraction.

Incentives for carrying out export activities

Enterprises exporting goods (works, services) of their own production for freely convertible currency may apply reduced rates of CIT as follows:

- If export share of total sales ranges from 15% to 30%, the effective rate shall be reduced by 30%.
- If export share of total sales is 30% or more, the effective tax rate shall be reduced by 50%.

This incentive is applied likewise in regards to property tax as follows:

- If export share ranges from 15% to 30%, the property tax rate is reduced by 30%.
- If export share is 30% or more, the property tax rate is reduced by 50%.

The incentive in both cases is subject to a restriction that it does not apply to wholesale/retail sale or intermediary companies, nor to revenues from the export of specific items such as cotton fibre, oil, gas, precious metals, etc.

Uzbekistan, Republic of

Producers can also defer payment of their import VAT in respect of material and technical resources used for production of goods to be exported. The deferral is granted for up to 90 days without application of any interest.

Incentives for service companies

Micro-firms and small enterprises engaged in certain types of activity are exempt from CIT and UTP until 1 January 2020. The exemption is no longer applicable to entities providing financial and banking services, including but not limited to leasing, audit, tax consulting, accounting services, and other services, like realtor services or veterinary services.

Exemptions from customs duties

There are certain exemptions from payment of customs duties offered by the legislation for the following, without limitation:

- Vehicles used for the international transportation of goods, luggage, and passengers.
- National currency of the Republic of Uzbekistan, foreign currency (excluding those for numismatic purposes), as well as securities.
- Goods imported as humanitarian aid.
- Goods imported for charitable purposes, including technical assistance.
- Goods under transit regime.
- Goods imported by legal entities at the expense of loans granted by international and foreign governmental financial organisations under international agreements, and at the expense of grants.
- Property imported for production needs by foreign investors and enterprises with foreign investment with foreign participation of not less than 33% within two years after state registration.
- Property imported for personal needs of foreign investors, citizens, or stateless persons residing in Uzbekistan in accordance with labour contracts concluded with foreign investors.
- Goods imported into the customs territory by foreign legal entities that made direct investments in the economy of the Republic of Uzbekistan for a total amount equivalent to or more than USD 50 million, provided that the imported goods are products of their own production.
- Goods intended for works under the production sharing agreement and imported under the project documentation by a foreign investor or other persons engaged in the performance of the production sharing agreement, as well as goods exported by the investor under the production sharing agreement.
- Technological equipment imported according to the list approved in accordance with legislation, as well as components and spare parts, provided that their supply is stipulated by the terms of the contract (agreement). In case of sale or gratuitous transfer of imported technological equipment for export within three years from importation, this exemption is revoked along with restoration of obligations to pay customs duties for the entire exemption period.

Foreign tax credit

In accordance with international tax treaties of the Republic of Uzbekistan, legal entities/residents of Uzbekistan can obtain tax relief in respect of CIT paid outside of Uzbekistan. Depending on the provisions of a particular DTT, a credit or exemption may be claimed. In order to claim tax relief, legal entities should provide a copy of the tax payment order, confirmation from a competent tax authority, or any other document confirming payment of the tax outside of Uzbekistan.

Withholding taxes

WHT is to be withheld and remitted to the state budget by entities paying income to non-residents if these entities qualify under a tax agent definition (i.e. by [i] Uzbek legal entities and [ii] non-residents operating in Uzbekistan via PE).

Income of non-residents subject to WHT (including income in the form of dividends, interest, and royalties) is to be paid without withholding of WHT at source or with application of a reduced WHT rate as provided by the tax treaty (with certain exemptions), provided that there is a duly formalised tax certificate issued by a competent authority confirming that non-residents are registered for tax purposes in the state with which Uzbekistan has the effective tax treaty. Such WHT exemption/rate reduction used to be granted through a preliminary approval by the Uzbek tax authorities.

The domestic WHT rates are as follows:

Payment	WHT (%)
Dividends and interest	10
Insurance and reinsurance payments	10
Freight	6
Royalties, services (including management, consulting services), rents, other income	20

Double taxation treaty (DTT) relief

Foreign legal entities that do not carry on activities in Uzbekistan through a PE are subject to WHT on income from sources in Uzbekistan, subject to the terms of a relevant DTT. Uzbekistan has enforced DTTs with 52 countries.

DTTs in force establish WHT rates as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Austria	5 (2)/15	10	5
Azerbaijan	10	10	10
Bahrain	8	8	8
Belarus	15	10	15

Notes

- Where the beneficial shareholder owns not less than 10% of the voting shares.
- Where the beneficial owner holds at least 10% of the capital of the paying entity.
- Where royalties are paid for patents, trademarks, know-how, etc.
- Where royalties are paid for copyrights on literature, cinema, musical works, etc.
- Where royalties are paid for secret formulas, processes, or know-how.
- Where royalties are paid for computer software, patents, designs, models, or plans.
- Where one of the following conditions is met:
 - recipient is a local authority or corporate body constituted under public law, including the central bank of the state, or interest is paid by the local authorities or corporate bodies
 - interest is paid in respect to debt claims or loans, guaranteed, insured, or aided by the state or on behalf of the state
 - interest is paid in respect to credit sales of industrial, commercial, or scientific equipment, goods and merchandise, or provision of services by an enterprise to another enterprise, or
 - interest is paid in respect to a loan of any kind granted by a bank.
- Where the beneficial shareholder owns no less than 25% of the capital of the paying entity.
- Where the recipients of the interest are governments of contracting states or any governmental body (such interest is exempt from WHT).
- Where royalties are paid in respect to use or the right to use industrial, commercial, or scientific equipment.
- Where the beneficial shareholder owns no less than 20% of the voting shares.
- Where the interest is received by any financial institution (including insurance companies).

13. Under the provisions of the Netherlands' Company Tax Act and the future amendments thereto, a company that is a resident of the Netherlands is not charged to Netherlands company tax with respect to dividends the company receives from a company that is a resident of Uzbekistan.
14. If and as long as the Netherlands, under its national legislation, levies no WHT on interest or royalties paid to a resident of Uzbekistan, the WHT rate for interest and royalty income paid at source in Uzbekistan shall be reduced to 0%.

Tax administration

Taxable period

The taxable period for CIT is a calendar year.

Tax returns

CIT is reported quarterly before the 25th day of the month following the reporting quarter, with an annual return due by 25 March following the reporting year for enterprises with foreign investment and 15 February following the reporting year for other categories of CIT payers. PEs report on CIT once a year prior to 25 March following the reporting year.

Payment of tax

Uzbek enterprises, including enterprises with foreign investment, are required to make advance instalments of CIT in each quarter based on estimated profits in the quarter. The instalments are payable by the tenth day of each month. Final quarterly payments based on actual profit figures are payable no later than the filing deadline for the quarterly tax returns (which is the 25th day of the month following the period of assessment). In case the final quarterly payment is more than 10% higher than advance instalments made in this quarter, tax authorities have the right to recalculate the advance instalments based on the actual quarterly profit figures and charge late payment interest accordingly.

Final CIT payment should be made no later than the date set as the deadline for annual return submission.

Payment of CIT by a PE is made annually within a month after the filing deadline.

Tax audit process

Scheduled statutory tax audits are to be carried out once in three years (once in four years for micro-firms, small enterprises) by the tax authority of the district where the enterprise is registered (i.e. district tax inspectorates). However, in certain cases, the tax audit is undertaken by the State Tax Committee, which is the highest tax authority.

The tax audits are aimed at verification of the tax returns submitted by the taxpayer. Normally, the tax authorities will review the accounting records, copies of tax returns, and source documents as required.

Effective 1 January 2017, all types of unscheduled audits of business entities were abolished, except for audits due to liquidation of legal entity or short-term audits carried out exclusively by decision of the Republican Council on coordination of regulatory authorities. Also, all types of cross audits of business entities, including those under criminal investigation, were abolished.

Article 10 of the Law 'On state control of activities of business entities' was supplemented by a provision stating that scheduled tax audits of private banks and

Uzbekistan, Republic of

other private financial institutions are to be carried out not more than once in five years.

In case of tax breaches revealed during tax audits, taxpayers should remove tax violations and pay respective taxes/obligatory payments and late payment interest within 30 days after the tax authority's decision is released. If accomplished within the deadline, the tax authority's decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from (i) the taxpayer's bank accounts (by issuing tax liability claim without acceptance), (ii) the taxpayer's debtors (by issuing tax liability claim on the debts payable to taxpayer), or (iii) the taxpayer's property (by issuing tax liability claim upon decision of the court).

Another form of monitoring accuracy and completeness of fulfilment of tax liabilities imposed by the tax authorities is 'cameral control', which is performed at the time of tax returns submission. The tax authorities may require the taxpayer to amend the tax return(s) if they have revealed mistakes or inconsistencies therein. The amended tax returns should be filed within ten days.

Statute of limitations

The statute of limitations for tax purposes in Uzbekistan is set to five years.

Topics of focus for tax authorities

There are no officially announced areas of focus during tax audits. In practice, the tax authorities usually focus on currency control, cash discipline, deductibility of expenses for CIT purposes, and taxes on resources (e.g. excess profits tax, subsurface use tax).

Other issues

Intergovernmental agreement (IGA) on the Foreign Account Tax Compliance Act (FATCA)

On 3 April 2015, a Model 1 IGA between the Government of the United States of America and the Government of the Republic of Uzbekistan to Improve International Tax Compliance and to Implement FATCA was signed. The IGA is not yet in force and is pending completion of domestic procedures.

More than 60 countries around the world have concluded IGAs on FATCA with the United States, while, as per a statement by the US Embassy in Uzbekistan, Uzbekistan is the first country in Central Asia to sign an IGA on FATCA with the United States.

The IGA will ensure compliance with US tax laws for US citizens working in Uzbekistan. According to the FATCA regulations, foreign financial institutions (FFIs) (i.e. all financial institutions outside of the United States) are faced with disclosure requirements regarding their account holders who are US persons. This means that FFIs in Uzbekistan are obligated to periodically transmit information on financial accounts held by US persons to the US Internal Revenue Service (IRS) or face a 30% WHT on payments made from the United States. In order to fulfil this obligation, FFIs should implement procedures to ensure information collecting systems are in place and required information in respect to US investors is duly reported to the US IRS.

Significant developments

Informative worth return for special taxpayers

On 16 January 2017, Administrative Ruling SNAT/2017/0002 published in the Official Gazette N° 41,075 provided for the obligation for legal entities qualified as special taxpayers to file an informative worth return.

According to the ruling, for these purposes, the entity's worth is comprised of assets and rights of economic value. Special taxpayers are comprised of individuals and entities with specific characteristic with regard to income level or type of activity and have been designated as such by the tax authorities by notification.

The ruling entered into force at the date of publication of the Official Gazette and the informative return should have been filed within 90 days following the enactment of the ruling.

Modifications on currency exchange regime

Exchange Agreement N° 38 enacted on 19 May 2017 provides for the terms of the auctions for the sale and purchase of foreign currency under the floating supplementary market exchange rate system (DICOM as per its Spanish Acronym). The auctions will operate under a monitored floating system where approved demands of foreign currency will be settled at the value offered by the purchaser.

Two kinds of auctions are established: (i) ordinary auctions, available to individuals and legal entities of all sectors and subject to the terms indicated in the calls, and (ii) contingency auctions, when due to an excess of offer or demand of foreign currency in the ordinary auctions, demands of foreign currency are not totally assigned. In this latter case, participation will be prioritised on the basis of the activities or economic sector of the requestors.

In general terms, there are limits to the amounts of foreign currency to be assigned to individual and legal entities participating in the auctions. Entities of the public sector can only participate as offerers.

Taxes on corporate income

Corporations resident in Venezuela are subject to corporate income tax (CIT) on their Venezuelan and foreign-source income, whereas corporations resident abroad with a permanent establishment (PE) in Venezuela are levied CIT on only their Venezuelan and foreign-source income attributable to said PE. Corporations are able to claim

Venezuela

any similar taxes paid abroad on foreign-source income as a tax credit. Non-resident corporations without a PE are subject to CIT only on Venezuela-source income.

Corporate income is taxed at the following progressive rates based on tax units (TU) (*see below*) (i.e. Tariff 2):

Taxable income (TU)		Rate (%)	Subtract (TU)
Over	Not over		
0	2,000	15	0
2,000	3,000	22	140
3,000	-	34	500

Tax units (TU)

The 1994 Income Tax Law reform established the concept of a taxable unit as an element that reduces the negative effects created by inflation on the determination of the tax rates. The tax code established the initial TU at 1 *bolívar fuerte* (VEF), with annual basis adjustments according to the variation on the consumer price index (CPI) from the previous year. For 2016, TU was VEF 177. For 2017, TU is VEF 300.

Additional rates and considerations

Income for oil exploitation and certain related activities is taxed at a flat rate of 50%. Related activities are comprised of those such as refinery, transportation, and purchases for the exports of hydrocarbons and by-products for exploitation. Joint venture corporations are also subject to a 50% CIT rate.

The above indicated regime does not apply to corporations engaged in the exploration and exploitation of non-associated gas (and the processing, refining, transportation, distribution, commercialisation, and exportation of the gas and its components) or companies exclusively engaged in the refining of hydrocarbons or improvement of extra heavy oil, which are subject to Tariff 2.

Net income from banking, financial, insurance, and re-insurance activities carried out by entities domiciled in Venezuela is subject to a 40% flat rate.

Local income taxes

See Municipal business licence tax in the Other taxes section for a description of local taxes on income.

Corporate residence

According to the Venezuelan tax code, the following companies are regarded as resident:

- Companies incorporated in Venezuela and registered with the Mercantile Registry as established by commercial law.
- Foreign companies registered to be domiciled in Venezuela as branches duly registered with the Mercantile Registry.

The following companies are non-residents but subject to Venezuelan taxes:

- Foreign companies that provide technical assistance, technological services, royalty items, and professional services from abroad.

- Foreign banks granting loans to local companies.
- Foreign companies leasing goods to local companies.
- Foreign companies deriving income from economic activities carried out in Venezuela or from assets in Venezuela.

Permanent establishment (PE)

According to the Venezuelan Income Tax Law (VITL), generally, a passive party is deemed to be carrying out operations in Venezuela through a PE when:

- The passive party owns, directly or through an agent, employee, or representative in the Venezuelan territory,
 - an office, fixed place of business, or an activity centre where its activities are totally or partially carried on
 - management headquarters, branches, offices, factories, shops, facilities, warehouses, stores, construction, installations, or assembling works, when the duration thereof exceeds six months, or
 - agencies or representatives authorised (according to the VITL) to contract in the name of or on behalf of the passive party.
- The passive party performs, directly or through an agent, employee, or representative in the Venezuelan territory, professional, artistic activities.
- The passive party possesses, directly or through an agent, employee, representative, or other contracted personnel in the Venezuelan territory, other work places where the operations are wholly or partially performed.

Any agent acting independently shall be excluded from this definition, except if such representative has the power to conclude contracts in the name of the principal.

Other taxes

Value-added tax (VAT)

Federal VAT (*Impuesto al Valor Agregado* or IVA) is a one-time tax payable by the ultimate consumer of all types of products and services. However, each business entity involved in the process, from the sale of raw materials to the production and distribution of finished products to the ultimate consumer, is required to include the tax on its products to customers (output tax) and to pay the tax on its purchases or imports of goods and services (input tax), crediting the amounts paid against the amounts due on its own activities. The net amount payable by each entity is considered to represent a tax on the value added.

In general, VAT does not represent an additional cost to business enterprises because even though all types of business enterprises, including government departments and agencies (with some exceptions), are required to accept charges of the tax by suppliers on their purchases of goods and services, such amounts are normally deductible from the liability of the business enterprises for the tax on their bills to customers.

There are exceptions, principally when the sales of an enterprise are exempt from VAT, in which case the enterprise is treated as the final consumer and must absorb any VAT charges on its purchases except insofar as its activities are subject to the zero rate (*see below*). However, input tax paid on goods or services used to produce items that are exempt from VAT may be deducted for CIT purposes.

Venezuela

Taxable transactions

In general, VAT is payable on all sales, rental, and importation of goods, and rendering of services executed or used in the country, although a number of significant exceptions are provided by law.

Sales of goods

The law defines a sale as any transmission of tangible goods, including those made on a conditional basis or through an irrevocable trust. The taxable amount of a sale includes the sale price as well as other amounts charged to the purchaser for other taxes, duties, interest, or surcharges of whatever nature. VAT becomes payable when the goods are invoiced or shipped to the customers or when the price is paid in full or in part.

Exempt sales include the following:

- Certain foods and other products for human consumption.
- Fertilisers as well as any natural gas used in the manufacturing thereof.
- Some products for animal consumption.
- Medicine.
- Products derived from hydrocarbons and some raw materials intended to improve the quality of gasoline.
- Wheelchairs.
- Books, magazines, newspapers, and the paper used in producing these products.
- Vehicles, aircraft, and trains for passenger transport.
- Machinery and equipment for agribusiness.
- Scientific equipment purchased by the government.

Services

Taxable services are those rendered within Venezuela by one person to another on an independent basis, transportation of passengers or goods, agency activities, technical assistance, and transfer of technology. VAT is payable to service providers at the time the invoice is issued, the service is rendered, or the fee becomes demandable, whichever comes first. The taxable amount includes not only the price of services, but also charges to the customers for other taxes, interest, etc.

Exempt services include the following:

- Domestic land and maritime transportation of passengers.
- Educational services.
- Accommodations for students and persons with disabilities.
- Healthcare and dental services, surgery, and hospitalisation.
- Theatres, sports, and cultural events.
- Food services for employees and students.
- Certain utilities (e.g. electricity, water).
- Housecleaning.
- Transport services for hydrocarbon-derived fuels.
- Services involving livestock, poultry, and other minor species, including breeding and production.

Exports

Exports are zero-rated. Consequently, VAT is not payable on exports, including exports of in-bond processing companies, technical fees to foreign residents, and sales to in-bond processing companies and companies that export their entire production. Sale of natural hydrocarbon by joint ventures regulated by the Hydrocarbon Law to

the National Oil Company (PDVSA) and affiliated companies are also taxable at 0%. Though exporters do not collect VAT on export sales, they may recover VAT charges on their purchases of goods and services by means of a refund certificate. This certificate may be used to pay other tax obligations. If such exporters carry out sales in the country, they will be entitled to recover only input VAT related to foreign sales.

Additionally, a zero rate applies to independent personal services provided by residents in Venezuela that are used solely by and for the benefit of persons abroad without a PE or fixed base in Venezuela.

Tax rates

The rate may change every year, within the range of 8% to 16.5%. Currently, the general VAT rate is 12%.

A 15% VAT applies to the sale and imports of luxury products (e.g. vehicles valued at 40,000 United States dollars [USD] or more, motorcycles valued at USD 20,000 or more, nickel or token game machines, aircraft used for recreational or sport purposes, jewellery valued at TU 2,500 or more).

An 8% VAT applies to the following transactions:

- Goats, sheep, and minor species for slaughter or breeding.
- Meats in their natural state, or refrigerated, frozen, or salted meats, or meats in brine of goats, sheep, and poultry.
- Shortening.
- Rendering of professional services to any government entity, in any level or branch of government, provided such services do not involve any commercial transactions but rather predominantly intellectual work or efforts.
- Domestic air passenger transportation.

In December 2016, a 2% VAT reduction was set for transactions paid through electronic means. Based on this, a 10% VAT applied, provided that:

- the transactions involved the sale of movable goods or supply of services to individual end consumers
- amounts involved were lower than VEF 200,000, and
- payment was carried out through electronic means.

The reduction became effective on 21 December 2016 and was in force for 90 days.

Payment and collection

Excess VAT charged or chargeable to customers over VAT paid to vendors or customs authorities (*Servicio Nacional Integrado de Administración, Aduanera y Tributaria* or SENIAT), including the correspondent payment, must be remitted to SENIAT within the first 15 days of the following month.

Customs duties

As a general rule, the importation of goods into Venezuela is subject to customs duties. These duties are generally levied on the cost, insurance, and freight (CIF) value of the product being imported, excluding VAT.

Customs duty rates generally range from 5% to 35%. The duty rates vary depending on the product involved. In general, import tariffs are 5% for capital goods, 10% to 15%

Venezuela

for raw materials and intermediate goods, and 15% to 35% for finished products. In addition, all imports are subject to customs handling charge, a duty import, and VAT.

With regard to procedural aspects, the Master Customs Law establishes two modes of customs declaration: (i) the anticipated informative declaration, only applicable to imports, and (ii) the definitive declaration for customs regime, also known as the single customs declaration. In this regard, it establishes that entities with competence for the issuance of permits and licences are to issue the corresponding documents, at least 25 business days in advance to the arrival of the merchandise, in order for importers to register the advanced informative customs declaration.

Additionally, an element has been created, named Authorised Economic Operator, who will be the company domiciled in the country, involved in the international logistic chain, which will serve as the substitute of simplified control procedures and customs clearance. With regard to the sanctioning system, pecuniary penalties applicable to transporters, porters, consolidating companies, and customs agents, as well as those applicable to infringements committed in the customs declaration of merchandise, have been increased.

Excise taxes

Tax on alcohol and alcoholic beverages

In general terms, the manufacture, commercialisation, and importation of alcohol and alcoholic beverages are subject to excise taxes. The Law of Tax on Alcohol and Alcoholic Beverages provides for three main types of excise taxes:

- Tax on the national production and importation of alcohol and alcoholic beverages, which is established on the basis of TU per litre and varies depending on the type of product.
- Additional excise tax per litre for national and imported beer and for other alcoholic beverages is levied on the sale of those products to the public, which is also provided on the basis of TU per litre, depending on the type of product.
- In addition to the above, another excise tax is imposed on the importation or local sale of national and imported alcoholic beverages to the public, which is levied on the sales price and provided on the basis of a percentage on the price of sale to the public depending on the type of product, as follows: 15% for beer, 35% for natural wines, and 50% for other beverages up to 50 grade on the Gay-Lussac scale.

The Alcohol and Alcoholic Species Tax Law specifies the time of payment of the tax as follows: (i) for importers, at the moment the merchandise is nationalised and (ii) for producers, upon withdrawal of the products from the establishment.

Tax on cigarettes and manufacturing of tobacco

The importation and national production of cigarettes and tobacco, fine cuts, and other tobacco derivatives to be consumed in Venezuela is subject to an excise tax. This proportional tax is levied at a rate of 70% on the retail price of cigarettes, tobacco, and its derivatives. As per the Cigarette and Tobacco Manufacturing Tax Law, produced and imported taxable products for zones under the Territorial Customs Regime, duty free shops, and special development regions shall also be subject to tax.

The time of payment of tax on cigarettes and manufacturing of tobacco is as follows: (i) for national production, before the products are removed from the manufacturing establishments and (ii) for imports, at the time of customs declaration.

Urban Property Tax

The Urban Property Tax is a local or municipal tax payable by any person who owns property rights or any other real rights on urban real estates. The taxable basis is the value of the urban real estate. For these purposes, the fair market value of the real estate is provided as a point of reference. The applicable rate varies according to each municipality.

Public registry tax

Commercial companies are registered with the Mercantile Registry Office and are subject to a tax levied upon incorporation of a company and registration of capital increases. The tax is 1% of the amounts of subscribed or increased capital.

The sale of a going concern is also registered in the Mercantile Registry Office and is subject to a tax levied upon the total amount of the sell. The tax is 2% of the amount.

Stamp duties

The Stamp Duties Law establishes a number of stamp duties on the issuance of official documents (e.g. certificates, permits, authorisations, registrations). Stamp duties may be levied at fixed amounts (ranging from TU 0.01 to TU 10,000) or at a rate based on the value of the transaction or work in question and vary depending on the jurisdiction.

District Capital stamp tax

The District Capital stamp tax on subscribed or increased capital of companies is 2%.

Tax on Large Financial Transactions

Taxpayers for the purposes of the Tax on Large Financial Transactions comprise:

- Entities qualified as 'special taxpayers' by the tax authorities, for payments made from their accounts in banks or financial institutions and payments that do not involve financial institutions (debt offsetting, debtor or creditor substitution, and debt forgiveness).
- Entities related to those qualified as 'special taxpayers' for the above-indicated transactions.
- Individuals and entities acting on behalf of 'special taxpayers' for the above-indicated transactions.

Special taxpayers are comprised of individuals and entities with specific characteristics with regard to income level or type of activity and have been designated as such by the tax authorities by notification.

The tax applies, among others, to the following transactions:

- Debits made in bank accounts, or any other deposit instrument, held in financial entities.
- Transfer of securities as of the second endorsement.
- Acquisition of cashier's check.
- Cross-border payments
- Payments of debts obligations (even if not executed through the formal financial system).

The applicable rate is 0.75% on the total bank debit or taxable transaction.

Venezuela

Certain transactions involving state-issued securities, payments of taxes, and transfer of funds among same-holder accounts are exempted from this tax.

The tax is not deductible for Venezuelan income tax purposes.

The tax due shall be determined on a daily basis.

Gift tax

Overall, the Inheritance and Donations Tax Law, published on 1999, stipulates the taxes attributable to inheritances left by individuals. Nonetheless, this Law provides regulation about donations, which are significant to corporations. Subject to payment of the gift tax are the beneficiaries of gifts in the form of movable or real property, rights, or shares located in the country.

For tax calculation purposes, the progressive tax rate (up to 55%) set forth in the Law will be applied to the donated good. Both donors and donees are jointly liable for the tax generated from the gift.

The gift tax is applicable from the time in which the donors manifest before the National Treasury their will to donate and must be paid before the registration of any document formalising or evidencing the authenticity of the gift. Should the donation not be perfected due to express will of the donor or rejection on the part of the donee, the obligation to pay the tax will be eliminated and reimbursement may be requested of the amounts paid in this connection.

Under the transfer pricing rules contained in the VITL, the tax authorities are empowered to impute income in inter-company transactions at a price reflecting the fair market value of the property being transferred.

Before the introduction of transfer pricing rules, under the Inheritance and Donations Tax Law, the tax authorities could and still can presume in transactions involving a sale, assignment, barter, or transfer, the existence of a donation if, for instance, the price stipulated in such transaction does not reflect the real value of the property being transacted. In such a case, a gift tax may be imposed on the difference between the fair market value of the property being transacted and the consideration received in return.

Also, a cancellation of a debt gives rise to gift tax issues. In this regard, the Inheritance and Donations Tax Law provides that the total or partial forgiveness or cancellation of a loan must be viewed as a gift and, as such, is subject to gift tax.

Windfall tax on oil production

The windfall tax on oil companies is provided in the following terms:

- The contribution on extraordinary oil prices is a 20% tax on the difference in price when the internationally quoted price per barrel exceeds the budgeted price per barrel (for purposes of the Venezuelan Annual Budget Law), provided that the quoted price per barrel is equivalent or lower than USD 80 per barrel (i.e. the maximum basis is the difference between USD 80 per barrel and the current budgeted price of USD 55).
- The contribution on exorbitant oil prices is comprised of the following:
 - 80% tax on income generated by quoted oil prices between USD 80 and USD 100 per barrel (i.e. 80% on the range from USD 80 to USD 100 quoted price per barrel).

- 90% tax on the difference in the quoted oil prices between USD 100 and USD 110 per barrel.
- 95% tax on the difference over the threshold of USD 110 per barrel.

The tax is payable by oil companies exporting with sale purposes. Also, the mixed companies (*empresas mixtas*) created in accordance with the Master Hydrocarbons Law that sell oil and by-products to PDVSA, or any of its affiliates, are also obligated to pay the above described tax.

On the other hand, tax exemption is provided for the following cases:

- For mixed companies when their activities are the result of the performance of projects for new developments of reservoirs, enhanced production, or projects to remediate production, declared as such by the Ministry of the Popular Power for Petroleum and Mining, until they have recovered their total investment. Parameters to determine the volumes exempted are to be separately established by the aforesaid Ministry by Resolution.
- Exports executed in connection with cooperation or financing international agreements.

The tax is payable on a monthly basis in foreign currency. Other terms of payments are to be regulated by Resolution.

Additionally, USD 80 per barrel is the maximum price to be used as the calculation basis for the payment of royalties, extraction tax, and export registration tax provided for in the Master Hydrocarbons Law.

Hydrocarbons Organic Law

The state is entitled to 30% of the volume of hydrocarbons extracted from any deposit, by way of royalties. The National Executive can reduce this within certain limits, when it is shown that certain types of deposits are not economically exploitable.

Persons conducting activities related to hydrocarbons must pay the following taxes:

Surface tax

For the portion of the surface area granted that is not under development, the equivalent of TU 100 for each square kilometre or portion of a square kilometre for every elapsed year is due as a surface tax. This tax will increase annually by 2% during the first five years and 5% during the following years.

Tax on own consumption

10% of the value of each cubic metre of hydrocarbon by-products produced and consumed as fuel in wholly-owned operations, based on the price of the end consumer, is due as a tax. In the case that said product fails to be sold in a domestic market, the Ministry of Energy and Mines shall provide the price.

General consumption tax

For every litre of hydrocarbon by-products sold in the domestic market, a tax is due at the rate of between 30% and 50% of the price paid by the end consumer, whose aliquot should be implemented annually between the two extremes under the Budget Law. This levy to be paid by the end consumer should be withheld at the supply source, to be handed over to the National Treasury on a monthly basis.

Venezuela

The National Executive may waive, in whole or in part, by the time specified, the general consumption tax, in order to encourage certain activities of public or general interest. The National Executive can also reinstate this levy to its original level when the causes for the waiver cease to exist.

Gaseous Hydrocarbons Organic Law

The Gaseous Hydrocarbons Organic Law establishes a system of royalties, determinable by the volumes of gaseous hydrocarbons extracted from any deposit and not re-injected. The state is also entitled to a 20% share for this item.

The Law also provides that additional legislation may obligate these entities to pay taxes on hydrocarbons consumed, such as fuel. However, no additional regulations have been enacted for enforcement of this obligation.

Additional taxes are provided for in the licence agreements, which vary for each particular case.

Science, technology, and innovation contribution

The Law on Science, Technology, and Innovation (LOCTI), establishes a mandatory contribution to be paid by companies that obtained, in the previous fiscal year, over TU 100,000 in gross income.

The kind of companies that are required to pay this contribution are stock companies, limited liability companies, partnerships, communities, irregular associations, associations, foundations, and PEs or fixed bases located inside or outside the national territory with current activities in Venezuela.

Contributions established in the LOCTI are as follows:

- Contributions made from companies related to bingos and casinos activities, alcoholic drinks, or tobacco: the companies engaged in activities related to bingos and casinos, alcoholic drinks, or tobacco must contribute annually the equivalent of 2% of gross income.
- Contributions made by private companies engaged in hydrocarbon or mining activities: the companies that are engaged in hydrocarbon activities, including gaseous hydrocarbons, or mining activities, must contribute the equivalent amount of 1% of gross income.
- Contributions made by companies engaged in other economic activities: these companies must contribute annually the equivalent of 0.5% of gross income.
- The company that performs activities with two different percentages will apply the highest one.

The National Fund for Science, Technology, and Innovation (FONACIT) is the entity responsible for the administration, collection, control, verification, and qualitative and quantitative determination of the contributions.

The contribution must be paid to FONACIT during the second quarter after the end of the corresponding fiscal year.

Contribution to support Organic Law on Sports, Physical Activity, and Physical Education

The purpose of the Organic Law on Sports, Physical Activity, and Physical Education (Sports Law) is to establish the public service nature of physical education and the

promotion, organisation, and administration of sports and physical activity, as well as their organisation as an economic activity with social aims.

The provision of the Sports Law are of a public nature and are applicable to the public national, state, and municipal administration and organisations, and also to individuals and legal entities that conduct any activity related to the practice, promotion, organisation, sponsorship, administration, or any economic activity associated with sports or physical activities and education.

The Sports Law creates the National Fund for the Development of Sports, Physical Activity, and Physical Education, which will be constituted with the contributions made by companies or other public or private organisations that perform economic activities for profit in the country; by donations, gifts, or any other special contribution made by the Republic, the states, the municipalities, or any other public or private entity; and by the revenue produced by such funds.

The contribution is 1% of the annual net of accounting profit and is payable by all companies or other public or private organisations that perform economic activities within the country and obtain an annual net or accounting profit of more than TU 20,000. Up to 50% of the contribution can be for the implementation of the taxpayer's own projects, provided the respective project follows the guidelines to be issued by the National Sports Institute, which will be updated every two years.

Anti-drugs contribution

The Organic Drug Law stipulates that any company employing 50 or more employees must make an annual contribution from their operating profit equivalent to 1%. On the other hand, corporations with the specifications mentioned before but that are dedicated to the manufacture or import of alcohol beverages, tobacco, or their mixtures are required to make a contribution equivalent of 2% from their operating profit. Under the definitions established by this Law, operating profit can be understood as the result from subtracting the operating expenses from the income profit in accordance with the accepted Venezuelan general accounting principles.

This contribution will be collected by the National Anti-Drug Fund (FONA) within 60 continuous days counted from the end of the fiscal year.

Note that this contribution can be retrieved if the company performs:

- prevention programs and projects intended for the company employees and their family environment
- prevention programs for children and adolescents, or
- programs to fight drug trafficking.

Payroll taxes and other contributions

Contributions applicable to resident companies in Venezuela:

Contributions	Basis	Contribution basis (cap)	Employer contributions (%)	Employee contributions (%)	Notes
Mandatory social security regime contribution	Wages (normal or regular wages)	Up to five minimum salaries for urban workers	9/10/11	4	(1, 2, 5)

Venezuela

Contributions	Basis	Contribution basis (cap)	Employer contributions (%)	Employee contributions (%)	Notes
Employment benefit regime contribution	Wages (normal or regular wages)	Up to ten minimum salaries for urban workers	2	0.5	(1)
Housing regime contribution	Total monthly (or integral) salary	No cap (5, 6)	2	1	(5, 6)
Employee training contribution (INCES)	Total salaries paid by the employer for purposes of the employer's contribution.	No cap	2	0.5 (4)	(3, 4)
Workplace prevention, conditions, and environment contribution (LOPCYMAT)	Total salaries paid to employees	No cap is established	From 0.75 to 10	N/A	(7, 8)

Notes

- As of 1 May 2017, the minimum monthly salary amount is VEF 65,021.04.
- The employer's contribution to social security depends on the company's risk qualification (minimum risk, middle risk, or maximum risk).
- Regarding *Instituto Nacional de Capacitación y Educación Socialista* (INCES) contribution, the employer must contribute 2% of the total wages and salaries paid to employees.
- Employers are also required to withhold 0.5% of the annual profit-sharing bonus paid to employees.
- According to the *Ley Orgánica del Sistema de Seguridad Social* (LOSSS), the general rule for contribution basis for the new systems may not exceed ten minimum salaries. The transition rules establish a contribution basis of five metropolitan minimum salaries for urban workers for social security purposes. No cap is expressly established in the transition rules for the housing system and work, security, and health regime.
- The basis of calculation of the housing contributions is the 'Integral Salary'. The Integral Salary is a concept established in the Organic Labour Law, and it comprises the following payments: commissions, gratifications, profit sharing bonuses, vacation bonus as well as surcharges for holidays, overtime, night shifts, among others, all of which are made to the employee and correspond to the services rendered by the individual.
- Contributions to be made to this regime are exclusively for the employer and vary depending on the risk associated to the company. A company's risk is to be determined by the *Instituto Nacional de Prevención, Salud y Seguridad Laborales* (INPSASEL).
- Ley Orgánica de Prevención, Condiciones y Medio Ambiente de Trabajo* (LOPCYMAT) regulations do not establish a cap for the contribution. However, as mentioned, the LOSSS establishes a maximum of the minimum urban salaries. For this reason, there are several contrary interpretations on whether a cap should be applied in this case.

Other contributions (see above)	Basis	Contribution basis (cap)	Employer contributions (%)	Employee contributions (%)
Science, technology, and innovation contribution (LOCTI) (1)	Total annual income	N/A	0.50/1/2	N/A
Anti-drug contribution (LOD) (2)	Operating profit	N/A	1/2 (3)	N/A

Notes

- Ley Orgánica de Ciencia, Tecnología e Innovación* (LOCTI).
- Ley Orgánica de Drogas* (LOD).

3. 2% in the case of companies that manufacture or import alcohol beverages or tobacco. 1% for companies that employ 50 or more employees.

Municipal business licence tax

Companies and business entities, as well as individuals and unincorporated companies, are subject to municipal tax on gross income from industrial or trade activities carried on in the municipality during the fiscal year. The rates range from 0.1% to 10.0%, depending on the activity and the municipality.

Other municipal taxes

Municipalities also tax vehicles, public entertainment, legal bets, and commercial advertisements. There are also various municipal tariffs and fees.

Branch income

Branches of foreign corporations are subject to the same tax rules as Venezuelan corporations. Inter-branch income and deductions must be eliminated. The positive difference between a branch's annual book and taxable income is deemed to be remitted to the branch's head office (branch profits tax). Such remittances are subject to the 34% flat dividend tax (see *Dividend tax in the Income determination section for more information*) regardless of whether there is an actual payment unless the branch can provide proof of reinvestment of its profits for a five-year period. If such proof is established, no deemed remittance is assumed.

A Venezuelan taxpayer has to recognise, annually on an accrual basis, income generated in a company or other legal entity it controls that is located in a jurisdiction with low fiscal taxation (JLFT). Further, investments in a JLFT must be declared to the SENIAT.

Income determination

Inventory valuation

Inventories may be valued at cost or the lower of cost or market value. Any method generally accepted for accounting purposes can be accepted for tax purposes.

Capital gains

Capital gains are taxable as ordinary income, and capital losses are deductible from ordinary income. Note that capital losses resulting from the sale of stock, capital reduction, or liquidation of a company are only deductible if they meet one of the following conditions:

- The cost of the capital stock was not in excess of the price quoted on a stock exchange or an amount with a reasonable relationship to the book value of the capital stock.
- The holding period of the investment was for at least two years immediately preceding the date of the sale.
- The stockholder proves that the company selling the shares carried on economic activities for at least two years preceding the date of sale.

At present, the tax law contains two different rulings relevant to the deductibility of losses incurred through operations on the Venezuelan Stock Market, one of which has been described above. The second ruling pertains to income obtained from operations

Venezuela

on the local market. This income is subject to a final 1% tax that is withheld at the source. Losses in this kind of operation are not deductible against other income. Corporate shareholders not domiciled in Venezuela may not deduct such losses from other taxable income other than dividends arising from Venezuelan sources.

Gains upon liquidation or reduction of capital are taxable to the liquidating entity.

Dividend income

A dividend tax is levied at a flat rate of 34% on the positive difference between book income and tax income generated after 2000. Book income is understood to be that approved at a shareholders' meeting and based on the financial statements prepared pursuant to generally accepted accounting principles (GAAP). To determine the applicable difference, a last in first out (LIFO) method applies. The tax is triggered when a dividend is paid and shall be remitted via withholding. Withholding is to be made at the moment a dividend is declared or credited to the account of a recipient. The 34% (domestic) rate can be mitigated under tax treaties.

Dividends obtained from companies incorporated or resident abroad or incorporated abroad and resident in Venezuela are taxed at a flat 34% rate.

Stock dividends

Dividends of stock are subject to payment of the aforementioned dividend tax. Moreover, stock dividends are subject to an advanced payment of dividend tax equivalent to 1% of the dividend distributed. Stock dividends have no cost for tax purposes.

Interest income

Unless the debtor can prove otherwise, any sum paid by a debtor in excess of the principal is deemed to be interest. As a general rule, interest is sourced in Venezuela if it is derived from activities carried out in Venezuela or from property located in Venezuela. Specifically, interest is deemed to be derived from activities carried out in Venezuela if the loan principal is used or enjoyed in the country. Interest received by non-resident corporations is therefore subject to Venezuelan income tax if the loan is granted or invested in Venezuela.

Interest paid on loans granted by non-resident financial institutions is subject to a final withholding tax (WHT) at source at a rate of 4.95% on gross income. Interest paid to other non-resident legal entities is subject to tax at a rate of 34% applied to 95% of the gross income.

Royalty income

Royalties derived by non-residents are subject to income tax on 90% of gross receipts in the case of royalties and similar payments, other than those derived from mining activities, resulting in an effective WHT rate of 30.6%.

Foreign income

Extraterritorial income is subject to Venezuelan CIT based on the concept of worldwide income taxation, according to which:

- Resident companies must pay a tax on total income whether from national or foreign source.
- Non-resident companies with PE in Venezuela will pay tax on their income, whether of national or foreign source, attributable to the Venezuelan PE.

- Non-resident companies will pay taxes on their income originated or caused in Venezuela.
- Resident companies as well as non-resident companies with PE in Venezuela may credit the tax paid abroad for earnings of an extraterritorial source against the income tax payable in Venezuela, subject to limitations.
- In general terms, taxation of foreign-source income is ruled by domestic provisions on taxation of territorial-source income. Foreign-source dividends are taxable when dividends are received. However, in case of investments located in a JLFT, anti-deferral rules in the international fiscal transparency regime apply (*see below*).

Foreign technical assistance and services

Taxable income of foreign taxpayers providing technical assistance or technological services from abroad to individuals or entities that use them in Venezuela or assign them to third parties is presumed to be 30% of gross income for technical assistance fees and 50% of gross income for technological service fees. If the contract does not specify the proportion in which the services are rendered, the law provides that 60% of the technical assistance and technological service fees are deemed to be rendered abroad (i.e. foreign-source), with the other 40% deemed to be rendered in Venezuela. The law also provides that 75% of the entire income related to technological services and 25% of that related to technological assistance is rendered abroad if not otherwise specified in the contract. *See the Withholding taxes section for more information.*

International fiscal transparency regime

A regime of international fiscal transparency is created for the purpose of establishing special standards of fiscal control, governing capital investments in countries classified as a JLFT, or tax havens. Under certain conditions, a Venezuelan taxpayer may be required to recognise income generated in its JLFT subsidiary on an accrual basis in its tax return.

Inflation adjustment

A system for the adjustment of non-monetary assets, non-monetary liabilities, and shareholder's equity has been established. 'Non-monetary assets' include land, construction, machinery, vehicles, installations, inventories, and investments other than in securities (e.g. bonds and stocks).

There are two phases to the adjustments: (i) initial adjustments and (ii) annual adjustments. Both phases are mandatory adjustments for taxpayers engaged in commercial and industrial operations, and in the exploitation of mines and hydrocarbons. The annual adjustment is optional for taxpayers performing non-business activities.

The following taxpayers are excluded from the inflation adjustment: (i) taxpayers engaged in banking, financial, insurance, and reinsurance activities and (ii) taxpayers designated by the tax authorities as 'special taxpayers'.

For those taxpayers subject to inflation accounting for tax purposes, the inflation adjustment is based on the National Consumer Price Index (NCPI).

Initial adjustment

The initial adjustment on depreciable fixed assets requires a registration tax of 3% on the amount of the adjustment.

Venezuela

The initial adjustment must be filed at the closing date of any fiscal year ending after 1 January 1993. This adjustment is applicable to all non-monetary assets and non-monetary liabilities.

The initial adjustment is calculated by applying the variations between the NCPI prevailing in the month in which the non-monetary assets were acquired and the month corresponding to the initial adjustment. Assets acquired before 1950 are deemed to have been acquired in January 1950.

A registry tax of 3% is applied exclusively to the initial revaluation adjustment of depreciable fixed assets. For payment, taxpayers must be registered with the Asset Revaluation Registry, maintained by the tax administration. The resulting tax may be paid in three consecutive annual instalments, beginning on the date of registration.

Companies in the pre-operating stage, deemed to end with the first invoice, must determine and pay a 3% tax once the pre-operating period has ended.

Depreciation or amortisation on the revaluation adjustment is allowed, based on the original estimated life of the asset.

Annual adjustment

The annual adjustment is applied each year in determining taxable income. The adjustment factor must be applied to the following balance sheet items at the closing date of the fiscal year. The resulting adjustment will increase or decrease taxable income.

Balance sheet items	Adjustment factor	Tax effect
Non-monetary assets:		
Inventories (including inventories in transit) (2)	Annual variation of the NCPI	Increase taxable income
Fixed assets (3)	Annual variation of the NCPI	Increase taxable income
Other assets, trademarks, patents, production licences, other rights, and investments in stock not registered in the Superintendencia Nacional de Valores (SNV) and deferred charges (except interest).	Annual variation of the NCPI	Increase taxable income
Investments in shares registered in the SNV	Adjusted to the share market value at the end of the year	Increase taxable income
Non-monetary liabilities:		
Deferred credits (except interest)	Annual variation of the NCPI	Decrease taxable income
Equity:		
Tax initial equity (1)	Annual variation of the NCPI	Decrease taxable income

Notes

1. Tax initial equity is defined as the difference between assets and liabilities at the beginning of the tax year, less accounts receivable from administrators, affiliated companies, and related companies. In order to determine the initial tax equity, assets not located in the country, as well as goods, debts, and liabilities entirely applied to the production of deemed, exempt, or exonerated income, are excluded.
2. Inventories are to be valued at historical cost for purposes of applying the NCPI. The provisions of the VITL detail the procedures for applying the NCPI. The revaluation of inventories in the tax year is included as part of the initial inventories of the following year.

3. The annual revaluation adjustment of fixed assets is considered part of the cost when the assets are sold.

More recently, there has been a delay in publishing the NCPI. To date, the last NCPI published is that corresponding to December 2015.

Net losses arising from the annual adjustment that have not been offset cannot be carried forward.

Gains or losses originating from the adjustment of accounts receivable or investments, as well as debts and liabilities in foreign currency or with a re-adjustability clause, are deemed to be carried out during the fiscal year in which they become demandable, collected, or paid, whichever comes first.

Deductions

Depreciation and amortisation

Companies may deduct depreciation of tangible fixed assets and amortisation of intangible fixed assets that are used in the production of income. Depreciation is generally computed on a straight-line basis although any other generally accepted method for accounting purposes is also accepted. Depreciation is not allowed on real estate used as rental property. Depreciation on the stepped-up portion of assets revalued by any method other than the inflation adjustments (*see the Income determination section*) is not permitted. In principle, useful lives of assets shall be consistent with the parameters used in accordance with accounting principles. Although domestic standards provide that tables with depreciation and amortisation rates to be applied by taxpayers may be provided via the Income Tax Rules, such a table has not been provided to date.

Goodwill

Deduction of the amortisation of goodwill is allowed for income tax purposes. Deduction of the cost basis for purposes of calculating the capital gain on the sale is also allowed for income tax purposes.

Organisational and pre-operating expenses

Domestic income tax regulations do not provide for specific guidance as to the treatment of organisational and pre-operating expenses. The accepted practice is to follow GAAP.

Interest expenses

Interest paid on a loan, the principal of which is invested to generate income, is deductible.

Bad debt

Losses arising from bad debts are deductible, provided:

- the loan concerned was granted as part of the taxpayer's business
- the amount of the debt was previously included in the taxpayer's gross revenue (except in the case of loans granted by financial institutions or by employers to their employees), and
- either the debtor and the debtor's guarantors are insolvent or the amount of the loan does not justify collection expenses.

Venezuela

Charitable contributions

Deductions for allowable charitable contributions are limited to 10% of taxable income (before deducting contributions) when taxable income does not exceed TU 10,000. When taxable income exceeds TU 10,000, charitable contributions are limited to 8% of taxable income. For oil extraction companies, the deduction is limited to 1% of the pre-contribution tax amount.

Fines and penalties

Income tax regulations do not expressly provide for the treatment of fines and penalties; however, such expenses are not deductible as they do not meet the normality and necessity requirements.

Taxes

Municipal, state, and local taxes are deductible in determining taxable income. Corporate taxes are not deductible.

Other significant items

Payments required by the labour law, such as profit sharing (generally between 15 days and four months' salary) and severance indemnity accruals, are also deductible. In cases of unjustified dismissals, double severance indemnities must be paid. However, accruals for such additional indemnities are generally not deductible until paid.

Corporate tax deduction of employees' compensation and professional fees is subject to compliance with the taxpayer's obligations as employer as provided for in the Law, which entail, among others, withholding obligations.

Net operating losses

Losses may be carried forward for three years. During the three-year term, the amount of losses available to carry forward cannot exceed 25% of the tax period's taxable income. Carryforward losses derived from the inflation adjustment have been eliminated. Losses may not be carried back. Foreign losses may be offset only against foreign profits.

Payments to foreign affiliates

A Venezuelan corporation may claim a deduction for royalties and technical assistance and for technical service fees paid to foreign affiliates, subject to the following conditions:

- Income tax payable by the recipient is withheld at the source.
- Transfer pricing requirements are met.
- In the case of technical assistance and technological services fees, the expenses may be deducted if such services cannot be otherwise provided in Venezuela.

Foreign companies domiciled in Venezuela are allowed to deduct royalties paid to parent companies or foreign affiliates (*see the Withholding taxes section for more information*). Branches of foreign companies, however, may not deduct such payments to head offices or related parties.

Group taxation

Group taxation is not possible in Venezuela.

Transfer pricing

Taxpayers that carry out operations with related parties abroad must calculate their income, costs, and deductions by applying a defined methodology of transfer pricing. This regime is applicable to imports, exports, and interest paid to recipients abroad as well as technical assistance, technological services, and royalty fees.

Thin capitalisation

Thin capitalisation rules limit the deduction of interest from debt with related parties in excess of a 1:1 debt-to-equity ratio. Under these rules, if the average of a taxpayer's debt (with related and unrelated parties) exceeds the average amount of its equity for the respective fiscal year, the excess debt is treated as equity for income tax purposes. Consequently, the ability to deduct interest on related-party loans may be affected.

Controlled foreign companies (CFCs)

Venezuelan tax legislation does not provide for CFC rules but does provide for international fiscal transparency rules where income from investments in a JLFT must be recognised on an accrual basis (*see Foreign income in the Income determination section*).

Tax credits and incentives

Foreign tax credit

Foreign income tax paid on taxable foreign income may be offset by the payable Venezuelan tax, up to the proportion of Venezuelan payable tax related to foreign-source income. Taxpayers must keep documentation of foreign tax. No carryforward rules are provided for in domestic regulations.

Other incentives

Customs duty incentives are also available, such as drawbacks on the import of materials used for exporting products. This may take the form of a tax refund certificate issued by the Ministry of Finance. The certificate is a negotiable bond and will be accepted by the Treasury Funds Office for payment of national taxes. Determination of the amount of the refund will take into account the import duties effectively paid at the time the materials used in the manufacture of the exported product were received in Venezuela.

Withholding taxes

Resident corporations making certain types of payments must withhold taxes. T2 refers to Tariff 2. These include the following:

Type of payment	Resident (%) (1)		Non-resident (%)	
	Corporation	Individual	Corporation	Individual
Commissions (2)	5	3	5	34
Dividends (5)	34	34	34	34
Royalties (3)	5	3	T2 on 90	34 on 90
Interest to foreign financial institutions	N/A	N/A	4.95	N/A
Other interest	5	3	T2 on 95	34 on 95

Venezuela

Type of payment	Resident (%) (1)		Non-resident (%)	
	Corporation	Individual	Corporation	Individual
Professional fees	5	3	T2 on 90	34 on 90
Technical assistance fees (3)	5	3	T2 on 30	34 on 30
Technological service fees (3)	5	3	T2 on 50	34 on 50
Real estate rentals	5	3	5	34
Tangible personal property rentals	5	3	5	34
Contractor and subcontractor services	2	1	T2	34
Film and television exhibition rights	5	3	T2 on 25	34 on 25
Insurance and reinsurance premiums	N/A	N/A	10 on 30	N/A
Payments to international media organisations	5	3	T2 on 15	N/A
Acquisition of Venezuela commercial funds	5	3	5	34
Payments to non-domiciled international transportation companies (4)	N/A	N/A	T2 on 5	N/A

Notes

1. WHTs constitute prepayments against final tax liabilities as determined by the income tax return when filed.
2. Includes commissions earned in instances other than through a dependent relationship (e.g. employer/employee). Commissions are subject to withholdings in the same manner as salaries and wages.
3. The rates for non-residents are similar to those rates applicable for payments to a non-domiciled corporation not resident in a treaty country and rendering services from abroad with no PE in Venezuela.
4. Excludes payments exempted under international shipping agreements.
5. Withholding applicable only on the excess on profits taxed at the corporate level (*see Dividend income in the Income determination section*).

Tax treaties

There are currently comprehensive treaties for the avoidance of double taxation with the following countries:

Recipient	WHT (%)		
	Dividends	Interest	Royalties
Non-treaty (1)	34	4.95/T2 on 95 (2)	T2 on 90
Austria	5/15 (3)	4.95/10 (4)	5
Barbados	5/10 (5)	5/15 (6)	10
Belarus	5/15 (7)	5	5/10 (8)
Belgium	5/15 (7)	10	5
Brazil	10/15 (9)	15	15
Canada	10/15 (10)	10	5/10 (11)
China	5/10 (12)	5/10 (13)	10
Cuba	10/15 (10)	10	5
Czech Republic	5/10 (14)	10	12
Denmark	5/15 (7)	5	5/10 (15)
France	0/5/15 (16)	5	5

Recipient	WHT (%)		
	Dividends	Interest	Royalties
Germany	5/15 (3)	5	5
Indonesia	10/15 (17)	10	10/20 (18)
Iran	5/10 (14)	5	5
Italy	10	10	7/10 (19)
Korea	5/10 (12)	5/10 (20)	5/10 (21)
Kuwait	5/10 (12)	5	20
Malaysia	5/10 (12)	15	10
Mexico (not in force)	5	4.95/10/15 (22)	10
Netherlands	0/10 (23)	5	5/7/10 (24)
Norway	5/10 (25)	5/15 (6)	9/12 (26)
Portugal	10	10	10/12 (27)
Qatar	5/10 (40)	5	5
Russia	10/15 (28)	5/10 (20)	10/15 (29)
Saudi Arabia	5	5	8
Spain	0/10 (30)	4.95/10 (31)	5
Sweden	5/10 (32)	10	7/10 (33)
Switzerland	0/10 (34)	5	5
Trinidad and Tobago	5/10 (32)	15	10
United Arab Emirates	5/10 (40)	10	10 (41)
United Kingdom	0/10 (35)	5	5/7 (36)
United States	5/15 (37)	4.95/10 (38)	5/10 (39)
Vietnam	5/10 (40)	10	10

Notes

- Domestic rate applicable to payments to non-resident corporations.
- The 4.95% rate applies to non-resident financial institutions, and the Tariff 2 on 90% on the gross income in all other cases of non-resident entities.
- The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 4.95% rate applies to interest paid to banks, and the 10% rate applies in other cases.
- The 5% rate applies when the beneficial owner is a company that holds at least 5% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
- The 5% rate applies to interest paid to banks, and the 15% rate applies in other cases.
- The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 5% rate applies to payments for the use or the right to use copyrights on scientific work, software, trademarks or for the use or the right to use any type of equipment or transportation vehicles. The 10% rate applies in all other cases.
- The 10% rate applies when the beneficial owner is a company that holds at least 20% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 10% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 5% rate applies to artistic copyright, computer software, patent, and industrial, commercial, and scientific royalties. The 10% rate applies in all other cases.
- The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
- The 5% rate applies to interest paid to banks, and the 10% rate applies in other cases.
- The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
- The 10% rate applies to royalties, and the 5% rate applies to technical assistance.
- No withholding applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends. The 5% rate applies in all other cases. The 15% rate applies to a resident of Venezuela who receives from a company that is a resident of France dividends that would give the right to a tax credit (*avoir fiscal*) if they were received by a resident of France and shall have the right to a payment from the French Treasury of an amount equal to this tax credit (*avoir fiscal*), subject to deduction of the tax.
- The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.

Venezuela

18. The 20% rate applies to royalties, and the 10% rate applies to technical assistance.
19. The 7% rate applies to literary, artistic, and scientific work copyright royalties, and the 10% rate applies in other cases.
20. The 5% rate applies to interest in the case of banks, and the 10% rate in other cases.
21. The 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment. The 10% rate applies in other cases.
22. The 4.95% rate applies to interest in the case of banks and insurance companies. The 10% rate applies to the aforesaid entities when the payment is carried out by banks. The 15% applies in other cases.
23. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
24. The 5% rate applies to patent royalties and to industrial, commercial, and scientific equipment royalties, the 7% rate applies to trademark royalties, and the 10% rate applies to literary, artistic, and scientific work copyright royalties.
25. The 5% rate applies if the beneficial owner is a company that directly controls at least 10% of the company paying the dividends.
26. The 12% rate applies in the case of royalties, and the 9% rate applies to technical assistance.
27. The 12% rate applies in the case of royalties, and the 10% rate applies to technical assistance.
28. The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends and has invested in this company not less than the equivalent to USD 100,000. The 15% rate applies in all other cases.
29. The 15% rate applies to royalties, and the 10% rate applies to technical assistance.
30. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
31. The 4.95% rate applies to interest in the case of banks. The 10% rate applies in other cases.
32. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
33. The 10% rate applies to literary, artistic, and scientific work copyright royalties, and the 7% rate applies in other cases.
34. No withholding applies when the beneficial owner is a company that controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
35. No withholding applies when the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.
36. The 5% rate applies to patent and trademark literary, artistic, or scientific work copyrights, including films, and the 7% rate applies in other cases.
37. The 5% rate applies if the beneficial owner is a company that owns at least 10% of the voting stock of the company paying the dividends. The 15% rate applies in other cases.
38. The 4.95% rate applies to interest to financial institutions (including insurance companies), and the 10% applies in other cases.
39. The 5% rate applies to industrial, commercial, and scientific equipment royalties, and the 10% rate applies in other cases.
40. The 5% rate applies if the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.
41. The Article also includes technical assistance.

The treaty with Mexico has been published in the Official Gazette and signed by the contracting parties but has not entered into force since diplomatic notes have not been exchanged.

Treaties with additional countries are being negotiated.

Tax administration

Taxable period

Taxable years may not exceed 12 months, but the first year may be less than 12 months. Taxpayers engaged in commercial, industrial, or service activities may choose a taxable year that does not coincide with the calendar year. A taxpayer that makes such an election may only change it after obtaining prior authorisation from the tax authorities. All other taxpayers are required to conform their taxable year to the calendar year.

Tax returns

Final tax returns must be filed within three months following the end of the tax year or at the date indicated on the corresponding calendar for those designated as a 'special taxpayer' by the tax authorities. The system is one of self-assessment.

Payment of tax

The total amount of tax due must be paid at the time of filing the annual return. Estimated tax payments must be paid consecutively in six monthly instalments. Companies engaged in mining, hydrocarbon exploitation, and related activities must make 12 equal monthly estimated tax payments.

Penalties

Fines for omitted taxes when assessed as a result of tax audits range from 100% to 300% of the omitted tax. The tax authorities generally assess the average fine (200%) unless aggravating or mitigating circumstances apply.

Fines are reduced to 30% if assessment is accepted within a specific timeframe.

Fines are adjusted according to the value of the Tax Unit.

Late payment interest is 1.2 times the average banking lending rate considering the six major banks.

Tax audit process

According to the Master Tax Code, the tax administration is entitled to review the existence of a taxpayer's liability, whether it has been reported or not. In exercising this power, the tax administration is entitled to obtain and verify information in connection with a determined tax liability. Verifications may be carried out on the basis of available information or on a presumptive basis if concrete information is not available.

Statute of limitations

According to the Master Tax Code, the statute of limitations for tax liabilities is six years starting to run on 1 January of the year following the tax period involved. Regarding taxes that are assessed by periods (e.g. income tax and VAT), it is understood that the taxable event occurs at the end of such period. Exceptionally, the statute of limitations is extended to ten years in any of the following circumstances: (i) the taxpayer fails to declare the taxable event or submit the relevant returns; (ii) the taxpayer does not comply with its obligation to register with the tax administration; (iii) the tax administration was not able to become aware of the taxable event; (iv) the taxpayer has extracted from the country property that is subject to the payment of the tax liability or if the tax liability is related to taxable events occurring abroad; or (v) the taxpayer does not keep its accounting in accordance with the relevant standards.

Topics of focus for tax authorities

Tax audits are generally focused on 'special taxpayers'. The main subjects of focus of tax audits on corporate taxpayers are related to compliance of formal obligations for direct and indirect taxes and transfer pricing.

Other issues

Sample corporate tax calculation

Taxable income (manufacturing company)	VEF	1,150,000.00
Divided by the value of the TU (VEF 300/1 TU)	VEF	300
Taxable income in TU	TU	3,833.33
Tax thereon:		
Tariff 2: 34%	TU	1,303.33
Subtract (per tax table)	TU	(500.00)
Total tax	TU	803.33
Less: Withholding taxes	TU	(100.00)
Less: Advance payments	TU	(100.00)
Net income tax payable in TU	TU	603.33
Net Income tax payable in VEF *	VEF	181,000.00

* Multiplied by the TU value, (i.e. VEF 300/1 TU)

Exchange control

In January 2003, the Venezuelan government and the Venezuelan Central Bank (VCB) restricted the free trade of foreign currency and established an Exchange Control Regime, which is currently administered by the VCB and the National Center of Foreign Commerce (CENCOEX). On 10 March 2016, a new dual foreign exchange system was enacted by Exchange Agreement N° 35, which provides the following:

- DIPRO, a protected exchange rate that is set at VEF 10 to USD 1 for, among other transactions, imports of food, medicines, basic goods for the country, and for payments of the foreign public debt.
- DICOM (also called the complementary dollar system), a floating complementary exchange rate that will fluctuate with the market. This system will apply to most other areas, such as sale foreign currency by basic industries and non-oil public entities, international institutions with which international agreements have been entered into, where the DICOM exchange rate will be reduced by 0.25%. It also applies to Venezuelan tourists and, in general, to transactions not specified in Exchange Agreement N° 35.
- A reduction of 0.25% will apply to any of the exchange rates applicable to sales of foreign currency derived from hydrocarbon exports and/or sales by the PDVSA derived from financing, financial instruments, cash capital contributions, asset sales, hydrocarbon exports and/or sales, dividends received, debt collection, service provision, and any other sources.
- Exchange Agreement N° 26, which provides for the Supplementary System for the Administration of Foreign Currency (SICAD) auction process at the awarded exchange rate carried out on a call-to-tender basis, limited to entities and sectors specified in the invitations to tender, was not abrogated; however, calls for auctions under this system have no longer taken place.

On 19 May 2017, Exchange Agreement N° 38 was published to provide for the terms of the auctions-based transactions under the DICOM system (*see the Significant developments section*).

The Law on the Currency Exchange Regime and Currency Exchange Violations is in effect, thereby establishing the actions that constitute exchange crimes and their respective penalties. Said penalties may be both criminal and pecuniary.

Significant developments

The most significant developments relate to transfer pricing. Following the establishment of a Transfer Pricing Audit Department by the General Department of Taxes (GDT) in 2015, similar departments were established in four key provinces, being Hanoi, Binh Duong, Dong Nai, and Ho Chi Minh City.

In July 2016, the GDT announced the establishment of a Base Erosion and Profit Shifting (BEPS) Working Group, which is responsible for preparing action plans to implement the Organisation for Economic Co-operation and Development (OECD) BEPS Initiatives and overseeing the implementation process.

More recently, on 24 February 2017, the Vietnamese government released Transfer Pricing Decree No. 20/2017/ND-CP guiding the implementation of transfer pricing (Decree 20), which entered into effect from 1 May 2017.

Decree 20 provides new transfer pricing compliance requirements, including three-tiered transfer pricing documentation, new transfer pricing declaration forms, and guidance on the deductibility of related-party expenses and interest, all of which are substantial changes to the prior rules.

Decree 20 represents the most important development with respect to Vietnam's transfer pricing regime in the last ten years. It demonstrates Vietnam's commitment to aligning with the global tax framework (BEPS) on transparency and anti-avoidance. While the new decree aims to enhance transfer pricing enforcement, it also increases the compliance burden on the taxpayer and has potential implications beyond transfer pricing. *Please refer to Transfer pricing in the Group taxation section for more details.*

A less favourable recent change is the removal of the ability to obtain value-added tax (VAT) refunds where taxpayers have accumulated input VAT outstanding for 12 months or more (except for exporters and taxpayers that have new investment projects).

Taxes on corporate income

Standard rates

All taxes are imposed at the national level. The standard corporate income tax (CIT) rate is 20%. Enterprises operating in the oil and gas industry are subject to CIT rates ranging from 32% to 50%, depending on the location and specific project conditions. Enterprises engaging in prospecting, exploration, and exploitation of mineral resources

Vietnam

(e.g. silver, gold, gemstones) are subject to CIT rates of 40% or 50%, depending on the project's location.

There is no concept of tax residency for CIT. Business organisations established under the laws of Vietnam are subject to CIT and taxed on worldwide income. 20% CIT shall be applicable to foreign income. There are no provisions for tax incentives for such income.

Foreign organisations carrying out business in Vietnam without setting up a legal entity in Vietnam and/or having Vietnam-sourced income are considered foreign contractors, irrespective of whether the services are performed inside or outside Vietnam. Payments to foreign contractors are subject to Foreign Contractor Tax (FCT), which consists of VAT and CIT elements. *See the Withholding taxes section for more information.*

Preferential rates

Preferential CIT rates of 10%, 15%, and 17% are available where certain criteria are met. *See the Tax credits and incentives section for more information.*

Calculation of taxable profits

Taxable profit is the difference between total revenue, whether domestic or foreign sourced, and deductible expenses (*see the Deductions section*), plus other assessable income.

Taxpayers are required to prepare an annual CIT return that includes a section for making adjustments between accounting profits and taxable profits.

Local income taxes

There are no local, state, or provincial income taxes in Vietnam.

Corporate residence

There is no concept of tax residency for CIT. Enterprises established under the law of Vietnam are subject to CIT in Vietnam. In addition, Vietnam has a broadly worded 'permanent establishment' definition.

Permanent establishment (PE)

In Vietnam, a PE is defined as "a fixed place of business through which a foreign enterprise carries out part or the whole of its business or production activities in Vietnam". The PE of a foreign enterprise shall include:

- A branch, an operating office, a factory, a workshop, means of transportation, a mine, an oil and gas field, or any place relating to the exploitation of natural resources in Vietnam.
- A building site; a construction, installation, or assembly project.
- An establishment providing services, including consultancy services, through its employees or other persons.
- An agent for a foreign enterprise.
- A representative in Vietnam where one has authority to sign contracts under the name of the foreign enterprise, or where one does not have authority to sign contracts under the name of the foreign enterprise but regularly delivers goods or provides services in Vietnam.

Foreign enterprises with their PEs in Vietnam shall pay tax on the taxable income earned in Vietnam (irrespective of whether it relates to the PE) and on the taxable income generated out of Vietnam and related to operations of the PEs.

Where a treaty on avoidance of double taxation to which Vietnam is a signatory contains different provisions relating to PE, such treaty shall apply (*see the Withholding taxes section for a list of countries with which such treaties exist*).

Other taxes

Value-added tax (VAT)

VAT applies to goods and services used for production, trading, and consumption in Vietnam (including goods and services purchased from non-residents), with certain exemptions. Depending on the category of goods or services, the VAT rates are as follows:

- A 0% rate applies to exported goods/services, including goods sold to overseas/non-tariff areas and consumed outside Vietnam/in the non-tariff areas, goods processed for export or in-country export (subject to conditions), goods sold to duty free shops, certain exported services, construction and installation carried out for export processing enterprises, and aviation, marine, and international transportation services.
- A 5% rate applies generally to areas of the economy concerned with the provision of essential goods and services. This includes clean water, teaching aids, books, unprocessed foodstuffs, medicine and medical equipment, various agricultural products and services, technical/scientific services, rubber latex, sugar and its by-products, social housing, and certain cultural, artistic, and sport services/products.
- The 10% 'standard' rate applies to activities not specified as exempt or subject to the 0% or 5% rate.

Activities not subject to output VAT

A separate category includes supplies not subject to output VAT, but related input VAT can, nevertheless, be claimed. This category includes the following:

- Compensation, bonus, subsidies (except those provided in exchange for certain services).
- Transfers of emission rights and various financial revenues.
- Certain services rendered by a foreign organisation that does not have a PE in Vietnam where the services are rendered outside of Vietnam, including repairs to means of transport, machinery, or equipment, advertising, marketing, promotion of overseas investment and trade, brokerage activities for the sale of overseas goods and services, training, and certain international telecommunication services.
- Sales of assets by non-business organisations or individuals not registered for VAT.
- Transfer of investment projects.
- Sale of agricultural products that have not been processed into other products or have only been through preliminary processing.
- Capital contributions in kind.
- Certain asset transfers between a parent company and its subsidiaries or between subsidiaries of the same parent company.
- Collections of compensation/indemnities by insurance companies from third parties.
- Collections on behalf of other parties that are not related to the provision of goods/services (e.g. if company A purchases goods/services from company B but pays to

Vietnam

company C, and, subsequently, company C pays to company B, then the payment from company C to company B is not subject to VAT).

- Commissions earned by (i) agents selling services, including postal, telecommunications, lottery, airlines/bus/ship/train tickets, at prices determined by principals; and (ii) agents for international transportation, airlines, and shipping services entitled to 0% VAT; or (iii) insurance agents.
- Commissions from the selling of exempt goods/services.
- Lending or return of machinery, equipment, goods.
- Goods exported and then re-imported back to Vietnam due to sales returns by overseas customers.

Exempt goods and services

There are stipulated categories of VAT exemptions, including goods/services provided by individuals having annual revenue of 100 million Vietnamese dong (VND) or below, transfer of land use rights, various financial services, capital assignments, certain types of insurance, medical services, education, printing/publishing, public transportation, export of unprocessed natural resources, etc.

When a supply cannot be readily classified based on the tax tariff, VAT must be calculated based on the highest rate applicable for the particular range of goods that the business supplies.

Taxpayers must file VAT returns on a monthly basis by the 20th day of the subsequent month or on a quarterly basis by the 30th day of the subsequent quarter (for companies with prior year annual revenue of VND 50 billion or less).

Customs duties

Import duty rates are classified into three categories: ordinary rates, preferential rates, and special preferential rates.

Preferential rates are applicable to imported goods from countries that have most-favoured-nation (MFN, also known as normal trade relations) status with Vietnam. The MFN rates are in accordance with Vietnam's World Trade Organization (WTO) commitments and are applicable to goods imported from other member countries of the WTO.

Special preferential rates are applicable to imported goods from countries that have a special preferential trade agreement with Vietnam. Currently effective free trade agreements (FTAs) to which Vietnam is a party include FTAs between ASEAN member states, between ASEAN members and Japan, ASEAN and China, ASEAN and India, ASEAN and Korea, ASEAN and Chile, ASEAN and Australia, ASEAN and New Zealand, Vietnam and Japan, Vietnam and Chile, Vietnam and Korea, Vietnam and the Eurasian Economic Union, and Vietnam and the Customs Union of Russia, Belarus, Kazakhstan.

Import duty exemptions are provided for encouraged projects and goods imported in certain circumstances.

Export duties are charged only on a few items, basically certain natural resources. Rates range from 0% to 40%.

Special sales tax (SST)

SST is a form of excise tax that applies to selected goods and services (*see below*). For goods, SST is charged at the production or importation stage. Imported goods (except

for various types of petrol) are subject to SST at both the import and selling stages. The SST paid at importation will be creditable against SST paid at the selling stage.

The SST rates are as follows:

Products/services	SST rate (%)
Cigar/cigarette:	
From 1 January 2016 to 31 December 2018	70
From 1 January 2019	75
Spirit/wine:	
With ABV $\geq 20^\circ$	
From 1 January 2017 to 31 December 2017	60
From 1 January 2018	65
With ABV $< 20^\circ$	
From 1 January 2016 to 31 December 2017	30
From 1 January 2018	35
Beer:	
From 1 January 2017 to 31 December 2017	60
From 1 January 2018	65
Automobiles having less than 24 seats:	
Prior to 1 January 2018	10 to 70
From 1 January 2018	10 to 150
Motorcycle with cylinder capacity above 125cm ³	20
Airplanes	30
Boats	30
Petrol	7 to 10
Air-conditioners (not more than 90,000 BTU)	10
Playing cards	40
Votive paper	70
Discotheques	40
Massage, karaoke	30
Casinos, jackpot games	35
Entertainment with betting	30
Golf	20
Lottery	15

Property taxes

Foreign investors generally pay rental fees for land use rights. The range of rates is wide depending upon the location, infrastructure, and the industrial sector in which the business is operating.

In addition, owners of houses and apartments have to pay land tax under the law on non-agricultural land use. The tax is charged on the specific land area used based on the prescribed price per square metre at progressive tax rates ranging from 0.03% to 0.15%.

Stamp taxes

Certain assets, including houses, land, automobiles and motorcycles, etc., that are subject to registration of ownership are subject to stamp duty. The stamp duty rates vary depending on the asset transferred.

Vietnam

Payroll taxes

Social insurance (SI) contributions

The level of compulsory SI contribution is 26% of total salary, of which 18% is the employers' obligation and the remaining 8% is the employees' obligation. The salary subject to SI contribution is the salary stated in the labour contract, but is capped at 20 times the minimum salary (the minimum salary is currently VND 1,210,000 and is subject to change periodically).

Health insurance (HI) contributions

HI contribution rates are 4.5% of total salary, with two-thirds contributed by the employer and one-third by the employee.

Unemployment insurance (UI) contributions

The employer and employee UI contributions are 1% on gross salary each. The employee contribution is capped at 20 times the minimum regional salary (the minimum regional salary varies from VND 2,580,000 to VND 3,750,000, depending on the region; these minimum salaries are subject to change each year).

In April 2017, the Vietnamese government issued a resolution to reduce the employer UI contribution to 0.5% of gross salary. It will apply after being approved by the National Assembly until 31 December 2019.

Natural resources tax (NRT)

NRT is payable by industries exploiting Vietnam's natural resources, including petroleum, minerals, natural gas, forest products, natural seafood, natural bird's nests, and natural water. Natural water used for agriculture, forestry, fisheries, salt industries, and sea water for cooling purposes may be exempt from NRT, provided that certain conditions are satisfied. The tax rates vary depending on the natural resource being exploited, ranging from 1% to 40%, and are applied to the production output at a specified taxable value per unit. Various methods are available for the calculation of the taxable value of the resources, including cases where the commercial value of the resources cannot be determined. Crude oil, natural gas, and coal gas are taxed at progressive tax rates depending on the daily average production output.

Environment protection tax (EPT)

EPT is an indirect tax that is applicable to the production and importation of certain goods deemed detrimental to the environment, the most significant of which are petroleum and coal. The tax is calculated as an absolute amount on the quantity of the goods.

The tax rates are as follows:

Goods	Unit	Tax range (VND)
Petrol, diesel, grease, etc.	litre/kg	300 to 3,000
Coal	ton	10,000 to 20,000
HCFCs	kg	4,000
Plastic bags *	kg	40,000
Restricted use chemicals	kg	500 to 1,000

* Excludes plastic bags used for packaging or that are 'environmentally friendly'.

Branch income

Branches of foreign entities are subject to the same CIT regime as entities incorporated in Vietnam.

Income determination

Inventory valuation

At present, there are no provisions for valuing inventories or determining inventory flows. The tax treatment follows the accounting treatment.

Asset revaluation

Gains from the revaluation of assets for the purposes of capital contribution or transfer upon division, demerger, consolidation, merger, or conversion of business are subject to the standard CIT rate.

Capital gains

Gains made by a foreign investor on the transfer of an interest (as opposed to shares) in a limited liability company are subject to the standard CIT rate. The assignee is required to withhold the tax due from the payment to the assignor and account for this to the tax authorities. Where both the assignor and the assignee are foreign entities, the Vietnamese company in which the capital interest is transferred is responsible for the above administration.

Gains earned by a foreign investor from selling securities (i.e. bonds, shares of public joint-stock companies, irrespective of whether they are listed or non-listed) are subject to CIT at a deemed rate of 0.1% of the sales proceeds. The standard CIT rate will apply to any gains earned by a foreign company (not incorporated in Vietnam) upon a sale of shares in a non-public joint-stock company.

Dividend income

Dividends received from investments in other companies in Vietnam are from after tax profits and are not subject to CIT.

Interest income

Certain types of interest income are entitled to tax incentives granted to the investment project, depending on the conditions on which tax incentives are granted.

Other significant items

Tax incentives that are available for investment in encouraged sectors do not apply to other income (except for income that directly relates to the incentivised activities, such as disposal of scrap), which is broadly defined.

The following income items are subject to the standard CIT rate and are not entitled to tax incentives (including preferential tax rate and exemption/reduction):

- Income from transfer of the right to make capital contribution; income from transfer of immovable property (except for income from investment in social houses); income from transfer of investment projects, transfer of the right to take part in investment projects, and transfer of the right to exploration and exploitation of minerals.

Vietnam

- Income from activities of prospecting for, exploration of, and exploitation of oil, gas, and other rare and precious resources; income from activities of exploiting minerals.
- Income from providing services subject to SST in accordance with the provisions of the law on SST.

Foreign income

Foreign income, under the domestic tax law, is subject to the standard CIT rate with tax credits available (*see Foreign tax credit in the Tax credits and incentives section*).

Foreign income shall be taxed when earned. There are no provisions for tax deferral or preferential tax rates for foreign income.

Deductions

Depreciation and amortisation

Tax depreciation may differ from accounting depreciation. Depreciation in excess of the rates specified in the regulations on tax depreciation is not deductible. These regulations specify maximum and minimum permissible effective lives for various classes of assets, including intangibles. Current straight-line tax depreciation rates are as follows:

Assets	Rate (%)
Buildings	2 to 16.67
Office equipment	10 to 20
Automobiles	3.33 to 16.66
Machinery and equipment	5 to 33.33
Intangible assets	Not more than 5
Goodwill	33.33

The depreciation period of assets of the Build Operate Transfer (BOT) and Business Cooperation Contract (BCC) projects is the period the investors use them to recover their investment capital.

Start-up expenses

Pre-establishment expenses (i.e. expenses for setting up a company) and certain expenses (i.e. training, advertising before establishment, costs for the research stage, relocation cost) can be amortised over a period of up to three years from the commencement of operations. In order for pre-establishment and pre-operating expenses to be deductible for CIT purposes, supporting documents to substantiate the fact that these pre-operating expenses were necessarily and legitimately incurred for the establishment of the company should be available.

Interest expenses

Interest on loans corresponding to the portion of charter capital not yet contributed as scheduled is not deductible.

Interest on loans from non-economic and non-credit organisations exceeding 1.5 times the interest rate set by the State Bank of Vietnam is not deductible.

Interest on loans that has been capitalised is not deductible.

Tax deductibility of interest on loans is to be capped at 20% of earnings before interest, taxes, depreciation, and amortisation (EBITDA) (*see Transfer pricing in the Group taxation section*).

Bad debt

Provisions for bad debts are deductible if the provision is made in accordance with the guidance by the Ministry of Finance (MoF). Certain conditions must be satisfied in order to set up a provision for bad debts (e.g. the debts must be supported by original documentation, there must be confirmation from clients of the overdue amounts, the debts must be overdue under the terms of an economic contract). In the absence of satisfying the necessary conditions, the provision for bad debts will generally not be deductible until incurred and supported by invoices.

Charitable contributions

Donations are generally non-deductible, except certain donations for education, health care, natural disasters, building charitable homes for the poor, or scientific research.

Fines and penalties

Administrative penalties and fines are specifically considered non-deductible.

Taxes

Creditable input VAT, CIT, and other fees/charges are not deductible for CIT purposes.

Other significant items

The following other expenditures are specifically stated to be non-deductible:

- Employee remuneration expenses that are not actually paid or are not stated in a labour contract, collective labour agreement, or the financial regulations of the company.
- Staff welfare (including certain benefits provided to family member of staff) exceeding a cap of one month's average salary.
- Provisions for severance allowance (except for companies not subject to mandatory unemployment insurance contributions) and payments of severance allowance in excess of the prescribed amount per the Labour Code.
- Contributions to voluntary pension funds and the purchase of voluntary pension for employees exceeding VND 1 million per month per person.
- Reserves for research and development (R&D) that is not in accordance with the prevailing regulations.
- Provisions for stock devaluation, bad debts, financial investment losses, product warranties, or construction work that are not in accordance with the prevailing regulations.
- Unrealised foreign exchange gain/losses due to the revaluation of foreign currency items other than account payables at the end of a financial year.
- Management expenses allocated to PEs in Vietnam by the foreign company's head office that are not in accordance with the regulations.
- Certain expenses directly related to the issuance, purchase, or sale of shares.

For certain businesses (e.g. insurance companies, securities trading, lotteries), the MoF provides specific guidance on deductible expenses for CIT purposes.

Net operating losses

Losses may be carried forward fully and consecutively for a maximum of five years. Carryback of losses is not permitted.

Vietnam

Payments to foreign affiliates

There are no special restrictions on the deductibility of royalties, loan interest, and service fees paid to foreign affiliates (except for those paid by branches). However, the payment must be defensible on an arm's-length basis as required by transfer pricing regulations (*see Transfer pricing in the Group taxation section*). Certain contracts for the transfer of technology and foreign loans must be registered with the competent authorities.

Group taxation

There is no provision for any form of consolidated filing or group loss relief in Vietnam.

Transfer pricing

From 1 May 2017, Vietnam's transfer pricing regulations are governed by Decree 20/2017/ND-CP. While it is based loosely on the superseded Circular 66, Decree 20 extends the interpretation of existing provisions and introduces additional concepts and principles from the Transfer Pricing Guidelines of the OECD and BEPS Action Plan.

Related party definition

The ownership threshold required to be a 'related party' under Decree 20 is 25%, higher than the prior 20% under Circular 66. In addition, Decree 20 removes from the related party definition of Circular 66 two entities having transactions between them accounting for more than 50% of their sales or purchases. Vietnam's transfer pricing rules also apply to domestic related-party transactions.

Transfer pricing methodologies

The acceptable methodologies for determining arm's-length pricing are analogous to those espoused by the OECD in the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations (i.e. comparable uncontrolled price, resale price, cost plus, profit split, and comparable profits methods).

Transfer pricing documentation

Compliance requirements include an annual declaration of related-party transactions and transfer pricing methodologies used, and a taxpayer confirmation of the arm's-length value of their transactions (or otherwise the making of voluntary adjustments), which is required to be filed together with the annual CIT return. Decree 20 requires that the transfer pricing method applied must ensure that there is no loss of tax revenue to the state budget, which could imply that no downward adjustments are allowed. Decree 20 also introduces a new transfer pricing declaration form that requires disclosure of more detailed information, including segmentation of profit and loss by related-party and third-party transactions.

Decree 20 gives the tax authorities the power to use internal databases for transfer pricing assessment purposes in cases where a taxpayer is deemed noncompliant with the requirements of the Decree.

Taxpayers engaged in related-party transactions solely with domestic related parties could be exempt from the requirement to disclose information on such transactions in the new transfer pricing declaration form, where both parties have the same tax rate and neither party enjoys tax incentives.

Companies that have related-party transactions must also prepare and maintain contemporaneous transfer pricing documentation. Decree 20 introduces a three-tiered transfer pricing documentation approach to collect more tax-related information on multinational companies' business operations, specifically a master file, a local file, and country-by-country (CbC) reporting. The three-tiered transfer pricing documentation has to be prepared before the submission date of the annual tax return, which gives taxpayers just 90 days (from the fiscal year-end date) to complete the year's transfer pricing documentation.

A taxpayer is exempt from preparing transfer pricing documentation (but not all other aspects of the Decree) if one of the following conditions is met:

- has revenue below VND 50 billion and total value of related-party transactions below VND 30 billion in a tax period
- concludes an Advance Pricing Agreement (APA) and submits annual APA report(s), or
- has revenue below VND 200 billion, performs simple functions, and achieves at least the following ratios of earnings before interest and tax to revenue on the following business: distribution (5%), manufacturing (10%), processing (15%).

As of 2017, the GDT is in negotiation with several taxpayers for the first APAs.

Thin capitalisation

There are no thin capitalisation requirements in the tax legislation. However, the level of permitted debt funding will be limited by virtue of licensing requirements. The maximum amount of debt funding is the difference between the licensed investment capital and charter capital.

Decree 20, however, provides that deductible interest on loans shall be subject to the cap of 20% of EBITDA.

Controlled foreign companies (CFCs)

Vietnam does not have any CFC legislation.

Tax credits and incentives

Foreign tax credit

In respect of Vietnamese enterprises earning income from overseas investment, CIT (or a kind of tax with a nature similar to CIT) paid in a foreign country or paid on behalf by its partner in the country receiving the investment (including tax levied on the dividend) is allowed to be creditable. The credit shall not exceed the CIT amount payable in Vietnam.

The foreign income tax that is entitled to exemption or reduction in accordance with the foreign law shall also be credited.

Inbound investment incentives

Tax incentives are granted based on regulated encouraged sectors, encouraged locations, and size of the projects.

The sectors that are encouraged by the Vietnamese government include education, health care, sport/culture, high technology, environmental protection, scientific

Vietnam

research and technology development, infrastructural development, processing of agricultural and aquatic products, software production, and renewable energy.

The encouraged locations include qualifying economic and high-tech zones, certain industrial zones, and difficult socio-economic areas. Large manufacturing projects with investment capital of more than VND 6 trillion disbursed within three years of being licensed can also qualify for CIT incentives if:

- the minimum revenue is VND 10 trillion *per annum* by the fourth year of operations at the latest, and
- the minimum headcount is 3,000 by the fourth year of operations at the latest.

The preferential incentive rate applied for large manufacturing projects can be extended for a maximum additional 15 years if the project manufactures goods having 'international competitiveness' whose revenue exceeds VND 20 trillion *per annum* within five years from the first year of revenue generation, or whose average head count is over 6,000.

Large manufacturing projects include projects with investment capital of VND 12 trillion or more, disbursed within five years of being licensed (excluding those related to the manufacture of products subject to SST or those exploiting mineral resources) and using technologies appraised in accordance with relevant laws.

Further, new investment projects engaging in manufacturing industrial products prioritised for development will be entitled to CIT incentives if the products support:

- the high technology sector, or
- the garment, textile, and footwear; information technology (IT); automobiles assembly; or mechanics sector and were not produced domestically as of 1 January 2015, or, if produced domestically, they meet the quality standards of the European Union (EU) or equivalent.

The two preferential rates of 10% and 17% for 15 years and 10 years, respectively, are available starting from the commencement of generating revenue from the incentivised activities. From 1 January 2016, enterprises entitled to the pre-2016 preferential CIT rate of 20% will enjoy the rate of 17% instead. When the preferential rate expires, the CIT rate reverts to the standard rate. The preferential rate of 15% will apply for the entire project life in certain cases. Certain socialised sectors (e.g. education, health) enjoy the 10% rate for the entire life of the project.

Business expansion projects are now entitled to CIT incentives if any of the following criteria are met:

- Additional fixed assets costing at least VND 20 billion (or VND 10 billion if the projects are in certain specified regions with difficult socio-economic conditions) are invested.
- There is at least a 20% increase in the value of fixed assets compared with the period before expansion.
- There is at least a 20% increase in the designed capacity compared with the period before expansion.

Investment projects are allowed to access more favourable tax incentives available under an amended or new law on CIT for the remaining project period, from tax year 2015. This entitlement is specifically applicable to the following cases:

- Expansion projects licensed or implemented during the period from 2009 to 2013 that were not previously entitled to any CIT incentives.
- Investment projects commencing operations in industrial zones during the period from 2009 to 2013 that were not previously entitled to any CIT incentives.
- Investment projects located in areas that were not previously designated as encouraged.

Tax holidays

Investors may be considered for tax holidays and reductions. The holidays take the form of a complete exemption from CIT for a certain period beginning immediately after the enterprise first makes profits, followed by a further period where tax is charged at 50% of the applicable rate. However, where the enterprise has not derived profits within three years of the commencement of operations, the tax holidays/tax reduction will start from the fourth year of operation. Criteria for eligibility to these holidays and reductions are set out in the CIT regulations as follows:

- Four years of tax exemption and nine subsequent years of 50% reduction shall be applied to:
 - Income earned by enterprises carrying out new investment projects entitled to 10% CIT.
 - Income earned by enterprises carrying out new investment projects in the socialised sectors and difficult socio-economic areas.
- Four years of tax exemption and 50% tax reduction for five subsequent years shall be given to income earned by enterprises carrying out new investment projects in the socialised sectors and in regions not included in the list of difficult socio-economic areas.
- Two years of tax exemption and four subsequent years of 50% reduction shall be applied to:
 - Income earned by enterprises from carrying out new investment projects in regions with difficult socio-economic conditions.
 - Income earned by enterprises from carrying out new investment projects, including production of high-grade steel, production of energy saving products, production of machinery or equipment used to serve agricultural, forestry, fishery, or salt production, production of irrigational equipment, production and refinement of foodstuff for cattle, poultry, or aquatic products, and development of traditional trades.
 - Income earned by enterprises that carry out new investment projects in industrial zones (except for industrial zones located in regions with favourable socio-economic conditions).

Employment incentives

Additional tax reductions may be available for engaging in manufacturing, construction, and transportation activities that employ several female staff and/or ethnic minorities. CIT reduction must correspond with the actual payment for those employees.

Vietnam

Research and Development (R&D) Fund

Business entities in Vietnam are allowed to set up a tax deductible R&D Fund. Enterprises can appropriate up to 10% of annual profits before tax to the fund. Various conditions apply.

Withholding taxes

Foreign Contractor Tax (FCT) is withheld on payments to foreign contractors.

Payments to foreign contractors

FCT on payments to foreign contractors applies where a Vietnamese contracting party (including a foreign-invested enterprise incorporated in Vietnam) contracts with a foreign party that does not have a licensed presence in Vietnam, irrespective of whether the services are provided in Vietnam or overseas.

This FCT generally applies to payments derived from Vietnam, except for the pure supply of goods (i.e. where the responsibility, cost, and risk relating to the goods passes at or before the border gate of Vietnam and there are no associated services performed in Vietnam), services performed and consumed outside Vietnam, and various other services performed wholly outside Vietnam (e.g. certain repairs, training, advertising, promotion).

In addition, certain distribution arrangements where foreign entities are directly or indirectly involved in the distribution of goods or provision of services in Vietnam are subject to FCT (e.g. where the foreign entity retains ownership of the goods; bears distribution, advertising, or marketing costs; is responsible for the quality of goods or services; makes pricing decisions; or authorises/hires other Vietnamese entities to carry out part of the distribution of goods/provision of services in Vietnam).

Foreign contractors can apply to be deduction-method VAT payers if they adopt the Vietnamese accounting system. If accounting records are adequate, the foreign contractor will pay CIT on actual profits, but otherwise on a deemed-profit basis.

For direct (non-deduction-method) foreign contractors, VAT and CIT will be withheld by the contracting party at deemed rates. Various rates are specified according to the nature of the contract performed. For CIT, the FCT rate varies from 0.1% to 10%. For VAT, the FCT rate can also range from 2% to 5%. The VAT withheld by the contracting party is an allowable input credit in its VAT return.

A summary of VAT and CIT FCT rates follow:

Types of payment	Deemed VAT rate (%) (3)	Deemed CIT rate (%)
Supply of goods in Vietnam or associated with services rendered in Vietnam (including in-country import-export and imports, distribution of goods in Vietnam or delivery of goods under Incoterms where the seller bears risk relating to goods in Vietnam)	Exempt (1)	1
Services	5	5
Services together with supply of machinery and equipment (2)	3	2
Restaurant, hotel, and casino management services	5	10
Construction, installation without supply of materials, machinery, or equipment	5	2

Types of payment	Deemed VAT rate (%) (3)	Deemed CIT rate (%)
Construction, installation with supply of materials, machinery, or equipment	3	2
Leasing of machinery, equipment, and drilling rigs	5	5
Leasing of aircraft and vessels	Exempt (4)	2
Transportation	3 (5)	2
Interest	Exempt	5
Royalties	Exempt/5 (6)	10
Insurance	Exempt/5 (7)	5
Re-insurance, commission for re-insurance	Exempt	0.1
Transfer of securities	Exempt	0.1
Financial derivatives	Exempt	2
Other activities	2	2

Notes

1. VAT will not be payable where goods are exempt from VAT or where import VAT is paid upon importation.
2. Where the contract does not separate the value of goods and services.
3. The supply of goods and/or services to the oil and gas industry is subject to the standard 10% VAT rate. Certain goods or services may be VAT exempt or subject to 5% VAT.
4. Where aircraft and vessels cannot be manufactured in Vietnam.
5. International transportation is subject to 0% VAT.
6. Software licences, transfer of technology, and transfer of intellectual property (IP) rights (including copyrights and industrial properties) are VAT exempt. Other royalties may attract VAT.
7. Certain types of insurance are exempt from VAT (see *Exempt goods and services under VAT in the Other taxes section*).

Interest

The FCT applied to interest payments to an overseas lender is 5%. Interest on pre-1999 loans may be exempt from FCT. Offshore loans provided by certain government or semi-governmental institutions may obtain an exemption from the interest FCT where a relevant double tax agreement (DTA) or inter-government agreement (IGA) applies.

Interest earned from bonds (except for tax-exempt bonds) and certificates of deposit are subject to 5% FCT. The sale of bonds and certificates of deposits are subject to deemed tax of 0.1% of the gross sales proceeds.

Royalties, licence fees, etc.

A 10% royalty FCT applies in the case of payments made to a foreign party for transfers of technology or software licence, unless the transfers are contributed as part of legal capital (akin to equity). Transfers of technology are defined very broadly. Certain contracts for the transfer of technology must be registered with the competent authorities.

Recently, the MoF has consistently sought to impose a 5% VAT on the payments for the right to use a trademark.

Management fees and head office charges

FCT applies on management fees and head office charges at the rates applicable to services (*see above*).

Vietnam

Cross-border leases

A Vietnam-based lessee is required to withhold tax from payments to an offshore lessor. 5% VAT and 5% CIT is applicable to the rental charge if it is an operating lease. If it is a finance lease, the interest portion will be exempt from VAT and subject to 5% CIT.

Tax treaties

The above FCT rates may be affected by a relevant DTA.

Recipient	Interest (%)	Royalties (%)
Algeria (1, 3)	15	15
Australia	10	10
Austria (2, 3, 4)	10	7.5/10
Azerbaijan (3)	10	10
Bangladesh (2, 3)	15	15
Belarus (2, 3)	10	15
Belgium (2, 3, 4)	10	5/10/15

Notes

1. The treaty is not yet in force.
2. In most cases, the limits set by the DTA are higher than the present FCT rates under domestic law; consequently, the domestic rates will apply.
3. Interest derived by certain government bodies is exempt from FCT.
4. Royalty FCT rates vary for certain types of royalties.
5. The content of these new DTAs is not available.

Tax administration

Taxable period

The standard tax year is the calendar year. However, different accounting year-ends can be used if approval is obtained from the authorities.

Vietnam

Tax returns

The annual final CIT return and the audited financial statements must be filed within 90 days from the end of the financial year.

Payment of tax

Enterprises are required to make quarterly provisional CIT payments (no later than the 30th day of the next quarter) based on estimates. If the provisional quarterly CIT payments account for less than 80% of the final CIT liability, the shortfall in excess of 20% is subject to late payment interest (currently as high as 11% *per annum*), counting from the deadline for payment of the fourth quarter CIT liability.

Final payment of CIT is due with the final CIT return (i.e. the 90th day of the following financial year).

Penalties

There are detailed regulations setting out penalties for various tax offences. These range from relatively minor administrative penalties to tax penalties amounting to various multiples of the additional tax assessed.

In practice, imposition of penalties has been arbitrary and inconsistent. However, in recent periods there has been a much tougher stance adopted by the tax authorities. Hence, where tax is paid late (e.g. as a result of a tax audit investigation), there is a significant likelihood of penalties being imposed.

Tax audit process

Tax audits are carried out regularly and often cover a number of tax years. Prior to an audit, the tax authorities send the taxpayer a written notice of time and scope of the audit inspection.

Statute of limitations

The general statute of limitations for imposing tax is ten years (effective 1 July 2013) and for penalties is five years. Where the taxpayer does not register for tax or commits evasion liable to criminal prosecution, the tax authorities can collect unpaid tax and penalties at any time.

Topics of focus for tax authorities

Transfer pricing

Transfer pricing is commonly discussed in the press, and the enterprises that are attracting the attention of the tax authority are generally multinational companies that have many inter-company transactions, have reported losses for many years, and/or are expanding businesses.

CIT incentives

The regulations on the conditions to enjoy CIT incentives are complicated. The guidance to classify new investment and investment expansion (these are subject to different incentive regimes) is not entirely clear. In addition, the ability to apply tax incentives is conditional on the compliance to the strict accounting system requirements. Taxpayers are required to self-assess their eligibility to the tax incentives. The tax authorities therefore in tax audits focus on reviewing the taxpayers' fulfilment of the conditions.

Documentation of expenses

The tax authorities are strictly reviewing the documentation of expenses, including contracts, invoices, evidence of work done/benefit received, etc. Insufficient documentation is resulting in disallowance of input VAT credit/refund and CIT deductibility.

FCT on supply of goods

The customs authority has been requested to provide the tax authority with information of companies engaged in in-country import/export transactions in an effort to collect under-declared FCT arising from these transactions.

Secondment arrangements

We have seen the tax authority seek to impose FCT on reimbursements of expatriate remuneration costs by Vietnamese entities. Companies need to ensure that supporting documents are available to show amounts have been reimbursed at cost.

Other issues
Foreign investment restrictions

In several fields, foreign investment will not be licensed or will only be licensed under special conditions. The List of Conditional Investment Sectors include, amongst 243 sectors, television, production and publishing cultural products, telecommunication, transportation by all means, cigarette production, exploring and processing natural resources, real-estate business, education, and medical services and distribution.

Exchange controls

All buying, selling, lending, and transfer of foreign currency needs to be made through credit institutions and other financial institutions authorised by the State Bank of Vietnam (SBV).

Outflow of foreign currency by transfer is authorised for certain transactions, such as payments for imports and services abroad, refund of loans contracted abroad and payment of interest accrued thereon, transfer of profits and dividends, and revenues from transfer of technology.

All monetary transactions in Vietnam must be undertaken in Vietnamese dong. Exceptions are applicable to payments for exports made between principals and their agents, and payments for goods and services purchased from institutions authorised to receive foreign currency payments such as for air tickets, shipping and air freight, insurance, and international communications.

Forms of doing business

According to the Law on Enterprises, a foreign-invested enterprise may be established as either a single member limited liability or a limited liability with more than one member, a joint-stock company, or a partnership.

Intellectual property (IP)

IP rights are protected by the Civil Code (1995 and 2005), the Law on Intellectual Property (2005), and a host of subordinate legislation.

Vietnam is signatory to the Paris Convention, the Madrid Agreement on International Trademark Registration, and the Patent Cooperation Treaty, and is a member of the

Vietnam

World Intellectual Property Organisation. Vietnam has entered into an agreement on copyrights with the United States (US). According to the Vietnam-US Bilateral Trade Agreement, Vietnam is further under the obligation to adhere to the Berne Convention.

Significant developments

Since the 2017 Budget, the following measures have been put in place with effect from 1 January 2017:

- Increase in the capital allowance rate from 50% to 100% for implements, plants, and machinery used in farming and agro-processing.
- Requirement for statutory bodies currently exempt from income tax to pay withholding tax (WHT) on rental income at the rate of 10%.
- Increase in the advance income tax rate from 6% to 15%.
- Increase in the period in which input value-added tax (VAT) refunds can be claimed from seven years to ten years for exploration companies.
- Input VAT claim period reduced from six months to three months.
- Appointment of taxable suppliers as Withholding VAT Agents.
- Abolishment of VAT group registration scheme.
- Suspension of customs duty on aquaculture implements for a period of three years.
- Increase in customs duty on semi-processed edible oils from 5% to 25%.
- Increase in excise duty on air time from 15% to 17.5%.
- Modification of excise duty on opaque beer to include presumptive rates.
- Introduction of a skills development levy (SDL) payable on a monthly basis by the employer at the rate of 0.5% of total gross emoluments paid by an employer to its employees.
- Increase in penalties on general offences and on failure to provide records for inspection from 8,000 penalty units to 20,000 penalty units and from 10,000 penalty units to 20,000 penalty units, respectively.
- Mandatory requirement for bank account holders to obtain taxpayer identification numbers.
- General reduction in tax compliance submission deadlines.

Taxes on corporate income

Under the Income Tax Act, Zambia has a source-based system for the taxation of income. Income deemed to be from a Zambian source is generally subject to Zambian income tax. Zambian residents are also subject to income tax on interest and dividends from a source outside Zambia.

A non-Zambian resident enterprise with a Zambian permanent establishment (PE) will be subject to corporate income tax (CIT) on its Zambian-source income. If there is no PE, Zambian-source income of the non-Zambian resident may still be subject to WHT (*see the Withholding taxes section*).

Zambia

The standard CIT rate applicable to the income of companies (and other persons other than individuals) is 35%.

The following sources of income are subject to different CIT rates:

Source of income	CIT rate (%)
Electronic communications networks or service licensees (income in excess of 250,000 Zambian kwacha [ZMW])	40
Farming	10
Agro-processing	10
Export of non-traditional products	15
Production of organic fertiliser and chemical manufacture of fertiliser	15

The rates applicable for mining operations (for both base metals and industrial minerals) are as follows:

Tax on mining operations (for both base metals* and industrial minerals**)	Rate
CIT	30%
Additional variable profits	N/A

The CIT rate of 35% is applicable on income from mineral processing***.

Notes

* Mining operations means an operation carried out under a mining right, excluding an operation carried out under a mineral processing licence only or an exploration licence.

** Industrial minerals include rocks or minerals other than gemstones, base metals, energy minerals, or precious metals used in their natural state or after physical or chemical transformation, including barites, dolomite, feldspar, fluorspar, graphite, gypsum, ironstone when used as a fluxing agent, kyanite, limestone, phyllite, magnesite, mica, nitrate, phosphate, pyrophyllite, salt, sand, clay, talc, laterite, gravel, potash, potassium minerals, granite, marble, clay, silica, diatomite, kaolin, bentonite, or quartz.

*** Mineral processing means the practice of beneficiating or liberating valuable minerals from their ores, which may combine a number of unit operations, such as crushing, grinding, sizing, screening, classification, washing, froth floatation, gravity concentration, electrostatic separation, magnetic separation, leaching, smelting, refining, calcining, and gasification or any other processes incidental thereto.

Reductions in CIT rates apply to a company operating under a priority sector declared under the Zambian Development Agency Act (ZDA Act), 2006, as amended.

Reduced CIT rates apply in some other cases, including for certain companies listed on the Lusaka Stock Exchange.

Mineral royalty tax

The mineral royalty tax regime in Zambia has undergone a number of changes since 2015. However, with effect from 1 June 2016, the following mineral royalty rates apply:

Description	Rate (%)
For a holder of a mining licence:	
Of the norm value of the base metals produced or recoverable under the licence, except when the base metal is copper.	5
Of the gross value of the energy and industrial minerals produced or recoverable under the licence.	5
Of the gross value of the gemstones produced or recoverable under the licence.	6
Of the norm value of the precious metals produced or recoverable under the licence.	6

Description	Rate (%)
Where the base metal produced or recoverable under the licence is copper:	
On the norm value when the norm price of copper is less than 4,500 United States dollars (USD) per tonne.	4
On the norm value, when the norm price of copper is USD 4,500 per tonne or greater, but less than USD 6,000 per tonne.	5
On the norm value, when the norm price of copper is USD 6,000 per tonne or greater.	6

Local income taxes

There are no income taxes imposed by the provincial or local authorities on businesses.

Corporate residence

A person other than an individual will be resident in Zambia if it is incorporated or formed under the laws of Zambia or if the central management and control is exercised in Zambia.

Permanent establishment (PE)

Broadly, a non-Zambian resident may have a Zambian PE if it has a fixed place of business in Zambia or if it has a dependent agent that has and habitually exercises the authority to conclude contracts in Zambia.

The Zambian definition of a PE is generally similar to the Organisation for Economic Co-operation and Development (OECD) definition and contains a similar list of activities that are included and excluded from the definition of a fixed place of business.

The definition of a PE includes the furnishing of services, including consultancy services, by an enterprise through employees or other personnel present in Zambia for a period or periods exceeding, in aggregate, 90 days in any 12-month period commencing or ending in the fiscal year concerned.

Where a relevant double tax treaty (DTT) is in force, the definition of a PE in the treaty should take precedence over the Zambian domestic legislation in a case where the non-Zambian resident enterprise does not have a PE under the treaty definition.

Other taxes

Value-added tax (VAT)

The VAT rate is 16% and is applicable to supplies of standard-rated goods and services.

The export of goods from Zambia is zero-rated. However, the supply of standard-rated services from a Zambian place of business is subject to VAT at 16%, whether the customer is a Zambian resident or a non-Zambian resident.

Standard-rated goods imported to Zambia are subject to import VAT at 16%.

The supply of standard-rated services to customers in Zambia by a non-Zambian supplier is subject to VAT. The non-Zambian supplier can appoint a local tax agent to account for this as output VAT; this procedure enables the Zambian customer to reclaim the corresponding input VAT. Otherwise, the Zambian VAT-registered customer would

Zambia

be required to account for the output VAT referred to as 'reverse-charge VAT on the services procured from the non-resident supplier'. In this instance, however, there is no mechanism for the Zambian customer to recover reverse-charge VAT.

Customs duties

Goods imported into Zambia are generally subject to customs duties. In 2017, a surtax of 5% was introduced on selected goods that are imported into, manufactured in, or produced in the country.

Excise taxes

Certain goods and services, such as alcoholic drinks, tobacco, and mobile communications airtime, are subject to excise duty at the following rates:

Item	2017 rate (%)	2016 rate (%)
Alcoholic drinks:		
Less than 80% by volume	60	60
80% or higher by volume	125	125
Tobacco*	0	145
Telephone airtime**	17.5	15

* For 2017, the *ad-valorem* rate of 145% has been removed and a specific excise duty of ZMW 240 per 1,000 sticks will apply.

** Airtime includes minutes of voice calls, short message services (sms), multi-media services (mms), internet band width, and other similar services that a subscriber consumes on a mobile cellular telephone or other electronic communication device.

Property taxes

Zambia does not have a property tax other than Property Transfer Tax (*see below*).

Property Transfer Tax (PTT)

PTT applies on the value of the transfer of land and buildings in Zambia and on the transfer of shares issued by a company incorporated in Zambia.

The rate of PTT is 5% and is payable on the open market value (or normal value of shares if greater). The PTT liability is payable by the vendor.

PTT applies on the transfer of a mining right at the rate of 10%.

Stamp taxes

Zambia does not have a stamp tax.

Turnover taxes

From 1 January 2017, turnover tax has been restructured to include bands and presumptive amounts with a turnover of not more than ZMW 800,000 *per annum*, as follows:

Monthly turnover category (ZMW)	Tax payable
0 to 4,200.00	3% of monthly turnover above ZMW 3,000
4,200.01 to 8,300.00	ZMW 225 per month + 3% of monthly turnover above ZMW 4,200
8,300.01 to 12,500.00	ZMW 400 per month + 3% of monthly turnover above ZMW 8,300

Monthly turnover category (ZMW)	Tax payable
12,500.01 to 16,500.00	ZMW 575 per month + 3% of monthly turnover above ZMW 12,500
16,500.01 to 20,800.00	ZMW 800 per month + 3% of monthly turnover above ZMW 16,500
Above 20,800.00	ZMW 1,025 per month + 3% of monthly turnover above ZMW 20,800

Prior to 1 January 2017, there were no bands, and the turnover tax rate was 3% on turnover.

Income that is subject to turnover tax will not be subject to income tax or VAT.

The definition of 'turnover' for turnover tax purposes excludes interest, rental income, dividends, royalties, and any other income subject to WHT.

Registration taxes

The Patents and Companies Registration Agency (PACRA) applies a registration fee of 2.5% to increases and reductions in the authorised share capital of companies incorporated in Zambia.

Payroll taxes

Employers are required to deduct income tax arising on any emoluments under the 'Pay As You Earn' (PAYE) regulations.

Skills development levy (SDL)

Effective 1 January 2017, employers are required to pay a monthly levy amounting to 0.5% of the gross emoluments payable to employees.

Social security contributions

Both employers and employees are required to make contributions to the National Pension Scheme Authority (NAPSA). The contribution rate is 5% of the employee's total earnings (a total 10% contribution from both the employer and employee), subject to a limit as prescribed by the authority. The maximum contribution limit for 2017 is ZMW 894.61 per employee per month (i.e. a total of ZMW 1,789.22 from both the employer and employee per month).

Provincial/local taxes other than income taxes

Certain levies may be payable to local councils (e.g. Lusaka City Council).

Branch income

There is no specific legislation concerning the calculation of branch income.

In general, both Zambian resident companies and Zambian branches are required to prepare financial statements under International Financial Reporting Standards (IFRS). The accounting profit is adjusted to determine taxable profits for each source of income according to the same rules used for determining taxable income of Zambian resident companies. The normal CIT rate applies as described in the *Taxes on corporate income* section.

WHT applies on profits distributed by branches of foreign companies at the rate of 15%.

Income determination

As noted below, Zambian CIT rules set out a number of sources of income that are subject to CIT. Income from each source is calculated separately, and a CIT liability arises on each source with no ability to offset a loss from one source against income from another source.

Business income

Business gains or profits from a Zambian source are taxable by reference to a charge year. This charge year runs from 1 January to 31 December; however, entities can apply to the Zambia Revenue Authority (ZRA) to have their accounts prepared for a different year end.

Inventory valuation

In calculating business income, IFRS should be followed for CIT purposes, including the determination of stock valuation.

Capital gains

Zambia does not have a capital gains tax regime, and, except where provided otherwise in the Income Tax Act or other legislation, capital gains are not subject to tax.

Dividend income

All dividend income (from both Zambian and non-Zambian sources) of a Zambian resident company is subject to CIT as a separate source.

In the case of dividend income received from another Zambian resident company, the WHT deducted on the payment of the dividend should represent the 'final tax', and the Zambian resident company receiving the dividend is not subject to an additional CIT liability.

Interest income

All interest income (from both Zambian and non-Zambian sources) of a Zambian resident company is subject to CIT as a separate source.

In the case of interest income from a Zambian source, the taxable amount for the recipient company is inclusive of the WHT deducted on the payment of the interest. The WHT is available as a credit for offset against the final CIT liability of the recipient Zambian resident company.

Rental income

Zambian-source rental income of a Zambian resident company is subject to CIT as a separate source.

WHT arises at 10% on rental payments. This is the final tax for a landlord, which will not be subject to a further CIT liability.

Royalty income

Zambian-source royalty income (which is very widely defined for these tax purposes) of a Zambian resident company is subject to CIT as a separate source, together with premiums or any like consideration for the use of any Zambian property.

The taxable amount for the recipient company is inclusive of the WHT deducted on the payment of the royalty. The WHT is available as a credit for offset against the CIT liability of the Zambian resident recipient company.

Partnership income

Where a business is carried on in partnership, the income to which each partner is entitled in a period is ascertained under the Zambian income tax rules, and each partner is assessed and charged separately. Accordingly, a partnership is broadly transparent for Zambian income tax purposes.

Unrealised gains/losses

Unrealised gains are not taxable, and, similarly, unrealised losses are not tax deductible.

Foreign currency exchange gains/losses

Foreign exchange gains are only taxable to the extent that they are revenue rather than capital in nature, in which case they are not taxed until they are realised. Foreign exchange losses are only deductible to the extent that they are revenue in nature and realised. By exception, foreign exchange losses of a capital nature incurred on borrowings used for the building and construction of an industrial or commercial building are deductible.

Other significant items

Other sources of income that are taxed under separate source include annuities and hedging income.

Foreign income

As noted above, Zambia operates a source-based system of income tax. However, where an individual/corporate entity is resident in Zambia, then they will also be subject to income tax on non-Zambian source dividends and interest income.

There are no specific anti-avoidance rules preventing deferral of non-Zambian source income, although it should be noted that Zambia has a general anti-avoidance rule.

Deductions

Expenses are generally deductible against taxable income from the same source, provided that they are not of a capital nature and are incurred wholly and exclusively for the purposes of a business.

Provisions can only be deducted to the extent that they are specific. Even if a provision complies with IFRS, it will be disallowed (and any reversal of the provision will not be taxed) to the extent it is considered to be general in nature.

Depreciation and amortisation

Depreciation and amortisation are not deductible as they relate to capital expenditure.

Zambia has a system of capital allowances that provides for deductions in ascertaining business income. These are calculated at annual rates on qualifying capital expenditure, which currently apply as follows:

Zambia

Category of qualifying expenditure	Rate of allowance (calculated on a straight-line basis)
	Investment allowance of 10% *
	Initial allowance of 10% *
Industrial buildings	Annual wear and tear allowance of 5% *
Other commercial buildings	Annual wear and tear allowance of 2%
Implements, machinery, and plant - farming and agro-processing	Annual wear and tear allowance of 100%
Implements, machinery, and plant - manufacturing, tourism, generation of electricity, and leasing	Annual wear and tear allowance of 50%
Implements, machinery and plant - other	Annual wear and tear allowance of 25%
Commercial vehicles	Annual wear and tear allowance of 25%
Non-commercial vehicles	Annual wear and tear allowance of 20%
Patents, designs, trademarks, and copyrights	Premium allowance on straight-line basis over the life of period for which the right is granted
Mining expenditure (only available for assets brought into use)	Mining deductions of 25%
Farm improvements	Farm improvement allowance of 100%
Construction and improvement of commercial and industrial buildings by person approved under the ZDA Act (see <i>the Tax credits and incentives section</i>)	Improvement allowance of 100%

* For industrial buildings, the investment allowance and the initial allowance can both be claimed in the year in which the building is put into use, together with the wear and tear allowance for that year.

Goodwill

Goodwill is not deductible as it is a capital expense.

Start-up expenses

A deduction is allowed for preliminary business expenses in the charge year in which that business commences, provided that the expenditure was incurred within 18 months before the commencement and provided that the expense would have been deductible if it had been incurred after the commencement.

There are special rules for prospecting expenditure in an area in Zambia over which a mining right has been granted. These enable the shareholders of the company undertaking the prospecting to claim a deduction for the prospecting expenditure, provided certain conditions are met.

Interest expenses

Interest expenses are deductible, provided that the loan or advance was obtained for capital employed wholly and exclusively for business purposes (or in the production of another source of income).

Note, however, that incidental costs of obtaining finance, such as commitment and guarantee fees and any other incidental costs of a similar nature, are not deductible.

Bad debt

A specific bad debt is deductible if it can be proved that it is bad or likely to become bad.

No deduction is allowed for impairment provisions/bad debt incurred by banks and financial institutions for debts that are secured against collateral.

Charitable contributions

A payment to a public benefit organisation that is approved by the Zambian government or owned by the Zambian government is deductible.

Pension expenses

Payments made by an employer by way of a contribution to an approved fund established for the benefit of employees are deductible. Note that special rules apply for the deductibility of lump sum payments and payments in arrears. Payments to non-approved pension funds are not deductible.

Payments to directors

Payments to directors are deductible, provided they are incurred wholly and exclusively for the purposes of a business (or other source of income). A payment could, however, be disallowed if it is deemed to be merely a domestic or personal expense.

Research and development (R&D) expenses

All revenue expenditure on experiments or research relating to a business is deductible. A deduction against business income is also allowed for a contribution to a scientific or educational society or institution, which is required to be used solely for industrial research or scientific experimental work connected with the business. However, capital expenditure on research is disallowed unless it qualifies for capital allowances.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments would normally be disallowed on the basis that they are not wholly and exclusively for the purposes of a business.

Fines and penalties

A penalty arising under the Income Tax Act is specifically disallowed. Other fines and penalties may be disallowed on the basis that they are not wholly and exclusively for the purposes of a business.

Taxes

Zambian CIT is not deductible. Other tax liabilities suffered should be deductible, provided they are revenue expenses and wholly and exclusively incurred for the purposes of the business (or other source of income). *See the Tax credits and incentives section regarding credits for non-Zambian tax suffered on non-Zambian source income.*

Other significant items

Other specific rules concerning expenses considered to be allowable include the following:

- Deductions for costs of an employer to establish and administer an approved share option scheme.
- Deductions for technical education.
- Deductions for mineral royalty tax payments.
- Deductions for SDL payments.
- A fixed deduction of ZMW 1,000 for employing a person with a disability.

Zambia

Other items specifically disallowed include the following:

- A loss or expense that is recoverable under an insurance contract or indemnity.
- Expenditure on the provision of entertainment, hospitality, or gifts.

Benefits provided that are incapable of being turned into money or money's worth (e.g. the use of cars and accommodation provided by the employer) are taxable to the employer under corporate tax.

Special rules apply for determining the gains or profits of an insurance business.

Net operating losses

Losses can be carried forward to set against profits of the same source. Normally, losses are available to carry forward for a period of five years after the charge year in which the loss was incurred. In the case of a person carrying on a mining operation or hydro, wind, solar, and thermo power generation, the loss carryforward period is ten years.

The set off of a loss incurred by a person in a charge year from mining operations shall be limited to 50% of the taxable income of the person carrying on mining operations.

There is no ability to carry back losses.

Losses arising from one source cannot be set against income arising from another source.

Payments to foreign affiliates

Certain 'loans to effective shareholders' may give rise to CIT liabilities. Note that transfer pricing rules may also apply (*see Transfer pricing in the Group taxation section*).

Group taxation

There are no special CIT rules for groups of companies. Accordingly, CIT returns cannot be prepared on a consolidated basis for group purposes. Losses arising in one group company cannot be set against profits of another group company.

Transfer pricing

Transfer pricing rules apply to transactions between associated persons and require that transactions are undertaken on an arm's-length basis. Otherwise, the associated person benefiting from a reduction in income as a consequence of any non-arm's-length terms will have its CIT computation adjusted as if the transactions had been undertaken on an arm's-length basis.

OECD transfer pricing guidelines are generally accepted as the appropriate basis to determine arm's-length terms.

Thin capitalisation

There are specific thin capitalisation rules. These relate to the issue of securities to an associated person, which require that the transaction is undertaken at an arm's-length rate by reference to:

- the appropriate level or extent of the issuing company's overall indebtedness
- whether the amount issued would have been provided as a loan on an arm's-length basis, and

- the rate of interest and other terms that would apply to such an arm's-length loan.

The debt-to-equity ratio of the borrowing party is an important test to determine whether there should be a thin capitalisation restriction. However, there is no defined debt-to-equity ratio in legislation or published guidance. This should be determined by reference to normal practice that would be adopted by two independent parties on the open market with respect to the particular situation. In practice, however, the generally accepted debt-to-equity ratio for non-mining companies is 1:1.

An exception applies to a company carrying on mining operations. In this case, the mining company's interest expense is restricted to the extent that its loans, in aggregate, exceed a 3:1 debt-to-equity ratio. For mining companies only, this thin capitalisation restriction applies to interest payable to both connected and unconnected parties.

Controlled foreign companies (CFCs)

Zambia does not have a CFC regime.

Tax credits and incentives

The ZDA Act 2006 offers a range of tax incentives in the form of allowances, exemptions, and concessions for companies making investment in Zambia that meet certain criteria.

The fiscal benefits arising from qualifying investment licenses are as follows:

- 0% CIT for five years from the date of commencement of operations.
- 0% tax on dividends for a period of five years starting from the date of commencement of operations.
- 100% improvement allowance for tax purposes on capital expenditure for improvement and upgrading of infrastructure.

Foreign tax credit

Domestic legislation provides that, where a DTT is in force and the other territory has taxing rights to a source of foreign income, a tax credit will be available to reduce the Zambian tax liability by the amount of non-Zambian tax suffered.

Where income is received from a source where there is no applicable DTT, unilateral relief should be available to offset foreign tax against Zambian tax arising on the foreign income.

In the case of both treaty relief and unilateral relief, the tax credit cannot exceed the amount of Zambian tax arising on the foreign income before the reduction.

Withholding taxes

Payments of the following items of Zambian-source income may be subject to WHT. The relevant rates under domestic legislation are as follows:

Zambia

Category of payment	Rate on payment to Zambian resident (%)	Rate on payment to non- Zambian resident (%)
Dividends	15 (1)	15 (1)
Interest	15	15
Interest from a Lusaka Stock Exchange listed Property Loan Stock Company	0	15
Coupon income (interest) on government bonds	15	15
Management or consultancy fee	15	20
Royalties	15	20
Rent from a Zambian source	10 (2)	10
Commissions	15	20
Construction and haulage contractors	0	20
Public entertainment fees to entertainers/sports persons	0	20

Notes

- 0% if paid by a mining company or a company listed on the Lusaka Stock Exchange to individual shareholders.
- 10% WHT on rent is a final tax.

The WHT liability arises by reference to the date of payment or, if earlier, the date of accrual (i.e. the date the recipient has a legal right to claim the payment). WHT is due to be paid within 14 days of the end of the month to which the payment or accrual relates.

Zambia has DTTs in force with the following territories, which generally provide reduced rates of WHT as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty territory	15	15	20
Treaty:			
Canada	15	15	15
China	5	10	5
Denmark	15	10	15
France	The 1950 France - Zambia DTT is accepted to apply (3)		
Finland	5 (1)/15	15	5 (1)/15
Germany	5 (1)/15	10	10
India	5 (1)/15	10	10
Ireland	7.5	10	8 (5)/10
Italy	5 (1)/15	10	10
Japan	0	10	10
Kenya	0	0	0
Mauritius	5 (1)/15	10	5
Netherlands	5 (2)/15	10	7.5 (6)/10
Norway	5 (1)/15	10	10 (7)/15
Seychelles	5 (1)/10	5	10
South Africa	The 1953 Rhodesia & Nyasaland - South Africa DTT is accepted to apply (3)		
Sweden	5 (1)/15	10	10
Switzerland	The 1954 Switzerland - United Kingdom DTT is accepted to apply (3)		
Tanzania	0	0	0
Uganda	0	0	0

Recipient	Dividends (%)	Interest (%)	Royalties (%)
United Kingdom	5/15 (8)	10	5 (4)

Notes

1. The non-resident recipient must own at least 25% of the share capital of the capital of the Zambian company.
2. The revised Zambia-Netherlands treaty was signed on 15 July 2015 but is not yet in force. This lower rate applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends, or if the beneficial owner is a pension fund.
3. These old treaties do not follow the OECD model, and, accordingly, their application to particular circumstances must be confirmed.
4. This lower rate applies to the treaty that was signed between the two states, which entered into force effective 1 January 2016.
5. The rate of 8% shall apply in the case of payment of royalties in respect of any copyright of scientific work, patent, trade mark, design or model, plan, secret formula or process, or information concerning industrial, commercial, or scientific experience.
6. The lower rate applies to the treaty that was signed between the two states in July 2015; the status of which is still pending.
7. The lower rate applies to the treaty that was signed between the two states in December 2015; the status of which is still pending.
8. This rate applies where the dividends are paid out of income (including gains) derived directly or indirectly from immovable property within the meaning of Article 6 of the treaty.

In all cases, advance clearance must be obtained to obtain the treaty benefit and take advantage of any reduced rate of WHT or tax exemption.

It may be possible to obtain confirmation that management and consultancy fees can be paid without deduction of WHT by reference to the provisions of the relevant treaty. For treaties following the OECD model, the article concerning 'Income Not Expressly Mentioned' is generally taken to be relevant.

Tax administration

Taxable period

CIT is determined by reference to a charge year, being the period of 12 months ending on 31 December.

Tax returns and payment of tax

The CIT rules require taxpayers to submit provisional tax returns in the first quarter of each charge year. Where there is a change in forecast, a revised return may be submitted at the end of either the second, third, or fourth quarters of the charge year. Provisional tax payments are required to be made quarterly. The provisional tax liabilities must be based on the estimated taxable income for the current charge year.

The quarterly returns and tax payments for the 2017 tax charge year are due as follows:

- 1st quarter return due 31 March 2017 (or 5 March 2017 if submitted manually).
- 2nd quarter return due on 30 June 2017.
- 3rd quarter return due on 30 September 2017.
- 4th quarter return due on 31 December 2017.

By concession, the ZRA allows a 10-day grace period for the payment of taxes. Accordingly, each quarterly payment can be made on the 10th day of the month following the end of each quarter.

Zambia

The returns for the 2016 tax charge year will need to be submitted by 30 June 2017. This is because the respective return relates to the 2016 tax charge in line with the law applicable to the 2016 tax charge year.

With effect from the 2017 tax charge year (i.e. tax charge year beginning on 1 January 2017), the final tax return needs to be submitted by 21 June following the end of the tax year. This must be accompanied by any balance of tax that remains unpaid. For example, the final tax return for the 2017 tax charge year is due for submission by 21 June 2018.

In the case of a manually filed tax return, the tax return needs to be submitted by 5 June following the end of the tax year. For example, the final tax return for the 2017 tax charge year, if submitted manually, is due for submission by 5 June 2018.

Tax audit process

The Commissioner-General of the ZRA has wide powers to require any person to attend to be examined at a time and place specified by notice, where it is determined that person is able to impart information necessary for the purposes of the Income Tax Act.

Furthermore, the Income Tax Act empowers the Commissioner General of the ZRA to access any type of information required for tax purposes held by legal practitioners, accountants, and financial institutions.

Statute of limitations

There is no provision that specifically provides for a statute of limitation. However, in practice, it is accepted that the revenue authorities cannot investigate any cases after six years following the end of the charge year except in cases of fraud or wilful default. This is on the basis that taxpayers are only required to maintain documentation for a period of six years from end of the relevant charge year.

Topics of focus for tax authorities

The ZRA is devoting a significant amount of time to transfer pricing, and this is expected to be an increasing focus of scrutiny.

Other issues

Advance income tax

With effect from 1 January 2017, advance income tax may apply at 15% (previously 6%) on the value of commercial imports where the importer is non-compliant. This can be credited against the importer's CIT liability on submission of the annual tax return.

Exchange controls

The exchange monitoring regulations and foreign currency regulations in Zambia were repealed in March 2014.

Choice of business entity

A non-Zambian resident company can establish a business in Zambia, either as a branch of a foreign company or a subsidiary (i.e. a Zambian registered limited liability company).

Adoption of IFRS

Zambia has adopted IFRS, and the accounting profits determined thereby are adjusted for tax purposes (based on tax legislation) to determine the taxable income for purposes of determining the CIT liability.

Significant developments

The introduction of Special Economic Zones occurred in December 2017; however, the laws governing the enabling of these Zones (including the formation of a Board) is still awaited.

The concept of permanent establishment (PE) has been introduced into the Income Tax Act with effect from 1 January 2017.

Several large mining companies have been appointed as value-added tax (VAT) agents.

Taxes on corporate income

The corporate income tax (CIT) rate for companies (other than mining companies with special mining leases, but including branches) continues unchanged at 25.75%. This rate includes a base rate of 25% plus a 3% AIDS levy.

Zimbabwe presently operates on a source-based tax system. This means that income from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The specific circumstances of a transaction should always be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Income earned by foreign companies from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obligated to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.

Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax (WHT). *See the Withholding taxes section for additional details.*

Local income taxes

There are no local income taxes payable in Zimbabwe.

Zimbabwe

Corporate residence

Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived, or deemed to be derived, from sources within Zimbabwe is subject to tax. Under the proposed new legislation, the place of effective management concept may be used for a residence-based tax. Note that this new Income Tax Act is still being drafted, and there is no certainty as to when it will become law.

Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may, in the hands of a domestic company, be deemed to arise in Zimbabwe and be taxed as such. Examples include interest and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

Permanent establishment (PE)

In the event that Zimbabwe has entered into a double taxation agreement (DTA) with the country where the foreign company resides, the entity will only be taxable in Zimbabwe if it operates through a PE, which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered. If a PE exists, only the portion of the income attributable to the PE will be subject to tax in Zimbabwe.

The concept of a 'permanent establishment' was introduced into the Zimbabwe Income Tax Act effective from 1 January 2017. The wording is based on the base erosion and profit shifting (BEPS) guidelines that have been adopted by many countries.

Other taxes

Value-added tax (VAT)

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0%, while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe that involves the supply of goods or services for consideration.

VAT is payable on all imports for local consumption into Zimbabwe, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated). Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed 60,000 United States dollars (USD) in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due by the 25th day following the month to which the VAT relates.

It is mandatory for all registered taxpayers (i.e. everyone that has a tax Business Partner Number) to use electronic fiscal registers (EFRs) that can be linked to the Zimbabwe Revenue Authority (ZIMRA). Penalties of up to USD 25 per day per point of sale may be imposed.

The concept of appointing VAT agents was adopted in April 2017. Several large mining companies were designated as agents, and the legislation demands that they deduct 10% of a gross invoice as a VAT WHT. The agents must then issue the payees with a certificate showing that the VAT WHT has been deducted in order to enable the payee to claim this against the following month's VAT liability.

Customs duties

Zimbabwe is a member of the Southern African Development Community (SADC) as well as the Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries, while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

25% surtaxes have been imposed on a number of imported goods (including footwear, clothing, and certain foodstuffs) in order to protect the local manufacturing sector.

A security deposit is required by Customs on all temporary importations of equipment to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Excise duties

Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries. Examples of the excise products and applicable rates include the following:

- Cigarettes: 40% + USD 7 per 1,000 sticks.
- Spirits: USD 2 per litre.
- Wine: USD 0.50 per litre.

Excise and fuel levies are also levied on petrol, diesel, and illuminating kerosene.

Zimbabwe

Property taxes

Property taxes are levied by cities, towns, and rural councils. Each of these bodies conducts periodic valuations of the properties in their area and annually set out a 'rates schedule' based on a percentage of the valuations. These may alter each year depending upon the entities budgetary requirements for funds. Valuations of the properties are usually based on estimates as there are very few qualified property valuers operating in Zimbabwe at present.

Transfer duty

Transfer duty is payable on the acquisition value of property purchased at the following rates:

Value of the property (USD)	Rate of transfer duty
0 to 5,000	USD 400
5,001 to 20,000	2% of the value above USD 5,000
20,001 to 50,000	3% of the value above USD 20,000
50,001 and above	4% of the value above USD 50,000

Transfer duty is normally payable by the buyer, but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 4% (plus 15% VAT) must be added on.

Stamp duty

Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

Transaction	Stamp duty
Bonds	0.4% (USD 0.40 for every USD 100 or part thereof)
Brokers notes - purchase of securities	0.25% (USD 0.25 per every USD 100 or part thereof)
Brokers notes - purchase/sale of any movable property other than a security	0.10% (USD 0.10 per every USD 100 or part thereof)
Brokers notes - purchase/sale of any immovable property	1% (USD 1.00 per every USD 100 or part thereof)
Off market share transfer instruments	2% or USD 2
Cheques	0.05% (USD 0.05)

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

Capital gains tax

It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed (on the Zimbabwean Stock Exchange) or unlisted companies at the following rates:

Acquired pre-February 2009

- Listed securities: 1% of proceeds.
- Property: 5% of proceeds.
- Unlisted securities: 5% of proceeds.

Acquired post-February 2009

- Listed securities: 1% of proceeds.
- Property: 20% of capital gain.
- Unlisted securities: 20% of capital gain.

Payroll taxes

Zimbabwe operates a pay-as-you-earn (PAYE) system that is called the 'Final Deduction System' (FDS). This is based on the presumption that all employers must register for PAYE (both local and foreign-based employers), and that they are responsible for calculating, collecting, and paying the correct amount of PAYE every month to ZIMRA. Tax audits are carried out periodically (every year or two) to test the payroll systems.

The full burden of collecting the correct tax is placed on the employer, and, because of this, there is no requirement for employees to file annual tax returns in respect of employment income.

Social security contributions

Zimbabwe has a limited social security system. The National Social Security Scheme (NSSS) contributions are payable at the same rate of 3.5% of basic salary by the employer and employee, with a salary cap set at USD 700 per month.

Manpower training levy

Subject to some exceptions, employers are required to pay a 1% monthly training levy (on the gross wage bill) to the Zimbabwe Manpower Development Authority.

Workmen's compensation

Under the Workmen's Compensation Act, employers are required to contribute to a fund that provides cash benefits for industrial injury, disability, and death. Contribution rates are supposed to vary according to inherent occupational risk, from less than 2% in most low-risk commercial/administrative occupations to 11% for high-risk sectors.

Standards Development Fund

With a few exceptions, employers are required to pay 0.5% of their quarterly gross wage bill to the Standards Development Fund. The amount is payable on all payments made by the employer on behalf of the employee, including medical aid and pension contributions.

Branch income

Branch income that is received or has accrued from a source within, or deemed to be within, Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 15% WHT is imposed on any payments made in respect of head office charges.

Zimbabwe

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

Note that the move from a source-based system to a residence-based system may affect the level of profits that are attributed to Zimbabwe. These laws are still pending, and no date of implementation has been given.

Income determination

The Act tax base for CIT is taxable income rather than profits. The source and nature of the income determines whether the amount is taxable or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

Inventory valuation

The legislation permits three methods of inventory valuation: historic cost, cost of replacement, or net realisable value. Standard cost based on first in first out (FIFO) is normally used for accounts valuations and is an accepted basis for tax purposes. Last in first out (LIFO) is not permitted for tax or for accounting purposes. The tax valuation may differ from the accounting valuation; this is a rare occurrence in Zimbabwe but is acceptable.

Capital gains

See Capital gains tax in the Other taxes section.

Dividend income

Dividends received from Zimbabwe incorporated companies are tax exempt. When received from non-Zimbabwe companies, they are taxed at a flat rate of 20%; however, relief is granted by allowing any foreign tax suffered as a tax credit (up to a maximum of the 20% local rate of tax).

Interest income

Interest accruing to Zimbabwe resident companies from 'financial institutions' is subject to a 15% WHT and thereafter is exempt from CIT (the WHT becomes a final tax). Interest from other local or foreign sources is included in gross income and is taxed at the normal CIT rate. Relief will be granted for any foreign tax paid, up to the maximum Zimbabwe tax rate.

Partnership income

The partnership itself is not taxed directly; however, the taxable income of the partnership is calculated in the same way as corporate income and is then allocated amongst the partners in accordance to their agreed profit sharing ratios. This income is taxed in their hands at the basic CIT rate.

Rent/royalties income

Rents and royalties are generally treated as normal taxable income and are taxed at the basic CIT rate. Rent arising in respect of land and buildings situated outside of Zimbabwe, however, is exempt from local tax.

Foreign income

Where income (including business profits) is deemed to be from a Zimbabwe source, it will form a part of the local company's taxable income and will be subject to tax at the basic CIT rate. Relief in respect of foreign taxes suffered will be granted unless it is clear that the true source of the income is, in fact, Zimbabwe.

Deductions

The Act makes provisions for specific deductions. Some of the deductions (e.g. the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, and manufacturing allowances) can be more complex.

Capital allowances

The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of construction cost in the year they enter service. Thereafter, an annual allowance of 25% is deductible for each year following the year of construction. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of construction and not the cost of acquisition. In the latter case, the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. Subsequent development expenditure is presently written off in the year expended.

Capital allowances may also be deducted with respect to leasehold improvements.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is calculated on the capital allowances previously granted.

Goodwill

Goodwill is currently not deductible for tax purposes in Zimbabwe.

Start-up expenses

Start-up expenses may be deducted if incurred within 18 months of commencement of business and not considered to be capital in nature.

Interest expenses

Zimbabwe has thin capitalisation rules based on a 3:1 debt-to-equity ratio. A portion of the overall interest may be disallowed if this ratio is exceeded.

Zimbabwe

Bad debt

Bad debts written off may be claimed, but not a provision for bad debts.

Charitable contributions

Donations (with varying maximum limits) made to specified charities and educational bodies may be claimed.

Entertainment expenses

Entertainment expenses are not deductible for tax purposes.

Fines and penalties

Fines and penalties are not deductible for tax purposes.

Taxes

Taxes are generally not allowed as a deduction against income unless they form a part of a cost of an allowable expense (e.g. VAT incurred on an expense line that may not be claimed as input tax).

Net operating losses

Assessed tax losses may be carried forward (but not backwards) for up to six years, provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

Payments to foreign affiliates

The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses, as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75%, respectively, for a company already in production and prior to production of total tax-deductible expenses.

Group taxation

No taxation of combined operations is allowed in Zimbabwe, including where operations are conducted by more than one company.

Transfer pricing

Effective 1 January 2014, transfer pricing legislation was introduced under a provision titled 'tax avoidance'. This legislation does not detail any parameters or requirements that corporations should follow, nor has ZIMRA issued any practice notes.

This legislation was enhanced with effect from 1 January 2016 to enable the use of the Organisation for Economic Co-operation and Development (OECD) and United Nations (UN) guidelines in respect of cross-border transactions.

It is important to note that, in addition to cross-border transactions between connected persons being examined, the law also covers internal (domestic) transactions between connected persons.

Thin capitalisation

The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt-to-equity ratio exceeds 3:1.

Controlled foreign companies (CFCs)

Zimbabwe currently has no CFC rules.

Tax credits and incentives

It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.

Person for whom incentive is available and duration of incentive	Tax incentive	Tax treatment for normal taxpayers
Taxpayers operating at designated growth point areas.	The capital allowance is calculated as 25% of the cost of construction of a commercial or industrial building in growth point areas in the year when the building enters service and 25% during the three years that follow the year of construction.	Capital allowances are calculated as 25% of the cost of construction of industrial building in the year when the building enters service and 25% during the three years that follow the year of construction.
Taxpayers operating at designated growth point areas.	Deduction of an investment allowance at 15% on cost of specified assets.	No investment allowance granted.
For all taxpayers in build, own, operate, and transfer (BOOT) or build, operate, and transfer (BOT) arrangements.	First five years: Taxed at 0%. Second five years: Taxed at 15%. Thereafter: Taxed at normal rate.	Taxed at 25%.
Exporting taxpayers.	An additional allowance of 100% of cost incurred in an export country in order to export Zimbabwean goods to such country may be deducted.	Export expenditure incurred is deductible for tax purposes.
For all manufacturing taxpayers exporting 50% or more of output (by volume).	Taxed at a reduced rate of 20%.	Taxed at 25%.
Mining company holding a special mining lease.	Taxed at a reduced rate of 15%.	Taxed at 25%.
Operator of a tourist facility in a tourist development zone.	First five years: Taxed at 0%. Thereafter: Taxed at normal rate.	Taxed at 25%.
Industrial park developer.	First five years: Taxed at 0%. Thereafter: Taxed at normal rate.	Taxed at 25%.

Zimbabwe

Foreign tax credit

Where foreign income is taxed in Zimbabwe, a tax credit (limited to the amount of local tax suffered) will be set off against the local tax liability.

Withholding taxes

WHTs are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).

Dividends

Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within ten days after declaration of the dividend.

Interest

WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are currently exempt from any WHT on interest.

Royalties or similar payments

WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within ten days of the date of payment. The WHT falls due upon accrual (i.e. when payable), and actual payment is not a factor.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

Fees

Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within ten days of the date of payment.

Summary of WHT payable

The non-residents WHT rates and treaty relief for Zimbabwean DTAs can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Fees (%)
Non-resident	15*	0	15	15
Treaty:				
Bulgaria	10	N/A	10	10
Canada	10	N/A	10	10
France	10	N/A	10	10
Germany	10	N/A	7.5	7.5
Malaysia	10	N/A	10	10
Mauritius	10	N/A	15	15
Netherlands	10	N/A	10	10
Norway	15	N/A	10	10
Poland	10	N/A	10	15
South Africa	15	N/A	15	15
Sweden	15	N/A	10	10
United Kingdom	5	N/A	10	10

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

'N/A' means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwean rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within ten days of the date of distribution or accrual.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

- Botswana
- Democratic Republic of the Congo
- Indonesia
- Iran
- Jamaica
- Namibia
- Serbia and Montenegro
- Seychelles
- South Africa
- Tanzania
- Tunisia
- Zambia

Tax administration

Taxable period

The tax year-end is 31 December each year. Applications may be made for a different year-end if good reasons are given (e.g. to comply with the international group year-end). In the first year of trade, a longer or shorter period than 12 months may be accepted to tie in with a future year-end.

Tax returns

The CIT return is due by 30 April in the following tax year.

Payment of tax

Zimbabwe regulates the payment of CIT on four dates during the course of the current tax year; these are referred to as Quarterly Payment Dates (QPDs). The first payment of 10% is due by 25 March of the respective tax year. The second payment of 25% is due by 25 June of the respective tax year. The third payment of 30% is due by 25 September

Zimbabwe

of the respective tax year. The fourth payment of 35% is due by 20 December of the respective tax year.

All taxes are expected to have been paid by the 25th day of December. If there is an adjustment after the year-end accounts have been finalised, a top-up payment must be made. There is no set date for this. However, in practice, this payment should not be more than 10% of the annual tax liability. ZIMRA often imposes a 10% *per annum* interest charge on any underpayments of QPDs.

WHT payments are due within ten days from the date of distribution or accrual.

Tax audit process

Tax audits do not, at present, have a set cycle; however, the aim is to establish a three-year cycle in the future.

Statute of limitations

The statute of limitations is generally three years unless ZIMRA considers that there is fraud or misrepresentation involved. In those circumstances, there is no set limit on how far back ZIMRA can go, but they usually do not go beyond six years in practice.

Topics of focus for tax authorities

ZIMRA is focused on ensuring that all compliance issues are in order and that VAT and payroll taxes have been correctly calculated.

Anti-avoidance

Current Zimbabwe legislation contains basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

- such a transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- it was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or
- it has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question.

The Commissioner General may, at the Commissioner General's sole discretion, impose this legislation on any transaction or scheme, which will place the burden of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Note that the anti-avoidance sections have been amended to include transfer pricing legislation effective from 1 January 2014 (*see Transfer pricing in the Group taxation section*).

Other issues

Exchange control

Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetarised effective April 2009. This has had a significant impact on the country's exchange control regulations.

The Exchange Control Handbook in Zimbabwe is not available to the public; only banking institutions have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to bank approval.

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. A limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.

Worldwide Tax Summaries – Corporate Taxes 2017/18 represents the combined efforts of more than 500 local PwC tax specialists in over 150 countries and territories. While too numerous to name individually, we thank them for their efforts in preparing this guide.

To obtain regularly updated information on the corporate and individual tax rules in operation in over 150 countries, please visit Worldwide Tax Summaries Online at www.pwc.com/taxsummaries.

To download an eBook version of *Worldwide Tax Summaries - Corporate Taxes 2017/18*, please visit www.pwc.com/taxsummaries/ebook.

Prior-year editions of *Worldwide Tax Summaries – Corporate Taxes* (dating back to 2010/11) are available in the Archives section on Worldwide Tax Summaries Online.

To contact the editorial team, please email us at worldwide.tax.summaries@us.pwc.com.

The world's taxes at your fingertips

If you are responsible for managing taxes in a business that trades or operates across a number of different countries, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of them, notwithstanding the fact that these frequently change.

Worldwide Tax Summaries – Corporate Taxes 2017/18 is a useful reference tool, offering quick access to information about corporate tax systems in 157 countries worldwide, in an easily digestible format.

Written by local PwC¹ tax specialists in each country, this guide covers recent changes in tax legislation as well as key information about income taxes, residency, income determination, deductions, group taxation, credits and incentives, withholding taxes, indirect taxes, and tax administration, up to date (unless otherwise stated) as of 1 June 2017.

Visit our mobile friendly online version, which is updated regularly throughout the year, at www.pwc.com/taxsummaries.

¹ "PwC" is the brand under which member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide services. Together, these firms form the PwC network. Each firm in the network is a separate legal entity and does not act as agent of PwCIL or any other member firm. PwCIL does not provide any services to clients. PwCIL is not responsible or liable for the acts or omissions of any of its member firms nor can it control the exercise of their professional judgment or bind them in any way.
