Dividends paid to a resident company are subject to a 20% WHT. Dividends paid to a non-resident company are subject to 18% WHT. The final taxation of dividends paid to a company within the EEA is nil, as WHT will be reimbursed in the year following payment upon filing a tax return.

Interest paid to resident company is subject to a 20% WHT, and interest paid to non-resident company is subject to 10% WHT.

Gross royalties paid to a non-resident are taxable at the standard 20% CIT rate and subject to withholding.

Notes

1. The lower rate applies to corporate shareholders with a minimum ownership of 10%.
2. The lower rate applies to corporate shareholders with a minimum ownership of 25%.
3. The lower rate applies to copyright royalties (except films, etc.) and royalties for computer software or patent, or for information concerning industrial, commercial, or scientific experience (except information provided in connection with a rental or franchise agreement).
4. The lower rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower rate applies to the right to use computer software or patent concerning industrial, commercial, or scientific experience.
6. The lower rate applies to corporate shareholders with a minimum ownership of 10%, and which has been held for a period of at least 12 months preceding the date the dividends were declared.
7. The lower rate applies to Russian corporate shareholders with a minimum ownership of 25% of capital in the Icelandic company and the foreign capital invested exceeds 100,000 United States dollars (USD).
8. The higher rate applies to royalties for the use of trademarks, know-how in relation to a trademark, and films, etc.

Tax administration

Taxable period

The tax year is the calendar year. However, in certain circumstances, the Internal Revenue Directorate can allow a different fiscal year from the calendar year upon application.

Tax returns

At the beginning of every year, the Internal Revenue Directorate determines the time limit for taxpayers to submit their tax returns and supporting documentation. The deadline for receipt of tax returns from corporations is generally 31 May each year. This deadline is extended upon application. Those who have their tax returns prepared by professional services can generally have the deadline extended until 10 September each year.

The final assessment must be completed no later than ten months after the end of the income year. Tax assessments for corporations will be available at the end of October.

Payment of tax

Advance tax payments are due on the first day of every month, except January and October. Corporations pay income tax in advance, which is in turn deducted from the final tax assessment in October each year. The advance tax is collected in the months of February to September and amounts to 8.5% of the income tax on each due date. In total, the advance tax payments amount to 68% of the income tax. Any deficit remaining when final tax is assessed must be paid in equal instalments in November and December.

Income tax payments on dividends and interest income are due every quarter. Due dates in 2012 are 20 April, 20 July, 20 October, and 20 January (2013), and the final deadline for payment is 15 days later.

Statute of limitations

Tax authorities in Iceland have the right to reassess tax returns for CIT six years prior to the year of the assessment (i.e. the statutory period of limitation is six years). The statutory period only reaches a maximum of two years in time if tax returns have been filled out properly and all necessary information presented for tax authorities to establish a correct assessment. This means that in the year 2012, tax authorities can, in theory, reassess the company's tax back to income year 2006.

Topics of focus for tax authorities

The topic of focus for tax authorities in Iceland is tax avoidance in general.

Other issues**Foreign currency financial statements/Accounting in foreign currencies**

Companies can apply to the Registry of Annual Accounts for an authorisation to keep their books and prepare their annual accounts in a foreign currency. An application must be filed no later than two months before the beginning of the company's fiscal year. The authorisation is valid for five years, and the Registry of Annual Accounts is responsible for ensuring that the authorised companies continue to fulfil one or more of the following necessary conditions:

- The company's main business operations take place abroad or the company is a part of a foreign company group.
- The company owns foreign subsidiaries or shares in foreign companies and its main business transactions are with those companies.
- The company's main place of business is Iceland, while a considerable number of their transactions are in foreign currencies.
- A considerable portion of the company's investments and related debts are in foreign currencies.

If the company deems that it no longer fulfils the conditions, it must notify the Registry of Annual Accounts. The Registry can postpone its decision of the authorisation's discontinuance for two fiscal years if the situation that is causing the fact that the company does not continue to fulfil the necessary conditions is deemed to be temporary.

The average exchange rate for the fiscal year must be used when converting income and expenses, depreciations included, into Icelandic króna. The exchange rate at the end of the fiscal year must be used when converting assets, debts, and capital. Exchange rate differences that may arise do not affect income on profit and loss accounts.

Rules on foreign exchange

In 2008, the Central Bank of Iceland issued rules on foreign exchange in order to restrict or temporarily prevent certain types of cross-border capital movements or foreign exchange transactions related thereto, which, according to the Central Bank of Iceland, can cause serious and considerable instabilities in exchange rates and financial matters.

The Act on Foreign Exchange defines capital movements as:

- The issue, sale, or purchase of shares, debt instruments, drafts, unit shares in mutual funds, and other long-term and short-term securities.

Iceland

- Deposits in and withdrawals from accounts with depository institutions.
- Lending, borrowing, and the issue of securities not related to international transactions with goods and services.
- The import and export of share certificates and domestic and foreign currencies.
- Forward contracts, options, currency and interest-rate swaps, and other related foreign exchange transactions in which the Icelandic króna is one of the denominated currencies.
- Presents, grants, or other transactions equivalent to the ones detailed above.

Capital movements of foreign currencies

All capital movements of foreign currencies between countries are prohibited, with the exception of payments for the purchase of goods and services or other capital movements specifically exempt from the regulations, according to Rules no. 370/2010 on Foreign Exchange, issued by the Central Bank of Iceland.

Capital movements of domestic currencies

Capital movements between countries in domestic currencies are also prohibited. There are several exceptions to this rule.

Capital movements specifically exempt from the above regulations are as follows:

- Capital movements in relation to the purchase or sale of goods and services (not including lending, borrowing, and the issue of securities not related to international transactions with goods and services) and payments in cash or by withdrawals from an account the buyer has in an Icelandic depository institution.
- Capital movements in relation to real estate purchases in Iceland or business transactions with securities issued in the domestic currency and payments by withdrawals from an account the buyer has in an Icelandic depository institution.
- Capital movements in relation to claims from a liquidated company and payments of contractual debts according to composition agreements, according to Act no. 21/1991.

Significant developments

Alternative Minimum Tax (AMT)

Alternative Minimum Tax (AMT) is made applicable to all other persons (other than a company) at the rate of 18.5% (plus applicable surcharge, education cess, and secondary and higher education cess). AMT paid in a year is eligible to be carried forward for set off against normal tax liability for ten years. In the case of an individual, or a hindu undivided family or an association of persons or a body of individuals or an artificial judicial person, AMT is not applicable where the adjusted total income does not exceed 2 million Indian rupees (INR).

General Anti Avoidance Rules (GAAR)

GAAR provisions were introduced by the 2012 Budget empowering the Tax Department to declare an 'arrangement' entered into by an assessee to be an 'Impermissible Avoidance Agreement' (IAA). The consequence would be denial of tax benefit either under the provisions of the Act or under the tax treaty. Any step in, or part of, any arrangement may also be declared as an IAA. The onus to prove that the main purpose of the IAA is to obtain tax benefit is on the Revenue. GAAR provisions are effective from 1 April 2013.

Conversion of a branch of a foreign bank into an Indian subsidiary

Conversion of a branch of a foreign bank into an Indian subsidiary company in accordance with the scheme of Reserve Bank of India will be tax neutral, subject to conditions to be notified. In case of failure to comply with any of the provisions specified in the scheme or the notification, all the provisions of the Act shall then apply to the foreign company and the subsidiary and the tax neutral nature of the conversion will be ignored and capital gains tax will become payable on the conversion.

Tax Residency Certificate (TRC)

For the purpose of obtaining tax treaty benefit, it will now be necessary for a non-resident assessee to furnish a certificate (containing prescribed particulars) of its being resident of that country, obtained by the assessee from the government of that country.

India

Definition of 'royalty'

It is clarified by the Budget 2012 that with retrospective effect from 1 June 1976, the definition of 'royalty' will also include consideration for use of, or right to use, computer software. It is also clarified that transfer of all or any rights in respect of any right, property, or information includes transfer of all or any right for use or right to use a computer software (including granting of a licence), irrespective of the medium through which such a right is transferred. Hence, while applying withholding tax (WHT) on such payments in the nature of royalty, one will need to consider the amended definition.

It is clarified that the term 'process' includes transmission by satellite (including up-linking, amplification, conversion for down-linking of any signal), cable, optic fibre, or by any other similar technology, whether or not such a process is secret.

Taxability of shares issued at premium in excess of fair market value of shares

Where a closely held company (other than a venture capital undertaking receiving from a venture capital fund/company or from any other notified person to be notified by the Central Government) issues shares at premium to a resident for an amount in excess of the fair market value of the shares, then the excess will be deemed to be the income of the company. This is effective from 1 April 2013.

Share premium in excess of fair market value to be treated as income

Any amount received towards share application money, share premium, or share capital by any closely held company will be considered as income, if the explanation offered by such company in relation to the source and nature of the amount so received is not satisfactory in the opinion of the tax officer. This is effective from 1 April 2013.

Domestic transfer pricing

Transfer pricing provisions also apply to specified domestic transactions effective from 1 April 2012, whereby any allowance or expenditure or interest on allocation of any cost or expense or any income in relation to any specified domestic transaction shall be computed having regard to the arm's-length price. The domestic transfer pricing provisions will apply only where the aggregate of the transactions in the previous year exceeds a sum of INR 50 million.

Advance pricing agreement (APA)

The provisions relating to APAs are introduced with effect from 1 July 2012.

The Central Board of Direct Taxes (CBDT), with the approval of the Central Government, can enter into agreement with any assessee for determining the arm's-length price or prescribe methods, adjustments, or variations to the arm's-length price that will be valid for a maximum period of five years. The agreement will be binding (in relation to that transaction) on the assessee, the Commissioner, and the income-tax authorities subordinate to the Commissioner, except where there is a change in law or facts. The CBDT may, with the approval of the Central Government, declare an agreement to be void *ab initio* if it finds that the agreement has been obtained by fraud or misrepresentation of facts.

Taxes on corporate income

A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India.

The corporate income tax (CIT) rate applicable to an Indian company for the tax year 2012/13 is 30% (plus surcharge, education cess, and secondary and higher education cess). Resident companies are liable to pay surcharge at the rate of 5% on the amount of CIT if the total income exceeds INR 10 million.

Foreign companies operating in India are taxed at 40% (plus surcharge, education cess, and secondary and higher education cess). For tax year 2012/13, surcharge for foreign companies is 2%.

The education cess is 2%, and the secondary and higher education cess is 1%.

Minimum alternative tax (MAT)

Resident companies are liable to pay MAT on their adjusted book profits (not on income from life insurance business) where the tax liability for the year is less than 20.01% of the adjusted book profits for the tax year 2012/13 (19.93% for assessment year 2012/13). In such cases, the tax liability is fixed at 20.01% of the adjusted book profits of the company.

Non-resident companies are liable to pay MAT on their adjusted book profits from India-sourced income where the tax liability for the year is less than 19.44% of the adjusted book profits from India-sourced income for tax year 2012/13 (18.91% for assessment year 2012/13). In such cases, the tax liability is fixed at 19.44% of the adjusted book profits of the company from India-sourced income.

Surcharge is payable only where total taxable income exceeds INR 10 million.

Sick companies (loss companies which have made losses continuously and may or may not be revived to making profits) are not subject to MAT.

From tax year 2010/11, companies are allowed to take the benefit of carrying forward the credit of tax paid under MAT for ten years.

A Special Economic Zone (SEZ) developer and a unit in an SEZ are now liable to pay MAT by virtue of amendment in section 115JB by the Finance Act, 2011 with effect from tax year 2011/12.

Tonnage tax scheme

The tonnage tax scheme can be elected by an Indian company that has a place of effective management in India, owns at least one qualifying ship, and whose main object is to carry on the business of operating qualifying ships. The tonnage tax scheme is in place of CIT and is levied on the basis of tonnage of vessels owned, operated, or chartered by it instead of net income generated by commercial operations.

In relation to non-resident shipping companies that have regular/occasional shipping income, presumptive tax provisions are applicable. Under the tonnage tax scheme, deemed income shall be assessed at a rate of 7.5% of the amount paid or payable (whether in or out of India) for carriage of passengers, livestock, mail, or goods shipped at any port in India and the amount received or deemed to be received in India on

India

account of carriage of passengers, livestock, mail, or goods shipped at any port outside India shall be treated as profits and gains of the business or profession.

Tax rates applicable to a non-resident should take into consideration any treaty provisions.

Under a presumptive tax system, taxpayers can opt to be taxed on their income at a pre-designated tax rate.

A government company, or a public company, formed and registered in India with the main object of operating ships is eligible for a deduction not exceeding 50% of the profits to the extent that it is transferred to a special reserve created for the purpose, which is utilised in accordance with the provisions of the Act.

Direct taxes code

A new direct taxes code replacing the existing Income-tax Act, 1961 is proposed and is expected to be introduced with effect from 1 April 2013.

Corporate residence

A company is treated as a resident of India if:

- it is an Indian company or
- during the tax year, the control or management of its affairs is situated wholly in India.

A company that does not fulfil either of these conditions is treated as a non-resident.

A partnership firm or a limited liability partnership (LLP) is treated as a resident in India if any portion of its control and management is in India. A partnership firm or an LLP is a non-resident if its control and management is situated wholly outside India.

Permanent establishment (PE)

A PE is defined in India as a fixed place of business through which the business of an enterprise is wholly or partly carried on.

Other taxes

Value-added tax (VAT)/Central sales tax (CST)

The sale of movable goods in India is chargeable to tax at the central or state level. The Indian regulatory framework has granted power to state legislatures to levy tax on goods sold within that state. Such sales are, therefore, chargeable to VAT at the rates notified under the VAT laws of the relevant state. All goods sold in the course of interstate trade are subject to CST.

Where goods are bought and sold by registered dealers on an inter-state basis for trading or for use as inputs in the manufacture of other goods or specified activities (such as mining or telecommunication networks), the rate of sales tax is 2%, provided Form 'C' is issued by the purchasing dealer. In the absence of Form 'C', the applicable rate would be the rate of VAT on such goods in the originating state. Interstate procurement, on which CST is charged by the originating state, is not eligible for input tax credit in the destination state and hence is a cost to a buyer.

State level sales tax has been replaced by VAT in all the states. Under the VAT regime, the VAT paid on goods purchased within the state is eligible for VAT credit. The input VAT credit can be utilised against the VAT/CST payable on the sale of goods. It is, thus, ensured that the cascading effect of taxes is avoided and only the value addition is taxed.

Currently, there is no VAT on imports into India. Exports are zero-rated. This means that while exports are not charged to VAT, VAT charged on inputs purchased and used in the manufacture of export good or goods purchased for exports is available to the purchaser as a refund.

The state VAT is charged at tax rates of 1%, 4%, 5%, and 20%. Goods other than those notified to be covered under the above rates are charged in the range of 12.5% to 15%. The rate of VAT depends on the nature of goods involved and varies from state to state.

Turnover threshold is prescribed so as to exclude small traders from the ambit of the VAT. A tax under composition scheme, at a lower rate, may be levied on small traders, within a specified turnover limit, in lieu of VAT.

Customs duty

Customs duty is levied by the Central Government on the import of goods into, and export from, India. The rate of customs duty applicable to a product proposed to be imported or exported depends upon its classification under the Customs Tariff. With regard to exports from India, customs duty is levied only on a very limited list of goods.

The Customs Tariff is aligned with the internationally recognised Harmonised System of Nomenclature (HSN) provided by the World Customs Organization.

Customs duty is levied on the transaction value of the imported or exported goods. According to Section 14 of The Customs Act, 1962 (CA), the concept of transaction value is the sole basis for valuation for the purposes of import and export of goods. While the general principles adopted for valuation of goods in India are in conformity with the World Trade Organization (WTO) agreement on customs valuation, the Central Government has notified independent Customs Valuation Rules applicable to export and import of goods.

India does not have one uniform element of customs duty, and the customs duty applicable to any product is composed of a number of components. The types of customs duty applicable are as follows:

- The Basic Customs Duty (BCD) is the basic component of customs duty levied at the effective rate notified under the First Schedule to the Customs Tariff Act (CTA) and applied to the landed value of the goods (i.e. the cost, insurance, and freight [CIF] value of the goods plus landing charges at 1%). Typically, the rate of BCD is 10%.
- The additional customs duty in lieu of excise duty (CVD) is equivalent to, and is charged in lieu of, the excise duty applicable on like goods manufactured or produced in India. CVD is calculated on the sum of landed value of the goods and the applicable BCD. However, the CVD on specific consumer goods intended for retail sale in India is calculated on the basis of the maximum retail price (MRP) less specified abatement printed on their packs. The general rate of excise duty is currently 12%, and, consequently the rate of CVD is also 12%. In addition, education cess at 2% and secondary and higher education cess at 1% are also levied on the CVD.

India

- Education cess at 2% and secondary and higher education cess at 1% are also levied on the aggregate of the custom duties (except in cases of safeguard duty, countervailing duty, and anti-dumping duty).
- Additional duty of customs (ADC) to countervail state taxes and VAT of 4% is charged in addition to the above duties on imports, subject to exceptions. ADC is calculated on the aggregate of the assessable value of the imported goods, the total customs duties (i.e. BCD and CVD) and the applicable education cess and secondary and higher education cess.

BCD, education cess, and secondary and higher education cess levied on the aggregate of duties of customs are a cost of any import transaction. The duty incidence arising on account of all other components may be set off or refunded subject to prescribed conditions. Where goods are imported for purposes of manufacture, the Indian manufacturer may take a credit of the CVD and ADC paid at the time of import for offset against the output excise duty. In the case of service providers, the credit of only the CVD is available. Similarly, the Central Government provides exemption from payment of ADC on import of certain specified goods. The Central Government also has prescribed a refund mechanism in relation to ADC paid on goods imported for the purpose of trading in India, subject to fulfilment of the conditions prescribed under the governing notifications and circulars issued in this regard.

CENVAT (Excise duty)

Central Value Added Tax (CENVAT) is an excise duty levied by the Central Government on the manufacture or production of movable and marketable goods in India.

The rate at which excise duty is leviable on the goods depends on the classification of the goods under the Excise Tariff. The Excise Tariff is primarily based on the eight digit HSN classification adopted so as to achieve conformity with the Customs Tariff.

The excise duty on most consumer goods, which are intended for retail sale, is chargeable on the basis of the MRP printed on the package of the goods. However, abatements are admissible at rates ranging from 15% to 55% of the MRP. Goods, other than those covered by MRP based assessments, are generally chargeable to duty on the 'transaction value' of the goods sold to an independent buyer. In addition, the Central Government has the power to fix tariff values for charging *ad valorem* duties on the goods.

Typically, the duty rate is 12%. However, notifications granting partial or complete exemption for specified goods from payment of excise duties are also available. Education cess at 2% and secondary and higher education cess at 1% are applicable on the aggregate of excise duties. Thus, the effective rate of excise duty is 12.36%.

The central excise duty is a modified VAT wherein a manufacturer is allowed credit of the excise duty paid on locally sourced goods and the CVD and ADC paid on imported goods. The CENVAT credit can be utilised for payment of excise duty on the clearance of dutiable final products manufactured in India. Manufacturers of dutiable final products are also eligible to avail CENVAT credit of the service taxes paid on input services used in or in relation to the manufacture of final products and clearances of final products from the place of removal, subject to fulfilment of conditions.

Service tax

Service tax is levied on specified taxable services. At present, over 100 services are classified as taxable services. The existing rate of service tax is 12%. In addition, an education cess of 2% and secondary and higher education cess of 1% of the service

tax have also been levied on taxable services. Thus, the effective rate of service tax is 12.36%. There is no service tax on the services which qualify as exports, subject to fulfilment of prescribed conditions.

The onus of payment of service tax lies with the provider of services. However, in the case of specified services, such as transport of goods by road, sponsorship services, and import of services, the service tax liability rests with the recipient of the services as against the service provider.

In light of the integration of goods and services tax, a service provider can avail CENVAT credit of excise duties paid on capital goods and inputs used for providing output services, apart from availing CENVAT credit of the service taxes paid on input services, subject to fulfilment of conditions.

Taxable services provided by service providers located outside India to a recipient in India are subject to service tax. Where the taxable services are provided from outside India and received in India, the service recipient is required to become registered and to pay the tax in accordance with the relevant provisions of law.

Further, the Central Government has introduced the Point of Taxation Rules, 2011 which envisages the point in time when a service shall be deemed to have been provided, thereby creating a deeming fiction for imposing the tax even prior to receipt of consideration for the services rendered. These rules prescribe accounting for services tax on an accrual basis as compared to the earlier cash basis system.

Further, the Central Government has proposed to introduce a negative list-based taxation system, which is to be implemented from a date to be notified after the Finance Bill, 2012 is enacted. Pursuant to it, service tax will be levied on all services provided or agreed to be provided in a taxable territory, except the following:

- Services in the negative list.
- Services specifically exempted by notification.

In this regard, the draft Place of Provision of Services Rules, 2012 have also been tabled for public comments.

Advance ruling for customs, excise, and service tax

In order to enable foreign investors to ascertain their indirect tax liabilities arising from proposed business ventures in India, the Central Government has constituted the Authority for Advance Rulings (AAR) as a high level quasi-judicial body. The functions of the AAR comprise of giving advance rulings on a specific set of facts relating to specified matters under customs, central excise, and service tax.

Advance rulings may be sought by any non-resident investor entering into a joint venture in India in collaboration with another non-resident, or a resident of India, or a resident setting up a joint venture in India in collaboration with a non-resident. Through the Finance Act 2005, this facility has also been made available to an existing joint venture in India. The Central Government is also empowered to notify any other class or category of persons as eligible for availing the benefit of an advance ruling.

Dividend distribution tax (DDT)

Indian companies distributing or declaring dividends are liable to pay DDT at 15% (plus surcharge, education cess, and secondary and higher education cess). This tax

India

is payable on declaration, distribution, or payment, whichever is earlier, and it is in addition to the CIT payable on business profits.

SEZ developers and units in a SEZ are liable to pay DDT at 15% (plus applicable surcharge, education cess, and secondary and higher education cess) with effect from 1 June 2011.

As of tax year 2011/2012, a holding company does not have to pay DDT on dividends paid to its shareholders to the extent that it has received dividends from its subsidiary company on which DDT has been paid by the subsidiary. However, the benefit will not be available if the holding company is itself a subsidiary of another company which has a shareholding of more than 50%. The restriction in relation to the holding company not being a subsidiary of any other company has been withdrawn from 1 July 2012, to remove the cascading effect of DDT becoming payable in a multi-tier corporate structure.

Securities transaction tax (STT)

STT is levied at 0.1% (0.25% up to 1 July 2012) and is applicable to transactions involving the purchase or sale of equity shares, derivatives, units of equity-oriented funds through a recognised stock exchange, or the sale of a unit of an equity-oriented fund to any mutual fund. STT paid is eligible to be claimed as a tax-deductible expenditure when computing the tax on income from the sale of securities.

Wealth tax

All companies are liable to pay wealth tax assessed at 1% of the value of specified net assets, if the value of net wealth exceeds INR 3 million. Valuation of assets is in terms of specific rules notified by the government.

Entry tax/Octroi duty

'Entry tax' is a tax on entry of specified goods into the state from outside the state for use, consumption, or sale therein. Entry tax continues to exist under the VAT regime; however, in most states, it has been made VAT-able and can be offset against the output VAT liability in the state. The only exception is where entry taxes have been imposed in lieu of Octroi for which no offset is allowed, and hence it is a cost. It is levied on the purchase value, which is defined to mean the amount of the valuable consideration paid or payable by a person for the purchase of any goods. The value of the specified goods can be ascertained from the original invoice for purchase of such goods. Typically, the rate of entry ranges from 0.5% to 15%, depending upon the respective state.

Further, it is important to note that the levy of entry tax has been considered as unconstitutional by the High Courts of a few of the states. The state governments have filed petitions before the Supreme Court to challenge the decision of the High Courts, and at present, the matter is pending for final adjudication before the Supreme Court.

Octroi is a municipal levy which is levied at the time of entry of specified goods into the limits of the relevant municipal corporation. Thus, Octroi is leviable, if there is movement of goods from one city to another in the same state, in the event the cities fall under the jurisdiction of two different municipal corporations.

Goods and services tax (GST)

The Central Government took a major step towards the transition to a national integrated GST in 2006. In this regard, a Joint Working Group (JWG) was constituted by the Empowered Committee (EC) to study global GST models and identify suitable models for introduction in India. In 2007, the JWG recommended a dual GST model

for India which was subsequently studied and approved by the EC and the Ministry of Finance.

The EC released the First Discussion Paper on the proposed GST in India on 10 November 2009. In the discussion paper, the government indicated that GST shall have two components. One levied by the Centre (Central GST or CGST) and the other levied by the states (State GST or SGST). The CGST and the SGST would be applicable on all transactions of goods and services made for a consideration except for exempted goods and services, goods which are outside the purview of GST, and transactions which are below the prescribed threshold limits. The exact date of implementation of GST is not yet decided. Details of taxes which would be subsumed in the dual GST are as follows.

The following taxes will be subsumed in the CGST:

- Excise duty.
- CVD/ADC.
- Service tax.

The following taxes will be subsumed in the SGST:

- VAT.
- Entertainment tax.
- Luxury tax.
- Lottery taxes.
- State cesses and surcharges.
- Entry tax not in lieu of octroi.

It is likely that CST will be phased out in the GST regime.

The input tax credit (ITC) for the CGST and SGST would operate in parallel and would be available for utilisation only against the output payment of CGST and SGST. Both CGST and SGST will be levied on import of goods and services into the country. The incidence of tax will follow the destination principle. Full and complete offset will be available on the GST paid on import of goods and services.

The Union Finance Minister (FM) met the EC on 21 July 2010, and the key highlight of the meeting was a single rate structure with unification of the rate for goods and services proposed to be achieved in a phased manner as below:

	Year one (%)	Year two (%)	Year three (%)
Goods			
Standard rate	10	9	8
Lower rate	6	6	8
Services	8	8	8

The FM has requested that the states adopt similar rates for the SGST.

In the Budget speech, while the FM did not indicate a specific deadline by which the GST would be introduced, he mentioned that there has been considerable progress in the last four years and that the areas of divergence of opinion with the states have been narrowed. He also said that work is underway on drafting of the model legislation for the Central and State GST. Various amendments in the Central Excise, Customs

India

and Service tax law, which include withdrawal of certain exemptions, retaining the present tax/duty rates and structure were done to align the present tax/duty structures consistent with the intended GST rates.

Branch income

Branches of foreign companies are taxed on income that is received in India, or which accrues or arises in India, at the rates applicable to foreign companies. There is no WHT on remittance of profits to the company's head office.

Income determination

Inventory valuation

Inventories are generally valued at cost or net realisable value, whichever is lower. Generally, there is conformity between book and tax reporting. The first in first out (FIFO) and average cost methods are acceptable, provided that they are consistently applied.

Capital gains

Capital gains refer to the gains made on the transfer of a capital asset, including extinguishment of the rights in an asset. Capital assets are classified into short-term capital assets and long-term capital assets. Long-term capital gains are eligible for concessional rate of tax.

Short-term capital assets are capital assets held for a period of less than 36 months. In the case of shares, listed securities, or units of specified mutual funds or zero-coupon bonds, the short-term holding period is less than 12 months. Capital assets that do not qualify as short-term capital assets are considered as long-term capital assets.

Normally, long-term capital gains are determined after increasing the cost by prescribed inflation factors. In the case of foreign companies, capital gains on the transfer of shares or debentures in Indian companies are computed in the foreign currency in which the shares or debentures were acquired, and the capital gains are reconverted into Indian currency.

Capital gains are taxed as follows:

- Long-term capital gains on the transfer of shares in a company, or units of an equity-oriented fund, which are subject to STT are exempt from taxation. However, such gains are taxable under MAT provisions.
- Other long-term capital gains are subject to taxation at 20% (plus the surcharge, education cess, and secondary and higher secondary education cess). However, long-term capital gains arising from the transfer of listed securities, units, or zero-coupon bonds are taxed at 10% (without adjusting the cost for inflation) or at 20% (after adjusting the cost for inflation), whichever is more beneficial to the taxpayer. These rates exclude surcharge, education cess, and secondary and higher education cess.
- Long-term capital gains arising to a non-resident (not being a company) or a foreign company from transfer of unlisted securities, shares, debentures, etc. Are taxable at 10% without any indexation benefit.

- Short-term capital gains on the transfer of shares in a company or units of an equity-oriented fund which are subject to STT are taxed at 15% (plus the surcharge, education cess, and secondary and higher education cess).
- Other short-term capital gains are subject to taxation at the normal corporate rates applicable to a company.

In the case of certain overseas financial organisations (e.g. off-shore funds and foreign institutional investors), long-term capital gains arising on the transfer of units purchased in foreign currency are taxable at 10% (plus the surcharge, education cess, and secondary and higher education cess) on the gross amount.

Long-term capital gains earned by non-residents on the transfer of bonds relating to Indian companies (issued abroad in accordance with government guidelines or approved schemes and acquired in foreign currency) are taxable at 10% (plus surcharge, education cess, and secondary and higher education cess) on the gross amount of gains.

The rules of carryforward and offset of loss for capital gains are as follows:

- Capital losses arising from the transfer of a short-term capital asset can be offset against capital gains arising from any other asset. However, capital losses arising from the transfer of a long-term capital asset can be offset only against capital gains arising from the transfer of any other long-term capital asset.
- Capital losses that cannot be offset can be carried forward and offset against the future capital gains. Losses can be carried forward for offset for a period of eight years after the year of loss.
- Gains and losses arising on the sale of depreciable assets are classified as short-term capital gains or losses, and the gains are taxed at the same rate as business income.

The transfer of unlisted (not tradable and not listed on any stock exchanges) shares of a company to a firm or a company without consideration or for inadequate consideration is taxable as income in the hands of the recipient firm or company.

Taxability of shares issued at premium in excess of fair market value of shares

Where a closely held company (other than a venture capital undertaking receiving from a venture capital fund/company or from any other notified person to be notified by the Central Government) issues shares at premium to a resident for an amount in excess of the fair market value of the shares, then the excess will be deemed to be the income of the company. This is effective from 1 April 2013.

Share premium in excess of fair market value to be treated as income

Any amount received towards share application money, share premium, or share capital by any closely held company will be considered as income, if the explanation offered by such company in relation to the source and nature of the amount so received is not satisfactory in the opinion of the tax officer. This is effective from 1 April 2013.

Dividend income

Dividend income received from Indian companies is not taxable in the hands of all the shareholders. This applies to resident as well as non-resident shareholders.

Income received by overseas financial organisations (offshore funds) from units of specified mutual funds, or from the Unit Trust of India, that is purchased in foreign currency, as well as interest received by non-residents on bonds issued abroad by

India

Indian companies following in terms of government guidelines and acquired in foreign currency, are taxable at 10% on the gross amount of income. Dividends (other than those received from Indian companies) and interest earned by foreign financial institutions from investment in the Indian capital market are taxable at 20% on the gross amount.

Income received from units of specified mutual funds is not taxable in the hands of the recipient. The distributing mutual fund is liable to pay a distribution tax of 25% or 30% (plus surcharge, education cess, and secondary and higher education cess). The above tax is not chargeable in respect of income distributed by an equity oriented fund in respect of distribution under such scheme.

Stock dividends (bonus shares) distributed are not taxed at the time of receipt in the hands of the recipient shareholders, but capital gains provisions are applicable to the sale of these stock dividends.

Interest income

Interest income received by a resident company is taxable at normal CIT rates.

Interest income received by a non-resident company is taxed at a concessional rate of withholding at 20%, subject to conditions.

Partnership/LLP income

A partnership firm and an LLP are taxed as a separate legal entity. The share of income of partners from a partnership firm or an LLP is exempt from tax. The partnership and LLP is taxed at the rate of 30% (plus education cess and secondary and higher education cess).

The interest payment to the partner on the capital or current account is allowed as a tax deductible expenditure; however, the maximum interest allowable for tax purposes is 12% per annum. A working partner can be paid salary, bonus, commission, or remuneration. The maximum permissible deduction in respect of remuneration payable collectively to all working partners would be based on the book profit at a specified percentage for different quantum slabs of the book profit.

Unrealised exchange gains/losses

There are no specific rules under the tax law for determining the nature of unrealised foreign exchange gains or losses. However, there are various judicial precedents available which lay down certain principles for classification of foreign exchange gains or losses.

- Profit/loss is considered to be trading profit/loss if foreign currency is held on revenue account or as trading assets or as a part of circulating capital invested in the business.
- Profit/loss is considered to be of a capital nature if a foreign currency loan is taken for capital asset or fixed asset.

Foreign income

A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India. This income is subject to any favourable tax treaty provisions.

Double taxation of foreign income for residents is avoided through treaties that generally provide for the deduction of the lower of foreign tax, or Indian tax, on the doubly taxed income from tax payable in India. Similar relief is allowed unilaterally

where no treaty exists, in which case a resident would be taxed at the rate which would be the lower of the Indian tax rates or the rate of the other country in which income is already taxed.

Deductions

Expenditures that are revenue in nature are allowed as a deduction if they are:

- incurred wholly and exclusively for the purpose of the business
- not in the nature of a personal expense, and
- not in the nature of a capital expense.

Depreciation

Depreciable assets are grouped in blocks, and each block is eligible for depreciation at a prescribed rate (usually 15% to 100% for machinery, 5% to 100% for buildings, 10% for furniture, 15% for windmills [80% up to 31 March 2012], and 25% for intangible assets) on the opening value (net of depreciation charged in preceding years), plus cost of acquisition, less deletions, during the year. A deletion is the reduction by way of sale, discarding, demolition, or destruction of the assets and the amount realised is reduced.

Depreciation is restricted to 50% of the prescribed rate if the asset acquired is used for less than 180 days during the year of acquisition. If money receivable on the transfer exceeds the opening written-down value plus acquisitions of the block concerned, the excess is taxed as a short-term capital gain at the same tax rates as that applicable to business income.

Additional depreciation of 20% on the cost of new plant and machinery (other than ships or aircrafts) is allowable in the year of commissioning for manufacture. This benefit is extended to power generating and distributing business. Power-generating or power-distributing companies have the option either to apply the reducing balance method provided under the normal schedule or to charge depreciation on a straight-line basis. The straight-line rates are aligned to the power companies' book depreciation rates.

Know-how, patents, licences, franchises, and similar intangible assets form part of the block of depreciable assets, provided that they are owned and put to use in the course of their business and are eligible for depreciation at the prescribed rate, which is 25%.

Tax depreciation is not required to conform to book depreciation.

Start-up expenses

Certain expenses are incurred by taxpayers either before the start-up of a business or after start-up of business, in connection with extension of the industrial undertaking, or in connection with setting-up a new unit. One fifth of such expenditure is allowed as a deduction each year, over a period of five years.

Interest expenses

Any interest paid by an assessee (taxpayer) on capital borrowed for the purposes of their business or profession is a tax-deductible expense. If the capital is borrowed for acquiring a capital asset for the purpose of extension of an existing business or profession, then interest liability pertaining to the period, until the time the asset is put to use, cannot be allowed as a tax deductible expense and will have to be added back to the cost of such asset.

India

Bad debts

The amount of any bad debt, or part thereof, that has been written off as irrecoverable in the accounts of the assessee (taxpayer) for the year is allowed as a tax-deductible write-off.

Charitable contributions

Any charitable contribution made by a company to any charity is allowed as a tax deductible expense. This is subject to certain conditions. The tax deductibility ranges from 50% to 100% of the charitable contribution, depending upon the nature of charity. The tax deductibility of charitable contribution is restricted to 10% of the total taxable income.

Expenses allowable on actual payment basis

Certain expenses, such as, but not limited to, employees' provident fund dues (i.e. retirement benefit funds), bonus to employees, and interest payable to financial institutions and banks are allowed as tax deductible expenses only on actual payment.

Bribes, kickbacks, illegal payments

Expenditures incurred by a taxpayer that are illegal are not deemed to have been incurred for the purpose of the business or profession, and no deduction will be allowed.

Taxes

All taxes (tax, duty, cess, or fees by whatever name called) relating to business (other than income tax and wealth tax) incurred during the tax year are deductible in that year, provided they are paid by the following 30 September. Otherwise, they are deductible in the year of payment.

Net operating losses

Losses can be carried forward and offset against income from subsequent year(s) for periods set out in the following table:

Types of losses	Time limit
Unabsorbed depreciation	Perpetually
Other business losses (other than speculation business losses)	8 years
Speculation business losses	4 years
Capital losses	8 years

There are no provisions in India for carrying losses back.

Payments to foreign affiliates

Indian companies can claim deduction for payment of royalties, and for interest and fees for technical or management service provided by foreign affiliates, as long as they are not capital in nature, are incurred wholly and exclusively for the purpose of the business, and requisite tax is withheld from such payment. However, if the requisite tax is not withheld from such payment, or is not paid into the government treasury after withholding, a tax deduction of the payment is available in the year of payment of tax into the government treasury.

Group taxation

Group taxation is not permitted under the Indian tax law.

Transfer pricing

The Indian transfer pricing regulations stipulate that income arising from 'international transactions' between 'associated enterprises' should be computed at 'arm's-length price'. Furthermore, any allowance for expenses or interest arising from any international transaction is also to be determined at arm's-length price.

The expressions 'international transactions' and 'associated enterprises' have been defined in the Indian transfer pricing regulations. Various (presently five) methods for computation of arm's-length price have been specified under the Indian transfer pricing regulations, which are broadly in line with the Organisation for Economic Co-operation and Development (OECD) Guidelines, and taxpayers are required to adopt the most appropriate method. Taxpayers are also required to maintain a comprehensive set of prescribed information and documents relating to international transactions which are undertaken between associated enterprises, on an annual basis, within the prescribed timelines (due date of filing the income tax return). Further, taxpayers are required to obtain an Accountant's Report (in prescribed Form 3CEB) from an independent accountant certifying the nature and amount of international transactions. The certificate needs to be filed along with the Income-tax return. The burden of proving the arm's-length character of the transaction is primarily on the taxpayer.

The Indian transfer pricing regulations adopt an arithmetic mean of comparable prices as the arm's-length price, with a flexibility of the percentage that is notified by the Central Government as +/- 3% of the actual price with effect from FY 2012/13 (+/- 5% up to 31 March 2012).

Where the transfer pricing officer is of the opinion that the arm's-length price was not applied, the officer may re-compute the taxable income after giving the taxpayer an opportunity to be heard. Stringent penalties are prescribed in cases of failure to comply with the provisions of the Indian transfer pricing regulations.

To facilitate quick resolution of disputes, the CBDT has provided for an alternative dispute resolution mechanism and constituted a Dispute Resolution Panel (DRP) comprised of three Commissioners of Income Tax. In cases of foreign companies, the transfer pricing orders passed by the tax officer (TO) on or after 1 October 2009 and which are prejudicial to the taxpayer, the TO shall be required to issue a draft order to the taxpayer. The taxpayer can file objections against the draft order before the DRP. After considering all evidence or objections and further enquiries, the DRP is required to issue binding directions to the TO within a period of nine months. The TO is required to pass an order within one month, in conformity with the directions of the DRP. Orders passed by a TO on the basis of directions of the DRP are appealable directly before the Income Tax Appellate Tribunal (ITAT). The DRP is now empowered to enhance any assessment matter relating to any draft order where it is raised by the assessee or by the revenue.

In order to lessen the litigation under transfer pricing regulations, provisions empowering the issue of safe harbour rules are contained in the tax law which would be separately issued by the CBDT. The safe harbour rules are not yet issued. The rules would provide the circumstances under which the tax authorities would accept the transfer price as declared by the assessee.

India

Taxpayers enjoying a tax holiday in India are also required to comply with the Indian transfer pricing regulations.

Domestic transfer pricing

Transfer pricing provisions also apply to specified domestic transactions effective from 1 April 2012 whereby any allowance or expenditure or interest on allocation of any cost or expense or any income in relation to any specified domestic transaction shall be computed having regard to the arm's-length price.

Only those cases where the aggregate of such transactions entered into by the assessee in the previous year exceeds a sum of INR 50 million are covered.

Advance pricing agreement (APA)

The provisions relating to APAs are introduced with effect from 1 July 2012.

The CBDT, with the approval of the Central Government, can enter into agreement with any assessee for determining its arm's-length price or prescribe methods, adjustments, or variations to the arm's-length price that would be valid for a maximum period of five years. The agreement will be binding (in relation to that transaction) on the assessee, the Commissioner, and the income-tax authorities subordinate to the Commissioner, except where there is a change in law or facts. The CBDT may, with the approval of the Central Government, declare an agreement to be void *ab initio* if it finds that the agreement has been obtained by fraud or misrepresentation of facts.

Thin capitalisation

No prescribed debt-to-equity ratios or thin capitalisation rules exist under India taxation law.

Controlled foreign companies (CFCs)

India currently has no CFC rules, so there will be no India tax on foreign profits that remain unremitted from offshore subsidiaries.

Tax credits and incentives

Tax incentive provisions normally have conditions applicable for the period within which the preferred activity should be undertaken and the period for which the tax incentive is available. It may also be necessary to fulfil certain other conditions such as 'forming' of a 'new' undertaking.

Tax incentives for undertakings other than infrastructure development undertakings

New industrial undertakings located in specified 'backward' states and districts are entitled to full tax exemption of profits for the first three or five years of operation, followed by a partial tax exemption of 30% of profits for the next five years. The list of backward districts has been streamlined into category A and category B districts, depending upon the current level of infrastructure development in those areas. The initial tax holiday period is five years in the case of category A districts and three years in the case of category B districts. A similar incentive is also applicable for hotels satisfying prescribed conditions.

If certain conditions are met, a tax holiday is permitted on the profits of an undertaking engaged in any of the following:

- Integrated business of handling, storage, and transportation of food grains.
- Developing and building of housing project.
- Scientific research.
- Commercial production or refining of mineral oils.
- Setting up and operating a cold chain for agricultural produce.
- Processing, preservation, and packaging of fruits or vegetables.
- Operating and maintaining a hospital in a rural area.

The tax holiday periods range from five to ten years, and the percentage of the rebate is either 30%, 50%, or 100% in initial years and 30% in the later years. The number of years constituting 'initial' and 'later' years varies from sector to sector.

Tax incentives for infrastructure development undertakings

Enterprises engaged in the business of power generation, transmission, or distribution; developing or operating and maintaining a notified infrastructure facility, industrial park, or SEZ; making substantial renovation and modernisation of the existing network of transmission or distribution lines (between specified periods); or laying and operating a cross country natural gas distribution network are eligible to a tax exemption of 100% of profits for any ten consecutive years falling within the first 15 years of operation (20 years in the case of infrastructure projects, except for ports, airports, inland waterways, water supply projects, and navigational channels to the sea).

'Infrastructure facility' means roads, including toll roads, bridges, rail systems, highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems or solid waste management systems, ports, airports, inland waterways, inland ports, or navigational channels to the sea.

Tax incentives for exports

The export profits from a new industrial undertaking satisfying prescribed conditions established in a Free Trade Zone (FTZ), Software Technology Park (STP), or Electronic Hardware Technology Park (EHTP), or a 100% export-oriented undertaking (EOU) or a unit in a SEZ are exempt from income tax for ten years, commencing from the first year of manufacture. However, this exemption was available only if the manufacturing activity commenced before the end of the tax year 2010/11.

The export profits from a new industrial undertaking satisfying the prescribed conditions established in an SEZ is eligible for tax exemption of 100% of profits for the first five years, from the year of commencement of manufacturing, followed by a partial tax exemption of 50% of profits for the next five years. A further tax exemption of 50% of the profits for five years is also available after that, subject to an equal amount of profit being retained and transferred to a special reserve in the books of account.

Tax incentives for units in the North Eastern Region of India

Measures are in place to facilitate the development of the Indian North Eastern Region and of the state of Sikkim. Undertakings located in these states which (i) begin to manufacture or produce any eligible article, (ii) undertake substantial expansion, or (iii) commence an eligible business between 1 April 2007 and 1 April 2017 are eligible for a 100% deduction of profits for ten consecutive years.

A list of eligible businesses has been provided by the Indian government. The eligible businesses include hotels (not below two-star category), adventure and leisure sports including ropeways, the provision of medical and health services in nursing homes with a minimum capacity of 25 beds, operating a vocational training institute for hotel

India

management, catering and food crafts, entrepreneurship development, nursing and para-medical training, civil aviation related training, fashion design and industrial training, running information technology related training centre, manufacturing of information technology hardware, and bio-technology. Businesses other than the above listed eligible businesses are not entitled to claim the tax holiday.

Tax incentives for hotels/convention centres located in specified districts

A tax holiday of five years is provided to hotels (two, three, or four star) and convention centres located in the National Capital Territory of Delhi and the districts of Faridabad, Gurgaon, Gautam Budh Nagar, and Ghaziabad, provided the date of functioning of the hotel or completion of the construction of convention centre was started by 31 July 2010 (the earlier date was 31 March 2010). Hotels located in a specified district having a World Heritage Site, if such a hotel is constructed and has started functioning at any time during the period 1 April 2008 to 31 March 2013, are eligible for a tax holiday for a period of five years.

Tax incentives for certain income relating to offshore banking units and international financial services centre

A scheduled bank, or any bank incorporated by or under the laws of a country outside India, which has an offshore banking unit in an SEZ or an international financial services centre with a specified income which is subject to prescribed conditions, is eligible for a tax exemption of 100% of the specified income for five consecutive years beginning from the year in which the permission under the Indian Banking Regulation Act, 1949 was obtained and for 50% of the specified income for five consecutive years.

Tax incentive of capital expenditure on certain specified businesses

Capital expenditure is allowed at 100% in respect of the following specified businesses:

- Setting up and operating cold chain facilities.
- Setting up and operating warehousing facilities for storage of agriculture produce.
- Setting up and operating an inland container depot, freight station, or warehousing facility for storage of sugar and beekeeping and honey and beeswax produce.
- Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution, including storage facilities being an integral part of such a network.
- Building and operating a hotel of two-star or above category in India.
- Building and operating a hospital with at least 100 beds.
- Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government.
- Developing and building specified housing projects under an affordable scheme of the central/state government.
- Investment in a new plant or newly installed capacity in an existing plant for production of fertiliser.

In case of certain specified businesses (commencing operations on or after 1 April 2012), such as cold chain facility, warehousing for agriculture produce, hospital with at least 100 beds, notified affordable housing projects and production of fertilizer, the deduction is 150% of capital expenditure incurred on or after 1 April 2012.

The following characteristics and conditions may be noted:

- Any sum received or receivable in cash or in kind on transfer, etc. of the capital asset shall be considered as business income, if expenditure on such an asset has been allowed as a deduction under this section.
- Any loss computed in respect of the above specified businesses shall be allowed to be offset or carried forward and offset only against the profits and gains of specified businesses.
- The specified business should:
 - not be set up by splitting up or reconstruction of a business already in existence
 - not be set up by transfer of used machinery or plant exceeding 20% of the total value of the machinery or plant used in such business, and
 - have been approved by the prescribed authority (i.e. the government).

Research and development (R&D) expenditure

The weighted deduction available in respect of expenditure incurred on scientific research in an in-house R&D facility approved by the prescribed authority has been increased from 150% to 200% for companies engaged in specified businesses.

A payment made to an approved research association undertaking research in social science or statistical research or to an Indian company to be used by it for scientific research is now eligible for a weighted deduction of 125% of the payment made.

Contributions made to the National Laboratory, approved scientific research associations, universities, and the Indian Institute of Technology are now 200% deductible instead of 175% deductible.

I

Withholding taxes

There is an obligation on the payer (either resident or non-resident) of income to deduct tax at source (i.e. withhold tax) when certain specified payments are credited and/or paid. Some of the expenses which require tax withholding are as follows.

Payments by resident companies

Nature of payment	Payment threshold for WHT (INR) (1)	WHT rate (%)
Specified type of interest	None	10
Non-specified type of interest	5,000 (2)	20
Professional or technical service	30,000	10
Commission and brokerage	5,000	10
Rent of plant, machinery, or equipment	180,000	2
Rent of land, building, or furniture	180,000	10
Contractual payment (except for individual/Hindu undivided family [HUF])	30,000 (single payment) 75,000 (aggregate payment)	2
Contractual payment to individual/HUF	30,000 (single payment) 75,000 (aggregate payment)	1
Royalty or fees for technical services	30,000	10

Notes

1. Payments have different threshold limits. The payer is only required to withhold tax if the payment is above the limit.
2. The threshold limit for WHT for non-specified type of interest is INR 5,000 except in the case of interest received from a bank, co-operative society, or deposit with post office, for which it is INR 10,000.

India

If the Permanent Account Number (PAN) of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Act, the rates in force, or the rate of 20%, whichever is higher.

It is clarified by the Budget 2012, with retrospective effect from 1 June 1976, that the definition of 'royalty' will also include consideration for use or right to use of computer software. It is also clarified that transfer of all or any rights in respect of any right, property, or information includes transfer of all or any right to use computer software (including granting of a licence), irrespective of the medium through which such a right is transferred. Hence, while applying WHT on such payments in the nature of royalty, one will need to consider the amended definition.

Payment to non-resident companies

Nature of payment	WHT rate (%)
Dividend	0
Interest on foreign currency	10
Interest on moneys borrowed in foreign currency under a loan agreement or by way of long-term infrastructure bonds	5
Royalty and technical fees	10
Long-term capital gains other than exempt income	20
Income by way of winning from horse races	30
Other income	40

Notes

- Percentage to be increased by a surcharge, education cess, and secondary and higher education cess to compute the effective rate of tax withholding.
- Income from units of specified mutual funds is exempt from tax in the hands of the unit-holders.
- Dividends received from Indian companies are tax-free in the hands of the shareholder.
- Short-term capital gains on transfer of shares of a company or units of an equity oriented fund would be taxable at 15%, if they have been subjected to STT.
- Long-term capital gains on transfer of shares (through stock exchange) in listed companies or units of an equity oriented fund are exempt from tax if they have been subjected to STT.
- There is no threshold applicable for payment to non-residents companies up to which no tax is required to be withheld.
- If the PAN of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Act, the rates in force, or the rate of 20%, whichever is higher.

Treaty rates

Some tax treaties provide for lower WHT rates from certain types of income, as follows:

Recipient	WHT (%)			
	Dividend (1)	Interest	Royalty (12)	Fee for technical services (12)
Albania				Treaty yet to be notified
Armenia	10	10	10	10
Australia	15	15	10/15 (2)	10/15
Austria	10	10	10	10
Bangladesh	10 (3)/15	10	10	N/A (5)
Belarus	10 (9)/15	10	15	15
Belgium	15	10 (11)/15	10	10
Botswana	7.5 (9)/10	10	10	10
Brazil	15	15	25 (15)/15	N/A (5)

Recipient	WHT (%)			Fee for technical services (12)
	Dividend (1)	Interest	Royalty (12)	
Bulgaria	15	15	15 (7)/20	20

Notes

- The treaty tax rates on dividends are not relevant since under the current Indian tax legislation, most dividend income from Indian companies which is subject to DDT is exempt from income tax in the hands of the recipient.
- 10% for equipment rental and ancillary services:
 - for other cases in the first five years: 15% if government or specified organisation is the payer and 20% for other payers.
 - for subsequent years: 15% in all cases (income of government organisations is exempt from taxation in the country of source).
- If at least 10% of capital is owned by the beneficial owner (company) of the company paying the dividend or interest.

4. If at least 20% of capital is owned by the beneficial owner (company) of the company paying dividend or interest.
5. In absence of specific provision, it may be treated as business profits or independent personal services under respective treaties, whichever is applicable.
6. The 'most favoured nation' clause is applicable. The protocol to the treaty limits the scope and rate of taxation to that specified in similar articles in treaties signed by India with an OECD or another country.
7. If royalty relates to copyrights of literary, artistic, or scientific work.
8. If the company paying the dividend is engaged in an industrial undertaking.
9. If at least 25% of capital is owned by the beneficial owner (company) of the company paying the dividend
10. If at least 25% of capital is owned by the company during at least six months before date of payment.
11. If paid on a loan granted by a bank/financial institution.
12. The tax rate for royalties and fees for technical services, under the domestic tax laws, is 10%. This rate is to be increased by a surcharge at 2.5% on the income tax and education cess at 2% and secondary and higher secondary education cess at 1% on the income tax including surcharge. As a consequence, the effective tax rate is 10.558%. This rate applies for payments made under an agreement entered into on or after 1 June 2005. Accordingly, a tax resident can either use the Treaty rate or domestic tax rate, whichever is more beneficial.
13. If interest is received by a financial institution.
14. Taxable in the country of source as per domestic tax rates.
15. If royalty payments arise from the use or right to use trademarks.

List of limited agreements between India and other countries

A list of the countries with which India has entered into limited agreements for double taxation relief with respect to income of airlines/merchant shipping, is given here.

Country	Government Notification Reference
Afghanistan	GSR 514(E), dated 30.09.1975
Bulgaria	GSR 184(E), dated 15.04.1977

Yemen Arab Republic	GSR 2(E), dated 01.12.1987

Tax administration

Taxable period

For India, the tax year ends on 31 March.

Tax returns

Accounts for tax purposes must be made up to 31 March. The electronic return of income is required to be filed by 30 September of the succeeding tax year.

India

Quarterly withholding tax returns

Quarterly statement of taxes withheld are to be filed electronically with the tax authorities on or before 15 July, 15 October, and 15 January for the first three calendar quarters of the tax year and on or before 15 May following the last calendar quarter of the tax year.

Obligation to submit tax return for assets located outside India

A resident taxpayer having any asset (including financial interest in any entity) located outside India or signing authority in any account located outside India is mandatorily required to furnish a tax return. This is effective from 1 April 2011.

In cases where taxpayers have assets outside India, the extant time limits of four and six years for reopening tax assessment (where income has escaped assessment) has been increased to 16 years. In case of a person who is treated as an agent of a non-resident, the time limit for issuing reassessment notice has been extended from two years to six years.

General Anti Avoidance Rule (GAAR)

GAAR provisions were introduced by the 2012 Budget empowering the tax department to declare an 'arrangement' entered into by an assessee to be an 'impermissible avoidance agreement' (IAA). The resulting consequence could be denial of tax benefit either under the provisions of the Act or under the double taxation avoidance agreement (DTAA). Any step in or part of any arrangement can also be declared as an IAA.

An IAA is defined as an arrangement whose main purpose or one of whose main purposes is to obtain a 'tax benefit'. For a transaction to be declared as an IAA, at least one of the following conditions should be satisfied:

- The arrangement creates rights and obligations that are not normally between arm's-length parties.
- It results directly or indirectly in any misuse or abuse of the provisions of the Act.
- It lacks commercial substance.
- The means or manner employed is not ordinary for *bona fide* purposes.

Any arrangement is deemed to lack commercial substance if the substance or effect of the arrangement is inconsistent with the form of its individual steps or parts. The arrangement is deemed to lack commercial substance *inter alia* under the following situations as well:

- It involves round-trip financing.
- It involves an accommodating party.
- It involves elements that set off or cancel each other.
- It involves transaction conducted through one or more persons such that its value, location, source, ownership, or control of funds is disguised.

Once an agreement is declared as an IAA, the consequence could be denial of tax benefit either under the provisions of the Act or under the DTAA. Such a denial could be in any manner, including disregarding, combining, or recharacterising a step, disregarding or treating an accommodating party or any other party as one person, piercing a corporate veil, treating equity as debt, treating capital as revenue and vice-versa, etc.

To take forward the GAAR provisions, the government will be issuing guidelines for proper implementation of GAAR. The guidelines are expected to be released by the end of September 2012. Readers are advised to check the Worldwide Tax Summaries website at www.pwc.com/taxsummaries at that time for this and any other significant developments on GAAR.

Payment of tax

Tax is payable in advance (if tax for the year exceeds INR 10,000) in specified instalments for every quarter, before the 15th day of the succeeding month, during the tax year (April to March) in respect of the income of the tax year ending 31 March. Any balance of tax due on the basis of the return must be paid on a self-assessment basis before the return is filed.

Audit for income tax purposes

Persons carrying on business are required to get their books of account audited for income tax purposes where the turnover is INR 10 million (INR 6 million until 31 March 2012). For persons carrying on a profession, the turnover threshold is INR 2.5 million. The penalty for non-compliance with this audit requirement is INR 0.15 million, subject to 1% of total turnover/gross receipts.

Permanent account number (PAN)

The government/CBDT has released a new PAN form (Form No. 49AA) for persons who are not citizens of India and for LLPs, companies, firms, associations of persons (AOPs), and bodies of individuals (BOIs) formed or registered outside India.

Other issues**Mergers and acquisitions**

The expression 'merger' has not been defined in the Act but has been covered as part of the definition of the term 'amalgamation'. Amalgamation is defined as a merger of one or more companies with another, or the merger of two or more companies to form a new company, in such a way that all the assets and liabilities of the amalgamating company or companies become the assets and liabilities of the amalgamated company, and held by the amalgamated company for a mining period of five years, and shareholders holding not less than 75% in value of the shares in the amalgamating company or companies become shareholders of the amalgamated company.

Capital gains

No capital gains tax is levied on the transfer of capital assets by an amalgamating company to the amalgamated company, provided the amalgamated company is an Indian company. Similar is the position in case of a demerger by a demerged company to a resulting company.

In cases where shares of an Indian company are transferred by a foreign company or a demerged foreign company to any another foreign company or resulting foreign company, there is no tax payable, provided it satisfies certain specified conditions. Furthermore, the shareholder of the amalgamating company or demerged company is not liable to pay capital gains tax on the exchange of shares with that of amalgamating company or the resulting company under the scheme of amalgamation.

India

Carryforward of accumulated losses of amalgamating company

The losses and unabsorbed depreciation of the amalgamating company are deemed to be those of the amalgamated company in the year in which the amalgamation takes place, provided it satisfies certain specified conditions.

In the case of amalgamation of a company owning an industrial undertaking, the amalgamated company shall achieve the level of production of at least 50% of the installed capacity of the undertaking before the end of the four years from the date of amalgamation and continue to maintain the minimum level of production till the end of five years from the date of amalgamation. If the above conditions are violated, the benefit claimed will be taxed in the hands of the amalgamated company in the year of default.

In case of demerger of a company, the accumulated losses or unabsorbed depreciation of the demerged company directly relatable to the undertaking or the division transferred is allowed to be carried forward and offset in the hands of the resulting company.

Amalgamation or demerger of co-operative banks

An amalgamated or resulting co-operative bank is eligible for offset and carryforward of the unabsorbed losses or accumulated depreciation of the amalgamating or demerged cooperative bank subject to fulfilment of certain conditions.

The following transactions are not liable for capital gains tax and are tax neutral:

- The transfer of a capital asset in business reorganisation by a predecessor co-operative bank to a successor co-operative bank.
- The transfer by a shareholder, in a business reorganisation of capital assets, of a share or shares held, in the predecessor co-operative bank, if the transfer is made as part of an allotment to the predecessor of any share or shares in the successor co-operative bank.

Significant developments

Several notable regulations have been issued in the past year that provides tax facilities and clearer guidance on tax administration and relevant value-added tax (VAT) matters.

A Minister of Finance (MoF) regulation regarding a corporate income tax (CIT) holiday for certain pioneer industries was released in August 2011. It was followed by implementing regulations issued at the end of November 2011 by the heads of two government bodies designated as the gateway for the tax holiday application (i.e. the Minister of Industry and the Chairman of the Investment Coordinating Board [*Badan Koordinasi Penanaman Modal* or BKPM]). The latest government regulation pertained to the Income Tax Facilities, including Investment Allowance, and was issued in December 2011 (*see the Tax credits and incentives section for more information*).

On the transfer pricing front, despite the continued focus of the Indonesian Tax Office (ITO) in its ongoing audits, a government regulation, which came into effect on 1 January 2012, provides flexibility for taxpayers to apply for a Mutual Agreement Procedure (MAP) and to continue local dispute resolution at the same time (*see Transfer pricing in the Group taxation section*).

Taxes on corporate income

Taxable business profits are calculated on the basis of normal accounting principles as modified by certain tax adjustments. Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain taxable business profits. A timing difference may arise if an expenditure recorded as an expense for accounting, cannot be immediately claimed as a deduction for tax (*see the Deductions section*).

Resident corporations are taxed based on worldwide income. A foreign company carrying out business activities through a permanent establishment (PE) in Indonesia will generally be required to assume the same tax obligations as a resident taxpayer.

Resident taxpayers and Indonesian PEs of foreign companies have to settle their tax liabilities either by direct payments, third party withholdings, or a combination of both. Foreign companies without a PE in Indonesia have to settle their tax liabilities for their Indonesian-sourced income through withholding of the tax by the Indonesian party paying the income.

CIT rates

A flat CIT rate of 25% applies to net taxable income.

Indonesia

Public company discount

Public companies that satisfy a minimum listing requirement of 40% and certain other conditions are entitled to a tax discount of 5% off the standard rate, providing an effective tax rate of 20%.

Small company discount

Small enterprises (i.e. corporate taxpayers with an annual turnover of not more than 50 billion Indonesian rupiah [IDR]) are entitled to a 50% tax discount of the standard rate, which is imposed proportionally on taxable income on the part of gross turnover up to IDR 4.8 billion.

Final income tax

Certain types of income are subject to a final income tax at a specified percentage of the gross amount of income, without regard to any attributable expenses.

Income	Tax rate (%)
Rental of land and/or building	10
Proceeds from transfers of land and building rights	5
Fees for construction work performance	2/3/4
Fees for construction work planning	4/6
Fees for construction work supervision	4/6
Interest on time or saving deposits and on Bank of Indonesia Certificates (SBIs) other than that payable to banks operating in Indonesia and to government-approved pension funds	20
Interest on bonds other than that payable to banks operating in Indonesia and government-approved pension funds	15
Sale of exchange-traded shares on the Indonesian stock exchange	0.1
Income from lottery prizes	25

Resident companies, PEs, representatives of foreign companies, organisations, and appointed individuals are required to withhold the above final tax from the gross payments to resident taxpayers and PEs.

Special industries and activities

Companies engaged in upstream oil and gas and geothermal industries typically have to calculate CIT in accordance with their production sharing contracts (PSCs). Certain companies engaged in metal, mineral, and coal mining are governed by a contract of work (CoW) for the income tax calculation. Different provisions may apply to them, pertaining to corporate tax rates, deductible expenses, and how to calculate taxable income.

Note that such contractual-based concessions are no longer available to new mining projects since the enactment of the Mining Law in 2009. The Mining Law stipulates that general prevailing tax laws/regulations apply to mining projects; consequently, any tax facilities should be provided accordingly, except as otherwise stated in a particular mining licence.

Local income taxes

There are no local taxes on income in Indonesia. *For a list of other local taxes, see Regional taxes in the Other taxes section.*

Corporate residence

A company is treated as a resident of Indonesia for tax purposes by virtue of having its establishment or its place of management in Indonesia.

Permanent establishment (PE)

Under the Income Tax Law, a non-resident company may be treated as having a taxable presence if it runs a business or conducts activities in Indonesia, which can be in the form of:

- a place of management
- a branch of the company
- a representative office
- an office building
- a factory
- a workshop
- a warehouse
- a room for promotion and selling
- a mining and extraction of natural resources
- a mining working area for oil and natural gas
- a fishery, animal husbandry, agriculture, plantation, or forestry location
- a project of construction, installation, or assembly
- the furnishing of services in whatever form by employees or other person, insofar conducted not more than 60 days within a 12-month period
- a person or corporation acting as a dependent agent
- an agent or employee of an insurance company that is not established and domiciled in Indonesia that receives insurance premiums or insures risk in Indonesia, and
- the computers, electronic agent, or automated equipment owned, leased, or used by an electronic transactions provider to conduct business via the internet.

Where the non-resident company is resident in a country that has a tax treaty with Indonesia, the rules on a PE creation may be changed, usually there is a longer 'time test' for certain activities performed in Indonesia.

Other taxes

Value-added tax (VAT)

With a few exceptions, VAT is applicable on deliveries (sales) of goods and services within Indonesia at a rate of 10%. VAT on export of goods is zero-rated while the import of goods is subject to VAT at a rate of 10%. Zero-rated VAT is also applicable on exported services, but subject to a MoF limitation. Currently, only certain exported services, including toll manufacturing services, are subject to the 0% VAT rate. Services performed within the Customs Area for customers outside of the Customs Area are considered as locally delivered and are therefore subject to the regular VAT rate of 10%. Inbound use or consumption of foreign services or intangible goods, with a few exceptions, is also subject to a self-assessed VAT at a rate of 10%.

The VAT law allows the government to change the VAT rate within the range of 5% to 15%. However, since the enactment of the VAT law in 1984, the government has never changed the VAT rate.

In general, VAT collection is based on the accrual principle, whereby VAT must be collected at the time of delivery of taxable goods or services. The term delivery, in this

Indonesia

case, is defined as the time when risk and ownership of goods have been transferred or when income from a service delivery can be reliably estimated or measured. In the accrual system, income or receivables are acknowledged when a transaction takes place, regardless of whether the transaction has been paid for or not. The recognition of revenue or receivables is indicated by the issue of a commercial invoice, which is a source document for this recognition and a basis for recording it.

VAT filing is done on a monthly basis, with payment and filing being due no later than the last day of the month following the taxable delivery.

Luxury-goods sales tax (LST)

In addition to VAT, some goods are subject to LST upon import or delivery by the manufacturer to another party at rates currently ranging from 10% to 75%.

Import duty

Import duty is payable at rates from 0% to 150% on the customs value of imported goods. Customs value is calculated on cost, insurance, and freight level (CIF).

Group	Good	Rate (%)
Automobiles	Passenger and commercial vehicles	0 to 50
Automobile parts		0 to 10
Vessels	Ships, boats, and floating structures	0 to 5
Electronic goods		0 to 12.5
Footwear		5 to 25
Beverages, ethyl alcohol, and alcoholic drinks	Ethyl alcohol, beer, wine, spirits, and other beverages	5 to 30, IDR 14,000 to IDR 125,000/ltr
Essential oils and resinoids	Odoriferous substances	5 to 150
Agricultural products	Animal and vegetable products	0 to 25
Textile, textile products, and accessories	Bags, harnesses, apparels, and clothing accessories, etc.	5 to 15
Others	Chemicals, pharmaceutical products, plastic, and rubber products, etc.	0 to 25

As a commitment to liberalising trade, the Indonesian government is progressively lowering import duty rates on most products. Higher duty rates remain to protect certain industries and goods regarded as sensitive for security or social and cultural reasons.

Duty relief/exemption/deferral

The Indonesian government offers duty relief, duty exemption, and duty deferral concessions to foreign and domestic investors in order to promote the development of local and export industries. Such concessions include the BKPM Masterlist, Bonded Zone, Bonded Warehouse, import duty exemption and drawback for exports, Free Trade Zone (FTZ) in Batam, Bintan, and Karimun, Association of Southeast Asian Nations (ASEAN) duty rates, Free Trade Area (FTA) agreement duty rates, and MITA (main partners) lanes.

Land and buildings taxes

Land and buildings tax (*Pajak Bumi dan Bangunan* or PBB) is due annually at 5% of the government-determined sales value.

A transfer of land and building will cause income tax on the deemed gain on the transfer/sale to be charged to the transferor/seller. The tax is set at 5% of the gross transfer value or the government-determined value, whichever is higher (*see Final income tax in the Taxes on corporate income section*).

In a land and building transfer, the acquirer is liable for duty on the acquisition of land and building rights (*Bea Pengalihan Hak atas Tanah dan Bangunan* or BPHTB) at 5% of the greater of the transaction value or the government-determined value.

Stamp duty

Stamp duty is nominal and payable as a fixed amount of either IDR 6,000 or IDR 3,000 on certain documents.

Regional taxes

A corporate taxpayer may be liable for a number of regional taxes and retributions. The rates range from 1.5% to 35% of a wide number of reference values determined by the relevant regional governments. The following are regional taxes that may apply:

- Motor vehicle tax.
- Motor vehicle ownership transfer fee.
- Motor vehicle fuel tax.
- Surface water tax.
- Cigarette tax.
- Hotel tax.
- Restaurant tax.
- Entertainment tax.
- Advertisement tax.
- Road illumination tax.
- Non-metal and rock minerals tax.
- Parking tax.
- Ground water tax.
- Swallow-nest tax.

Jamsostek

Employers are held responsible for ascertaining that their employees are covered by *Jamsostek* (workers social security program) which provides compensation in the event of working accidents, deaths, and old age (55 years) as well as sickness or hospitalisation. The program calls for premium contributions from both the employers and the employees. Employees' contributions are collected through payroll deductions. The premium contributions are calculated as a percentage of regular salaries/wages, ranging from 0.24% to 3%.

Branch income

Branch profits are subject to the ordinary CIT rate of 25%. The after-tax profits are subject to a withholding tax (WHT) (i.e. branch profits tax or BPT) at 20%, regardless of whether the profits are remitted to the home country. However, a concessional WHT rate may be applicable where a tax treaty is in force (*see the Withholding taxes section for more information*). The BPT may be exempt if the profits are entirely reinvested in Indonesia (*see the Tax credits and incentives section for more information*).

Indonesia

Income determination

Inventory valuation

Inventories must be measured at cost by using either the average or first in first out (FIFO) method. Once a costing method is adopted, it must be applied consistently.

Capital gains

Capital gains are generally assessable together with ordinary income and subject to tax at the standard CIT rate. However, gains from the transfer of land and buildings are not subject to regular CIT but rather are subject to final income tax at a rate of 5% of the transaction value or the government-determined value, whichever is higher.

The proceeds from sales of shares listed on the Indonesian stock exchange are not subject to normal CIT. Instead, the proceeds are subject only to a final WHT of 0.1% of the gross sales consideration. An additional tax of 0.5% applies to the share value of founder shares at the time an initial public offering takes place, irrespective of whether the shares are held or sold. Shareholders may elect not to pay this tax, in which case the actual gain will be subject to normal tax at the time the shares are sold.

Dividend income

In principle, dividend income received by a resident taxpayer from a limited liability company (generally referred to as a *Perseroan Terbatas* or PT) is taxable as ordinary income for the taxpayer receiving the dividend. However, if the dividend recipient is a PT with a minimum shareholding of 25% in the company paying the dividend and the dividend is paid out of retained earnings, it is exempt from CIT.

Where the recipient is not resident in Indonesia, a WHT rate of 20% applies, subject to variation by tax treaties (*see the Withholding taxes section for more information*).

The same rules apply to stock dividends (bonus shares), including dividends paid out of share premium (*agio*).

Interest income

Interest income on time or saving deposits and on Bank of Indonesia Certificates (SBIs) received by a resident company or a PE is taxed at a final tax rate of 20%.

Exchange gains and losses

Gains and losses arising from currency fluctuations are generally recognised on an accrual basis in accordance with the prevailing Indonesian Accounting Standards, which resemble International Accounting Standards in most respects.

Foreign income

Foreign branch income of an Indonesian company must be accounted for as Indonesian taxable income under the controlled foreign corporations (CFCs) regulation. These rules apply to Indonesian tax residents owning at least 50% of the paid-up capital (shares) in a CFC. The rules make no reference to such terms as tax avoidance or tax evasion and therefore apply even if the CFC is domiciled in a non-tax haven country. The only situation in which the rules do not apply is when the CFC's shares are listed on a recognised stock exchange. In very broad terms, under the CFC rules, the Indonesian shareholder of the CFC is deemed to receive a dividend with respect to the CFC profits based on a shareholding proportional calculation.

Deductions

In general, expenses incurred in the ordinary course of business (to obtain, collect, and maintain taxable income) are deductible, subject to the requirements for documentary support.

Note that expenses relating to gross income subject to final income tax are not deductible for CIT purposes.

Depreciation, amortisation, and depletion

Depreciable/amortisable assets include both tangible and intangible property or costs, including the cost of extending building use rights, rights for business use, rights for use, and goodwill, with a useful life of more than one year, except land that is owned and used in business. Depreciation and amortisation may be calculated under the straight-line method or the declining-balance method on an individual asset basis. Once a method is chosen, it should be applied consistently. In calculating depreciation, depreciable assets are divided into the following classes:

Class	Depreciation/amortisation rate (%)	
	Straight-line method	Declining-balance method
Property:		
Useful life of four years	25	50
Useful life of eight years	12.5	25
Useful life of 16 years	6.25	12.5
Useful life of 20 years	5	10
Buildings:		
Permanent	5	-
Non-permanent	10	-

Special rules apply for assets used in certain business fields and/or certain areas. Tax depreciation need not conform to book depreciation.

The costs incurred for acquiring rights, with a beneficial life of more than one year, for mining, oil, and natural gas concessions; forest concessions; and other rights to exploit natural resources should be amortised by the production-unit method. Except for the right to acquire oil and natural gas concessions, the depletion rate used should not exceed 20% per annum.

Organisational and start-up expenses

The costs of incorporation and expansion of the capital of an enterprise are claimed in full in the year in which the expenditure is incurred or are amortised using either the declining-balance or straight-line method at the above rates.

Costs incurred before the commencement of commercial operations with a useful life of longer than one year are capitalised and amortised according to the above rates.

Interest expense

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes.

Interest on loans relating to time deposits (which income is subject to a final tax) is not deductible.

Indonesia

Interest on loans used to buy shares where dividends to be received are not subject to income tax is also not deductible.

Bad debts

Uncollectible debts are deductible for tax purposes, with the following conditions:

- The debtor has recognised the amount of uncollectible receivables as income in the relevant year.
- The taxpayer must submit a list of uncollectible account receivables to the Directorate General of Tax.
- A legal case to enforce collection has been brought to a District Court or government agency that handles state receivables, there is a written agreement on cancellation of receivables/debt release and discharge between the concerned creditor and debtor, it has been publicised in a general or a special publication, or the debtor has otherwise acknowledged that his/her debts have been cancelled.

Charitable contributions

Donations for national disasters, education facilities, sport development, and social infrastructures, with certain conditions, may be deductible in the fiscal year when the donations are provided.

Benefits in kind

Most benefits received in-kind by employees, such as free housing, are not tax-deductible to the entity providing the benefit. Free motor vehicle and telephone expenses, including depreciation, are tax-deductible but only for 50% of the total expenses incurred. Expenses for meals and transportation made available to all staff are tax-deductible. Apart from these, certain benefits in kind (e.g. housing provided in remote areas as designated by the MoF, Integrated Economic Development Areas as designated by Presidential Decree) can also be claimed as tax-deductible expenses.

Fines and penalties

Fines, penalties, and interest on underpayment of taxes are not deductible.

Taxes

Land and buildings tax and regional taxes may be deducted from taxable income. With several exceptions, input VAT is also deductible against taxable income as long as it is not claimed as a credit against output VAT.

Net operating losses

Losses may be carried forward for a maximum period of five years. Carrying back of losses is not permitted. Offsetting losses within a corporate group is not permitted.

Payments to foreign affiliates

WHT is applied as a final tax on the recipient for payments of royalties, interest, and service fees to foreign non-resident companies. Excessive and non-arm's-length payments to related parties are disallowed as deductions. The tax law denies deductions for all payments from a branch to its head office for royalties, interest, and services provided by the head office (exceptions apply for loans between bank branches and their head offices).

Group taxation

Consolidated returns are not allowed in Indonesia.

Transfer pricing

Transactions between related parties must be consistent with the arm's-length principle. If the arm's-length principle is not followed, the Director General of Tax (DGT) is authorised to recalculate the taxable income or deductible costs arising from such transactions applying the arm's-length principle.

Under the General Tax Provisions Law, the government requires specific transfer pricing documentation to prove the arm's-length nature of related-party transactions.

Detailed transfer pricing disclosures are required in the CIT return, which include the following:

- The nature and value of transactions with related parties.
- The transfer pricing methods applied to those transactions and the rationale for selecting the methods.
- Whether the company has prepared transfer pricing documentation.

Transfer pricing disputes may be resolved through the domestic objection and appeal process, or, where the dispute involves a transaction with a related party in a country that is one of Indonesia's tax treaty partners, the parties may request double tax relief under the Mutual Agreement Procedures (MAP) article of the relevant tax treaty. Taxpayers may apply for a MAP and continue the domestic dispute resolution process at the same time. A MAP application shall be discontinued if an appeal decision is declared by the Tax Court prior to the finalisation of the MAP.

The tax law authorises the DGT to enter into Advance Pricing Agreements (APAs) with taxpayers and/or another tax country's tax authority on the future application of the arm's-length principle to transactions between related parties. The process may or may not involve cooperation with foreign tax authorities. Once agreed, an APA will typically be valid for a maximum of three tax years after the tax year in which the APA is agreed. The APA can also be applied to tax years before it was agreed if certain conditions are met, such as the tax year has not been audited and there is no indication of tax crime. However, the rollback of an APA to prior years is not automatic and will be subject to agreement between the taxpayer and the DGT.

Increase in transfer pricing focused investigations

The number of tax audits with transfer pricing as the key focus area has significantly increased following the issuance of new regulations relating to transfer pricing. Transactions under particularly close scrutiny include payments of royalties and technical or management services fees, inter-company services, royalty and financing transactions, and exports to related parties.

Where a taxpayer has no documentation available to substantiate these transactions, there is a high risk that deductions for the payments will be denied in full. In this regard, the 30-day time limit within which a taxpayer must produce any documentation requested by the ITO during an audit is being strictly enforced. Any documentation provided after the 30-day time limit is being disregarded by the ITO in its decision making process.

Indonesia

Several transfer pricing specific audits have been conducted by the ITO for the past year. The ITO will identify high priority targets for transfer pricing specific audits based on:

- profit performance of the company (companies that have incurred consistent losses will be the highest priority but there is also a risk of being selected for companies with profits below industry norms) and
- materiality of the company's related party transactions.

In addition to transfer pricing audit activity, the ITO has also issued questionnaires to several taxpayers who are not under an audit that focus primarily on transfer pricing issues. It is possible that the information gathered by the ITO from these questionnaires will lead to follow-up investigations or audits in some cases.

Thin capitalisation

The MoF is authorised to make a determination on an appropriate ratio of debt to equity. Under the law, debt between related parties may be recharacterised as equity, thus giving rise to the disallowance of a tax deduction for related costs. However, the MoF has not yet issued a ruling on these matters.

Controlled foreign companies (CFCs)

See *Foreign income in the Income determination section* for a description of the CFC regime.

Tax credits and incentives

Foreign tax credit

Tax paid or payable in foreign countries upon income from abroad received or obtained by a resident taxpayer may be credited against tax payable in Indonesia in the same fiscal year.

The amount of tax credit is in the same amount with income tax paid or payable abroad, but shall not exceed tax payable calculated according to the Indonesian tax law.

Tax holiday

New corporate taxpayers in certain pioneer industries may enjoy a CIT exemption for a period of five to ten years from the start of commercial production. After the end of the CIT exemption, the company will receive a 50% CIT reduction for two years.

To be eligible for the above facilities, taxpayers should be newly incorporated in Indonesia (not earlier than 14 August 2010), should have a legalised new capital investment plan of a minimum IDR 1 trillion, should deposit a minimum of 10% of their planned investment value in banks located in Indonesia, and should not withdraw the deposit prior to the realisation of the investment plan.

An application for the tax holiday must be submitted to the Minister of Industry (MoI) or to the BKPM Chairman. A proposal for approval of the MoF will be made by the MoI or the BKPM Chairman after carrying out research on the applicant. Tax holiday proposals may only be submitted to the MoF until 15 August 2014.

Inbound investment incentives

The DGT, on behalf of the MoF and based on the recommendation of the BKPM Chairman, may provide the following tax concessions to PT companies following their investment in certain designated business areas and/or in certain designated regions with a high priority on the national scale:

- A reduction in net income of up to 30% of the amount invested (generally amount spent on assets), prorated at 5% for six years from commercial production date, provided that the assets invested are not transferred out within six years.
- Acceleration of fiscal depreciation deductions.
- Extension of tax loss carryforwards for up to ten years.
- A reduction of the WHT rate on dividends paid to non-residents to 10%.

A government regulation was issued in December 2011 which lengthened the list of investments eligible for the tax facilities. The list now covers 129 types of investment, which include 52 types of investment in particular sectors and 77 types of investment in particular sectors and regions.

Taxpayers who have enjoyed the income tax facilities above cannot enjoy the tax holiday facility, and vice versa.

The same tax facilities may be granted by the DGT to companies conducting business in an Integrated Economic Development Area (*Kawasan Pengembangan Ekonomi Terpadu* or KAPET). Specific approval must be obtained from the DGT for these tax facilities. If the company has bonded zone (*Kawasan Berikat* or KB) status, the tax facilities will also include those typically enjoyed by a KB company, for example:

- Non-collection of VAT and sales tax on certain luxury goods transactions.
- Exemption from prepaid income tax on the importation of capital goods and other equipment directly relating to production activities.
- Postponement of import duty on capital goods and equipment and goods and materials for processing.
- Exemption from import duty for four years on machinery and certain spare parts.

The designation of an area as a KAPET is set out in a specific presidential decree. Currently, there are approximately 25 areas designated as KAPETs.

Reinvestment of branch profits

PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from branch profit tax on these profits. The reinvestment should be one of the following forms:

- As a founder or a participant founder in a newly established Indonesian company through capital participation.
- As a shareholder of an established Indonesian company through capital participation.
- Acquisition of a fixed asset used by the PE to conduct its business or activities in Indonesia.
- Investment in the form of an intangible asset used by the PE to conduct its business or activities in Indonesia.

Shares in a newly established company shall not be transferred until, at a minimum, two years from the date that the company commences commercial production. With regard to the investment in an established Indonesian company, acquisition of a fixed asset, or investment of an intangible asset, the investment shall not be transferred until, at a minimum, three years after the investment.

Indonesia

Other incentives

Income earned by venture capital companies in the form of profit-sharing from their investments in Indonesia is exempt from tax, provided that the following conditions are met:

- Entities are small or medium-scale businesses in one of the sectors designated by the Indonesian government.
- Investments are not listed on the Indonesian stock exchange.

Withholding taxes

Indonesian income tax is collected mainly through a system of withholding taxes. Where a particular income item is subject to WHT, the payer is generally held responsible for withholding or collecting the tax. These withholding taxes are commonly referred to using the relevant article of the Income Tax Law, as follows.

Article 23/26 WHT

Article 23/26 WHT is levied on a variety of payments to corporations and individuals, resident and non-resident, at the following rates:

Recipient	WHT (%)				
	Dividends		Interest (8)	Royalties (9)	Branch profits (10)
	Portfolio	Substantial holdings			
Resident corporations (5)	15	0	15	15	N/A
Resident individuals	10	10	15	15	N/A
Non-resident corporations and individuals					
Non-treaty	20	20	20	20	0/20
Treaty:

Indonesia

Recipient	WHT (%)				
	Dividends		Interest (8)	Royalties (9)	Branch profits (10)
	Portfolio	Substantial holdings			
Venezuela (1)	15	10	0/10	20	10
Vietnam	15	15	0/15	15	10
Zimbabwe (1, 6)	20	10	0/10	15	10

Domestic Article 23 WHT is also payable at the rate of 2% for most types of services where the recipient of the payment is an Indonesian resident.

Notes

- Service fees, including for technical, management, and consulting services, rendered in Indonesia are subject to WHT at rates of 5% for Switzerland, 7.5% for Germany, 10% for Luxembourg, Papua New Guinea, Venezuela, and Zimbabwe, and 15% for Pakistan.
- VAT is reciprocally exempt from the income earned on the operation of ships or aircraft in international lanes.
- The treaty is silent concerning branch profit tax rate. The ITO interprets this to mean that the tax rate under Indonesian Tax Law (20%) should apply.
- Labuan offshore companies (under the Labuan Offshore Business Activity Tax Act 1990) are not entitled to the tax treaty benefits.
- In the case of dividends received by a resident shareholder, 'portfolio shareholding' refers to share ownership of less than 25% of the paid-up capital. In this respect, the dividend tax withheld by the payer constitutes a prepayment of the income tax liability of the shareholder. 'Substantial shareholding' refers to the share ownership of 25% of the paid-up capital or more.
- Ratified but not yet effective, pending the exchange of ratification documents. Expected effective date is 1 January 2013.
- Entered into force with the effective dates of 1 January 2013 for Indonesia and 1 April 2013 for Hong Kong.
- Interest:
 - Lower rate or exemption if received by a financial institution.
 - Exempt if paid to the government.
 - Lower rate or exemption if paid by an approved industrial undertaking.
 - Exempt if paid by a bank and received by a bank.
 - Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
- Royalties:
 - Lower rate for payments in connection with literary or artistic copyrights, including film royalties.
 - Lower rate for payments in connection with industrial, commercial, or scientific equipment.
 - Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
- Branch profits:
 - PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from branch profit tax on these profits (*see the Tax credits and incentives section*).

The issue of beneficial ownership has come under tax office scrutiny. For treaty WHT rates to apply to passive income such as interests, dividends, and royalties, the recipient of such income must be the beneficial owner. The recipient must also provide a Certificate of Domicile (CoD) in the form required by the ITO certified by their home country tax authority, certifying that the recipient is a tax resident of that country. The CoD in the form prepared by the other country's tax authority may only be used in limited circumstances. Further, the CoD form also requires a number of declarations to be made by the recipient that acknowledges that the use of the treaty jurisdiction was not merely for obtaining the benefit of the treaty. These declarations place onerous obligations on both the Indonesian payer and the recipient entity. Without a certified CoD, a WHT at a rate of 20% will apply. These aspects need to be considered when paying income of this nature.

Article 22 Income Tax

Article 22 income tax is typically applicable to the following:

Event	Tax rate (%)	Tax base
1. The import of goods (except goods mentioned in number 2 below) using an Importer Identification Number (<i>Angka Pengenal Impor</i> or API)	2.5	Import value (i.e. CIF value plus duties payable)
2. The import of soybeans, wheat and flour wheat using an API	0.5	Import value (i.e. CIF value plus duties payable)
3. The import of goods without an API	7.5	Import value (i.e. CIF value plus duties payable)
4. The auctioned imported goods	7.5	Auction prices
5. The sale of goods to the government requiring payment from the State Treasury and Proxy of Budget User (<i>Kuasa Pengguna Anggaran</i> or KPA)	1.5	Selling prices
6. The purchasing of oil fuel by state-owned gas stations	0.25	Selling prices
7. The purchasing of oil fuel by private gas stations and non-gas stations	0.3	Selling prices
8. The purchasing of gas fuel	0.3	Selling prices
9. The purchasing of lubricants	0.3	Selling prices
10. The purchasing of steel products	0.3	Selling prices
11. The purchasing of automotive products	0.45	Selling prices
12. The purchasing of paper products	0.1	Selling prices
13. The purchasing of cement	0.25	Selling prices
14. The purchasing of materials by appointed manufacturers or exporters in forestry, plantation, agriculture, and fishery from wholesalers	0.25	Selling prices
15. The purchasing of very luxurious goods	5	Selling prices

Notes

- The tax does not apply, either automatically or given an Exemption Certificate issued by the DGT, on the following types of imports:
 - Goods exempted from import duties and VAT.
 - Goods that have been temporarily imported (i.e. goods for re-export).
 - Goods for re-importing (i.e. to be repaired or tested for subsequent re-exporting).
- In event 5, the tax collector (the State Treasury, state-owned company, etc.) must withhold Article 22 income tax from the amount payable to a particular supplier (vendor). In the other events, the importer or the buyer of the designated goods must pay Article 22 income tax in addition to the amounts payable for the goods imported or purchased.
- Vendors of goods under events 10 through 13 can only collect Article 22 income tax from buyers if they have been appointed by the DGT to undertake this role (i.e. if there has been a specific DGT Appointment Decision).
- Article 22 income tax constitutes a prepayment of corporate/individual income tax liabilities, except for the purchasing of oil fuel, gas fuel, and lubricants by non-distributors/agents, which is categorised as final tax.
- Tax exemption applies to certain categories of goods or to the importing/purchasing of goods for non-business purposes.

Tax administration**Payments of tax and tax returns filing**

Tax liabilities for a particular period or year must typically be paid to the State Treasury through a designated tax-payment bank (*bank persepsi*) and then accounted for at the DGT office through the filing of the relevant tax returns. The tax payments and tax

Indonesia

return filing for a particular tax must be undertaken monthly or annually, depending upon the tax obligation in question.

Corporate tax liabilities may be settled either by direct payments, third party withholdings, or a combination of both. Monthly tax instalments constitute the first part of tax payments to be made by taxpayers as a prepayment of their current year CIT liability. A monthly tax instalment is generally calculated using the most recent CIT return. The tax withheld by third parties on certain income or tax to be paid in advance on certain transactions (i.e. imports) also constitute prepayments for the current year corporate tax liability of the income recipient or the party conducting the import. If the total amounts of tax paid in advance through the year are less than the total CIT due, the company concerned has to settle the shortfall before filing its CIT return. Returns for transaction taxes such as WHT must be filed on a monthly basis.

A summary of these tax obligations is as follows:

Monthly tax obligations

Type of tax	Tax payment deadline	Tax return filing deadline
Article 21/26 WHT	The 10th of the following month	The 20th of the following month
Article 23/26 WHT	The 10th of the following month	The 20th of the following month
Article 25 Income Tax Instalment	The 15th of the following month	The 20th of the following month
Article 22 Income Tax on imports / Payments to Tax Collectors	The 10th of the following month	The 20th of the following month
Article 4(2) Final Income Tax	The 10th of the following month	The 20th of the following month
VAT and LST	Prior to the tax return filing deadline	The end of the following month

Annual tax obligations

Type of tax	Tax payment deadline	Tax return filing deadline
Corporate Income Tax	The end of the fourth month after the book year end before filing the tax return	The end of the fourth month after the book year end
Land and Building Tax (PBB)	Six months after the receipt of a Tax Due Notification Letter from the ITO	N/A

Penalties

Late payments of the above taxes incur interest penalties at 2% per month, with a maximum of 48%. Part of a month, for example a single day, is considered a full month.

Late filing of a tax return or failure to file a tax return incurs an administrative penalty at the following amounts:

Type of tax return	IDR
VAT return	500,000
Other monthly tax returns	100,000
Corporate income tax return	1,000,000

Tax assessments

Indonesia uses a self-assessment system under which taxpayers are trusted to calculate, pay, and report their own taxes in accordance with prevailing tax laws and regulations. However, the DGT may issue tax assessment letters to a particular taxpayer if it finds that, based on a tax audit or on other information, the taxpayer has not fully paid all

tax liabilities. A tax assessment letter may also be issued by the DGT to a taxpayer who ignores a warning letter to file a tax return within a specified period. Failure to maintain books in accordance with the prescribed standards is another condition that may lead the DGT to issue an official tax assessment.

Statute of limitations

Under the current Tax Administration Law, the DGT can issue an underpaid tax assessment letter for the years up to 2007 only within ten years after the incurrence of a tax liability, the end of a tax period (month), or the end of (part of) a tax year, but no later than 2013. For years from 2008 onwards, the time spans for the issuing of underpaid tax assessment letters is reduced to five years.

Tax audits

The tax audit of a company may cover only a particular tax or all taxes for a particular tax period (a tax month) or tax year. It may be conducted at the company's premises, at the DGT offices, or at both.

Conditions triggering a tax audit

A tax refund request will always trigger a tax audit. Due to the requirement for the DGT to decide on a refund request within 12 months, a tax audit will typically begin from a few weeks to several months from the refund request date. A corporate tax refund request will normally trigger a complete tax audit covering all taxes. A refund request of any other tax will normally trigger a tax audit covering only one particular tax. The DGT will likely broaden the tax audit scope to include other taxes.

Other events which may trigger a tax audit include the following:

- A tax return in an overpayment position (not necessarily accompanied by a refund request).
- An annual income tax return presenting/claiming a tax loss.
- A tax return not filed within the prescribed time.
- A tax return meeting certain (undisclosed) DGT criteria.

Industry-based profitability benchmarking

The ITO has introduced profitability benchmarking based on taxpayer industries. The benchmarking is based on analysis conducted internally by the ITO and is intended to be used in assessing the risk profile of Indonesian corporate taxpayers as a tool in its audit selection process. Taxpayers with profitability that falls below the ITO's benchmarks for their industry may be asked for further information, asked to amend a tax return, or possibly be subject to an audit.

The benchmarking contains a range of financial ratios for the industries examined, including gross profit margin, operating profit margin, net profit margin, and corporate tax to turnover. Up to now, the ITO has released benchmarking guidelines of 115 industries. Further benchmarking regulations are likely to be issued in the future which cover additional industries.

Other issues

Business combinations and splits

Transfers of assets in business mergers, consolidations, or business splits must generally be dealt with at market value. Gains resulting from this kind of restructuring are assessable, while losses are generally claimable as a deduction from income.

Indonesia

However, a tax-neutral merger or consolidation, under which assets are transferred at book value, can be conducted but subject to the approval of the DGT. To obtain this approval, the merger or consolidation plan in question must pass a business-purpose test. Tax-driven arrangements are prohibited, and tax losses from the combining companies may not be passed to the surviving company.

Subject to a similar, specific DGT approval, the same concession is also available for business splits that constitute part of an initial public offering (IPO) plan. In this case, within one year of the DGT's approval being given, the company concerned must have made an effective declaration regarding registration for an IPO with the Capital Market Supervisory Board (*Badan Pengawas Pasar Modal* or BAPEPAM). In the event of complications beyond the company's control, the period may be extended by the DGT for up to four years.

Significant developments

The suppliers of goods and services are subject to withholding tax (WHT) at the rate of 3% to 3.3%.

Foreign oil companies contracting to operate in Iraq in the following activities in Iraq are subject to corporate income tax (CIT) at a rate of 35%:

- Oil and gas fields and exploration areas upstream development contracts.
- Seismic survey.
- Wells excavation.
- Reclamation of wells.
- Technical operations related to wells and including the laying down linings, cementing, wells recovery, electrical boring, and wells completion.
- Surface installations for the operations of producing and extracting oil or gas and the industries related to them.
- Water injection installations.
- Flow pipes.
- Gas treatment coefficient.
- Cathode protection.
- Engineering examination and qualitative control related to oil industries.
- Water wells excavation.
- Activities related to extraction up to the limit at which oil or gas is ready for pumping to exportation outlets.

For the purpose of these instructions, 'foreign company' shall mean the company incorporated in accordance with foreign laws.

The main contractors (operators) are required to deduct 7% of the total payment due for the subcontractor. The amounts deducted shall be transferred to the Public Taxation Authority within 30 days as of the date of payment and shall be entered as trusts to be settled when making the final tax accounting.

Taxes on corporate income

All income derived from Iraq is subject to tax in Iraq regardless of the residence of the recipient.

The effective CIT system presented in Iraq for juristic persons (except partnerships) is based on a statutory CIT rate of 15% at all income levels with no progressive tax rate scale.

Iraq

Foreign oil company income tax

The income realised in Iraq from contracts concluded with foreign oil companies, their branches or offices, and subcontractors working in Iraq in the oil and gas production sector and related industries are taxed at a rate of 35%.

Corporate residence

One of the key issues in determining when a company becomes taxable in Iraq is whether the foreign company is considered to be doing business 'in Iraq' or 'with Iraq'. In 2009, with Instructions No. 2/2008, the Iraqi tax administration provided a clearer distinction between business 'in Iraq' and business 'with Iraq'.

Once the determination has been made that the company is trading 'in Iraq', the company should legally register in Iraq and then register with the General Commission for Taxes (GCT). A company that is registered with the GCT will be subject to CIT and will be required to file a CIT return.

Permanent establishment (PE)

It is important to note that the current Iraq income tax law does not clearly define a PE; therefore, it is important to monitor commercial activity being performed in the country to ensure compliance with the registration requirements and tax law. The company should consult with their internal tax department and external advisers if they have signed a contract to provide any type of services inside Iraq to determine if the company should have a legal registration and begin to file CIT returns.

Other taxes

Sales tax

A sales tax of 10% of the value of services is imposed on services rendered by deluxe and first class restaurants and hotels in Iraq. There are no other sales taxes in Iraq.

Custom duty

The customs duty system and procedures in Iraq are currently evolving. In March 2010, the Iraqi Presidency Council issued Law 12 of 2010 (Custom Tariff Law), which is in effect as of 1 June 2012. The law is comprised of 11 articles and primarily addresses custom duties on goods imported into Iraq. The law notes that customs duties shall be levied based on percentages set in the custom tariff and agricultural agenda that is annexed to the Custom Tariff Law. For the purposes of the Custom Tariff Law, the custom tariff and agricultural agenda refers to the schedule comprised of itemised and codified sections and notes based on the international harmonised system adopted by the World Customs Organization (WCO).

Excise taxes

There is no tax provision in the Iraqi Tax Law addressing excise taxes.

Property taxes

A basic tax of 10% is assessed on the annual revenue for all real estate collected from the real estate owner or the long-term lessee (five years). In cases where the owner or long-term lessee cannot be located, the person occupying the real estate will be assessed. Note that the annual revenue for each real estate is discounted by 10% for expenses and maintenance before assessing the tax on that real estate.

Transfer taxes

There are no restrictions or taxes on transferring funds into or out of Iraq.

Stamp duty

All direct and indirect contracts related to credit facilities and other bank's activities (e.g. letter of credit contracts) are subject to the stamp fees at a rate of 0.2% of the contract value.

Branch income

The tax treatment for the branch is similar to the local Iraqi corporation. In general, CIT is imposed on corporate entities and foreign branches with respect to taxable profit from all sources arising or deemed to arise in Iraq. However, certain limitations apply to head office expenses.

Income determination

A corporation has to determine its profit/loss according to its income statement for a tax period as established under the Unified Accounting System (Iraqi Generally Accepted Accounting Principles [GAAP]). However, to reach the taxable income, positive or negative adjustments have to be made to the profit/loss as determined according to GAAP.

Inventory valuation

There is no tax provision in the Iraqi Tax Law addressing inventory valuation.

Capital gains

Capital gains on sales of depreciable assets are taxed at the normal CIT rate. To the best of our knowledge and legal practice, gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax. Capital gains derived from the sale of shares and bonds in the course of a trading activity are taxable at the normal CIT rate.

Dividend income

Under the tax law, dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

Interest income

Interest income deemed to arise in Iraq is taxed at the normal CIT rate.

Rent/royalties income

Rent and royalties income deemed to arise in Iraq are taxed at the normal CIT rate.

Foreign income

There is no tax provision in the Iraqi Tax Law addressing foreign income.

Deductions

In general, all expenses incurred by the taxpayer in order to produce income during the year are deducted from income, provided that such expenses are confirmed by acceptable documents, with some exceptions.

Iraq

Depreciation

The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets (please contact us for additional information regarding the specific rates). If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed.

The depreciation method is either a straight-line method or declining-balance method.

Goodwill

Iraqi tax law does not contain a provision that covers the deductibility of goodwill.

Start-up expenses

Iraqi tax law does not contain a provision that covers the deductibility of start-up expenses.

Interest expenses

Iraqi tax law does not contain a provision that covers the deductibility of interest expenses.

Bad debt

Bad debt is deductible if it was included in earlier income and there is proof of the unsuccessful steps to collect it.

Charitable contributions

Charitable contributions to the Government and Socialist Sector departments and to scientific, cultural, educational, charitable, and spiritual organisations, which are legally recognised (provided that the Minister of Finance has issued a list containing the names of these organisations), are deductible.

Bribes and illegal payments

Bribes and illegal payments are not allowed or deductible.

Fines and penalties

Broadly speaking, fines and penalties are not deductible items.

Taxes

Broadly speaking, taxes are not deductible items.

Net operating losses

Under the tax law, loss of a taxpayer in some sources of income arising in Iraq, substantiated by legally accepted documents, are generally deducted from profits arising from other sources.

Losses which cannot be settled in this manner shall be carried forward and deducted from the income of the taxpayer over five consecutive years, provided that losses may not offset more than half of the taxable income of each of the five years and the loss is from the same source of income from which it has arisen.

Losses cannot be carried back.

Payments to foreign affiliates

Iraqi tax law does not contain a provision that covers the deductibility of payments to foreign affiliates.

Group taxation

Iraqi tax law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

Transfer pricing

The precise meaning of transfer pricing under the effective Iraqi tax system is rather unclear from a tax and legal perspective.

We note that whilst having no specific transfer pricing legislation, Iraq does have a 'third party' arm's-length provision contained within its tax legislation; whereby, if a non-resident taxpayer is engaged in business with a resident and it appears to the tax authority that due to the connection existing between the resident and the non-resident, and the substantial control of one over the other, that the business relationship is arranged in a manner that leaves no profits to the resident, or the profits left are much less than what is normally earned, the tax shall be assessed on the actual profits of the non-resident and charged to the resident as if the resident is the business agent for the non-resident.

Thin capitalisation

Iraqi tax law does not contain a provision that covers thin capitalisation.

Tax credits and incentives

In accordance with the Iraqi Investment Law, approved industrial projects are given certain custom duty and tax incentives; however, oil and gas is not one of the sectors that is normally granted investment promotion exemptions incentives.

The tax incentives may include corporate tax, individual tax, and others; however, the tax incentives vary from one project to another.

The Board of Investment Promotion has the authority to add any sector or specific project to the list of sectors or projects that benefit from the investment promotion law incentives.

Foreign tax credit

Income tax paid to a foreign country on income earned in that country may be credited against tax paid to Iraq. The amount of the credit may not exceed the amount of tax assessed in Iraq.

Withholding taxes

Under the tax law, the amount due from any residing taxpayers to a non-resident, whether the payment is made in cash or credited to the account, is subject to WHT at the rate of 15% if such amounts are related to interest on debentures, mortgages, loans, deposits and advances, as well as annual allowances, pension salaries, or other yearly payments.

Iraq

Tax administration

Taxable period

The taxable year in Iraq is the calendar year.

Tax returns

The statutory time line for filing tax returns is the first day of June of the year of assessment. If the self-assessment of tax is not accepted by the tax authorities, tax is assessed on the income of the taxpayer based on the information available to the tax authorities.

Failure to file a tax return may lead to an estimate of income and assessment of tax by the tax authorities; however, such an assessment does not relieve the taxpayer from responsibility for non-submission of the return within the statutory time line stipulated by law.

Payment of taxes

Payment of the tax liability has to be paid within 21 days from the assessment date by the tax authority. There is no requirement of quarterly payments during the taxable year.

Statute of limitations

The statute of limitations is seven years. However, the tax authority has the right to go back beyond seven years in certain instances.

Iraqi GAAP

The Iraqi tax law requires all taxpayers to maintain books and records in accordance with Iraq's local unified accounting system (Iraqi GAAP).

These books shall constitute tax books/accounts. This accounting treatment will determine when income is accrued and costs are incurred for computing taxable profits.

Significant developments

Research and development (R&D) tax credit

Tax incentives for companies undertaking in-house R&D activities are at the forefront of Ireland's attempts to establish itself as a knowledge economy. Recent changes introduced in Finance Act 2012 continue to enhance the attraction of Ireland as an R&D location.

In a very innovative policy move, Finance Act 2012 has introduced increased flexibility for companies in terms of utilising the benefit of the R&D tax credit. Companies who are in receipt of an R&D tax credit will now, in certain instances, have the option to reward key employees through an alternative use of that credit. In effect, the company may surrender a portion of their R&D credit that could otherwise have been used to reduce corporation tax against employees' income. Essentially, this new measure can reduce an employee's effective rate of tax to 23% (the average effective tax rate for such employees would typically be in the region of 40% in the absence of such an R&D credit).

Finance Bill 2012 also introduced a limited volume-based approach for the purposes of calculating the tax credit. Going forward, the first 100,000 euros (EUR) of qualifying R&D expenditure will now benefit from the 25% R&D tax credit on a volume basis (thus ignoring the 2003 base year spend), meaning that companies engaging in R&D are guaranteed a credit of EUR 25,000 in respect of their first EUR 100,000 of expenditure.

Cash pooling

The corporate treasury sector sought changes to facilitate international cash pooling operations, and certain relevant changes were brought about in Finance Act 2012. Under a typical cashpool arrangement, interest payments by the Irish cashpool leader typically would constitute 'short' interest for tax purposes because of the overnight/short term nature of these arrangements. Prior to the introduction of Finance Act 2012, an interest payment by an Irish cashpool leader to a 'group' company (75% or more direct or indirect relationship) resident outside the European Union (EU) in a country with which Ireland does not have a double tax treaty (DTT) may have been regarded as a dividend for tax purposes. There were two tax consequences of this. Firstly, this interest was not deductible for corporation tax purposes, giving rise to an Irish tax cost of 12.5%. Secondly, dividend withholding tax (WHT) at a rate of 20% may have applied, although there are a number of exemptions from dividend WHT that may be relevant, depending on the specific circumstances.

Finance Act 2012 has introduced a relieving provision effective for accounting periods ending on or after 1 January 2012 in respect of 'short' interest. Short interest is generally regarded as interest on a loan/deposit where the term is less than a year. Essentially, the Irish company will be entitled to a tax deduction for the interest payable

Ireland

to any group company resident outside the European Union in a non-treaty country, provided the recipient country taxes foreign interest income at a rate equal to or greater than the Irish corporate rate. If the recipient country taxes foreign interest at a rate of less than 12.5%, then relief will be given in Ireland at that effective tax rate. If the recipient country exempts foreign interest, then no relief will be available in Ireland. It should be noted that this will affect not only cash-pooling operations but all forms of short-term lending (i.e. less than one year).

This may create additional borrowing opportunities for Irish treasury companies.

Group relief for Irish loss

Finance Act 2012 contained a positive and very welcome development in relation to the surrender of Irish losses in group situations. It is another significant measure designed to enhance the attractiveness of Ireland to foreign head-quartered groups. Previously, it was the position that a group for Irish loss relief purposes could not exist where it was necessary to trace ownership through a company not resident in an EU member state (or Iceland or Norway) in order to establish a 75% group relationship between the surrendering company and the claimant company. In practice, the most frequent difficulties arose where it was necessary to trace through a parent company resident in Switzerland or the United States (US).

The amendments introduced in the Act now allow Irish losses to be surrendered from the surrendering company to a claimant company where both companies are at least 75% members of the same corporate group, and the difficulties that existed in establishing a 75% group relationship are now relaxed as (in addition to tracing through EU resident companies) it is now possible to trace through companies resident in a country with whom Ireland has a DTT and it is also possible to trace through companies quoted on certain recognised stock exchanges (or 75% subsidiaries of companies so quoted).

Extension of 12.5% tax rate of foreign dividends

An Irish resident company is chargeable to corporation tax at the 12.5% rate on certain foreign dividends that have been paid out of trading profits. This applies to dividends received from:

- a company tax resident in the European Union
- a company tax resident in a country with which Ireland has a DTT, and
- a company tax resident in a non-treaty country, provided the principal class of shares in it or in its parent company are substantially and regularly traded on a recognised stock exchange in the European Union or in a treaty country.

Finance Act 2012 extends the 12.5% corporate tax rate to foreign dividends paid out of trading profits of a company resident in a country that has ratified the Convention on Mutual Assistance in Tax Matters. Such countries include Azerbaijan and Ukraine. Please note that Argentina, Brazil, and Indonesia have signed, but have not yet ratified, the Convention.

Exemption for new start-up companies

Finance Act 2012 extends the exemption for start-up companies from corporation tax and capital gains tax. The relief is now extended to companies that commence a new trade in 2012, 2013, and 2014.

Stamp duty and value-added tax (VAT)

The rate of stamp duty on non-residential property has been reduced from a top rate of 6% to a flat rate of 2%. This new 2% rate not only applies to transfers of commercial and industrial land and buildings but also to transfers of business assets such as goodwill, debtors, contracts, etc.

The main rate of VAT that applies to the supply of the majority goods and services in the course of business has increased from 21% to 23%.

Pooling of foreign tax deductions for royalties

Finance Act 2012 introduced a number of beneficial changes to the computational rules that provide relief for foreign tax on royalties. In effect, the changes provide for a form of pooling of tax deductions in relation to foreign tax on royalties where the royalty income is taken into account in computing the trading income of a trade carried on by the company.

International funds sector

The Finance Act 2012 introduced a number of provisions designed to support and enhance the international funds sector in Ireland, as set out in further detail below:

Funds re-domiciling to Ireland

Finance Act 2012 provides that where the Central Bank has authorised an investment fund that has re-domiciled to Ireland from certain offshore centres, a declaration can be made by the fund stating that the unitholders are non-Irish resident, to ensure that no Irish tax charge arises in respect of such non-residents, thereby clarifying the tax exemption applying to payments made by Irish funds to non-resident investors. To the extent that there are any Irish resident unitholders, these need to be identified in the declaration and tax accounted for, where appropriate, on any payments made to such unitholders.

Cross-border fund mergers involving Irish funds

New measures have been introduced confirming that mergers (both inbound and outbound) involving an Irish fund with a fund located in a member state of the European Union, European Economic Area (EEA), or an Organisation for Economic Co-operation and Development (OECD) country with which Ireland has entered into a DTT will not give rise to a charge to tax in respect of Irish resident investors. Effectively, the charge to tax is deferred until the ultimate disposal of the replacement units. The calculation of any future gain on such units is calculated by reference to the cost of the original units.

Finance Act 2012 also confirms that no charge to Irish tax shall arise on the transfer of units in the formation of certain master/feeder structures.

Finance Act 2012 also includes a number of significant stamp duty exemptions available for collective investment vehicles.

Legislative changes: New Irish corporate structure for investment funds

The Irish funds industry continues to work with the Irish government to explore new products that could enhance the competitiveness of Ireland's fund offering on the global stage.

The Irish Minister of Finance has approved, in principle, legislative proposals for a new form of corporate structure for regulated investment funds.

Ireland

Currently, investment funds in Ireland structured as companies are incorporated as public limited companies ('plc') under the Irish Companies Acts. The new corporate structure will be specifically designed for investment funds and will not be subject to the legislation governing other types of companies, reducing the need to comply with certain inappropriate requirements under the Companies Acts. The legislation will also increase the range of structures open to investment managers and promoters establishing funds in Ireland.

One of the main advantages of new corporate structure will be the ability of this structure to 'check-the-box' (an election to be regarded as tax transparent) for US tax purposes, whereas an Irish plc cannot. This is seen as a very positive development in the funds industry, particularly in the context of investment funds seeking to re-domicile from traditional tax haven jurisdictions to a regulated jurisdiction like Ireland.

It is expected that the proposed new legislation will be enacted by the end of 2012 prior to the entry into force of the EU Alternative Investment Funds Managers Directive in July 2013. It is intended that the new corporate fund would qualify for the tax exemption that applies to Irish regulated funds.

Taxes on corporate income

Corporation tax is chargeable as follows on income and capital gains:

Standard rate on income (‘trading rate’)	Higher rate on income (‘passive rate’)	Capital gains rate
12.5%	25%	30%

Resident companies are taxable in Ireland on their worldwide profits (including gains). Non-resident companies are subject to Irish corporation tax only on the trading profits of an Irish branch or agency and to Irish income tax (generally by way of withholding) on certain Irish source income.

Non-trading (passive) income includes dividends from companies resident outside Ireland (with some exceptions), interest, rents, and royalties. Legislation provides that certain dividend income (e.g. income from foreign trades) is taxed at 12.5% (*see the Income determination section*). The higher rate (i.e. 25%) also applies to income from a business carried on wholly outside Ireland and to income from land dealing, mining, and petroleum extraction operations.

An additional 'profit resource rent' tax applies to certain petroleum activities. Depending on the profit yield of a site, the tax rate applicable can range from 25% to 40%.

Close companies (*see the Income determination section*) may be subject to additional corporate taxes on undistributed investment income (including Irish dividends) and on undistributed income from professional services. Examples of professional services include professions such as solicitor, accountant, doctor, and engineer.

Corporate residence

A company that is incorporated, or has its place of central management and control, in Ireland will be regarded as resident in Ireland for the purposes of corporation tax and capital gains tax. This is subject to the following two exceptions where a company incorporated in Ireland is not considered a tax resident.

A treaty exception applies if the Irish incorporated company is, by virtue of an Irish DTT, considered to be tax resident in the treaty partner country and not resident in Ireland.

An active trading exception applies if the Irish incorporated company or its 50% affiliate carries on a trade in Ireland and the company has qualifying ownership. A 50% affiliate is essentially a company where:

- one company is a 50% subsidiary of the other or both companies are 50% subsidiaries of a third company
- there is an entitlement to at least 50% of the profits available for distribution, and
- there is an entitlement to at least 50% of the assets available in the case of a winding up of the other company.

Qualifying ownership requires that the Irish incorporated company or a 50% or more affiliate/parent is listed on a stock exchange in a European Union member state or a territory which has a tax treaty with Ireland or, in the absence of such a listing, that the ultimate control (more than 50%) of the Irish incorporated company rests with persons who are tax resident in EU or treaty countries.

Permanent establishment (PE)

Non-resident companies are subject to Irish corporation tax only on the trading profits attributable to an Irish branch or agency, plus Irish income tax (generally by way of withholding, though this is not the case with Irish source rental profits) on certain Irish source income.

For non-resident companies, the liability to corporation tax depends on the existence of any kind of branch or agency through which a trade is carried on. The meaning of branch or agency for Irish tax purposes is set out in statute. The corporation tax liability of a non-resident company will be reduced by a DTT if the company does not have a PE in Ireland.

Subject to the terms of the relevant DTT, a non-resident company will have a PE in Ireland if:

- it has a fixed place of business in Ireland through which the business of the company is wholly or partly carried on or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in Ireland.

A fixed place of business includes (but is not limited to) a place of management, a branch, an office, a factory, a workshop, an installation or structure for the exploration of natural resources, a mine, oil or gas well, quarry, or other place of extraction of natural resources, or a building or construction or installation project. A company is not, however, regarded as having an Irish PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

Ireland

Other taxes

Value-added tax (VAT)

VAT is charged at 23% on the supply of most goods and services in the course of business.

There are two lower rates. A 13.5% rate applies to most building services, labour intensive services, domestic fuel and power, and other reduced rate supplies. A 4.8% rate applies to livestock and greyhounds.

As of 1 July 2011, a reduced 9% VAT rate applies to certain services in the tourism sector. These include restaurant and catering services, hotel and holiday accommodation, and various entertainment services, such as admissions to cinemas, theatres, museums, fairgrounds, amusement parks, and sporting facilities. Under current legislation, this rate will apply until 31 December 2013.

Most exports, food, oral medicine, and children's clothing and footwear are zero-rated.

Some supplies are exempt from VAT. The main exempt categories are most banking services, insurance services, medical services, passenger transport, education, and training.

Zero rating is preferable to exemption because most VAT costs incurred in making a zero-rated supply can be recovered, while those incurred in making an exempt supply generally cannot.

Customs duties

Many goods imported into Ireland from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff.

Excise duties

Excise duties are chargeable on most hydrocarbon oil products, electricity supply, alcoholic drinks, and tobacco products imported into or produced in Ireland.

Stamp duty

Stamp duty is a tax on instruments. It is payable on transfers of land and on other assets whose legal title cannot be passed by delivery. It is also chargeable on all instruments of transfer executed in Ireland, and on instruments, wherever executed, which relate to Irish property or activities. The transfer of assets between associated companies may not be liable to stamp duty, provided the following key conditions are met:

- The companies have a 90% relationship (that is, one company is the beneficial owner of at least 90% of the ordinary share capital of the other and is entitled to at least 90% of the profits available for distribution and is entitled to at least 90% of the assets in the case of a winding-up of the other company).
- The companies are in a group 90% relationship as defined above that can be traced as far up the group chain as is necessary to establish the qualifying relationship.
- This relationship is maintained for a period of two years after the transfer of the assets to avoid the relief being clawed back.

There is an exemption for transfers of intellectual property (IP), and the categories of IP qualifying for this exemption are broadly similar to those for which IP capital allowances are available (*see Intellectual property [IP] regime in the Tax credits and incentives section*).

Stamp duty rates are up to 2% of the value transferring. Rates of 1% to 2% apply for residential property. Stamp duty is levied at 1% on transfers of Irish shares.

A EUR 1 stamp duty applies to a policy of insurance, other than life insurance, relating to risks located in Ireland. The stamp duty is normally collected under the terms of a composition agreement, which provides for regular, usually quarterly, payments of duty.

Capital duty on share capital

Ireland does not levy capital duty on share capital of companies.

Capital taxes

Ireland does not levy tax on the net worth of companies.

Social security contributions

Employed persons are compulsorily insured under a state-administered scheme of pay-related social insurance (PRSI). Contributions are made by both the employer and the employee. The employer is responsible for making PRSI contributions up to a rate of 10.75%, and these are an allowable deduction for corporation tax purposes.

Insurance premium tax (IPT)

A levy of 3% of gross premiums received applies in relation to non-life insurance policies relating to risks located in Ireland. This levy is payable four times per annum, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

A levy of 1% of gross premiums received applies in relation to certain classes of life insurance policies relating to risks located in Ireland. This levy is payable four times per annum, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

An additional contribution of 2% to the Insurance Compensation Fund applies to premiums received in relation to non-life insurance policies. Similar to the 3% non-life insurance levy, the contribution applies where premiums are received in respect of risks located in Ireland. The contribution is also payable four times per annum in conjunction with the non-life insurance levy on premiums.

Reinsurance business is excluded from the levy.

Emissions allowances

Legislation was introduced in relation to the tax treatment of emission allowances under the EU Emissions Trading Scheme. The legislation distinguishes between allowances acquired free of charge from the Environment Protection Agency under the EU Scheme and those that are purchased.

Environmental taxes

In Ireland, a levy (currently 22 cent per bag) is imposed upon consumers provided with a plastic bag when purchasing goods in supermarkets and other retail outlets. Under the applicable legislation, retailers are obliged to collect 22 cent in respect of every plastic bag or bag containing plastic, regardless of size, unless specifically exempted, that is provided to customers and remit all plastic bag levies collected to Irish Revenue. As a result of the levy, most non-supermarket retailers provide paper carrier bags, and many retailers provide 'bags for life', which are made from non-plastic material and, therefore, not subject to the environmental levy.

Ireland

Carbon tax

A carbon tax has been introduced on mineral oils (e.g. auto fuels, kerosene) which are supplied in Ireland. The rates of carbon tax on oil and gas broadly equate to EUR 20 per tonne of CO₂ emitted. Relief applies where mineral oils are supplied to an Emissions Trading Scheme (ETS) installation or for electricity generation. Pure biofuels are exempt from carbon tax. There is full relief for the biofuel component of the fuel. Where biofuel has been mixed or blended with any other mineral oil, the relief from carbon taxes shall apply to the biofuel content of the mixture or blend, regardless of the percentage.

A carbon tax has also been introduced on natural gas and solid fuel where supplied for combustion. Again, reliefs apply where these fuels are supplied to ETS installations or used in electricity generation, chemical reduction, or in the electrolytical or metallurgical processes.

Local taxes

Local taxes known as 'rates' are not based on income but rather are levied on the occupiers of business property by reference to a deemed rental value of the property concerned. The level of rates levied can depend on the region in which the property is located. Rates are an allowable deduction for corporation tax purposes.

Local authorities are also empowered to levy charges on all occupiers for specific services (e.g. water supply). These charges are also deductible for corporation tax purposes.

Branch income

Irish branches of foreign companies are liable to corporation tax at the rates that apply to Irish resident companies. No tax is withheld on repatriation of branch profits to the head office.

Income determination

Irish trading profits are computed in accordance with Irish Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS), subject to any adjustment required by law. Prior-year adjustments may arise on the first-time adoption of IFRS, which may result in double counting of income or expenses or of income falling out of the charge to tax. Generally speaking, in order to avoid such an outcome, transitional adjustments exist whereby amounts of income or expenses that could be double-counted or that would fall out of the charge to tax are identified and the amounts concerned are taxed or deducted as appropriate over a five year period.

Inventory valuation

Each item of inventory is valued for tax purposes at cost or market value, whichever is lower, and this will normally accord with the accounting treatment. The method used in arriving at cost or market value of inventory generally must be consistent and must not be in conflict with tax law. The first in first out (FIFO) method is an acceptable method of calculation for tax purposes. The base-stock method has been held to be an inappropriate method for tax purposes, as has the last in first out (LIFO) method.

Capital gains

Companies are subject to capital gains tax in respect of gains arising on the disposal of capital assets. The taxable gain is arrived at by deducting from the sales proceeds the cost incurred on acquiring the asset (as indexed to reflect inflation only up to 31 December 2002). The resulting gain is taxable at 30%. In cases of disposals of interests in offshore funds and foreign life assurance policies, indexation relief does not apply; while, with effect from 1 January 2012, a tax rate of 33% applies to non-corporate shareholders in respect of funds and policies located in EU/ EEA/DTT countries, and a rate of 30% or 40% applies to funds or policies located in all other jurisdictions. Finance Act 2012 reduced the rate of exit tax applying to Irish corporate shareholders investing in Irish funds to 25%, effective 1 January 2012. Special rules apply to gains (and losses) from the disposal of development land in Ireland.

Companies that are tax resident in Ireland (that is managed and controlled in Ireland or incorporated in Ireland and not qualifying for exclusion) are taxable on worldwide gains. Non-resident companies are subject to capital gains tax on capital gains arising on the disposal of Irish land, buildings, mineral rights, and exploration rights on the Irish continental shelf, together with shares in unquoted (unlisted) companies, whose value substantially (greater than 50%) is derived from these assets. Non-resident companies also are subject to capital gains tax from the realisation of assets used for the purposes of a business carried on in Ireland.

Losses arising on the disposal of capital assets may be offset against capital gains in the accounting period or carried forward for offset against future capital gains. No carryback of capital losses is permitted. There is no facility to offset capital losses against business income or to surrender capital losses within a tax group.

Irish capital gains tax legislation facilitates corporate reorganisations on a tax-free basis in situations where there is a share for share exchange. Assets can be transferred within certain company groups without capital gains tax applying (*see the Group taxation section for further information*).

Participation exemption from capital gains

A participation exemption is available to Irish resident companies on the disposal of a shareholding interest if:

- a minimum of 5% of the shares (including the right to profits and assets on winding up) is held for a continuous 12-month period
- the share sale takes place during the period for which the minimum 5% holding is held
- the sale takes place within two years after meeting the holding requirement, to take account of gradual dispositions over time
- the company whose shares are sold is resident in an EU member state (including Ireland) or in a country with which Ireland has a DTT at the time of the disposal (this includes tax treaties that have been signed but not yet ratified), and
- a trading condition is met at the time of the disposal whereby either: (i) the business of the company whose shares are disposed of consists wholly or mainly of the carrying on of one or more trades or (ii) taken together, the businesses of the Irish holding company and all companies in which it has a direct or indirect 5% or more ownership interest consist wholly or mainly of the carrying on of one or more trades.

If the Irish holding company is unable to meet the minimum holding requirement but is a member of a group (that is, a parent company and its 51% worldwide subsidiaries), the gain arising on the disposal still will be exempt if the holding requirement can be

Ireland

met by including holdings of other members of the group. Thus, the Irish company may be exempt from capital gains tax on a disposal of shares even if it does not directly hold a significant shareholding. The exemption also applies to a disposal of assets related to shares, such as options and convertible debt. However, it does not apply to a sale of either shares or related assets that derive the greater part of their value (more than 50%) from Irish real property, minerals, mining rights, and exploration and exploitation rights in a designated area. Shares deriving their value from non-Irish real property, minerals, and mining rights qualify for exemption if the other conditions are met.

Capital losses arising on the disposal of a shareholding where a gain on disposal would be exempt under the participation exemption are not deductible.

Dividend income

Dividends from Irish companies are exempt from corporation tax. Dividends paid out of the trading profits of a company resident in a country with which Ireland has a DTT (or a country with which Ireland has ratified the Convention on Mutual Assistance in Tax Matters) may be taxed at the 12.5% rate, provided a claim is made. The 12.5% corporate tax rate applies to the same type of dividends received from companies resident in non-treaty countries, that is, where the company that paid the dividend is a listed company or is part of a 75% listed group the principal class of the shares of which are substantially and regularly traded on the Irish Stock Exchange, a recognised Stock Exchange in a country with which Ireland has a DTT, or on such other Stock Exchange as is approved by the Minister for Finance for the purposes of this relief from double taxation.

Finance Act 2012 extends the 12.5% corporate tax rate to foreign dividends paid out of trading profits of a company resident in a country that has ratified the Convention on Mutual Assistance in Tax Matters. Such countries include Azerbaijan and Ukraine. Please note that Argentina, Brazil, and Indonesia have signed, but have not yet ratified, the Convention.

Foreign dividends received by an Irish company where it holds 5% or less of the share capital and voting rights in that foreign company are exempt from corporation tax where the Irish company would otherwise be taxed on this dividend income as trading income.

Dividends from Irish resident companies are not liable to further tax, other than a surcharge on close companies if the dividend is not redistributed. Broadly speaking, a close company is a company which is under the control of five or fewer 'participators'. Participators can include individual shareholders, corporate shareholders, loan creditors, any person with a right to receive distributions from the company, etc. Where not less than 35% of the shares of a company (including the voting power) are listed, a company would not be regarded as a close company.

A close company surcharge of 20% is payable on certain non-trading income (for example, rental income, certain dividend income, and interest income) if it is not distributed to shareholders within 18 months of the accounting period in which the income was earned. Since 31 January 2008, a close company making a distribution and the close company receiving a distribution have the option jointly to elect to have the dividend disregarded for surcharge purposes. This can give close companies the option of moving 'trading income' up to a holding company without incurring a surcharge. Generally speaking, close companies avoid the surcharge through the payment of dividends within the prescribed period. Capital gains accruing to a non-resident

company that would be close if it were resident can be attributed to Irish resident participants in certain instances.

Stock dividends

Stock dividends taken in lieu of cash are taxed to the shareholder on an amount equivalent to the amount which would have been received if the option to take stock dividends had not been exercised. If the recipient is an Irish resident company and it receives the stock dividend from a quoted (listed) Irish company, then there will be no tax. For a quoted (listed) company paying the stock dividend, dividend WHT with the appropriate exemptions and exclusions applies. Other stock dividends (bonus issues) are generally non-taxable.

Interest income

Interest income earned by Irish companies generally is taxable at the rate of tax for passive income of 25% (interest may be regarded as a trading receipt for certain financial trader companies). It is possible to offset current year trading losses against passive interest income arising in the same year on a 'value basis'. It is not possible to offset prior year trading losses against current year interest income unless that interest constitutes a trading receipt of the particular company.

Foreign income

Resident companies are liable to Irish tax on worldwide income. Accordingly, in the case of an Irish resident company, foreign income and capital gains are, broadly speaking, subject in full to corporation tax. This applies to income of a foreign branch of an Irish company as well as to dividend income arising abroad.

In general, income of foreign subsidiaries of Irish companies is not taxed until remitted to Ireland, although there are special rules that seek to tax certain undistributed capital gains of non-resident close companies (*see Dividend income above for further information in relation to close companies*).

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland (*see Foreign tax credit in the Tax credits and incentives section*).

Deductions

In general, expenses incurred wholly and exclusively for the purposes of the trade are tax-deductible.

General accruals and provisions are not tax-deductible.

Depreciation

Book depreciation is not deductible for tax purposes (except in the case of IP assets). Instead, tax depreciation (known as capital allowances) is permitted on a straight-line basis in respect of expenditure incurred on assets which have been put into use by the company. The following rates are applicable:

Asset type	Tax depreciation rate (%)
Plant and machinery	12.5
Industrial buildings used for manufacturing	4
Motor vehicles	12.5

Ireland

Asset type	Tax depreciation rate (%)
IP assets	Book depreciation or 7

The allowances are calculated on the cost after deduction of grants, except for plant and machinery used in the course of the manufacture of processed food for human consumption. In this case, the allowances are calculated on the gross cost. Allowances on cars are restricted to a capital cost of EUR 24,000 and may be restricted further (to 50% or zero) depending on the level of carbon emissions of the vehicle.

Accelerated capital allowances

A 100% first-year capital allowance is available in respect of expenditures incurred on certain approved energy-efficient equipment up to 31 December 2014. The categories of equipment that may be eligible for inclusion are:

- Information and communications technology.
- Heating and electricity provision.
- Electric and alternative fuel vehicles.
- Heating, ventilation, and air conditioning (HVAC) control systems.
- Lighting.
- Motors and drives.
- Building energy management systems.
- Refrigeration and cooling systems.
- Electro-mechanical systems.
- Catering and hospitality equipment.

Leasing

Ireland operates an eight-year tax depreciation life on most assets. A beneficial tax treatment applies to finance leases and operating leases of certain assets. For short life assets (i.e. those with a life of less than eight years), Ireland allows such lessors to follow the accounting treatment of the transaction that provides a faster write-off of the capital cost of an asset rather than relying on tax depreciation over eight years. This effectively allows the lessors to write-off their capital for tax purposes in line with the economic recovery on the asset.

Goodwill

The amortisation of goodwill is generally not allowable as a deduction. However, a tax deduction may be available for capital expenditure on the acquisition of goodwill (*see Intellectual property (IP) regime in the Tax credits and incentives section*).

Start-up expenses

A deduction may be allowed in respect of pre-trading expenses that are incurred for the purposes of a trade and within three years of the commencement of the trade. Such expenses may be offset against the income of that same trade.

Interest expenses

A deduction for interest is allowed only to the extent that borrowings are used for the purpose of a trade or other limited purposes.

R&D expenses

Expenditure on scientific R&D and payments for the acquisition of know-how in general are allowable deductions, as are the costs of obtaining or extending patents and obtaining and renewing trademarks.

Bad debts

A deduction is available for bad debts written off in the accounts of a company as irrecoverable. Specific bad debt provisions may also be deductible once they satisfy Irish GAAP or IFRS accounting standards. The creation of a general bad debt provision is not a deductible expense.

Charitable contributions

Companies are entitled to a deduction, as a trading expense, for qualifying donations to approved charities, educational institutions, schools, churches, research foundations, sports bodies, and other approved organisations which satisfy certain conditions. To qualify for a tax deduction, the donation(s) to an organisation in a 12-month accounting period must amount to at least EUR 250.

Meals and entertainment

Costs incurred for third-party entertainment are not tax-deductible. Entertainment includes the provision of accommodation, food, drink, and any other form of hospitality including the provision of gifts. Expenditure on bona fide staff entertainment is allowable as a deduction provided its provision is not incidental to the provision of entertainment to third parties. Certain promotional costs are tax-deductible if they are incurred wholly and exclusively for the purposes of the trade.

Pension expenses

Contributions to certain employee pension schemes and the cost of setting up such schemes are deductible. Pension contributions are allowable as a deduction for employers in the year in which they are paid.

Fines and penalties

Fines and penalties imposed for breaking the law, civil penalties, interest, and late filing surcharges imposed by the Revenue Commissioners are generally not deductible.

Taxes

Taxes that are deductible in computing profits for corporation tax include VAT not recovered, the employer's share of PRSI contributions, and local taxes (i.e. rates levied on commercial property and local authority charges).

Net operating losses

Losses are computed for tax purposes in the same way as business profits. Trading losses can be offset against other income of any nature, either in the current or preceding accounting period (of equal length). The amount of losses required to shelter the income is dependent on the tax rate which would have been applied to the income in the absence of the loss relief. Any excess losses can be carried forward indefinitely against future trading income. Certain changes in ownership may prevent the carryforward of losses to future periods. Terminal losses which arise within 12 months of the date a company ceases to trade may be carried back three years.

Payments to foreign affiliates

Generally, deductions can be claimed for royalties, management service charges, and most interest charges paid to foreign affiliates, provided the amounts do not exceed what would be paid to unrelated entities. Depending on the circumstances, certain elections may be required. Ireland does not have any thin capitalisation rules.

Cash pooling

The corporate treasury sector sought changes to facilitate international cash pooling operations, and certain relevant changes were brought about in Finance Act 2012.

Ireland

Under a typical cashpool arrangement, interest payments by the Irish cashpool leader typically would constitute 'short' interest for tax purposes because of the overnight/short term nature of these arrangements. Prior to the introduction of Finance Act 2012, an interest payment by an Irish cashpool leader to a 'group' company (75% or more direct or indirect relationship) resident outside the European Union in a country with which Ireland does not have a DTT may have been regarded as a dividend for tax purposes. There were two tax consequences of this. Firstly, this interest was not deductible for corporation tax purposes, giving rise to an Irish tax cost of 12.5%. Secondly, dividend WHT at a rate of 20% may have applied, although there are a number of exemptions from dividend WHT that may be relevant, depending on the specific circumstances.

Finance Act 2012 has introduced a relieving provision effective for accounting periods ending on or after 1 January 2012 in respect of 'short' interest. Short interest is generally regarded as interest on a loan/deposit where the term is less than a year. Essentially, the Irish company will be entitled to a tax deduction for the interest payable to any group company resident outside the European Union in a non-treaty country, provided the recipient country taxes foreign interest income at a rate equal to or greater than the Irish corporate rate. If the recipient country taxes foreign interest at a rate of less than 12.5%, then relief will be given in Ireland at that effective tax rate. If the recipient country exempts foreign interest, then no relief will be available in Ireland. It should be noted that this will affect not only cash-pooling operations but all forms of short-term lending (i.e. less than one year).

This may create additional borrowing opportunities for Irish treasury companies.

Group taxation

The concept of 'fiscal unity' or consolidated group tax does not exist in Ireland. However, trading losses as computed for tax purposes may be offset on a current period basis against taxable profits of another group company. As with loss relief in a single company, the amount of losses required to shelter the income is dependent on the tax rate which would have been applied to the income in the absence of the loss relief.

A group consists of a parent company and all of its 75% subsidiaries, with all group members being tax resident in Ireland, in another member state of the EEA or in a country with which Ireland has a DTT. It is also possible to trace through companies quoted on certain recognised stock exchanges (or 75% subsidiaries of companies so quoted). Non-Irish members may only surrender losses from activities which would, if profitable, be subject to Irish tax.

Capital losses cannot be surrendered within a group.

Relief from capital gains tax is available on intra-group transfers of capital assets. Where a capital asset is transferred from a resident company to another resident company in a 75% group, no capital gains tax charge arises. A group, for capital gains tax purposes, consists of a principal company and its 75% subsidiary companies. A 75% subsidiary is defined by reference to the beneficial ownership of ordinary share capital, owned either directly or indirectly. A capital gains tax group can include EEA resident companies for the purpose of analysing the beneficial ownership of a company.

It also is possible for an Irish resident company and an Irish branch of an EEA company in the same group to transfer capital assets without crystallising a capital gains charge,

provided the asset transferred remains within the scope of the charge to Irish capital gains tax.

Subsequent to an intra-group transfer, a charge to capital gains tax will arise when either:

- the asset is sold outside the group, in which case the tax is calculated by reference to the original cost and acquisition date of the asset when first acquired within the group or
- a company owns an asset which was transferred by a group company and subsequently leaves the group within a ten year period of the intra-group transfer. The gain on this intra-group transfer crystallises and becomes payable at this point.

Transfer pricing

In April 2010, Ireland enacted broad based transfer pricing legislation. The legislation endorses the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and adopts the arm's-length principle. The introduction of general transfer pricing legislation in Ireland was widely anticipated and brings the Irish tax regime into line with international norms in this area. The new regime applies to domestic as well as international related party arrangements and is effective for accounting periods commencing on or after 1 January 2011 in relation to certain arrangements entered into on or after 1 July 2010.

The new transfer pricing rules apply to arrangements entered into between associated persons, involving the supply or acquisition of goods, services, money, or intangible assets and relating to trading activities within the charge to Irish tax at the trading rate of 12.5%. The rules confer a power on the Irish tax authorities to re-compute the taxable profit or loss of a taxpayer where income has been understated or where expenditure has been overstated as a result of certain non-arm's-length arrangements. The adjustment will be made to the Irish taxable profits to reflect the arrangement had it been entered into by independent parties dealing at arm's length.

The legislation also places an obligation on a taxpayer to provide documentation 'as may reasonably be required' to support the arm's-length nature of the related party arrangements and that documentation will need to be prepared 'on a timely basis'. Guidance notes issued by the Irish tax authorities on transfer pricing documentation support the legislative basis and indicate that a company is required to have transfer pricing documentation available for inspection if requested by the Irish tax authorities. Notably, the guidance notes state that "it is best practice that the documentation is prepared at the time the terms of the transaction are agreed". Additionally, the guidance notes state that in order "for a company to be in a position to make a correct and complete tax return, appropriate transfer pricing documentation should exist at the time the tax return is filed". It is worth noting that the taxpayer can maintain documentation in the form 'of its choosing'. Additionally, where documentation exists in another territory which supports the Irish arrangement, this will also be sufficient from an Irish transfer pricing perspective, provided that the documentation is in English. The Irish tax authorities have also confirmed that they will accept documentation that has been prepared in accordance with either the OECD Transfer Pricing Guidelines or the code of conduct adopted by the EU Council under the title 'EU Transfer Pricing Documentation'.

Note that arrangements entered into between related parties prior to 1 July 2010 are 'grandfathered' and thereby excluded from the scope of the new transfer pricing rules. There is also an exemption from the new rules for small and medium-sized enterprises.

Ireland

Broadly speaking, small and medium-sized enterprises include enterprises employing less than 250 people and that have either a turnover of less than EUR 50 million or assets of less than EUR 43 million.

Thin capitalisation

Ireland does not have any thin capitalisation rules.

Controlled foreign companies (CFCs)

Ireland does not have CFC rules.

Tax credits and incentives

The main tax incentives in Ireland are:

- 12.5% corporation tax rate on active business income.
- A 25% credit on incremental R&D spending over the base year of 2003; total effective tax deduction of 37.5%.
- Ability to exploit IP at favourable tax rates.
- Accelerated tax depreciation allowances for approved energy efficient equipment.
- Ability to carry out investment management activities for non-Irish investment funds without creating a taxable presence in Ireland for such funds.
- An effective legal, regulatory, and tax framework to allow for the efficient redomiciliation of investment funds from traditional offshore centres to Ireland.

R&D credit

Incremental R&D expenditure (over a base year of 2003) qualifies for a tax credit of 25% in addition to a tax deduction. This means that the total tax deduction on qualifying expenditure is 37.5%. A limited volume-based approach applies for the purposes of calculating the tax credit so that the first EUR 100,000 of qualifying R&D expenditure will benefit from the 25% R&D tax credit on a volume basis (thus ignoring the 2003 base year spend). This means that companies engaging in R&D are guaranteed a credit of EUR 25,000 in respect of their first EUR 100,000 of expenditure.

Expenditure on buildings used for R&D now also can qualify for the credit as long as at least 35% of the building is used for R&D activities. This hurdle is measured over the course of four years. This is of particular assistance where R&D is carried on in a manufacturing environment. It should be noted that expenditures incurred on the acquisition of an intangible asset that qualify for capital allowances under the IP regime will not qualify for the R&D credit.

The R&D regime caters for pre-trading expenditures and other specific circumstances. Where a company incurs R&D expenditures but has not yet commenced to trade, all R&D claims in this regard must be made within 12 months from the end of the accounting period in which the company first commences to trade.

Companies who are in receipt of an R&D tax credit will now, in certain instances, have the option to reward key employees through an alternative use of that credit. In effect, the company may surrender a portion of their R&D credit that could otherwise have been used to reduce corporation tax against employees' income. Essentially, this new measure can reduce an employee's effective rate of tax to 23% (the average effective tax rate for such employees would typically be in the region of 40% in the absence of such an R&D credit).

The R&D credit can be used to generate a tax refund through a carryback against prior year profits. In addition, repayment for excess credits is available over the course of a three-year cycle. Repayments are limited to the greater of the corporation tax payable by the company in the preceding ten years or the payroll tax liability for the period in which the relevant R&D expenditure is incurred.

In addition, under Irish GAAP, companies may account for the R&D tax credit through their profit and loss account or income statement in arriving at the pre-tax profit or loss. This immediately impacts on the unit cost of R&D, which is the key measurement used by multi-national corporations (MNCs) when considering the locations of R&D projects.

Intellectual property (IP) regime

Legislation provides for a tax deduction for capital expenditure on the acquisition of qualifying IP assets. The definition of IP assets is widely drafted and includes the acquisition of, or the licence to use, the following:

- Patents and registered designs.
- Trademarks and brand names.
- Know-how (broadly in line with the OECD model tax treaty definition of know-how).
- Domain name, copyrights, service marks, and publishing titles.
- Authorisation to sell medicines, a product of any design, formula, process, or invention (and rights derived from research into same).
- Applications for legal protection (for example, applications for the grant or registration of brands, trademarks, patents, copyright, etc.).
- Expenditure on computer software acquired for commercial exploitation.
- Goodwill, to the extent that it relates directly to the assets outlined above.

Capital allowances will be available at the same rate as the depreciation/amortisation charge for financial accounting purposes. Alternatively, the company may elect to claim allowances over a period of 15 years.

Tax deductions (e.g. financing costs) are available for offset against income generated from exploiting IP assets, up to a maximum deduction of 80% of the relevant IP profits. The remaining 20% is taxable at the 12.5% corporation tax rate. There is no clawback provided the IP is held for ten years (reduced from 15 years in Finance Act 2010).

There is currently an option to elect to stay within the 'old' regime for know-how and patents for IP acquired up until 7 May 2011. A shorter write off period of eight years has also been retained for acquired software rights under the existing capital allowances regime where the rights are not acquired for commercial exploitation (i.e. were acquired for end use by the company).

Exemption for new start-up companies

A corporation tax holiday applies to certain start-up companies that commence to trade during 2012, 2013, and 2014. The relief applies for three years where the total amount of corporation tax payable does not exceed EUR 40,000 in each year. Marginal relief is available where corporation tax payable is between EUR 40,000 and EUR 60,000. The relief available is now linked to the amount of employer's PRSI paid by a company in an accounting period and is intended to target the relief at companies generating employment.

Section 110 company

Ireland has a favourable tax regime for entities known as Section 110 companies. A Section 110 company is an Irish resident special purpose company that holds and/

Ireland

or manages 'qualifying assets' which provides for an onshore investment platform (with access to Ireland's treaty network) in an environment of increased international focus on tax havens and transparency. The Section 110 regime has been in existence since 1991 and with appropriate planning effectively allows for corporation tax neutral treatment, provided that certain conditions are met. The regime is widely used by international banks, asset managers, and investment funds in the context of securitisations, investment platforms, collateralised debt obligations (CDOs), and capital markets bond issuances.

Recent legislative changes, arrived at following extensive industry consultation, have significantly expanded the range of assets that a Section 110 company can invest in, whilst also seeking to restrict the use of Section 110 in specific targeted circumstances.

Prior to 2011, Section 110 companies were limited to investing in financial assets. The term 'financial asset' is widely defined and includes both mainstream financial assets such as shares, loans, leases, lease portfolios, bonds, debt, and derivatives, as well as assets such as greenhouse gas emissions allowance, all types of receivables, etc.

The range of investments in which a Section 110 company can invest has been significantly extended since 2011 to include investments in commodities and plant and machinery. Greenhouse gas emissions allowance has been redefined as a qualifying asset to include 'carbon offsets' and has been broadened significantly. These are very welcome changes, particularly in the context of recent market interest in commodity transactions and the launch of the Irish Government's 'Green International Financial Services Centre (IFSC)' initiative.

In addition, the extension of the Section 110 regime to include plant and machinery will benefit Ireland's position as the preferred destination for aircraft financing and leasing activities and will give an added boost to Ireland's position as the centre of excellence for aircraft financing transactions.

Grants

Cash grants may be available for capital expenditures on machinery and equipment and industrial premises, training of employees, creation of employment, rent subsidies, R&D, manufacturing and exporting products, providing services to customers overseas, etc. The level of grant aid depends on a number of factors and is specific to each project. Rates depend on the location of the new industry.

Foreign tax credit

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland. The calculation of the credit depends on the nature of the income item, but for income sources other than dividends and some related party interest, the credit is limited to the Irish tax referable to the particular item of income. A system of onshore pooling of excess foreign tax credits applies to dividends from 5% or greater corporate shareholdings, and excess credits in the dividend pool can be carried forward indefinitely. A similar pooling system applies to some related party interest and also to foreign branch income.

An Irish resident company with a branch or branches outside Ireland is generally taxable in Ireland on the foreign branch profits with a credit for foreign taxes paid on those profits. A unilateral form of credit relief for foreign taxes paid by foreign branches operating in countries with which Ireland does not have a tax treaty is available also. To the extent that there were foreign taxes on branch profits that were not utilised

in the relevant period (that is, where credit for foreign tax exceeds the Irish tax payable), these unused credits can be carried forward indefinitely and credited against corporation tax on foreign branch profits in future accounting periods.

Finance Act 2012 introduced a number of beneficial changes to the computational rules that provide relief for foreign tax on royalties. In effect, the changes provide for a form of pooling of tax deductions in relation to foreign tax on royalties where the royalty income is taken into account in computing the trading income of a trade carried on by the company.

Withholding taxes

Irish resident companies are required to withhold tax on certain types of payments as set out below (see sub-sections below for WHT exemptions and table at end of this section for WHT rate reductions).

Recipient	WHT (%)		
	Dividends	Interest	Patents, royalties
Resident companies	0	20	20
Resident individuals	20	20	20
Non-resident companies and individuals	20	20	20

Dividend WHT

Dividend WHT applies at 20% to dividends and other distributions. However, an exemption may be available where the recipient of the dividend is either an Irish company or a non-Irish company eligible for the Parent-Subsidiary Directive (which in Ireland requires a 5% or greater shareholding).

Exemptions from dividend WHT also are available where the recipient of the distribution falls into one of the categories listed below and provided an appropriate declaration is made to the company paying the distribution in advance of the distribution. In a move to significantly ease the administrative burden in applying for exemption for dividend WHT, this declaration is now self-assessed and valid for up to six years.

- Irish tax resident companies (a declaration is not required for Irish tax resident companies which hold a 51% or greater shareholding of the company).
- Non-resident companies, which are resident in a country with which Ireland has a tax treaty or in another EU member state, where the company is not controlled by Irish residents.
- Non-resident companies which ultimately are controlled by residents of a tax treaty country or another EU member state.
- Non-resident companies whose principal class of shares is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance (or if recipient of the dividend is a 75% subsidiary of such a listed company).
- Non-resident companies that are wholly owned by two or more companies the principal class of shares of each of which is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance.
- Individuals who are resident in a tax treaty country or in another EU member state.

Ireland

- Certain pension funds, retirement funds, sports bodies, collective investment funds, and employee share ownership trusts.

Companies that make a dividend distribution are required, within 14 days of the end of the month in which the distribution is made, to make a return to the tax authorities containing details of the recipient of the dividend, the reason for any exemption from dividend WHT, and to pay over any tax withheld.

Interest WHT

Financial institutions operating in Ireland are obligated to withhold tax (deposit interest retention tax or DIRT) at 30% out of interest paid or credited on deposit accounts in the beneficial ownership of resident companies, unless the financial institution is authorised to pay the interest gross. There is no DIRT on interest paid to non-residents where a written declaration of non-residence is completed. Certain annual interest payments are subject to WHT at 20%. Interest payments by companies to companies resident in other EU member states or in treaty countries are generally not subject to WHT. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies.

Royalties WHT

Royalties, other than patents, are not generally subject to WHT under domestic law. Documentation and reporting may be required to access lower treaty withholding rates in other cases. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies. Associated companies, for the purpose of this directive, are companies where one can directly control at least 25% of the voting power of the other or at least 25% of the voting power of both companies is directly controlled by a third company. In all cases, all companies must be resident in a member state of the European Union.

WHT on capital gains

Where any of the following assets is disposed of, the person by whom or through whom the consideration is paid (i.e. the purchaser) must deduct capital gains tax at 15% from the payment:

1. Land or minerals in Ireland or exploration rights in the Irish continental shelf.
2. Unquoted (unlisted) shares deriving their value or the greater part of their value (more than 50%) from assets described in (1).
3. Unquoted (unlisted) shares issued in exchange for shares deriving their value or the greater part of their value from assets as described in (1).
4. Goodwill of a trade carried on in Ireland.

The requirement to withhold tax is not required where the consideration does not exceed EUR 500,000 or where the person disposing of the asset produces a certificate from the Revenue Commissioners authorising payment in full. A clearance certificate may be obtained by making application on Form CG50 to the Revenue Commissioners supported by a copy of the agreement or contract for sale. The certificate may be obtained on the grounds that the vendor is Irish resident or that no capital gains tax is due in respect of the disposal or that the capital gains tax has been paid. WHT is creditable against the capital gains tax liability of the vendor, and any excess is refundable.

To avoid the requirement to withhold, clearance must be obtained before the consideration is paid. There is no exemption from the withholding procedure where the asset is held as trading stock or where the transaction is intra-group and a capital gains

tax liability does not arise. Failure to obtain the certificate will lead to the purchaser being assessed to capital gains tax for an amount of 15% of the consideration.

Professional services withholding tax (PSWT)

Individual income tax at the standard rate (currently 20%) is deducted from payments for professional services by government departments, state bodies, and local authorities. Credit is granted for any PSWT withheld against the corporation tax (or income tax for an individual) liability of the accounting period in which tax is withheld.

Relevant contracts tax (RCT)

There are special WHT rules (with exemptions available) relating to payments made by principal contractors to sub-contractors in respect of relevant contracts in the construction, forestry, and meat processing industries. Where relevant operations under a relevant contract are carried out in Ireland, the RCT system applies regardless of whether or not parties to the contract are non-resident in Ireland, parties to the contract are not liable to tax in Ireland in respect of those operations, the contract is executed outside Ireland, or payments under the contract are made outside Ireland. It is important to note that principal contractors, liable to RCT, may not operate in the above industries. In the case of construction in particular, relevant contracts may be entered into by a variety of entity types. For example, electricity generation, oil and gas, and telecommunications undertakings are all classed as principal contractors.

The principal contractor must deduct tax at rates of 20% or 35% from such payments and remit this to the Revenue. The rate that is applied to a subcontractor will principally depend on the sub-contractor's tax compliance record. The 20% rate will apply to sub-contractors who are registered with Revenue and have a good tax compliance record, including foreign tax compliance in the case of foreign companies. A zero rate of RCT applies where the sub-contractor applies for that rate and Revenue authorises the principal subcontractor not to deduct RCT from payments. Principals must notify each payment on Revenue's online system and obtain an authorised rate before making any payment, otherwise penalties may apply. The gross amount receivable under the contract is included in the computation of the profit of the sub-contractor, and the sub-contractor is entitled to credit for, or offset of, the tax suffered.

WHT rate reductions and exemptions

Exemptions and rate reductions apply under domestic law and under tax treaties.

Where an exemption from WHT is not available (*please see sections above for domestic law exemptions*), a reduced rate of WHT may apply under an applicable tax treaty. The table below sets out the reduced rates of WHT that may be available to payments of dividends, interest, and royalties under an applicable tax treaty.

Recipient	WHT (%)

Legislation recently has been amended to allow for favourable treatment in situations where a DTT has been signed but not yet ratified.

* These treaties are currently under renegotiation.

** Awaiting ratification.

*** Protocols to the DTTs with Malaysia, Switzerland, and Austria are awaiting ratification. These protocols do not have any impact upon the exemptions and rate reductions outlined above.

Notes

1. See *Dividend WHT sub-section above for domestic WHT exemptions.*
2. See *Interest WHT sub-section above for domestic WHT exemptions.*
3. See *Royalties WHT sub-section above for domestic WHT exemptions.*
4. Where the beneficial owner of the dividends is a resident of a contracting state and is a company which holds directly at least 25% of the capital of the company paying the dividends.
5. Refer to Ireland/Pakistan DTT.
6. Where the beneficial owner of the dividends is a resident of the contracting state and is a company which controls directly or indirectly 10% or more of the voting power in the company paying the dividends.
7. Where the beneficial owner of the dividends is a resident of the contracting state and is a company which controls directly 10% or more of the voting power in the company paying the dividends.
8. For loans from banks and, in the case of Norway, certain government funds.
9. Where the beneficial owner of the dividends is a resident of the contracting state and controls directly or indirectly at least 10% of the voting power in the company paying the dividend and has invested more than EUR 100,000 in the capital of the company paying the dividend. The above details in general are subject to any special relationship that may exist between the payer and the recipient, and it is assumed that the recipient does not have a permanent establishment (taxable presence) in the other contracting state.
10. Where the beneficial owner of the dividends is a resident of a contracting state and is a company which holds directly at least 70% of the voting power of the company paying the dividends.
11. Refer to Ireland/Vietnam DTT.
12. Treaty came into effect on 1 January 2012.

Ireland is currently negotiating treaties with the following countries

- Argentina
- Azerbaijan
- Qatar
- Thailand
- Tunisia
- Ukraine
- Uzbekistan

Ireland

Tax administration

Taxable period

The tax accounting period normally coincides with a company's financial accounting period, except where the latter period exceeds 12 months.

Tax returns

Corporation tax returns must be submitted within nine months (and no later than the 23rd day of the ninth month) after the end of the tax accounting period in order to avoid a surcharge (maximum of EUR 63,485) or a restriction of 50% of losses claimed, to a maximum of EUR 158,715.

Payment of tax

Corporation tax payment dates are different for 'large' and 'small' companies. A small company is one whose corporation tax liability in the preceding period was less than EUR 200,000. Interest on late payments or underpayments is applied at approximately 10% per year.

Large companies

The first instalment of preliminary tax totalling 45% of the expected final tax liability, or 50% of the prior period liability, is due six months from the start of the tax accounting period (but no later than the 23rd day of the month).

The second instalment of preliminary tax is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month). This payment must bring the total paid up to 90% of the estimated liability for the period.

The balance of tax is due when the corporation tax return for the period is filed (that is, within nine months of the end of the tax accounting period, but no later than the 23rd day of the month in which that period of nine months ends).

Small companies

Small companies only are required to pay one instalment of preliminary tax. This is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month).

The company can choose to pay an amount of preliminary tax equal to 100% of the corporation tax liability for its immediately preceding period or 90% of the estimated liability for the current period. As is the case for large companies, the final instalment is due when the corporation tax return is filed.

Statute of limitations

A system of self-assessment and Irish Revenue audits is in operation in Ireland. Irish Revenue may undertake an audit of a company's tax return within a period of four years from the end of the accounting period in which the return is submitted.

Other issues

Asset management

Irish tax legislation contains provisions aimed at enhancing Ireland as a leading location for the management of both Undertakings for Collective Investment in Transferable Securities (UCITS) and non-UCITS funds. UCITS III and IV brought about fundamental changes to both the management and structuring of UCITS. One of the reforms

introduced permits UCITS management companies located in one EU jurisdiction to manage UCITS domiciled in another EU jurisdiction. One of the areas of concern is whether the activities of the management company could bring a foreign UCITS within the charge to tax in the management company's home jurisdiction (e.g. by creating a branch or agency or causing the fund to be regarded as tax resident there). In the case of an Irish management company managing a non-Irish UCITS, such management company will not be regarded as a branch or agency of the non-Irish UCITS and will not bring the profits of the foreign UCITS within the charge to Irish tax or treat the foreign UCITS as an Irish regulated fund.

Following the US and OECD review of offshore domiciles, which has resulted in increased regulation and tax obligations, fund managers are being forced to consider possible alternative onshore jurisdictions for their investment fund products. Because of its international reputation of its investment funds industry and the favourable corporate tax regime, Ireland is seeing a significant trend in investment managers moving their investment platforms there from the traditional offshore jurisdictions. Recent company law changes also allow corporate funds to migrate to Ireland through a re-registration process, whereby the fund company would benefit from its continued existence, including the ability to retain the fund's performance track record post migration and avoid potential adverse tax consequences and costs that typically arise from a merger of an offshore fund with a new onshore fund. The Irish Financial Regulator has introduced a coordinated authorisation process to facilitate speed to market, which at present is a key advantage in comparison to delays being experienced in other EU domiciles.

International funds sector

The Finance Act 2012 introduced a number of provisions designed to support and enhance the international funds sector in Ireland, as set out in further detail below:

Funds re-domiciling to Ireland

Finance Act 2012 provides that where the Central Bank has authorised an investment fund that has re-domiciled to Ireland from certain offshore centres, a declaration can be made by the fund stating that the unitholders are non-Irish resident, to ensure that no Irish tax charge arises in respect of such non-residents, thereby clarifying the tax exemption applying to payments made by Irish funds to non-resident investors. To the extent that there are any Irish resident unitholders, these need to be identified in the declaration and tax accounted for, where appropriate, on any payments made to such unitholders.

Cross-border fund mergers involving Irish funds

New measures have been introduced confirming that mergers (both inbound and outbound) involving an Irish fund with a fund located in a member state of the European Union, European Economic Area (EEA), or an Organisation for Economic Co-operation and Development (OECD) country with which Ireland has entered into a DTT will not give rise to a charge to tax in respect of Irish resident investors. Effectively, the charge to tax is deferred until the ultimate disposal of the replacement units. The calculation of any future gain on such units is calculated by reference to the cost of the original units.

Finance Act 2012 also confirms that no charge to Irish tax shall arise on the transfer of units in the formation of certain master/feeder structures.

Finance Act 2012 also includes a number of significant stamp duty exemptions available for collective investment vehicles.

Ireland

Legislative changes: New Irish corporate structure for investment funds

The Irish funds industry continues to work with the Irish government to explore new products that could enhance the competitiveness of Ireland's fund offering on the global stage.

The Irish Minister of Finance has approved, in principle, legislative proposals for a new form of corporate structure for regulated investment funds.

Currently, investment funds in Ireland structured as companies are incorporated as public limited companies ('plc') under the Irish Companies Acts. The new corporate structure will be specifically designed for investment funds and will not be subject to the legislation governing other types of companies, reducing the need to comply with certain inappropriate requirements under the Companies Acts. The legislation will also increase the range of structures open to investment managers and promoters establishing funds in Ireland.

One of the main advantages of new corporate structure will be the ability of this structure to 'check-the-box' (an election to be regarded as tax transparent) for US tax purposes, whereas an Irish plc cannot. This is seen as a very positive development in the funds industry, particularly in the context of investment funds seeking to re-domicile from traditional tax haven jurisdictions to a regulated jurisdiction like Ireland.

It is expected that the proposed new legislation will be enacted by the end of 2012 prior to the entry into force of the EU Alternative Investment Funds Managers Directive in July 2013. It is intended that the new corporate fund would qualify for the tax exemption that applies to Irish regulated funds.

Islamic finance

The Irish tax treatment of certain Islamic finance transactions, such as funds, certain *ijara* (leasing), *takaful* (insurance), and *re-takaful* (reinsurance) is accommodated within existing Irish tax legislation. Specific legislation was also introduced to facilitate the issuance of *sukuk* (i.e. Islamic bonds) in Ireland. Overall, the intention of the legislature is to ensure that Islamic finance transactions are treated in the same favourable manner as conventional financing transactions. The legislation also introduced changes in relation to the taxation (and tax impact) of UCITS management companies. The UCITS structure is one of the commonly used structures for many different types of Islamic funds, such as retail Islamic equity funds, Shariah-compliant money market funds, Shariah-compliant exchange traded funds (ETFs), etc. This demonstrates the Irish government and tax authorities desire to enhance the attractiveness of Ireland as a location for Islamic finance transactions by extending to this form of financing the relieving provisions which currently apply to conventional financing.

Islamic insurance

The Irish Revenue has recently provided guidance in respect of the Irish tax treatment of general *takaful* (non-life), *re-takaful* (reinsurance), and family (life) *takaful* arrangements. Legislative changes are not currently required to facilitate Islamic insurance in Ireland.

Exchange control

Ireland does not have exchange control regulations.

Choice of legal entity

Foreign investors tend to operate either through an Irish legal entity or as a branch of a foreign entity. Both are equally valid means of doing business in Ireland, and the choice would normally depend on the commercial fact pattern and individual circumstances of the investor parent company.

Mandatory disclosure

In a move to promote transparency between taxpayers, practitioners, and tax authorities, provisions relating to the disclosure of tax schemes are applicable as of January 2011. These require promoters of such schemes to provide information to the tax authorities within a specified time of having made the scheme available. A transaction which comes within the new law and which therefore must be reported to Revenue is not necessarily a tax avoidance transaction for the purposes of existing legislation. The rules are wide reaching and essentially cover all tax heads including corporation tax, income tax, capital gains tax, stamp duty, VAT, customs duties, and excise duties.

Significant developments

Tax treaties

The Isle of Man signed a comprehensive double tax agreement (DTA) with Qatar in May 2012, bringing the total number of treaties to five. The DTA with Belgium, signed in July 2009, is still awaiting ratification.

The Isle of Man now has a total of 30 tax information exchange agreements (TIEAs), including those signed during 2011 with Canada, India, Poland, Mexico, Japan, Indonesia, Slovenia and, most recently, the Czech Republic.

Income attributed to shareholders

For accounting periods ending prior to 5 April 2012, legislation existed that attributed the profits of an Isle of Man resident company to any Manx resident shareholders as if that profit had been distributed to them. Although any resulting tax charge fell on the shareholder, the legislation placed reporting and filing obligations on the Isle of Man resident company in respect of profits realised and distributions made.

This legislation was abolished in the 2011 budget and no longer applies for accounting periods commencing after 6 April 2012.

Taxes on corporate income

Companies resident in the Isle of Man are taxed on their worldwide income and are required to file an annual income tax return reporting worldwide taxable profits calculated in line with local legislation and practice.

A non-resident company incorporated outside the Isle of Man but having a place of business or a permanent establishment (PE) on the Isle of Man will be taxed on the profit attributable to the Isle of Man establishment.

The majority of companies pay income tax at 0% in the Isle of Man.

A 10% rate of tax applies to income received by a company from any of the following sources:

- Banking business.
- Land and property in the Isle of Man (including property development, residential and commercial rental or property letting, and mining and quarrying, but excluding farming).

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, or a combination of both rates. Both resident and non-resident companies are taxed on their income at the same rates.

Unilateral relief from double taxation in respect of foreign-source income is given by way of tax credit.

Local income taxes

There are no profit based taxes levied by local government in the Isle of Man. However, commercial business rates are payable. Premises are assessed and given a 'rateable value' that forms the basis of the annual rates charge levied.

Corporate residence

A company incorporated in the Isle of Man is automatically resident for tax purposes and must therefore file an annual income tax return whether it pays tax at 0% or 10%.

A company which is incorporated elsewhere will be considered resident in the Isle of Man if it is 'managed and controlled' in the Isle of Man, and will be taxed on their worldwide income accordingly. 'Managed and controlled' is generally interpreted as being the place where the board of directors meets, although this is not always conclusive.

In cases where a company is resident in a country with which the Isle of Man has a tax treaty, then a tie-breaker may operate to determine residence.

Other taxes

Value-added tax (VAT)

VAT is a transaction based tax applied on the domestic supply of most goods and services and is currently charged at a standard rate of 20%. VAT is designed to be a tax borne by the final consumer, and there is a mechanism for businesses to recover VAT incurred in a supply chain, subject to meeting certain conditions.

For VAT purposes, the Isle of Man forms a single VAT jurisdiction with the United Kingdom (UK), and the VAT rules are broadly identical. This means that VAT is charged on supplies between Isle of Man and UK businesses as if they were domestic supplies. The Isle of Man has its own tax authorities who work in conjunction with the UK tax authorities.

Some supplies are charged at 0%, including food, books and publications, and public transport, and there is also a 5% rate applying to domestic property repairs, amongst others. Finally, some supplies are exempt from VAT, including insurance and financial services, betting and gaming, education, and health.

Customs and excise duties

In addition to VAT, the Isle of Man forms a common jurisdiction for customs and excise duties with the United Kingdom, and, again, the rules are broadly identical. Customs duties are levied on most goods imported from outside the European Union (EU) into the Isle of Man, and there are various rates of duty which apply. Excise duties apply to such things as alcohol, tobacco, and fuels, and there are various rates of duty which apply. There is also a levy on commercial passenger flights known as Air Passenger Duty.

Isle of Man

Property taxes

There are no property related taxes for companies other than income tax payable at a rate of 10% on their profits from the rental or development of land or property situated in the Isle of Man, and business rates as detailed in the *Taxes on corporate income section*.

Transfer taxes

There are no capital transfer taxes in the Isle of Man.

Stamp taxes

There is no stamp duty payable in the Isle of Man.

Betting duty

There are no other transaction taxes in the Isle of Man other than betting duty on gaming transactions, which is levied at differing rates of up to 15%, depending on the nature of the gaming transaction and whether it is online or land based.

Branch income

The income of branches is taxed in the same way as other corporate income in the Isle of Man. Consequently, Isle of Man resident companies with branches overseas are taxable on their worldwide income (although relief may be available for any foreign tax paid). Foreign companies with branches in the Isle of Man will be taxed at the appropriate rate on the profits attributable to the Isle of Man establishment.

Income determination

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, or a combination of both rates.

Inventory valuation

Inventories are generally stated at the lower of cost or market value. Any method of valuation that accords with sound commercial principles is acceptable for tax purposes, provided it is adopted consistently at the beginning and end of the accounting period and does not conflict with tax law. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base stock method or the last in first out (LIFO) method.

In general, the book and tax methods of inventory valuation must conform.

Capital gains

There is no capital gains tax in the Isle of Man.

Dividend income

Dividends are taxed at the standard rate of 0%. Dividends received from Isle of Man companies will not have suffered WHT.

Banking income

Licensed banks are taxed at 10% on income from deposit taking and any related activities, and interest earned from the investment of regulatory reserves only.

Income earned on capital and reserves in excess of the regulatory capital, group funded lending, fiduciary deposits, assurance, insurance, custody, trust, and corporate services are not banking business and are therefore taxed at 0%.

General expenses are allocated against 0% and 10% income streams on a pro rata basis.

Rental income

Companies with profits arising on rental income in respect of land or property situated in the Isle of Man are charged to income tax at a rate of 10%. This applies whether or not the company is resident in the Isle of Man.

Foreign income

Resident corporations are liable to tax on their worldwide income (albeit the relevant rate of tax is often 0%). UK tax is relieved under the treaty with the United Kingdom by way of tax credits. However, the treaty does not cover dividends or debenture interest. Where a liability to tax at 10% arises, the Isle of Man grants unilateral relief from double taxation in respect of all foreign-source income arising outside the United Kingdom by way of tax credit.

I

Deductions

Relief is given in calculating the taxable profit of a company if the expense is incurred in the normal course of the business and is incurred wholly and exclusively for business purposes. However, certain expenses which are deductible in the computation of profits are not allowable for tax purposes. These include depreciation, unpaid but accrued pension and bonus payments, certain lease payments, and interest paid to non-Manx resident lenders.

Depreciation

Depreciation charged in accounts is not allowable for tax purposes. Instead, relief for depreciation is given using 'capital allowances' based on a reducing-balance method. Plant and machinery, tourist premises, industrial buildings, commercial buildings within a designated area, fish processing buildings, and agricultural buildings and works have an initial allowance of 100%. There are restrictions on allowances for expensive motorcars.

Isle of Man government grants are not taken into account in determining the amount of expenditure on which allowances may be given.

Tax depreciation is not required to conform to book depreciation.

Upon disposal, allowances will be reclaimed on the resale value, restricted to cost.

Goodwill

No relief is given against trading profits for the purchase of goodwill.

Start-up expenses

Start-up expenses incurred in the three years prior to the commencement of trading, which would have been deductible as a trading expense if incurred after the commencement of trading, are treated as a loss arising in the year trading commenced, and relief for these losses can be claimed subject to the normal loss relief rules.

Isle of Man

Interest expenses

Interest paid to lenders subject to Isle of Man tax is allowable in full. Interest paid to lenders not subject to Isle of Man taxation is allowable if it is incurred in the normal course of the business and is wholly and exclusively for business purposes. Only interest charged at a reasonable commercial rate will be allowed as a deduction.

Bad debt

Relief against trading profits is only available in respect of specific bad debts. General provisions are not allowable.

Charitable contributions

Broadly, trading companies are able to claim a deduction for donations made to charities subject to a maximum of 15,000 Isle of Man pounds (IMP) or 1% of their taxable income, whichever is greater.

Fines and penalties

No relief is available for any payments made in respect of fines or penalties, whether related to income tax compliance or otherwise.

Taxes

Local income taxes paid are not deductible when calculating net taxable profit.

Net operating losses

Losses can be carried forward indefinitely against future profits from the same trade.

Trading losses incurred may be carried back against preceding year profits. There are additional rules which apply in the opening years of trade. Terminal losses in the last year of trade can be carried back against profits for the previous three years of trading.

Payments to foreign affiliates

There is no transfer pricing regime in the Isle of Man. If, however, the Assessor of Taxes is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction of tax liability.

For details of WHTs, please see the Withholding taxes section.

Group taxation

Trading losses and excess capital allowances may be surrendered (subject to certain restrictions) between 75% affiliates resident in the Isle of Man. Similar concessions are available to members of a consortium, but only a fraction of the loss or excess may be set-off, that fraction being equal to the members' share in the consortium in the relevant year of assessment.

Transfer pricing

There is no transfer pricing regime in the Isle of Man. If, however, the Assessor of Taxes is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction of tax liability.

Thin capitalisation

There is no specific thin capitalisation rule in the Isle of Man.

Controlled foreign companies (CFCs)

There is no CFC regime in the Isle of Man.

Tax credits and incentives

In view of the low rate of income tax in the Isle of Man, there are no special tax incentives available.

Foreign tax credit

See *Foreign income in the Income determination section* for a description of foreign tax credits.

Withholding taxes

WHT should be deducted from certain payments made to non-residents by Isle of Man resident companies as follows:

- Rent from Manx land and property: 10% if paid to a company, 20% if paid to an individual.
- Dividends: WHT is not required.
- Loan interest and royalties: WHT is generally not required, but there are certain exceptions which may apply.
- Other: The Assessor of Income Tax in the Isle of Man has the power to require WHT, at a rate determined by the Assessor (typically 20%), on payments of taxable income made to a non-resident (e.g. payments made to non-resident sub-contractors).

Tax administration

Taxable period

An accounting period for tax filing purposes can be no more than 12 months.

Tax returns

All companies are required to submit income tax returns on an accounting period basis, whether they are liable to tax at 0% or at 10%. The tax return is due for submission one year and one day following the end of an accounting period. Where the financial statements cover more than 12 months, two (or more) returns may be required.

Fixed rate penalties apply if returns are filed late. The Assessor of Taxes also has the powers to raise a default assessment where a tax return has not been filed.

Payment of tax

Payment of tax is due within one year and one day of an accounting period end. Interest is charged on tax paid late.

Audit cycle

Companies are subject to an audit of their accounts on an annual basis unless they qualify for exemption under the regulatory codes and guidelines issued by the Isle of Man General Registry.

Where a company qualifies for exemption from the audit requirement, it must make an election during the course of the relevant financial period.

Isle of Man

All Isle of Man registered companies are required to file an annual return to the Isle of Man Companies Registry.

Statute of limitations

Generally, the Assessor of Taxes may make an enquiry into a tax return no later than 12 months from the date that the tax return is delivered to the Assessor.

If, however, the Assessor discovers that income tax has not been assessed that should have been assessed, the Assessor is able to make an assessment of that tax within a period of for years from the end of the relevant accounting period.

The Assessor also has powers to require the production of documents.

Topics of focus for tax authorities

The Isle of Man government is focussed on delivering openness and transparency across all areas of Isle of Man taxation. The government and the Tax Authorities work closely with international bodies such as the EU Code of Conduct group and the EU's Economic and Financial Affairs Council to ensure that the Island is fully compliant with international standards in areas such as tax transparency and exchange of information. The Island is already recognised on the Organisation for Economic Co-operation and Development (OECD) White List as being in the top tier of countries for transparency and information exchange.

In addition to maintaining its international position, the tax authorities are keen to engage taxpayers on important issues through consultation on key areas. It is also striving to maintain and improve its services and levels of efficiency through the continued expansion of its range of services available online.

Other issues

Tax treaties

The Isle of Man signed a comprehensive DTA with Qatar in May 2012, bringing the total number of treaties to five. The DTA with Belgium, signed in July 2009, is still awaiting ratification.

The Isle of Man now has a total of 30 TIEAs, including those signed during 2011 with Canada, India, Poland, Mexico, Japan, Indonesia, Slovenia and, most recently, the Czech Republic.

Choice of business entity

There are several different entities through which businesses may operate in the Isle of Man. These include companies, limited liability companies, partnerships, limited partnerships, and protected cell companies.

Significant developments

The Israeli Parliament passed legislation on 6 December 2011 that is based on the tax reform proposals issued by the Committee for Socioeconomic Change (the Committee), a state-appointed committee headed by Professor Manuel Trajtenberg whose proposals were aimed at lowering living costs and economic inequality. The tax amendments are generally effective as of 1 January 2012 and include the following developments:

- As of January 2012, the corporate tax rate has been increased to 25% for 2012 and thereafter.
- During 2011, a 20% tax rate generally applied to interest income, dividend income, and capital gains. A 25% rate applied to dividend income and capital gains generated by shareholders owning 10% or more in a company. As of January 2012, the 20% rate has been increased to 25%, and the rate on dividend income and capital gains for 10% or more shareholders has been increased from 25% to 30%. It should be noted that for foreign residents these taxes may be exempt or reduced in accordance to the provisions of local legislation or an applicable tax treaty.

Taxes on corporate income

Israel incorporated companies and foreign companies that have a branch presence in Israel are both subject to Israeli corporate tax. An Israeli-resident entity is subject to Israeli corporate tax on worldwide income while a non-resident entity is subject to Israeli corporate tax only on income accrued or derived in Israel. Income sourcing rules determine when income is to be considered from an Israeli source.

As of January 2012, the scheduled corporate tax rate reductions have been cancelled and the corporate tax rate has been increased to 25% (from 24%) for 2012 and thereafter.

Approved enterprises are subject to reduced rates of tax depending upon the level of foreign ownership and location (*see the Tax credits and incentives section*).

Local income taxes

Israel does not impose local taxes on corporate income.

Corporate residence

The following are considered to be resident in Israel:

Israel

- A company incorporated in Israel.
- A company whose business is managed and controlled from Israel.

In the absence of a definition of the term ‘management and control’ either in Israeli legislation or a direct discussion of this term by the Israeli courts, it may be difficult to determine whether a company that is incorporated outside of Israel shall be viewed as managed and controlled from Israel. This is a complex subject that needs to be addressed on a case by case basis. When an entity is both an Israeli tax resident and a resident of a foreign jurisdiction which is party to an income tax treaty with Israel, most treaties provide a tiebreaker test in the determination of an entity’s tax residency.

Permanent establishment (PE)

Foreign resident entities might be exempt from corporate tax to the extent that its activities do not constitute a PE under the tax treaty applicable between Israel and the foreign resident’s country of residency.

Whether a non-resident has a taxable presence under Israeli domestic tax law is far less clear than the definition of PE under a relevant tax treaty. There is no detailed legislation or Israeli court decisions which directly address this issue.

Other taxes

Value-added tax (VAT)

The current rate of VAT is 16%.

Exports of goods and certain services and various other transactions are zero-rated, and certain transactions are exempt. Banks and other financial institutions pay VAT-equivalent taxes at the rate of 16% based on their total payroll and on profits. Not-for-profit organisations pay VAT (wage tax) at the rate of 8% of their total payroll.

Customs duties

Customs duty is imposed on certain products imported into Israel. The rates of duty depend upon their classification according to the Harmonised Customs Tariff and the country of origin. Israel has concluded free-trade agreements with the United States, Canada, Mexico, the European Union (EU), and the European Free Trade Association (EFTA).

Excise taxes

The government imposes excise taxes on a variety of goods (e.g. fuel, tobacco). The excise taxes are levied item-by-item.

Municipal tax

Municipal tax is levied annually on buildings by local municipalities based on the size, location, and purpose of the property.

Real estate - capital gains

Capital gains on real estate are subject to the Land Appreciation Tax Law. The law relates to any real estate in Israel, including houses, buildings, and anything permanently fixed to land; real estate rights; and leases for 25 years or more. Tax calculations closely follow the calculation of company tax on capital gains (*see Capital gains in the Income determination section*).

The tax rate on the real gain is the applicable corporate tax rate (25% in 2012).

A special tax rate may apply with respect to real estate acquired prior to 1960.

Transfer tax

The purchaser of real estate is generally subject to acquisition tax at rates of 0.5% up to a maximum of 5%.

Stamp taxes

There are no stamp taxes imposed in Israel.

Employer's national insurance contributions

Employers are obliged to pay national insurance contributions based on a percentage of each employee's income on a monthly basis. Employers are responsible for withholding employees' contributions from wages and remitting these together with the employer's own contributions. The employer's contribution rates (current as of May 2012) for Israeli-resident employees are 3.45% up to monthly income of 5,171 Israeli shekels (ILS) and 5.9% on the difference between ILS 5,171 and the maximum monthly income of ILS 41,850.

For non-resident employees, the employer rates are significantly lower and are 0.49% up to monthly income of ILS 5,171 and 1.17% on the difference between ILS 5,171 and the maximum monthly income of ILS 41,850. The minimal National Insurance payments for non-resident employees do not provide any retirement benefit for the non-resident but generally provides a certain element of work accident coverage.

When an irregular salary payment in excess of one quarter of the usual salary is made, special provisions apply to the computation of social charges by which the application of this payment is equally attributed to the current month and to the past 11 months.

Israel has social security totalisation agreements with 14 countries which may allow for an exemption from Israeli National Insurance throughout the employment period of the employee in Israel.

Branch income

A branch is liable for tax at the standard corporate rate on Israel-source income. No tax is withheld on transfers of profits to the foreign head office unless the branch is an approved enterprise (*see the Tax credits and incentives section*).

Income determination

In general, the annual results (i.e. the excess of income over expenses or vice versa) of an Israeli company or branch, as detailed in the taxpayer's financial statements, form the basis for computing the taxable income of the business.

The base amount is then adjusted pursuant to the provisions of the tax law to arrive at 'taxable income'.

Inventory valuation

Inventories are generally valued at the lower of cost or market value (i.e. net realisable value). Conformity is required between book and tax reporting of inventory. The first in first out (FIFO) or weighted-average basis of valuation is acceptable; the last in first out (LIFO) method is not accepted.

Israel

Capital gains

Capital gains tax is generally payable on capital gains by residents of Israel on the sale of assets (irrespective of the location of the assets) and by non-residents on the sale of the following:

- Assets located in Israel.
- Assets located abroad that are essentially a direct or indirect right to an asset or to inventory, or that are an indirect right to a real estate right or to an asset in a real estate association, located in Israel. Taxation applies only in respect of that part of the consideration that stems from the above property located in Israel.
- Assets that are a share or the right to a share in an Israeli entity.
- Assets that are a right in a foreign resident entity which is essentially a direct or indirect right to property located in Israel. Taxation applies only with respect to that part of the consideration that stems from the property located in Israel.

The cashless transfer of rights and assets arising from certain mergers, spin-offs, and asset transfers may be exempt from tax upon meeting various requirements.

Determination of the capital gain - Computation of real gain and inflationary components

Company tax on capital gains is imposed on the disposal of fixed and intangible assets where the disposal price is in excess of the depreciated cost.

For tax purposes, the capital gain is generally calculated in local currency, and there are provisions for segregating the taxable gain into its real and inflationary components. The inflationary amount is the original cost of the asset, less depreciation (where applicable), multiplied by the percentage increase in the Israeli consumer price index (CPI) from the date of acquisition of the asset to the date of its sale. The inflationary amount component is exempt to the extent it accrued after 1 January 1994 and is generally subject to tax at the rate of 10% if it accrued before that date.

The real gain component, if any, is taxed at the rates set out further below.

A non-resident that invests in capital assets with foreign currency may elect to calculate the inflationary amount in that foreign currency. Under this option, in the event of a sale of shares in an Israeli company, the inflationary amount attributable to exchange differences on the investment is always exempt from Israeli tax.

Sale of assets (including publicly and non-publicly traded shares)

The real gain is generally subject to tax at the corporate tax rate applicable in the year of the gain (25% in 2012). Special exemptions may apply for non-residents (*see further below*).

Special rule for retained profits upon sale of shares

In the case of a disposal by corporations of: (i) non-traded shares and (ii) traded shares when the seller generally directly or indirectly holds at least 10% of the sold Israeli company during the 12-month period preceding the sale, special provisions apply to such part of the real gain which is attributed to the seller's share of retained profits. The share of retained profits is the amount of gain equal to the proportional part of the retained profits of the company that the seller of the shares would have rights to by virtue of those shares. Detailed rules apply in determining this profit component.

Generally, the seller's proportionate part of the company's retained profits is taxed as if this amount had been received as dividends immediately before the sale (i.e. at a tax

rate of 0% in the case of an Israeli-resident corporate shareholder or at a tax rate of 30% when the seller is a non-Israeli resident corporate shareholder that generally holds 10% or more in the rights of the Israeli company, subject to a reduced rate in accordance with the provisions of an applicable tax treaty). The part of the retained profits that is attributed to the period ending on 31 December 2002 is subject to tax at the rate of 10%.

Special exemptions for non-residents

Publicly traded Israeli shares

Non-residents corporations not having a PE in Israel are exempt from tax on capital gains from the sale of shares of an Israeli company traded on the Israeli stock exchange or on a foreign stock exchange.

Where the shares were purchased by the non-resident prior to being publicly traded, capital gains tax applies for the portion of the gain that was generated up to the day of the share's public listing but not to exceed the capital gain actually arising upon the sale of the share and provided that the value on the day of public listing was more than their value on the date of purchase and that the proceeds upon sale exceeded the value on the date of purchase.

Non-publicly traded shares

For purchases after 1 January 2009, an exemption exists under domestic law for non-residents, regardless of their percentage holding in an Israeli company, from gains derived from the sale of securities not traded on a stock exchange, provided the following conditions are met:

- The investment is not in a company the majority of whose assets are real estate assets in Israel.
- The capital gains were not derived by the seller's PE in Israel.
- The shares were not purchased from a relative (as defined in the Income Tax Ordinance [ITO]) or by means of a tax-free reorganisation.

For shares purchased between 1 July 2005 and 1 January 2009, more restrictive conditions apply in order to be eligible for the exemption. Detailed rules apply.

Treaty exemption

Non-residents may qualify for a tax treaty capital gain exemption depending upon the particular circumstances and the provisions of the applicable tax treaty (e.g. in some tax treaties, no capital gains exemption is allowed where the holding in the sold Israeli company exceeds a certain percentage).

When assets are attributable to an Israeli PE or are real estate rights (including rights in a real estate association), a treaty exemption will generally not be available.

The Israel Tax Authority (ITA) is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes.

Capital losses

Capital losses may offset all capital gains (including gains from Israeli or foreign securities) and gains from the sale of property (whether Israeli or foreign source).

Israel

Where the capital loss is from a non-Israeli asset (including when carried forward into future years), the loss must first be offset against foreign source capital gains.

Capital losses derived from the sale of securities may also be offset against interest and dividend income generated from the sold security and also against interest and dividend income received from other securities (where the income was not subject to tax of more than 25%).

Capital losses from the sale of shares are generally reduced by any dividends received by the selling corporation during the 24 months preceding the sale, where tax on the dividends of at least 15% was paid.

Capital losses can generally be carried forward indefinitely and set-off only against capital gains.

Exit tax

When an Israeli tax resident, including a company, ceases to be an Israeli resident for tax purposes, its assets are deemed to have been sold one day before it ceased being an Israeli resident. Although exit tax is primarily applicable to individuals, this might also apply to corporations incorporated outside of Israel whose management and control is transferred from Israel to another jurisdiction at a particular time.

Any gain attributable to the deemed sale of assets may be paid on the day the residency ceased or it may be postponed until the date the assets are actually realised. When the tax event is deferred to the sale date of the assets, the amount of the Israeli capital gain portion is determined by taking the real capital gain at the time of realisation, multiplied by the period of ownership from the day on which it acquired the asset until the day it ceased being an Israeli resident, divided by the entire period from the day of the asset's acquisition until the day of realisation. The Minister of Finance is authorised to prescribe provisions for the implementation of the exit tax including provisions for the prevention of double taxation and the submission of tax reports, but no provisions have yet been issued.

Dividend income

Received by an Israeli-resident company

Dividends received by an Israel-resident company from another Israeli-resident company which originate from income accrued or derived in Israel are exempt from corporate tax, except for dividends paid from income of an approved enterprise (*see the Tax credits and incentives section*). This affords the opportunity to transfer after tax profits within an Israeli group of companies for further investment.

Dividends received by an Israeli-resident company from a non-resident company as well as dividends received from an Israeli company which arise from foreign source income of the distributing company are generally taxable for the receiving company at the rate of 25%. Under certain circumstances, the receiving company may elect to be taxed on such dividends at the corporate tax rate, in which case it would also be entitled to a foreign tax credit with respect to corporate taxes paid by the company distributing the dividend (i.e. an 'underlying' tax credit).

Received by a non-resident shareholder

Dividends received by a non-resident shareholder from an Israeli company are generally subject to tax at the rate of 25% (30% if paid to a 10% or more shareholder), subject to a reduced rate of tax under an applicable tax treaty.

Several of Israel's tax treaties have very beneficial withholding tax (WHT) rates for dividends being paid from Israel. The ITA is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes. Furthermore, many of the treaties contain a beneficial ownership clause as a condition to enjoying the treaty WHT rates.

Interest income

Received by an Israeli-resident company

Interest income received by an Israeli-resident company is subject to the regular corporate tax rate (25% in 2012).

Received by a non-resident

Interest income received by a non-resident company is generally subject to tax at the rate of 20% or subject to a reduced rate of tax under an applicable tax treaty.

Interest received by a non-resident from deposits of foreign currency with an Israel bank is exempt from tax, subject to certain conditions.

Rent/royalties income

Rent and royalty income, less allowable deductions for tax purposes, is subject to tax at the regular corporate tax rate (25% in 2012).

Partnership income

From an Israeli tax perspective, a partnership is, in principle, a fiscally transparent vehicle. Accordingly, Israeli tax law does not tax partnerships as such, but generally each partner is taxed in respect of its share of the partnership income, with the taxable income allocated to a corporate partner taxed at the regular company tax rate. Consequently, the actual distribution of partnership income to a partner is a non-taxable event.

Foreign income

An Israeli-resident company is liable for tax on its worldwide income. Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty (*see the Tax credits and incentives section*).

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of the undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Deductions

Costs incurred by a branch or a company are deductible as a business expense for tax purposes where they are incurred 'wholly and exclusively in the production of income'. The amount of the deduction may be limited or disallowed further to other ITO provisions and income tax regulations.

Israel

Depreciation

The ITO and tax regulations prescribe standard annual rates of tax depreciation for assets serving in the production of taxable income. Depreciation is generally on a straight-line basis for industrial and other enterprises based on the specific asset types as set out in the tax regulations.

Accelerated rates of depreciation may be available in regard to certain activities (such as industrial) where there is unusual wear and tear due to additional shifts of equipment use. Detailed rules apply.

Depreciation is not permitted on land.

Goodwill

In general, under Israeli tax regulations, goodwill purchased after 1 July 2003 may be amortisable by the purchaser over a 10-year period (10% annually).

Organisational and start-up expenses

Organisational and start-up expenses are generally not immediately deductible but rather are to be capitalised for tax purposes.

Interest expenses

Interest expenses incurred in the production of taxable income are generally deductible. Since there are no thin capitalisation rules in Israel, there are no specific debt-to-equity ratio requirements and there is no limit to the amount of debt that may be used in establishing a branch or local company operation in Israel. Interest and linkage payments arising from late tax payments are generally not deductible for tax purposes. Interest charges between related parties must be set based on transfer pricing principles. Detailed rules apply.

Bad debt

Provisions for bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

Charitable contributions

Charitable contributions do not constitute a regular business expense. However, a tax credit may be available (*see Tax credit for donations in the Tax credits and incentives section*).

Research and development (R&D) costs

Special tax relief is provided under the ITO for R&D costs incurred (*see the Tax credits and incentives section*).

Pension expense

Pension fund contributions made to recognised funds are generally deductible for the employer provided *inter alia* the contributions do not exceed a prescribed level and are effected on a regular basis.

Directors' fees

Payments for commercially justifiable director fees should generally be deductible.

Accrued expenses

Payments are generally deductible on an accrual basis for commercially justifiable expenses representing arm's-length consideration. However, when payments made to foreign residents attract WHT, the deduction will generally be allowed provided the

payment is effected within the tax year. Alternatively, such payments may be deductible in a tax year if the applicable WHT is deducted within three months after the tax year-end and remitted to the tax authorities within seven days of the deduction, together with index linkage differences and interest accrued since the year-end.

However, accrued expenses for severance pay, vacation pay, recreation pay, holiday allowances, and sick pay are not deductible, even if there is an obligation to make these payments. They are only deductible in the year in which they are actually paid to the beneficiary or to a recognised fund.

Contingent liabilities

Based on Israeli court decisions, contingent liabilities may be deductible for tax purposes upon satisfying the following criterion: (i) according to accepted accounting principles, the taxpayer must include in its balance sheet a suitable provision for the potential liability; otherwise, its income will be considered to have been incorrectly reported; (ii) the circumstances of the case and the technical means according to accepted accounting practice must be provided, enabling a determination of the amount of the liability; and (iii) there is a high probability that the potential debt with respect to which the provision was made will become an absolute debt.

Excess (disallowed) expenses

Israeli tax law disallows the partial deduction of certain employee-related expenses incurred by a company doing business in Israel. These include so-called 'excess expenses'. Examples of these are (i) payments for business, travel, and meals which exceed allowable deductions; (ii) expenses incurred in respect of a benefit granted by an employer to its employees but which cannot be attributed to a particular employee; and (iii) certain vehicle maintenance expenses (all expenses relating to a company owned vehicle that was also designated for use of an employee are generally tax deductible).

A company is obliged to pay a monthly advance on excess expenses in the amount of 45% of the excess expense. The amount paid as an advance in respect of excess expenses is deemed a payment on account of the regular tax advances and payments that the company must pay for corporate income tax and is offset against them, but it is not refundable (i.e. when a taxpayer's tax liability in a given year is lower than the excess expense advances paid, the unutilised amount shall be carried forward to future tax years). Detailed rules apply.

Fines and penalties

Payment of fines and penalties are generally not deductible.

Taxes

Municipality taxes incurred in the production of taxable income are generally deductible.

Net operating losses

Business losses can be offset against income from any source in the same year. Loss carrybacks are not allowed. Losses may be carried forward and set-off without time limit against income from any trade or business or capital gains arising in the business, but not against income from any other source.

Payments to foreign affiliates

Payments of interest, royalties, and management fees to foreign affiliates are deductible if based on normal commercial terms and practices and evidenced by an inter-company

Israel

agreement and transfer pricing documentation. Where such payments attract WHT, the deduction will only be allowed where such tax has been withheld and paid in accordance with certain requirements. All cross-border payments to foreign affiliates for goods and services have to comply with arm's-length pricing standards (see *Transfer pricing in the Group taxation section*).

Group taxation

As a general rule, a parent company and its subsidiaries may not submit consolidated tax returns. Only groups of industrial companies in the same line of business, as well as parent companies that control industrial companies in the same line of business and have at least 80% of their assets invested in industrial companies, are eligible to file consolidated tax returns.

Transfer pricing

The ITO and its accompanying regulations contain elaborate transfer pricing provisions, including the arm's-length principle, which apply to any international transaction in which there is a special relationship between the parties to the transaction and for which a price was settled on for property, a right, a service, or credit. In general, the regulations are based upon internationally recognised transfer pricing principles (i.e. United States tax regulations or Organisation for Economic Co-operation and Development [OECD] rules). These regulations generally require the taxpayer to support the pricing of international transactions with a transfer pricing study, inter-company agreements, and other documentation. In accordance to Israeli High Court Rulings, the terms of transaction conducted between related parties should be set in written contracts.

Since transfer pricing is a subject that receives considerable attention from the ITA in its examination of related inter-company transactions, transfer pricing principles and documentation requirements should be carefully adhered to.

A taxpayer is required to include in its annual corporate tax return a special form entitled 'Declaration of International Transactions' providing details for every cross-border transaction conducted with related parties. The taxpayer must sign the form which includes a declaration that the transactions with related parties abroad were in accordance with the arm's-length principle, as defined in the Israeli transfer pricing regulations promulgated under the ITO. As a result of this form and declaration, the importance of appropriate transfer pricing documentation has increased.

Thin capitalisation

Israel has no statutory or regulatory provisions or other rules concerning thin capitalisation for tax purposes as exist in certain other jurisdictions. Since there are no thin capitalisation rules and Israel has no specific debt-equity ratio requirements, a company may be financed with minimum capital and there is no limit to the amount of debt that may be used. Transfer pricing principles shall generally apply with regards to interest charges.

Controlled foreign companies (CFCs)

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of certain undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). A CFC is a company to which a number of cumulative conditions apply including that most of its income or profits in the tax

year were derived from passive sources (e.g. capital gains, interest, rental, dividend, royalties) and such passive income has been subject to an effective tax rate that does not exceed 20%.

Tax credits and incentives

Foreign tax credit

Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty. The foreign tax credit is limited to the Israeli corporate tax payable with respect to the same income. Foreign sourced income is divided into 'baskets' (i.e. categories) on the basis of the income source (e.g. dividends, business income), and a particular credit limitation applies to each basket. Excess uncredited foreign income can be carried forward for the subsequent five tax years.

Approved enterprises (AEs)

AE status, which provides for cash and tax benefits, may be granted under the Law for the Encouragement of Capital Investments (the Law) to enterprises that increase the productive capacity of the economy, improve the balance of payments, or provide new employment opportunities.

The Law differentiates between three geographical regions (A, B, and C). Area A enjoys the most incentives, while Area C (generally the central area of the country) enjoys the least amount of incentives.

New AE programmes and expansion of prior existing AE programmes are governed by the Law, which underwent a major amendment on 29 March 2005 (2005 Amended Law) and also on 29 December 2010 (2011 Amended Law), effective for 2011 and thereafter.

AE programmes which commenced their period of benefits generally prior to 2005 may still be subject to the Law's provisions prior to these amendments.

The 2011 Amended Law is intended to simplify the manner of taxation that applies to income generated from an AE by applying a uniform tax rate for all AE-generated taxable income. Prior to these amendments, as summarised below, the corporate tax rate applicable to an AE depended upon many factors, including the tax route selected, the geographical area in which the industrial site is located, the level of foreign investment ownership, and attribution of taxable income between different tiers of AE plans further to complex formulas.

It should be noted that the 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to these amendments or to choose, in any tax year, to commence to apply the new provisions of the Law and to waive the remaining benefit period those AE benefits provided under the Law prior to its amendment. It should also be noted that once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years. Moreover, as part of the transition rules, an AE owner is generally allowed to elect until 2012 to apply for a new AE status under the terms of the Law in effect prior to its amendment, so long as part of the relating investment was made during 2010. This election can allow the AE owner to further extend the benefits available under the terms of the Law prior to the legislation.

Israel

This general overview will address the Law as applicable prior to the 2011 Amended Law as well as setting forth the material tax law changes under the 2011 Amended Law.

We would caution that our comments in regard to the 2011 Amended Law should be regarded as preliminary in nature and they do not address all of the legislative changes. Further detailed rules apply and certain areas still await further legislation and clarifications as to the Israeli Income Tax Authorities' interpretive positions.

Cash grants (applicable also under the 2011 Amended Law)

Approved enterprises located in development areas A and B are eligible for cash investment grants, which vary according to the geographic location of the enterprise. Under the 2011 Amended Law, only AEs that operate in Area A are eligible for grants. Grant amounts and conditions are subject to governmental change from time to time.

AE tax incentives prior to 2011 Amended Law

Reduced tax rates

In addition to financial incentives for the establishment or expansion of an AE, various tax incentives are available once a new AE or expansion thereof is operational.

The reduced tax rates generally apply for a seven-year benefit period (or a ten-year period in certain cases of local companies established in development area A or in the case of a foreign investor company, see below), commencing with the year in which the AE first generates taxable income.

Generally, this seven or ten-year period of benefits is limited to 12 years from the year of implementation. For AE plans governed prior to the 2005 amendment to the Law, the period of benefits cannot extend beyond 12 years from the year the enterprise commenced its operations or beyond 14 years from the year in which approval of status as an AE was granted, whichever is earlier.

Locally owned companies

Income derived by a company from an AE during the maximum seven-year period of benefits is generally subject to company tax at a rate of 25%.

A WHT rate of 15% (subject to a possible reduction under a tax treaty) applies to dividends paid from profits of an approved enterprise earned during the benefits period, if distributed either during the benefits period or during the subsequent 12 years. Note that dividends from non-approved enterprise profits that are paid to non-residents are generally subject to a maximum 25% WHT rate that may be further reduced under the terms of a relevant tax treaty.

Foreign investors' companies (FIC)

A company that qualifies as a FIC is entitled to enhanced tax benefits on AE income. In general, a FIC is a company having more than 25% of its share capital (in terms of rights to shares, profits, voting, and the appointment of directors) and its combined share capital and investor loan capital owned by foreign residents. To qualify for FIC status, a foreign investor must make an investment in the company of at least ILS 5 million.

A FIC benefits from reduced company tax on the profits of an AE for a period of ten years (instead of seven years) commencing with the first year in which taxable income is generated. The total period of benefits is restricted as discussed above.

A FIC enjoys reduced company tax rates applicable to its AE income as shown below:

Percentage of foreign ownership	Company tax rate (%)
Over 25% but less than 49%	25
49% or more but less than 74%	20
74% or more but less than 90%	15
90% or more	10

The foreign ownership percentage is annually determined as the lowest level retained during the specific tax year.

Dividends paid by a FIC out of the profits of its AE are subject to tax in the hands of the recipient at the rate of 15%, without limitation as to their distribution date, provided the dividends are distributed out of AE profits derived during the benefits period.

Alternative system of tax benefits for AEs (tax holiday)

Companies with new or expanding AEs may elect to forego all government cash grants and receive instead a total exemption (i.e. tax holiday) from company tax on undistributed profits of the approved enterprise for ten years in development area A, for six years in development area B, and for two years in development area C. The area of incentive being the area in which the company's facilities are located.

The tax holiday provides an Israeli tax exemption so long as the AE profits generated in the exemption period are retained within the company. Should a subsequent distribution of such profits occur, company tax and dividend WHT is imposed on the income distributed, at the rates which would have been applicable if the tax holiday had not been elected (i.e. 25% or at a lower rate if the company is a FIC with a foreign ownership percentage of 49% or more during those years).

Under certain anti-avoidance provisions applicable to tax holidays, amounts paid or credited directly or indirectly by an approved enterprise to a relative, a major shareholder, or to a related entity controlled by either a relative or a major shareholder may be treated as a deemed taxable distribution of profits by the AE.

Ireland track and strategic investment track

For companies having an AE in development area A that seek to distribute dividends while maintaining a low company and dividend tax burden, there is an 'Ireland track' under which the aggregate Israeli corporate and dividend WHT for a foreign resident shareholder is 15% and for an Israeli resident shareholder is 24.8%. This track is in contrast to the standard alternative benefit track discussed above, which provides a tax holiday provided that profits remain undistributed.

Furthermore, a 'strategic investment track' allows for an exemption during the benefit period from company tax and dividend WHT for a company having (depending on its location within Area A of the country) very significant investment and revenue levels. This means that during the benefits period, a company eligible for benefits from income accrued under this track will have no tax liability whatsoever for its productive activity arising from such investment and for the distribution of profits. Detailed rules apply to these tracks.

Israel

Qualifying for AE status

Minimal investment amount

For entitlement of tax benefits under the alternative benefit track, there must be a certain minimal investment amount ('Minimum qualifying investment') towards purchasing productive assets (e.g. machinery and equipment, but not buildings) within three years.

In the case of a new factory, the minimum required investment is ILS 300,000.

For expansion of a factory, the amount of required investment is ILS 300,000 or the amount based on the formula shown below, whichever is higher:

Value of productive assets in the factory in the tax year prior to the year the minimum qualifying investment commences (in ILS million)	Amount of investment required expressed as a percentage of the value of the productive assets (%)
Up to 140	12
140 to 500	7
Above 500	5

Detailed rules apply in determining how to value the assets for purposes of these tests (including in regards to AEs operated by affiliated companies).

For AE plans governed by the Law prior to its amendment, a general condition for approval is that a minimum of 30% of the investment in fixed assets must be equity-financed.

For investors wanting to expand their current AE, a new requirement has been added to the Law that demands at least a two year waiting period before an investor can obtain AE status for its new investments. Upon completion of these investment conditions, the taxpayer must file the election of the investments implementation year. Such election must generally be filed by the filing date of the relevant annual tax return but no later than 12 months from the end of that tax year.

Automatic approval

Where an investment project meets all of the eligibility criterion under one of the alternative tracks (standard alternative track, Ireland track, or strategic investment track) as set out in the Law and in regulations to be issued, a project will automatically qualify for the AE taxation benefits under the Law with no need for prior approval from the ITA (i.e. a 'green lane'). The criteria that confer tax benefits in the alternative track of the Law are handled by the ITA. A mechanism is available which enables a company to apply for a pre-ruling from the ITA, where it desires to obtain certainty as to the taxation status of its investment under the Amended Law. The application to the ITA must be submitted no later than six months following the end of the investment's implementation year (first year of potential benefits for the AE).

For AE plans governed by the Law prior to its 2005 amendment, the certification of a new or expanding approved enterprise status required interaction with the Israeli Investment Centre (IC) which had to approve the application for approved enterprise status and was responsible for issuing a final implementation approval following its determination that all requirements relating to investments in assets and minimum capital have been met.

Interruption of entitlement to benefits

Unlike the Law prior to its 2005 amendment, where an AE owner was generally required to continue to operate the AE for the entire benefit period, under the Law following its amendment in 2005, the examination as to whether an owner is entitled to enjoy AE benefits for a tax year is determined on a year by year basis. Consequently, if in any tax year during the benefit period a company does not meet any of the conditions required under the Law, then for that tax year it is not entitled to benefits. However, if the company again meets the conditions during the benefit period, the company is entitled to the benefits during the remainder of the benefit period.

Mixed enterprises

Special rules govern the allocation of taxable income of 'mixed enterprises'. These are essentially entities that derive only part of their income from an AE or entities which operate under a number of approvals relating to separate investment projects. The company tax payable in respect of income from each part of a mixed enterprise is separately computed and a composite WHT is applicable to dividends distributed by a mixed enterprise.

Neutralisation of assets

Assets used in the operation of an enterprise that are not part of an AE are regarded as non-approved assets. Consequently, turnover which is deemed to be generated from the non-approved assets will result in non-approved enterprise income that should be taxed at the regular Israeli corporate tax rate applicable for the relevant year.

For plans operating under the Law prior to its 2005 amendment, in some cases, upon request, the Investment Centre granted neutralisation of assets that were not part of the approved investment plan, so that they would have no negative impact on the tax benefits. Neutralised assets have a 'neutral' effect, as they are not considered part of the approved investment plan or part of a non-approved plan. For certain industrial equipment, neutralisation is not available. Assets that are of a non-productive nature may receive neutralisation.

In accordance with the 2005 Amended Law, this issue arises only in connection to assets purchased which had previous use in Israel.

AE 2011 Amended Law overview

Upon the AE owner's election, the various reduced tax routes described above are cancelled and replaced with a new uniform tax rate based on the corporate tax rate applicable during the relevant year, as follows:

Year	Area A (%)	Rest of country (%)	Scheduled regular corporate tax rate (%)
2011 to 2012	10	15	24 (2011), 25 (2012)
2012 to 2014	7	12.5	25
2014 and thereafter	6	12	25

A modified Strategic Investment Track has been introduced, but it appears that its qualifying terms and conditions should make this track not particularly relevant for most investors.

The WHT rate applicable to dividends distributed to foreign shareholders remains 15% (subject to being reduced under the terms of an applicable tax treaty). Distributions to

Israel

Israeli corporations shall not be subject to tax while distributions to Israeli individuals shall be subject to tax at a rate of 15%.

This is a major change in policy from the pre-2011 Amendment FIC route discussed above, which encouraged foreign investment in Israeli companies having AE programs by providing for increasingly reduced rates (e.g. 10% rate where 90% foreign owned). Further to the amendments, there will no longer be available any additional AE tax benefits specifically linked to foreign investment. Notwithstanding the cancellation of the tax holiday route, a distribution or deemed distribution of profits that were tax-exempted under the tax holiday route before the legislative change had taken effect shall continue to be subject to company tax at the applicable AE reduced rates in addition to the dividend WHT that will be imposed on the income distributed.

Although it would appear that the 2011 Amendments may result in an increased Israeli tax liability for many investors, depending on the particular circumstances, some investors may still benefit from the new changes. Consequently, each investor should examine the impact of such changes upon its financial results and prepare its action steps accordingly.

Transition rules

It should be noted that the 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to these amendments or to choose in any tax year to commence to apply the new provisions of the Law and to waive the remaining benefit period those AE benefits provided under the Law prior to its amendment. Once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years. Moreover, as part of the transition rules, an AE owner is generally allowed to elect until 2012 to apply for a new AE status under the terms of the Law in effect prior to its amendment, so long as part of the relating investment was made during 2010. This election can allow the AE owner to further extend the benefits available under the terms of the Law prior to the legislation. According to the approach of the ITA, in order for this election to be applicable for a certain tax year, this election must be filed by 31 May of that year.

Research and development (R&D) incentives

Under special relief provided under the ITO which was enacted for the purpose of encouraging taxpayers to invest in R&D activities, R&D costs can generally be deductible for tax purposes even when they represent capital costs.

The ITO provision generally distinguishes between two types of investors in R&D projects:

- The R&D project is conducted or sponsored by the owner of an enterprise in the fields of industry, agriculture, transportation, and energy, and it is intended to develop this enterprise.
- The R&D costs are borne by a taxpayer that is not the owner of an enterprise in the above mentioned fields or the taxpayer participates in R&D costs of another developer in consideration for a reasonable return, when such R&D projects also enjoy government grants.

In regard to the first group of taxpayers, the R&D expenses shall be deducted in the tax year incurred when such expense has been approved as an R&D expense by the relevant government department (the approval in regard to industrial related projects is

generally granted by the Office of the Chief Scientist [OCS]). When such OCS approval is not obtained, the expense shall be deducted over three tax years.

The R&D expenses incurred by the second group of taxpayers shall generally be deducted over two tax years. The deductible expenses allowed to a participant in R&D costs of another developer generally may not exceed 40% of the taxable income of the investor in the year in which the expenses had been incurred.

For acquisitions between 1 January 2011 and 31 December 2015, an Israeli tax resident company that acquires a controlling interest in a private Israeli company that meets certain R&D activity levels shall be entitled to amortise its acquisition amount (i.e. consideration paid for shares less the purchased company's positive equity capital if any) from its taxable income equally over five years beginning with the tax year following the acquisition. Entitlement to this deduction is subject to the fulfillment of detailed qualifying conditions which include *inter alia* that both companies have AE plans in the year of acquisition, meet certain R&D investment levels, employ a certain prescribed percentage of employees having academic degrees in certain qualifying fields, and for the first three years of the amortisation period the R&D expenses of the acquired company are incurred for its own company or that of the purchasing company and at least 75% of such expenses are incurred in Israel. Detailed rules apply.

Tax credit for donations

A tax credit is granted in respect of donations to approved state and charitable institutions aggregating at least ILS 420 (for 2011) in a tax year. The donor is allowed a tax credit equal to the amount of the contribution times the corporate tax rate applicable during the year, provided the donations do not exceed the lower of the following: (i) 30% of the corporation's taxable income in that year or (ii) ILS 4,351,000 (in 2011). The above figures are adjusted each year according to the CPI. Excess unused tax credits may be carried forward for three years subject to detailed rules.

Incentive to promote foreign investment in Israeli corporate bonds

In order to promote foreign investment in the Israeli corporate bonds market, there is an exemption from tax with respect to interest income received by foreign investors on their commercial investments in Israeli corporate bonds traded on the Tel Aviv stock exchange (TASE). The exemption is not granted to a foreign investor that has a PE in Israel or is related to, or holds 10% more of the means of control in, the investee company. In addition, in order for the exemption to apply to a foreign investor that has 'special relations' with the investee company, regularly sells products to or provides services to the investee company, or is employed by the investee company, the investor must prove that the interest rate on the corporate bond was determined in good faith.

Withholding taxes

Under Israeli domestic tax law, a 25% WHT on payments of Israeli-source income is generally deducted by an Israeli paying bank from all income remittances abroad, unless a tax certificate is obtained from the ITA authorising withholding-exempt remittances or a reduced rate of tax pursuant to an applicable tax treaty.

Set out below is a listing of WHT rates for dividends, interest, and royalties under domestic tax law and pursuant to tax treaties in force. Detailed rules apply under certain tax treaties for eligibility to the treaty reduced rates (e.g. beneficial ownership, having no permanent establishment in Israel). The applicable tax treaty should be

Israel

consulted to determine the relevant WHT rate and to examine detailed conditions that may apply for the specific circumstance.

Notes

* Some Israeli tax treaties provide for an exemption from WHT on interest involving governmental and quasi-governmental parties. Such exemptions are not separately indicated in the table above.

- Dividends between Israeli resident companies are generally exempt from Israeli tax. Dividends paid from a foreign resident company received via an Israeli payer (e.g. bank) to an Israeli resident company or individual are subject to WHT at the rate of 25%.
- 30% rate applies in the case of a 10% or more shareholder (detailed rules apply).
- 10% where beneficial owner holds directly at least 25% of the capital of the company paying the dividends.
- At a rate which is 50% of the rate which would have been imposed but for this provision but not to exceed 12.5% and not less than 7.5%. A 10% rate applies where paid from profits generated by an enterprise entitled to special tax rates under the Encouragement of Investment Law.
- 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate applies in all other cases.
- 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 15% of the capital of the company paying the dividends; 15% rate in all other cases.
- 0% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 5% rate in all other cases.
- 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
- 5% if the beneficial owner is a company (other than a partnership) which controls directly at least 10% of the voting power in the company paying the dividends; 15% rate in all other cases.
- 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
- At the domestic Israeli tax rate.
- 5% if the recipient holds directly at least 10% of the capital of the company paying the dividends.
- 10% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends.
- 15% if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 10% of the voting power of the company paying the dividends.
- 5% if the beneficial owner is a company which owns at least 25% of the voting shares of the company paying the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
- 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax at a rate which is lower than the normal rate of the corporation tax; 15% rate in all other cases.

Israel

17. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits which by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempt from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
18. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits which by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempted from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
19. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
20. 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends.
21. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends.
22. With respect to dividends paid to a company which holds directly at least 25% of the capital of the company paying the dividends: (i) 10% where the dividends are paid out of profits which, by virtue of provisions in Israeli law for the encouragement of investment in Israel, are exempted from tax or subject to tax at a rate that is lower than the standard rate levied on the profits of a company resident in Israel; (ii) 5% where paid out of regularly taxed profits. A 15% rate applies in all other cases.
23. 10% if the beneficial owner is a company (excluding partnership) which holds directly at least 10% of the capital of the paying company.
24. 5% if the recipient holds directly at least 15% of the capital of the company paying dividends.
25. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
26. 5% if the beneficial owner holds directly at least 10% of the capital of the company paying the dividends.
27. 5% if the recipient holds directly or indirectly at least 10% of the capital of the company paying the dividends.
28. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 10% of the gross amount of the dividends if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that, by virtue of law of the state in which the payer is a resident, are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% of the gross amount of the dividends in all other cases.
29. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
30. 10% if the dividends if the recipient holds at least 25% of the capital of the company paying the dividends.
31. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax.
32. 12.5% but only if (i) during the part of the paying corporation's taxable year which precedes the date of payment of the dividend and during the whole of its prior taxable year (if any), at least 10% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation, and (ii) not more than 25% of the gross income of the paying corporation for such prior taxable year (if any) consists of interest or dividends (other than interest derived from the conduct of a banking, insurance, or financing business and dividends or interest received from subsidiary corporations, 50% or more of the outstanding shares of the voting stock of which is owned by the paying corporation at the time such dividends or interest is received). A 15% rate applies for payments from income derived during any period for which the paying corporation is entitled to the reduced tax rate applicable to an approved enterprise under Israel's Encouragement of Capital Investments Law (1959). A 25% rate applies in all other cases.
33. Different rates ranging from 15% to 35% apply for certain types of instruments. Interest paid to a 10% or more shareholder is subject to tax at the highest marginal tax rate (48% in 2012). Detailed rules apply.

34. 5% for interest in connection with the sale on credit of any industrial, commercial, or scientific equipment or on any loan of whatever kind granted by a bank.
35. 5% for interest in the case of a bank or other financial institution.
36. 7% for interest received by any bank or financial institution.
37. 5% for interest paid on a loan granted by a bank.
38. 5% for interest paid on any loan of whatever kind granted by a bank.
39. 5% where in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank loans made by banks; 10% in all other cases. An election can be made to be taxed on the net amount of the interest as if such interest were business profits.
40. 5% for interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
41. 7.5% for interest if received by any bank or financial institution.
42. 5% where paid on any loan of whatever kind granted by a bank.
43. 5% where paid on any loan of whatever kind granted by a bank.
44. 10% where paid to a bank or a financial institution.
45. 5% where paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
46. 2% rate applies to government debt or government-assisted debt; 5% rate applies when paid to a financial institution; 10% rate applies in all other cases.
47. 5% rate in connection with the sale on credit of any industrial, commercial, or scientific equipment, or in connection with the sale on credit of any merchandise by one enterprise to another enterprise, or on any loan granted by a financial institution.
48. 5% rate for interest paid on any loan of whatever kind granted by a bank.
49. 7% rate for interest paid on any loan of whatever kind granted by a bank.
50. 10% rate for interest received by any financial institution (including an insurance company).
51. 5% rate for interest paid on any loan of whatever kind granted by a bank.
52. 10% for interest derived from a loan of whatever kind granted by a bank, savings institution, or insurance company or the like. 17.5% rate for other interest. An election may be made to be taxed on interest income as if that income were industrial and commercial profits.
53. 0% for literary, dramatic, musical, or artistic work copyright royalties (excluding in respect of motion picture films or films for use in connection with television).
54. 5% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films) or for the use of, or the right to use, industrial, commercial, or scientific equipment or road-transport vehicles.
55. 0% for copyright royalties for literary, dramatic, musical, artistic, or scientific work (excluding in respect of films for cinema or television).
56. 15% for trademark royalties.
57. The rate is 50% of the rate which would have been imposed but for the treaty provision but not to exceed 12.5% and not to be less than 7.5%.
58. 0% for copyright royalties for the production or reproduction of any literary, dramatic, musical, or artistic work (but not including royalties in respect of motion pictures).
59. For industrial, commercial, and scientific equipment royalties, the 10% rate applies to the adjusted amount of the royalties (70% of the gross amount of the royalties).
60. 0% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films).
61. 0% for copyright royalties for literary, dramatic, musical, or artistic works.
62. 0% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films or tapes for television or broadcasting).
63. 2% for industrial, commercial, and scientific equipment royalties.
64. 5% for industrial, commercial, and scientific equipment royalties.
65. 10% for royalties for cinematograph films and films or video-tapes for radio or television broadcasting.
66. 5% for industrial, commercial, or scientific equipment royalties.
67. For royalties in respect of cinematograph or television films, the WHT rate shall not exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
68. 5% for royalties for copyrights of literary, dramatic, musical, artistic work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
69. The definition of royalties does not include any royalty or other amount paid in respect of (i) the operation of a mine or quarry or of any other extraction of natural resources or (ii) in respect of cinematograph including television films.
70. 5% for royalties for literary, artistic or scientific work, excluding cinematograph films or films or tapes used for radio, or television broadcasting
71. For royalties in respect of cinematograph or television films, tax may be imposed in Israel, but not to exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
72. 10% for copyright or film royalties.
73. 5% of the gross amount of the royalties where such royalties consist of payments of any kind received as a consideration for the use or the right to use any copyright of literary, artistic, or scientific work (excluding cinematograph films).
74. 5% for royalties for any patent, design or model, plan, secret formula or for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience; 7.5% for technical fees; 15% for all other royalties.

Israel

Tax administration

Taxable period

The tax year is generally the calendar year. Certain entities may apply to have their tax year-end on different dates, specifically, mutual funds, government companies, quoted companies, and subsidiaries of foreign publicly listed companies.

Tax returns

The Israeli system is based on a combined form of assessment and self-assessment.

The statutory filing date is five months following the end of the tax year, which for a calendar year taxpayer would be 31 May. It is possible, however, to secure extensions of the filing date.

Payment of tax

Generally, 12 monthly advance payments are levied at a fixed ratio of the company's turnover. Alternatively, a company may be required to make ten monthly payments beginning in the second month of its tax year, each payment being a fixed percentage of the previous year's tax assessment.

Penalties are imposed on overdue advance payments and on delays in the submission of tax returns. The balance of any taxes due is payable from the beginning of the following tax year and is linked to the CPI; it bears interest of 4% until paid.

Statute of limitations

The statute of limitation period for corporate tax is three years from the end of the tax year in which the relevant tax return is filed. The Commissioner of the Tax Authorities has the authority to extend this period to four years.

Other issues

Choice of business entities

Investments and business operations in Israel may be structured in a variety of ways. The following are the common types of business entities in Israel: (i) Israeli public or private company; (ii) foreign company in Israel (i.e. a branch); (iii) Israeli general or limited partnership; (iv) foreign general or limited partnership; (v) other entities such as cooperative societies; and (vi) other arrangements (e.g. contractual joint ventures).

Mergers and acquisitions

Israeli tax law allows for non-taxable reorganisations in situations in which the ownership and business enterprise of the original parties is continued after the reorganisation takes place, allowing for the deferral of the tax liability until the shares or assets transferred in such reorganisations are actually sold. Different qualifying requirements and conditions apply (e.g. obtaining a ruling from the ITA in certain cases), depending upon the tax residency of the parties and the type of transfer.

Significant developments

The major recent changes in the Italian tax rules that occurred in the last 12 months are as follows:

- Increase of the base withholding tax (WHT) rate on the yields on loans and securities.
- Changes to value-added tax (VAT).
- New shell companies taxation regime.
- Allowance for Corporate Equity (ACE).
- New regime for tax losses to be carried forward for corporate income tax (*Imposta sul Reddito delle Società* or IRES) purposes.
- Taxation on companies operating in the oil, electric, and energy sector.
- Increase of regional production tax (*Imposta Regionale sulle Attività Produttive* or IRAP) rate for certain entities.

Please note that Italy tax updates are generally expected from June to September in connection with the finance bill and approval of related laws. In this respect, we suggest visiting the Worldwide Tax Summaries website after September each year in order to check whether or not relevant changes affect your business.

Increase of the base WHT rate on the yields on loans and securities

Effective from 2012, the base standard WHT rate on the yields on loans and securities (bonds, shares, etc) paid by Italian resident entities to both Italian and non-Italian resident investors has been increased from 12.5% to 20%.

The said increase, however, does not affect the applicability of those rules allowing either the application of reduced WHT rates or full exemption from the said withholdings (e.g. double tax treaties [DTTs], European Union [EU] directives, special domestic tax rules).

VAT changes

For certain supplies of services carried out starting from 17 March 2012, the time of supply has been substantially modified (i.e. time of completion, date of maturity of the consideration).

As of 17 September 2011, the standard rate of VAT increased from 20% to 21%.

Please consider that from 1 October 2012, an additional increase of the standard VAT rate, from 21% to 23%, and the reduced VAT rate, from of 10% to 12%, is expected.

Italy

Changes in shell companies taxation

Starting from fiscal year 2012, companies qualified as shell companies will be subject to an additional corporate tax rate of 10.5% on the deemed taxable income (total IRES rate 38%).

The qualification as a 'non-operating' company is enlarged to companies that declare a tax loss for three consecutive periods.

Allowance for Corporate Equity (ACE)

As of 2011, in order to promote the capitalisation of companies, a new deduction from the IRES tax base has been introduced. The deduction is determined based on the net increase in the equity employed in the entity.

New regime for tax losses to be carried forward for IRES purposes

As of 2011, tax losses to be carried forward for IRES purposes are no longer subject to time limitation. However, the tax loss incurred in a period can only be used to offset taxable income for an amount not exceeding 80% of the taxable income.

Taxation on companies operating in the oil, electric, and energy sector

The additional corporate tax for companies operating in the oil, electric, and energy sector increased from 6.5% to 10.5%. The new tax rate is applicable for three tax periods starting from fiscal year 2011.

Increase of IRAP rate for certain entities

As of 2011, the IRAP rate increased to:

- 4.20% for entities with a determined governmental exclusive right to provide services
- 4.65% for banks and financial entities, and
- 5.90% for insurance corporations.

Taxes on corporate income

Applicable rates

Italian corporate entities are subject to a corporate income tax, known as *Imposta sul Reddito delle Società* (IRES), and to regional production tax, known as *Imposta Regionale sulle Attività Produttive* (IRAP).

The standard rates are as follows:

- 27.5% for corporate income tax (IRES).
- 3.9% for regional production tax (IRAP).

A 6.5% increase (surtax) to the IRES rate is applied to companies operating in the areas of oil, gas (refining, production, or trade), and electrical energy (production or trade) whose turnover exceeded 10 million euros (EUR) and whose net income was EUR 1 million in the prior fiscal year. Limited from 2011 to the 2013 tax period, and additional increase of 4% is applicable (total surtax of 10.5%).

As of 2011, the following increased IRAP rates are applicable for certain entities:

- 4.20% for entities with a determined governmental exclusive right to provide services.

- 4.65% for bank and financial entities.
- 5.90% for insurance corporations.

General rules

IRES

The IRES taxable base is determined according to the worldwide taxation principle, which states that, regardless of the location/jurisdiction where the income is produced, to the extent that the income is legally attributable to an Italian resident entity, the income is taxed in Italy. IRES is charged on the total net income reported in the financial statements of the company as adjusted for specific tax rules. Non-resident companies are taxed only on Italian-source income.

IRAP

There are different methods of computation for the IRAP taxable base, depending on the nature of the business carried out by the taxpayer. Labour costs (with limited exceptions), provisions for liabilities and risks, and extraordinary items cannot be taken into account when determining the IRAP taxable base.

For sales and manufacturing companies, the IRAP taxable base is broadly represented by the company's gross margin in its financial statements. In addition to the non-deductible items mentioned above, interest income and expense and provisions for bad debts are excluded for the purposes of the IRAP taxable base.

For banks, the IRAP taxable base is broadly defined as follows:

- Intermediation margin reduced by 50% of dividends.
- 90% of amortisation costs relating to fixed tangible and intangible assets.
- 90% of other administrative expenses.

Special rules apply to financial institutions, other than banks.

IRAP is levied on a regional basis, and regions are allowed to increase or decrease the standard IRAP rate up to 0.9176%. Companies with facilities in different regions must allocate their overall taxable base to the different regions on the basis of the employment costs of personnel located at the various sites. Facilities become relevant to the calculation of IRAP if they have been established for more than three months. Italian companies with permanent establishments (PEs) abroad, as well as shipping companies qualifying for the tonnage tax regime (*see Tonnage tax below*), are not subject to IRAP on the income earned through these PEs.

For fiscal year 2011, there is a 0.15% increase in the IRAP rates for the regions of Campania, Molise, and Calabria.

Substitutive tax on reorganisations (mergers, demergers, contributions in kind)

Corporate restructurings, such as contributions in kind, (assets versus shares transactions) mergers, and demergers, are, in principle, tax neutral even if, for financial accounting purposes, the transaction results in the recognition of higher values of the assets or of goodwill. Companies may elect to obtain partial or full recognition for tax purposes of the step-up in the financial accounting values of assets or of the goodwill arising from the corporate restructurings, provided they pay a substitutive tax.

Italy

The substitutive tax is calculated on the step-up in tax basis and is based on progressive rates of 12% to 16%. The first EUR 5 million is taxed at 12%, the tranche above EUR 5 million but less than EUR 10 million is taxed at 14%, and the amount in excess of EUR 10 million is taxed at 16%. The substitutive tax may also be paid in three annual instalments of 30% in the year of election, 40% in year two, and 30% in year three plus interest at the rate of 2.5% per year on the deferred amounts. The substitutive tax is not deductible for the purposes of IRES or IRAP.

In addition, stepped-up values of goodwill and trademarks may be depreciated for tax purposes over ten tax years instead of the normally allowed 18 years by paying a substitutive tax of 16%. The higher tax depreciation arising from this election is effective from the tax period subsequent to the one in which the substitutive tax is paid. For example, if a merger transaction occurred in year one and the substitutive tax was paid in year two, the increased tax depreciation would begin in year three.

Tonnage tax

Italian tax resident shipping companies, as well as non-resident shipping companies operating in Italy through a PE, can qualify for and then elect to be subject to the Italian tonnage tax regime. The regime basically allows for the determination of presumptive income based on the net tonnage of the qualifying ships apportioned to the effective shipping days (tonnage income). The tonnage income is subject to IRES only.

To qualify for the tonnage tax, ships must: (i) have a net tonnage of more than 100 net tons (NT); (ii) be used for goods transportation, passenger transportation, salvage, towing, and other services; and (iii) operate in international shipping as defined by the rules disciplining Italian International Registry. Ships chartered out on a bare boat charter are excluded. Chartered ships with crew are included in the tonnage tax regime if their global net tonnage is less than 50% of the total net tonnage.

Tonnage income is calculated on the basis of the ship's net tonnage. The daily income is determined according to the following rate system:

Ship's net tonnage (NT)	Daily income in EUR per NT
0 to 1,000	0.0090
1,001 to 10,000	0.0070
10,001 to 25,000	0.0040
above 25,001	0.0020

No deductions are allowed from tonnage tax income.

Income and expenses from the following activities are all deemed to be covered by the tonnage income determined as previously discussed:

- Transport of goods.
- Transport of passengers.
- Salvage and towing.
- Other services that need to be performed on the high seas.
- Charges related to the above mentioned activities (e.g. administrative and commercial expenses, insurances fees).
- Other operations performed in close connection with the transportation operations (e.g. loading and unloading).
- Other minor activities.

Capital gains or losses arising from the transfer of ships that have been acquired by a company, while under the tonnage tax regime, are also deemed to be included in tonnage tax income. Conversely, for capital gains arising from the transfer of a ship acquired prior to election for the tonnage tax regime, the difference between the sale price and the net tax cost as of the last tax period prior to the election for the tonnage tax regime is subject to the ordinary tax regime. Tax losses, in this latter case, are tax deductible.

An election for the tonnage tax regime should be made for all of a company's or group's qualifying vessels. So called 'cherry picking' is not allowed. Election for the tonnage tax regime is on a voluntary basis, but, once elected, it remains in effect for ten years. The election is renewable.

Corporate residence

Corporate residence of companies

Companies having their legal or administrative headquarters or their principal business activity within the Italian territory are considered to be resident companies and are taxable in Italy on their worldwide income.

A foreign company holding one or more Italian subsidiaries is deemed to be resident of Italy for tax purposes if at least one of the following conditions exists:

- The foreign company is, either directly or indirectly, held by Italian tax resident persons.
- The board of directors of the foreign company is made up mainly of Italian resident individuals.

Non-resident companies are subject to IRES and IRAP only on their Italian-source income. Specifically, Italian non-resident companies having a PE in Italy are subject to IRES and IRAP with respect of the taxable income generated from the PE in Italy.

Permanent establishment (PE)

The domestic definition of PE is substantially aligned with the Organisation for Economic Co-operation and Development (OECD) model.

Corporate residence of a trust

Trusts are considered as persons subject to corporate taxation.

Residence is defined on the basis of the location of the place of management and of the main object of the trust. In the first instance, trusts that operate through an appropriate structure are deemed to be tax resident in Italy, if the said structure is located in Italy. In the absence of any such structure, trusts managed by a trustee will be deemed as tax resident in Italy, if the trustee is tax resident in Italy. In addition, trusts that have the largest part of their assets located in Italy are deemed a tax resident in Italy.

Note that there are anti-avoidance rules for Italian non-resident trusts, setting out the specific conditions on which these trusts can become Italian tax resident.

Italy

Other taxes

Value-added tax (VAT)

Italian VAT (*Imposta sul Valore Aggiunto*) applies to the supply of goods and services carried out in Italy by entrepreneurs, professionals, or artists and on importations carried out by anyone. Intra-community acquisitions are also subject to VAT taxation under certain situations.

The Italian standard VAT rate is 21% (20% prior to 17 September 2011). Reduced rates are provided for specifically listed supplies of goods and services, such as 4% for listed food, drinks, and agricultural products and 10% for electric power supplies for listed uses and listed drugs. Intra-community supplies and exports are exempt from VAT.

Specific supplies of goods and services expressly listed in the law are exempt from VAT (e.g. public postal services, hospital and medical care, education, insurance services, specific financial services, supply, leasing of particular immovable property). Other specifically listed transactions are also out of the VAT application scope (e.g. transfer of money, transfer of business parts).

Input VAT on purchases of goods and services related to business activity generally is allowed for recovery. Special limitations apply in relation to specific items (e.g. cars, entertainment expenses).

The filing deadline for VAT returns is 30 September.

Expected modification of VAT rates

In case of deterioration of the financial key performance indicators (KPIs) of the central government during fiscal year 2012, additional increases of the standard VAT rate, from 21% to 23%, and of the reduced VAT rate, from 10% to 12%, should be applied. Such increases would be effective from 1 October 2012. The reduced rate of 4% is expected to remain, instead, unchanged.

For the same reasons above, a further 0.5% VAT rate increase might occur in 2014.

Service supply rules

Services supplied by a taxable person to another taxable person (business to business or B2B) are in the scope of the Italian VAT if the services are supplied to Italian taxable persons or to PEs of an Italian non-resident entity.

The general rules are as follows:

- For services related to immovable property, reference must be made to the place in which the immovable property is located.
- For the transportation of passengers, the place in which the transportation takes place must be identified including the proportion of the distance covered.
- For catering and restaurant services, the place in which the activity will be physically carried out must be identified.
- For short term hiring, leasing, and similar means of obtaining transport services, the place in which the vehicle is used must be identified (use and enjoyment rule has been implemented on these services).

The general rule for services supplied by a taxable person to a non-taxable person (business to consumer or B2C) identifies the place of taxation with the country of residence of the supplier.

Several rules, in addition to the B2B general rules, exist for the following:

- Brokerage services.
- Goods transport services.
- Services related to movable goods and ancillary activities related to transports.
- Long term hiring/leasing of means of transport services.
- Electronic services supplied by extra-European Union (EU) suppliers.
- Telecommunications and television/radio broadcast services.

In addition, special rules are provided for intangible services provided to final customers established outside the European Union.

In relation to the VAT treatment of cultural, artistic, sporting, scientific, educational, recreational, and similar services, VAT is due in the country where the activities were physically carried out for B2C activities and VAT is due in the country of the recipient for B2B activities other than admission. For B2B services in respect of admission, the place of supply is where the events take place.

Time of supply for certain services

For transactions carried out from 17 March 2012, the time of supply is the time of completion in case of:

- supply of services falling under the general rule (i.e. generic supply of services) rendered by EU and non-EU taxable persons to taxable persons established in Italy, and
- supply of services falling under the general rule rendered by taxable persons established in Italy to EU and non-EU taxable persons.

In case of periodic or continuous supply of services, the time of supply is the date of maturity of the consideration.

Moreover, the above supplies of services, if performed/received by taxable persons established in Italy continuously over a period longer than one year and if no payments are carried out, even partially, in the same period, shall be considered carried out at the end of each calendar year up to completion of the same supplies.

Reporting obligation

Transactions carried out with subjects resident in 'black list' countries (i.e. tax haven jurisdictions) must be disclosed in periodical communications to be electronically filed with the tax authorities. The transactions to be reported are those higher than EUR 500.

For transactions carried out from 1 January 2012, a taxable person must also communicate the total amount of the output transactions rendered towards each customer and input transactions received from each supplier. As regards the communication related to transactions for which there is no obligation to issue an invoice, the threshold for this fulfillment is EUR 3,600, VAT inclusive. Specific transactions are excluded from the communication (e.g. importations, exportations, and other transactions that have already been communicated to the tax authorities, such as black list, insurance, electricity supply, and telephone services contracts).

Reverse charge mechanism extension

According to the reverse charge mechanism, the obligations related to supply of goods and provision of services carried out in Italy by non-resident taxable persons towards taxable persons established in Italy are fulfilled by the latter. From a practical point of

Italy

view, the recipient of goods and/or services has to issue a self-invoice and record it in the VAT sales register and VAT purchase register.

The reverse charge mechanism obligation has been extended to the supply of all goods and services in the scope of the Italian VAT carried out by non-resident entities to taxable persons resident in Italy. Non-resident entities (including those having an Italian VAT number through indirect or direct registration) cannot charge Italian VAT to an Italian established VAT person.

Note that sales within the Italian territory of:

- mobile telephones, being devices made or adapted for use in connection with a licensed network and operated on specified frequencies, whether or not they have any other use and
- integrated circuit devices, such as microprocessors and central processing units, in a state prior to integration into end-user products are subject to the reverse charge in case the recipient of the above goods is a taxable person in Italy. This mechanism is not applicable to retail sales and when the supply of the handset is ancillary to the airtime.

VAT credit offset with other taxes

From 1 April 2012, to offset a VAT credit against other taxes for an amount higher than EUR 5,000, it is necessary to wait until the 16th day of the month following the filing of the yearly VAT return on which the credit is shown.

Furthermore, in order to avoid abuse, taxpayers intending to offset a VAT credit for an amount greater than EUR 15,000 are required to ask their tax advisors or auditors to affix their signature to the VAT return, which is known as the 'conformity mark'.

Registration tax

Specific deeds and contracts must be filed with the local registration tax office either upon signature or if specific circumstances occur, and the relevant tax must be paid.

Depending on the nature of the contract and on the assets that are the object of the contract, as well as on the form of the contract, registration tax is levied as a fixed amount or as a percentage of the value of the goods and/or rights that are the object of the contract. As a general rule, no proportional registration tax is due in the case of transactions subject to VAT.

VAT and registration tax on lease of immovable properties

Leases of residential and commercial buildings, or portion thereof, generally are VAT exempt and subject to the registration tax at 2% or 1% rate.

Please refer to the table below for an overview of the tax regime applicable to the leases, including financial leases, of both residential and commercial buildings.

Type of building	Lessor (VAT status)	Lessee (VAT status)	VAT (%)	Registration tax (%)
Residential buildings	Individual or entities not acting in the course of business (not subject to VAT)	Any	Out of scope	2

Type of building	Lessor (VAT status)	Lessee (VAT status)	VAT (%)	Registration tax (%)
Commercial buildings	Individual or entities not acting in the course of business (not subject to VAT)	Any	Out of scope	2
Residential buildings	Taxable persons acting in the course of business	Any	Exempt (with no right to deduction)*	2
Commercial buildings	Taxable persons acting in the course of business	Individual or entities not acting in the course of business (not subject to VAT)	21	1
		VAT taxable persons with a VAT recoverable pro-rata not higher than 25%	21	1
		Other cases	Exempt (with non right to deduction) with the possibility for the lessor to opt for the VAT regime (21% rate)	1

* In some specific cases of subsidised housing, VAT is applicable at a 10% reduced rate.

Specific rules apply in case of financial leases of residential and commercial buildings from a registration tax perspective.

Customs duty

At the moment of the importation of goods into the EU territory, customs duties are applied. The amount of customs duties to pay depends on the value and nature of the goods imported. In particular, for each kind of good, the Common Customs Tariff provides a tax-rate to be applied to the value of the goods imported.

The correct classification of the goods is one of the most important issues to consider when an economic operator introduces goods in Italy. A wrong classification can give rise to the application of higher customs duties, and the operator could face a tax burden not due, or to the application of lower customs duties, and this situation could lead to a Tax Assessment by Italian Customs Authority.

The value of the goods is represented by the transaction value, hence, the price actually paid or payable for the goods when sold for exportation to the customs territory of the EU, provided that:

- there are no restrictions as to the disposal or use of the goods by the buyer
- the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued
- part of the profits of any subsequent resale, disposal, or use of the goods by the buyer will not be accrued, directly or indirectly, to the seller, and
- the buyer and seller are not related, or, where the buyer and seller are related, that the transaction value is acceptable for customs purposes.

In determining whether the transaction value is acceptable, the fact that the buyer and the seller are related is not, in itself, sufficient for considering the transaction

Italy

value as non acceptable. Where necessary, the circumstances surrounding the sale are examined, and the transaction value is accepted provided that the relationship did not influence the price.

The price actually paid or payable is the total transaction amount paid for the imported goods and includes all payments made as a condition of sale of the imported goods by the buyer to the seller or by the buyer to a third party to satisfy an obligation of the seller.

In determining the customs value, the following items shall be added to the price, to the extent that they are incurred by the buyer and are not included in the price (list not exhaustive):

- Commissions and brokerage.
- Royalties and license fees related to the goods under assessment.
- The cost of transport and insurance of the imported goods.

At the same time, provided that they are shown separately from the price actually paid or payable, the following items shall not be included in to the customs value (list not exhaustive):

- Charges for the transport of goods after their arrival at the place of introduction into the customs territory of the European Community (EC).
- Charges for construction, erection, assembly, maintenance, or technical assistance, undertaken after importation of imported goods such as industrial plant, machinery, or equipment.
- Buying commissions.

A reduced tax-rate at importation can be applied when the goods imported have a preferential origin. The preferential origin depends on the existence of commercial agreements between the European Community and other non-EC states or by facilities provided by European Community to non-EC states unilaterally.

The application of a reduced tax-rate can even depend on the existence of preferential tariff treatment or on the existence of a particular exemption provided by law for some kind of goods.

Any person may appoint a representative in one's dealings with the Customs Authority to perform the activities and formalities laid down by customs rules. Such representation may be direct, in which case the representative shall act in the name and on behalf of another person, or indirect, in which case the representatives shall act in one's own name but on behalf of another person.

For direct representation, a forwarding agent, holder of a particular license, must be appointed.

The representative must be established within the European Community.

Excise duty

The following goods are subject to excise duties:

- Energetic products (e.g. petrol, gas oil, natural gas, coal).
- Alcohol and alcoholic drinks (e.g. wine, beer, ethylic alcohol).

- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Electric power.

The subjection of a product to excise duties has to be verified on the basis of its customs combined nomenclature code.

The tax liability, depending on the products, arises:

- at the moment of importation or production (and the excise duties must be paid at the moment in which they are released for consumption in Italy)
- when the excisable goods are used for heating or as fuel, and
- when the excisable goods are released for consumption or used for own use.

As a general rule (with exception from natural gas and coal, coke, and lignite), with reference to excise goods released for consumption during a month, the payment of the relative excise duties has to be done within the 16th day of the following month.

With reference to excise goods imported, customs rules are applied as far as the procedure and terms of payment are concerned.

The production, processing, and holding of 'excise goods', except from natural gas, coal, coke, lignite, and electric power, are subject to a suspensive regime performed through a fiscal warehouse.

In order to manage a fiscal warehouse, it is necessary to acquire a license issued by the Italian Customs Authority, and there are specific obligations for the owner of a fiscal warehouse (e.g. provide for a particular guarantee, keep a particular accounting system for the goods stored, be subject to controls performed by Italian Customs Authority, where requested).

The Italian legislation provides for many exemptions with regards to the use of 'excise goods'.

Furthermore, under certain circumstances, a tax refund is granted to the operator who released for consumption, if, afterwards, the products are not consumed in Italy.

Stamp duty taxes

Stamp duty taxes (*Imposta di Bollo*) apply on a certain list of deeds or documents provided for by the relevant law provision (e.g. checks, bills of exchange, statements of account, certificates, books of account, deeds of transfer of quotas, and, in some cases, invoices).

According to the kind of deed, stamp duty tax is due at the moment of the deeds' origin or in case of use and can be a fixed amount or an amount proportional to the value of the deed or document.

Stamp duty tax can be paid:

- ordinarily, through a physical stamp attached on the document, or
- virtually, through electronic means (in this case, a specific authorisation from the Italian Tax Authorities and a specific process are needed).

Stamp duty tax is usually alternative to VAT; however, in case of considerations partially subject to VAT and partially not subject to VAT, the invoice is subject to stamp duty tax if

Italy

the total amount of the considerations not subject to VAT exceeds EUR 77.47. Moreover, some transactions are stamp duty tax exempted (e.g. intercommunity supply of goods). For transactions which are exempted from VAT (with restriction on VAT credit) and for transactions out of scope of VAT, exceeding EUR 77.47, an amount of EUR 1.81 is due as stamp duty tax for every invoice issued.

Imposta Municipale Unica (IMU)

IMU is the municipal tax on real estate. It is levied annually either on the owner or on the financial lessee of real estate (i.e. buildings, development land, and agricultural land). The standard tax rate is 0.76%. Depending on the municipality, the tax rate can be increased.

The taxable basis generally is determined on the basis of the so called 'cadastral value' (i.e. capitalisation of the income derived from the real estate).

Branch income

The tax regime for PEs is the same as for corporate Italian entities (e.g. joint-stock companies). Accordingly, a branch is subject to IRES as well as IRAP. Both taxes are determined on the basis of the relevant financial statements related to the business activities carried out by the PE.

Transfer pricing principles apply to transactions between a head office and its Italian tax resident PE.

Income determination

In principle, positive and negative components of a company's income statement are, respectively, taxed or deducted on an accruals basis (under the accrual principle) for tax purposes. Additionally, in order to be taxed/deducted, income items have to be certain under a legal standpoint and either objectively determined or capable of objective determination as to their amount (under the certain and objective determination principle). Income statement items accrued in the statutory accounts not meeting the above criteria are not allowed for tax deduction nor taxed as income in the tax period. Deduction or taxation of income is correspondingly deferred to future tax periods when the criteria are met.

Expenses generally are deductible if they relate to activities generating revenues concurring to the company's taxable income (under the inherence to business principle) and provided they are included in the relevant statutory accounts (under the imputation principle). An exception to this general rule is made for those income statement items accrued in the statutory accounts relating to a tax period different from that in which they become relevant for tax purposes in accordance with the principles of certainty and objective determination as described above. These items are taken into account in determining taxable income in the tax period when the latter conditions are met.

For IRAP purposes, relevant income and expense are those reported in the financial statements.

Specific rules have been released for entities which have adopted International Financial Reporting Standards (IFRS) for Italian statutory financial reporting purposes. These provisions are aimed to align income determination rules with IFRS.

Inventory valuation

Italian tax law allows the application of all the most commonly used inventory valuation methods: last in first out (LIFO), first in first out (FIFO), average cost. For IRES only, the reference prices used to calculate the written down value of the inventory items cannot be lower than their market prices during the final month of the tax period.

Companies operating in the oil and gas sector are required to adopt either average cost or FIFO for tax purposes.

Capital gains

Capital gains are taxable in the tax period in which they are realised, as follows:

- **Fixed assets:** the gain realised on the sale of fixed assets is taxable for both IRES and IRAP purposes. Additionally, for IRES purposes, tax on capital gains can be spread over a maximum of five years. This treatment is allowed provided that the company owns the fixed assets for not less than three years.
- **Financial Investments:** a specific participation exemption regime (PEX) is applicable. Under this regime, capital gains realised by Italian companies on sales of shareholdings are 95% exempt from IRES.

PEX applies if all of the following conditions are met:

- The shareholding was held uninterruptedly for at least 12 months prior to the sale.
- The investment was classified under financial fixed assets in the financial statements relating to the first tax period of uninterrupted ownership.
- The subsidiary is actually carrying on a commercial activity (e.g. investments in companies mainly performing management of their own real estate are not entitled to the PEX benefits).
- The majority of the subsidiary's income is not generated in a tax haven country or one with a privileged tax regime.

The third and fourth conditions must be met both at the time of the sale of the investment and in the three preceding years. If these conditions are not met, the capital gain realised by the company is ordinarily taxed. Capital losses arising from the sale or write-down of shareholdings meeting PEX conditions are basically not tax deductible. Likewise, the capital losses realised on sales of non-PEX investments are tax deductible. Specific exemptions are provided for those entities adopting IFRS for Italian statutory accounts reporting purposes.

Specific anti-dividend washing rules provide that where capital losses arise from the disposal of shareholdings which are not eligible for PEX, such losses are deductible only for the part exceeding the tax exempt amount of dividends (*see Dividend income discussion below*) received from the shares in question in the 36 months prior to the disposal.

Capital gains on financial investments generally are excluded from the IRAP taxable base.

Italy

Dividend income

Dividends received by Italian resident companies from Italian companies or from companies resident in countries other than tax havens (i.e. not included in the 'black list') are excluded from the IRES taxable base for 95% of their amount. Conversely, no exemption applies to dividends paid by entities that are resident in tax haven jurisdictions (unless those dividends derive from profits that were already taxed under the Italian controlled foreign company [CFC] rules). There are specific rules for entities adopting IFRS for Italian statutory financial reporting purposes. For such entities, dividends from investments in shares and other financial instruments held for trading are fully taxable.

Dividends generally are excluded from the IRAP taxable base.

Interest income

Interest income is generally part of the taxable base.

Foreign income

An Italian resident corporation is taxable on all income whether produced in Italy or abroad. Profits earned by subsidiaries that are resident or located in countries or territories other than tax havens are taxed only on distribution of the relevant profits. Double taxation is, in principle, avoided by means of foreign tax credits.

Shell companies

Resident companies and PEs of non-resident companies can be qualified as non-operating entities if, alternatively, one of the following conditions is met:

- The entity is in a tax loss position for three consecutive tax periods.
- The average revenues recorded in the current fiscal year and in the prior two is lower than the amount resulting by applying certain 'deemed return' percentages to the average balance sheet value of specific assets in the current fiscal year and the two previous years.

The main assets to be taken into consideration are shares and shareholdings, financial receivables, owned or leased real estate, and owned or leased tangible and intangible assets. The value of any assets that have been acquired or sold during the fiscal year must be adjusted according to the period of ownership.

These conditions must be checked every year. Therefore, it is possible for an entity to be 'non-operative' in one year and operative in the following year.

The shell company is assessed as having a minimum taxable income for both IRES and IRAP purposes.

For IRES purposes, the taxable income of a non-operative entity is determined as the sum of such values emerging from the application of specific percentages to the book values of the above-mentioned assets.

As of 2012, the IRES standard rate for entities qualified as shell companies has increased from 27.5% to 38%.

Tax losses generated in a tax period when the company was deemed to be non-operating cannot be carried forward.

For IRAP purposes, labour costs and other non-deductible items have to be added back to the deemed minimum IRES income as outlined above.

These rules are not applicable in the first year of a company's incorporation. Exemptions from these rules can be achieved:

- by means of an advance ruling from the Italian tax authorities aimed at assessing the specific circumstances that caused the company not to earn the minimum amount of income or
- by specific objective situations provided for by Italian law (e.g. company directly or indirectly held by quoted companies).

Shell companies are also subject to limitations in their ability to recover VAT credits.

Deductions

The principles outlined in the section on Income determination also apply for deductible costs.

Depreciation and amortisation

All fixed assets that are used in the business of the company, except land, are depreciable for tax purposes (for both IRES and IRAP).

For IRES, the maximum depreciation rates for fixed tangible assets are set forth in a ministerial decree. Such depreciation rates are different, depending on the economic sector in which the company operates. In the event that financial accounting depreciation exceeds the amounts allowed for tax purposes, temporary differences arise. Tax depreciation of fixed tangible assets is allowed from the tax period in which the asset is first used. In the first tax depreciation period, the depreciation rate cannot exceed one-half of the normal rates.

It is worth pointing out that a project aimed at achieving the grouping of the tax amortisation rates has been announced by the government. Timing for the implementation of such a project is still uncertain.

Land is not a depreciable asset. Amortisation of goodwill derived from an acquisition and amortisation of trademarks are deductible for an amount not exceeding one-eighteenth of the cost of the goodwill in any year.

Patents, know-how, and other intellectual property may be amortised over a two-year period.

Concession rights may be depreciated with reference to the utilisation period as determined either by law or in the relevant agreement.

For IRAP purposes only, depreciation and amortisation (other than as related to goodwill and trademarks) are deductible in accordance with the amounts reported in the financial statements, regardless of the limits outlined above.

Interest expense

Generally, interest expense is fully tax deductible up to the amount of interest income. Thereafter, excess interest expense is deductible up to 30% of the gross operating margin (interest deduction capacity) as reported in the financial statements. Gross

Italy

operating margin is defined as the difference between operating revenues and expenses excluding depreciation of tangible and intangible assets and charges for leased assets as stated in the profit and loss account for the year.

Net interest expense in excess of the yearly limitation is carried forward indefinitely. Hence, net interest expense not deducted in previous years can be deducted in any future fiscal year as long as total interest in that year does not exceed 30% of gross operating margin. If net interest expense is lower than the annual limit (i.e. 30% of gross operating margin), this difference can be carried over to increase the company's interest deduction capacity in future years.

Where an election is made for the domestic tax consolidation regime, (*as discussed in the Group taxation section*), the net interest expense limitation applies to the consolidated tax group. As a consequence, if a company participating in a tax group has an excess interest deduction capacity, this excess may be used against the interest deduction deficit in another company belonging to the same tax consolidation group. Under specific conditions, non-resident subsidiaries can also be 'virtually' included in the tax consolidation for the sole purpose of transferring their excess capacity over 30% of gross operating margin in order to increase the overall interest deduction capacity of the Italian group.

The above-mentioned rules are not applicable for financial institutions, such as banks and insurance companies, where the deductibility of interest expense (for both IRES and IRAP purposes) is limited to a fixed amount of 96% of the interest expense shown in the income statement of these entities.

Allowance for Corporate Equity (ACE)

The ACE is a deduction that corresponds to the net increase in the equity employed in the entity, multiplied by an index yearly determined by the Ministry of Finance, currently equal to 3%.

The relevant increase is determined by the equity contributions and by the retained earnings (except profits allocated to a non-disposable reserve) less the following items:

- Reductions of the net equity with assignment to shareholders.
- Investments in controlled companies.
- Business acquisitions.

If the allowance for a year is higher than the net IRES taxable base, the difference will be carried forward to the next periods.

The reference equity is the amount disclosed in the financial statements for the fiscal year as at 31 December 2010, net of the profits for the same year. Fiscal year 2011 is the first period of application for this benefit.

Bad debts

Yearly provision for bad debts not guaranteed by third parties and relating to sales of goods and services is tax deductible at up to 0.5% of the gross value of the receivables. Deduction shall no longer be permitted when the total amount of the bad debts reserve exceeds 5% of the above-mentioned gross value of the receivables as of the end of the fiscal year.

Losses on bad debts exceeding the said provision are allowed for deduction if backed by precise and objective evidence or when the debtor is subjected to bankruptcy proceedings.

Charitable contributions

Deduction of charitable contributions is allowed. The amounts allowed for deductions depend on the specific features of the recipient entity, and specific limitations are set by the law.

Entertainment expenses

For IRES purposes, expenses for gifts and entertainment which meet the requirements (both qualitative and quantitative) contained in the specific Ministerial Decree are fully deductible in the tax period in which they are incurred. Entertainment expenses which do not meet these requirements cannot be deducted.

Expenses related to gifts with a value of EUR 50 or less are entirely deductible.

Travel expenses

For IRES purposes, the deduction for travel expenses incurred within the municipality is limited to 75% of the amount incurred. However, the VAT related to such costs is fully recoverable.

Automobile expenses

For IRES purposes, deduction of the cost of company automobiles is limited to 40% of the total amount of the costs for the automobile. If automobiles are assigned to employees, the company may deduct 90% of the costs associated with the automobile.

Automobile costs may be deducted in their entirety if (i) automobiles are necessary for the company's business or (ii) automobiles are an essential element in the company's activity (i.e. vehicles owned by a car rental company).

Telephone expenses

For IRES purposes, up to 80% of the total expenses related to both mobile and landline telephones are deductible.

Fines and penalties

Fines and penalties are generally not considered inherent costs and are, consequently, not deductible for tax purposes.

Taxes

When calculating the IRES base, 10% of IRAP paid is deductible.

IMU, municipal tax on real estate, is not deductible for either IRES or IRAP.

Purchases from suppliers resident in tax haven jurisdictions

The costs of goods and services purchased from entities which are resident in tax haven jurisdictions are deductible on the condition that the taxpayer can, upon request of the tax authorities, provide evidence that the foreign companies carry out a real business activity or that the transactions were carried out for good and sound economic reasons (e.g. better economic conditions, the foreign supplier is the sole distributor for specific products).

An official list of tax haven jurisdictions (known as the 'black list') has been issued by the Ministry of Finance. A list of countries which are not considered to have a privileged

Italy

tax regime (known as the 'white list') is expected, and countries not on this white list will be deemed tax havens. Specific disclosure is required in a company's income tax return for the expenses arising in tax haven jurisdictions.

Net operating losses

As of 2011, tax losses can be carried forward for IRES purposes and used to offset income in the following tax periods without any time limitation.

Tax losses can only be offset with taxable income for an amount not exceeding 80% of the taxable income. Thus, corporations are required to pay IRES on at least 20% of taxable income.

Note that losses arising in the first three years of activity can be offset with 100% of taxable income.

Tax authorities have clarified that the new regime applies on tax losses generated from 2006 onward.

In the previous regime, the carryforward was limited to the five tax periods following the period in which the tax loss was incurred.

For IRAP purposes, tax losses may not be carried forward.

Specific (tax anti-avoidance) rules limit the carryforward of tax losses in the event of:

- change of control and
- an effective change of the main activity (performed by the company carrying forward the losses).

The aforementioned changes must occur together in order for the limitations to be applicable. The change of the main activity is relevant for these purposes if it takes place in the tax period in which the change of control occurs or in the two subsequent or preceding periods.

Specific anti-abuse provisions are also applicable to net operating losses in cases of merger or demerger.

In Italy, tax losses may not be carried back.

Payments to foreign affiliates

Transactions with foreign affiliated companies should be at 'fair market value' and, generally, as defined by OECD guidelines.

Italian companies transacting business with related non-resident parties may participate in special tax ruling procedures for the transfer pricing procedures used for intra-group transactions. The agreement executed between the tax authorities and the taxpayer is binding for the fiscal year during which the agreement is executed and for the following two fiscal years, unless significant changes in the circumstances relevant for the conclusion of the agreement executed by the taxpayer take place.

Group taxation

Domestic tax consolidation

Companies belonging to the same group can elect domestic tax consolidation. This allows the determination of a single IRES taxable base comprised of the taxable income and losses of each of the participating entities. The tax consolidation does not operate for IRAP purposes.

Where an overall tax loss position arises, this can be carried forward and used against future consolidated taxable income. Conversely, tax losses arising in fiscal years preceding the domestic tax consolidation election can be carried forward and used only by the company to which these losses belong.

The taxable basis determined by each company participating in the tax consolidation arrangement is included in its entirety. No apportionment is made in relation to the percentage of control.

In order to validly elect the Italian domestic tax consolidation regime, the following conditions must be met:

- The consolidating entity must be an Italian tax resident company, and it must hold, directly or indirectly, more than the 50% of the share capital of the consolidated entities (so called 'legal control').
- This control must be in place from the beginning of the tax period for which the tax consolidation is applied for.
- All of the companies participating in the group must have the same year end.

Provided that specific requirements are met, Italian PEs of foreign companies can also participate as controlling entities in a tax consolidation.

The consolidation arrangement operates on an elective basis. Taxpayers may select whether to be included or not, and it is not necessary for all the Italian group/sub-group companies to jointly elect for the tax consolidation.

Once the election is made, it cannot be revoked for three fiscal years.

Worldwide tax consolidation group

A worldwide tax consolidation group is available, allowing the consolidation of foreign subsidiaries.

In addition to the requirements set out for domestic tax group system, the following conditions apply:

- The ultimate parent company must be either owned by individuals who are tax residents of Italy or listed on the Italian Stock Exchange.
- The option must be exercised for all foreign companies (under the 'all in, all out' principle).

Income for each company is apportioned in the tax consolidation based on the actual percentage of control exercised by the ultimate parent company that is an Italian tax resident.

Italy

A number of additional requirements need to be fulfilled in order for a worldwide tax consolidation to be operative, including a mandatory audit of the financial statements of all the foreign subsidiaries.

Once the election is made, it cannot be rescinded for five fiscal years.

Transfer pricing

Income derived from operations with non-resident corporations which directly or indirectly control the Italian entity, are controlled by the Italian entity, or are controlled by the same corporation controlling the Italian entity have to be valued on the basis of the normal value of the goods transferred, services rendered, and services and good received, if an increase in taxable income is derived there from. Possible reductions in taxable income as a result of the normal value rule are allowed only on the basis of mutual agreement procedures or the EU Arbitration Convention.

The normal value is the average price or consideration paid for goods and services of the same or similar type, carried on at free market conditions and at the same level of commerce, at the time and place in which the goods and services were purchased or performed. For the determination of the normal value reference should be made, to the extent possible, to the price list of the provider of goods or services, and, in their absence, to the price lists issued by the chamber of commerce and to professional tariffs, taking into account usual discounts.

Penalty protection regime with transfer pricing documentation support

Transfer pricing rules provide for a penalty protection regime in case of transfer pricing audit, provided that the taxpayer has prepared proper documentation detailing the compliance of intercompany transaction to the arm's-length principle.

The regulation applies to transactions incurred between Italian entities and non-resident entities belonging to the same group (transfer pricing rule are not applicable to domestic transactions). No specific methods have been introduced to test the arm's length of transactions; reference is made to the OECD Guidelines.

On the base of the transfer pricing regulation, taxpayers can obtain penalty protection if they provide the Italian tax authorities with:

- Documentation to support the intercompany transactions drawn up in the specific format detailed in the Regulation issued by the Italian tax authorities and in Italian language. Tax authority confirmed that information in annexes (intercompany contracts and transactions diagram) can be in the English language.
- Notification that documentation has been prepared and available by checking the box in the annual corporate income tax return.

The information required is based on the EU Code of Conduct for Transfer Pricing documentation.

Based on the group structure, Master File and/or Country File have to be prepared.

Italian based groups and Italian sub-groups owning non-Italian subsidiaries must produce both a Master File and a Country File. Italian subsidiaries of multinational groups need to produce a Country File only.

The sub-group provisions are onerous, especially so where they relate to branches. Where a foreign entity has an Italian branch but the company itself is also a holding

company, a Master File is required for the foreign entity's subgroup, even if there is no holding directly attributed to the branch.

Sub-holding companies based in Italy with at least one non-Italian subsidiary, which need to produce a Master File, may instead produce the Master File for the entire group in English. If it does not contain all the information in the Italian Regulation, they will need to supplement it.

Documentation must be signed by the legal representative of the company and provided to the authority upon request within ten days. Also, an electronic copy must be provided at authority request.

Small and medium companies (defined as those with an annual turnover of less than EUR 50 million) need to update the economic analysis only every three years, provided that no significant change in the business occurred. Otherwise, it is necessary to update the economic analysis each year.

As the documentation provisions provide a potential benefit for Italian taxpayers (by waiving the automatic tax geared penalties that would otherwise apply to a transfer pricing adjustment), taxpayers have been given the opportunity to take advantage of this penalty protection for all open years if they file a communication that they possess documentation in the required format before they receive notification of any tax audit.

Thin capitalisation

Italy no longer has thin capitalisation rules per se. Instead, net interest expense is deductible only up to an amount equal to 30% of gross operating margin (*see Interest expense in the Deductions section for more information*).

Controlled foreign companies (CFCs)

An Italian company that controls, either directly or indirectly, an entity located in a tax haven jurisdiction is required to consolidate the taxable income arising in proportion to the percentage of shareholding held, irrespective of whether the profits have been distributed or not.

Income from CFCs is taxed separately from the other taxable income of the business at the standard IRES rate (i.e. other tax losses cannot be used to offset CFC income). Foreign taxes paid by the CFCs are recoverable by way of a corresponding tax credit.

Dividends received by an Italian shareholder from a CFC are excluded from taxable income up to the amount of the taxable income attributed under the above CFC provisions. The excess of any dividends over income already included through the CFC regime is fully taxable in the hands of the shareholder.

Where companies are located in a tax haven, the CFC rules also apply for companies holding not less than the 20% of the company's share capital or entitled to not less than 20% share of the company's profits. In such instances, there are specific rules to determine the taxable income attributable to the Italian resident shareholder. The taxable income is determined by applying specific income ratios to the business assets of the CFC as they appear in the relevant accounts.

Exemption from these CFC rules can be achieved by means of an advance ruling from the Italian tax authorities. To obtain such a ruling, adequate evidence must be provided to demonstrate at least one of the following:

Italy

- The foreign company is mainly and effectively engaged in sales and/or industrial activities in the 'market' of the foreign host state or territory. Banks, other financial entities, and insurance companies must demonstrate that most of the financial resources and related proceeds are made in or the result of yields, respectively, from the market of the foreign host state or territory. However, this exemption cannot be requested where more than 50% of the income of the foreign subsidiaries is derived from 'passive income' (e.g. holding or investment in securities, receivables, or other financial assets, transfer or licence of intangible rights) or from intra-group services.
- No less than 75% of all the proceeds of the CFC have been taxed in jurisdictions that are not tax privileged countries (e.g. a company resident in Hong Kong has all of its operations in China mainland and it is subject to ordinary taxation there).

The CFC rules also extend to controlled companies that are located in a jurisdiction with a privileged tax regime that is not a tax haven, if the following conditions exist:

- The effective tax is less than 50% of the tax that would have been charged had the company been resident in Italy.
- More than 50% of revenue is derived from so-called 'passive income' or from intra-group services.

By means of an advance ruling, the Italian parent company is able to obtain an exemption from these rules if it is able to provide proper evidence that the establishment of the company in the privileged tax jurisdiction is not for tax avoidance purposes (unfair tax advantage).

Tax credits and incentives

Foreign tax credit

Where foreign-source income definitively is taxed abroad, a tax credit can be claimed for use against a company's IRES liability. The amount of the tax credit that can be claimed is the lower of the foreign tax incurred and the proportion of the IRES liability related to the foreign-source income. For partially exempt income (e.g. dividends), the foreign tax credit is reduced in proportion to the amount of the income taxable in Italy.

If an Italian company receives foreign income from more than one country, this limitation is applied separately to each country.

Foreign taxes borne by the foreign PE of an Italian resident company are allowed to be offset against the overall consolidated tax liability (IRES).

Any excess of foreign tax credit over the maximum amount allowed for recovery in the same tax period can be carried back or carried forward for eight years and recovered if specific conditions are met (e.g. same source country of the income, occurring because of an excess of the IRES liability related to the foreign-source income).

Inward investment, capital investment, and research and development (R&D) investment incentives

A number of incentives have been established to attract new industry to southern Italy and certain depressed mountain areas in central and northern Italy.

Tax credits are given to companies that increase the number of their employees and that invest in R&D.

The possibility of taking advantage of these rules, however, depends on the taxpayer fulfilling specific conditions and on the actual availability of financial resources by the Italian state. These financial resources generally are set in the annual state budget.

It is worth pointing out that the government is working on an incentive plan. The actual features and contents of such an incentive plan are expected to be out in the next few months.

Tax regime for EU investments in Italy

A special incentive has been introduced for the companies resident in other EU countries starting new economic activities in Italy and for their employees and staff. The possibility is to apply for three years the tax regime of EU countries in alternative to the Italian one.

The new activities need to be effectively performed in Italy.

The possibility to benefit from the new incentive needs to be agreed by means of an international ruling procedure with the Italian tax authorities.

Ministry of Finance is still expected to issue a decree regulating the relevant fulfillments for the practical application of this rule.

Withholding taxes

Effective from 2012, the base standard WHT rate on the yields on loans and securities (bonds, shares, etc.) paid by Italian resident entities to both Italian and non-Italian resident investors has been increased from 12.5% to 20%.

The said increase, however, does not affect the applicability of those rules allowing either the application of reduced WHT rates or the full exemption from the said withholdings (e.g. DTTs, EU directives, special domestic tax rules).

Interest on Treasury bonds will still be subject to a 12.5% domestic WHT.

WHT chart

Domestic corporations paying certain types of income are required to withhold as shown on the following chart. The numbers in parentheses refer to the notes below.

Recipient	Dividends (%)	Interest (%)	Royalties (%)

Italy

Notes

1. The actual applicable rate depends on the features of the recipient. Applicable rates are as follows: 0% applies on loan agreements and ordinary notes when the recipient is a corporation; 20% rate in all other cases.
2. 0% is applicable on dividends received by shareholders holding no less than 20% of the share capital (2% in the case of listed entities), so called 'qualified investments'. The rate applicable to 'non-qualified investments' is 20%.
3. The rate is applicable on 75% of the gross amount of the royalty paid.
4. Pursuant to the EU Directives and provided that the requirements set forth therein are met, payments of dividends, interest, and royalties made by an Italian company to an EU resident group company can be WHT exempt. Specifically for the dividends, the minimum shareholding requirement (to benefit from this exemption) is currently equal to 10%.
5. Should the full WHT exemption not apply, 1.375% is applicable on dividends paid to EU tax residents.
6. Pursuant to the 2004 Swiss EU tax agreement and provided that the requirements contained therein are met, payments of dividends, interest, and royalties made by an Italian company to a Swiss tax resident group company can be WHT exempt.
7. Non-residents persons have the right to obtain reimbursement for up to one-fourth of the withholding effected, upon proof of the actual taxation of the dividends in the foreign country where the recipient is a resident.
8. Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer. In a number of circumstances, tax treaties may provide for particular tax rates mainly dependant on the nature of the instruments and on the profile of the recipients/payers. In such cases, the applicable WHT must be verified from an analysis of the relevant tax treaty.
9. The treaty enters into force starting from 1 January 2013.

Tax administration

Taxable period

The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies are allowed to have taxable periods of up to 18 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).

Tax returns

IRES and IRAP returns must be filed by the end of the ninth month following the tax year-end.

The ordinary filing deadline for WHT agent returns is 31 July for both the simplified WHT return and the ordinary WHT return.

Payment of taxes

For IRES and IRAP purposes, the tax law provides for both advance payments and settlement payments. The advance payments are equal to the net tax payable for the previous tax period and are due during the tax period to which they refer. Advance payments are split into two instalments:

- 40% by the 16th day of the sixth month following the tax year-end.
- 60% by the end of the 11th month following the tax year-end.

Settlement payments are due by the 16th day of the sixth month following the tax year-end to which they refer.

Tax payments should be performed through a specific form to be electronically filed to the Tax Authorities (i.e. F24 form).

Offsetting of taxes

Payables and receivables (not claimed for refund) resulting from a return regarding different taxes are allowed for off-setting within a yearly limit of EUR 516,457.90.

Starting as of 1 January 2011, the mentioned offsetting is no longer allowed if taxes definitively assessed by the Tax Authorities and not paid within the deadlines by the taxpayer are higher than EUR 1,500. In case of breach of the above limit, the law provides for a penalty of up to 50% of the undue settled amount.

Administrative penalties

Failure to file a tax return results in a penalty ranging from 120% to 240% of the taxes due. Minimum penalties (ranging from EUR 258 to EUR 1,032) are applicable if no tax liability emerged in the return.

A tax return showing either a taxable income lower than the one assessed or a tax credit higher than those owed to the taxpayer (i.e. an untrue tax return) results in a penalty ranging from 100% to 200% of the higher taxes ultimately due.

Omitted and/or late payments of taxes of whichever kind and nature result in a penalty equal to 30% of the unpaid/late paid tax.

Special rules apply where similar violations are repeated over various years.

Self-curement of tax law breaches are allowed on payment of the higher taxes and of reduced penalties. Such self-curement is allowed on condition that no tax audit is in progress in relation to the tax period in which the breach took place. The reduced penalties are always computed on the floor of the applicable range of penalties. The actual reduction depends on the time elapsed between the occurring of the breach and the self-curement itself. In this respect, reduced penalties may range from 1/8 to 1/10.

Software based tax controls (so-called 'Studi di settore')

The Italian Tax law provides for special tax control procedures for those enterprises whose total turnover does not exceed EUR 7.5 million. The controls, so-called 'Studi di Settore', are based on standardised economic models of the different business fields and are aimed at assessing whether or not a specific subject's taxable income is in line with its own standard model (on statistical basis).

A higher possibility of undergoing tax audit should be considered for entities not meeting such standard model.

Statute of limitations

The Italian tax authorities are entitled to make an assessment in relation to direct taxes (IRES and IRAP), VAT, and WHT returns up to the end of the fourth calendar year following the year in which the tax return was filed. Under certain circumstances (e.g. no return filed or fraud giving rise to criminal law penalties) the above deadlines may be extended.

Audit cycle

For larger companies having a yearly turnover exceeding specific thresholds (that are in the process of being progressively decreased to EUR 100 million), administrative checks on tax returns may be carried out within the year following that in which the tax return has been filed.

Italy

With limited exceptions, corporations that are repeatedly in a tax loss position will be subject to tax audit.

Tax audit can take place at the taxpayer's premises as well as in the tax authorities' offices. The statute of limitations provides that tax auditors can stay at a taxpayer's premises for not longer than 60 working days (30 days ordinary term plus 30 days of extension). At the end of this period, the audit must come to an end unless extraordinary issues arise. Tax auditors must take note of the observations and requests made by the taxpayer. At the end of their audit, the tax auditors must draw up a tax audit report whereby the outcome of the audit activity must be detailed and the findings (if any) must be illustrated and motivated. A copy of the report has to be filed with the tax office.

The tax office receiving the tax audit report examines the findings reported by the tax auditors and starts the assessment procedure, which may lead to the issuing of a tax assessment notice bearing the request for payment of higher taxes and/or penalties.

Topics of focus for tax authorities

Extraordinary transactions (such as mergers, de-mergers, etc.) continue to be a topic of focus for tax authorities due to the potential applicability of tax anti-abuse rules.

As a response to recent cases of carousel-frauds on VAT, cross-border transactions are being more heavily scrutinised.

Over the last few years, we experienced an increasing focus by the tax authorities on transfer pricing related issues. That is, presumably, a result of the introduction in Italy of specific guidelines in relation to infra-group transactions (namely the penalty protection rules).

Tax controversy and dispute resolutions

Should the taxpayer accept all of the challenges raised by the tax authorities, it may take advantage of the application of reduced penalties. The reduced penalties may range from $\frac{1}{6}$ to $\frac{1}{3}$ of the minimum applicable penalties, depending on the status of the controversy.

In case the taxpayer decides not to accept the challenges by the tax authorities, a settlement procedure can be initiated. The favourable outcome of the settlement procedure brings forth (in addition to the agreed-upon reduction of challenged taxes) the reduction of penalties: ordinarily down to $\frac{1}{3}$ of the minimum applicable penalties.

In case no settlement is either achieved or requested for, the taxpayer may start a tax dispute before the Court. The judicial proceedings are structured in three tiers:

- Provincial Tax Commission, in first instance.
- Regional Tax Commission, in second instance.
- Supreme Court of Cassation.

Other issues

Adoption of IFRS and taxation

The Italian tax law provides for two basic principles and some specific rules for taxation of a company adopting International Accounting Standards (IAS)/IFRS in the statutory financial statements:

- Derivation principle (*Principio della Derivazione*): the taxable base of companies is determined starting from the net income arising from the profit and loss, increased or decreased by items directly booked to equity pursuant to the application of IAS/IFRS. To such income, the general tax adjustments set forth by the Corporate Income Tax Law apply. In this respect, as exception to the general tax criteria, the accrual principle, and the qualification and classification criteria stated by the IFRS are relevant for the calculation of the taxable base.
- Neutrality principle (*Principio della Neutralità*): such principle aims to neutralise the effects deriving from the movement to IAS/IFRS (First Time Adoption or FTA). Conversely, such principle does not grant an equal treatment for companies adopting or not IAS/IFRS (in fact, specific rules are applicable only to IAS/IFRS adopters, e.g. taxation of dividend on held for trading securities, derivatives).

The following specific rules applicable to IAS adopters must be considered:

- Adjustments or recognitions of transactions made in equity and/or in the 'other comprehensive income (OCI)' are relevant for tax purposes, to the extent that such items are in compliance with general tax principles.
- For equity instruments, the legal classification is prevailing over the accounting one (debt vs. equity classification).
- Under certain conditions, unrealised profits and losses recognised in the profit and loss become taxable and deductible (e.g. fair value on securities other than shareholdings and on derivatives transactions).
- The tax treatment of transactions between IFRS adopters and non-IFRS adopters is based on the accounting principle adopted by each company (e.g. financial leasing transaction).
- Depreciation and amortisation are permitted within the rates provided by the tax rules and limited to the amount booked in the profit and loss statement. In this respect, the abolition of the imperative systematic depreciation of the goodwill and its substitution by the goodwill's review for impairment does not affect the tax deduction of the goodwill amortisation that should be made solely for tax purposes.
- Negative components booked in the income statement as expenses for personnel settled with equity instrument under IFRS 2 are, in principle, deductible for IRES purposes (stock options).
- In order to identify financial instruments with hedging purposes, IFRS adopters are allowed to give relevance to the classification made in the financial statement. In particular, financial instruments designated in the financial statement as hedging instruments in compliance with IFRS principles are considered also as hedging instruments for fiscal purposes (hedging accounting approach including the fair value option [FVO]).
- Given the possibility, under the IAS 39 accounting principle, to reclassify financial securities in a different portfolio from that of the initial booking, the value at which the security is booked in the new portfolio is tax relevant.

Significant developments

After the political crisis in 2011, the FY11 Financial Law enforced (as of 14 July 2011) some tax reduction and tax holidays for the companies which had suffered losses during the political crisis.

The FY12 Financial Law was enforced on 9 January 2012 and includes some amendments to various tax laws (*see the Other taxes section for more information*).

Taxes on corporate income

Tax on industrial and commercial profits in Côte d'Ivoire is levied at 25%, subject to a minimum tax.

Taxable corporate income in Côte d'Ivoire is based on worldwide income for resident companies. Non-resident entities are subject to withholding tax (WHT) at 20%, subject to existing double taxation agreement (DTA), on their Côte d'Ivoire source income when they do not have a permanent establishment (PE). Non-residents with a PE are taxed in the same way as a resident.

Minimum tax

The minimum tax is based on total turnover and is calculated at the rate of 0.5% (0.15% for banking activities, 0.1% for oil companies), with a minimum tax of 2 million *Communauté financière d'Afrique* (Financial Community of Africa or CFA) francs (XOF) and a maximum tax of XOF 30 million.

Local income taxes

The income tax is levied at the national level. There is no local income tax.

Corporate residence

In Côte d'Ivoire, companies are considered resident in tax jurisdictions where they have a registered fixed establishment (e.g. subsidiaries, branches, representative offices).

Permanent establishment (PE)

A non-resident is considered as having a PE in Côte d'Ivoire when its activities involve a complete commercial cycle in Côte d'Ivoire or when it operates through a dependent agent in Côte d'Ivoire.

According to DTAs, a non-resident is considered as having a PE in Côte d'Ivoire when it has a registered establishment, including a subsidiary, a branch, a representative office, a mine or an oil well, a building site, a manufacture plant, or a trading establishment. Sometimes, a time threshold of six months is considered.

Other taxes

Value-added tax (VAT)

VAT is a non-cumulative tax levied on the sale of goods and services at the rate of 18%. Subject to certain restrictions, VAT is recoverable.

The rate is reduced to 9% for milk, pasta products which contain 100% durum wheat semolina, and the equipment designed for the production of solar energy.

Customs duties

Customs duties rates range from 0% to 20%, depending on the classification of the imported goods according to the customs tariff.

Upon import, goods are also subject to the statistical fee (1%), to community levy (1%), and to VAT (18%).

Special taxes depending on the nature of the imported goods may apply, such as excises duties.

Excise duties

Excise duties apply on cigarette's imports, alcoholic or non-alcoholic beverages, and oil products.

Real estate tax

A real estate tax is imposed at the following rates:

- 1.5% for undeveloped lands.
- 4% on land revenue.
- 11% on developed land or 15% when the built property is used by the company itself. The rate is reduced to 4% for unoccupied buildings.

Property owners are required to withhold 15% of rentals, payable on the 15th day of each month to the tax authorities. This is an advance payment on the annual real estate tax by the owner of the estate property.

Transfer taxes

In the case of the transfer of property through a direct sale, taxes are assessed at the following rates:

- 10% for lease transfers.
- 7.5% or 10% for the sale of real estate. The 7.5% rate applies on estate properties used for business purpose. The 10% rate applies to the other transfers.
- 10% for the sale of businesses.

Stamp duty

A direct tax is paid for any document subject to a registration procedure, for an acknowledgment of a cash payment, and for bills of exchange.

Ivory Coast (Côte d'Ivoire)

Special tax for equipment

This is a tax paid by all taxpayers for the purpose of the equipment of the government. The tax is based on the turnover of the taxpayers.

As of 9 January 2012, tax of 0.1% is calculated on total turnover and is paid monthly. Prior to 9 January 2012, the rate was 0.08%.

Business franchise tax

The business franchise tax includes a turnover tax and a proportional tax. The turnover tax is calculated on turnover at the rate of 0.5%, with a minimum tax of XOF 300,000 and a maximum tax of XOF 3 million. The proportional tax rate is 18.5% and is based on the rental value of the professional office location (based on general office rents).

Tax on banking operations

A cumulative tax of 10% is levied on bank services rendered. Tax on banking operations charged by banks to companies is fully deductible from output VAT.

Registration taxes

Registration of capital contributions is taxed, whether the capital or increase in capital is made in cash or in kind. The rate is 0.6% for contributions up to XOF 5 billion and 0.2% for contributions over XOF 5 billion, with a minimum tax of XOF 18,000. Increases in capital by incorporation of reserves are taxed at 6%.

In the event of a capital increase through a merger, the increase in the share capital of the acquiring company is taxed at half the rate, 0.3% for amounts up to XOF 5 billion and 0.1% for amounts over XOF 5 billion.

Tax on insurance premiums

Insurance premiums are subject to tax as follows:

Policy type	Tax rate (%)
Marine policies	7.0
Life policies	Exempted when contract's duration is more than three years
Fire policies	25.0
Health policies	8.0
Export credit insurance	0.1
Other (e.g. personal liability, transportation)	14.5

Premiums paid under commercial shipping insurance policies for maritime risks are exempt. The tax may be paid by the insurance company, its agent, or the subscriber, in cases where the subscriber had to pay the premium to a foreign insurance company.

Tax on telecommunication services

The FY12 Financial Law has enforced a specific tax of 3% applicable on the turnover of mobile telecommunication companies.

Payroll taxes

Taxes are levied at the rates of 2.8% for local employees and 12% for expatriate employees on the total taxable remuneration, including salaries, benefits, and benefits in kind.

Ivory Coast (Côte d'Ivoire)

Social security contributions

Employers must contribute to the social security system (CNPS) at the following rates:

Contribution	Contribution rate (%)	Monthly ceiling (XOF)
Family allowance	5.75	70,000
Work injury	2.0 to 5.0	70,000
Retirement pension	6.6	1,647,315

WHT on public contracts for services

Any payment made by government bodies or public institutions to non-resident persons or companies for a contract for goods or services is subject to a 20% WHT, subject to DTA (see *Impôt sur les benefices non commerciaux in the Withholding taxes section*).

Resident persons or companies are not subject to this WHT, except for individual service (or goods) providers registered under the standard tax regime for small companies (see below).

WHT on small-size businesses

A 5% or 7.5% WHT is applicable on the remunerations paid to individual service providers registered under the standard tax regime for small companies.

A 10% WHT is applicable on payments made by government bodies or public institutions for a contract for services (or goods).

Branch income

The tax rate for branch income is the same as that for corporate income. After-tax branch earnings are subject to a 12% tax (*Impôt sur le revenu des valeurs mobilières* or IRVM) calculated on 50% of the taxable profit. This is analogous to the WHT on dividends.

Income determination

Inventory valuation

Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) methods are permitted. Book and tax conformity is required.

Capital gains

Capital gains are normally taxed at full corporate rates. However, the tax on capital gains, exclusive of recaptured depreciation, can be deferred if the gain is reinvested within three years.

Dividend income

Dividends are brought into taxable income at 50% of the net amount earned by the company (after 12% WHT).

The exemption is increased to 95% for dividends received from a subsidiary if a parent company domiciled in Côte d'Ivoire owns 10% of the subsidiary.

Ivory Coast (Côte d'Ivoire)

Stock dividends

Stock dividends are unusual, but in the event they are declared, they are not taxable to the recipient.

Interest income

Interest from loans is brought into taxable income at 50% of the net amount earned by the company after 18% WHT.

Foreign income

Resident corporations are taxed on their worldwide income, except for profits derived from business conducted through a PE outside Côte d'Ivoire. Since income derived from business conducted outside Côte d'Ivoire is not taxable, no tax credit is allowed. Interest and dividends from foreign sources are entitled to certain deductions to alleviate instances of double taxation. Subject to provisions of tax treaties, no deductions or tax credits are allowed for revenue from royalties and services.

Deductions

Depreciation and depletion

Depreciation is generally computed on a straight-line basis over the useful life of the asset (e.g. 20 years for buildings, three years for automobiles). Accelerated depreciation is sometimes permitted for machinery. The following depreciation rates are generally accepted for tax purposes:

Assets	Depreciation rate (%)
Buildings	5
Machinery, equipment (rate depending on equipment)	8/10/20
Office furniture	10
Office equipment	20
Vehicles	33.3
Computing equipment	20 to 50

A time coefficient is applied to the rate of depreciation to obtain the declining balance. Depreciation rates may be amended, but only after agreement with the tax authorities.

New plants and equipment may be depreciated at twice the normal rate in the first year of use, provided they are depreciated over at least six years. Under certain circumstances, buildings used for staff housing may be depreciated at 40% of cost in the first year. Annual depreciation must be booked to preserve tax deductibility. The whole or any part of the annual charge can then be deferred in annual accounts for fiscal years showing a tax loss. Recaptured depreciation is taxed at full rates. Tax and book conformity is obligatory.

Depletion allowances, as such, do not exist, but tax incentives are available for exploration to replace depleted natural reserves.

Goodwill

Goodwill (capital gain) deriving from the transfer of assets is included in taxable profit. The gain may be exempted from the income tax basis if the taxpayer commits to reinvest the purchase price of the transferred assets plus the goodwill in the three following years.

Ivory Coast (Côte d'Ivoire)

If the reinvestment is not completed in the three years, the gain will be subject to income taxation.

Interest expenses

Interest paid to shareholders may be deducted. The maximum interest rate allowed is related to the *Banque Central des Etats de l'Afrique de l'Ouest* (BCEAO) rate plus three points. The reimbursement of the loan must take place in the five years following the loan.

Bad debt

Provisions for bad debts are deductible, provided that a minimum set of collection procedures have been engaged.

Bad debts are deductible for income tax purposes, unless the debt results from abnormal business decisions.

Charitable contributions

Charitable contributions to recognised sport and health associations are deductible.

Charitable contributions to individuals or non-recognised beneficiaries are not tax deductible.

Fines and penalties

Fines borne by corporations are not tax deductible.

Taxes

Regular taxes paid by corporations are deductible for income tax purposes.

Third party taxes (such as WHT on non-resident service providers) borne by corporations are not tax deductible.

Other significant items

In respect to legal reserves, 10% of net profit must be transferred to a reserve for legal fees until the reserve equals 5% of the paid-up share capital.

To be tax deductible, provisions must relate to existing liability or loss. General reserves are not deductible.

Net operating losses

Losses may be carried forward five years.

Losses derived from depreciation can be carried forward indefinitely.

Losses cannot be carried back.

Payments to foreign affiliates

Reasonable royalties, interest, and management and service fees paid to foreign parent companies are tax deductible. However, the deductions should not exceed 5% of the turnover and 20% of the overhead. Otherwise, the portion exceeding the ceiling is not tax deductible. The onus is on the taxpayer to prove that expenses are justified and reflect real transactions.

Ivory Coast (Côte d'Ivoire)

Group taxation

Group taxation is not permitted in Côte d'Ivoire.

Transfer pricing

Profits directly or indirectly transferred to related non-resident companies are disallowed from the income tax basis.

The tax administration may inquire on transfer pricing when local subsidiaries having most of their transactions with non-resident group companies record losses.

Transfer price documentation is not generally requested.

Thin capitalisation

The deduction of the interest of loans granted on top of the share capital by related parties is subject to restrictions (*see Interest expenses in the Deductions section*).

When, because of losses, the equity of the company is less than 50% of the share capital, the company must be recapitalised in the two following years, unless the company is dissolved.

Tax credits and incentives

Foreign tax credit

Since income derived from business conducted outside Côte d'Ivoire is not taxable, no tax credit is allowed.

Investment zones

Investment Law No. 95-620 of 3 August 1995 divides the country into two investment zones, offering incentives for up to five or eight years in each area.

The Investment Code provides for 100% tax exemption during the first three or six years (depending on the nature of the activity and the zone), then 50% and 25% progressively for the last two years of exemption. Exemption periods may be extended to complete a scheduled investment program.

Incentives are divided into two programs: 'prior declaration' for investments of less than XOF 500 million that create new activity and 'prior agreement' for investments of XOF 500 million or more that create new activity or develop an existing activity. Both programs are handled by the *Centre de Promotion des Investissements en Côte d'Ivoire* (CEPICI) and are open to all sectors except trade, public works, building construction, transportation, banking, and insurance.

Prior declaration investments may be exempt from tax on corporate income and the business franchise tax. Prior agreement investments benefit from exemptions varying with the size and nature of the project as follows:

- Creating a new enterprise or a new activity in an existing enterprise:
 - Investments of XOF 500 million to XOF 2 billion may be exempt from tax on corporate income, business franchise tax, and import duties and taxes (with the exception of a 5% tax on machinery, equipment, and spare parts).
 - Investments of more than XOF 2 billion may be exempt from real estate tax, in addition to the above.

Ivory Coast (Côte d'Ivoire)

- Developing an existing activity:
 - Investments of at least XOF 500 million may be exempt from import duties and taxes (with the exception of a 5% tax on machinery, equipment, and spare parts).

These incentives may not be combined with sector-specific investment programs, such as those for mining and hydrocarbons.

Capital investment incentives

With prior approval of the tax authorities and varying with geographical location, 35% to 40% of the total investment in fixed assets related to commercial, industrial, or agricultural activity may be deducted from taxable income. The deduction is limited to 50% of taxable profits. The balance of deduction of the first year may be carried forward over the three following years.

Export incentives

No VAT is levied on export sales.

Sales and provisions of services made to export companies, which process certain farm products (i.e. cocoa, coffee, banana, hevea, and palm tree oil) and realise at least 30% of their turnover from exports, are free from VAT. The exemption is granted for the purpose of avoiding new cases of VAT credits in this line of business.

The FY12 Financial Law extended the measure to 31 December 2014.

It is also extended it to the following activities:

- The manufacturing and the sale of natural and synthetic fibres bags.
- The sale of softwood lumber and timber products by enterprises benefiting from the export authorisation granted by the Department of Water and Forestry.

Export incentives for the mining industry

During the exploration phase, investments may be exempt from payroll tax; VAT on goods and services; additional tax (on the sale of goods) on imports and purchases; all import taxes and duties, including VAT on materials, machines, and equipment used in research activities; and half of the registration duties applicable to in-kind or cash share-capital contributions.

During the production phase, mining activities may have a five-year exemption from corporate income tax and relief from all import duties, including VAT on recovered investments required for exploitation. In addition, they may be granted temporary admission of machines and equipment that facilitate research and exploitation. A tax on profit is levied as soon as investment funds are recovered. Mining enterprises may not combine these incentives with those of the Investment Code.

Export incentives for petroleum service contractors

A special and optional tax treatment applies to petroleum service contractors that meet established criteria. Corporate tax, distribution tax, payroll tax, income tax on salaries, and the tax on insurance premiums are calculated on the turnover of the contractor. The total taxes represent 5.636% of turnover. Standard rates apply for business franchise tax and social security contributions for local personnel. The exemption from customs duties and VAT for oil companies is extended to petroleum service contractors.

Ivory Coast (Côte d'Ivoire)

Withholding taxes

WHTs are levied as follows:

- *Impôt sur le revenu des valeurs mobilières* (IRVM): 12% or 18% on dividends and directors' fees.
- *Impôt sur le revenu des créances* (IRC): 18% on interest payments, reduced to 13.5% (individuals) and 16.5% (businesses) on bank deposit interest. Foreign banks are subject to 18% tax on loan interest or 9% on equipment loans with minimum three-year terms.
- *Impôt sur les bénéfices non commerciaux* (BNC): 25% of 80% of revenues on royalties, license fees, and management and service fees paid by Ivorian companies to foreign companies (effective rate: 20% of net amount paid). Treaties with Belgium, Canada, France, Germany, Italy, Norway, Switzerland, and the United Kingdom provide a maximum BNC rate of 10% on royalties and management fees. The tax treaty between the member states of West African Economic and Monetary Union (UEMOA) provides a maximum BNC rate of 15%.
- Interest on certificates of deposit (*bons de caisse*): 25%.

Tax administration

Taxable period

Companies are required by law to have a 31 December fiscal year-end.

Tax returns

Financial statements are filed annually, according to local generally accepted accounting principles (GAAP). The deadline for the filing is 30 April for entities with more than XOF 1 billion turnover, 30 May for entities with less than XOF 1 billion turnover, and 30 June for entities under the standard tax regime for small companies.

Payment of tax

The corporate income tax due is returned together with the annual financial statements on the dates described above.

Monthly tax returns, including the taxes withheld (on residents or non-residents), must be rendered to the tax authorities by the tenth, 15th, or the 20th day of the following month.

The tenth day of the following month is the due date for industrial companies, oil and mining companies registered with the Department of Large Taxpayers (DGE), and companies under a real tax regime.

The 20th day of the following month is the due date for service providers registered with the DGE.

The 15th day of the following month is the due date for all other taxpayers, mostly for taxpayers under the standard tax regime for small companies.

Statute of limitations

The statute of limitations covers the current year and the three prior years.

Significant developments

Recent tax policy reform measures

The following measures were announced by the Minister of Finance and the Public Service in the 2011/12 budget speech and became effective in May 2011:

Recovery of general consumption tax (GCT) on capital equipment

GCT registered taxpayers who incur GCT on the acquisition of machinery or equipment costing more than 100,000 Jamaican dollars (JMD) for the purpose of their taxable activity are now able to claim this GCT by way of input tax credit over a three-month period instead of over a 24-month period.

Carryforward of contractors levy

Previously, contractors who suffered the 2% contractors levy on receipts could claim a credit against their income tax liability only in the year of assessment in which the levy is deducted. As of the financial year 2011/12, where the levy is deducted from the contract sum and remitted to the Collector of Taxes, any amount not utilised as a credit against income tax for that year of assessment may be carried forward to subsequent years of assessment, not exceeding five years. Previously, there was no provision to carry forward any levy credit not utilised.

Revision of import duty structure on motor vehicles

The rates of Common External Tariff applicable to several types of motor vehicles were reduced as of 2 May 2011. This includes sports utility vehicles, vehicles referred to as pick-ups, certain motor cycles, and all-terrain vehicles.

Tax administration

A series of administrative reforms aimed at enhancing the efficiency and effectiveness of Jamaica's tax regime have been implemented. As of 1 May 2011, the Inland Revenue Department, the Taxpayer Audit & Assessment Department, and the Tax Administration Services Department were merged into a single department called Tax Administration Jamaica. Jamaica Customs was separated and has been transitioned into an Executive Agency. Additionally, the Taxpayer Appeals Department has become a Revenue Appeals Division of the Ministry of Finance, the objective being to ensure that the reporting structure in relation to assessments and appeals is separated.

During 2011, other administrative reforms were implemented to simplify the remittance of payroll tax and the associated annual reports required to be filed with the various payroll tax agencies:

- In January 2011, the remittance of payroll taxes was consolidated by the introduction of a single form which replaced the several forms previously required to remit payroll taxes on a monthly basis.

Jamaica

- In December 2011, legislation was passed to introduce a Consolidated Employers' Annual Return which is to be used by employers to submit their annual employees' information commencing in 2012. The new form replaces a number of forms, schedules, and deduction cards that were previously required to submit annual payroll returns to the various payroll tax agencies.

Other reform measures

Other reform measures included the removal of transfer tax and stamp duty on securities and a reduction in stamp duty on the refinancing and transfer of mortgages.

Taxes on corporate income

A resident corporation is taxable on its worldwide income. Non-resident companies are subject to tax on Jamaican-sourced income. Tax is imposed on certain sources of income, such as interest, dividends, royalties, and fees by way of withholding at a rate of 33 $\frac{1}{3}$ % for corporations. Lower rates of withholding are possible, provided that the recipient is resident in a country that has concluded a double taxation treaty (DTT) with Jamaica.

Income tax at a rate of 33 $\frac{1}{3}$ % is payable by most corporations, including Jamaican branches of foreign corporations.

Building societies (similar to Savings and Loans Associations) are taxed at the rate of 30% on their profits.

Life insurance companies are taxed at 15% on their 'investment income' net of 'management expenses', both terms of which are defined by the Income Tax Act. Additionally, 'regionalised' life insurance companies pay income tax on gross premiums (derived from life assurance, pensions, and annuity business) at the rate of 3% while others pay at the rate of 4%.

The income of certain organisations is specifically exempt from income tax. These include pension and superannuation funds and charitable organisations approved by the Commissioner General of Tax Administration Jamaica.

Local income taxes

Income tax is imposed at the national level. Income tax is not separately imposed at the local level.

Corporate residence

A corporation, wherever incorporated, is resident in Jamaica if the central management and control of its business is exercised in Jamaica. Normally, this is the case if meetings of directors and shareholders are held in Jamaica and major policy decisions of the corporation are made in Jamaica.

Permanent establishment (PE)

The term PE is not defined by local law. In the case of a treaty jurisdiction, the relevant treaty will prescribe the meaning of the term. Where a company's activities create a PE, then it must be registered for tax purposes.

Other taxes

General consumption tax (GCT)

The GCT is a value-added tax (VAT), and the standard rate is currently 17.5%. Higher or lower rates of GCT, however, are applicable to certain goods and services. GCT at the rate of 25% applies to the provision of telephone services and handsets, while the tax is imposed on hotels and other businesses in the tourism sector at an effective rate of approximately 10%. Supplies of electricity to residential customers (in excess of 200 Kwh per month) and to commercial or industrial consumers are also subject to GCT at the rate of 10%.

GCT is also charged on imported services. Where services are imported from a person who is not resident in Jamaica, the recipient of those services is deemed to be the registered taxpayer and pays the tax chargeable on the service. This may be available as a credit in some cases against the tax payable by the recipient of the service.

The list of items and services exempt from GCT includes a wide range of basic food items, medical supplies, and other items. Certain specified drugs, as well as other items and services, are zero-rated. Supplies of electricity to residential customers up to 200 Kwh per month are zero-rated for GCT purposes.

Customs duties

Customs duty is levied on the customs value of goods imported, which is determined in accordance with the World Trade Organization (WTO) rules on customs valuation. The rates are specified by a prescribed Customs Tariff, having regard (where appropriate) to the Common External Tariff agreed between Caribbean Community (CARICOM) member states.

In addition to normal customs duties, a user fee of 2% and an environmental levy of 0.5% are imposed on the value of imports. An additional 5% GCT is levied on the commercial importation of goods subject to GCT. However, certain categories of imports are excluded from this advance GCT charge. Other import duties include additional stamp duty and a standard compliance fee.

Special consumption tax (SCT)

SCT, at various rates, is applicable to some goods, such as tobacco products, liquor, motor vehicles, and petroleum products.

Real estate tax

All land in Jamaica is valued on the 'site value' or 'unimproved value'. Owners of properties valued at JMD 300,000 or less pay a flat rate of JMD 600 annually. Tax is payable at a rate of 0.75% where the property exceeds this value, in addition to the flat rate.

Transfer tax

There is a transfer tax of 4% on the market value of the asset transferred (limited to 37.5% of the capital gain derived, if any) on the transfer of land, buildings, securities, and shares. Transactions on the Jamaica Stock Exchange (JSE) are exempt from transfer tax, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE.

Stamp duty

There is stamp duty of 1% payable on the transfer/disposal of shares and 3% for real property sold/transferred. Transactions on the JSE are exempt from stamp duty, as are

Jamaica

the transfer of registered corporate bonds, whether or not the company is listed on the JSE. Stamp duty is also imposed at nominal rate of JMD 100 on instruments effecting a refinancing of an existing mortgage. Where, however, the mortgage is increased, the normal stamp duty rates shall apply to the amount by which the mortgage increased.

Annual fee

A fee ranging from JMD 1,000 to JMD 35,000 is payable on or before 1 September, depending on the aggregate value of the company's assets. The minimum fee is payable where the aggregate value of the assets is less than JMD 50,000, and the maximum fee is payable where the aggregate value of the assets is greater than JMD 100 million.

Construction operations levy

A levy of 2% of the gross amount is payable on contracts relating to construction, haulage, and tillage operations. The contractors' levy is in the nature of tax withheld at source and must be deducted by the taxpayer from the gross payment for the construction or tillage operations and paid to the Collector of Taxes within 14 days of the month in which the gross payments are made.

The levy paid is allowable as a credit against the income tax liability of the contractor in the year of assessment in which the levy is deducted, and any amount not utilised as a credit against income tax for that year of assessment may be carried forward to subsequent years of assessment, not exceeding five years.

Branch income

Branch income is taxed at the same rate as that of local corporations and on a similar basis. The transfer of profits to the head office is subject to a withholding tax (WHT) of 33¹/₃% or at a lower treaty rate, where applicable.

A branch operation, irrespective of the nature of its business activities, is subject to Jamaican tax on income derived from the island and elsewhere. In computing the income for tax purposes, expenses incurred, wholly and exclusively for the purpose of the branch's trade, are deductible, including a reasonable proportion of head office expenses.

Transactions between the branch, its head office, and affiliates should be at arm's-length values.

Income determination

Inventory valuation

Inventories are valued at the lower of cost or market value. The Commissioner General has made no pronouncement, but last in first out (LIFO) is not generally permitted.

Any method of valuation that accords with standard accounting practice is acceptable for tax purposes, provided it is consistently applied at the beginning and end of the accounting period and it is not in contravention of the Income Tax Act.

Capital gains

There is no tax on capital gains. There is, however, a transfer tax on the market value of certain assets transferred and stamp duty payable on the transfer/disposal of shares or real property. *See the Other taxes section for more information.*

Dividend income

Ordinary dividends and non-deductible preference dividends paid to Jamaican tax residents by resident companies (whether or not they are listed on the JSE) are taxed at a zero rate. However, preference dividends that qualify as tax deductible expenses of the paying company (*see below*) are taxable in the hands of the recipient, whether or not the shares on which they are paid are listed on the JSE.

This tax-free treatment does not extend to non-resident shareholders in receipt of dividends from resident companies, and, accordingly, all dividends paid to non-resident shareholders are subject to income tax thereon at the default rate of 33 $\frac{1}{3}$ % in the case of a company and 25% in the case of an individual (subject to any treaty protection or incentive relief available).

Subject to certain conditions being met, a company may claim an income tax deduction in respect of preference dividends paid during the year of assessment. However, to the extent that these preference dividends do not qualify for this income tax deduction, they will be treated in a similar manner to ordinary dividends as indicated above.

Stock dividends

Stocks issued by way of the capitalisation of retained earnings (referred to as ‘bonus issues’) do not create a taxable distribution in the hands of the shareholders.

Interest income

Interest income is included in chargeable income and is subject to tax when received. Where interest is paid by a prescribed person, tax is deducted at source at the rate of 25% (*see the Withholding taxes section for more information*). The interest payable on certain securities issued by the government of Jamaica has been designated as being exempt from tax.

Foreign income

Resident corporations are taxable in Jamaica on their worldwide gains or profits. This includes the income of a foreign branch of a Jamaican company, as well as dividends arising abroad.

Tax deferral is not permitted in Jamaica.

Deductions

Expenses are deductible to the extent that they were incurred wholly and exclusively to earn the income and are claimed in the year in which they were incurred.

Depreciation

Tax depreciation is generally computed on the reducing-balance basis over the anticipated normal working life of the asset at specified rates. An election may be made for machinery and equipment to be depreciated at higher rates on the straight-line basis.

In the year of expenditure, initial allowances are available at the rate of 20% on industrial buildings and structures and machinery and plant. Annual allowances are available as follows:

Jamaica

Assets	Basis	Rate of annual allowance (%)
Industrial buildings	Reducing-balance	5.0
Buildings for rent	Straight-line	2.5
Other buildings	Reducing-balance	2.5
Machinery and equipment (excluding computers)		Various rates
Computers	Straight-line	22.5

Generally, capital gains on depreciable property are not taxed. However, a recharge limited to the extent of the depreciation allowed (balancing charge) is taxable. Tax depreciation may not conform to book depreciation.

Investment allowance

Investment allowances (ranging from 20% to 40%, depending on the type of industry) are available on certain plant, machinery, and buildings used in basic and qualifying industries. As investment allowances are not taken into account in calculating the tax written down value of the assets, the company effectively receives 120% or 140% of the asset's cost as tax depreciation.

Qualifying industries include manufacturing, construction, electricity undertakings, warehousing/cold storage, dock operations, and agriculture.

Accelerated depreciation

New machinery and plant acquired by a 'qualifying business' may be fully depreciated in the year of purchase instead of over the anticipated normal working life of the asset. This allowance is given in lieu of all other capital allowances and is not available for certain business activities. A qualifying business is one so designated by the Minister of Industry, Investment, and Commerce (MIIC).

Provision also exists for increased depreciation on machinery and equipment used for more than one shift in certain qualifying industries.

Goodwill

The amortisation or write-off of goodwill is not an allowable deduction.

Start-up expenses

The costs of incorporation and other expenses incurred in connection with establishing a business are not deductible against income.

Interest expenses

A deduction is available for interest that is paid on capital employed in acquiring the income. Additionally, where interest is paid to a non-resident, tax must be withheld and remitted to the tax authorities in order to secure a deduction.

Bad debts

A deduction is available in respect of specific debts that become bad during the year of assessment.

Charitable contributions

Approved donations (not exceeding 5% of taxable income) to certain qualified charities and educational institutions are deductible.

Foreign exchange gains/losses

Foreign exchange gains and losses arising from trading are included in or deducted from chargeable income when realised, regardless of whether they are converted to Jamaican dollars. Foreign exchange gains and losses arising on capital assets are not taxable or allowable for tax purposes; however, where they pertain to fixed assets, on realisation, they may become part of the underlying acquisition cost and tax depreciation computed thereon.

Fines and penalties

Fines, penalties, and interest arising from tax arrears are not deductible.

Taxes

Taxes on income are not deductible. Additionally, GCT, contractors' levy, transfer tax, and stamp duty incurred on capital assets, as well as input tax credits for GCT purposes, are generally disregarded for income tax purposes. Other taxes, such as property tax, payroll taxes, and other business taxes, are deductible, to the extent that they were incurred to earn the income.

Net operating losses

Losses incurred may be carried forward indefinitely until fully utilised. There are provisions designed to disallow the deduction of such losses where the company that has accumulated them is sold under certain circumstances.

Tax losses are not available for carryback.

Payments to foreign affiliates

Royalties, management fees, and interest charges paid to foreign affiliates are deductible to the extent that these payments are made at arm's-length rates. WHT should be paid in respect of such services, normally at 33 $\frac{1}{3}$ % where payment is to a company and 25% in the case of individuals, unless a lower rate is provided for under a DTT. Furthermore, interest paid to non-residents is not deductible until the WHT is remitted.

Group taxation

Group taxation is not permitted in Jamaica.

Transfer pricing

There are no specific transfer pricing rules in Jamaica. Transactions between connected parties are accepted if they are conducted on an arm's-length basis. The Commissioner General, however, has the power to restate the value of such transactions if a view is formed that they are conducted at artificially high/low consideration, for the purpose of avoiding tax.

Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of Jamaica.

Controlled foreign companies (CFCs)

There is no CFC regime in Jamaica.

Jamaica

Tax credits and incentives

A number of incentive laws grant approved persons relief from taxation for a specified number of years.

Specific incentives are set out under the following acts:

- The Export Industry (Encouragement) Act.
- The Industrial Incentives Act.
- The Industrial Incentives (Factory Construction) Act.
- The Jamaica Export Free Zones Act.
- The Hotels (Incentives) Act.
- The Resort Cottages Incentives Act.
- The International Finance Companies (Income Tax Relief) Act.
- The Income Tax Act (Agricultural & Venture Capital Incentives).
- The Urban Renewal (Tax Relief) Act.
- The Motion Picture Encouragement Act.
- The Shipping Act.
- The Factory Construction Act.

The incentives offered under the Industrial Incentives Act, the Export Industry (Encouragement) Act, and those available for the production of goods under the Jamaica Export Free Zones Act are to be phased out, given Jamaica's commitments under the World Trade Organization (WTO) agreement. This was expected to have been phased out by 1 January 2003. An extension of time has been granted for implementation until the end of 2013, with a two year phase-out period.

The Export Industry (Encouragement) Act (EIEA)

The incentives provided under The Export Industry (Encouragement) Act are available to companies incorporated in Jamaica whose products are exclusively for sale outside of Jamaica and CARICOM. The company must be declared an 'approved export manufacturer' in relation to an 'approved export product' by the MIIC. The incentive is also available to companies that are designated as 'partial exporters'.

Benefits available under the EIEA include relief from income tax on export profits and duty exemption on machinery and equipment, consumer goods, raw material, packaging material, and imports for the repair and maintenance of the factory. Although the benefits provided under the EIEA are initially allowed for a specified period, the MIIC has the authority to extend the incentive period by order.

The Jamaica Export Free Zones Act

The Jamaica Export Free Zones Act offers concessions to manufacturers who can operate within a designated free zone area as well as in stand-alone free zones approved by the MIIC. Exporters benefiting from this scheme obtain 100% relief from income tax; duty exemption on capital goods, consumer goods, raw material, or imports for the construction, extension, and repair of free-zone premises.

Companies approved to operate in one of Jamaica's free zones must be registered or incorporated in Jamaica under the Companies Act. They must also obtain approval from the Jamaica Free Zone Council to undertake an approved activity.

The Hotels (Incentives) Act

The Hotels (Incentives) Act provides that an approved hotel enterprise or approved extension is entitled to relief in respect of profits or gains arising from an approved

hotel enterprise or extension during the concession period, which is usually ten years. Approved hotel enterprises or extensions also benefit from exemption from customs duty and GCT on building material imported for the construction or repair of the approved hotel enterprise or approved extension, as well as certain equipment and supplies imported to outfit the hotel. An approved hotel enterprise or approved extension is so designated by the Minister of Tourism.

The Act also provides exemption from income tax on dividends to Jamaican-resident shareholders received from an approved hotel enterprise/extension as well as to non-resident shareholders who are not liable to income tax on the dividends in their country of residence.

The Urban Renewal (Tax Relief) Act

The Urban Renewal (Tax Relief) Act provides tax incentives to persons approved under the Act in connection with undertaking programmes of development in areas designated as special development areas, with a view to improving or restoring them. The tax incentive provides certain tax benefits, including relief from income tax on rental income and interest earned by an investor in an Urban Renewal Bond. There is also exemption from stamp duty and transfer tax on the transfers of property.

As of December 2010, an increased tax credit of 33 $\frac{1}{3}$ % (up from 25%) of expenditure on capital improvement works in a designated special development area (e.g. Downtown Kingston) is available. In addition, lessees of the improved properties who satisfy certain criteria are now able to claim a tax deduction of double the rental paid.

Non-resident deposits

Non-residents who place deposits with Jamaican banks can earn interest free of Jamaican tax in certain circumstances. The deposits may be designated in foreign currency or Jamaican dollars.

Employee Share Ownership Plan (ESOP)

Certain tax benefits accrue to employees and employers in respect of contributions to an approved ESOP as well as the allocation of shares from such plans.

Foreign tax credit

The avoidance of double taxation is achieved by means of foreign tax credits available under most tax treaties or by means of deduction in the case of the CARICOM treaty. Under the provisions of the Income Tax Act, a foreign tax credit is also available to companies in Jamaica that have paid or are liable to Commonwealth Income Tax. Where recourse cannot be had through either of these methods, by convention, partial relief by way of expense deduction is granted against income for the foreign tax.

Withholding taxes

The Jamaican Income Tax Act refers to deduction at source and not to withholding. The following references are to deduction at source. If it is proved that this exceeds the tax actually payable, refunds are made.

'Prescribed persons', primarily financial institutions, are required to withhold tax at source at a rate of 25% on interest income earned on investment instruments (subject to any lower rate as prescribed in a DTT). The Income Tax Act has been amended to provide a wider definition of the term 'interest'. 'Prescribed persons', as defined, include the Accountant General; banks operating under the Banking Act or the Bank

Jamaica

of Jamaica Act; institutions operating under the Financial Institutions Act; building societies; societies registered under the Industrial and Provident Societies Act, unless certain conditions are met; the Ministry of Finance & the Public Service; life insurance companies; companies registered under the Companies Act in which the government or an agency of the government holds more than 50% of the ordinary shares and which issues interest bearing securities; issuers of commercial paper; unit trust management companies; and any person who is connected with any of the persons mentioned above (with the exception of the Accountant General).

Generally, all WHTs, including taxes withheld from dividend, interest, royalties, and fees must be remitted to the Inland Revenue Department within 14 days of the end of the month in which the payment is made in order to avoid the imposition of interest and penalties.

Recipient	WHT (%)				
	Dividends		Interest (1)	Royalties	Management fees
	Portfolio	Substantial holdings			
Resident corporations	0	0	25 (3)	0	0
Resident individuals	0 (2)	0 (2)	25 (3)	0	0
Non-treaty:					
Non-resident corporations	33 $\frac{1}{3}$	33 $\frac{1}{3}$	33 $\frac{1}{3}$	33 $\frac{1}{3}$	33 $\frac{1}{3}$
Non-resident individuals	25	25	25	25	25
Treaty:					
Canada	15	22.5	15	10	12.5
CARICOM countries	0 (4)	0 (4)	15 (4)	15 (4)	15
China, P.R	5 (5)	5 (5)	7.5 (5)	10	33 $\frac{1}{3}$
Denmark	15	10 (6)	12.5	10	10
France	15	10 (6)	10	10	10
Germany	15	10 (6)	12.5 (7)	10	10
Israel	22.5 (8)	15	15	10	33 $\frac{1}{3}$
Norway	15 (5)	15 (5)	12.5	10	10
Spain	10 (5)	5 (5)	10	10	10
Sweden	22.5 (5, 8)	15 (5)	12.5	10	10
Switzerland	15 (5, 6)	10 (5)	10	10	10
United Kingdom	15 (5, 6)	22.5 (5)	12.5	10	12.5
United States	15 (5, 6)	10 (5)	12.5	10	33 $\frac{1}{3}$ (9)

Notes

1. No WHT is applicable where the interest is paid by a local bank or financial institution to an approved overseas organisation, that is, a foreign bank or financial institution to an approved overseas organisation approved by the Ministry of Finance & the Public Service.
2. Tax is withheld at the rate of 0% as of 1 January 2010 where an ordinary dividend is paid by a company resident in Jamaica to a resident shareholder.
3. Tax is deducted from interest paid to Jamaican residents if payment is made by a prescribed person.
4. Rates apply only to specified member states.
5. The lower treaty rates do not apply if the recipient has a permanent establishment (PE) in the other territory that is 'effectively connected' with the company paying the dividend.
6. A rate of 15% applies to an individual regardless of shareholding.

7. Reduced to 10% if received by a bank recognised as a banking institution under the laws of that state.
8. A rate of 22.5% applies to an individual regardless of the shareholding.
9. Nil in the absence of a PE.

A WHT rate of 25% is required to be applied in respect of interest paid or credited by prescribed persons. However, certain categories of interest income earned on long-term savings accounts (LSAs) were made exempt from tax, including:

- Interest paid or credited in respect of investments or deposits made by individuals with prescribed persons if:
 - the deposit remains a minimum of five years without any withdrawal from the principal sum invested
 - the deposit or investment (other than interest accrued or credited) does not exceed JMD 1 million in any year
 - the account is not transferable, except on the death or bankruptcy of the depositor or investor, and
 - not more than 75% of the interest accrued in any year is withdrawn during the year.
- Benefits derived from investments in certain life insurance policies may also be exempt from income tax if specified criteria are satisfied.

J

Tax administration

Jamaica has established the following departments to handle tax administration:

- The recently formed Tax Administration Jamaica (TAJ) integrates the functions which were previously undertaken by a number of different departments. These functions include compliance and tax collection, administrative and legal support, audit and assessment of income tax, general consumption tax, stamp duty, and transfer tax. The Commissioner General has responsibility for the direction, supervision, and administration of TAJ and is supported in undertaking this role by several Deputy Commissioners General.
- The former Taxpayer Appeals Department (TAD), which recently became a Revenue Appeals Division of the Ministry of Finance, processes appeals to decisions made by TAJ.
- Jamaica Customs administers taxes at the port of entry.

There is also a Financial Investigations Division in the Ministry of Finance which investigates customs breaches and fraudulent acts in respect of tax legislation.

Taxable period

A corporation is subject to tax on its income for a calendar year. However, where the Commissioner General of TAJ is satisfied that a corporation normally prepares financial statements to a date other than 31 December, the company may be permitted to use the profits of its own financial year rather than the calendar year as the basis of assessment. The basis period should not exceed 12 months; however, a company wishing to file its income tax return for a period exceeding this period must obtain the approval of TAJ.

Tax returns

Income tax returns are due for filing by 15 March in the year following the year of assessment and are based on a system of self-assessment of the tax payable.

Jamaica

Payment of tax

Tax is payable in quarterly instalments on the 15th day of March, June, September, and December of each tax year. Quarterly instalments are based on an estimate of the year's liability or the actual tax payable for the previous year. The balance of income tax payable for a taxation year, after deduction of the instalments of estimated tax, is due on 15 March of the following year. Interest is charged on unpaid tax at a rate of 20% per annum while the amount remains unpaid. A penalty of up to 50% may also be imposed if TAJ issues an assessment.

TAJ has implemented an electronic tax system that taxpayers may use to file various tax returns and remit taxes.

Tax assessments and audits

The Commissioner General is empowered to conduct audits on selected tax returns or to assess a taxpayer for additional tax at any time prior to the expiration of the statute of limitation, which is six years, except in certain cases. Tax audits can be carried out whether or not notices of assessment have been issued. Tax assessments may be raised where the Commissioner General is of the opinion that a taxpayer has been assessed for less tax than the taxpayer ought to have been charged, or where the taxpayer failed to file a tax return.

Other issues

Corporate tax calculation - Calendar year 2012

	JMD	JMD
Net profit before taxation		10,000,000
Add:		
Depreciation charged in the financial statements	500,000	
Interest payable, 2012 - accrued (1)	12,000	
Interest receivable, 2011 - now received (1)	7,000	
Donations not approved	15,000	
Subscriptions disallowable	5,000	
Interest for late payment of income tax	4,000	
Legal fees re increase in share capital	21,000	
Bad debts - increase in general provision (2)	50,000	
Balancing charge (3)	7,500	
Capital expenditure charged in the financial statements	120,500	742,000
Less:		
Interest payable, 2011 - now paid (1)	20,000	
Interest receivable, 2012 - accrued (1)	17,000	
Gain on disposal of fixed assets	18,000	
Losses carried forward from year of assessment 2011	14,000	
Capital allowances (4)	455,000	(524,000)
Taxable income		10,218,000
Income tax payable at 0% (dividends from ordinary shares of Jamaican-resident companies)	2,000,000	(2,000,000)

	JMD	JMD
Net taxable income		8,218,000
Income tax payable at 33 $\frac{1}{3}$ %		2,739,333
Less:		
Estimated (advance) tax payments	2,100,000	
Foreign tax credit	11,000	
Tax deducted from local bank interest	3,833	(2,114,833)
Net tax payable by 15 March 2013		624,500

Notes

1. Interest paid/received is dealt with on the cash basis, hence the adjustments for the amount receivable/payable.
2. Reserve for specific bad debts is allowed.
3. Recapture of excess tax depreciation is allowed.
4. Tax depreciation is granted in lieu of book depreciation.

Significant developments

2012 Tax Reform

The 2012 tax reform bill was passed on 30 March 2012 and became effective as of 1 April 2012. The key changes in the Japanese corporate tax system included in this tax reform were as follows:

- The deductible portion of a corporation's net interest expense to a related party will be restricted to 50% of the adjusted income. The net interest is calculated as interest expense to related parties less corresponding interest income. The adjusted income is defined as taxable income, adding back interest expense, depreciation expense, and exempted dividend income but excluding extraordinary income or loss. This rule will be applicable for tax years beginning on or after 1 April 2013. *See the Income determination section for more information.*
- Prior to the 2012 tax reform, qualifying research and development (R&D) expenses were allowed for taxpayers to claim an R&D tax credit to offset up to 40% of a corporation's tax liability. This preferential tax treatment was amended so that the R&D tax credit may only offset up to 30% of the corporate tax liability, effective for tax years beginning on or after 1 April 2012. *See the Tax credits and incentives section for more information.*

Special Restoration Tax Law

In the Special Restoration Tax Law, a temporary surtax system was introduced to income taxation and corporate taxation. The surtax rate is 10% of corporation tax and 2.1% of income tax. The corporation surtax is applied for three years from the first tax year that begins during the period between 1 April 2012 and 31 March 2015, and the income surtax is applied for 25 years from year 2013. Due to the introduction of the surtax, combined with the decreased corporate tax rate under the 2011 tax reform, the effective corporate tax rate is decreased by approximately 2.6% for the first three years. *See the Taxes on corporate income section for more information.*

Tohoku Earthquake and special tax legislation

On 27 April 2011, special national tax laws to help deal with the Tohoku Earthquake, including associated amendments to the local tax laws, were promulgated and immediately became effective ('Tohoku Legislation'). These tax laws are intended to provide special tax relief for affected individuals or corporations.

Further special tax relief for restoration of the affected area was added to the above Tohoku Legislation, was promulgated, and became effective on 14 December 2011. *See the Tax credits and incentives section for more information.*

Taxes on corporate income

A domestic corporation in Japan is taxed on its worldwide income. A foreign corporation is taxed only on its Japan-source income.

Corporation tax

The corporation tax rates are provided in the table below. While they were reduced, based on the December 2011 Tax Reform, for fiscal years beginning 1 April 2012, a temporary surtax of 10% is being charged, by the enactment of the Special Restoration Tax Law, to the taxpayer of corporation tax for three years from the first tax year that begins during the period between 1 April 2012 and 31 March 2015.

Company size and income	Corporation tax rate (%)		Corporation surtax (2)
	Fiscal years beginning before 1 April 2012	Fiscal years beginning on or after 1 April 2012	
Paid-in capital of over 100 million Japanese yen (JPY).	30.0	25.5	10% of the corporation tax before certain tax credit etc.
Paid-in capital of JPY 100 million or less, except for a company wholly owned by a company which has paid-in capital of JPY 500 million or more:			
First JPY 8 million per annum.	18.0	15.0 (1)	
Over JPY 8 million per annum.	30.0	25.5	

Notes

1. This is a temporary rate, which, if not extended by legislation, will revert to a 19% rate during fiscal years beginning on or after 1 April 2012 but prior to 1 April 2015.
2. The surtax applies to the three year period from the first tax year that begins during the period between 1 April 2012 and 31 March 2015.

Standard enterprise tax (and Special Local Corporate Tax)

Enterprise tax is imposed on a corporation's income allocated to each prefecture. This allocation is generally made on the basis of the number of employees.

The standard rates of enterprise tax, including a Special Local Corporate Tax, are shown below.

Taxable base	Enterprise tax (%)	Special Local Corporate Tax
First JPY 4 million per annum	2.7	81% of the current enterprise tax
Next JPY 4 million per annum	4.0	(see the immediate left column)
Over JPY 8 million per annum	5.3	

If the paid-in capital of a corporation is JPY 10 million or more and the corporation has places of business in more than two prefectures, the graduated rates above are not applicable.

For utilities and insurance companies, the standard tax rate is shown as follows:

Japan

Taxable base	Enterprise tax (%)	Special Local Corporate Tax
Net revenue (net utility charges or net insurance premiums)	0.7	81% of the current enterprise tax (see the immediate left column)

Size-based enterprise tax (and Special Local Corporate Tax)

Instead of the above general enterprise tax, a 'size-based' enterprise tax (*Gaikei Hyojun Kazei*) is applied to a company whose paid-in capital is more than JPY 100 million as of the year end.

Factors such as the size of a corporation's personnel costs and its capital (the amount of paid-in capital) will determine the additional amount of tax payable. The existing profit-based enterprise tax will also continue to apply at the tax rates indicated below. Therefore, a loss company in Japan may be required to pay tax based on value-added activities and the corporation's paid-in capital. The applicable standard rates are shown as follows:

Taxable base	Tax rate (%)	Special Local Corporate Tax
Profit-based tax:		148% of the current enterprise tax (see the immediate left column)
First JPY 4 million per annum	1.5	
Next JPY 4 million per annum	2.2	
Over JPY 8 million per annum	2.9	
Additional value-based tax	0.48	N/A
Capital-based tax	0.2	N/A

Inhabitant's tax

Inhabitant's tax is imposed on a corporation's income allocated to each prefecture and city (municipal borough). The allocation is generally made on the basis of the number of employees, in the same way as enterprise tax.

The standard tax rate is 5% as prefectural tax and 12.3% as municipal tax. However, the tax rate may be increased up to 6% for prefectural tax and 14.7% for municipal tax, depending upon the determination of each local government.

In addition to the above, inhabitant's tax is imposed on a per capita basis, in the range from JPY 70,000 (in the case that the amount of paid-in capital is JPY 10 million or less, and the number of employees in each prefecture and city is 50 or less) to JPY 3.8 million (in the case that the amount of paid-in capital is over JPY 5 billion and the number of employees in each prefecture and city is over 50). The inhabitant's tax amount is determined by the local government by the factors of paid-in capital and the number of employees.

Effective tax rate

The total corporate income tax burden (i.e. effective tax rate) is in the range of 40.69% to 42.05% (in the case of a corporation located in the Tokyo Metropolitan Area) depending upon the size of a company's paid-in capital. Since enterprise tax is deductible, the effective tax rate is less than the total of the statutory rates of corporation tax, inhabitant's tax, and enterprise tax.

In consequence of the permanent reduction of corporation tax rate and the introduction of temporary surtax mentioned above, the effective tax rate will be altered hereafter. The following is the summary of the effective applicable tax rate in the case of a large

corporation operating in Tokyo (taking no thought of an additional-value-based tax and capital-based tax out of the enterprise tax above):

Tax year	Effective corporation tax rate (%)	
	SMEs	Large corporations
Beginning on or before 31 March 2012	42.05	40.69
Beginning between 1 April 2012 and 31 March 2015	39.43	38.01
Beginning on or after 1 April 2015	37.12	35.64

Corporate residence

Domestic and foreign corporation

A company incorporated under the laws of Japan is a domestic corporation. The nationality of its shareholders or place of central management is not relevant.

A corporation other than a domestic corporation is regarded as a foreign corporation.

Permanent establishment (PE)

Under domestic tax law, the scope of Japan-source income in respect of which a foreign corporation is taxable depends upon the type of taxable presence that it has in Japan. The types of taxable presence that a foreign corporation may have in Japan include the following:

- Branch, factory and other fixed places in which business is conducted in Japan, mine, quarry, building for rent, etc. but exclude a specified place used only for the business of purchasing assets and for keeping them (Direct PE).
- Construction, installation, assembly project, or supervisory services related thereto for a period of greater than one year.
- Certain agents (Agent PE), as follows:
 - A person in Japan who has an authority to conclude contracts for a foreign corporation (excluding contracts to purchase assets) and exercises such authority continuously (Contracting Agent).
 - A person in Japan who keeps for a foreign corporation a certain quantity of assets sufficient to meet ordinary demand from the foreign corporation's customers and delivers the said assets to the customers according to their requirements (Fills Order Agent).
 - A person in Japan who, solely or principally for or on behalf one foreign corporation, habitually performs an important part of solicitation of orders, negotiations, or other acts leading up to the conclusion of contracts with respect to the business of the foreign person (Secure Order Agent).

As a matter of law, the articles of Japan's tax treaties have precedence over domestic tax law. In general, there are no significant differences between the definitions of PE under domestic tax law and Japan's tax treaties. However, once a PE has been established for a foreign corporation under domestic law, all Japan-source income is taxable to the PE (as opposed to just income 'attributable to' the PE, as is the case under most treaties).

Japan

Other taxes

Consumption tax

Consumption tax (value-added tax or VAT) is levied when a business enterprise transfers goods, provides services, or imports goods into Japan. The applicable rate is 5%. Exports and certain services to non-residents are taxed at a zero rate. Specified transactions, such as sales or lease of land, sales of securities, and provision of public services, are not subject to taxation.

Consumption tax paid by the business enterprise shall be refundable by filing the consumption tax return to the extent that such transaction is recorded in the accounting book.

Customs duty

A customs duty is levied on imported goods based on the custom tariff table.

Excise taxes

Excise taxes were abolished by introduction of consumption tax.

Fixed assets tax

The annual fixed assets tax is levied by the local tax authorities on real property and depreciable fixed assets used for business purposes. Real property is taxed at 1.7% (standard rate including city planning tax) of the value appraised by the local tax authorities. The depreciable fixed assets tax is assessed at 1.4% of cost after statutory depreciation.

Stamp duty

A stamp duty is levied on certain documents prepared in Japan. The tax amount is generally determined based on the amount stated in the document.

Registration and licence tax

Registration and licence tax is levied where certain property is registered, at a rate from 0.2% to 2% of the taxable basis. The taxable basis depends upon the property being registered (e.g. the amount of paid-in capital registered by a company or the value of real estate as assessed by local tax authorities).

Family corporation tax

If an individual shareholder together with their family members own, either directly or indirectly, more than 50% of the total issued shares or voting rights of a Japanese corporation, the corporation is treated as a family corporation (with the exception of corporations with paid in capital of JPY 100 million or less) and is subject to the family corporation tax in addition to corporation tax.

A family corporation is liable for an additional tax at the rates shown below on its undistributed current earnings in excess of specified limits.

Taxable undistributed current earnings	Family corporation tax rate (%)
First JPY 30 million per annum	10
Next JPY 70 million per annum	15
Over JPY 100 million per annum	20

Business premises tax

Business premises tax is levied and designated by each city in Japan, such as Tokyo, Osaka, Nagoya, Fukuoka, and other cities with a population of more than 300,000. A company that uses business premises in excess of 1,000 square metres and/or has more than 100 employees in a designated city is responsible to pay this tax based on the usage of the business (JPY 600 per square metre) and gross payroll (0.25% of gross payroll).

Branch income

Branch profits are taxed in the same manner as corporate profits. However, the family corporation tax does not apply to a branch of a foreign corporation. In addition, no withholding tax (WHT) is imposed on the repatriation of branch profits to the home office.

Income determination

The taxable income of a corporation is the aggregate income from all sources. There is no specific requirement to differentiate between the types of income. In principle, accounting for tax purposes follows generally accepted accounting principles in Japan, and income of a corporation is determined on an accrual basis.

Inventory valuation

Inventory cost should be determined by applying one of the following methods accepted for corporate tax purposes: actual individual cost, first in first out (FIFO), weighted average, moving average, most recent retail, selling price reduction, and lower of cost or market. However, the method of writing down inventory to market was abolished for accounting periods starting on or after 1 April 2011. The method of adding back the credited reserve amount in full to the income in the following period still remains.

Capital gains

Capital gains and losses are classified as ordinary income and losses respectively.

Under certain circumstances (e.g. qualified reinvestment, exchange property), taxes generally levied on capital gains may be deferred (i.e. provided rollover relief) as long as certain requirements are met. A special relief is available in the case of expropriation of real property by either the national or local government.

The recognition of capital gains or losses from the transfer of certain assets between group companies are to be deferred until the asset is transferred to another group company or a non-group company.

Dividend income

Dividends received from a Japanese corporation are excluded from taxable income for corporate income tax purposes, provided that the recipient corporation owns 25% or more of the shares in the dividend-paying corporation. If a corporation owns less than 25% of the shares in the dividend-paying corporation, 50% of the dividends received from the dividend-paying corporation are excluded from taxable income.

Interest expense which is allocable as an investment cost of the shares that generate the dividend income effectively reduces the amount of dividend income. Note that this rule is not applicable to dividends between 100% group companies.

Japan

95% of dividends received by a company from a foreign company in which it has held at least 25% of the outstanding shares for a continuous period of six months or more, ending on the date on which the dividend is declared, can be excluded from the company's taxable income.

If the foreign company is resident in a country with which Japan has concluded a tax treaty for the avoidance of double taxation, and such treaty provides for the allowance of an indirect foreign tax credit for taxes paid by the foreign company on the profits out of which the dividend is paid where the company holds a certain percentage of the foreign company's outstanding shares (e.g. 10% based on the tax treaty between the United States and Japan), that percentage will apply for the purpose of determining the availability of the above exemption to the extent that it is lower than 25%.

The WHT for dividends is applicable at a rate of 7% (15% on and after 1 January 2014) or 20% depending on the type of stock from which the dividends were received, and a tax credit may also be available for such WHT. The WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

Interest income

Interest received is included in taxable income. The WHT for interest is applicable at a rate of 20% (15% national tax and 5% local tax) and a tax credit may be available for such WHT. As with dividend income, the WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

Foreign income

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly. *See Foreign tax credit in the Tax credits and incentives section for more information.*

Undistributed profits of a foreign subsidiary (i.e. controlled foreign company [CFC]) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions. *See Anti-tax haven (CFC) rules in the Group taxation section for more information.*

Deductions

Depreciation and amortisation

Depreciation is deductible in the calculation of taxable income for corporation tax purposes. Depreciable assets include tangible property (e.g. buildings, attachments to buildings, structures, machinery and equipment). Certain intangible assets are also eligible for amortisation (e.g. goodwill, patents and trademarks).

With regard to depreciation methods, a taxpayer may adopt one of the allowable methods for each of the types of depreciable property. Tangible property is generally depreciated using either the straight-line method or the declining-balance method. Intangible property is generally amortised under the straight-line method.

Useful lives for assets are set forth on the table in detail. For reference, the following is the brief table of useful lives for typical assets.

Types of assets	Useful lives (years)
Concrete buildings	21 to 50 (depending on uses)
Metal building	12 to 38 (depending on uses)
Electrical facilities and lighting	15
Heating and air conditioning	15
Motor vehicles	3 to 6 (depending on uses)
Personal computers	4
Digital telephone equipment	6
Machinery and equipment	3 to 22 (depending on uses)
Patents	8
Software	3 or 5 (depending on uses)

Start-up expenses

Start-up expenses, such as corporation organisation costs and opening costs (costs to begin business after the corporation is established), are treated as deferred assets and allowed to be amortised on a voluntary basis.

Interest expenses

Interest expenses on borrowing are deductible in the calculation of taxable income in principle. However, the interest payment to related parties in the corporate group may be disallowed to be deducted to some extent in certain cases. See *'Thin capitalisation'* and *'Interest expense deduction limitation'* in the *Group taxation* section.

Reserves

Reserves recorded in the books of accounts, except for reserves for doubtful receivables and return of goods not sold, are not deductible for corporate tax purposes.

Reserve for doubtful receivables

The deductibility of a reserve for doubtful receivables is limited by the following two components: (i) an estimate of irrecoverable amounts from a debtor and (ii) a calculation of the limit in the aggregate based on either the actual historical bad debt percentage or statutory percentage (reduced for large corporations), excluding the irrecoverable amount of receivable in (i) above.

Per the December 2011 Tax Reform, the reserve for doubtful receivables is abolished, except for SMEs, banks, insurance companies, and other similar financial corporations. The abolishment is phased in over four years, as follows:

Applicable tax years	% of the deductible amount (100% = deductible amount before 2011 tax reform)
Beginning between 1 April 2012 and 31 March 2013	75
Beginning between 1 April 2013 and 31 March 2014	50
Beginning between 1 April 2014 and 31 March 2015	25
Beginning on or after 1 April 2015	0

Reserve for return of goods not sold

A deductible reserve for return of goods not sold is available to corporations such as publishers, wholesalers of books, and others, provided that the corporation sells the merchandise under an unconditional repurchase agreement.

Japan

Charitable contributions

Except for certain designated donations, the tax deduction for charitable contributions is limited to certain amounts (updated for the December 2011 Tax Reform), as follows:

Donation	Tax year beginning before 1 April 2012	Tax year beginning on or after 1 April 2012
General donation	$((0.25\% \text{ of capital plus capital surplus}) + (2.5\% \text{ of income})) \times 1/2$	$((0.25\% \text{ of capital plus capital surplus}) + (2.5\% \text{ of income})) \times 1/4$
Donation made to designated public purpose companies	$((0.25\% \text{ of capital plus capital surplus}) + (5.0\% \text{ of income})) \times 1/2$	$((0.375\% \text{ of capital plus capital surplus}) + (6.25\% \text{ of income})) \times 1/2$

Donations subject to this limitation include economic benefits considered to be given as a subsidy. Donations to foreign affiliates are not fully deductible.

In the case that a donation occurs between group companies (as defined), there will be no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee).

Directors' remuneration

The remuneration paid to directors is deductible only in the following three cases:

- Fixed monthly payments.
- Fixed payments in accordance with an advance notice to the tax office.
- Performance bonuses paid in proportion to the company's earnings to directors who engage in the operation of the company's business, to the extent that certain requirements are met.

If the amount of remuneration is deemed unreasonable by the tax authority, only the reasonable amount is deductible for tax purposes.

Entertainment expenses

In principle, entertainment expenses are not deductible for tax purposes. However, an SME, defined as a company with paid-in capital of JPY 100 million or less (except for a company wholly owned by a company which has paid-in capital of JPY 500 million or more after the group taxation regime is effective) may take a tax deduction up to the smaller of 90% of the actual disbursement for the entertainment expense or JPY 5.4 million (90% of JPY 6 million). With regard to expenses for eating and drinking, a company may deduct such expenses up to JPY 5,000 per person (excluding expenditures for internal purposes) for tax purposes.

Fines and penalties

Fines and penalties are not deductible.

Taxes

Enterprise tax and business premises tax are deductible in the calculation of the taxable income for corporation tax purposes on a cash basis. However, corporation tax and inhabitant's tax are not deductible. Fixed assets tax and other taxes are deductible, when assessed. Foreign income taxes also may be deductible if the Japanese corporation does not elect to claim a foreign tax credit.

Net operating losses

For corporate income tax and enterprise tax purposes (indirectly for inhabitant's tax purposes), a tax loss can be carried forward to offset future income in the case that a taxpayer files a 'blue form' tax return (see *Tax returns in the Tax administration section*) or if the tax loss is incurred as a result of certain disaster events.

Per the December 2011 Tax Reform, the use of carried forward net operating losses is limited to 80% of current taxable income, effective for tax years beginning on or after 1 April 2012. Such limitation does not apply to SMEs and certain 'investment vehicle' corporations. However, the period within which net operating losses can be carried forward is extended from seven years to nine years for the losses incurred in the tax year ending on or after 1 April 2008 on condition that taxpayers maintain their books and records in which net operating losses were recognised.

	Fiscal year beginning before 1 April 2012	Fiscal year beginning on or after 1 April 2012
SMEs and certain 'investment vehicle' corporations		
Deductible losses against taxable income	100%	100%
Carryforward years	7 years	9 years
Corporations other than above		
Deductible losses against taxable income	100%	80%
Carryforward years	7 years	9 years

Where there is a change in ownership of a corporation followed by certain events, such as the cessation of business or a significant change in its business within a five-year period following a business acquisition, the utilisation of its tax loss is restricted.

Carryback of tax losses is generally available for one year for national corporation tax purposes. This carryback rule is suspended until the fiscal year ending 31 March 2014 (except in specified circumstances, e.g. year of liquidation). However, a SME can apply a tax loss recognised in a fiscal year ending on or after 1 February 2009.

No carryback of losses is allowed for enterprise tax and inhabitant's tax.

Payments to foreign affiliates

In order to support a deduction in Japan for expenses incurred by a foreign affiliate and charged to a Japanese corporation, in general, it should be demonstrated that the service arrangement between the foreign affiliate and the Japanese corporation satisfies arm's-length criteria for purposes of Japan's transfer pricing laws and regulations.

Generally, fees that are paid by a Japanese subsidiary to a foreign affiliate should be deductible for Japanese tax purposes if the following conditions are met:

- The services should have the same character as services which take place between non-related companies or such services are essential to Japan's activities.
- There is a written service agreement.
- The services were requested by the Japanese corporation.
- The rendering of services is documented with evidence (e.g. requests for services from the Japanese subsidiary, regular invoices sent by the foreign affiliate).
- The service charges are reasonable.

Japan

Group taxation

Consolidated tax regime

Under the consolidated tax regime, a consolidated group can report and pay national corporate income tax on a consolidated basis. A consolidated group may be formed by a Japanese parent company and its 100% owned (directly or indirectly) Japanese subsidiaries. The taxpayer may file an application to elect a consolidated group filing for tax purposes, but the election must include all of the parent's eligible subsidiaries. Once the election is made, the consolidated filing, in principle, cannot be revoked unless there is a specific event, such as an ownership change that causes the qualifying conditions of a consolidated filing to fail, or an application to discontinue the consolidated group has been approved by the Commissioner of the National Tax Agency (NTA).

The taxable income of the consolidated group is computed on a consolidated basis by aggregating the taxable income or losses of each member of the consolidated group followed by the consolidation adjustments. Profits from intra-group transactions, except for transfer of certain assets as defined, should be included in the aggregate taxable income. Gains or losses from the intra-group transfer of certain assets are deferred.

Pre-consolidation tax losses of a subsidiary can be carried forward into a consolidated tax group but may only be offset against taxable income of the subsidiary for the calculation of a consolidation income.

The consolidated national corporate income tax liability is determined by applying the corporate income tax rate to the consolidated taxable income and adjusted for consolidated tax credits. The total tax liabilities are allocated back to each member company. The parent company files the consolidated return and pays the national corporate income tax for the group; however, each member company remains jointly and severally liable for the consolidated group's total national corporate income tax liability.

Local corporate income taxes levied on member companies are paid on a separate company basis, but the amount of local tax payable may be affected because of the consolidated filing.

Group taxation regime

A group taxation regime is applicable to domestic companies that are wholly owned by a domestic company, foreign company, or individual ('group companies'). Unlike the consolidated tax regime, the group taxation regime automatically applies to group companies.

The key points of this regime are summarised as follows:

- The recognition of capital gains or losses from the transfer of certain assets (including the transfer of assets as a result of a non-qualified or taxable merger) between group companies is deferred until the asset is transferred to another group company or a non-group company. The scope of assets is the same as that under the tax consolidation system (i.e. fixed assets, land, securities, monetary receivables, and deferred expenses [excluding securities for trading purposes and assets with a book value of less than JPY 10 million]).
- Where a donation occurs between group companies, there are no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee). Note that this treatment is not applied to a group company owned by an

individual. This is consistent with the treatment of a donation between members of a consolidated tax group.

- A dividend received from a group company can be fully excluded from taxable income without any reduction for allocable interest expense. This is consistent with the treatment of dividends between members of a consolidated tax group.

A group company that would otherwise qualify as an SME on a stand-alone basis is not eligible for SME benefits (e.g. reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carry back of tax losses) if the SME is owned by a parent company or two or more parent companies of the group that has paid-in capital of JPY 500 million or more.

As amended in the 2011 tax reform, where a corporation which is a member of a 100% group is in the process of liquidation and is expected to be dissolved, any loss from the impairment or devaluation of the shares of the liquidating corporation cannot be recognised by the parent company as a tax deductible expense, effective on a devaluation on or after 30 June 2011.

Transfer pricing

If a corporation which is subject to corporation tax sells property to or buys property from a foreign-related person, or provides services or conducts other transactions with a foreign-related person, and consideration is received or paid by the corporation, the transaction is required to be carried out at an arm's-length price for corporation tax purposes.

A foreign-related person is a foreign corporation which maintains certain special relationships with the subject corporation, such as parent-subsidiary, brother-sister, or substantial control relationship.

The arm's-length price for the sales or purchase of inventory may be determined using one of the four following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Other method.

For accounting periods starting on or before 30 September 2011, an 'other method' may only be used if the first three methods cannot be applied. After the 2011 tax reform, for accounting periods starting on or after 1 October 2011, the priority between transfer pricing methods has been eliminated, and the 'most appropriate method' should be applied in order to calculate the arm's-length price.

An advanced pricing agreement (APA) system is available to confirm the arm's-length pricing system proposed by a taxpayer. In general, corporations entering into an APA are advised to file a request for mutual agreement procedures (MAP) in order to obtain the agreement of the competent authorities of each country.

Thin capitalisation

Interest paid on debt to controlling foreign shareholders is disallowed to the extent the average balance of debt on which that interest is paid is more than three times the equity of controlling foreign shareholders.

Japan

Interest expense deduction limitation

Under the 2012 tax reform, the new rule regarding the restriction of deductibility of interest expense from a related party was introduced.

The deductible portion of a corporation's net interest expense to a related party will be restricted to 50% of the adjusted income. The net interest is calculated as interest expense to related parties less corresponding interest income. The adjusted income is defined as taxable income, adding back interest expense, depreciation expense, and exempted dividend income but excluding extraordinary income or loss.

This rule will be applicable for tax years beginning on or after 1 April 2013.

Anti-tax haven (controlled foreign company or CFC) rules

Undistributed profits of a foreign subsidiary (i.e. CFC) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions.

Tax havens are defined as certain countries or territories that do not impose corporate income tax or that tax the income of a foreign subsidiary at a rate of 20% or less. A Japanese corporation owning a 10% or more direct or indirect interest in a CFC is required to include its pro-rata share of the taxable retained earnings of the CFC in its gross income under certain circumstances.

A dividend paid by a CFC is not deductible when calculating its undistributed income.

Tax credits and incentives

Foreign tax credit

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly.

Creditable foreign taxes are defined as taxes that (i) are incurred directly by the taxpayer; (ii) are levied by foreign governments and local authorities in accordance with local tax laws; (iii) are levied on corporate income; and (iv) have the same characteristics as Japanese income tax, corporation tax, and local income-based taxes. A tax for which refund can be claimed optionally by the taxpayer after the tax payment, or a tax whose payment grace period can be decided by the taxpayer, are not regarded as foreign tax.

In order to prevent the credit from reducing corporation tax on Japan-source income, certain limitations are set on the amount of foreign tax that can actually be credited. Per the December 2011 Tax Reform, the ceiling is lowered from 50% to 35% for the foreign tax paid in the tax year beginning on or after 1 April 2012.

A foreign tax credit is not applicable for enterprise tax purposes, although foreign branch income attributable to a business executed outside Japan is exempt from enterprise tax.

Generally speaking, the foreign tax credit system does not apply to the extent the dividend income from the foreign subsidiary is subject to the dividend exemption system.

Tax credit for research and development (R&D) cost

The tax credit for R&D cost is calculated based on gross R&D cost. Limitation of the credit is determined based on the corporation tax liability as follows:

- For tax years ending on or before 31 March 2012: 30% of the corporation tax liability.
- For tax years beginning 1 April 2012 to 31 March 2014: 20% of the corporation tax liability.

In the case that the amount of the credit exceeds the limitations above, the excess amount can be carried forward for one year.

In addition to the R&D credit, for tax years beginning during the period 1 April 2008 to 31 March 2014, a taxpayer may claim an additional tax credit based on its incremental R&D expenditure or excess R&D cost over sales, as follows:

- 5% of the excess R&D costs over the annual average of R&D costs for the last three years.
- Excess R&D costs over 10% of the average sales amount multiplied by a tax credit ratio equal to $((\text{R\&D costs}/\text{average sales}) - 10\%) \times 0.2$.

The limitation of this additional tax credit is 10% of the corporation tax liability.

Special tax treatment for investment in certain equipment

SMEs filing 'blue form' tax returns may elect, under certain conditions, to claim accelerated depreciation of 30% of the base acquisition cost or a special tax credit equivalent to 7% of the base acquisition cost on designated equipment to the extent that it is acquired by 31 March 2014. The maximum tax credit is limited to 20% of the taxpayers' corporate tax liability.

Special tax treatment for Designated International Strategic Area

Qualifying corporations doing business in certain designated metropolitan areas ('Designated International Strategic Area') will be granted the following tax incentives:

- If qualifying corporations are engaged in specified businesses in the Designated International Strategic Area, certain capital expenditures (JPY 20 million or more for machinery and equipment and JPY 100 million or more for building and construction) incurred for the specified businesses will be eligible for either (i) a deduction equal to 50% of the capital expenditures (building is limited to 25%) or (ii) a tax credit equal to 15% of the capital expenditures (building is limited to 8%), with the maximum credit amount in any given tax year being equal to 20% of the tax liability before the credit, with a one year carryforward.
- If qualifying corporations are engaged primarily in specified businesses in the Designated International Strategic Area, they will be entitled to an income exclusion of up to 20% for five years, provided they are incorporated in the Designated International Strategic Area and incur certain capital expenditures. If qualifying corporations claim the 20% income exclusion, they will not be entitled to the tax credit regime described above.

Qualifying corporations will be eligible for the tax credit regime described above with respect to capital expenditures incurred from the effective date of the law concerning this regime through 31 March 2014. Corporations will be eligible for the 20% income exclusion regime for five years once they are specified as qualifying corporations

Japan

during a period from the effective date of the law concerning this regime through 31 March 2014.

Tax incentives for Asian headquarters

A qualifying corporation filing 'blue form' tax returns that will be primarily engaged in the operational management or R&D activities established by an international foreign corporation will be entitled to claim a 20% income exclusion over five years from the date it is specified (during the period from the effective date of the law concerning this regime through 31 March 2014) as a qualifying corporation pursuant to the relevant law.

Employment promotion taxation

If qualifying corporations increase the number of employees subject to employment insurance by 10% or more and by five people (two in the case of small and medium corporations) or more from the end of the prior tax year, the qualifying corporations will be eligible for the tax credit equal to the increased number of the employees multiplied by JPY 200,000 with the limitation of 10% (20% in the case of small and medium corporations) of the tax liability before the credit, subject to certain conditions for the tax years which commence from 1 April 2011 (excluding years ending before 30 June 2011) to 31 March 2014.

Tohoku Earthquake and special tax legislation

Corporate tax refunds by loss carrybacks

Under the current law, one year tax loss carrybacks are allowed for SMEs. Other corporations are allowed a one year tax loss carryback in the year of liquidation. In the Tohoku Legislation, corporations which incurred a specified disaster loss from the Tohoku Earthquake (the "Tohoku Earthquake Disaster Loss") may carry back such loss for two years for national tax purposes. Such carryback may be elected either with the annual corporate tax return or an interim tax return based upon a full interim closing of the corporate books. For local tax purposes, the tax loss carryback is not applicable, although carryforward of all losses (including the Tohoku Earthquake Disaster Loss) is allowed over the normal nine year carryforward period.

Applicable tax year and tax return	Carryback years	Refundable tax amount
Final tax return for tax year ending between 11 March 2011 and 10 March 2012	Tax years beginning within two years from the first date of the tax year when the Tohoku Earthquake Disaster Loss is incurred	Tax liability of carryback year X (Tohoku Earthquake Disaster Loss / Taxable income of carryback year)
Closing basis interim tax return for interim period ending between 11 March 2011 and 10 September 2011	Tax years beginning within two years from the first date of the interim period when the Tohoku Earthquake Disaster Loss is incurred	

Special depreciation for newly acquired assets relating to the Tohoku Earthquake

A corporation may claim a special depreciation of certain assets in the year of acquisition in addition to normal depreciation. The qualified assets should be acquired and placed in service between 11 March 2011 and 31 March 2016 and satisfy either (i) or (ii) below:

- (i) Newly acquired assets to replace assets destroyed in the Tohoku Earthquake, including:
 - Buildings, structures, machinery, or equipment.
 - Registered vessels, aircraft, or vehicles.
- (ii) Newly acquired assets placed in service in a business carried out at the affected area*, including buildings, structures, machinery, or equipment.

* Areas where destroyed buildings or structures were located and surrounding areas where machinery or equipment were installed.

Assets	Special depreciation rate applicable to the assets acquired and put into service between 11 March 2011 and 31 March 2014 (%)		Special depreciation rate applicable to the assets acquired and put into service between 1 April 2014 and 31 March 2016 (%)	
	SMEs	Other than SMEs	SMEs	Other than SMEs
Buildings, structures	18	15	12	10
Machinery, equipment; registered vessels, aircraft, vehicles	36	30	24	20

J

Rollover relief given to newly acquired assets to replace old assets

Under the current statutes, up to 80% of the capital gain realised when a corporation acquires an asset to replace an old one may be deferred. Under the Tohoku Legislation, for certain assets acquired between 11 March 2011 and 31 March 2016, the entire amount of capital gain may be deferred. Qualified replacement assets include the following:

- Real estate or depreciable assets located in Japan purchased to replace real estate (including buildings or structures fixed to the land) in the affected area that had been acquired prior to 11 March 2011.
- Real estate or depreciable assets purchased in the affected area to replace real estate, buildings, or structures located other than in the affected area.

When applying the rollover relief rules, the due date for acquiring replacement assets is extended for a further two years if it is difficult to acquire the replacement asset by the normal due date as a result of the Tohoku Earthquake.

Applicable transaction	<ul style="list-style-type: none"> • Acquiring replacement assets due to expropriation. • Acquiring certain other replacement assets.
Cases where the extension will be approved	<ul style="list-style-type: none"> • Difficulty in acquiring replacement assets by the normal due date which falls within a tax year which ends between 11 March 2011 and 31 March 2012.
Requirements for applying the extension	<ul style="list-style-type: none"> • A corporation expects to acquire the replacing asset within the designated period (up to two years). • A corporation expects to place the replacing asset in service within one year from the acquisition date (excluding replacement assets due to expropriation). • Extension is approved by the chief of the appropriate tax office.
Filing of the application form	<ul style="list-style-type: none"> • The application form should be filed within two months from the beginning of the tax year following the transferring year.

Japan

Additional special tax relief for restoration of the affected area

The following additional tax incentives were introduced on 14 December 2011. Please note that a corporate taxpayer must choose one of (i), (ii), or (iii) below, where (ii) can be chosen only where 'employment promotion taxation' (*see above*) is not applied.

i. Tax incentive for a newly established company doing business in designated areas.

A newly established company satisfying certain criterion is not subject to tax on income for the first five years of its existence. However, in effect, the tax holiday is more akin to a deferral since the income is offset by a special reserve that is reversed in later years.

The tax incentive applies to a company that acquires machinery, equipment, and building structures in a specified industrial concentration area which is organised by an approved local government and designated by 31 March 2016 by the local government as a company which contributes to providing opportunities for employment ('Designated Company') and newly established on or after the date when the designated restoration planning is approved.

If a Designated Company set up reserves for reinvestment in each of the tax years (including a day) within a designated period (five years from the date on which a company is designated), the amount of reserve (which may be set up to be 100% of taxable income) is deductible and may essentially defer tax for ten years.

In a tax year where a Designated Company reinvests in machinery or building in a specified industrial concentration area, a corporation is allowed to claim a deduction of the lesser of (i) special depreciation up to the balance of the reserve and (ii) special depreciation equal to the reversed reserve amount.

ii. Special corporation tax credit

Designated Company is allowed to enjoy a tax credit for 10% of salary paid (but limited to 20% of corporation tax due) to employees within a specified industrial concentration area.

iii. Special depreciation and special tax credit

Designated Company is allowed to enjoy special depreciation or a special tax credit for (i) machinery and equipment and (ii) buildings and structures acquired by 31 March 2016 in a specified industrial concentration area.

- Special depreciation: Depreciation rates applicable for machinery and equipment are 100% if acquired and used by 31 March 2014, and 50% if acquired and used on or after 1 April 2014. The depreciation rate applicable for buildings and structures is 25%.
- Special tax credit: The rates of tax credit applicable for (i) machinery and equipment and (ii) building and structures are 15% and 8%, respectively, but limited to 20% of corporation tax due. Any tax credits in excess of this limitation can be carried forward for four years.

Withholding taxes

Tax treaty network

As of 31 March 2012, Japan has entered into 55 tax treaties with 66 countries. Companies making certain payments are required to withhold income taxes using the following rates.

Vietnam	10	10	10	10
Zambia	0	0	10	10

Notes

The applicable treaty rates are effective as of 31 March 2012.

1. The tax treaty rates apply only to corporate shareholders. The applicable treaty should be checked for conditions required to claim the reduced rate.
2. The applicable treaty should be reviewed because certain tax treaties exclude film royalties and/or gain from copyright transfer from taxable income.
3. For certain dividends received from 1 January 2004 through 31 December 2013, the reduced rate of 7% (for resident individuals, an additional 3% will be levied) is applied instead of 20%. Thus, the WHT rate for resident individuals is either 10% or 20%, whereas, the rate for corporations or resident individuals in non-treaty countries is 7% or 20%. For residents in treaty countries, 7% or the treaty rate will be applied. As of 1 January 2014, 20% will be applied without exception.
4. Interest on bank deposits and/or certain designated financial instruments is subject to a 15% national WHT and 5% local inhabitants WHT (20% combined). Taxation of such interest is fully realised by tax withholding, so resident individuals are not required to aggregate such interest income with other income. Interest on loans made by resident individuals is not subject to withholding tax; instead, it is taxed in the aggregate with other income. Such WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
5. Dividends, interest, and royalties earned by non-resident individuals and/or foreign corporations are subject to a 20% national WHT under Japanese domestic tax laws in principle. An exception rate of 7% is applied to dividends from certain listed companies. An exceptional rate of 15% is applied to interest on bank deposits and certain designated financial instruments. Interest on loans, however, is taxed at a 20% rate. A special exemption from WHT applies to certain long-term corporate bonds issued to non-residents in foreign countries.
6. Tax treaties with many countries provide reduced tax rates, as indicated. Some treaties, however, provide higher tax rates (e.g. Brazil, Thailand) or do not provide rates (e.g. Egypt, New Zealand). In these instances, rates specified under Japanese domestic tax laws apply. Each treaty should be consulted to see if a reduced rate for dividends (in the case of substantial holdings) is applicable.
7. The tax treaty was concluded mainly for the purpose of information exchange.
8. The tax treaty with Brazil provides a 25% tax rate for certain royalties (trademark). However, the WHT rate cannot exceed 20% on any royalties to be received by a non-resident taxpayer of Japan under Japanese income tax law. Film royalties are taxed at 15%. Any other royalties are taxed at 12.5%.

9. The treaty with the former Czechoslovakia is applied to the Czech Republic and the Slovak Republic. It stipulates that cultural royalties are tax exempt.
10. Film royalties are taxed at 20%, and other royalties are taxed at 15%.
11. Cultural royalties are tax exempt.
12. The rate of 10% for royalties includes consideration for technical services.
13. The rate for royalties is reduced to 5% by Protocol.
14. Dividends received from subsidiaries, by parent companies that have met certain conditions, are exempt from withholding taxes.
15. Dividends received from subsidiaries for which parent company has over 50% shareholding are tax exempt. Interest received by government and other specific entities, or paid as a consequence of sale on credit of any equipment, merchandise, or service, is tax exempt.
16. A 5% rate is applied to a company which has over 50% shares with direct voting rights, and a rate of 7.5% is applied to a company which has over 25% shares with direct voting rights.
17. Film royalties are taxed at 15%. Any other royalties are taxed at 10%.
18. Cultural royalties are tax exempt.
19. Cultural royalties are taxed at 10%.
20. Royalties paid for the use of certain equipment are taxed at 5%.
21. Interest paid to financial institutions is tax exempt, as well as film and copyright royalties. Patent royalties are subject to a 10% rate.
22. If certain conditions for beneficial owners are met, dividends are taxable only in the contracting state of which the beneficial owner is a resident.
23. Dividends paid by a corporation that is engaged in industrial undertakings are taxed at 15%. Interest paid to financial institutions is taxed at 10%.
24. Interest paid to financial institutions is taxed at 10%.
25. The treaty with the former USSR is applied to Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. It stipulates that cultural royalties are tax exempt.

Tax administration

Taxable period

The tax year is the corporation's annual accounting period specified in its articles of incorporation. A Japan branch of a foreign corporation must use the same accounting period that is adopted by the corporation in its home country.

Tax returns

Corporate income tax returns (i.e. the national corporation tax return, enterprise tax return, and local inhabitants' tax return) are self-assessment tax returns.

If a corporation meets certain conditions, such as keeping certain accounting books, and makes an application for it in advance, it is allowed to file a 'blue form' tax return. A blue form filing corporation may benefit from loss carryforward and other benefits.

A corporation (including a branch) is required to file the final tax return within two months after the end of its annual accounting period. If a corporation cannot file the final return because of specific reasons, the due date of final return may be extended for one month with the tax authority's approval.

Payment of tax

Income taxes payable on the final corporate income tax return should be paid on or before the filing due date of the final tax returns (usually two months after the end of the corporation's accounting period). If an extension of time for filing is granted, the taxes may be paid on or before the extended due date with interest accrued at a rate of 4.3% (for the year 2012) per annum for the period from the day following the original due date (i.e. two months after the end of an accounting period) to the date of the actual payment.

Provisional tax payments are required for a corporation that has a fiscal period longer than six months. Provisional taxes generally are computed as one-half of the tax

Japan

liabilities for the previous year, but they may be reduced by the filing of interim tax returns that reflect semi-annual results of the operations. The provisional tax payment is required to be made within two months after the end of the sixth month of the corporation's accounting period.

Tax audit

Generally speaking, corporate tax audit is performed in cycles of three to five years' duration. However, this period may be shortened in the case that some significant tax matters were pointed out in the prior audit and so on. If taxpayers request a downward correction, tax audit will be performed to make sure it.

With regard to tax audit procedures, tax laws have not clarified them thus far. Under the December 2011 tax reform, it is clarified that prior to conducting tax audit, in principle, tax agents are required to notify taxpayers and that, upon completion of tax audits, tax agents are required to provide to taxpayers a brief written summary of their findings, etc. It is effective for tax audits commencing on or after 1 January 2013.

Statute of limitations

The statutory limitations to request a downward correction of prior year tax liabilities is five year (six years for transfer pricing) from when the original tax return was filed (with regard to the tax returns due before 2 December 2011, the statutory limitation was one year, as a rule).

The statute of limitations with regard to upward corrections by the tax authorities is also five years (six years for transfer pricing).

Consolidated taxation

The parent company will file the consolidated tax return and pay national corporate income tax for the group. The consolidated tax return and payment due dates are the same as previously discussed; however, the due date of the final return may be extended for two months.

For local corporate income taxes, each member of the consolidated group must separately file the returns and pay the taxes.

Penalties

If the tax return is filed late, a late filing penalty is imposed at 15% to 20% of the tax balance due. In the case that a corporation voluntarily files the tax return after the due date, this penalty may be reduced to 5%.

An under-payment penalty is imposed at 10% to 15% of additional tax due. In the case that a corporation amends a tax return and tax liabilities voluntarily after the due date, this penalty may not be levied.

In addition, interest for the late payment of tax is levied at 4.3% (for the year 2012) per annum for the first two months and increases to 14.6% per annum thereafter.

Significant developments

Jersey's business tax regime has recently been reviewed by the European Union (EU) Code of Conduct on Business Taxation Group (Code Group). The Code Group expressed concerns over Jersey's rules for taxing profits of Jersey companies on Jersey shareholders as deemed dividends or attributed profits. To address these concerns, these provisions have been removed as of 31 December 2011. During a meeting held with the Code Group on 13 September 2011, Jersey officials received confirmation that the removal of these provisions means that they will no longer regard Jersey's tax regime as 'harmful'. The formal process of ratification by the Economic and Financial Affairs Council (ECOFIN) was received in December 2011.

Taxes on corporate income

Resident companies are generally taxed on their worldwide income. A permanent establishment (PE), e.g. a branch of a company, is taxed on profits attributable to the PE. Non-resident companies are taxable on Jersey real estate income.

Companies pay income tax at a rate of 0%, 10%, or 20% on taxable income. The general rate applicable is 0%; the 10% and 20% rates apply to certain companies/income streams as explained in this section. The tax rate applies to the company as a whole, the only exception being Jersey-source property income, which is taxed at 20% regardless of the classification of the property holding company.

Certain Collective Investment Funds and Securitisation Vehicles can elect to be exempt from tax on income, other than income from Jersey land or property, for an annual fee of 500 pounds sterling (GBP).

The 20% tax rate applies to Jersey-based utility companies, such as telephone, gas, and electricity companies. Additionally, income from Jersey real estate, including rental income, property development profits, and income from exploiting Jersey land (e.g. quarrying activities) is subject to tax at 20%. From 2012, companies involved in oil importation are taxed at 20%.

The 10% rate applies to financial services companies. A company is defined as a financial services company if:

- it is registered under the 1998 financial services law to carry out investment business, trust company business, or fund services business as an administrator or custodian in relation to an unclassified or an unregulated fund
- it is registered under the 1991 banking business law, or

Jersey, Channel Islands

- it holds a permit under the collective investment funds law of 1988 as an administrator or custodian.

The 0% rate applies to all entities that are not exempt, financial services entities, or utility companies, including fund managers who do not hold any of the permits mentioned above.

Provisions in Jersey tax law under which Jersey-resident beneficial owners of Jersey companies were subject to tax on distributed or undistributed profits were removed as of 31 December 2011.

Local income taxes

There are no local government taxes on income.

Corporate residence

A company is regarded as tax resident in Jersey if it is incorporated in Jersey or if it has its place of central management and control in Jersey. However, a Jersey incorporated company managed and controlled elsewhere will not be regarded as a Jersey resident, provided certain conditions are satisfied.

Permanent establishment (PE)

Under domestic legislation, a PE, in relation to a company, includes a branch of the company, a factory, shop, workshop, quarry or a building site, and a place of management of the company; however, the fact that the directors of a company regularly meet in Jersey shall not, of itself, make their meeting place a PE.

For a definition of PE contained in Jersey's double tax agreements (DTAs), the relevant clause and agreement should be reviewed. In general, it may include a branch, management, or other fixed place of business, but not an agency, unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts or has a stock of merchandise from which the agent regularly fills orders.

Other taxes

Goods and services tax (GST)

The standard rate of GST is 5%.

Companies with taxable supplies of more than GBP 300,000 per annum are required to register for GST.

International service entity (ISE) status

To address the difficulty of irrecoverable input tax in the financial services sector, and to mitigate the administrative cost of GST for exporters in general, Jersey has introduced the concept of an ISE. Where an entity qualifies for this status:

- it will not be required to register for GST
- services to it will be zero-rated (i.e. treated as an export) where the supply exceeds GBP 1,000, and
- input tax on purchases less than GBP 1,000 may be reclaimed.

Jersey, Channel Islands

ISE status is automatically available to a wide variety of service providers and administered entities based in Jersey, upon application and payment of the relevant fee, including licensed banks, licensed trust service providers, licensed fund administrators, fund managers, and managed managers.

Other entities not automatically eligible under one of the categories above, including companies, partnerships, trusts, unrecognised funds, and special purpose vehicles, may still obtain ISE status if they fulfil certain criteria.

The ISE must be included on a list maintained by the comptroller of income tax. The list will refer either to the entity itself or (e.g. for administered entities) a class of entities as submitted by the administrator.

Customs duties

A common customs tariff is applicable on all goods imported from outside the European Union. The amount is dependent on what the goods are and where they are imported from.

Excise taxes

An excise duty tax is payable on imported alcohol, tobacco, and fuel at varying rates.

Stamp tax

Stamp duty is payable on the purchase or transfer of Jersey real estate, with rates ranging from 0% to 5%. Mortgages secured by a charge over Jersey real estate are subject to stamp duty at rates of up to 0.5% of the amount borrowed. No stamp duty is payable on the transfer of shares.

Transfer tax

A land transaction tax applies when shares in companies are transferred and the ownership of which confers a right of occupation of residential real estate in Jersey. The amount of land transaction tax payable is equal to the stamp duty that would have been suffered if the real estate were held directly.

Branch income

Branch income is taxed at the rate applicable to the company. No further tax is withheld on the transfer of profits abroad.

Income determination

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. The last in first out (LIFO) method is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains

Capital gains are not subject to tax in Jersey.

Dividend income

There is no requirement to withhold tax at source when paying dividends. If a dividend is paid out of profits that have suffered tax at a 10% or 20% rate, then the net dividend

Jersey, Channel Islands

will be accompanied by a tax credit at the applicable rate. Repayment of the tax credit can be claimed by Jersey investment companies and financial services companies receiving the dividends, subject to certain restrictions. However, trading companies subject to tax at 0% are not entitled to claim a repayment of any of the tax credit.

Stock dividends

Stock dividends are taxed as income.

Interest income

Interest income will form part of taxable income and will be taxed at the rate applicable to the company.

Foreign income

Income tax is levied on foreign branch income when earned and on foreign dividends, interest, rents, and royalties. Double taxation is mitigated by either the granting of unilateral relief to the extent of taxing foreign income net of foreign taxes or by treaty relief, which gives credit for foreign tax. Concessional credit relief might be granted in certain limited circumstances upon application.

In addition to the long standing DTAs with the United Kingdom and Guernsey, Jersey now has DTAs with Australia, Denmark, Estonia, Faroes, Finland, France, Germany, Greenland, Hong Kong, Iceland, Malta, New Zealand, Norway, Qatar, and Sweden. The scope varies from agreement to agreement, but most are of limited scope.

Jersey has also signed tax information exchange agreements (TIEAs) with 23 countries.

Deductions

Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of the trade.

Depreciation and depletion

Capital allowances are available using the diminishing-balance method on machinery and equipment, including vehicles, at a rate of 25%. For this purpose, all such assets are pooled, and the allowance is calculated by reference to the value of the pool.

On disposal of an asset, the lower of cost and sale proceeds of the asset is deducted from the pool. A balancing charge is levied if the proceeds exceed the balance of the pool.

Motor vehicles costing more than GBP 21,000 and greenhouses are subject to special rules and are not pooled with other assets.

By concession, an alternative is to claim the full cost of replacement in the year of replacement.

Capital allowances are not applicable to buildings or the depletion of natural resources.

Goodwill

Goodwill expenditure is non-deductible for Jersey income tax purposes.

Start-up expenses

Once a company has commenced its trade, start-up expenditure will be allowable for tax purposes if it is not capital in nature and has been incurred wholly and exclusively for trade purposes.

Interest expenses

Interest expense will be allowable if it is incurred for the purposes of a trade or is paid in connection with a loan taken out for a qualifying purpose.

Bad debts

Trading bad debts are normally allowable for Jersey income tax purposes unless they relate to a general provision.

Charitable contributions

Charitable contributions are generally non-deductible for tax purposes, unless the contribution itself provides a benefit to the trade (i.e. marketing).

Fines and penalties

Fines and penalties are generally non-deductible for tax purposes.

Taxes

Local income tax paid is not deductible in computing taxable income. ISE fees paid are a tax-deductible expense.

Net operating losses

No distinction is drawn between different types of income or losses arising from different trades or sources, apart from Jersey property income which is separately streamed.

Unrelieved losses may be carried forward and used to offset profits in future accounting periods. Alternatively, losses can be group relieved to group companies in the same income tax rate band.

There are now only very limited circumstances where a company can obtain relief for carrying back losses.

Payments to foreign affiliates

There are no withholding taxes (WHTs) on patent royalties paid by Jersey companies to non-residents.

Group taxation

Group taxation is not permitted in Jersey. However, there are provisions for group relief between group companies subject to the same rate of tax. It is not possible to relieve losses between two companies taxed at different rates.

Transfer pricing

There are no specific rules in relation to transfer pricing in Jersey. There is, however, a general anti-avoidance provision in Jersey tax law. It may be applied by the Comptroller of Taxes if a transaction or a combination or series of transactions is entered into for the avoidance or reduction of Jersey income tax.

Thin capitalisation

There are no specific rules in relation to thin capitalisation in Jersey.

Jersey, Channel Islands

Tax credits and incentives

There are generally no special incentives for locally owned businesses in view of the low rate of tax.

Foreign tax credit

There is no local foreign tax credit regime in Jersey. DTAs need to be considered as appropriate. Unilateral relief may be available under very limited specific circumstances.

Withholding taxes

There are no WHTs on dividends or interest paid by Jersey companies.

Tax administration

Taxable period

The tax year is the calendar year. Companies are assessed on income earned in respect of the financial year that ends within the applicable calendar year of assessment.

Tax returns

The system relies on the filing of a return of information with the Jersey tax authority, which then raises an assessment (in the case of companies taxed at 10% or 20% on all or part of their income). Companies taxed at 0% are required to submit a tax return but are not required to submit accounts and tax computations.

As of 1 January 2011, there is a filing deadline for the corporate return of 6pm on the last Friday in July and a late filing penalty of GBP 250.

Payment of tax

For companies, tax is payable in arrears during the calendar year following the year of assessment.

Estimated assessments are issued early during the calendar year following the year of assessment and are broadly based on the tax liability of the previous year of assessment. These assessments are appealed with the tax office, and a payment on account is made based on estimates.

Tax paid after a prescribed date (usually the first Friday in the December following the year of assessment) incurs a 10% surcharge.

Statute of limitations

There is no statutory limitation date, as such. If the Comptroller discovers profits have not been fully assessed, the Comptroller can issue an amended/additional assessment at any time not later than five years after the expiration of the year of assessment. If the error involves fraud, willful default, or neglect, then the assessment can be revised at any time.

Topics of focus for tax authorities

The Jersey tax authorities are committed to being tax transparent, with an increased emphasis on agreeing further DTAs and TIEAs.

Significant developments

The Jordanian tax regime was previously based on the application of the Jordanian Income Tax Law No. 57 of 1985 ('Old' Tax Law). The Old Tax Law was repealed and replaced by a temporary income tax law, which became effective as of 1 January 2010. This temporary income tax law was introduced by the newly appointed Jordanian government in the absence of a Parliament (after a royal edict ordering its dissolution). When the new government was sworn in during December 2009, the introduction of a new income tax law was identified on the agenda of items to be addressed. On this basis, the temporary income tax law was introduced by the new government and will be in force until the elected Parliament enacts the final income tax law; however, an exact date for enactment is not yet known. Part of Parliament's tasks will be to review these temporary laws, make amendments, if appropriate, and then pass the laws as final.

Taxes on corporate income

The corporate tax rates in Jordan are applied based on the industry/business activities from which the taxpayer generates income. The corporate tax rates are as follows:

- 30% for banks.
- 24% for telecommunication, insurance, financial intermediation companies (including exchange and finance leasing companies).
- 14% for other companies.

Jordanian resident corporations are not subjected to income tax on their worldwide income, unless that income is raised from sources that originate and relate to Jordanian deposits and funds. However, for foreign branches of Jordanian resident corporations, 20% of the branch net income after taxes is subject to Jordanian corporate tax.

Non-resident corporations are taxed through withholding tax (WHT) (*see the Withholding taxes section*).

Local income taxes

There are no local income taxes in Jordan.

Corporate residence

An entity will be deemed to be resident in Jordan if it has been established and registered in accordance with the provisions of the Jordanian legislation in force and (i) has an office or branch practicing management and supervision of its work in Jordan,

Jordan

(ii) whose management head office or actual office is located in Jordan, or (iii) which the government or any official or public institutions own more than 50% of its capital.

Permanent establishment (PE)

There are no clear provisions in the Jordan income tax law to define PE.

Other taxes

Sales tax

A general sales tax similar in operation to a value-added tax (VAT) is imposed at the rate of 16% on the following transactions:

- Sales of goods or services, or both.
- Importing any service or goods from outside Jordan or from the free zone areas and markets inside Jordan.

Special tax rates are applied on certain items (*see Excise taxes below*).

A zero rate is applied to the export sales of goods and services outside Jordan or to the free zone areas and markets. A zero rate is also applied to sales inside Jordan of certain food items, books, magazines, manure, farm tractors, other agricultural tools, and salt.

Goods exempt from sales tax include fish, eggs, animals, bread, water packed in less than 5 litres, trees and plants, fruits, vegetable oils, honey, tea, sugar, gold, money, potash, emergency and fire vehicles, electricity, and pharmaceutical products.

Services exempt from sales tax include the following:

- Air transport.
- Education.
- Disposal of sewage and waste.
- Public health and similar activities.
- Activities of religious organisations.
- Activities of social organisations.

Custom duties

Certain goods imported to Jordan are subject to custom duties. Custom duties vary depending on the type and the origin of imported goods, as prescribed by the Customs Tariff. The Customs Tariff is based on the Harmonised Commodity Description and Coding System (HS Nomenclature).

Excise tax

Excise tax is the special sales tax that is imposed on certain goods and services, including cement, iron used in construction, tobacco products, wines, spirits, cars, beer, fuel, and lubricants.

Property taxes

There is a property tax in Jordan that is paid annually, and the tax rate is determined by the municipality depending on the location and size of the property and, in case of buildings, depending on annual rental value.

Transfer property taxes

Transfer of property is subject to tax at a rate of 9% (registration fee at a rate of 5% and sale of property tax at a rate of 4%).

Stamp duty

An *ad valorem* stamp duty of 0.3% or 0.6% is levied.

Payroll tax

A company should withhold payroll tax from monthly salaries and benefits at rates ranging from 7% to 14%.

Social security tax

A social security tax is imposed on the employer and the employee by rates of 12.25% and 6.5% respectively on the monthly salaries and certain allowances in kind. The employer should report and withhold these contributions on a monthly basis.

Branch income

Operating branches of non-resident companies registered in Jordan are taxed based on their activities/business being carried out in Jordan at the prevailing corporate income tax rates. Non-operating branches of non-resident companies registered in Jordan are generally prohibited from carrying on any commercial activity in Jordan.

Income determination

Any income incurred in or from Jordan, regardless of the place of payment, shall be subject to tax. This includes, but is not limited to, income from:

- Professional services or activities.
- Interest, commissions, discounts, currency differences, deposit profits, and profits from banks and other legal resident persons.
- Royalties.
- Selling goods produced in Jordan whether sold in Jordan or exported.
- Selling or leasing of movable properties located in Jordan.
- Leasing immovable properties located in Jordan and the income from key money.
- Selling or leasing intangible assets in Jordan, including goodwill.
- Insurance premiums due according to insurance and re-insurance agreements for risk in Jordan.
- All forms of telecommunication services, including international telecommunications.
- Transportation between Jordan and any foreign country.
- Service compensation gained by a non-resident person from Jordan for a service provided to any person if the activity or the work related to this compensation was carried out or the output of this service was used in Jordan.
- Any contract in Jordan, such as construction contracting, commercial agencies profits, and any other similar entities whether their source is inside or outside Jordan.
- Any other employment or business activity, or investment, which has not been exempted according to the provisions of the law.

The following shall be exempted from tax:

Jordan

- The King's allocations.
- Income of public and official institutions and municipalities, excluding its income from rent and key money.
- Income of unions, professional commissions, cooperation societies, and other societies legally registered and licensed from non-profit activities.
- Income of any religious, charity, cultural, educational, sports, or health institutions with a public character, not aiming to achieve profit and the income of charity *awqaf* (public endowment), and income from the Orphans Development Fund investment.
- Income of exempted registered companies according to the companies' law, which is incurred from activities undertaken outside Jordan, except income derived from income sources subject to tax according to the provision of the law.
- Profits from stocks and dividends distributed by a resident to another resident, except profits of mutual investment funds of banks and financial companies.
- Capital gains incurred inside Jordan, other than profits from assets subject to depreciation.
- Income derived from inside Jordan from trading in dividends and stocks, bonds, equity loan, treasury bonds, mutual investment funds, currencies, commodities in addition to futures and options contracts related to any of them, except that incurred by banks, financial companies, financial intermediation and insurance companies, and legal persons who undertake financial lease activities.
- Income from trading in immovable properties located in Jordan except the following:
 - Income incurred from such trade by a legal person.
 - Income incurred from building and selling real-estate.
- Income derived by non-Jordanian resident investors from sources outside Jordan that are initiated from their investments of their foreign capital, returns, profits, and proceeds from their investments' liquidation, returns, or selling of their projects, shares, or stocks after transferring them outside Jordan in accordance to the enacted Investment Law or any other law that will replace it.
- Compensation paid by insurance entities, other than what is paid as reimbursement for the loss of income from business activity or employment.
- Any income generated by banks and financial companies not operating in Jordan from banks operating in Jordan, such as deposit interest, commissions, and deposit profits from investment in interest-free banks and financial companies.
- Profits gained by re-insurance companies from insurance contracts concluded with insurance companies operating in Jordan.
- Income covered by double-taxation agreements (DTA) concluded by the government, to the extent of that which is covered under these agreements.
- The income of public or private pension funds and savings funds and any other funds approved by the Minister shall not be subject to tax if this income is derived from the employees and employers contributions.
- Certain types of local origin goods and services' exports outside Jordan may be totally or partially exempted from tax as set forth in regulations issued for this purpose.

Inventory valuation

Inventory is generally valued in accordance to the International Financial Reporting Standards (IFRS) accounting framework.

Capital gains

Capital gains are not taxable in Jordan except for capital gains that are generated from depreciable assets.

Dividend income

Dividend income received from a resident juristic person is not taxable in Jordan. However, dividend income received from a non-resident juristic person is subject to income tax.

Foreign income

Jordanian resident corporations are not subjected to income tax on their foreign income, except for foreign branches of Jordanian resident corporations, whereby 20% of the branch net income after taxes is subject to Jordanian corporate tax.

Deductions**Depreciation and amortisation**

Depreciation and amortisation of fixed assets are determined using the straight-line method, provided that the provisions, procedures, and rates shall be defined by the depreciation regime issued for this purpose. Assets with a cost of less than 100 Jordanian dinars (JOD) shall be totally deducted in the tax period in which they were acquired.

Goodwill

Purchased goodwill can be amortised using the straight-line method, provided that the provisions, procedures, and rates shall be defined by a regulation issued for this purpose.

Start-up expenses

There is no clear provision in the enacted temporary Jordan income tax law to define the treatment of start-up expenses; however, these expenses can be accepted at the establishment year.

Interest expenses

Interest and *Murabaha* (profit-sharing) paid by banks or financial institutions are deductible.

Interest and *Murabaha* that are paid by any taxpayer other than banks and financial institutions and finance leasing companies are deductible, provided that the deduction shall not exceed the rates that are determined in the thin capitalisation rules (*see Thin capitalisation in the Group taxation section*).

Bad debt

Bad debts are deductible.

Charitable contributions

A person may deduct any amount paid during the tax period as a donation to any of the governmental departments, public or official institutions, or municipalities from the gross income in the period in which the payment occurred.

Any person may deduct subscriptions and donations paid in Jordan without any personal benefit, for religious, charitable, humanitarian, scientific, environmental, cultural, sport, and professional purposes if the Council of Ministers approves its character. The deductible amount according to the provisions of this paragraph shall not exceed 25% of the taxable income after deducting what is provided for in the first paragraph above and before making this deduction.

Jordan

Fines and penalties

Fines and penalties are not acceptable expenses for income tax purposes.

Taxes

Taxes and fees paid on taxable activities are deductible.

Foreign income tax paid for income earned from sources outside Jordan that was subject to tax under the provisions of the tax law is deductible.

Other significant items

Approved expenses, including the following, are deductible:

- Insurance premiums.
- Maintenance expenses for assets that were spent within the tax period, provided that such expenses do not exceed 5% of their value.
- Amounts paid as civil compensation under contracts concluded by the taxpayer for the purpose of carrying out taxable activities.
- Amounts paid by the employer for employees to the Social Security Corporation.
- Hospitality and travel expenses incurred by the taxpayer.
- Expenditures for employees' medical treatment, meals during duty, travel, transport, and life insurance against work injuries or death.
- Marketing, scientific research, development, and training expenses.
- Expenses of prior tax periods, which were neither defined nor final.

Net operating losses

Losses may be carried forward indefinitely, but the carryback of losses is not permitted.

Payments to foreign affiliates

A resident generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates taking into account the transfer pricing regime and the applicable WHT.

Group taxation

Group taxation is not permitted in Jordan.

Transfer pricing

Any disposition transaction which is not based on arm's length, is with parties that have mutual interests, and leads to a decrease in the taxable income is ignored, and the real profits are estimated according to the regular market value of the transactions.

Any illusionary or fake disposition transactions are ignored and the tax due is estimated as if there were no transactions.

Thin capitalisation

Interest and *Murabaha* that are paid by any taxpayer other than banks and financial institutions and finance leasing companies shall be accepted as a deduction, provided that the deduction shall not exceed the following rates of relative value (i.e. total debt to the paid capital or average owners' equity, whichever is higher):

Tax period	Relative value
2011	5:1
2012	4:1
2013 and following years	3:1

Tax credits and incentives

Jordan has had tax reductions for selective sectors categorised by development zones. Generally, these have required pre-approval.

Foreign tax credit

Foreign tax credit treatment is not available in Jordan.

Withholding taxes

Dividends paid

Dividends are not taxable in Jordan.

Non-resident WHT

With respect to services performed by a non-resident juristic or natural person, under the Income Tax Law, "Amounts received or earned by the non-resident person from the Kingdom, which are derived from services provided to any person if the work or service related has been performed in the Kingdom or if the outcome of such services has been used in the Kingdom as well, is subject to tax in Jordan".

The current WHT rate on services performed by a non-resident juristic or natural person is 7% of the payment.

Resident WHT

Resident juristic or natural persons that perform any services in Jordan are subject to a WHT on the services performed. The applicable WHT rate is the rate prevailing at the time the service is performed. The current WHT rate on services performed by a local service provider is 5% of the payment.

Some services are excluded from the 5% WHT regulation, provided that the service provider has an income tax identification number, including the following services:

- Shipping services and related brokerage services.
- Road transport services and related brokerage services.
- Air transport services.
- Financing lease services.
- Hotels and restaurants services.
- Clearance services.
- Programming services provided by the company.
- Hospital services provided by hospitals.
- Advertising services.
- Cleaning services.
- Security services.
- Training services provided by the company.
- Insurance activities services.

Jordan

- Banking services provided by banks.
- Communication activities and services provided by primary telecom companies (defined in the tax law as being communications companies individually licensed in accordance with the provisions of the communications law in effect and regulations and instructions issued pursuant thereto).
- Transportation and distribution of electric power services provided by the Electricity Company Plc.
- Contracting services implemented under contractor certified by the Jordanian Contractors Association.
- Public safety services.
- Maintenance services that include value of materials and goods and labour wages.
- Food processing services, correspondence, and transport and laundry provided to hospitals.
- Loading and unloading services.
- Services that are executed by a juristic person, excluding civil companies, and have a tax number (income and sales).
- Any other service approved by the Minister upon the recommendation of the Director General.

Tax treaties

Jordan has entered into income tax treaties with Algeria, Bahrain, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iraq, South Korea, Kuwait, Lebanon, Libya, Malaysia, the Netherlands, Pakistan, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, the United Kingdom, and Yemen.

Jordan has transportation agreements with many countries and is negotiating treaties with more countries.

Tax administration

Taxable period

A taxpayer's due tax shall be computed on a calendar year basis.

A taxpayer who closes one's accounts on a date other than the end of the calendar year may calculate the due tax according to the fiscal year, provided that prior approval shall be obtained from the General Director of the income tax department.

A taxpayer who commences activity within the first half of the calendar year shall compute the due tax for the period from the establishment date until the end of the calendar year.

A taxpayer who commences activity within the second half of the calendar year may compute the due tax for the period from the establishment date until the end of the next calendar year.

Tax returns

Taxpayers are obliged to file tax returns before the end of the fourth month following the end of the tax period, including details related to income, expenses, exemptions, and tax due. Tax returns are submitted by any of the following means approved by the department according to terms and procedures to be determined by instructions:

- Registered mail.
- Banks.

- Any licensed company to undertake the tasks of public or private mail post approved by the Council of Ministries upon the recommendation of the Minister.
- Electronic means.

The date of filing is considered to be the earlier of the date of receipt by the department, post seal, or deposit receipt at a bank or licensed company. In the case of sending electronic mail, implementation instructions have not yet been introduced to determine the approved date of submitting the same.

Payment of tax

The tax balance is due before the end of the fourth month following the end of the tax period.

A taxpayer who is carrying out business activities and has gross income in the previous tax period exceeding JOD 500,000 from these activities is required to remit two advance payments on the accrued income tax from these activities using the rates determined for each tax period mentioned in the following schedule. The advance payments are calculated according to the income tax in the financial statements presented to the income tax department for the concerned period. In the absence of the financial statements for this period, the income tax included in the immediate preceding tax declaration will be used to calculate the advance payments.

Tax period	Rate on accrued income tax (%)
2011	25
2012 and following years	37.5

The first advance payment is due within a period not exceeding 30 days from the last day of the first half of that income tax period.

The second advance payment is due within a period not exceeding 30 days from the last day of the second half of that income tax period.

Audit cycle

The tax audit is likely to take place within one year from the date of filing the return.

Statute of limitations

The tax auditor may not audit a tax return after four years from the date of filing the return.

Fines and penalties

Failure to pay tax on the assigned dates according to the provisions of the tax law will result in a delay fine at a rate of 0.4% of the value of the tax due or any deductible amounts for each full or partial week of delay.

If a taxpayer submits a tax return and pays the declared tax in a timely manner, but the declared tax is less than the actual amount due, a shortage fee for such differences will be imposed, as follows:

- 15% of the shortage if the difference exceeds 20% but less than 50% of the tax due by law.
- 80% of the shortage if the difference exceeds 50% of the tax due by law.

Significant developments

From 1 January 2012, certain amendments were introduced into the Kazakh Tax Code. Some of these amendments relate to such provisions as exemption from taxation of outbound and in-country dividends and capital gains, clarifications regarding permanent establishment (PE) provisions, administration of double tax treaty (DTT) benefits, and provisions on the controlled foreign company (CFC) rules. Another set of amendments introduced a special taxation regime around the project of clearing Kazakhstan banks' toxic assets. In general, the goal of the proposed tax changes is to create a favourable tax environment for the participants in this project.

Also, effective January 2012, the Common Economic Area (CEA) for Kazakhstan, Russia, and Belarus came into effect. The CEA is the next level of cooperation of these countries after the creation of the Customs Union in 2010. Legal framework of the CEA consists of 17 international agreements. The aim of the CEA is to harmonise not only taxation, but also macroeconomic and monetary policies, enabling the free movement of goods and services, capital and labor force, creating shared transport and energy systems, and implementing uniform technical regulations.

It's also worth mentioning that Kazakhstan companies and individuals are currently in the process of transition to new individual identification numbers, which were introduced to replace several existing registration numbers, such as taxpayers' registration number and social security fund identification numbers. The deadline to finalise this transition is set at 1 January 2013.

Taxes on corporate income

The tax rate for corporations is 20% and is based on a calendar year. All Kazakhstan legal entities and branches of foreign legal entities are subject to CIT. Taxable income is determined as the taxpayer's aggregate annual income less allowable deductions.

Resident companies are taxable in Kazakhstan on their worldwide profits, while non-resident companies operating through a PE in Kazakhstan are subject to Kazakhstan CIT only on the profits attributable to that PE.

Non-residents without a PE in Kazakhstan that receive income from sources in Kazakhstan are generally subject to income tax withheld at source of payment on Kazakhstan-source income (*please see the Withholding taxes section for more information*).

Reduced CIT rates

A reduced CIT rate of 6% applies to the qualified agricultural income of legal entities producing agricultural products.

In addition, taxpayers operating in special economic zones may enjoy full exemption from CIT, land tax, and property tax, if certain statutory requirements established for such benefits are met.

Excess profit tax (EPT)

EPT rates are progressive and range from 0% to 60%. The tax base is comprised of the portion of net income of subsurface users exceeding 25% of deductions for EPT purposes. Subsurface users may include asset acquisition costs, capital costs, and losses (with certain limitations) as deductions.

Local income taxes

There are no local income taxes in Kazakhstan.

Corporate residence

Generally, Kazakhstan incorporated companies or other legal entities that have their place of effective management located in Kazakhstan are treated as Kazakhstan tax residents.

Permanent establishment (PE)

Non-resident legal entities having business activities in Kazakhstan may create a PE in the following cases:

- 'Fixed place PE': a non-resident enterprise carries on business activities in Kazakhstan through a fixed place, including, but not limited to, through a place of management.
- 'Services PE': a non-resident enterprise renders services in Kazakhstan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 183 days within any consecutive 12-month period for the same or connected projects.
- 'Construction PE': a construction site, in particular a shop or an assembly facility, performance of projecting work, forms a PE, notwithstanding the timing of performing operations.
- 'Agency PE': a non-resident enterprise carries on business activities in Kazakhstan through a dependent agent. A dependent agent is an individual or legal entity that meets all of the following criteria simultaneously:
 - Has the contractual authority to represent the non-resident's interests in Kazakhstan and makes use of this authority by acting and signing (negotiating) contracts on behalf of the non-resident.
 - The business is carried outside the activity of either a customs broker or professional participant of the securities market or other brokerage type of business (except for activity as an insurance broker).
 - Carries on activities that are not limited to those of preparatory and auxiliary nature.

Kazakhstan

Other taxes

Value-added tax (VAT)

The current VAT rate is 12%. This tax is applicable to the sales value of products, works, and services, as well as imports. Exports of goods are taxed at 0%. There is a list of goods, works, and services exempt from VAT (e.g. financial services provided by financial institutions, financial leasing services, notary and advocacy services, operations with financial securities and investment gold).

Goods and services are subject to VAT if they are deemed to be supplied in Kazakhstan under the place of supply rules.

VAT refunds are generally available with respect to excess input VAT.

The VAT reporting period is the calendar quarter.

Customs duties

Customs duties apply to goods imported to the Customs Union countries from third countries. The customs duties rates are established either based on a percentage (in general ranging between 0% and 30%; higher rates exist for certain goods) of the customs value of goods or in absolute terms in euros.

Goods of the Customs Union countries should be generally exempt from Kazakhstan customs duties.

In addition to membership in the Customs Union, Kazakhstan concluded a number of bilateral and multilateral Free Trade Agreements with the Commonwealth of Independent States (CIS), which provides for exemption of goods circulated between the CIS member states from customs duties, if certain conditions are met.

Kazakhstan is not yet a World Trade Organization (WTO) member.

Customs fees

A customs processing fee is assessed at 60 euros (EUR) for the main page of a customs declaration plus EUR 25 for each supplemental page.

Excise taxes

Excise taxes apply to the sale and import of crude oil, gas condensate, petrol/gasoline (excluding aviation fuel), diesel fuel, spirits and alcoholic beverages, beer, tobacco, and passenger cars.

Type of excisable good	Excise tax rate
Crude oil, gas condensate, petrol/gasoline, diesel	KZT 0 to 450 per tonne
Alcoholic beverages and beer tobacco	KZT 1 to 2,450 per item of measure (pieces or litres)
Passenger cars	KZT 100 per each cm ³ of engine capacity

Property tax

Property tax is assessed annually at a general rate of 1.5% of the average net book value of immovable property.

Land tax

Entities and individuals that own land plots (or land share in cases of commonly shared ownership of land plots) must pay land tax annually. Land tax rates vary based on the purpose for which the land is used as well as the size and quality of the land.

Transfer taxes

There are no transfer taxes in Kazakhstan.

Stamp taxes

There are not stamp taxes in Kazakhstan.

Vehicle tax

The vehicle tax rate is based on monthly calculation indices and determined in accordance with the type of vehicle, engine volume, operation period of the vehicle (aircraft only), and other factors.

Social tax

Employers must pay social tax at the rate of 11% of gross remuneration (salaries and certain benefits provided) of all employees (local and expatriate). A deduction is available for obligatory pension contributions.

Mineral extraction tax

The mineral extraction tax applies to the monetary value of extracted volume of crude oil, gas condensate, natural gas, minerals, and groundwater.

The tax is calculated based on the value of the extracted content, which is computed by applying average global prices to the extracted volume (adjusted for content). The determination of average global prices is based on the list of publications that are considered official sources for computation of mineral production tax (Platts Crude Oil Marketwire and Crude Argus).

Currently, the tax rates for crude oil and gas condensate range from 5% to 18%, depending on the accumulated production volume for the calendar year. For hydrocarbons, rates can be reduced by 50% if they are supplied to domestic refineries on the basis of a sale/purchase agreement or tolling agreement.

The tax rate for natural gas is set at 10%. For domestic sales of natural gas, tax rates range from 0.5% to 1.5%.

Tax rates for minerals that have undergone initial processing (except for widespread minerals) and for coal vary between 0% and 22%.

Branch income

The net income of branches of foreign legal entities, after CIT at 20%, is subject to a branch profits tax at a rate of 15%, which may be reduced under an applicable DTT. As such, the effective tax rate for the income of branches of foreign legal entities equals 32% if there is no reduction under a DTT.

Kazakhstan

Income determination

Kazakhstan legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities, carrying out business activities through a PE in Kazakhstan, are taxable on income attributed to the activities of that PE. All taxpayers must apply the accrual method for recognition of income.

Inventory valuation

For tax purposes, inventory is valued in accordance with International Financial Reporting Standards (IFRS) and Kazakhstan financial accounting legislation. As such, permitted inventory valuation methods include first in first out (FIFO), weighted average, and specific identification methods.

Capital gains

Capital gains are subject to ordinary CIT rates. An exemption is available for capital gains realised from the sale of shares and participation interests in Kazakhstan legal entities or consortiums that are not engaged in subsurface activities.

Dividend income

Dividend income of a Kazakh resident company on inbound dividends is exempt from Kazakh taxation. Dividends from a Kazakhstan resident company to another Kazakhstan resident company are exempt from taxation, except for dividends paid by certain types of investment funds.

Interest income

Interest income should be included in the aggregate annual income of a taxpayer and taxed at the 20% CIT rate.

Foreign exchange gain

Foreign exchange gain should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange gain over foreign exchange loss should be included in the aggregate annual income of a taxpayer.

Foreign income

Foreign income is subject to ordinary CIT.

There are no provisions for tax deferrals in Kazakhstan.

For additional information, please refer to Controlled foreign companies (CFCs) in the Group taxation section.

Deductions

Allowable deductions generally include expenses associated with activities designed to generate income, unless specifically restricted for deduction by tax legislation. All expenses require supporting documentation.

Depreciation and depletion

Tax depreciation is calculated using the declining-balance method at depreciation rates ranging from 10% to 40%, applied to the balances of four basic categories of assets:

- Buildings and facilities: 10%.

- Machinery and equipment: 25%.
- Computers and equipment for information processing: 40%.
- Fixed assets not included into other groups, including oil and gas wells, transmission equipment, oil and gas machinery and equipment: 15%.

Goodwill

There are no special provisions in the Kazakhstan tax Code with respect to deductibility of goodwill expenses.

Start-up expenses

The Kazakhstan Tax Code does not specifically address deductibility of start-up expenses, but, generally, expenses incurred in relation to business activities and aimed at earning revenue occurring at start-up should be deductible.

Interest expenses

Interest paid to unrelated third parties and credit partnerships created in Kazakhstan are deducted in full. *For information about taxation of interest paid to related parties, please refer to Thin capitalisation in the Group taxation section.*

Bad debt

Amounts of receivables that were not paid within three years are to be recognised as bad debt expenses. Such expenses can be deducted in full by a taxpayer, provided that (i) these receivables are reflected in the books of a taxpayer and (ii) proper supporting documents are in place.

Charitable contributions

Charitable contributions are entitled to decrease taxable base but are capped at 3% of the company's annual taxable income.

Foreign exchange loss

Foreign exchange loss should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange loss over foreign exchange gain is allowed for deduction.

Fines and penalties

Generally, deductions are available for forfeits, fines, and penalties that are not payable to the state budget.

Taxes

Taxes remitted to the state treasury of Kazakhstan are deductible, except for the following:

- Taxes excluded prior to the calculation of the aggregate annual income.
- Income taxes paid in Kazakhstan and other countries.
- Taxes paid in preferential tax jurisdictions.
- Excess profit tax.

Net operating losses

Net operating losses accumulated prior to 1 January 2009 may be carried forward for up to three years. Net operating losses generated after 1 January 2009 may be carried forward for up to ten years. Loss carryback is not permitted under Kazakhstan tax legislation.

Kazakhstan

Payments to foreign affiliates

Payments to foreign affiliates are deductible for CIT purposes if the payments are intended to generate income, are supported by documentation, and comply with Kazakhstan transfer pricing law.

Group taxation

Kazakhstan tax law does not permit group taxation.

Transfer pricing

Under Kazakhstan transfer pricing law, both customs and tax authorities have the right to monitor and adjust prices used in cross-border and certain domestic transactions when prices are perceived to deviate from market prices, even if such transactions are with unrelated parties. If the authorities adjust prices, the re-assessed liability will include taxes, duties, penalty interest, and fines to the state budget.

Transfer pricing rules impact the following transactions:

- International commercial transactions.
- Domestic transactions that directly relate to international commercial operations where:
 - the sale relates to a subsurface use contract
 - one of the parties has tax preferences, or
 - one of the parties has losses for two years prior the year of the transaction.

Thin capitalisation

Deduction of interest paid to related parties, or to unrelated parties under related parties warranties, or to parties registered in a country with privileged taxation depends on the borrower's capital structure; such that deductible interest will be limited with reference to an 'acceptable' proportion of debt to equity (7:1 for financial institutions, 4:1 for all other entities). The list of jurisdictions with privileged taxation, the so called 'black list' established by the government, includes 62 jurisdictions (*see the Kazakhstan summary at www.pwc.com/taxsummaries for a current list*).

Controlled foreign companies (CFCs)

Under the CFC rules, if a Kazakhstan legal entity has 10% or more of direct or indirect ownership in the share capital or voting rights in a non-resident company, registered or located in a country with privileged taxation (*see above*), the legal entity is subject to Kazakhstan CIT on the portion of the undistributed profits from the non-resident company.

Tax credits and incentives

Foreign tax credit

In general, the Kazakhstan Tax Code allows taxpayers to credit the foreign income taxes paid against the income taxes payable in Kazakhstan provided the documents confirming the payment of such taxes are available. However, a tax credit may not be granted in certain cases (e.g. for taxes paid in countries with privileged taxation).

Investment incentives

Investment incentives are available to certain Kazakhstan legal entities that fit certain criteria and possess objects (e.g. certain fixed assets), for which investment incentives

may be applied. Generally, the investment incentives allow companies to fully deduct, for CIT purposes, the cost of the investment objects and the cost associated with their reconstruction and modernisation either at once or within first three years of their use.

Based on the Investment Law, incentives are granted under an investment contract between the government and companies and focus on priority sectors of the economy, as determined by the government.

Special economic zones

Currently, the following special economic zones have been established in Kazakhstan:

- ‘Astana, the New City’ in Astana (the expiry date is in 2027).
- ‘Aktau Sea Port’ in Aktau (the expiry date is on 1 January 2028).
- ‘Ontustik’ in Sairam district of South-Kazakhstan region (the expiry date is on 1 July 2030).
- ‘National Industrial Petrochemical Park’ in Atyrau region (the expiry date is on 31 December 2032).
- ‘Burabai’ in Akmola region (the expiry date is on 1 December 2017).
- ‘Park of Innovative Technologies’ (the expiry date is 1 January 2028).

In order to enjoy the incentives available in special economic zones, a legal entity must meet the following requirements:

- It must be registered by the tax authorities in the territories of special economic zones.
- It must have no structural subdivisions beyond the boundaries of the territories of the special economic zones.
- 90% of aggregate annual income must constitute income earned from activities in the special economic zone consistent with the objectives of the special economic zone’s formation.

The general incentives available for legal entities in special economic zones are:

- CIT: 100% reduction.
- Land tax: 0% rate.
- Property tax: 0% rate.

Withholding taxes

Kazakhstan-source income of non-residents and the proceeds from the sale of shares in subsurface users are subject to withholding tax (WHT) at the rates shown in the table below.

A non-resident legal entity is exempt from dividend WHT if:

- the holding period of shares or participation interest is greater than or equal to three years, and
- 50% or more of the charter capital value of the entity paying the dividends is not the property of a subsurface user.

Types of income at a source of payment	WHT rate (%)
Dividends, capital gains, interest, royalties	15

Kazakhstan

Types of income at a source of payment	WHT rate (%)
Any income of an entity registered in a tax haven jurisdiction	20
Insurance premiums under risk insurance agreements	15
Income from international transportation services; insurance premiums under risk reinsurance agreements	5
Other income	20

Benefits paid by a company to a shareholder, founder, participant, or related party, falling under the definition of constructive dividends, are taxed at a rate of 15%.

The rate of WHT may be reduced under an applicable DTT. A list of DTTs concluded and ratified by Kazakhstan is detailed below:

WHT rates between Kazakhstan and treaty countries as of 1 January 2012

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	15	15	15
Treaty:			
Armenia	10	10	10
Austria	5/15 (4)	10	10

Notes

- 5% if the beneficial owner is a company owning, directly (or indirectly in case of Canada and the United Kingdom), at least 10% of the voting power of the company paying the dividends.
- 5% (10% in case of Moldova) if the beneficial owner is a company that directly holds at least 25% of the capital of the paying company.
- 10% if the beneficial owner is a company, directly or indirectly, holding at least 20% of the capital of the paying company.
- 5% if the beneficial owner is a company (other than partnership), which owns not less than 10% of the capital of paying company.
- 5% if the recipient is a company (other than partnership), which directly owns not less than 20% of the capital of paying company.
- 10% if the actual owner is a legal entity, which owns not less than 30% of the authorised capital of the legal entity paying the dividends.
- 10% if the beneficial owner is a company, which holds directly at least 30% of the capital of the company paying the dividends.
- 0% if dividends are paid in consideration of an investment of at least 50 million United States dollars (USD) in the paying company.
- 0% if the company receiving the dividends holds directly or indirectly at least 50% of the capital of the paying company and has made an investment in the company paying the dividends of at least USD 1 million, which investment is guaranteed in full or insured in full by the government of the first contracting state, the central bank of that state or any agency or instrumentality (including a financial institution) owned or controlled by that government, and has been approved by the government of the other contracting state.
- 5% (or 12.5% in case of Pakistan) if the beneficial owner is a company which directly owns (or indirectly in case of the Netherlands and Pakistan) at least 10% of the capital of paying company.
- 5% if the beneficial owner is a company owning directly or indirectly, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power of the company paying the dividends.

Tax administration

Taxable period

The tax year in Kazakhstan is the calendar year.

Tax returns

Annual CIT declarations are due by 31 March of the year following the tax year-end. However, a taxpayer may be granted a 30 calendar-day extension of the deadline upon request.

Kazakhstan

Certain taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

The deadline for other tax returns is the 15th calendar day of the second month following the reporting period. However, a taxpayer may be granted a 30 calendar-day extension of the deadline upon request.

Payment of tax

For CIT, advance payments are due every 25th day of the month. Taxpayers with aggregate annual income during the tax period preceding the previous tax period of less than 325,000 times the amount of the monthly calculation index established for the relevant financial year (approximately USD 3.55 million) are exempt from the obligation to calculate and pay CIT advance payments. Payment of any outstanding CIT liabilities is required within ten calendar days following submission of the annual CIT declaration (i.e. 10 April).

Most other taxes are payable by the 25th day of the second month following the end of reporting period.

Audit cycle

Kazakhstan tax authorities have the right to conduct regular tax audits (at least once a year). Generally, there are two types of audits:

- Planned tax audits. The list of entities that fall under tax audit is published semi-annually on the official web-site of the Kazakh government.
- Unplanned tax audits. Tax authorities may conduct unplanned tax audits. Information about misstatements in tax returns or any other discrepancy may trigger an unplanned tax audit.

Statute of limitations

The statute of limitations for tax purposes in Kazakhstan is five years. For taxpayers operating under subsurface use contracts, the tax authorities maintain the right to assess or revise the assessed amount of excess profit tax and other taxes and obligatory payments to the budget, where a methodology of calculation uses one of the following indices: internal rate of return (IRR) or internal revenue rate or R-factor (earning yield) during the effective period of a subsurface use contract and five years after the end of the effective period of a subsurface use contract.

Topics of focus for tax authorities

Tax audits may be comprehensive or thematic. Comprehensive tax audits cover all applicable taxes, while thematic tax audits may cover only some specific tax liabilities. As a rule, Kazakh tax authorities are form, rather than substance, driven during audits.

Fines and interest penalties

Interest penalties are assessed on late tax payments at 2.5 times the Kazakhstan National Bank refinancing rate. As of 2 April 2012, the National Bank refinancing rate was set at 6.5% per annum.

Substantial fines are imposed for understatement of tax liabilities. Generally, the fines amount to 50% of the understated tax.

For advance CIT payments, an administrative fine of 40% applies to understated advance tax payments compared with the final declared CIT, if the understated amount is greater than 20% of the final declared amount.

If a taxpayer is deemed to have concealed taxable income, a fine of 150% of the concealed amount may be assessed.

Other issues

Accounting system

Kazakhstan legal entities should maintain accounts and produce financial statements in accordance with IFRS or national accounting standards (depending on the size of the company and other factors). In most cases, tax treatment follows accounting treatment.

Kenya

Significant developments

Several changes and tax measures have been introduced to Kenya's corporate tax system in the past year aimed at expanding the tax base and capturing more revenue. The overall aim is to increase revenue collection in order to satisfy the government budget requirements. The main areas of reforms include the following:

- Increasing the tax base.
- Realigning policy making.
- Increasing administration and collection.
- Simplification of tax regime.
- Automation of tax administration.

Legislation was enacted to give legal effect to tax information exchange agreements (TIEAs), which the revenue authority intends to enter into with other governments.

The 2012 Finance Act provides clarification in respect of the implementation of deemed interest provisions. The clarifications include the following:

- The Commissioner will now prescribe the rules of calculating deemed interest rather than the 91 day Treasury Bill rate.
- The provisions on withholding tax (WHT) have been enabled to allow the revenue authority to collect WHT on deemed interest.
- The Finance Act has further tightened the rules by providing that deemed interest shall be deemed to be income which accrued in or was derived from Kenya.

The 2012 Act also introduced a 20% WHT on winnings to payments made to both resident and non-resident persons from betting, lotteries, and gaming. These amounts are categorised as income that accrued in or was derived from Kenya. The WHT deducted is a final tax for payments made to both resident and non-resident persons.

Taxes on corporate income

Companies (including a branch of an overseas company) are subject to Kenyan corporate income tax (CIT) at the following rates on all income accrued in or derived from Kenya:

Entity	CIT rate (%)
Resident companies (including subsidiary companies of foreign parent companies)	30
Branches of foreign companies/Permanent establishments (PEs)	37.5

Entity	CIT rate (%)
Export processing zone (EPZ) enterprises:	
First ten years	0
Next ten years	25
Thereafter	30
Registered unit trusts/Collective investment schemes	Exempt (subject to conditions)
Newly listed companies:	
20% of shares listed: first three years after listing	27
30% of shares listed: first five years after listing	25
40% of shares listed: first five years after listing	20
Rates on gross income of non-residents derived in Kenya:	
Transmission of messages	5
Ownership or operation of a ship and aircrafts	2.5

Industry-specific rates

There are special provisions for non-resident shipping companies and airlines; non-residents providing broadcast, internet, and messaging services; and non-resident petroleum industry subcontractors providing exploration and production services in Kenya.

K

Corporate residence

A company is considered resident in Kenya if it meets one of the following criteria:

- It is incorporated under Kenyan laws.
- The management and control of company affairs are exercised in Kenya.
- The company has been declared by the minister, by announcement in the gazette, to be resident in Kenya for any year of income.

Permanent establishment (PE)

A business carried on in Kenya through a fixed place of business gives rise to a PE for branch purposes, as does a building site, or a construction or assembly project, that has existed for six months or more. Note that the definition of a PE may be modified by a double tax agreement (DTA).

Other taxes

Value-added tax (VAT)

VAT is levied on the supply of taxable goods and services in Kenya, as well as on the importation of taxable goods and services into Kenya.

The following VAT rates apply in Kenya:

Activity	VAT rate (%)
Standard rate on all goods and services that are neither exempt nor zero-rated	16
Electricity, diesel oil, and residual fuel oils	12
Export of goods and services, certain other goods and services	0

Kenya

Certain goods and services are designated as exempt from VAT. Exempt supplies do not count towards the registration threshold (*see below*), and the related input VAT is not recoverable.

Zero rating applies to the export of goods or services. The supply of goods or services to certain designated persons and projects are also zero-rated.

The threshold for VAT registration is taxable supplies of 5 million Kenyan shillings (KES) per year. Registered persons must record their turnover using an approved electronic tax register or signature device. Only registered persons may recover input tax. An input tax credit is not available for several items such as non-commercial vehicles, office furniture, and hospitality and entertainment services. An excess input tax credit may be carried forward or refunded, subject to certain conditions.

Import (customs) duty

Import duty is levied under the East African Community Customs Management Act. Imports of goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods. Enterprises established in an EPZ are exempt from customs duty on machinery and inputs for exported products. Where raw materials that are not subject to 0% import duty are used to manufacture goods for export outside the East African Community, one may apply for remission under the import duty remission scheme. This is subject to a requirement for proof of export and execution of a bond.

Excise duty

Excise duty is imposed on the manufacture or importation of certain commodities and services, such as mobile phone services, bottled water, soft drinks, cigarettes, alcohol, perfumes, fuels, and motor vehicles, at varying rates. There are various classes for each category and commodity where different rates of duty apply.

Category	Goods description	Excise duty rates
Beer	Beer	KES 70 per litre or 40% of RSP (1)
Other alcoholic beverages	Wines (2)	KES 80 per litre or 40% of RSP (1)
	Cider	KES 70 per litre or 40% of RSP (1)
	Spirits, whisky, rum, gin, and vodka	KES 120 per litre or 35% of RSP (1)
	Undenatured ethyl alcohol strength by volume of 80% or higher	KES 120 per litre or 65% of the RSP (1)
	Premixed alcoholic beverages of strength not exceed 10% by alcohol content	KES 70 per litre or 40% RSP (1)
Tobacco and tobacco products	Cigarettes	KES 1,200 per mille or 35% of RSP (1)
Soft drinks	Carbonated drinks and juices	7%
	Bottled water	KES 3 per litre or 5% of the RSP (1)
Other excisable products	Plastic bags (3)	50%
	Motor vehicles	20%
	Cosmetic products	5%

Category	Goods description	Excise duty rates
	Imported used computers (used computers more than three years from date of manufacture)	25%
Excisable services	Mobile cellular phone services and other wireless telephone services	10%
	Gambling services	5%

Notes

- Excise value is the higher of the actual value or retail selling price (RSP).
- This includes a wide range of wines, such as sparkling wine, vermouth, etc.
- Manufacturers who use plastic bags for packing their products will now be entitled to claim excise duty paid on their plastic bags from the Kenya Revenue Authority (KRA).

Stamp duty

Stamp duty is payable on transfer of properties. In the case of real property, stamp duty is payable at the rate of 4% on the value of the land as assessed by a government valuer. For other properties, other rates of stamp duty apply as specified in the Schedule to the Stamp Duty Act. The rates of stamp duty are shown below:

Activity	Stamp duty rate (%)
Transfer of immovable property:	
Urban	4
Rural	2
Creation or increase of share capital	1
Transfer of unquoted shares or marketable securities	1
Transfer of quoted shares of marketable securities	0*
Registration of a debenture or mortgage	
Primary security	0.1
Auxiliary security	0.1
Transfers	0.05
Lease:	
Period three years and under	1% of annual rent
Period over three years	2% of annual rent

* Transfer of quoted securities is exempt.

Land purchased for expansion and development of schools is exempt from stamp duty, provided the land does not revert to any other use and approval has been obtained from the relevant authorities.

Compensating tax

Where a company pays dividends out of profits that have not been subject to CIT, the company will be liable to pay a compensating tax. The compensating tax rate is 42.8%. The aim of this tax is to ensure that all dividends are paid out of profits that have suffered CIT.

Turnover tax for small business taxpayers

A resident taxpayer whose annual gross turnover does not exceed KES 5 million will be taxed at the rate of 3% per quarter of one's turnover. In such a case, the taxpayer

Kenya

will not be required to register for VAT. Turnover tax does not apply to rental income, management or professional fees, training fees, income subject to WHT as a final tax, and income of incorporated companies. Loss making businesses are allowed to make an election to be exempted from turnover tax. A written application for exemption has to be made to the Commissioner, and there is a procedure to be followed.

Business permit

Every person who carries on a business in Kenya is required to apply for a business permit from the relevant local authority. The business permit is usually based on the size of one's business and is renewable on an annual basis.

Catering levy

This is a levy which is payable to Catering Levy Trustees by hotels and restaurants at a rate of 2% of turnover.

Advance tax on motor vehicles

Advance tax is payable at varying rates per year on commercial vehicles and is creditable against CIT for the year.

Fringe benefit tax (FBT)

The FBT is payable on interest-free or low-interest loans granted to employees. FBT is paid by the employer, whether exempted from tax or not, at the resident CIT rate of 30%. The benefit is the difference between actual interest charged and the interest computed using the Commissioner's prescribed rate published quarterly. The directors and employees are not personally taxed on the benefit.

Employers' national social security contributions

Employees are also obligated to contribute monthly to the National Social Security Fund (NSSF) a standard amount of KES 200, with an equal amount of contribution from the employer.

Local government rent and rates

Rent and rates are levied on properties in Kenya, the rateable value which is payable to the local authority or central government shall vary in each county based on various forms of ratings such as area rate, agricultural rental value, or site value.

Branch income

The profit of a PE is taxed at the branch income tax rate of 37.5%, but there is no further taxation on the distribution of branch profits. However, there are certain restrictions with respect to costs paid to the head office.

Income determination

Inventory valuation

Inventory is stated at the lower of cost or net realisable value, with the exception of biological assets whose value is prescribed by the Commissioner.

Capital gains

Taxation of capital gains was suspended in 1985.

Dividend income

Kenya source dividends are taxable income in Kenya, unless the recipient is a Kenya resident company holding 12.5% or more of voting power of the company paying the dividend. However, for companies holding less than 12.5% of the votes, and other resident taxpayers, the 5% WHT is the final tax. Dividends paid to non-residents and any overseas holding company attract 10% WHT.

Stock dividends

Stock dividends issued in a ratio not proportionate to shareholding of the existing equity are considered as taxable dividends to the extent of the disproportionate increase in the value of the ownership of the company.

Interest income

Interest income is generally included in the determination of taxable income.

Foreign income

Income earned abroad is generally taxed as part of corporate income since a resident company is subject to CIT on its worldwide income.

Deductions

The general principle in Kenya is that expenses are deductible if they are incurred wholly and exclusively to generate taxable income.

Depreciation and depletion

No deduction is allowed for accounting depreciation or impairment. However, capital allowances are permitted at varying rates (on a straight-line basis) for certain assets used for business purposes, including buildings and machinery used in manufacturing, industrial buildings and hotels, machinery and plant, agricultural works, and mining.

Capital deductions	Rate (%)
Investment deduction:	
Qualifying investment exceeding KES 200 million (outside Nairobi or the municipalities of Mombasa or Kisumu)	150
Other qualifying investment	100
Industrial building allowance: *	
Hostels and certified education buildings (straight-line)	50
Qualifying rental residential or commercial buildings (straight-line)	25
Other qualifying buildings (including hotels, straight-line)	10
Wear and tear allowance:	
Plant and machinery (reducing-balance)	
Class 1	37.5
Class 2	30
Class 3	25
Class 4	12.5
Telecommunication equipment (straight-line)	20
Other allowances:	
Computer software (straight-line)	20
Capital expenditure under a concessionaire arrangement	Equal proportions over the period of the concession

Kenya

Capital deductions	Rate (%)
Mining specified minerals:	
Year one	40
Year two through seven	10
Farm works (straight-line)**	100

* Different percentages apply for previous years.

** With effect from 1 January 2011.

Goodwill

Cost acquisition of goodwill and amortisation of goodwill are not deductible as they are capital in nature.

Start-up expenses

There is a specific provision allowing the deduction of start-up expenses, provided that the required conditions have been met.

Interest expenses

A deduction for interest is allowed only to the extent that the borrowings are used for the purpose of trade. Where a non-resident person controls a company alone or with four or fewer other persons, interest restriction or 'thin capitalisation' rules apply (see *Thin capitalisation in the Group taxation section*).

Bad debts

Bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

Charitable contributions

Donations to charities and for certain public works are deductible, subject to certain conditions.

Fines and penalties

Generally, fines and penalties are not deductible as they are not considered to be expenses incurred for producing profits chargeable to tax.

Taxes

Kenyan income taxes are not deductible while computing income tax of a person. However, foreign income taxes incurred are generally deductible as an expense if tax credit relief is not available under a DTA.

Net operating losses

Losses calculated under the tax rules may be carried forward against income from the same source for a maximum of five years, including the year in which the losses arise. Losses cannot be carried back, except for petroleum companies, where losses can be carried back for three years from the year of income in which the petroleum company ceased permanently to produce petroleum.

Payments to foreign affiliates

Transfer pricing rules based on Organisation for Economic Co-operation and Development (OECD) principles apply to transactions with foreign affiliates (both companies and branches/PE). Additionally, there are restrictions on the deductibility of expenses incurred outside of Kenya by non-residents with a Kenyan PE. Transfer pricing is not limited to anti-avoidance.

Group taxation

Each company in a group is taxed as a separate entity in Kenya.

Transfer pricing

A company that has related party transactions is required to ensure such transactions are at arm's length. The company is therefore required to prepare a transfer pricing policy to justify the pricing arrangements. The Commissioner is allowed to adjust the prices if they do not conform to the arm's-length principle. The policy should be prepared and submitted to the KRA upon request.

Thin capitalisation

In Kenya, a company is thinly capitalised if all of the following occur:

- The company is in control of a non-resident person alone or together with four or fewer persons.
- The company is not a bank or financial institution.
- The highest amount of all loans held by the company at any time exceeds the sum of three times the revenue reserves (including accumulated losses) and the issued and paid up share capital of all classes of shares of the company.

A company that is thinly capitalised cannot claim a deduction on the interest expense incurred by the company on loans in excess of three times the sum of revenue reserves and issued and paid up capital of all classes of shares of the company. The company also cannot claim a deduction for any foreign exchange loss realised by the company with respect to any loans from its shareholders in the period that the company remains thinly capitalised.

K

Tax credits and incentives

Foreign tax credit

For business income, there is no relief for foreign tax paid except as provided for by a DTA (if applicable) between Kenya and the other country.

Investment deduction

Qualifying investments exceeding KES 200 million incurred outside Nairobi or the municipalities of Mombasa or Kisumu are allowed an investment deduction of 150%. All other qualifying investments are allowed a 100% investment deduction in the year the asset is put into service.

Export processing zone (EPZ)

Companies located in an approved EPZ, principally to export goods, are taxed at a 0% CIT rate for ten years from its commencement and at a rate of 25% for the next ten years.

Listed companies

Companies listed on the Nairobi Stock Exchange are entitled to reduced rates of income tax for a period, depending on the proportion of share capital listed (*see the Taxes on corporate income section for the rates*).

Kenya

Withholding taxes

WHT is levied at varying rates (3% to 30%) on a range of payments to residents and non-residents. Resident WHT is either a final tax or creditable against CIT. Non-resident WHT is a final tax.

Payments	Resident WHT rate (%)	Non-Resident WHT rate (%)
Dividend > 12.5% voting power	Exempt	10
Dividend < 12.5% voting power	5	10
Interest:		
Bearer instruments	25	25
Government bearer bonds (maturity ≥ 2 years)	15	15
Bearer bonds (maturity ≥ 10 years)	10	N/A
Other	15	15
Qualifying interest:		
Housing bonds	10	N/A
Bearer instruments	20	N/A
Other	15	N/A
Royalty	5	20
Management or professional fees	5	20
Consultancy fees - Citizen of East Africa Community		15
Training (including incidental costs)	5	20
Rent/leasing:		
Immovable property	N/A	30
Others (other than immovable)	N/A	15
Pension/retirement annuity	Varied *	5
Contractual fees	3	20
Winnings from betting, lotteries, and gaming	20	20

* This will vary depending on the payments paid out.

Double tax agreements (DTAs)

Lower rates may apply to non-residents where there is a DTA in force. The table below shows the maximum rates of tax that recipients in those countries with a DTA with Kenya can be charged on dividends, interest, royalties, and management and professional fees. The table only includes agreements that are currently in force.

Recipient	WHT (%)		
	Dividends	Interest	Royalties and management & professional fees
Canada	15	15	15
Denmark	20	20 (1)	20
France	10	12	10 (5)
Germany	15	15 (1)	15
India	15	15	20 (4)
Norway	15	20 (1)	20
Sweden	15	15	20
United Kingdom	15	15 (1)	15 (2)

Recipient	WHT (%)		
	Dividends	Interest	Royalties and management & professional fees
Zambia	0 (3)	0 (3)	0 (3, 5)

Notes

1. Interest paid by the government and the Central Bank of Kenya is tax-exempt.
2. The rate is 12.5% for management and professional fees.
3. No Kenya tax is due if subject to tax in Zambia.
4. The rate is 17.5% for management and professional fees.
5. Management and professional fees subject to normal WHT rates.

Where the treaty rate is higher than the non-treaty rate, the lower rate applies.

Tax administration

Taxable period

A company has discretion to determine its corporate tax year, provided it is a 12-month period. However, any changes in corporate tax year end must be approved by the Commissioner of the KRA.

Tax returns

Resident companies and PEs of non-resident companies must file a self-assessment tax return accompanied by audited or certified accounts annually. The return is due within six months following a company's year-end.

Payment of tax

Instalment tax payments must be made during the year based on the lower of 110% of the previous year's liability or an estimate of the current year's liability. Agricultural companies are required to pay estimated tax in two instalments of 75% and 25% during the year. Any balance of tax at the end of the year must be paid within four months of the financial year-end.

Payment of agency taxes

The tax withheld from payments must be paid by the 20th day of the month following the month in which the deduction is made.

Penalties for non-compliance

If a self-assessment tax return is not submitted by the due date, a penalty of 5% on the unpaid tax for the year may be imposed, subject to a minimum of KES 10,000. Failure or late submission of an EPZ company return will be subject to a penalty of KES 2,000 per day for as long as the failure continues.

A penalty of 20% and interest at 2% per month are imposed on underestimation and late payment of instalment tax and any balance of tax. Interest is charged only on the principal tax due.

Failure to make a deduction or to remit the WHT deducted attracts a penalty equal to 10% of the amount of tax involved (subject to a maximum of KES 1 million) and accrues interest at 2% per month.

Kenya

Audit cycle

There is no prescribed audit process, as an audit can be triggered by any factor as determined by the revenue authority. Generally, tax audits should be carried out after every two to four years. The audit or inspection will commence with a request from the revenue authority for the taxpayer to make available any such records or information as may be required.

Statute of limitations

The tax authorities must commence an audit before the expiry of seven years after the end of a year of income. The revenue authorities may go back past seven years where fraud is suspected. There is no time limit for completing tax audits. However, they are normally completed within a reasonable time, especially if there are no major disputes.

Topics of focus for tax authorities

The issues that are often subject to close scrutiny by the tax authority include related-party transactions.

Significant developments

New middle income tax bracket

The basic Korean corporate income tax (CIT) rates for fiscal year (FY) 2011 are 10% on the first 200 million Korean won (KRW) of the tax base and 22% for the excess. In FY 2012 and thereafter, the top rate of CIT will be maintained while a middle income tax bracket will be created: 10% on the first KRW 200 million, 20% for the tax base between KRW 200 million and KRW 20 billion, and 22% for the excess.

New or increased tax credit for job-creating investments

While the 4% to 5% temporary tax credit for facility investments will be terminated for investments made after 1 January 2012, the existing tax credit for job-creating investments will be maintained at an increased rate of 5% to 7%, compared with the current 1% credit. The credit will include a 3% to 4% tax credit for a company maintaining a status quo employment and an additional 2% to 3% tax credit for new job-creating investments. The additional tax credit for job creation will not exceed the ceilings set at KRW 10 million (KRW 15 million per employee between the ages 15 and 29, KRW 20 million per specified occupational high school graduate employee) multiplied by the number of new employment in net.

Tax law changes upon the adoption of International Financial Reporting Standards (IFRS)

Inventory costing

For inventory costing under IFRS in Korea (K-IFRS), last in first out (LIFO) will no longer be treated as an acceptable accounting method. Consequently, taxable income arising from adjusting the inventory balance booked under LIFO using other acceptable costing methods (e.g. first in first out [FIFO], weighted-average) will be allowed to be spread in its recognition over a five-year period. This change is applied for the fiscal year to which 31 December 2011 belongs.

Bad debt allowance

In order to relieve K-IFRS users from any disproportionate burden for tax payment from book-tax difference due to the adoption of a new accounting method or treatment, the current tax law allows for deferral of taxable income recognition in various situations. One such situation is the taxable income created in accounting for bad debt allowance.

This deferral is currently effective to cover a wider scope of entities over an extended time period. For tax administration purposes, the scope of entities for deferral covers a domestic place of business of a foreign corporation as well as domestic companies. Deferral is available through 31 December 2013. The deferred income will be added

Korea, Republic of

back to taxable income of the fiscal year that begins after 1 January 2014. Please note that non-IFRS users will be excluded from the scope of eligible entities.

Taxes on corporate income

The basic Korean CIT rates for FY 2011 are 10% on the first KRW 200 million of the tax base and 22% for the excess. For FY 2012 and thereafter, the rates will be 10% on the first KRW 200 million, 20% for the tax base between KRW 200 million and 20 billion, and 22% for the excess.

Resident corporations are taxed on their worldwide income, whereas non-resident corporations with a permanent establishment (PE) in Korea are taxed only to the extent of their Korean-sourced income. Non-resident corporations without a PE in Korea are generally taxed through a withholding tax (WHT) on each separate item of income.

Agriculture and fishery surtax

When a corporate taxpayer claims certain tax credits or exemptions under the STTCL, a 20% agriculture and fishery surtax is levied on the reduced CIT liability.

Local income taxes (Resident tax surcharges)

A resident tax surcharge of 10% on CIT liability is assessed each year.

Minimum tax

Corporate taxpayers are liable for the minimum tax, which is defined as the greater of 10% (to the tax base of up to KRW 10 billion, 11% on the excess up to KRW 100 billion, 14% on the excess above KRW 100 billion) of the taxable income before various deductions and exemptions pursuant to the Special Tax Treatment Control Law (STTCL) applied to arrive at adjusted taxable income or the actual tax after various deductions and exemptions.

For small and medium enterprises (SMEs), the minimum tax is the greater of 7% of adjusted taxable income or actual tax liability.

Corporate residence

A corporation having its head office or principal office in Korea is a resident corporation. A corporation with a place of effective management in Korea is also treated as a resident corporation.

Permanent establishment (PE)

A non-resident corporation is generally deemed to have a tax presence (i.e. PE) in Korea if one of the following applies:

- It has any fixed place of business in Korea, where the business of the entity is wholly or partly carried on.
- It is represented by a dependent agent in Korea, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- Its employee(s) provides services in Korea for more than six months within 12 consecutive months.
- Its employee(s) continuously or repeatedly renders similar services in Korea for two or more years, even if each service visit is for less than six months within 12 consecutive months.

Exceptions to a PE in Korea for a non-resident corporation include fixed places of business used only for purchasing or storage of property at which no sales activities, advertising, publicity, collecting, or furnishing of information, or other activities that are preparatory or auxiliary to the conduct of business, occur.

Other taxes

Value-added tax (VAT)

VAT is levied at a rate of 10% on sales and transfers of goods and services, except zero-rated goods and services (e.g. goods for exportation, services rendered outside Korea, international transportation service by ships and aircraft, other goods and services supplied for foreign exchange earnings) and exempt goods and services (e.g. basic life necessities and services, such as unprocessed foodstuffs and agricultural products; medical and health service; finance and insurance services; duty-exempt goods).

Electronic VAT invoicing is a compulsory requirement. If a taxpayer fails to issue the electronic VAT invoice or report electronically to tax authorities, the relevant penalties shall be imposed.

Customs duties

Customs duties are generally assessed on imported goods. 'Importation' refers to the delivery of goods into Korea (in case of goods passing through a bonded area, delivery of such goods into Korea from such a bonded area) to be consumed or to be used in Korea.

Excise taxes

The individual consumption tax is imposed on specific luxury goods, high-priced durable consumer goods, goods subject to consumption restraints, and certain luxury activities for the purpose of supplementing the VAT single-rate scheme. Tax rates range from 2% to 20%; in certain circumstances, a fixed amount is levied (e.g. KRW 12,000 per person for golf course greens fees).

Property taxes

An annual tax ranging from 0.07% to 5% is charged on the statutory value of land, buildings, houses, vessels, and aircraft. Five times the property tax rate is applied to property that is newly constructed or expanded in the Seoul metropolitan area for five years from its relevant registration date.

Securities transaction tax

A securities transaction tax of 0.5% is imposed on the total value of securities at the time of transfer, but the government is authorised to adjust the tax rate in certain circumstances. The flexible tax rate prescribed by the Presidential Decree is 0.3% on transactions in both the Korea Stock Exchange and Korean Securities Dealers Automated Quotations (KOSDAQ).

Stamp taxes

The stamp tax is levied on a person who prepares a document certifying establishment, transfer, or change of rights to property in Korea. The stamp tax ranges from KRW 100 to KRW 350,000, depending on the type of taxable document.

Registration taxes

Registration tax ranging from 0.1% to 5% is charged upon the registration of title or right and incorporation. Registration tax upon the registration of title or right and

Korea, Republic of

incorporation for corporations located in large cities may be subject to three times the rates otherwise applied.

Acquisition taxes

Acquisition tax is charged on the price of real estate, motor vehicles, construction equipment, golf membership, boats, etc. The minimum rate is 2%. A weighted rate is charged on acquisitions in the Seoul metropolitan area or on acquisition of luxury items, such as villas, golf courses, and yachts.

Branch income

In general, a branch office of a foreign corporation is taxed in the same manner as resident companies.

Remittance of retained earnings from a Korean branch to its head office is subject to reporting to a designated foreign exchange bank in Korea under the Foreign Exchange Transaction Act.

If the tax treaty between Korea and the country in which a foreign corporation is residing allows the imposition of a branch profits tax, the tax is imposed on the adjusted taxable income of the Korean branch.

Where applicable, the branch profit tax is levied in addition to the regular CIT, which is imposed at the rate of 20% (or at a reduced rate as provided in a treaty) of the adjusted taxable income of the Korean branch.

Income determination

Gross income consists of gains, profits, income from trade and commerce, dealings in property, rents, royalties, and income derived from any ordinary transactions carried on for gain or profit.

Inventory valuation

Inventories generally are stated at the lower of cost or market (LCM). Any one of seven inventory valuation methods, including LCM, specific identification, first in first out (FIFO), last in first out (LIFO), weighted-average, moving-average, and retail method can be elected for tax purposes. The method elected should be applied consistently each year unless an application for change has been submitted before three months from the year-end. Different valuation methods may be used for different categories (i.e. products and merchandise, semi-finished goods and goods in process, raw materials, goods in stock) and different business places.

For inventory costing under K-IFRS, LIFO will no longer be treated as an acceptable accounting method. Consequently, taxable income arising from adjusting the inventory balance booked under LIFO using other acceptable costing methods (e.g. FIFO, weighted-average) will be allowed to be spread in its recognition over a five-year period. This change is applied for the fiscal year to which 31 December 2011 belongs.

Stock valuation

The valuation of securities or bonds shall be made using the cost method. For cost method, the weighted-average cost method or moving-average cost method shall be

applied for the purpose of valuation of securities and individual cost method may be used for valuation of bonds.

Capital gains

For the purposes of taxation, gross income does not include income derived from gains from capital transactions such as capital surplus; gains on reduction of paid-in capital; or gains from merger, divisions, comprehensive share transfer, or comprehensive share exchange. However, gains from treasury stock transactions are taxed, and losses are deductible from taxable income.

Note that capital gains from the disposal of non-business purpose land or houses may be subject to additional capital gains tax at rates ranging from 10% to 40% after CIT.

Dividend income

All distributions to shareholders are taxed as dividend income, whether paid in cash or in stock.

However, a qualified domestic holding company that owns more than 80% (40% in case of listed subsidiary) share ownership in its domestic subsidiary will receive a 100% deduction for dividends while an 80% deduction is allowed for share ownership of 80% (40% in case of listed subsidiary) or less. A domestic corporation other than a qualified holding company will also receive a 100% deduction for share ownership of 100%, 50% for more than 50% (30% in case of listed subsidiary) share ownership, and 30% for share ownership of 50% (30% in case of listed subsidiary) or less.

K

Interest income

Except for certain cases, all interest income must be included in taxable income. Generally, interest income is included in taxable income as it is received.

Rental income

A company engaged in the business of the rental of real properties is also taxed on the deemed rental income calculated at the financial institutions' interest rate on the lease security money as well as on the recognised rental income.

Royalty income

Royalties are considered to be taxable income when earned.

Gains and losses on foreign currency translation

Companies are allowed to recognise unrealised gains and losses on foreign currency translation of their monetary assets in a foreign currency. This recognition is also allowed with respect to currency forward transactions and swaps to hedge foreign exchange risks of such assets. In this regard, a taxpayer can choose whether to recognise unrealised gains and losses or not for tax purposes. Once elected, the same method must be consistently used.

Foreign income

Resident corporations are taxed on their worldwide income. A Korean company is taxed on its foreign-sourced income as earned at normal CIT rates. To avoid double taxation, taxes imposed by foreign governments on income recognised by a resident company are allowed as a credit against the income taxes to be paid in Korea or as deductible expenses in computing the taxable income. In general, foreign taxes will generally be applied as credit rather than as a deduction.

Korea, Republic of

Income of foreign subsidiaries incorporated outside Korea is not included in the taxable income of a resident company. Income is recognised by a resident company only upon the declaration of dividends from a foreign subsidiary. Therefore, the Korean tax impact may be delayed through deferring the declaration of dividends unless the anti-tax haven rule under the Law for Coordination of International Tax Affairs (LCITA) is triggered.

Korean anti-tax haven rules state that accumulated earnings (distributable retained earnings) of a resident company's subsidiary located in a low tax jurisdiction (i.e. a tax haven where the effective tax rate on the taxable income for the past three years averages 15% or less) are taxed as deemed dividends to the resident company, which has direct and indirect interest of 20% or more in such subsidiary.

The foreign tax paid by a qualifying subsidiary is eligible for foreign tax credit against the dividend income of a resident company regardless of whether there are tax treaties with the relevant foreign countries. Before the amendment, the tax credits were allowed only when an existing tax treaty between Korea and the country of which the foreign subsidiary is a resident allows it. This change is applicable for the fiscal year commencing after 31 December 2011.

In connection with percentage of shareholding for tax credits, a qualifying subsidiary is one in which a resident corporation owns 10% or more of its shares for more than or equal to six consecutive months after the date of dividend declaration. Unused foreign tax credits can be carried forward for five years.

Deductions

In general, expenses incurred in the ordinary course of business are deductible, subject to the requirements for documentary support.

A corporation's disbursements of more than KRW 30,000 for goods or services provided are required to be supported by corroborating documents, such as credit card sales vouchers, cash receipts, tax invoices, and those vouchers and invoices stored in the company's enterprise resource planning (ERP) system. The corporation is required to maintain these documents for five years. If the corporation fails to maintain proper evidences, a 2% penalty shall be levied on the amount of disbursement.

Accrued expenses are not deductible until the expenses are fixed or paid.

Depreciation and amortisation

With the exception of land, depreciation of all property, plant, and equipment (PP&E), which includes buildings, machinery, and auto-vehicles, used to generate income is allowed as a deduction for CIT. Generally, interest on debt acquired to purchase, manufacture, or construct PP&E must be capitalised until the PP&E is operational. This does not apply to the interest associated with the expansion or improvement of existing PP&E. A detailed list of fixed assets, gross values (including capitalised interest), the useful lives of the assets, and the current year's depreciation charge must be submitted to the tax authorities when filing the annual CIT return.

The tax law allows the following methods for calculating depreciation:

- Straight-line or declining-balance method for tangible fixed assets, other than plant and buildings.

Korea, Republic of

- Straight-line method for plant, buildings, and intangible assets.
- Service-output or straight-line method for mining rights.
- Service-output, declining-balance, or straight-line method for tangible fixed assets used in mining.

In determining depreciation using a straight-line method, salvage value of the assets is regarded as zero. However, where the declining-balance method is used, 5% salvage value is required. Changes in the depreciation method must be approved by the tax authorities in advance, and such approval may only be obtained in exceptional cases (i.e. merger between two corporations having different depreciation methods). Although the tax law specifies the useful lives of assets, the useful life of a fixed asset can be increased or decreased by 25% of the specified useful life at the taxpayer's election. The selected depreciation method should be consistently applied.

The standard useful life and the scope of useful life for assets are provided in the following tables:

Tangible fixed assets	Standard useful life (years)	Scope of useful life (years)
Autos and transportation equipment (excluding those used for transportation businesses, leasing service of machinery, equipment, and consumer goods), tools, equipment, and fixtures	5	4 to 6
Ships and aircraft (excluding those used for fishery, transportation, leasing service of machinery, equipment, and consumer goods)	12	9 to 15
All buildings and constructions of brick structure, block structure, concrete structure, mud structure, mud wall structure, wooden structure, wooden frame mortar structure, and other structures	20	15 to 25
All the buildings and constructions of steel-frame/iron bar concrete structures, stone structures, brick/stone structures, steel-frame structures	40	30 to 50

Intangible fixed assets	Useful life (years)
Goodwill, design rights, utility model rights, trademarks	5
Patents, fishery rights, extraction rights under the law of development of mineral resources at the sea bottom (may elect activity method), right of management for toll roads, water rights, right of use for electricity and gas service facilities, right of use for tap water facilities for industrial use, right of use for general tap water facilities, right of use for heating facilities	10
Mining rights (may elect activity method), right of use for exclusive telegraph and telephone facilities, right of use for exclusive sidetracks, right of management for sewage disposal, right of management for tap water facilities	20
Right of use for dams	50

Note that for used fixed assets (including assets acquired through mergers or spin-offs) that have been used for more than half of their useful lives, a new useful life may be

Korea, Republic of

filed with the tax authorities within the range of half of the original useful life and the original useful life filed for the first time of its utilisation.

According to CIT law, depreciation is allowed for tax deduction only when expensed for book purposes. However, in order to alleviate any dramatic increase in tax burden due to decreased depreciation expenses through the adoption of K-IFRS, additional expense deduction through tax adjustment may be allowed on a temporary basis. For tax purposes, depreciable assets acquired on or before 2013 may be depreciated at the rate equivalent to the average of three years before the adoption of K-IFRS. Depreciable assets acquired after 2014 may be depreciated using the tax useful lives.

Goodwill

Goodwill for tax purposes is defined as “value transferred with consideration, apart from transferred assets included in business transfer, valued by taking into account business premium factors of the transferor such as permission/licence, legal privileges, geographical advantages, business secrets, credit, reputation, transaction partners, etc.” Goodwill may be amortised over five years using the straight-line method for tax purposes.

Start-up expenses

Start-up expenses such as incorporation expenses, founders’ salary, and registration fees and taxes are deductible when the expenses are actually paid.

Interest expenses

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes. There are, however, a number of exceptions to the general rule, as follows:

- If borrowings from a foreign shareholder, or from a third party under a payment guarantee by the foreign shareholder, exceed three times the equity of the relevant foreign shareholder, the paid interest and discount fee as to the relevant excessive portion will be treated as a dividend payment and not allowed as a deduction.
- Debenture for which the creditor is unknown.
- Bonds and securities on which recipient of interest is unknown.
- Construction loans and loans for the purchase of land and fixed assets up to the date on which the assets are acquired or completed must be capitalised as a part of the cost of the asset and depreciated over the life of the asset. Interest after the date of completion or acquisition is deductible as incurred.
- Interest on loans related to non-business purpose assets or funds loaned to related parties.

Contingent liabilities

In general, contingent liabilities are not deductible, except for reserves under the following items, which are counted as losses within the tax limit:

- Reserves for retirement allowance.
- Reserves for bad debts.
- Liability reserves and emergency reserves prescribed in the Insurance Business Law.
- Reserves for non-profit organisations.
- Reserves for the write-off of a compensation claim set aside by trust guarantee funds in each business year.

The amounts enumerated below are also counted as losses in calculating income for the business year:

- The amount of gains from insurance claims used to acquire the same kinds of fixed assets as the lost fixed assets, or to improve the damaged fixed assets within two years after the first day of the business year following the business year in which the gains fall.
- The amount of a beneficiary's share of construction costs received by a domestic corporation engaged in the electricity or gas business, etc., used for the acquisition of fixed assets.
- The amount of the national treasury subsidies actually used for acquisition or improvement of fixed assets for business.

Bad debt

A doubtful accounts reserve is allowed for tax purposes of up to 1% (2% for certain financial institutions) or the previous year's ratio of actual loss from bad debts to total balance of account receivables at year-end. Actual losses on bad debts are allowed when certain legal proceedings are satisfied or the statute of limitations has lapsed.

Although companies could set aside bad debt allowances based on reasonable estimates under the old generally accepted accounting principles (K-GAAP), the new GAAP for non-K-IFRS users and K-IFRS users requires objective evidence to recognise the allowance. This stricter rule is expected to create disproportionately higher taxable income on the first year of adoption.

In order to relieve K-IFRS users from any disproportionate burden for tax payment from book-tax difference due to the adoption of a new accounting method or treatment, the current tax law allows for deferral of taxable income recognition in various situations. One such situation is the taxable income created in accounting for bad debt allowance.

This deferral is currently effective to cover a wider scope of entities over an extended time period. For tax administration purposes, the scope of entities for deferral will cover a domestic place of business of a foreign corporation as well as domestic companies, while a domestic place of business of a foreign corporation was not covered in the concerned article before the tax reform of 31 December 2011. Deferral is available through 31 December 2013. The deferred income will be added back to taxable income of the fiscal year that begins after 1 January 2014. Please note that non-IFRS users will be excluded from the scope of eligible entities.

Charitable contributions

Donations to public interest entities, such as government authorities and social welfare organisations, as well as donations for academic research, technical development, etc., are classified as Bub-jung donations. Bub-jung donations are tax-deductible up to 50% of the total taxable income for the concerned fiscal year after deduction of net operating loss (NOL). Ji-jung donations to public entities prescribed by Corporate Income Tax Law (CITL) are also tax-deductible at up to 10% of the total taxable income for the fiscal year after the deduction of deductible Bub-jung donations and NOL.

The amount in excess of such limit may be carried over for three or five years. Donations other than the statutory donations above will not be deductible for tax purposes.

Employee remuneration

There is no statutory limit for employee remuneration, which includes salaries, wages, stipends, bonuses, retirement payments, pensions, and meal and housing allowances as well as all other kinds of subsidies, payments, and compensation. Remuneration of foreign employees is determined according to their engagement contracts.

Korea, Republic of

Pension expense

For tax purposes, severance allowance may be deducted at up to 5% of the annual total amount of wages paid. However, the accumulated amount of the severance allowance reserve may not exceed 25% of the actual aggregate liability to employees for FY 2011. This deduction limit will be reduced by 5% every year from 2011 to be entirely eliminated in 2016. If a corporation subscribes to severance insurance with an insurance company to cover future payments of retirement allowances, additional tax deductions beyond the limits described above are available.

Employers hiring five or more employees are required to set aside retirement pensions for their employees. Defined contribution (DC) and defined benefits (DB) are the two available schemes for the retirement pension system. Under the DC scheme, the premiums paid by the employer are deductible upon payment while the reserve under the DB scheme is deductible subject to a limit, similar to the severance insurance.

Payment for directors

Bonuses paid to directors in excess of the amount determined in the articles of incorporation or at a shareholders' meeting, etc. are not deductible. Also, severance benefits paid to directors in excess of the amount prescribed in the tax law are not deductible.

Entertainment expenses

Entertainment expenses of more than KRW 10,000 on an event basis must be supported by corporate credit card vouchers, cash receipts, or tax invoices in order to be deductible. In addition, the entertainment expenses in excess of the tax limit are not deductible.

The deductible limit for entertainment expenses in a business year is computed as:

- an amount calculated by multiplying KRW 12 million (KRW 18 million for a SME) by the number of months in the respective business year divided by 12, plus
- an amount calculated by multiplying the amount of gross receipts for a business year by the rates listed in the following table (in the case of receipts from transactions between related parties, 20% of the amount calculated by multiplying the receipts by following rates shall be applied).

Amount of gross receipts (KRW)	Rate
10 billion or less	0.2%
10 billion to 50 billion	KRW 20 million + 0.1% of the excess over KRW 10 billion
Greater than 50 billion	KRW 60 million + 0.03% of the excess over KRW 50 billion

Insurance premiums

Insurance premiums paid to an insurance company are deductible if the business enterprise is the listed beneficiary. Insurance premiums for which the beneficiary is the employee are also deductible; however, they are treated as salaries for the employees and are subject to WHT on earned income (this excludes the severance insurance premium or social security taxes that are borne by the corporations).

Fines and penalties

Fines, penalties, and interest on underpayment of taxes are not deductible.

Taxes

Income taxes are generally not deductible in determining income subject to CIT.

Net operating losses (NOLs)

In general, an NOL carryover is allowed for ten years for fiscal years commencing after 31 December 2008 (five years for the prior years). Along with the extension of the NOL carryforward period from five years to ten years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitations shall be one year from the filing due date of the fiscal year when the NOL is utilised.

Generally, loss carrybacks are not allowed. However, SMEs can carry back an NOL for one year.

Payments to foreign affiliates

With sufficient supporting documentation, interest, royalty, and management service fees paid to foreign affiliates are deductible for CIT purposes.

Under the LCITA, the following conditions must be met in order for a management service fee to be deductible:

- The services must be provided based on an agreement entered into by the service provider prior to the service transaction.
- The provision of the service can be verified by a schedule of services, description of services, description of the company providing services and its employees, detailed explanation of expenses incurred, and other supporting documentation.
- A company must be able to anticipate the company's additional profit or reduced expense through the services provided by a foreign affiliate.
- Payment for the provided services should be consistent with arm's-length standards.

K

Group taxation

The consolidated corporate tax filing system can be adopted for a domestic corporation in cases where two or more wholly-owned subsidiaries exist. It is up to the election of the taxpayer, but it cannot be revoked for at least five years after the election of the consolidated tax filing.

Transfer pricing

The LCITA authorises the tax authorities to adjust the transfer price based on an arm's-length price and to determine or recalculate a resident's taxable income when the transfer price of a Korean company and its foreign counterpart is either below or above an arm's-length price.

The LCITA lists the following methods for determining an arm's-length price: the comparable uncontrolled price (CUP) method, the resale price method, and the cost-plus method. Furthermore, the Decree elaborates upon the profit-split method, the transactional net margin method (TNMM), and the Berry Ratio method as methods for determining an arm's-length price based on profits arising from controlled transactions.

The method used and the reason for adopting that particular one for an arm's-length price determination must be disclosed to the tax authorities by a taxpayer in a report submitted along with one's annual tax return.

Korea, Republic of

Thin capitalisation

In cases where a Korean company borrows from its controlling shareholders overseas, an amount greater than three times (six times in the case of financial institutions) its equity interest payable on the excess portion of the borrowing is characterised as dividends to which the article on dividends in tax treaty applies and therefore is treated as non-deductible in computing taxable income.

Anti-tax haven rules

In cases where a Korean company invests in a company located in a tax haven, which unreasonably has reserved profits in the controlled foreign company, the profits reserved therein shall be treated as dividends paid out to that Korean company (individual), despite the fact that the reserved profits are not actually distributed.

Anti-tax haven rules are intended to regulate a company that has made overseas investments of an abnormal nature. Thus, these anti-tax haven rules apply to those Korean companies that have invested in a company incorporated in a foreign country with an average effective tax rate of 15% or less on taxable income for the past three years.

However, if a company incorporated in such a tax haven country actively engages in business operations through an office, shop, or a factory, then the anti-tax haven rules will not apply.

Related party transactions

Under the provision of CITL, the tax authorities may recalculate the corporation's taxable income when CIT is unreasonably reduced due to transactions with related parties. Generally, if the discrepancy between the transaction price and fair market value exceeds 5% of the fair market value or KRW 300 million, the transaction will be subject to this provision.

Tax credits and incentives

Foreign tax credit

Taxes imposed by foreign governments on income recognised by a resident taxpayer are allowed as a credit within the limit against the income taxes to be paid in Korea, or as deductible expenses in computing the taxable income. In general, foreign taxes will be applied as credit rather than as a deduction. The excess foreign tax credit can be carried forward five years.

Investment incentives

Tax credits are generally available for qualified investment in facilities for productivity enhancement, safety, job-creating investments, etc.

Tax credit for investment in facilities for productivity enhancement

If a resident makes an investment in facilities or equipment to increase productivity by no later than 31 December 2012, then 3% (7% in the case of SMEs) of such investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

Tax credit for investment in facilities for safety

If a resident or a domestic corporation makes an investment in a facility (excluding any investment in used assets) for safety that is considered necessary for industrial purposes

no later than 31 December 2012, then an amount of 3% of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

New or increased tax credit for job-creating investments

While the 4% to 5% temporary tax credit for facility investments will be terminated for investments made after 1 January 2012, the existing tax credit for job-creating investments will be maintained at an increased rate of 5% to 7%, compared with the current 1% credit. The credit will include a 3% to 4% tax credit for a company maintaining a status quo employment and an additional 2% to 3% tax credit for new job-creating investments. The additional tax credit for job creation will not exceed the ceilings set at KRW 10 million (KRW 15 million per employee between the ages 15 and 29, KRW 20 million per specified occupational high school graduate employee) multiplied by the number of new employment in net.

Research and development (R&D) tax incentives

The STTCL provides various tax incentives to stimulate R&D activities. These include deduction of R&D reserve, tax credit for research, and manpower development expenses.

Reserves for development of technology and manpower

In cases where a corporation has set aside development of technology and manpower reserves for expenses on development of technology and manpower on or before 31 December 2013, those reserves are considered as deductible expenses up to 3% of annual sales.

Tax credit for development of technology and manpower

Companies presently claim a tax credit in relation to qualifying R&D expenditure to the extent of either (i) 3% to 6% (25% for SMEs) of the current R&D expenses or (ii) 40% (50% for SMEs) of the incremental portion of the current R&D expenses over the average of the previous four years. The tax credit has been extended to include R&D in relation to core technologies as authorised by government ministries as well as pre-designated strategic growth industries until the end of December 2012, and for these industries, the credit rate for the current R&D expenditure is 20% (30% for SMEs).

Tax credit for investment in facilities for technology and human resources development

A corporation purchasing facilities prescribed in the Presidential Decree with the purpose of R&D and job training is eligible for tax credit up to 10% of such investment. The unused tax credit can be carried forward five years.

Energy/environmental incentives

Tax credit for investment in energy-economising facilities

If a resident makes an investment (excluding any investment in used goods) not later than 31 December 2013 in energy-economising facilities, 10% of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

Tax credit for investment in facilities for environmental protection

If a resident makes an investment (excluding any investment in used goods) in any facility for the purpose of environmental conservation no later than 31 December 2013, then 10% of the investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

Korea, Republic of

Inbound investment incentives

The Korean government provides various incentives and benefits for inducing foreign investment under the Foreign Investment Promotion Law.

Foreign invested companies that engage in certain qualified high-technology businesses can apply for 100% exemption from CIT for five years, beginning from the first year of profitable operations (from the fifth year, if not profitable until then) and a 50% reduction for the following two years in proportion to the foreign shareholding ratio. An exemption from WHT on dividends is available for foreign investors in the same manner as above during the same grace period. In addition, the taxpayer can apply for 100% exemption from local taxes, such as acquisition tax, registration tax, and property tax on assets acquired for their business for five years after the business commencement date and 50% reduction for the following two years. For local tax exemption, some local governments grant longer exemption periods (up to 15 years) in accordance with their local ordinances. Qualified foreign investment also can be eligible for exemption from customs duties, VAT, and special excise tax on imported capital goods for the first three years.

In addition, foreign investors satisfying specified criteria are provided with tax incentives and other benefits for investment in specially designated areas, including foreign investment zones (FIZ), free economic zones (FEZ), free trade zones (FTZ), and strategic industrial complexes exclusively developed for foreign invested companies. The tax incentives for qualifying foreign investors in FIZ are similar to those of the above foreign invested high-tech companies. Qualifying investors in FEZ, FTZ, and strategic industrial complexes may receive the 100% exemption from corporate or individual income tax as well as local taxes for the first three years and 50% reduction for the next two years. An exemption from WHT on dividends is granted to qualifying foreign investors in FEZs, FTZs, and such industrial complexes in the same manner as above during the same grace period. They also receive exemption from customs duties on imported goods for the first three years.

Foreign direct investment (FDI) incentive limitations

The FDI credit limits incentives granted to qualified FDIs. The ceiling has been set to encompass both investment amount and job-creation. In terms of investment amount, the level of incentives for FDI has been reduced to 70% of the aggregated FDI amount for companies benefiting from a seven-year incentive period (50% ceiling for companies enjoying a five-year incentive period). In terms of job-creation, the level of incentives for FDI has been reduced to the lower of either 20% of the aggregated FDI amount or KRW 10 million times the company's net increase in employment.

Companies that have enjoyed tax benefits based on job-creation will be subject to tax assessment in cases where there is a net decrease in employment within the subsequent two years in comparison to the year that the relevant tax credit was obtained.

Withholding taxes

Foreign corporations with income derived from sources in Korea are subject to CIT on such income. If the foreign corporation has no 'domestic place of business' in Korea, it will be subject to tax on its Korean-source income on a withholding basis in accordance with the tax laws and the relevant tax treaty, if applicable. Any Korean-source income attributable to a domestic fixed place of business of a foreign corporation will be subject to Korean CIT.

Korea, Republic of

For residents of countries with a tax treaty with Korea, reduced WHT rates may apply. Starting from 1 July 2012, an application form must be submitted to the withholding agents in order to apply the treaty rate. If a beneficiary cannot be identified in the application form, the withholding agents should withhold the tax at the non-treaty rate.

If a foreign company is located in a foreign jurisdiction designated as a tax haven by the Minister of Strategy & Finance, any Korean-source income of such foreign company will be subject to the domestic withholding rate of 20% regardless of whether or not the foreign company is resident of a treaty country. Currently, only Labuan is designated as such a jurisdiction. The foreign company may claim a refund of any excess WHT paid within three years, if it proves to the Korean Tax Office that it is entitled to the reduced treaty rates as the substantive and beneficial owner of the income. Alternatively, a foreign company may attempt to seek a pre-approval in order to have the treaty benefits apply upfront by making an application to the Commissioner of Taxation.

For dividends, interest, and royalties, the WHT rates are limited as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations (1)	0	14/25	0

Vietnam	10	10	5/15 (22)

Notes

1. Dividends and interest paid to resident individuals by corporations generally are subject to a 14% WHT rate. In addition to this, there is a resident surtax of 10% on the CIT liability.
2. In addition to the indicated tax rate, a resident surtax is charged at a rate of 10% of the respective tax rate.
3. Lower rate applies in case of equity ownership of 10% or more.
4. 10% rate applies to royalties paid for the use of or the right associated with industrial activities.
5. 10% rate applies if the loan period extends to seven years or more, the recipient is a financial institution, and the loan is used for certain designated purposes.
6. 25% rate applies to royalties associated with the use of trademarks or trademark rights.
7. 5% rate applies in case of equity ownership of 15% or more.
8. Lower rate applies in case of equity ownership of 25% or more.
9. 10% rate applies if the term of loans exceeds three years.
10. 10% rate applies when a recipient of interest income is a bank and income is connected with a loan with a term in excess of seven years.
11. Lower rate applies in case of equity ownership of 20% or more.
12. 10% rate applies if a recipient is a bank.
13. 5% rate applies if a recipient holds 10% or more ownership in a paying corporation but, even in case of 10% or more ownership, 10% rate applies if the dividends are paid out of profits subject to tax at a lower rate than the normal corporate tax rate of a country where a payer resides. In other cases, 15% rate applies.
14. 7.5% rate applies when a recipient of interest income is a bank or a financial institution.
15. 2% rate applies to royalties paid for use of or the right to use industrial, commercial, or scientific equipment.
16. 10% rate applies if it is for the use of or the right to use industrial, commercial, and scientific equipment or information.
17. 15% rate applies if royalties are for use of or the right to use cinematography films or tapes for radio or television broadcasting or any copyright of literary or artistic work.
18. 0% rate applies in case of equity ownership of 10% or more.
19. 5% rate applies if a recipient is a bank.
20. 5% rate applies to royalties for use of copyrighted literature and music.
21. 10% rate applies if the term of the loans exceeds seven years.
22. Lower rate applies if it is for the use of or the right to use a patent, trademark, design, or secret formula, or industrial, commercial, and scientific equipment or information.
23. 10% rate applies in cases of equity ownership of 25% or more, or dividend paid by a resident company engaged in a preferred pioneer area and registered with the Board of Investment.
24. 10% rate applies in cases where the interest is paid in respect of public offering of bonds, debentures, or similar obligations or interest paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentive laws.
25. 10% rate applies in case of royalties paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentive laws.
26. 5% rate applies if a recipient holds 30% or more of equity interest in the amount of at least 100,000 United States dollars (USD).
27. 10% rate applies if a beneficial owner of the income is a financial institution (including insurance company) or resident of Thailand who is paid with respect to indebtedness arising as a consequence of a sale on credit by a resident of Thailand of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
28. 10% rate applies if the term of the loan exceeds two years.
29. 10% rate applies to royalties for use of copyrighted literature, music, films, and television or radio broadcasts. Otherwise, 15% rate applies.
30. 10% rate applies if equity ownership is 10% or more and not more than 25% of the gross income of a paying corporation for a preceding tax year consists of interest or dividends.
31. 10% rate applies when a recipient of interest income is a bank or an insurance company.
32. 5% rate applies when a recipient holds 25% or more of equity interest, and 10%, when a recipient holds 10% or more of equity interest. In other cases, 15% rate applies.
33. 5% rate applies to royalties paid for the use of or the right associated with industrial, commercial, or scientific equipment.
34. 0% rate applies to royalties paid for the use of academic rights.
35. 5% rate applies to royalties paid for the use of or the right associated with any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. 10% rate applies to royalties paid for the use of or the right to use a patent, trademark, design or model, plan, secret formula, or process. 15% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
36. 14% rate applies if interest arises from bonds issued by a Korean company or government bodies.
37. 0% rate applies if a recipient of interest income is government, central bank, etc.
38. 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.

Korea, Republic of

39. Fees arising from rental of industrial, commercial, scientific equipment, etc. are classified as rental income subject to 2% WHT.

Tax administration

Taxable period

In Korea, the taxable year is on a fiscal-year basis as elected by the taxpayer. However, it cannot exceed 12 months.

Tax returns

A corporation must file an interim tax return with due payment for the first six months of the fiscal year and the filing/payment must be made within two months after the end of the interim six-month period.

A corporation must file an annual tax return with due payment for the fiscal year and the filing/payment must be made within three months from the end of a fiscal year.

Payment of tax

Where the tax amount to be paid by a resident corporation is in excess of KRW 10 million, part of the tax amount to be paid may be paid in instalments within one month of the date of the expiration of the payment period (two months for SMEs).

Where the tax amount to be paid is less than KRW 20 million, the excess of KRW 10 million shall be paid in instalments; where the tax amount to be paid exceeds KRW 20 million, 50% or less of the tax amount shall be paid in instalments.

Functional currency

In instances where the taxpayer adopts to use a foreign currency as its functional currency, there are three ways to calculate the CIT base: (i) calculate the tax base using the financial statements in functional currency and translate it into Korean won; (ii) prepare the financial statements in Korean won and calculate the tax base; or (iii) translate the financial statements into Korean won and calculate the tax base. Once elected, the same method must be consistently used.

Audit cycle

In January 2012, the National Tax Service (NTS) announced the 'Plan for Tax Audits', which is the criteria for selecting a tax audit target company.

For large companies whose sales revenue is KRW 500 billion or more, the tax audit will be conducted every five years. Other companies are selected by certain standards which were announced by NTS.

Statute of limitations

The statute of limitations is generally five years from the statutory filing due date of the annual CIT return. However, the statute of limitations is extended further in the following cases:

- Ten years if a taxpayer evades taxes by fraud or unjustifiable means.
- Seven years if a taxpayer does not file its tax base by the statutory due date.

Along with the extension of the NOL carryforward period from five years to ten years, when a taxpayer uses the NOL incurred more than five years ago, the statute of

limitation shall be one year from the filing due date of the fiscal year when the NOL is utilised.

Topics of focus for tax authorities

The recent topics of focus for tax authorities are as follows:

- Increased scrutiny for the prevention of offshore tax evasion through aggressive tax planning.
- Denial of unfair transactions between related parties.
- Prevention of embezzlement through fictitious expenses or tax evasion using subcontractors.
- Deductibility of management service fees or allocated expenses incurred by foreign affiliates.
- International inter-company transactions and transfer pricing.

Other issues

Exchange controls

Most transactions involving foreign exchange generally do not require approval or reporting under the Foreign Exchange Transaction Act (FETA), with a few exceptions as prescribed by the FETA. Receipt of foreign exchange from outside Korea is freely permitted, and payments to foreign companies are not regulated. Most restrictions on Korean companies' foreign currency transactions with foreigners have been removed. However, the government continues to monitor certain flows of foreign currency in an attempt to minimise incoming speculative currency and outgoing capital flight.

Ever since Korea's currency crisis, most restrictions on short-term as well as mid and long-term borrowings from overseas by corporations have been removed. Most foreign currency loans are allowed and are subject to reporting to a foreign exchange bank. There are no specific regulations, except the reporting requirements, on borrowings from overseas by foreign investment companies in Korea.

Choice of business entity

The following types of commercial entities are permitted in Korea:

- Corporation (*Hoesa*): There are five classes of corporation, outlined as follows:
 - Limited corporation:
 - *Jusik Hoesa* (JH): A corporation incorporated by one or more promoters, with each shareholder's liability limited to the amount of contributed capital. This type of entity is the most commonly used in Korea.
 - *Yuhan Hoesa* (YH): A corporation incorporated by one or more members, with each member's liability limited to the amount of that member's contribution to the corporation.
 - *Yuhan Cheгим Hoesa* (a newly adopted form since 2012): A corporation incorporated by one or more members, with each member's liability limited to the amount of that member's capital contribution. With significantly fewer restrictions for establishment and operation, *Yuhan Cheгим Hoesa* provides more flexibility and self-control than YH.
 - Unlimited corporation:
 - *Hapmyong Hoesa*: A corporation incorporated jointly by more than two members who are responsible for corporate obligations, if the assets of the corporation are insufficient to fully satisfy those obligations.

Korea, Republic of

- *Hapja Hoesa*: A corporation composed of one or more partners who have unlimited liability and one or more partners with limited liability.
- Partnership: *Hapja Johap* is a legal form of partnership allowed under the Commercial Code.
- Joint venture: A joint venture is generally established as a domestically incorporated corporation whose shareholders have limited liability regarding the obligations of the corporation under the Commercial Code.
- Branch: A foreign corporation can perform its business operation in Korea by setting up a taxable presence in the form of a branch office.
- Liaison office: A foreign corporation can establish a liaison office which is not allowed to execute income-generating business activities in Korea.
- Sole proprietorship: Sole proprietorships are not a legal form of entity in Korea.

Significant developments

Commercial developments

The Ministry of Commerce in Kuwait issued the Ministerial Order No. 237 of 2011, dated 26 May 2011, to regulate the set up of the Gulf Cooperation Council (GCC) companies to operate in Kuwait. As per the order, GCC companies are allowed to operate in Kuwait and are treated as Kuwaiti companies, provided that such companies are 100% owned by GCC nationals.

Tax developments

The tax retention mechanism

The Kuwait Tax Authorities (KTA) have implemented an active approach to ensure the compliance of local companies with the tax retention mechanism, especially those who have franchise operations and agreement with foreign franchisors in Kuwait. In some cases, the KTA has asked the Kuwaiti companies to settle the 5% retention wherein the franchisors have failed to comply with the tax law requirements.

Hence, the tax law now clearly states the following:

“All ministries, authorities, public institutions, companies, any private entities (and the similar) or any natural person that contracted with any incorporated body whether through contracts, agreements or any transactions shall retain 5% of the contract, agreement or transaction value or from each payment to the incorporated body.”

The above mentioned authorities have to provide amounts mentioned before and any information required by the tax administration in order to implement the income tax decree; in the violation of this article, the violator is responsible for the payment of the taxpayer's debts.

In the event of breach, the breaching party shall be liable for paying the tax debts payable by the incorporated body.

The KTA is currently adopting a very aggressive attitude for non-compliant taxpayers and franchisors. Tax assessments have been issued on an arbitrary basis by the KTA through the application of an aggressive deemed profit with penalty to the foreign franchisor.

Kuwait

Value Added Tax (VAT) Law

The Ministry of Finance (MOF) in Kuwait is currently studying the implementation of the Value Added Tax Law in Kuwait. Substantial steps, studies, training sessions, and internal meetings within the MOF have been conducted. This Law is estimated to be introduced by the year 2014. However, nothing has been officially issued.

Taxes on corporate income

Kuwait does not impose income tax on companies wholly owned by the nationals of Kuwait or other GCC countries, including Bahrain, Oman, Qatar, Saudi Arabia, and the United Arab Emirates. However, GCC companies with foreign ownership are subject to taxation to the extent of the foreign ownership. Income tax is imposed only on the profits and capital gains of foreign 'corporate bodies' conducting business or trade in Kuwait, directly or through an agent.

Income earned from activities in Kuwait shall be considered subject to tax in Kuwait. In cases where a contract involves the performance of work both inside and outside Kuwait, the entire revenue from the contract must be reported for tax in Kuwait, including the work carried out outside Kuwait. *See the Income determination section for more information on income that is subject to tax in Kuwait.*

The current tax rate in Kuwait is a flat rate of 15%.

Foreign companies carrying on trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are subject to tax in Kuwait on 50% of taxable profit under the law.

Please refer to the Income determination section for details on taxable income in Kuwait.

Zakat

Zakat is imposed on all publicly traded and closed Kuwaiti shareholding companies at a rate of 1% of the companies' net profits.

Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS)

All Kuwaiti shareholding companies are required to pay 1% of their net profits as per their financial statements after their transfer to the statutory reserve and the offset of loss carryforwards, to the KFAS, which supports scientific progress.

Corporate residence

A foreign corporate body is any association formed and registered under the law of any country or state other than Kuwait that is registered as having a legal existence entirely separate from that of its individual members. No Kuwait-registered company is subject to income tax. However, any foreign corporate body that is a shareholder in a Kuwait-registered company undertaking business in Kuwait is subject to tax (*see the Taxes on corporate income section*). For the purposes of this law, GCC residents and entities wholly owned by GCC residents are treated in the same manner as Kuwaiti business entities.

Permanent establishment (PE)

The interpretation and application of the tax laws in Kuwait is usually not consistent with international standards, and the taxing provisions are usually subjected to the widest possible interpretation by the tax authorities in Kuwait to tax all income from Kuwaiti sources. An insignificant presence of employees or short term visits to Kuwait by the representatives of a company may render the entire revenue from the transactions as taxable in Kuwait. Full value of the contract, including the value of work performed outside Kuwait, is subject to tax in Kuwait.

Other taxes**Value-added tax (VAT)**

The Kuwait Tax Law does not currently provide for a VAT. However, we understand that the MOF is considering introducing a VAT in Kuwait by the year 2014.

Customs duties/import tariffs

The GCC states have approved a unified customs tariff of 5% on cost, insurance, and freight (CIF) invoice price, subject to certain exceptions. A higher tariff is imposed on imports of tobacco and its derivatives and other products as notified.

Excise taxes

There are no excise taxes in Kuwait.

Property taxes

There are no property taxes in Kuwait.

Transfer taxes

There are no transfer taxes (e.g. stamp duty, real estate) in Kuwait.

National Labour Support Tax (NLST)

The purpose of the NLST law is to encourage the national labour force to work in the private sector by closing the gap in salaries and benefits between public and private sectors.

As per the law, Kuwaiti companies listed in the Kuwait Stock Exchange (KSE) are required to pay an employment tax of 2.5% of the company's net annual profits.

Social security

There are no social security obligations for expatriate workers. However, for foreign employees, it is generally necessary to make terminal indemnity payments calculated at 15 days' pay-per-year for the first three years of service and 2/3 month's pay-per-year thereafter.

For Kuwaiti employees, contributions are payable monthly by both the employer and employee under the Social Security Law. The employer's contribution is 11% and the employee's is 7.5% of monthly salary, up to a ceiling of 2,500 Kuwaiti dinars (KWD) per month. Benefits provided include pensions on retirement and allowances for disability, sickness, and death.

Kuwait

Branch income

Tax rates on branch profits are the same as on corporate profits.

Income determination

Income tax is imposed on the profit of a business in Kuwait as calculated by the normal commercial criteria, using generally accepted accounting principles (GAAP), including the accrual basis. Note that provisions, as opposed to accruals, are not deductible for tax purposes. In addition, for contract accounting, revenue is recognised by applying the percentage of completion method. Work-in-progress carried forward may not exceed 20% of work executed.

Article 2 of the amended tax law provides that income earned from the following activities in Kuwait shall be considered subject to tax in Kuwait:

- Any activities or business carried out either entirely or partially in Kuwait, whether the contract has been signed inside or outside Kuwait, as well as any income resulting from supply or sale of goods, or from providing services.
- The amounts collected from the sale, rent, or granting of a franchise to utilise any trademarks, design, patents, copyright, or other moral rights, or those related to intellectual property rights for use of rights to publish literary, arts, or scientific works of any form.
- Commission earned or resulting from agreements of representation or commercial mediation, whether such commissions are in cash or in kind.
- Having permanent office in Kuwait where the sale and purchase contracts are signed and/or where business activities are performed.
- Profits resulting from the following:
 - Any industrial or commercial activity in Kuwait.
 - Disposal of assets, either through the sale of the asset, part of the asset, the transfer of the asset's ownership to others, or any other form of disposal, including the disposal of shares in a company whose assets mainly consist of non-movable capital existing in Kuwait.
 - Granting loans in Kuwait.
 - Purchase and sale of property, goods, or related rights in Kuwait, whether such rights are related to monetary assets or moral rights such as mortgage and franchise rights.
 - Lease of property used in Kuwait.
 - Providing services, including profits from management, technical, and consultancy services.
 - Carrying out trading activities in the KSE, whether directly or through portfolios or investment funds.

Inventory valuation

Inventory is normally valued at the lower of cost or net realisable value, on a first in first out (FIFO) or average basis.

Capital gains

Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at a 15% rate. The tax law provides for a tax exemption for profits generated from dealing in securities on the KSE, whether directly or through investment portfolios.

Dividend income

Treatment of dividends is not specifically addressed in the amended tax law or in its bylaws. The bylaws to the amended tax law, however, require investment companies or banks that manage portfolios, funds, or act as custodians of shares for foreign entities to deduct corporate tax due from payments due to foreign investors. Tax payment should be made within 30 days from the date of the deduction of tax, together with a list showing names of the foreign entities and the amount withheld from each.

Under the original tax law, no tax was imposed on dividends paid to foreign shareholders by Kuwaiti companies.

Interest income

In principle, tax is levied on the foreign company's share of the profits (whether or not distributed by the Kuwaiti company) plus any amounts receivable for any other income in Kuwait (e.g. interest, royalties, technical services, and management fees). However, the Kuwait tax law will still subject the interest received from a Kuwaiti source to tax in Kuwait whether this interest is the only source of income for the foreign entity in Kuwait or the foreign entity has more sources of income in Kuwait than the interest income.

Foreign currency exchange rates and related profits and losses

The tax treatment for realised and unrealised losses and gains related to foreign currency transactions are as follows:

- Unrealised foreign exchange gains are required to be reported in the tax declaration. However, unrealised gains may be excluded from taxable income for calculating the tax due for the fiscal year.
- Realised foreign exchange gains are taxable in Kuwait and therefore added to calculate taxable profits.
- Unrealised losses are not considered as tax deductible costs and therefore excluded for calculating taxable profits.
- Realised losses may be claimed as tax deductible costs, provided such losses are supported by adequate supporting information and documents.

Exempt income

The following sources of income are exempt from tax in Kuwait:

- Kuwaiti merchants purchasing, transporting, and selling goods imported on their own account where the foreign supplier has not been involved in Kuwait operations.
- Profits of a corporate body generated from dealing in securities listed in the KSE, whether such activities are carried out directly or through investment portfolios or funds.

Foreign income

The Kuwait tax law does not clearly state the tax treatment of foreign income. Such income is currently treated on case-by-case basis.

Deductions

For expenses to be deductible, they must be incurred in the generation of income in Kuwait. Such expenses must be supported by adequate documentary evidence.

Kuwait

Depreciation

Depreciation is taken on a straight-line basis at specified rates. However, within 90 days prior to submission of the tax declaration, the taxpayer may request that the tax department calculate the depreciation using a different method than the straight-line method. The tax department shall accept this request provided it is based on a reasonable basis in accordance with the tax accounting principles and rules.

The principal depreciation rates are specified in the law, as follows:

Type of fixed asset	Depreciation rate (%)
Buildings	4
Pre-fabricated buildings, furniture, and office equipment	15
Electronics and electrical equipment	15
Transportation and freight vehicles (trucks)	15
Tools and equipment	20
Cars and buses	20
Drilling equipment	25
Software	25
Computer equipment and accessories	33.3

Goodwill

In accordance with Executive Rule No. 39, amortisation of incorporated body goodwill is not allowed as a tax deductible expense.

Start-up expenses

Expenses incurred prior to signing of the contract are not allowed as tax deductible costs.

Interest expenses

Interest expenses are deductible if they are related to operations in Kuwait and are paid to a local bank.

Bad debt

Bad debt is deductible if related to operations in Kuwait and final resolution from the court is available.

Charitable contributions

Grants, donations, and subsidies paid to licensed Kuwaiti public or private agencies are deductible.

Fines and penalties

Fines and penalties are not tax deductible.

Taxes

Taxes and fees, except income tax, are deductible in Kuwait.

Net operating losses

As per the amended tax law, losses may be carried forward for a maximum of three years, provided that the following situations do not arise in the fiscal period following the period in which the loss was recorded:

- The tax declaration does not include any revenue from the business activities of the taxpayer in Kuwait.
- Change in the legal structure of the taxpayer.
- Merger of the taxpayer with another entity.
- Liquidation or ceasing of the activities of the taxpayer in Kuwait.

Please note that losses cannot be carried back in Kuwait.

Head office expenses/payments to foreign affiliates

The deduction of head office expenses (the overhead or the indirect expenses) is limited to 1.5% of the company's Kuwait revenue after deducting the subcontractors shares (if any).

The direct costs allocated by the head office (e.g. supply of goods, design and consultancy costs) are regulated as follows.

For goods costs incurred outside Kuwait:

Work conducted by	Allowable costs as a percentage of revenue
Head office	85% to 90%
Affiliated companies	90% to 93.5%
Third parties	93.5% to 96.5%

K

For design costs incurred outside Kuwait:

Work conducted by	Allowable costs as a percentage of revenue
Head office	75% to 80%
Affiliated companies	80% to 85%
Third parties	85% to 90%

For consultancy costs incurred outside Kuwait:

Work conducted by	Allowable costs as a percentage of revenue
Head office	70% to 75%
Affiliated companies	75% to 80%
Third parties	80% to 85%

In case there is no separate revenue for the consultancy, design, or goods work, although the nature of the contract requires the existence of consultancy work, the following formula shall be applied:

Consultancy, design, or goods revenue = (consultancy, design, or goods costs / total direct costs) x contract revenue

Group taxation

If a foreign company conducts more than one business activity in Kuwait, one tax declaration aggregating the income from all activities is required to be submitted in Kuwait. In addition, in the case where two affiliates are involved in similar lines of

Kuwait

business or work on the same project, their taxable results may be aggregated for the assessment of tax by the Kuwait tax authority.

Transfer pricing

Please refer to *Head office expenses/payments to foreign affiliates* in the *Deductions* section.

Thin capitalisation

Executive Rule No. 37 deals with the tax treatment of interest and letters of credit. Through this rule, the tax authority will accept the interest paid by a company, provided it is fully supported, paid to a financial institution, and related to the Kuwait operations. However, the tax law provides the Kuwait tax authority the right to determine the proper tax treatment on a case-by-case basis (if required).

Tax credits and incentives

Leasing and Investment Companies Law No. 12 of 1998

Leasing and Investment Companies Law No. 12 of 1998 allows the formation of investment and leasing companies having their principal place of business in Kuwait, with Kuwaiti or foreign shareholders. The law grants a five-year tax holiday to non-Kuwaiti founders and shareholders of such companies, beginning on the date of establishment of the companies.

Direct Foreign Capital Investment Law (DIFCL) No. 8 of 2001

DIFCL aims to encourage foreign investment participation in Kuwait, allowing up to 100% of foreign ownership in Kuwaiti businesses. It also provides a tax holiday of up to ten years with respect to non-Kuwaiti shareholders' shares of the profits from qualifying projects. An additional tax holiday for a similar period is granted for further investment in an already approved project.

Kuwait Free Trade Zone

Businesses set up in the Kuwait Free Trade Zone for carrying on specified operations are exempt from taxes on operations conducted in the zone. Foreign entities can own 100% of such businesses.

Build, operate, and transfer (BOT)

Kuwait has begun to use the BOT method in respect of some large infrastructure projects. Tax and tariff concessions may be built into a BOT contract.

Circular No. 50 of 2002

As per Circular No. 50 of 2002 issued by the Director of Income Taxation (DIT) regarding treatment of exempted companies under tax laws and/or other special laws and/or tax treaty, exempted companies shall comply with the provisions of submission of tax declaration, inspection, and assessment procedures like other companies in order to be eligible for exemption.

Some of the privileges under this law include:

- Exemption from income tax or any other taxes for a period of ten years from the commencing of the actual operations of the enterprise.
- Benefits under double taxation agreements.
- Benefits under investment encouragement and protection agreements.
- Total or partial exemption from custom duties on imports.

- Recruitment of required foreign labour.
- Allotment of land and real estate.

Withholding taxes

Apart from the withholding tax (WHT) on dividends arising from trading in the KSE, there are no other WHTs. However, all government bodies and private entities are required to retain the final payment due to a contractor or subcontractor until presentation of a tax clearance certificate from the MOF, confirming that the respective company has settled all of its tax liabilities. The final payment should not be less than 5% of the total contract value.

Tax treaties

Kuwait has entered into tax treaties with several countries for the avoidance of double taxation. Treaties with several other countries are at various stages of negotiation or ratification.

However, little experience has been gained in Kuwait regarding the application of tax treaties. As a result, disputes about the interpretation of various clauses in tax treaties between taxpayers and the DIT are not uncommon. Disputes with the DIT regarding tax treaties normally arise with respect to the following issues:

- Existence of a PE.
- Income attributable to a PE.
- Tax deductibility of costs incurred outside Kuwait.

The domestic tax law in Kuwait does not provide for WHTs. As a result, it is not yet known how the Kuwaiti government will apply the WHT procedures included in the treaties listed in the table below. The WHT rates listed in the table are for illustrative purposes only.

Recipient	Dividends (%)	Interest (%)	Royalties (%)

Notes

1. The rate is 0% for amounts paid to a company of which the government owns at least 20% of the equity.
2. The rate is 0% for interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for the interest paid to entities in which the government owns a specified percentage of the equity and for interest paid on loans guaranteed by the government.
3. The rate is 0% for dividends and interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for dividends paid to entities in which the government owns a specified percentage of the equity.
4. The rate is 10% for dividends paid to the government of Kuwait or any of the institutions or any intergovernmental entities. The rate is 15% for other dividends.
5. The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 10% of the payer. The 15% rate applies to other dividends.
6. The rate is increased to 5% if the beneficial owner of the interest carries on business in the other contracting state through a PE and the debt on which the interest is paid is connected to such PE.
7. The rate is 0% for amounts paid to the government of the other contracting state and to entities of which the government owns at least 51% of the paid-up capital.
8. For dividends and interest, the rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 49% of the capital is owned directly or indirectly by, the government or a governmental institution. A 0% rate also applies to interest arising on loans guaranteed by the government of the other contracting state or by a governmental institution or other governmental entity of the other contracting state.
9. A 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends.
10. The rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is resident of the other contracting state and is controlled by, or at least 25% of the capital is owned directly or indirectly by, the government or a governmental institution of the contracting state.
11. The rate is 0% if the beneficial owner of the interest is a resident in the other contracting state and the loan is secured or financed directly or indirectly by a financial entity or other local body wholly owned by the government of the other contracting state.
12. The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 25% of the payer. The 10% rate applies to other dividends.

13. The rate is 5% if the beneficial owner of the dividends is a company that owns 10% or more of the issued and outstanding voting or 25% or more of the value of all of the issued and outstanding shares. The 15% rate applies to other dividends.
14. Dividends or interest paid by a company that is resident of a contracting state is not taxable in that contracting state if the beneficial owner of the dividends or interest is one of the following:
- The government.
 - A political subdivision or a local authority of the other contracting state.
 - The Central Bank of the other contracting state.
 - Other governmental agencies or governmental financial institutions as may be specified and agreed to in an exchange of notes between the competent authorities of the contracting state.

In addition to the above existing tax treaties, Kuwait has signed the following tax treaties, but such treaties have not yet been ratified:

Country	Date of signing	Type of agreement	Status of the treaty
Cyprus	7 October 2010	Avoidance of double taxation and income tax evasion	Finally signed
Djibouti	28 March 2010	Avoidance of double taxation and income tax evasion	Finally signed
Egypt	30 December 2010	Avoidance of double taxation and income tax evasion	Initially signed
Goiania	19 July 2010	Avoidance of double taxation and income tax evasion	Finally signed
Indonesia	22 September 2010	Avoidance of double taxation and income tax evasion	Finally signed
Ireland	23 November 2010	Avoidance of double taxation and income tax evasion	Finally signed
Japan	17 February 2010	Avoidance of double taxation and income tax evasion	Finally signed
Kenya	7 January 2010	Avoidance of double taxation and income tax evasion	Initially signed
Myanmar	16 December 2010	Avoidance of double taxation and income tax evasion	Second round discussion
Nigeria	1 May 2010	Avoidance of double taxation and income tax evasion	Initially signed
North Korea	24 March 2010	Avoidance of double taxation and income tax evasion	Initially signed
Syria	1 May 2010	Avoidance of double taxation and income tax evasion	Initially signed

Kuwait

Tax administration

Taxable period

Tax is imposed on profits arising in a taxable period, which is defined as the accounting period of the taxpayer and further assumed to be the calendar year. However, the DIT may agree to a written request from the taxpayer to change the year-end to a date other than 31 December. Also, at the taxpayer's request, the DIT may agree to extend the accounting period, provided it does not exceed 18 months.

Tax returns

The taxpayer must submit a tax return, based on the taxpayer's books of account, within three months and 15 days of the end of the taxable period. A foreign entity can request an extension of up to 30 days for filing the tax declaration. Upon application, the DIT may extend the filing period by a maximum of 60 days.

The taxpayer must keep in Kuwait certain accounting records, which are subject to inspection by the tax department's officials. Accounting records may be in English and may be in a computerised system used to prepare financial statements, provided that the system includes the required records and the tax department is previously informed.

The tax return should be supported by the following:

- Audited balance sheet and profit-and-loss account for the period.
- Detailed list of fixed assets (e.g. additions, disposals).
- List of inventory (e.g. quantities and values).
- List of subcontractors and the latest payments to them.
- Copies of current contracts and a statement of income and expenditure for each.
- Trial balance, forming the basis of the accounts.
- Last payment certificate from the client.
- Insurance companies must attach to the Public Budget and the tax declaration a detailed statement with the reinsured documents and the related terms and conditions.

As a general rule, an assessment is finalised only after inspection of records by the tax department. As indicated above, proper documentation must be kept to support expenditure and to avoid disallowances at the time of tax inspection. If support is considered inadequate, the assessment is apt to be made on the basis of deemed profitability. This is computed as a percentage of turnover and is fixed arbitrarily, depending on the nature of the taxpayer's business.

Payment of tax

Tax is payable in four equal instalments on the 15th day of the fourth, sixth, ninth, and 12th months following the end of the tax period. If an extension is approved by the DIT, all of the tax is payable upon the expiration date of the extension. Failure to file or pay the tax on time attracts a penalty of 1% of the tax liability for every 30 days of delay or part thereof.

Objection process

If a company disagrees with an assessment issued by the DIT, the company should submit an objection within 60 days from the date of the assessment. The DIT is required to resolve the objection within 90 days of the filing of the objection, after which a revised tax assessment is issued by the DIT. Upon issuance of a revised tax assessment, any additional tax is payable within 30 days. If the DIT issues no response within 90 days of filing the objection, this implies that the taxpayer's objection has been rejected.

Appeals process

In case the objection is rejected or the taxpayer is still not satisfied with the revised tax assessment, the company may contest the matter further with the Tax Appeals Committee (TAC) by submitting a letter of appeal within 30 days from the date of the objection response or 30 days from the expiry of the 90 days following submission of an objection if no response is provided by the DIT.

The matter is then resolved through appeal hearings, and a final revised assessment is issued based on the decision of the TAC. Tax payable per the revised assessment must then be settled within 30 days from the date of issuance of the revised assessment. Failure to do so results in a delay penalty of 1% of the amount of the tax due per the final assessment for each period of 30 days or part thereof of the delay.

Other issues

Offset program

Kuwait has designed a counter-trade offset program to meet the objectives of its economic development plan. The offset program derives from the government's concern that the long-term benefits from job creation and capital accumulation resulting from government contracts with foreign suppliers unfairly accrue to the suppliers, at the expense of Kuwaiti companies and citizens. The objective of the offset program is to remedy this problem by encouraging collaborative business ventures between foreign contractors and the Kuwaiti private sector. Accordingly, the offset program has been established with the following objectives:

- Promote sustainable economic development in Kuwait, by the assimilation of modern technology and know-how in the local economy.
- Support projects that generate high skilled jobs for Kuwaiti nationals.
- Attract foreign investment capital to facilitate economic development in Kuwait.

The following are significant aspects of the program:

- All civil contracts with a value of KWD 10 million and more, and defence contracts with a value of KWD 3 million and more, attract the offset obligations for contractors. The obligations become effective on the signing date of the contract.
- The contractors covered by the offset obligation are required to invest 35% of the value of the contract with Kuwaiti government bodies.
- Offset obligators have the following options for fulfilling their offset obligation:
 - Implement investment projects suggested by the offset program management.
 - Propose their own investment projects, and seek approval of the offset program management.
 - Participate in any of the funds that the offset program management may establish.
 - Purchase of commodities and services of Kuwaiti origin. The MOF is, however, still finalising detailed regulations in this regard.
- Contractors covered by the offset obligation must provide unconditional, irrevocable bank guarantees issued by Kuwaiti banks to the MOF equal to 6% of the contract price. The value of the bank guarantee submitted will be reduced gradually based on the actual execution of its work by the foreign contractor/supplier. The MOF has the right to cash in the bank guarantee if the offset obligor fails to respect their offset obligation.

Significant developments

There have been no significant corporate tax developments in Kyrgyzstan during the past year.

Taxes on corporate income

Pursuant to the tax code, resident entities are subject to a corporate income tax, called the 'profit tax', on their aggregate annual income earned worldwide. Non-resident legal entities carrying out business activities through a permanent establishment (PE) in Kyrgyzstan are subject to profit tax on the income attributed to the activities of that PE.

Profit tax is calculated at a rate of 10% of aggregate annual income less allowed deductions.

Corporate residence

There is no concept of corporate residence in the Kyrgyzstan tax legislation.

Legal entities formed under the Kyrgyz law should be taxed in Kyrgyzstan on their worldwide income, whereas foreign legal entities should be taxed only in relation to Kyrgyzstan-sourced income.

Permanent establishment (PE)

Under Kyrgyzstan tax legislation, a PE is a permanent place of business, through which a non-resident carries out business operations, including activities performed through an authorised person. A PE includes the following:

- Any place of management, department, office, factory, workshop, mining, oil and gas wells, land, construction site, or project.
- Any services rendered by non-residents by hiring personnel working in the territory of Kyrgyzstan for a duration of more than 183 calendar days within any consecutive 12-month period.

A PE is not created in Kyrgyzstan if a non-resident is limited to the following activities in Kyrgyzstan:

- Use of warehouses or buildings exclusively for storage or demonstration activities.
- Use of a fixed place of business exclusively for preparatory purposes.
- Performance of activities in Kyrgyzstan through an agent in cases where such agent usually performs such activities in the ordinary course of business.

Creation of a PE may be connected with the establishment of a branch or subsidiary. Both branches and subsidiaries are considered appropriate business vehicles for foreign investors and the choice between them is determined by the business the investor is engaged in, along with various other factors.

Other taxes

Value-added tax (VAT)

In Kyrgyzstan, VAT is assessed on taxable supply and taxable imports. Input VAT assessed on purchases used for business purposes is generally offset against output VAT on taxable supplies. The VAT rate is 12%, except for certain zero-rated supplies and certain exempt turnover (*see below*).

All taxpayers registered for VAT purposes are required to charge VAT on their taxable supply and to calculate and report their VAT liabilities. Taxpayers are required to register for Kyrgyzstan VAT purposes if their taxable supply in the preceding 12 calendar months exceeds 4 million Kyrgyzstani som (KGS) (approximately 86,682 United States dollars [USD]). Even if an entity is not required to register for VAT purposes, it may still do so voluntarily by submitting an application to the appropriate tax committee.

Place of supply of goods

Goods and services are subject to VAT if they are deemed to be supplied in Kyrgyzstan under the place of supply rules. According to these rules, transactions are deemed to be made at the place where transport of the goods begins if the goods are transported by the supplier, and in all other cases, at the place where the goods are transferred to the customer. The rules regarding services are more complicated. Services that are not specifically mentioned are deemed to be supplied at the place where the service provider has established his place of business. Certain other services are deemed to be supplied at the place of the purchaser.

Import of goods

Generally, imports of goods are subject to VAT.

Non-deductible input VAT

The input VAT is not allowed for offset if it is subject to payment in connection with the receipt of goods, works, or services not related to entrepreneurial activity, or if it relates to inputs for VAT exempt supplies.

Zero-rated supplies

Certain supplies are zero-rated for VAT purposes. These include exports (except for certain limited types of export), international transportation, and services connected with the service of transit air flights related with international transportation. Supply of goods, works, or services for official use of diplomatic and consular representations is taxable, but may be refunded provided that certain conditions are met.

Exempt supplies

Certain supplies are VAT-exempt, including supplies and exports of gold and silver alloy and refined gold and silver, supplies of pharmaceuticals, land plots, residual buildings and construction, financial services, and export of works and services. When a taxpayer generates both taxable and exempt supplies, input VAT proportional to the ratio of the exempt supply to the total supply is disallowed for offset.

Kyrgyzstan

VAT incentives

Certain imports are VAT exempt, including imports of technological equipment, if it is used for own production purposes. Recently, a preferential offset method of VAT settlement in respect of certain fixed assets imported to Kyrgyzstan has been introduced, whereby the import VAT does not need to be paid to customs but is reflected simultaneously as input and output VAT in the VAT accounts.

Reverse-charge VAT

The current tax code does not have any provisions on reverse-charge VAT.

VAT liability calculation and VAT offset carryforward

In general, the VAT liability of a taxpayer is calculated as output VAT (i.e. VAT charged by a taxpayer) less input VAT (i.e. VAT paid by a taxpayer to its suppliers) in a reporting period. The excess of input VAT over output VAT may generally be carried forward against future VAT liabilities.

VAT compliance

The tax period for VAT is a calendar month. The submission of the VAT declaration is due by the 25th day of the month following the reporting period (except for major taxpayers, for which it is due by the end of the month following the reporting period). Payment of the VAT liability is due by the 25th day of the month following the reporting period.

Sales tax

Sales tax is assessed on Kyrgyz legal entities or foreign entities operating through a PE in Kyrgyzstan for any sales of goods or rendering of services. The sales tax mechanism differs from VAT, i.e. the sales tax is levied for the whole sales turnover and does not take into account the purchases (input turnover).

Sales tax rates are as follows:

- In case of the sale of goods, works, or services by VAT payers:
 - Trading activities: 1.0%.
 - For other activities: 2.0%.
- In case of the sale of goods, works, or services by non-VAT payers:
 - Trading activities: 2.0%.
 - For other activities: 3.0%.

The Kyrgyz Tax Code further defines trading activities as activities on sale of goods purchased for re-sale purposes.

The tax period of sales tax is a calendar month. Taxpayers have to submit tax returns and make payments of sales tax at the place of tax registration by the 20th day of the month following the reporting month.

Customs duties and regimes

According to the Customs Code, the customs value of goods imported to the customs territory of Kyrgyzstan is determined by applying the following methods:

- Transaction value of imported goods.
- Transaction value of identical goods.
- Transaction value of similar goods.
- Deductive method.
- Computed method.

- Provisional method.

Based on the Kyrgyzstan customs legislation, the rates of customs duties may be:

- *Ad valorem* - charged in percentage to customs value of the taxable goods.
- Specific - charged within established size for unit of the taxable goods.
- Combined - including both above mentioned types.

The rates in percentage range from 0% to 30%; however, the maximum rate of 35% may be charged if the country of origin is unknown.

Import restrictions

Generally, all entities or persons have equal rights to import and export or transfer goods into the Kyrgyzstan territory, including when carrying out foreign trade activity, except in special cases as stipulated by legislation and international treaties.

Import of certain goods (e.g. weapons, nuclear materials) is subject to licensing.

Temporary import relief

There is a temporary import regime under which foreign goods are used in Kyrgyzstan with full or partial conditional exemption from the payment of customs duties and taxes and without application of non-tariff regulatory measures. The term of the 'temporary import' customs regime may not exceed two years.

K

Customs duties incentives

Certain items are exempt from customs payments, including:

- Transportation vehicles used in the international conveyance of passengers and goods and items of material and technical supply in transit.
- Goods imported in the customs territory or imported from the customs territory for official and personal use by official state representatives of foreign states.

Kyrgyzstan provides preferential rates or exemptions on the importation (and export) of certain goods, including goods originating from the states which form free trade zones or a customs union with Kyrgyzstan and goods originating from developing countries, included on a special list provided by the government.

Documentation and procedures

Kyrgyzstan pays close attention to formalities/documentation, so it is necessary to furnish the customs authorities with a set of required documents. For import, such documents usually include cargo customs declaration, invoices, contracts, etc.

Warehousing and storage

There is a bonded warehouse customs regime in Kyrgyzstan. Under this regime, imports entering into Kyrgyzstan may be stored in special facilities or special areas that have the status of a customs warehouse under the customs legislation of Kyrgyzstan. This regime implies exemption from customs duties and taxes.

Generally, most goods (unless otherwise specifically provided for) can be placed under the bonded warehouse customs regime. The period for storage of goods at a bonded warehouse is determined by the person placing the goods into the customs warehouse but cannot exceed three years from the date when the goods were placed under the bonded warehouse customs regime.

Kyrgyzstan

Re-exports

The re-export regime is similar to that used in international practice. It is defined as a customs regime under which goods previously imported into Kyrgyzstan are exported without payment or with a refund of the paid amounts of import customs duties and taxes and without applying the non-tariff regulatory measures with respect to the goods in compliance with Kyrgyz legislation.

There are certain conditions under which goods can be re-exported. Customs duties and taxes are not charged for goods declared as goods intended for re-export. However, if the goods do not meet the re-export criteria, customs duties and taxes are paid in the amount which would be payable if the goods, at their importation, were declared for release for free circulation, as well as interest on them paid at the National Bank rates, as if deferment was provided with respect to the amounts at placement of the goods under the customs regime of re-export.

Excise tax

Certain goods manufactured in Kyrgyzstan or imported to Kyrgyzstan are subject to excise tax. These include certain alcohol and alcoholic drinks, fortified drinks, tobacco goods, and oil products.

The rates of excise tax are adopted annually by the Kyrgyzstan government and range from KGS 10 (approximately USD 0.2) for 1 litre of alcohol drinks to KGS 3,000 for 1 ton of fuel (approximately USD 65). The rate for tobacco goods range from KGS 5 (approximately USD 0.1) to KGS 297 (approximately USD 6.4) based on the type of tobacco.

Stamp taxes

There are no stamp taxes in Kyrgyzstan.

Subsurface use taxes

The subsurface use taxes consist of separate bonus and royalty taxes on subsurface users, both Kyrgyz legal entities and branches of foreign legal entities. Under Kyrgyz legislation, subsurface users are legal entities and individuals who perform exploration and/or extraction of mineral resources.

The government, depending on the type of mineral resources, establishes the bonus rates.

The royalty rates are estimated either as a percentage of sales turnover (1% to 12%) or in absolute terms in Kyrgyzstani som depending on the type of mineral resources.

Local taxes

There are two local taxes in Kyrgyzstan, property tax and land tax.

Property tax

Property tax is a local tax payable quarterly by legal entities owning transport vehicles and immovable property in Kyrgyzstan, including apartment houses, apartments, boarding houses, holiday inns, sanatoria, resorts, production, administrative, industrial, and other buildings or facilities. Certain real estate may not be subject to this tax according to special lists approved by the government.

In respect of immovable property, the tax rate is established by the city or local authorities at a rate not to exceed 0.8% of the estimated value of taxable objects, except for apartment houses and apartments designated solely for residence, for which the

rate may not exceed 0.35% of the estimated value. The estimation can be performed by the state competent body and independent appraisers. For transport vehicles, the tax is computed in Kyrgyzstani som depending on engine volume.

Land tax

Land tax is paid quarterly by legal entities on the area of owned land. The basic rates are provided in the tax code, depending on the location and purposes of the land. The basic rates may range from KGS 0.9 to KGS 2.9 per square metre (approximately USD 0.01 to USD 0.06).

Branch income

Branch income is subject to the profit tax. There is no special branch profits tax in addition to profit tax.

Income determination

Aggregate annual income is comprised of all types of income, including, but not limited to, the following, in addition to gross revenue from the sale of goods, works, or services:

- Interest income (except for income already subject to withholding tax [WHT]).
- Dividends.
- Royalties.
- Assets received free of charge.
- Rental income.
- Income from the reduction of liabilities.
- Foreign exchange gain.
- Write-off liability.

The tax code envisages some profit tax privileges aimed at developing certain areas of the business economy. Currently, these include privileges/preferences for:

- Charity organisations.
- Associations of invalids of I and II groups (i.e. persons with disability with different levels of physical disability), associations of blind and deaf persons.
- Agricultural organisations.
- Growing of berries, fruits, and vegetables.
- Credit unions.
- Companies that have been involved in the food industry for less than three years and included in the Kyrgyzstan government's list of exempt companies.

Non-taxable revenues include, *inter alia*, the following:

- Property received as a charter capital contribution and income from realisation of shares of organisations.
- Property donated to special organisations using such property for development purposes under the government's social culture plan. Despite being designated as property used for social culture purposes, such property may still be used for other purposes (i.e. citizen defence projects, mining equipment, water intakes, heat networks, roads, stations).

Kyrgyzstan

Inventory valuation

There are no special provisions on inventory valuation in the Kyrgyzstan Tax Code. Inventory valuation is conducted in accordance with the International Financial Reporting Standards (IFRS).

Capital gains

Capital gains are subject to the ordinary profit tax rate. There is an exemption available for capital gains from selling shares that occur on the date of a given sale in the official lists of the stock exchange in the top two categories of listing.

Dividend income

Dividends from participation in Kyrgyz legal entities are exempt from profit tax. All other dividends are subject to the ordinary profit tax rate.

Partnership income

Simple partnerships are not taxpayers in their own right, and income and expenses flow through to the partners for tax reporting purposes. Kyrgyzstan limited liability partnerships are taxed as corporations.

Foreign income

Generally, Kyrgyz legal entities are taxable on income earned worldwide. Foreign income is subject to the ordinary profit tax rate.

There are no tax deferral provisions in Kyrgyzstan tax legislation.

Deductions

Generally, expenses related to the earning of aggregate annual income are considered deductible for profit tax purposes, including:

- Business trip expenses that were actually incurred and supported by appropriate documentation (*per diems* during business trips are deductible only within the established statutory limits).
- Commissions on payroll expenses for labour.
- Material and social benefits provided to employees.
- Representational expenses connected with earning income (transportation, hotel, and translator services).
- Training and retraining of employees.
- Scientific development and exploration works (deductions are relevant for fixed assets).
- Any other costs related to earning income, which can be supported by appropriate documentation in terms of their nature and amount (e.g. invoices, payment orders, receipts).

The principal categories of expenses that are not deductible include:

- Capital expenses and expenses connected with the purchase, production, and installation of equipment.
- Taxes paid in accordance with the tax code, except for land tax, property tax, VAT that cannot be offset, and subsurface use taxes.
- Any expenses incurred on behalf of any other third persons, except in cases where documentation proves business needs for such expenses.

- Pricing losses caused by rates, understated below-market prices, and price incentives.
- Expenses connected with purchases of services in entertainment, vacations, and leisure.

Depreciation

The tax code establishes a deduction for depreciation based on the declining-balance method. Depreciable fixed assets are divided into several groups, for which maximum depreciation rates range from 10% to 50%.

Group	Assets	Maximum rate of depreciation (%)
I	Cars, automobile and tractor equipment for use on roads, special instruments, sundries, and accessories; computers, telephone sets, peripherals, and equipment for data processing	30
II	Automotive transport rolling stock: trucks, buses, special automobiles, and trailers; construction equipment; machines and equipment for all sectors of industry, including the foundry; smith-pressing equipment; electronic and simple equipment, agricultural machines. Office furniture, intangible assets	25
III	Depreciable fixed assets not listed in other groups and expenses equated to them	20
IV	Railroad, sea, and river transport vehicles, power machines, and equipment: thermal-engineering equipment, turbine equipment, electric motors and diesel-generators, electricity transmission and communication facilities, pipelines	10
V	Buildings and constructions	10
VI	Taxpayer's costs of geological preparation of deposit reserves, design and engineering-research works, and obtaining the licence for the use of deposits, as well as mining-capital and mining pre-works aimed at further extraction of minerals, as well as the fixed assets of the mining and/or mining-processing enterprises put into operation and actually used in deposit exploration	50

Certain expenses are deductible within specified limits, including expenses on repairs, expenses on procuring and producing capital production assets, and certain other expenses.

Goodwill

Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for goodwill for profit tax purposes.

Start-up expenses

Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for start-up expenses for profit tax purposes.

Interest expenses

Deductions for interest actually paid on debts, where the loan proceeds were used to fund expenses incurred for the taxpayer's business activity, are allowed within limitations provided in the tax code depending on methodology and nature of the debt. For example, interest on loans connected with the purchase of depreciable assets is not deducted, but increases their value.

Kyrgyzstan

Charitable contributions

Deductions for donations of assets to charity and budget organisations are limited to 10% of taxable income.

Fines and penalties

Fines and interest penalties paid to the state budget are not deductible.

Taxes

The following taxes may be deducted:

- Land tax.
- Property tax.
- VAT not allowed for offset.
- Subsurface use taxes.

Net operating losses

Net operating losses can be carried forward for up to five years. There are no provisions in Kyrgyz legislation allowing carryback of losses.

Payments to foreign affiliates

Payments to foreign affiliates are deductible for profit tax purposes if they are aimed at earning income and supported by documentation.

Group taxation

Group taxation is not permitted in Kyrgyzstan.

Transfer pricing

While there is no special law on transfer pricing in Kyrgyzstan, rules on transfer pricing are found in the tax code. The general transfer pricing provisions set in the tax code do not follow Organisation for Economic Co-operation and Development (OECD) guidelines (thus, no advance pricing agreement [APA] mechanism is provided). According to the Kyrgyz transfer pricing regulations, the tax authorities are empowered to determine the value of the following transactions:

- Transfers between related parties.
- Barter transactions.
- Cross-border transactions.

Thin capitalisation

There are no thin capitalisation limitations under the Kyrgyzstan tax code.

Tax credits and incentives

The legislation currently provides the following tax incentives:

Investment incentives

There are no special tax preferences in the Kyrgyzstan Tax Code; however, Kyrgyz Law on Investments envisages that in case of changes in the tax and customs legislation, investors may apply terms which are more beneficial to them.

Special economic zones

There are four special economic zones in Kyrgyzstan: Naryn, Karakol, Bishkek, and Maimak. The special economic zones generally provide for a tax-neutral regime, exemption from customs duties, and a liberal currency control regime. However, there is a special fee for incentives which varies from 0.1% to 2% of sales (depending on the region).

Park of Innovative Technologies

Activities of residents of the Park of Innovative Technologies are exempt from profits tax, sales tax, and VAT, providing they meet requirements of the Tax Code of Kyrgyzstan. The tax rate for employees of residents of the Park of Innovative Technologies and individual entrepreneurs is 5%.

Foreign tax credits

There is no possibility to offset the amount of tax paid outside Kyrgyzstan against the Kyrgyz tax if there is no double tax treaty (DTT) with this country.

Withholding taxes

Passive income from sources in Kyrgyzstan by a non-resident that is not connected with a PE is taxable at the source of payment, without deductions, at the following rates:

- Dividends and interest: 10%.
- Insurance premiums received under risk insurance or re-insurance agreements: 5%.
- Authorship fee and royalty: 10%.

Income obtained by a non-resident from performing activities and services in Kyrgyzstan, not connected with a PE, is taxable at the source of payment, without deductions (with the exception of VAT), at the following rates:

- Income from telecommunication or freight services in international communication and transportation between Kyrgyzstan and other countries: 5%.
- Income from management and consulting services: 10%.
- Other services and activities: 10%.

WHT applies to Kyrgyzstan-source income regardless of whether the payment is made within or outside of Kyrgyzstan.

The application of DTTs often effectively provides a reduction of WHT rates or, in the case of non-passive income, an income tax exemption. Note that the application of treaty privileges is not necessarily automatic, and taxpayers may need to comply with certain administrative procedures to secure relief.

Tax treaties

According to the tax code, the provisions of international tax agreements and other acts to which Kyrgyzstan is a party and ratified by the president or the parliament (as appropriate) take precedence over the provisions of the tax code.

As of 1 April 2012, Kyrgyzstan has concluded DTTs with the countries listed in the following table, which shows the corresponding WHT rates:

Kyrgyzstan

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	10	10	10
Treaty:			
Austria	5/10 (1)	10	10
Belarus	15	10	15
Canada	15	15	10
China	10	10	10
Finland	5/10 (1)	10	5
Germany	5/10 (1)	5	10
India	10	10	15
Iran	5/10 (1)	10	10
Kazakhstan	10	10	10
Latvia	5/10 (1)	10	5
Malaysia	5/10 (2)	10	10
Moldova	5/10 (1)	10	10
Mongolia	10	10	10
Pakistan	10	10	10
Poland	10	10	10
Russia	10	10	10
Switzerland	5/10 (1)	5	5
Tajikistan	5/10 (3)	10	10
Turkey	10	10	10
Ukraine	5/10 (3)	10	10
Uzbekistan	5/10 (3)	10	10

Notes

1. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the paying company.
2. 5% if the beneficial owner is a company (other than a partnership), which owns not less than 10% of the capital of the paying company.
3. 5% if the beneficial recipient is a company, which owns not less than 50% of the capital of the paying company.

Tax administration

Taxable period

The taxable period for profit tax is one calendar year.

Tax returns

The tax code stipulates that the Aggregate Annual Income Tax Declaration must be filed with the tax authorities by 1 March of the year following the reporting year.

Tax authorities may grant an extension for filing a tax return for up to one month upon application by the taxpayer. Such extension does not relieve or prolong the taxpayer's obligation to pay the tax in a timely manner.

Payment of tax

Tax payments should be made as follows:

- Advance payments on profit tax: quarterly by the 20th day of the second month of the reporting quarter.
- Final payments on profit tax: 1 March of the year following the reporting year.
- Tax withheld at the source of payment by a tax agent: by the 20th day of the month following the month when income was recognised.

Audit cycle

The State Tax Inspectorate of the Ministry of Finance of Kyrgyzstan and its local tax authorities are the only state authorities that have the right to perform tax audits. The Kyrgyzstan tax service consists of relevant subdivisions of the revenue committee of the Ministry of Finance of Kyrgyzstan and its local authorities.

A tax audit is performed based on a written notification from the Head of the State Tax Inspectorate, which specifies the name of the company to audit, the scope of the audit, and the terms of the audit. Tax audits may be performed not more than once a year by one of the tax authorities (district, city, region, or the state tax authorities) and should not last more than 30 days. If necessary, however, a tax audit may be extended for ten additional days with written approval from the State Tax Inspectorate.

Statute of limitations

The period of limitation for tax liability is six years.

Significant developments

Effective 1 January 2012, the corporate income tax (profits tax or PT) rate has been lowered to 28% from 35%.

Taxes on corporate income

Profits tax (PT)

All companies (including all forms of legal entities) that are registered under Lao People's Democratic Republic (PDR) law are subject to PT on their worldwide income. Companies formed under foreign law, operating a business in Lao PDR, and conducting business in Lao PDR are subject to tax on their income derived in Lao PDR.

Effective 1 January 2012, the standard rate of PT for companies in Lao PDR has been lowered to 28% from 35%. The 28% rate applies to both domestic and foreign investors.

Tax holidays and reduced PT rates are applicable to companies that qualify as promoted investment activities (*see the Tax credits and incentives section for more information*).

Minimum tax (MT)

Companies that operate at a loss or have profits below a certain level are subject to MT. However, if the company's loss or profit is certified by an independent auditing firm recognised by the government and registered with the Ministry of Finance, MT will not be payable.

MT rates are 0.25% of gross receipts for manufacturing companies and 1% of gross receipts for trade and service companies.

Local income taxes

There are no provincial or local income taxes in Lao PDR.

Corporate residence

There is no definition of residence or permanent establishment (PE) for tax purposes under Lao PDR law.

Other taxes

Valued-added tax (VAT)

The standard VAT rate is 10%.

Lao People's Democratic Republic

VAT is imposed on the final consumer of goods and services. Goods and services used for production, trading, and consumption in Lao PDR, goods imported into Lao PDR, and services rendered by foreigners to Lao PDR customers are subject to VAT.

Certain goods and services are exempt from VAT. Exempted items include unprocessed agricultural products, seeds, fertilisers, textbooks, education services, medical services, banking services, and insurance.

Exported goods and services are zero rated. The conventional credit method is used to calculate the VAT payable (i.e. output VAT less input VAT). Excess input VAT can be carried forward for six months (extendable). Input VAT for exports is refundable.

Organisations engaged in production or trading of taxable goods and services must register for VAT if their annual revenue is 400 million Lao kip (LAK) or more. Companies below this threshold may voluntarily register. Only registered VAT taxpayers may claim VAT refunds.

One unique feature of Lao PDR VAT is that VAT is charged on withholding taxes (WHTs) (*see the Withholding taxes section for more information*).

Customs duties/Import tariffs

All goods imported into Lao PDR are subject to import duty. Exemptions are available to enterprises operating promoted investment activities (*see the Tax credits and incentives section for more information*).

Lao PDR has adopted the General Agreement on Tariffs and Trade (GATT) valuation principles. Duty rates are based on the Association of Southeast Asian Nations (ASEAN) harmonised tariff nomenclature. Duty rates range between 0% and 40% depending on whether the goods are ASEAN or other source.

Excise taxes

Excise tax applies to the import and sale of certain luxury products. Excisable goods include alcohol, beer, cigarettes, perfume, cosmetics, motor vehicles, soft drinks, mineral water, and many types of electrical equipment. Excise tax rates range from 5% to 90%.

Property taxes

Land taxes vary depending on the location and the type of the land (e.g. land for construction, agriculture). The calculation of the land tax is based on both the location and the size of the land and is levied at annual rates per square meter. Land tax is payable in the first quarter of the relevant calendar year.

Transfer taxes

There are no transfer taxes in Lao PDR.

Stamp taxes

There are no stamp taxes in Lao PDR.

Administrative fees

Under the Tax Law, government sectors can collect fees for issuing fiscal licences, business licences, permits, visas, advertisement boards, broadcasting rights, and other services. The charges and service fees are set periodically by Presidential Decree.

Lao People's Democratic Republic

Branch income

Branches of foreign companies are taxable on their income from carrying on business in Lao PDR.

Income determination

The PT calculation is based on an entity's actual accounting profits as adjusted for tax purposes. The Lao PDR Tax Regulations are silent on the treatment of a large number of items. Generally, in such cases, the tax treatment will follow the accounting treatment. Some of the more common differences are depreciation, entertainment expenses, and the non-deductibility of reserves and provisions (until actually paid).

Inventory valuation

Inventory valuation for tax purposes follows the method used for accounting purposes in Lao PDR.

Capital gains

There is no separate tax on capital gains in Lao PDR; however, profits from the sale of shares are subject to tax at a rate of 10%. The buyer of the shares is required to withhold and remit the tax.

Dividend income

Dividends received from another Lao PDR company or a foreign company are taxed at a flat rate of 10%.

Interest income

Interest income is taxable in Lao PDR.

Rents/royalties income

Rents and royalties income are taxable in Lao PDR.

Unrealised exchange gains/losses

Unrealised exchange gains are not taxable and losses are not deductible in Lao PDR.

Foreign income

There is no controlled foreign company (CFC) or similar regime in Lao. Profits of a foreign subsidiary are taxable when remitted as dividends.

Deductions

Accrued expenses are deductible in Lao PDR. Reserves and provisions are not deductible until actually settled.

Depreciation

Depreciation rates are prescribed in the tax law and may differ from financial accounting. Depreciation is on a straight-line basis over prescribed useful lives, as follows:

Assets	Years
Buildings used for industrial purposes:	

Lao People's Democratic Republic

Assets	Years
20 years old or less	20
Over 20 years	40
Buildings used for commercial and residential purposes:	
Permanent structures	20
Semi-permanent structures	10
Machinery, equipment, vehicles	5
Office equipment	10
Ships and passenger aircraft	20

Goodwill

There is no specific guidance on the deductibility of goodwill or amortisation in Lao PDR.

Start-up expenses

Start-up expenses are amortisable over two years in Lao PDR.

Interest expenses

Interest is deductible on an accrual basis following the accounting treatment. All interest payments must be supported by documents showing that the payments are commercially reasonable. Interest paid to a shareholder is not deductible.

Bad debt

Bad debt reserves are not deductible in Lao PDR. However, a deduction is allowed when debt is written off.

Charitable contributions

Charitable contributions in Lao PDR are limited to the smaller of 0.15% of taxable income or LAK 4 million.

Entertainment expenses

Entertainment expenses are capped at 0.4% of annual revenue.

Pension expenses

Pension expenses are deductible when paid in Lao PDR.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments are not deductible in Lao PDR.

Fines and penalties

Fines and penalties are not deductible in Lao PDR.

Taxes

PT and MT are not deductible.

Net operating and capital losses

Tax losses can be carried forward for three years, but no carryback is allowed. A change in control will not impact a company's loss carryforward. Capital losses are treated as ordinary losses.

Payments to foreign affiliates

Payments to foreign affiliates are deductible if in the ordinary course of business.

Lao People's Democratic Republic

Group taxation

Consolidation or grouping is not permitted, and each entity must file on a separate basis in Lao PDR.

Transfer pricing

There are no specified transfer pricing rules in Lao PDR. However, intercompany transactions should be at arm's length.

Thin capitalisation

There are no thin capitalisation or debt-to-equity rules in Lao PDR.

Tax credits and incentives

Foreign tax credit

There is no foreign tax credit regime in Lao tax law. However, certain tax treaties entered into by Lao PDR do have provisions for either deductibility of foreign tax or a credit.

Promoted investment activities

The following activities are promoted under the Law on the Promotion of Foreign Investment No. 11/NA, dated 22 October 2004 (Existing Foreign Investment Law):

- Production for export.
- Activities relating to agriculture or forestry, and agricultural, forestry, and handicraft processing activities.
- Activities relating to industrial processing, industrial activities using modern techniques and technology, research and development, and activities relating to the protection of the environment and biodiversity.
- Human resource development, skills development, and public health.
- Construction of infrastructure.
- Production of raw materials and equipment to be supplied to key industrial activities.
- Development of the tourism industry and transit services.

The following three zones are promoted under the Existing Foreign Investment Law:

Zone 1: Mountainous, plain, and plateau zones with no economic infrastructure to facilitate investments.

Zone 2: Mountainous, plain, and plateau zones with a moderate level of economic infrastructure suitable to accommodate investments to some extent.

Zone 3: Mountainous, plain, and plateau zones with good infrastructure to support investments.

The tax incentives are as follows:

- Investment in Zone 1 shall be entitled to a PT exemption for seven years and thereafter shall be subject to PT at the rate of 10%.
- Investment in Zone 2 shall be entitled to a PT exemption for five years, then shall be subject to a reduced PT rate of 7.5% for three years, and thereafter a PT rate of 15%.
- Investment in Zone 3 shall be entitled to a PT exemption for two years, then shall be subject to a reduced PT rate of 10% for two years, and thereafter a PT rate of 20%.

Lao People's Democratic Republic

In addition to the incentives as mentioned above, foreign investment enterprises shall be entitled to the following incentives:

- During the tax exemption period and during the tax reduction period, the enterprise shall be entitled to an exemption from MT.
- Profits used for the expansion of licensed business activities shall be exempted from PT during the accounting year.

The Law on the Promotion of Foreign Investment grants incentives to foreign investors investing in activities within the promoted sectors and zones. Raw materials, equipment, machines, and vehicles used directly in production will be exempted from import duties and taxes or will be subject to a combined import duty and VAT rate of 1%. An application/request letter for incentives in respect of the importation of raw materials, equipment, machines, and vehicles used directly in production will be considered within 30 working days from the date of receipt of the application/request letter.

Withholding taxes

WHT is applied to various types of payments made to domestic and foreign recipients.

Payment	WHT rate (%)
Dividends	10
Profit from the sale of shares	10
Interest and guarantee fees	10
Payments for use of trademarks and intellectual property	5

As mentioned in the *Other taxes* section, VAT of 10% is charged on the above WHT.

In the case of a foreign recipient, the WHT is considered a final tax.

Lao PDR has double tax treaties (DTTs) with the following countries, and WHT rates under the treaties are as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Brunei (not in force)	-	-	-
China	5	5	5
Kuwait (not in force)	-	-	-
North Korea	5	10	5
Russia	10	10	0
South Korea (not in force)	-	-	-
Thailand	10	10	5
Vietnam	10	10	5

Lao People's Democratic Republic

Foreign contractor withholding tax (FCWT)

A WHT on payments to foreign contractors applies where a Lao PDR contracting party contracts with a foreign party that does not have a licensed presence in Lao PDR regardless of whether the services are provided in Lao PDR or outside Lao PDR. The FCWT comprises both a PT and VAT element and is intended to be a final tax on the foreign company. The FCWT withholding and filing obligation rests with the Lao PDR customer.

For foreign contractors, PT must be withheld at a deemed percentage of taxable turnover. The deemed rates are determined according to the nature of the contract or activity.

Activity	Deemed profit margin (% of business revenue)	Deemed PT rate (%)
Commerce	5	1.75
Production	8	2.8
Transportation and construction	10	3.5
Service	20	7

These PT rates are then added to the VAT at 10% to determine the total FCWT. For example, a foreign service charge of LAK 1,000 would result in LAK 70 of PT and LAK 100 of VAT for a total FCWT of LAK 170.

Tax administration

Taxable period

PT is determined on a calendar year basis.

Tax returns

The tax return is due by 10 March of the subsequent year. Submission of the final tax return will be followed by an audit by the Tax Department.

Payment of tax

PT is payable quarterly in advance, with a final payment after year end. The first three payments are due 10 April, 10 July, and 10 October of the current tax year. The final payment is due with the submission of the final tax return on 10 March of the subsequent year. The quarterly payments are based on the prior year's PT (or expected tax for the current year). Any excess PT payment can be carried forward to the subsequent year.

Audit cycle

Most large companies are audited annually in Lao PDR.

Statute of limitations

The statute of limitations is generally three years in Lao PDR.

Topics of focus for tax authorities

There are no areas of special focus in tax examinations in Lao PDR.

Significant developments

Large investment relief

On 1 January 2011, the government introduced corporate income tax (CIT) relief for investments, at particular investment amounts, in qualifying industries in new, unused fixed assets (buildings and structures classified as industrial buildings and new plant and technological equipment) that can be used for business purposes. As per amendments made to the CIT Act, CIT relief is available for investments over 3 million Latvian lats (LVL). The available tax relief is 25% of the amount of investments made (15% for investments over LVL 35 million). The time in which the investment project has to be completed has been increased from three to five years.

Note that companies have to go through certain procedures in order to receive a Cabinet decision in support of a qualifying investment project. Investments have to enable a company to launch a new line of business or to modernise its existing production, which includes manufacturing new goods, a shift of business activity from producing one type of goods to producing another type of goods, or a complete overhaul of the manufacturing process.

Loss carryforward

Companies will be able to carry forward tax losses accrued since 2008 for an unlimited period of time. Losses accrued before 2008 may be carried forward eight years.

Free-port and enterprise-zone companies

The amendments to the CIT Act make the tax regime in free ports and enterprise zones even more attractive by allowing free-port and enterprise-zone companies to apply 15% CIT (previously 25%) before taking tax relief. The effective tax rate after the relief will be 3% (previously 5%).

Value-added tax (VAT) rate reduction

Effective 1 July 2012, the standard VAT rate will be reduced from 22% to 21%.

CIT Act amendments effective from 2013 and 2014

New withholding tax rules

The amendments to the CIT Act include significant amendments regarding withholding tax (WHT) on dividends, interest, and royalties paid to non-residents, i.e. provide WHT exemption on the following payments:

- Dividends paid to any non-resident company (effective from 1 January 2013).
- Interest payments to any non-resident company that does not reside in an offshore territory (effective from 1 January 2014).
- Royalty payments to any non-resident company that does not reside in an offshore territory (effective from 1 January 2014).

Latvia

Interest and royalties paid to a related European Union (EU)/European Economic Area (EEA) company will not attract WHT from 1 July 2013 based on the transitional period of implementing Interest-Royalty Directive in Latvia.

Capital gains

Starting in 1 January 2013, capital gains from trading in non-public securities (shares), except offshore company shares, are not taxable and losses are not tax deductible. For planning purposes, companies should take into account that the specific regulation on loss carryforward from transactions in non-public securities has been excluded as of 1 January 2013. Therefore, any losses accumulated from trading with non-public securities can be used only in 2012, if certain criteria are met.

Taxation of dividends

Dividends received from companies in other countries, excluding companies registered in low tax jurisdictions or tax havens, should not be included in the taxable income of a Latvian company as of 1 January 2013.

Option to tax introduced in VAT Act

A VAT-registered person will be allowed to use the 'option to tax' regulation in respect to sale of unused real estate as of 1 January 2013, if the real estate is acquired before 27 July 2011.

Taxes on corporate income

The standard rate of CIT is 15%. The tax is assessed on a company's financial profit (loss) that has been adjusted by certain corrections required by law. There are no other taxes on corporate income stated either by the government of Latvia or by local municipalities.

Resident companies are taxed on their worldwide income.

Non-resident companies are taxed on their Latvia-source income through permanent establishment (PE) at the standard CIT rate. If no PE is created, non-residents may be taxed with 2% to 15% withholding tax (WHT) for qualifying payments (e.g. royalties, management fees, interest).

Micro-business tax (MBT)

The Micro-business Tax Act gives existing and newly-formed businesses the opportunity of acquiring micro-business status and registering for MBT if they meet the following criteria:

- The shareholders are individuals who are also concurrently members of the board.
- The turnover does not exceed LVL 70,000 in a calendar year.
- The number of employees does not exceed five at any time. Absent employees or employees suspended from work shall not be included in the number of employees.

The standard MBT rate is 9% of a micro-business's turnover and covers payroll taxes, business risk duties, and CIT. The standard rate may be increased in the following cases:

- If its quarterly staff count exceeds five, then 2% per extra employee will be added to the standard rate.
- If the turnover exceeds LVL 70,000 in a calendar year, the excess will attract a rate of 20%.

- If an employee’s net income exceeds LVL 500 a month, the excess will also attract a rate of 20%.

Corporate residence

A company is resident in Latvia if it is incorporated or had to be incorporated in Latvia.

Permanent establishment (PE)

Under the Latvian Taxes and Duties Act, a non-resident has a PE in Latvia if all three of the following conditions are met simultaneously:

- The non-resident uses a fixed place for activities in Latvia.
- The place for activities is permanently used or is established for the purpose of being used permanently.
- The place for activities is used for the performance of commercial activities.

In addition, it is considered that a non-resident has a PE in Latvia if the non-resident performs in Latvia at least one of the following activities:

- Uses a construction site or performs building or installation activities or supervision or consultative activities related to the construction site or aforementioned activities.
- Uses equipment or installations, drilling platforms and special ships intended for the research or extraction of natural resources, or carries out supervisory or consultative work related thereto.
- Within a time period, which together exceeds 30 days in any six-month period, provides services, including consulting, management, and technical services, utilising one’s employees or associated personnel.
- Uses the activity of an individual, legal, or other person for the benefit of one’s commercial activities, provided that this person is authorised to enter into contracts in the name of the foreign entity and the person regularly (more than once in a taxation period) exercises such an authority.

Note that the PE risk for entities located in treaty countries should be tested in accordance with the relevant double tax treaty (DTT).

Other taxes

Value-added tax (VAT)

The following VAT rates apply in Latvia:

Description of goods	VAT (%)
The standard rate on supplies of goods and services, commodity imports, certain services rendered by non-residents and treated as supplied in Latvia, intra-community acquisitions of goods, and personal consumption.	22 (21 effective 1 July 2012)
A reduced rate on medicines, medical devices, specialised baby food, domestic public transport services, household heating charges, firewood and wooden heating material to households, textbooks, original literature publications, accommodation services, newspapers and other periodical publications, and electronically supplied media information.	12
Exemption with credit on supplies of goods within the European Union to taxable persons registered for VAT in other EU member states.	0

Latvia

Description of goods	VAT (%)
Exemption with credit on commodity exports and imports not released for free circulation in the European Union, supplies of goods and services to diplomats, supplies of goods and services financed by foreign aid, import of gas that is supplied through natural gas system, import of electricity and heat and cooling energy.	0

Please note that the exemption with credit method has been applied on import of gas, import of electricity, and heat and cooling energy only from 1 October 2011.

A number of services are exempt, including education, financial, medical, and insurance services; nursery fees; and the sale of used real estate, including land (except for building land, which is taxable).

Customs duty

Customs duty is levied on goods imported into Latvia. The rate of customs duty generally is between 0% and 20% of the value of imported goods, depending on the type and origin of such goods. Exports are generally exempt from customs tax.

Excise duty

An excise duty is levied on specific categories of goods, mostly as a fixed amount per unit. Excise duties are applied to the following goods, whether made in Latvia or imported:

Product	Excise amount
Oil and oil products	Up to LVL 320 per 1,000 litres, depending on the type of the product.
Alcohol	LVL 45 to 940 per 1,000 litres, depending on the type of alcohol.
Beer	LVL 2.18 for each percent of absolute alcohol, but not less than LVL 4 per 100 litres of beer (LVL 1.09 on the first 10,000 hectolitres for small breweries).
Tobacco products	LVL 32 per 1,000 cigars or cigarillos. LVL 32 per 1,000 cigarettes plus 33% of the maximum retail selling price, but not less than LVL 64 per 1,000 cigarettes. LVL 64 per 1,000 cigarettes plus 33% of the maximum retail selling price for cigarettes 80mm to 110mm in length, but not less than LVL 128 per 1,000 cigarettes. LVL 96 per 1,000 cigarettes plus 33% of the maximum retail selling price for cigarettes 111mm to 140mm in length, but not less than LVL 192 per 1,000 cigarettes. LVL 128 per 1,000 cigarettes plus 33% of the maximum retail selling price for cigarettes exceeding 140mm in length, but not less than LVL 256 per 1,000 cigarettes. LVL 43 per 1,000 grams of fine-cut smoking tobacco intended for the rolling of cigarettes. LVL 43 for other smoking tobacco.
Coffee	LVL 100 per 100 kg.
Certain soft drinks	LVL 5.2 per 100 litres.
Natural gas	LVL 15.6 per 1,000 m ³ for use as heating fuel. LVL 70 per 1,000 m ³ for use as fuel.

Real estate tax

The real estate tax is payable annually for:

- Business properties, such as land and buildings used for economic activities, as well as engineering structures, such as motorways, streets, roads, parking places, bridges, elevated highways, tunnels, pipelines, communication lines, and power lines
- Buildings that form part of a private dwelling house development (also if owned by a company but not used for living purposes).

The following real estate tax rates are applicable:

- The standard rate of 1.5% on the cadastral value of land, buildings, and engineering structures.
- A progressive rate for dwelling houses, their parts, and any parts of a non-residential building that are functionally used for living and not used in trade or business:
 - 0.2% of cadastral values up to LVL 40,000.
 - 0.4% of cadastral values exceeding 40,000 but not exceeding LVL 75,000.
 - 0.6% of cadastral values exceeding LVL 75,000.
- 3% for uncultivated land capable of agricultural use, unless it is up to one hectare in area or subject to statutory restrictions on agricultural activity. By law, uncultivated land capable of agricultural use is agricultural land that is not used for making or growing agricultural products (including harvesting, grazing, and keeping animals for agricultural purposes) or is not kept in good agricultural and environmental condition. A 3% rate can also be applied by municipalities, if buildings may cause a threat to people because of their condition.

Newly constructed or reconstructed buildings are exempt from real estate tax for one year after completion. Other reliefs are available under the Real Estate Tax Act or determined by municipalities.

Stamp duty

Stamp duties are levied on certain legal and other kinds of services, such as court trials, company formation and registration, licences for certain types of business activity, provision of information, notary services, operation of bills of exchange, and registration of real estate at the Land Registry (2% of the higher of deal value or cadastral value capped at LVL 30,000 per property).

Stamp duty is not payable if re-registration of real estate in the Land Registry is necessary due to the reorganisation process. The maximum amount of stamp duty payable for re-registration of the title to immovable property in case of contribution in kind to a company's capital is LVL 1,000.

National social insurance contributions (NSIC)

The company as an employer is liable to pay 24.09% NSIC calculated on employee's gross salary.

Natural resource tax

Any natural resources acquired as a result of economic activities (e.g. surface and underground water, dolomite, and quartz sand), the collection of edible park snails, taking advantage of useful features of the bowels of the earth by pumping natural gas or greenhouse gases into geological structures, pollution (waste, emissions, and pollutants), products harmful to the environment (e.g. lubricating oil, electric batteries, oil filters, and tyres), electrical and electronic equipment and appliances, radioactive substances, packaging, disposable tableware, means of transport, the volume of

Latvia

emitted greenhouse gasses that is not included in the number of emission quotas surrendered, coal, coke and lignite are subject to a natural resource tax in Latvia. The rates are specific for each product and are based on weight, volume, or the amount of the product.

The taxpayer may reduce the natural resource tax by taking part in recycling programs for packaging, products harmful to the environment, electrical and electronic equipment and appliances, and means of transport. Taxpayers do not have an obligation to recycle themselves to be entitled to the relief; instead they can conclude an agreement with the recycling company.

For some of the products, the taxpayer must also pay the disposal tax. The rates differ for a large variety of products.

Vehicle taxes

There are two vehicle taxes in Latvia, a vehicle usage tax and a light corporate vehicle tax. The first is payable for exploitation of trucks, and the second is payable for light vehicles held or owned by a company.

Vehicle usage tax

The vehicle tax on usage (exploitation) for trucks with gross weight up to 12,000 kg is payable in accordance with the gross weight of these trucks in the following amounts:

- Up to 1,500 kg: LVL 1.
- Between 1,501 kg and 1,800 kg: LVL 24.
- Between 1,801 kg and 2,100 kg: LVL 45.
- Between 2,101 kg and 2,600 kg: LVL 64.
- Between 2,601 kg and 3,500 kg: LVL 72.
- Between 3,501 kg and 12,000 kg: LVL 102.

The vehicle usage tax for trucks with gross weight above 12,000 kg shall be payable depending on the number of axles the truck has and the driving axle suspension type.

The vehicle usage tax is payable on a yearly basis and it must be paid in full amount prior to the state technical inspection.

Light corporate vehicle tax

A light corporate vehicle tax (LCVT) was introduced in Latvia on 1 January 2011. LCVT is paid for vehicle(s) owned or held (e.g. rented) by a business person, which is registered for the first time after 1 January 2005, and with information on the engine volume in the registration certificate. There is a fixed rate of LCVT calculated according to the engine volume, as follows:

- Up to 2,000 cc: LVL 19 per month.
- From 2,001 cc to 2,500 cc: LVL 30 per month.
- Over 2,500 cc: LVL 40 per month.

For vehicles not mentioned in the above criteria, the LCVT will be LVL 30 per month.

Car and motorcycle duty

Cars and motorcycles registered for the first time or after modification are subject to a car and motorcycle duty. This duty is payable by any individual or entity registered as the owner of a car or motorcycle.

The applicable tax rates for cars registered in foreign countries are calculated based on the carbon dioxide (CO₂) on each kilometre constituted by the car. The rates range from LVL 0.3 to LVL 5 where the CO₂ is from 120 grams to 350 grams for each kilometre. The rate for newly registered motorcycles is LVL 0.10 for each cubic-centimetre of the engine's capacity.

For other cars, rates range from LVL 75 to LVL 850, depending on age and capacity. The rate for motorcycles depends on age and is 25% of the rate for cars.

Lottery and gambling tax

A lottery and gambling tax is levied on licensed organisers of games or lotteries. Licence fees range from LVL 3,000 to LVL 300,000. Game organisers, gambling places, and gambling machines are subject to the gambling tax. The tax rates depend on the number and type of gambling machines or percentage of income for several gambling types.

Electricity tax

This electricity tax is levied on electricity supplied to final consumers or consumed by suppliers. The rate is LVL 0.71 per mega-watt-hour. Exemptions are available to producers of electricity and for electricity used by domestic public transport and households.

Local duties

Certain activities are subject to local duties (e.g. construction permits).

L

Branch income

As a general rule, branches and resident companies are taxed alike, with certain adjustments for payments to the head office. Branch income is subject to a 15% CIT.

Income determination

Inventory valuation

Dictated by the matching and prudence concepts, stock should be valued at the lower of cost or net realisable value. Cost must be computed on a first in first out (FIFO) basis. Cost can mean purchase price or production cost. Any unrealised losses from stock revaluation are non-deductible.

Capital gains

From 1 January 2013, there will not be different treatment of capital gains from the sale of public and non-public securities (including also public securities traded outside the EU/EEA). Profits on trading in securities will not be taxable, provided that income results from the sale of a company not included in the list of low tax jurisdictions stated by the Latvian government, and losses from sale of any securities will not be tax deductible.

A capital gain on the disposal of a capital asset is calculated as the difference between the sale proceeds and cost. This gain is subject to a 15% CIT as ordinary income.

Losses on the sale of non-public securities made in previous years may be carried forward and offset against total taxable income from operating activities in 2012, if a company made a one-off sale of securities that it had held for more than 12

Latvia

months (otherwise losses may be offset against income from the sale of other non-public securities). A possibility to offset the losses will no longer be available as of 1 January 2013.

Profits on trading in securities publicly quoted in the EU/EEA are not taxable, and losses from these securities are not deductible.

Dividend income

From 1 January 2013, dividends received from any companies abroad or in Latvia are exempt from CIT, except dividends from companies registered in blacklisted tax havens (a list of blacklisted tax havens is provided by the Cabinet of Ministers).

In 2012, the following dividends are exempt from CIT:

- Dividends received from Latvian registered companies, except for dividends from companies paying CIT at a reduced rate (e.g. companies operating in free ports or special economic zones [SEZs]).
- Dividends from a company resident in another EU/EEA country.
- Dividends paid by a non-resident company based outside blacklisted tax havens to a Latvian person, directly holding at least 25% of shares in that company at the time the dividends are paid.

Stock dividends

The distribution of new shares to a company's shareholders in proportion to their existing shareholdings (after a share capital increase by conversion of accrued capital) is not a taxable event for the shareholders.

Interest income

Interest income is taxed at the 15% CIT rate.

Foreign income

Resident companies are taxed on their worldwide income. Income is taxed for the given taxation period; there is no possibility to defer taxation until the profit is repatriated to Latvia. Tax paid abroad on income included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credits may not be carried forward.

Deductions

Depreciation and amortisation

Fixed assets may be depreciated for tax purposes according to the reducing-balance method by applying the following rates to tax written-down values:

Types of property	Depreciation rate (%)
Buildings, structures, and perennial plantations	10
Technology and energy installations, fleet, railway	20
Computer hardware and software, information systems, electronic equipment	70
Light passenger cars (except special purpose vehicles), motorcycles, and air transport means	30

Types of property	Depreciation rate (%)
Oil rigs, oil exploration and extraction ships, sea and river transport means	15
Other fixed assets	40

The value of new technological equipment is multiplied by a coefficient (1.5 from 2009 to 2013) before claiming capital allowances. The effect of applying a coefficient is reversed if the new technological equipment is disposed of within five years from acquisition.

Non-business assets are ineligible for capital allowances.

Intangible assets are eligible for capital allowances on a straight-line basis over the following recovery periods:

- Concessions: ten years
- Patents, licences, and trademarks: five years
- Research and development (R&D) expenses: one year

Any intangible assets not fitting into any of these categories (such as goodwill) are ineligible for capital allowances.

The cost of intangible investments is increased by a coefficient of 1.5 if such investments result in a trademark or patent being registered.

L

Start-up expenses

There is no specific treatment for start-up expenses. Generally, after registration of the company for tax purposes, expenses are deductible. Expenses accrued before registration of company cannot be deducted for CIT purposes due to the lack of supporting documentation with company identifying information. However, input VAT on goods purchased or services received prior to registration for VAT purposes is recoverable if the goods purchased and services received or used will further be used for taxable transactions.

Interest expenses

The CIT Act imposes restrictions on deductibility of interest payable on loans or credits, factoring transactions, and finance leases under two methods. *For further details, please see Thin capitalisation in the Group taxation section.*

Bad debts

Bad debts may only be deducted for CIT purposes if certain conditions are met.

Provision for doubtful debts

Recent amendments allow taxpayers, under certain conditions, to defer payment of CIT on a provision for doubtful debts for three years, without increasing taxable income at the time of making that provision. A special provision for doubtful debts in a tax period that does not increase taxable income must not exceed 20% of taxable income before provisions for bad debts. To take this relief, the following conditions must be met:

- The payment became due more than six months ago.
- The income associated with these debts has been added to taxable income.
- The debtor is a legal entity resident in the EU/EEA or in a country that has an effective DTT with Latvia.

Latvia

- The taxpayer and the debtor are not related companies and neither of them is a person related to the company.
- Dealings with the debtor were stopped at least six months ago and have not been resumed since.
- The taxpayer can prove that steps were taken to recover the doubtful debt.
- The taxpayer has given the debtor written notice by 31 December in the tax year that the debt (with details of the supporting document) is covered by a provision for doubtful debts made in line with this clause.

Unless the provision is reduced within three years by being added to taxable income or through a bad debt being written off, the amount of doubtful debts covered by the special provision will have to be added to taxable income.

The amendments relating to the provision for doubtful debts apply from 2011 to 2013.

Amounts unpaid by a debtor

A taxpayer who has not paid for goods or services within six months after the due date for payment must not deduct the amount of the debt from taxable income if the creditor has notified one that the debt is classified as doubtful and covered by a special provision for doubtful debts. Taxable income can be reduced in the tax period the debt is paid.

The amendments relating to the provision for doubtful debts apply from 2011 to 2013.

Charitable contributions

Donations paid to charitable institutions, non-profit making foundations, churches and monasteries, and various other welfare institutions increase taxable income, but may qualify for a tax relief, if certain criteria are met (*see the Tax credits and incentives section*).

Luxury vehicles

Luxury vehicles (i.e. light passenger cars with a value greater than LVL 25,424, excluding VAT) are not eligible for capital allowances. A tax deduction is denied for expenses incurred in using and maintaining luxury vehicles and for lease or hire purchase payments associated with leasing such vehicles. These rules do not, however, apply to special purpose vehicles (such as emergency vehicles and special passenger vehicles).

Provisions

Any increase in general provisions and reserves for the tax period as compared with the previous tax period is non-deductible. These provisions include accruals for accrued benefits, bonuses and commissions, and other expenses.

Non-business expenses

A tax deduction is not allowed for any expense not directly related to business activities. In fact, non-deductible expenses have to be increased by a coefficient of 1.5 (except donations made to qualifying institutions). Effectively, such expenses are taxed at 22.5% (15% x 1.5).

Non-business expenses include costs that are not directly related to commercial activities; all expenses incurred for the pleasure and recreation of owners and employees; entertainment trips taken by owners and employees in company vehicles; any benefits, gifts, credits, and loans turned into gifts to owners and employees; and any other disbursements in cash or in kind to owners or employees that are not part of remuneration or that are not related to the taxpayer's commercial activities.

Representation expenses

Under the Latvian CIT Act, representation expenses are costs that a company incurs in developing and maintaining its prestige at a level acceptable to society. Representation expenses include costs incurred in holding public conferences, receptions, and meals, and the cost of producing items to represent the company (e.g. items bearing its logo). 40% of representation expenses are deductible for CIT purposes.

Fines and penalties

Fines, contractual penalties, and statutory interest on arrears (including increase in principal debt) levied under the Taxes and Duties Act and specific tax laws are not deductible.

Taxes

Excise duties, employer's national social insurance contributions, natural resource taxes, customs duties, and real estate taxes are deductible.

Net operating losses

Tax losses may be carried forward for an unlimited period of time, if accrued since 2008. Tax losses accrued before 2008 may be carried forward eight years (*for more details, please see table below*).

Year losses accrued	Last year losses could be used
2004	2012
2005	2013
2006	2014
2007	2015
2008 and after	Not limited

The carryback of losses is not permitted.

A company in which more than 50% of shares (a controlling interest) have changed hands may utilise its tax losses if it continues for five years the same business that it carried on during the two years prior to the change of control. When companies are reorganised by a merger or spin-off, it may be possible to utilise losses accrued.

Payments to foreign affiliates

In general, a Latvian company may deduct the full amount of royalties, service fees, and interest (subject to statutory limits) made to related parties to the extent that such payments are made at arm's length. Such payments may be subject to a WHT (*see the Withholding taxes section*). However, if a taxpayer fails to deduct the WHT due, the amounts paid cease to be deductible for tax purposes.

Group taxation

Group consolidation is not permitted for tax purposes. However, the members of a group of Latvian companies, whose parent owns directly or indirectly 90% of the capital of its subsidiary or subsidiaries, may surrender their current-year tax losses to one another.

Latvia

Transfer pricing

The Latvian Regulation governing the application of the CIT Act states that for transfer pricing calculation purposes, use may be made of the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, a document issued by the Organisation for Economic Co-operation and Development (OECD).

Latvian law requires that related-party transactions be in compliance with the arm's-length principle. Under the arm's-length principle, the conditions made or imposed between two related enterprises in their commercial or financial relations must not differ from those that would be agreed between independent enterprises engaging in similar transactions under similar circumstances.

A tax audit may examine and adjust the price of a transaction in the following circumstances:

- The transaction is between related parties.
- Barter and set offs.
- A price deviation exceeds 20% of prices that the taxpayer has applied to similar goods or services over a short period.
- Exports and imports.

The transfer pricing requirements for the arm's-length price of a related-party transaction primarily apply to transactions between two or more related companies. Latvian legislation has broadened these requirements, and section 12 of the CIT Act requires the taxpayer to adjust one's taxable income for the difference between the price applied to a transaction and the arm's-length value if the transaction involves:

- individuals related to the company
- related foreign companies
- companies exempt from CIT or enjoying CIT relief pursuant to other Latvian laws, or
- a related company with which it forms a single tax group.

This provision may apply to any transaction, including purchases and sales of fixed assets and goods, supplies of services, loans and borrowings, and intellectual property (IP). It is possible to use corresponding adjustments and adjust taxable income if a related party has made adjustments of its income according to transfer pricing rules. It is possible only if the related party is registered in EU/EEA and documentary evidence from the respective tax authorities is received.

It should also be pointed out that the traditional view that transfer pricing rules only apply to transactions with foreign related companies is no longer consistent with the law because transfer pricing issues are now also important to companies doing business with Latvian-related companies.

There are no obligatory transfer pricing documentation requirements in Latvia yet. According to the proposed amendments, Latvian taxpayers who enter into transactions with any of the parties listed above and whose annual turnover exceeds LVL 1 million will have to prepare transfer pricing documentation for those transactions. Nevertheless, it is highly advisable to prepare the transfer pricing documentation also for companies below the set threshold, as it may be of valuable support during tax audits.

Thin capitalisation

Thin capitalisation rules apply when claiming a tax deduction for interest payments on loans and leasing services.

Taxable income should be adjusted for either:

- interest paid in excess of interest calculated by applying to the liability 1.2 times the average short-term interest rate at Latvian banks as determined by the Central Statistical Office for the last month of the tax period or
- interest in proportion to the excess of the average liability over an amount equal to four times shareholders' equity at the beginning of the tax year less any revaluation reserve.

The higher of these calculations should be added to taxable income.

The following interest payments are fully deductible:

- Interest paid on borrowings from credit institutions resident in Latvia, EEA member states, or countries with which Latvia has an effective DTT.
- Interest paid to the Latvian Treasury, Nordic Investment Bank, European Bank for Reconstruction and Development, European Investment Bank, European Council Development Bank, or the World Bank Group.
- Interest paid on Latvian or EEA debt securities in public trading.
- Interest expenses incurred by credit institutions and insurance institutions, regardless of the lender.

Interest paid on borrowings from a financial institution is deductible up to the amount of interest calculated by applying to the liability 1.2 times the average short-term interest rate at Latvian banks as determined by the Central Statistical Office for the last month of the tax period. The qualifying financial institution must meet the following criteria:

- It is resident in Latvia, the EEA, or a country with which Latvia has an effective DTT.
- It provides lending services or finance lease and is monitored by the controlling institution that supervises credit institutions or the financial sector.

Controlled foreign companies (CFCs)

There is no CFC regime in Latvia.

Tax credits and incentives**Foreign tax credit**

Tax paid abroad on income included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credits may not be carried forward.

Donations to public benefit organisations

CIT liability may be reduced by 85% of amounts donated to qualifying state-funded institutions; Latvian-registered societies, establishments, and religious organisations; or to institutions qualifying as public-benefit organisations under the Public Benefit Organisations Act. Such a reduction may not exceed 20% of the total CIT liability. When

Latvia

making a donation, the donor is not permitted to impose an obligation on the recipient of the donation or carry out any acts that may be classified and treated as consideration.

Donation relief is also available for donations to EU/EEA entities that have statuses similar to public-benefit organisations in the country of residence.

Large investment relief

CIT relief is available for investments over LVL 3 million in qualifying industries in new, unused fixed assets (buildings and structures classified as industrial buildings and new plant and technological equipment) which they can use for business purposes. The available tax relief is 25% of the amount of investments made (15% for investments over LVL 35 million). Investment projects must be completed within five years after the tax relief is granted.

Investments have to enable a company to launch a new line of business or to modernise its existing production, which includes manufacturing new goods, a shift of business activity from producing one type of goods to producing another type of goods, or a complete overhaul of the manufacturing process.

Incentives for shareholders to invest profits in companies

Recent changes in CIT law encourage shareholders to invest profits in the development of their company rather than take them out as dividends. Businesses may reduce their taxable income by a notional amount of interest that a taxpayer would have to pay on a loan equal to one's prior-year undistributed profit. This adjustment is calculated by multiplying the annual weighted average rate of interest on loans issued to non-financial Latvian businesses as determined by the Bank of Latvia for the tax period by undistributed profits accrued since 31 December 2008.

Free ports and special economic zones (SEZs)

Companies operating in SEZs are entitled to CIT and real estate tax relief. These areas include the free ports of Ventspils and Riga and the SEZs of Rezekne and Liepaja.

The qualifying companies may apply CIT relief of 80%. Since 2012, the CIT must be calculated at a 15% rate, resulting in an effective CIT rate of 3%. The companies may also apply 80% WHT relief for dividends, management services, and payments for IP made to non-resident companies.

Real estate tax relief amounts to 80%, and the municipality may waive the remaining 20%. Therefore, when meeting certain criteria, qualifying companies may decrease real estate tax to zero.

The amount of total CIT and real estate tax relief that may be claimed by the company depends on the amount of qualifying investments made by the company in the free port or SEZ area. Depending on the size of the company, the total tax relief available ranges from 50% to 70% from the amount of investments made.

Deferred tax on asset replacements

Latvia will allow a deferred payment of tax on profits arising on the sale of a replaced asset in order to encourage manufacturing companies to replace inefficient and outdated plant and machinery.

If a company acquires a functionally similar asset within 12 months before or after the old equipment is disposed of, then any income (profit) on the disposal of the old equipment is ignored in this tax period (i.e. the profit is deductible from taxable

income). Tax payment is deferred until the new equipment is sold and may be further postponed if the equipment is replaced.

Withholding taxes

The following types of payments to non-residents and, in some cases according to Latvian transfer pricing rules, to related Latvian companies using CIT reliefs are subject to WHT.

Dividends

Dividends are generally subject to a 10% WHT. DTTs generally reduce the rate to 5%. However, dividends paid after 1 January 2013 to any company will be exempt. Dividends that meet criteria of parent-subsidiary directive and are paid to an EU/EEA resident are already exempt.

Interest

Interest payments to related non-resident parties are generally subject to a 10% WHT. Interest payments to non-related creditors are not subject to WHT. If a bank registered in Latvia pays interest to related companies at the bank's normal interest rate level, then a 5% WHT applies.

Through 30 June 2013, Latvian companies will have to comply with transitional rules of the CIT Act, which provide a 5% WHT on interest payments to a related EU company. From 1 July 2013 onwards, WHT no longer will apply to interest paid by a Latvian company to a related EU member state company that holds at least 25% of the share capital or voting power in that Latvian company and meets certain other statutory criteria.

However, after 1 January 2014, payments to any non-resident company will be tax exempt, excluding payments to tax havens. In certain cases, for payments to tax havens, the company may obtain State Revenue Service confirmation that WHT does not apply, provided that the payment has not been made to reduce the taxable income.

Royalties

Payments for IP (copyright in literary or artistic works, including movies, videos, and sound recordings) are subject to a 15% WHT. A 5% WHT is applied on other intellectual rights, such as patents, royalties, and trademarks. DTTs may reduce the rate.

If the recipient is an EU-related company that holds at least 25% of the share capital or voting power in that Latvian company and meets certain other statutory criteria, the applicable rate for IP is 5% through 30 June 2013 and exempt from 1 July 2013 onwards.

CIT provision states that after 1 January 2014 every payment for IP to any non-resident company will be tax exempt, excluding payments to tax havens. In certain cases, for payments to tax havens, the company may obtain State Revenue Service confirmation that WHT does not apply, provided that the payment has not been made to reduce the taxable income.

Rentals of industrial, commercial, or scientific equipment and real estate

Rental payments for property in Latvia are subject to a 5% WHT.

Latvia

Management fees

Management and consulting fees are subject to a 10% WHT. The term 'management and consulting' means activities carried out by a non-resident directly or by outsourced personnel to ensure the management of a Latvian company or to provide necessary advice. DTTs may reduce the rate to 0%.

Disposal of real estate

A 2% WHT applies to proceeds from real estate disposals. This applies to income from disposed shares or other participation in a Latvian or foreign-registered company or other entity, if real estate in Latvia made up (in the period of disposal or the previous period, whether directly or indirectly, through shareholdings in one or more other entities established in Latvia or abroad) more than 50% of the asset value of the company being disposed of.

Double tax treaties (DTTs)

A Latvian company can rely on a DTT to reduce the rate of WHT on any payments previously mentioned. To this end, the Latvian company must obtain a valid residence certificate for each type of payment to each recipient prior to making the actual payment. A valid residence certificate is one approved by the foreign tax authority and the Latvian tax authority.

Please see the following table for WHT rates applicable to the payments described above:

Recipient	WHT (%)					
	Dividends (1)	Interest (2)	Royalties (2)	Rentals of industrial, commercial, or scientific equipment and real estate	Management fees	Disposal of real estate
Related Latvian companies using certain CIT reliefs	0	5/10	5/15	5	10	2

Latvia

Notes

1. No WHT from 1 January 2013.
2. No WHT from 1 January 2014, excluding companies in tax havens.
3. 15% applies to all payments to companies located in tax havens, with the following exceptions:
 - 10% for dividends paid by Latvian residents. Starting from 1 January 2013, dividend payments are exempt.
 - 5% for interest on deposits and current accounts paid by Latvian banks at their general rate.
 - Repayments of loan principal are exempt.
 - Goods originating in the tax haven are exempt.
4. A 25% minimum shareholding is required for the lower rate.
5. A 10% minimum shareholding is required for the lower rate.
6. A 25% and 75,000 United States dollars (USD) minimum shareholding is required for the lower rate.
7. A 20% minimum shareholding is required for the lower rate.
8. A 75% minimum shareholding is required for the 0% rate; a 25% minimum shareholding is required for the 5% rate.

Tax administration

Taxable period

The fiscal year may not exceed 12 months and is normally based on the calendar year. However, companies are permitted to choose alternative start and end dates for the tax year. The first year of trading may last up to 18 months.

Tax returns

Tax returns are filed annually, together with annual accounts, within one month after they have been approved but not later than four months after the end of financial year. Thus, if the financial year ends on 31 December, the CIT return and annual accounts must be filed not later than by 1 May of the following year. Larger companies may file the CIT return and annual accounts not later than seven months after the end of financial year.

Payment of tax

CIT usually is paid monthly on or before the 15th day of each month, with a final adjustment when the annual tax return is filed. Monthly tax instalments are based on the tax liability in the previous fiscal year and adjusted by the consumer price index. A company may choose quarterly instalments if its monthly advances in the previous period were less than LVL 500. For a new company, advance payments are voluntary.

Audit cycle

The tax audit commences with an audit note for open tax years (not more than three years since the tax payment was due). There are draft provisions suggesting that transfer pricing related issues can be audited for the prior five years. The duration of the audit may vary from a few weeks to a few months, in certain cases, not exceeding 90 days. In certain cases, it can be extended to 150 days.

Tax authorities should inform a taxpayer of a tax audit no later than ten working days prior to the commencement of the audit with notification about documents the tax authorities may like to receive.

During a tax audit, the auditor notifies the taxpayer about irregularities of calculation of tax payments and any possible fines that could be charged. Prior to issuing a decision of the audit, the auditor invites the taxpayer to final negotiations to discuss the tax audit results.

Following the audit and the notification of tax audit findings, the company may in turn:

- Negotiate with the tax authorities with a view to reducing the tax burden and achieve an 'out of court settlement'. The out-of court settlement offers the possibility to reduce fines and late payment penalties calculated (not the additional amount of tax calculated) by 50% to 85%. The conclusion of such a settlement presupposes that the company accepts the findings of the audit (e.g. of expenses) for the audited years.
- Appeal decision by requesting opinion of general director of Latvian State Revenue Service.
- Only after receiving decision of general director of Latvian State Revenue Service, taxpayer may take the case to court. An advance payment of additional tax calculated and late payment penalties are suggested. The first decision normally takes to two years and another two years until a decision by the Court of Appeal and Supreme Court is issued.

Statute of limitations

The right of the Latvian tax authorities to collect unpaid taxes is three years since the relevant tax payment was due.

Topics of focus for tax authorities

Topics of interest to Latvia tax authorities include:

- Transfer pricing.
- Non-business, marketing, and representation expenses.
- Payments to and from non-resident companies, including offshore companies.
- Obligation to register PE in Latvia.

Significant developments

The Ministry of Finance issued Decision No. 1291/1, dated 1 December 2011, and amended by Decision No.1363/1, dated 23 December 2011, to adjust some of the rates used to calculate the deemed profit with effect as of the fiscal year 2012. Among the major changes is the deemed profit rate for insurance activities, which is now fixed at 8% for all types of insurance activities (i.e. life, motor, accident, etc.). Prior to fiscal year 2012, it varied depending on the type of insurance activity.

The Ministry of Finance issued Memo No.1460/S2 stating that the double tax treaty (DTT) between Lebanon and Italy, signed on 22 November 2001, is enforced as of 21 November 2011.

Taxes on corporate income

Under the income tax law in Lebanon, tax is levied based on income type. Accordingly, the income tax law divides income into the following three categories:

- Chapter I - profits from industrial, commercial, and non-commercial professions.
- Chapter II - salaries and wages and pension salaries.
- Chapter III - revenues from moveable capital (chapter III mainly covers all types of dividend income, board member appropriations from profits, and interest income, including interest on bonds and treasury bills).

The income tax law does not provide for a single tax on income. Accordingly, where a taxpayer has income from different sources, each type of income is taxed according to the tax chapter it falls under. The applicable rates are as follows:

- Corporate income tax (CIT): 15%.
- Capital gains tax: 10%.
- Dividend distribution withholding tax (WHT): 10% (may be reduced to 5% in certain cases).
- Non-resident WHT: 7.5% for services and 2.25% for other than services.
- Payroll tax: from 2% to 20%.
- Moveable capital WHT: 5% or 10%.

Not all businesses are taxed in the same manner, and, depending on the relative size and structure of a business, the tax method applied is assessed depending on real (or actual) profits or deemed profits.

Real profit method

In Lebanon, tax is charged on the total income or profits derived in Lebanon. Based on the income tax law and the principle of territoriality, the main premise for considering a profit to have been realised in Lebanon is if it was generated through an effort or activity exerted in Lebanon.

The tax base (the determination of profits) and the tax rates differ between resident and non-resident tax payers.

For resident corporate entities, CIT is computed at 15% based on the taxpayer's accounting profits after adjustments resulting from tax rules through the schedule of accounting-to-tax calculation.

The use of the real profit method is mandatory for the following:

- Corporations (SAL).
- Limited liability companies (SARL).
- Companies of individuals.
- Branches of foreign companies.
- All entities employing more than four employees or importing goods.

Small entities may choose voluntarily to be subject to the real profit method; however, once they choose the real profit method, they cannot revert back to the deemed profit method.

Concerning tax non-residents, WHT applies at 2.25% on payments for goods and 7.5% on payments for services.

Deemed profit method

A deemed profit method is imposed on insurance and savings institutions, taxable transport companies, oil refineries, and public work contractors.

Taxation is based on deemed profits and is levied at a flat rate of 15%.

The rate of deemed profit for public work contractors, as approved by the Ministry of Finance, is currently set at either 10% or 15% of total amounts collected per year, based on the type of activity performed by the contractor.

For insurance companies, the deemed profit rate is 8% for all insurance activities. Prior to fiscal year 2012, the rate varied depending on the type of insurance activity (i.e. life, motor, accident, etc.).

In addition to the flat rate tax imposed on deemed profits, a distribution tax of 10% is levied on dividends.

Local income taxes

There are no local government taxes on income in Lebanon.

Corporate residence

Tax is levied on all corporeal/natural and incorporeal/artificial persons, resident in Lebanon or outside, on all profits that they generate in Lebanon. The main premise for considering profits to have been realised in Lebanon is when such profits have occurred

Lebanon

from an effort exerted in Lebanon, irrespective of the identity of the taxpayer or place of residency.

Tax is levied on profits generated by two categories of taxpayers: resident taxpayers and non-resident taxpayers.

Resident taxpayers

A person, establishment, or company is considered resident for tax purposes, even if not physically resident in Lebanon, when any of the following two terms are satisfied:

- Have an office or a fixed place of business in their name in Lebanon, even when they are not undertaking their business in a normal and repetitive manner.
- Practising a profession or business activity in a normal or repetitive manner in Lebanon, even if they do not have a known registered place of business in Lebanon. This is because they are considered to have practised their profession from the place in which they contact their customers, even if such place is a hotel or a café.

Non-resident taxpayers

Non-resident taxpayers can consist of persons residing in Lebanon and persons residing outside Lebanon. A corporeal person residing in Lebanon is subject to the non-resident WHT (*see the Withholding taxes section for more information*) if neither of the following two terms are satisfied:

- Practise a certain trade in a normal and repetitive manner in Lebanon, irrespective of whether or not they have a known registered place of business.
- Have a known registered place of business in Lebanon.

A person residing outside Lebanon is subject to the non-resident WHT on the amounts, revenues, profits, or proceeds obtained from Lebanon as a result of undertaking an activity in whole or in part on Lebanese territory or as a result of exploiting rights in Lebanon.

Permanent establishment (PE)

There are no clear provisions in the Lebanese income tax law to define PE.

Other taxes

Value-added tax (VAT)

The standard VAT rate in Lebanon is 10%. Unless specifically exempt, VAT is levied on all commercial transactions undertaken by business entities. Export of goods and services and export-related services, international transport, and some of the intermediate operations are zero-rated. Banking, financial services, and insurance operations are exempt from VAT.

Customs duties

Modern, simple, and efficient assessment means are adopted by the customs authorities (e.g. electronic declarations, declaration in advance, applying international procedures in clearing the goods, selective inspection, auditing the goods after their release, and adopting the unique declaration).

Customs rates are imposed and modified according to decisions from the Lebanese customs authorities. These decisions are adopted based on the need of the Lebanese markets of some goods and the will to protect national production sectors.

Safeguard measures are provided for in relation to imported goods. The purpose behind such measures is to protect the domestic production sectors when an increase of imports is witnessed when compared to the same period during the previous year.

The rates are determined based on a specific schedule created in conformity with the Harmonised System of Nomenclature. This conformity with the unified system allows Lebanon to represent an 'importer friendly' environment for importers.

The normal rates are applied where there is no preferential agreement. When the origin of the good or part of the good is from a country with which Lebanon has a preferential customs treatment, preferential rates apply.

Customs rates in Lebanon are either determined in percentage or paid as a lump sum per unit of imported products.

Excise taxes

Excise taxes are mainly applicable in Lebanon on certain beverages and spirits, tobacco products, gasoline, and vehicles.

Built property tax

The built property tax is an annual progressive tax, ranging between 4% and 14%, on built property.

Stamp duty

Two kinds of stamp duties are levied. A proportionate stamp duty of 0.3% is levied on all deeds and contracts (written or implied) that mention specific payments or other sums of money. A fixed stamp duty ranging between a minimum of 100 Lebanese pounds (LBP) and a maximum of LBP 2 million is applicable on documents in accordance with schedules appended to the stamp duty law.

Capital gains tax

Under local legislation, companies are permitted to revalue their fixed assets every five years. Capital gains recognised from such a revaluation, as well as any profits that may be realised from the disposal of fixed assets, are subject to a capital gains tax of 10%.

Income from disposal of shares realised by a company is subject to 10% capital gains tax when the shares are classified as financial assets in the company's balance sheet.

Income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

Registration taxes

The estimated cost of establishing a company in Lebanon is 7,500 United States dollars (USD). This includes lawyer's fees and registration fees. The registration fees will increase if the company is established with capital exceeding the minimum requirement. However, the registration fees should not normally exceed 1% of the value of capital.

For branch offices and representative offices, establishment costs are lower and may be estimated at USD 5,000.

When transferring ownership of real estate, registration fees of approximately 6% are applicable.

Lebanon

Payroll taxes

Employers are responsible for withholding and declaring payroll taxes on behalf of their employees. Payroll tax is levied at progressive rates of 2% to 20%.

Branch income

Net income derived from a branch's operations in Lebanon is subject to Lebanese CIT, levied under the real profit method at a rate of 15%. Taxable profits of foreign branch offices are deemed to be distributed and are subject to a dividend distribution tax at the rate of 10%.

Representative offices

Representative offices do not pay CIT as long as they do not carry out commercial activities. Representative offices are required to submit annual tax declarations along with detailed company information that includes employee information, a balance sheet, an income statement, a non-resident tax schedule, and a schedule of payments to professionals. The declaration, with all relevant documentation, should be submitted as one single set. All the information included should be based on accounting records. The deadline for submitting the declaration depends on the legal form of the parent company (i.e. before 1 June of the following year for SAL or SARL companies and before 1 May of the following year for others).

Income determination

Inventory valuation

For tax purposes, inventory is valued using the weighted average cost method.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. *See Capital gains tax in the Other taxes section for more information.*

Note that income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

Dividend income

Dividends received as a result of a taxable person's activity are deemed trading income and are subject to 15% CIT. Dividends received as passive income are subject to 10% tax in Lebanon. However, dividends received from Lebanese entities are exempt from CIT, as the dividend tax is withheld at source, but are not exempt from further tax upon distribution from the recipient entity.

Stock dividends

The Lebanese law is silent on the tax implications of stock dividends. However, when share capital is increased by reducing retained earnings, no tax is applicable.

Interest income

Interest earned by corporations is added to taxable income. Relief is given for the WHT suffered on bank accounts, treasury bills, and bonds issue to the extent of the CIT due.

Rental income

Rental income should be deducted from the accounting result to reach the taxable result. Moreover, expenses related to property that is rented out should be added back to the accounting result to reach the taxable result.

A built property tax is paid on rental income at progressive rates ranging between 4% and 14%.

Royalties income

Royalties received by a holding company from Lebanese companies for patents and the like are taxed at a rate of 10%. Royalties received by holding companies from abroad are exempt from tax.

Royalties received by other than holding companies are taxed as ordinary income at 15%.

Unrealised exchange gains/losses

Unrealised exchange gains and losses are not treated differently from any other gain or loss for tax purposes, i.e. unrealised exchange gains are subject to CIT at 15% and unrealised exchange losses are deductible for CIT purposes.

Foreign income

Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches.

L

Deductions**Depreciation**

Depreciation of property, plant, and equipment (at rates fixed by ministerial decree) is deductible. The depreciation method to be used is the straight-line method. If a depreciation rate that is higher than the low rate is adopted, the Ministry of Finance should be notified. The allowable depreciation rates are as follows:

Assets	Low rate (%)	High rate (%)
Buildings (commercial, touristic, and services)	2	5
Buildings (industrial and artisanal)	3	10
Buildings and constructions (commercial or industrial)	6	20
Freehold improvements and decorations	6	25
Technical installations and industrial equipments	8	25
Computer hardware and software	20	50
Vehicles (cars)	10	25
Vehicles (transport of goods/buses)	6	20
Sea transport	5	10
Air transport	20	25
Office equipment and furniture	8	25
Glasswares and silverwares (hotels, restaurants, etc.)	Inventory at year-end	Inventory at year-end
Gas cylinders	8	20

Lebanon

Goodwill

Under Lebanese tax rules, goodwill cannot be amortised.

Organisation and start-up expenses

Organisation and start-up expenses are amortised over three to five years for tax purposes.

Interest expenses

Interest on business loans is deductible, under certain conditions. Interest paid on the taxpayer's capital is not deductible.

Bad debt

Bad debts are deductible if all means for collection of the debt have been exhausted.

Provisions for bad debts are deductible if a debtor has been declared bankrupt. Surplus provisions are added to profits.

Charitable contributions

Charitable contributions are deductible if made to approved charitable, social, cultural, or sporting institutions, within certain limits.

Gifts

Gifts given by the company in cash are non-deductible.

Gifts given by the company in-kind to customers when the amount of each gift exceeds LBP 1 million per person per year and when the total amount of gifts in-kind exceeds 1% of the turnover are non-deductible.

Fines and penalties

Fines and penalties are not deductible in Lebanon.

Taxes

Taxes and duties incurred in the course of business (except CIT) are deductible.

Taxes due to foreign governments on income earned in Lebanon are non-deductible.

Exceptional taxes and fines are non-deductible.

Other significant items

Other deductible expenses include:

- Cost of goods sold.
- Cost of services rendered.
- Rent of business premises or, if the premises are owned by the taxpayer, their depreciation.
- Salaries, wages, and other employee benefits, including end-of-service indemnities.
- General business expenses, including insurance premiums.
- Reserves for severance payments, pensions, and disability payments. Surplus provisions are added to profits.
- Advertising and publicity expenses, within certain limits.
- Travel, telephone, and vehicle expenses, within certain limits.
- Entertainment expenses that are properly supported.
- Board remuneration against services performed.
- Accrued expenses as long as their occurrence is certain.

- Employees' life insurance premiums are deductible as long as they are included in the employees' benefits subject to payroll tax.

Other non-deductible expenses include:

- With the exception of normal maintenance expenses, costs that increase the value of the property, plant, or equipment (such costs should be capitalised and depreciated in accordance with the fiscal depreciation rates).
- Losses or share-in-costs resulting from enterprises, offices, and branches situated outside Lebanon.
- Representation allowances in excess of 10% of an employee's basic salary, as well as unjustifiable and unreasonable salaries.
- Personal expenses, such as payments deducted by an employer or partner for the management of the business and for certain business expenses incurred by the employer or partner.
- Appropriations made to board members that do not comprise remuneration for work done.
- Provisions, other than those specifically allowed by law. Examples of non-deductible provisions include provisions for bad debts, provisions for slow moving items, and provisions for bonuses, contingencies, and charges.

Net operating and capital losses

Tax losses may be carried forward for up to three years after the year in which they were originally incurred. The carryback of losses is not available.

Capital losses may be used to offset taxable profits of the current year but may not be carried forward.

Payments to foreign affiliates

Payments to foreign affiliates are generally subject to WHT.

Based on guidance issued by the Ministry of Finance, recharges from the head office located abroad (including advertising) are deductible up to a certain limit, calculated as follows:

$(\text{Assets of the branch in Lebanon/Consolidated assets}) \times \text{Central administrative expenses.}$

However, a ceiling of 3% of the branch's revenues is applied.

Group taxation

There is no group taxation in Lebanon.

Transfer pricing

In Lebanon, there are no clear and detailed transfer pricing or general anti-avoidance rules. However, even in the absence of clear transfer pricing rules, exchanges or transactions made between related parties should be done on an arm's-length basis.

The tax administration has the right to reassess related party transactions and adjust their value in order to reflect the taxable amount related to the period under study.

Lebanon

Thin capitalisation

In Lebanon, there are no clear or detailed thin capitalisation rules.

Tax credits and incentives

Holding companies

Lebanese holding companies are exempt from CIT and from WHT on dividends. However, they are subject to a tax on their paid-up capital and reserves. In any given tax year, total tax payments on paid-up capital and reserves are capped at LBP 5 million.

Interest, management fees, and royalties received by holding companies from abroad are exempt from CIT.

Holding companies are subject to a 10% tax on interest received from loans shorter than three years extended to companies operating in Lebanon. Management fees received by the holding company from companies operating in Lebanon are subject to a 5% tax. Capital gains on financial assets in Lebanese companies held for less than two years are subject to a 10% tax. Royalties received from Lebanese companies for patents and the like are taxed at a rate of 10%.

Offshore companies

Offshore companies are exempt from CIT and from the WHT on dividends, and are instead subject to a lump-sum annual tax of LBP 1 million. Contracts related to offshore activities outside Lebanon are exempt from Lebanese stamp duty.

Offshore companies are required to be registered as SAL companies and, with a few exceptions, are subject to the same regulations as a SAL company. The business objectives of an offshore company are limited.

Permanent exemptions from CIT

Companies and organisations that are granted an indefinite exemption from CIT include the following:

- Educational institutions.
- Hospitals, orphanages, asylums, and other shelters that admit patients free of charge.
- Shipping, sea, and air transport associations (subject to certain restrictions).
- Farmers, provided they do not display farm produce and cattle outlets or sell products and meat after conversion tax.
- Syndicates and other types of professional associations.
- Miscellaneous non-profit organisations and co-operatives.
- Holding companies and offshore companies.
- Public sector bodies that do not compete with private institutions.

Reinvestment incentives

Industrial companies using operating profit to finance certain capital investments are exempt from up to 50% of their CIT liabilities for a period of up to four years, provided that such exemptions do not exceed the original investments made. In areas designated 'development zones', 75% of a company's tax liabilities may be exempt.

In order to take advantage of this regulation, investments should consist of capital expenditures designed to increase a company's manufacturing capacity or of investments in housing facilities for the company's staff and other employees.

Withholding taxes

WHT on interest

The income, revenues, and interest earned from accounts opened at Lebanese banks and from treasury bonds are subject to a 5% WHT that is non-refundable and cannot be carried forward. This WHT is considered as an advance payment on the current CIT due to the extent of that amount and acts as a minimum tax in situations where the tax due is lower than the tax on interest paid.

Non-resident WHT

Revenues earned by non-residents in Lebanon are subject to an effective WHT of 2.25% on revenue from the sale of materials and equipment, and 7.5% on the revenue in the case of sale of services.

Movable capital WHT

A 10% WHT is levied on income derived from movable capital generated in Lebanon. Taxable income is comprised of the following:

- Distributed dividends, interest, and income from shares.
- Directors' and shareholders' fees.
- Distribution of reserves or profits.
- Interest from loans to corporations.

WHT on dividends

Tax is withheld from dividends paid to shareholders/partners at a rate of 10%. The dividend distribution tax rate may be reduced to 5% under specific conditions.

DTTs provide the following WHT benefits. Note that treaty rates do not override lower non-treaty rates. Treaty members may take advantage of the non-treaty rates.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	10	10	7.5
Treaty:			
Algeria	15	10	10
Armenia	5/10 (1)	8	5

Notes

1. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the equity capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
2. Dividends, interest, or royalties arising in a Contracting State and paid to a resident of the other Contracting State shall be taxable only in that other State.
3. Shall not exceed:
 - 5% of the gross amount of royalties paid for the use of, or the right to use, any industrial, commercial or scientific equipment.
 - 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic or scientific work, including cinematograph films and films or tapes for radio or television broadcasting any software, patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience.
4. Where the dividends are paid by a company which is:
 - A resident of Lebanon to a resident of Malta who is the beneficial owner thereof, the Lebanese tax so charged shall not exceed 5% of the gross amount of the dividends.
 - A resident of Malta to a resident of Lebanon who is the beneficial owner thereof, the Malta tax on the gross amount of the dividends shall not exceed that chargeable on the profits out of which the dividends are paid.
5. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the equity capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
6. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the equity capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
7. Shall not exceed:
 - 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic or scientific work, including cinematograph films and films or tapes for radio or television broadcasting.
 - 5% of the gross amount of royalties paid in other cases.
8. Shall not exceed:
 - 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 15% of the equity capital of the company paying the dividends.
 - 15% of the gross amount of the dividends in all other cases.
9. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the equity capital of the company paying the dividends.
 - 15% of the gross amount of the dividends in all other cases.
10. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company which has owned at least 10% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.

- 15% of the gross amount of the dividends in all other cases.

Tax administration

Taxable period

Lebanon's fiscal year runs from January to December and is based on the Gregorian calendar. With the special permission of the local tax authorities, companies may, however, use their own accounting year.

Tax returns

Taxes on business income in any given year are based on the profits of the previous financial year.

Tax returns by artificial persons (entities) must be filed by 31 March of the year following the year of income. Tax returns by capital companies must be filed by 31 May of the year following the year of income.

Submission deadlines of annual declarations for institutions that are exempt from income tax (other than companies) are as follows:

- Before 1 February for institutions adopting the cash basis accounting.
- Before 1 April for institutions adopting the accrual basis accounting and for representative offices that represent non-corporate entities.
- Before 1 June for representative offices that represent corporations.

If taxpayers fail to submit a tax return, realisation penalties will be due.

Payment of tax

The same deadlines for tax returns apply for tax payments.

If taxpayers fail to make payment, late payment penalties will be due.

Audit cycle

The most common ways for the tax authorities to select companies for tax audits are the size of the company, the type of business, and certain risk assessment measures.

Tax audits typically cover a single type of tax.

In a typical situation, a tax audit is likely to take less than one year from first information request to substantive resolution.

Statute of limitations

The tax administration has four years to collect its rights. The period is calculated from the end of year that follows the current business year.

The taxable person may request the refund of excess tax within four years starting from the end of the year where the refund right was created.

The tax administration can exceed the statute of limitations in cases where a profit or revenue has been proven by a court order, arbitration, or inheritance clearance. The extension is limited till the end of the calendar year following the end of the year in which the tax administration was notified of such event.

Lebanon

Under the statute of limitations, a company should keep its accounting books and documentation for ten years.

Topics of focus for tax authorities

Lately, several topics have been of interest to the tax authorities in Lebanon, including transfer pricing, payments of royalties, and management fees to non-resident parties, provisions, and employee compensation.

Other issues

Foreign ownership of real estate restrictions

- Up to 3,000 square metres does not require Council of Ministers approval.
- Exploitation and normal lease right extending for a period of more than ten years cannot be attained without obtaining approval.
- Real estate owned by foreigners, for which approval has been obtained, cannot exceed, over all of the Lebanese territory, 3% of the total area of Lebanon. In each province, the total area owned should not exceed 3% of its area. With respect to Beirut, the total area owned should not exceed 10% of its area.
- The approval is nullified if not acted upon during a period of one year.
- When approval is granted, the building on the real estate should be constructed within a period of five years (renewable once by the Council of Ministers).

Choice of business entity

Lebanon's commercial law provides for a range of business entities available to both local and foreign investors. These consist of the following:

- Sole proprietorships.
- General partnerships.
- Limited partnerships.
- Joint-stock companies (SAL).
- Limited liability companies (SARL).
- Holding companies.
- Offshore companies.
- Representative offices.

Legal structures commonly used by foreigners in conducting business in Lebanon are SALs, SARLs, and branch offices.

Joint-stock companies (Société anonyme libanaise or SAL)

Lebanese joint-stock companies are permitted to engage in all kinds of business activity. Shareholders of a SAL have no liability beyond their actual capital subscriptions.

With a small number of exceptions (such as real estate companies and banks), there are no limits on the amount of capital that can be held by foreign investors.

The management of a SAL is entrusted to a board of directors with a minimum of three and a maximum of 12 members. The majority of board members must be Lebanese, but the chairman may be a foreign national.

- Certain types of businesses such as banks and insurance companies are required to incorporate as joint-stock corporations. Minimum capital: LBP 30 million.
- Taxation: the applicable CIT rate is 15% in addition to a WHT on dividends of 10%, reduced to 5% in certain cases, mainly if the shares are listed.

Limited liability companies (Société à responsabilité limitée or SARL)

Members of a limited liability company are partners, and the company's capital is divided into parts rather than shares. Partners are liable only to the extent of their parts, and individual partners' claims on the company's capital are fixed in the partnership deed.

All partners may be foreigners, with the exception of companies seeking to engage in commercial representation.

Limited liability companies may not be active in certain sectors of the economy, such as in insurance, banking, fund management, or air transportation.

The transfer of parts in a limited liability company is subject to the consent of partners representing at least three-quarters of the capital. Existing partners enjoy priority in the purchase of parts offered for transfer.

- A limited liability company is managed by one or several directors (managers) who may or may not be selected from among the partners. Minimum capital: LBP 5 million.
- Taxation: the applicable CIT rate is 15% in addition to a WHT on dividends of 10%.

Intellectual property

The law in Lebanon does not contain a clear definition of author's rights. It protects all products of the human intellect whether written, pictorial, sculptural, scriptural, or oral regardless of its value, importance, destination, or form of expression.

The law provides patent protection for inventions and plant varieties and a sui generis protection for layout designs of integrated circuits. Furthermore, the law provides protection for undisclosed information. According to an assessment conducted by the World Intellectual Property Organization (WIPO) in July 2002, the Patent law is in complete conformity with the WTO's Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS). It was also pointed out that the provisions of the Plant Varieties exceed the minimum requirements of the TRIPS Agreement.

The law does not explicitly protect notorious trademarks and geographical indications. However, those are provided protection via Lebanon's membership to the Paris Convention. Moreover, geographical indications are provided protection under the provisions of the new Law on Customs, the Law on Fraud Control, and the Criminal Law.

The copyright protection originally available to literary and artistic works is now extended to computer software, video films, and all kind of audio-visual works. The law provides stiffer penalties for offenders and better compensation to the persons whose rights have been infringed. The manner in which the copyright is breached has also been extended.

Significant developments

There have been no significant corporate tax developments in Libya during the past year. Various suggestions for tax reforms are being considered but would not be implemented until the formation of the newly elected government, later in 2012.

Taxes on corporate income

For any Libyan registered entity, income arising both in Libya and abroad (i.e. worldwide) is assessable for corporate income tax (CIT) purposes in Libya.

CIT is imposed annually on the same basis for Libyan controlled corporate entities, foreign controlled corporate entities, and branches of foreign companies.

CIT is levied on taxable profits at a flat rate of 20%.

Jehad Tax

There is a flat rate of Jehad Tax assessed at 4% on taxable corporate profits.

Jehad Tax was established by Law 44 of 1970. The purpose of the tax is to further the Muslim cause, in a peaceful manner, throughout the world.

Local income taxes

Libya has no provincial income tax laws.

Corporate residence

Corporate residence is not specifically dealt with under the laws of Libya. The tax authorities will seek to assess any income derived from services provided in Libya.

Permanent establishment (PE)

Double tax treaties (DTTs) being signed introduce the concept of permanent establishment. However, general law requires that any foreign entity seeking to provide services in Libya should obtain a business licence, which necessitates it registering as a legal entity. Historically, unregistered foreign entities have provided services in Libya, but this is not in line with the law and it is becoming difficult to do so.

Other taxes

Value-added tax (VAT)

There is no VAT in Libya.

Custom duties

Customs duties were abolished in 2005, except for tobacco and tobacco products.

A service fee of 5% on the value on most imports also exists. There are various exemptions to this service fee, specifically under Investment Law and within the oil sector.

Other dues and taxes on importation are estimated at 0.5%. Initially, a temporary import licence is issued for six months that can be extended to a maximum of three years. A guarantee or a deposit can be provided by the importer to the Customs Department.

Excise taxes

Libya has no excise taxes.

Property taxes

Libya has no specific property taxes.

Transfer taxes

Libya has no transfer taxes.

Stamp duty

Stamp Duty Law levies a schedule of duties and rates on various documents and transactions. The most relevant to corporate entities is Schedule 28, which prescribes the rate of duties on contracts for the provision of services or supply. The duty on main contracts is 1% and on subcontracts is 0.1%. Note that there is a duty of 0.5% on all payments to the Tax Department as well.

L

Branch income

Tax rates on branch profits are the same as on corporate profits. However, the Income Tax Law allows the Tax Department to assess income tax on branches of foreign companies as a percentage of turnover via the 'deemed profit' basis of assessment. Tax is therefore payable even where tax losses are declared.

The level of deemed profit applied to turnover varies according to the branch's type of business activity. This ranges from 10% to 15% for civil works and contracting (turnkey projects), 15% to 25% for oil service, and between 25% and 40% in the case of design/consulting engineers. A deemed profit of between 5% and 7% is also assessed on supply. The deemed profit percentage applied to any year will be higher than the profit percentage declared in the annual tax return since the deemed profit basis is applied during the course of a tax audit and is effectively a revenue generating exercise for the tax authorities. Historically, tax audits have not resulted in credits or reimbursements.

Income determination

No specific rules apply on income determination for the following categories:

- Interest income.
- Partnership income.
- Rent/royalties income.
- Foreign income.

Libya

Income Tax Law allows entities to account on an accrual basis or on a cash basis.

Inventory valuation

The Commercial Code allows inventory to be valued at the lower of cost and net realisable value.

Capital gains

Any chargeable gains on the sale of capital assets are taxed as ordinary income. For entities assessed on a deemed profit basis, capital gains should be added to the deemed taxable income.

Dividend income

Historically, dividend income has not been subject to any additional taxes.

Inter-company dividends

Libyan taxation laws do not contain any special provisions regarding inter-company dividends.

Stock dividends

Stock dividends are not specifically dealt with in Libyan taxation laws. The current practice is for dividend distributions not to be taxed.

Deductions

Taxable income is determined after deducting all expenditure and costs incurred in the realisation of the gross income (*for more details on the deemed profit basis of assessment on branches of foreign companies, see the Branch income section*).

For any entity (not a foreign branch) seeking to be assessed on an add-back basis, it should ensure, in accordance with Stamp Duty Law, that the majority of its costs can be supported by tax registered documents, i.e. declared payrolls and registered contracts and invoices.

Depreciation

Depreciation should be calculated in accordance with the Executive Regulations of the law.

Assets	Depreciation rate (%)
Buildings	
Building in which machines are fixed	3
Building without fixed machines	2
Means of transport	
Passenger	20
Cargo and freight	10
Ships	4
Fishing boats	4
Aeroplanes	8
Furniture	
Office, shop, and domestic furniture	10
Hotel, restaurant, cafes, and hospital furniture	20
Work camps outside of cities	20

Assets	Depreciation rate (%)
Food utensils and furnishings for restaurants, hotels, and the like	25
Machines	
Office machines	10
Electric generators	20
Computers and accessories	10
Software	10
Other machines	15

Goodwill

Purchased goodwill can be amortised on a straight-line basis over five years.

Organisation and start-up expenditure

Organisational and start-up expenditure can be capitalised and amortised over five years on a straight-line basis.

Interest expenses

No specific rules apply for the deduction of interest expenses.

Bad debt

Bad debts are only recognised to the extent that they have been recognised as such legally.

Charitable contributions

Donations to charities recognised by the state are permitted, up to 2% of net income.

Fines and penalties

No specific rules apply for the deduction of fines and penalties.

Taxes

No specific rules apply for the deduction of taxes.

Net operating losses

Losses may be carried forward and deducted from future profits, for up to five years. The Income Tax Law has no provision for the carryback of losses.

Payments to foreign affiliates

No specific rules apply for the deduction of payments to foreign affiliates.

Group taxation

There is no recognition of a group for taxation purposes.

Transfer pricing

No transfer pricing rules exist in the general law.

Thin capitalisation

No thin capitalisation rules exist in the general law.

Libya

Tax credits and incentives

Foreign tax credit

Under general tax law, no provision exists for allowing the deduction of foreign tax credits.

CIT exemption

Exemptions to CIT exist, most notably, under the Investment Law. General projects registered under the Investment Law are permitted a five-year CIT holiday with a possibility to extend for a further three years.

Exemptions also exist for strategic infrastructure projects. Such exemptions must be awarded by the General People's Committee (GPC), which is the legislative body, either by ratifying the relevant contract, which includes a tax exemption clause, or by the issuance of a separate law.

Customs and stamp duties exemption

Investment law also provides exemptions for customs duties and stamp duty. The exemptions that exist are bestowed on subcontractors to the relevant projects.

Petroleum Law provides exemption to customs duties on oilfield specific equipment and materials, which is also provided to oil service companies.

Withholding taxes

Libyan law has no withholding taxes (WHTs). Generally, for unregistered foreign entities seeking to register a contract with the tax authorities, CIT will be assessed (and must be settled) on a deemed profit basis at the time of registration. It may be possible to negotiate a WHT in preference to the aforementioned general procedure for a significant contract where there is greater uncertainty as to the estimated contract value.

Tax administration

Taxable period

The tax year is generally a calendar year, although assessments can be made on the basis of a company's own year-end, provided permission is granted in advance from the Tax Department, and the company then adheres consistently to the same date.

Tax returns

All corporate entities must make an annual filing within four months of its year-end or within one month of its audit report, whichever is earlier.

Payment of tax

CIT is payable on a quarterly basis (10 March, 10 June, 10 September, and 10 December) normally commencing the first quarter date after an assessment has been issued.

Tax audit cycle

Tax audits typically occur every three or four years.

Statute of limitations

The statute of limitations for CIT purposes is seven years.

Late payment penalties

A late payment penalty is assessed on the tax due at the rate of 1% to a maximum of 12%. In addition, the remaining quarterly payments are due immediately for failing to make an instalment on time.

The law also imposes the following penalties:

- A fine of not less than three times the amount of unpaid tax due shall be applied to any person who fails to pay tax by the due date.
- Without prejudice to any harsher penalty, a fine of not less than four times the amount of tax due and unpaid will be applied to any person who, with intent to evade all or part of the tax, commits any of the following acts or abets, agrees, or aids a person who commits such an act:
 - The making of false statements in declarations submitted under this law.
 - The preparation of false accounts, books and records, reports, or budgets.
 - The use of fraudulent means to conceal or attempt to conceal taxable amounts due under this law.

Topics of focus for tax authorities

Various reforms are being considered, including the abolition of Jihad Tax; however, until a newly elected government is in place, such discussions are without substance.

L

Other issues**Statutory Books**

Business entities operating in Libya are required by Libyan Law to maintain a General Ledger and a General Journal (i.e. the Statutory Books).

Before use, these must be stamped as registered with the Revenue Authorities and the Commercial Court. It should be noted that a Ledger or Journal will not be registered if it already contains accounting entries (i.e. one cannot register existing books of account).

Similarly, transactions pre-dating the date the books are registered will be disallowed. In theory, transactions should be entered daily, but in practice, most companies write up their statutory records on the basis of monthly transactions summaries.

The Tax Inspector will always request production of the Statutory Books at the commencement of a tax audit. If these are not available, a perfunctory audit of the English (or other language) books of account will be made, and it is likely that there will be a punitive increase in taxable income as a consequence.

The new Commercial Code allows approved computer based ledgers to be used instead of the traditional manual ledgers.

Significant developments

Three new tax information exchange agreements (TIEAs), with Finland, Norway, and Iceland, recently entered into force. Liechtenstein is in negotiations for new TIEAs with Canada, China, Japan, Mexico, and South Africa.

Additionally, the double tax treaty (DTT) with Germany was signed in November 2011 and is now in parliament for ratification.

Taxes on corporate income

In principle, all corporations, foundations, and establishments are subject to a profit tax at a flat rate of 12.5%. Resident companies are subject to unlimited tax liability on worldwide income. Non-resident companies are subject to limited tax liability for income from properties or branches within Liechtenstein.

Minimum tax

All legal entities are subject to an annual minimum tax of 1,200 Swiss francs (CHF). This tax can be fully credited to the profit tax.

The full tax amount is due even if the corporation is not resident in Liechtenstein for the whole tax period.

Corporate residence

A company is considered to be resident in Liechtenstein if its registered seat (address) or place of effective management is within Liechtenstein.

Companies that have neither a domicile nor effective place of management in Liechtenstein, as well as special asset dedications without legal personality, are subject to limited tax liability for the following income:

- Corporate income from the cultivation of domestic real estate used for agriculture and forestry.
- Rental and lease income from real estate situated within Liechtenstein.
- Taxable net corporate income of permanent establishments (PEs) situated in Liechtenstein.

Permanent establishment (PE)

Please note that Liechtenstein has only a few DTTs (*see the Withholding taxes section*). However, Liechtenstein is in the process of negotiating various new DTTs and has

included PE definitions according to the Organisation for Economic Co-operation and Development (OECD) model treaty.

Other taxes

Value-added tax (VAT)

Liechtenstein has adopted the VAT law of Switzerland, having its own administration in Vaduz.

The general VAT rate is 8%. A reduced rate of 2.5% is applicable to deliveries of food, drugs, newspapers, magazines, and books. Furthermore, lodging/accommodation is taxed at a reduced rate of 3.8%. Note that various services are VAT-exempt (e.g. health, social security, education, banking, insurance).

Any person who, irrespective of legal form, carries on a business is liable for VAT. Any person liable for VAT that is involved in domestic entrepreneurial activity with a taxable turnover that is less than CHF 100,000 within a financial year can be exempted from taxation. Special regulations apply for non-profit institutions as well as for non-profit sport or cultures clubs. Reverse charge is applicable for services and certain deliveries from an entity domiciled abroad.

Customs duties/import tariffs

According to the customs union treaty of 1923 between Liechtenstein and Switzerland, Switzerland customs duties and import tariffs are applicable for Liechtenstein as well. The tariffs and duties depend on various specific attributes of the products and are listed on comprehensive tariffs and duties lists. Therefore, the specific tariffs and duties must be checked for every case individually.

Excise taxes

Several excise taxes apply in Liechtenstein (e.g. petroleum tax, tobacco tax, car tax, CO₂ tax, beer tax, salt tax, taxation of distilled spirits).

Property taxes

No property taxes are applicable in Liechtenstein.

Stamp duty

According to the customs union treaty of 1923 between Switzerland and Liechtenstein, the Swiss stamp duty tax law of 27 June 1927 is applicable in Liechtenstein. The stamp duty law includes the stamp duty tax and the security transfer tax.

Stamp duty tax

Upon the formation of legal entities whose capital is divided into shares (e.g. company limited by shares, limited liability company, establishment with capital divided into shares) the stamp duty amounts to 1% of the nominal value or the higher amount effectively paid (above par). The first CHF 1 million is tax exempt.

The same duty also becomes due when the capital is increased or when the shareholders make contributions without increasing the capital. Stamp duty is also due on bonds (0.6 per million to 1.2 per million) and money market certificates (0.6 per million).

Various exemptions should also be considered.

Liechtenstein

Security transfer tax

Security transfer tax is due on all transactions of qualifying securities, if a security dealer is involved. The tax amounts to 0.15% for domestic securities (Switzerland and Liechtenstein) and 0.3% for foreign securities.

In particular, banks and financial intermediaries are liable for settlement. Furthermore, legal entities with qualifying securities with a book value of more than CHF 10 million also qualify as security dealers.

Formation tax (*Gründungsabgabe*)

Unless Swiss stamp duty law applies, a formation tax in the amount of 1% of the statutory nominal capital is levied upon the formation or relocation of legal companies in Liechtenstein (e.g. foundations) as well as for capital increases.

The general tax rate of 1% is reduced to 0.5% for amounts greater than CHF 5 million and to 0.3% for amounts greater than CHF 10 million. The first CHF 1 million is tax exempt.

Foundations are subject to the formation tax at a tax rate of 0.2%.

Real estate profit tax

Capital gains from the sale of real estate, or equivalent actions with the same result, are subject to a separately assessed real estate profit tax. The taxable gain is generally the difference between proceeds of the sale and the original purchase price of the property plus any capital expenditure incurred. The basic tax rate is between approximately 2% and 14%, depending on the amount of taxable real estate gain. The transfer of the economic ownership of real estate (e.g. via the sale of the majority of the shares in a real estate company) triggers real estate tax as well.

Capital tax

As of 1 January 2011, annual capital tax has been abolished.

Tax on insurance premiums

Liechtenstein levies a tax on certain insurance premiums. The tax rate amounts to 5% of the cash premium (for life insurance 2.5%). Cash premiums in foreign currency have to be converted to Swiss francs at the time the tax claims arise.

Various exemptions should also be considered.

Branch income

The same principles applicable to corporations also apply for branch income, provided that transactions with the head office or other branches are at arm's length. Liechtenstein taxation is imposed on the profit attributable to branch and on the capital invested in the branch. The minimum tax of CHF 1,200 is also applicable.

There is no withholding tax (WHT) on profit transfer to the head office.

Income determination

The corporate profit tax is determined according to the taxable corporate net income, which is based on the financial statement under consideration of the following provisions.

Inventory valuation

Inventories must be stated at the lower of cost or market. Cost is generally determined by the first in first out (FIFO) or by the average cost method. The tax authorities permit a general reserve against stock contingencies of up to one-third of the inventory cost or market value at the balance sheet date without inquiry into its justification, provided a detailed record of inventory is available for review by the tax authorities. The need for a reserve in excess of this amount (e.g. for obsolescence, slow-moving-stocks) must be substantiated to the satisfaction of the tax authorities.

Capital gains

Capital gains derived from the sale of shares are tax-exempt. Capital gains from the sale of real estate are subject to a separately assessed real estate profit tax (*see the Other taxes section for more information*).

Dividend income

Dividend income and liquidation proceeds are tax-exempt.

Interest income

Interest income is taxable and must be at arm's length if it is in respect to related parties (*for safe harbour rates, see Interest expenses in the Deductions section*).

Foreign income

Resident corporations operating locally are generally taxed on their worldwide income. However, income from foreign real estate and PEs situated abroad is exempt from taxation in Liechtenstein.

Deductions

Depreciation and amortisation

Depreciation of tangible fixed assets and amortisation of intangible assets is allowed if it is 'commercially justified'. For tax purposes, either the straight-line (depreciation based on the acquisition value) or the declining-balance method (depreciation based on the book value) may be used. Depreciation and amortisation not recorded in statutory accounts are not deductible for tax purposes.

A special (higher) rate of depreciation may be allowed for assets used only for short periods or for assets for which a rapid decrease in value can be proved.

The depreciation/amortisation rate per annum of various property types are provided below. Note that these depreciation rates relate to write-downs on the book value. If the write-down is performed on the acquisition value, then the rates enumerated below should be reduced by half.

Liechtenstein

Property type	Rate per annum (%)
Immovable assets:	
Real estate (dwelling houses, offices, shops, restaurant and hotel buildings, industrial buildings, factories, warehouses, and parking spaces)	5
Movable assets:	
Mobile structures, technical installations (air conditioning plant, gas and electricity mains for industrial purposes), elevators, investments in foreign real estate, high rack warehouses, and airplanes	15
Office furniture and machines, workshop, and storeroom equipment	20
Furniture used for the hotel and restaurant trade	25
Machines and accessories for production purposes, vending machines, telephone installations, and operating applications	30
Machinery used in more than one shift or used under heavy conditions, motor vehicles	35
Information technology (hardware and software), office furniture and machines, workshop and storeroom equipment, hotel and restaurant cookery, cutlery, and linen	50
Officially approved installations and equipment against water pollution, energy-saving equipment, and installations using solar energy	50
Intangible assets:	
Goodwill, patent, licence, and other rights of use	40

Start-up expenses

Please see *Formation tax (Gründungsabgabe)* in the *Other taxes* section.

In general, the expenses for a start-up are tax deductible as long as they are economically justified.

Interest expenses

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliates or shareholder) has to reflect the fair market rate and has to be at arm's length.

With respect to related parties, the tax administration of Liechtenstein annually issues safe harbour interest rates to be used on loans denominated in Swiss francs on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates are at arm's length and more appropriate in the present case.

Safe harbour rates 2012

Loans in Swiss francs	Minimum interest rate (%)
For loans made to related parties	
Financed from equity and no interest-bearing debt capital	2.0
Financed from debt capital	
Cost price	+ 0.5
At least	2.0
	Maximum interest rate (%)
For loans received from related parties	2.0
Loans in euros (EUR) or United States dollars (USD)	
For loans received from related parties	3.5

Equity interest deduction

The equity interest deduction is a standardised deduction for interest on equity based on the multiplication of the 'modified' equity by the interest rate (according to the annual finance law). For 2012, the equity interest rate is 4%.

To determine the modified equity, the following terms have to be considered:

- Paid-in capital and open reserves plus taxed hidden reserves:
 - Deduction of own shares.
 - Deduction of participations/shares.
 - Deduction of foreign real estate.
 - Deduction of assets belonging to foreign PEs.
 - Deduction of non-operating related assets.
- Equity increases and decreases, based on the capital at the beginning of the business year.

	Example 1	Example 2	Example 3	Example 4	Example 5	Example 6
Modified equity	1,000,000	500,000	500,000	1,000,000	1,000,000	1,000,000
Loans	0	500,000	500,000	0	0	0
Profit	100,000	100,000	200,000	1,000,000,000	30,000	60,000
Interest on loans (4%)	0	(20,000)	(20,000)	0	0	0
Profit	100,000	80,000	180,000	1,000,000,000	30,000	60,000
Interest on equity (4%)	(40,000)	(20,000)	(20,000)	(40,000)	(40,000)	(40,000)
Taxable profit	60,000	60,000	160,000	999,960,000	(10,000)	20,000
Profit tax rate	12.50%	12.50%	12.50%	12.50%	12.50%	12.50%
Tax burden	7,500	7,500	20,000	124,995,000	0	2,500
Effective tax rate	7.50%	9.38%	11.11%	12.50%	0.00%	4.17%

Provisions

Bad debt provision

It is admissible to set up an accounting provision for specific impaired debt; additionally, it is possible to account for a general bad debt provision of up to 10% on receivables from Liechtenstein and Switzerland and up to 15% on receivables from any other country, if no specific provision has been accounted for on the corresponding debt. These provisions are not accepted regarding receivables to corporations and institutions under public law, banks, or for intercompany receivables.

Inventory provision

See *Inventory valuation in the Income determination section for a description of the inventory provision regime.*

Provisions on financial investments

Provisions on financial investments are possible but must be proved by established corporate evaluation method or other suitable documents.

Liechtenstein

Other provisions

Provisions at the expense of the profit and loss statement are admissible for obligations during the business year whose amount is not yet determined or for other immediately imminent losses during the business year.

Charitable contributions

Charitable contributions to legal persons and special asset dedications with domicile in Liechtenstein, in another country member of the European Economic Area (EEA), or in Switzerland, which are exempt from tax liability in light of exclusively and irrevocably common-benefit purposes, are deductible, up to the amount of 10% of the taxable corporate net income.

Deduction for income from intellectual property (IP)

A deduction of 80% is allowed on the net IP income that was created or acquired after 1 January 2011. IP, in the sense of the tax law, consists of patents, trademarks, models, and utility models. According to a recent court decision, however, it is not clear at the moment which IP qualifies for the IP-deduction.

This tax rule was approved by the European Free Trade Association (EFTA) Supervising Authority on 1 June 2011.

Fines and penalties

Fines and penalties are generally not tax deductible.

Taxes

Taxes are not deductible in Liechtenstein.

Net operating losses

A loss can be carried forward and offset against the profits for future years. There is no limitation of loss carryforwards as well as loss offsetting. Losses cannot be carried back.

Payments to foreign affiliates

Interest, royalties and licences, and other fees to foreign affiliates are allowed as deductions to the extent that they meet the arm's-length test (i.e. equivalent to charges that would be made by an unrelated third party).

For interest payments between affiliated companies or between shareholders and companies, Liechtenstein tax authorities publish safe harbour rules annually (i.e. generally accepted interest).

Group taxation

Resident and non-resident corporations have the possibility to opt for group taxation if they meet the legal requirements (such as more than 50% of capital and 50% of voting rights). The ultimate group leader must either be a corporation domiciled in Liechtenstein or with the effective place of management in Liechtenstein.

In order to form multi-level group structures, sub-groups may also be built. The same rules are applicable for the group leader of the sup-group as for the primary group leader.

The group leader can decide, for each company that fulfils the conditions, which company will be included in the group or not.

Losses of group members can be offset against profits of the (sub) group leader within the same year. The offsetting is only possible under the following conditions:

- Only losses incurred after the option for group taxation can be considered.
- Losses need to be calculated according to Liechtenstein profit calculation rules.

The losses are allocated to the (sub) group leader according to the direct participation quota of the (sub) group leader to the group member whose losses should be offset. If the losses cannot be used at the level of the (sub) group leader, they can be allocated to other group members. However, the minimum tax is applicable for each group member.

Losses that have been attributed to the (sub) group leader must be adjusted in the following cases:

- Losses can be offset against profits on the level of the group member.
- Exit of group member from the group.
- Reduction of participation quota of a group member.
- Depreciation is made on a participation due to losses.

The (sub) group leader must provide evidence annually that no adjustment needs to be made.

Transfer pricing

Liechtenstein does not have specific transfer pricing rules apart from the rule that intra-group transactions are carried out at arm's-length terms.

Thin capitalisation

Liechtenstein does not have thin capitalisation rules.

Tax credits and incentives

As of 1 January 2011, tax privileges for certain legal structures, such as domiciliary and holding companies, have been abolished. Companies that benefited from such privileges will continue to be taxed accordingly through 2013, unless they opt for the ordinary taxation scheme. These companies also have to pay the minimum tax of CHF 1,200 annually.

The following tax incentives are applicable as of 1 January 2011:

- Profit tax exemption for corporations that have an irrevocable charitable, cultural, or ideal purpose without commercial activity.
- Profit tax exemption of dividend income and capital gains on shares/participations (especially interesting for holding companies).
- Notional interest deduction on equity.
- Private vehicle solution (PVS).

Private vehicle solution (Privatvermögensstrukturen or PVS)

Liechtenstein offers tax privileges for PVSs. A PVS has no economic activity. The purpose of a PVS is to acquire, hold, administrate, and sell financial instruments according to the assets management law as well as cash and bank accounts. Participations may only be held if it can be proved that the shareholders or beneficiaries have no influence on the administration of this company.

Liechtenstein

The articles of the PVS must contain a clause that the regulations for PVS are applicable. Exemptions of this rule are applicable for legal entities that existed before the introduction of the new tax law as of 1 January 2011.

The investors of a PVS must be individuals who administrate their own assets or structures acting in the interest of individuals.

The company or the audit company needs to confirm, upon formation or after major changes, that the conditions for the PVS structure are fulfilled. This is supervised by the tax authority or a neutral certified accountant.

A PVS only pays the minimum tax of CHF 1,200 annually.

This tax scheme was qualified as in conformity with the provisions on state aid set out in Article 61 of the Agreement on the European Economic Area by the EFTA Surveillance Authority (ESA).

Avoidance of double taxation

Foreign taxes shall be allowable against domestic taxes (credit method) under circumstances where (i) the income is derived or wealth is owned in a country that has concluded an agreement for the avoidance of double taxation with Liechtenstein and such agreement provides for a tax credit or (ii) reciprocity is granted. Income or wealth shall be exempted from taxation in Liechtenstein (exemption method) if the agreement for the avoidance of double taxation provides tax exemption or if reciprocity is granted.

Withholding taxes

Coupon (withholding) tax

Until the end of 2010, Liechtenstein had a coupon tax of 4% on dividend payments and certain interest payments. The coupon tax was abolished as of the beginning of 2011. This means that no coupon tax is due on new reserves incurred after the end of 2010 or on interest payments. However, the coupon tax still applies with regard to old reserves (reserves existing on 1 January 2011). The tax base for calculation of the coupon tax on old reserves is the taxable capital dated 31 December 2010 (i.e. equity according to commercial balance sheet, adjusted with taxed hidden reserves). With regards to future distributions, old reserves have priority.

Transitional rule

Distributions of old reserves in 2011 and 2012 will be taxed at a reduced rate of 2%. Companies can either distribute during this time frame or opt for the taxation of the old reserves without effective distribution.

Distributions of old reserves as of 2013 are taxed at the ordinary rate of 4%.

The transitional rule is not applicable for liquidations of ordinary taxed companies terminated before 30 June 2011.

Tax treaties

Currently, a comprehensive DTT on income is in effect with Austria, Hong Kong, Luxembourg, and San Marino, as well as a limited one with Switzerland.

The DDT with Germany was signed in November 2011 and is now in parliament for ratification.

Recently Liechtenstein initiated DTTs with Uruguay. Furthermore, various TIEAs have been concluded.

The governments of Liechtenstein and the United Kingdom (UK) signed a Memorandum of Understanding (MOU) relating to cooperation in tax matters, which includes the Liechtenstein disclosures facility (LDF). According to these regulations, financial intermediaries in Liechtenstein are required to show that their UK customers have been declaring their Liechtenstein investments to Her Majesty's Revenue and Customs (HMRC). Disclosure can be made between 1 September 2009 and 31 March 2015 and benefiting from favourable rules. In certain circumstances, even accounts or assets outside of Liechtenstein can be transferred in order to take advantage of the terms of the LDF.

Tax administration

Taxable period

The tax year corresponds with the business year. Therefore, the applicable accounting period, which may end at any date within the calendar year, is the basis for corporate taxation.

Tax returns

Corporations resident in Liechtenstein or with PEs in Liechtenstein must file a tax return by 1 July of the calendar year following the fiscal year-end.

Due to a substantiated written request, the tax authority may extend the submission deadline by six months. The request must be made, at the latest, 30 days after the general due date (31 August). A deadline extension requires the payment of the provisional invoice. In especially justified cases, the submission deadline may be extended once again. Such a request must be made before expiry of the first deadline extension.

The tax assessment issued by the tax administration is based on the company's tax return, including the attachments and the financial statements filed.

Payment of tax

Companies must pay tax within 30 days of receipt of the assessment. The defaults charge rate is 5%.

Statute of limitations

The limitation of the right to assess a tax is five years, starting after the end of the tax year in terms of periodic tax and after the end of the year in which the taxable incidence had taken place in terms of non-periodic tax.

Other issues

Restructurings

Restructurings (e.g. change of corporate form, merger, spin-off) can be carried out tax neutrally, if certain conditions are met.

All reorganisations have in common that they can only be carried out tax neutrally if they are performed at tax book value and if the assets remain taxable within Liechtenstein. Furthermore, specific/additional conditions must be met for each kind of restructuring

Significant developments

The following recent amendments have been introduced into the Lithuanian tax legislation:

- Advanced pricing agreements (APAs) and binding rulings were introduced as of 1 January 2012.
- 0% withholding tax (WHT) on royalties paid to related parties meeting requirements of the European Commission (EC) Interest and Royalty Directive from 1 July 2011.
- As of 1 January 2012, the threshold of income for small companies (having not more than ten employees) that may apply the reduced corporate income tax (CIT) rate of 5% was increased to 1 million Lithuanian litas (LTL) (approximately 290,000 euros [EUR]). Previously, the threshold was LTL 500,000 (approximately EUR 145,000).

Taxes on corporate income

The standard CIT rate is 15%. However, small companies and agricultural companies can apply a reduced CIT rate of 5%, if certain conditions are met.

Generally, CIT is applied on taxable income received by a Lithuanian tax resident from its local and worldwide activities. Taxable income is calculated by reducing general income of a certain tax period with deductible expenses and non-taxable income.

Income of a tax resident company is not subject to taxation in Lithuania if it was received from activities through a permanent establishment (PE) in a foreign country which is in the European Economic Area (EEA) or which has a double tax treaty (DTT) with Lithuania and if the income was subject to taxation there.

Furthermore, CIT may be reduced or even not applied if foreign-sourced income received not through a PE is taxed with a WHT in a foreign country and this country has a DTT with Lithuania.

Non-resident companies are generally taxed on Lithuania-sourced income received through a local PE and reduced by deductible expenses or on income subject to WHT in Lithuania.

Reduced CIT rate for small companies

Entities with fewer than ten employees and less than LTL 1 million (approximately EUR 290,000) in gross annual revenues can benefit from a reduced CIT rate of 5%.

CIT regime for certain maritime activities

The rate of CIT on certain maritime activities is 15%, with the base set by reference to the functional capacity of the ship. This fixed CIT may be applied to maritime entities that fulfill certain conditions indicated in the law. An election must be made to the tax authorities to apply this regime.

Local income taxes

There is no local or municipal CIT.

Corporate residence

A company is resident in Lithuania if it incorporates there or its activities create a PE for tax purposes.

Permanent establishment (PE)

According to local legislation, a foreign company is deemed to have a PE in Lithuania when:

- it permanently carries out commercial activities in Lithuania in whole or in part
- it carries out its activities through a dependent representative (agent)
- it uses a building site or construction, assembly, or equipment objects, or
- it uses equipment, including drilling installations and ships, for exploration or extraction of natural resources.

DTTs may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty take precedence.

A PE must be registered as a taxpayer with the tax authorities in the territory where its activities are carried out. Its profits are subject to CIT at the rate of 15%.

Other taxes**Value-added tax (VAT)**

The standard VAT rate is 21%.

A reduced rate of 9% applies to:

- Books and non-periodicals.
- Supply of heating of residential premises and the supply of hot water to residential premises as well as heating of cold water (applicable thru 31 December 2012).

A reduced rate of 5% applies to compensated pharmaceuticals and medical aid devices (applicable thru 31 December 2012).

The compensational rate for farmers is 6%.

In general, supplies of goods and services made by a taxable person performing its economic activity for a consideration within the territory of Lithuania, as well as imports of goods, are subject to VAT.

Lithuania

Exempt with credit (zero-rated)

Goods and services that are exempt with credit (zero-rated) include, but are not limited to, the following:

- Supply of goods exported outside of the European Union (EU).
- Goods acquired by non-EU resident passengers in Lithuania and carried out from the European Union.
- Goods and services for vessels and aircraft.
- Transportation and any directly linked ancillary services related to export of goods and any directly linked ancillary services related to the import of goods when the value of these services shall be included in the customs value of the goods.
- Transportation of imported goods carried to a VAT exemption warehouse or temporarily stored under customs' supervision, placed in a free economic zone or free warehouse, put under customs warehousing procedure, processed under customs' supervision, temporarily imported for processing without levying customs duties, temporarily imported without implicitly levying customs duties, or put under internal or external transit procedure.
- Issuance of International Road Transportation (TIR) and Admission Temporaire/ Temporary Admission (ATA) transportation documents.
- Insurance and certain financial services directly related to export of goods from the European Union.
- Supply of goods to sponsorship or charity recipients registered in Lithuania and listed in the Lithuanian law on charity and sponsorship, if the goods are exported by the recipients as sponsorship or charity to non-EU organisations which may be recipients of sponsorship or charity under the law.
- Supply of maintenance and processing services for movable property supplied to non-taxable persons established outside Lithuania that have no fixed establishment within the country, provided that the property was temporarily imported for maintenance, repair, processing, etc. in the European Union and will be carried out from the European Union after supply of these services.
- Services of disclosed agents participating in certain transactions of supply of goods or services to local taxable and non-taxable persons where zero-rated VAT is applied and transactions of supply of goods or services where the supply of goods or services is considered carried out outside the European Union.
- Supply of goods to VAT payers registered in another EU member state when these goods are carried out from Lithuania to another EU member state.
- Supply of new means of transport supplied to any person when new vehicles are carried out from Lithuania to another EU member state.
- Supply of goods subject to excise duty when they are supplied to a company not registered for VAT purposes and the goods are carried out from Lithuania to another EU member state.
- Supply of goods in certain cases related to international trade.

In order to apply zero-rated VAT on goods carried out from Lithuania, VAT payers must hold supporting documents as evidence that these goods were actually exported from the European Union or carried out from Lithuania to another EU member state.

Exempt without credit

Goods and services that are exempt without credit include, but are not limited to, the following:

- Personal or public health care services, under certain conditions.
- Supply of human organs, blood, human milk, and dental prostheses supplied by dentists or dental technicians.

- Transportation of ill, wounded, or other persons requiring medical care by special means of transport.
- Social services supplied by institutions for children and young people, nursing homes for the elderly, and/or by care or guardianship institutions for disabled or by other non-profit entities.
- Education and training services.
- Cultural and sports services rendered by non-profit entities.
- Services provided by political parties, trade unions, and other non-profit membership based legal entities to their members when these services correspond to that set out in the articles of association and are provided free-of-charge, except for membership fees.
- Services provided by religious communities, other communities, and centres to their members if these services correspond to the purposes of these communities set out in their canons, statutes, and other documents and are provided free-of-charge, except for donations.
- Postal services and directly related goods supplied by government-listed universal postal services providers, except for individually negotiated postal services.
- Radio and TV broadcasting services provided by non-profit legal entities.
- All types of insurance and re-insurance services and related services rendered by insurance and re-insurance agents.
- Financial services meeting certain requirements.
- Lotteries and gambling.
- Postage stamps and other government-listed special signs available for sale against their nominal value (this provision shall be applied only to the postage stamps which can be used as a confirmation of payment for postal services in Lithuania).
- Letting of residential premises (except for accommodation services provided by hotels, motels, camping, and other accommodation services or letting of residential premises not indicated above when the letting period does not exceed two months).
- Letting or sale of immovable property, other than residential premises (certain exceptions apply).
- Supply of goods where the VAT payer has not deducted any proportion of the VAT on purchases and/or importation thereof (certain conditions apply).

Intra-Community acquisitions (i.e. acquisitions of goods from other EU member states) are VAT-exempt provided that:

- the supply of such goods in Lithuania would be VAT-exempt or zero-rated or the import of such goods would be VAT-exempt
- the purchaser who is a foreign taxable person would be able to refund this VAT, and
- triangular transactions meet certain criteria.

Sale and contribution in kind of a business or part of a business is treated as being out of scope of VAT (under certain conditions).

Option to tax

Option to tax is applicable to:

- Lease of immovable property.
- Sale or other transfer of old immovable property (i.e. used for more than 24 months).
- Financial services meeting certain requirements.

Lithuania

Option to tax may be exercised only if the customer is a taxable person registered for VAT purposes. If a VAT payer decides to use the option to tax, it is valid for at least 24 months.

Customs duties

EU customs law is applicable in full.

EU customs law, also known as the Community Customs Code, compiles the rules, arrangements, and procedures applicable to goods traded between the European Community and non-member countries. The Community Customs Code indicates an obligation on a person to pay the amount of the import or export duties which apply to specific goods under the Community provisions in force. The application of the EU customs law means that:

- trade between Lithuania and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Lithuania.

Excise taxes

Excise duty is imposed on the following goods produced in or imported into Lithuania: ethyl alcohol and alcoholic drinks, including beer and wine; processed tobacco, including cigarettes, cigars, cigarillos, and smoking tobacco; energy-related products, including petrol, kerosene, gasoline, fuel oil, natural gas, and their substitutes and additives; coal, coke, and lignite; and electricity. The tax rate depends on the type and quantity of goods.

Land tax

Lithuanian and foreign entities are subject to land tax collected by the municipalities for the land they own in Lithuania. Roads for general use and forestland are exempt. The annual tax rate is 1.5% of the taxable value, which is determined according to the rules established by the government. The assessment and payment terms are set forth by the municipalities, which are also entitled to grant land tax incentives.

As of 1 January 2013, the following amendments will come into force:

The main amendments	Currently in force	In force from 1 January 2013
Tax rate	1.5%	0.01% to 4%, defined by municipality
Taxable value	Value identified by the Centre of Registers multiplied by certain ratios.	The average market value determined in the map of values established according to the mass valuation. The mass valuation is performed not rarer than every five years. A possibility to apply the value determined during the individual valuation if it differs from the market value by more than 20% (principles are similar to real estate tax).
Declaration	Template of a tax return is completed and sent by the tax authorities until 1 October.	Template of a tax return is completed and sent by the tax authorities until 1 November.
Payments	One annual payment due 1 November.	One annual payment due 15 November.

The main amendments	Currently in force	In force from 1 January 2013
Additional comments		Transitional application: Gradual increase of the tax from 2013 to 2016.

Land lease tax

State-owned land that is leased for Lithuanian and foreign companies is subject to land lease tax at a rate established by the municipalities. The minimum tax rate set by the government is 0.1%, and the maximum rate is 4% of the value of the land.

Real estate tax

Real estate tax at a rate ranging from 0.3% up to 1% is levied on the value of real estate owned by individuals and used for commercial purposes or owned by legal entities (with certain exemptions). Municipal councils establish a specific tax rate for real estate situated in their territories annually.

State dues (stamp taxes)

State dues are payable on activities of state institutions, such as the issuance of documents having legal force and other deeds.

Environmental tax

Environmental tax is imposed on pollutants discharged into the environment, a few specified products (e.g. tyres, batteries), and certain types of packaging.

Tax on natural resources

A tax on natural resources is payable on the value of extracted natural resources.

Branch income

A branch of a foreign company is defined as a structural subunit of a foreign company, which has an establishment in Lithuania and is entitled to engage in commercial activities in Lithuania as well as conclude contracts and undertake obligations according to the power of attorney issued to the branch by its founder. A branch does not have the status of a legal person. It is taxed in the same manner as a PE (*see the Taxes on corporate income section*).

Income determination

Inventory valuation

Under domestic accounting legislation, stock used in the production and included in the cost of produced products is valued in the financial statements by the first in first out (FIFO) method. The last in first out (LIFO), weighted-average, progressive-average, actual-price, or another method that corresponds to the stocks' movement can also be used. However, the method used must be disclosed in the notes to the annual accounts, and, among other things, the note must report the profit that would have been calculated if the FIFO method of valuation had been used. For CIT purposes, usage of another method than FIFO should be approved by the tax authorities.

Capital gains

Capital gains are taxed as part of the corporate profit of the enterprise.

Lithuania

Capital gains are treated as non-taxable income when they are derived from the transfer of shares in a company incorporated in the European Economic Area or in a country with which Lithuania has a valid DTT and that pays CIT or an equivalent tax. This holds true if the Lithuanian holding company holds more than 25% of voting shares for a continuous period of (i) at least two years or (ii) at least three years when the shares were transferred in one of the established forms of reorganisation. Certain restrictions apply.

Dividend income

The receiving company does not include the dividends received from other entities in its taxable income.

Interest income

Interest income is treated as general taxable income and is subject to 15% CIT.

Exemptions from taxable income

The following types of income are exempt from CIT:

- Insurance indemnity not in excess of the value of lost property or other losses or damages, the refunded part of insurance premiums in excess of the premiums deducted from income in accordance with the procedure established, and the part of insurance indemnity in excess of the premiums deducted from income in accordance with the procedure established.
- Proceeds of a bankrupt company received from sale of its property.
- The balance of the formation fund of an insurance company as prescribed by the law on insurance.
- Investment income of investment companies with variable capital and closed-end investment companies acting in accordance with the law on collective investment undertakings, except for dividends and other distributable profits.
- Income derived by health care institutions for their services that are financed from the funds of the Compulsory Health Insurance fund.
- Income derived from revaluation of fixed assets and liabilities as established by laws and regulations, except for income derived from the revaluation of derivative financial instruments acquired for hedging purposes.
- Default interest except for that received from foreign companies registered or otherwise organised in blacklisted territories or residents of such territories (*see Blacklisted territories in the Deductions section*).
- All or part of the profit gained from legal entities of unlimited civil liability that are payers of CIT and with income that is subject to CIT under the law or to a similar tax under respective statutes of foreign countries, with certain exceptions.
- Fees collected by seaports and airports, charges for air traffic navigation services, and funds collected from the lease of seaport-owned land.
- Results arising from adjustments made for the previous tax periods as prescribed by the law on accounting.
- Indemnification for damages received by the company, with certain exceptions.
- Compensation received according to the Lithuanian programmes of the EU financial support relating to taking fishing ships for scrap.
- Life insurance payments received by insurance companies, provided the term of the life insurance policy is valid for not less than ten years or at the date of the receipt of the insurance benefit the recipient has reached the pension age in accordance with the additional law on pensions. Additionally, insurance investment income of insurance companies, except for dividends and other distributable profit, are exempt along with investment insurance income of insurance companies received according

to the contracts of life insurance occupational pensions concluded in accordance with the law on accumulation of occupational pensions.

- Direct and other compensational allowances, which are received by units performing agricultural activities to maintain their level of income, which meet the requirements established in the laws and other legal acts of Lithuania.

Foreign income

Income is not subject to taxation in Lithuania if it was received from activities through a PE in a foreign country which is in the European Economic Area or which has a DTT with Lithuania and if the income was subject to taxation there. Since such income is not subject to taxation in Lithuania, costs related to the income cannot be deducted from income that is subject to taxation in Lithuania.

Deductions

Allowable deductions include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit unless the law on CIT provides otherwise.

Limited deductible expenses include the following:

- Depreciation or amortisation expenses of fixed assets: for tax purposes assets cannot be depreciated faster than indicated in the CIT law (*see below*).
- Maintenance, repair, and reconstruction expenses of tangible fixed assets: if the repair or reconstruction increase the service period and improve the qualities (useful characteristics of the fixed assets), the value of repair or reconstruction shall be added to the acquisition value of the tangible fixed assets.
- Business travel expenses: deductible with restrictions.
- Advertising and representation expenses: 75% of representation expenses are deductible.
- Natural losses: deduction limited to not more than 1% of turnover.
- Taxes: deductible with restrictions (*see below*).
- Bad debts (*see below*).
- Contributions and expenses for the benefit of employees: deductible with restrictions.
- Special provisions of credit institutions and insurance companies: calculated according to the methods established by the Bank of Lithuania and the Commission of Insurance Supervision.
- Sponsorship: the double amount deductible (i.e. 200% deduction is available) but only if provided to registered recipients and only up to 40% of taxable result before deduction of sponsorship and utilisation of tax losses carried forward.
- Membership fees, contributions, and premiums: deductible with restrictions.
- Losses of previous tax periods: losses can be carried forward for indefinite period if certain requirements are met (*see below*).

Non-deductible expenses include the following:

- VAT payable to the budget and CIT (*see below*).
- Default interest (forfeit), fines, and late interest paid to the state budget as well as other sanctions imposed for violations of laws and regulations of Lithuania.
- Interest or any other indemnity paid due to non-performance of contractual obligations by related parties.
- Amount of the limited deductible expenses in excess of the established limits.

Lithuania

- Expenses attributed to allowable deductions more than 18 months past, although the payments for goods or services supplied by the entities registered or otherwise organised in blacklisted territories (*see below*) have not been made.
- Sponsorship and gifts that do not correspond to the requirements of CIT law.
- Payments to blacklisted territories (*see below*) if they are not verified and payments are not subject to withholding tax (WHT).
- Indemnification for damages inflicted by the entity.
- Dividends or otherwise distributed profits.
- Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as the expenses that are not considered allowable deductions under the law.
- Amounts resulting from adjustments and corrections of errors of previous tax periods.
- Expenses related to revaluation of fixed assets and securities.
- Deductible or limited deductible expenses attributed to non-taxable income.
- Expenses related to income from certain international maritime activities, if a maritime entity chose to apply a fixed CIT.

Depreciation

Tangible and intangible assets may be depreciated using a directly proportional (straight-line) depreciation method, a production depreciation method, or a double-declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law. For certain typical assets depreciation rates relevant for tax purposes are shown in the chart below:

Asset	Depreciation period (years)	Annual depreciation rate (%)
New buildings used for business activities	8	12.5
Residential buildings	20	5
Plant and machinery	5	20
Trucks (not older than 5 years)	4	25
Computer and communications equipment	3	33.3
Software	3	33.3

Goodwill

Goodwill can be amortised for tax purposes in a straight-line method over 15 years after a merger of a purchasing company and an acquired company, if certain conditions are met.

Start-up expenses

Generally, start-up expenses are deductible for tax purposes.

Interest expenses

Interest expenses are generally deductible for tax purposes. Interest expenses should be recognised as non-deductible for tax purposes if, after acquisition, a purchasing company and an acquired company are merged and a debt used for acquisition of shares is pushed down to the acquired company and certain conditions are not met.

Interest paid to related parties may be non-deductible for tax purposes if thin capitalisation rules are infringed and interest rate on a debt from related party does not correspond to a fair market interest rate (*see Transfer pricing and Thin capitalisation in the Group taxation section*).

Bad debts

Bad debts are deductible only if proved and specific criteria are met. Provisions are non-deductible.

Charitable contributions

Generally, double the amount of donation/sponsorship can be deducted for tax purposes (i.e. 200% deduction is available) but only if donation/sponsorship was provided to registered recipients and only up to a limit of 40% of taxable result before deduction of sponsorship and utilisation of tax losses carried forward.

Fines and penalties

Fines and penalties are generally non-deductible for tax purposes.

Taxes

All taxes, fees, and other compulsory payments to the state budget are deductible for CIT purposes, except VAT paid to the budget and CIT. Note that VAT can be treated as deductible for CIT purposes if it is input or paid import VAT which is non-refundable for VAT purposes and this input or paid import VAT is calculated on deductible expenses.

Net operating losses

Operating losses may be carried forward for an indefinite period, provided that certain requirements are met.

Current year operating losses incurred after 1 January 2010 can be transferred to another legal entity of the group if certain conditions are met.

Losses incurred due to the transfer of securities and/or derivative financial instruments may be carried forward for five years.

No carryback of losses is available in Lithuania.

Payments to foreign affiliates

Payments to foreign affiliates (e.g. interest, royalties, management fees, fees for other services) are deductible for tax purposes if the payment serves a business purpose, provides a benefit to the payer, is at arm's length, and is substantiated by sufficient documentation. Payments to foreign affiliates may also be subject to various WHTs. Certain payments to affiliates located in tax haven (blacklisted) countries are subject to 15% WHT rate.

Blacklisted territories

A blacklisted territory is a foreign country or territory that is included on a list of offshore territories established by the Minister of Finance that meets at least two of the following criteria:

- Similar tax rate in such territory is below 75% of that set in the Lithuanian CIT law.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the parent company (controlling entity) is registered or otherwise organised.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the business is conducted.
- The company (the controlled taxable entity) has entered into agreement with the tax administrator of that territory with regard to the application of a tax rate or tax base.
- There is no effective exchange of information in such territory.

Lithuania

- There is no financial and administrative transparency in such territory, the tax administration rules are not quite clear, and the application thereof is not communicated to tax administrators of other countries.

A list of 58 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any work or services, commodities, interest on funding, insurance premiums, guarantees, etc. are non-deductible for CIT purposes unless the Lithuanian entity provides evidence to the state tax authorities that:

- the payments are related to usual activities of the paying and the receiving business entities
- the receiving foreign business entity manages the property necessary to carry out such usual activities, and
- there is a connection between the payment and the economically grounded business operation.

Group taxation

Group taxation legislation and regimes are not available in Lithuania. Each Lithuanian entity is regarded as a separate taxpayer and may not deduct tax losses accumulated from previous tax periods at the level of any other group entity.

However, recent amendments to CIT law allowed transfer of current year operating tax losses incurred as of 1 January 2010 to an entity of the same group of companies if certain requirements are met.

Transfer pricing

All transactions between associated parties must be performed at arm's length. The tax authorities have a right to adjust transaction prices if they do not conform to market prices.

The Lithuanian rules refer to the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations established by Organisation for Economic Co-operation and Development (OECD) to the extent that they do not contradict with the domestic rules.

According to the Lithuanian transfer pricing regulations, companies may apply the following methods, although traditional methods should be given preference:

- Comparable uncontrolled price method.
- Resale price method.
- 'Cost plus' method.
- Profit split method.
- Transactional net margin method.

All entities with an annual revenue exceeding LTL 10 million (EUR 2.9 million), as well as all banks, insurance companies, and credit institutions are required to prepare transfer pricing documentation in a specifically prescribed form. The documentation may be in a foreign language, but upon request has to be translated to Lithuanian.

As of 1 January 2012, APAs and binding rulings were introduced in Lithuania. Taxpayers can apply for an APA or a binding ruling from the Lithuanian tax authority in respect of future transactions.

Decisions in the form of a binding ruling or APA will be issued by the Lithuanian tax authority regarding the application of tax legislation provisions and pricing principles. The above-mentioned decisions will be particularly relevant to companies planning to undertake new transactions where the taxation principles of such transactions are not clearly defined in the tax legislation and to international companies planning to perform significant transactions with associated parties.

Thin capitalisation

The Lithuanian thin capitalisation rules apply in respect to borrowings from related parties as well as borrowings from third parties guaranteed by related parties. The debt-to-equity ratio is 4:1. The above provisions do not apply if a Lithuanian company can prove that the same loan under the same conditions would have been granted by a non-related entity.

Tax credits and incentives

Foreign tax credit

A company may reduce tax payable on certain foreign-sourced income in Lithuania by taxes paid on that income in a foreign country if that Lithuanian company has received appropriate notice from that foreign country. The tax credit may not exceed CIT rate payable in Lithuania.

Investment project incentive

Entities involved in an investment project are able to reduce their taxable profits by up to 50% of the actually incurred acquisition costs of long-term assets meeting certain requirements. Please note that depreciation (amortisation) expenses of such assets shall be deducted in a common manner.

Taxable profits can be reduced by such costs incurred from 2009 to 2013.

The costs exceeding the above mentioned 50% limit can be carried forward for four years.

There are certain criteria defining what could be considered an investment project. The project should be precisely described to meet the criteria allowing it to use the tax relief, and the tax authorities should be properly notified about the project.

Tax relief for research and development (R&D)

Expenses, except for fixed assets' depreciation (amortisation) expenses, incurred for R&D purposes can be deducted three times in the tax period when they are incurred, provided that R&D works performed are related to ordinary business activities.

A company applying tax relief for R&D has to prepare R&D documentation. This documentation has to cover the performed project, substantiate conformity with certain tax requirements, and specify the amount of expenses for R&D activities.

Lithuania

Free economic zones

Entities that invest in Lithuanian free economic zones are entitled to partial or complete CIT relief (depending on the investment amount), relief of tax on real estate, and 50% relief of land lease tax.

Withholding taxes

Domestic legislation

Generally, income of a foreign entity in Lithuania not derived through a PE is deemed to be Lithuanian-source income and is subject to WHT at the following rates:

- Interest on any type of debt obligations, including securities: 10%.
- Proceeds from the sale, transfer (with title), or lease of immovable property located in Lithuania: 15%.
- Income derived from sports activities or performers' activities: 15%.
- Income from distributed profits: 15%.
- Royalties: 10%.
- Annual payments (*tantiems*) to the members of the board or supervisory board: 15%.
- Indemnities received for the infringement of copyrights or neighbouring rights: 10%.

As of 1 July 2011, the WHT rate on royalties paid to related parties meeting requirements of the EC Interest and Royalty Directive was reduced from 10% to 0%.

Lithuanian WHT on interest paid to EU entities or DTT tax residents is 0%.

WHT is not applied on government securities issued on international financial markets, interest accumulated and paid on deposits, and interest on subordinated loans which meet the criteria established by legal acts adopted by the Bank of Lithuania.

Dividends distributed by a resident company to another resident company are subject to a 15% CIT, which is withheld by a distributing company.

The dividends distributed by a resident company are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (*see Blacklisted territories in the Deductions section*), as specified by the Ministry of Finance. Please note that the requirement of the 12-month holding period does not necessarily have to be fulfilled on the day of dividend distribution.

The receiving company may reduce its payable CIT for that period when dividends were received by the amount of CIT withheld from the received dividends. Any excess credit may be offset with other taxes payable.

Dividends distributed by a foreign entity are subject to a 15% WHT which is to be paid by the receiving Lithuanian entity.

Dividends distributed by a foreign company to a Lithuanian company are exempt from WHT if the distributing foreign entity is established in the EEA and related profit is properly taxed in the domiciled country.

The dividends are also exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the receiving entity is subject to 5% or 15% Lithuanian CIT rate. This participation exemption satisfies the requirements of the EC Parent-Subsidiary Directive. The exemption also applies to dividends paid by non-EU foreign companies, except those registered or organised in blacklisted territories.

Tax treaties

Where a treaty for the avoidance of double taxation and prevention of fiscal infringement with the country in question contradicts the local regulations, the treaty provisions prevail. Lithuania has now signed 49 DTTs with foreign countries; however, two of them (with Kirghizia and Mexico) are not yet enforced.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (3)
Non-treaty	0/15	0/10	10
Treaty:			
Armenia	0/15	0	10

Uzbekistan	0/10	0	10

Notes

- Dividends are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to a 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (see *Blacklisted territories in the Deductions section*), as specified by the Ministry of Finance. If participation exemption criteria are not met, the standard WHT rate of 15% should be applied. However, some of the DTTs allow applying WHT at a reduced rate of 10%.
- Under the domestic law, the rate is nil if interest is paid to a company established in a country which has a DTT with Lithuania or is a member of a European Economic Area. In other cases, except for Latvia where 0% WHT is established in the DTT, 10% WHT rate should be applied.
- Under the domestic law as of 1 July 2011, the WHT rate on royalties paid to related parties meeting requirements of the EC Interest and Royalty Directive was reduced from 10% to 0%.
- Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.

Reduction of, or exemption from, WHT under a DTT may be obtained if a special residence certificate (Form DAS-1) is completed and approved by the tax authorities before a taxable payment is transferred. If a payment that would have been subject to a tax treaty has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund of the Lithuanian tax withheld at source (Form DAS-2) and obtaining the approval of the tax authorities.

In addition, the tax authorities may require completion of a special certificate giving information about income received and taxes paid in Lithuania (Form DAS-3).

Tax administration

Taxable period

The Lithuanian tax year runs from 1 January to 31 December. However, a corporation may apply to adopt a substitute year of reporting (e.g. 1 July to 30 June).

Tax returns**CIT**

CIT returns must be submitted by the first day of the sixth month of the following tax period (1 June for companies using the calendar year).

If CIT is calculated based on activity results for the previous year, the advance CIT return for the first nine months of the tax period is to be submitted by the last day of the first month (usually January) of the tax period. The return for the remaining months of the tax period is to be submitted by the last day of the tenth month (usually October) of the tax period. If the taxpayer has chosen to pay the advance amount based on the projected amount of CIT for the current year, the return must be submitted not later than the last day of the first month of the tax period.

WHT on dividends

A tax-withholding entity must submit to the tax authorities a special form of a return reporting the dividends paid and tax withheld within ten calendar days after the end of the month of the dividend payment.

WHT on payments other than dividends

A tax-withholding entity must submit to the tax authorities a special form of a return reporting the amounts of payments paid and taxes withheld during the calendar month no later than 15 days after the end of the month in which the amounts were paid.

Payment of tax**CIT**

Based on the activity results for the previous year, the advance amount of CIT for the first nine months of the tax period is calculated based on the actual CIT amount for the tax period before the previous tax period. For example, the CIT for the first nine months of 2012 would be calculated based on the appropriate portion of the actual amount of CIT for 2010. The advance amount for the remainder of the tax period is based on the actual amount of CIT for the previous period, for example, tax for the last three months of 2012 would be based on the appropriate portion of the actual amount of CIT for 2011. Thus, the advance CIT amount for each quarter would be equal to one-fourth of the actual tax amount calculated for the tax periods discussed.

The taxpayer may choose to pay the advance amount based on the projected amount of CIT calculated for the current year. The advance tax (one-fourth of the advance CIT) must be paid no later than the last day of the respective quarter, and for the last quarter by the 25th day of the last month of the quarter.

If the amount of tax indicated in the return exceeds the amount actually paid during the tax period, the taxpayer is obliged to transfer the additional amount no later than the return submission deadline. Overpaid tax can be offset with other tax dues or refunded in accordance with the law on tax administration.

WHT on dividends

WHT on dividends is to be calculated, withheld, and remitted by a Lithuanian company that pays dividends within ten calendar days after the end of the month of the payment.

Lithuania

WHT on payments other than dividends

WHT on payments other than dividends is to be calculated, withheld, and remitted by a Lithuanian company or a PE of a foreign company no later than the return submission deadline.

Audit cycle

The Lithuanian tax system for companies is based on self-assessment; however, the tax authorities undertake ongoing compliance activity to ensure corporations are meeting their tax obligations. The tax authorities take a risk-based and materiality approaches to compliance and audit activities, with efforts generally focused on taxpayers with a higher likelihood of non-compliance and/or material consequences of non-compliance. Compliance activities take various forms, including general risk reviews, questionnaires, reviews of specific issues, and tax audits.

Statute of limitations

Generally, the tax authorities may investigate current and five previous tax periods. However, the limit of ten previous tax periods applies where the tax authorities are of the opinion there has been fraud or tax evasion.

Significant developments

The Luxembourg tax environment proved once again its long-standing reputation of stability over the last 12 months.

Following the introduction over the past few years of a favourable tax regime for intellectual property (IP) rights, an increase of the rates applicable to investment tax credits, and the implementation of a transfer pricing framework for intra-group financing activities, no major changes have been introduced in the Luxembourg income tax law.

The government, nevertheless, continues its efforts in negotiating new tax treaties and also revisiting the existing ones in the view of introducing the internationally agreed tax standards in terms of exchange of information.

L

Taxes on corporate income

Luxembourg taxes its corporate residents on their worldwide income and non-residents only on Luxembourg-source income.

Businesses with taxable income lower than 15,000 euros (EUR) are subject to corporate income tax (CIT) at a rate of 20%. The CIT rate is currently 21% for companies with taxable income in excess of EUR 15,000.

The CIT does not apply to tax transparent entities (e.g. general or limited partnerships or European Economic Interest Grouping).

As of tax year 2011, EUR 1,500 minimal CIT (increased to EUR 1,575 by the 5% contribution to the employment fund) has been introduced for fully taxable resident entities which (i) do not require a business licence or the approval of a supervisory authority and (ii) own financial assets, transferable securities, and cash at bank (i.e. accounts no. 23, 50, or 51 of the Standard Chart of Accounts) exceeding 90% of their total balance sheet. For tax-consolidated entities, this measure will only apply once (at the level of the head of the tax consolidation).

Solidarity tax

A 5% solidarity tax is also imposed on the CIT amount.

Taking into account the solidarity tax, the aggregate CIT rate is 22.05% for companies with taxable income in excess of EUR 15,000.

Luxembourg

Municipal business tax on income

Municipal business tax is levied by the communes and varies from municipality to municipality. The municipal business tax for Luxembourg City is 6.75%.

The effective combined CIT rate (i.e. CIT, solidarity tax, and municipal business tax) for Luxembourg City is 28.80%.

Corporate residence

Based on domestic law, a company is considered to be resident in Luxembourg if either its registered office or place of central administration is located in Luxembourg. The registered office is designated as such in the company's articles of incorporation.

The place of central administration is generally understood to mean the place where the company is managed and controlled. While this term is not legally defined, the location of the company's major establishment is determined by facts and circumstances, including the following:

- The place where meetings of the board of directors are held.
- The place where shareholders meetings are held.
- The place where the company's officers make their decisions.
- The place where the company's books and records are kept.
- The place where other, similar factors evidencing management control occur.

Permanent establishment (PE)

The provisions on PEs included in the tax treaties concluded by Luxembourg generally follow the wording of the Organisation for Economic Co-operation and Development (OECD) model.

Under Luxembourg domestic tax law, a similar PE concept exists but is defined in a broader way and is to be understood as every fixed piece of equipment or place which serves for the operation of an established business.

Other taxes

Value-added tax (VAT)

Proceeds of sales and services, which are deemed to take place in Luxembourg, are subject to VAT at the standard rate of 15% (lowest standard VAT rate in the European Union (EU)) or, on certain transactions, at 12% (e.g. wine, advertising pamphlets), 6% (e.g. supply of gas or electricity), or 3% (e.g. food except alcohol beverages, pharmaceutical products, books [including e-books], radio and television broadcasting services [except adult entertainment]). Some transactions, such as export and related transport, are zero-rated.

Taxpayers whose activities are subject to VAT are entitled to offset against their VAT payable the amount of such tax charged to them by their suppliers or reverse charged (i.e. self-accounted) by them on import or acquisitions of goods or services from abroad.

Banking, financial, insurance, and reinsurance generally are exempt activities. The VAT paid on costs made for these transactions cannot be recovered except when related to services performed for persons established outside the European Union. VAT on

expenses made in the context of 'passive' holding activities, which are considered as outside the scope of VAT, are not recoverable.

As of 2011, a Standard Audit File for Tax (SAF-T), which is a file containing reliable accounting data, has been implemented by the VAT authorities. This specific file is used by taxable persons to transfer information to Luxembourg VAT authorities during a VAT audit. Only specific taxable persons having a certain minimum number of transactions (+/- 500) and registered under a 'normal filing regime' with a turnover exceeding EUR 112,000 are firstly concerned. On the other hand, some entities, notably those subject to the supervision of the *Commission de Surveillance du Secteur Financier* (CSSF) and insurance/reinsurance companies, will not yet be subject to these SAF-T obligations.

A law regarding the creation of a VAT suspension regime was adopted in September 2011. This law, in force since 1 October 2011, introduced new VAT suspension regimes that can be operated either under a free zone or under VAT warehouses. These regimes complement the already existing customs warehousing regimes and are based on existing provisions in the European Union (EU) VAT Directive.

All operations (e.g. entry, transport, storage, packaging, evaluation, and realised sales) taking place under the suspension regime will be exempt from VAT until the goods are being removed from the regime.

The suspension of VAT liabilities is attractive for companies that are involved in the trading of goods and wishing to optimise VAT cash flows and compliance obligations in their supply chains.

As of January 2012, e-books benefit from a super-reduced VAT rate of 3%.

Customs duties/import tariffs

Based on a European Regulation, goods entering within the territory of the European Union could be subject to customs duties/import tariffs. Rates applying for determining customs duties/import tariffs are based on the nature and on the quantity of the products.

Excise duties

In addition to VAT, some products are subject to specific excise duties. In Luxembourg, these products are electricity, mineral oils, manufactured tobacco, and alcohol.

Excise duties are not based on the sale price of the products but on the quantity. Excise duty becomes chargeable at the time, and in the EU member state, of release for consumption. Release for consumption occurs in any of the following instances:

- The departure of excise goods from a duty suspension arrangement.
- The holding of excise goods outside a duty suspension arrangement where excise duty has not been levied pursuant to the applicable provisions of Community law and national legislation.
- The production of excise goods outside a duty suspension arrangement.
- The importation of excise goods, including irregular importation, unless the excise goods are placed, immediately upon importation, under a duty suspension arrangement.

Net wealth tax

Both Luxembourg resident companies and Luxembourg branches of non-resident companies are subject to net wealth tax levied at a rate of 0.5% on their net wealth,

Luxembourg

based on prescribed valuation methods. In general, assets are taken into account at market value (except for real estate, which is subject to a special regime). Shareholdings qualifying for the participation exemption (*see Dividend income in the Income determination section*) generally are exempt from net wealth tax.

Resident companies and Luxembourg branches of non-resident companies may claim a reduction of their net wealth tax liability by making an allocation to a special reserve before the closing of the tax year following the year for which the net wealth tax reduction is claimed. To this end, an amount corresponding to five times the net wealth tax that should have become payable must be kept in this special reserve for the five years following the year in which it was allocated. The reduction, however, may not be higher than the taxpayer's CIT liability, before tax credits, for that same year.

Subscription tax

Investment funds are subject to subscription tax (at various rates) on their total net assets evaluated at the last day of each quarter. Institutional funds and monetary funds are subject to an annual rate of 0.01% and the other funds to an annual rate of 0.05%. Funds of institutional funds and monetary institutional funds are exempt from subscription tax.

Exemptions from subscription tax are available for exchange traded funds, and an extension of exemption is available for funds dedicated to multi-employer pension vehicles or to several employers providing pension benefits to their employees.

Where a foreign Undertakings for Collective Investment (UCI) is managed by a Luxembourg-based management company (or where the UCI's place of effective management is located in Luxembourg), the UCI will not be deemed to be domiciled in Luxembourg and therefore not be subject to any tax in Luxembourg.

General registration taxes

General registration taxes (inclusive of the transcription tax described below) are levied at 7% on the market value of real estate purchased or transferred (10% in the commune of Luxembourg City for some categories of properties) and 1% on mortgages on real estate. The taxes are deductible for CIT purposes.

Note that a fixed registration duty of EUR 75 is levied on certain transactions involving Luxembourg entities (i.e. incorporation, amendment to the articles of association, and transfer of seat to Luxembourg).

For Luxembourg real estate assets, contribution made to a company remunerated by shares are subject to a proportional registration duty of 0.6% (0.9% for Luxembourg City for some categories of properties) and a transcription tax of 0.5%. Contribution remunerated by means other than shares remain subject to a proportional registration duty of 6% (9% for some categories of properties located in Luxembourg City) and a transcription tax of 1%. Transfers made within the framework of a corporate reorganisation may be exempt from any proportional registration duty under certain conditions.

Commune (municipalities) real estate tax

Communes (municipalities) levy an annual real estate tax, the basis of which is the unitary value of real estate, which represents its estimated value in 1941. The basic rate varies from 0.7% to 1% of the unitary value, according to the category of property, and is multiplied by a coefficient, which varies with communes and different types of property. For commercial properties, the coefficient in Luxembourg City is 750%,

which should be applied to 1% of the unitary value. The real estate tax is deductible for CIT purposes.

Branch income

Branch income generally is taxed at CIT rates. However, the municipal business tax generally only applies if the branch is carrying on commercial activity within Luxembourg.

Income determination

Inventory valuation

Inventories generally are valued at the lower of actual or market cost. There is no statutory specified method. In general, the first in first out (FIFO), the last in first out (LIFO), and the weighted-average costs methods of inventory valuation are acceptable for income tax purposes, provided the method is in accordance with the facts.

Dividend income

Dividends received by a Luxembourg resident company (or by a domestic permanent establishment [PE] of a non-resident company in certain cases) should, in principle, be subject to CIT.

Participation exemption regime

Dividends received may be tax exempt in Luxembourg, according to the so-called 'participation exemption' regime, if the conditions described below are satisfied:

- The distributing company is:
 - a collective entity falling within the scope of article 2 of the amended version of the EU Council directive of 23 July 1990 (90/435/EEC), hereafter the 'Parent Subsidiary Directive'
 - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the appendix to paragraph 10 of article 166 of the Luxembourg Income Tax Law (LITL), or
 - a non-resident joint-stock company that is fully liable (in its state of residence) to a tax corresponding to the Luxembourg CIT (i.e. as a general rule, it is required that the foreign tax is compulsorily levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one).
- The beneficiary company is:
 - a Luxembourg resident collective entity, which is fully taxable and takes one of the forms listed in the appendix to paragraph 10 of article 166 LITL
 - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the above-mentioned appendix
 - a domestic PE of a collective entity falling within the scope of article 2 of the amended version of the Parent-Subsidiary Directive
 - a domestic PE of a joint-stock company that is resident in a country with which Luxembourg has concluded a double tax treaty (DTT), or
 - a domestic PE of a joint-stock company or of a cooperative society, which is a resident of a European Economic Area (EEA) member state (other than an EU member state).

Luxembourg

- At the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly (or through a tax transparent entity - *see Transparent entities below*), for an uninterrupted period of at least 12 months, a participation in the share capital of the subsidiary of at least 10% or with an acquisition price of at least EUR 1.2 million.

Capital gains

Capital gains (and losses) generally are taxed as ordinary income (or losses). It is possible to defer the taxation of gains on certain fixed assets where the gain is used to acquire replacement items. Under certain conditions, exempted capital gains and hidden reserves may be unrealised in a merger or another form of reorganisation of resident companies or other EU companies.

In general, capital gains on the disposal of qualifying shareholdings held by entities eligible to the participation exemption regime are tax exempt, provided (i) the shareholding constitutes at least 10% of total ownership or an acquisition price of at least EUR 6 million and (ii) the disposing company has held or intends to hold the qualifying shareholding for at least 12 months.

A recapture system exists wherein the capital gain realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of realisation of the exempt capital gain and in previous years.

The purpose of the system is to avoid a taxation vacuum, which could result if the deductibility of expenses and write-downs connected to the participation was allowed, while the income arising from the participation is tax exempt. This system should, in principle, remain tax neutral, as the company should have available carryforward losses for an equivalent amount (unless previously used to offset other taxable income).

Taxation of non-resident corporate investors on gains upon disposal of shares

In principle, should a non-resident corporate investor (non-treaty protected) derive income from the disposal of an important participation (i.e. representing at least 10% of the share capital) in a Luxembourg company within six months of its acquisition, said capital gain will be subject to CIT in Luxembourg unless a tax treaty provides otherwise.

Non-resident investors are not subject to the aforementioned capital gains tax upon disposal of shares in a Luxembourg *Société d'Investissement à Capital Variable* (SICAV), *Société d'Investissement en Capital à Risque* (SICAR), and *Société de gestion de Patrimoine Familial* (SPF).

Interest income

Under Luxembourg accounting and tax principles, interest income is recognised on an accrual basis and is fully subject to tax at the effective combined CIT rate of 28.80%.

Transparent entities

From a Luxembourg tax perspective, a transparent entity is seen as having no legal personality distinct from that of its partners (those transparent entities are commonly referred to as 'partnerships') for CIT and net wealth tax purposes, although it may be regarded as a separate legal entity from a civil/corporate law point of view. Provided that the partnership carries out a commercial activity, however, it will be liable to municipal business tax on its own.

Foreign income

A Luxembourg tax resident company is liable for CIT on its worldwide income, whether derived from Luxembourg or from foreign sources. Luxembourg does not apply a territorial basis for taxation. Foreign-source income is therefore taxable in Luxembourg, unless a DTT provides for an exemption.

Dividends from foreign subsidiaries are taxed when received, except where exempt as mentioned above. Profits of a foreign branch which are not exempt by means of a DTT may, however, benefit from a foreign tax credit. Any foreign taxes paid in excess of the tax credit are deductible as expenses. Luxembourg is, however, using the exemption method in most of its DTTs.

Deferral of taxation for income earned abroad is not provided for under Luxembourg domestic tax law.

Deductions

Depreciation

Depreciation rates must be consistent with economic reality. The depreciation must be calculated on the total acquisition cost, bearing in mind the normal life of the asset and the estimated residual value.

Depreciation normally is calculated using the straight-line method. However, the declining-balance method is permitted for fixed assets, other than buildings and intangible assets. The depreciation rate may not, however, exceed three times the rate applicable according to the straight-line method, or 30% (four times the applicable rate in the case of assets used exclusively for scientific and technical research, or 40%).

It is permissible to change from the declining-balance method to the straight-line method, but the converse is not allowed. Tax depreciation must be reflected in the financial accounts prepared for commercial purposes.

In the event of a sale of a depreciated asset, the net book value at the moment of the disposal must be compared with the sale price of that asset. If this comparison indicates a profit, corresponding income tax may be due unless the sale price is reinvested in eligible assets. Capital losses are deductible.

Under certain conditions, fixed assets with a value of less than EUR 870 or an economic life that is not in excess of one year can be expensed fully in the year of acquisition. Special accelerated depreciation on 80% of the cost of fixed assets is available for assets that protect the national environment, save energy in Luxembourg, or permit the development of workplaces for handicapped workers, under certain conditions.

Goodwill

Goodwill is generally amortised over a five year maximum period. It can, however, be amortised for a period longer than five years provided that this period does not exceed the useful economic life of this asset. The Luxembourg tax treatment will follow the applicable accounting treatment.

Start-up expenses

Formation expenses can either be directly charged to the profit and loss account of the year in which they are incurred or depreciated on a straight-line basis over a five year maximum period. The accounting treatment is followed for Luxembourg tax purposes.

Luxembourg

Interest payments

Interest payments are, in principle, deductible to the extent they comply with the arm's-length principle (*see Transfer pricing in the Group taxation section*).

Non-deductibility of the interest payments may arise in case they depend on the profits realised by the company or are derived from loans structured in the form of bonds or similar securities. Also, the deductibility will be limited in case the company is considered as being thinly capitalised (*see Thin capitalisation in the Group taxation section*).

Bad debt

Provisions for bad debts are generally tax deductible.

Charitable contributions

Gifts for scientific, charitable, or public purposes and to institutions in the general interest are deductible, subject to a maximum of 20% of the net income or up to an amount of EUR 1 million (the minimum being EUR 120) with a possibility to spread the deduction over two years.

Shareholdings

Expenses linked to a shareholding qualifying for the participation exemption, including write-downs in the value of the shareholding booked as a consequence of a dividend distribution, are not deductible up to the amount of the exempt dividend. Recapture rules may apply in the event of disposal of the shareholding. Basically, the effect of this rule is that capital gains realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation, deducted during the year of disposal and the previous years. The qualifying shareholding is exempt from net wealth tax.

Severance payouts or 'golden handshakes'

Severance payouts or 'golden handshakes' are deductible for CIT and municipal business tax purposes, up to EUR 300,000.

Fines and penalties

Fines and penalties suffered by the taxpayer are not to be considered as operating expenses and are therefore non-tax deductible.

Taxes

Several taxes are deductible in determining income subject to CIT, including the registration duties and real estate tax. Also, certain taxes are credited against the computed amount of income tax owed, including taxes withheld from Luxembourg dividend income, tax withheld abroad from dividend and interest income received by a Luxembourg corporation (subject to limitations), and investment tax credits (*see the Tax credits and incentives section*).

The main non-deductible taxes are CIT, municipal business tax, net wealth tax as well as interest and penalties for late payment of said taxes.

Net operating losses

Net operating losses can be carried forward for an unlimited period but cannot be carried back.

Payments to foreign affiliates

Royalties, management service fees, and interest charges paid to foreign affiliates by a Luxembourg company are deductible items, provided they are equal to what the company would pay an unrelated entity for comparable services.

Group taxation

Luxembourg permits tax unity. Generally, the conditions to qualify for tax unity include that:

- each company is a fully taxable company that is resident in Luxembourg (the top entity may be a Luxembourg PE of a fully taxable non-resident company)
- at least 95% of each subsidiary's capital is directly or indirectly held by the parent company
- each company's fiscal year starts and ends on the same date, and
- tax unity is requested jointly by the top company and each subsidiary that becomes member of the group.

Tax unity lasts for a five-year period, and taxable income/loss is computed on the consolidated result. Tax losses that occurred before the consolidation period may be offset only against tax profits of the company that incurred the loss. Tax losses that are sustained by a group member during the consolidation period are offset against the tax profits of the other group members. Tax losses arising during the consolidation period that exist after the consolidation period are attributed to the parent company.

Transfer pricing

Luxembourg largely follows the transfer pricing guidelines issued by the OECD in the absence of detailed transfer pricing regulations in Luxembourg. LITL has prescribed the general transfer pricing provisions in Article 56 LITL, which requires that transactions between related parties are carried out in line with the arm's-length principle. This article provides that where there is a transfer of profit possibly due to the fact that a Luxembourg taxpayer has a special economic relationship with a non-resident taxpayer, then the tax authorities may determine the financial result regardless of the reported profit. The concept of a special economic relationship can be described as any economic relationship that differs from a regular/commercial economic relationship between two parties. The special economic relationship goes beyond the related party definition as stated in article 9 of the OECD Model Convention.

Furthermore, Article 164(3) LITL characterises certain transactions as a hidden distribution of profits where a direct or indirect shareholder receives an advantage from a company that said shareholder would not have received if there had not been a shareholding relationship. The hidden distribution of profits in Luxembourg is included in the profit of the taxpayer and subject to tax at the prevailing statutory rate of corporation tax. In addition, it may be subject to 15% withholding tax (WHT) on the gross amount received, except in case a reduced rate applies under the provisions of the relevant DTT or the European Commission (EC) Parent-Subsidiary Directive.

Transfer pricing documentation is prepared based on OECD transfer pricing guidelines and EU transfer pricing documentation guidelines. Transfer pricing documentation is neither required at the time of the transaction nor at the filing of the tax return. During the course of a tax assessment, the tax authorities may request documentation from the taxpayer to evidence the reasonableness of an intra-group pricing arrangement. There are no transfer pricing methods prescribed for determining the arm's-length standard,

Luxembourg

and the taxpayers and the tax authorities largely follow the transfer pricing methods prescribed in the OECD transfer pricing guidelines.

In terms of the burden of proof, the tax authorities have to prove that there is an erosion of the taxable base in Luxembourg, whereas the taxpayer has to prove that the inter-company transactions did not result in a reduction or cancellation of taxes. The statute of limitations is generally five years from the end of the year in which the tax liability arises. This period may be extended if a deferred payment is granted. In case of tax evasion or fraud, the statute of limitations can be extended up to ten years. There are no specific penalties in relation to transfer pricing in Luxembourg, but the penalty regime under the corporate tax will be applicable.

Although Luxembourg has no formal procedure for applying advance pricing arrangements (APAs), the income tax authorities are quite flexible in this area. There have been a few cases in Luxembourg where bilateral APAs have been concluded, although in general, unilateral advanced tax agreements are obtained on an individual basis. Recently, the tax authorities have increased their focus on transfer pricing. As a result, two Circulars describing the tax treatment for intra-group financing transactions have been issued by the Luxembourg tax authorities.

According to the Circular of 28 January 2011 (L.I.R. n° 164/2), the internationally acceptable arm's-length principle should be applied for the determination of the compensation for Luxembourg companies which are principally engaged in on-lending transactions. The remuneration of the related entities should be determined based on the functions performed, assets utilised, and risks born by the Luxembourg company. A written confirmation from the tax authorities can be obtained if the Luxembourg company meets the substance and equity at risk requirements with regard to the on-lending activity. In respect of the equity at risk requirement, the Luxembourg company must be at risk for an amount equal to the lesser of 1% of the nominal value of the loan or EUR 2 million. In addition, the arm's-length price has to be determined by way of a transfer pricing analysis.

On 8 April 2011, the Luxembourg tax authorities issued a second Circular (L.I.R. n°164/2bis) clarifying the application of Circular L.I.R. 164/2 of 28 January 2011. This Circular explains that, as of 1 January 2012, the income tax authorities are no longer bound by confirmation obtained before 28 January 2011 in relation to existing intra-group lending activities financed with borrowings falling within the scope of Circular L.I.R. 164/2.

Thin capitalisation

No thin capitalisation ratio is specifically provided by the Luxembourg tax law.

In practice, the tax authorities apply an 85:15 debt-to-equity ratio for the intra-group financing of participations. Should the 85:15 ratio not be complied with by the taxpayer, the surplus of interest could be re-qualified by the tax authorities as a hidden distribution of profits which would be non-deductible and potentially subject to a 15% WHT.

Tax credits and incentives

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Inbound and capital investment incentives

Luxembourg tax law provides for various incentives, with specific requirements, in the areas of risk-capital, audiovisual activities, and environmental protection as well as for research and development (R&D), professional training, and recruitment of unemployed persons.

The most commonly used incentives are the investment tax credits. Luxembourg tax law provides for two types of investment tax credits.

First, a tax credit is available which amounts to 13% of the increase in investment in tangible depreciable assets made during the tax year. The increase in investment over a given tax year is computed as the difference between the current value of all qualifying assets and the reference value allocated to the same type of assets.

Independently, the company may benefit from a 7% tax credit on the first EUR 150,000 of qualifying new investments, and a 3% tax credit on the amount of new investments exceeding EUR 150,000 in tangible depreciable assets as well as investments in sanitary and central heating installation in hotel buildings and investments in buildings used for social activities. The above 7% and 3% rates are increased to 8% and 4% for investments eligible for special depreciation (i.e. investments favouring the protection of the environment, the realisation of energy savings, or the creation of employment for handicapped workers). However, certain investments are excluded from the credit calculation, including investments in real property, intangible assets, and vehicles (unless specifically stated by the law).

Domestic law requires that investments be physically operated in Luxembourg in order to be eligible for the incentive, unless the investment consists in shipping vessels operating in international waters. In addition, the tax benefit of the tax credit is limited to investments that are made within a Luxembourg business establishment and that are intended to be used permanently in Luxembourg.

Further to the European Court of Justice's decision dated 22 December 2010 (Tankreederei, C-287/10), the Luxembourg Tax Authorities issued a Circular letter dated 31 March 2011, confirming that the investment tax credit must be granted to any investment used within the EU and EEA member states. Although Luxembourg domestic tax law has not yet been amended accordingly, the application of investment tax credit may be requested for the current tax year, as well as for tax years already assessed but still subject to the introduction of a claim.

Intellectual property (IP) regime

An IP regime is applicable to qualifying IP rights acquired or developed after 31 December 2007. This regime provides for an 80% tax exemption of the net income deriving from the use and the right to use qualifying IP rights, under certain conditions. Qualifying IP rights include patents, trademarks, design, domain names, models, and software copyrights.

An 80% deduction of net deemed income is available also under certain conditions for self-developed patents, which are used internally by the taxpayer.

The net capital gain realised upon disposal of the qualifying IP rights also benefits from the 80% exemption.

Finally, qualifying IP rights may be fully tax exempt for net wealth tax purposes under certain conditions.

Luxembourg

R&D incentives

Luxembourg entities involved in innovative and R&D activities can benefit from financial support in addition to the specific IP tax regime and general tax incentives.

Innovation loans may be granted by the *Société Nationale de Crédit et d'Investissement* and may carry a fixed interest rate lower than the market rate. Financial support may also be granted in the form of cash grants or interest subsidies.

R&D projects or programmes receive financial support up to a maximum eligibility (percentage of costs eligible for the incentives) depending on the size of the beneficiary (private research companies or organisations) as follows:

- Large (25% to 100% depending on the investment).
- Mid-size (35% to 100%).
- Small (45% to 100%).

These incentives are available for:

- experimental development
- experimental development and cooperation
- industrial research
- industrial research and cooperation, or
- fundamental research.

Innovation in process and organisation and investment in innovation pools can benefit from financial support of between 15% and 35% (50% for public research companies).

Promotion and development of innovation pools can benefit from financial support of up to 50% for private organisations or 75% for public research companies.

Research regarding technical feasibility can benefit from financial support of up to 40% or 50% if prior to experimental development and up to 65% or 75% if prior to experimental research.

Other incentives by entity

Investment funds

Investment funds resident in Luxembourg generally are exempt from CIT, municipal business tax, and WHT on dividends. These investment funds are subject to the previously described subscription tax and to the general registration duty regime.

Financial participation company (Soparfi)

A Soparfi (*Société de Participation Financière*) is neither a specific type of company nor a special tax regime. It is rather used to refer to resident companies that hold and manage the shareholdings of subsidiaries. A Soparfi is subject to CIT, municipal business tax, and net wealth tax, but it does benefit from Luxembourg's DTTs, EU Directives (e.g. Parent-Subsidiary directive), the domestic participation exemption on dividends received, and capital gains on qualifying participations.

Private wealth management company (Société de gestion du Patrimoine Familial or SPF)

The SPF has been tailored to enter the private sphere of individuals for the purpose of wealth management. Its corporate objective is restricted to the acquisition, holding, management, and disposal of financial assets, to the exclusion of any commercial

activity. As a general rule, an SPF is exempt from Luxembourg taxation on income and wealth tax in Luxembourg. A yearly subscription tax of 0.25% is due on the basis of paid-up capital, share premium, and excessive debts. Subscription tax, however, is capped at EUR 125,000. No WHT applies on dividends distributed by an SPF. Non-resident investors are not taxed in Luxembourg on dividends paid by a SPF or on capital gains realised on shares in a SPF.

Securitisation companies (SC)

SCs are subject to normal corporate taxation. A securitisation company is a company which carries out securitisation activities or which participates in securitisation transactions. Securitisation companies are taxed based on their net accounting profit (i.e. gross accounting profits minus expenses). However, the commitment to remunerate the security holders (both capital and debt) issued by the securitisation company qualifies as interest on debt even if paid as return on equity. Securitisation companies are not subject to net wealth tax in Luxembourg.

Venture capital vehicle (Société d'Investissement en Capital à Risques or SICAR)

The SICAR benefits from an attractive tax regime. SICARs are notably exempt from net wealth tax. Incorporated under a corporate form, the SICAR is subject to income tax at the normal rate with the benefit of an exemption on income and gains (e.g. dividends, capital gains, liquidation proceeds, interest) from transferable securities qualifying as risk capital as well as income arising from investments in liquid assets pending their investment in risk capital for a maximum of 12 months. In addition, it can benefit from the European directives and DTTs. Under the form of a limited partnership, the SICAR is treated as a tax transparent entity, and investors are taxed according to the rules of their country of residence. SICARs treated as tax transparent entities do not benefit from the European directives and DTTs. The SICAR mainly targets qualified or informed investors (i.e. 'professional' investors).

Financial services companies

Banks, securities depositaries, insurance, and reinsurance companies as well as other financial service companies may benefit from preferential regulations when establishing their taxable basis for CIT (e.g. provision for the neutralisation of unrealised exchange gains, general banking risk provision, provision for guarantee of deposits, mathematical reserves, and/or catastrophe reserves).

Shipping companies

Luxembourg-resident shipping companies are not subject to municipal business tax and can benefit from investment tax credits and accelerated depreciation (even for used assets).

Withholding taxes

Dividends paid by a Luxembourg fully taxable company to its 'corporate' shareholders resident in a treaty country, which hold or commit themselves to hold a participation of at least 10% in the Luxembourg company (or shares with an acquisition price of at least EUR 1.2 million) for an uninterrupted period of at least 12 months, may be exempt from WHT (*see Note 1 below for more details*).

The following taxes are withheld on payments made. The WHT due on dividends paid to residents of a treaty country cannot exceed the non-treaty rate.

Notes

These notes are not extensive. The full text of the DTT should be checked for a comprehensive view on the conditions of application of reduced rates.

- Under Luxembourg domestic law, no WHT is levied on dividends paid by a Luxembourg qualifying subsidiary to an entity which is:
 - a collective entity falling within the scope of article 2 of the amended version of the Parent - Subsidiary Directive
 - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the appendix to paragraph 10 of article 166 of the Luxembourg income tax law
 - a PE of a collective entity falling under the previous categories
 - a collective entity that is resident in a country with which Luxembourg has concluded a DTT and which is fully liable to a tax corresponding to the Luxembourg CIT, or a domestic PE of such an entity
 - a Swiss resident joint-stock company that is subject to Swiss CIT without benefiting from any exemption
 - a joint-stock company or a cooperative society which is resident in a EEA member state (other than a EU member state) and is fully liable to a tax corresponding to the Luxembourg CIT, or
 - a PE of a joint-stock company or of a cooperative society which is resident in a EEA member state (other than a EU member state), and
 - at the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly, for an uninterrupted period of at least 12 months, a participation of at least 10%, or with an acquisition price of at least EUR 1.2 million in the share capital of the income debtor.

Qualifying shareholders need to be fully taxable collective entities subject in their country of residence to a tax similar to that imposed by Luxembourg. As a general rule, this requirement is met if the foreign tax is compulsorily levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one.

Luxembourg

2. Interest paid to non-residents generally is not subject to WHT in Luxembourg. However, interest that represents a right to profit participation on a bond may be assimilated to a dividend and subject to WHT. Further analysis should be made to determine the applicable reduced rate on the basis of the treaty (i.e. pursuant to dividend or interest clause). The WHT that may be due as a consequence of the EU Savings Directive (Council Directive 2003/48/EC dated 3 June 2003) is not mentioned.
3. Royalties paid to non-residents are not subject to WHT in Luxembourg, whether the companies are associated or not.
4. A WHT of 10% is withheld on defined interest income paid by a Luxembourg paying agent to resident individuals. Interest indirectly cashed through investment funds are out of the scope of this WHT.
5. DTTs have been concluded with Albania, Cyprus, Kazakhstan, Kuwait, Kirghizstan, Lebanon, Macedonia, Oman, Pakistan, Seychelles, Serbia and Montenegro, Sri Lanka, Syria, Tajikistan, and Ukraine, but are not yet in force. A new DTT with Germany was signed on 23 April 2012, but domestic transposition procedures are still pending.
6. The recipient company holds at least 25% of the Luxembourg company's capital. In some rare cases, a holding period requirement may have to be met as well (e.g. Spain, Switzerland).
7. The recipient company owns at least 30% of the company's capital and the equivalent of an acquisition price of USD 300,000.
8. The recipient company owns a 25% investment or the equivalent of an acquisition price of EUR 6,197,338. The investments may be held by several Belgian companies, provided one owns at least 50% of the shares of each of the others. The investment must be held since the beginning of the financial year of the recipient of the dividends.
9. The recipient company holds at least 10% of the Luxembourg company's capital.
10. No WHT is levied if the recipient company holds at least 10% of the Luxembourg company's capital or a participation with an acquisition price of a least EUR 1.2 million.
11. The rate of 5% of WHT on the gross amount of the dividends applies where the effective recipient company owns directly or indirectly at least 50% of the share capital of the paying company or has contributed more than 10 million United States dollars (USD) or the equivalent in Luxembourg or in Vietnamese currency, in the capital of the company paying the dividends; the rate of 10% of WHT on the gross amount of the dividends applies where the beneficial owner is a company which holds directly or indirectly at least 25% but less than 50% of the capital of the company paying the dividends and has contributed not more than USD 10 million, or the equivalent in Luxembourg or Vietnamese currency, in the capital of the company paying the dividends.
12. The recipient company owns directly or indirectly 25% of the company's capital. Indirect participation includes the holding through several treaty resident companies located in the same country provided one owns more than 50% of the shares of each of the others.
13. A 5% WHT is levied on dividend distributions where the beneficial owner is a company which holds at least 10% of the voting rights of the paying company. No WHT is levied when the US company has held, during an uninterrupted period of two years, a direct shareholding of at least 25% of the voting power of the paying company and certain conditions regarding the nature of activities performed by the distributing company are met.
14. The recipient company owns directly or indirectly 25% of the company's voting rights. Indirect participation includes the holding through several treaty resident companies located in the same country provided one owns more than 50% of the voting rights of each of the others.
15. The recipient company holds at least 25% of the Luxembourg company's voting shares during the period of six months immediately before the end of the accounting period in which the distribution of profits takes place.
16. The dividends are taxable at a rate of 5% if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. No WHT is levied when the beneficiary company has held during the 12 preceding months a direct shareholding of at least 25% of the capital of the paying company. The holding period must be met before the date of distribution of the dividend. Furthermore, certain conditions regarding the nature of activities performed by the company must be met.
17. The recipient company holds at least 30% of the Luxembourg company's capital and the acquisition price reaches at least EUR 75,000 (or equivalent).
18. The recipient company holds at least 10% of the Luxembourg company's capital. Dividends paid to the government of Singapore are exempt.
19. The beneficial owner is a company (other than a partnership) which controls directly or indirectly at least 10% of the voting power in the company paying the dividends.
20. The recipient company holds at least 25% of the Luxembourg company's voting shares (Germany/Luxembourg) or company's voting power (Ireland/Luxembourg).
21. The rate of 5% of WHT on the gross amount of dividends applies where the recipient company holds at least 10% of the Luxembourg company's capital.
22. The rate of WHT is 5% if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 100,000 or the equivalent in Georgian currency. No WHT is levied when the beneficiary company holds directly at least 50% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 2 million or the equivalent in Georgian currency.
23. The recipient company holds at least 20% of the Luxembourg company's capital.
24. No WHT is levied when the beneficiary company holds at least 10% of the company paying the dividends. The rate of 5% of WHT on the gross amount of dividends applies where the beneficial owner is an individual who holds directly at least 10% of the company paying the dividends and was

- a resident of the other contracting state for the 48-month period immediately preceding the year in which the dividends are paid.
25. No WHT is levied when the beneficiary of the dividend is a joint stock company, which has held directly a participation of at least 10% (or with an acquisition price of at least EUR 1.2 million) of the distributing company's share capital, for an uninterrupted period of at least 12 months. The rate of 5% of WHT applies if said participation has been held for less than 12 months.
 26. No WHT is levied when the recipient company holds at least 10% of the Luxembourg company's capital. A holding period requirement has to be met for Sweden and San Marino.
 27. No WHT is levied when the beneficiary of the dividends is a joint-stock company that has directly held a participation of at least 10% of the distributing company's capital for an uninterrupted period of at least 12 months preceding the decision to distribute the dividend.
 28. A 5% WHT if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. No WHT is levied if the beneficial owner is a company (other than a partnership) that is a resident of the other contracting state and that holds, directly for an uninterrupted period of two years preceding the date of payment of such dividends, at least 25% of the capital of the company paying the dividends. The provision applies only to dividends from the fraction of the holding that has been the uninterrupted property of the company that is beneficial owner during said period of two years.

Tax administration

Tax returns

Companies must file their tax returns by 31 May of each year following the calendar year during which the income was earned.

Assessments are issued after the end of the tax year and normally can be finalised within five years, although the delay may extend to ten years if the declaration is found to be incomplete or inexact, with or without the intention of fraud. Once issued, the tax assessment notice is, in principle, final (unless new facts come to light).

A self-assessment procedure applies to Luxembourg resident companies. Tax assessments are issued by the tax authorities immediately upon receipt of the tax return, based on the taxable profit reported by the company. The tax authorities may then reassess or request more information on the return within the period of five years that follows the reception of the tax return.

Payment of tax

Quarterly tax advances must be paid. These payments are fixed by the tax administration on the basis of the tax assessed for the preceding year or on the basis of the estimate for the first year. This estimate is given by the company pursuant to the request of the Luxembourg tax authorities.

Final payment of CIT must be paid by the end of the month that follows the month of reception by the company of its tax assessment.

Significant developments

Tax incentives for the tax year 2012

On 15 December 2011, the Legislative Assembly approved certain tax incentives proposed by the Chief Executive of Macau in the Budget for the financial year 2012. The key tax incentives include the following:

- The tax-free income threshold for complementary (corporate) tax will continue to be increased from 32,000 Macanese patacas (MOP) to MOP 200,000 for income derived in the tax year 2011. Taxable income between MOP 200,000 and MOP 300,000 is taxed at 9%, and taxable income over MOP 300,000 is taxed at 12%.
- The standard MOP 3,500 reduction in property tax liabilities will continue to be available in the tax year 2012 for both self-use and rental properties.
- Restaurants will continue to be exempt from tourism tax in the tax year 2012.
- Insurance policies written or renewed in the tax year 2012 and banking transactions in the tax year 2012 will continue to be exempt from stamp duty.
- Admission tickets for performances, exhibitions, and entertainment programs will continue to be exempt from stamp duty in the tax year 2012.
- Commercial and industrial operations will continue to be exempt from the annual industrial tax in the tax year 2012.

Revision of the Macau Property Tax Law

The Legislative Assembly approved certain amendments to the Macau Property Tax Law on 16 February 2011. The amendments became effective on 8 March 2011 and are applicable to benefits derived from properties for the tax year 2010 retrospectively.

Under the revised Law, the property tax rate for leased properties has been reduced from 16% to 10% on the actual rental income. For self-use properties, the property tax rate has been reduced from 10% to 6% on the official ratable value. The surcharge of 5% that was previously levied on the property tax payable on such properties has been abolished.

The annual deduction of 10% of the official ratable value to cover repair and maintenance expenses is automatically available for self-use properties under the revised Law. However, approval by the Macau Finance Bureau (MFB) is still required for a maximum deduction of 10% of the rental income derived for leased properties.

Revision of the Macau Stamp Duty Law

Effective as of 4 May 2011, the 0.5% stamp duty on intermediate transfer of immovable properties, so called 'confirmor sale', has been annulled.

The revision of the Macau Stamp Duty Law was intended to curb speculation activities in the real estate market. Under the revised Law, all property transfer, whether it

be intermediate, final, or sale of uncompleted properties, will be subject to Macau Stamp Duty at a progressive rate scale ranging from 1% to 3%, thereby increasing the transactional costs of speculative property activities.

Law on Special Stamp Duty for transfer of residential properties approved

On 7 June 2011, the Legislative Assembly approved the Law on Special Stamp Duty for transfer of residential properties. The enactment of the Law was intended to further curb speculation activities in the residential real estate market. The Law was gazetted on 13 June 2011 and is effective from 14 June 2011.

Under the Law, the transferor of a residential property or property under construction acquired on or after 14 June 2011 will be subject to Special Stamp Duty of 20% on the value of the residential property if the property is resold within a year of its purchase. The Special Stamp Duty rate will be reduced to 10% if the resale takes place between one and two years after the purchase. The Special Stamp Duty is also applicable to transfer of 80% or more shareholding interest in a Macau company that has residential properties.

First Protocol to the People's Republic of China/Macau avoidance of double taxation arrangement (DTA)

The Central Government of the People's Republic of China (the PRC) and the Government of Macau signed the Protocol (Protocol) to the PRC/Macau DTA on 15 July 2009. The Protocol became effective on 15 September 2010 and is applicable to income arising as of 1 January 2011.

The PRC/Macau DTA was signed in 2003. Some of the provisions of the PRC/Macau DTA are less favourable than those of the PRC/Hong Kong DTA. Under the Protocol, the treaty-based rates for withholding tax (WHT) on dividends, interest, and royalty have been reduced. Further, the criteria for determination of a service permanent establishment (PE) and certain criteria for capital gains exemption under the PRC/Macau DTA have been clarified. In summary, the Protocol has brought the PRC/Macau DTA broadly in line with the PRC/Hong Kong DTA. This has no doubt increased the competitiveness of Macau and provided added incentives for Macau companies to do business or invest in the People's Republic of China. Nevertheless, as Macau adopts a worldwide taxation system in its domestic tax regime, consideration should be given as to whether the use of a Macau company as a holding company for investments in the People's Republic of China is favourable from a tax perspective.

Second Protocol to the PRC/Macau DTA

The Central Government of the People's Republic of China and the Government of Macau signed the Second Protocol (Second Protocol) to the PRC/Macau DTA on 26 April 2011, and this Second Protocol became effective on 8 October 2011. The Second Protocol is aimed at amending Article 26 of the PRC/Macau DTA to implement the standards on transparency and exchange of information developed by the Organisation for Economic Co-operation and Development (OECD), which are endorsed by the Group of Twenty (G20) members.

Mozambique/Macau DTA

The ratification procedures for the DTA signed between the Government of Macau and the Government of Mozambique have been completed, and the DTA became effective on 11 January 2011.

Macau

Tax information exchange agreements (TIEAs)

On 29 April 2011, the Government of Macau signed TIEAs with the Nordic countries, which include Denmark, the Faroe Islands, Finland, Greenland, Iceland, Norway, and Sweden. The Government of Macau has further signed TIEAs with Australia and India on 12 July 2011 and 3 January 2012 respectively. Together with the five comprehensive tax arrangements/agreements that Macau has signed with the People's Republic of China, Portugal, Mozambique, Belgium, and Cape Verde, Macau has enlarged the network of agreements to implement the internationally agreed standards on transparency and exchange of information for tax purposes through the signing of a total of 14 DTAs or TIEAs to date.

The TIEAs will become effective upon completion of the necessary ratification procedures by the respective jurisdictions.

Taxes on corporate income

Complementary tax is imposed on the worldwide income earned by Macau registered entities, irrespective of where their residence or headquarters are situated and irrespective of the nature of the income. The exception to the foregoing is rental income from leasing of immovable properties located in Macau, which is taxed separately under the property tax regime.

Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

According to the Macau Complementary Tax Law, complementary tax is imposed on a progressive rate scale ranging from 3% to 9% for taxable profits below or equal to MOP 300,000 and 12% for taxable profits over MOP 300,000. Taxable profits below MOP 32,000 are exempt from tax.

According to the Budget for the financial year 2012 approved by the Legislative Assembly (2012 Budget), the tax-free income threshold for complementary tax has been increased from MOP 32,000 to MOP 200,000 for income derived in the tax year 2011 (the next MOP 100,000 of taxable income is taxed at 9%, and taxable income in excess of MOP 300,000 is taxed at 12%). Such increase in the tax-free income threshold has been granted since the tax year 2007. While it is generally believed that the direction of the Macau government policy will remain stable at least for several years, the changes in tax-free income threshold and the tax brackets beyond the tax year 2011 are subject to approval by the Legislative Assembly on an annual basis, unless such amendments are written into the relevant tax laws.

Types of taxpayers and associated tax bases

Group A taxpayers

Taxpayer entities whose registered capital reached MOP 1 million, or whose average taxable profits reached MOP 500,000, per year in three consecutive years will automatically become Group A taxpayers in the tax year following the year in which the notification is issued by the Macau Finance Bureau. A taxpayer entity can also elect to become a Group A taxpayer by filing a Group A declaration form. Profits of Group A taxpayers are assessed based on the actual accounting income after making necessary tax adjustments.

Group B taxpayers

Group B taxpayers refer to any individual or any other form of companies not mentioned above and those taxpayers that do not keep detailed accounting records. Profits of Group B taxpayers are assessed on a deemed basis if the reported income is below the internal parameters set by the MFB for taxpayers in similar industries.

Corporate residence

Corporate residence is generally determined by reference to the place of establishment. The exception to the foregoing is a Macau offshore company or a Macau offshore financial institution that is established under Law 58/99/M. Such a Macau offshore company or financial institution is not considered as a Macau tax resident in the context of the comprehensive tax arrangement/agreements entered into between Macau and its treaty partners.

Permanent establishment (PE)

There is no specific definition of PE in the Macau Complementary Tax Law. Technically speaking, there are two major criteria for determining whether a foreign entity should be subject to complementary tax, and the key phrases are 'engaging in commercial/industrial activities' and/or 'rendering services in Macau'. These phrases are again not defined. Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

Other taxes**Value-added tax (VAT)**

There is no VAT regime in Macau.

Customs duties/import tariffs

Apart from consumption tax imposed on tobacco and spirits entering into Macau, there are no customs duties/import tariffs in Macau.

Consumption tax (excise duty)

Consumption tax is imposed only on tobacco and spirits entering into Macau.

There are two methods for determining the amount of consumption tax payable, by quantity or by value. The former method of assessment is based on the weight or volume of goods and the latter is based on the price of the goods imported into Macau. The rate of consumption tax varies depending on the classification of the imported goods.

Property tax

Property tax is imposed annually on the owner of buildings situated in Macau. This is first payable after acquiring a property or upon the expiry of the property tax exemption period, if applicable. Different exemption periods are granted, depending on the location of the property. Additional exemption periods may apply in special cases.

For leased properties, property tax is charged at 10% on the actual rental income, and by application, a maximum deduction based on 10% of the rental income derived to cover repair and maintenance expenses incurred will be granted, if approved by the MFB.

Macau

For self-use properties, property tax is charged at 6% on the official ratable value as established by the appointed committee of the MFB. A deduction of 10% of the official ratable value to cover repair and maintenance expenses will be automatically granted for self-use property. If the property is not occupied, the owner can apply for an exemption from property tax, the approval of which is entirely at the discretion of the MFB.

According to the 2012 Budget, there is a standard MOP 3,500 reduction in the property tax liabilities assessed in the tax year 2012 for both self-used and rental properties.

Effective from 8 March 2011, the surcharge of 5% that was previously levied on property tax payable has been abolished.

Stamp duty

Stamp duty is payable on certain types of documents and stampable transactions at a small fixed amount or at rates ranging from 0.1% to 10% on the value represented by the documents and transactions.

The charge to stamp duty has been extended to property transfers and the irrevocable transfer of certain assets. Stamp duty at progressive rates ranging from 1% to 3% is payable on transfer of immovable property with a surcharge of 5% on the duty payable, resulting in effective stamp duty rates of 1.05% to 3.15%. The irrevocable transfer of certain assets without consideration is subject to a 5% stamp duty.

Insurance policies, written or renewed, and banking transactions have been exempt from stamp duty since 2005. This exemption has been approved by the Legislative Assembly and will continue to be available in the tax year 2012.

Admission tickets for performances, exhibitions, and any kind of entertainment programmes is exempt from stamp tax for the tax year 2012, as approved by the Legislative Assembly. This exemption, if extended, will be published by the Macau government on an annual basis.

Annual industrial tax

The annual industrial tax has been exempted for the tax year 2012 and has been exempted on an annual basis by the Macau government since 2002.

Under the Industrial Tax Code, all commercial or industrial operations carried out in Macau are subject to industrial tax at the beginning of each year. The amount of the tax is dependent upon the nature of the business. The table below is an illustration of the tax amounts applicable to certain types of businesses in Macau.

Type of business	Tax (MOP)
Commercial banks	80,000
Construction companies	500
Hotels	500
Insurance companies	500
Textile companies	500

Special gaming tax

Special gaming tax is levied at 35% on the gross gaming revenue derived by gaming concessionaires authorised to carry on the operation of games of chance in Macau under Law 16/2001.

Tourism tax

Tourism tax is imposed at the rate of 5% on bill of services, excluding telecommunication and laundry services, and service charges of up to 10%, rendered in Macau by establishments such as hotels, guest houses, dancing halls, night clubs, massage/sauna parlours, gymnasium, karaoke, and the like. Such tax is generally borne by consumers.

Restaurants are exempt from tourism tax in the tax year 2012 and have been exempt, via an exemption published on an annual basis by the Macau government, since 2002.

Motor vehicle tax

Motor vehicle tax is imposed on the sale of new motor vehicles to consumers and the importation of new motor vehicles for self-use. Exemptions are available to certain persons and organisations and for certain specific usages. Generally, motor vehicle tax is levied based on the listed selling prices as registered with the MFB. The rate of motor vehicle tax varies depending on the type of motor vehicle and its value.

Land rent

According to the 2012 Budget, land rent below MOP 100 shall not be collected by the MFB in the tax year 2012. However, any such amount already collected shall not be refunded.

M

Branch income

Branch income is subject to tax at the same rate as that for corporations. The taxable income is ascertained based on branch accounts.

Income determination

The paragraphs below describe the tax acceptable treatments under the prevailing Complementary Tax Law and are for reference only.

Inventory valuation

Inventory should be stated at actual cost, and conformity between book and tax reporting is required. Market selling price or replacement cost is allowed only in special circumstances, and prior approval of the Director of the MFB is required for adoption of such inventory valuation methods. The write-down of inventory values is not permitted.

Capital gains

Gains or losses from the realisation of capital assets of a corporate taxpayer are treated as current revenue or expense items for complementary tax purposes.

Dividend income

Dividends from all sources are subject to complementary tax in the hands of a recipient incorporated in Macau unless the dividends were paid out of profits that have been taxed at the corporate level in Macau. Where dividend to shareholders is paid out

Macau

of profits of a Macau entity that have not been taxed in Macau, complementary tax will technically be charged on the dividend distribution to the shareholders, except for distribution of tax exempt profits of approved offshore institutions, where complementary tax, in practice, has not been charged by the MFB to date.

Interest income

Interest income received by or accrued to a corporate taxpayer in Macau is subject to complementary tax.

Foreign income

Companies incorporated in Macau are subject to complementary tax on worldwide income, wherever received or credited. There are no provisions in the Macau Complementary Tax Law that allow foreign income to be deferred for tax purposes. Currently, double taxation relief is available under the respective avoidance of double taxation agreements/arrangement that Macau has with Portugal, the People's Republic of China, Mozambique, Belgium, and Cape Verde.

Deductions

Please note that the assessor is empowered to disallow any business expenses (e.g. entertainment, travelling) where the amount incurred is considered to be excessive.

Depreciation

An initial allowance of 20% is granted on buildings. The rates of tax depreciation are detailed in Decree-Law No.4/90/M, dated 5 March 1990. The Decree-Law prescribes the maximum annual tax depreciation rates and the number of years of asset life for different asset classes under the straight-line method. For illustration, the maximum depreciation rates and the maximum useful life currently applicable to the general types of assets are set out below:

Assets	Maximum annual percentage rate (%)	Maximum number of years
Industrial buildings	4	50
Office and residential buildings	2	100
Machinery and installations, air conditioning, elevators, equipment	10 to 20	20 to 10
Tools	20 to 33.3	10 to 6
Laboratory, telex and interior telephone equipment, furniture, filing systems, typewriters, and accounting machines	16.66 to 25	12 to 8
Computer hardware	25	8
Office installations	14.29	14
Trucks	14.29	14
Automobiles	20	10
Intangible assets, pre-operating expenses incurred prior to commencement of business	33.33	6
Deferred expenses arising in connection with increases in share capital, changes in form of business enterprises, issuance of debentures, marketing and other studies, and financial expenses incurred for the acquisition or own production of fixed assets prior to completion	33.33	6

Assets	Maximum annual percentage rate	Maximum number of years
	(%)	
Patents	10	20
Manufacturing licences, concessionary agreements, and similar rights	*	*
Trademark	*	*

* At the discretion of the authorities.

In the case of commercial and industrial buildings, depreciation is not allowed for the value attributable to the cost of the freehold land. Where the value of the freehold land cannot be determined from the total cost of land and buildings, a portion equal to 20% is deemed to be attributable to the land value for the purpose of determining the value of buildings to be depreciated.

Depreciation can be claimed either on a prorated basis in accordance with the prescribed annual rates for assets that are not acquired at the beginning of the financial year or on an annual basis.

The cost of repairs and maintenance exceeding 10% of the acquisition cost of the asset in a given year is deemed to be an expense of a capital nature and should be capitalised and depreciated over the remaining life of the asset.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is generally deductible to the extent it is incurred in the generation of assessable profits.

Interest expenses

There is no thin capitalisation rule in Macau. However, the MFB may assess the reasonableness of the interest rate charged for interest expense paid to related parties.

Bad debts

The amount provided against doubtful trade receivables is an allowable tax deduction, but the provision cannot exceed 2% of the total receivables, except in the case of banks, where the minimum provisions required under the local banking regulations are fully tax-deductible.

Debts considered uncollectible may be written off only when adequate proof can be shown, usually by way of bankruptcy court proceedings.

Charitable contributions

A deduction of up to 0.2% of the company's turnover is allowable for donations to charitable organisations recognised by the tax authority.

Pension expenses

The employer's contribution to the staff provident fund legally registered in Macau is fully tax-deductible up to 15% of the employees' basic salary.

Fine and penalties

Tax fines are not deductible.

Macau

Taxes paid

Taxes, except for complementary tax and taxes paid on corporate profits, are generally deductible to the extent they are incurred in the generation of assessable profits.

Other significant items

- An amount provided against stock obsolescence of up to 3% of the total stock value at year-end is allowed as a tax deduction.
- Losses arising from insurable risks are not allowable as a tax deduction.
- Staff social welfare expenses paid for the benefit of employees, for example canteens and libraries, are fully tax-deductible.

Net operating losses

Agreed tax losses can be carried forward for three consecutive years for Group A taxpayers. Group B taxpayers are not allowed to carry their tax losses forward to future years. Tax losses cannot be carried back in Macau.

Payments to foreign affiliates

The regulations make no specific mention of royalties and service fees paid to foreign affiliates. The MFB generally monitors the deductibility of such payments. Payments to foreign service providers for consulting services or construction-related services are not deductible if such consulting contracts are not properly registered in Macau.

Group taxation

There is no provision for group taxation in Macau.

Transfer pricing

There is no transfer pricing provision in the Macau tax regime.

Thin capitalisation

There is no thin capitalisation provision in the Macau tax regime.

Tax credits and incentives

Foreign tax credit

There is no foreign tax credit provision in the Macau Complementary Tax Law. Foreign tax credit is only available under the relevant provisions of the comprehensive tax arrangement/agreements that Macau has entered into with the People Republic of China, Portugal, Mozambique, Belgium, and Cape Verde respectively.

Capital investment incentives

A 50% reduction in complementary tax and stamp duty on certain transactions, as well as exemptions from annual industrial tax (currently exempt for all taxpayers) and property tax (up to periods prescribed by the MFB), are allowable for taxpayers in the manufacturing industry (as defined in the Decree Law) whose capital investment is aimed at the introduction of new products or high technology, improvement of productivity, and increase in exports of goods to new markets.

Where profits are retained in reserves and reinvested in installation of new equipment within the following three financial years, the reinvested reserves can be deducted from taxable profits, provided that the reinvested reserves are attributable to profits earned

from normal business operations and the investment is considered to be beneficial for the economic development of Macau.

Offshore services business incentives

Profits derived by approved offshore institutions from prescribed offshore service-related activities are exempt from all forms of taxes, such as complementary tax, annual industrial tax (currently exempt for all taxpayers), and stamp duties.

Incentives for owners of touristic facilities

Additional incentives, such as an extended property tax exemption period, exemption from annual industrial tax (currently exempt for all taxpayers), reduction in stamp duty, as well as acceleration of depreciation for complementary tax purposes, are available to owners of facilities that qualify as touristic facilities.

Withholding taxes

Currently, there is no provision in the Macau Complementary Tax Law for the withholding of taxes from payments made by domestic corporations to overseas companies.

Tax administration

Taxable period

The Macau tax year is on a calendar-year basis.

Tax returns

Assessments are made by the MFB upon review of the tax returns, which must be lodged before 31 March or 30 June of each year for Group B or Group A taxpayers, respectively.

Payment of tax

A provisional tax payment calculated based on the declared taxable profit for a Group A taxpayer or final assessed profit for a Group B taxpayer is payable in two equal instalments, in September and November. However, if the amount is not greater than MOP 3,000, payment will be requested in one lump sum amount in September. For Group A taxpayers, a final tax assessment will be issued upon the completion of tax assessment by the MFB.

Statute of limitations

The statute of limitations period is five assessment years from the relevant year of assessment for both Group A and Group B taxpayers.

Exchange of information

Law 20/2009 is the legislation that governs the exchange of information by Macau with other tax jurisdictions within the scope of bilateral tax treaties or arrangements. Its objective is to promote the transparency of the Macau tax administration and to demonstrate Macau's willingness to cooperate with treaty partners in combating tax avoidance or tax evasion activities.

The information to be exchanged under Law 20/2009 is strictly confined to information collected for tax purposes only, and includes the following:

Macau

- Information collected within the jurisdiction of the MFB.
- Information collected by the MFB from financial institutions that are governed by the Macau Financial System Act and offshore institutions that are governed by the Macau Offshore Law (the Institutions).

So far, Macau has concluded TIEAs or DTAs that comply with the latest internationally agreed standards with 14 different tax jurisdictions. The following tables summarise the TIEAs and DTAs that Macau has signed, and the TIEAs and DTAs that are in negotiation:

TIEAs have been signed by Macau with the following countries:

- Australia
- Denmark
- Faroe Islands
- Finland
- Greenland
- Iceland
- India
- Norway
- Sweden

TIEAs are in negotiation with the following countries:

- Argentina
- Germany
- Ireland
- Jamaica
- Malta
- New Zealand

DTAs have been signed by Macau with the following countries:

Treaty partners	Effective date
The Mainland of China	1 January 2004 (Note: The first protocol and the second protocol became effective on 15 September 2010 and 8 October 2011 respectively)
Mozambique	11 January 2011
Portugal	1 January 1999
Belgium	Not yet effective
Cape Verde	Not yet effective

DTAs are in negotiation with the following countries:

- Hong Kong
- Vietnam

It is believed that more comprehensive DTAs or TIEAs will be signed between Macau and other tax jurisdictions in the near future to demonstrate Macau's willingness to continue to cooperate with the OECD countries in combating tax avoidance or evasion activities.

During the peer review meeting held from 19 September 2011 to 23 September 2011 by the OECD Global Forum on Transparency and Exchange of Information for Tax Purposes, the Phase I review report of Macau was adopted, and the peer review panel members unanimously agreed that Macau has the relevant legal and regulatory framework in place that could ensure the effective implementation of tax information exchange and that Macau complied with the internationally agreed standards.

As the information of a Macau taxpayer is becoming more transparent under comprehensive DTAs or TIEAs, it is important for Macau companies with cross-border transactions to perform periodic tax health checks to ensure that tax planning arrangements, if any, that have been put in place in the past, remain technically defensible. As Macau offshore companies continue to be a focus of investigations for

many tax jurisdictions, it is important to ensure that such companies have adequate commercial substance in Macau and the companies' transfer pricing policies are supported by appropriate transfer pricing documentation and transfer pricing studies.

Other issues

Choice of business entity

A foreign company conducting business (except for a short term project) in Macau is obligated to set up a legal establishment, which could be in the form of a company or a branch.

There are two types of Macau companies: companies limited by shares and companies limited by quotas. The capital and corporate governance requirements for a company limited by shares are higher than a company limited by quotas, and, in general, a company limited by quotas is used by investors that are not in regulated industries.

Significant developments

New changes were introduced in the Corporate Income Tax (CIT) Law applicable as of 11 October 2011. The changes are in respect to the legal remedies available to the taxpayers should the tax authorities fail to respond to the request for decreasing the tax liability regarding introduced fiscal registers within the statutory deadline. The same changes are introduced regarding the request for tax refund.

Following the amendments to the CIT Law, a new Rulebook for the Manner of Calculation and Payment of CIT and Prevention of Double Exemption or Double Taxation ('the Rulebook') was enacted on 15 December 2011. The Rulebook generally explains in more details the CIT Law provisions and prescribes the forms of the annual tax returns and the withholding tax (WHT) exemption requests. It gives more detailed definitions for some items in the CIT Law, such as organised transport, organised food, individuals related to the legal entities, etc. These definitions will be applicable when determining the amount of non-deductible expenses deriving from the above-mentioned items. Further, it introduces the necessity of transfer pricing documentation supporting the prices used in transactions with related parties. The Rulebook gives more detailed information regarding the determination of the tax-deductible interest rate on loans between related parties as well as information on the applicability of the thin capitalisation rules. Additionally, it allows tax credit for all expenses, with deferred recognition for tax purposes for which the tax base has been increased in the previous periods. Finally, it introduces new forms for obtaining WHT exemption and the need of an existence of a double tax treaty (DTT) for using tax credit for the tax paid abroad.

The new changes in the Value-add Tax (VAT) Law applicable as of 11 October 2011 introduced additional supplies that will be subject to the preferential 5% VAT rate, as follows:

- Raw oil used in the food industry or for consumption.
- The first sale of residential premises within five years from the end of its construction.
- Accommodation services, bed and breakfast services, as well as half board and full board services provided by hotelkeepers in the country.

The changes in the Customs Law applicable as of 14 March 2012 introduce lower customs duty rate of 5% (previously 30%) on import of white sugar. Also, the importation of certain raw precious metals is exempt from customs duties.

Taxes on corporate income

Generally, all resident and non-resident legal entities operating through a permanent establishment (PE) are liable to pay CIT in Macedonia.

Macedonian resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Macedonian-source income. Non-business organisations (including governmental bodies) are taxed on income from their business activities (if any).

The CIT rate is 10%.

There are two separate tax bases for CIT which are subject to filing of two separate tax returns.

The first tax base is the sum of taxable expenses and understated revenues decreased by any available tax credits and tax reliefs. In this case, tax is payable on an annual basis regardless of whether the corporate taxpayer incurs profit or loss.

The second tax base is the amount of dividends or other type of profit distributions by the taxpayer in monetary or non-monetary form. Under recent amendments, the definition of 'other type of profit distributions' was extended to cover also the increase of registered capital as a result of asset revaluation as well as payments from profit to shareholders, members of managing bodies, and employees, based on the taxpayer's decision.

Distribution of profit to resident legal entities is exempt from CIT. Therefore, only distributed profit to individuals (foreign or domestic residents) or to non-resident legal entities is taxable.

Taxpayers are obliged to cover the losses from previous years prior profit distribution. The distributed amount is taxed at the moment of payment. Upon each profit distribution, a corporate taxpayer is obliged to submit a tax return containing information for the dividend beneficiary and the year from which the profit to be distributed arises. If the profit arose prior to 2009, CIT is not payable.

Undistributed profit is tax exempt. Undistributed profit is determined in accordance with the accounting regulations and standards decreased by the amount of CIT paid on taxable expenses and understated revenue.

Simplified tax regime for companies

Under the amendments in the CIT Law effective as of 16 April 2011, more companies (except companies that provide banking, financial, and insurance services, as well as services in the field of games of chance and entertainment games) can choose to benefit from the simplified tax regime based on their overall annual income. Provided other criteria prescribed in the CIT Law are met, the companies will qualify for the simplified tax regime if their overall annual income from all sources is between 3 million Macedonian denari (MKD) and MKD 6 million. These companies will pay 1% CIT on their overall income from all sources as stated in their income statement and financial statements for the respective calendar year. Provided their overall annual income in the following three years is within the above range, the companies cannot request to be excluded from the simplified tax regime.

Macedonia

According to the amendments, exemption from tax is introduced for companies under the simplified tax regime with an overall annual income from all sources up to MKD 3 million.

Local income taxes

There are no local government taxes levied on corporate income.

Corporate residence

A company is resident in Macedonia for tax purposes if it is established or maintains its headquarters in the territory of Macedonia. Foreign legal entities with headquarters abroad are non-residents for tax purposes, but their Macedonian branches are liable for tax on any profit generated in the territory of Macedonia if they are considered as a PE for the foreign legal entity in Macedonia.

Permanent establishment (PE)

Generally, a PE is a fixed place of business through which the business of an enterprise is wholly or partly carried on, either directly or through a dependent agent.

More specifically, the domestic law provides that a PE may include a place of management, a branch office, an office, a factory, a workshop, mining activities, or any other place of extraction of natural resources.

A building site or construction or installation project, as well as related supervision activities, may constitute a PE if it lasts longer than six months.

Furthermore, the provision of services, including consulting services with regard to one or several related projects, is deemed to give rise to a PE if such activities last longer than 90 continuous days within any 12-month period. According to recent amendments effective as of April 2011, if one or several persons establish a PE as per above, any other non-related project on which they are working on becomes part of the PE irrespective of its duration.

The amendments also prescribe that the PE should be registered as a corporate taxpayer at the beginning of its activity in the country for the purposes of obtaining a tax number. However, this provision seems to contradict the Companies Law requirement, which states that if operating in Macedonia, the foreign companies are obliged to establish at least a branch in the country. Therefore, it should be further clarified whether tax registration of a PE shall be possible without establishment of a legal form as per the Macedonian Companies Law.

Other taxes

Value-added tax (VAT)

In general, the VAT regulations are in line with the provisions of the sixth European Union (EU) VAT directive.

The standard VAT rate is 18%. This rate applies to overall turnover and imports of goods and services. A lower rate of 5% applies to supplies of certain goods and services, such as supply of food for human consumption; drinking water from public supply systems; computers and software; agricultural material and equipment; pharmaceuticals and medical equipment; publications such as books, pamphlets, newspapers, and other

printed material, except for publications mainly used for advertising purposes; transport of passengers; and accommodation services, bed and breakfast services, as well as half board and full board services provided by hotelkeepers in the country.

As per recent amendments, all taxpayers whose total annual turnover exceeds MKD 2 million or whose total supplies, as projected at the beginning of the business activity, will exceed this amount, are liable to register for VAT purposes.

Residents that do not meet the criteria above may voluntarily register for VAT purposes at the beginning of each calendar year.

The standard VAT period is one calendar month. However, if the total turnover in the previous calendar year did not exceed MKD 25 million, the tax period is the calendar quarter. The tax period for voluntarily VAT registered taxpayers is the calendar year.

A taxpayer is obliged to submit a VAT return for each tax period within 25 days following the end of the relevant tax period.

Customs duties

Customs duties generally apply to most products imported into Macedonia. The customs rates under the most favoured nation treatment for agricultural products are up to 31%, whereas the customs rates for industrial products are below 23%.

Macedonia has signed trade agreements with Turkey, Ukraine, and European Free Trade Association (EFTA) member states. The country is a member state to the Central European Free Trade Agreement (CEFTA) and has signed a Stabilisation and Association Agreement with the European Community.

The import of industrial products with preferential origin is custom duty exempt as of 2011. In addition, the import of certain raw precious metals is also exempt as of 14 March 2012.

According to the Stabilisation and Association Agreement 2001 between Macedonia and the European Union, generally, products with Macedonian origin can be exported into EU countries free of customs duties.

Excise duties

Excise duties are levied with respect to a limited number of goods produced or imported in Macedonia. Petroleum products, alcohol and alcoholic beverages, tobacco products, and passenger motor vehicles are subject to an excise duty at a flat or percentage rate. The excise period is one calendar month, and excise duty is payable within 15 days as of the end of the calendar month. The excise duty for alcohol beverages and tobacco goods is levied by way of purchasing excise stamps.

The excise duty for petroleum products is payable per kilo/litre and ranges between MKD 0.1 and MKD 24.

Alcohol and alcoholic beverages are taxable per litre/percentage of alcohol. Some categories of alcoholic beverages (e.g. wine) are subject to no excise duty. Maximum excise duty payable is up to MKD 300 per litre on pure alcohol.

The excise duty for tobacco products is combined and is calculated both per piece/kilo and as a percentage from the retail price as follows:

Macedonia

- MKD 1.35 per cigar and 0% from its retail price.
- MKD 0.10 per cigarette and 35% of from its retail price.
- MKD 1,350 per kilo smoking tobacco and 0% from its retail price.

The excise duty for passenger motor vehicles is calculated as a percentage of the market value or the custom value of the vehicle. It ranges from 0% for vehicles valued up to 3,000 euro (EUR) to 18% for vehicles valued above EUR 30,000.

Property tax

Property tax is paid annually on the ownership of real estate, including land (agricultural, construction, forest, and pastures) and buildings (residential buildings or flats, business buildings and business premises, administrative buildings and administrative premises, buildings and flats for rest and recreation, and other construction facilities, as well as installations constructed on the buildings or below and permanently attached to the buildings).

The person liable for property tax is the legal entity or the individual owner of the property. If the owner is not known or cannot be reached, the person liable for property tax is the user of the property. A property taxpayer may also be the taxpayer who usufructs the property; and if the property is owned by several persons, each of them is a property taxpayer proportionately for the portion owned. A property taxpayer is also the legal entity who uses real estate owned by the state and the municipality.

The property tax base is the market value of the real estate. The market value of the real estate is determined by a special municipal commission in accordance with the methodology prescribed by the government.

Property tax rates are proportional and range from 0.10% to 0.20%. The rates may be determined on the basis of the type of the property. As an exception, property tax rates on agricultural land not used for agricultural production may be increased outside the above range (i.e. from three to five times in relation to the basic rates).

The amount of the rates is decided by the Municipal Councils.

Transfer tax

The transfer of the right to ownership of real estate for or without compensation, as well as other means of acquiring real estate for or without compensation, between legal entities is subject to transfer tax.

The person liable for transfer tax is the seller of the real estate. As an exception, a taxpayer may also be the buyer of the real estate, if agreed in the sale and purchase agreement. When replacing real estate, the taxpayer is the party that replaces the real estate of greater value.

When selling real estate in bankruptcy and executive procedure, as well as when realising agreements on mortgage, the taxpayer may be the buyer of the real estate.

In the case of transfer of ownership of an ideal share in real estate, taxpayers are each of the owners separately.

The tax base is the market value of the real estate at the moment the tax liability arises.

When replacing real estate, the tax base is the difference between the market values of the real estate being replaced.

When selling real estate in bankruptcy and executive procedure, the tax base is the attained selling price.

The market value is determined by a special municipal commission in accordance to the methodology prescribed by the government.

Tax rates are proportional and range from 2% to 4%. The tax rates are determined by the municipal councils by way of decision.

There are certain exemptions from transfer taxes available for specifically determined cases (i.e. transfer of shares, sale of securities, the first sale of residential premises for the first five years from the end of their construction, etc.).

Stamp taxes

Stamp taxes are not payable in Macedonia.

Garbage collection fee

A garbage collection fee is payable for immovable property depending on the type of property and on the surface area used. It is calculated on the basis of a tariff. It is collected together with the bills for water usage.

Companies and individuals are liable for paying communal taxes for usage of certain rights and services (mainly for usage of the urban space in the municipalities, posting commercials, etc.).

Branch income

Branch offices are registered in the Trade Registry. Branches are subject to CIT in accordance with the general statutory provisions. The foreign parent company is fully liable for the obligations of its established branch office in Macedonia.

A foreign company that is entitled to carry out commercial activities pursuant to its national legislation may establish a commercial representative office in Macedonia. Representative offices are not legal entities and may not carry out any commercial activities. Representative offices are not subject to CIT.

Income determination

Capital gains, as well as income from dividends, interest, rent, and royalties are treated as ordinary income of the taxpayer and are included in its general taxable base in accordance with accounting rules and standards. Since the accounting profits of a company are not taxable until distributed to individuals and non-resident legal entities, such income is not subject to CIT before that time.

Inventory valuation

As of 16 April 2011, the provisions in the tax legislation regarding inventory valuation were abolished. Prior to 16 April 2011, corporate taxpayers were restricted to value inventories for tax purposes in accordance to the weighted average price method.

Macedonia

Deductions

Tax base on taxable expenses and understated revenues

The CIT Law exhaustively lists the expenses which are not recognised for tax purposes and are part of the tax base on taxable expenses and understated revenues.

Hidden profit distribution

As of 16 April 2011, hidden profit distributions are taxable as part of the tax base on taxable expenses and understated revenues. The following transactions with shareholders or their related parties are considered as hidden profit distribution subject to CIT:

- Sales of goods/services on terms below the market price.
- Purchase of goods/services on terms above the market price.
- Providing loans with an interest lower than the market one.
- Arrangements under which gains are realised by the shareholders or their related parties.

Unjustified shortages are also taxed as hidden profit distribution if not reimbursed from the salary of the authorised person.

Some of the transactions as per above may be regulated under the transfer pricing provisions in the CIT Law as well. It seems that the purpose of this provision was to tax the non-fair transactions with shareholders and their related parties which do not fall under the 'related-party' definition as per the CIT Law.

Non-business-related expenses

Expenses which are not related to the business activity of the taxpayer are taxable.

Depreciation

As of April 2011, corporate taxpayers can apply depreciation methods and rates as well as perform impairment of their fixed assets under applicable accounting standards without any tax consequences.

Prior to the amendments, the depreciation of intangible and tangible assets was not taxable up to the amount calculated on the acquisition value of such assets, by applying depreciation rates within the limits set by the law. Once determined, the depreciation method was used until the final depreciation of the asset or group of assets.

Interest expenses

Interest paid on non-business related credits of the taxpayer as well as interest on credits for purchase of passenger vehicles, furniture, carpets, works of art, and decorative objects is a taxable expense. Interest on business-related credit is also taxable provided it falls under the thin capitalisation or transfer pricing rules (*see Thin capitalisation or Transfer pricing in the Group taxation section for more information*).

Impairment and write-off of receivables

Impairment of receivables is not taxable for banks, saving institutions, and insurance companies if impaired in accordance to the methods prescribed by law. As to other corporate taxpayers, impairment of receivables is a taxable expense if not based on an effective court decision or reported and confirmed as debts in liquidation or bankruptcy procedure. The taxpayers are entitled to a tax credit for the tax paid on collected impaired receivables in the year of collection.

Write-off of receivables is a taxable expense for all corporate taxpayers.

Charitable contributions

Donations and sponsorships expenses are taxable if not pursuant to the manner, the conditions, and the procedure set forth in the Law on Donations and Sponsorships in Public Activities. If compliant with the law requirements as per above, donations are taxable if the annual amount borne by the taxpayer exceeds 5% of its overall revenue, whereas sponsorship expenses are taxable if above 3% of the overall revenue of the taxpayer.

Compensation expenses

Employees' related expenditures (e.g. organised transportation to/from work, organised food (cantina), business trip allowance, field allowance, family separation allowance, one-off severance payment, retirement allowance, annual holiday allowance, anniversary awards) are taxable if paid over the amount prescribed by law and collective agreement.

Voluntary pension insurance contributions are taxable if their annual amount per employee exceeds four average monthly gross salaries paid out in the previous calendar year.

The monthly allowances and expenses to the managing board members are tax-deductible up to 50% of the average gross monthly salary paid out in the country in the previous year.

Insurance expenses

Personal insurance premiums paid for members of the management board and the employees (if not paid out of their salary) are taxable expenses. Only the collective insurance of the employees for work related injuries is a non-taxable expense for corporate taxpayers.

Entertainment expenses

Expenses for gifts, business dinners, recreation, and entertainment are taxable up to 90% of the annual amount borne by the taxpayer.

Scrapping

Expenses for scrapping exceeding the standards for the particular industry are taxable if not caused by *vis major* or an uncontrollable event.

Fines, penalties, and taxes

Fines and tax penalties, penalty interest on unpaid public duties, and expenses for enforced payments, as well as WHT borne by the taxpayer on behalf of third parties, are taxable.

Net operating losses

Loss carryforwards are not specifically regulated in the Macedonian tax legislation. However, due to the concept of corporate income taxation of distributed profit, in essence, accounting losses could be carried forward indefinitely. This is because of the fact that profit can be distributed only if losses from previous years are covered.

Loss carrybacks are not allowed under the Macedonian tax legislation.

Macedonia

Tax losses on taxable expenses and understated revenues

As of April 2011, tax losses arising from taxation of taxable expenses and understated revenues could be carried forward in the next consecutive five years. Such tax losses are recognised when the tax credit and reliefs exceed the amount of taxable expenses in the tax return on taxable expenses and understated revenues.

Payments to foreign affiliates

There are no specific provisions in the tax legislation with regard to payments towards foreign affiliates.

Group taxation

Tax consolidation provisions were abolished in Macedonia as of 1 January 2009.

Transfer pricing

As of 16 April 2011, the transfer pricing provisions are extended to cover not only the expenses but also the revenues resulting from related party transactions.

The difference between the market price and the transfer price is a taxable expense in the tax return on taxable expenses and understated revenues. As of April 2011, the cost plus method, in addition to the comparable uncontrolled price method, are applicable. No reference is made to other methods accepted by the Organisation for Economic Co-operation and Development (OECD).

The part of the interest paid on loans to related parties which exceeds or is below the interest payable between unrelated parties is considered taxable.

Penalty interest imposed between related parties shall be considered as a taxable expense.

Transfer pricing rules do not apply on expenses for interest under credits and penalty interest paid to related parties which are banks or financial institutions.

According to the changes in the CIT Rulebook applicable as of December 2011, upon request by the Macedonian tax authorities, companies should provide enough documentation as evidence that the transactions with related parties were in line with the 'arm's-length principle'.

Thin capitalisation

As of April 2011, part of the interest related to a loan received from a non-resident shareholder, who directly holds at least 25% of the capital in the company, that exceeds three times its share in the equity in the company will be taxable during a tax period. Thin capitalisation rules do not apply to loans received from banks or other financial organisations. Also, thin capitalisation rules do not apply for newly established companies within the first three years of operation.

Tax credits and incentives

Foreign tax credit

The taxpayer is allowed a tax credit for the tax paid on foreign income abroad up to the amount of tax payable for that income in Macedonia. The WHT on dividends and CIT paid abroad can be credited against the corporate tax liability on profit distribution. The

foreign WHT paid on other types of income, except dividends, can be credited against the corporate tax liability on taxable expenses and understated revenues.

Technological industrial development zones

A taxpayer that is a registered user within a technological industrial development zone is exempt from profit tax payment for a period of ten years from the commencement of the performance of the activity in the zone under terms and conditions and according to a procedure determined with the Law on Technological Industrial Development Zones.

Withholding taxes

All domestic legal entities and domestic physical persons that are registered for carrying out an activity, as well as foreign legal entities or physical persons that are non-residents but have a PE in Macedonia, are obliged to withhold tax when paying certain types of income to a foreign legal person and to pay the tax withheld to a respective suspense account simultaneously with the payment of the income.

The WHT rate is 10% and is applied on the following forms of incomes payable abroad:

- Dividends.
- Interest.
- Royalties.
- Income from entertainment or sporting activities in Macedonia.
- Income from management, consulting, financial services, or services related to research and development.
- Income from insurance or reinsurance premiums.
- Income from telecommunications services between Macedonia and a foreign country.
- Income from the lease of immovable property in Macedonia.

As an exception, WHT is not applicable to the following forms of income:

- The after-tax profit of a PE transferred to its foreign headquarters.
- Interest from bonds issued or guaranteed by the government.
- Interest on deposits in banks located in Macedonia.
- Income from transactions in state securities on the international financial markets.

If a double taxation avoidance agreement is in place, WHT shall be payable in accordance with the provisions from the DTT. Taxpayers are obliged to obtain approval from the Macedonian tax authorities prior to applying the tax rates from the DTT.

Macedonia has signed DTTs with the 38 countries listed in the chart below:

Recipient	WHT (%)			
	Dividend	Interest	Royalties	Other income
Albania	10	10	10	0
Austria (1)	0/15	0	0	0
Belarus (2)	5/15	10	10	0
Belgium (2, 8)	10/15	15	10	0
Belgium (1)	5/15	10	10	0
Bulgaria (2)	5/15	10	10	0

Notes

1. The lower rate applies to dividends paid out to a foreign company, which controls at least 10% of the share capital of the payer of the dividends.
2. The lower rate applies to dividends paid out to a foreign company, which controls at least 25% of the share capital of the payer of the dividends.
3. The zero rate applies to dividends paid out to pension funds.
4. These DTTs are still not in force.
5. The DTT with Federal Republic of Yugoslavia now applies both to Serbia and Montenegro.
6. The zero rate applies to dividends paid out to recognised pension funds and to foreign companies which continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company which controls at least 10% of the share capital of the payer of the dividends. The 10% rate applies to dividends paid out in all other cases.

7. The tax rate of 10% for royalties payments applies only for utilisation or right to utilise cinematographic films and films or tapes for radio and television transmission. The 5% rate applies on all other cases.
8. The DTT concluded between the Socialist Federal Republic of Yugoslavia (SFRY) and Belgium is still applicable for Macedonia.
9. The zero rate applies to dividends paid out to pension schemes and to foreign companies which continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company which controls at least 10% of the share capital of the payer of the dividends. The 15% rate applies to dividends paid out in all other cases.

Tax administration

Taxable period

The taxable period for which CIT is determined covers one calendar year.

Tax returns

Taxpayers are obligated to calculate and pay CIT on taxable expenses and understated revenues on the basis of a tax return on taxable expenses and understated revenues which must be submitted to the Public Revenue Office by the end of February the following year.

Taxpayers who distribute profit are obliged to calculate and pay CIT on the basis of a tax return on profit distribution, which should be submitted to the tax authorities up to the date of profit distribution.

Small taxpayers who fall under the simplified tax regime are obliged to calculate and pay the tax due on the basis of a tax return on overall income which should be submitted to the tax authorities by the end of February the following year.

Payment of tax

Corporate taxpayers are obliged to pay monthly CIT advance payments during the year within 15 days of the end of each month.

Monthly CIT advance payments are calculated as one-twelfth of the tax obligation on taxable expenses and understated revenues for the previous calendar year increased by the index of cumulative retail price growth as determined by the State Statistical Bureau.

The difference between the advance payments and the final CIT liability as determined in the tax return on taxable expenses and understated revenues should be paid within 30 days as of the dead-line for submission of the tax return on taxable expenses and understated revenues. Daily penalty interest of 0.03% is due on late tax payments.

In case the sum of monthly advance payments exceeds the final tax liability in the tax return on taxable expenses and understated revenues, the taxpayer may request for a refund of overpaid tax. The tax should be refunded within 60 days as of the date of submitting the request. If the taxpayer does not ask for a tax refund, the overpaid amounts will be considered as advance payment for the following period.

Macedonia

Other issues

Choice of business entity

The Macedonian Trade Companies Law provides for the following types of entities:

- General partnerships.
- Limited partnerships.
- Limited liability companies.
- Joint stock companies.
- Limited partnerships by shares.
- Foreign business entities may register a branch office or a representative office in Macedonia.

Significant developments

Reduction of income tax rate

Income tax rates, including corporate income tax (CIT), salary income tax, withholding tax on capital interest, and capital gain on real estate, decreased from 22% to 21% in 2012.

Financial year change

In 2012, the financial year may be spread over any period of 12 months.

Tax reduction for companies investing in the production and supply of renewable energy

In 2012, companies investing in the production and supply of renewable energy can benefit from a tax reduction equal to the tax corresponding to 50% of the amount of investment that they realised during the related tax year.

Value-added tax (VAT) developments

Transport companies are allowed to claim VAT input on gasoline used for land transportation. The objective is to reduce the impact of cost of oil and gas on transportation fees.

In 2012, all transactions made by a VAT vendor with a non-VAT vendor must be done via the banking system when the value of the transaction exceeds a threshold fixed by Decree.

Taxes on corporate income

Taxation of residents

Resident corporate entities are subject to CIT based on realised worldwide income.

A corporate entity having an annual turnover less than 20 million Malagasy ariary (MGA) is subject to CIT at a rate of 5% of 70% of turnover, with a minimum tax of MGA 16,000.

A corporate entity registered in Madagascar and having an annual turnover exceeding MGA 20 million is subject to CIT at a rate of 21%. Note that the CIT rate was 22% in 2011.

The tax payable cannot be less than 5/1,000 of turnover plus a fixed amount of MGA 100,000 for taxable persons carrying on agricultural, artisan, transportation, industrial, hotel, or mining activities. The minimum tax cannot be less than 5/1,000 of turnover plus MGA 320,000 for other activities.

Madagascar

Taxation of non-residents

Only Madagascar-source income is taxable for non-residents.

Revenue of foreign businesses that do not have a permanent establishment (PE) in Madagascar is subject to withholding income tax at a rate of 10% of any income realised in Madagascar.

Local income taxes

No other local income taxes are applicable in Madagascar.

Corporate residence

Companies are considered resident in Madagascar if they are registered in Madagascar or have a legal existence in Madagascar.

Permanent establishment (PE)

While there is no definition of PE in the Madagascar tax law, companies usually are required to have a legal existence when they carry out business in Madagascar or have revenue from ownership of assets in Madagascar.

Other taxes

Value-added tax (VAT)

The VAT rate is 20%, and the VAT rate on export is 0%. VAT input is recoverable under certain conditions.

VAT is applicable to all transactions realised in Madagascar by a VAT vendor. Services are considered to be performed in Madagascar if such services are used in Madagascar or invoiced to a taxpayer established in Madagascar.

Transport companies are allowed to claim VAT input on gasoline used for land transportation. The objective is to reduce the impact of cost of oil and gas on transportation fees.

Any corporate entity or individual person who realises an annual turnover exceeding MGA 200 million is a VAT vendor. For a business realising annual revenue less than MGA 200 million, VAT vendor registration is an option.

A foreign company that has no PE in Madagascar but renders services to a Madagascar taxpayer must appoint a tax representative to collect and pay VAT on its behalf. Otherwise, the beneficiary of the services must collect and pay VAT on behalf of the foreign supplier.

As of 2012, all transactions made by a VAT vendor with a non-VAT vendor must be done via the banking system when the value of the transaction exceeds a threshold fixed by Decree.

Custom and import tax

The importation of goods is subject to payment of custom and import tax payable to the custom office.

In addition, Gasynet fee corresponding to 0.5% of the cost, insurance, and freight (CIF) value of goods is applicable on importation of goods.

Excise taxes

Excise duty applies on a range of goods and services, such as tobacco, alcohol, lighters, and communication by mobile phones. Excise duty rate ranges from 7% to 200% or a fixed amount per litre or per unit.

Real estate ownership tax

Real estate ownership tax is imposed annually at the rate of 5% to 10% on the rental value of the property. Land ownership is also taxable at a rate depending on the nature of the land.

Registration fees

Registration fees are applicable to transfers of title ownership (e.g. sales, donations) of movable and immovable assets, to transfers of interests, to share capital increases, and to lease agreements.

Registration fee rates are 0.5% to 6%, depending on the nature of the transaction.

Payroll tax

Salary income taxes, called *Impôt sur les Revenus Salariaux et Assimilés* (IRSA), are levied at a rate of 21% on the total taxable remuneration of employees, including salaries, allowances, and benefits in kind. Employers are responsible for withholding and paying salary income taxes on behalf of employees.

Social security contributions

Employers must contribute to *Caisse Nationale de Prévoyance Sociale*, Madagascar's national social security fund, which includes pensions and accident insurance. The contribution is capped at 13% of eight times the legal minimum salary per employee.

Health contributions

Employers must contribute to the health system assessment at a rate of 5% of the total amount of taxable remuneration of its employees.

Tax on insurance contracts

All insurance or life annuity conventions concluded with a company, insurance firm, or with any other Madagascan or other insurer are subject to an annual tax on insurance contracts at a rate of 3% to 20% levied on the insurance premiums.

Branch income

The tax on branch income is the same as for corporate income. The branch income tax base is the income realised by the branch in Madagascar.

Income determination

Inventory valuation

There are no provisions for valuing inventories or determining inventory flows in Madagascar. The tax treatment will follow the accounting treatment.

Madagascar

Capital gains

There is no provision for capital gains in Madagascar, except for capital gains on the sale of real estate by an individual. Capital gains made by a company on the sale of assets and interests are considered as normal business income that is subject to CIT.

Dividend income

Dividends received by a company are considered as business income subject to CIT.

Stock dividends

Stock dividends are unusual, but they are considered as business income that is subject to CIT.

Interest income

Interest income received by a resident taxpayer from another entity established in Madagascar is subject to withholding tax (WHT) at a rate of 21%. Revenue already subject to WHT is no longer taxable to CIT.

Foreign income

Foreign income is considered as normal business income subject to CIT unless a tax treaty is established and indicates otherwise.

Deductions

Depreciation

The amount of deductible depreciation should not exceed the amount that is calculated according to the following rates of depreciation provided by the law:

Asset	Depreciation rate (%)
Industrial buildings	5
Plant and machinery	10
Mining exploration and development (licence)	33
Transportation (Car)	20
Transportation (utility cars, vans, trucks)	25
Computers	25
Electricity generators	10

With the exception of buildings, it is also possible to practise a graduated depreciation. In this case, the annual depreciation corresponds to 30% of the net book value of the asset.

In case of loss, depreciation of assets can be deferred and carried forward to the next financial years until absorption.

Goodwill

There is no provision concerning deductibility of goodwill in the Madagascar tax code.

Start-up expenses

There is no specific tax provision on start-up expenses. Accounting rules are applicable for the profit and loss recognition.

Start-up and prospecting expenses for the installation of an overseas establishment, as well as the costs of running such a foreign establishment, for the first three years are tax deductible. However, the amounts deducted must be reported, in equal amounts, to the taxable income of the five consecutive years from the fifth year following the creation of the foreign establishment.

Interest expenses

Interest expenses are deductible. However, interests on inter-company loans are subject to thin capitalisation rule (see *Thin capitalisation in the Group taxation section for more information*).

Bad debt

To be tax-deductible, provisions for doubtful debt must be subject to justification of existence of amicable or judicial settlement.

Charitable contributions

Payments made for the benefit of educational, social, or cultural recognised public associations; accredited bodies for scientific research; or for the promotion and creation of businesses for achievement of planned economic and social development are deductible within the limits of 0.5% of annual turnover.

Gifts in kind or in cash granted in case of natural calamities and donations in cash granted to a corporation established by decree for the interest of the nation are also deductible.

Any other charitable contributions are not deductible.

Deductible wages

Salaries and wages that are not included in salary income taxes or not declared to *Caisse Nationale de Prévoyance Sociale* are not deductible.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Taxes

Except for CIT, taxes in relation to business in Madagascar are deductible.

Third-party taxes borne by the company are not tax-deductible.

Net operating losses

Accumulated loss can be carried forward for the next five financial years following the period in which the loss occurs.

Payments to foreign affiliates

For branches, the deductible amount of overhead that the head office can charge to the branch is limited to 1% of the turnover of the branch.

For interest on inter-company loans, only interest calculated on twice the amount of the share capital, at a rate practised by the Central Bank plus two points, is deductible.

Group taxation

There is no provision regarding group taxation in Madagascar.

Madagascar

Transfer pricing

There is a provision in the tax law allowing the tax authority to claim a tax adjustment in cases where the transactions between a Madagascar entity and a foreign entity controlling or controlled by the Madagascar entity are not concluded on an arm's-length basis. However, there is no definition of arm's-length bases under the Malagasy law. In practice, deductibility of inter-company expenses is appreciated by the tax authority based on the following:

- The agreement must correspond to actual services.
- The amount invoiced must be reasonable compared to the market practice.
- The services rendered must be required for the exploitation.

Thin capitalisation

Under Malagasy tax law, deductible inter-company financial interest cannot exceed the interest calculated on twice the share capital at the rate of the Central Bank of Madagascar plus two points (the April 2012 rate of the Central Bank of Madagascar was 9.5%).

Tax credits and incentives

The following activities benefit from a special tax and/or customs regime:

Microfinance activity

Microfinance benefits are available for entities specialising in lending money on the basis of small or medium scale value. Entities duly licensed to practise microfinance activities are exempt from CIT during the first five years. After this period, the microfinance company is subject to CIT at a rate of 21%.

Free zone (free trade zone)

Free-zone law is available for industrial and other service providers that export all of their products. If eligible under the free-zone law, a CIT exemption is provided during the first two to five years and a reduced CIT of 10% is levied thereafter. Exemption from customs duties on importation is also provided.

Companies investing in the production and supply of renewable energy

Companies investing in the production and supply of renewable energy can benefit from a tax reduction equal to the tax corresponding to 50% of the amount of investment that they realised during the related tax year. The right to reduction that can be used under the tax year cannot exceed 50% of tax actually due. The balance is carried forward with the same limitation to subsequent years, until clearance.

Big investment mining

A mining company committing to invest more than USD 50 million is considered a big investment mining company. The big investment mining law provides a minimum income tax exemption, a reduced CIT rate for the transformation entity (i.e. the entity in charge of processing the extracted minerals), exemption from custom and importation duties, and VAT reimbursement on locally purchased equipment and investments.

Petroleum code

The petroleum code provides a custom and importation duties exemption for hydrocarbon research, exploration, and exploitation activities.

Leasing law

The leasing law provides that leasing activities can benefit from CIT exemption and reduction of tax rate during the first four years.

Foreign tax credit

Except under a tax treaty, there is no foreign tax credit rule under the Malagasy tax law.

Withholding taxes

WHTs are levied as follows:

- *Impôt sur les revenus des capitaux mobiliers* (IRCM): WHT on interest of 21% is applicable on financial loan interest. However, interest paid to banks, financial institution, and foreign financial organisation is exempt.
- WHT of 21% is applicable on remuneration of a member of a board of directors or a single director.
- Income tax for non-resident entity: Management fees, royalties, technical and assistance fees, licence fees, equipment rental fees, and any income realised by foreign suppliers is subject to withholding income tax at a rate of 10%.

Madagascar has signed two tax treaties.

Recipient	Dividends (%)	Loan interest (%)	Royalties, management fees, services fees (%)
No tax treaty	0	21	10
France	15 (max)	15	15 (max)
Mauritius	10 (max)	10	5 (max)

Tax administration

Taxable period

From 2012, the financial year may be spread over any period of 12 months. There is no need to obtain prior authorisation in order to close the financial year on a date other than 31 December or 30 June.

Tax returns

CIT returns are due before 15 May each year for companies whose financial year-ends at 31 December, before 15 November each year for companies whose financial year-ends at 30 June, and within four months from the date of closing of the financial year for all other year-ends.

Payment of tax

CIT is payable bi-monthly in provisional instalments. The balance is payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and within four months from the date of closing of the financial year for all other year-ends.

WHT on foreign services is payable to the tax authorities within one month of the date of payment.

Madagascar

WHT on interest and on payments to members of boards of directors are payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and within four months from the date of closing of the financial year for all other year-ends.

Audit cycle

According to the corporate law, an annual statutory audit is required. An auditor is appointed for six financial years for a corporation (*société anonyme* or SA) and for three years for a private limited liability company (*société à responsabilité limitée* or SARL).

Statute of limitations

The tax limitation period is three years.

Topics of focus for tax authorities

Areas where tax authorities usually claim adjustment are:

- VAT reverse on foreign services.
- Completeness of VAT output on revenue.
- Sales without invoices.
- Expenses without invoices.
- Employees remuneration not subject to salary tax.
- Payment to non-registered suppliers.

Malawi

Significant developments

As of 1 July 2011, the following developments have entered into effect:

- Minimum tax based on turnover has been introduced on loss-making companies and companies with low profits, as follows: 1% of turnover for annual turnover of 50 million Malawian kwachas (MWK) or less; 2% of turnover for annual turnover of more than MWK 50 million.
- Investment allowances for manufacturers has been reduced from 100% to 40% of the cost for new and unused plant and machinery and industrial buildings and from 40% to 20% for used assets.
- Additional 50% training allowance has been abolished. Previously, the cost of training a Malawian employee to obtain a degree, diploma, or a certificate in the field relevant to the employee's job would attract a 50% additional training allowance.
- The rate of transport allowance for transportation of exports has been reduced from 25% of the cost to 15%.
- Corporate tax at 30% has been introduced on income of companies operating in Export Processing Zones. Previously, these companies would enjoy both income tax and import duty exemption.
- A levy of 0.2% has been introduced on the buyers of tobacco for every kilogram of tobacco bought.
- Withholding tax (WHT) threshold for casual labour has been increased from MWK 5,000 to MWK 12,000. Casual labour will be treated separately from services.
- WHT rate for rental income has been increased from 10% to 15%.
- WHT exemption has been re-introduced for compliant taxpayers (since 1 July 2010, issuance of WHT exemption certificates was abolished on supply of goods, including agricultural produce and food stuffs).

Taxes on corporate income

Malawi does not have separate legislation for the determination of taxable income of different types of legal persons. Taxation of all income is included in the Taxation Act.

Section 11 of the Taxation Act defines income as the total amount in cash or otherwise, including any capital gain, received by or accrued to in any year or period of assessment from a source within or deemed to be within Malawi. The taxpayer's assessable income excludes any amount exempt from tax under this act.

Income deemed to arise in Malawi

The liability for Malawi tax is based on the source of the income rather than residence of the person. Certain transactions may be deemed to be from a source within Malawi

Malawi

even if effected outside Malawi. Section 27 of the Taxation Act limits the income that may be deemed to have arisen in Malawi to the following:

- Remuneration for services rendered or work performed in Malawi.
- Remuneration for services rendered or work performed in or out of Malawi where the amount may be claimed as a tax-deductible expense by a permanent establishment (PE) in Malawi.
- Amounts incurred, claimed, or claimable in connection with a PE in Malawi.
- Realised exchange gains and losses arising in connection with a PE in Malawi or foreign exchange assets and liabilities held in Malawi.
- Capital gains and losses realised with respect to tangible property located in Malawi and interests in companies incorporated in Malawi.

Summary of tax rates

Entity	Income tax rate (%)
Locally incorporated companies (1)	30
Branches of companies not incorporated in Malawi	35
Companies in Export Processing Zones (2)	30
Companies in priority industries (3)	
For a period not exceeding ten years	0
In all other cases for companies incorporated in Malawi	15
In all other cases for Malawi branches of external companies	20

Notes

1. In the case of a mining company, an additional resource rent tax of 10% is levied on profits after tax if the company's rate of return exceeds 20%. The basis for calculating rate of return has not been defined.
2. Prior to 1 July 2011, these companies enjoyed an income tax exemption.
3. Priority industries have not been defined.

Minimum tax

As of 1 July 2011, companies are subject to minimum tax based on turnover, as follows: 1% of turnover for annual turnover of MWK 50 million or less; 2% of turnover for annual turnover of more than MWK 50 million.

Non-resident tax

Non-resident tax is payable on income due to a non-resident at the rate of 15% of the gross income.

Any income payable to a person who is not resident in Malawi (who has not been in Malawi for an aggregate period of 183 days) arising from a source within Malawi is liable to a final WHT of 15% of the gross of such income. Non-resident tax is applicable where the recipient of the income does not have a PE in Malawi from which the income emanated.

Non-resident tax should not be charged on income of residents of countries that have a standing double tax agreement (DTA) with Malawi. Currently, the following countries have a DTA with Malawi: Denmark, France, the Netherlands, Norway, South Africa, Sweden, Switzerland, and the United Kingdom.

Corporate residence

A corporate entity is considered a resident for tax purposes in Malawi if it has a PE in Malawi.

Permanent establishment (PE)

The Taxation Act defines a PE as 'an office or other fixed place of business through which business activity is carried on'. This short definition is wide in scope. Care must be exercised when considering this definition in situations that may be affected by a DTA. Each DTA contains a specific and far more detailed definition of what constitutes a PE.

Other taxes

Value-added tax (VAT)

VAT is applicable on taxable goods and services. There are three classes of supplies for VAT: taxable supplies (at the rate of 16.5%), zero-rated supplies, and exempt supplies.

A taxable person can claim input VAT on inputs used in making taxable supplies.

A taxable person should complete VAT returns and make VAT payment, where applicable, on a monthly basis within 25 days after the end of the month.

Customs duties/Import tariffs

Customs duty is applicable on goods imported into Malawi. The basis for calculating duty is cost, insurance, and freight (CIF). There are three types of import duties: Customs duty, import excise, and import VAT. The rate of custom duty varies from product to product.

Excise duties

Domestic excise is chargeable on certain goods manufactured in Malawi and on certain services such as alcoholic drinks, tobacco, and cell phone airtime. The rate of excise varies depending on the goods and services.

Tobacco levy

Buyers of tobacco must pay a levy of 0.2% for every kilogram of tobacco bought.

Turnover tax

Turnover tax is applicable for businesses with a turnover between MWK 2 million and MWK 6 million. The turnover tax rate is 2% of turnover.

Resource rent tax for miners

Miners pay resource rent tax of 10% on after tax profits if the rate of return exceeds 20%. This kind of tax has been introduced recently and details of operation are not clear. For example, no formula has been provided for calculating the rate of return.

Fringe benefits tax (FBT)

A fringe benefit is defined as any asset, service, or other benefit in kind provided by or on behalf of an employer to an employee, if such benefit includes an element of personal benefit to the employee. And, the employer providing such benefits is liable for payment of FBT. FBT is charged at the rate of 30% of the taxable figure.

Malawi

Take note that a benefit need not be wholly for personal use in order to be considered for FBT.

Note as well that no benefit in cash, no matter what it is termed as, can be treated as a fringe benefit. All monies paid in cash (rather than in kind) should be considered for pay as you earn (PAYE) deduction.

However, subsistence allowances, given to employees working out of their duty station for instance, presumably to cater wholly, exclusively, and necessarily for the needs such as accommodation, meals, transport, etc. ought not be taxed. This applies also for reimbursement of expenses incurred in business.

Every employer shall register for FBT within the month in which one begins to provide fringe benefits.

The sums due as FBT shall be remitted to the Malawi Revenue Authority (MRA) in quarterly instalments not later than 14 days after the end of each quarter of a period of 12 months ending 30 June, and remittance should be accompanied with a duly completed FBT return in Form FBT 2.

Note that the value for FBT should not be included in the employee's certificate of gross emoluments.

Assessment of housing fringe benefits

The taxable value of a housing fringe benefit is the greatest of (i) 10% of salary where the house is unfurnished, (ii) 12% of salary if furnished, or (iii) the rental value.

Where the house occupied by the employee is owned by the employer, the taxable value is reduced by 50%.

Motor vehicles

FBT is applicable on motor vehicles allocated for use by members of staff and does not include pool cars or cars that are strictly commercial in nature.

The taxable value is 15% of the original cost of the vehicle.

School fees (for children/dependants)

50% of the cost to the employer for school fees is a taxable benefit, where payment is made directly to the educational institution. Education allowances payable to employees are not subject to FBT as the allowance is considered part of normal salary and taxable as such.

Utilities, household items, vacations, travel, and domestic services

The taxable value of utilities (e.g. electricity, water, and telephone expenses), household items, vacations, travel, and domestic services (e.g. gardener, cook, house boy, guard, nanny) is the entire cost to the employer. Except that for a house owned by the employer, the cost of gardener, security guard, and watchman shall not constitute a taxable benefit.

Interest free loans and loans given at interest lower than the commercial rate

Where an employer gives a loan to an employee that is interest free or bears interest that is lower than the predetermined commercial rate, the difference between the interest offered and the commercial rate is a taxable benefit.

Branch income

There is a 35% tax on taxable income of a branch of a foreign company. Locally incorporated companies pay tax at the rate of 30%.

No dividend WHT is applicable on repatriation of profits.

Income determination

Inventory valuation

Inventory is stated at cost for tax purposes.

Capital gains

The tax basis for capital gains is the cost of the asset adjusted by the applicable consumer price index (inflation index). Once determined, the taxable gain is subject to corporate tax at the rate applicable to the particular entity.

Capital gains arising from the disposal of personal and domestic assets not used in connection with trade are exempt from corporate tax.

As of 1 July 2011, capital gains arising from the sale of shares traded on the Malawi Stock Exchange are taxable.

Rollover relief

If a business asset is sold and the taxpayer acquires a qualifying replacement asset, the taxpayer may claim rollover relief. This means that the taxpayer does not immediately pay the tax on the gain. Instead, the cost of the replacement asset is reduced by the amount of the gain. The taxpayer must declare this in the tax return.

A qualifying replacement asset is an asset similar to, or related in service or use to, the asset disposed of. The replacement asset must be acquired within 18 months of the disposal giving rise to the gain.

Dividend income

Dividend income is exempt from corporate tax; however, dividends received from Malawi sources are subject to a 10% dividend WHT, which is a final tax. Note that although the word 'final' has not been defined, it is applied as meaning that dividend WHT suffered may not be offset against an income tax liability.

Foreign exchange gains and losses

Foreign exchange gains realised on foreign currency assets or liabilities are taxable.

Foreign exchange losses realised on foreign currency assets or liabilities are tax deductible.

Unrealised gains and losses are carried forward until realised and then included in income or allowable expenditures. The maintenance of records that accurately track unrealised exchange rate adjustments from year to year is necessary to ensure correct tax computations.

Tax-exempt income

The following are common examples of other tax-exempt income:

Malawi

- The income of agricultural, mining, and commercial institutions or societies not operating for private pecuniary profit or gain of the members.
- The income of clubs, societies, and associations formed, organised, and operated solely or principally for social welfare or civic improvement or other similar purpose provided that the income of such bodies may not be divided among or used for the benefit of the members or shareholders.
- The income of ecclesiastical, charitable, and educational institutions of a public character.

Foreign income

Generally, income whose source is not Malawi is not taxable in Malawi.

Deductions

Taxable income is calculated by deducting allowable items from assessable income. Section 28 of the Taxation Act defines tax-allowable deductions as any expenditures and losses (not being of a capital nature) wholly, exclusively, and necessarily incurred by the taxpayer for the purpose of trade or in the production of income.

Capital allowances

Capital allowances (i.e. depreciation allowances) are applicable as stipulated in the Taxation Act at various rates.

Capital allowances, which are available to companies and individuals in business, are allowed as follows:

Asset	Allowances (%)		
	Initial	Investment	Annual
Industrial and farm buildings, hotels, and docks (1, 2, 3)	10	20/40	5
Staff housing (3)	10	-	5
Plant, machinery, and equipment (1, 2, 3, 4)	20	20/40	10/20
Furniture and fittings (3)	20	-	10
Motor vehicles (3, 4, 5, 6)	20	-	20
Commercial buildings (7)	-	-	2.5
Computers	20	-	40

Notes

1. The 40% investment allowance is available only on new and unused qualifying assets as indicated above, belonging to and used by a manufacturer or farmer (prior to 1 July 2011, the investment allowance was 100%). The rate for used qualifying assets is 20% (40% prior to 1 July 2011). The investment allowance is claimable only in the first year of use.
2. Where an investment allowance is claimed, the initial allowance is not allowed to be claimed on the same asset. The initial allowance is claimable only in the first year of use.
3. Annual allowances at the above rates are based on cost less investment and initial and annual allowances previously granted.
4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.
5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.
6. No initial allowance is granted on private motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.
7. The building must be newly constructed at a cost of no less than MWK 100 million.

On disposal, assets are subject to balancing charges (capital gains) or balancing allowances.

If an asset is subject to extensive use, such as machinery working double shifts, so that its expected economic life is reduced, the commissioner general may agree to increase the rates of annual allowances.

Lease, patent, trademark, and copyright premium

The tax-deductible amount of a premium paid for the right of use or occupation of land or buildings, plant or machinery, patent design, trademark, copyright, or any other property of a similar nature is one of the following:

- The amount of premium or consideration divided by the number of years for which the right of occupation or use is granted.
- Where the period for which the right of occupation or use is granted exceeds 25 years, the deduction is one-twenty-fifth of the premium or consideration.

The premium is tax deductible only where the asset or right with respect to which the premium or consideration is paid is used for the generation of income. If a taxpayer acquires ownership of the asset or right, no further deduction of the premium or consideration is allowed from the date ownership is acquired.

Goodwill

The legislation does not prescribe treatment for goodwill. It has been the practice that goodwill is not deductible for tax purposes.

Pre-operating expenditures

A manufacturer may claim as a deduction any expenditure incurred in the course of establishing the business, provided that the following are true:

- The expenditure was incurred not more than 18 months before commencing business.
- The expenditure would have been allowed as a deduction if it had been incurred after commencing business.

Interest expenses

Interest that arises out of financing operations is allowable, while interest due to late payment of a debt is not allowable.

Bad debt

Specific bad debts are tax deductible and taxable in the following year. Bad debts written off are allowable and taxable upon eventual recovery.

Charitable contributions

Donations to approved charities and approved non-profit institutions formed for the purpose of social welfare, civic improvement, educational development, or other similar purposes are deductible. The minimum individual donation allowable is MWK 500. The minimum donation for other approved charities is MWK 250. In both cases, there is no maximum donation.

Research and development (R&D) expenditures

Research expenditures are fully allowable as a deduction if they are for 'experiments and research relating to trade'.

Malawi

Pension contributions

The tax-allowable amount of ordinary pension contributions made by an employer to an approved pension fund is subject to limitations. The limit with respect to each employee is the lowest of one of the following per annum:

- The actual contribution.
- 24% of the employee's compensation.
- MWK 9,000.

No allowance is available if an employee is entitled to a tax-free gratuity.

Fines and penalties

Fines and penalties are not tax deductible in any way.

Taxes

Taxes are not allowed as deductible expenses, except where they are local taxes.

Net operating losses

Current taxable income may be offset against net operating losses brought forward and current operating losses may be increased by net unexhausted trading losses brought forward. Manufacturers and taxpayers in the agricultural industry may carry losses forward indefinitely, while other taxpayers may carry losses forward for only six years. Net operating losses may not be carried back.

Payments to foreign affiliates

A deduction is allowed for payments to foreign affiliates if such payments are expended wholly, exclusively, and necessarily for the production of income or for the purposes of trade, and it can be demonstrated that the transaction is at arm's length.

Group taxation

Group taxation is not permitted in Malawi.

Transfer pricing

Transfer pricing regulations were introduced and effective as of 1 July 2009. There is also a tax anti-avoidance provision that is used to check transactions between related parties. If transactions between related parties result in profits that are lower than what would be expected if the company was trading with an independent party, then the tax authorities can challenge the transaction.

Thin capitalisation

There are no thin capitalisation rules in Malawi.

There are no restrictions on the level of external borrowings. If a Malawi company wants to borrow money from a foreign entity (whether or not a bank), it will require exchange control approval. In such instances, Reserve Bank does not consider the debt-to-equity ratio. It looks at the terms and conditions to see that they are what would be commonly available on the open market between unrelated parties. As you can see, this is an anti-transfer pricing measure.

If a new application is made for exchange control approval of foreign ownership (normally this is when there is a new business/investment into Malawi), Reserve Bank will look at the external debt to local equity ratio. There are no fixed rules, but Reserve

Bank does not normally like external debt to be more than twice equity (i.e. 1:2 equity to external debt). It does give approval for external ownership where the proportion of external debt is higher than this as it looks at each proposal on its own merit. The applicant would have to justify the higher level of external debt in such a case.

Controlled foreign companies (CFCs)

There is no CFC regime in Malawi.

Tax credits and incentives

Export allowances

Exporters, including those manufacturing in bond, are entitled to claim additional tax allowances for non-traditional exports:

- On the export of non-traditional products, there is a 15% tax allowance on taxable income derived from exports (prior to 1 July 2011, the allowance was 25%).
- There is a 15% transport tax allowance on international transport costs for non-traditional exports (prior to 1 July 2011, the allowance was 25%). Traditional exports are tea, coffee, cane sugar, and unmanufactured tobacco and tobacco refuse.

Export allowances may not be claimed in respect of exports from mining operations.

Investment allowance

There is a 40% investment allowance on plant and machinery and industrial buildings for taxpayers in the manufacturing industry (prior to 1 July 2011, the investment allowance was 100%).

Farming operations

Farming operations receive a 100% allowance with respect to expenditures incurred during any year of assessment on the following:

- Stumping, leveling, and clearing of land.
- Work in connection with the prevention of soil erosion.
- Boreholes.
- Wells.
- Aerial and geophysical surveys.
- Water control work, including any canal, channel, dyke, furrow, and any flood control structure, whether or not of a permanent nature.
- Water conservation work, meaning any reservoir, water dam, or embankment constructed for the impounding of water. In the case of water conservation work, the Taxation Act limits the amount deductible to amounts actually paid, where the farmer incurs a liability in terms of any law relating to natural resources.

Where a farmer derives taxable income from growing timber, the farmer may elect that the taxable income is determined in accordance with the following rules:

- Carryforward the cost of planting the timber until the timber reaches maturity.
- Add annually to the cost of planting the timber an amount calculated as 5% of the cost of planting the timber until the timber reaches maturity.
- When the timber is sold, a proportionate amount of the total of the carryforward cost and annual added cost is deducted from the proceeds.
- In each year of assessment, the annual added cost is treated as taxable income in the hands of the farmer.

Malawi

A farmer may not deduct any expenditures that have been recovered through a subsidy or claim a capital allowance on any assets where the expenditures have been recovered through a subsidy.

Mining operations

Mining operations receive a 100% allowance with respect to mining expenditures incurred during any year of assessment. Mining expenditures are defined as capital expenditures incurred in Malawi by a person carrying on or about to carry on mining operations in Malawi:

- In searching for or in discovering and testing or in winning access to deposits of minerals.
- In the acquisition of or of rights in or over such deposits, other than the acquisition from a person who has carried on mining operations in relation to such deposits.
- In the provision of plant and machinery and industrial buildings that would have little or no value to such person if the mine ceased to work.
- On the construction of any buildings or works that would have little or no value if the mine ceased to be worked.
- On development, general administration, and management prior to the commencement of mining operations.

Persons engaged in mining operations are not entitled to claim the export tax allowance on non-traditional exports or the 15% transport tax allowance on international transport costs for non-traditional exports.

Withholding taxes

WHT rates

Nature of payment	WHT rate (%)
Royalties	20
Rents	15
Payment of more than MWK 60,000 per annum for any supplies to traders and institutions	3
Commission	20
Payment for carriage and haulage	10
Payment to contractors and subcontractors in the building and construction industries	4
Payment for public entertainment	20
Payment of more than MWK 12,000 for casual labour	20
Services	20
Bank interest in excess of MWK 10,000	20
Fees	10

Dividend WHT

Dividend WHT is a final tax and is charged at 10%. The dividend is not included in the taxpayer's taxable income and the WHT is not deducted from the taxpayer's tax liability.

WHT exemption

As of 1 July 2011, WHT exemption has been re-introduced for compliant taxpayers (since 1 July 2010, issuance of WHT certificates was abolished on supply of goods, including agricultural produce and foodstuffs).

Tax administration

Taxable period

The taxable period for income tax is a 12-month period ending on 30 June of each year. For businesses whose year end is 31 July and 31 August, the applicable tax year end is the preceding 30 June, while all the years ending in the subsequent months have the following 30 June as a year end.

Tax returns

Income tax returns are due within 180 days after the end of the financial year.

Payment of tax

Tax is payable in quarterly instalments within 25 days of the month following the end of the quarter, with the balance of the tax being paid upon submission of the return.

Penalties

A penalty for late submission of returns is MWK 200,000.

Audit cycle

The target for the tax authorities is to audit 30% of the taxpayers in any fiscal year. This translates to approximately three years per audit cycle.

Statute of limitations

There is no statute of limitations in Malawi.

Topics of focus for tax authorities

The tax authorities have recently focussed on transfer pricing and have consequently established a unit responsible for this. All multinationals are under scrutiny to check if they are dealing at arm's length with related entities.

Commissioner General's power to increase taxable income

The Commissioner General is empowered to increase the taxable income and liability of a taxpayer when of the opinion that the main purpose or one of the main purposes of a transaction was the avoidance or reduction of tax or where the main benefit that might have been expected to accrue from a transaction was the avoidance or reduction of tax.

Significant developments

To complement existing legislation, new rules in relation to transfer pricing and advance pricing arrangements were gazetted on 11 May 2012. These rules, which apply to controlled transactions and cross-border transactions respectively, are deemed to have come into operation on 1 January 2009 (see *Transfer pricing in the Group taxation section for more information*).

Taxes on corporate income

For both resident and non-resident companies, corporate income tax is (CIT) imposed on income accruing in or derived from Malaysia. The current CIT rates are provided in the following table:

Type of company	Chargeable income (MYR*)	CIT rate (%)
Resident company (other than company described below)		25
Resident company:	On the first 500,000	20
• with paid-up capital of MYR 2.5 million or less		
• that does not control, directly or indirectly, another company that has paid-up capital of more than MYR 2.5 million, and		
• is not controlled, directly or indirectly, by another company that has paid-up capital of more than MYR 2.5 million.	In excess of 500,000	25
Non-resident company		25

* Malaysian ringgit

Petroleum income tax

Petroleum income tax is imposed at the rate of 38% on profits from petroleum operations in Malaysia. No other taxes are imposed on income from petroleum operations.

Corporate residence

A company is tax resident in Malaysia in a basis year (normally the financial year) if, at any time during the basis year, the management and control of its affairs are exercised in Malaysia. Generally, a company is regarded as resident in Malaysia if at any time

during the basis period for a year of assessment, at least one meeting of the Board of Directors is held in Malaysia concerning the management and control of the company.

Permanent establishment (PE)

Generally, a non-resident entity is regarded as having a PE in Malaysia if it has a fixed place of business in Malaysia, where the business of the entity is wholly or partly carried on. A non-resident company may also be deemed to have a PE in Malaysia under certain circumstances, such as the following:

- It is represented by a dependent agent in Malaysia, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- It carries on supervisory activities in Malaysia for six/nine months in connection with a construction, installation, or assembly project.

Other taxes

Sales tax

A single-stage *ad valorem* tax (sales tax), at rates ranging from 5% to 10%, is imposed on all goods imported into or manufactured in Malaysia, unless specifically exempted.

Service tax

Service tax is imposed at the rate of 6% on the value of taxable services sold or provided by taxable persons. A list of 'taxable services' and 'taxable persons' is found in the Service Tax Regulations 1975.

Goods and services tax (GST)

A GST of 4% was originally expected to be implemented in mid 2011, but its implementation is now delayed indefinitely. The reason reported for the delay is to allow the government more time to engage with the public in order to gather feedback on the implementation of the GST. When implemented, GST will replace the current sales tax and service tax.

Import duties

Import duties are levied on goods that are subject to import duties and imported into the country. Import duties are generally levied on an *ad valorem* basis but may also be imposed on a specific basis. The *ad valorem* rates of import duties range from 2% to 60%. Raw materials, machinery, essential foodstuffs, and pharmaceutical products are generally non-dutiable or subject to duties at lower rates.

Excise duties

Excise duties are imposed on a selected range of goods manufactured and imported into Malaysia. Goods that are subject to excise duty include beer/stout, cider and perry, rice wine, mead, un-denatured ethyl alcohol, brandy, whisky, rum and tafia, gin, cigarettes containing tobacco, motor vehicles, motorcycles, playing cards, and mahjong tiles.

The rate of excise duties vary from a composite rate of MYR 0.1 per litre and 15% of the value for certain types of spirituous beverages, to as much as 105% of the value of motorcars (depending on engine capacity).

Property tax

Property tax is levied on the gross annual value of property as determined by the local state authorities.

Malaysia

Real property gains tax (RPGT)

RPGT is charged upon gains from disposals of real property, which is defined as:

- any land situated in Malaysia, as well as any interest, option, or other right in or over such land, or
- shares in a real-property company (RPC), which is a controlled company holding real property or shares in another RPC or a combination of both, where the total defined value is not less than 75% of its total tangible assets.

RPGT is imposed as follows:

Holding period from date of acquisition	RPGT rate (%)
Up to two years	10
Exceeding two years and up to five years	5
Exceeding five years	0

Stamp duty

Malaysia imposes stamp duty, which is payable by the buyer/transferee, on chargeable instruments. Some examples are provided as follows:

Transaction type	Value chargeable	Stamp duty rate (%)
Sale/transfer of properties (excluding stock, shares, or marketable securities)	Market value	1 to 3
Sale/transfer of stock, shares, or marketable securities	Consideration paid or market value, whichever is higher	0.3
Service/loan agreements	Value of services/loans	0.5

Windfall profit levy

A levy is imposed on crude palm oil and crude palm kernel oil at a maximum of MYR 50 per ton where the price exceeds MYR 2,500 per ton in Peninsula Malaysia, and MYR 3,000 per ton in the states of Sabah and Sarawak.

Contract levy

A levy of 0.125% on contract works having a contract sum above MYR 500,000 is imposed on every registered contractor by the Construction Industry Development Board.

Human resource development levy

Employers engaged in the manufacturing and services sectors that employ more than a specified number of employees must contribute to the Human Resource Development Fund (HRDF). The levy required to be paid is at the rate of 1% of the employees' monthly wages on a monthly basis.

Branch income

Tax rates on branch profits of a company are the same as CIT rates. No tax is withheld on transfer of profits to a foreign head office.

Income determination

Inventory valuation

Inventories are generally stated at lower of cost or net realisable value. Cost may be determined using one of several methods (e.g. unit cost, average cost, or first in first out [FIFO]), as long as the basis used is consistent for each year.

Capital gains

Generally, gains on capital assets are not subject to tax, except for gains arising from the disposal of real property situated in Malaysia, which is subject to RPGT (*see the Other taxes section for more information*).

Dividend income

A single-tier system of taxation came into force on 1 January 2008, replacing the previous dividend imputation system. There is a six-year transitional period (until 31 December 2013) for all companies to migrate into the single-tier system.

Under the dividend imputation system, dividends received from Malaysian companies are taxed at gross value in the hands of shareholders, whether corporate or individuals. Companies distributing dividends are required to deduct tax at source at the prevailing corporate tax rate, from gross dividends payable, but the income tax deducted or deemed deducted is available as a credit against the income tax liability of the shareholder. If a dividend is paid by a company that is subjected to the reduced CIT rate of 20%, tax is deducted or deemed deducted from the dividend at the normal 25% CIT rate.

Under the single-tier tax system, dividends are exempt in the hands of shareholders. Companies are not required to deduct tax from dividends paid to shareholders, and no tax credits will be available for offset against the recipient's tax liability. Corporate shareholders receiving exempt single-tier dividends can, in turn, distribute such dividends to their own shareholders, who are also exempt on such receipts.

Stock dividends

A Malaysian corporation may distribute bonus shares tax-free to shareholders.

Interest income

Interest income accruing in or derived from Malaysia or received in Malaysia from outside Malaysia is subject to CIT. However, exemption is provided on interest income received in Malaysia from outside Malaysia. Other exemptions granted include interest income earned by a non-resident person from deposits placed in designated financial institutions in Malaysia.

Foreign income

Under the Income Tax Act 1967, a Malaysian tax-resident company and a unit trust are not taxed on their foreign-sourced income, regardless of whether such income is received in Malaysia. However, income of a resident company from the business of air/sea transport, banking, or insurance is assessable on a worldwide basis.

Taxation on a worldwide basis does not apply when income attributable to a Labuan business activity of a Labuan branch or subsidiary of a Malaysian bank is subject to tax under the Labuan Business Activity Tax Act 1990. This exception will not apply if the Labuan entity has made an irrevocable election to be taxed under the Income Tax Act 1967 in respect of its Labuan business activity.

Malaysia

In respect of Malaysian-owned banks, insurance companies, and takaful (Islamic insurance) companies, the profits of newly established branches abroad or remittances from new subsidiaries abroad are tax exempt for five years, provided that the applications to establish branches or subsidiaries abroad are received by the Central Bank of Malaysia no later than 31 December 2015.

Relief from double taxation is available by means of a bilateral credit if there is a governing tax treaty or unilateral relief where there is no treaty. The relief is restricted to the lower of Malaysian tax payable or foreign tax paid if there is a treaty, or one-half of the foreign tax paid if there is no treaty.

Undistributed income of foreign subsidiaries is not taxable.

Deductions

Capital allowance

Capital allowance (tax depreciation) on industrial buildings, plant, and machinery is available at prescribed rates for all types of businesses. Initial allowance is granted in the year the expenditure is incurred and the asset is in use for the purpose of the business. Annual allowance at the prescribed rates calculated on cost is given for every year during which the asset is in use at the end of the basis year for the purposes of the business. The following are examples of capital allowance rates currently available:

Qualifying asset	Initial allowance (%)	Annual allowance (%)
Industrial building, whether constructed or purchased	10	3
Heavy machinery	20	20
General plant and machinery	20	14
Furniture and fixtures	20	10
Office equipment	20	10
Motor vehicles*	20	20*
Small value assets of less than MYR 1,000 (subject to a maximum total cost of MYR 10,000)	-	100

* Restrictions apply on maximum qualifying capital expenditure.

Accelerated capital allowance is available for certain types of industrial building, plant, and machinery, some of which includes buildings used as a warehouse, buildings used as a school or an educational institution, computers, information technology equipment, environmental protection equipment, waste recycling equipment, and plant and machinery used in specific industries.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is not deductible as these expenses are capital in nature.

Start-up expenses

In general, start-up expenses incurred before the commencement of a trade, profession, or business are capital in nature as they were expended to put the person in a position to earn income. However, there are specific deductions allowed, such as incorporation expenses and recruitment expenses (conditions apply).

Interest expenses

Interest expense is allowed as deduction if the expense was incurred on any money borrowed and employed in the production of gross income or laid out on assets used or held for the production of gross income. Where a borrowing is partly used to finance non-business operations, the proportion of interest expense will be allowed against the non-business income.

Bad debt

Debts must be specifically identified and reasonably estimated to be irrecoverable to qualify for a tax deduction.

Donations to charitable institutions

A deduction is allowed for cash donation to approved institutions (defined) made in the basis period for a year of assessment. The deduction is limited to 10% of the aggregate income of that company for a year of assessment.

Fines and penalties

Fines and penalties are generally not deductible.

Taxes

Taxes on income are generally not deductible, whereas indirect taxes, such as sales tax and service tax, are deductible.

Net operating losses

The carryforward of business losses and capital allowances is not available for deduction in subsequent years of assessment if the company does not meet the conditions of a shareholders' continuity test. However, per policy issued by the Ministry of Finance, these conditions currently apply only to dormant companies. Carryforward of business losses and capital allowances is unlimited in time for non-dormant companies.

Current-year business losses may be utilised against all sources of income. Utilisation of carried-forward losses is restricted to income from business sources only. Utilisation of capital allowance is also restricted to income from the same underlying business source.

Payments to foreign affiliates

A Malaysian company can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided that these are made at arm's length and the relevant withholding taxes (WHTs), where applicable, have been paid.

Group taxation

A company that qualifies for group relief may surrender a maximum of 70% of its adjusted loss for a year of assessment to one or more related companies if the following conditions are met by both the claimant and surrendering companies:

- Both must be resident and incorporated in Malaysia.
- Each has paid-up capital of ordinary shares exceeding MYR 2.5 million at the beginning of the basis period.
- Both have the same (12-month) accounting period.
- They are 'related' throughout the basis period for a particular year of assessment as well as the 12 months preceding that basis period.

Malaysia

- Both are not currently enjoying specific stipulated incentives, such as pioneer status, investment tax allowance, reinvestment allowance, etc.

'Related company' is defined by the Income Tax Act 1967 and involves the application of a two-tier test. The companies are regarded as 'related' if:

- either company owns at least 70% of the ordinary share capital of the other company or a third company owns at least 70% of each of the companies, and
- the holders of ordinary shares are entitled to at least 70% of the distributable profits and assets of the company on winding up.

Companies that wish to avail themselves of group relief must make an irrevocable election to surrender or claim the tax loss in the return to be filed with the Inland Revenue Board for that year of assessment.

Transfer pricing

The Director General of Inland Revenue (DGIR) is empowered to make adjustments on transactions of goods and services if the DGIR is of the opinion that the transactions were not entered into on an arm's-length basis.

To complement the above, two new rules were gazetted on 11 May 2012, and both are deemed to have come into operation on 1 January 2009. The transfer pricing rules that apply to controlled transactions (defined) (including financial assistance) specify the methods to determine the arm's-length price and the circumstances under which the DGIR may re-characterise transactions. The advance pricing arrangement rules that apply only to cross-border transactions outline the application procedures for unilateral, bilateral, or multilateral advance pricing arrangements.

Thin capitalisation

A new provision for thin capitalisation was introduced, effective as of 1 January 2009, under which the portion of the interest charge that relates to the amount of financial assistance that is excessive is disallowed as a deduction. However, the implementation of specific rules relating to this provision has been deferred to the end of December 2012.

Tax credits and incentives

Malaysia has a wide variety for incentives covering the major industry sectors. Tax incentives can be granted through income exemption or by way of allowances. Generally, when income is exempted, any dividends paid out of such exempt income are not taxable in the hands of the shareholders. Where incentives are given by way of allowances, any unutilised allowances generally may be carried forward indefinitely to be utilised against future statutory income. The following are the major types of incentives available in Malaysia.

Pioneer status (PS) and Investment tax allowance (ITA)

Companies in the manufacturing, agricultural, hotel, and tourism sectors, or any other industrial or commercial sector, that participate in a promoted activity or produce a promoted product may be eligible for either PS or ITA.

PS is given by way of exemption from CIT on 70% of the statutory income for five years and the remaining 30% is taxed at the prevailing CIT rate. ITA is granted on 60%

qualifying capital expenditure incurred for a period of five years to be utilised against 70% of the statutory income, while the balance 30% is taxed at the prevailing CIT rate.

A company which intends to undertake reinvestment before expiration of its PS or ITA status may opt for reinvestment allowance, provided it surrenders its PS or ITA status.

The PS and ITA incentives are enhanced for the following types of projects:

Qualifying industry	Pioneer status		Investment tax allowance	
	Incentive	TRP (1)	Incentive	TRP (1)
Projects of national and strategic importance involving heavy capital investment and high technology.	100% of SI (2)	5 + 5	100% QCE (3) against 100% SI	5
High-technology companies engaged in areas of new and emerging technologies.	100% of SI	5	60% QCE against 100% SI	5
Companies participating in an industrial linkage programme.	100% of SI	5	60% QCE against 100% SI	5
Companies manufacturing specialised machinery and equipment.	100% of SI	10	100% QCE against 100% SI	5
Existing locally owned companies reinvesting in production of heavy machinery, specialised machinery, and equipment.	70% of increased SI	5	60% new QCE against 70% SI	5
Companies providing technical and vocational training, and private higher education institution providing qualifying science courses.	-	-	100% QCE against 70% SI	10
New companies investing and existing companies reinvesting in utilising oil palm biomass to produce value-added products.	100% of SI	10	100% QCE against 100% SI	5
Small scale companies (defined) that meet with specified conditions.	100% of SI	5	60% QCE against 100% SI	5
Companies investing in new laboratories for testing medical devices (applications from 8 September 2007 to 31 December 2012).	100% of SI	5	60% QCE against 100% SI	5
Companies upgrading existing laboratories for testing medical devices (applications from 8 September 2007 to 31 December 2012).	-	-	60% QCE against 100% SI	5

3. Qualifying capital expenditure.

Special incentive schemes

Reinvestment allowance

A resident company in operation for not less than 36 months that incurs capital expenditure to expand, modernise, automate, or diversify its existing manufacturing business or approved agricultural project is entitled to reinvestment allowance as follows:

- An allowance of 60% of QCE incurred to be utilised against 70% of statutory income. The remaining 30% is taxed as the prevailing CIT rate.
- The 70% restriction does not apply to projects located in the eastern corridor states of Peninsular Malaysia, Sabah, Sarawak, Labuan, the state of Perlis, and Mersing district in Johor (up to year of assessment 2011) or to projects that achieved the level of productivity as prescribed by the Minister of Finance.
- The allowance is given for 15 years from the first year of claim and will be withdrawn if the asset for which the allowance is granted is disposed of within five years.

Approved service projects

A resident company undertaking a project approved by the Minister of Finance in the transportation, communications, utilities, and services subsectors may enjoy the following incentives:

- Investment allowance of 60% of QCE incurred within five years to be utilised against 70% statutory income.
- Alternatively, income tax exemption of 70% of statutory income for a period of five years.
- Buildings used solely for the purposes of such projects qualify for an industrial building allowance.

Export incentives

A resident company engaged in manufacturing or agriculture that exports manufactured products, agricultural produce, or services is entitled for allowances between 10% to 100% of increased exports (subject to satisfying prescribed conditions), which is deductible up to 70% of statutory income.

Regional operations

Operational headquarters company (OHQ)

A Malaysian incorporated company that provides qualifying services to its offices and related companies, within or outside Malaysia, may enjoy CIT exemption for a period of ten years. Income exempted includes business income, interest, royalties, and income

from services (not exceeding 20% of total income of qualifying services) provided to related companies in Malaysia.

Expatriates working in an OHQ are taxed only on the portion of chargeable income attributable to the number of days they are in Malaysia. An OHQ is also granted special facilities (subject to minimal conditions) including:

- Approvals for expatriate posts.
- Ability to obtain credit facilities in foreign currency from licensed banks in Malaysia, without approval of the Central Bank of Malaysia.
- Invest freely in foreign securities and lend to related companies outside Malaysia.
- Ability to open foreign currency accounts with licensed banks in Malaysia or banks in Labuan.

International procurement centre (IPC) and Regional distribution centre (RDC)

An IPC engaged in the procurement and sale of raw materials, components, and finished products to its related or unrelated companies within or outside Malaysia may, subject to conditions, enjoy income tax exemption for ten years on income from qualifying activities in respect of export sales.

An RDC operates similarly to an IPC, except an RDC is only allowed to deal with its own brand of goods. The RDC enjoys the same incentives as an IPC.

Other available non-fiscal incentives available to IPC/RDC include:

- Approval for expatriate posts.
- One or more foreign currency accounts for the retention of export proceeds with any licensed commercial bank, without any limit on account balances.
- Ability to enter into foreign exchange forward contracts with a licensed commercial bank to sell forward export proceeds based on projected export.
- Exemption from foreign equity ownership restrictions.

International trading company

International trading companies are exempt for five years on income equivalent to 20% of increased export value, up to a maximum of 70% of statutory income. To qualify for the incentive, the company must meet the following three conditions:

- Be incorporated in Malaysia, with 60% Malaysian ownership.
- Achieve minimum annual sales of MYR 10 million, not more than 20% of which may be derived from the trading of commodities.
- Use local services (banking, finance, and insurance) and infrastructure (local ports and airports) in its operations.

Financial services sector

Islamic securities

Tax deduction is allowed for expenses incurred in the issuance of Islamic securities, including Islamic Securities based on the Wakalah principle, approved by the Securities Commission or the Labuan Financial Services Authority, until year of assessment 2015 only.

Malaysia

Islamic banking and takaful business

Effective from year of assessment 2007 until year of assessment 2016, full income tax exemption for ten years is granted to:

- Islamic banks licensed under the Islamic Banking Act 1983, on income from Islamic banking business conducted in international currencies.
- Takaful (Islamic insurance) companies licensed under the Takaful Act 1984, on income from takaful business conducted in international currencies.

Islamic fund management

Full income tax exemption is available on statutory income on management fees received by resident fund management companies for managing funds of foreign and local investors established under Syariah principles (effective from year of assessment 2008 until year of assessment 2016). Such funds must be approved by the Securities Commission.

Special purpose vehicle (SPV) for Islamic financing

An SPV established solely for the purpose of issuance of Islamic securities under the Syariah principles (approved by the Securities Commission or established under the Labuan Companies Act 1990) is not subject to income tax and is not required to comply with administrative procedures under the income tax law. The company that establishes the approved SPV is deemed to be the recipient of the SPV's income and will be taxed accordingly, but that company will be allowed a deduction for the cost of issuance of Islamic securities.

Islamic stock broking company

Establishment expenditure incurred prior to the commencement of an Islamic stock-broking company is allowed as a deduction, provided the company commences business within two years from the date of approval. Applications must be received by the Securities Commission before 31 December 2015.

Treasury management centre (TMC)

It is proposed that locally incorporated companies establishing their TMC (a centre that provides financial and fund management services to a group of related companies within or outside the country) in Malaysia will enjoy the following incentives (applications to be received from 8 October 2011 until 31 December 2016):

- Income tax exemption of 70% of statutory income from qualifying treasury services rendered to related companies for five years.
- WHT exemption on interest payments on overseas borrowings from overseas used for qualifying activities.
- Stamp duty exemption on loan and service agreements for qualifying activities.
- Expatriates working in the TMC are taxed only on the portion of their chargeable income attributable to the number of days they are in Malaysia.

Kuala Lumpur International Financial District (KLIFD)

The KLIFD is a joint property development comprising office towers for finance and banking, residences, and retail spaces in Kuala Lumpur. To accelerate the development of the KLIFD, the following incentives are proposed:

- Full income tax exemption for ten years and stamp duty exemption on loan and service agreements for KLIFD status companies.
- Industrial building allowance and accelerated capital allowance for KLIFD Marquee Status Companies.

- Income tax exemption of 70% of statutory income for five years for property developers in KLIFD.

Real estate investment trusts (REIT)/Property trust fund (PTF)

REIT/PTFs are vehicles that mobilise funds from unit holders comprising individuals and companies for investments in the property sector and related assets. REIT/PTFs are exempted from tax on all income provided that at least 90% of their total income is distributed to unit holders. If the 90% distribution condition is not complied with, all income will be taxed at the prevailing income tax rate at the REIT/PTF level and tax credit will be claimed by the unit holders on distributions received from the REIT/PTF.

Unit holders are taxed as follows:

Unit holders	WHT rate
Individuals (whether resident or non-resident), body of persons, or other unincorporated persons	10% from 1 January 2009 to 31 December 2016
Non-resident company	25%
Resident company	None (income to be included in annual tax return)
Institutional investor (pension fund, collective investment scheme, or other person approved by the Minister of Finance)	10% from 1 January 2009 to 31 December 2016

Other incentives available are:

- Real property gains tax and stamp duty exemptions on disposal/transfer of real property to an REIT/PTF.
- Tax deduction given for consultancy, legal, and valuation service fees incurred on the establishment of an REIT.

Foreign fund management company

A foreign fund management company providing fund management services to foreign clients is taxed at a concessionary rate of 10% in respect of income derived from the management of foreign funds, while income arising from services rendered to clients in Malaysia is taxed at the prevailing CIT rate.

A foreign fund management company is a Malaysian incorporated company licensed under the Capital Markets and Services Act 2007. Its activities are regulated by the Securities Commission.

Export of financial services

Income tax exemption for a period of five years is granted to Malaysian banks, insurance companies, and takaful companies on profits of newly established branches overseas or income remitted by new overseas subsidiaries. Applications to establish new branches or subsidiaries overseas should be received by the Central Bank of Malaysia not later than 31 December 2015.

Venture capital company (VCC)

A VCC investing in a venture company (VC), which is not the VCC's related company at the point of first investment, will be given a deduction on the value of investment made in a VC. Where the deduction is not claimed, the VCC is eligible for the following income tax exemption on income from all sources, other than interest income from savings or fixed deposits, and profits from Syariah-based deposits:

Malaysia

Conditions	Exemption period
<ul style="list-style-type: none"> At least 70% of invested funds is invested in VC, or At least 50% of invested funds is invested in VC in the form of seed capital. 	10 years
<ul style="list-style-type: none"> At least 30% of invested funds is invested in VC in the form of seed capital, start-up, or early stage financing, and Applications received by Securities Commission from 30 August 2008 to 31 December 2013 	5 years

Special economic regions

The following special economic regions were launched as part of the Malaysian government's plan for regional growth and development:

Economic region	Location	Year of launch
Iskandar Malaysia (formerly known as Iskandar Development Region [IDR]) www.iskandarmalaysia.com.my	Southern Johor	2006
Northern Corridor Economic Region www.ncer.com.my	States of Perlis, Kedah, Penang, and northern Perak	2007
East Coast Economic Region www.ecerdc.com	States of Kelantan, Terengganu, Pahang, and district of Mersing in Johor	2007
Sabah Development Corridor www.sedia.my	Western, central, and eastern regions of Sabah	2008
Sarawak Corridor of Renewable Energy www.sarawakscore.com.my	Central Sarawak	2008

Special incentives, on top of the existing incentives given by the Malaysian government, will be customised for the purpose of each economic region. At present, special legislation has been enacted only in respect of Iskandar Malaysia (IM) to grant the following exemptions/incentives:

Entity	Incentive
IDR status company	10 years income tax exemption on statutory income from the provision of qualifying services to a person situated within designated nodes in the IDR or outside Malaysia. Operations to commence before 31 December 2015.
Developer	Income tax exemption on statutory income from the disposal of rights over land in designated nodes (until year of assessment 2015). Income tax exemption on rental or disposal of buildings in designated nodes (until year of assessment 2020).
Development manager	Income tax exemption on statutory income from the provision of management, supervisory, and marketing services to an approved developer (until year of assessment 2020).
Non-resident service provider	Income tax and WHT exemptions on income from technical fees, interest, or royalties received from approved developers in IDR designated nodes or IDR status companies.
Individuals working in IDR	A qualified knowledge worker is taxed at the rate of 15% on chargeable income from employment with a designated company engaged in a qualified activity (e.g. green technology, educational services, healthcare services, creative industries, financial advisory and consulting services, logistics services, tourism). Employment must commence between 24 October 2009 and 31 December 2015.

Information and communication technology

MSC Malaysia

MSC Malaysia is Malaysia's initiative for the global information technology (IT) industry and is designed to be the research and development (R&D) centre for industries based on IT. It is an information communication technology hub equipped with high-capacity global telecommunications and logistics networks. MSC Malaysia is also supported by secure cyber laws, strategic policies, and a range of financial and non-financial incentives for investors. It is managed by the Multimedia Development Corporation (MDeC), a 'one-stop shop' that acts as the approving authority for companies applying for MSC Malaysia status.

MSC Malaysia status is awarded to both local and foreign companies that develop or use multimedia technologies to produce or enhance their products and services as well as for process development. MSC Malaysia companies are eligible for incentives, which include the following:

- PS (five + extendable by five years) of 100% statutory income or ITA of 100% for five years for a new company or existing company on its additional income.
- Eligibility for R&D grants (for majority Malaysian-owned MSC Malaysia company).
- Exemption from indirect taxes on multimedia equipment.
- Unrestricted employment of local and foreign knowledge workers.
- Freedom to source funds globally for investments.
- Protection of intellectual property and cyber laws.
- No censorship of the internet.
- Globally competitive telecommunication tariffs and services guarantees, world-class physical and IT infrastructure, and excellent R&D facilities.

M

Offshore trading through websites in Malaysia

Income received by companies undertaking offshore trading (buying and selling of foreign goods to non-residents) via websites in Malaysia is taxed at a reduced rate of 10% for a period of five years. The approval of the Minister of Finance must be obtained.

Green incentives

Green Building Index (GBI) certification

A resident in Malaysia awarded a GBI certificate by the Board of Architects Malaysia from 24 October 2009 until 31 December 2014 is granted 100% allowance on qualifying expenditure incurred for the purpose of obtaining the GBI certificate, to be utilised against 100% of statutory income.

Renewable energy source

Companies engaged in generating energy from renewable sources (biomass, hydropower, or solar power) can enjoy the following incentives for applications received before 31 December 2015:

- Full income tax exemption on statutory income for ten years, or
- ITA of 100% QCE against 100% statutory income for five years.

Energy conservation

Companies undertaking contracting service activities to conserve usage of energy can enjoy the following incentives for applications received before 31 December 2015:

Malaysia

- Full income tax exemption on statutory income for ten years, or
- ITA of 100% QCE against 100% statutory income for five years.

Biotechnology industry

Biotechnology industry

Companies undertaking biotechnology activity with approved bionexus status from Malaysian Biotechnology Corporation Sdn Bhd will be eligible for the following incentives:

- Full income tax exemption for ten years from the first year in which the company derives statutory income or ITA of 100% on QCE incurred for a period of five years.
- Concessional tax rate of 20% on statutory income from qualifying activities for ten years upon expiry of the tax exempt period.
- Accelerated industrial building allowance (over ten years) for buildings used solely purpose of its new business or expansion project.
- Exemption of import duty and sales tax on import of raw materials and machinery.

Research and development (R&D)

Contract R&D company

Companies that provide R&D services to third parties are eligible for:

- full exemption of their statutory income for a period of five years (extendable by five years), or
- ITA of 100% of QCE incurred within a period of ten (extendable by ten years) to be utilised against 70% of statutory income.

R&D company

The ITA incentive is also available to companies undertaking R&D services for their group and third parties.

In-house R&D

Companies undertaking in-house R&D projects are eligible for ITA at the rate of 50% of QCE incurred within a period of ten years.

Commercialisation of resource-based R&D findings

A company that invest for the sole purpose of financing a project on commercialisation of resource-based R&D findings (which is wholly owned by a public research institute or public institute of higher learning in Malaysia) is given a deduction equivalent to the value of that investment.

The subsidiary undertaking the commercialisation of R&D findings is granted 100% tax exemption on statutory income for ten years.

Other incentives

Shipping

A tax-resident person (including a partnership) carrying on shipping business using Malaysian ships is exempt from tax on income. Effective from year of assessment 2012, this exemption is reduced from 100% to 70% of statutory income and determined on a per ship basis. The balance of 30% of statutory income is deemed to be total income chargeable to tax.

Healthcare service providers

A healthcare service provider providing healthcare services to foreign clients (foreign companies, partnership, and citizens) are given income tax exemption equivalent to 100% of the value of increased services to be utilised against 70% of statutory income (year of assessment 2010 to 2014).

Healthcare facilities

Qualifying private healthcare facilities are eligible for 100% tax exemption on statutory income for five years in respect of the construction of hospitals and expansion and refurbishment of existing ones (applications to be made between 1 January 2010 to 31 December 2014).

Foreign tax credit

See *Foreign income in the Income determination section* for a discussion of the foreign tax credit regime.

Withholding taxes

Corporations making payments of the following types of income are required to withhold tax at the rates shown in the table below. See *Note 5 for other sources of income subject to WHT*.

Notes

* Treaties pending ratification

Restricted tax treaties dealing with taxation of specific transport operations in international traffic have also been signed with Argentina and the United States.

1. Dividends:

- A single-tier system of taxation came into force on 1 January 2008 that replaced the full imputation system (see the *Income determination section for details*).
- Malaysia has no WHT on dividends in addition to tax on the profits out of which the dividends are declared. Some treaties provide for a maximum WHT on dividends should Malaysia impose such a WHT in the future.

2. Interest:

- Interest on loans given to or guaranteed by the Malaysian government is exempt from tax.
- Interest paid to a non-resident by a commercial or merchant bank operating in Malaysia is also exempt from tax.

3. Royalty:

- Approved royalty payments under certain treaty provisions are exempt from WHT.
- Royalty income received by non-resident franchisors under franchised education scheme programmes by the Ministry of Education is exempted from tax.
- Royalty does not include payments in respect of the operation of oil or gas wells, or the extraction of mineral deposits or other natural resources.
- Royalty does not include amount paid in respect of motion picture films or of tapes for radio or television broadcasting.
- Royalty does not include natural resource royalties.
- Royalty does not include royalty paid in respect of (literary or artistic copyrights - Norway only) or of motion picture films or of tapes for television (or radio - Thailand only) broadcasting, or of the operation of a mine, oil well, quarry, or any other place of extraction of natural resources or of timber or other forest produce.

4. Special classes of income:

- Contract payments to non-resident contractors in respect of services under a contract project are subject to a 13% deduction of tax (10% on account of the contractors' tax liability and 3% on account of their employees' tax liability). This deduction of tax at source does not represent a final tax, which is determined upon the filing of the tax return.
- Payments made to non-residents in respect of the provision of technical services performed in Malaysia and rental of movable properties are subject to a 10% WHT (unless exempted under statutory provisions for purpose of granting incentives).

5. Other income:

- WHT is also applied in respect of income of a non-resident from sources other than the following:
 - Sources shown in the preceding table.
 - A business source.
 - An employment source.
- The rate of WHT on such income is 10%. This is applicable on payments made to residents of all the treaty partners listed, except for certain countries (including Germany, Turkmenistan, Bosnia & Herzegovina, Senegal, and Jordan) where the respective tax treaties have provided for such type of income to be taxed only in the contracting state in which the recipient is resident.

Tax administration

Taxable period

Assessment of income is on a current-year basis. A company is taxed on income from all sources (whether business or non-business) arising in its financial year ending in the calendar year which coincides with that particular year of assessment. For example, a company that closes its accounts on 30 June of each year is taxed on income earned during the financial year ending on 30 June 2012 for year of assessment 2012.

Malaysia

Tax returns

Under the self-assessment system, companies are required to submit a return of income within seven months from the date of closing of accounts. Particulars required to be specified in the return include the amount of chargeable income and tax payable by the company. The tax return is deemed to be a notice of assessment and is deemed served on the company upon the date the tax return is submitted.

'E-filing' or online filing of tax returns via the Internet is available. E-filing is encouraged by the Inland Revenue Board.

Payment of tax

Tax payable under an assessment upon submission of a tax return is due and payable by the last day of the seventh month from the date of closing of accounts.

Companies are required to furnish estimates of their tax payable for a year of assessment no later than 30 days before the beginning of the basis period (normally the financial year). However, a newly established company with paid-up capital of MYR 2.5 million or less that meets with certain specified conditions is exempted from this requirement for two years, beginning from the year of assessment in which the company commences operation. A revised estimate can be submitted in the sixth and ninth months of the basis period for a year of assessment.

Companies are then required to pay tax by monthly instalments (based on the estimates submitted) commencing from the second month of the company's basis period.

From year of assessment 2011, a company commencing operations in a year of assessment is not required to furnish estimates of tax payable or to make instalment payments if the basis period for the year of assessment in which the company commences operations is less than six months.

Statute of limitations

Additional assessments can be made within six years after the expiration of the relevant year of assessment. This time limit is not applicable where fraud, wilful default, or negligence has been committed.

Audit cycle

The tax authorities have issued a Tax Audit Framework that outlines the rights and responsibilities of audit officers, taxpayers, and tax agents in respect of a tax audit. A tax audit may cover a period of one to three years of assessment determined in accordance with the audit focus. The years of assessment to be covered in a tax audit may, however, be extended depending on the issues identified during an audit.

Topics of focus for tax authorities

Some issues that the tax authorities have focused on recently include:

- Deductibility of certain expenses (e.g. entertainment, provisions, management service fees, allocated expenses from foreign related counterparts).
- The correctness of tax incentive claims.

Significant developments

A number of changes to Maltese tax legislation were published in 2011, including:

- The EU Directive 2011/96/EU of 30 November 2011 on the common system of taxation applicable in the case of parent companies and subsidiaries of different member states has been fully transposed into Maltese legislation.
- Rules establishing the taxation of securitisation of vehicles have been recently introduced into Maltese tax law. Such rules provide for tax neutrality in respect of a securitisation transaction. In terms of the rules, the income derived by a securitisation vehicle in respect of a securitisation transaction may effectively not be subject to any Maltese income tax.
- Among other double taxation treaties (DTTs) in force with Malta, a new treaty has recently entered into force between Malta and the People's Republic of China. The treaty applies with respect to income derived during taxable years starting on or after 1 January 2012. This new treaty replaces the DTT which was signed in 1993 and is expected to enhance Malta's attractiveness for the purposes of channelling investments in or from China.
- An income tax exemption has been introduced in respect of artistic royalties protected by copyrights. This extends the current exemption applicable on royalties derived from qualifying patents on inventions.
- Legislation providing for the taxation of private foundations that complements the Private Foundation Law embodied within Maltese Civil law.
- Incentives for businesses to regularise their value-added tax (VAT) position by means of the introduction of a scheme whereby businesses may settle VAT dues and pay a reduced amount of penalties and accumulated interest.
- A new scheme has been introduced whereby rental income derived from immovable property that has been restored will be subject to a final withholding tax (WHT) of 10% of the gross rental income received for residential purposes and 15% for commercial purposes.
- A reduced rate of WHT of 10% has been introduced with respect to a transfer of immovable property that has been restored, subject to the satisfaction of certain conditions.

Taxes on corporate income

Companies are subject to income tax at a flat rate of 35%. There is no corporation tax structure separate from income tax.

A company incorporated in Malta is considered as both domiciled and resident in Malta and is consequently taxable on a worldwide basis. A non-Maltese incorporated company which is resident in Malta through management and control is subject to Maltese tax on income arising in Malta and on income received in/remitted to Malta.

Malta

Petroleum profits tax

Petroleum profits tax is levied as income tax with similar deductions being allowed in respect of incurred expenditure. In the case of a Production Sharing Contract signed after 1 January 1996, any petroleum profits are taxed at the standard corporate tax rate of 35%. However, all other petroleum profits are subject to a 50% tax rate.

Insurance profits tax

Insurance profits tax is levied as income tax and subject to the normal standard tax rate of 35% as other corporate profits; however, the manner in which such profits are ascertained is subject to a number of detailed rules which take into account the special nature of the insurance industry. In the case of non-resident companies, the computation is applied with reference only to business carried on in or from Malta.

Shipping profits tax

A beneficial tonnage tax regime is applicable under Maltese law. Such regime covers profits from shipping activities as defined under the applicable regulations which are derived by qualifying Maltese-flagged and European Union (EU)/European Economic Area (EEA) vessels as well as non-EU/EEA vessels satisfying certain additional rules. Furthermore, qualifying ship management activities are also entitled to the benefits of the tonnage tax regime. Profits qualifying under the tonnage tax regime may also be distributed tax-free. The related company shares are exempt from the provisions of the Duty on Documents and Transfers Act (stamp duties).

Corporate residence

All companies incorporated in Malta are considered to be both domiciled and resident in Malta. Other bodies of persons (including companies incorporated overseas) are considered to be resident in Malta when the control and management of their business are exercised in the country.

Permanent establishment (PE)

Although Maltese tax legislation contains a number of references to the term 'permanent establishment', the term is not defined by Maltese legislation. Indeed, in terms of Maltese domestic tax law, a non-resident is, in principle, subject to Maltese tax on income arising in Malta, irrespective of the existence or otherwise of a PE in Malta (naturally subject to any DTT provisions, which would apply if in conflict with Maltese tax law).

In the event the Maltese Revenue is required to interpret such a term, reference would typically be made to the definition contained in the Organisation for Economic Co-operation and Development (OECD) Model Convention.

Other taxes

Value-added tax (VAT)

Supplies of goods and services in Malta are subject to VAT at the standard rate of 18% (7% on accommodation in hotels and licensed premises; 5% on supply of electricity, works of art, collector's items and antiques, certain confectionery, medical accessories, printed matter, and items for exclusive use by the disabled). Exports to countries outside the European Union, food, and certain other goods and services are exempt from VAT and provide a right to credit of VAT remitted.

A government initiative has been recently introduced that results in the reduction of administrative penalties incurred in terms of the Maltese Value Added Tax Act. This VAT amnesty is intended to encourage the submission of outstanding VAT returns, settle tax balances due, and assist businesses to regularise their VAT positions.

Customs duties

Goods imported from outside the European Union may be subject to customs duties. A Customs Code provides for customs procedures and concepts, which are based on European Community requirements.

Excise duties

Excise duties are chargeable on certain energy products, certain alcoholic drinks, certain manufactured tobacco products, and mobile telephony services at a 5% rate (although other rates may apply in different circumstances).

Property transfer taxes

Immovable property situated in Malta is generally subject to a final WHT of 12%, which is, in most cases, charged on the transfer value of the property. The term 'transfer' is attributed a very wide definition and encompasses any alienation of property under any title. There are, however, a number of instances where the transfer of immovable property is taxed under the normal taxing provisions, i.e. mainly the gain (not the transfer value) being chargeable at the corporate tax rate.

Stamp duty

Stamp duty is charged on, among other transactions, transfers of immovable property (5% for both residents and non-residents) and marketable securities (2%; 5% in the case of transfers of shares in property companies). Furthermore, in the event that the market value of shares held by a person is reduced following a change in the company's issued share capital or voting rights and the value shifts onto the other shareholders, the transferor would be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a stamp duty liability (although certain exceptions/exemptions may apply).

Maltese legislation also provides for the possibility of a stamp duty exemption in a number of instances, subject to the satisfaction of certain conditions. Some of the more commonly availed of exemptions include the acquisition or disposal of marketable securities by or in the following: (i) licensed collective investment schemes; (ii) licensed persons providing management, administration, safekeeping or investment advice to collective investment schemes; (iii) companies being owned as to more than 50% by non-Maltese residents and satisfying certain other conditions; and (iv) a company that carries on or intends to carry on more than 90% of its business outside of Malta.

Employer's social security contributions

Employers are obliged to pay social security contributions at the rate of 10% of the individual employee's salary and at fixed rates of 37.85 euros (EUR) per week for annual salaries exceeding EUR 20,061, provided the employee is born on or after 1 January 1962 (note that the employee is also required to pay an equivalent weekly amount).

Branch income

The tax rate on branch income is the same as that for resident companies. Other than the tax charged on a branch's income, no tax is withheld on transfers of profits to the head office.

Malta

Income determination

Inventory valuation

Inventory valuations are generally made at the lower of cost or market value. In general, the book and tax methods of inventory valuation will conform. However, the last in first out (LIFO) method is not accepted for taxation purposes. Obsolescence is accepted where proven, but there are no provisions to take into account the effects of monetary inflation on the inventory valuation.

Capital gains

Tax is chargeable on capital gains realised on the transfer of immovable property (real estate), shares and other securities, business goodwill, business permits, copyrights, patents, trade names, trademarks, interests in a partnership, and beneficial interests in a trust. In the case of transfers of immovable property, a final WHT of 12% on the transfer value applies. Note that there are certain cases where the 12% final WHT on the transfer value may not apply, and the transfers would be subject to the normal tax on capital gains regime with the chargeable profit being taxed at the taxpayer's applicable rate(s).

No tax is levied on investments that yield a fixed rate of return. A tax exemption applies in certain instances and subject to the satisfaction of certain conditions on the capital gain arising on the transfer of shares in a company listed on a recognised stock exchange other than shares held in certain collective investment schemes. If the capital gain arising on the transfer of listed shares is subject to tax, then special rules apply with respect to the calculation of the gain and such gain would be subject to tax separately at the rate of 15%.

Subject to the satisfaction of certain conditions, if the asset is transferred between group companies, no loss or gain is deemed to arise from the transfer. Note that a provision has been enacted to bring to charge the transfer of shares in property companies (as specifically defined) that were originally subject to intra-group tax deferral when the transferor and the transferee cease to be members of the original group within six years from the date of such intra-group transfer.

Gains realised from the transfer of other assets fall outside the scope of the tax. Gains arising outside Malta and derived by a company that is either not domiciled or not ordinarily resident in Malta are not subject to tax. There are also a number of exemptions provided in the law. For example, capital gains realised by non-residents on transfers of units in Maltese collective investment schemes, similar investments relating to linked long-term insurance business and shares, or securities in Maltese companies (except for companies holding certain Maltese immovable property) are exempt from tax.

Rollover relief

Rollover relief is granted with respect to capital assets used in a business for a period of at least three years and which are transferred and replaced within one year by an asset used solely for similar business purposes (i.e. no tax is chargeable on the capital gain). In such instances, the cost of acquisition of the new asset is reduced by the gain on the transfer of the previous asset which would otherwise have been taxable.

Maltese tax law also provides for the surrendering and claiming of allowable losses between companies that form part of the same group (*see Group taxation for more information*) as well as for reorganisation relief, subject to certain specific conditions.

Dividend income

Dividends received by one resident company from another, whether or not a subsidiary, are taxable on the gross amount in the recipient's hands. If the distributed profits have been taxed, no further tax should be chargeable to the recipient company. However, for resident shareholders, if the corporate rate of tax in the year in which the profits are earned is lower than that in the year in which they are distributed, an amount equivalent to the difference in rates (topping up) is payable. If the distribution is made from untaxed income, the dividend would be tax-free in the hands of the recipient company.

Dividends and gains on disposal of shares received by a corporate investor from a non-resident company (or from a non-resident limited partnership) may qualify for a participation exemption in Malta, subject to the satisfaction of certain statutory conditions.

The participation exemption may also apply to gains upon the disposal of equity holdings in Maltese-resident entities. Distributions of taxed income by Maltese-resident companies are not subject to further tax under the full imputation system.

Stock dividends

A Maltese company may distribute bonus shares from profits, whether of an income or capital nature, and from share premium and capital redemption reserves. When bonus shares represent a capitalisation of profits, they are deemed to be dividends for tax purposes. Such bonus shares are subject to tax in the recipients' hands, gross of any tax paid at the corporate level on the relative profits, but tax credits equivalent to the gross-up of tax are available to stockholders.

Interest income

Interest is chargeable to tax under the provisions of Article 4(1)(c) of the Income Tax Act and subject to the standard corporate tax rate. Nevertheless, in the event the receipt of interest falls within the definition of 'investment income' as established by Maltese tax legislation, a WHT of 15% may be generally applicable. Furthermore, in the case of interest income payable to non-Maltese residents, such interest should be exempt from Maltese tax, subject to the satisfaction of certain statutory conditions.

Foreign income

A company is taxable on its worldwide income when it is ordinarily resident and domiciled in Malta. A company that is either not ordinarily resident or not domiciled in Malta is taxable on its foreign income only insofar as such income is remitted to/received in Malta. Foreign tax is relieved by way of tax credits. This may occur under the terms of a DTT. Where no treaty exists, the foreign tax can be relieved through a system of unilateral relief. Relief for underlying tax is also granted with respect to dividend income, either in terms of a DTT or as unilateral relief. Such relief may be available if, among other things, evidence of tax paid abroad is produced.

Profits of Malta resident companies are subdivided for Maltese tax purposes into five accounts: the Immovable Property Account, the Final Tax Account, the Maltese Taxed Account, the Untaxed Account, and the Foreign Income Account. The last of these includes, among other things, taxable profits of Maltese-resident companies resulting from foreign investments; profits of a foreign permanent establishment (PE); and profits resulting from foreign investments, assets, or liabilities of an onshore bank licensed in Malta. Income allocated to the Foreign Income Account for which no evidence of tax paid abroad is available can qualify for a flat-rate foreign tax credit of 25%.

Malta

The Immovable Property Account would include profits and income derived directly or indirectly from immovable property situated in Malta. The Final Tax Account would include, among other items, profits that have been subject to a final tax at source or were exempt from tax and such exemption is extended to shareholders upon a distribution of such profits. The Maltese Taxed Account would include any other taxed profits while the Untaxed Account would represent the difference between the distributable profits and the profits allocated to the other taxed accounts.

Under Malta's system of taxation of dividends, shareholders receiving distributions from the Maltese Taxed Account and/or the Foreign Income Account may be entitled to a tax refund of part or the full tax paid by the distributing Maltese company on such profits being distributed. The tax refund may be either a six-sevenths refund, a five-sevenths refund, a two-thirds refund, or a full refund of the tax suffered by the Maltese distributing company on the distributed profits. The type of the tax refund depends on the nature of the income to be distributed.

Deductions

The basic condition for deductibility of expenses is that deductions are allowable only with respect to expenditures which are wholly and exclusively incurred in the production of income. However, the Maltese Income Tax Act also provides a number of exceptions whereby specific expenses of a capital nature may also be tax deductible, subject to the satisfaction of the statutory conditions applicable thereto. The following are some further comments on specific items of expenditure.

Depreciation and depletion

Tax depreciation is computed on the straight-line method. The rate of depreciation on plant and machinery varies according to the category of the plant and machinery in question.

Maltese tax law prescribes the minimum number of years over which items of plant and machinery are to be depreciated as follows:

Category	Years
Computers and electronic equipment	4
Computer software	4
Motor vehicles	5
Furniture, fixtures, fittings, and soft furnishings	10
Equipment used for constructions of buildings and excavation	6
Catering equipment	6
Aircraft - aircraft airframe	6
Aircraft - engines	6
Aircraft - engine or airframe overhaul	6
Aircraft - interiors and other parts	4
Ships and vessels	10
Electrical and plumbing installations and sanitary fittings	15
Cable infrastructure	20
Pipeline infrastructure	20
Communications and broadcasting equipment	6

Category	Years
Medical equipment	6
Lifts and escalators	10
Air-conditioners	6
Equipment mainly designed or used for the production of water or electricity	6
Other machinery	5
Other plant	10

The wear and tear rate on industrial buildings and structures (including hotels) may not exceed 2% per annum. New acquisitions of industrial buildings and structures are entitled to a concurrent extra 10% allowance in the year of acquisition. Tax depreciation is not required to conform to book depreciation.

The total allowances over the asset's useful life may not exceed 100% of its cost. If a surplus arises on disposal of a tax-depreciated asset, it is either added to the year's income or utilised to reduce the cost of any replacement. If the asset has been under-depreciated, a balancing allowance is granted.

No deduction is available for the depletion of natural resources.

The rules on tax deductions for wear and tear of plant and machinery provide for certain specific treatment in particular situations, including, among other things, the following:

- To establish the cost of an asset when it is transferred between related companies, the lower of the actual cost of the asset or the tax written-down value adjusted by any balancing charge or allowance incurred by the transferring company should be applied.
- Deductions for wear and tear are allowed only where proper records and documentation have been kept that support the cost of the respective assets.
- A proportional deduction is allowed where an asset is used partly in the production of income and partly for other purposes.

Goodwill

In the event that goodwill were to fall within the purport of intellectual property (IP) for the purposes of the tax deductibility rules under Maltese tax law, then it may possibly be argued that an expenditure on goodwill may be tax deductible. However, this would need to be analysed on a case-by-case basis.

Start-up expenses

Certain pre-trading expenses are also allowed as a deduction, subject to the satisfaction of the following conditions:

- a. The expenditure is incurred not more than 18 months before the commencement of the trade or business.
- b. The expenditure is not deductible in ascertaining the trading or business income of the person carrying on such trade or business but would have been so deductible under (a) above had it been incurred after that time.

In the event the above conditions are satisfied, such expenditure is treated as incurred on the day on which the trade or business is first carried on by the person.

Malta

Interest expenses

Interest on any borrowed money is an allowable deduction if it is paid on capital employed in acquiring income. The expense is allowable even though the borrowing would have been made for a capital purpose, but it is deductible only against the income derived in the same year from the employment of that capital. This special rule is in addition to the deduction for interest paid on money due on revenue account (such interest should be deductible under the general rule of deductibility), such as interest on trade debts or charged on normal business overdraft facilities.

Bad debt

Bad debts incurred in any trade, business, profession, or vocation are allowed in the year they become bad if proved to the satisfaction of the tax authorities. No deduction is given for provisions for bad debts and for bad debts incurred in activities other than a trade, business, profession, or vocation. Any bad debt that is later recovered is deemed as income for the year in which it is received.

Charitable contributions

The general rule is that charitable contributions are not deductible for Maltese tax purposes unless expressly provided for by law.

Fines and penalties

The general rule is that fines and penalties are not deductible for Maltese tax purposes. Nevertheless, there is an exemption to this general rule which provides that interest paid or payable by any person in terms of the Maltese Value Added Tax Act will be treated as expenses incurred in the production of the income of that person for income tax purposes.

Taxes

The typical interpretation is that taxes suffered are not deductible for Maltese tax purposes, although certain exceptions may possibly apply.

Other significant items

Capital expenditures on scientific research, patents, and IP rights are written off over a number of years. In the case of scientific research, a deduction may be granted at 150% of the expenditure.

The Income Tax (Deductions) Rules of 2001 provide for specific conditions on deductions with respect to the use of cars and the payment of employee compensation. The cost on which capital allowances on certain motor vehicles may be claimed is restricted to EUR 14,000 as of year of assessment 2011. Deductions for lease payments on cars are restricted in a manner that corresponds with the stated restriction of EUR 14,000 (also as of year of assessment 2011) that applies to capital allowances on owned cars. With respect to payment of employee compensation, the Deduction Rules require that in order for employee compensation to be allowed as a deduction for tax purposes in the hands of the employing company, it must have been duly accounted for. In particular, the employee compensation must have been reported on the appropriate forms and within the statutory time limit to the Office of Inland Revenue. The rules also provide for restrictions on deductibility of emoluments with respect to the payment of certain fringe benefits to employees.

Net operating losses

Net operating losses may be carried forward indefinitely until absorbed. There is no carryback of losses, not even in terminal years. Unabsorbed capital allowances may be

carried forward only against the same underlying source of income. Where the source ceases to exist, any remaining balance of unabsorbed capital allowances is lost.

Payments to foreign affiliates

There are no restrictions on the deductibility of royalties, interest (except for interest, discount, or premium which are in any manner connected to Maltese immovable property and subject to the satisfaction of certain other statutory conditions, in which case, the interest/discount/premium should not be tax deductible in Malta), and service fees paid to foreign affiliates as long as the particular expenses are considered to be incurred in the production of the particular income and satisfy the applicable statutory conditions. Interest, discount, premium, or royalties derived by non-residents are exempt from tax, subject to the applicable statutory requirements.

Group taxation

Two companies that for tax purposes are resident exclusively in Malta, where one company is a 50% plus subsidiary of the other or both are 50% plus subsidiaries of a third Malta-resident company, qualify as members of a group of companies. Allowable losses may be surrendered by a company to another company within the group where both companies have concurrent accounting periods and form part of such group throughout the entire basis year for which this relief is claimed; however, such surrendering of losses may not occur where the surrendering or claimant company is carrying on the business of insurance. Each company must file a separate tax return, and no combined grouping or consolidated returns are permitted.

Transfer pricing

Malta does not operate a sophisticated transfer pricing regime. There are some general anti-avoidance provisions and brief references to transactions at arm's length. However, the Maltese tax authorities would typically still consider it desirable that transactions between residents and non-residents broadly adhere to the arm's-length principle, that is, prices that would have been concluded between independent enterprises. However, no specific rules are available on the manner in which an arm's-length price is to be established.

Thin capitalisation

The Maltese tax regime does not contain thin capitalisation rules.

Controlled foreign companies (CFCs)

No anti-CFC rules or legislation are applicable in Malta.

Tax credits and incentives

Foreign tax credit

A credit for foreign taxes may be applied against the Maltese tax charge (*see Foreign income in the Income determination section for more information*).

Inbound investment

Investments by foreigners may be readily repatriated together with profits.

The Malta Enterprise Act and other related legislation provide a comprehensive package of incentives for inbound investment. These incentives are reserved for enterprises carrying on certain activities in Malta, mainly manufacturing activities.

Malta

The focus is on high-value-added activities, and approval of a project's eligibility for benefits by the Malta Enterprise may be required. In general, eligibility does not depend on whether the company produces for the local or for export markets. The main tax incentives include the following:

- Enterprises carrying out qualifying activities, which mainly include manufacturing activities, qualify for investment tax credits whereby a percentage of up to 30% (50% in the case of small-sized enterprises and 40% in the case of medium-sized enterprises) of qualifying expenditures are off-set against the tax charge (not against taxable income). Any unused credits are carried forward and added to the credits for subsequent years. The amount carried forward is increased by a percentage rate which is based on EU parameters as updated from time to time.
- Certain tax credits and special incentives may be available, subject to certain conditions. These tax credits are calculated on the basis of specific expenditures incurred by a company while the special incentives grant tax exemptions on all or part of the chargeable income in specified circumstances.
- No further tax is charged on distributions from profits that had previously been taxed at a reduced rate. This benefit is also extended to amounts that were not subject to tax on account of the investment allowance, investment tax credits, and specific tax credits/special incentives.
- A 15.75% tax rate is applicable to profits reinvested in the enterprise, pursuant to a project approved by the Malta Enterprise.
- The combination of certain tax treaties and Maltese domestic law lowers the Maltese tax rate on certain companies receiving certain industrial assistance (i.e. mainly assistance in terms of the Malta Enterprise Act, Business Promotion Act, and Business Promotion Regulations) to 15%.

Capital investment

In the case of qualifying companies, an investment allowance of 50% on plant and machinery and of 20% on industrial buildings and structures may be available (subject to certain capping rules), bringing the total allowances granted during the lifetime of the assets up to 150% and 120%, respectively. Apart from the investment allowances, normal allowances for wear and tear are also available on such assets (*see Depreciation and depletion in the Deductions section for more information*).

International business profits

Tax benefits are available for shareholders with respect to distributions by such companies of specified types of income. A beneficial tax regime is also available in respect of collective investment schemes.

The Maltese fiscal implications relative to trusts vary, depending on a number of circumstances, including: (i) the particulars of the parties involved (e.g. domicile or residence of the trustees or beneficiaries), (ii) the act or event under review (e.g. the settlement of property, transfers of beneficial interests, distributions of trust assets), and (iii) the nature of the trust assets. Furthermore, in certain circumstances, tax transparency provisions are set out in the law, particularly so as to allow, among other things, the application of tax exemptions that would have applied to beneficiaries if there was no trust relationship.

An option exists for a step-up in the cost of acquisition of assets situated outside Malta (including companies) effecting a change in domicile or residence or becoming Maltese companies as a result of cross border mergers.

Any income derived from the ownership, use, or lease of aircraft when such aircraft is employed for international transport shall be deemed to arise outside Malta and hence outside the Maltese tax base, irrespective of the country of incorporation of the aircraft or whether the aircraft calls or operates from Malta.

Withholding taxes

Domestic corporations paying certain types of income are subject to deduction of tax-at-source obligations as follows:

Recipient	Dividends (%) (1)	Interest (%)	Royalties (%)
Resident corporations	35	35 (2)	0
Resident individuals	35	25 (2)	0
Non-resident corporations and individuals:			
Non-treaty	35	0 (3)	0 (3)

Notes

Treaties relating to international air and shipping traffic are in force with Switzerland and the United States.

The numbers in parentheses refer to the following notes:

1. Malta makes no distinction between portfolio and substantial holdings. No additional tax is imposed on distributions other than the tax charged on the company with respect to distributed profits. Under Malta's full-imputation system of taxation of dividends, the corporate tax is assimilated with the personal income tax of the shareholder with respect to the dividend. In the shareholder's hands, the dividend is taxed at the gross amount, and the relevant amount of corporate tax offsets the shareholder's tax liability on income from all taxable sources. Special provisions exist for taxation of distributions from income that would not have suffered tax at the corporate level.
2. Withholding of tax may be required only where the interest is debenture interest or interest on any other loan advanced to a corporation for capital purposes. The WHT is, in effect, a prepayment of the

- recipient's final liability because a reassessment on income is made upon the submission of returns. Any resulting overpayment is refunded.
3. Interest and royalty income derived by non-residents is exempt from tax in Malta as long as certain conditions are complied with (e.g. they are not effectively connected to a PE of the recipient situated in Malta).
 4. On the basis that Malta operates the full-imputation system of dividends, dividends are not subject to further tax when distributed by a company registered in Malta to a non-Maltese resident. Furthermore, if the rate provided under the Dividends Article in the respective treaty provides for a lower rate than the Maltese corporate tax rate incurred by the company on the respective profits (standard corporate tax rate of 35%), then this may result in a refund of Maltese tax in terms of Malta's full imputation system (such a refund situation may arise in the treaties with Austria, Bulgaria, Kuwait, Libya, and Romania). In a number of treaties, the rate of deduction and of tax is reduced to 15% in the case of companies enjoying certain tax incentives. See also *Note 1 with respect to Malta's full-imputation system of taxation of dividends*.

Tax administration

Taxable period

The year of assessment is a calendar year, but a company may obtain authorisation from the Maltese Revenue to have a different year end (i.e. other than 31 December).

Tax returns

An income tax return for income earned during the previous year must be filed for every year of assessment. The tax return for a company must be submitted by the later of nine months following the end of the financial year or by 31 March following the year of assessment (however, in recent years the Commissioner of Inland Revenue has provided concessionary extensions to such statutory deadlines in the case where the tax return is submitted electronically). Penalties are incurred on late filing of returns. The tax return submitted by the company is a self-assessment, and the Commissioner of Inland Revenue will not raise an assessment unless there is not agreement with the self-assessment.

Payment of tax

Companies pay tax in the currency in which their share capital is denominated.

During the basis tax year, a company is generally required to make provisional tax (PT) payments every four months. In general, the PT payments are based on the last self-assessment filed by the company, and payments are divided into three instalments of 20%, 30%, and 50%, respectively. Any tax liability that is still due at the tax return date after deducting all tax credits must be settled immediately with the submission of the return. Interest at 0.75% per month is charged on any unpaid tax.

In certain instances, especially for companies with mostly international operations, PT may not be payable, and the tax payment is normally paid on the earlier of the date profits are distributed or 18 months after the end of the relative accounting period.

The employer is required to withhold income tax and social security contributions from employees' salaries and pass on such tax/contributions to the Office of Inland Revenue. This system of WHT at source is referred to as the Final Settlement System (FSS), and the employer is legally required to operate such a system. The salary from which the withholding is to be effected should also include the value of any taxable fringe benefits. There are three main categories of fringe benefits: (i) use of motor vehicles, (ii) use of other assets including accommodation, and (iii) other benefits. The method of valuation in each case varies, and the employer is required to refer to the Fringe Benefits Regulations (and also to the fringe benefits guidelines) so as to calculate the

Malta

correct value of any fringe benefits being provided to the employees and to deduct the right amount of tax accordingly.

Audit cycle

A company's annual accounts need to be audited on a yearly basis, and certified auditors are required to report to the shareholders on every set of financial statements furnished at a company's annual general meeting.

Statute of limitations

An assessment (as from year of assessment 1999) may be issued by the Maltese Revenue by not later than six years from the end of the respective tax year. In the event of non-full disclosure or wilful incorrect/misleading information, the aforesaid prescription period would not apply.

In respect of the payment of tax, additional tax, interest, or any penalty, an action may be taken during any time from the date on which it becomes due and payable up to eight years from that date or, where an assessment in respect thereof has been made, from the date on which that assessment becomes final and conclusive.

Topics of focus for tax authorities

We are not aware of any particular topics of focus by the Maltese tax authorities. One might say that typically the Maltese Revenue is particularly wary with respect to activities and transactions concerning immovable property situated in Malta.

Significant developments

New withholding tax (WHT) rates were enacted in the past year. *See the Withholding taxes section for a table of current rates.*

Taxes on corporate income

A corporation resident in Mauritius is subject to tax on its worldwide income. A non-resident corporation is liable to tax on any Mauritius-source income, subject to any applicable tax treaty provisions. Corporations are liable to income tax on their net income, currently at a flat rate of 15%.

Mauritius has a credit system of taxation whereby foreign tax credit is given on any foreign-source income declared in Mauritius on which foreign tax of similar character to Mauritian tax has been imposed. All corporate bodies incorporated in Mauritius (except companies holding a Category 2 Global Business Licence) are subject to income tax. This applies to all associations and other registered bodies. Income derived by local partnerships is shared and taxed in the hands of the partners. Foreign corporations carrying on business, or having a place of business, in Mauritius are also liable to income tax on income derived from Mauritius.

Income tax is payable on total net income before distribution at the following rates:

Entity	Rate (%)
Global Business Category 1 (GBC1) companies and offshore trusts (see below)	15
Freeport operators carrying on Freeport activities other than providing goods and services on local markets	Exempt
All other companies	15

* The normal tax rate will then apply after the exemption period.

Global Business Category 1 (GBC1) companies are liable to tax at the rate of 15%. However, they are entitled to a foreign tax credit equivalent to the higher of 80% of the Mauritius tax chargeable or the actual tax suffered abroad in respect of the foreign-source income.

Global Business Category 2 (GBC2) companies incorporated under the laws of Mauritius are exempt from income tax and are not tax residents for treaty purposes. *For more information, see the Tax credits and incentives section.*

Mauritius

Alternative minimum tax (AMT)

Companies paying or declaring dividends must pay tax either under the normal rules or an AMT, whichever is higher.

AMT is calculated where the normal tax payable for an income year by a company is less than 7.5% of its book profit. The AMT is the lesser of 7.5% of its book profit or 10% of dividends declared in respect of that year.

Book profit is the profit computed in accordance with internationally accepted accounting practices, excluding:

- dividends received from resident companies
- profits or loss on disposal of fixed assets, and
- profits or gains or loss from sale of securities.

AMT does not apply to the following:

- Companies which have not declared any dividend.
- Companies which are exempt from payment of tax.
- GBC1 companies.
- Where the amount representing 10% of dividends declared does not exceed the normal tax payable.

Special levies

Banks

All banks are required to pay a special levy calculated according to their book profit and their operating income derived during the preceding year. 'Operating income' means the sum of net interest income and other income before deducting non-interest expense.

The rates of the special levy on banks are as follows:

Year of assessment commencing	Rates
1 January 2011	3.4% on book profit; 1.0% on operating income
1 January 2012	3.4% on book profit; 1.0% on operating income
1 January 2013 and subsequent years	1.7% on book profit; 0.5% on operating income

One-off charge on banks

Every bank, except the Development Bank of Mauritius, has to create a one-off charge in the year immediately preceding the year of assessment 2012 for an amount equivalent to:

- 0.5% of the turnover and
- 1.25% of the book profit relating to the banking transactions with persons, other than non-residents and companies holding a Global Business Licence under the Financial Services Act.

The fund created is used to finance the new equity fund referred to in the Ministry's document entitled 'Facing The Euro Zone Crisis and Restructuring for Long Term Resilience' during the year immediately preceding the year of assessment 2012.

Where the amount used to finance the private equity fund is less than the one-off charge, the difference shall be remitted to the Mauritius Revenue Authority (MRA) on submission of the return for the year of assessment 2012.

Telephony service providers

Providers of public fixed or mobile telecommunication networks and services (including information and communication services such as value added services and mobile internet) are liable to a solidarity levy. The solidarity levy is calculated according to the book profit and turnover for the preceding income year of the operator. The applicable rates are as follows:

Years of assessment commencing on 1 July 2009, 1 January 2011, 1 January 2012, and 1 January 2013: 5% of the book profit and 1.5% of the turnover of the operator.

'Book profit' means the profit derived by an operator from all its activities and computed in accordance with International Financial Reporting Standards (IFRS).

Corporate Social Responsibility (CSR) Fund

Every year, a company has to set up a CSR Fund equivalent to 2% of its chargeable income of the preceding year to:

- implement an approved programme by the company
- implement an approved programme under the National Empowerment Foundation, or
- finance an approved non-governmental organisation (NGO).

Note that the following entities are not subject to the CSR regulations:

- A company holding a GBC1 Licence under the Financial Services Act;
- A bank holding a banking licence under the Banking Act, in respect of its income derived from its banking transactions with non-residents or with corporations holding a Global Business Licence under the Financial Services Act.
- An IRS company referred to in the Investment Promotion (Real Estate Development Scheme) Regulations 2007.
- A non-resident *société*, a trust, or a trustee of a unit trust scheme.

The CSR contribution is either disbursed by the company on approved projects/NGOs or remitted to the MRA if not expensed fully or paid into the CSR Fund. The CSR Fund is managed by government, and its specific objectives are to:

- encourage companies to manage their own programmes, impacting the intersection of economic with social and environmental development, and
- facilitate the contribution of companies to support existing Approved National Programmes implemented by companies, national agencies, or NGOs.

Local income taxes

Local income taxes levied by local administration, such as urban councils, do not exist in Mauritius.

Mauritius

Corporate residence

Under domestic law, a company is resident in Mauritius for tax purposes if it is incorporated in Mauritius or centrally managed or controlled in Mauritius.

A GBC2 company is not considered a resident in Mauritius for the purposes of double taxation treaties (DTTs).

Under a tax treaty, a company is considered a resident in Mauritius if it is incorporated in Mauritius or if its effective management is in Mauritius.

Permanent establishment (PE)

Generally, a PE is created under a tax treaty if one of the following criteria is met:

- Branch, office, factory, workshop, or installation used for extraction of natural resources.
- Building site, construction, installation, assembly, or supervisory services where the activity on the site lasts for a minimum of six months or 12 months, depending on the tax treaty.

Other taxes

Value-added tax (VAT)

VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them in Mauritius (except those taxed at 0%), other than the following exempt supplies (not an exhaustive list):

- Rice, bread, butter.
- Medical, hospital, and dental services, including clinical laboratory services, services provided in a health institution, and veterinary services.
- Educational and training services provided by institutions approved by the Mauritius Qualification Authority.
- Construction of building for residential purpose, provided letter of intent relating to an Integrated Resort Scheme was issued prior to 1 October 2006.
- Sale or transfer of an immovable property, a building or part of a building, apartment, flat, or tenement.
- Banking services, except:
 - services provided to merchants accepting credit/debit card
 - services in respect of safe deposit locker, and issue and renewal of credit/debit cards
 - services for keeping and maintaining customer's accounts, and
 - services supplied by a bank holding a banking licence under Banking Act 2004 in respect of its banking transactions with non-residents and corporations holding a Global Business Licence.

An entity should register for VAT if turnover exceeds 2 million Mauritian rupees (MUR) a year. However, certain service providers (e.g. accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers) should register for VAT irrespective of their turnover.

Customs duties

Customs duty is levied on commodities imported into Mauritius. The rate of duty applicable is the rate in force under the Customs Tariff Act at the time the bill of entry is validated at the Customs.

An excise duty is also levied at the time of importation on selected commodities, which includes spirits, vehicles, and petroleum products.

A number of exemptions and concessions are available to industries, organisations, and persons under the Customs Tariff Act.

Land transfer tax

Land transfer tax is levied on the transfer of land (excluding the value of any building thereon) and is payable by the transferor at the following rates.

- If the land was held by the transferor for a period of more than five years: 5% of the transfer value.
- If the land was held by the transferor for a period not exceeding five years: 10% of the transfer value.

Land transfer tax is also payable at the above rates by the transferor upon transfer of the shares of a company owning immovable properties based on the value of shares or property, whichever is the lower.

Leasehold tax

Leasehold tax is levied on the registration of a deed of transfer of leasehold rights in state land. Both the lessor and the lessee are liable to leasehold tax at the rate of 10% on the open market value of the leasehold right at the time of transfer.

Registration duty

The Registration Duty Act provides for a duty at an effective rate of 5% on the value of transfer of any immovable property. The duty is payable by the transferee at the time of the transfer.

The transfer of shares of a company other than those listed on the Stock Exchange of Mauritius or traded on the secondary market is subject to registration duty if the company holds immovable property.

The following transactions are not subject to registration duty:

- A transfer of immovable property from ascendant to descendent (or vice versa).
- A transfer of property made to a company holding a letter of approval for the implementation of a project under the Real Estate Development Scheme, provided that the transferor holds shares in the company equivalent to at least the value of the land transferred.
- A transfer of immovable property or shares between companies forming part of a group of companies, as defined in the Companies Act 2001.
- A transfer of immovable property where such transfer takes place between companies having the same shareholders for the sole purpose of merging.

Mauritius

Stamp duty

Stamp duty is levied and paid to the Registrar General on every document at the time of registration, transcription, inscription, or erasure of inscription. Stamp duty varies from MUR 25 to MUR 1,000.

Branch income

Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits by way of dividend to a head office.

Income determination

Inventory valuation

Inventories should be valued at the lower of historical cost or net realisable value. The last in first out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the revenue authority is not satisfied that the basis of valuation is acceptable (e.g. where the LIFO basis has been applied) it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.

Capital gains

There is no tax on capital gains in Mauritius. However, certain transactions are taxed as ordinary business profit instead of capital gains. Where a transaction is in the nature of trade, the revenue authority may take the view that it is an ordinary trading transaction and assess the gains derived as income.

Any gains derived from the sale of shares held for less than six months are classified as trading income and are therefore taxed as ordinary income.

Gains realised from the sale of any property or interest in property acquired in the course of a business, as part of a profit-making undertaking or scheme, are taxable as ordinary income.

Dividend income

Companies, whether resident or not, are exempt from tax on dividends received from resident companies.

Dividend income received from abroad by a company resident in Mauritius (non-GBC1 company) is subject to tax at the rate of 15%. Credit for any foreign tax withheld is given, subject to documentary evidence provided to the MRA.

Dividend income received from abroad by a GBC1 company is subject to tax at an effective rate of 3%.

Stock dividends

A resident company can distribute stock dividends (bonus shares) proportionately to all of its shareholders. Stock dividends per se or convertible into cash are not taxable in the hands of the recipient. Dividends in kind (i.e. other than cash or shares) are treated as taxable benefits.

Interest income

Interest income received by resident companies (non-GBC1 companies) is liable to tax at the rate of 15%.

A GBC1 company receiving interest income from abroad is liable to tax at the effective rate of 3%.

As of 1 March 2012, interest income received by non-residents is liable to WHT at the rate of 10% (final tax).

Interest paid by a GBC1 company to a non-resident is exempt from tax.

Foreign income

Resident corporations are taxed on their worldwide income, but tax credit and treaty relief is generally available in order to avoid double taxation (see *Foreign tax credits in the Tax credits and incentives section for more information*).

Undistributed income of foreign subsidiaries is not subject to any special taxation as long as the income of the foreign subsidiary before distribution is not included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius.

Deductions**Depreciation**

Annual allowance rates vary between 5% and 100% of base value (unless stated otherwise), as per the following table:

Capital expenditure incurred on	Rate of annual allowance	
	Percentage of	
	Base value	Cost
Industrial premises excluding hotels		5
Commercial premises		5
Hotels	30	
Plant or machinery		
Costing MUR 30,000 or less		100
Costing more than MUR 30,000		
Ships or aircrafts	20	
Aircrafts and aircraft simulators leased by a company engaged in aircraft leasing		100
Motor vehicles	25	
Electronic and high precision machinery or equipment, computer hardware and peripherals, and computer software	50	
Furniture and fittings	20	
Other	35	
Improvement on agricultural land for agricultural purposes	25	
Scientific research	25	
Golf courses	15	

Mauritius

	Rate of annual allowance	
	Percentage of	
Capital expenditure incurred on	Base value	Cost
Acquisition or improvement of any other item of a capital nature that is subject to depreciation under the normal accounting principles	5	

Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

Leasing agreements

There has been a substantial increase in leasing activity over the last decade. Where an asset is transferred under a financial lease agreement, the lessee is entitled to capital allowances on the value of the asset, including finance charges, as if it was an outright sale by the lessor.

On the other hand, the lessor cannot capitalise the leased assets in its books, and no capital allowance is claimed on the assets leased. However, the lessor is taxable on the interest income derived from the assets leased.

There are no special rules for operating leases.

Set-up costs

Set-up costs are not allowed for tax purposes as they are considered as pre-operational expenses.

Interest expenses

Expenditure incurred on interest is deductible, provided it is incurred in respect of capital employed exclusively in the production of income.

Mauritius tax law does not provide for thin capitalisation rules, which require companies to maintain a prescribed ratio of share capital to loan capital.

Bad debts

A provision for bad or doubtful debts is generally not deductible unless a court ruling has been obtained against the debtor.

Contributions to charitable institutions

Donations/gifts, whether to charitable institutions or not, are not allowed for tax purposes.

Fines and penalties

Fines and penalties are not allowed for tax purposes as they are expenses not exclusively incurred for the production of gross income

Taxes

Income taxes and foreign taxes paid are not normally deductible; however, some taxes (e.g. municipal taxes relating to buildings, land transfer tax, irrecoverable input VAT) are deductible.

Other significant items

A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

Net operating losses

Losses made in an accounting year are carried forward for a maximum of five years, provided the corporation can demonstrate a 50% continuity of shareholding between the year of loss and the year of claim. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a company takes over another company engaged in manufacturing activities, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the Minister of Finance.

Payments to foreign affiliates

Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable, and do not exceed what would be paid under an arm's-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1 companies, banks out of their foreign-source income as defined in the Income Tax Act, and trusts are tax-exempt.

Group taxation

There are no group taxation provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over (see *Net operating losses in the Deductions section for more information*).

Transfer pricing

Mauritius does not have any specific transfer pricing legislation. However, it does contain an arm's-length provisions requiring transactions between related parties to reflect a commercially objective value which would be the amount charged for the services were the parties not connected.

Thin capitalisation

Mauritius does not have specific thin capitalisation legislation; however, it does have other anti-avoidance provisions.

Tax credits and incentives

Global Business Category 1 and 2 companies

Since January 2011, a GBC1 company can now trade with a Mauritian resident as well as non-residents. Transactions made with a Mauritian resident will be taxed at the rate of 15% whereas transactions with non-residents are taxed at an effective tax rate of 3%.

The registration and application of GBC1 companies should be submitted to the Financial Services Commission (FSC) through a duly licensed Management Company on a prescribed form accompanied by the following:

Mauritius

- The certified supporting documents.
- The applicable processing fees and relevant fees.

A GBC1 company is tax resident in Mauritius and may apply for a Tax Residence Certificate (TRC) from the Director General of the MRA should this be required by the tax authorities in the jurisdiction in which the company is conducting its business.

Investors may benefit from an extensive network of double taxation agreements (DTAs). Entities holding a GBC1 Licence wishing to avail to the benefits of a tax treaty must obtain a TRC issued by the MRA.

A GBC1 company is encouraged to have more substance in Mauritius by ascertaining the following:

- It has at least two directors, resident in Mauritius, of sufficient caliber to exercise independence of mind and judgment.
- It maintains at all times its principal bank account in Mauritius.
- It keeps and maintains, at all times, its accounting records at its registered office in Mauritius.
- It prepares, or proposes to prepare, its statutory financial statements and causes or proposes to have such financial statements to be audited in Mauritius.

A GBC1 company can apply for a TRC to show substance in Mauritius. The TRC is generally issued within a period of seven days from the date of application, provided that the person has submitted the return required under the Income Tax Act 1995.

A GBC2 company is required to have, at all times, a registered agent in Mauritius. Only a management company shall act as the registered agent of a company holding a GBC2 Licence. A GBC2 company is defined as a resident corporation conducting business outside Mauritius and can engage in activities other than the following:

- Banking.
- Financial services.
- Holding, managing, or otherwise dealing with a collective investment fund or scheme as a professional functionary.
- Providing registered office facilities, nominee services, directorship services, secretarial services, or other services for corporations.
- Providing trusteeship services by way of business.

An applicant for a GBC2 Licence must submit the following forms/documents to the FSC through a management company:

- The application form, duly filled in and signed.
- The certified supporting documents.
- The applicable processing fees and relevant fees.

The fees payable to the FSC for registering a GBC1 and a GBC2 company are as follows:

Fee	GBC1 (USD*)	GBC2 (USD)
Processing	500	100
Annual Licensing	1,750	235

* United States dollars

The TRC is renewable on an annual basis and issued in respect of a particular country.

A GBC2 company is a limited liability company incorporated in Mauritius. However, GBC2 companies are exempt from Mauritius tax and are not required to file tax returns. GBC2 companies are therefore not able to access the tax treaty network of Mauritius.

Companies in the Freeport zone

The income of a Freeport operator derived from Freeport activities is exempt from income tax, except income that is derived from goods or services provided on the local market.

Income tax exemption for vessel owners

Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade.

Foreign tax credits

Generally, double taxation is avoided by means of a unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded.

Regarding foreign income derived from countries with which Mauritius has treaties for the avoidance of double taxation, a tax credit is given for foreign tax in accordance with the treaties. There are clauses in the double taxation conventions which provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax.

Mauritius has signed double taxation conventions with Bangladesh, Barbados, Belgium, Botswana, the People's Republic of China, Croatia, Cyprus, France, Germany, India, Italy, Kuwait, Lesotho, Luxembourg, Madagascar, Malaysia, Mozambique, Namibia, Nepal, Oman, Pakistan, Qatar, Rwanda, Senegal, Seychelles, Singapore, South Africa, Sri Lanka, Swaziland, Sweden, Thailand, Tunisia, Uganda, the United Kingdom, United Arab Emirates, and Zimbabwe.

Three treaties await ratification: Congo, Russia, and Zambia.

Five treaties await signature: Egypt, Ghana, Kenya, Malawi, and Nigeria.

13 treaties are being negotiated: Algeria, Burkina Faso, Canada, Czech Republic, Greece, Monaco, Portugal, Republic of Iran, Saudi Arabia, St. Kitts and Nevis, Tanzania, Vietnam, and Yemen.

A GBC1 company may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable on income derived from banking transactions with non-residents and with GBC1 and GBC2 companies.

In the case of foreign dividends, the general tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

Mauritius

Mauritius also allows a tax-sparing credit under its local tax legislation.

Withholding taxes

There is no WHT in Mauritius for payments made by GBC companies to non-residents not carrying out any business in Mauritius. There is no WHT on dividends received from resident companies. The table below shows the rates of WHT applicable for the following payments:

Payment	WHT (%)
Interest payable to a non-resident (other than interest paid by banks)	10
Royalties payable to:	
Resident	10
Non-resident	15
Rent	5
Payments to contractors and sub-contractors	0.75
Payments to providers of services (architect, attorney/solicitors, barrister, dentist, doctor, engineer, land surveyor, legal consultant, project manager in the construction industry, quantity surveyor)	3
Payment made by ministry, government department, local authority, statutory body, or the Rodrigues Regional Assembly on contracts, other than payments to contractors and subcontractors and payments to providers of services as specified at point above.	
For the procurement of goods and services under a single contract, where the payment exceeds MUR 300,000	1
For the procurement of goods under a contract, where the payment exceeds MUR 100,000	1
For the procurement of services under a contract, where the payment exceeds MUR 30,000 rupees	3
Payments made to the owner of an immovable property or agent	5
Payments made to a non-resident for any services rendered in Mauritius	10

Tax administration

Taxable period

Companies are assessed for a year beginning 1 January and ending 31 December on their income for the preceding year ending 31 December. Where a company closes its accounts at a date other than 31 December, it may elect to adopt as a basis year the accounting year ending in the 12-month period preceding the year of assessment.

Tax returns

Every company, both taxpayer and non-taxpayer, must file a return of its income on the basis of the income year preceding the year of assessment. The return must be filed within six months of the financial year-end.

Payment of tax

Any tax due should be paid when the return is filed and within the six months deadline.

Penalties

If timely payment is not made, a penalty representing 5% of the amount of tax due is payable. In addition, interest at the rate of 1% of the tax unpaid for each month or part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month or part of a month is also prescribed for failure to file a return, subject to a maximum of MUR 20,000.

Tax audits

Tax audits are carried out on a sample basis throughout the year. Generally, the audits are fairly detailed, but more protracted enquiries are carried out into cases where fraud is suspected.

Statute of limitations

While there is no statutory time limit for recovering tax already assessed, the Director General is barred from making an assessment for a period beyond four years preceding the current tax year.

Significant developments

On 10 October 2011, modifications to the Miscellaneous Foreign Trade rules were published in Mexico's Official Gazette and included a kind of clarification on the value-added tax (VAT) triggered on *Maquiladora* (IMMEX program) structures. The sale of a virtually exported good to a Mexican resident will be considered a domestic sale subject to VAT withholding, to be remitted by the Mexican resident purchaser of the good.

On 30 June 2011, the Mexican Tax Authorities (Hacienda) issued a comprehensive study on the performance of the flat tax and the possible repeal of certain chapters of the Income Tax Law to include them in the flat tax law with the purpose of having a unified tax law on net income. According to the study, the flat tax has achieved the government's goals and has become an important part of the tax structure in Mexico. However, the study recommended the continued application of the flat tax in coexistence with the income tax. Moreover, Mexico has negotiated the inclusion of the flat tax within its tax treaties.

The government believes that the current tax structure is adequate for the current circumstances. According to the study, the elimination of the corporate income tax (CIT) would produce several adverse consequences not only for taxpayers in Mexico but also to the Mexican economy.

On 30 March 2012, the Mexican government published in the Official Gazette a Decree intended to reduce the administrative tax burden for taxpayers. The Decree compiles several tax benefits that were spread out in different Decrees previously published. In addition, the Decree provides other measures to simplify the tax administration for certain qualified taxpayers.

As of 1 January 2012, the federal tax on the ownership of vehicles was abolished; however, the states may impose a similar tax.

In 2012, the tax authorities released criteria to determine whether a foreign tax can be claimed as a foreign tax credit.

Taxes on corporate income

Federal corporate income tax (CIT)

The CIT applies to Mexican resident taxpayers' income from worldwide sources, as well as to foreign residents on the income attributed to their permanent establishments (PEs) located in Mexico.

The federal CIT rate for 2012 is 30%. Beginning in 2013, the rate will drop to 29% and then back to 28% (as was in force until 2009) in 2014.

All corporate entities, including associations of a civil nature, branches, etc. are subject to the tax rules applicable to Mexican corporations (unless specifically ruled out, such as not-for-profit organisations).

The CIT rate applicable to taxpayers engaged exclusively in agriculture, livestock, fishing, and forestry activities is currently 21%.

Provisions to recognise the effects of inflation for tax purposes in the areas of monetary assets and liabilities (annual monetary adjustment) and depreciable assets are provided in the income tax law, even though recent inflation rates have been decreasing.

Once a corporation has paid its CIT, after-tax earnings (i.e. earnings arising from the after-tax earnings account, *Cuenta de Utilidad Fiscal Neta* or CUFIN) may be distributed to the shareholders with no tax charge at the corporate level and without income tax withholding, regardless of the tax residence of the recipient.

Nonetheless, if a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will be subject to CIT on the grossed-up distributed earnings (gross-up factors are: 1.4286 in 2012, 1.4085 in 2013, and 1.3889 as from 2014).

Tax paid on dividends distributed in excess of CUFIN can be credited against the CIT of the year or in the two fiscal years following the year in which the tax on the non-CUFIN distributions was paid. The CUFIN of the tax years in which the credit is applied must be reduced by an amount equal to the grossed-up dividend distribution.

Federal flat tax

The flat tax applies to Mexican resident taxpayers' income from worldwide sources, as well as to foreign residents on the income attributed to their PEs located in Mexico. The current flat tax rate is 17.5% and is applied to the flat tax base.

In general, the flat tax base is the excess of income actually collected relating to: (i) the sale or disposal of property, (ii) the provision of independent services, and (iii) the granting of temporary use or enjoyment of assets (i.e. rental income and unrelated party royalty income) over amounts actually paid for: (i) the acquisition of assets, (ii) the receipt of independent services, and (iii) the temporary use or enjoyment of assets, as well as certain (iv) other cash expenses, with the exceptions noted below. Even though there are no tax losses for flat tax purposes, a tax credit (with similar results to the application of net operating losses) may be available where flat tax deductions exceed income in a fiscal year, provided certain conditions are met. This credit may be used against flat tax liabilities for the subsequent ten years.

Salaries and wages, employer contributions to the social security system, non-taxable employee benefits, most interest income, and royalties received from related parties for the temporary use or enjoyment of intangible assets are not included within taxable income under the flat tax legislation. Accordingly, payments in respect of these types of expenses are non-deductible items. Nevertheless, the employer can obtain a flat tax credit on 'taxable' wages paid and social security contributions made, which is generally equivalent to deducting these two items.

Mexico

Certain taxpayers are exempt from flat tax.

The flat tax operates as a supplemental tax to CIT, to the extent the flat tax due is higher than the income tax due for the fiscal year. Hence, the initial flat tax triggered is reduced by a 'credit' for an amount equal to CIT of the fiscal year plus any CIT on distributions exceeding the balance of the after-tax earnings account (i.e. non-CUFIN distributions).

Flat tax is computed on a cash-flow basis (with certain exceptions) and determined per calendar year. Nevertheless, advanced monthly flat tax payments are made based on the year-to-date flat tax gross income, minus the authorised deductions in that same period.

Depreciation and amortisation are not deductible for flat tax purposes since the purchase price paid on the acquisition of fixed assets is a deductible item.

Maquiladoras (factories importing duty free materials for processing and re-exporting) are subject to specific provisions that can significantly reduce their effective flat tax rates, to the extent certain conditions are satisfied.

Financial sector entities are subject to flat tax on their financing intermediation margin, less certain cash expenses paid, pursuant to specific rules applicable to these entities in the flat tax law.

Local income tax

There are no state taxes on corporate net income.

Corporate residence

The federal tax code provides that corporations are deemed residents in Mexico if the principal centre of administration or the effective place of management is located in Mexico. A specific definition of 'tax resident' in any tax treaty overrides domestic law definitions, if the taxpayer is eligible to apply the treaty.

When a company ceases to be a Mexican resident in terms of the Mexican federal tax code or any tax treaty, it is deemed to be liquidated for tax purposes. In such cases, a notification is required at least 15 days before the change, and the CIT return must be filed with the Mexican tax authorities within 15 working days following the date on which the change of tax residency takes place.

Permanent establishment (PE)

The income tax law considers a PE to be any place in Mexico where business activities or services are carried out or rendered by non-residents, such as agencies, offices, mining exploration sites, or any other place of exploration, extraction, or exploitation of natural resources, regardless of the length of time involved.

A foreign insurance company could also be considered as having a PE when it engages in activities consisting of insuring risk or collecting premiums (with the exception of reinsurance activities) in Mexico through a party other than an independent agent.

Sites used for display, storage, or purchasing facilities; inventories imported in-bond to be processed by a third party; short-term construction services; and offices to carry out auxiliary or preliminary activities and information gathering or scientific research

are not considered to create a PE in Mexico. Non-residents may also keep merchandise in bonded warehouses (including merchandise delivered for importation into Mexico) without being considered as having a PE.

A non-resident is not considered to have a PE in Mexico as a result of the legal or economic relationships maintained with companies carrying out certain inventory processing activities (i.e. *Maquiladoras*) which normally process goods or merchandise maintained in Mexico by the non-resident by using assets provided by the non-resident or any related party, as long as certain requirements are met. The requirements include the conditions that the non-resident be resident in a tax treaty country and that the *Maquiladora* complies with the transfer pricing provisions provided in the law as well as the revised definition of *Maquiladora* operation that entered into force on 1 January 2011.

Maquila operations ('revised definition') are generally defined as those with the following characteristics:

- Raw materials are supplied by a foreign resident (with which a *Maquila* contract is in place) and are temporarily imported to be processed, transformed, or repaired and are subsequently exported, including for these purposes virtual import-export operations.
- The *Maquila* is also permitted to import goods in accordance with the permanent importation regime. Additionally, local purchases are allowed, as long as such goods are consumed in production and/or exported with the temporarily-imported inventory.
- The processing, transformation, or repair of goods must be performed with temporarily-imported machinery and equipment (M&E) which is the property of the foreign principal. In this regard, the foreign principal must own at least 30% of such M&E. It is important to mention that this M&E may not have been previously owned by the *Maquila* or by any other Mexican related party.

The limits for M&E will not apply to companies that were operating under an IMMEX program prior to 31 December 2009, if such companies have fulfilled all of their tax obligations, including those related to the transfer pricing safe harbour options under the Income Tax Law.

Maquiladoras under shelter programmes may not be considered as creating a PE in Mexico when assets of foreign residents are involved and certain information is provided to the Mexican Tax Administration in relation to the gross revenues earned and income taxes paid by its non-Mexican related party.

A definition of PE in any tax treaty overrides domestic law definitions where the taxpayer is eligible to apply the corresponding tax treaty.

Other taxes

Value-added tax (VAT)

VAT is payable at the general rate of 16% on sales of goods and services, as well as on lease payments and imports of goods and services, except in the border zones, where a 11% VAT rate generally applies (except on the sale of construction and developed real estate, which is subject to the general rate). The sale of medicines, as well as the sale of most food products, is zero-rated. The principal VAT-exempt transactions are the sale of land, credit instruments (including equity shares), residential construction, interest

Mexico

paid by banks, medical services, education, salaries and wages, rentals of residential property, and the sale of non-amortisable participation certificates on real estate investment trusts, provided specific requirements are satisfied.

The sale in Mexico of temporarily imported goods by non-residents to (i) other non-residents, (ii) *Maquiladoras*, or (iii) companies in the automotive industry is also VAT-exempt under certain circumstances.

The 0% VAT rate, which generally means that no VAT is payable, is applicable to a substantial number of transactions, including the sale of books, magazines, and newspapers published by the taxpayer, the exportation of goods and certain services (including some *Maquiladora* activities intended for exportation), the sale of certain basic foodstuffs, agricultural goods and services, sales and rentals of farm machinery and equipment, and other specified transactions.

Taxes paid by business enterprises on their purchases and expenses related to VAT taxable activities (including activities subject to the 0% VAT rate), may usually be credited against their liability for VAT they collect from customers on their own sales, services rendered, etc. The input VAT credit on goods or services of a general nature, or those not specially identified with either taxable or exempt activities for VAT purposes, is computed based on a VAT ratio proportional to the VAT taxable versus VAT activities (taxable and exempt) carried out by the taxpayer. Creditable VAT paid on purchases and expenses in excess of VAT collected from customers is recoverable via either a refund, offset against other Federal taxes, or a credit against subsequent VAT liabilities.

VAT is a 'cash basis' tax, with few exceptions (e.g. VAT on some types of interest must be paid on an accrued basis), therefore only the receipt of payment for goods or services triggers the output VAT liability, and an input VAT credit may be claimed only when the taxpayer pays VAT to its providers of goods and services. VAT is calculated for each calendar month as a final tax. In addition, VAT overpayments may be used to offset the tax liabilities arising from other federal taxes.

VAT must generally be withheld by Mexican residents acquiring or leasing tangible goods from non-residents if such foreign residents do not have a PE in the country to which income is attributed. Mexican business entities are required to withhold VAT on payments to individuals or entities for services consisting of ground transportation of goods. Mexican corporations must also withhold VAT on commissions paid to individuals, as well as on independent services rendered by Mexican individuals, and on tangible goods leased from individuals.

An information return related to the VAT taxable activities carried out by the taxpayer must be filed on a monthly basis. Definitive monthly VAT payments are required by the 17th day of the immediately following month.

Customs duties/import tariffs

Mexico's commercial conditions provide an excellent business and investment opportunity. Mexico is a member of the World Trade Organization (WTO), the Asia-Pacific Economic Cooperation Mechanism (APEC), and the Organisation for Economic Co-operation and Development (OECD).

Mexico lies in a strategic geographical location for international trade, sharing borders with the United States of America, while facing Europe and Asia, and representing an easy entry to the rest of Latin America.

Mexico has signed 12 Free Trade Agreements (FTAs), which provide for preferential duty rates on foreign trade operations with 43 countries. FTAs signed by Mexico include NAFTA; Colombia; Costa Rica; Bolivia; Nicaragua; Chile; the European Union; Israel; Honduras, Guatemala and El Salvador (the Northern Triangle FTA), the European Free Trade Association, Uruguay, and Japan. Most FTAs provide 0% duty rates for almost 90% of the goods to be imported.

General Import Duty rates range from 0% to 35%, but most imports fall within the range of 3% to 20% (exceptionally, certain food products, shoes, and textiles pay higher duties).

Temporary imports are exempt from customs duties (except for fixed assets) and VAT payments.

Excise tax

The excise tax law (*Impuesto Especial Sobre Producción y Servicios* or IEPS) levies substantial federal excise rates on the importation and/or sale of certain taxable items, such as gasoline (% variable), beer (26.5%), wine (26.5% to 30%), spirits (53%), and cigarettes and other tobacco products (160% plus an additional quota), and on certain services related to these activities, such as commission, mediation, and distribution of excise taxable items as well as services for raffles and gambling (30%). Excise tax is also applicable to certain telecommunications services (3%).

In general terms, goods are exempt from IEPS when exported. Consequently, the input IEPS paid by exporters on their purchases is not creditable, and that tax becomes an additional cost.

IEPS is payable (output tax) and creditable (input tax) on a cash basis. It is payable on the date that the charge invoiced is collected from the client and can be credited when the respective payment is made to the supplier. On imports, IEPS is creditable when paid at the customs offices.

In certain cases, the IEPS legislation allows taxpayers that are not subject to this tax to credit IEPS paid on the acquisition and/or the importation of certain goods.

There is a specific procedure to calculate the tax for beer producers, bottlers, and importers; however, the tax can never be lower than 26.5%.

Among other obligations, IEPS taxpayers must file information regarding their 50 main clients and suppliers before the Mexican Tax Administration on a quarterly basis.

Property taxes

Annual taxes on real property are levied by the Federal District and all the states at widely varying rates applied to values shown in the property tax records. Assessed values have been increased substantially recently in the Federal District and some other areas.

Title transfer taxes

The transfer of real estate is almost without exception subject to a variable transfer tax at rates averaging 3% to 4%. The tax is levied by most states and the Federal District.

Stamp taxes

There are no stamp taxes in Mexico.

Mexico

Compulsory profit sharing

Although not a tax, every business unit with employees (irrespective of the type of organisation) is required to distribute a portion of its annual profits among all employees, except directors and the general manager. The amount distributable to the employees in most cases is 10% of taxable income, adjusted to eliminate income or deductions that relate to the recognition of inflation and include dividend income. Special rules apply to a limited number of specific businesses.

No profit sharing is paid during the first year of operations. Also, special rules apply for personal service entities and for entities deriving their income from rental activities, both of which can limit their profit sharing payment to the equivalent of one month of regular salary.

The profit sharing amount paid out is a deductible item for CIT purposes, provided certain requirements are met.

Vehicle taxes

As of 1 January 2012, the federal tax on the ownership of vehicles was abolished; however, the states may impose a similar tax.

Tax is still levied on the acquisition of new vehicles. This tax is payable in addition to the VAT on the purchase. Note that some vehicles considered as 'hybrid' (e.g. battery assisted vehicles) are not subject to the new vehicle acquisition tax.

Tax on cash deposits (IDE)

IDE is applicable at 3% on monthly cash bank deposits exceeding 15,000 Mexican pesos (MXN) or its equivalent in foreign currency. This tax can be credited against certain taxes, including CIT.

Branch income

Mexican branches of foreign corporations (i.e. PEs) are generally subject to the same tax rules as Mexican corporations, with some exceptions. Such exceptions include that branches may deduct pro rata allocations of home office expenses, provided certain requirements are complied with (such as the existence of an applicable tax treaty and a comprehensive agreement for the exchange of tax information between the relevant territory and Mexico), but may not deduct remittances to their home offices, even when such remittances are classified as royalties, fees, commissions, services, or interest.

In general terms, profit distributions to the head office (other than those regarded as a return to the head office of the capital invested into the branch) either in cash or in kind from branches or other PEs are subject to the statutory corporate tax rate on the grossed-up distribution, unless the remittance is made from the CUFIN account balance (i.e. the after-tax earnings account).

Income determination

Recognition of income

Income is generally recognised on an accrual basis. However, the service revenues of civil entities that render professional services (e.g. law and accounting firms) are reported on a cash basis.

Inventory valuation

The costing system to be used will be the incurred cost system, based on historic costs or pre-determined costs. If the requirements provided on the regulations of the income tax law are met, the direct cost system (based on historical costs) may be used.

Inventory may be determined by any of the following methods:

- First in first out (FIFO).
- Last in first out (LIFO).
- Identifiable costs.
- Average cost.
- Retail.

The FIFO and LIFO methods must be applied to each type of merchandise and each movement. The monetary FIFO and LIFO methods may not be used. Taxpayers selling goods that are identifiable by serial numbers, at a cost exceeding MXN 50,000, must determine their inventory by the identifiable cost method.

Once elected, a method is compulsory for five years and can be changed only if the requirements established in the regulations of the income tax law are fulfilled. The monetary results of the change in method are amortised over the following five years.

For accounting purposes, different methods and certain variations can be adopted. However, a record of the differences must be maintained, and such difference will not be taxable or deductible.

The cost of imported goods may be deducted (and included in the cost of goods sold) only if it can be supported that the goods were legally imported into the country.

Capital gains

Capital gains are taxed as follows.

Securities

Gains on securities are included in regular taxable income. There are two different procedures for computing the tax basis of a Mexican company's shares, depending on the period for which the shares are held (i.e. whether less or more than 12 months).

The tax basis of shares of Mexican corporations sold may be increased by the inflation adjustment applicable for the holding period.

In the case of shares with a holding period of more than 12 months, there are certain items to be considered when computing the tax basis, such as: (i) the movement in the after-tax earnings account (CUFIN) of the issuing company (including the possible negative CUFIN effects), as adjusted for inflation, (ii) the unamortised prior years' tax losses at the date of the sale, (iii) tax losses arising prior to the date on which the shares were acquired and amortised during the holding period, and (iv) any capital reductions of the issuing company.

When the sum of: (i) the CUFIN balance at the date of acquisition of the shares, (ii) the capital reductions paid, (iii) the unamortised prior years' tax losses at the date of the sale, and (iv) the negative CUFIN balance of the issuing corporation is higher than the sum of: (i) the CUFIN balance at the date of the sale and (ii) the tax losses arising prior to the date on which the shares were acquired, and amortised during the shares'

Mexico

holding period, the difference must be subtracted from the tax basis of the shares to be disposed (potentially resulting in the shares' tax basis being equal to zero).

When the aforementioned difference exceeds the tax basis of the shares disposed, this excess (restated by inflation) must be subtracted from the tax basis of the shares in any subsequent share sale by the same taxpayer, even if the shares are issued by a different company.

The aforementioned procedure allows the average cost (tax basis) of the shares to be determined, which is then updated and considered as the acquisition cost for future sales.

A different but simpler procedure applies for computing the tax basis of shares held during a period of 12 months or less.

Deduction of losses arising from the sale of shares is limited to the value of gains from similar transactions in the same or the following ten fiscal years. Losses may not be deducted by non-residents selling shares.

A gain from the sale of shares is considered Mexican-source income when the transferred shares are issued by a Mexican resident or when more than 50% of their book value arises directly or indirectly from immovable property located in Mexico, including cases where the shareholding is structured in different levels.

In general terms, the sale by non-residents of shares issued by a Mexican company is subject to a 25% withholding tax (WHT) applicable to the gross amount of the transaction (i.e. without deductions). However, there may be the option for gains realised by non-residents on the sale of shares issued by a Mexican company to be taxed by applying the statutory 30% rate to the net gain (i.e. the value of the transfer less the tax basis of the shares). The tax rate for these purposes is the same as that applicable to corporate taxpayers in each year, as mentioned above. Hence, in 2013 the rate will be reduced to 29% and to 28% in 2014.

This net income election is available only if the foreign shareholder is resident of a country that is not considered a 'preferred tax regime jurisdiction' (tax haven) or a country with a territorial tax system. The non-resident seller must have previously appointed a representative in Mexico and have a public accountant assigned to issue a statutory tax audit report on the transfer of shares. The public accountant issuing the respective report must specify the accounting value of the shares sold and explain the factors used in determining the sales price and the market value of the shares if shares are sold between related parties.

The representative is jointly liable for the tax on the sale of shares, even when the statutory report is issued by a public accountant.

The tax authorities may authorise the deferral of taxes that would otherwise be triggered by the transfer of shares in a group reorganisation (the authorisation must be obtained prior to the share transfer). The price used on the transaction must be at arm's length. The tax deferred, adjusted for inflation, is due upon the sale of the originally transferred shares outside the same interest group. An interest group consists of shareholders that have over 50% common voting stock of the companies.

In principle, authorisations for tax deferral are not granted if the party acquiring or selling the shares is resident in a tax haven or is a resident of a country that has not

signed a comprehensive exchange of information agreement with Mexico. However, in the latter case, an authorisation may still be granted if the taxpayer provides documentation to the Mexican tax authorities stating that the taxpayer has authorised the foreign tax authorities to provide information to the Mexican authorities regarding the operation in question.

If the share sale qualifies as an exempt reorganisation under tax treaty rules, the non-resident must appoint a legal representative in Mexico prior to the sale and file a notice with the Mexican Tax Administration informing them of such appointment and the details of the reorganisation process intended to be carried out. Additionally, certain formal requirements are established in the regulations of the Mexican income tax law that must be satisfied when carrying out this type of transaction.

Tax treaty rules (optionally) override domestic law rules when the seller resides in a tax treaty country.

Shares sold through the stock market

In certain specific cases, the sale of shares is exempt from CIT when such shares are disposed of by individuals and residents abroad through authorised stock markets to the extent that certain requirements are met.

Real estate

In determining the taxable gain of real estate, the cost basis of land and buildings may be adjusted (i.e. increased) for tax purposes on the basis of the period of time for which the assets have been held. This adjustment is performed by applying inflation adjustment factors to the net undepreciated balance. Similar rules apply to non-residents electing to pay tax on net income by appointing a legal representative in Mexico. The rate of tax on the net gain is 30% (in 2013 the rate will be reduced to 29% and to 28% in 2014). Otherwise, the 25% final WHT on gross income applies to non-residents.

Machinery and equipment

Gains or losses from the disposal of machinery, equipment, and other fixed assets are also calculated after adjusting the basis in these assets, by applying inflation factors to the net undepreciated balance.

Inflationary gain or loss

Taxpayers are required to calculate an adjustment for inflation (resulting in additional taxable income or deductible expense) on an annual basis by applying the percentage increases in the National Consumer Price Index (NCPI) to the value of essentially all liabilities, reduced by monetary assets, including bank balances, investments (except in shares), and some debt and receivables.

Dividend income

Dividends received by Mexican corporations from other Mexican corporations need not be included in gross income. However, dividend income is subject to the 10% compulsory profit sharing and must be included within the recipient corporation's CUFIN.

No further taxes apply on dividends distributed out of the CUFIN. However, non-CUFIN distributions (i.e. distributions that for any reason have not been subject to CIT) are generally subject to tax at the level of the distributing company at the general income tax rate on the grossed-up distribution.

Mexico

Interest income

Interest received by Mexican corporations is generally subject to tax on an accrual basis and included in gross income (*see also inflationary gain or loss above*).

Foreign income

A Mexican corporation is taxed on foreign-source income when earned. Double taxation is reduced, or possibly avoided, by means of foreign tax credits. However, the undistributed profits of a foreign subsidiary are not subject to Mexican tax until dividends are paid, with the exception of companies with investments in entities located in a tax haven ('income subject to preferred tax regimes'), in which case income is generally taxable even if no distributions are received from those entities.

Investments in tax havens (income subject to preferred tax regime)

Investments in tax havens include those made directly or indirectly in entities, branches, real property, shares, bank accounts, or investment accounts, and any kind of participation in entities, trusts, joint ventures, or investment funds, as well as in any other similar legal entities created or incorporated in accordance with foreign law and located in a tax haven, and including those that are carried out through an intermediary.

A business, entity, trust, or joint venture is considered to be located in a tax haven when it has a physical presence, an address, a post office box, or effective management in a tax haven, or when its bank account is held in or through financing entities located in a tax haven.

Unless it can be demonstrated that the taxpayer does not have management control of the foreign investments, the taxpayer must include the income generated through such entities or foreign vehicles in the proportion that corresponds to their direct or indirect participation in the capital of the entity or vehicle.

Income and profits subject to preferred tax regimes (PTRs) are taxed separately. This income cannot be combined with other taxable income or losses and it is not considered for purposes of making advance income tax payments. Tax applicable to this type of income is payable together with the annual CIT return.

The classification of a PTR is not based on the location of the investment but on the tax effectively paid on the income generated abroad. An investment is considered subject to a PTR if the income tax paid abroad is less than 75% of the income tax that would have been incurred and paid in Mexico, if the income had been taxed under Mexican rules.

In general, interest income and the annual inflationary adjustment made to liabilities of the investment in the tax haven are included in taxable income without subtracting the annual inflationary adjustment on receivables.

However, the annual inflationary adjustment on receivables may be subtracted from interest income earned, provided an information return is filed.

Tax on investments in a PTR is determined by applying the general CIT rate to taxable income. Additionally, net operating loss carryforwards associated with an investment in a PTR may be amortised against the tax profit of the following tax years arising from investments in PTR, and tax deductions related to the investment may also be applied, as long as accounting records pertaining to those investments are available and the annual information return on the investments is filed on time.

Undistributed income from investments in entities located in a PTR need not be immediately included in taxable income (under the provisions discussed above) in certain particular cases (e.g. income arising from qualified active business activities in accordance with the applicable legislation and in the case of indirect investments in a tax haven when certain strict conditions are met).

Income earned in a PTR will be taxed until its distribution where the PTR income arises from a business activity. This treatment will not be applicable, however, if income such as interest, dividends, royalties, certain capital gains, and rents (i.e. passive income) represent more than 20% of the total income generated.

Other specific cases of income on which the tax may apply until distribution include the case of share transfers within the same group and for income derived from royalties and interest that do not represent a tax deduction for Mexican tax residents to the extent that certain specific requirements are fulfilled.

Maquiladoras

As discussed in the Corporate residence section, companies operating under an IMMEX programme (*Maquiladoras*/in-bond processing companies) are considered to not have a PE in Mexico. This is the case for the non-resident principal which owns the M&E and inventory, to the extent it is a resident of a country that has a tax treaty in force with Mexico, complies with all the terms and requirements of the treaty, satisfies any mutual agreements between Mexico and its treaty partner, and complies with the transfer pricing provisions provided in the law as well as the revised definition of *Maquiladora* that entered into force on 1 January 2011. This relief applies only if the *Maquiladora* complies with any of the following options stated under the domestic law:

- Maintenance of documentation on transfer pricing in accordance with the applicable legislation, adding to the *Maquila* fee 1% of the net book value of the M&E owned by the foreign related company and used by the *Maquiladora* in its activities.
- Reporting of a taxable income margin of a minimum of the higher of:
 - 6.9% of the value of assets used in the *Maquila* activity (including the inventories and fixed assets owned by the foreign related party) or
 - 6.5% of the value of the operating costs and expenses of the *Maquiladora*.
- Maintenance of documentation on transfer pricing using the transactional net margin method (TNMM) and considering a return on the net book value of M&E owned by the foreign related company used by the *Maquiladora* in its activities, adjusted by financing terms.

Maquiladoras that apply the first or third option may request an advanced pricing agreement (APA) from the Mexican tax authorities. However, this APA is not mandatory in order to obtain the PE exemption.

Maquiladoras that apply any of the three options above are not required to file an annual information return on transactions with foreign related parties. This exemption is only available in respect of the *Maquila* activity.

If the *Maquiladora* renders services other than exported *Maquila* services (including domestic sales), specific transfer pricing requirements apply and potential PE issues must be evaluated.

In general terms, the *Maquiladoras* receive a significant reduction on their effective income tax and flat tax rates to the extent certain conditions are satisfied.

Mexico

The Mexican Tax Administration has recently initiated a detailed review of the *Maquiladora* programme, hence it is expected that significant tax reforms will be approved in the coming years.

Deductions

The applicable deduction requirements must be complied with no later than the last day of the tax year to which the deduction applies, although the invoice supporting the expense may be provided up to the date on which the tax return for the period in question is filed (or comes due). An expense invoice must contain a date within the year for which the deduction is claimed.

Deductions for certain business expenses are limited in the case of business meals and use of company owned cars.

Depreciation, amortisation, and depletion

Straight-line depreciation is permitted at the rates specified in the law (i.e. estimated lives for assets are 20 years for buildings, 3.3 years for computers, 4 years for cars, 10 years for certain machinery and equipment, etc.), and the deduction may be increased by applying the percentage increases in the NCPI from the month in which the asset was originally acquired. When an asset is disposed of or becomes useless, the remaining undepreciated historical cost may also be deducted, after application of the appropriate inflation adjustment factor to the undepreciated historical cost.

Intangible assets for the exploitation of goods that are in the public domain, or for rendering public services under concession, are considered deferred assets (i.e. not deducted as incurred). Therefore, these assets are subject to amortisation for income tax purposes.

Specific annual depreciation rates are established for goods used in certain industries.

Goodwill

Goodwill is a non-deductible item for Mexican tax purposes, and the corresponding input VAT (if any) will not be creditable.

Start-up expenses

Start-up expenses incurred prior the commencement of operations may be amortised at the rate of 10% per year, after applying the adjustment factors. Taxpayers engaged in mining exploitation may also elect to deduct start-up expenses as incurred.

Interest expenses

In general terms, interest expenses are deductible items if, among others, the principal is invested in the main activity of the Mexican taxpayer, withholding obligations are complied with, informative returns disclosing information related to the loan and transactions carried out with related parties are filed, thin capitalisation rules (3:1 debt-to-equity ratio) are satisfied, the transaction is arm's length, and the interest does not fall into the deemed dividend criteria.

Bad debts

Bad debts may be deducted in the earlier of the date in which the debt prescribes or the date in which the taxpayer substantiates the practical impossibility of collection, as defined by the law, among other detailed rules.

Charitable contributions

The maximum amount for deductible donations is limited to 7% of the taxable income of the previous year.

Fines and penalties

In general terms, fines and penalties are non-deductible items for income tax purposes, except interest for underpayment of taxes.

Taxes

In general, all federal, state, and local taxes levied on a company (not including those required to be withheld from other parties) represent deductible expenses for CIT purposes, with the following exceptions:

- CIT.
- Flat tax.
- Federal VAT and excise tax when the company is entitled to credit the tax.
- Taxes on acquisitions of fixed assets and real estate, which must be capitalised and deducted as part of the total cost of such assets to be depreciated.

Net operating losses

Subject to certain limitations, losses incurred in prior years by a business may be carried forward and deducted from income earned over a subsequent ten-year period. Net operating loss carrybacks are not allowed.

Losses carried forward may be increased by the percentage increase in the NCPI between the seventh and 12th months of the fiscal year in which they are incurred and thereafter up to the sixth month of the fiscal year in which they are applied.

Tax loss carryforwards are non-transferable; however, they can be used by the surviving entity, in a merger with certain restrictions. In the case of a spin-off, tax loss carryforwards can be divided between the surviving entity and the spun-off entities in proportion to the following:

- Inventories and accounts receivable transferred in the case of commercial entities.
- Fixed assets transferred, in all other cases.

Current tax legislation limits the utilisation of tax losses in changes in ownership, with certain exceptions and limitations.

Payments to foreign affiliates

Taxable income and authorised deductions must be determined on the basis of prices that would be agreed with independent parties in comparable transactions (arm's-length values).

For this purpose, taxpayers must secure and maintain contemporaneous documentation supporting transactions with related parties residing abroad, demonstrating that income and deductions are based on market values. This documentation must be prepared per type of transaction and must include all operations carried out with related parties.

Domestic transactions must also be supported by the application of a recognised transfer pricing method selected in accordance with the preferred ordering methods determined in the legislation.

Mexico

Payments made to residents of tax havens (or PTRs) are considered non-deductible, unless it can be demonstrated that the price of the transaction is the same that would have been set between or among unrelated parties in comparable transactions. Unless the contrary is demonstrated, it is assumed that operations with companies, entities, or trusts resident in a PTR are carried out between or among related parties and that prices are not set as they would be in comparable operations between or among independent parties.

The sales price of shares (other than publicly traded shares) sold to a related party must be set at market value and the transaction must be supported by the corresponding contemporaneous transfer pricing documentation.

In order to be deductible, payments of technical assistance fees and for the transfer of technology or royalties must be made directly to companies with the required technical capabilities to provide the corresponding service and should correspond to services actually received.

Payments to non-residents of a prorated portion of expenses (i.e. allocations of expenses) are not deductible for Mexican corporations.

Group taxation

The income tax law contains a chapter that allows certain holding companies to file a consolidated income tax return with their majority-owned subsidiaries. Tax consolidation is applicable for CIT purposes but not for other taxes (e.g. flat tax and VAT) or compulsory employee profit sharing.

The principal requirements for a company to qualify as a holding company for fiscal consolidation are that it must be a Mexican tax resident with no more than 50% of its shares owned by other companies, regardless of their country of residence. Shares that qualify as placed among the general investing public and non-voting shares are not considered for this purpose.

Where more than 50% of the holding company's shares are held by a foreign corporation, the above qualifying rule precludes the possibility of filing a consolidated return for a Mexican group, for companies that would otherwise qualify. However, there is an exception in cases where the foreign corporation that owns the shares of the Mexican holding company is a resident in a country that has executed a comprehensive agreement for the exchange of tax information with Mexico.

As of 21 May 2012, Australia, Austria, Bahamas, Barbados, Bermudas, Brazil, Canada, Chile, China, the Czech Republic, Denmark, Ecuador, Finland, France, Germany, Greece, Iceland, India, Italy, Japan, New Zealand, the Republic of Korea, the Netherlands, the Netherlands Antilles, Norway, Panama, Poland, Portugal, Romania, Russia, Singapore, Slovak Republic, South Africa, Spain, Sweden, Switzerland, the United Kingdom, Uruguay, and the United States have agreements of this nature with Mexico, and other agreements or tax treaties that might contain such an agreement are awaiting ratification or being negotiated.

Likewise, Cayman Islands, Cook Islands, Guernsey, Hungary, Isle of Man, Jersey, and Luxembourg have a new comprehensive agreement for the exchange of tax information with Mexico, but they have not been officially included in the relevant list published in the Official Gazette by the Mexican tax authorities.

The Mexican Tax Administration must authorise the application of the consolidation regime, and financial statements and written consent of the legal representative must be filed before 15 August of the year prior to the first year of consolidation to request the proper authorisation. There is a minimum five-year period of fiscal consolidation, and special consolidated tax accounts should be prepared by the consolidated group.

There are some entities that are non-qualifying entities for inclusion in the consolidation regime, such as non-profit entities, credit institutions, insurance corporations, trusts, auxiliary credit institutions, stock exchange entities, foreign exchange houses and capital investment companies, non-resident companies, companies in liquidation, civil or social associations, and cooperatives.

In general terms, the consolidation regime allows certain benefits, such as:

- Individual company loss offset against profits of other companies in the same group during a deferral period.
- Deferral of tax on dividends in excess of the individual CUFIN, to the extent that the dividend flow remains within the consolidation group.
- Capital losses in the holding company from the sale of subsidiaries deducted as an ordinary loss in the year.

Prior to 2010, these deferral benefits were subject to recapture, and could generally be triggered if:

- A member leaves the consolidated group.
- The ownership percentage is reduced.
- The group is deconsolidated.
- Certain carryforward limitations expire (i.e. tax loss and capital loss recapture is required if any of the above three events occur during the ten-year period).

The significant 2010 tax reforms introduced important modifications to the consolidation regime, including a reduction of the recapture period from ten to five years in the case of tax losses and capital losses. Moreover, the introduction of new rules now trigger excess dividends over the CUFIN balance and other recapture items after five years while these deferrals were often considered indefinite before the reform, as long as the same group remained in the consolidation with the same ownership percentages.

As a result, most of the consolidated benefits will be reversed in five years, and the deferred income tax will be payable with the submission of the tax return starting from 'Year six', as follows:

- 25% in each of years six and seven.
- 20% in year eight.
- 15% in each of years nine and ten.

Similar transition rules have also been implemented for the recapture and repayment of certain consolidated benefits obtained in years prior to 2010.

Transfer pricing

Mexican transfer pricing legislation has significantly developed as a result of Mexico's admission to the Organisation for Economic Co-operation and Development (OECD) in 1994. This development has resulted in the implementation of transfer pricing guidelines that are in line with the global economy and market liberalisation.

Mexico

In general terms, from a Mexican transfer pricing perspective, all related party transactions (including certain Joint-Venture relationships) must be reported at arm's length.

Local legislation allows the selection of both traditional methods and profit-based methods consistent with the OECD guidelines. However the legislation requires a strict ordering for the application of a method.

Mexican legislation is generally 'form over substance' oriented; therefore contractual terms remain relevant when defining the economic substance of the transactions subject to the transfer pricing analysis.

Reliable financial information is not always publicly available for Mexican entities. Hence, reliance is often placed on foreign information, which is then adjusted to properly reflect local market conditions and render the transactions in question more comparable.

Thin capitalisation

Interest generated by excess debt lent by a related party is non-deductible for CIT purposes. Excess debt is defined as having an average level of liabilities amounting to more than three times the value of shareholders' equity (i.e. a 3:1 debt-to-equity ratio) as per the taxpayer's Mexican generally accepted accounting principles (GAAP) balance sheet.

In principle, all liabilities are considered in determining the annual average liabilities for purposes of calculating the ratio and thereby the disallowed interest expense amount. However, certain liabilities incurred for construction, operation, or maintenance of the productive infrastructure associated with the strategic areas of Mexico may be excluded from this computation.

Taxpayers may also be able to obtain a ruling from the Mexican Tax Administration in order to apply a higher financial leverage (i.e. not the 3:1 debt-to-equity ratio), owing to the characteristics of their activities. Also, the thin capitalisation rules do not apply to the financial sector.

In addition, taxpayers are entitled to use the sum of the average balances of the capital contributions account (CUCA) and the after-tax earnings account (CUFIN) to determine the 3:1 debt-to-equity ratio instead of shareholders' equity. Taxpayers that opt for this tax equity computation must continue to use it for at least five years. This alternative computation is mandatory for those taxpayers that do not account for capital following Mexican GAAP.

Specific provisions dealing with the disallowance of interest expenses for debt financing structured through back-to-back loans should also be closely observed.

Tax credits and incentives

Foreign tax credit

The income tax law allows Mexican corporations and individuals a foreign tax credit on income from foreign sources. The law provides that taxpayers may credit against their Mexican income tax liability the amount of income tax paid in foreign countries on their foreign-source income, as long as such income is subject to income tax in Mexico.

In general, credit is available in respect of foreign income taxes directly withheld from foreign-source income or paid with a tax return filed in the foreign country in the name of the Mexican resident or by a foreign branch of a Mexican corporation. However, in the case of dividends or distributions of profits received from corporations resident in a foreign country, when a Mexican corporation owns at least 10% of the capital of the foreign corporation for six months prior to the dividend, a deemed-paid credit can also be taken for the proportionate part of the underlying foreign corporate income tax paid by that corporation, corresponding to the dividend or distribution of profits received. In calculating the amount of income subject to Mexican tax in these cases, the dividend or distribution must be grossed up to include the proportionate amount of tax paid by the foreign corporation. This credit is allowed also on tax paid on a second holding tier, provided certain requirements are met.

The foreign tax credit will be allowed up to the effective Mexican rate of tax on the taxable income (tax result) shown by the annual return under an 'overall' type limitation. Taxpayers who are not in a position to take full credit for the taxes paid to a foreign country on foreign-source income are allowed a ten-year carryforward of such excess foreign taxes, provided certain compliance requirements are met and the credit is limited to the corporate tax rate of 30%.

In 2012, the Mexican tax authorities released the internal criteria that they will follow to determine whether or not a foreign tax is considered as an income tax for purposes of applying the tax credit.

Duty-deferral programmes

A deferral programme is an authorisation provided by the Mexican Ministry of Economy to those companies importing raw materials or fixed assets to manufacture finished products within Mexico.

In addition to the benefits described for CIT purposes in the Income determination section, *Maquiladoras* - i.e. entities with a Manufacturing, *Maquila*, and Export Service Program in force) are entitled to the following customs benefits:

- No payment of import duties and VAT for temporarily imported raw materials, as long as they are exported.
- Sales of temporarily imported goods to other *Maquila* companies at a 0% VAT rate, under certain circumstances.
- Temporary import of fixed assets without paying VAT.

Another programme allowing preferential duty rates is the Program of Sectoral Promotion (known as PROSEC), which allows manufacturers to apply lower duty rates on the permanent import of raw materials and machinery required for its productive processes, regardless of their country of origin and regardless of if they are for the Mexican market or for export. These programmes were created by the federal government in order to establish competitive tariff conditions for Mexican manufacturers needing to import raw materials and fixed assets from non-NAFTA countries due to the changes made in 2001, where non-originating merchandise exported to NAFTA countries must pay duties.

Companies in Mexico that had formerly performed import operations with values from MXN 200 million to MXN 400 million per semester can take advantage of significant customs and administrative benefits if registered into the 'Certified Company Registry' (authorised by the Ministry of Finance).

Mexico

In general terms, the main benefits provided by the Certified Company Registry allows simplified procedures to process imports and exports, including the reduction in time and number of reviews when clearing goods at customs facilities.

Accelerated depreciation

Investments in certain new fixed assets outside Mexico City, Guadalajara, and Monterrey are entitled to an accelerated depreciation deduction considering a present value discounted rate of the future stream of depreciation. Some taxpayers may benefit from this deduction in the aforementioned cities if they can show that their business operations do not contribute to pollution and do not require the intensive use of water.

Research and development (R&D) incentives

An income tax incentive for taxpayers involved in certain technological R&D projects carried out during the year allows a cash subsidy to be yearly determined by the tax authorities, based on a budget to be approved by the Mexican Congress.

Employment incentives

An incentive offers a credit equivalent to 100% of the income tax corresponding to the salary paid to workers/employees with certain types of disabilities.

An additional deduction is available for employers who hire first-job employees for newly-created positions, which is calculated using a specified method.

Incentives for investments in movie production

A limited credit is applicable for investments in movie production activities through an immediate tax credit which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

Incentives for investments in theatre production

A limited credit is applicable for investments in theatre production activities through an immediate tax credit which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

Marginal scarcely inhabited zones

Taxpayers investing in specific regions of Mexico considered to be 'marginal scarcely inhabited zones' (less than 50,000 inhabitants) can receive certain tax benefits, such as a 100% exemption on Social Security contributions to the extent certain requirements are met and financing benefits for the development of industrial facilities according to the guidelines and limitations provided by the Ministry of Economic Affairs in Mexico.

Real estate investment incentives

Several tax benefits exist for qualifying real estate investments (i.e. Mexican REITs such as FIBRAS, SIBRAS, etc.) in Mexico.

Capital investment

There are certain incentives to encourage risk capital investments in Mexico.

Other incentives

Certain other specific and limited tax incentives are available for taxpayers engaged in certain activities (e.g. those engaged in air or sea transportation of goods or passengers with respect to aircraft and ships with a federal government commercial concession or permit; in the agricultural and forestry sectors; and in-bond warehouses with respect to real property used for the storage, safeguarding, or conservation of goods or merchandise).

Withholding taxes

Payments to Mexican residents

Payments to resident corporations and PEs in Mexico are generally not subject to WHT.

Payments by resident corporations to resident individuals are subject to WHT as follows:

Payment	WHT (%)
Wages, salaries, and other remuneration	0 to 30
Fees:	
Members of boards of directors and advisory boards	30.0
Other professional fees	10.0
Lease payments on real property	10.0
Interest on securities (1)	0.6
Interest on nonqualified securities	20.0
Dividends	0.0
Miscellaneous types of income of individuals, usually sporadic payments	20.0

Note

1. WHT on interest paid by financial institutions to Mexican resident investors is generally set at 0.6% of the invested capital.

To simplify the calculation of interest income from loans entered into with financial institutions, a new procedure has been proposed based on cash flow, which would enter into force on 1 January 2013.

Through this procedure, financial services taxpayers would be relieved from the requirement to withhold the corresponding income tax on the principal of the loan. Income tax withheld would be considered as a final payment for individuals and an advance payment for corporations.

Payments to non-residents

Income tax must usually be withheld from payments to non-resident corporations and individuals. In the case of non-tax treaty countries, the statutory withholding rates are as noted below.

Income tax of 40%, with no deductions, must be withheld on most payments made to foreign related parties located in tax havens, in lieu of the tax provided in the domestic law for non-tax haven residents. This is not applicable in certain cases, such as on income not subject to Mexican taxation in accordance with the regular provisions for income earned by non-residents from a source of wealth located in Mexico, income from dividends, and certain types of interest, including interest payments made to foreign banks. In these cases, the regular provisions of the domestic law should be applied to determine the income tax withholding.

Additionally, revenues for intermediation services, including commissions for brokerage, agents, distribution, and assignment, and generally all income from the negotiation of third-party interests, are also subject to 40% WHT when paid to tax haven related residents. The 40% may be reduced if the beneficiary resides in a country with which Mexico has signed a comprehensive exchange of information agreement.

Non-residents' wages and salaries are taxed on the basis of a 12-month earnings period at the following income tax withholding rates:

Mexico

Taxable income (MXN)		
From	To	WHT (%)
0	125,900	0
125,901	1,000,000	15
1,000,001	and above	30

The above mentioned rates are also applicable to retirement fund payouts.

However, no tax arises on compensation (wages, salaries, or fees other than board fees) paid by a non-resident with no establishment in Mexico (even if not subject to tax) to which the services relate, provided the individual remains in Mexico for fewer than 183 days (consecutive or not) in any 12-month period.

The tax, when applicable, is withheld if the income is paid by a resident (or a non-resident with a PE in Mexico). Otherwise, the tax is generally payable within 15 working days of the associated payment, by the party earning the Mexican-sourced income.

Statutory withholding rates (not mentioned above) under local legislation are as follows:

Payment	WHT (%)
Professional fees for services rendered in Mexico	25
Lease payments:	
Lease of real property	25
Lease of containers, airplanes, and ships authorised by the Mexican Government to be commercially exploited in the transportation of goods or persons	5
Lease of personal property	25
Time-sharing services (1)	25
Charter agreements	10
Sales:	
Real property located in Mexico (1)	25
Shares of Mexican companies (1, 2)	25
Transfers of ownership of Mexican public debt by other than the original creditors (intended to cover debt-for-equity swaps) (1)	25
Derivative transactions:	
On capital (1)	25
On debt (3)	Same rates applicable to interest
Interest (4):	
Paid to foreign government financing entities, to duly registered foreign banks and other entities that provide financing with funds obtained by issuing publicly traded debt instruments abroad, registered with the Ministry of Finance (5)	10
Interest on debt instruments placed abroad (6)	4.9
Interest payments to specific foreign financial institutions (7)	4.9
Other interest payments (not otherwise included above) paid by Mexican financial institutions to residents abroad	21
Paid to foreign suppliers of M&E, to others to finance purchases of such assets or inventory or working capital loans, if the lender is duly registered	21

Payment	WHT (%)
Paid to reinsurance entities	15
Other interest payments (11)	30
Financial leases (on the portion deemed to qualify as interest or finance charge)	15
Dividends	0
Royalties (8):	
For the use of railroad cars	5
For the use of copyrights on scientific, literary, or art works, including motion pictures and radio and television recordings, as well as software and payments for the transmission of video and audio signals via satellite, cable, optic fibre, and similar media	25
On patents, invention or improvement certificates, trademarks, brand names, and advertising (11)	30
For the use of drawings or models, plans, formulas, or procedures, and of scientific, commercial, and industrial equipment; on amounts paid for information regarding scientific, commercial, and industrial experience; and for technical assistance	25
Short-term construction and the respective installation, maintenance, technical direction, or supervision (9)	25
Reinsurance premiums	2
Income obtained by athletes and artists (1)	25
Income derived from prizes (e.g. lottery tickets or raffles) (10)	1/21
Other income (forgiven debts, indemnifications, rights to participate in business, investments, etc.) (11)	30

Notes

- The non-resident may elect to pay tax at a rate of 30% in 2012 (see Note 11 below for the rate applicable thereafter) on the net taxable profit in the case of (i) time-sharing services, (ii) share sales, (iii) sales of real property, (iv) activities of sportsmen/artists, and (v) derivative stock and debt transactions provided that the non-resident recipient of the income has a legal representative resident in Mexico and to the extent that the following specific requirements are met:
 - For time-sharing services, the resident legal representative must keep the audited financial statements of the taxpayer available for inspection by the Mexican Tax Administration.
 - For share sales, a tax opinion issued by a registered public accountant is required.
 - For shares and debt-for-equity swap transactions, this election is available only where the foreign taxpayer is not a resident of a country classified as a tax haven or a country with a territorial tax system. It should be noted that there is an option to defer Mexican income tax arising from the sale of shares within the same group due to a corporate reorganisation provided certain conditions are met and that no legal representative is required for sales of real property by public deed.
- The sale of shares through the Mexican Stock Exchange and government securities are exempt from income tax withholding provided certain rules are satisfied.
- The applicable WHT rate (based on the WHT rates for interest) for debt-derivative transactions is applied on a net basis, that is, gross income less authorised deductions. However, if the transaction is liquidated in kind, the applicable WHT rate (on the same net basis) is 10%.
- Interest payments to non-residents are exempt from Mexican income tax when they are paid on the following:
 - Loans to the federal government or to the Bank of Mexico (Central Bank) or bonds issued by the latter organisation to be acquired and paid abroad.
 - Loans for three or more years granted or guaranteed by duly registered financial entities that promote exports through special financing.
 - Preferential loans granted or guaranteed by foreign financial entities to institutions authorised to receive tax-deductible donations in Mexico, provided these institutions are properly registered and use the funds for purposes consistent with their status.
 - Loans derived from bonds issued by the federal government or the Bank of Mexico placed on a recognised national stock exchange, to the extent the beneficial owner is a foreign resident.
- In 2012, a 4.9% WHT rate (the rate has been extended for another year) is applicable when the interest is paid to registered banks resident in countries with which Mexico has signed a tax treaty.
- The 4.9% WHT rate applies, provided the placement is handled through banks or brokerage firms resident in a country with which Mexico has signed a tax treaty if there is compliance with the information requirements established in the general rules issued by the Ministry of Finance. If there is

Mexico

failure to comply with these requirements, the 10% WHT rate applies. The 4.9% and 10% WHT rates mentioned in the preceding paragraphs do not apply, and instead a 30% (see Note 11 below for the rate applicable thereafter) WHT rate is applicable to interest, when the direct or indirect beneficiaries of the interest, either individually or jointly with related parties, receive more than 5% of the interest arising from the instrument in question, and are either (i) holders of more than 10% of the voting shares of the issuing company, either directly or indirectly, either individually or jointly with related parties or (ii) business entities holding more than 20% of their shares, either directly or indirectly, either individually or jointly with parties related to the issuer.

7. The 4.9% WHT rate is applicable to interest payments made to foreign financial institutions in which the Mexican federal government or the Mexican Central Bank has an equity participation.
8. The WHT rate is applied to the gross amount of the payment.
9. The non-resident taxpayer may elect to pay 30% (see Note 11 below for the rate applicable thereafter) tax on the net profit in 2012 if the taxpayer has a resident legal representative and so advises the customer, who then makes no withholding. When business activities last for more than 183 days, the foreign taxpayer is deemed to have a PE in Mexico for tax purposes and is taxed in the same manner as a local resident corporation or branch.
10. The 21% federal rate is applied only in the case of non-qualifying prizes (i.e. income derived from prizes that is subject to a state tax that exceeds a rate of 6%).
11. A 30% WHT rate is applicable for 2012. Beginning in 2013, the rate will reduce to 29% and then back to 28% in 2014. The statutory WHT rates mentioned above may be reduced by applying tax treaty provisions. During the last decade, Mexico has embarked on a policy of negotiating a network of tax treaties with its principal trading and investment partners.

As of 21 May 2012, the treaties with the following countries are pending ratification while waiting for the completion of specific formalities by the respective governments in order to become effective, have not been published yet in the Official Gazette, or are under negotiation: Bahrain, Colombia, Estonia, Hong Kong, Kuwait, Latvia, Lebanon, Lithuania, Malaysia, Malta, Morocco, Nicaragua, Pakistan, Peru, Qatar, Saudi Arabia, Slovenia, Thailand, Turkey, Ukraine, United Arab Emirates, and Venezuela. Note that the tax treaties in force with Belgium and Italy are being renegotiated.

Tax treaties with Australia, Austria, Barbados, Belgium, Brazil, Canada, Chile, China, the Czech Republic, Denmark, Ecuador, Finland, France, Germany, Greece, Hungary, Iceland, India, Indonesia, Ireland, Israel, Italy, Japan, the Republic of Korea, Luxembourg, the Netherlands, New Zealand, Norway, Panama, Poland, Portugal, Romania, Russia, Singapore, the Slovak Republic, South Africa, Spain, Sweden, Switzerland, the United Kingdom, the United States, and Uruguay have been published in the Official Gazette and are in force.

The WHT rates negotiated under the tax treaties are as follows:

Recipient	Dividends (%)			
	Portfolio	Substantial holdings	Interest (%)	Royalties (%)
Australia	15	0 (1)	10/15 (25)	10
Austria	10	5 (4)	10	10
Barbados	10	5 (1)	10	10
Belgium	15	5 (2)	10/15 (16)	10
Brazil	15	10 (6)	15	10/15 (27, 29)
Canada	15	5 (4)	10	10
Chile	10	5 (6)	5/15 (26)	5/10 (29, 30)
China	5 (7)	5 (7)	10	10
Czech Republic	10 (7)	10 (7)	10	10
Denmark	15	0 (3)	5/15 (17)	10
Ecuador	5 (7)	5 (7)	10/15 (16)	10
Finland	0	0	10/15 (24)	10
France	0/5 (9)	0/5 (9)	5/10 (29, 17)	10 (29)

Recipient	Dividends (%)			
	Portfolio	Substantial holdings	Interest (%)	Royalties (%)
Germany	15	5 (1)	5/10 (18)	10
Greece	10 (7)	10 (7)	10	10
Hungary	15	5 (1)	10	10
Iceland	15	5 (1)	10	10
India	10 (7)	10 (7)	10	10 (31)
Indonesia	10 (7)	10 (7)	10	10
Ireland, Republic of	10	5 (4)	5/10 (17, 29)	10
Israel	10	5 (10)	10	10
Italy	15 (7)	15 (7)	10 (29)	15
Japan	15	5 (8)	10/15 (25)	10
Korea, Republic of	15	0 (1)	5/15 (17)	10
Luxembourg	15	8 (11)	10	10
Netherlands	15	0 (12)	5/10 (21)	10 (28)
New Zealand	15 (7, 13)	15 (7, 13)	10	10
Norway	15	0 (3)	10/15 (16)	10
Panama	7.5	5 (32)	5/10 (17)	10 (33)
Poland	15	5 (3)	10/15 (19)	10
Portugal	10 (7)	10 (7)	10	10
Romania	10 (7)	10 (7)	15	15
Russia	10 (7)	10 (7)	10	10
Singapore	0	0	5/15 (17)	10
Slovak Republic	0 (14)	0 (14)	10	10
South Africa	10	5 (1)	10	10
Spain	15	5 (3)	5/10/15 (21, 22, 29)	10
Sweden	15	5 (5)	10/15 (16)	10
Switzerland	15	0 (34)	5/10 (35)	10
United Kingdom	0	0	5/10/15 (21, 23)	10
United States	10	5 (4, 15)	4.9/10/15 (23, 20)	10
Uruguay	5 (7)	5 (7)	10	10

Notes

The applicable tax rates on dividends paid abroad in accordance with the tax treaties executed by Mexico are detailed below; however, no withholding is applied on dividend distributions under domestic law.

There are certain specific cases of interest paid to parties resident abroad that might be exempted by certain tax treaties (e.g. interest paid to a pension fund or paid by a bank, interest paid on certain loans granted or guaranteed by certain entities for exports under preferable conditions), which are not detailed in the information below.

1. This rate applies when the recipient corporation that is the beneficial owner of the dividend (except for civil partnerships) directly owns at least 10% of the capital of the distributing corporation. In the case of Barbados, Hungary, and South Africa, the specific exclusion of civil partnerships is not included.
2. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 25% of the capital of the distributing company.
3. This rate applies where the company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 25% of the capital of the company distributing the dividends. In

Mexico

the case of Norway, taxation is limited to the country of residence of the party receiving the dividends, provided the aforementioned substantial holding rule is satisfied.

4. This rate applies where the recipient corporation that is the beneficial owner of the dividend owns at least 10% of the voting shares of the paying corporation. The Mexico-US tax treaty contains a most-favoured nation clause.
5. This rate applies where a company that is the beneficial owner of the dividends (except for civil partnerships, although limited liability partnerships are included) directly owns at least 10% of the voting shares of the company distributing the dividends.
6. This rate applies where a company that is the beneficial owner of the dividends owns at least 20% of the voting shares of the company paying the dividends.
7. This is the maximum WHT rate for dividends, with no distinction for substantial holdings. In the case of Ecuador and India, the tax payable on dividends paid to residents in Mexico must not exceed a limit established in the treaty.
8. The 5% rate applies when a company that is the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying dividends during the six months prior to the end of the tax period in which dividends are paid. Under certain particular rules and provided this ownership requirement is complied with, dividend payments are only subject to tax in the country of residence of the recipient of the dividends.
9. No withholding applies when more than 50% of the shares of the recipient corporation are owned by residents of France or Mexico or when the beneficial owner of the dividend is a resident individual. Accordingly, the WHT applies to dividends when more than 50% of the recipient corporation's shares are owned by residents of other countries. However, the WHT must not exceed 5% when the party receiving the dividend is the effective beneficiary of said dividend. Dividends paid by a company resident in France to a resident of Mexico, other than a company which directly or indirectly holds at least 10% of the capital stock of the first-mentioned company, may also be taxed in France, in accordance with the law of France, but if the recipient of the dividends is the beneficial owner, the tax thus charged must not exceed 15% of the gross amount of the dividends.
10. The 5% rate applies where the company that is the beneficial owner of dividends directly or indirectly owns at least 10% of the capital of the company distributing the dividends. There is a 10% tax rate that applies when these same ownership requirements are complied with, but the company paying dividends is a resident of Israel (provided dividends are paid from earnings taxed in Israel at a tax rate lower than the regular corporate tax rate in Israel).
11. The applicable tax rate on the gross amount of the dividends when the recipient company (beneficial owner) (except for civil partnerships) directly holds at least 10% of the capital of the corporation paying the dividend must not exceed 5% in the case of Luxembourg and 8% in the case of Mexico. The protocol of the Mexico-Luxembourg tax treaty states that this rate might be reviewed in the future by the contracting states if the WHT is not fully creditable, and can be adjusted under the principle of avoiding double taxation, provided the adjusted WHT rate is not lower than 5%.
12. Dividends paid by a company resident in Mexico to a company resident in the Netherlands (which is the beneficiary of said dividends) are subject to a maximum tax of 5% on the gross amount of the dividends if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying said dividends. However, as long as a company resident in the Netherlands is not subject to Dutch income tax on dividends received from a company resident in Mexico under the terms of the Dutch income tax law and any future amendments thereto, the dividends mentioned in the preceding paragraph may only be taxed in the Netherlands (not in Mexico).
13. The Mexico-New Zealand tax treaty contains a most-favoured nation clause that may be applicable in the future.
14. The exemption on dividend WHT is not applicable in the case of deemed dividends.
15. To the extent certain requirements provided in the Protocol are met, the WHT may be reduced to 0%.
16. The 10% rate applies to loans from banks.
17. The 5% WHT rate is applicable to interest paid to banks.
18. The 5% rate applies to interest on loans from banks, insurance companies, and retirement and pension plans.
19. The 10% rate applies to interest on loans from banks, insurance companies, and securities regularly and substantially traded on a recognised national stock exchange.
20. The 4.9% rate applies to interest on loans from banks and insurance companies and to interest on securities regularly and substantially traded on a recognised national stock exchange.
21. In the case of the Netherlands, the 5% rate applies to interest on loans from banks and to interest on securities regularly and substantially traded on a recognised national stock exchange. In the case of Spain and the United Kingdom, the 5% rate extends to interest paid to insurance companies.
22. The 10% rate applies to interest paid by financial institutions and interest paid to the original seller of M&E.
23. The 10% rate on interest applies in the case of interest paid to the original seller of M&E and interest paid by banks.
24. The 10% rate applies to interest on loans from banks and to interest derived from bonds or securities that are regularly and substantially traded on a recognised securities market, as well as to interest paid by the purchaser of M&E to a beneficial owner that is the seller of the M&E.
25. The 10% rate applies to interest on loans from banks and insurance companies, to interest on securities regularly and substantially traded on a recognised national stock exchange, to interest paid to the original seller of M&E in a sale on credit and to interest paid by banks.

26. The 5% rate is applicable to interest on loans granted by banks and insurance companies, securities traded on a recognised securities market, and the sale on credit of M&E.
27. It is understood that the definition of royalties applies to any type of payment received for the provision of technical assistance services. The 15% rate applies to royalties arising from the use of, or the right to use, trademarks.
28. The original rate is 15% but has been reduced to 10% as long as the Netherlands does not impose a WHT.
29. Reduced WHT rate results from the application of the most-favoured nation clause.
30. The 5% rate applies to industrial, commercial, and scientific equipment.
31. The 10% rate also applies to fees for technical assistance which are payments of any kind, other than those mentioned in Articles 14 and 15 of the treaty as consideration for managerial or technical or consultancy services, including the provision of services of technical or other personnel.
32. This rate applies where the company that is the beneficial owner of the dividends directly owns at least 25% of the capital of the distributing company.
33. The treaty broadly defines royalties and includes payments related to certain software.
34. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 10% of the capital of the distributing company.
35. The 5% rate applies on the gross amount of the interest paid to, among others, banks and insurance institutions.

Tax administration

Taxable period

In general terms, the taxable period in Mexico is the calendar year.

Tax returns

Corporate taxpayers are required to file annual CIT and flat tax returns for the preceding calendar year by 31 March. Holding companies in the tax consolidation regime are required to file an annual consolidated tax return within four months of the end of the tax period (i.e. usually by 30 April).

Thereafter, the taxpayer is generally required to obtain a certification of tax compliance by an independent auditor and to file the related tax compliance opinion by the end of June. This certification process covers all federal taxes other than customs duties.

Business taxpayers meeting certain size criteria or belonging to a group that as a whole meets these criteria must also file a tax-compliance audit report on an annual basis with the Mexican Audit Administration. This report consists of audited financial statements and detailed schedules, together with a report by the auditor stating that no irregularities were observed in respect of the taxpayer's compliance with its federal tax liabilities. These reports must be filled electronically, and the auditor must be an independent certified public accountant (CPA) registered with the Mexican Audit Administration. The amount of detailed information required to be filed, and the auditor's responsibility in connection therewith, is significant. This obligation is now becoming elective for most companies and, for this, certain application rules will apply, provided also that certain additional information is submitted with their yearly tax return, in lieu of complying with the full certification process.

Employees' profit sharing payments are generally due by 31 May of the year following that in which the corresponding profit was obtained.

Information returns must also be filed no later than 15 February each year, reporting on, amongst others, the following activities performed in the immediately preceding year:

- Payments made to parties resident abroad.
- Loans received from or guaranteed by non-residents.

Mexico

- Transactions conducted through a business trust.
- Parties to which the taxpayer makes payments and withholds income tax.
- Parties to which the taxpayer has made donations.
- Parties to which the taxpayer has paid dividends, and the value of such payments.
- Transactions carried out with suppliers and clients, either local or overseas.

Taxpayers making salary payments are also required to file information returns reporting salaries paid and salary credit paid in the immediately preceding calendar year.

An annual information return must be filed on investments made or held in a tax haven. This must be filed in February of the immediately following year.

An information return on transactions carried out with non-resident related parties must be filed together with the annual CIT return (no later than March of the following year).

Annual information returns must also be filed disclosing items used in the flat tax computation.

Payment of tax

Corporate taxpayers are required to make estimated payments of CIT by the 17th day of each month based on their estimated taxable income at the end of the previous month and calculated principally by applying the profit factor to the cumulative monthly gross income. The profit factor is determined by dividing the taxable profit by gross income shown in the annual return for the preceding year, or, if no profit factor is to be found in that annual return, the factor appearing in the year preceding that and so on, up to five years, with certain adjustments. For this purpose, gross income includes nominal income, excluding inflationary adjustments. The balance of CIT for the year is due at the same time as the annual return.

Monthly flat tax advance payments are also required by the 17th day of the immediately following month. The balance of flat tax for the year is due at the same time as the annual return.

Special procedures are provided for computing advance CIT payments and for obtaining authorisation to reduce the amounts of monthly advances after the sixth month of the year. No advance payments or adjustments thereto are required in the first year of operations.

Audit cycle

In general terms, for taxpayers that are obligated or elected to file a tax-compliance audit report, the tax audit (tax inspection) may start with a review of the audit report prepared by the independent CPA. At this point, the tax authorities may finish the audit if they are satisfied with the information provided by the CPA; otherwise, tax authorities may initiate a direct review on the taxpayer either at the tax authority's offices or at the taxpayer's facilities. Tax authorities may request several documents from the taxpayer and third parties that carried out transactions with the audited taxpayer.

Tax audits should be concluded within the following 12 months after the audit was initiated. The period to conclude tax audits for taxpayers that are either part of the financial system or consolidated for tax purposes is 18 months. In cases where the Mexican tax authorities request information to tax authorities from foreign

jurisdictions, the period to conclude the audit is two years. The above periods might be suspended under certain circumstances (e.g. a judicial recourse or appeal initiated by the taxpayer against the tax authorities). Upon conclusion of the audit, the tax authorities should issue either a notification explaining tax underpayments observed during the audit process or a notification of conclusion if no issues remain open at the end of the inspection.

Finally, tax authorities should issue a notification of assessment within the six months after the conclusion of the tax audit. At this point, all underpayments claimed by the tax authorities become due.

Statute of limitations

In general, the right of the tax authorities to collect taxes, review tax returns, or claim additional tax expires five years after the date the respective return is filed. However, in cases where the taxpayer has not secured a federal tax registration number, has no accounting records, has failed to keep accounting records for the required five-year period, or has not filed a tax return, the statute of limitations expires in ten years. Similarly, the period for claiming a refund of overpaid tax expires after five years.

Topics of focus for tax authorities

Although there are no formal written communications from the tax authorities dealing with this matter, in recent years the tax authorities have focused audits on transactions with non-residents, inter-company transactions, transfer pricing, social security contributions, and customs duties, among other areas.

Other issues

International Financial Reporting Standards (IFRS) adoption

All companies listed on the Mexican Stock Exchange are required to submit annual consolidated financial statements accompanied by the opinion of a Mexican independent CPA. Commencing in the year ending 31 December 2012, these financial statements must be prepared in conformity with IFRS and cover three years. Financial institutions and insurance companies must file audited financial statements with the appropriate regulatory agency.

The adoption of IFRS in Mexico presents companies with great challenges and opportunities. Changing from Mexican Financial Reporting Standards (MFRS) to IFRS requires companies to review their financial reporting procedures and criteria. Major changes in the requirements often have a ripple effect, impacting many aspects of a company's information reporting organisation.

Nevertheless, the benefits to Mexican companies in reporting under IFRS are numerous. Among the greatest of these is the opening up of the Mexican Stock Market to overseas investors. By adopting IFRS, investors are able to compare two companies on different sides of the world with greater ease, and thus it is hoped that the change will encourage investment in Mexican companies.

Adoption of IFRS is not a straightforward process, and it will require time and effort on the part of the adopting entities to be able to ensure a smooth transition from MFRS to IFRS and ensure that the changes and benefits from this transition are duly implemented.

Significant developments

Corporate income tax (CIT)

As of 2012, a 12% CIT rate is introduced, abolishing the 0% CIT rate that was applicable for the period 2008 through 2011.

As of 2012, small and medium companies that are not registered as value-added tax (VAT) payers (i.e. registered operational revenue up to 100,000 Moldovan lei [MDL] or approximately 6,600 euros [EUR] in the previous fiscal year) should apply a special CIT regime of 3% on their turnover. This special tax regime is optional for legal entities that are not VAT payers and that registered operational revenue between MDL 100,000 (approximately EUR 6,600) and MDL 600,000 (approximately EUR 39,500) during the previous year.

In the financial services sector, the transition from National Standards of Accounting to International Financial Reporting Standards (IFRS) is to be viewed as largely neutral from a CIT perspective. Therefore, income or expenses recorded within such transition should generally not be recognised for tax purposes.

Also starting in 2012, leasing companies are allowed to deduct provisions to cover claims related to non-recovery of lease rates and interest rates up to 5% from the weighted average balance from the account receivables, provided certain conditions are met.

The interest expenses incurred by legal entities, based on a loan contract, given to individuals and legal entities (except financial institutions, microfinance organisations, and leasing companies) can be deducted up to the weighted average interest rate applied for loans granted by the banking sector to legal entities for a period of up to 12 months and over 12 months (values are set by the National Bank of Moldova and published on its official website).

Tax incentives

Another important change for the 2012 year is the annulment of many tax incentives.

The following tax incentives are maintained:

- Residents of free entrepreneurial zones (FEZs) continue to receive preferential treatment (until the expiration of the period of activity of the FEZs).
- Interest income received by legal entities from bank deposits and corporate securities for a period not exceeding three years are tax exempt (until 1 January 2015).
- Certain tax incentives remain available for legal entities that made capital investments in the Free International Port 'Giurgiulesti' (within the investment agreement in this respect).

- There are some benefits available with respect to salary taxes on income of employees of companies whose main activity represents software development, under certain conditions (until 31 December 2016).

Withholding taxes (WHTs)

The WHTs applicable to certain types of income have been changed for residents and non-residents.

Starting in 2012, the WHT for dividends is 6% for both residents and non-residents. However, the distribution of dividends from profit earned during the period between 2008 and 2011 remain subject to the previously applicable final WHT rate of 15%.

The royalty and interest WHT for residents remains unchanged at 15%. For non-residents, however, it has been lowered to 12%.

As of 2012, the preliminary WHT on payments made for the benefit of resident individuals has been increased to 7%, unless such payments are tax exempted or are computed as employment salaries.

Value-added tax (VAT)

Legal entities registered as VAT payers will be liable to submit tax returns using automated methods of electronic reporting starting with:

- 1 January 2012: VAT payers which are administered by the Main State Tax Inspectorate and State Tax Inspectorates of the main cities (i.e. Chisinau, Balti, Comrat).
- 1 January 2013: All other VAT payers.

As of 1 July 2012, companies subject to VAT taxation from Chisinau and Balti will be required to register their VAT invoices that exceed the taxable value of MDL 100,000 (approximately EUR 6,600) in the new general electronic register. This liability will be gradually applicable to the rest of VAT payers.

Excise duties

The excise duty rates were amended for a series of excisable goods (e.g. wine from fresh grapes, denaturated ethyl alcohol and other fermented beverages, tobacco and cigarettes, gasoline and its derivatives, diesel, oils and cars). Also, some types of goods were excluded from the list of goods subject to excise duties (e.g. wines and fermented or partially fermented grape musts; crystal objects; video, web, and photo cameras).

Liquefied gas and inert gas (nitrogen and oxygen) became subject to excise duty.

Road taxes

The road tax rates for vehicles registered in Moldova have increased.

Taxes on corporate income

Resident companies generally must calculate their taxable base for CIT purposes on their worldwide income. Permanent establishments (PEs), unlike resident companies, are only required to calculate their taxable base for CIT purposes on income sourced in Moldova.

The CIT rate applicable in 2012 is 12%.

Moldova

In 2012, individual entrepreneurs are subject to progressive rates of 7% for annual income up to MDL 25,200 (approximately EUR 1,660) and 18% for annual income exceeding MDL 25,200 (approximately EUR 1,660).

Farming enterprises are subject to a 7% CIT rate in 2012.

Small and medium companies that are not registered as VAT payers (i.e. registered operational revenue up to MDL 100,000 or approximately EUR 6,600 in the previous fiscal year) should apply a special CIT regime of 3% on their turnover. This special tax regime is optional for legal entities that are not VAT payers and that registered operational revenue between MDL 100,000 (approximately EUR 6,600) and MDL 600,000 (approximately EUR 39,500) during the previous year.

If a Moldovan Tax Authorities (MTA) tax inspection, applying indirect methods, re-assesses the income amount compared to the declared gross income, a 15% CIT rate may be applied to the excess amount.

Corporate residence

According to Moldovan tax law, a tax resident is a legal entity organised or managed in Moldova or that has its main place of business in Moldova. In practice, tax residency is determined by the place of incorporation.

Permanent establishment (PE)

Based on the Moldovan tax law, a PE is a fixed place of business through which a non-resident carries out, wholly or partly, either directly or through a dependent agent, entrepreneurial activity in the territory of Moldova (e.g. other services and activities, if the period during which such services/activities are carried out exceeds three months).

Due to the regulatory environment in Moldova, foreign enterprises operating through a PE in Moldova are not common.

Other taxes

Value-added tax (VAT)

The standard VAT rate in Moldova is currently 20%. It is generally applied to local supplies of goods and services as well as to goods subject to import and services subject to the reverse charge mechanism.

The reverse charge refers to services rendered by a non-resident supplier to a Moldovan company, which have a place of supply deemed to be in Moldova (e.g. consulting services, supply of information, supply of staff) and which do not fall under any specific VAT exemption. Such reverse charge VAT is due and payable to the Moldovan budget at the date of external payment, including advance payments, duly confirmed under the correspondent documentation.

Apart from the above, certain types of supplies are subject to reduced VAT rates. For instance, local supplies of bread, bakery products, milk, and dairy products; the import and local supplies of sugar produced from sugar beet; and the import and local supply of drugs and certain pharmaceutical products are subject to the reduced 8% VAT rate.

A number of supplies are subject to the 0% VAT rate (i.e. VAT exempt with the right to exercise the input VAT deduction), including international transportation and exports of goods or services. Certain supplies are subject to VAT exemptions, including financial services and the sale or rental of dwellings and land.

Input VAT

It should be mentioned that input VAT incurred on acquisitions of goods and/or services may be deducted, provided it is incurred by a VAT registered payer to perform VAT-able supplies within its business activity.

A company is required to register for VAT purposes if the total turnover within the last 12 consecutive months reached the threshold of MDL 600,000 (approximately EUR 39,500).

If input VAT is incurred by a business not registered for VAT purposes, if input VAT relates to acquisitions used for supplying VAT exempt supplies, or if input VAT relates to purchases performed not for business purposes, such input VAT may not be deducted and shall be treated as a cost/expense.

If input VAT relates to acquisitions destined to perform mixed supplies (i.e. both VAT-able and VAT-exempt ones), the input VAT deduction right is exercised on a pro-rata basis.

Should a company register a deductible input VAT exceeding its output VAT, this balance can be partially refunded only if the company carries out a specific range of business activities (e.g. export supplies, international transportation services, production of bakery and dairy products, leasing activity). Otherwise, such VAT amount may be carried forward to the following months, offset against the company's future output VAT liabilities.

VAT refunds

Additionally, VAT payers performing capital investments in Moldova may be entitled to refund the recoverable VAT related to these kinds of capital investments. Prior to 2012, such refund was not available in Chisinau and Balti. Starting in 2012, however, the VAT refund has been extended for capital investments in these municipalities. Note that specific conditions must be met, and there are few exceptions to this rule (e.g. buildings and transport items).

The VAT refund for capital investments made until 31 December 2011 will still be performed only according to the law applicable to that date.

The possibility to refund the VAT against future obligations to the national public budget is also now available, at the request of taxpayers not having debts to the national public budget.

VAT administration

As of 1 July 2012, companies subject to VAT taxation from Chisinau and Balti will be required to register their VAT invoices that exceed the taxable value of MDL 100,000 (approximately EUR 6,600) in the new general electronic register. This liability will be gradually applicable to the rest of VAT payers.

The fiscal period for VAT purposes is considered the calendar month.

Moldova

Every VAT payer (sometimes also non-registered entities for VAT purposes) must submit VAT returns and must settle related payable VAT liabilities by the end of the month following the reporting one (except for VAT on services supplied by non-residents which are VAT-able in Moldova). VAT payers registered for VAT purposes in Balti, Chisinau, Comrat, and at the Main State Tax Inspectorate must submit electronic VAT returns.

Generally, VAT payers are required to issue VAT invoices for the VAT-able supplies performed, as well as to keep detailed records of their acquisitions and supplies in the correspondent VAT ledgers, according to a set of specific rules.

Customs duties

Moldova's current customs framework is regulated by the Customs Code, Law on Customs Tariff, International Agreements concluded by Moldova to date, and by other legal acts.

Customs duties include customs procedural taxes, customs taxes, VAT, and excise duties. In general, any kind of goods and means of transport may enter and leave the territory of Moldova without any restriction. However, certain limitations specifically provided by the legislation are in force, which cover goods and means of transport crossing the border by breaching state security, public order, environment, etc.

Customs regimes

Definitive and suspensive customs regimes are provided under Moldovan law.

Definitive customs regimes refer to import and export, while suspensive customs regimes comprise: transit, bonded warehouse, inward processing relief (with suspension), processing under customs control, temporary admission, and outward processing relief.

Of these customs regimes, the following are deemed to have economic impact: bonded warehouse, inward processing relief, processing under customs control, temporary admission, and outward processing relief.

The suspensive customs regimes allow for suspension of import duties payment, usually for a specific (limited) period and provided that certain conditions are fulfilled, whilst a customs regimes having economic impact triggers a specific economic advantage to the benefit of the company applying it (e.g. repayment of customs duties paid upon importation, application of lower customs duty rates or customs duties exemption).

Citizens of Moldova, as well as foreigners, are allowed to move any goods in or out of Moldova under a simplified customs regime, provided these goods are not intended for business or commercial purposes.

Note that there are also some environmental pollution taxes related to specific packaging and goods that importers should pay.

Customs tariff and duties

The Law on Customs Tariff establishes standard customs duty rates applicable upon import of goods into Moldova, depending on their specific customs tariff classification code. The Moldovan Customs Tariff is based on the Harmonised Commodity Description and Coding System.

Customs duty rates are generally indicated as percentages to be applied to the customs value (i.e. *ad valorem* duty rates) of goods imported into Moldova. The maximum *ad*

valorem standard customs duty rate is 25%. There are also specific customs duty rates established, as well as combined rates.

Customs valuation

Under Moldovan customs legislation, the customs valuation is generally performed in accordance with the customs valuation principles in the General Agreement on Tariffs and Trade (GATT).

The customs value is determined based on one of the six provided valuation methods (i.e. transaction value, transaction value of identical goods, transaction value of similar goods, deductive value, computed value, and reserve method). If the first method is not applicable, then the second method should be applied and so forth.

Preferential tariff treatment

A preferential tariff treatment presumes a reduction of or exemption from customs duty, which may also be applied within a specific quota (settled either as value or quantity).

A preferential tariff treatment is granted for specific categories of goods depending on their origin and in accordance with the free trade arrangements (FTAs) to which Moldova is a party.

Moldova has concluded FTAs to date with most of the Commonwealth of Independent States (CIS) countries and is also a Central European Free Trade Agreement (CEFTA) contracting state.

From 1 March 2008 until 31 December 2012, Moldova benefits from Autonomous Trade Preferences (ATP) from the European Union (EU), which allows unlimited duty-free access to the EU market for all products originating in Moldova, except for certain agricultural products. Such agricultural products are accepted for import into the European Union either with exemptions from customs duties within the limits of specific tariff quotas (e.g. fresh, chilled, and frozen meat of bovine animals, dairy products, common wheat, barley, maize, white sugar) or with exemption of the *ad valorem* component of the import duty (e.g. tomatoes, grapes, apples).

To benefit from these preferential terms for imports of goods into the European Union, compliance with origin and certification requirements has to be observed.

Favourable tariff treatment

A favourable tariff treatment presumes a reduction or an exemption from customs duty upon import of specific goods into Moldova, depending on their type or final destination, according to domestic customs law or international agreements to which Moldova is a party.

Moldovan customs law provides the following exemptions, among others, from customs duty:

- Goods imported by individuals for personal use, not exceeding a specific threshold.
- Fixed assets aimed at being contributed in kind to a company's statutory capital.
- Goods released in Moldova under transit, bonded warehouse, or inward processing relief regimes.
- Moldovan goods previously exported and released back within a three-year term in the same status, as well as compensatory products obtained under outward processing relief.

Moldova

- Certain movable goods imported by legal entities carrying out leasing activities for the purpose of paying off their contractual liabilities derived from lease agreements concluded with Moldovan individuals or legal entities.
- Goods imported by legal entities for non-commercial purposes whose customs value does not exceed EUR 100.

Customs administration

Moldovan customs legislation provides for:

- the concepts and procedures of post clearance audit
- the obligation of individuals and companies to maintain the necessary documents for customs control for six years, and
- the obligation of individuals and companies that perform external trade transactions to maintain the related documents for the purposes of post clearance audit for five years.

We noticed a tendency of the customs authorities for intensifying the practical applicability of this concept. Moreover, the Moldova customs legislation provides for a number of fines for violation of these provisions. These fines vary between 40% and 100% of the customs value.

Excise duties

Excise duties apply to the production and import of cars, tobacco, alcohol, petrol and lubricants, and other goods. Special excise rates for each type of excisable goods are established in the tax code. The rates are widely variable and are based on multiple factors. The excise duty rates are generally indicated as a percentage applied to the value of goods (e.g. 30% for perfumes) or as a fixed amount for a certain quantity of excisable goods (e.g. MDL 1.85 [approximately EUR 0.12] applied to each litre of beer).

The following are liable for excise duties:

- Any individual or legal entity producing and/or processing excisable goods in the territory of Moldova.
- Any individual or legal entity importing excisable goods, unless there is no specific exemption provided.

Businesses or individuals that produce and/or process excisable goods in the territory of Moldova (or intend to do so) must possess excise duty certificates, which must be granted by the tax authorities before these operations are actually carried out. It is mandatory for individuals or businesses, upon submitting the relevant applications to the tax authorities, to attach the details of the excise premises.

Under certain circumstances, excise duty exemptions may apply. Some excise-liable goods are subject to mandatory excise stamp marking and labelling.

Recently, some major amendments were performed to the list of excisable goods as well as to the excise duty rates. For example, some types of goods were excluded from the list of goods subject to excise duties (e.g. wines and fermented or partially fermented grape musts; crystal objects; video, web, and photo cameras), while liquefied gas and inert gas (nitrogen and oxygen) became subject to excise duty.

Also, the excise duty rates have been increased for a series of excisable goods, for example:

- Wine from fresh grapes: increased from 10% of the goods' value (but not less than MDL 1.69 per litre) to MDL 15 per litre plus 15% of goods' value.
- Filter cigarettes: increased from MDL 10 for 1,000 units plus 18% of the goods' value to MDL 20 for 1,000 units plus 24% of the goods' value.

Tax on immovable property

Tax on immovable property is a local tax paid on real estate (i.e. land and/or construction on the land) by the proprietor or owner of material rights. Residents and non-residents owning real estate located in the territory of Moldova have similar obligations.

The 0.1% rate on immovable property used for entrepreneurial activity is applied either on the property's estimated value (if such exists) or on its book value, while the maximum tax rate on property used for agricultural activities is 0.1% of the property's book value.

Tax rates for real estate housing, including villages (communes) from Chisinau and Balti municipalities, have been increased.

As of 2012, separate rates have been introduced for agricultural land with construction buildings on it.

The actual tax rate on immovable property for a legal entity is established in monetary value (i.e. MDL), depending on its destination (e.g. land for agriculture usage) and location.

Tax on real estate housing, including villages (communes) from Chisinau and Balti municipalities, and agricultural land with constructions on them is paid in equal instalments on 15 August and 15 October for property owned before 1 July and is paid by 31 March for property acquired after 1 July. The respective tax shall be calculated based on the estimated value of the immovable property.

For the rest of immovable property, taxes have to be paid quarterly based on the book value.

Companies and individual entrepreneurs who own immovable property will be obliged to declare the immovable property tax by 1 July of the current fiscal period.

Local taxes

Local taxation in Moldova refers to the application of the following types of taxes and duties:

- Tax on the following natural resources:
 - Water.
 - Mineral exploration.
 - Geological exploration.
 - Mining operations.
 - Usage of underground areas for the construction of underground structures not related to mining operations.
 - Exploitation of underground structures within the performance of entrepreneurial activity, not related to mining operations.
 - Standing wood.
- Tax on immovable property.
- Duty for the right to perform local auctions and lotteries.

Moldova

- Tax on advertising placement.
- Fee for the right to use local symbols.
- Parking tax.
- Hotel room occupancy tax.
- Resort fee.

New amendments to the legislation provide that local authorities are now authorised to establish the list and the levels of tax rates for local taxes (i.e. previously it was the competence of the Moldovan Parliament to establish the maximum rates in this respect). Additionally,

- the publicity tax is no longer applied for placement of advertisements by means of broadcasting via TV, internet, radio, press, and printed media, and
- the terms of payment and submission of tax returns for some local taxes were amended (e.g. tax on organisation of auctions and lotteries in the territory of the administrative territorial unit, tax on passengers' transportation services within municipalities, cities, and villages).

Starting in 2012, the following local taxes have been introduced:

- Tax on transport unit owners, which is paid by legal entities or individuals that own transport units, depending on engine capacity, total weight, weight charge per axle, number of transport units owned.
- Parking fee, which is due by legal entities or individuals owning vehicles, depending on the parking space used for transport unit standing during a certain period of time. The specific conditions for fee assessment are to be provided by the local authorities.
- Tax for commercial and/or services providing units, which is to be paid by legal entities or individuals who have outdoor units selling products and/or services, depending on their surface.
- Tax on advertising devices, due by legal entities or individuals registered as entrepreneurs who own posters, banners, billboards, and other technical methods to place outdoor advertising, depending on the advertising device surface.

Road taxes

Road taxes are fees collected for the use of roads and/or protection zones of the roads outside the locality limits.

The system of road taxes includes the following:

- Tax for the use of roads by vehicles registered in Moldova.
- Tax for the use of roads of Moldova by vehicles not registered in Moldova.
- Tax for the use of roads by the vehicles with total mass, axle loads, or dimensions exceeding the admitted limits.
- Tax for the use of road protection zones outside the localities for carrying out construction or installation works.
- Tax for the use of road protection zones outside the locality limits for placing outdoor advertisements.
- Tax for the use of road protection zones outside the locality limits for placing roadside service objects.

Depending on the type of road tax, the tax law establishes the taxable person, deadlines for payment of the road tax, tax rates, exemptions (e.g. a legal entity or an individual shall pay road tax on vehicles registered in Moldova (i) on the date of state registration

of vehicle, (ii) on the date of the vehicle inspection/annual technical testing of the vehicle).

Recently, road tax rates have been increased to the following:

Object of taxation	Tax (MDL)	Tax (EUR)
Motorcycles:		
Under 500 cm ³ inclusive	100	6.5
Over 500 cm ³	200	13
Cars, vehicles for special use on car or bus chassis, with engine (cylinder) capacity:		
Up to 1,500 cm ³ inclusive	300	19
Over 6,000 cm ³	3,600	235
Trailers with a lifting capacity indicated in the registration certificate in tonnes	120	8
Semitrailers with a lifting capacity indicated in the registration certificate:		
Up to 15 tonnes inclusive	100	6.5
Over 35 tonnes	1,000	6,500
Trucks, vehicles for special use on truck chassis, any other self-propelled vehicles, with total weight indicated in the registration certificate:		
Up to 1.6 tonnes	120	8
Minibuses and buses with a capacity: *		
Up to 11 seats	1,300	85
Over 40 seats	2,400	160

* For minibuses and buses, the number of seats was calculated without taking into account the driver's seat.

Branch income

Branches

Moldovan law does not distinguish between branches of non-resident companies and local companies established by a foreign investor. As such, a non-resident's branch is established and registered in Moldova as a legal enterprise fully owned by the foreign investor. As such, it is subject to the same tax regime as local incorporated companies.

On the other hand, the concept of a tax PE does exist in Moldova. Generally, the PE of a non-resident entity will be subject to CIT in Moldova on any profits attributable to that PE. While non-resident entities operating in Moldova without a locally established entity run the risk of creating a taxable PE, since there is no local concept of a legal branch that is not a legal entity, non-residents do not typically intentionally operate in Moldova through a taxable PE.

Representative offices

Representative offices are often established by non-resident entities as a first step to operating in Moldova. According to the tax law, a representative office can engage only in auxiliary or preparatory activities. A representative office can perform only a limited range of activities without being considered a PE of the non-resident.

Moldova

All representative offices must submit by 31 March of the year following the reporting year the required Tax Reporting Statement on the activity conducted during the year concerned.

Income determination

Resident legal entities are taxed on their worldwide income, while non-resident entities are taxed on their Moldovan-source income. Taxable income is computed as accounting income adjusted in accordance with tax legislation.

Inventory valuation

Moldovan law provides for the following inventory valuation methods: standard cost method, retail method, weighted average cost, first in first out (FIFO), and last in first out (LIFO).

Assets are generally valued at their acquisition cost, production cost, or market value.

Capital gains

The capital gains rule applies to Moldovan companies selling capital assets on an occasional basis and whose ordinary activity does not include transactions with land, buildings, and shares. Shares and other investment assets (e.g. land, property) are treated under the tax law as capital assets (i.e. property not used in the ordinary course of business).

The income earned from the sale, exchange, or disposal of capital assets is deemed to be a capital gain in the amount of 50% of the difference between the purchase price (i.e. all costs related to the acquisition of capital assets) and the sale price. This capital gain must be included in the total gross amount of income for the year in which the assets were sold. This amount is subject to CIT.

Capital gains may be decreased by capital losses registered in the current or previous year.

Dividend income

Starting with profits earned in 2012, dividends paid by Moldovan legal entities to other Moldovan legal entities are taxed with the applicable final 6% WHT, while the distribution of dividends from profit earned during the period between 2008 and 2011 remain subject to the previously applicable final WHT of 15%.

Dividends received by Moldovan legal entities from foreign legal entities are included in taxable income and taxed at the applicable 12% CIT rate. According to Moldovan legislation, the beneficiary of such dividends is entitled to a credit for the tax paid in the foreign country, within certain limits.

Exchange gains and losses

Revenues obtained from foreign exchange differences are to be included in taxable income. Foreign exchange losses are CIT deductible, in the period they are incurred.

In certain circumstances (e.g. high depreciation of the national currency), foreign exchange differences should be capitalised to the value of assets in relation to which the expenses were incurred.

Non-taxable revenues

Moldovan tax law provides for the following main types of non-taxable revenues:

- Contributions to the capital of an entity.
- Income earned while benefiting from an income tax exemption.
- Money received from special funds and which are used in accordance with fund destination.
- Interest derived by legal entities on bank deposits with a period exceeding three years, as well as the interest derived from corporate securities issued in the form of bonds for a period exceeding three years, is tax exempted until 1 January 2015.
- Interest derived from state bonds, until 1 January 2015.

The following elements have also been included in the list of non-taxable sources of income:

- Income arisen due to the transition from National Standards of Accounting to IFRS.
- Income resulting from revaluation of fixed assets and other assets.
- Dividends covering the fiscal periods up to 1 January 2008, payable to resident individuals.

Foreign income

Resident legal entities are taxed on their worldwide income, unless a double tax treaty (DTT) stipulates otherwise. The legal entities, under certain conditions, can benefit from tax credits provided under a DTT or can apply for unilateral tax credits against income tax paid in any foreign country, if this income is subject to taxation in the Republic of Moldova. Such tax credit shall not exceed the amount that would have been estimated at the CIT rate applicable in the given tax period. Otherwise, there is no specific tax deferral regime.

M

Deductions

As a general rule, expenses incurred by a company are deductible for CIT purposes only if they are deemed as ordinary and necessary, aimed at deriving taxable income, and justified with adequate supporting documentation.

Among others, the following expenses are generally CIT deductible:

- Depreciation of fixed assets calculated under the diminishing-balance method.
- Amortisation of intangible assets computed under the straight-line method.
- Research and development (R&D) expenses incurred during the fiscal year as current expenses, should certain conditions be met.
- Business trip expenses, protocol expenses, and expenses on insurance of business entities, within the limits approved by the government.
- Waste, spoilage, and perishability expenses, within the threshold approved by the company's manager.
- Bad debt, provided certain conditions are fulfilled and justifying documents are made available.
- Charity and sponsorship expenses borne for the benefit of public authorities and public institutions financed from the state budget, as well as non-profit organisations within certain conditions, at up to 10% of taxable income.

Moldova

As of 2012, the rate of deductible expenses for business purposes (ordinary and necessary) that are not adequately supported by necessary documentation has been increased from 0.1% to 0.2%.

Also starting in 2012, leasing companies are allowed to deduct provisions to cover claims related to non-recovery of lease rates and interest rates up to 5% from the weighted average balance from the account receivables, provided certain conditions are met.

Depreciation and amortisation

Fixed assets are subject to CIT depreciation under the diminishing-balance method if their useful economic life exceeds one year and acquisition costs exceed MDL 6,000 (approximately EUR 395).

According to the fiscal law, fixed assets are divided into five categories. These categories are set out according to specific rules, mainly on the assets' useful life (i.e. the number of years during which the assets' utilisation generates economic advantages; the useful life for each type of depreciating asset is regulated by governmental decision). The depreciation rates vary as follows:

- First category: 5%.
- Second category: 8%.
- Third category: 12.5%.
- Fourth category: 20%.
- Fifth category: 30%.

Intangible assets are subject to CIT amortisation according to the straight-line method.

Interest expenses

Different CIT deductibility rules apply for interest on loans used for carrying out operational activities and for loans used for investment activities performed on an occasional basis.

As a general rule, deductions for interest and foreign exchange losses are allowed for CIT purposes provided such expenses are deemed as ordinary and necessary for carrying out the activities of the business. Expenses should also be incurred for the purposes of obtaining taxable income and justified by adequate backup documentation.

If the interest paid by a Moldovan company relates to its operational or day-to-day activities, the related expenses are CIT-deductible. A few other provisions should also be considered, namely the following:

- Interest expenses incurred based on loan agreements, for the benefit of individuals and legal entities (except financial institutions and micro-financing organisations, and leasing companies), by businesses are CIT-deductible, limited to the average weighted interest rate on credit loans offered by banks to legal entities for the period of up to 12 months and over 12 months.
- If the loan is obtained to acquire/build fixed assets, the related interest expense should be capitalised to the initial fiscal value of assets until they are commissioned. The deductibility of this expense is capped at the above limit. The excess difference is treated as a CIT non-deductible expense for that fiscal year.
- If interest relates to an investment activity, the interest expense is CIT-deductible within the limit of the income derived from the investment.

Non-deductible expenses

Among others, the following expenses are generally not deductible for CIT purposes:

- Expenses not adequately supported by necessary documentation, except the 0.2% rate as mentioned above.
- Provisions, except for financial institutions and leasing companies as mentioned above.
- CIT as well as CIT related fines and penalties, or related to other taxes and due payments to the state budget, or for violations of legal acts.
- Losses incurred from transaction between affiliated parties.

Fiscal losses

Fiscal losses may only be carried forward in three equal instalments for three consecutive years following the year the losses were incurred, provided the company records taxable income. If the company recorded fiscal losses for more than one year, such losses are carried forward in the order in which they arose. Fiscal losses are recorded on off-balance-sheet accounts.

Losses may not be carried back.

Payments to foreign affiliates

A Moldovan legal entity generally may deduct payments to foreign affiliates to the extent that these amounts were actually paid and are not in excess of what it would have paid to an unrelated entity (i.e. arm's length). However, the payer is required to hold documentary evidence for the actually performed transactions. Still, certain types of expenses may follow general rules of deductibility that would limit their amount (e.g. interest expenses on loan agreements).

M

Group taxation

Moldovan tax law does not provide for group taxation.

Transfer pricing

Transfer pricing regulations are currently at the initial stage of development, as the law does not list any specific transfer pricing methods. Moreover, taking into account that Moldova is not currently an Organisation for Economic Co-operation and Development (OECD) member country, there is no possibility of enforcing the OECD Transfer Pricing Guidelines.

According to the law in force, transactions carried out between related parties should observe the arm's-length principle. Transactions that do not follow this rule are disregarded for tax purposes.

In accordance with Moldovan tax law, a company is considered the taxpayer's related party if it controls the taxpayer, is controlled by the taxpayer, or both the company and the taxpayer are under the common control of a third party.

From a tax perspective, control is the ownership (either directly or through one or more related parties) of 50% or more in value of the capital or voting power of one of the companies.

Losses incurred in dealings between related parties carried out directly or through intermediaries are treated as non-deductible for CIT purposes.

Moldova

According to current Moldovan tax law, there are no formal transfer pricing documentation requirements. However, at the time of writing, there is a proposal that formal transfer pricing documentation requirements will be introduced in the Moldovan tax law starting in 2014.

Thin capitalisation

Moldovan tax law does not provide for a specific thin capitalisation regime.

The deductibility of interest expenses follows the deductibility regime as described under Interest expenses in the Deductions section.

Tax credits and incentives

Foreign tax credit

Income tax paid in any foreign country, if this income is subject to taxation in the Republic of Moldova, is allowed for tax credit. The credit of the income tax may be made, provided that the taxpayer submits a document that justifies payment (withholding) of the income tax outside the Republic of Moldova, certified by the competent body of the respective foreign country, with its translation into the state language.

The amount of tax credit for any taxable year should not exceed the amount that would have been estimated at the rate applicable in the Republic of Moldova with regard to this income.

A tax paid in a foreign country should be creditable for the year in which the income is taxable in the Republic of Moldova.

Free entrepreneurial zones (FEZs)

FEZs are territories where domestic and foreign investors can carry out entrepreneurial activities on preferential terms (i.e. favourable tax, customs, visa, and other regimes). There are currently nine FEZs in Moldova.

The following types of activities may be carried out in a FEZ:

- Production of goods preferentially for export (i.e. supply of goods in the territory of Moldova does not exceed 30% of the total amount of goods and services supplied within one year).
- Sorting, packing, marking, and other similar operations of goods transiting the customs territory of Moldova.
- Other supportive activities.

FEZ incentives

For the 2012 year, the following CIT incentives for FEZ investors have been maintained:

- Entities that are established in the FEZ and export goods and services from the FEZ outside the customs territory of Moldova will be entitled to apply only 50% of the applicable CIT rate on such gains; for other cases, the CIT rate will be 75% of the established one.
- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova is CIT exempted for a period of three years, provided that the FEZ residents invested in the fixed assets of their enterprises and/

or in development of the infrastructure of the FEZ capital equivalent to at least 1 million United States dollars (USD).

- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova is CIT exempted for a period of five years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital equivalent to at least USD 5 million.

From a VAT standpoint, goods and services supplied in the FEZ from abroad, from the FEZ outside the customs territory of Moldova, in the FEZ from other areas of Moldova, and those supplied to residents of other FEZs are subject to 0% VAT.

According to the customs provisions, goods are introduced into the FEZ with no VAT or customs duty and are not subject to economic policy measures, according to specific criteria. However, certain taxes in specific situations might be incurred by residents of the FEZ. Investors in the FEZ are guaranteed and protected from changes in legislation for a general period of up to ten years, while under certain conditions this period may be extended to 20 years.

Withholding taxes

Residents

Resident legal entities making payments to individuals (other than salary payments) must withhold and pay WHT to the MTA at the following rates:

- 7% preliminary withholding of payments made for the benefit of resident individuals, unless such payments are tax exempt or are computed as employment salaries. The beneficiary deducts (i.e. recovers) the 7% WHT from annual income tax due.
- 10% final withholding of an individual's income derived from leasing, rent, usufruct of movable and immovable property, and advertising campaigns.
- 6% final withholding of dividends paid out to individuals, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
- 15% preliminary withholding from royalties and interests. The beneficiary deducts (i.e. recovers) the 15% WHT from annual income tax due.

Non-residents

Under the 2012 domestic tax provisions, the following WHT rates apply upon payments to non-residents:

- 6% for dividend payouts, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
- 12% for other revenues.

Double tax treaties (DTTs)

The DTTs in force between Moldova and other countries may provide for more favourable tax rates than those provided by the local provisions. For their application, the foreign beneficiary of such income should provide the paying entity with its fiscal residency certificate before the payments are actually made.

Operational DTTs to which Moldova is a party are outlined below:

Moldova

Recipient	Dividends (%) *	Interest (%)	Royalties (%)
Albania	5/10	5	10
Armenia	5/15	10	10
Austria	5/15	5	5
Azerbaijan	8/15	10	10
Belarus	15	10	15
Belgium	15	15	0
Bosnia & Herzegovina	5/10	10	10
Bulgaria	5/15	10	10
Canada	5/15	10	10
China	5/10	10	10
Croatia	5/10	5	10
Cyprus	5/10	5	5
Czech Republic	5/15	5	10
Estonia	10	10	10
Finland	5/15	5	3/7
Germany	15	5	0
Greece	5/15	10	8
Hungary	5/15	10	0
Ireland	5/10	5	5
Israel	5/10	5	5
Italy	5/15	5	5
Japan	15	10	0/10
Kazakhstan	10/15	10	10
Kyrgyzstan	5/15	10	10
Latvia	10	10	10
Lithuania	10	10	10
Luxembourg	5/10	5	5
Macedonia	5/10	5	10
Montenegro	5/15	10	10
The Netherlands	0/5/15	5	2
Oman	5	5	10
Poland	5/15	10	10
Portugal	5/10	10	8
Romania	10	10	10/15
Russian Federation	10	0	10
Serbia	5/15	10	10
Slovakia	5/15	10	10
Slovenia	5/10	5	5
Spain	0/5/10	5	8
Switzerland	5/15	10	0
Turkey	10/15	10	10
Tajikistan	5/10	5	10
Ukraine	5/15	10	10
Uzbekistan	5/15	10	15
United Kingdom	0/5/10	0/5	5

* If multiple rates are listed, then the WHT is limited if the beneficial owner is a company (other than a partnership) that holds directly at least 50%, 25%, 20%, or 10% of the capital of the company paying the dividends, depending on the treaty.

Tax administration

Taxable period

The tax year for CIT purposes is the calendar year. For new business entities, the fiscal year is considered the period beginning with the registration date until the end of the calendar year.

For WHT and VAT purposes, the fiscal period is the calendar month starting the first day of the month.

Tax returns

An annual CIT return must be submitted to the MTA by 31 March of the year following the reporting year.

WHT and VAT liabilities must be declared and settled monthly by the end of the month following the reporting month.

Farming enterprises with an annual average number of employees not exceeding three and not registered as VAT payers must submit a unified tax return, if certain conditions are met.

Adjusted tax returns

Starting in 2012, the specific procedure for taxpayers submitting adjusted tax returns (after the taxpayer identifies previous errors) has been changed. Taxpayers who discover that the tax return previously submitted contains an error are able to submit the revised tax return not being limited to certain tax periods, provided that no written decision was issued by the tax authority in order to initiate a tax audit.

Penalties will not be applicable in amounts higher than the tax liability resulting from the revised tax return submitted, and no fines will be applicable if the tax duties are paid before the announcement of a tax audit.

Under amendments to tax legislation, the penalty will not apply in certain circumstances of fiscal violations specified by law, and if already established, it will be entirely cancelled, if no additional tax liabilities arise.

Companies that have miscalculated the taxes, and this was not detected in the previous tax audit, are absolved from fines and penalties for violations identified within the repeated tax audit.

Companies keeping the accounting records and preparing financial reports under IFRS will be not fined for violation of accounting and record keeping for tax purposes for a period of up to two years from the date of implementation (transition) to those standards.

Payment of tax

Taxpayers must declare and pay the applicable CIT by 31 March of the year following the reporting year. Also, interim quarterly 2012 CIT payments were reintroduced. Therefore, in 2012, taxpayers that receive income from sources other than employment

Moldova

income, interest, or royalties (from which residents withhold an income tax at source) are required to pay, no later than 31 March, 30 June, 30 September, and 31 December, amounts equal to 25% of either the total estimated value of the CIT due for the 2012 fiscal period or the total value of the calculated CIT for the 2011 fiscal period.

Fines and penalties

The MTA is entitled to apply a fine of 15% to the amount by which a taxpayer under-reported its taxable income for the period between 2008 and 2011 for CIT purposes. For the period starting with 2012, a fine of 30% of the diminished tax liabilities (including CIT ones) will be applied.

Under the tax law, the MTA is entitled to apply a fine in the amount of the undeclared tax, if this is a result of tax evasion.

Taxpayers who settle amounts as assessed by the MTA within three business days and have no other outstanding liabilities qualify for certain tax incentives (i.e. 50% reduction of fines). As of 2012, the possibility to benefit from a 50% reduction for the fines applied by the customs authorities has also been introduced, provided the fines are paid within three business days from the date of handing the decision on their application.

In addition, certain special provisions regarding tax evasion apply. The term 'tax avoidance' is defined under Moldovan tax law as diminishing the tax liabilities by more than MDL 30,000 (approximately EUR 2,000) by means of including in accounting, tax, or financial documents deliberately distorted data on income or expenses or by hiding other objects of taxation. Should the amount of the tax due exceed MDL 30,000 (approximately EUR 2,000), the tax evasion is regarded as a criminal offence. According to the Moldovan Criminal Code, legal entities can be punished for tax evasion with a fine up to MDL 120,000 (approximately EUR 7,905) and preclusion from performing certain activities or winding-up.

The fines for violations of tax legislation committed by taxpayers have been increased (some of which are capped), and new sanctions for non-compliance with applicable tax law have been introduced.

Among others fines that have been increased, the following are worthy of mention:

- The fine for the performance by the taxpayer of an economic activity with the issuance of a bill without using a cash register has been increased to MDL 10,000 or EUR 660, while such repeated action is sanctioned with a fine of MDL 50,000 or EUR 3,300.
- The fine for the failure to provide the VAT invoice in accordance with the tax law has been increased to MDL 3,600 or EUR 240 for each VAT invoice but capped to MDL 108,000 or EUR 7,200.
- The fine for hindering the execution of a tax audit by not providing access to production, storage, commercial, or other facilities has been increased from MDL 3,000 or (approximately EUR 200) to MDL 10,000 or (approximately EUR 650).
- The fine for submitting a tax return containing unauthentic information has increased from MDL 200 (approximately EUR 13) to MDL 1,000 (approximately EUR 65) for each tax return, but being capped to MDL 10,000 (approximately EUR 650).

Rulings

The law does not provide for the possibility of obtaining binding rulings. However, comfort letters can be obtained.

Taxpayers that inadequately computed tax liabilities due to incorrect written explanations issued by the MTA may not be subject to sanctions (i.e. fines and late-payment penalties). Tax liabilities may still be recomputed by the MTA. Written explanations are issued by the MTA free of charge and may remain valid for an indefinite period of time, unless cancelled by new legislation or other rulings. Such explanations are generally issued by the Moldovan competent authorities during a period of up to one month.

Other issues

The legislation and the approach of the state authorities in Moldova related to corporate taxation have been and are expected to be subject to significant changes.

Taxpayers should seek professional advice over specific issues, given that only limited interpretations have been issued by the MTA.

Significant developments

The following important changes to the Corporate Income Tax Law came into effect as of 1 January 2012, impacting the requirements for Mongolian companies to withhold tax on amounts paid to non-residents:

- The word 'loan' was removed from the article requiring tax to be withheld on 'loan interest' paid to a non-resident, confirming that tax should be withheld on any interest paid to a non-resident.
- Mongolian companies are now required to withhold tax on all payments for services to non-residents. Previously, this was only required where the service was provided in the territory of Mongolia.

Taxes on corporate income

Mongolian resident economic entities are taxable on aggregate annual income earned worldwide. Non-resident economic entities carrying out business activities in Mongolia are taxable only on the income earned in the territory of Mongolia.

Mongolian corporate income tax (CIT) is levied at the following rates, using a progressive-rate scale that ranges from 10% to 25%, as follows:

- 10% applies to the first 3 billion Mongolian tugriks (MNT) of annual taxable income.
- 25% applies to any excess of MNT 3 billion of annual taxable income.

However, the income described in the chart below is excluded when determining the annual taxable income and is taxed at different tax rates on a gross basis:

Source of income	Applicable tax rate (%)
Dividends	10
Royalties	10
Interest	10
Gambling, betting games, and lotteries (net)	40
Sale of immovable property	2
Sale of rights (e.g. mining licenses, special activity licences, and other rights granted by the authorised organisations for conducting specific activities)	30

Local income taxes

The Mongolian tax system divides to state taxes or local taxes. Only individual income tax falls under local income tax, and other taxes that are concentrated in local budgets are not related to income.

Corporate residence

A resident legal entity is an economic entity formed under the laws of Mongolia or a foreign economic entity that has its headquarter office in Mongolia. There has not been further development of this concept, so it cannot be assumed that the standard place of effective management or control test will apply.

A non-resident company is a foreign economic entity that conducts its business for Mongolian clients.

Permanent establishment (PE)

The concept of a PE is not well developed. Therefore, non-resident companies will suffer a 20% withholding tax (WHT) on a range of payments unless treaty protection is available.

Other taxes

Value-added tax (VAT)

A VAT at the rate of 10% is imposed on the supply of taxable goods and services in the territory of Mongolia and on imports into Mongolia.

VAT is specifically levied on the following:

- Goods sold in Mongolia.
- Work performed and services rendered in Mongolia.
- All goods imported into Mongolia to be sold or used.
- Goods exported from Mongolia for use or consumption outside Mongolia.

Customs duty

A flat customs tariff of 5% applies with respect to most goods imported into Mongolia, except for information technology and medical equipment and pure-bred livestock, which are zero rated.

Equipment and spares imported by small and medium-size companies for the purposes of creating employment, replacing import goods, and supporting export goods are exempt from the customs tariff.

Export duties apply to certain exported goods, such as unprocessed camel wool, wood, and wooden materials.

Excise tax

Excise tax is levied on goods manufactured in or imported into Mongolia, such as tobacco, alcohol, gasoline and diesel fuel, and passenger vehicles. Excise tax is also levied on the physical units of special-purpose technical devices and equipment used for betting games and gambling and on the activities of individuals and legal entities that conduct such activities. The excise tax rate on the goods varies between 0.30 United States dollars (USD) and USD 10, according to the origin and type.

Mongolia

Excise tax imposed on imported gasoline and diesel varies depending on the port you import into and a decision of the Cabinet; but starting from the 11 November 2011 up until now there is no excise tax on imported gasoline and diesel.

If the gasoline and diesel is produced in Mongolia, the rates are:

- Gasoline:
 - USD 11 per tonne (up to 90 octane).
 - USD 12 per tonne (above 90 octane).
- Diesel: USD 15 per tonne.

Immovable property tax

Immovable property tax is an annual tax levied at 0.6% (this will vary from 0.6% to 1% depending on the decisions made by the local representatives' committee beginning 1 January 2013) of the value of the immovable property that is owned. For tax purposes, the value used is the value registered with the government registration authority. If the property is unregistered, the insured value is used. In the absence of either a registered or insured value, the accounting value is used.

This tax does not apply to property owned by persons and financed through the state budget, to any dwelling houses, or to any buildings and construction for public use.

Stamp duty

Under the Law of Mongolia on State Stamp Duties, there are 43 types of activities subject to stamp duties, including the following:

- Settlement of a legal dispute by a court.
- Court involvement in arbitration.
- Notary services.
- Consulate services.
- State registration services for legal entities.
- Registration services for foreign invested economic entities and representative offices of foreign organisations.
- Other specific activities that need permissions and rights from the state authorities.

The amount of duty varies depending on the types of services or activities involved.

Fees and taxes applicable to the extractive industry

A range of fees and other taxes are payable for activities in the extractive industry. The primary ones include the following:

- Mining License Fee, which is agreed up front and stated in the mining licence.
- Royalties, which are paid on the sale of mining products. The rate depends on the product being mined and the level of processing being performed in Mongolia.
- Air Pollution Fees.
- Land Use Fee.

Branch income

The repatriation of profits from branches of foreign legal entities is subject to branch profits tax at a rate of 20%.

Please note that it appears it is no longer possible for foreign legal entities to establish a branch in Mongolia. However, the above provision remains in place for branches that were previously established in Mongolia.

Income determination

Inventory valuation

There is no specific provision in the tax law for inventory valuation.

Capital gains

Capital and ordinary transactions are treated the same for tax purposes (i.e. included in annual taxable income). An exception is provided for income from sales of immovable property, which is subject to tax of 2% on gross sales proceeds.

Taxation of capital gains of non-residents is not clear. Conservative reading of corporate income law suggests that gross income (not net gain) from disposal of shares in a Mongolian company should be subject to 20% WHT. No mechanism currently exists if the transaction takes place between two non-residents.

Dividend income

Dividend income earned by a Mongolian resident entity is subject to WHT of 10%. Dividend income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable double taxation treaty (DTT).

Interest income

Interest income is subject to a special income tax of 10%. Interest income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Partnership income

Partnership income is treated as ordinary income to the partner.

Rental income

Rental income is included in taxable income for tax determination.

Royalty income

Royalty income is taxed at a special rate of 10%. Royalty income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Unrealised currency exchange gains/losses

Unrealised currency exchange gains are not considered as taxable income, and, at the same time, losses are not deductible from taxable income.

Foreign investment

Tax stability is available for foreign investments of a certain level.

Foreign income

Unremitted earnings are taxed the same as ordinary earnings.

Mongolia

Deductions

Expenses mostly associated with generating aggregate annual income are deductible for CIT purposes (provided proper documentation is in place), and a list of these is provided in the legislation. Expenses not on this list are not deductible.

Note that the CIT law stipulates that finance lease payments (except interest) are not deductible for tax purposes.

Accrued expenses

Accrued expenses are tax-deductible.

Contingent liabilities

Contingent liabilities are not tax-deductible.

Depreciation and amortisation

Depreciation of fixed assets and amortisation of intangibles are tax-deductible. A straight-line method is used and the years of usage are determined for tax purposes.

	Non-current asset class	Useful life (in years)
1	Building and construction	40
2	Machinery and equipment	10
3	Computer, computer parts, and software	3
4	Intangible asset with undefined useful life	10
5	Intangible asset with defined useful life (includes licence for mineral exploration and extraction)	Period in force
6	Other non-current asset	10
7	Building and facilities of manufacture, management of technology park, unit production, and buildings within technology park	20
8	Machineries, mechanism, equipment, technical parts of manufacturing within the management technology park, unit production, and technology park	3

Goodwill

There is no specific provision in the tax law regarding the deductibility of goodwill.

Organisational and start-up expenses

Organisational and start-up expenses are tax-deductible.

Interest expenses

Interest expenses are deductible. However, there are limits with respect to the deductibility of interest expense. *See Thin capitalisation in the Group taxation section for more information.*

Bad debt

Bad debt is not tax-deductible.

Charitable contributions

Charitable contributions are not tax-deductible, except for donations to the fund of vocational training.

Pension expenses

Compulsory pension insurance premiums paid to the Social Security Authority of Mongolia are deductible. Additional voluntary insurance premiums are tax-deductible but shall not exceed 15% of taxable income. Pension provisions or internal pension fund expenses are not deductible.

Payment for directors

If a payment for directors is a salary payment on which social insurance and personal income tax is levied, it is considered as deductible.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments are not in the list of permitted deductions. Per anti-corruption law, monetary amounts involved with respect to such payments will be confiscated and criminal proceedings will be instituted.

Fines and penalties

Fines and penalties are not deductible for tax purposes.

Net operating losses

Net operating losses generally may be carried forward for up to two years. However, the annual amount of carried forward losses deductible from taxable income may not exceed 50% of the taxable income in the tax year.

Legal entities involved in the infrastructure and mining industries may carry forward 100% of their losses for up to four to eight years, depending on their investment period and based on government regulations.

There is no provision for the carryback of losses.

Payments to foreign affiliates

Deductibility of payments to foreign affiliates depends on the nature of the payment, as follows:

- Interest payments are deductible but with restrictions (i.e. thin capitalisation rule may apply, interest paid on loan for construction of building and installation of equipments need to be capitalised during that period).
- Dividend payments are not deductible.
- Technical assistance service payments are deductible.
- Payments for other services are deductible.

Group taxation

There are no rules permitting grouping for tax purposes in Mongolia.

Transfer pricing

If the following relation is present with a taxpayer, it is considered as 'a related party':

- Holds 20% or more of the common stock.
- Has the right to receive 20% or more of the dividends or distributions.
- Has the right to appoint 20% or more of the management of the economic entity or is otherwise able to determine its policies.

Mongolia

If related parties have sold or transferred goods, performed work, or rendered services among themselves below or above fair market value, the tax authority shall determine gross taxable income of such goods, work, and services based on value involving transactions of similar goods, work, and services among non-related parties.

Thin capitalisation

A thin capitalisation rule (debt-to-equity ratio is 3:1) applies, and interest paid in excess of this ratio is not deductible and is treated as a dividend. This is applied on a shareholder-by-shareholder basis as opposed to the company as a whole; no restriction applies to interest that is not paid to a shareholder.

Tax credits and incentives

A 50% tax credit is available for an economic entity that produces or grows the following products:

- Cereal, potatoes, and vegetables.
- Milk.
- Fruits and berries.
- Fodder plants.

Foreign tax credit

Tax credit shall be granted to an economic entity that paid tax in a foreign country based on agreements for the avoidance of double taxation and tax evasion.

Withholding taxes

Dividends, interest, and royalties paid; goods sold; and work/services provided to non-residents are subject to WHT at a 20% rate.

Dividends, interest, and royalties paid to resident companies are all subject to WHT at 10%.

Dividends, interest, and royalties paid to resident individuals are subject to WHT at a 10% rate, but WHT on dividends and interest to individuals will only be effective as of 1 January 2013.

Current DTTs

Recipient	Beneficial WHT rates (%)

Notes

- 5% if the recipient is a company (excluding partnerships) and directly owns at least 10% of the company.
- 5% if the beneficial owner is a company (excluding partnerships) and directly or indirectly holds at least 10% of the company.
- 5% if the beneficial owner is a company that controls, directly or indirectly, at least 10% of the voting power in the company.
- 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 10% of the company.
- 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 25% of the company.
- No tax if the beneficial owner of the dividends is a company that has held, for 12 months before the date of dividend payment, a direct interest of at least 25%. Does not apply to dividend investments or management of investment activities, unless exercised by a banking or insurance company.
- No tax if the beneficial owner of the dividends is a company holding at least 10% of the company.
- No tax if dividends paid to the government/certain public bodies.

Pending DTTs

Mongolia has pending DTTs with Egypt and Thailand.

Tax administration

Taxable period

The tax year is the calendar year.

Mongolia

Tax returns

Companies must submit a quarterly return by the 20th day of the month following the end of each quarter.

A withholder must prepare and submit a quarterly return of the tax deducted by the 20th day of the first month of the following quarter and an annual return by 10 February after the end of the tax year.

Payment of tax

A taxpayer shall pay the taxes due in advance by the 25th day of each month in accordance with the payment schedule based on the previous year. Quarterly tax statements should be submitted to the corresponding tax authority by the 20th day of the first month of the following quarter, and an annual tax statement should be submitted by 10 February of the following year when the year-end settlement is made.

In practice, the Mongolian tax authorities allow concessions as follows:

Where total tax paid exceeds the tax liability, the excess may be credited against other taxes due or credited against future tax payments. The overpayment also may, theoretically, be refunded; however, the practice of refunding in Mongolia is not clear or consistent.

An economic entity or organisation that has withheld tax from a payment of dividends, royalties, sale of rights, or a payment of income to a taxpayer should transfer the WHT to the tax authorities within seven working days. Tax withheld relating to the sale of immovable property should be transferred to the tax authorities within ten working days.

Audit cycle

The tax audit cycle is not clearly stated in the tax laws. However, the regular cycle in Mongolia is three to five years in practice, and it is very common if the company requests a refund from tax authorities or liquidates its company. Moreover, a tax audit can come anytime if the tax authorities suspect some risk or misuse of the legislation or receive information from a trustworthy source about tax evasion.

Statute of limitations

The statute of limitations in Mongolia is five years for tax arrears, fines, and penalties. However, the dispute settlement timeframe shall not pertain to payment of tax, fine, and penalty debts.

Significant developments

The latest changes to the Corporate Profit Tax (CPT) Law became effective on 27 February 2012 and introduced amendments to a tax incentive for companies performing production activities in underdeveloped regions. The amendments stipulate CPT holiday for the first eight years from establishment of a company in an underdeveloped region. Also, the same incentive is applicable to companies whose business units involved in production are established in underdeveloped regions. In such cases, CPT holiday is proportional to the amount of profit generated by such unit over the total profit. However, amendments specify that taxpayers operating in the sector of primary production of agricultural products, transport, shipbuilding, fishery, and steel production cannot use this incentive.

Also, amendments to the CPT Law introduce official tax residency for the purpose of application of double tax treaties (DTTs).

Taxes on corporate income

Entities operating in Montenegro are subject to a 9% CPT.

Resident taxpayers are taxed on their worldwide profit. Non-resident taxpayers are taxed on their Montenegrin-sourced income or income attributed to their Montenegrin permanent establishment (PE). Non-residents are also subject to withholding tax (WHT) on income sourced in Montenegro. *See the Withholding taxes section for more information.*

Local income taxes

No local (i.e. municipality) corporate income taxes exist in Montenegro.

Corporate residence

A legal entity is considered to be a tax resident if it is incorporated in Montenegro. In addition, a foreign corporation may also be deemed a Montenegrin tax resident if the corporation has a place of effective management in Montenegro. No explicit rules exist for determination of effective management. In practice, it usually is the place where key managerial decisions are made or where the board of directors sits.

Permanent establishment (PE)

Montenegrin tax legislation contains very basic PE rules following, in main features, the guidelines set out in the Commentary to the Organisation for Economic Co-operation and Development (OECD) Model Tax Treaty. PE is defined as a fixed place of business through which a non-resident carries out business in Montenegro. PE is deemed to

Montenegro

exist in case of a non-resident having one of the following in Montenegro: place of management, branch office, office, factory, workshop, mine, gas or oil site, stone pit, or any other place of natural resources exploitation in Montenegro. A construction site constitutes a PE only if construction activities last longer than six months.

PE is not deemed to exist in case of a non-resident having storage of inventory in Montenegro only for the purpose of delivery of goods or having operations in Montenegro that are of a preparatory or auxiliary nature.

Other taxes

Value-added tax (VAT)

The main principles of the Montenegrin VAT are in line with the European Union (EU) Sixth Directive guidelines. Taxable supplies are subject to a general 17% VAT rate; however, certain supplies are taxed at a reduced 7% rate (e.g. bread, milk, books, medicines, computers) and 0% rate (e.g. export of goods, supply of gasoline for vessels in international traffic).

In principle, the VAT base is comprised of consideration (in cash, goods, or services) received for supplies, including taxes except VAT (e.g. customs, excise duty) and direct costs (e.g. commissions, cost of packing, transport). If the consideration is not paid in cash, or if an exchange of goods for services takes place, the tax base will be the market value of the goods or services received at the time of supply.

Registration for VAT in Montenegro may be either voluntary or mandatory. Voluntary VAT registration is possible for small taxpayers who have not realised turnover exceeding 18,000 euros (EUR) in the last 12-month period. Once registered, a company may not apply for deregistration for at least three years. VAT registration is mandatory for an entity that realises turnover exceeding the EUR 18,000 threshold in any 12-month period.

VAT is calculated and paid on a calendar-month basis (i.e. a VAT return must be submitted and VAT liability cleared monthly). VAT calculated on imports is paid along with custom duties.

Customs duty

Exports

There are no export duties in Montenegro, nor is it forbidden to export any goods. Exceptionally, the Montenegrin government can impose quantity limitation of exports only in case of critical shortage of certain goods or for the purpose of protection of non-renewable natural resources, under certain conditions.

Imports

Customs duties are paid on goods imported into the customs territory of Montenegro in accordance with the rates and tariffs set forth in the Customs Tariffs which is in line with the harmonised system of tariff codes prescribed by the World Trade Organization (WTO). Customs duties can be levied in two manners, as *ad valorem* or specific duty per unit of goods.

For agricultural - alimentary products, a combined duty has been determined, that is, both *ad valorem* and specific duty are charged simultaneously.

Ad valorem duties are prescribed within the scope from 0% to 30%. Specific duties range from EUR 0.04 per 1 kg to EUR 1 per 1kg.

Customs rates stipulated by international agreements are only applied to goods of preferential origin from countries covered by such agreements. The most important free trade agreements which Montenegro signed are with the European Union, the European Free Trade Association (EFTA), the Central European Free Trade Agreement (CEFTA) states, and, in the near future, with Ukraine.

Excise duty

Legal entities that are importers or producers of the following products are subject to the excise duty:

- Alcohol and alcohol beverages.
- Tobacco products.
- Mineral oils, their derivatives, and substitutes.
- Coffee and coffee products.
- Mineralised water with sugar or aroma.

Excise duty can be prescribed as a fixed amount and/or as a certain percentage (*ad valorem*).

Property tax

Property tax is payable by legal entities who own or have user rights over real estate located in Montenegro. The annual tax is levied at proportional rates, ranging from 0.1% to 1% on the market value of assets as of 1 January of the current year. In case of acquisition of new property, the taxpayer is obligated to submit a tax return to the tax authorities within 30 days from the acquisition date (i.e. registration return for property tax) and to declare annual property tax by the submission of annual returns. Tax is payable in two instalments, based on decisions issued by the tax authorities.

Property transfer tax

Transfer tax of 3% is payable on the acquisition of ownership rights over immovable property.

The taxable base is the market value of the immovable property at the time of the acquisition. A taxpayer (i.e. the acquirer of immovable property) is obliged to submit a tax return within 15 days from the contract date. The liability is payable within 15 days from the receipt of the tax administration decision.

Stamp taxes

No stamp taxes are in place in Montenegro.

Payroll tax

Employment income includes all receipts paid or provided to an individual based on employment (salaries, pensions, benefits in kind, insurance premiums, benefits, and awards above the non-taxable thresholds). Income generated through other types of personal engagements similar to employment (e.g. temporary jobs) is also considered employment income.

While employees are the taxpayers, the employer is responsible for calculating and withholding personal income tax on behalf of its employees.

Employment income is subject to WHT at a flat rate of 9%.

Montenegro

Social security contributions

Social security contributions for pension and disability insurance, health insurance, and unemployment insurance are calculated and withheld by an employer from the salary paid to an employee. Unlike the other two types of social security contributions, pension and disability insurance contributions are subject to a specific annual cap (EUR 50,000 for 2012).

Social security contributions are payable by the employer and employee at different rates. The amount borne by the employer is treated as an operating cost while the portion payable by the employee is taken from the gross salary.

The rates paid by the employer are as follows:

- Pension and disability insurance 5.5%.
- Health insurance 3.8%.
- Unemployment insurance 0.5%.

The rates paid by the employee are as follows:

- Pension and disability insurance 15%.
- Health insurance 8.5%.
- Unemployment insurance 0.5%.

Environmental charges

Legal entities are subject to environmental charges for the following:

- Use of firing or electrical feed equipment with power greater than 1MW.
- Import of substances harmful to the atmosphere.
- Production or deposit of dangerous waste.
- Tax for use of road vehicles (Vignettes).

Branch income

Non-residents carrying out business in Montenegro through a PE are taxed on their Montenegrin-source income at a rate of 9%. A branch is considered to be a PE.

Income determination

Taxable profit is calculated by adjusting the accounting profit (determined in accordance with International Financial Reporting Standards [IFRS] and accounting legislation) in accordance with the provisions of the CPT Law.

Inventory valuation

Inventory is valued by applying the average-weighted-cost method or the first in first out (FIFO) method. If another method is used for book purposes, an adjustment for tax purposes should be made.

Capital gains

Capital gains realised by the sale or transfer of real estate or other property rights, as well as shares and other securities, are subject to the 9% CPT rate.

Capital gains may be offset against capital losses occurring in the same period. A capital loss may be carried forward for five years.

Dividend income

Dividend income of the recipient is exempt from CPT in Montenegro if the distributor is a Montenegrin corporate taxpayer.

Interest income

Interest income is included in taxable profit and subject to 9% CPT.

Foreign income

A Montenegrin resident receiving foreign income is granted a tax credit in the amount of the tax paid abroad but limited to the amount that would be calculated using Montenegrin rates.

Deductions

The following expenditures are recognised for CPT purposes, up to the prescribed threshold:

- Depreciation computed in accordance with tax legislation.
- Expenses for health care, scientific, educational, humanitarian, religious, environmental protection, and sports-related purposes, up to 3.5% of total revenue.
- Entertaining expenses, up to 1% of total revenue.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue unless the amount of the fees has been determined by law.
- Provisions for redundancy payments and jubilee awards recognised as expenditures, up to the amount prescribed by the labour law.
- Provisions made by banks and insurance companies, in an amount not exceeding the amount prescribed by the legislation that regulates operation of these entities.
- Provisions for special risks of brokers and dealers, up to amount prescribed by the securities law.
- Provisions for renewable natural resources, warranties for the sale of goods and services (guarantee period), and the expected loss from court process (delicate agreements) if accounted for in accordance with the accounting legislation.
- Paid interest to non-residents, up to the amount of commercial interest.

Depreciation

Depreciable assets are tangible and intangible assets with a useful life of at least one year and an individual acquisition value of at least EUR 300.

Intangible and fixed assets are divided into five depreciation groups, with depreciation rates prescribed for each group (I - 5%, II - 15%, III - 20%, IV - 25%, and V - 30%). A straight-line depreciation method is prescribed for assets classified in the first group (real estate), while a declining-balance method is applicable for assets classified in the other groups.

Goodwill

Goodwill is determined according to IFRS and is subject to impairment. There are no other special provisions on goodwill.

Montenegro

Start-up expenses

There are no special provisions regarding treatment of start-up expenses. Therefore, they will be deductible if they are incurred for business purpose and properly documented under the general expense deductibility rule.

Interest expenses

Interest expenses are generally deductible if they are business related and properly documented. Also, interest and related cost of loans paid out to a creditor with the status of a related party are recognised as expenses only in the amount that does not exceed market interest rates between unrelated parties. The exceeding amount is not recognised as an expense, but it is included in the taxable profit and subject to 9% CPT.

Interest paid out to non-resident legal entities (unless it is revenue of a PE of a non-resident legal entity) is subject to WHT levied at 9%.

Bad debt

Write-offs and provisions for doubtful debts are considered deductible, provided that:

- written-off/provided receivables were previously included in taxpayer's revenues
- doubtful debts were written-off as uncollectible, and
- proof of unsuccessful collection of these debts exists.

Charitable contributions

Charitable contributions for healthcare, scientific, educational, humanitarian, religious, environmental protection, and sports-related purposes are recognised for CPT purposes, up to a threshold of 3.5% of total revenue.

Taxes

The basic deductibility rule is that business expenses incurred for business purposes are CPT deductible. Following that rule, CPT Law provides for full deductibility of taxes. However, penalty interest for late payment of taxes is not CPT deductible.

Net operating losses

The taxpayer is entitled to carry forward losses incurred in an accounting period over the following five years. Carryback of losses is not allowed.

Payments to foreign affiliates

Supplies of goods or services from a foreign group entity not established in Montenegro to a Montenegrin entity must be valued at arm's length. Excess expenses recorded over market value are treated as non-deductible expenses.

With respect to payment of charges of a PE, CPT Law provides that administrative costs charged by the non-resident head office are non-deductible for CPT at the level of PE.

Group taxation

Tax consolidation is permitted for a group of companies in which all of the members are Montenegrin residents and the parent company directly or indirectly controls at least 75% of the shares in the other companies. Each company files its own tax return, and the parent company files a consolidated tax return for the entire group.

Each company is taxed based on its contribution to the consolidated taxable profit (or loss) of the group.

Tax consolidation is binding for at least five years.

Transfer pricing

The difference between the transfer price and arm's-length price is included in the taxable profit and is taxed accordingly. Parties considered to be related are the parties between whom special relations exist, which could directly impact the conditions or economical results of the transaction between them.

Methods permitted in determining arm's-length price are: comparable uncontrolled price (CUP) method as the primary method, resale minus method, or cost plus method.

There are no other rules or guidelines introduced apart from the above rules in respect to transfer pricing.

Thin capitalisation

There are no thin capitalisation provisions in place in Montenegro.

Tax credits and incentives

The CPT Law provides only three tax incentives related to businesses: one for newly established businesses in non-developed municipalities, one for non-governmental organisations, and a foreign tax credit. The latest CPT amendments introduced the tax holiday for newly established business in underdeveloped municipalities.

Tax exemption for newly established business in underdeveloped municipalities

Newly established production companies located in underdeveloped municipalities are entitled to an eight year tax exemption.

The incentive is applicable to companies whose business units are established in underdeveloped regions. In that case, tax holiday is proportional to the amount of profit generated by such unit over the total profit for the period of eight years from establishment of the unit.

The tax incentive is not applicable to a taxpayers operating in the sector of primary production of agricultural products, transport, shipbuilding, fishery, and steel production.

Tax exemption for non-governmental organisations

Non-governmental organisations (NGOs) registered for business activity are permitted to decrease the corporate tax base by EUR 4,000 with the condition that this money is used for realisation of the main goals of an NGO.

Foreign tax credit

Resident taxpayers are entitled to a tax credit up to the amount of corporate tax paid in another country on income realised in that country. This tax credit is equal to the tax paid in another country but may not exceed the amount of the tax that would have been paid in Montenegro.

Montenegro

Withholding taxes

Montenegrin CPT Law imposes WHT on income realised from a Montenegrin source and distributed to a non-resident. The scope of the WHT applies to dividends and profit distribution, capital gains, interest, royalties, intellectual property rights fees, and rental income, as well as fees for consulting, market research, and audit services.

Distributions of dividends and share of profits are also subject to WHT if the recipient is a Montenegrin resident (either individual or legal entity).

The general WHT rate is 9%.

Application of a DTT may reduce or eliminate Montenegrin WHT. To qualify for the beneficial rates prescribed by the treaty, a non-resident must prove tax residency of a relevant treaty country and beneficial ownership over the income. In order to qualify for a preferential tax rate according to a DTT, a non-resident will need to provide the tax residency certificate filled out and stamped by the relevant authority of its country of residence.

Although Serbia is regarded as the legal successor of the Serbia and Montenegro State Union which ceased to exist in June 2006, the Republic of Montenegro, upon its Decision on Independence (dated 3 June 2006), continues to honour international treaties which were applicable in the State Union, including those executed by State Union's legal predecessors (Federal Republic of Yugoslavia and Socialist Federal Republic of Yugoslavia, i.e. former Yugoslavia). However, a quite low statutory WHT rate of 9%, which was enacted after the most of the treaties had been introduced, is usually more beneficial than treaty rates.

The list of the treaties is provided below:

Recipient	WHT (%)			Applicable from
	Dividends (1)	Interest	Royalties	
Non-treaty	9	9	9	
Albania	5/15	10	10	2006
Belgium	10/15	15	10	1982

United Kingdom	5/15	10	10	1983
Zimbabwe (3)	5/15	10	10	N/A

Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new double taxation treaty was signed with Egypt in 2005, but it is not applicable yet. Meanwhile, the old treaty is still applicable.
3. Instruments of ratification have not been exchanged between the two countries.
4. The contract was signed, ratified, and should become applicable after the exchange of ratification instruments by the signatories.
5. A tax rate of 5% will be applicable to literary, scientific, and work of art, films and works created like films, or other sources of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedure.
6. Only in cases when dividends are to be paid to Montenegrin residents. If paid to Malaysian residents, they are taxable at 20% in Montenegro.
7. A 5% rate is applicable for intellectual property and 10% rate for industrial property.
8. A 0% rate is applicable in cases when the income recipient is the government or government owned banks.

Montenegro

Tax administration

Taxable period

The tax year in Montenegro is the calendar year.

Tax returns

Tax returns and supplementary documents (e.g. tax depreciation form) must be filed with the tax authorities by the end of March of the following year.

Payment of tax

CPT is paid by the end of March of the following year for the previous year. Alternatively, CPT may be paid in six annual instalments at the taxpayer's request.

Audit cycle

There are no particular provisions regarding the audit cycle in Montenegro.

Statute of limitations

The right to assess taxes expires within five years after the end of the year in which the tax should have been assessed.

The right to collect taxes expires within three years after the end of the year in which tax has been determined.

Topic on focus for tax authorities

According to our best knowledge, the focus of the tax authorities is proper documenting of expenses and VAT.

Apart from this, we are expecting that in the near future the focus of the tax authorities will be transfer pricing, following trends of the countries in the region.

Significant developments

Sports companies

The provisions of Finance Law 2012 have set a reduced corporate income tax (CIT) rate of 17.5% for sports companies regularly established in accordance with the provisions of law n° 30-09 during the first five years following their incorporation.

Statement of tax losses or absence of tax benefits

Finance Law 2012 provides for a new provision that requires companies not generating positive income and subject to CIT or individual income tax to submit a statement explaining the origin of the tax loss or the absence of tax benefits.

This provision applies to taxable income returns submitted on or after 1 January 2013.

Social cohesion contribution

Finance Law 2012 introduced, solely for the year 2012, a contribution to support social cohesion. Such contributions are levied on companies liable for CIT. This contribution is not tax deductible.

The contribution for the year 2012 is calculated on the basis of the net profit for fiscal year 2012 according to the following rates:

Net profit (MAD*)	Contribution rate (%)
Between 50 million and 100 million	1.5
More than 100 million	2.5

* Moroccan dirhams

Exemption for companies established in export free zones

The Moroccan tax code states that companies that operate in the export free zones benefit:

- from the total exemption during the first five consecutive years starting from the first operation of exportation, and
- from a reduced tax rate of 17.5% for the following 20 years.

Finance Law 2012 provides that the exemption and the application of the reduced rate apply also to transactions between the companies established either in the same free zone or in different free zones.

Morocco

Taxes on corporate income

In general, the Moroccan tax code considers that all revenues and capital gains generated in Morocco are subject to Moroccan taxation.

Companies are taxed on the difference between their trading income and expenditure. Business expenses incurred in the operation of the business are generally deductible unless specifically excluded.

The standard CIT rate is 30%. A higher rate of 37% applies to leasing companies and credit institutions.

A reduced rate of 15% applies to small companies realising a turnover equal to or less than MAD 3 million.

Non-resident companies can, under certain conditions, opt for an alternative tax at the rate of 8% of the amount of their contract, whatever the taxable income is.

Minimum contribution

CIT cannot be lower than a minimum contribution of 0.5% (or 0.25% for specific products) levied on the turnover and other specific revenues. The minimum contribution is not due during the first 36 months following the beginning of activities.

The minimum contribution paid in case of loss or the portion of minimum contribution that exceeds the amount of CIT may be offset against the portion of CIT that exceeds the minimum contribution until the third year.

Local income taxes

There are no local taxes levied on income in Morocco.

Corporate residence

Companies, whether or not established in Morocco, will be subject to CIT on all profits or income relating to property which they own, activities which they carry on, and profit-making transactions which they carry out in Morocco, even when these are of an occasional nature.

Permanent establishment (PE)

The notion of PE is not explicitly defined under Moroccan tax law.

However, the Moroccan tax authorities apply this concept for non-resident companies according to some determined criteria that are inspired from the various tax treaties that Morocco has signed with other countries.

Indeed, the question of whether an entity will be deemed to have a PE in Morocco is a question of fact, in particular, subject to having, in Morocco, any fixed place of business through which a foreign entity conducts industrial or commercial activity for an indefinite or substantial period of time.

The term fixed place of business includes, for instance, a place of management or operations, a branch, an agency, a premises used as a sales outlet, a construction of assembly project, or a purchasing office. Also, in some specific cases, a non-

resident company may be deemed as having a PE if it operates in Morocco through a dependant agent.

Other taxes

Valued-added tax (VAT)

VAT is levied under the Moroccan Tax Code and is due on all industrial, commercial, and handicraft transactions taking place in Morocco as well as on importation operations.

The standard rate of VAT is 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated operations.

The sale of goods is considered as taking place in Morocco, and thus subject to VAT, if the goods sold are delivered in Morocco.

The sale of services is considered as taking place in Morocco, and thus subject to VAT, if the services sold are consumed or used in Morocco.

Two types of exemptions from VAT are provided. The first is an exemption with credit, equivalent to the zero tax concept. The second is an exemption without credit.

The zero-rated supplies include (but are not limited to) supplies of the following goods or services:

- Exported goods and services.
- Certain agricultural equipments supplied under prescribed circumstances.
- Investment goods recorded as fixed assets in the company accounting and acquired during the first 24 months following the beginning of activity.
- Offshore banks for certain specific operations, such as interest and commissions.
- Goods and services rendered to companies established in export free zones.
- Activities related to hydrocarbon exploration, etc.

Exempt supplies without deduction right include (but are not limited to) supplies of the following goods or services:

- Milk, sugar, bread, cereals.
- Fiscal stamps.
- Newspapers, books, documentaries.
- Interest on government loans.

Customs duties

Importation of goods in Morocco gives rise to payment of importation duties, the VAT on importation, and the special tax on importation called *Taxe Parafiscale à l'Importation* (TPI).

Customs duties are computed on the basis of the *ad valorem* value of the goods at the time of their entrance into Morocco.

Customs duties can be reduced if the imported products are covered by free trade agreements signed by Morocco or other specific regulatory dispositions.

Under Moroccan tax law, the importation operations are subject to VAT at the rate of 20%. Lower rates of 7%, 10% and 14% apply to specifically designated importations.

Morocco

The Moroccan tax law also offers some economical customs regimes that provide VAT exemptions with credit (equivalent to zero rate).

The TPI rate is 0.25% levied on the value of the imported goods.

Excise taxes

Excise taxes apply to specific products imported or produced in Morocco, such as tobacco, alcohol, and lubricants.

Registration duties

Registration duties are due on all written or verbal conventions, such as property transfer of real estate, shares, or rights; company set up; equity increase; and goodwill transfer.

The rates of registration duties range from 1% to 6%. A flat rate of MAD 200 is also applicable to specific operations and conventions.

For information purpose, the company set up and the capital increase are subject to registration duties at the rate of 1%.

The transfer of non-listed shares is subject to registration duties at the rate of 3%. However, a 6% rate is applicable to the transfer of shares of real estate companies.

The applicable rate for the transfer of goodwill is 6%.

Professional tax

A professional tax is levied on individuals and enterprises that carry out a professional activity in Morocco.

The tax consists of a tax on the rental value of business premises (rented or owned) and fixed assets. The tax rates range from 10% to 30% with exemption for the five first years of activity.

The rental value is exempted for the portion of cost exceeding MAD 50 million.

Branch income

Non-resident entities will be subject to income tax at normal corporate rates derived from all profits or income relating to property which they own, activities which they carry on, and profit-making transactions which they carry out in Morocco.

The taxation is levied to the portion of income allocable to the branch located in Morocco.

In addition, a 10% 'branch tax' applies to a non-resident's after-tax profits. The rate at which the branch tax is levied may be reduced to the withholding tax (WHT) rate on dividends prescribed in the relevant tax treaty.

For resident entities having branches in Morocco, the income is taxable in the hands of the head office at normal corporate rates.

Income determination

Inventory valuation

Cost of inventory must be determined in accordance with the first in first out (FIFO) or the average cost method. The last in first out (LIFO) method is prohibited.

Capital gains

Capital gains are taxable as a part of ordinary business income.

Dividend income

Dividends received by corporate shareholders from Moroccan-resident entities subject to CIT must be included in business profits of the recipient company, but the dividends are 100% deductible in the computation of taxable income.

Participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

Interest income

Interest income is subject to a WHT at the rate of 20%. The WHT is deductible from CIT.

Rents/royalties income

Rents and royalties income are taxable as a part of ordinary business income.

Foreign income

The income derived from activities carried out in a foreign country is not subject to taxation in Morocco unless the taxation is granted by treaty dispositions.

Note that the participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

Deductions

Depreciation

Fixed assets are normally depreciated according to their economical life duration according to the provision of the accounting regulation.

Depreciation is computed according to two methods: the straight-line method and the declining-balance method.

The tax regulation (through administrative guidelines) has provided indicative depreciation rates applicable when the company activity or the asset to be depreciated is specific or particular.

Indicative depreciation rates are as follows:

Asset	Depreciation rate (%)
Business premises and buildings	4 to 5
Lights constructions (metal frame constructions)	10
Production equipments, tools, and constructions fitting	10 to 15
Huge computer facilities	10 to 20
Computers and related items (printers) and programs, as well as vehicles (cars, trucks, vans, lifters) and vehicles	20 to 25

Morocco

Asset	Depreciation rate (%)
Office furniture and software	20
Non-significant tools	30

Goodwill

Under Moroccan tax law, goodwill cannot be subject to amortisation. However, a decrease of the value of goodwill is allowed to be recorded through provisions.

Start-up expenses

The development as well as incorporation expenses shall be capitalised and be tax depreciated over a period of five years.

The carryforward of any loss due to the above expenses is limited to a period of four years.

Interest expenses

Interest on loans granted by direct shareholders is deductible if the capital is fully paid in. Also, (i) the deductible interest is limited to the portion of the loan that does not exceed the share capital equity and (ii) the interest rate exceeds a rate provided, annually, by the ministry of finance (3.44% in 2011).

Bad debt

Bad debts which are definitively non-recoverable (after all recovery procedures have been undertaken) are treated, from a tax point of view, as deductible losses.

Charitable contributions

Charitable contributions made by companies are deductible only if they are granted to foundations and societies explicitly provided by law.

The contributions made to the community enterprise are deductible up to 0.2% of the company turnover.

Fines and penalties

Fines and penalties are not tax deductible expenses if they relate to infringements to legal and regulatory dispositions.

Tax penalties provided under Moroccan law include penalties for late return submission as well as for late payment.

Taxes

Taxes constitute deductible expenses, except CIT itself and recoverable taxes.

Net operating losses

Tax losses may be carried forward for a period of four years from the end of the loss-making accounting period.

However, the portion of a loss that relates to depreciation may be carried forward indefinitely.

Carryback mechanism is not allowed under Moroccan law.

Payments to foreign affiliates

Payments to foreign affiliates are allowed under Moroccan law. However, such payments should respect the arm's-length principle and foreign exchange regulations.

Group taxation

Under Moroccan law, consolidation or group taxation is not allowed.

Transfer pricing

Morocco has a general provision within its tax legislation requiring transactions between related parties to be at arm's length.

Where a Moroccan company is directly or indirectly connected with enterprises situated inside or outside Morocco, profits transferred indirectly to such enterprises, by means of increases or decreases in buying or selling prices or by any other means, must be included among taxable profits on the tax return.

In order to determine the amount to be included among taxable profits, Moroccan tax authorities will make comparisons with other similar companies carrying on normal business activities or by mean of direct assessment based on information available to the tax authorities.

Thin capitalisation

No specific thin capitalisation rules exist in Morocco.

However, the tax law restricts the interest rate on debts issued by shareholders and the basis of calculating deductible interests.

Interest incurred is tax deductible if the shareholder's capital is fully paid. Additionally, the sum of the shareholder loans generating deductible interests should not exceed the equity capital subscribed, and the applicable interest rate should not exceed the official rate calculated annually on the basis of six months treasury bills.

Tax credits and incentives

The Moroccan tax law provides several tax incentives for specific sectors of activities.

Export companies

Export companies are exempt from CIT on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced rate of 17.5% in subsequent years.

Hotel companies

Hotel companies are fully exempt from tax on profits relating to foreign currency turnover for the first five years following their first accommodation operation in foreign currency. They also benefit from a reduced rate of 17.5% on such profits for subsequent years.

Mining companies

Exporting mining companies, including those that sell products to export companies, benefit from a reduced CIT rate of 17.5%.

Morocco

Agricultural enterprises

Agricultural enterprises are exempt from all taxes until the year 2013.

Capital risk companies

Capital risk companies are exempt from CIT on profits derived within the scope of their activities (these are profits related to purchases of companies' shares that support such companies' development and the sales of such shares thereafter).

Hydrocarbon companies

Companies holding hydrocarbon exploration and exploitation permits are exempt from CIT for ten years from the beginning of hydrocarbon regular production.

Banks and holding companies located in offshore zones

Banks and holding companies located in offshore zones benefit from a reduction in CIT for the first 15 years of operation.

Banks may opt for a minimum CIT of USD 25,000 or pay the tax at a reduced rate of 10%.

Holding companies pay a flat tax of USD 500 during the first 15 years.

Casablanca Finance City (CFC)

A law was enacted in 2010 for the setting up of a finance area in Casablanca, called, Casablanca Finance City.

The CFC statute may be granted to specific financial institutions as well as non-financial institutions that offer such services as auditing, fiscal, legal, financial, actuarial, and human resources management advisory.

The above statute may also be granted to regional and international headquarters.

Entities established in Casablanca Finance City are exempt, for their export turnover, from CIT during the first five years following the date they obtain CFC statute.

These companies benefit, for the export turnover, from a reduced rate of 8.75% in subsequent years.

Free trade zones (FTZs)

The activities which must be necessarily performed by the companies established in the export free zones are mainly the followings (the activities may vary for each FTZ):

- Food processing industries.
- Textile and leather industries.
- Metallurgic, mechanic, electric, and electronic industries.
- Chemical and special chemical industries.
- Services connected with the aforementioned activities.

Entities established in FTZs are exempt, for their export turnover, from CIT during the first five years. These companies benefit, for the export turnover, from a reduced rate of 8.75% for the following 20 years.

Moreover, for entities established in FTZs, the dividends paid to non-residents relating to activities performed in the export free zone are totally exempted from the WHT on dividends.

Listed shares

Non-resident entities are exempted from capital gains derived from the sale of stocks listed on the Casablanca stock exchange, excluding the shares of real estate entities.

Withholding taxes**WHT on interests**

The standard WHT on interest paid to non-resident entities is set at 10% as provided by the Moroccan law (unless reduced by treaty).

However, the Moroccan law provides that interests on loans granted in foreign currency with a maturity exceeding ten years are exempted from WHT.

WHT on dividends

The standard WHT rate on dividends is set at 10% according to the Moroccan law (unless reduced by treaty).

WHT does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax, subject to the delivery of a property attestation.

A branch tax of 10% applies to the net income transferred by the Moroccan branch to the foreign entities (maybe reduced by the tax treaty).

WHT on services paid to non-resident entities

According to the Moroccan tax code, all payments of all kind of services rendered by non-resident entities are subject to WHT at the rate of 10%.

However, it shall be noted that treaties dispositions limit the scope of application of WHT only to remunerations that constitute royalties. Such dispositions overrule the domestic tax law provided by the Moroccan law.

Treaty WHT rates

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

Recipient	WHT (%)			
	Dividends		Interest (1)	Royalties
	Individuals and non-qualified companies	Qualifying companies		
Arab Maghreb Union (2)	(3)	(3)	(3)	(3)

United States*	10	10	10	10

Notes

* In case the rate provided by the double tax treaty (DTT) is higher than the one provided by the Moroccan Tax Code, the rate provided by the Moroccan Tax Code (10%) should apply.

1. Some treaties provide for an exemption for certain types of interest (e.g. interest paid to public bodies and institutions). Such exemptions are not dealt with in this treaty chart.
2. Arab Maghreb Union, the member states of which are Algeria, Libya, Mauritania, Morocco, and Tunisia.
3. There is no limitation on WHT under the treaty.
4. The lower rate (i.e. 5%) usually applies to copyright royalties and other similar payments in respect of the production or reproduction of any literary, artistic, or dramatic work (excluding cinematographic and television films), while the 10% rate applies to other types of royalties.

Tax administration

Taxable period

The taxable period corresponds to 12 months. The first taxable period can be less than one year but should never exceed it.

Tax returns

CIT returns must be filed within three months following the closing of the fiscal year.

Payment of tax

Payment of tax is made during the fiscal year by way of four instalments of 25% each based on the CIT of the previous year.

In case the CIT of the year exceeds the sum of the four instalments, the company should proceed to tax regularisation along with the submitting of the taxable income return after three months following the closing of the fiscal year (i.e. 31 March for fiscal year corresponding to the calendar year).

Otherwise, the exceeding tax amount can be imputed on the four following instalments. Any remaining excess is reimbursed by the tax authorities.

Statute of limitations

The statute of limitations runs until the end of the following fourth year. This period may be extended in case of deficits or credits.

Topics of focus of tax authorities

The topics of focus of tax authorities depend on each specific situation (sector of activity, company size, etc.). However, it is very common to find the following points:

- Transfer pricing.
- Tax treatment of provisions.
- Taxation of indemnities and benefits granted to employees.

M

Other issues**Exchange controls**

Foreign investors are allowed, following the accomplishment of some formalities, to freely transfer abroad the whole proceeds of their investments in Morocco (i.e. dividends, shares sale price, and liquidation income at the condition that the initial investment is realised in one of the foreign currencies listed by the Moroccan Central Bank).

However, some specific transfers of funds into and out of Morocco are subject to prior authorisations from the exchange control office.

Choice of business entity

The legal vehicles used by foreign companies for the purpose of setting up a business in Morocco are the branch and the subsidiary.

Under subsidiary form, the foreign entities generally opt for the corporation (SA) or the limited liability company (SARL).

The SARL is most adequate for companies with low investment capital while the SA is most appropriate for companies that are investing an important amount of capital. In general, the rules relating to the organisation and functioning of an SARL are more flexible than those required for an SA.

Significant developments

There have been no significant corporate tax developments in Mozambique during the past year.

Taxes on corporate income

Corporate income tax (CIT) is payable on general corporate income at a tax rate of 32%. For tax years ending prior to 1 January 2016, income arising from agricultural or cattle breeding activities is subject to a reduced rate of 10%.

CIT is levied on taxable profits, defined as accounting profits adjusted to comply with tax law rules.

Corporate entities and other entities with headquarters or permanent establishment (PE) in Mozambique are subject to CIT based on their worldwide income. On the other hand, corporate entities and other entities without headquarters or PE in Mozambique (i.e. non-resident entities) are only subject to CIT on the income earned in Mozambique.

Local income taxes

See Municipality taxes in the Other taxes section.

Corporate residence

Corporate residence is determined on the basis of a company's place of incorporation or effective management. Thus, all companies with headquarters in Mozambique, as well as any PE of non-resident entities, are considered tax residents and are liable for CIT on their worldwide income.

Permanent establishment (PE)

Under the relevant internal legislation, a non-resident entity is deemed to have a PE in Mozambique whenever any of the following circumstances exists:

- It has premises or other fixed places of business through which industrial, trading, agricultural, rendering of services, or similar activities are totally or partially carried out.
- It has an office, branch, plant, workshop, mines, quarries, oil or natural gas wells, or other places of extraction of natural resources.

- It has a construction, installation, or assembly site when the duration of works exceed six months, including the activities of coordination, inspection, and supervision connected to these sites.
- It has persons or hired personnel, acting and dealing in Mozambique, who are not independent agents in the terms of the law but rather acting on behalf of the company with legal capacity to conclude contracts on its behalf and its name within the scope of the company's activities.

Other taxes

Value-added tax (VAT)

VAT is chargeable on the sale of most goods and services as well as on imports. The standard rate is 17%. Usually, VAT is recoverable by corporate entities, except for those engaged in special business activities (e.g. financial and insurance operations, leasing [exemption with restrictions], sale of immovable property, some exempt activities).

Customs duties

Custom duties are charged on importation of goods into Mozambique, and the applicable rates vary from 0% to 20%. Mozambique is part of the Southern African Development Community (SADC) protocol on commercial trade that exempts from customs duties some goods produced within the SADC region. However, in order to benefit from the exemption, the importer should provide proof of the origin of the said goods through the presentation of the certificate of origin of goods.

Mozambique also has signed agreements with the European Union (EU) based on which preferential rates are applicable on certain goods imported from such region.

Excise taxes

Excise duties are levied on certain goods manufactured locally or imported, which are identified in a specific table that is an integrant part of the excise duty act that also indicates the applicable rates. Amongst others, the said table includes goods such as tobacco, beer and other alcoholic beverages, vehicles, cosmetics, cloths, airplanes, boats, etc.

Recently, the excise duty act was changed through Laws 2/2012 and 5/2012, both dated 23 January, and Decree 2/2012, dated 24 February, and some rates were increased as follows:

- Alcoholic beverages: Although the general rate is 40%, it was increased to 55% for wine of fresh grape.
- Tobacco: The general rate was increased by 10%, and the new rate is 75%.
- Air vehicle without engine: The applicable rate was reduced by 30%, and the new rate is 35%.
- Boats and other recreational or sportive crafts: The applicable rate was reduced by 5%, and the new rate is 35%.
- Cloths and respective accessories: The applicable rate was reduced by 10%, and the new rate is 30%.

Property transfer taxes (SISA)

In Mozambique, a property transfer tax is charged on transfers of real estate, excluding the land, which is owned by the state. The rate of tax is 2% of the selling price of the building.

Mozambique

Stamp taxes and service charges

Various documents require the payment of stamp duties. Service charges are payable for the performance of certain services for official purposes, such as those rendered by public notaries. These duties have been recently amended and vary generally from 0.03% to 50% on the amount of the transaction supported by the document to be stamped. In some other cases, the stamp tax comprises fixed amounts, ranging from 0.50 Mozambican meticals (MZN) to MZN 5,000.

Municipality taxes

Municipality taxes that should be considered for corporate purposes include the following:

Municipality tax on real estate

The municipality tax on real estate is levied annually on the value of immovable assets situated within the municipality and owned or possessed by corporate entities. Effective tax rates range from 0.2% to 1% of the building value, depending on the municipality.

Municipality tax on economic activities

The municipality tax on economic activities is levied on commercial or industrial activities carried out within a municipal territory. The tax depends on the activity being carried out, adjusted by coefficients, which are based on the zone and total area of the premises in square metres. In Maputo, this tax is calculated based on the following formula:

Maputo tax on economic activities = Basis rate x Index of category x Index of location x Index of area occupied

Where the basis rate is the applicable maximum amount of the national minimum salary (currently MZN 5,320, approximately 200 United States dollars [USD]).

Where the index of the location varies from 1.3 to 1.5 depending on the location of the premises within the municipality.

Where the index of the area occupied varies from 1.2 to 1.5 depending on the nature of the activities and the space occupied by the premises.

Municipal vehicles tax

This tax replaces the vehicles tax within the municipality and is levied on the use of specific vehicles (e.g. light and heavy vehicles less than 25 years old, motorcycles less than 15 years old, aeroplanes, and boats for private use). This tax is due by the owners who are residents of a municipality, regardless of the place of registration of the vehicle owned.

The rate varies, depending on specific criteria such as type of fuel, engine capacity, period of registration, and weight.

This tax must be paid between January and March or within 30 days after the acquisition of the vehicle.

Branch income

From a tax perspective, branches are liable for Mozambican CIT as a separate entity; therefore, the regime is the same that would apply to a Mozambican resident

company. However, on the grounds that branches do not distribute dividends, the 20% withholding tax (WHT) does not apply to the after-tax profits arising in Mozambique.

Income determination

Inventory valuation

Special rules regarding valuation of inventories are still waiting for approval from the Minister of Finance. In the meantime, all inventory valuation methods generally accepted and according to international accounting principles are permitted for tax purposes, provided that the method is:

- used by the taxpayer consistently and
- based on arm's-length prices duly documented and effectively exercised.

Based on the above assumptions, last in first out (LIFO) and first in first out (FIFO) methods are allowed. Write-downs and depreciation of inventories are not allowed. Conformity between book and tax reporting is required.

In principle, large companies began adopting International Financial Reporting Standards (IFRS) in 2010.

Capital gains

Capital gains less any capital losses derived from the sale or disposal of tangible fixed assets, including insurance indemnities received in case of accident, are taxed as part of normal income. If a taxpayer reinvests the sale proceeds within three tax years following the year of sale, the gain may be deferred until the end of the third year. A four-year reinvestment period may be accepted provided a prior application is submitted to the Minister of Finance. However, if the taxpayer does not realise the reinvestment, the CIT that was not assessed during the three-year period will be assessed, along with compensatory interest.

Dividend income

In the case of resident companies, income arising from dividends is excluded from taxable income, provided that the shares that a resident company holds in another resident company represents at least 20% of the total capital and are held for at least two consecutive years (or with an undertaking to hold the shares for this period). The same applies to income arising from risk capital companies and holding companies (*Sociedade Gestora de Participações Sociais* or SGPSS) or from subsidiaries as a result of the application of technical reserves in insurance companies. However, in the case of holdings, the percentage of share capital decreases to 10% and shares should be held for at least one year.

If the shareholding falls outside the parameters indicated above, the tax withheld (20%) constitutes a payment on account. A tax credit corresponding to 62.5% of the CIT is attributable to the gross-up dividend.

Interest income

Interest is subject to 20% WHT. In the case of foreign entities, the WHT is considered as a definitive tax. In the case of resident entities, it is considered as an advance of the final tax.

Mozambique

Foreign income

Mozambican resident companies are taxed on the total income earned on a worldwide basis. Please note that there is no provision on tax deferral in Mozambique in relation to income earned abroad. Double taxation treaties (DTTs) allow tax paid abroad to offset Mozambican CIT. Mozambique has signed DTTs with Botswana, India, Italy, Macau, Mauritius, Portugal, South Africa, the United Arab Emirates, and Vietnam.

Deductions

Depreciation

Depreciation is a deductible cost for CIT purposes, according to the regulations of the Corporate Income Tax Code, subject to restrictive and specific rules.

The main legal principles regarding depreciation are as follows:

- The establishment of the applicable rates falls under the competence of the Ministry of Finance.
- The calculation is carried out on a straight-line basis in accordance with the rates applicable.

The main depreciation rates are:

Assets	Rate (%)
Tangible assets:	
Industrial buildings	4
Office and residential buildings	2
Machinery and installations, air conditioning, and telephone equipment	10
Lifts	8.33
Tools	25
Laboratory equipment	12.5
Telex and interior equipment	10
Furniture and filing systems	10
Typewriters and accounting machines	14.28
Computer hardware	16.66
Warehouse and filing installations:	
Of concrete	5
Of wood	6.66
Of steel	8.33
Trucks	20
Automobiles	25
Intangible assets:	
Pre-operating expenses incurred prior to the commencement of business	33.33
Deferred expenses arising in connection with increases in share capital, changes in form of business enterprises, issuance of debentures, marketing and other studies, and financial expenses incurred for the acquisition or own production of fixed assets prior to completion	33.33
Patents	10
Manufacturing licenses, concessionaire agreements, and similar rights	5 (1)
Trademark or premium of taking over leases of real estate (2)	

Notes

1. Subject to certain conditions set forth by the tax authorities.
2. Depreciation is only allowed in cases of effective reduction of value within the limits regarded as reasonable by the tax authorities.

Accelerated depreciation

New immovable assets, used for the furtherance of the business, may be depreciated by increasing to 50% the normal depreciation rates approved by law. This benefit is also granted to rehabilitated immovable assets, machinery, and equipment used in agro-industrial activities.

Bad debt

In Mozambique, companies are able to create all the provisions necessary and relevant for the normal course of business. However, for tax purposes, only the provisions listed below can be deducted as a cost:

- Bad debts.
- Depreciation of stock.
- Ongoing judicial procedures.
- Credit institutions/Insurance companies.
- Reconstruction of mines.
- Rehabilitation of land.

Any other provisions reflected in the company's accounts will not be accepted as tax deductible costs.

With regards to provisions for bad debts, companies are only allowed to deduct 1.5% per year (and 6% accumulated) of the provisions created for bad debts.

Charitable contributions

Donations can be deducted as cost for tax purposes, provided the beneficiaries thereof are:

- Social and cultural organisations that, acting without lucrative intent, carry out actions in art, education, science, health, preservation and restoration of cultural patrimony, or social activities: Donations can be deducted up to the limit of 5% of the previous year taxable income.
- The Mozambican state: Donations can be fully deducted.

Fines and penalties

Fines and other penalties paid due to any infringement, which do not have a contractual basis, including interest, are not accepted as tax deductible costs.

Taxes

Taxes paid in relation to the activities of a company are tax-deductible, excluding CIT itself.

Net operating losses

Carryback of losses is not allowed in Mozambique. On the other hand, losses may be carried forward for a period of five consecutive years.

Payments to foreign affiliates

Any payments to non-residents are allowed as deductible expenses provided that the amount does not exceed normal rates and that the taxpayer is able to prove

Mozambique

that a business transaction was carried out with the non-resident company. The tax authorities may redetermine taxable income if, due to a special relationship between the Mozambican and non-resident companies, certain conditions existed that allowed a calculation of profit that differed from the profit that would have been calculated without the existence of such relationship (i.e. the arm's-length principle).

Group taxation

There are no group taxation provisions available in Mozambique. Each member of a group of companies preparing consolidated accounts for accounting purposes must file separate tax returns in order to be taxed on its profits on a stand-alone basis.

Transfer pricing

The tax authorities may proceed with the necessary corrections for assessing the profits for tax purposes whenever:

- by virtue of special relations between the taxpayer and other entity, different conditions from those that should be normally agreed upon between independent entities have been established, and
- in consequence of those conditions, the profits for accounts purposes are different from those that would have resulted had such special relations not existed.

The corrections above shall be equally applicable whenever the profits for accounts purposes regarding non-resident entities are different from those that should have resulted if the non-resident entity were a separate entity carrying out similar activities in similar conditions and with total independence.

The corrections referred above will also be applicable to entities that carry out activities simultaneously subject and not subject to the CIT Code, provided that similar evasion regarding such activities is verified.

Whenever these corrections are applicable to one taxpayer of CIT (Taxpayer 1) by virtue of special relations with another taxpayer of CIT or of individual income tax (Taxpayer 2), the adjustments reflecting the corrections made in the calculation of the profits for tax purposes of Taxpayer 1 shall be applicable in the assessment of the profits for tax purposes of Taxpayer 2.

Thin capitalisation

Where loans from related foreign corporations exceed twice the corresponding equity in the borrowing Mozambican corporation, the interest on the excess borrowing is not tax-deductible. Thin capitalisation rules are in force.

According to the Mozambican thin capitalisation rules, subsidiaries are considered and treated as thinly capitalised companies if and to the extent that, as at any date of the tax period, any of their relevant debt to equity ratios exceeds a factor of two.

'Relevant debt to equity ratio', within the context of the law, means the ratio between, on one hand, the amount of direct and indirect indebtedness of a Mozambican company towards a specially related non-resident, and on the other, the amount of equity that this non-resident holds in the Mozambican company.

A 'specially related non-resident', for these purposes, is an entity with special links with another, which includes any entity that:

- holds, either directly or indirectly, at least 25% of the share capital of the Mozambican company
- though holding less than 25%, has a significant influence on its management, or
- both taxpayer and non-resident entity are under control of the same entity, which has participation in their share capital, either directly or indirectly.

Under any of these circumstances, interest paid to such specially related non-residents is not allowed as a tax deductible cost for the Mozambican company in the part that corresponds to the excessive indebtedness, unless the company can prove that it could have obtained the same level of indebtedness at comparable conditions from unrelated parties, taking into account the nature of its business, its sector of activity, dimension, and other relevant criteria.

Tax credits and incentives

Foreign tax credit

Resident companies are allowed to deduct a credit correspondent to a tax paid abroad. The tax credit to be deducted should be equal to the lower of the amount of Mozambican corporate tax imputed to income obtained abroad or the amount of foreign tax effectively paid.

Inbound investment incentives

In addition to the guarantees of ownership and remittance of funds abroad, the Mozambican government also guarantees the concession of tax and customs incentives. The incentives vary depending on whether a company is starting a new venture or rehabilitating one and also on the nature of the project to be developed. The incentives discussed in this section are the generic benefits applicable to standard projects. Certain specific benefits also may be applicable depending on the activities of the industry for the investment project (e.g. agriculture, tourism, science and technology).

Exemption from import duties

An exemption from customs duties and VAT applies upon the importation of capital equipment, listed in Section K of the Customs Tariff Schedule.

Tax credit for investment

Investments in new fixed tangible assets used in the operations of an enterprise within the Mozambican territory may benefit from an investment tax credit equal to 5% of the total investment realised, for a period of five years. This investment tax credit is offset against CIT, up to the total amount of the tax assessment. This incentive does not apply when the investment in tangible fixed assets is with respect to the construction, acquisition, restoration, or extension of buildings, passenger vehicles, furnishings, and articles of comfort and decoration, leisure equipment, advanced technology, or other assets not directly associated with the production activity carried out by the enterprise. When the project is located outside Maputo City, this tax credit is increased to up to 15% depending on the province.

Advanced technology incentive

The amount invested in specialised equipment classified as advanced technology, during the first five years from the date of commencement of activity, may be deducted from taxable income for purposes of calculating CIT, up to a maximum of 10% of taxable income.

Mozambique

Professional training incentive

Investment expenditures for professional training of Mozambican workers shall, up to a maximum amount of 5% of the taxable income (10% in case of professional training related to new/high technology equipment), be deductible from taxable income for the purposes of calculating CIT during the first five years from the date of the commencement of such activities.

Exploration incentives

During a period of five years counting from the date of exploration (i.e. the date the implementing company starts the activities approved under the investment project terms of authorisation), the following expenditure may be treated as deductible expenditures for purposes of calculating CIT:

- In the case of undertakings carried out in the City of Maputo, 110% of the value of expenditures for the construction and rehabilitation of roads, railways, airports, telecommunications, water supply, electric energy, and other works of public utility is deductible for tax purposes.
- In the case of undertakings carried out in the rest of the Provinces, an amount equal to 120% of the expenditures referred to in the paragraph above is deductible for tax purposes.
- In the case of expenditures for the acquisition for personal ownership of works of art and other objects that are representative of Mozambican culture, as well as activities that contribute to the development of such works, 50% of the expenditures are deductible for tax purposes.

Withholding taxes

Any non-resident entity carrying out economic activities in Mozambique, without being registered as a taxpayer, is liable to a final and definitive 20% WHT that is applied on all income earned. An exception exists for telecommunications and international transport as well as the respective installation and assembly of equipment made by those same entities, which are subject to a 10% WHT rate.

Both Mozambican resident and non-resident recipients are liable to tax on dividends at a tax rate of 20%.

Tax treaties

In accordance with Mozambique's DTTs, the following tax rates are applicable to dividends, interest, and royalties:

Recipient	WHT (%)			
	Dividends	Interest	Royalties	Capital gains on shares
Botswana	0/12 (4, 5)	10	10	0
India	7.5	10	10	0
Italy	15	10	10	0
Macau	10	10	10	0
Mauritius	8/10/15 (1, 2, 3)	8	5	0
Portugal	15	10	10	10
South Africa	8/15 (1, 3)	8	5	0
United Arab Emirates	0	0	5	0
Vietnam	10	10	10	0

Notes

1. The 8% rate applies if the recipient of the dividends is a company which has more than 25% of the share capital in the company that distributes the dividends.
2. The 10% rate applies if the recipient of the dividends is a company which has less than 25% of the share capital in the company that distributes the dividends.
3. The 15% rate applies in all other cases.
4. The 0% rate applies if the recipient of the dividends is a company which has more than 25% of the share capital in the company that distributes the dividends.
5. The 12% rate applies in all other cases.

Tax administration

Taxable period

The tax year is, as a general rule, the calendar year. A different tax year may be applied (if previously authorised by the Ministry of Finance) for companies that carry out activities that justify a different year or non-resident companies with a PE in Mozambique.

Tax returns

CIT assessment must be prepared by the companies on annual returns, based on the accounting records and on adjustments prescribed by the tax regulations.

The submission of the annual tax return is due by the last working day of May for companies using the calendar year as their tax year. For companies with a tax year that is not coincident with the calendar year, the presentation of the tax return is due by the last day of the fifth month subsequent to the respective year-end.

Payment of tax

Mozambican companies and non-resident companies with a PE in Mozambique must pay CIT in one of the two following ways:

- In three advance payments (based on 80% of the preceding tax year's CIT), due in May, July, and September of the respective tax year; or if the tax year chosen is not coincident with the calendar year, on the fifth, seventh, and ninth months of the respective tax year.
- In three special advance payments (based on 0.5% of the preceding year's turnover less the advance payments made in previous years, which cannot be less than MZN 30,000 or more than MZN 100,000) due in June, August, and October of the respective tax year; or if the tax year chosen is not coincident with the calendar year, on the sixth, eighth, and tenth months of the respective year.

Audit cycle

The tax authorities may carry out an inspection whenever necessary. Normally, the inspection occurs after the taxpayer files a refund application.

Statute of limitations

The statute of limitations period is five years.

Significant developments

2012 National Budget

On 28 February 2012, the Honourable Minister of Finance, Ms. Saara Kuugongelwa-Amadhila again had the huge task to balance the 10th National Budget against a global economic background of a continued weak developed world (and the European Union [EU] in particular) while oil prices remain high. A rebound in Southern Africa Customs Union (SACU) transfers gave the Minister some extra resources to use to decrease the deficit while maintaining expenditures.

Some highlights of the Budget include the following:

- Measures to improve revenue collection were emphasised, including a voluntary disclosure programme and a planned simplified tax system for small and medium-sized enterprises (SMEs).
- Some tax measures were planned for 2012, including a revised corporate income tax for non-diamond mining companies, an environmental levy on a range of harmful products, a differentiated tax rate for the export of natural resources, an increase in non-resident shareholders tax, and a withholding tax (WHT) on fees paid to non-residents.
- The usual excise duty increases on liquor and tobacco products were announced.

Amendments to the value-added tax (VAT), stamp duty, and transfer duty are expected to be tabled during 2012.

Income Tax Third Amendment Act, Act 15 of 2011

The following amended legislation was promulgated as the Income Tax Third Amendment Act, Act 15 of 2011:

Mining licences/rights

Any sale/donation/expropriation cession, grant, or other alienation or transfer of ownership of a licence or right to mine minerals have been included in the definition of gross income. The definition also specifically includes a sale of shares in a company for a licence or right to mine minerals in Namibia.

The new legislation only covers mining licences/rights, whereas the original proposal referred to 'natural resources' that could impact other industries as well.

Section 15, as proposed, deems these profits to be from a Namibian source irrespective of:

- whether the transaction is concluded in or outside Namibia
- the place where the payment of such amount is made, or
- the place where the funds from which the payment is made are held.

Export allowance

Section 17C of the Act dealing with the export allowance for manufactured goods was amended to include only goods manufactured in Namibia.

WHT on interest

The reference to unit trust schemes was removed from the new definition of ‘negotiable instrument’; consequently, WHT will be due from interest of any negotiable instrument issued by unit trust schemes.

Interest on negotiable instruments issued by a banking institution will not be subject to WHT on interest.

The treatment of undisclosed investors who are represented by an agent or any other person (excluding a stock broker) for WHT on interest purposes will apply to both financial institutions and unit trust schemes. This means that investments by undisclosed investors through their agents will be treated the same by financial institutions and unit trust schemes. Previously, the treatment of undisclosed investors was only applicable to financial institutions.

Section 34D was amended to include Subsection 7, which requires the WHT on interest from a deemed distribution (i.e. non distribution) to be paid within 60 days after the financial year end.

For the purposes of WHT on interest, ‘gross interest’ is defined as follows:

“gross interest means: interest excluding interest from stock or securities [which includes] ... Treasury Bills issued by the government of Namibia, a regional council, or local authority”.

WHT on services

Section 35A introduces a 25% WHT on entertainment fees paid to a non-resident as well as consultancy, management, and directors fees paid to a non-resident for administrative, managerial, technical, consultative, or any similar services.

The resident person making the payment to the non-resident is liable to withhold and pay the tax within 20 days from the end of the month during which the amount was withheld.

Where the resident fails to pay over such tax, the resident will become liable for the amount of tax.

The WHT is applicable irrespective of where the services are performed. There is a presumption that where a payment is made to an address outside Namibia, the amount will be deemed to be made to a non-resident, and, accordingly, the WHT will apply.

Non-resident shareholders tax (NRST)

The NRST rate increased from 10% to 20%. The 10% rate will still be applicable to investors holding at least 25% of the share capital in the Namibian company.

Building allowance

The initial 20% building allowance will only be applicable on the cost of erection of a building used for purpose of trade and only in the year the building is brought into use. The 4% allowance is only claimable in the year following the year in which the building was brought into use.

Namibia, Republic of

The same applies with regards to the 20% and 8% building allowance in respect of buildings used solely for manufacturing.

Provisional tax payment penalties

Underestimation penalties (limited to 100% of the underpaid tax) and interest will be levied on both the first and second provisional tax payments where the estimate is less than 40% and 80% respectively of the actual taxable income for the year.

Late submission provisional returns will be is subject to a penalty of 100 Namibian dollars (NAD) per day that the form is late.

Late payment of provisional tax will further be subject to a penalty of 10% per month (limited to the tax payable). Previously, this was a once off 10% penalty.

Company-owned insurance policies

The 'gross income' definition will be extended to include the following company-owned insurance policies in taxable income:

"An amount received, including a loan or advance, by an insurer for any policy of insurance, on the life of an employee or director, if the premiums made to such a policy was allowed as a tax deduction".

A new Section 17(w) will allow a tax deduction for a taxpayer (employer) for any premiums paid under a long-term insurance policy, where the taxpayer (employer) is the policy holder. This deduction is allowed provided that all of the following requirements are met:

- The premium expended by the taxpayer (employer) is included in the taxable income of the employee for fringe benefit purposes.
- The taxpayer (employer) is insured against any loss due to death, disablement, or severe illness of an employee or director.
- The policy is a risk policy with no cash value prior to occurrence of payment.
- The policy is not the property of any other person (i.e. ceded to a creditor or financial institution as security for debt or loan).
- No transaction or arrangement exists where the taxpayer (employer) will pay any amount over to an employee or representative.

Pending legislation

Please note this information is current as of 1 June 2012. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2012.

Taxes on corporate income

Namibia has a source-based tax system, which means that income from a source within Namibia or deemed to be within Namibia will be subject to tax in Namibia, unless a specific exemption is available.

Income earned by foreign companies from a source within or deemed to be within Namibia will be subject to tax in Namibia. In such cases, the foreign entity must determine whether it is obliged to register a local entity or branch. A company is

required to register a branch if it has established a place of business in Namibia. A local subsidiary company may be registered as an alternative to a branch.

In the event that Namibia has entered into a double tax agreement (DTA) with the country where the foreign company resides, such entity will only be taxable in Namibia if it has established a permanent establishment (PE) in Namibia. If a PE exists, only the portion of income attributable to the PE will be subject to tax in Namibia.

Non-residents who do not have a place of business in Namibia may, however, be subject to WHT. *See the Withholding taxes section for more information.*

Calculation of taxable income

Gross income	The total amount, in cash or otherwise, received by or accrued to any person from a source within, or deemed to be within, Namibia, excluding receipts of a capital nature (provisions for specific inclusions in gross income and amounts deemed to be from a Namibian source exist).
Less: Exemptions	The Act provides for certain amounts to be specifically exempt from tax.
Equals: Income	
Less: Deductions	Expenditures and losses actually incurred to generate income may be deducted, provided that these expenses are not of a capital nature. The Act specifically provides for certain expenditures to be deductible and allows a deduction for capital allowances. Only expenses incurred to generate 'income' may be deducted. Expenses incurred to generate income exempt from tax are not deductible. Apportionment should be considered when expenses are incurred to generate both income and exempt income.
Equals: Taxable income	Taxable income is taxed at the corporate tax rate as set out under the tax rate section below.

Tax rates

The corporate tax rates are summarised below:

Entity	Current tax rate (%)
Domestic companies and close corporations (excluding entities mentioned below)	34
Branches of foreign companies	34
Registered manufacturers (only applicable for the first ten years of registration)	18
Diamond mining companies and companies that render services to such companies in connection with diamond mining	55
Mining companies (other than diamond mining companies) and companies that render services to such companies in connection with mining	37.5
Long-term insurers (the rate is applied to gross investment income)	13.6
Petroleum income tax rate	35

Corporate residence

The Namibian tax system is based on source and not on residency. Income derived or deemed to be derived from sources within Namibia are subject to tax.

Namibia, Republic of

The source is determined as the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Namibia, the source of income is deemed to arise in Namibia, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Namibia may, in the hands of a domestic company, be deemed to arise in Namibia and be taxed as such. Examples are interest and certain copyright royalties arising outside Namibia.

Permanent establishment (PE)

A PE includes, in most cases, a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered.

Except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance.

Other taxes

Value-added tax (VAT)

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Namibia which involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption in Namibia, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated).

Import VAT is payable on the greater of the free on board (FOB) value plus 10%, or the market value. The payment may be deferred in terms of an import VAT account registered with the Directorate of Inland Revenue to the 20th day of the month following the month of importation. Penalties of 10% per month or part of a month and 20% interest on outstanding import VAT, according to the Customs Asycuda reports on import VAT account numbers, are levied by the Directorate of Inland Revenue.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard rated and zero-rated supplies) exceed NAD 200,000 in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may be deducted only as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due within 25 days following the month to which the VAT relates.

Customs and excise duties

Namibia is a member of the Southern African Customs Union (SACU), and customs duties are not levied on intra SACU trade (i.e. between Botswana, Lesotho, Namibia, South Africa, and Swaziland).

Customs duties are payable according to the Common Customs Tariff of SACU on imports from outside SACU. Preferential duty rates apply on imports from Southern African Development Community (SADC) countries, while goods may be imported free of customs duties from Zimbabwe in terms of the Namibia-Zimbabwe Free Trade Agreement.

Excise duties are levied on local production of excisable products (e.g. cigarettes, liquor, fuel) and are included on most excisable products imported from another SACU country in terms of the duty at source procedures. Identical excise duty rates are applied throughout the SACU. Importation of excisable products from outside the SACU is subject to customs duties and specific customs duties.

Current specific excise/customs duty rates for the above-mentioned products are as follows:

- Cigarettes: NAD 5.16/10 cigarettes.
- Beer: NAD 59.36/litre absolute alcohol (AA).
- Spirits (whisky, rum, brandy, gin, vodka, etc): NAD 111.64/litre AA.
- Petrol: NAD 39.09/litre.
- Diesel and biodiesel: NAD 38.17/litre.
- Illuminating kerosene (paraffin): NAD 38.14/litre.

Ad valorem excise/customs duties are levied on certain products (e.g. motor vehicles, perfumes) in addition to the normal customs duties.

Current *ad valorem* excise/customs duty rates are as follows for the above-mentioned goods:

- Motor vehicles: $([0.00003 \times A] - 0.75)\%$, with a maximum of 25%, where 'A' is the recommended retail price, exclusive of VAT.
- Perfumes: 7%.

Fuel levies are payable on petrol, diesel, and illuminating kerosene and may be claimed back for certain non-road operations (e.g. mining, farming, and construction).

The current fuel levies are as follows:

- Petrol: NAD 0.12/litre.
- Diesel: NAD 0.10/litre.
- Illuminating kerosene (paraffin): NAD 0.47/litre.

Surety in the form of a provisional payment, bank, or insurance guarantee is required by Customs on all temporary importations to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Namibia, Republic of

Property taxes

Property taxes are levied by municipalities based on municipal valuations of properties.

Transfer duty

Transfer duty is payable at 12% of the acquisition value of real property acquired. While it is normally payable by the buyer, the agreement for the sale of the property may determine the person liable to pay these costs.

Amendments to the Transfer Duty Act that will levy transfer duty on the sales of shares/members interest in property-owning entities are expected to be tabled during 2012.

Stamp duty

Certain transactions may attract stamp duty. The amount of stamp duty payable differs and is based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

Transaction	Stamp duty
Agreements or contracts (other than those where duty is specifically provided for in the Act)	NAD 5
Lease agreement or lease	The stamp duty will be based on lease payments, together with additional considerations specified in the lease agreement
Transfer or issue of marketable securities and other share transactions	NAD 2 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction
Transfer deed relating to immovable property purchased.	NAD 12 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction

Annual duty

Annual duty is levied in terms of the Companies Act at an amount of NAD 4.00 for every NAD 10,000 (or part thereof) of the issued share capital of a company, with a minimum duty of NAD 80.00 per annum. Issued share capital includes ordinary shares, share premium, and preference shares.

Since a branch does not issue share capital, the issued share capital of the head office will be used to calculate the annual duty payable in Namibia.

Branch income

Branch income that is received or accrued from a source within, or deemed to be within, Namibia is taxable in Namibia based on the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may, therefore, not deduct fees paid to its foreign head office (unless a tax treaty provides for such a deduction), as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

Transfer pricing rules apply between a branch and its foreign head office or other cross-border related parties.

Income determination

Inventory valuation

Inventory is valued at cost for tax purposes in Namibia.

The last in first out (LIFO) basis of valuation is only accepted if:

- written consent was obtained from the Minister of Finance before such taxpayer renders one's income tax return for the first year of assessment for which the LIFO basis was adopted by the taxpayer, and
- various conditions are met by the taxpayer as determined by the Minister of Finance.

Capital gains

Other than profits on the sale of mining licences/rights, capital gains are not taxed in Namibia.

Mining licences/rights

Any sale/donation/expropriation cession, grant, or other alienation or transfer of ownership of a licence or right to mine minerals have been included in the definition of gross income. The definition also specifically includes a sale of shares in a company for a licence or right to mine minerals in Namibia.

The new legislation only covers mining licences/rights, whereas the original proposal referred to 'natural resources' that could impact other industries as well.

Section 15, as proposed, deems these profits to be from a Namibian source irrespective of:

- whether the transaction is concluded in or outside Namibia
- the place where the payment of such amount is made, or
- the place where the funds from which the payment is made are held.

Dividend income

Dividends received are exempt from tax. Non-resident shareholders tax (NRST) should be withheld on dividends declared to non-resident shareholders. *For more information on NRST, see the Withholding taxes section.*

Interest income

Namibian companies are taxed on interest received from a Namibian source. Persons other than Namibian companies are subject to a final WHT on interest from banks and unit trusts. *For more information, see the Withholding taxes section.*

Partnership income

The relevant partners of a partnership are regarded as the responsible taxpayers and not the partnership itself.

In practice, the assessment of a partnership is treated like that of a private business. The partnership is first treated as a business entity on its own in terms of income and expenditure. The profit or loss at the end of the year is then allocated to the individual partners. If they derived a profit from the partnership, it is added to their other non-partnership income; or if the partnership made a loss, the partners have the right to deduct it from their non-partnership income.

Namibia, Republic of

Rental income

Companies are taxed on rental income received from a Namibian source.

Royalty income

Companies are taxed on royalty income received from a Namibian source.

Foreign income

Corporate tax in Namibia is determined on the source basis, therefore, only income from a Namibian source or deemed Namibian source is subject to corporate tax.

Deductions

Capital allowances

The cost (including finance charges) of machinery, equipment, and other articles used by the taxpayer to generate income is deductible in three equal annual allowances. No apportionment is required where an asset is held for less than 12 months.

Buildings used by the taxpayer to generate income qualify for an initial allowance of 20% of erection costs in the year they are first brought into use. Thereafter, an annual allowance of 4% is deductible for each year following the year of erection. Additions to existing buildings (not alterations or repairs) qualify for the same 20% and 4% deductions. Note that the allowance is calculated on the cost of erection and not the cost of acquisition. The allowance is also only calculated for a period of 21 years from the date of erection.

Mining exploration expenditures incurred before commencement of production are deductible in full in the first year that income is generated from the mine. Subsequent developmental expenditures are written off in three equal annual allowances.

Capital allowances may also be deducted with respect to patents, trademarks, leasehold improvements, etc.

A recovery or recapture of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recaptured by way of disposal, withdrawal from trade for non-trade purposes, or removal from Namibia. The recapture is calculated at the market value of the asset.

Goodwill

Goodwill does not constitute an intangible asset. Accordingly, the amortisation of goodwill is not deductible for tax purposes and should be excluded from calculating taxable income.

Start-up expenses

Mining

The Income Tax Act allows exploration expenditure to be deducted in full during the year in which the mine commences with production. All exploration expenses incurred before the commencement of mining is therefore deferred until such time that the mine commences production.

All other industries

The general deduction formula determines that only expenses incurred in the production of income that are not of a capital nature may be claimed for tax purposes. The Income Tax Act defines income as 'income in any year or period of assessment'.

Interest expenses

A deduction is allowed in respect of financing expenditure incurred in respect of any financing agreement (i.e. hire purchases) for the acquisition of fixed assets utilised in ordinary trade activities.

The general deduction formula determines that only expenses incurred in the production of taxable income that are not of a capital nature may be claimed for tax purposes. Therefore, where the interest can be argued to be incurred in the production of income, the interest expense will be deductible.

Thin capitalisation legislation may be applied to interest paid on related party loans (see *Thin capitalisation in the Group taxation section*).

Bad debt

The Income Tax Act allows a specific deduction for bad debts, provided that the amount written off was previously included in the taxpayer's income.

Charitable contributions/donations

A specific deduction for donations is allowed, provided that it is made to a registered welfare organisation or an approved educational institution. It is a further requirement under that a certificate should be issued by the welfare organisation/educational institution in respect of the donation in order for it to qualify as a deduction.

Fines and penalties

In terms of practise applied by Inland Revenue, penalties and fines are not deductible for tax purposes.

Taxes

Taxes levied on income are not allowed as a deduction.

Net operating losses

Assessed tax losses may be carried forward indefinitely, provided the company continues to trade. Tax laws do not allow losses to be transferred to other members of a group, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

If a company ceases to trade for a full fiscal year, its assessed losses are forfeited, regardless of subsequent activities. Assessed losses are also reduced in the event of a compromise agreement with creditors.

Namibian tax legislation does not provide for carrying back tax losses.

Payments to foreign affiliates

For information on payments to foreign affiliates, please refer to the Branch income section, Group taxation section, and Withholding taxes section.

Namibia, Republic of

Group taxation

No taxation of combined operations is allowed in Namibia where operations are conducted by more than one company.

Transfer pricing

Namibia introduced transfer pricing legislation on 14 May 2005. The legislation was aimed at enforcing the arm's-length principle in cross-border transactions carried out between connected persons. On 5 September 2006, the Directorate of Inland Revenue issued Income Tax Practice Note 2 of 2006 that contains guidance on the application of the transfer pricing legislation. The Practice Note is based on guidance set out by the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for multinational enterprises and tax administrations.

The objective of this Practice Note is to provide taxpayers with guidelines regarding the procedures to be followed in the determination of arm's-length prices, taking into account the Namibian business environment. It also sets out the Minister of Finance's views on documentation and other practical issues that are relevant in setting and reviewing transfer pricing in international agreements.

Transfer pricing legislation is essentially aimed at ensuring that cross-border transactions between companies operating in a multinational group are fairly priced and that profits are not stripped out of Namibia and taxed in lower tax jurisdictions. The legislation achieves this by giving the Minister of Finance (who essentially delegates to the Directorate of Inland Revenue) the power to adjust any non-market related prices charged or paid by Namibian entities in cross-border transactions with related parties to arm's-length prices and to tax the Namibian entity as if the transactions had been carried out at market-related prices.

In terms of the normal penalty provisions of the Income Tax Act, the Directorate of Inland Revenue may levy penalties of up to 200% on any amount of underpaid tax. Consequently, the Inland Revenue may invoke such provisions in the event that a taxpayer's taxable income is understated as a result of prices that were charged in affected transactions, which were not carried out at arm's length. Further, interest will be charged on the unpaid amounts at 20% per annum.

Thin capitalisation

The Minister may, if any amount of financial assistance provided by a foreign connected person is excessive in relation to a company's fixed capital (being share capital, share premium, accumulated profits, whether capital or not), disallow the deduction for income tax purposes of any interest or other charges payable by the Namibian person on the 'excessive portion' of the financial assistance provided by the foreigner.

There is no guidance that provides a definition for 'excessive'. Therefore, each case should be considered on the basis of the facts provided. The 3:1 ratio is applied by the Bank of Namibia for exchange control purposes, and this guideline is therefore deemed suitable until otherwise determined by Inland Revenue.

Tax credits and incentives

Manufacturing

The following is a high-level comparison of the different tax treatments for normal companies and registered manufacturing companies. This description does not consider the specific conditions that should be met in order for these incentives to be utilised.

Note that only the building allowance and preferential tax rate (*as set out below*) may create or increase a tax loss.

Building allowance

A building allowance is deductible with respect to buildings used for purposes of trade.

For normal companies, the allowance is calculated as 20% of the cost of construction in the year in which the building enters service and 4% during the 20 years that follow the year of construction.

For registered manufacturing companies, the allowance is calculated as 20% of the cost of construction in the year in which the building enters service and 8% during the ten years that follow the year of construction.

Employee allowances

For normal companies, expenditures for remuneration and training of employees are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of remuneration and training of employees that are directly engaged in the manufacturing process are deductible.

Export expenditure allowance

For normal companies, export expenditures incurred are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of costs incurred in an export country, in order to export Namibian manufactured goods to such country, may be deducted.

Export allowance

Any taxpayer that derives income from the export of manufactured goods, excluding meat or fish, may deduct an export allowance equal to 80% of the taxable income derived from the export of manufactured goods.

Gross profit derived from the export of manufactured goods as a percentage of total gross profit should be used to determine the percentage of taxable income that is used to calculate the export allowance.

Transport allowance

For normal companies, land-based transport costs (i.e. transport by road or rail) are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of land-based transport cost in respect of material and components used in the manufacturing process or equipment imported for direct use in the manufacturing process may be deducted.

Namibia, Republic of

Preferential tax rate

For normal companies, the normal tax rate for companies other than mining companies or registered manufacturers is 34%.

The tax rate for a registered manufacturer for taxable income with respect to the manufacturing activity for which they are registered is 18%. This preferential rate is applicable for a period of ten years from registration as a manufacturer.

Export Processing Zones (EPZs)

In order to become an EPZ company, a particular entity must register with the EPZ governing body and obtain approval from Inland Revenue.

An EPZ company qualifies for the following benefits:

- The company is exempt from corporate tax.
- No VAT is payable on the sale of goods or services rendered in the zone.
- No VAT is payable on goods imported or manufactured in the zone.
- No customs or excise duty is payable on goods imported into the zone.
- No stamp duty or transfer duty is payable in relation to the transfer of movable or immovable property in the zone.
- A 75% refund of expenditures incurred in training Namibian citizens.
- Some of the provisions in the Labour Relations Act do not apply in the zone.

Enterprises must comply with the following requirements in order to qualify for EPZ status:

- Goods must be exported to countries other than countries in the SACU.
- Industrial employment must be created or increased.
- Namibia's export earnings must be increased as a result of manufactured goods exported.

EPZ companies may not be involved in retail business operations.

Withholding taxes

Withholding taxes (WHTs) are applicable where dividends and royalties, or similar payments, are declared or distributed to non-Namibian residents.

Dividends

Dividends declared by a Namibian company to a non-resident holding company are subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 10%, unless treaty relief is available. NRST is payable within 30 days after declaration of a dividend.

Royalties or similar payments

WHT on royalties are payable when a Namibian company pays a royalty to a non-resident. WHT is levied at a rate of 10.2% (30% of the corporate tax rate of 34%) and is payable within 14 days after the end of the month during which the liability for payment is incurred.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula, or process, or any other property or right of a similar nature. A royalty also includes the imparting of any scientific, technical,

industrial, or commercial knowledge or information for use in Namibia. The nature of fees payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

Interest

A WHT of 10%, calculated on the gross amount of interest, is payable on interest accruing to any person, other than a Namibian company, from a registered Namibian banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Namibian companies, however, are taxed on interest at the corporate tax rate.

It is the obligation of the financial institution to withhold the tax and pay such tax to the revenue authorities.

No WHT on interest applies to interest paid on loan accounts to foreign entities.

Services

Section 35A was recently introduced by the Ministry of Finance and applies to any Namibian resident (i.e. a company incorporated or managed and controlled in Namibia, and natural persons ordinarily resident in Namibia) paying a management, consultancy, or entertainment fee to a non-resident.

Management and consulting fees are specifically defined as: “any amount payable for administrative, managerial, technical, or consultative services or any similar services, whether such services are of a professional nature or not”.

The legislation imposes the obligation on the Namibian resident to withhold a 25% WHT on such fees paid to the non-resident. It is important to note that the legislation also specifically includes any directors fees paid to a foreign director.

The official Directorate Inland Revenue effective date for Section 35A is 30 December 2011.

Summary of WHT payable

The WHT rates and treaty relief for Namibian DTAs can be summarised as follows. Note that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, royalties, and interest in the various treaties should also be considered.

Recipient	WHT (%)				
	Dividends	Interest	Royalties	Technical fees	Directors fees
Non-treaty	10	10*	10.2	25	25
Botswana	10	10	10	15	25
France	5	10	10	0	25
Germany	10	0	10	0	25
India	10	10	10	10	25
Malaysia	5	10	5	5	25
Mauritius	5	10	5	0	25
Romania	N/A	10	5	0	25

Namibia, Republic of

Recipient	WHT (%)				
	Dividends	Interest	Royalties	Technical fees	Directors fees
Russian Federation	5	10	5	0	25
South Africa	5	10	10	0	25
Sweden	5	10	5	15	25
United Kingdom	5	N/A	5	0	25

* Namibian companies are taxed at the corporate tax rate on interest received.

'N/A' means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Namibian rate. It should be noted that a treaty may only provide tax relief and cannot impose a higher tax rate.

Mining royalties

The Minerals (Prospecting and Mining) Act levies a royalty on minerals won or mined by a licence holder in Namibia, based on the table below:

Group of minerals	Percentage of market value of minerals leviable as a royalty (%)
Precious metals	3
Base and rare metals	3
Semi-precious stones	2
Nuclear fuel minerals	3*
Industrial minerals	2
Non-nuclear fuel minerals	2

* Applicable to all licence holders on nuclear fuel minerals, except Rössing Uranium Mine Ltd, where a 6% royalty is applicable.

Tax administration

Taxable period

The tax year for companies and close corporations is aligned with the financial year.

Tax returns

The income tax return is due within seven months after the financial year-end of the company and can be extended to five months after the seventh month due date, provided that no other prior year income tax returns are outstanding.

Payment of tax

The first provisional payment for income tax is due within six months from the commencement of the company's financial year (new tax amendments require that at least 40% of tax payable at year-end is paid on first submission). The second provisional payment is due on/before the last day of the respective tax year (new tax amendments require that at least 80% of tax payable at year-end is paid on second submission). The final provisional payment is due within seven months after the financial year-end of the company.

WHT on dividends are due within 30 days after declaration of the dividend.

WHT on royalties or similar payments are due within 14 days after the end of the month during which the liability for payment of the royalty was incurred.

WHT on services is payable to Inland Revenue within 20 days after the end of the month during which the amount was deducted or withheld.

It is advised that if relief is available under the DTA, a nil form should still be submitted when payment is made to non-residents. The amount of DTA relief claimed should be disclosed on the form submitted.

Penalties and interest

The penalties and interest due for late submissions and payments can be summarised as follows:

Tax area	Reason	Penalty	Interest (%)
1st provisional tax	Late submission	NAD 100 per day penalty for outstanding provisional tax returns	None
	Late payment	10%	20
2nd provisional tax	Late submission	NAD 100 per day penalty for outstanding provisional tax returns	20
	Late payment	10%	20
	Under-estimation	20%	20
Income tax return	Late submission	10%	20
	Late payment	None	20
	Omission/incorrect statement	Up to 200%	20
WHT	Late payment	10%	20

Anti-avoidance

Note that the Income Tax Act, Act 24 of 1981, contains an anti-avoidance section, Section 95, which enables the Receiver of Revenue to disregard the implications of a transaction or scheme if it can be proven that:

- such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- such transaction or scheme was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation or scheme of the nature of the transaction, operation or scheme in question, or has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation or scheme of nature of the transaction, operation or scheme in question, and
- such transaction or scheme was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.

The Receiver of Revenue can, at its sole discretion, impose Section 95 on any transaction or scheme, which will place the onus on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Significant developments

The corporate tax system of the Netherlands contains a number of well-known features providing for an attractive investment climate, such as: the fiscal unity regime with tax consolidation for group companies, a full participation exemption for capital gains and dividends from qualifying participations, and several favourable tax regimes (e.g. for patent income, investment vehicles, and income from ocean shipping activities).

The Dutch ministry of Finance recently published details of the Budget Agreement for 2013, which was agreed upon in the spring of 2012 by a coalition of five political parties. This agreement includes a number of fiscal measures aimed at reducing the Dutch European Monetary Union (EMU) gap to 3% in 2013. An accompanying legislative proposal with more detailed explanation of the measures is, however, not yet public. Among other measures, it has been agreed that the general value-added tax (VAT) rate will rise to 21% (currently 19%) in October 2012. For corporate taxpayers, the deduction of 'excessive' interest due on debt used to finance participations will be restricted.

As of 1 January 2012, a number of amendments in the corporate income tax (CIT) law from the 2012 Dutch Tax Package have taken effect. One of the most important aspects of the 2012 Dutch Tax Package was the introduction of a restriction on the deduction of interest (including costs and currency exchange results) on excess-acquisition debt. Further, foreign-sourced income (foreign-branch income, real estate income, and other income) is now 'excluded' from the Dutch taxable base.

In addition to the existing research and development (R&D) facilities, a new R&D deduction has been introduced as of 1 January 2012. The R&D deduction is calculated as 40% of the costs (other than wage costs) and expenses directly related to R&D activities performed by the taxpayer.

The announced possible reduction of the standard CIT rate to 24% has not (yet) been implemented.

The Netherlands pursue an active tax treaty policy in order to maintain and extend its wide tax treaty network. Most Dutch bilateral tax treaties are based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention. In 2011, the Dutch Ministry of Finance published a Memorandum on the Dutch Tax Treaty Policy, expressing policy positions in regard of future treaty negotiations. With respect to the avoidance of double taxation on income and capital, the Netherlands has concluded bilateral tax treaties with about 90 other countries worldwide. In 2011, the new (or revised) tax treaties with the United Kingdom, the United Arab Emirates, Saudi Arabia, Barbados, and Slovakia have taken effect. New (or revised) treaties with Hong Kong, Japan, Oman, Panama, and Switzerland came into force in 2012.

Please note this information is current as of 1 June 2012. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2012.

Taxes on corporate income

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted or excluded from the tax base. Non-resident entities only have a limited tax liability with regard to income from Dutch sources.

Standard corporate income tax (CIT) rate

The Dutch standard CIT rate has been reduced significantly over the past years. As of 1 January 2011, the standard CIT rate is 25%. There are two taxable income brackets. A lower rate of 20% applies to the first income bracket, for taxable income up to 200,000 euros (EUR).

Fiscal investment fund regime

In general terms, under the existing fiscal investment fund regime, the CIT rate for fiscal investment funds is 0%, provided that their profit is made available to the shareholders and holders of certificates of participation no later than eight months after year end.

Since 2007, fiscal investment funds may also invest in real estate development (or redevelopment) activities, provided that these activities take place through a subsidiary subject to Dutch CIT and the development (or redevelopment) activities are exercised for the benefit of real estate that is (or will be) forming part of the fund's own portfolio, an affiliated fiscal investment fund's portfolio, the portfolio of a company in which the fund or the affiliated fund has a substantial interest, or for the benefit of the subsidiary's own portfolio.

Exempt investment fund regime

The exempt investment fund regime exists next to the fiscal investment fund regime described above. In accordance with the exempt investment fund regime, investment funds as defined in the Dutch Financial Supervision Act (*Wet op het financieel toezicht*) that meet certain conditions can request an exemption from CIT. Apart from the exempt status for CIT purposes, the exempt investment fund is not obliged to withhold dividend withholding tax (WHT) with regard to profit distributions to its shareholders.

Innovation box regime

A special regime applies with respect to profits, including royalties, derived from a self-developed intangible asset (developed after 31 December 2006). In this so-called innovation box, the taxpayer may opt, under certain conditions, for the application of a lower effective rate on taxable profits derived from these intangible assets. The effective tax rate of the innovation box is 5%.

The innovation box is applicable provided that at least 30% of the profits have been originated by the patent. Companies which have incurred certain qualified R&D costs for the development of intellectual property for which no patent was granted are also entitled to the favourable effective tax rate. This is subject to the condition that these qualified R&D assets became part of the company's assets after 31 December 2007.

The lower effective tax rate of 5% only applies to positive income, allowing innovation losses to be taken into account in full. As of 1 January 2011, it is also possible to include

The Netherlands

profits from an intangible asset derived in the period between the patent application and the granting of the patent in the innovation box regime (not for R&D assets).

Tonnage tax regime

In order to stimulate entrepreneurs engaged in ocean shipping, a favourable regime (known as the Dutch tonnage tax regime) may be available to certain shipping companies. Under this regime, the taxable profit of a sea-going vessel is based on its registered net tonnage multiplied by a fixed amount of deemed profit per ton instead of the actual profits from the exploitation. The regime only applies to the calculation of the profit related to the qualifying shipping activities. These activities include operating vessels in international traffic (including transportation for the purpose of the exploitation of natural resources at sea), cable and pipe-laying activities at the bottom of the sea, and towing and dredging and connected activities. The profits from the qualifying activities are taxed at a deemed tonnage profit according to a five bracket regressive scale system. The tonnage tax regime applies upon request and for a fixed period of ten years or multiples of the ten-year period.

Local income taxes

There are no provincial or municipal corporate income taxes in the Netherlands.

Corporate residence

In the Netherlands, corporate residence is determined by each corporation's circumstances. Management and control are important factors in this respect. Companies incorporated under Dutch law are deemed to be residents of the Netherlands (although not with respect to certain provisions, such as the participation exemption and fiscal unity).

Permanent establishment (PE)

Non-resident companies that are neither incorporated nor effectively managed in the Netherlands are limited in their liability to tax in the Netherlands if they receive Dutch source income. This could be, for instance, business income derived from a Dutch permanent establishment (PE) or permanent representative. The definition of a PE for Dutch tax purposes is largely inspired by the OECD Model Convention definition and Commentary.

Other taxes

Value-added tax (VAT)

VAT, known in Dutch as the *Belasting over de Toegevoegde Waarde* or BTW, is payable on sales of goods and on services rendered in the Netherlands as well as on the importation of goods and on the 'intra-European' acquisition of goods. There are three VAT rates, which are 19%, 6%, and 0%.

The main VAT rate of 19% will be increased to 21% on 1 October 2012.

The reduced 6% VAT rate is applicable on certain prime necessities (and also on certain energy-saving insulation activities on houses).

The special 0% VAT rate is applicable mainly to intra-European Union (EU) supplies, exports, imports stored in bonded warehouses, services rendered in connection with the above, and certain other services.

The following are exempt from VAT:

- The supply of immovable property two years after putting it into use and lease. However, if the lessee's use of the immovable property is 90% or more for input VAT-deductible purposes, the lessor and lessee may opt to be subject to VAT on rent, in which case the lessor may deduct the VAT charged in respect of the property.
- Medical, cultural, social, and educational services.
- Services provided by banks and other financial institutions in connection with payment transactions and the granting of credit facilities.
- Insurance transactions.
- Transactions in shares.

Customs and excise tax

Many goods imported to the Netherlands from outside the European Union are subject to customs and excise duties. The tariffs and rates that apply to the different goods vary widely and change regularly.

An excise tax is levied on certain consumer goods (e.g. cigarettes, cigars, mineral oils, alcoholic products). If the goods are used solely as raw materials, no excise tax is levied. The excise tax is refundable if the article is exported.

Immovable property tax

Municipalities impose an annual immovable property tax on the owners of immovable property. The rates depend on the municipality. The taxable basis is the market value of the immovable property. Please note that the (assessment of the) value is also of importance for CIT, as depreciation might be limited based on this value (*see Limited depreciation of immovable property in the Deductions section*).

Transfer tax on immovable property

Acquisition of economic or legal ownership of immovable property in the Netherlands is subject to a 6% transfer tax on market value. Some exemptions are available. Real estate transfer tax on dwellings is reduced to 2% as of 1 July 2011, and will remain at 2% permanently.

Transfer tax on acquisition of shares in a real estate entity

The acquisition of shares in an entity that owns real estate may also be subject to transfer tax, if that entity is characterised as a so-called real estate entity. The threshold for qualifying as a real estate entity has been lowered as of 1 January 2011. In short, the threshold is met if more than 50% of the assets of the entity consist of real estate and at least 30% of Dutch immovable property. Prior to 2011, the threshold was met if more than 70% of the assets consisted of Dutch real estate.

Stamp duty

There are no stamp duties in the Netherlands.

Capital tax

The Netherlands do not levy capital tax on capital transactions (e.g. issue or increase capital).

Insurance tax

An insurance tax of 9.7% is payable on insurance premiums if the insured is a resident of the Netherlands or if the insured object is in the Netherlands. Several exemptions are available (e.g. insurances of ships and aircrafts operated in international traffic

The Netherlands

are exempt from insurance tax). In certain situations, an insurer outside the European Union may be required to take on a tax representative in the Netherlands.

Environmental charges on packaging

Producers or importers have to pay taxes on packaging. The tariff depends on the type and method of packaging. An exemption is granted to companies that bring less than 50,000 kilograms of packaging materials a year on the market. A refund of the packaging tax for indirect export also is available to foreign entrepreneurs.

Branch income

Rates for Dutch branch profits are the same as for other corporate profits, but no tax is withheld on transfers of profits to the head office. The tax base is, in principle, calculated on the same rules as for Dutch-resident companies.

Income determination

Inventory valuation

In general, stock/inventory is stated at the lower of cost or market value. Cost may be determined on the basis of first in first out (FIFO), last in first out (LIFO), base stock, or average cost. The LIFO system may be used for commercial/financial and tax purposes.

There is no requirement of conformity between commercial/financial and tax reporting.

Capital gains

Capital gains are taxed as ordinary income. However, capital gains realised on disposal of shares qualifying for the participation exemption are tax exempt (*see Dividend income below*).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired assets. Except in special circumstances, the reserve cannot be maintained for more than three consecutive years. If the reserve has not been fully applied after three years, the remainder will be liable to taxation.

Capital losses are deductible, unless attributable to the disposal of a shareholding qualifying for the participation exemption.

Dividend income

Subject to meeting the conditions for the participation exemption, a Dutch company or branch of a foreign company is exempt from Dutch tax on all benefits connected with a qualifying shareholding, including cash dividends, dividends in kind, bonus shares, hidden profit distributions, capital gains, and currency exchange results.

Participation exemption

The participation exemption will apply to a shareholding in a Dutch company if the holding is at least 5% of the investee's capital, provided the conditions are met.

As a general rule, the participation exemption is applicable as long as the participation is not held as a portfolio investment. The intention of the parent company, which can be based on particular facts and circumstances, is decisive. Regardless of the company's intention, the participation exemption also is applicable if the sufficient tax test, which

is if the income is subject to a real profit tax of at least 10%, or the asset test, if the subsidiary's assets do not usually consist of more than 50% of portfolio investments, is met.

For portfolio investment participations not qualifying for the participation exemption, double taxation will be avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.

Dividends not qualifying under the participation exemption are taxable in full at the ordinary CIT rate.

Interests of 25% or more in a company of which the assets consist (nearly) exclusively of portfolio investments should be annually valued, as an asset, at the fair market value.

Costs related to the acquisition and disposal of a participation (e.g. legal fees, compensations, notary fees) are not deductible for corporate tax.

Losses arising from the liquidation of a (foreign) subsidiary are deductible for CIT, subject to certain conditions.

The recently published Budget Agreement for 2013 indicates that the deduction of 'excessive' interest due on debt used to finance participations will be restricted. An accompanying legislative proposal with more detailed explanation is, however, not yet available.

Profits derived from a company that was created by converting a foreign PE only qualify for the participation exemption after they exceed the losses from the PE during the previous years insofar as those losses reduced the taxable profits in the Netherlands before 1 January 2012. Under certain circumstances, such as the alienation of (part of) the shares of the company, all non-recaptured losses will be added to the profits of the Dutch parent company at once. Note that the scope of these anti-abuse provisions has been extended by including situations in which a foreign intermediate holding company is interposed.

N

Stock dividends

Stock dividends are taxed as dividend income to the extent that they are paid out of earned surplus. They are not taxable if paid out of share premium ('*agio*'), provided the share premium account was not created pursuant to a share-for-share merger, in which only Dutch companies were involved. In the case of a share-for-share merger, in which shares in foreign subsidiaries were contributed to a Dutch company, the Dutch company can distribute the difference between the fair market value and the paid-in capital of the subsidiaries being contributed as a stock dividend without triggering Dutch dividend WHT (step-up in basis), provided certain requirements are met.

Work in progress

Profits with regard to work in progress should be accounted before actual completion, to the extent that the work is completed. All project costs should be recognised in the year the costs occurred.

Foreign income

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted (e.g. due to the application of the participation exemption described above) or excluded from the tax base.

The Netherlands

As of 1 January 2012, certain foreign-sourced income (foreign branch income, real estate income, and other income) is 'excluded' from the Dutch taxable base. The so-called 'object exemption', a method to provide relief for international juridical double taxation in situations of Dutch companies with a PE abroad, is designed as a tax base adjustment instead of a real exemption. Consequently, losses of foreign PEs can no longer be offset against profits of the Dutch head office (except for final losses), but currency exchange results are still included in the tax base. Also, if the foreign activities cease, any losses upon 'liquidation' can, in principle, be deducted. For certain low-taxed passive PEs, the object exemption is replaced by a credit system.

Prior to 1 January 2012, double taxation of certain foreign-source income, including foreign branch income, was avoided by reducing Dutch tax by the ratio of foreign income (subject to a foreign income tax and/or covered by certain tax treaty provisions) to total income, the so-called exemption method. Currency exchange profits or losses on the head office's investment in its foreign branch were not considered 'foreign income' for the purposes of these relief provisions. Unilateral relief from double taxation for income from foreign financing branches was provided by means of a credit of 17.5% of the passive financing income for foreign taxes deemed paid or the foreign tax actually paid. However, the exemption method applied only if the taxpayer could demonstrate that the foreign branch was actively engaged in intra-group financing activities.

Double taxation of foreign dividends, interest, and royalties is relieved by a tax credit provided by Dutch tax treaties or unilaterally, if the payer of the income streams is a resident of a developing country, designated by Ministerial Order. If no treaty or unilateral relief applies, a deduction of the foreign tax paid is allowed in computing the net taxable income.

However, relief by exemption is given for dividends from foreign investments qualifying for the participation exemption, as discussed above. In that case, there is no Dutch tax to credit against taxes withheld in the subsidiary's country of residence.

In most circumstances, the foreign dividend is exempt for Dutch CIT under the participation exemption, as previously discussed. As a consequence, foreign WHT cannot be credited, and WHT constitute a real cost for the companies concerned. A credit of the foreign WHT is granted against Dutch dividend WHT due on the distribution to foreign parents of the Dutch company. The credit amounts to a maximum of 3% of the gross dividend paid, to the extent that it can be paid out of foreign-source dividends received that have been subject to at least a 5% WHT and the foreign company is liable for CIT. This tax credit does not result in taxable income for CIT purposes.

Deductions

Depreciation, amortisation, and depletion

Generally, depreciation may be computed by a straight-line or a reducing-balance method or, in accordance with any other sound business practice, on the basis of historical cost. Depreciation is applied from the date the asset comes into use. Dutch tax law includes specific rules (*see below*) that potentially limit the depreciation of assets (e.g. immovable property, goodwill, and other fixed assets).

To meet companies' urgent need for cash due to the worldwide credit crunch, a temporary provision was introduced, allowing accelerated depreciation (*see below*)

of new investments in certain assets in 2009, 2010, and 2011. These measures are not extended for 2012.

A depletion allowance for natural resources may be granted for tax purposes, when it conforms to sound business practice and is appropriate for accounting purposes.

Limited depreciation of immovable property

There are special provisions for depreciation of immovable property. A distinction is made between immovable property held for investment purposes and buildings used in a trade or business.

Investment property cannot be depreciated to an amount lower than the official property's fair market value for tax purposes, which is known as *WOZ-waarde*. In other words, a property will not be subject to depreciation unless the carrying amount of the building and the land on which it is located is higher than its value for tax purposes. This value is determined by the municipal tax authorities annually. As this value is based on the assumption that the property is free of lease, the value for tax purposes of commercial real estate may be lower than fair market value.

Alternatively, the depreciation of buildings employed in a trade or business is limited to 50% of the property's value for tax purposes. It should still be possible to value immovable property at fair market value if this is demonstrably lower than the current book value. In addition, anti-abuse measures apply to prevent the division of land and buildings into separate legal entities or to related individuals.

Note that maintenance costs continue to qualify for tax relief and any maintenance-related value increase does not lead to a compulsory upward revaluation of the property. Moreover, a property is not required to be revaluated as its value increases due to market developments.

Depreciation of land is not permitted.

The sale of depreciated assets triggers tax on the difference between the sale price and the depreciated book value unless a reinvestment reserve is set up (*see Capital gains in the Income determination section*).

Limited amortisation of goodwill and depreciation of fixed assets

With regard to goodwill, the amortisation for tax purposes is limited to 10% of the purchase price per annum. Furthermore, the tax depreciation of other fixed assets (i.e. inventory, equipment) is limited to 20% of the purchase price or production costs per annum.

Accelerated depreciation

The law provides accelerated depreciation of several specific assets. Accelerated depreciation applies to investments in assets that are in the interest of the protection of the environment in the Netherlands and that appear on the so-called VAMIL ('*Vervroegde Afschrijving Milieu-investeringen*') list. In 2011, 2012, and 2013, the accelerated depreciation facility for investments in environment-improving assets is temporary limited to 75% of the total (investment) costs. As of 1 January 2014, this percentage will be 100%.

Accelerated depreciation also is available for certain other designated assets, for example, investments of starting entrepreneurs.

The Netherlands

Investment costs minus residual value of sea-vessels that are operated mainly from the Netherlands may be depreciated straight-line over five years. Instead of accelerated depreciation, these taxpayers may choose immediate taxation (*see Tonnage tax regime in the Taxes on corporate income section*).

As a temporary provision to stimulate the economy, companies may depreciate, under certain conditions, the value of assets bought and investments made in 2009, 2010, and 2011 in two years (or more), provided that the assets are not used formerly and the assets are not meant to be mainly put at the disposal of third parties, directly or indirectly. Further, the asset has to be brought into use before 1 January 2012, 1 January 2013, or 1 January 2014, respectively. This temporary provision is not extended to investments made in 2012.

The temporary possibility for accelerated depreciation, however, is prohibited for, among other things, buildings; ground, road, and hydraulic works; cars (except environmentally very clean and efficient cars); and intangible fixed assets. It is possible to depreciate up to 50% of the asset's value in the year of investment. The remainder may be depreciated, without the 50% limitation, in subsequent year(s). The annual amount to be depreciated before the asset has come into use is limited to the actual payments or investments made.

Anti-abuse rules regarding interest and loans

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction as well as the loan, or of taxation of the interest in the hands of the recipient at an effective tax rate that is considered adequate by Dutch standards, the interest may be deductible.

Furthermore, interest paid on certain profit participating loans will be qualified as a dividend and will not be tax deductible. Interest received upon these loans may meet the definitions for the participation exemption if the creditor also holds a qualifying participation in the debtor. Intra-group conduits may be denied a credit of foreign WHT with respect to royalties or interest received if no economic risk is deployed.

If the interest payment to a group company relates to a loan that is directly or indirectly granted by a group company in order to finance an acquisition or capital contribution, the interest will be deductible only if the loan and the underlying transaction are based predominantly on sound business considerations or if the interest received is effectively and sufficiently taxed.

When the debt ultimately is financed externally (outside the group) and a direct relationship exists between the internal debt and the ultimate external financing, it can be substantiated that there are sound business reasons for the loan. Furthermore, the use of tax losses or similar relief claims by the recipient of the inter-company interest, may affect adversely the deductibility of the interest paid. Also the law states that the interest deduction related to indebted dividend distributions, paid back capital and capital contributions is not only possible in case of sound business reasons but also if the interest is taxed in the hands of the creditor at an effective tax rate that is considered adequate by Dutch standards. The latter requirement means that the interest needs to be subject to an effective tax rate of at least 10% over taxable profits determined according to Dutch standards. For the determination of 'a taxable base according to Dutch tax standards' the tax base limitation for the innovation box is not taken into account.

If the taxpayer makes a reasonable case that the interest is taxable at an effective tax rate of at least 10%, the tax authorities, nevertheless, have the option to substantiate that either the liability or the corresponding transaction is not based on sound business reasons. The tax authorities also have the option to substantiate that the liability is incurred in order to compensate losses or other rights that were formed in that year or that will be formed shortly thereafter. This is also applicable to existing loans.

As of 15 November 2011, deduction of interest (including costs and currency exchange results) on excess acquisition debt is restricted if the acquired company subsequently joins a Dutch fiscal unity with the taxpayer. The acquisition debt is considered excessive in so far as it exceeds 60% of the acquisition price. The interest expenses may only be deducted from the acquiring company's 'own profits', meaning that the profits of the target company that was added to the fiscal unity are not taken into consideration. The restriction is not applicable if the interest on the debt does not exceed EUR 1 million. Contrary to the other existing interest deduction restrictions illustrated above, this new measure also relates to interest on loans obtained from third parties.

Provision for bad debt

It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

Charitable contributions

Charitable contributions are deductible if certain conditions are met. The gift must be documented in writing and contributed to a qualifying charity (ANBI or SBBI). The deductible amount may not exceed 50% of the taxable profits, with a maximum of EUR 100,000.

Limited deductibility of costs relating to remuneration by way of shares

Any remunerations by way of shares, profit-sharing certificates, option rights on shares, or similar rights are not deductible. However, grandfathering rules exist for situations where option rights have been granted to employees before 24 May 2006.

Costs related to so-called stock appreciation rights for employees that earn an income which exceeds EUR 500,000 are not deductible, as a result of tax legislation on 'excessive' remuneration.

Fines and penalties

Most criminal fines and tax penalties are not tax deductible. This applies, for instance, to fines imposed by a Dutch criminal judge, administrative fines, disciplinary fines, and penalties from a European institution.

Taxes

Certain taxes, such as the tax on insurance transactions, are deductible. Tax paid on the transfer of immovable property must be included in the cost price and taken into account in the course of normal depreciation. The corporate tax itself is not deductible.

Other significant items

Deduction of certain expenses (e.g. costs for food, drink, and entertainment) paid by employers for employees are not deductible, in part. These costs are often referred to as mixed costs. The non-deductible portion is 0.4% of the total taxable wages of all employees but never less than EUR 4,400 per year. Alternatively, the employer may choose to deduct only 73.5% of the actual expenses.

The Netherlands

Net operating losses

Tax losses can be carried back one year and carried forward to nine years. This also applies to start-up losses.

With regard to losses arising in the years 2009, 2010, and 2011, corporate taxpayers may opt for a temporary extension of the carryback period for losses from one to three years. This option, however, also means that the maximum period for loss carryforward will be limited to six years (instead of nine). Furthermore, the extended measure is limited to EUR 10 million loss carryback per extra year.

Complex rules may prohibit the utilisation of net operating losses after a change of 30% or more of the ultimate control in a company. Furthermore, limitations exist on loss utilisation for holding/finance companies. Based on these rules, losses incurred by a mere holding or group finance company can be offset only against holding or finance income in preceding and following years, provided that certain strict conditions are met. These conditions are meant to counter tax planning, whereby, the Dutch company concerned acquires (e.g. by way of equity contribution or exchange) other assets that enhance its income streams and its capacity to make use of the losses. Companies carrying out significant other activities (with 25 or more full-time employees) are, in principle, unaffected by these loss relief restrictions.

Payments to foreign affiliates

A Dutch corporation generally can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, to the extent that the amounts are not in excess of what it would pay an unrelated entity (i.e. arm's-length principle). Dutch companies are obliged to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices.

Group taxation

Fiscal unity regime

A parent company and its Dutch-resident subsidiaries (if the parent owns at least 95% of the shares) may, under certain conditions, file a tax return as one entity (fiscal unity). Group taxation is available for companies having their place of effective management in the Netherlands, both for Dutch tax and treaty purposes.

The main feature of the fiscal unity is that profits of one company can be offset against losses of another company forming part of that fiscal unity. Furthermore, inter-company transactions are eliminated.

In February 2010, the European Court of Justice (ECJ) decided that the Dutch fiscal unity regime does not violate EU law (the freedom of establishment), insofar as it disallows a cross-border fiscal unity. However, the ECJ has not yet explicitly dealt with the effects of the fiscal unity regime, other than cross-border loss utilisation, such as the transfer of assets between group companies without immediate taxation and the use of 'final losses'. The Dutch Supreme Court will possibly deal with those issues at a later stage.

Transfer pricing rules

Based on a general transfer pricing provision in the corporation tax law, all transactions between related parties must be at arm's length. Furthermore, a specific transfer pricing provision exists with respect to the transactions of an interest and royalty conduit

company. Dutch companies are obliged to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices. If a transaction between related parties is not at arm's length, the taxable income may be corrected by the tax authorities. Moreover, transactions that do not meet the arm's-length test may constitute a contribution of informal capital or a hidden profit distribution.

On the basis of a decree of the State Secretary for Finance regarding transfer pricing, companies may request an advance tax ruling (ATR) and an advance pricing agreement (APA). An ATR may be requested on the classification of activities and an APA may be required on the classification of activities and the arm's-length character of the transfer price.

Thin capitalisation

Thin capitalisation rules limit the deductibility of interest paid on intra-group debts. These rules apply to all Dutch companies that are part of a domestic or international group of companies. The allowed debt-to-equity ratio is 3:1, based on the average of the tax equity at the beginning and at the end of the year. A higher ratio may apply at the request of the taxpayer if the group to which the Dutch company belongs has, according to the financial statements, a higher, worldwide debt-to-equity ratio. Interest paid on loans exceeding the 3:1 ratio is disallowed only to the extent it exceeds inter-company interest received. The deduction of interest paid on genuine third party loans is not limited by the thin capitalisation rules.

Tax credits and incentives

Foreign tax credit

See *Foreign income in the Income determination section* for a description of the foreign tax credit regime.

Small investments

There is a system of deductions for small investments, the so-called small scale investment deduction. To calculate this annual deduction, investments of more than EUR 450 each are totalled to determine the percentage of the deduction.

Total of investments (EUR)	Deduction
0 to 2,300	0
2,301 to 55,248	28% of the value of the total of small investments
55,249 to 102,311	EUR 15,470
102,312 to 306,931	EUR 15,470 minus 7.56% of the amount exceeding EUR 102,311
Above 306,931	No deduction

Investments in energy-efficient assets

For investments in energy-efficient assets, there is a deduction from corporate income of 41.5% of the value of the total annual amount of investments exceeding EUR 2,300, up to and including EUR 118 million.

Investments in environmental assets

For investments in certain new environmental improving assets exceeding EUR 2,300 per calendar year (with a maximum of EUR 25 million per taxpayer), a deduction from

The Netherlands

corporate income of 36%, 27%, or 13.5% exists (in 2011, 2012, and 2013), depending on the ministerial classification of the assets. Prior to 2011 and as of 2014, the deduction was/will be 40%, 30%, or 15%, depending on the type of investment.

New technology

Wage costs

Conducting certain R&D activities on applied new technology is subsidised by a reduction of wage tax to be paid on wages of employees engaged in R&D of technologically new products. The subsidy accrues to the employer when the employee is credited for the normal amount of wage tax. The amount of the reduction was substantially raised for the years 2009 (retroactively), 2010, and 2011 to stimulate the economy. For the year 2012, the reduction of the payroll tax and social security contributions amounts to 42% of the first EUR 110,000 in R&D wage costs (first bracket) and 14% of the excess costs. The benefit for each employer (or group of companies) may not exceed EUR 14 million per year.

To obtain the relief under the R&D incentive programme, taxpayers must file an electronic/online application with the so-called *Agentschap NL* (NL Agency), a department of the Ministry of Economic Affairs. The taxpayer will receive an R&D declaration. The budget for this subsidy is fixed, so the amount of the subsidy is dependent on budget availability. Note that self-developed and utilised software falls within the scope of the R&D incentive under certain conditions.

Other costs

In addition to the existing R&D facilities, a new R&D deduction is introduced as of 1 January 2012.

For 2012, the R&D deduction amounts to 40% of the costs (other than wage costs) and expenses directly related to R&D activities performed by the taxpayer. An expense of EUR 1 million will be taken into account over a period of five years, 20% each year.

Taxpayers must file an electronic/online application with the so-called *Agentschap NL*. The request must be filled together with the application for the R&D declaration. Application is first possible as of 1 May 2012.

Withholding taxes

Dividends from Dutch corporations are generally subject to a 15% Dutch dividend WHT. In general, this does not apply to the Dutch cooperative (i.e. 'co-op') in a business driven structure, a widely used vehicle for holding and financing activities.

The Netherlands does not levy a WHT on interest and royalty payments.

Domestic corporations are required to withhold taxes as follows:

Recipient	Dividends (%) (1)
Resident corporations	0/15
Resident individuals	15
Non-resident corporations and individuals:	
Non-treaty situations	15

Notes

1. A 0% WHT rate applies to payments to a resident corporation when its shareholding qualifies for the participation exemption and the shares form part of a company whose activities are carried on in the Netherlands. However, dividend WHT may be levied on certain profit participating loans.
2. The lower rate applies if the foreign company owns directly at least 25% of the capital of the Dutch company.
3. The 5% rate is applicable if the foreign company directly owns 10% of capital of the Dutch company. The 0% rate is applicable if the dividend originates from ordinary taxed profits and the dividend is tax exempt in the hands of the recipient.
4. Based upon the treaty concluded with former Yugoslavia.
5. Negotiations on (revisions of) tax treaties are currently pending with Angola, Aruba Australia, Belgium, Brazil, Chile, China, Colombia, Costa Rica, Curaçao, Czech Republic, Ethiopia, France, Germany, India, Indonesia, Kenya, New Zealand, Poland, Saint Martin, Singapore, Slovak Republic, and Spain.
6. Indicates that this country is a member state of the European Union. The EU Parent/Subsidiary Directive applies from 1 January 1992. According to the Directive, dividends paid by a Dutch company (BV or NV) to a qualifying parent company resident in another EU member state must be exempt from Dutch WHT, provided certain conditions are met. Among other things, the EU parent company must hold at least 15% (from 2009, the EU parent must hold 10%) of the Dutch dividend-paying company's capital (or, in certain cases, voting rights) for a continuous period of at least one year. A provisional exemption from dividend WHT will apply from the start of the one-year holding period. The exemption will be cancelled retroactively if, following the dividend distribution, the one-year holding requirement is not actually met. The Dutch dividend-distributing company must provide to the Dutch tax authorities a satisfactory guarantee for the payment of dividend WHT that, but for the provisional exemption, would be due. The exemption is also applicable if the parent company is a resident of a EU member state and owns at least 10% of the (voting) shares in the Dutch company but only on the basis of reciprocity (Finland, Germany, Greece, Luxembourg, Spain, and United Kingdom). Should the WHT exemption not be available under the EU Parent/Subsidiary Directive, the treaty rate(s) set out in the right-hand side of the same column (following 'or') will apply.
7. The lower rate applies if the foreign company owns, directly or indirectly, at least 25% of the capital of the Dutch company.
8. The lower rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company.
9. The 0% rate applies if the foreign company directly owns at least 50% of the capital of the Dutch company, or invested more than EUR 250,000 in the Dutch company or owns directly 25% of the capital of the Dutch company and has a statement indicating that the investment in Dutch capital is, directly or indirectly, guaranteed by the government of Belarus.
10. The 5% rate applies if the foreign company owns, directly or indirectly, at least 25% of the capital or at least 10% of the voting rights in the Dutch company.
11. The treaty is not applicable for Hong Kong and Taiwan.
12. The lower rate applies if the foreign company owns at least 25% of the voting shares of the Dutch company.
13. The lower rate applies if the foreign company owns at least 25% of the voting rights in the Dutch company.
14. The 5% rate is applicable if the Italian company owns at least 50% of the voting shares in the Dutch company for a continuous period of at least 12 months prior to the date chosen for distribution of a dividend. The 10% rate is applicable if the Italian company owns at least 10% of the voting shares in the Dutch company for the continuous period mentioned above. In other cases, the dividend WHT rate is 15%.
15. The 5% rate applies if the foreign company owns at least 10% of the voting shares of the Dutch company for a continuous period of at least six months immediately before the end of the book year to which the dividend distribution relates. No WHT is levied if the foreign company owns directly or indirectly at least 50% of the voting power in the Dutch company distributing the dividends for a period of six months. Also, no WHT is levied if the foreign company is a pension fund.
16. The lower rate applies if the foreign company owns, directly or indirectly, at least 10% of the capital of the Dutch company.
17. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or if it has invested more than 1 million United States dollars (USD) in the Dutch company, insofar as the government of Kazakhstan has guaranteed the investment; the 5% rate applies if the recipient company owns at least 10% of the capital of the paying company.
18. These rates do not apply to dividend payments to Luxembourg '1929' holding companies.
19. The dividend article of the treaty is not applicable anymore. The national WHT rate is applicable.

The Netherlands

20. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company and invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company owns directly 25% or more of the capital of the Dutch company. The 15% rate is applicable on portfolio investments.
21. The rate is 15% unless the dividend is paid to a company holding at least 25% of the paid-up capital in the Dutch company. In this latter case, the WHT rate will be reduced to: (i) 5% if the dividends received are subject to a profits tax in the other state of at least 5.5% on the dividend or (ii) 7.5% if the profits tax is less than 5.5%. The combined CIT of the other state and Dutch dividend WHT for participations of at least 25% must not exceed 8.3%. Depending on the tax percentage levied in the other state, the Dutch dividend WHT will be restituted accordingly.
22. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns 10% of the capital of the Dutch company. The 0% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% of the capital of the Dutch company.
23. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% in the capital of the Dutch company with a minimum investment of at least EUR 75,000.
24. The Netherlands applies the treaty with the former Soviet Union unilaterally to Kyrgyzstan, Tajikistan, and Turkmenistan.
25. The lower treaty rate applies if the Spanish company owns 50% or more of the capital of the Dutch company or if the Spanish company owns 25% or more of the capital of the Dutch company and another Spanish company also owns 25% or more of that capital.
26. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company owns directly 20% or more of the capital of the Dutch company.
27. The lower rate applies if the foreign company owns directly at least 10% of the voting rights in the Dutch company. On 8 March 2004, the Netherlands and the United States signed a protocol amending the applicable tax treaty. Based on this protocol, the WHT on dividends will be reduced to 0% if the receiving company owns 80% or more of the voting power of the distributing company, provided that certain other conditions are also met. This reduction of the dividend WHT has taken effect as of 1 January 2005.
28. The 5% rate is applicable if the foreign company owns directly 25% or more of the capital of the Dutch company. The 0% rate is applicable if the dividend for that company qualifies for the participation exemption in the Netherlands. The 15% rate is applicable to portfolio dividends.
29. The 5% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or invested more than USD 10 million in the Dutch company. The 7% rate applies to the foreign company owning, directly or indirectly, at least 25% of the capital of the Dutch company.
30. No dividend WHT is due provided the share in the participation is at least 50% and at least USD 250,000 capital is paid in, in the participation. A dividend WHT of 5% is due if the share in the participation is at least 25%.
31. A dividend WHT of 5% is due if the share in the participation is at least 10%. No dividend WHT is due provided the share in the participation is at least 50% and at least USD 2 million capital is paid in, in the participation.
32. Based upon most-favoured nation principle.
33. The 0% rate applies if a company controls at least 10% of the voting power of the Dutch company paying the dividends. The 15% rate applies to dividends arising from income from immovable property, distributed by certain tax exempt real estate investment vehicles (e.g. REITs or FBIs).
34. In case a Thai company holds at least a 25% share in a Thai company, the Dutch dividend WHT rate is 5%.
35. If a share of at least 50% is held by a company, no dividend WHT is due. If the share the company holds is less than 50%, 5% dividend WHT is due.
36. As of 29 December 2004, Switzerland and the European Union concluded a treaty in the light of the EU savings directive. The treaty, amongst others, contains a clause that no dividend tax is withheld if certain requirements are met. The main requirements are that a shareholding of at least 25% is held directly for a period of at least two years and both corporations are not subjected to a special tax regime. Please note that even though the treatment of dividend appears to be equal to the treatment on the basis of the EU-parent subsidiary directive, the directive is in fact not applicable to Switzerland.
37. The 0% rate applies if the foreign company owns directly at least 5% of the capital of the Dutch company.
38. The 5% rate applies if the foreign company owns directly at least 25% of the capital of the Dutch company with a minimum investment of at least EUR 200,000 in the Dutch company.
39. The 0% rate applies if the foreign company directly owns at least 7.5% of the capital of the Dutch company.
40. The WHT rates are based on the Dutch '*Belastingregeling voor het Koninkrijk*'.
41. The WHT rates for the Caribbean Netherlands are based on the Dutch '*Belastingregeling voor het land Nederland*'.
42. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 10% (15% threshold for the Panama Treaty) of the shares of the Dutch company, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarter owning at least 10% of the shares of the Dutch company, or a pension fund.

43. The 0% rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company, is a pension fund, or, as far as Switzerland is concerned, the beneficial owner is a social security scheme.

Tax administration

Taxable period

Generally, the tax year is equal to the calendar year. However, corporate taxpayers may deviate from this by adopting a different financial year.

Tax returns

Tax returns must be filed either every calendar year or every financial year. The due date is generally five months after the end of the company's fiscal year. This filing due date may be extended upon request by the taxpayer. The Dutch tax authorities generally make a provisional assessment before issuing the final assessment after a full examination of the return.

Payment of tax

The CIT assessed must be paid within two months of the date of the assessment. In addition, provisional assessments are issued for the current tax year on the basis of the prior year's taxable income.

Audit cycle

Corporate taxpayers might be subject to regular audits by tax inspectors. This forms part of the so-called vertical monitoring tasks of the national tax authorities. In recent years, there has been a tendency towards a more enhanced co-operation between tax authorities and taxpayers in the Netherlands (*see Horizontal Monitoring in this section below*). Part of this trend is that there are to be less audits in retrospect.

Statute of limitations

Under certain conditions, the tax administration can impose an additional assessment within five years from the year in which the tax debt originated (if the filing due date was extended on request, this period is added). In case of income from abroad, the period for additional assessment is extended to 12 years.

Advance pricing agreement (APA)/Advance tax ruling (ATR)

Taxpayers are able to obtain (legal) certainty concerning their CIT positions. They may request the Dutch tax authorities to conclude an APA with respect to the transfer pricing of controlled transactions. Taxpayers may also request the Dutch tax authorities to provide an ATR with respect to the CIT implications of a (contemplated) set of transactions.

Horizontal monitoring

If the taxpayer is willing, the Dutch tax authorities, in certain cases, shift their method from vertical monitoring to horizontal monitoring. Emphasis is placed on cooperation and on the responsibilities of the parties involved, instead of retrospectively control. Horizontal monitoring is based on mutual trust, understanding, and transparency between the taxpayers and the Dutch tax authorities. It aims at reducing administrative burdens and providing legal certainty in advance. Taxpayers need to have a solid Tax Control Framework.

Significant developments

Corporate tax rate reduced

The corporate tax rate has been reduced from 30% to 28% with effect from the beginning of the 2011/12 income year, which, for most companies, is 1 April 2011. The reduced rate applies to all resident and non-resident companies, including branches.

There will be a two year transition period to allow tax paid at 30% to be imputed to dividends at a rate of 30%.

Gift duty abolished

Gift duty was abolished with effect from 1 October 2011.

Changes to the thin capitalisation rules

The safe harbour threshold for the inbound thin capitalisation rules has been reduced from 75% to 60% effective from the beginning of the 2011/12 income year.

Broadly, New Zealand's inbound thin capitalisation rules limit the scope for non-residents to fund debt against their New Zealand operations and thereby reduce tax paid in New Zealand. Under the previous rules, New Zealand taxpayers controlled by non-residents were denied an interest deduction in New Zealand to the extent that their debt percentage (total group debt/total group assets) exceeded both 75% (now 60%) and 110% of the worldwide group's debt percentage.

The Taxation (International Investment and Remedial Matters) Act 2012 makes several additional changes to the thin capitalisation rules, including:

- Extending the thin capitalisation rules to New Zealand residents with foreign investment fund (FIF) interests that use the attributable FIF income method (i.e. the active income exemption) or the exemption for Australian resident FIFs. The changes apply to income years beginning on or after 1 July 2011.
- Introducing a new test to give certain New Zealand-based groups with high levels of arm's-length debt the option of using a ratio of interest expense to pre-tax cash flows, rather than a debt-to-asset ratio under the current test. The test applies retrospectively for income years beginning on or after 1 July 2009.
- Removing the application of the thin capitalisation rules for non-resident companies that do not carry on a business through a fixed establishment in New Zealand, if all their New Zealand-sourced income that is not relieved under a double tax agreement (DTA) is non-resident passive income (i.e. dividends, royalties, or interest). The changes apply for income years beginning on or after 1 July 2011.

The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Bill also proposes to increase the minimum equity threshold of a foreign-held bank from 4% to 6% of the group's risk-weighted exposures.

Removal of depreciation on certain buildings

The depreciation rate for buildings with an estimated useful life of 50 years or more has been reduced to 0% from the 2011/12 income year.

Changes to the tax treatment of qualifying companies and new 'look-through companies'

New legislation took effect, from 1 April 2011, which does the following:

- Creates a new entity, the 'look-through company' (LTC), which is treated as a partnership for tax purposes. Income, expenses, tax credits, and losses of an LTC are able to be passed on to shareholders, subject to the application of a loss limitation rule.
- Allows existing qualifying companies (QC) and loss attributing qualifying companies (LAQCs) to continue to use the current QC rules but without the ability to attribute losses to shareholders until a review of the dividend rules for closely held companies has been completed.
- Allows existing QCs and LAQCs to elect to be subject to the new LTC rules, or to transition to a new structure such as a partnership, limited partnership, or sole trader, without incurring a tax cost.

Goods and services tax (GST)

Compulsory zero-rating (GST at 0%) applies to any supply involving land between two GST-registered parties from 1 April 2011, if:

- the purchaser acquires the land with the intention of using it to make taxable supplies, and
- the land is not intended to be used as a principal place of residence for either the purchaser or an associate.

Amendments have also been made to the change-in-use rules and the GST boundary between commercial and residential accommodation as well as the GST treatment of transactions involving nominee situations (e.g. where a named purchaser under a sale and purchase agreement directs a third party to take title). These rules apply from 1 April 2011.

The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Bill introduced in September 2011 proposes an amendment to the GST rules to provide that late payment fees are subject to GST. This development will broaden the GST tax base to include fees that have never been subject to GST as they are not part of the price for the underlying goods and services.

Other proposed changes to GST rules include:

- A new rule precluding liquidators, receivers, and administrators from changing their GST accounting basis from payments to invoice basis to claim GST deductions (effective from the date of enactment).
- Confirmation that an assignment of a commercial lease can be zero-rated under the compulsory zero-rating (CZR) regime.

New Zealand

- Amendments to the nomination rules for non-land transactions to ensure a GST-registered contractual purchaser can claim a GST deduction even if the nominee is not GST-registered.

The government has not yet confirmed when these proposed changes will apply from if enacted.

International tax rules - changes to the FIF regime

The Taxation (International Investment and Remedial Matters) Act 2012 aligned the FIF rules with the controlled foreign company (CFC) rules where a New Zealand resident has an interest of 10% or more in a FIF. The changes apply to income years starting on or after 1 July 2011.

The Act also repeals the availability of the branch equivalent and accounting profits methods for calculating FIF income. Taxpayers that can access the information to prepare a branch equivalent calculation will be taxed on a notional income amount, even if the FIF is making losses.

Tax treatment of interests of 10% or more in a FIF

The Act repeals the current grey list exemption and replaces it with an Australian exemption.

The active business test that was previously only available for CFCs has been extended to apply to FIFs. This means that no income is taxable for FIFs that have passive income of less than 5% of their total gross income.

If a FIF fails the active business test, only its passive income is taxable.

The active business test may be applied to a group of foreign companies using consolidated accounting information where a FIF holds 50% or more of the voting interests in lower tier FIFs, regardless of jurisdiction. This differs from the CFC rules, which only allow CFCs in the same jurisdiction to be grouped and requires minority interests to be removed.

Investors who do not have enough information to perform the required calculations are able to use one of the attribution methods available for FIF interests of less than 10%, subject to certain restrictions.

Tax treatment of interests of less than 10% in a FIF

The active income exemption is not available. The default income attribution method will continue to be the fair dividend rate (FDR) method or the cost method if no market value is available for the FIF interest.

The comparative value (CV) method is also available for individuals and trustees. The CV method must be used for non-ordinary shares. If the CV method cannot be applied, the deemed rate of return method must be applied.

Revaluation of inherited FIF interests

The Act also revalues interests in grey list companies inherited before 1 April 2007 (i.e. when the grey list was abolished) to market value at the date the Act was enacted (i.e. 7 May 2012). The change is intended to prevent situations where a person has inherited investments in a FIF with a significant market value but is not required to attribute any FIF income as the investments fall under the *de minimis* threshold because the cost to the investor was nil or less than 50,000 New Zealand dollars (NZD).

Double tax agreements (DTAs)

Hong Kong - New Zealand DTA

A new DTA between Hong Kong and New Zealand came into force on 9 November 2011. The DTA brings withholding tax (WHT) rates into line with rates currently in operation with the United States (US) and Australia. The DTA applies in New Zealand for WHTs from 1 April 2012. In respect of all other taxes, the DTA applies in New Zealand for income years beginning on or after 1 April 2012.

Turkey - New Zealand DTA

A new DTA between Turkey and New Zealand came into force on 28 July 2011. The DTA is effective in New Zealand for WHTs from 1 January 2012. In respect of all other taxes, the DTA applies in New Zealand for income years beginning on or after 1 April 2012. In Turkey, the DTA is effective generally for taxable periods beginning on or after 1 January 2012.

Changes to Mexico and Chile DTAs

Lower non-resident WHT rates on dividends and royalty payments under New Zealand's DTAs with Chile and Mexico apply retrospectively from 1 May 2010. The reciprocal WHT rate on royalties arising in New Zealand and Chile has decreased from 10% to 5%. The WHT rate for dividend payments arising in New Zealand and Mexico has decreased from 15% to either 5% or zero, depending on the size of the investor's shareholding in the company paying the dividend and certain other criteria.

Canada - New Zealand DTA

New Zealand and Canada have signed a new DTA, which will replace the 1980 treaty. The updated agreement will come into force once both countries have given legal effect to it. In New Zealand, this will occur through an Order in Council.

The WHT rate on dividends will reduce from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend. The WHT rate on royalties will reduce from 15% to 10% generally, with a further reduced rate of 5% for royalties relating to copyright, computer software, and others.

DTAs under negotiation

New Zealand is currently negotiating DTAs with Papua New Guinea, the Netherlands, Luxembourg, the United Kingdom, and Vietnam.

Approved issuer levy and bonds

The Taxation (International Investment and Remedial Matters) Act 2012 also introduces an approved issuer levy (AIL) rate of zero (instead of the usual 2%) that applies to interest paid on qualifying bonds that meet certain requirements, including that the securities have been offered to the public, are not asset-backed securities, and are either listed on an exchange registered under the Securities Market Act 1988 or were issued to a group of at least 100 persons with no person (or group of associated persons) receiving 10% or more of the total securities.

The changes apply to interest payments made on or after 7 May 2012 (i.e. the date the Act was enacted).

Repeal of superannuation fund withdrawal tax

Superannuation fund withdrawal tax has been repealed as of 1 April 2011.

New Zealand

Broadly, the superannuation fund withdrawal tax provisions applied to make superannuation funds liable to income tax at the rate of 5% on amounts withdrawn from a superannuation fund prior to retirement to the extent they include employer contributions since 1 April 2000 (and earnings thereon).

KiwiSaver

The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Bill raises the minimum employee and employer contribution rates for KiwiSaver from 2% to 3% of an employee's gross salary or wages. If enacted, the new rates apply from 1 April 2013.

Employer superannuation contribution tax (ESCT)

The exemption from ESCT for an employer's superannuation contributions (up to 2% of salary and wages) to an employee's KiwiSaver and complying superannuation fund accounts was removed from 1 April 2012.

From 1 April 2012, employers must calculate ESCT at a rate equivalent to an employee's marginal tax rate. The default deduction rate (a flat rate of 33%) is removed from 1 April 2012.

Unsuccessful software costs

The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Bill introduces an upfront deduction for expenditure incurred on unsuccessful software development projects in the year that the development is abandoned. If enacted, this amendment will apply retrospectively from the 2007/08 and later income years.

Profit distribution plans (PDPs)

The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Bill proposes to treat shares issued under PDPs as taxable dividends from 1 July 2012. The changes follow the government's announcement in April 2009 that it intended to tax bonus issues of shares distributed under PDPs in the same way as it taxes shares issued under other dividend reinvestment plans.

Taxes on corporate income

New Zealand resident companies are taxed on their worldwide income, and non-resident companies (including branches) are taxed on New Zealand-sourced income.

From the beginning of the 2011/12 income year, the tax rate is 28%. Prior to the 2011/12 income year, the income tax rate was 30%.

Local income taxes

There are no state and municipal income taxes in New Zealand.

Corporate residence

Residence is determined by place of incorporation, location of head office or centre of management, or by directors' exercising control of the company in New Zealand.

Permanent establishment (PE)

Generally, DTAs to which New Zealand is a party define a PE by reference to a fixed place of business through which the company's business is carried on. A PE can also

exist without a fixed place of business if the employees of the overseas company habitually exercise an authority to conclude contracts in New Zealand.

Other taxes

Goods and services tax (GST)

GST is a form of value-added tax (VAT) that applies to most supplies of goods and services. The narrow category of exempt supplies includes financial services. The rate applied to taxable supplies is currently 15% or 0%.

The 0% rate applies to a few supplies only, including exports and financial services supplied to other registered businesses. As of 1 April 2011, the 0% rate also applies to the sale of land between two registered parties if the purchaser acquires the land with the intention of using it to make taxable supplies and the land is not intended to be used as a principal place of residence for the purchaser or an associate.

There is also a 'reverse charge' mechanism that requires the self-assessment of GST on the value of certain services imported by GST registered persons.

Customs duties

Customs duty is levied on some imported goods at rates generally ranging from 1% to 10%.

Excise duty

Excise duty is levied, in addition to GST, on alcoholic beverages (e.g. wines, beers, spirits), tobacco products, and certain fuels (e.g. compressed natural gas, gasoline). The excise duties are levied item-by-item at rates that vary considerably.

Property taxes

Local authorities levy tax known as 'rates' on land within their territorial boundaries. Rates are levied on properties based on the properties' rateable value.

Stamp duty

Stamp duty has been abolished in respect of instruments executed after 20 May 1999.

Accident compensation levy

A statutory-based scheme of accident insurance is funded in part by premiums payable by employers and employees.

Premiums paid by employers (including the self-employed) fund insurance for work-related accidents. Employers are liable to pay a residual claims levy and an employer levy. The employer levy payable is determined according to the industry or risk classification of the employer and the level of earnings of employees.

Fringe benefit tax (FBT)

Employers are subject to a tax-deductible FBT on the value of non-cash fringe benefits provided to their employees. Employers can elect to pay FBT at flat rates (for the 2011/12 income year, 49.25% on attributed benefits and 42.86% on pool benefits, i.e. those benefits that cannot be attributed to a particular employee) applied against the value of the benefit or can attribute fringe benefits to individual employees and pay FBT based on each employee's marginal tax rate.

New Zealand

Under the attribution option, the applicable FBT rate depends on the net remuneration (including fringe benefits) (for the 2011/12 income year, 49.25% on attributed benefits and 42.86% on pool benefits, i.e. those benefits which cannot be attributed to a particular employee) applied against the value of the benefit or can attribute fringe benefits to individual employees and pay FBT based on each employee's marginal tax rate. Under the attribution option, the applicable FBT rate depends on the net remuneration (including fringe benefits) paid to the employee. The attribution calculation treats the fringe benefit as if it was paid in cash and calculates FBT as the notional increase in income that otherwise would have arisen.

The multi rates for the 2012/13 income tax year are:

Net remuneration (NZD)	FBT rate (%)
12,530 or less	11.73
12,531 to 40,580	21.21
40,581 to 55,980	42.86
Greater than 55,981	49.25

Fringe benefits include motor vehicles available for private use, loans at below prescribed interest rates, contributions to medical insurance schemes, and employer contributions to superannuation schemes.

In relation to motor vehicles, employers can value a vehicle on an annual basis either using 20% of the cost price or market value (GST inclusive) of the vehicle (depending on whether the vehicle is owned or leased by the employer) or 36% of the vehicle's tax written down value (GST inclusive). In each case, the FBT value must be reduced proportionately for whole days when the vehicle is not available for private use at any time.

FBT is also applicable to benefits received by an employee from a third party where there is an arrangement between the employer and the third party and where the benefit would be subject to FBT if it had been provided by the employer.

Gift duty

Previously, gift duty was payable by donors (including companies) on gifts which exceed NZD 27,000 in aggregate in any 12-month period. A gift statement had to be filed when the value of the gifts exceeded NZD 12,000 in aggregate in any 12-month period.

Gift duty has been repealed in respect of gifts made on or after 1 October 2011.

Employer superannuation contribution tax (ESCT)

Employers' contributions to an approved superannuation fund (excludes foreign schemes) are subject to ESCT, formally known as 'specified superannuation contribution withholding tax'.

From 1 April 2012, employer contributions to KiwiSaver (or other qualifying registered superannuation schemes) are subject to ESCT at an employee's marginal tax rate. From 1 April 2009 to 1 April 2012, there was an exemption from ESCT for employer contributions to KiwiSaver capped at 2% of the compulsory employer contribution (previously 4%).

Fund withdrawal tax (FWT)

FWT has been repealed as of 1 April 2011.

Prior to 1 April 2011, the FWT provisions made the superannuation fund liable to income tax at the rate of 5% on amounts withdrawn from a superannuation fund prior to retirement, to the extent they included employer contributions since 1 April 2000 (and earnings thereon). FWT applied where the superannuation fund member's income was above NZD 70,000.

Branch income

A non-resident company is taxed on income generated by business wholly or partially carried on in New Zealand. Branch profits are subject to ordinary corporate rates of taxation, and there is no WHT on repatriated profits.

Income determination

Inventory valuation

Inventory must be valued by a cost-valuation method or, where market-selling value is lower than cost, may be valued at market-selling value. If the inventory is shares, it must be valued at cost. Cost is determined under generally accepted accounting principles (GAAP). Acceptable cost flow methods are first in first out (FIFO) or weighted-average cost. Some valuation concessions are available to small taxpayers.

Capital gains

There is no separate capital gains tax. However, the income tax legislation specifically includes various forms of gain that would otherwise be considered a capital gain within the definition of 'income'. Taxable income includes gains on the sale of real estate in certain circumstances and on personal property where the taxpayer acquired the property for resale or deals in such property or where a profit-making purpose or scheme can be deemed or imputed.

Dividend income

Dividends derived from resident companies are exempt where there is 100% common ownership.

Dividends from a foreign company

A dividend derived by a company resident in New Zealand from a foreign company is treated as exempt income, unless it is:

- a dividend on a fixed rate share or a dividend for which the foreign company has received a tax deduction in its home jurisdiction, or
- a dividend from a portfolio FIF (i.e. interests under 10%) that is exempt from FIF rules (e.g. an interest in an Australian listed company).

Dividends from foreign companies derived by taxpayers other than companies are taxable (generally with a credit for any foreign withholding taxes).

Branch equivalent tax account (BETA)

Previously, taxpayers who were subject to tax on attributed foreign income under the CFC or FIF regimes and also taxed or liable to pay foreign dividend payments on dividends could elect to maintain a BETA. A BETA operates in a similar manner to an

New Zealand

Imputation Credit Account and helps avoid the double taxation of attributed foreign income and foreign dividend income.

As most foreign dividends received by New Zealand companies are exempt from tax, most companies therefore no longer need to maintain BETAs. The Taxation (International Investment and Remedial Matters) Act 2012 abolishes BETAs from the income year beginning on or after 1 July 2012.

Other

Previously, the foreign investor tax credit (FITC) regime ensured that foreign investors were not taxed at more than the New Zealand corporate tax rate by effectively rebating the New Zealand withholding tax to the extent that the dividend was fully imputed. As non-resident withholding tax (NRWT) rates have been reduced to nil on most fully imputed dividends, FITC is generally no longer required.

The FITC regime applies only to fully imputed dividends paid to shareholders holding less than 10% of the shares in the company on NRWT rates of at least 15%.

Broadly therefore:

- only portfolio investors (i.e. those with less than 10% holdings) with NRWT rates of at least 15% and supplementary dividend holding companies will qualify for relief under the supplementary dividend rules, and
- a zero rate of NRWT applies to dividends paid to non-portfolio shareholders (i.e. shareholders with more than 10% holdings) and to any other dividends subject to lower tax rates, to the extent they are fully imputed.

The changes affect provisional tax calculations for taxpayers who take into account their anticipated FITC in calculating their provisional tax. Taxpayers should also consider the need to impute dividends where a tax treaty applies to reduce the NRWT rate.

The supplementary dividend regime will cease to apply to holding companies from the 2013/14 income tax year.

Stock dividends

Bonus issues can be taxable or non-taxable. With a taxable bonus issue, the amount capitalised becomes available for tax-free distribution upon a subsequent share cancellation. With a non-taxable bonus issue, the amount capitalised is not available for tax-free distribution upon a subsequent share cancellation.

Draft legislation introduced in August 2011 introduces rules that ensure bonus issues of shares distributed under profit distribution plans (PDPs) are taxed in the same way as shares issued under other dividend reinvestment plans. These rules will apply from 1 July 2012.

Interest income

All income derived by a company is income. The financial arrangement rules may require income for tax purposes to be recognised on an accrual basis. When this is not required (because the person is classified as a 'cash basis' person), interest income is recognised as and when it is received.

Other significant items

The taxation of debt and debt instruments is governed by the financial arrangements rules, a specific set of timing rules. Income or expenditure (including foreign exchange gains and losses) from financial arrangements must be recognised on an accrual basis (generally, yield to maturity or other commercially acceptable method). These rules do not apply to the income or expenditure of a non-resident if the financial arrangement does not relate to a business carried on in New Zealand.

Foreign income

A New Zealand corporation is taxed on foreign passive income as earned. Double taxation with respect to all types of taxable income, including interest, rents, and royalties, is avoided by the recognition of foreign tax credits. Foreign dividends received are exempt from income tax but are subject to the foreign dividend withholding payment. However, new rules exempt most foreign dividends received by New Zealand companies from domestic tax and repeals the foreign dividend payment (FDP) and underlying foreign tax credit rules.

New Zealand does not offer specific tax deferral rules.

Deductions

Depreciation and depletion

For tax purposes, depreciation of property can be computed under the diminishing value method, the straight-line method, or a pooling method. The rates of depreciation depend on the following factors:

- Type of asset.
- Whether the asset is acquired new or second-hand (i.e. used).

Taxpayers must use the economic depreciation rates prescribed by Inland Revenue, together with a 20% uplift in the case of new assets (other than buildings and imported motor vehicles) purchased on or before 20 May 2010 (the 20% uplift has been removed for assets purchased after this date). Fixed-life intangible property (including the right to use land and resource consents) is depreciable on a straight-line basis over its legal life. Any depreciation recovered on the sale of an asset (up to its original cost) is taxable in the year of sale.

The double-declining-balance (accelerated) method applies to most plant and equipment. Under the double-declining-balance method, equipment with an estimated useful life of ten years results in diminishing value depreciation deductions of 20% per annum (i.e. double the straight-line rate of 10% over the equipment's ten-year life). Buildings, certain motor vehicles, high-residual-value property, fixed-life intangible property, and property acquired prior to the introduction of the new rules cannot be depreciated under the double-declining-balance method.

The depreciation rate for buildings with an estimated useful life of 50 years or more is reduced to 0% as of the 2011/12 income year.

Goodwill

Goodwill is generally regarded as a capital asset, thus any payment for goodwill is non-deductible. There is a limited exception for payments made to preserve goodwill.

New Zealand

Start-up expenses

Expenses incurred by a company before the commencement of the business are generally regarded as outgoings of a capital nature and are therefore not deductible. However, certain expenditure on scientific research may be deductible, provided that it is incurred for the purpose of the company deriving assessable income.

Research and development (R&D)

R&D costs are tax deductible. Expenses written off as immaterial and not tested against certain asset-recognition criteria are not automatically deductible for tax purposes.

Interest expense

Generally, interest incurred by most companies is deductible, subject to thin capitalisation rules (*see the Group taxation section*).

Bad debt

A company is allowed a deduction for bad debt in the income year in which the debt is physically written off by the company.

Charitable contributions

A company is allowed a deduction for charitable contributions it makes to listed donee organisations. The list of approved donee organisations is available on Inland Revenue's website. The deduction available for charitable contributions is limited to the company's net income for that income year.

Entertainment expenditure

Entertainment expenditure is generally only 50% deductible. However, entertainment expenditure incurred overseas is 100% deductible.

Legal expenditure

Legal expenditure is deductible if the expenditure is:

- incurred in deriving assessable or excluded income or
- incurred in the course of carrying on a business for the purpose of deriving assessable or excluded income.

However, the expenditure is not deductible if it is of a capital, private, or domestic nature.

Taxpayers with business-related legal expenditure of NZD 10,000 or less are able to deduct the full amount of the expenditure in the year it is incurred, whether or not it is capital in nature.

Fines and penalties

Generally, no deduction is available where a company has incurred expenditure on fines or penalties paid in breach of statute or regulation. Expenditure on other fines and penalties requires further evaluation before its deductibility can be determined.

Taxes

FBT is deductible, as is GST payable on the value of a fringe benefit.

Net operating losses

Losses may be carried forward indefinitely for offset against future profits, subject to the company maintaining 49% continuity of ownership. There is no loss carryback. A legislative amendment in 2002 ensures that losses of a subsidiary are preserved on a

spinout (i.e. when shares in the subsidiary are transferred to shareholders of its parent company).

Payments to foreign affiliates

A New Zealand corporation can claim a deduction for royalties, management service fees, and interest charges paid to non-resident associates, provided the charges satisfy the 'arm's-length principle', which forms the basis of New Zealand's transfer pricing regime.

Group taxation

Companies that are 66% or more commonly owned constitute a 'group'. Group companies are able to offset losses by election as well as by subvention payment. A subvention payment is a payment made by the profit company to the loss company and is equal to the amount of loss to be offset. The payment is deductible to the profit company and assessable to the loss company. Certain companies subject to special bases of assessment (e.g. mining companies other than petroleum extraction companies) are excluded from the grouping provisions. Branches of non-resident companies may be included, provided they continue to carry on business in New Zealand through a fixed establishment.

Groups of resident companies that have 100% common ownership may elect to be subject to the consolidated group regime. The group is effectively treated as a single company and transfers of assets, dividends, interest, and management fees among members of the group are generally disregarded for tax purposes. The group files a single return and is issued a single assessment. Group members are jointly and severally liable for tax purposes.

Losses incurred by a dual-resident company are not available for offset by election or subvention payment.

Transfer pricing

The transfer pricing rules are based on Organisation for Economic Co-operation and Development (OECD) principles and require taxpayers to value for tax purposes all cross-border transactions with associates on an arm's-length basis.

The transfer pricing rules apply to arrangements for the acquisition or supply of goods, services, money, intangible property, and anything else (other than non-fixed rate shares), where the supplier and acquirer are associated persons. Similar rules apply to the apportionment of branch profits.

Various methods are available for determining the 'arm's-length consideration'. The taxpayer is required to use the method that produces the most reliable measure of the amount that independent parties would have paid or received in respect of the same or similar transactions. Inland Revenue has published guidelines that make it clear that documentation is required to support a taxpayer's transfer prices.

Thin capitalisation

'Inbound' thin capitalisation rules apply to New Zealand taxpayers controlled by non-residents, including branches of non-residents. The aim of the rules is to ensure that New Zealand entities or branches do not deduct a disproportionately high amount of the worldwide group's interest expense. This is achieved by deeming income in New

New Zealand

Zealand when, and to the extent that, the New Zealand entities in the group are thinly capitalised (i.e. excessively debt funded).

The 'outbound' thin capitalisation rules are intended to operate as a base protection measure to prevent New Zealand residents with CFC investments from allocating an excessive portion of their interest cost against the New Zealand tax base.

To reduce taxpayer compliance costs, the outbound thin capitalisation rules do not apply when the New Zealand taxpayer has:

- 90% or more of their assets in New Zealand or
- less than NZD 250,000 of interest deductions.

Further concessions are available to taxpayers who do not fall below the above thresholds. If the taxpayer's interest deduction and dividends paid for fixed rate shares (the finance cost) is below NZD 1 million, no apportionment of deductible interest is required. If the finance cost is above NZD 1 million, but below NZD 2 million, the apportionment is an adjustment.

An apportionment of deductible interest is required under the thin capitalisation rules when the debt percentage (calculated as the total group debt/total group assets of a New Zealand entity or group) exceeds both:

- 75% (for 'inbound' thin capitalisation, the 75% threshold is reduced to 60% from the beginning of the 2011/12 income year) and
- 110% of the worldwide group's debt percentage.

The use of the debt-to-asset ratio differs from most thin capitalisation models, which apply to an entity's debt-to-equity ratio. All interest (both related and unrelated party) is subject to apportionment.

Foreign-owned banks operating in New Zealand are subject to specific thin capitalisation rules that deem income if the bank does not hold a level of equity equivalent to 4% (draft legislation proposes that this threshold increase to 6%) of their New Zealand banking risk-weighted assets. In addition, banks are required to have sufficient equity to equity fund offshore investments that do not give rise to New Zealand taxable income in full.

Controlled foreign companies (CFCs)

The CFC regime imposes New Zealand tax on the notional share of income attributable to residents (companies, trusts, and individuals) with interests in certain CFCs.

Central to the regime is the definition of a CFC. When five or fewer New Zealand residents directly or indirectly control more than 50% of a foreign company, or when a single New Zealand resident directly or indirectly controls 40% or more of a foreign company (unless a non-associated non-resident has equal or greater control), that company is a CFC. For interests of less than 10%, the investment may be taxed under the FIF regime (*see below*).

For income years starting on or after 1 July 2009, new rules apply to the taxation of foreign companies controlled by New Zealand residents. Under the new rules, a person with an income interest of 10% or more in a CFC does not have attributed CFC income or losses if:

- the Australian exemption applies or
- the CFC passes an active business test.

If the exemptions do not apply, only the CFC's passive (attributable) income is subject to tax on attribution (on an accrual basis).

Active business test

A CFC passes the active business test if it has passive (attributable) income that is less than 5% of its total income. For the purposes of the test, taxpayers measure passive and total income using either financial accounting (audited International Financial Reporting Standards [IFRS] or New Zealand GAAP accounts) or tax measures of income.

CFCs in the same country may be consolidated for calculating the 5% ratio, subject to certain conditions.

The active exemption test may also be available to investors with less than 10% interest income in a CFC if certain criteria are satisfied.

Australian exemption

A person with an income interest of 10% or more in a CFC does not have attributed CFC income or a loss if the CFC is a resident in, and subject to income tax in, Australia and meets certain other criteria.

Passive (attributable) income

Attributable, or passive, income is income that is highly mobile and not location-specific (i.e. income where there is a risk that it could easily be shifted out of the New Zealand tax base).

The broad categories of attributable income are as follows:

- Certain types of dividend that would be taxable if received by a New Zealand resident company.
- Certain interest.
- Certain royalties.
- Certain rents.
- Certain amounts for financial arrangements.
- Income from services performed in New Zealand.
- Income from offshore insurance business and life insurance policies.
- Personal services income.
- Income from the disposal of revenue account property.
- Certain income related to telecommunications services.

Taxpayers must disclose interests in CFCs in their annual tax returns. Failure to disclose CFC interests can result in the imposition of penalties.

Foreign investment funds (FIFs)

The FIF regime is an extension of the CFC regime, which subjects persons with interests in certain foreign entities (which are not CFCs) to New Zealand tax. It also applies when the investor does not have a sufficient interest in a CFC to be taxed under that regime.

Common examples of investments classified as FIFs include foreign companies, unit trusts, foreign superannuation schemes, and life insurance policies issued by foreign entities not subject to New Zealand tax.

New Zealand

The FIF rules can be split into two regimes:

- The portfolio FIF rules, which apply to interests of less than 10% in a FIF.
- The non-portfolio FIF rules, which apply to interests of 10% or more that are outside the CFC rules.

Portfolio FIF rules

The portfolio FIF rules underwent significant reform in 2006. The new rules have applied from 1 April 2007. The portfolio FIF rules apply to interests of less than 10% in foreign companies, foreign superannuation schemes, and foreign life insurance policies issued by non-resident life insurers (if the CFC rules do not apply). However, a New Zealand resident does not generally have FIF income when:

- the total cost of FIF interests held by the individual does not exceed NZD 50,000
- the income interest is less than 10% in certain Australian Securities Exchange (ASX) listed companies or certain Australian unit trusts, or
- the CFC rules apply.

There are also exemptions for interests in certain foreign employment-related superannuation schemes. These include interests held by returning residents and new migrants acquired before the person became a New Zealand resident or within the first five years of New Zealand residence.

When an interest is exempt from the FIF rules, distributions are subject to tax on a receipts basis in accordance with normal principles.

The taxable income of a New Zealand resident with an interest in a FIF that does not qualify for one of the exemptions is calculated using one of the following methods:

- Fair dividend rate (FDR).
- Comparative value.
- Cost.
- Deemed rate of return.

The nature of the interest held and the availability of information restrict the choice of method.

Taxpayers must disclose interests in certain FIFs in their annual tax returns. Failure to disclose can result in the imposition of penalties.

Non-portfolio FIF rules

The Taxation (International Investment and Remedial Matters) Act 2012 reforms the non-portfolio FIF rules significantly. The new rules apply to income years starting on or after 1 July 2011. A key feature of the new rules is to extend the active income exemption (which applies for CFCs) to certain non-portfolio FIFs. If the FIF fails the active business test, passive income will be attributed to the New Zealand shareholders. The new rules also repeal the grey list exemption from the FIF rules and replaces it with an exemption for shareholders with a 10% or greater interest in a FIF that is resident and subject to tax in Australia.

When investors do not have sufficient information to perform the calculations required under the active business test (or choose not to apply the active business test), they will be able to use one of the attribution methods for portfolio FIF investments (*see above*). The accounting profits and branch equivalent methods, which were previously available

to calculate FIF income, have also been repealed under the new rules for both non-portfolio and portfolio FIF interests.

Tax credits and incentives

Foreign tax credits

If a New Zealand resident company derives overseas income which is subject to New Zealand income tax, generally the company is allowed a credit for the foreign income tax paid in respect of that income. Generally, the credit is limited to the lesser of the actual overseas tax paid on the overseas income or the New Zealand tax applicable to the overseas income.

Inbound investment incentives

There are limited specific tax incentives designed to encourage the flow of investment funds into New Zealand.

Legislation enacted in 2004 encourages foreign venture capital investment into unlisted New Zealand companies. Gains derived by certain non-residents from the sale of shares (held on revenue account and owned for at least 12 months) in New Zealand unlisted companies that do not have certain prohibited activities as their main activity, are exempt from income tax. The rules apply to foreign investors who are resident in all of the countries with which New Zealand has a DTA (except Switzerland) and who invest into New Zealand venture capital opportunities.

Capital investment incentives

Investment allowances on fixed assets are not available.

Trans-Tasman imputation

Elective rules allow trans-Tasman groups of companies to attach both imputation credits (representing New Zealand tax paid) and franking credits (representing Australian tax paid) to dividends paid to shareholders.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax on gross income, as shown in the table below.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations	33 (1)	28 (1)	0
Resident individuals	33	max 33	-
Non-resident corporations and individuals		(2)

Notes

- Resident WHT applies to both interest and dividends. Unless the recipient corporation holds an exemption certificate, and if the recipient provides a tax file number, the default rate of the interest WHT is 28% (33% prior to 1 April 2011). Recipients can elect for the rate of interest withholding to be 30%. The rate of interest WHT is 30% where the recipient does not provide a tax file number. The rate of WHT on dividends paid is 33%, but the tax is reduced by the aggregate imputation and withholding payment credits attached to the dividend or taxable bonus share. Interest and dividends paid between group companies and in certain other limited circumstances are exempt from the WHT.
- Resident corporations paying interest to non-associated, non-resident corporations and individuals need not withhold tax if they have approved-issuer status and the security under which interest is payable is registered with Inland Revenue. In this case, the resident corporation pays a 2% levy (tax deductible) on the interest payments instead of the WHT otherwise applicable.
- Non-resident WHT is imposed on dividends at the following rates, regardless of the jurisdiction to which the dividends are paid:
 - 0% for fully imputed dividends paid to a shareholder holding 10% or more of the direct voting interests in the company and fully imputed non-cash dividends.
 - 15% for fully imputed cash dividends paid to a shareholder holding less than 10%.
 - 30% in most other cases, subject to any relief available under a DTA.
- Net interest income is subject to reassessment at the company tax rate where the payer and the recipient are 'associated persons', but WHT is the minimum liability. Non-resident WHT is not imposed where the recipient of the interest has a fixed establishment in New Zealand.

5. 10% if the interest received is derived from loans granted by banks or insurance companies. In all other cases, 15%.
6. 10% or 15%, depending on the type of royalty.
7. The government has announced that it is re-negotiating New Zealand's DTA with the United Kingdom.
8. The WHT rate on dividends is reduced from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend and to 0% if the investor holds 80% or more of the shares in the company and meets other criteria.
The rate on interest is generally 10%, although it will drop to 0% for interest paid to lending or finance businesses, provided that the 2% approved issuer levy is paid on New Zealand-sourced interest.
9. The WHT on dividends is reduced from 15% to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 80% or more of the shares in the other company and meets other criteria. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.
10. The standard WHT rate on dividends reduces to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend.
11. New Zealand and Canada have signed a new DTA, which will come into force once both countries have given legal effect to it. The WHT rate on dividends will reduce from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend. The WHT rate on royalties will reduce from 15% to 10% generally, with a further reduced rate of 5% for royalties relating to copyright, computer software, and others.
12. The government signed a Second Protocol in December 2009, which amends the 1981 DTA. Both sides are still working towards completing their procedures for entry into force. Negotiations for a Third Protocol to amend Article 25 (Exchange of Information) of the DTA are currently in progress.
13. The 0% WHT rate applies where the foreign company owns at least 80% of the voting rights in the paying company (directly or indirectly) for 12 months prior to the date the dividend is paid. The 5% rate applies if the foreign company has a direct interest of at least 10% of the voting rights in the paying company.
14. The 0% WHT rate applies to interest paid to or by government organisations or the central bank or is paid in respect of a loan (for a period of at least three years) granted, guaranteed, or insured by such entities.

Tax administration

Taxable period

Tax returns are based on the fiscal year ending 31 March, although other fiscal year-ends are possible if permission is obtained.

Tax returns

The system is one of self-assessment, under which the corporation files an income tax return each year. For those not linked to a tax agent, returns must be filed by 7 July for March balance dates, or by the seventh day of the fourth month following a substituted balance date. The terminal tax due date is extended by two months for taxpayers linked to a tax agent.

Payment of tax

The final assessed tax (terminal tax) is generally payable on the seventh day of the 11th month following the end of that income year or the 13th month following the end of that income year if the taxpayer has a tax agent with an 'extension of time' arrangement. For a standard (31 March) balance date, this means either 7 February or 7 April of the following year.

Provisional tax payments are generally due in three instalments: (1) 28th day of seventh month before balance date, (2) 28th day of third month before balance date, (3) 28th day of month following balance date.

Calculating provisional tax

For the 2012/13 income year (i.e. year ending 31 March 2013), provisional taxpayers have the following four options:

New Zealand

- Where the 2011/12 return of income has been filed, 2012/13 provisional tax can be based on 105% of the 2011/12 residual income tax.
- Where the 2011/12 return of income has not been filed, due to an extension of time for filing, 2012/13 provisional tax can be based on 105% (previously 110%) of the 2010/11 residual income tax, but only for the first two instalments. The final instalment must be calculated based on the first option above.
- Provisional tax can be based on a fair and reasonable estimate of 2012/13 residual income tax.
- The GST ratio option.

The GST ratio option has been introduced to enable smaller taxpayers to align their provisional tax payments with their cash flow and reduce their exposure to use of money interest. The option is intended to benefit those taxpayers with declining, seasonal, or fluctuating income. This option calculates provisional tax by reference to the taxpayer's GST taxable supplies in the relevant provisional tax instalment period.

Taxpayers can also make voluntary payments. Such payments can be made to minimise exposure to use of money interest. A taxpayer choosing to estimate residual income tax is required to take reasonable care when estimating.

When the taxpayer's return of income for the year is furnished, the provisional tax paid for that year is credited against the tax assessed. This results in either a refund or further tax to pay by way of terminal tax.

Where provisional tax paid is less than the amount of income tax deemed due on that instalment date, interest is imposed. If provisional tax is overpaid, interest is payable to the taxpayer. Interest is deductible for tax purposes by business taxpayers, and interest earned on overpaid provisional tax is gross income for tax purposes. The interest rate for unpaid tax is 8.40%, while the rate for overpaid tax is 1.75%.

Tax pooling

Taxpayers are able to pool their provisional tax payments with those of other taxpayers through an arrangement with a commercial intermediary. Tax pooling allows underpayments to be offset by overpayments within the same pool and vice versa.

Tax penalties

An initial late payment penalty of 1% applies if a tax payment is not made on the due date. A further 4% late payment penalty applies if the payment is not made within seven days of the due date. An incremental late payment penalty of 1% is then imposed monthly until payment is made.

Inland Revenue is required to notify a taxpayer the first time their payment is late rather than imposing an immediate late payment penalty. If payment is not made by a certain date, a late payment penalty will be imposed. Taxpayers will be entitled to one notification every two years. After receiving a first warning, the Inland Revenue will not send further notifications for two years, and an initial late payment penalty will be imposed in the normal manner.

Shortfall penalties

Shortfall penalties, calculated as a percentage of the tax shortfall resulting from the action or position taken by the taxpayer in a tax return, may also apply.

There is a 50% discount on certain penalties where the taxpayer has a past record of 'good behaviour' and, in certain circumstances, a cap of NZD 50,000 on shortfall penalties for not taking reasonable care or for taking an unacceptable tax position.

Audit cycle

Inland Revenue maintains an active audit programme across all tax types and taxpayer profiles and regularly publishes information about their compliance focus (see '*Topics of focus of tax compliance*' below). Often, Inland Revenue audits are preceded by a risk review where Inland Revenue requests information in order to evaluate the risk of non-compliance. Where this review detects an issue that requires further inspection, Inland Revenue will then advise that an audit will be commenced.

Statute of limitations

The general rule is that Inland Revenue has four years from the end of the New Zealand income tax year (31 March) in which the return is filed to re-assess the return, unless the return is fraudulent, wilfully misleading, or omits income of a particular nature or source.

Topics of focus of tax compliance

Inland Revenue's compliance management programme

In July 2011, Inland Revenue announced its key areas of focus for 2011/12. These include complex financing arrangements, loss generation and usage, diverting personal income, and the 'hidden economy'.

Tax policy work programme

The focus of the government's tax policy work programme for 2012/13 is on increasing efficiency and fairness in the tax system. Specific areas of focus will include further simplification measures for small and medium businesses, deductibility of 'mixed-use assets', ensuring consistency in the tax treatment of employee benefits, reviewing the tax treatment of New Zealand residents' foreign superannuation, and ensuring deductibility of certain 'black hole' expenditure. Extending the active income exemption to branches and seeking mutual recognition of imputation and franking credits is also on the government's agenda for the next 18 months.

N

Other issues

International Financial Reporting Standards (IFRS)

The relationship between statutory accounting and taxable income is quasi-dependent. The year of final adoption for IFRS was 2007, and the impact on significant areas of tax law is as follows.

Comments on tax regime

New Zealand's determination of taxable income starts with the statutory accounts' accounting profit and then specific tax adjustments are made based on rules for revenue recognition and deductible expenditure in the tax legislation. Changes have been made to the tax treatment of 'financial arrangements' (a defined tax legislative term) to allow for the alignment to the accounting recognition of fair values on such arrangements in specific cases.

Year of adoption cash impact

Mandatory adoption of NZ IFRS accounting standards for most entities (except for small & medium enterprises) applied for balance dates beginning 1 January

New Zealand

2007. Depending on the specific IFRS adoption adjustment, the resulting income or expenditure is taken into taxable income based on the ordinary statutory tax provisions. The key areas, which were changed for tax under IFRS adoption, are the trading stock provisions (which align tax with accounting standards subject to some provisions) and the financial arrangement rules. These rules are very broad and deal with the tax treatment of accrual income or expenditure on debt instruments, debt type instruments, derivatives, etc.

Thin capitalisation

The thin capitalisation rules work on a debt over assets percentage. It relies mostly on the tax legislative definition for debt and the amount disclosed in the financial statements under generally accepted accounting practice as assets (although there are some other measurement alternatives).

Debt versus equity classifications

The classification of debt and equity instruments for tax is dependent on the tax legislative definitions for specific purposes (such as the spreading of any deductions or income where the financial arrangement rules apply, thin capitalisation, etc). Tax applies legal form and does not strictly rely upon the classification applied under IFRS.

Lease versus sale determinations

There are specific tax provisions dealing with finance leases.

Distributable reserves

The level of distributable reserves is based on the company law requirements of solvency and not specifically on the amounts shown as reserves in the financial statements.

Transfer pricing determination

There have been no specific comments released yet by the New Zealand Revenue Authority on the adoption of IFRS impact for transfer pricing.

Financial arrangements

Specific timing rules apply to the recognition for income tax purposes of income and expenditure in relation to financial arrangements, which apply to New Zealand residents or entities carrying on business in New Zealand.

A number of changes to the financial arrangements rules have been enacted to ensure that taxpayers who adopt IFRS can continue to use tax rules that rely on accounting practice. For other taxpayers, the existing tax spreading methodologies continue to apply but without the option of using the financial reporting method.

The new rules include a combination of compulsory methods and elective methods that are available subject to the taxpayer meeting certain qualification criteria. Two new methods (the expected value method and the equity-free fair value method) have been introduced to assist in reducing exposure to volatility that might otherwise arise under IFRS fair value accounting.

Significant developments

There have been no significant corporate tax developments in Nicaragua during the past year.

Taxes on corporate income

Nicaragua has a territorial income tax system under which only income generated in, or that causes effects in, Nicaragua is generally subject to income tax. The corporate income tax (CIT) is imposed on a corporation's profits, which consist of business/trading income, passive income, and capital gains. General business expenses are allowed as a deduction in computing taxable income.

Corporate income tax (CIT) rate

CIT is levied only on domestic-sourced income at a flat rate of the higher of:

- 30% of net taxable income (i.e. gross taxable income less allowed deductions) or
- a definitive minimum tax of 1% on gross income obtained during the fiscal year.

If the company does not have net income, 30% of net income will not be greater than 1% of gross income.

The law establishes the following exceptions to the 1% definitive minimum tax:

- First three fiscal periods of recently incorporated entities.
- Taxpayers whose sales prices are controlled by the government.
- Taxpayers that ceased operations on account of *force majeure*.

Local income taxes

See *Municipal sales and services tax* in the *Other taxes* section.

Corporate residence

In order to be considered as a tax resident, a legal entity must be registered first in the mercantile registry, then before the tax authorities. The legal forms permitted in Nicaragua to constitute a corporation are stock corporations or limited liability companies, either as subsidiaries or branches.

Permanent establishment (PE)

In principle, the Nicaraguan tax system does not recognise any rule for PE.

Nicaragua

Other taxes

Value-added tax (VAT)

VAT is imposed at a 15% rate on the sale of goods, rendering of services, grant of use of assets, and import of goods.

VAT exemptions are available for certain items, including medicine, real estate transfer, sale of used goods, basic food products, credit instruments, tuition, and textbooks and educational supplies.

Taxpayers may recover VAT paid for the purchase of goods and services used to generate other goods and services subject to VAT. This is known as VAT liquidation, which is determined by subtracting VAT credits paid on transactions needed to generate taxable income for VAT purposes from VAT collected on the sales of goods or the rendering of services. Note that VAT paid on transactions to generate non-taxable income for VAT purposes are not allowed as VAT credits.

VAT returns must be filed on a monthly basis, with payment due in full on the same day. Taxpayers registered as high-taxpayers (with annual income greater than 6 million Nicaraguan córdobas [NIO]) must present an advanced bi-weekly VAT return in the first five days after the 15th day of each month and a definite return in the first five days of the following month.

Selective consumption tax

A selective consumption tax is applied to goods that are considered to be non-essential. The tax base is the cost, insurance, and freight (CIF) price for imported items, and the tax is levied and paid only at that stage (based on the list of products published as an appendix to the Fiscal Equity Law and its reforms).

Customs duties

Customs duties relate to the importation of any good within the Nicaragua territory for commercial purposes. The following taxes apply to imports, depending on the product:

- Importation tax (DAI).
- Excise tax (ISC).
- VAT.

Excise taxes

A non-creditable excise tax on tobacco cigarettes applies on imports.

Transfer taxes

Nicaragua's tax system does not impose transfer taxes.

Stamp taxes

Stamp duty is levied on certain types of documents issued in Nicaragua.

Municipal sales and services tax

A monthly 1% tax is levied on all sales of goods and rendering of services in each of the municipalities of the country.

Municipal registration tax

An annual 2% tax is levied by each municipality on the average of income received in the months of October, November, and December of the previous year. In the case of the

incorporation of a new establishment or enterprise, the municipal registration tax is 1% of the capital invested.

Real estate municipal tax

The real estate municipal tax is an annual tax that is levied at a rate of 1% on 80% of cadastral value, as recorded by the government. If the cadastral value is not available, the cost or fiscal appraisal value may be used.

Branch income

Branch income received is subject to the general CIT. The repatriation of income from the branch to the head office in the form of dividends, profits, capital gains, or any other form that suggest the income repatriated is an economic benefit in considered taxable.

Income determination

Taxable income is determined by the sum of all income or gains derived from Nicaraguan sources, less allowable deductions, which generally include all expenses necessary to generate taxable income. Taxable income is computed according to International Financial Reporting Standards (IFRS) and modified as required by Nicaraguan income tax law.

Inventory valuation

Last in first out (LIFO), first in first out (FIFO), and the average cost methods are accepted for inventory valuation purposes. Tax authorities shall authorise the change of a valuation method.

Capital gains and losses

Capital gains and losses are treated as ordinary taxable corporate income. Capital gain transactions that require any annotation in the public registry (e.g. real estate, vehicles) will be subject to a withholding tax (WHT) based on the amount of the transaction, as follows:

From	Good value (USD*)	WHT rate (%)
	Through	
0.01	50,000.00	1
50,000.01	100,000.00	2
More than 100,000.01		3

* United States dollars

Dividend income

Stock dividends paid by Nicaraguan entities to resident or non-resident shareholders are subject to a 10% definitive WHT.

The Equity Tax Law Reform regulations define 'stock dividends' as stock dividends paid as well as the remittance of net income after income tax made by branches to headquarters and any payments considered as advance net income remittance abroad or locally.

Nicaragua

Interest income

Interest received from Nicaraguan source by residents or non-residents of Nicaragua, as well as the interest gained by resident from deposits placed in the national financial system, is subject to a 10% WHT.

Interest earned on government bonds and securities is considered taxable income subject to a 10% WHT.

Foreign income

Business enterprises are subject to CIT only on Nicaraguan-source income.

Deductions

Depreciation

Depreciation must be computed using the straight-line method. Depending on the type of construction and the estimated life of fixed assets, annual rates for depreciation are as follows:

Asset	Rate (%)
Buildings	3/5/10
Vehicles	12.5/20
Plant and equipment	10/15/20
Other assets	10/20

Alternative method of depreciation

Taxpayers under the Temporary Admission for Active Processing (TAP) regime may, at their convenience, request a different depreciation rate (i.e. accelerated depreciation) from tax authorities. Used fixed assets acquired abroad could also be subject to a different depreciation rate.

Goodwill

Goodwill, meaning the excess paid over book value in a transaction, can be deductible for CIT purposes if the capital gain is considered in the seller's CIT return. However, the tax authorities must authorise the tax periods in which the goodwill will be amortised.

Start-up expenses

The Nicaraguan tax system does not recognise start-up expenses.

Interest expenses

A deduction is allowed for any interest paid on loans with national and foreign financial institutions.

In order for interest paid to a non-resident to be deductible, the corresponding 10% WHT must be withheld and paid.

Bad debt

Corporations are allowed a deduction for receivables as an allowance for doubtful accounts as long as there is supporting documentation of the credit, identification documents of the debtor and creditor, and administrative and judicial collection proof.

Charitable contributions

A deduction is allowed, up to 10% of the corporation's income, for charitable contributions made to the government and its institutions, Red Cross, and other organisations.

Compensation

A deduction is allowed for payments made to employees as bonuses or in addition to their salaries or wages.

Life insurance

A deduction is allowed for employee insurance payments made.

Fines and penalties

Penalties or charges made by tax, customs, Social Security, or municipal authorities are not deductible for CIT purposes.

Taxes

In principle, income tax expense is not deductible for CIT purposes. Municipal or local taxes (i.e. real estate tax, monthly sales and services tax, annual registration tax) are deductible from CIT.

Net operating losses

Losses may be carried forward and deducted from future profits, for up to three years. The carryback of losses is not allowed.

Payments to foreign affiliates

Payments made from affiliates to foreign related parties are deductible for CIT purposes, provided the following requirements are met:

- The expenses (i.e. royalties, interest, and services) are needed to generate taxable income.
- The expenses are duly supported (e.g. agreements, invoices, payment receipts).
- The expenses are incurred within the fiscal period.
- The WHT is applied and paid to the tax authorities.

Group taxation

Section 3 of the Equity Tax Law recognises 'economic units' as a taxpayer formed by many entities of one group. However, group taxation is permitted only when previously approved by the tax authorities. The economic group must submit a business case to the Tax Administration justifying the economic reason of their request.

Transfer pricing

The Nicaragua tax system recognises transfer pricing as a method of trading; however, it is not regulated yet.

Thin capitalisation

The Nicaragua tax system does not impose any form of thin capitalisation rules.

Nicaragua

Tax credits and incentives

Foreign tax credit

The Nicaragua tax system does not recognise any form of foreign tax credit.

Tourism incentives

Under present law, and on a case-by-case basis, new companies with tourist activities may request and the government may grant, during the facilities' construction phase, total exemption of customs duties and partial or total CIT exemption for a maximum period of ten years.

Renewable energy incentives

The renewable energy sector is covered by a special law with tax benefits or exemptions in CIT, VAT, customs duties, and municipal tax.

Free trade zones (FTZs)

FTZ industries have a special law with tax benefits or exemptions in CIT, VAT, customs duties, and municipal taxes.

An industrial export zone decree provides a 15-year exemption from CIT to those taxpayers located in certain FTZs. There is a 100% exemption for the first ten years and 60% exemption for the following five years. Additional requirements and provisions apply.

In accordance with the Agreement on Subsidies and Countervailing Measures issued by the World Trade Organization (WTO), by the end of year 2015 all tax exemptions granted to FTZs shall be eliminated. However, Nicaragua falls under the exception of section 27 of this agreement and qualifies as a country listed in Annex VII (for being a developing economy) as a country with per capita gross national product (GNP) of less than USD 1,000, based on World Bank estimates. Due to this exception, it is foreseen that the tax holiday will still apply to FTZ industries in Nicaragua past 2015.

Withholding taxes

Payments to residents

Dividend payments to resident shareholders (corporations or individuals) are subject to 10% WHT.

Payments of royalties to resident individuals or corporations are subject to 2% WHT.

Interest paid to a resident individual or legal entity is subject to 10% WHT.

Professional services provided by an individual are subject to 10% WHT.

Payments on the local acquisition of goods and services are subject to 1% WHT.

Payments to non-residents

Payments of royalties, interest, dividends, and service fees to non-resident corporations are subject to WHT, as follows:

Payment	WHT rate (%)
Royalties	21
Dividends	10
Services provided in general	10.5
Interest:	
Non-financial companies	10
Financial companies	10
TV and Radio programming or subscription	9

Payments of any kind of income to non-resident individuals are subject to WHT of 20%.

In principle, Nicaragua has not signed any agreement or treaty with any country to avoid double taxation.

Tax administration

Taxable period

The standard tax year in Nicaragua commonly ends on 30 June; however, companies can obtain authorisation from the tax authorities in order to change or have a different year-end: 31 March, 30 September, or 31 December.

Tax returns

Without exception, all corporations are required to file CIT returns for a fiscal year within the following three months after the fiscal year end.

Payment of tax

Corporations shall pay fiscal-year income tax in monthly advance payments. The monthly payable amount is calculated as 1% of gross income.

Final CIT payment is due with the final CIT return (i.e. within the following three months after the fiscal year end).

Audit cycle

The tax authority is entitled to conduct a tax audit of the taxpayer when considered necessary. The taxpayer has the obligation to submit before the tax auditor the corporate information and documents related to the generation of income.

Statute of limitations

The statute of limitation in Nicaragua is up to the last four fiscal ended periods.

Significant developments

A new National Tax Policy (NTP) developed in 2010 was re-launched in the first half of 2012 by the federal government of Nigeria. The NTP is now at the implementation stage, and, as a result, a number of changes have been made to existing tax laws and regulations. Notable changes include amendments to the Personal Income Tax Act; Companies Income Tax Act; and Tax Administration (Self Assessment) Regulations 2011. In addition, work is ongoing to further amend the Companies Income Tax Act to introduce transfer pricing regulations and thin capitalisation rules. The tax authorities are also intensifying efforts to implement a gradual move towards electronic tax filing and payments. It is expected that the new cash-less economy policy of the Central Bank of Nigeria will facilitate electronic tax payment. Also, there is an ongoing project to re-write the tax laws in plain English for ease of understanding, interpretation, and application.

Below are some of the recent developments in the tax environment and significant potential changes under consideration.

Amendment to the Companies Income Tax Act

The Fifth Schedule to the Companies Income Tax Act has been amended to cover more bodies to which tax deductible donations can be made. Generally, public institutions or funds established by a society or association for public interest related activities will qualify for tax deductible donations.

In addition, there is a proposed amendment to the Act to, among other things, provide tax incentives for economic growth and creation of employment opportunities.

The proposal, if passed into law, will grant a ten-year tax holiday to any new company established in an area with no electricity, water, or tarred road. Where such facilities provided by government are located at least 10 kms away, the company will be entitled to an investment allowance ranging from 20% to 100% of expenditure incurred in providing such facilities.

Also, the proposal seeks to increase the tax holiday of a new company going into mining of solid minerals or gas utilisation from the current three and five years to five and seven years, respectively.

Tax Administration (Self-Assessment) Regulations

New regulations dated 12 December 2011 have been issued to prescribe rules for self assessment tax filing. The regulations cover all major taxes, including corporate income tax (CIT), petroleum profits tax, personal income tax, value-added tax (VAT), and withholding tax (WHT). Based on the regulations, taxpayers are required to comply

strictly with tax filing and payment deadlines or face sanctions. The maximum number of tax instalments for CIT has been reduced from six to three, while the deadline for the final payment has been reduced from five to two months after the filing due date.

Revised Petroleum Industry Bill

The Petroleum Industry Bill seeks to combine 16 different petroleum laws. The bill, which has been undergoing legislative process for several years, is currently being redrafted. This became necessary due to the emergence of different versions of the bill and to address the major concerns of key stakeholders. The delay in passing the bill into law is estimated to be costing Nigeria billions of dollars annually in foreign direct investment into the oil and gas sector of the economy. The bill aims to ensure transparency, make industry participation more equitable, and maximise government revenue. Once enacted, a two-tier tax system consisting of a CIT and hydrocarbon tax will apply to exploration and production companies.

Industrial Training Fund Act

The Industrial Training Fund Act has been amended to make every employer with a minimum of five employees or annual turnover of 50 million Nigerian naira (NGN) liable to the Fund. Previously, the threshold was a minimum of 25 employees. The required contribution is 1% of payroll defined as the sum total of all basic pay allowances and other entitlements payable within and outside Nigeria to any employee in an establishment, public or private. 'Employees' mean all persons, whether or not they are Nigerians, employed in any establishment in return for salary, wages, or other consideration, and whether employed full-time or part-time and includes temporary employees who work for periods of not less than 30 days.

Where an employer provides verifiable training to its employees in line with guidelines issued by the Fund, a maximum refund of 50% of the amount contributed by an employer to the Fund may be granted.

Tax exemption for all bonds

The proposal to grant a tax waiver on interest on all bonds, including corporate and sub-national bonds, has been enacted into law. The enactment, which was made via the Personal Income Tax (Amendment) Act 2011, is, however, only applicable to individual investors. The waiver to cover corporate investors was included in the fiscal policy of the federal government for the 2012 fiscal year. The waiver is designed to encourage more activities in the bond market and ensure cheaper and stable long-term source of funds for project finance and economic development.

Transfer pricing regulations and thin capitalisation rules

The Federal Inland Revenue Service (FIRS) is set to issue transfer pricing regulations in the second half of 2012. When published, the regulations will be applicable to both local and multinational related party transactions for the financial period commencing after the publication. The regulations are in conformity with the Organisation for Economic Co-operation and Development (OECD) guidelines. Also, the FIRS is planning to introduce thin capitalisation rules to limit the ratio of related party debt-to-equity permissible for tax purposes. However, the rules are not likely to be published until early 2013, with an appropriate cut-off date or transition period for existing debts.

Taxes on corporate income

The CIT rate is 30%, assessed on a preceding year basis (i.e. tax is charged on profits for the accounting year ending in the year preceding assessment).

Nigeria

Resident companies are liable for CIT on their worldwide income while non-residents are subject to CIT on their Nigeria-source income. Investment income paid by a Nigerian resident to a non-resident is sourced in Nigeria and subject to WHT at source, which serves as the final tax.

In respect of business profits, a non-resident company which has a fixed base or a permanent establishment (PE) in Nigeria is taxable on the profits attributable to that fixed base. As such, it is required to register for CIT and file its tax returns. Any WHT deducted at source from its Nigeria-source income is available as offset against the CIT liability.

Small company rates

For small companies in the manufacturing industry and wholly export-oriented companies with turnover not exceeding NGN 1 million (about 6,300 United States dollars [USD]), the CIT rate is reduced to 20% in the first five calendar years of operation.

Petroleum profit tax (PPT)

PPT is a tax on the income of companies engaged in upstream petroleum operations in lieu of CIT.

The PPT rates vary as follows:

- 50% for petroleum operations under production sharing contracts (PSC) with the Nigerian National Petroleum Corporation (NNPC).
- 65.75% for non-PSC operations, including joint ventures (JVs), in the first five years during which the company has not fully amortised all pre-production capitalised expenditure.
- 85% for non-PSC operations after the first five years.

Education tax

An education tax is levied on every Nigerian resident company at the rate of 2% of the assessable profit for each year of assessment. The tax is payable within two months of an assessment notice from the Federal Inland Revenue Service (FIRS). In practice, many companies pay the tax on a self assessment basis along with their CIT.

For companies subject to PPT, education tax is to be treated as an allowable deduction. For other companies, income/profit taxes are not deductible in arriving at taxable income. Non-resident companies and unincorporated entities are exempt from education tax.

Minimum tax

Minimum tax is payable by companies having no taxable profits for the year or where the tax on profits is below the minimum tax. However, companies in the first four calendar years of business, companies engaged in the agriculture business, or companies that have foreign equity capital of at least 25% are exempt from minimum tax.

Minimum tax payable is calculated as follows:

- Where the turnover of the company is NGN 500,000 or below, minimum tax is the highest of:
 - 0.5% of gross profits
 - 0.5% of net assets

- 0.25% of paid up capital, or
- 0.25% of turnover of the company for the year.
- Where the turnover is higher than NGN 500,000, minimum tax is the highest of the calculations listed above plus 0.125% of turnover in excess of NGN 500,000.

Alternative tax on distribution

There is a tax on distribution where a company pays a dividend in excess of its taxable profit. Such a company will be charged tax on the dividend paid as if the dividend is the taxable profit of the company for that year of assessment.

Alternative tax on deemed income

Non-resident companies are subject to tax on the income or profit derived from Nigeria. The FIRS often assesses non-resident companies on a deemed income basis. This is done by applying 20% of turnover as deemed profit and then charging CIT at 30%, resulting in an effective tax rate of 6% on turnover.

Local income taxes

CIT is payable only to the federal government. State governments collect income taxes of individuals and unincorporated entities, while local governments are only allowed to collect levies and rates but not income tax.

Corporate residence

A company is considered resident in Nigeria if such a company is registered or incorporated under the Companies and Allied Matters Act. This means that a company formed outside Nigeria under the laws in force in the foreign territory will be considered as a non-resident company for tax purposes.

Permanent establishment (PE)

Fixed base is not defined but is generally considered to be a location with a degree of permanence. The following would generally not be considered to be a fixed base:

- The use of facilities solely for the purpose of storage or display of goods or merchandise.
- The use of facilities solely for the collection of information.

Other activities that could trigger a tax presence in Nigeria include a dependent agency arrangement, execution of a turnkey project, or artificial arrangements between related parties.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 5%, but there is a plan to increase the rate to 10%. A bill is currently being drafted that includes the proposed increase in VAT rate. Once finalised, the draft bill will be presented to Parliament for enactment into law. Zero-rated items include non-oil exports, goods and services purchased by diplomats, and goods and services purchased for use in humanitarian donor funded projects. Exempt items include plants and machinery for use in export processing zones or free trade zones, basic food items, medical products and services, pharmaceutical products, books and educational materials, and exported services.

Nigeria

Government agencies and oil and gas companies are required to deduct at source VAT charged by their suppliers and remit to the tax authority. All other organisations are required to collect VAT charged on their invoices from their customers for filing and payment to the tax authority.

Customs duties

Customs duties in Nigeria are levied only on imports. Rates vary for different items, typically from 5% to 35%, and are assessed with reference to the prevailing Harmonized Commodity and Coding System (HS code).

Excise taxes

Excise duty is applicable on beer and stout, wines, spirits, cigarettes, and tobacco manufactured and sold in Nigeria at rates ranging from 5% to 20%.

Property taxes

Property taxes in Nigeria are usually levied annually by the state government with varying rates depending on the state and the location of the property within the state. The two major property taxes are governor's consent fee and land registration fee. In Lagos (which is the economic hub of Nigeria), governor's consent fee, land registration fees, and other levies payable to the state give rise to a total levy of 15% of the transfer value of the land. Also, Right of Occupancy fee and tenement rates are chargeable by state and local government authorities.

Stamp taxes

Under the Stamp Duty Act, stamp duty is payable on any agreement executed in Nigeria, or relating, whatsoever, to any property situated in or to any matter or thing done in Nigeria. Instruments which are required to be stamped under the Stamp Duties Act must be stamped within 40 days of first execution.

Stamp duty is chargeable either at fixed rates or *ad valorem* (i.e. in proportion to the value of the consideration) depending on the class of instrument. Stamp duty is imposed at the rate of 0.75% on the authorised share capital at incorporation of a company or on registration of new shares.

Capital gains tax (CGT)

Gains accruing to a chargeable person (individual or company) on the disposal of chargeable assets shall be subject to tax under the Capital Gains Tax Act at the rate of 10%. There is no distinction between long-term and short-term gains and no inflation adjustment to cost for CGT purposes.

All forms of assets, including options, debts, goodwill, and foreign currency, other than those specifically exempt, are liable for CGT. The gains on the disposal of shares are exempt from CGT.

CGT is applicable on the chargeable gains received or brought into Nigeria in respect of assets situated outside Nigeria.

Capital losses are not allowed as an offset against chargeable gains accruing to a person from the disposal of any assets.

Information technology levy

A company with an annual turnover of NGN 100 million or more is required to pay 1% of its profit before tax as information technology tax. This levy is tax deductible when

paid (typically in the year of assessment following that in which the payment was made).

This tax is applicable to:

- Banking and other financial activities, including capital and money market operators, mortgage institutions, and micro-finance banks.
- Insurance activities, including brokerage.
- Pension fund administration, pension management, and related services.
- GSM services providers and telecommunication companies.
- Cyber and internet services providers.

Levy on contracts awarded in the upstream oil and gas sector

The Nigerian Content Development Act was introduced to increase the level of Nigerian participation in the oil and gas industry. The Act introduces a levy of 1% on every contract awarded in the upstream oil and gas sector of the economy. Any violation of the Act is liable for a fine of 5% of the contract value and may result in outright cancellation of the contract.

Payroll contribution

Under the Employee Compensation Act, all employers are required to contribute 1% of their payroll cost in the first two years of commencement of the Act. Subsequently, assessments will be issued by the Nigeria Social Insurance Trust Fund, the body empowered to administer and implement the Act.

Branch income

Except in rare circumstances, it is illegal for a non-resident company to operate through a branch in Nigeria. The Nigeria-source income of a non-resident company is taxable at the CIT rate of 30% or via the alternative tax on deemed income (*see the Taxes on corporate income section for more information*).

N

Income determination

The following income is subject to CIT in Nigeria:

- Profits accruing in, derived from, brought into, or received in Nigeria in respect of any trade or business.
- Dividends, interest, royalties, discounts, charges, or annuities.
- Rent or any premium arising from the right granted to any person for the use or occupation of any property, where applicable.
- Any source of annual profits or gain not falling within the preceding categories.
- Fees, dues, and allowances (wherever paid) for services rendered.
- Any amount of profits or gains arising from the acquisition or disposal of short-term money instruments like federal government securities, treasury bills, treasury or savings certificates, debenture certificates, and treasury bonds.

Inventory valuation

The first in first out (FIFO) valuation method is commonly used. Average and standard cost methods are also allowed, but last in first out (LIFO) is not permitted. Other than the accounting requirement in the local generally accepted accounting principles (GAAP), there are no special statutory provisions for inventory valuation.

Nigeria

Capital gains

Capital gains are not subject to CIT, but may be subject to CGT. See *Capital gains tax in the Other taxes section for more information.*

Dividend income

Dividends received by a Nigerian resident company from another Nigerian resident company are taxable at source (see *Withholding taxes section for more information*) and not subject to further tax.

Dividends received from non-resident companies are taxable except if repatriated into Nigeria through government approved channels (i.e. any financial institution authorised by the Central Bank of Nigeria to deal in foreign currency transactions).

Stock dividends

Stock dividends (bonus shares) are not taxable at source or included in the taxable income of the recipient company.

Interest income

Interest payable to a non-resident investor is liable to WHT at 10%, which is the final tax. Recipients who are resident in a country with double taxation treaty (DTT) with Nigeria enjoy a reduced rate of 7.5%. Interest received by a Nigerian company is liable to tax at the CIT rate of 30% with tax withheld at 10% available as an offset against the final tax liability. Interest on government bonds is tax exempt.

Foreign income

A Nigerian resident company is taxable on its worldwide income. On the other hand, a non-resident company is subject to tax only on income derived from Nigeria.

Dividends, interest, rents, and royalties earned abroad and brought into Nigeria through government-approved channels are exempt from Nigerian tax; otherwise, the income is taxable at the CIT rate of 30% and education tax at 2%. Government-approved channels mean the Central Bank of Nigeria and any bank or financial institution authorised to carry out foreign exchange transactions.

Taxable foreign income earned by a Nigerian tax resident entity cannot be legally deferred.

Deductions

Expenses are deductible for tax purposes if they are wholly, reasonably, exclusively, and necessarily incurred for the business or trade.

Depreciation

Capital allowances are calculated on a straight-line basis. Capital allowances claimable in any year are restricted to two-third of assessable profits for all companies, except companies in the manufacturing and agricultural sectors which are excluded from this restriction.

The following are the capital allowance rates on fixed assets (qualifying expenditures):

Qualifying expenditure	Initial allowance (%)	Annual allowance (%)
Building (industrial and non-industrial)	15	10

Qualifying expenditure	Initial allowance (%)	Annual allowance (%)
Furniture and fittings	25	20
Plant expenditure (1)	50/95	0/25
Mining expenditure	95	0
Plantation equipment	95	0
Motor vehicle (2)	50/95	0/25
Ranching and plantation expenditure	30	50
Housing estate expenditure	50	25
Research and development	95	0

Notes

1. 95% initial allowance for plant used in agricultural production; others 50%.
2. 95% initial allowance is granted for motor vehicles used for public transportation if the company has a fleet of at least three buses; all other motor vehicles 50%.

The initial allowance is first deducted, and the balance is written off on a straight-line basis over a fixed period, depending on the rates of annual allowance. There is a requirement that assets not yet disposed of cannot be fully written off in the books. A nominal amount of NGN 10 per asset must be retained in the books till the assets are disposed of. However, where 95% has been claimed as an initial allowance, the 5% balance is the value that must be maintained in the books until the final disposal of the asset.

When assets are sold, the proceeds over the tax written-down value are taxed at 30% to the extent of the allowances already claimed.

Goodwill

There is no tax deduction for goodwill.

Start-up expenses

Start-up expenses are not specifically stated as non-deductible in the tax law, but, in practice, they are usually not allowed by the tax authority. This is based on the assumption that start-up expenses are not directly attributable to any taxable income of the company, which is a fundamental condition for tax deductibility of expenses.

Interest expense

Interest on money borrowed and employed in producing taxable income is a deductible expense. There is currently no thin capitalisation regulation in Nigeria, but general anti-avoidance rules are usually applied to limit deductible interest on related party loans.

Bad debt

Bad debt incurred in the course of trade is deductible.

Charitable contributions

Donations are deductible, subject to the provisions of the law.

Fines and penalties

Any punitive payments for default or violation of law are expressly not deductible for tax purposes. In practice, this is usually extended to include default surcharges and other avoidable fines.

Nigeria

Taxes

Any tax on income or profit is not deductible except where such tax was paid on profit earned outside Nigeria. In this case, if the source country has no DTT with Nigeria, the foreign tax paid is allowed as a deduction for CIT purposes. State and local taxes (business rates) and levies may be deducted from taxable income.

Other significant items

Other deductible expenses include the following:

- Sum payable by way of interest on capital borrowed.
- Rent for the period.
- Expenses incurred in respect of salary and wages.
- Expenses incurred for repair of assets.
- Liability incurred for purpose of trade.
- Research and development (R&D) costs.

Net operating losses

Losses can be carried forward indefinitely, except for insurance companies where losses can only be carried forward for four years. Losses made from one line of business cannot be relieved against another line of business. Losses cannot be carried back.

Payments to foreign affiliates

Payments considered to be artificial are not deductible for tax purposes. Royalties, management, and technical fees require the approval of the National Office for Technology Acquisition and Promotion (NOTAP) for exchange control purposes and for tax deduction. NOTAP approved royalties and technical fees are limited to a range of 1% to 5% of net sales, while management fees are limited to a range of 2% to 5% of profit before tax, and consultancy fees are limited to 5% of total project cost. Technical fees are limited to approved man-hour rates.

Trademark fees are disallowed where the trademark owner has more than 75% equity participation in the local company.

Group taxation

There are currently no provisions for group taxation, group relief, or group filing of tax returns in Nigeria. Each legal entity within a group is treated as distinct and separate for tax purposes.

Transfer pricing

There are no specific transfer pricing rules in Nigeria. However, the tax laws have a general anti-avoidance provision which requires transactions between related entities to be at arm's length.

The FIRS is currently working on the introduction of formal transfer pricing guidelines, which are expected to be published in the second half of 2012. The guidelines are expected to be in conformity with the OECD guidelines.

Thin capitalisation

Nigeria has no thin capitalisation rules. However, interest charged between related parties is expected to reflect arm's-length transactions. The tax authority may disallow any related party interest considered to be excessive.

Tax credits and incentives

Nigeria has various tax incentives intended to encourage investment in key sectors of the economy, as follows.

Tax holidays

Pioneer companies investing in specified industrial activities may, on application, be granted a tax holiday for a maximum period of five years. Examples of economic activities that may be granted a tax holiday include glass and glassware manufacturing, manufacturing of fertilisers, and steel manufacturing.

A new company that engages in the mining of solid minerals is exempt from tax for the first three years of its operation.

Rural location incentives

Certain incentives are available to companies located in rural areas. The incentives take the form of tax reductions at graduated rates for enterprises located at least 20 kilometres from available electricity, water, and tarred roads.

Export incentives

A company that is engaged in an approved manufacturing activity in an export processing zone (EPZ) and incurs expenditures in its qualifying building and plant equipment is entitled to 100% capital allowance in that year of assessment.

In addition, a company that is 100% export oriented but located outside an EPZ will enjoy a three year tax holiday, provided the company is not formed by splitting up or reconstruction of an already existing business and the export proceeds form at least 75% of its turnover.

Profits of companies whose supplies are exclusively inputs to the manufacture of products for export are exempt from tax. Such companies are expected to obtain a certificate of purchase of the input from the exporter in order to claim tax exemption.

Where plant and machinery are transferred to a new company, the tax written down value of the asset transferred must not exceed 25% of the total value of plant and machinery in the new company. The company should also repatriate at least 75% of the export earnings to Nigeria and place it in a Nigerian domiciliary account in order to qualify for a tax holiday.

Profits of any Nigerian company in respect of goods exported from Nigeria are exempt from tax, provided that the proceeds from such exports are repatriated to Nigeria and are used exclusively for the purchase of raw materials, plant, equipments, and spare parts.

Gas utilisation incentives

Companies engaged in gas utilisation are entitled to:

- A tax free period for up to five years.
- Accelerated capital allowance after the tax free period.
- Tax free dividends during the tax free period.

Nigeria

Tourism incentives

25% of the income derived from tourism by hotels in convertible currencies is exempt from tax if such income is put in a reserve fund to be utilised within five years for expansion or construction of new hotels and other facilities for tourism development.

Interest incentives

Interest accruing on deposit accounts of a non-resident company is tax-exempt, provided the deposits are made by transfer of funds to Nigeria on or after 1 January 1990 and the depositor does not become non-resident after making the deposit while in Nigeria.

Interest on foreign-currency domiciliary accounts is also tax-exempt.

Interest on any foreign loans, and interest on any loan granted by a bank for the purpose of manufacturing goods for export, is exempt from tax as follows:

Repayment period	Moratorium	Exemption (%)
Over 7 years	Not less than 2 years	100
5 to 7 years	Not less than 1.5 years	70
2 to 4 years	Not less than 1 year	40

Interest on any loan granted by a bank to a company engaged in agricultural trade, fabrication of local plant and machinery, or as working capital to any cottage industry is 100% tax free if the loan has a moratorium of not less than 18 months and the rate of interest is not more than the base lending rate.

Investment allowances

An investment allowance of 10% on the cost of qualifying expenditures in respect of plant and machinery is available as a deduction from assessable profits in the year of purchase. There is no restriction to the full claim of capital allowance in any year of assessment for companies in the mining, manufacturing, and agricultural sectors.

Foreign tax credit

Nigeria does not grant automatic tax credits to Nigerian companies for foreign tax on income derived from other countries. The Nigerian tax laws already provides for tax exemption for dividends, interest, and royalties.

Foreign tax credits are only granted based on the provisions of existing DTTs and partial credits as applicable to Commonwealth countries. In this regard, full tax credits are usually provided for in the DTTs. Tax credit for members of Commonwealth countries is granted up to half the Nigerian CIT rate.

Withholding taxes

WHT is applicable on specified transactions as indicated below. There is no distinction between the WHT rates for resident companies or individuals and non-resident companies or individuals.

Types of payment	WHT for companies (%)	WHT for individuals (%)
Dividends, interest, and rents	10	10
Directors fees	N/A	10

Types of payment	WHT for companies (%)	WHT for individuals (%)
Hire of equipment	10	10
Royalties	10	5
Commission, consultancy, technical, service fees	10	5
Management fees	10	5
Construction/building	5	5
Contracts other than sales in the ordinary course of business	5	5

The period for filing WHT is 21 days after the duty to deduct arose for deductions from companies.

The penalty for failure to deduct or remit tax is now 10% of the amount not deducted/remitted.

Note that companies are required to submit, in electronic form, a schedule of all their suppliers for the month showing the tax identification number (TIN), address of the suppliers, the nature of the transaction, WHT deducted, and invoice number.

Double tax treaties (DTTs)

Nigeria has DTTs with Belgium, Canada, China, Czech Republic, France, the Netherlands, Pakistan, Philippines, Romania, Slovak Republic, South Africa, and the United Kingdom.

The provisions of Nigeria's DTTs allow a reduced WHT rate of 7.5% on dividends, royalties, and interest payable to a beneficiary resident in a treaty country, compared to 10% for non-treaty residents.

N

Tax administration

Taxable period

The taxable period is the fiscal year, which runs from 1 January to 31 December.

Tax returns

Companies are required to register for tax and file their audited accounts and tax computations with the FIRS within six months of their financial year end on a self-assessment basis or 18 months after incorporation (whichever comes first). A company may file an application for extension of filing tax returns for up to two months at the discretion of the FIRS.

Upon registration, a company is issued a TIN which will serve as the company's file number for all federal taxes and future correspondence with the FIRS.

The company must file the following documents with the tax authority on an annual basis:

- Tax computation for the relevant year of assessment.
- The audited financial statements for the respective period; this should be in conformity with the local GAAP.
- A duly completed and signed self-assessment form for CIT.

Nigeria

- Evidence of remittance of the income tax liability (partly or in full).

PPT is payable on an actual year basis. Estimated tax returns must be filed within two months of the fiscal year. Actual tax returns should be filed within five months after the end of the accounting period, that is, not later than 31 May.

Assessment

Nigerian companies file their tax returns based on a self-assessment system where the taxpayer prepares its annual returns and determines its tax liability. However, the FIRS may apply a best of judgment (BOJ) assessment where it is of the opinion that the tax returns filed are deliberately misstated or where no returns are filed within the stipulated period.

Payment of tax

CIT

A company that files its self assessment within six months after the accounting year-end can apply to the FIRS in writing to pay its income tax in instalments. The maximum number of instalments the FIRS may approve has been reduced from six to three. Evidence of the first instalment has to accompany the tax returns filed in order to qualify for the instalmental payment. However, all payments have to be made not later than eight months after the financial year end.

Assessments are made on a preceding year basis. This means that the financial statements for a period ended in 2011 will form the basis for the 2012 year of assessment.

PPT

Payments with respect to PPT in any accounting period of 12 months are made in 12 instalments, with a final 13th instalment (if there is an underpayment). The first instalment for the year is due by the end of March.

Penalty for non-compliance

Late payment of taxes attracts a 10% penalty and interest at commercial rate.

A company that files its annual tax return late or fails to submit its accounts by the due date is liable for a nominal penalty.

Late submission of PPT returns attracts an initial penalty of NGN 10,000 and NGN 2,000 for each day such failure continues, while late payment of tax attracts a penalty of 5% of the tax not paid.

Audit cycle

Generally, the tax authority will commence a desk examination of a taxpayer's returns immediately after filing. This may be followed by a tax monitoring exercise whereby tax officers visit taxpayers to conduct interview and on-site high level review of their tax affairs.

Random or specific tax audit may be carried out usually within six years of filing tax returns. In unusual cases, a back-duty tax investigation may be conducted for more than six years, especially where a tax fraud or willful default is suspected.

Tax audits take a long time to conclude, usually between three to five years.

Statute of limitations

The tax authority may carry out tax audit and issue additional assessment within six years from the relevant tax year. However, the limitation does not apply in the event of a fraud, willful default, or neglect by the company.

Topics of focus for tax authorities

The tax authorities are focusing on possible ways to generate more tax revenue. As a result, certain areas of taxation that have previously received very little attention, such as capital gains tax, stamp duties, and excise duties are now key areas of focus by the tax authorities. In addition, related party transactions are increasingly being scrutinized, as well as non-resident entities doing business in Nigeria. This trend is expected to continue and possibly intensify in the coming years.

Significant developments

Loss on receivables between group companies

As of 6 October 2011, loss on receivables between group companies (with more than 90% direct or indirect mutual ownership of shares) and partnerships is no longer tax deductible. However, trade receivables, already taxed receivables, and loss on receivables created in connection with mergers or demergers are still deductible for tax purposes.

Tax on correction income

Until 2012, Norwegian companies have been tax liable for so-called correction income ('No. korreksjonsinntekt') if a company has distributed untaxed profits or made appropriation for such distribution. These rules have been repealed as of income year 2012.

Alteration of the tax-exemption method

According to the tax-exemption method, income and capital gain derived from shares, etc. is exempt for certain entities, leaving 3% of the gain taxable at a 28% rate (0.84% effective tax rate). According to recent alterations, only 3% of dividend distributions will be taxed, leaving capital gain on realisation fully tax exempt. In addition, dividend distributions within a tax group (ultimate parent company owning, directly or indirectly, more than 90% of the shares and voting rights) will be fully tax exempt. The 3% rule will now also apply for certain distributions from partnerships and on certain conditions to foreign resident companies with a permanent establishment (PE) in Norway. The new regulations entered into force from the income year 2012.

Taxes on corporate income

A Norwegian resident company is, as a starting point, subject to CIT on its worldwide income. Non-resident companies are, as a starting point, liable for CIT in Norway when engaged in a business that is either conducted in or managed from Norway.

CIT is assessed at a rate of 28%.

As a general rule, income is taxable when the right to the benefit is earned and costs are deductible when the liability to cover the costs arises. The actual payment is generally not relevant.

Petroleum tax regime

All upstream petroleum activity on the Norwegian Continental Shelf (NCS) is taxable to Norway.

Taxation is based on net income at a marginal tax rate of 78%, which is composed of the ordinary 28% CIT rate and a 50% special tax. All income is subject to the 28% CIT, while only income from offshore production and pipeline transportation of petroleum from the NCS (offshore tax regime) is subject to the additional 50% special tax.

All upstream activity on the NCS must be consolidated within the company. There is no ring fence per oil field, and tax consolidation against other activity is limited. Crude oil sales from most of the fields are taxed at a predetermined market price set by an official board (i.e. the norm price). A norm price may be imposed on gas sales, but this has not been implemented. Investments in installations for exploitation and production of petroleum as well as investments in pipelines are depreciated linearly over six years.

An investment-based 'supplementary depreciation' (uplift) of 30% (7.5% per year for four years) is granted on investments in installations for exploitation and production of petroleum as well as investments in pipelines. The uplift is deducted against the special tax base. Loss and unused uplift may be carried forward indefinitely with an annual interest. Both depreciation and uplift may be claimed from the year of the investment, regardless of whether title has passed or the asset has been taken into use. If the upstream activity on the NCS ceases, the tax value of loss carryforward and unused uplift may either be sold or compensated by the Norwegian state. Exploration costs are tax deductible as incurred. If a loss is created due to exploration cost, the taxpayer may claim the tax value of such loss repaid in the year following the income year in which the loss was created.

Special rules apply as to the deductibility of net interest cost in the special tax basis (50%).

A special regime ensures that transfer of licenses on NCS are tax exempt, there is no step up in basis.

Note that income taxed under the special tax is not subject to dividend withholding tax (WHT).

Hydro power tax regime

The hydro power tax regime is applicable on taxation of income derived from production, sales, transfer, or distribution of hydro power.

Taxation is based on net income at a marginal tax rate of 58%, which is comprised of the ordinary 28% CIT rate and a 30% resource rent tax. All income is subject to the 28% CIT, while only income from hydro power production is subject to the additional 30% resource rent tax.

The resource rent is calculated per hydro power plant. The gross income is, with some exceptions, calculated based on spot market price per hour multiplied with actual production. In addition, actual income from green certificates is included in the gross income. Deductible costs will be the same as for the CIT; that is, expenses related to the power plant except for interest expenses, which are not deductible. Uplift is granted. Special rules apply to depreciations of investments in hydro power plants. Rent expenditure and depreciations related to waterfalls are not deductible, and waterfalls are not included in the basis for uplift. Tax consolidation is mandatory within the company and, provided the conditions for group taxation are fulfilled, available on a group level. Losses (negative resource rent) on a company (eventually on a group) level will be compensated by the Norwegian state.

Norway

Shipping tonnage tax regime

The tonnage tax rules are in line with the tonnage tax rules found in other European Union (EU)/European Economic Area (EEA) countries and imply that shipping income will be tax-exempt on a permanent basis.

Norwegian tonnage-taxed companies are allowed to keep only certain kinds of assets inside the model (legal assets) and are not allowed to have income from non-tonnage-taxed activities except financial income. If the requirements are not fulfilled, the company would fall outside the scope of the model and be taxed at ordinary rates (28%).

Qualifying assets

A tonnage-taxed company must own at least one qualifying asset (i.e. a vessel, for example bulk, tankers, container vessels, car carriers, tugboats, and entrepreneurial vessels and auxiliary vessels for use in the petroleum industry) new building contracts, a 3% share in another tonnage-taxed limited company, or a 3% ownership interest in a partnership or controlled foreign company (CFC).

Qualifying and legal business activities/income

Qualifying business income is income from operation of the company's own and chartered vessels. A tonnage-taxed company may, for example, charter vessels in and out on bareboat and time charter terms without limitations. Furthermore, gains upon disposal of vessels and new building contracts are exempt from taxation.

Income from related activities such as sales of goods and services onboard vessels, loading and discharging vessels or leasing out containers and operations of ticket offices is also exempt from taxation. The exemption also applies to income from the strategic and commercial management of the company's owned and chartered vessels, as well as vessels owned or operated by group companies (more than 50% joint ownership), and vessels operated according to a pool agreement. Pure management companies are not included (i.e. all companies must have at least one qualifying asset).

Financial income is permitted except for income from shares in unlisted companies and ownership interests in partnerships that are not taxed under the tonnage tax system. The condition is that financial activities do not constitute a separate business. Net financial income is subject to ordinary taxation (28%). Currency gains and losses are partly taxable/ deductible, and interest costs partly deductible corresponding to the proportion between the company's finance capital and total book capital.

Entrance into the tonnage tax system

Entry into the tonnage tax system is, as a starting point, optional and may take place with effect from 1 January every year, provided that the company has fulfilled the conditions for application of the tonnage tax system from the beginning of the year. Newly established companies will have direct entry and may enter into the tonnage tax system from the date of incorporation. All qualifying companies within the same group should be obliged to make the same election (tonnage taxation or ordinary taxation).

Companies that enter into the tonnage tax system are subject to a formal ten-year lock-in period. If a company exits the tonnage tax system before the lock-in period expires, it will be excluded from the tonnage tax system until after the initial lock-in period has ended.

Upon entry into the tonnage tax system, the difference between market value and tax value of the company's assets (including vessels, new building contracts, ownership

interests in partnerships, and shares in CFCs/tax exempt assets) is taxed as a capital gain (28%) that can be offset to the gain and loss account and entered as income with 20% of the balance each year (balance method). There is continuity for financial assets and assets covered by the tax-exemption rules (qualifying shares and derivatives).

Exit from the tonnage tax system

A shipping company may exit the regime on a voluntary basis or may be obliged to do so after breaching specific requirements for companies within the tonnage tax system. As a starting point, there is no exit charge when leaving the regime, and the tax value on the company's assets will be adjusted to market value at the time of exit. However, a possible exit while the company has untaxed gain calculated upon entry into the tonnage tax system could result in tax liability upon exit.

Local income taxes

There is no county or municipal CIT in Norway.

Corporate residence

Companies incorporated in Norway in accordance with Norwegian company law and registered in Norway are, as a general rule, regarded as tax resident in Norway and taxable for their worldwide income. If management at the board/director level is carried out outside Norway, residency in Norway for tax purposes may cease, and the company may be subject to exit taxation. Note that several factors should be considered in order to determine whether tax residency has been moved (e.g. other management functions and the overall nexus to Norway).

Foreign corporations will be regarded as resident in Norway if the place of effective management is in Norway. The place of effective management will, for example, be deemed to be in Norway if the board of directors makes its decisions in Norway.

Permanent establishment (PE)

According to Norwegian domestic law, a foreign company is liable to tax in Norway when engaged in a business that is either conducted in or managed from Norway. The tax liability is limited to income that is derived from Norwegian sources. As a general rule, non-residents without a PE are not liable for tax on capital gains when selling Norwegian financial instruments. However, when the property has been used in a business that is conducted in or managed from Norway, the capital gain or loss has to be included.

The statute does not contain a reference to the treaty concepts of 'permanent establishment' or 'permanent representative'. The threshold for tax liability is normally lower under the statute than the taxing right afforded to source states under double tax treaties (DTTs).

With respect to DTT's, the Norwegian tax authorities will, to a large extent, follow the Organisation for Economic Co-operation and Development (OECD) Commentaries when interpreting the relevant DTT, if the wording is similar to the OECD Model Tax Convention.

Norway

Other taxes

Value-added tax (VAT)

The general VAT rate is 25% and applies to all supplies of goods and services not qualifying for another rate or an exemption. A reduced rate of 15% applies to supply of food and beverages, excluding tobacco, alcohol, medication, and water from waterworks. The reduced rate is not applicable to the supply of food and beverages consumed in restaurants and other food establishments.

A reduced rate of 8% applies to the television licence fee charged for broadcasting services provided by the Norwegian Broadcasting Company (NRK), domestic passenger transport services and procurement of such services, domestic ferry services related to transport of vehicles, accommodation services, and cinema tickets.

Exemptions with credit (zero-rated) include, but are not limited to, the following:

- Export of goods and services.
- Goods and services for Norwegian offshore and non-resident ships.
- Transfer of a going concern.
- Supply of newspapers and books to recipients.
- International transport services.
- Sale of vessels and aircrafts for use in taxable activity.

Exemptions without credit include, but are not limited to, the following:

- Supply of works of art owned by the artist.
- Health services.
- Social services.
- Financial services including banking, insurance, and the sale of shares.
- Educational services.
- Sale and lease of real estate (accommodation and lease of parking lots are taxable).
- Services supplied by cultural and entertainment institutions.

Exemptions, whereby an option to tax is available, include the letting of immovable property to VAT liable lessees following a specific VAT registration with the VAT authorities.

The registration threshold is met when VAT taxable supplies, as comprised by the Norwegian VAT legislation (including self-supplies), exceed 50,000 Norwegian kroner (NOK) during a 12-month period. For charitable and public utility institutions and organisations, the threshold is set at NOK 140,000.

Customs duties

There are quite extensive customs duties on agricultural products, which must be paid upon importation. However, it is often possible to avoid customs duties on these products partly or completely by applying for an exemption from the agricultural authorities in advance. Some of these exemptions are subject to tariff quotas.

Clothes are also subject to customs duties upon importation to Norway, but imports comprised by free trade agreements (such as the EEA with the European Union) and the General System of Preferences (for developing countries) are exempt. As a result, clothes will, as a general rule, not be subject to customs duties as long as the importer presents the necessary certificates of origin.

There are no customs duties on other products than agricultural products and clothes.

Excise taxes

Excise taxes are calculated on import and domestic production of the following:

- Petroleum products, including gas.
- Alcoholic beverages.
- Non-alcoholic beverages.
- Ethanol for technical purposes.
- Tobacco.
- Chocolate, candy, sugar etc.
- Maritime engines.
- Products containing the chemicals TRI/PER.
- Products containing the propellant gases HFK/PFK.

There are also excise taxes related to the following:

- Registration of vehicles.
- Use of vehicles (annual tax).
- Emissions of NOx.
- Waste treatment.
- Sale of electricity.

Property taxes

Real estate may, under certain conditions, be subject to property tax. It is up to the different municipalities to choose whether it wants to impose property tax or not on real estate. Not all municipalities impose property tax on real estate. The applicable rate varies between 0.2% and 0.7%, which is decided by the municipality. The tax base will normally be estimated market value with some adjustments.

Hydro power producers must pay property tax on the hydro power plant's capitalised value using a capital interest rate of 3.3% for the property tax year 2012 (4.5% for 2013). However, the basis for the calculation of the property tax for 2012 shall not exceed the range between NOK 0.95 and NOK 2.47 per kWh of the power plant average production the last seven years (NOK 0.95 and NOK 2.274 per kWh for 2013). For hydro power plants with nominal capacity less than 10,000 kVA, the property tax base will be the same as the tax value for income tax purposes.

Stamp taxes

A tax is levied on registration of change of ownership to real estate. The tax is calculated at 2.5% of the fair market value.

Net wealth taxes

There is no net wealth tax or other capital taxes for limited liability companies, investment funds, state-owned enterprises according to the State-owned Enterprise Act, inter-municipal companies, and companies in which somebody owns a part in or receives income from, when the responsibility for the companies' liabilities is limited to the companies' capital.

Some institutional holders (e.g. mutual insurance companies, savings banks, co-operatives, taxable pension funds, self-owned finance institutions, mortgage credit associations) pay 0.30% (state) net wealth tax. The maximum net wealth tax rate for a corporate body is 1.00% (state and municipal tax).

Norway

Shares in limited liability companies and equity funds are valued at 100% of quoted value for net wealth tax purposes as of 1 January of the year after the relevant income year. If quoted both on Norwegian and foreign stock exchange, the Norwegian stock exchange value will be applicable. If not quoted, the basis for taxation is the company's net taxable value for wealth tax purposes as per 1 January of the income year in question. The basis for taxation of not quoted shares in foreign companies is as a starting point the shares assumed market value as per 1 January of the assessment year.

Exit tax

The exit rules levy taxes upon the migration of assets or liabilities. The tax is calculated by reference to the accrued but unrealised gains at the time of migration at a rate of 28%. Exit tax is also levied if Norwegian CFC taxation lapses because the control requirement is no longer met or if a company:

- transfers its tax residency (effective management) to another country
- has assets or liabilities that are transferred to a PE that is tax exempt pursuant to a DTT, or
- has assets or liabilities that are transferred from a Norwegian PE of a foreign company to the head office or a foreign PE of the same company.

Transfer of assets or liabilities to a PE in a country where the DTT in question is based on the credit method is, however, not regarded as a taxable event.

According to the rules, the tax treatment is different depending on the type of assets being transferred. Business-related operational equipment and financial assets being transferred out of Norwegian taxing jurisdiction are considered as taxable events, but the tax charge may be deferred if certain conditions are met. In addition, the taxation may lapse if the assets are not sold within five years after they are transferred out of Norway. Transfer of intangible assets and inventory trigger immediate and unconditional exit taxation.

De minimis exception rules apply when determining whether the exit tax may be levied. Exit tax on the transfer of tangible assets is applicable only if the unrealised capital gains exceed NOK 5 million. Exit tax on the transfer of other assets and liabilities is only applicable if the unrealised capital gains exceed NOK 1 million.

Exit taxation at both the corporate and shareholder level will also be triggered when companies transfer tax residency (effective management) to another state.

If a company transfer's tax residency (effective management) to another jurisdiction within the EEA, the exit may be exempt. In the event the company is transferred to a low-tax jurisdiction within the EEA, the exemption is contingent on the company being actually established and conducting genuine economic activity in the new state of residence. To the extent any assets or liabilities are transferred out of Norwegian tax jurisdiction, these will be subject to a gain or loss recognition under the exit tax regime.

Carbon dioxide (CO₂) tax

A CO₂ tax is calculated on petroleum that is flared and natural gas emitted into the air, as well as on CO₂ that is separated from petroleum and emitted into the air, on installations used for production or transportation of petroleum. The CO₂ tax is regarded as a normal operating cost for CIT purposes and is a fully deductible cost both for corporate and special tax calculations.

Type of Petroleum	NOK per l/ Sm ³ /kg	NOK per tonne CO ₂
Petrol	0.89	384
Petroleum, high rate		
Aviation turbine kerosene	0.70	274
Petroleum		
Light oil, diesel oil	0.60	225
Residue	0.60	191
Petroleum reduced rate	0.31	
Light oil, diesel oil	0.31	116
Residue	0.31	99
Aviation turbine kerosene	0.42	165
Domestic used gas		
Natural gas	0.45	226
LPG	0.67	223
Reduced rate natural gas	0.05	25
Continental shelf	0.48	
Light oil, diesel oil	0.49	184
Residue	0.49	156
Natural gas	0.49	209

Natural resource tax

A NOK 0.013 per kWh natural resource tax applies to hydro power activities, based on 1/7 of the produced kWh for the income year in question and the six previous years. The natural resource tax is creditable against the standard CIT.

N

Branch income

Branch income is taxed at the corporate rate of 28% (the same as Norwegian companies). The basis for taxation is gross income less deductible costs. Both direct and indirect costs related to the activities carried out in Norway may be deductible.

There is no branch profit tax or other repatriation taxes. However, if assets and/or liabilities are transferred from a PE in Norway to the head office or another foreign PE of the same company, this may trigger exit taxation. The transfer of assets to another corporate entity is subject to regular taxation.

Income determination

Inventory valuation

Inventory is valued at cost. Cost is normally determined using the first in first out (FIFO) method. The last in first out (LIFO) method is not acceptable for tax purposes. Conformity between book and tax reporting is not required.

Capital gains

Capital gains realised in the course of a business activity are almost always regarded as taxable income. Gains resulting from real estate transactions are taxed, regardless of whether they are incurred in connection with business activity. Losses may be offset against the taxpayer's other income.

Norway

Capital gains realised on both business-related and non-business-related securities are, in principle, taxable. In general, any capital gains realised on bonds at maturity are regarded as taxable income. Correspondingly, realised losses will be eligible for deductions.

Tax-exemption rules for corporate shareholders

Under the tax-exemption rules, corporate shareholders are generally exempt from tax on dividends received and capital gains on qualifying shares and on derivatives where the underlying object is qualifying shares. Correspondingly, losses on shares are, in general, non-deductible. All operational expenses related to exempt income from shares are fully tax deductible. In order to limit the benefit of these deductions, the tax-exemption method is, with some exemptions, limited to 97% on received dividend, and the remaining 3% is taxable for Norwegian corporate shareholders (at a 0.84% effective tax rate). The 3% taxable income is calculated on dividends. Dividend distributions within a tax group (ultimate parent company is, directly or indirectly, owning more than 90% of the shares and voting rights) are fully tax exempt. In addition, the tax-exemption method also applies for certain distributions from partnerships and on certain conditions to foreign-resident companies with taxable activity in Norway (3% of the income taxable at 28%).

Note that an investment in a company resident in a low-tax country in the EEA has to fulfil certain substance requirements to qualify for the tax-exemption rules. These requirements are intended to be in line with the substance requirements of the European Court of Justice's (ECJ's) decision in the Cadbury Schweppes case. A country is considered a low-tax country if the level of effective taxation is less than two-thirds of the tax that would have been due had the foreign company been resident in Norway. This is the same test used for the CFC regime (*see the Group taxation section for more information*). The Directorate of Taxes has published a non-exhaustive list of low-tax jurisdictions (black list) and non low-tax jurisdictions (white list).

However, for investments outside the EEA, the exemption applies only if a shareholder owns 10% or more of the share capital and the voting rights of the foreign company for a consecutive period of two years or more. To be able to deduct losses on realisation of shareholdings outside the EEA, the shareholder and/or a related party may not own 10% or more of the share capital and the voting rights of the foreign company in a two-year period prior to the realisation. For dividends, the holding period of two years does not have to be met when dividends are distributed, but can also be met after the ex-dividend date.

Shareholdings in low-tax countries outside of the EEA do not qualify for the tax-exemption rules.

Acquisition and sales related costs (e.g. broker fees) must be activated (i.e. added to the cost price of the shares for tax purposes). Costs incurred to manage acquired tax-exempt shares are, however, tax deductible.

Norway's internal tax rules do not allow taxation of a non-resident's capital gain on disposal of financial instruments including, among others, shares in Norwegian companies, unless the non-resident has a PE to which the financial instrument may be allocated.

Stock dividends

Stock dividends (bonus shares) are not taxable on receipt, provided that the dividends have been distributed in accordance with the Limited Liability Company Acts and distributed in proportion with the ownership level of the shares.

Interest income

In general, interest income is taxable on an accrual basis.

Foreign income

A Norwegian resident company is subject to CIT on its worldwide income. Double taxation of foreign-source income, including foreign-branch income and CFC income, is mitigated either through tax treaties or domestic tax provisions. A deduction for foreign tax may either be claimed as an expense or as a credit against Norwegian tax payable on that income. In most circumstances, foreign dividends are exempt according to the tax-exemption rules. As a consequence, foreign WHTs may not be credited and constitute a real cost for the companies concerned.

Norway does not have any legislation for tax deferral of foreign income.

Deductions**Depreciation**

For depreciation, the declining-balance method is mandatory. The depreciation rates given below are the maximum rates.

There is a duty to capitalise if the value of an asset subject to declining-balance method of depreciation is NOK 15,000 or higher and has an economic life of at least three years.

Asset	Depreciation rate (%)
Office machines, etc.	30
Acquired goodwill/business value	20
Trucks, lorries, buses, taxicabs, vehicles for persons with disabilities	20
Cars, tractors, other vehicular machinery, instruments, fixtures and furniture, etc.	20
Ships, vessels, offshore rigs, etc.	14
Aircraft, helicopters	12
Construction for transmission and distribution of electric power and electronic equipment in a power company	5*
Buildings and construction, hotels, hostels, inns, etc.	4 (10)**
Office buildings	2
Fixed technical installations in buildings, including heating plant, cooling and freezing plant, electrical installation, sanitary installation, elevator, etc.	10

* As of income year 2012, auxiliary and supplementary installations in industrial plants will be depreciated together with the building and constructions group (10% depreciation if expected operating time is less than 20 years). In addition, constructions for transfer and distribution of energy, and electronic equipment, used in other business activities than power generation will be depreciated at 5%.

** As of income year 2012, the applicable rate is 10% if, from the date of its erection, the structure has an economic life of 20 years or less. Prior to income year 2012, the depreciation rate was 8%.

Special depreciation rules apply to assets moved in and out of Norwegian jurisdiction to and from companies resident outside the EEA.

Norway

Goodwill

Acquired goodwill may be depreciated according to the declining-balance method at a maximum of 20% per annum. The tax authorities have, however, on several occasions recently questioned the allocation to goodwill and claimed that a part of the purchase price should be allocated to intellectual property, concessions, etc. (which may, as a rule, not be depreciated unless it is of a time-limited nature). Other intangibles are depreciable on condition that they are subject to an evident loss in value (impairment test) or if they are time-limited.

Start-up expenses

Start-up expenses are, in general, deductible, provided that the costs are borne by the company. Start-up costs could, for example, be costs related to registration in the Register of Business Enterprises, lawyers and accountants fees, drafting articles of association and shareholders agreement, etc.

Interest expenses

Interest expenses are, in general, deductible. Norway does not have rules distinguishing between different income categories (as in the United Kingdom). If income is exempt from taxation in Norway pursuant to a tax treaty, corresponding costs or losses would not be tax deductible.

Bad debt

In general, receivables are tax deductible, provided that the debt is clearly irrecoverable or realised and is sufficiently connected to the company's business (the business requirement). In case of accounts receivables, a calculated rate multiplied by the total account receivables at year-end may be deducted. The rate is calculated based on the two preceding years losses on such receivables multiplied by a fixed rate set by the Ministry of Finance.

As of 6 October 2011, loss on receivables between group companies (with more than 90% direct or indirect mutual ownership of shares) and partnerships is no longer tax deductible. However, trade receivables, already taxed receivables, and loss on receivables created in connection with mergers or demergers are still deductible for tax purposes.

Charitable contributions

Donations to certain charitable institutions are tax deductible. The upper limit for the tax deduction per year is NOK 12,000. The same limit applies to individuals and companies. The receiving entity must be preapproved by the Norwegian tax authorities.

Fines and penalties

Fines and penalties are normally not tax deductible. This also applies to some administrative charges that are penal in nature. Charges that have no statutory basis in Norwegian law may be tax deductible, provided that the general conditions are fulfilled.

Taxes

Real estate tax, as well as foreign income and capital taxes paid by the taxpayer, is deductible in determining corporate income. Foreign taxes derived from income that is taxable in Norway are deductible only if they have not been credited against Norwegian payable tax.

Net operating losses

Losses may be carried forward indefinitely. Losses incurred in the year of ceasing business may be carried back for a period of two years.

Payments to foreign affiliates

Royalties and service fees paid to related foreign companies are fully deductible, provided they meet the arm's-length standard. There are no formal thin capitalisation or income-stripping rules in Norway. In practice, the tax authorities require that the entity in question is able to service its debts. In addition, any loan terms should be comparable to those that would have been agreed upon by unrelated parties. Interest on financing, to the extent that these rules are not satisfied, may be regarded as dividends and thus non-deductible and, in addition, may be subject to Norwegian WHT.

Group taxation

Income taxes are assessed on companies individually, not on a consolidated basis. This may be avoided through group contributions between Norwegian companies, provided common direct or indirect (including foreign) ownership and voting rights is more than 90%. Furthermore, the Norwegian group contribution rules are, under certain conditions, also applicable to branches of foreign companies that are resident within the EEA. Note that group contributions are not deductible for companies engaged in oil and gas producing activities subject to the Petroleum Tax Act.

Assets may, pursuant to the Group Regulations, be transferred tax-free between group companies at tax book value for tax purposes and at market value for financial book purposes. Payment in this respect must equal market value of the assets transferred. The same applies to payment in shares. If the transferee loses the affiliation with the tax group while still owning the transferred assets, the transferor will be taxed for the difference between the tax book value and the market value of the assets.

Transfer pricing

In Norway, the arm's-length standard for related party transactions is incorporated into the Tax Act. The transfer pricing provision of the Tax Act makes reference to the OECD Guidelines; it is stated that the OECD Guidelines 'shall be taken into account' when addressing transfer pricing issues under Norwegian tax law.

A few years back, the resources of the Norwegian tax authorities were limited, and their interest tended to focus on intra-group services and the financing of operations. However, this has changed considerably as transfer pricing has increasingly become the focus of the tax authorities' attention, and the resource issues have been addressed. It is fairly common for the Norwegian tax authorities to pick test cases that are subject to substantial investment. During the most recent years, focus has been, *inter alia*, on business restructuring and commissionaire arrangements.

Norway does not yet have an advance pricing agreement regime. Nevertheless, it is becoming more common to discuss complex cases with the tax authorities in advance of implementation or before assessment. Furthermore, there are no safe harbour rules or any other official guidance of how to price specific transactions, etc.

Thin capitalisation

There is no fixed debt to equity ratio requirement in Norwegian tax law. However, if Norwegian income from a subsidiary is reduced due to the affiliation between the Norwegian company and a foreign company, adjustments may be made under the

Norway

arm's-length provisions. Generally, these provisions apply only if the company has obtained a larger loan from a group company than an independent credit institution would have granted, or if the agreed level of interest is higher than an independent credit institution would have required. As a rule of thumb, 25% to 30% equity is feasible. Naturally, this analysis will vary based on the actual company's credit worthiness, which would consist of several elements such as the nature of the business, financial status, future income possibilities, and group relationship. The company must also be able to service its debts.

If a Norwegian entity is regarded as being thinly capitalised, part of the entity's interest and debts may be reclassified to dividend and equity.

Controlled foreign companies (CFCs)

Norwegian residents are taxed directly for their allocable part of the profits from a CFC's income if the company is resident in a low-tax country, irrespective of whether income is distributed to the Norwegian investor. A low-tax country in this respect is a country where the effective foreign income taxation of the company's profits is less than two-thirds of the effective taxation which would have been due had the company been resident in Norway. A condition for such taxation is that 50% or more of the foreign company's shares or capital is held or controlled, directly or indirectly, by Norwegian taxpayers (alone or together), based on the status at the beginning and end of the income year in question.

Note that if Norwegian taxpayers own or control more than 60% of the shares or capital at the end of the income year, Norwegian control exists irrespective of the level of control at the beginning of the year. Norwegian control ceases to exist if Norwegian taxpayers own or control less than 50% of the shares or capital at both the beginning and end of the income year or less than 40% of the shares or capital at the end of the income year.

On condition that Norway has signed a tax treaty with the country involved and the company in question is covered by the treaty, the CFC rules will be applicable only if the income of the entity in question is mainly of a passive nature. Furthermore, CFC taxation may also be prohibited if the company in question is resident within the EEA and cannot be deemed as a wholly artificial arrangement as outlined in the ECJ's decision in the Cadbury Schweppes case. Hence, CFC taxation will be avoided for EEA companies that fulfil certain substance requirements.

Tax credits and incentives

Foreign tax credit

Norwegian limited liability companies that have paid taxes on foreign-source income may, under certain conditions, offset the Norwegian tax against the foreign tax paid. The tax credit is limited to the lowest of the Norwegian tax paid on the same type of foreign income and the foreign tax actually paid. It is possible to carry forward unused foreign taxes for five years. Credit claimed in accordance with the regulations stated above may not be used in addition to deductions pursuant to other rules and regulations. These rules are very technical, and it should be noted that there are three different 'baskets' of income.

Roll-over regulations

The Ministry of Finance has the authority to grant a tax relief in case of transfer of assets within a group upon application. The transfer may be carried out between group

companies or partnerships with mainly the same owners. If a tax relief is granted, the transfer would not trigger any taxation at the time of the transfer, but all tax positions, including tax basis of the transferred assets, will be transferred to the acquiring company. A condition for the tax relief is normally that the companies remain within the group.

The Ministry of Finance also has the authority to grant a tax relief in case of reorganisation. The reorganisation must improve the efficiency of the business to qualify for tax relief; accordingly, administrative effects would not be sufficient. The tax relief must also ease the reorganisation. In addition, the tax relief must not erode the Norwegian tax base; the tax positions would be transferred to the new taxpayer.

Withholding taxes

Norway does not levy WHT on payments of royalties and interest except interest derived from primary capital certificates ('*No. Egenkapitalbevis*').

The internal WHT rate is 25%, which either may be reduced under the tax-exemption rules or an applicable tax treaty. To qualify for the tax-exemption rule, the recipient of the dividends has to be a corporate investor resident in an EEA country and also fulfil certain substance requirements.

6. 50% of the voting rights.
7. 5% for over 70% of the capital; 10% for 25% to 70% of the capital.
8. Internal Norwegian WHT rate (i.e. 25%).
9. 15% of the capital.
10. 10% of the capital for a uninterrupted 24-month period.
11. 80% of voting rights.
12. 20% of the capital provided that such dividends are exempt from tax in that other state.

Tax administration

Taxable period

The income tax year normally runs from 1 January to 31 December, with assessments being issued in early autumn of the following calendar year. Companies are liable for both advance payments and final settlements in the calendar year of assessment. Companies with a financial year other than the calendar year may use the financial year for tax purposes in certain instances (e.g. if they belong to a foreign group with a deviating accounting year, they may use the financial year of the group for tax purposes).

Tax returns

Companies are required to file their tax returns by the end of March in the year following their financial year. If filed electronically, the return must be filed by the end of May. Upon application, an extension of the time limit to file normally will be granted. The tax returns and the basic attachments are obligatory for all corporate taxpayers.

Norway

Additional requirements might apply for specific business sectors, such as hydro power production. Under the petroleum tax regime, the filing deadline is end of April, regardless of whether filed electronically or not.

The annual assessment is made by five regional departments of tax, which notify the taxpayer if taxable income is determined to deviate from what was submitted in the tax return.

Payment of tax

Companies are required to make advance payments of tax on 15 February and 15 April in the year following the income year. The two payments should together cover all of the expected CIT to be assessed. Any balance must be paid three weeks after the assessment has been made public (i.e. in early autumn of the year following the relevant accounting year).

The above applies to all corporate taxpayers, except for taxpayers under the petroleum tax regime, where tax shall be paid in six instalments.

Statute of limitations

The tax office has a ten-year limit for reassessing tax assessment (open years) from the year after the income year in question. However, a two-year limit applies for negative adjustment and a three-year limit for positive adjustment if the taxpayer has provided sufficient and correct information in the tax return.

The taxpayer may file an appeal on the tax assessment within six weeks after the taxpayer has received the tax assessment. The time limit for appealing other decisions is normally three weeks after the tax office's decision.

Topics of focus for tax authorities

The tax office's topics of focus vary from time to time and region. The tax office assessing most companies in the eastern region of Norway has stated that the topics of focus are, among others, tax loss on receivables, exit taxation, and taxation of shares and distributions from partnerships.

Significant developments

Executive Regulations relating to the 2010 Income Tax Law were published in early 2012, with effect from 1 January 2012.

Taxes on corporate income

The rate of income tax is uniform for all types of business entities, regardless of whether it is a corporate entity and/or whether it is registered or not.

The Income Tax Law seeks to tax worldwide income of entities formed in Oman and the Oman-source income of branches and other forms of permanent establishment (PE).

The income tax rate is as follows:

Taxable profits (OMR*)	Rate (%)
First 30,000	0
Over 30,000	12

* Omani rial

Petroleum income tax

Special provisions are applicable to the taxation of income derived from the sale of petroleum. The tax rate specified for such companies is 55%. However, the tax rates are applied on income as determined by the individual Exploration and Production Sharing Agreement entered into between the government of Oman and the company engaged in the sale of petroleum. Under these agreements, the government pays the company's share of income tax from amounts withheld from the government's share of production. Therefore, the income tax is not actually borne by the company.

Corporate residence

The term 'resident' is not defined in the tax law.

Permanent establishment (PE)

PE is defined in very broad terms and includes places of sale, places of management, branches, offices, factories, workshops, mines, quarries, and building sites for construction. However, the mere use of storage or display facilities does not constitute

Oman

a PE. The definition of PE references carrying on business in Oman, either directly or through a dependent agent.

Additionally, the definition stipulates that a total stay of 90 days during a 12-month period creates a PE in Oman. However, this 90 day period applies to rendering of consultancy services or other services only. Under this definition, while the sale of goods into Oman will not be deemed to be a taxable activity, a contract for the supply and installation of equipment is likely to attract tax. By the same criterion, services rendered by personnel visiting Oman will be treated as taxable activities, applying the 90 day rule.

Other taxes

Value-added tax (VAT)

There is no VAT or sales tax in Oman.

Customs duty

Customs duty of 5% of cost, insurance, and freight (CIF) value applies to most non-GCC source goods. Exemptions apply for certain food items, medical supplies, etc.

Excise taxes

There are no excise taxes in Oman.

Property taxes

There are no property taxes in Oman.

Stamp duty

Stamp duty is applicable on transfer of land and property at 3% of the value.

Municipal taxes

Municipal taxes apply to the following items:

- Property rents: 3%.
- Hotel occupancy: 5%.
- Leisure and cinema houses: 10%.

Branch income

Branches of foreign entities (regardless of country) are subject to tax at the rate of 12% on income over OMR 30,000.

Expenses incurred by the head office that can be identified as directly related to the branch's activity are deductible. The deduction for other head office expenses is limited to 3% of the branch's gross income for the year. This rate is 5% for banks and insurance companies, and 10% for high tech industrial activities.

Income determination

Inventory valuation

Inventory should be valued using a method that complies with International Accounting Standards.

Capital gains

Gains on sales of securities listed on the Muscat Securities Market are exempt from taxation. A recent Supreme Court ruling held that gains on transfers of other assets are taxable as ordinary income.

Dividend income

Dividends received from Omani entities are exempt from taxation. Foreign source dividends are taxable. Foreign source dividends are taxed as the same rates as corporate income.

Stock dividends

There are no provisions in the tax law that address stock dividends.

Interest income

Interest income is taxable as business income.

Rent/royalty income

Rental income and royalties are taxed as business income.

Unrealised exchange gains/losses

Unrealised exchange gains are not taxable. Similarly, any unrealised loss is not deductible from the total taxable income.

Foreign income

Worldwide income of an entity formed in Oman is taxed in Oman. Credit for foreign taxes paid is given under the law; however, this may not exceed the amount of Omani tax payable on such income.

The Oman tax law does not contain rules on deferral of foreign income.

Deductions**Depreciation**

Depreciation is taken on a straight-line basis on the following classes of assets at the annual rates shown.

Asset	Rate (%)
Permanent buildings	4
Semi-permanent buildings	15
Docks, sea barriers in ports, pipelines, roads, and railway lines	10
Aircraft and ships	15
Hospital buildings, educational establishments, and equipment for scientific research	100

The rate of depreciation allowed is doubled in the case of buildings used for industrial purposes.

The tax law now provides for calculation of depreciation on a net book value basis for the following class of assets. A 'pooling' concept has been introduced, whereby assets subject to same rate of depreciation may be pooled together for purposes of depreciation.

Oman

Pool	Rate (%)
First pool is comprised of machinery and equipment, including computer software installations, furniture and fixtures, and vehicles	33.33
Second pool is comprised of drilling equipment	10
Third pool is comprised of 'other machinery and equipment' not included above	15

Goodwill

Goodwill is amortisable for tax purposes, generally over the life assigned for International Financial Reporting Standards (IFRS) accounting purposes.

Start-up expenses

Expenses incurred before the commencement of business are allowed as a deduction in the first taxable year (or period).

Interest expenses

Deduction of expenses incurred for the purpose of earning income is generally allowed. Interest expense is allowed for loans from unrelated parties or on loans from banks. Interest paid to related parties is allowed only to the extent the loan terms are at arm's length.

Charitable contributions

Charitable donations are limited to specified institutions and organisations and are subject to an overall limitation of 5% of total income.

Meals, entertainment, officers compensation, etc.

All expenses incurred for the generation of gross total income are allowed. There are no specific restrictions on deduction for expenses like meals and entertainment, compensation for officers, and life insurance payments for employees. There are limits on the deductibility of directors' fees.

Social security payments

Social security contributions paid by employers in respect of employees may also be deducted.

Pension payments

Contributions to pension funds, domestic and foreign, are deductible, provided the fund is licensed (in Oman or the country where it was established) and complies with certain other specified conditions.

Illegal payments

Payments of bribes or kickbacks, and other illegal payments, are not deductible.

Fines and penalties

Civil fines and penalties are not deductible.

Taxes

Taxes on income, whether incurred in Oman or elsewhere, are not deductible in arriving at taxable income. A credit may be available for taxes paid in a foreign jurisdiction.

Other significant items/restrictions on allowable expenses

The tax law has imposed restrictions on the deductibility of certain expenses. The principal items affected are the following:

- Sponsorship fees paid to Omani sponsors are restricted to 5% of net taxable income before sponsorship fees. Net taxable income is determined after offsetting any losses carried forward.
- Charges or expenses allocated from the head office or other group companies are limited to 3% of gross income (5% for banks and insurance companies, and 10% for high tech industrial activities).
- Commissions paid by insurance companies are restricted to 25% of net premiums collected.
- Amounts charged to the profit and loss account for creating provisions in respect of bad debts, stock obsolescence, warranties, and similar types of contingencies are not tax deductible. Deduction is allowed only at the time of write-off. However, provisions created by licensed banks in respect of bad debts are allowable within the limits approved/required by the Central Bank of Oman.
- Leasing companies are treated at par with banks as far as deduction for loan loss provision is concerned. Leasing companies are allowed deductions for loan loss provisions subject to the limits or recommendations of the Central Bank of Oman.
- Losses arising on sale of investments listed on the Muscat Security Market are not allowed as a deduction from taxable income.
- Any expense or costs which have been incurred to generate income exempted from tax are not allowed as a deduction from taxable income.
- Amounts paid as tax consultancy or advisory fees are disallowed.

Net operating losses

Carryforward of losses is limited to five years, except in the case of companies that incurred losses during a mandatory tax-exempt period, where the losses may be carried forward indefinitely for offset against future profits.

Carryback of losses is not allowed.

Payments to foreign affiliates

Payments to foreign affiliates normally receive in-depth scrutiny from the tax authorities. Accordingly, proper documentation should be obtained in order to establish that these transactions are made at an arm's-length basis.

Group taxation

Businesses are taxed as separate entities, and the tax law does not recognise group taxation.

Transfer pricing

Transactions between related parties must be valued at arm's length. There is no specific guidance on acceptable methods for determining an arm's-length price.

Inter-company payments

All inter-company payments are scrutinised in detail to ensure that the profits are not transferred to avoid payment of tax.

Thin capitalisation

If the debt-to-equity ratio exceeds 2:1 in the case of related party debt, interest on the excess debt is not deductible for tax purposes. This rule does not apply to banks and insurance companies, PEs of foreign companies, or proprietary (Omani owned) establishments.

Oman

Controlled foreign companies (CFCs)

There is no CFC regime in Oman.

Tax credits and incentives

Foreign tax credit

Foreign taxes paid to a country with whom Oman has a double tax treaty (DTT) are eligible for a credit to the maximum of the Oman tax that would have been payable on such income. The tax payer is required to submit an application to the Secretariat General for Taxation to claim such credit.

Exempt activities

Income from the principal activities listed below is exempt from tax, if an exemption is applied for and obtained.

- Industry and mining.
- Export of products manufactured or processed locally.
- Operation of hotels or tourist villages.
- Agriculture and animal husbandry and the processing of agricultural produce.
- Fishing and fish processing and aquaculture.
- University education, college or institutes of higher studies, private schools, nurseries, training colleges, and institutes.

The exemption is valid for a period of five years from the date of commencement of production or the practice of activities and may be made subject to such conditions as the Minister of Commerce and industry may specify. The exemption is renewable for a period not exceeding five years, subject to approval by the Financial Affairs and Energy Resources Council.

Exempt income

The following income is exempt from income tax in Oman:

- Dividends received from an Omani company.
- Profits or gains on disposal of securities listed on Muscat Security Market.
- Omani marine companies, whether wholly owned by Omanis or with foreign and Omani ownership and registered in Oman, are exempt from tax. Foreign marine companies conducting activities in Oman through an authorised agent are exempted from tax with effect from the date of commencement of activity, provided that reciprocal treatment is afforded by the country of the foreign company.
- Income realised by foreign airlines carrying on business through establishments in Oman is exempt from tax. This exemption is limited to the extent of the income from operating airplanes for international transport, provided reciprocal treatment is accorded in the airline's home country.
- Income realised by investment funds established in Oman under the Capital Market Authority Law or established overseas for dealing in shares and securities listed on Muscat Security Market is exempt.
- Foreign companies engaged in oil and gas exploration activities, while taxable under the law, normally have their tax obligations discharged by the government under the terms of the Exploration and Production Sharing Agreement.
- Foreign companies working for the government in projects deemed to be of national importance may be able to negotiate a tax protection clause whereby any tax paid by them is reimbursed by the government.

Withholding taxes

Foreign companies that do not have a PE in Oman for tax purposes and that derive income from Oman in the nature of the following are subject to withholding tax (WHT) at 10% of gross income from such sources:

- Royalty.
- Consideration for research and development (R&D).
- Consideration for use of or right to use computer software.
- Management fees.

Such WHT is required to be withheld by the Omani-based company and paid to the tax department within 14 days of the end of the month in which tax is deducted or payments are due or made to the foreign company.

There is no WHT on dividends and interest payments.

The term 'royalty' has been defined under the law to include consideration for the use of intellectual property, including computer software, cinematography films, tapes, discs, or any other media, patents, trademarks, drawings, etc. The term further includes consideration for using industrial, commercial, or scientific equipment and consideration for information concerning industrial, commercial, or scientific experience or consideration for granting rights to exploit mining or other natural resources.

Double tax treaties (DTTs)

The maximum WHT rates provided by the Oman DTTs are shown in the table below. There are also agreements with various countries which are not yet in force.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Algeria	5 (3)/10	5	10
Belarus	5	5	10
Brunei	-	-	-
Canada	5 (1)/15	10	10
China	5	10	10
Croatia	0	5	10
France	0	0	0
India	10 (1)/12.5	10	15
Iran	10	10	10
Italy	5 (3)/10	5	10
Korea	5 (1)/10	5	8
Lebanon	5 (4)/10	10	10
Mauritius	0	0	0
Moldova	5	5	10
Morocco	5 (1)/10	10	10
Pakistan	10 (1)/12.5	10	12.5
Seychelles	5	5	10
Singapore	5	7	8
South Africa	0	0	8
Sudan	-	-	-
Syria	-	-	-

Oman

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Thailand	10	10 (5)/15	15
Tunisia	0	10	5
Turkey	10 (3)/15	10	10
United Kingdom	5 (1)/10	0	8
Uzbekistan	7	7	10
Vietnam	5 (6)/10 (7)/15	10	10
Yemen	5	10	10

Notes

1. 10% minimum shareholding required.
2. Distributions by real estate investment company/fund.
3. 15% minimum shareholding required.
4. 20% minimum shareholding required.
5. Interest received by financial institutions (including insurance companies) or loans/debt claims guaranteed by the government of the source state.
6. 60% minimum shareholding required.
7. 25% to 60% minimum shareholding required.

Tax administration

Taxable period

The tax year is the calendar year. Assessments can be made on the basis of a year-end other than 31 December, provided permission is granted in advance by the Omani tax authorities and the company then adheres to the year-end on a consistent basis.

Tax returns

A provisional declaration of tax must be submitted in the prescribed form within three months from the end of the accounting period to which it relates. The final annual return of income should be submitted in the prescribed format within six months from the end of the accounting period to which it relates. Reasonable time extensions can be sought and are normally provided for filing the provisional and annual returns of income, but these do not defer payment of tax, which will be subject to additional tax at 1% per month from the due date to the actual date of payment.

In the case of companies having a paid-up capital in excess of OMR 20,000, the annual return of income should be accompanied by audited accounts signed by an auditor registered in Oman. The law requires accounts to be drawn up in accordance with IFRS consistently applied. It specifically provides for accrual accounting unless prior permission of the Secretary General of Taxation (the Secretary General) has been obtained. The accounts must be submitted in local currency unless prior approval of the Secretary General has been obtained for submitting them in foreign currency.

Delay or failure in submitting the provisional or annual returns may attract a penalty of not less than OMR 100 and not more than OMR 1,000.

Failure to file the provisional or annual returns of income may result in an estimated profit assessment by the Secretary General.

Failure to submit audited accounts as required under the Law is deemed to result in an incomplete annual return of income and may attract an estimated profit assessment.

The law confers wide powers on the Secretary General for requesting information. Experience has shown that, notwithstanding the presentation of audited accounts, the tax department requests very detailed information and supporting documentation relating to revenue and expenses. Failure to provide such information or the provision of incorrect information can result in an additional assessment by the Secretary General and/or various penalties on the company and/or the officer responsible for providing the information.

Payment of tax

Any tax estimated to be payable in respect of an accounting period should be paid with the provisional assessment and 'topped up' for any additional amount computed as payable following submission of the annual return of income. Failure to pay taxes by the due date attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

The difference between the amount paid and the amount assessed, subject to filing of an objection, should be paid within one month from the date of the assessment. The additional amount assessed attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

Under the Law, the Secretary General has the authority, with the approval of the Minister and the Tax Committee, to sequester and sell the assets of a taxable entity to recover the taxes due.

If decisive proof is presented to the Secretary General that any person has paid tax for any year exceeding the tax due and payable for such tax year as finally settled, such person has the right to recover the tax. However, if any tax has become payable by such person in respect of another tax year, the excess amount will be adjusted against the future tax liability. Any request for recovery must be presented within five years from the end of the tax year to which it relates.

Where the taxpayer fails to declare correct income in the tax return for any tax year, the Secretary General may impose a fine not exceeding 25% of the difference between the amount on the basis of the correct taxable income and the amount of tax as per the return submitted.

Statute of limitation

The tax authorities have a period of up to five years from the end of the year in which a tax return is submitted to complete the assessment for that tax year. However where the entity has not submitted any tax return, the tax authorities have a period of ten years to complete the assessments.

Maintenance of records

The Law requires accounting records and supporting documentation to be maintained for ten years after the end of the accounting period to which these records relate.

Objections and appeals

A company has a right to object to any assessment issued by the Secretary General. The objection document should be prepared in writing (in English and in Arabic) and filed with the office of the Secretary General for Taxation within 45 days from the date of assessment. The Secretary General is required to give a judgment within five months, extendable up to another five months at the Secretary General's discretion, from the date of receiving the objection. The tax demanded may be kept in abeyance on request. No additional tax is payable until the Secretary General issues the judgment.

Significant developments

The following significant developments in corporate taxation have recently occurred in Pakistan:

- The province of Sindh has introduced an Act to collect and levy sales tax on services.
- Minimum tax can now be carried forward for five years instead of three years.
- An advance ruling can now only be obtained by a non-resident not having a permanent establishment (PE) in Pakistan.
- Withholding tax (WHT) on cash withdrawals exceeding 25,000 Pakistani rupees (PKR) has been reduced from 0.3% to 0.2%.
- The general rate of sales tax has been reduced from 17% to 16%.
- Significant exemptions have been withdrawn from the levy of sales tax (i.e. computer software, certain special purpose vehicles, aircraft, specified ships, and certain specified machinery).

Taxes on corporate income

A resident company is taxed on its worldwide income. The federal corporate tax rates on taxable income are as follows:

Company type	Tax rate (%)
Banking company	35
Public company other than a banking company	35
Any other company	35
Small company (see the <i>Tax credits and incentives section for more information</i>)	25

The term 'public company' implies a company listed on any stock exchange in Pakistan or one in which not less than 50% of the shares are held by the federal government or a public trust.

In the case of a *modaraba* (see the *Income determination section for a definition*), income, except relating to trading activities, is exempt from tax, provided that 90% of its profit is distributed to the certificate holders as cash dividends.

The final tax regime (FTR) for resident taxpayers, a presumptive tax scheme where taxes are withheld at the source on the sale of goods and execution of contracts or collected at the time of import (for other than industrial raw materials), is considered a final tax liability in respect of income arising from the sale, contract, or import.

In the case of exports, tax collected at the time of realisation of foreign-exchange proceeds is treated as final tax for that income.

The FTR is also applicable to non-resident taxpayers, at their option. However, it is only applicable in cases of receipts on account of the execution of a contract for construction, assembly, or installation, including a contract for the supply of management activities in relation to such project as well as certain contracts for services and contract for advertisement services rendered by television satellite channels.

Taxation of a permanent establishment (PE) of a non-resident

The following principles shall apply in computing taxable income of a PE:

- It is a distinct and separate entity dealing independently with the non-resident of which it is a PE.
- In addition to business expenditure, executive and administrative expenditure, whether incurred in Pakistan or elsewhere, will be allowed as deductions.
- Head office expenditure, including rent, salaries, travelling, and any other expenditure which may be prescribed, shall be allowed as a deduction in proportion to the turnover of the PE in the same proportion as the non-resident's total head office expenditure bears to its worldwide turnover.
- Royalties, compensation for services (including management services), and interest on loans (except in banking business) payable or receivable to or from PE's head office shall be considered in computing taxable income of PE.
- No deduction will be allowed for any interest paid on loans acquired by a non-resident to finance the operations of a PE (or for the insurance premium in respect of such loans).

Minimum tax

Where the tax payable by a company is less than 1% of the turnover, except where the company is in loss before charging depreciation and other inadmissible expenses, the company is required to pay a minimum tax equivalent to 1% of the turnover. Tax paid in excess of normal tax liability, can be carried forward for adjustment against tax liability of a subsequent tax year. However, such tax can only be adjusted against tax liability of the five tax years immediately succeeding the tax year for which the amount was paid.

Local taxes on income

No local taxes are payable in respect of income of companies.

Corporate residence

A company is resident in Pakistan if it is incorporated or formed by or under the law of Pakistan or if the control and management of its affairs is situated wholly in Pakistan in that year.

The term 'company' includes a trust, a cooperative society, a finance society, or any other society established or constituted by or under any law; a corporate body incorporated outside Pakistan; and any foreign association, incorporated or unincorporated, which the Central Revenue authorities may declare to be a company.

Permanent establishment (PE)

PE is a place of business through which the business of a non-resident is wholly or partly carried out, including:

Pakistan

- A place of management, branch, office, factory or workshop, premises for soliciting orders, warehouse, permanent sales exhibition, or sales outlet, except a liaison office.
- An agriculture, pastoral, or forestry property.
- A mine, oil or gas well, quarry, or any other place of extraction of natural resources.
- A building site; a construction, assembly, or installation project; or supervisory activities connected with such site or project if such activity continued for more than 90 days within any 12-month period.
- The furnishing of services, including consultancy services, by any person through employees or other personnel engaged by the person for that purpose.
- A person acting in Pakistan on behalf of the person, other than an agent of independent status acting in the ordinary course of business.
- Any substantial equipment installed, or other asset or property capable of activity giving rise to income.

The definition of a PE provided in a double taxation treaty (DTT) will prevail in cases where a DTT is executed by Pakistan with the related country of origin of the PE.

Other taxes

Value-added tax (VAT)

VAT (locally termed as 'sales tax') is ordinarily levied at 16% on the value of goods, unless specifically exempt, after allowing related input credits.

Telecommunication services are levied VAT at the rate of 19.5%. VAT on other services is a provincial levy.

Significant zero-rated goods are as follows:

- Supplies and repair and maintenance of certain ships and aircrafts.
- Supplies to diplomatic missions and diplomats.
- Supplies against international tenders.
- Supplies of raw materials, components, and goods for export processing zones.
- Supplies of locally manufactured plant and machinery to export processing zones and supplies of certain specified machinery to exploration and production sector.
- Supplies to exporters.

Significant exemptions are as follows:

- Live animals and poultry.
- Live plants.
- Vegetables, pulses, fruits, certain spices, sugar cane, edible oils, etc.
- Milk preparations.
- Newsprints, newspapers, journals, periodicals, and books.
- Agricultural produce not subjected to any process.

Customs and import duties

Custom and certain other duties are collected at import stage at varying rates classified under Harmonized System (HS) Code.

Excise duty

Federal excise duty (FED) is levied at the rate of 16% on certain types of manufacturing, import of goods, and rendering of services, except telecommunications services, which

are charged at the rate of 19.5%. FED, under the constitution, is to be levied and collected by the provinces. Sindh province has promulgated their statute, and others are expected to follow.

Property taxes

Property owners are required to pay property tax levied and collected by provincial governments through municipal governments at varying rates.

Stamp duty

In the case of sale or transfer of immovable property, stamp duty is payable (with varying rates on the basis of location of the property) on the value of the property.

Branch income

The rates of tax for a branch of a company incorporated outside Pakistan are the same as those applicable on resident companies, other than public and banking companies (i.e. 35%). Tax at the rate of 10% is levied on the transfer of profits to the head office, with an exception for companies engaged in oil and gas exploration and production business.

Payments to a branch in Pakistan of a non-resident are subject to deduction of tax at source, on the same basis as a resident in the case of sale of goods, rendering of professional services, and execution of contracts. In other circumstances, a reduced/0% WHT certificate can be obtained from the Commissioner of Income Tax.

Pakistan has signed agreements for avoidance of double taxation with over 60 countries.

Income determination

Inventory valuation

Inventories are to be stated at the lower of cost or market. The first in first out (FIFO) and average methods are accepted. Conformity of methods used for book and tax reporting is desirable, and the method used should be consistently applied.

Capital gains

Capital gain on the sale of immovable property, on which depreciation is not allowed, is not taxable.

Gain on the disposal of shares of a resident company or a non-resident company, whose assets wholly or principally consist of immovable property situated in Pakistan or rights to explore/exploit natural resources in Pakistan, shall be Pakistan-source income.

Capital gains on the sale of shares of public companies or *modaraba* (profit sharing) certificates are exempt from tax if held for a period of more than 12 months. Capital gains on shares and *modaraba*, if held for less than 12 months, are taxable under two categories, (i) held for less than six months and (ii) held for more than six months but less than 12 months at 7.5% and 10% to be gradually enhanced to 17.5% and 10% by 2015.

Pakistan

Capital gain, other than on statutory depreciable assets, realised within one year of acquisition is fully taxed; after one year, 75% of such gains are taxed and 25% are exempt.

Capital gains on statutory depreciable assets (other than immovable property) are chargeable to tax as normal business income in the year of sale. They are measured as the difference between the sale proceeds and the tax written-down value of the relevant asset sold.

In the case of an asset disposal transaction that is on a non-arm's-length basis, fair market value of the asset shall be taken to be the consideration received by the seller, as well as the cost for the buyer.

Where assets are transferred outside Pakistan, the original cost is treated as the sale price, which means that the entire depreciation is recaptured at the time of export, except if the assets are used in oil or gas exploration, in which case only the initial depreciation is recaptured.

No gain or loss shall be taken to arise on disposal of an asset by a resident company to another resident company, if certain conditions are met. The required conditions include, *inter alia*, that the transferor is 100% owned by the transferee or vice versa or both companies are 100% owned by a third company, and the transferee income is not exempt in the year of transfer. The scheme of arrangement is approved by the Securities and Exchange Commission of Pakistan or State Bank of Pakistan.

Any distribution to the shareholders of a company to the extent that it relates to undistributed profits is treated as a dividend.

Capital loss can be offset only against capital gains. Unabsorbed capital loss can be carried forward for adjustment against capital gains for six years.

Dividend income

Dividend income is subject to WHT of 10% or a lower tax treaty rate.

The deduction at source shall be the full and final discharge of tax liability on dividend income.

Stock dividends

Stock dividends declared by resident companies are exempt from tax.

Interest income

Interest earned by a company is taxed as its income from other sources. Interest earned by a non-resident company without a PE in Pakistan attracts WHT at the rate of 10%, except where a lower rate is provided in the related DTT, which is also the final tax on such income.

Income from royalties and fees for technical services (FTS)

Royalties received by non-residents are deemed to accrue or arise in Pakistan and are taxable if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan.

Income from 'fees for technical services' (FTS) is deemed to accrue or arise in Pakistan if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan. FTS means any consideration for the rendering of any managerial, technical, or consultancy services (including the provision of the services of technical or other personnel),

but does not include consideration for any construction, assembly, or like project undertaken by the recipient or consideration that would be income of the recipient chargeable under the head salary.

Other significant items

Liabilities allowed as a tax deduction in a tax year and remaining unpaid for three subsequent years are deemed to be income in the first tax year following the said three years. Such items are then allowed as a deduction in the year the liability is discharged.

Agricultural income is exempt from income tax.

Foreign income

A resident company is taxed on its worldwide income and on its foreign income as earned. Double taxation of foreign income is avoided by means of foreign tax credits; this relief is allowed to the resident company on the doubly taxed income at the lower of the Pakistan or foreign tax rate. Undistributed income of a non-resident subsidiary is not subject to tax.

Foreign loss can only be offset against foreign income and can be carried forward for six years.

Modaraba

Modaraba (profit sharing) is a financing vehicle that enables a management company to control and manage the business of a *modaraba* company with a minimum of 10% equity participation. The management company is entitled to remuneration based on an agreed percentage (but not exceeding 10%) of annual profits of the *modaraba* business. A *modaraba* can be for a specific purpose or many purposes and for a limited or unlimited period. The income of a *modaraba* not relating to trading activity is free from tax if 90% of its profits are distributed as cash dividend.

Deductions

Depreciation

Normal depreciation is allowed at the following prescribed rates by applying the reducing-balance method.

Assets	Depreciation rate (%)
Buildings	10
Furniture	15
Machinery and equipment, including motor vehicles and ships	15
Computer hardware, including monitors and printers	30
Aircraft and aero engines	30
Below-ground installations in mineral oil concerns	100
Offshore platform	20

All depreciable assets put into service for the first time in Pakistan during a tax year, other than road transport vehicles not plying for hire, furniture including fixtures, plant, and machinery used previously in Pakistan, or plant and machinery for which a deduction has been allowed under another section of this ordinance, for the entire cost of the asset, shall be entitled to an initial allowance at 50% of the cost of the asset.

Pakistan

Book depreciation need not conform to tax depreciation. Unabsorbed tax depreciation not set off against the income of the year is carried forward and added to depreciation of the assets of the same business in the following year. Tax depreciation can be carried forward without limit until fully absorbed.

Amortisation of intangibles

The cost incurred on acquisition of a patent, invention, design or model, secret formula or process, copyright, software, quota, licence, intellectual property or other like property or right and any expenditure that provides an advantage or benefit for a period of more than one year is allowed as a deduction on a straight-line basis over the useful life of the asset, but not exceeding a period of ten years.

Any payment made against acquisition of goodwill will also be amortised under these provisions.

Organisational and start-up expenses

Expenditure incurred before the commencement of a business wholly and exclusively to derive income chargeable to tax can be deducted over a period of five years.

Interest expense

Interest expense is allowed as an expense if required WHT is deducted and deposited in the government treasury.

Bad debt

The bad debts are allowed as deductible expenditure if the following conditions are satisfied:

- Debts are included previously in the income chargeable to tax.
- Debts are written off in the financial statements.
- There are reasonable grounds for believing that the debt is irrecoverable.

Charitable contributions

See *Charitable donations credit in the Tax credits and incentives section.*

Fines and penalties

Fines or penalties that are not paid or payable for the violation of any law, rule, or regulation are allowable as tax deductible expenses.

Taxes

Taxes on income are not deductible. Sales tax and excise tax are tax deductible where these are to be absorbed by the business; otherwise, these are passed on to the consumer.

Other significant items

The deductibility of a head office expenditure of a non-resident taxpayer is limited to the same proportion of total head office expenditure as the Pakistan turnover has with the total world turnover. However, such domestic rules are overridden if the branch is a tax resident of a country having an agreement for avoidance of double taxation (treaty) and that treaty provides a different basis.

Expenditure on scientific research incurred in Pakistan wholly and exclusively for the purpose of deriving income chargeable to tax is an allowable expenditure.

Exchange gains and loss on foreign currency loans specifically obtained for acquiring an asset are adjusted against the depreciable cost of the asset.

Any lease rental incurred by a person in the tax year to a scheduled bank, financial institution, approved *modaraba*, or approved leasing company shall be a deductible expense. However, financial charges paid for the above-mentioned leases are added back into the taxable income of the company.

Net operating losses

Operating loss may be carried forward and set off against the profits of the succeeding six years of the same business in which the loss was incurred. Unabsorbed depreciation can be carried forward indefinitely.

Carried forward loss of an entity in the case of group relief cannot be utilised if the ownership of the holding company is reduced to less than 55% and 75% if one of the companies is a listed company or none of the companies is a listed company, respectively.

Business loss can be carried forward up to a period of six years in the case of the amalgamation of two companies, with the condition that the same business is continued for a minimum period of five years.

Carryback of loss is not permitted.

Group taxation

A locally incorporated holding company and subsidiary of a 100% owned group may be taxed as one group by giving an irrevocable option for taxation as one fiscal unit. The relief is not available for losses prior to formation of the group. The group is available if the companies are designated as entitled to avail group relief by the Securities and Exchange Commission of Pakistan.

Any company that is the subsidiary of a holding company may surrender its loss for the year to its holding company or its subsidiary, or between another subsidiary of the holding company, provided that the holding company holds directly 55% or more capital of the subsidiary, if one of the companies is a listed company. However, if none of the companies is a listed company, the holding requirement is 75% or more. The loss can be surrendered for a maximum of three years, and the required holding is for at least five years.

Transfer pricing

The tax authorities have the power in respect of a transaction between associates to distribute, apportion, or allocate income, deductions, or tax credits between such associates to reflect the income that would have been realised in an arm's-length transaction.

Thin capitalisation

Where a foreign-controlled resident company (other than a financial institution or a banking company) or a branch of a foreign company operating in Pakistan has a foreign debt to foreign equity ratio in excess of 3:1 at any time during a year, a deduction shall be disallowed for the profit on debt (interest) paid by the company in that year on that part of the debt which exceeds the 3:1 ratio.

Pakistan

Tax credits and incentives

Any relief from Pakistani income tax that is provided in any other law and not provided for in the Income Tax Ordinance or a treaty is not valid.

Tax exemptions

Profits and gains derived from an electric power generation project set up in Pakistan are exempt from tax.

Profits and gains derived by a company from the export of computer software, information technology (IT) services, or IT enabled services are exempt from tax through 30 June 2016.

Small companies

Activities of small companies are encouraged with a reduced income tax rate of 25%.

A small company has been defined to mean a company that:

- is registered on or after 1 July 2005 under the Companies Ordinance, 1984
- has a paid up capital plus undistributed reserves not exceeding PKR 25 million (0.278 million United States dollars [USD])
- has an annual turnover not exceeding PKR 250 million (USD 2.778 million), and
- is not formed by splitting up or the reconstitution of business already in existence.

Charitable donations credit

Companies are allowed a tax credit equivalent to 20% of their taxable income in respect of donations to:

- any board of education or university in Pakistan, established by or under federal or provincial law
- any educational institution, hospital, or relief fund established or run in Pakistan by federal government, provincial government or local government, and
- any non-profit organisation.

Foreign tax credit

Where a resident taxpayer derives foreign source income on which foreign income tax is paid within two years from the year in which it is derived, the taxpayer is allowed tax credit equal to the lower of (i) the foreign income tax paid or (ii) the Pakistan tax payable in respect of that income. However, foreign tax paid is not refundable.

Withholding taxes

WHT on payments of royalty and FTS, when royalty or FTS is not attributable to a PE in Pakistan, is 15% or a lower treaty rate, of royalty or gross fees. The tax withheld would be deemed to be the final tax liability of the non-resident. In the case of a non-resident where royalty or FTS is attributable to a PE in Pakistan, the amount of royalty/FTS shall be chargeable to tax as normal income, and withholding on payments can be avoided subject to approval of the commissioner. If a reduced rate is available in a tax treaty, such rate would be applicable.

Resident corporations making certain types of payments must withhold tax as follows:

Recipient (1, 2, 3)	Dividends (%)	Interest (%)	Royalties (%)
Resident individuals	10	10	N/A
Resident corporations	10	10	0
Non-resident individuals:

Notes

1. This table is a summary only and does not reproduce all the provisions that may be relevant in determining the application of WHT in each tax treaty.
2. Resident and non-resident imply tax status.
3. Individuals and companies are required to render annual returns of income and pay tax at the applicable rates. Credit is given for WHT deducted.
4. WHT rates for interest and royalties given to non-resident corporations (treaty countries) also apply to non-resident individuals.
5. The general WHT rate for non-residents is 20%.
6. The following remarks for dividends should be noted:
 - The inter-corporate rate of tax on dividends received by a foreign corporation is 10%; corresponding treaty WHT rates in excess of 10% have been specified.
 - The rates given in the table for treaty countries relate to recipient corporations. The maximum rate, as stated above, in respect of inter-corporate dividends is 10%. The lower rates are expressly provided in respect of dividends paid to a parent/associated corporation that has a certain minimum holding in a Pakistan industrial undertaking. The level of holding are noted:
 - Japan: 25% and 50%
 - United States: 50%
7. Certain treaties provide for tax exemption of interest paid to the government or the central bank of the contracting state and on foreign loans specifically approved by the federal government.
8. No concession is provided under the treaty.
9. Royalties are exempt from tax, provided the recipient does not have a PE in Pakistan.
10. Inter-corporate dividend where companies are entitled to group relief is exempt.
11. WHT rate depends on percentage of holding in the company.
12. This rate applies if the paying company is engaged in the industrial undertaking.
13. Consideration for technical know-how or information concerning industrial, commercial, or scientific experience.
14. This rate applies if the beneficial owner is a company.
15. This rate applies if the beneficial owner is a bank.
16. This rate applies if the paying company operates in preferred areas.
17. This rate applies if the company is owned by the government.

Tax administration

Taxable period

The tax year is 1 July through 30 June. However, tax authorities are empowered to approve a special year end.

Tax returns

All companies are required to file an income tax return each year by 31 December for the preceding financial year (1 July through 30 June) by accounting for business income on an accrual basis. If the special year granted by the tax authorities ends on 31 December, then the tax return is required to be filed by 30 September following the year-end.

An across-the-board self-assessment scheme is in place whereby assessment is taken to be finalised upon filing of the return. The Commissioner, however, has powers to amend the assessment if it is believed that the ordinance has been incorrectly applied or there is definite information that the assessment made is incorrect. These powers are to be exercised within a prescribed time frame. In the case of transactions between associates, the Commissioner can substitute the transaction value with the fair market consideration. The Commissioner is also empowered to determine tax liability according to the substance of the transaction, disregarding formal arrangements between the parties.

Payment of tax

Companies are required to pay advance tax on the basis of tax liability of the immediately preceding tax year in respect of their income (excluding capital gains and presumptive income). The advance tax is to be paid after adjusting the taxes withheld at source (other than the tax withheld relating to final tax regime).

Advance tax is required to be paid in four quarterly instalments on or before 25 September, 25 December, 25 March, and 15 June in each financial year. Credit for tax paid in a tax year shall be allowed against tax liability of that year.

The total tax liability is to be discharged at the time of filing the return of income.

Advance taxes and taxes withheld are adjustable against the tax payable with the return of income.

Statute of limitations

An audit of the tax return filed by a taxpayer can be conducted by the tax authorities within five years of the end of the financial year in which the return is filed.

Advance rulings

A non-resident not operating in Pakistan through a PE can apply to the Federal Board of Revenue to issue an advance ruling setting out the Board's position regarding application of the provisions of the Income Tax Ordinance to a transaction proposed or entered into by the taxpayer. The tax ruling, once issued, is binding on tax authorities.

Topics of focus of tax authorities

Tax authorities focus on the following issues:

- WHT.
- Transfer pricing.
- Relationship of expenditure with the business of the taxpayer.

Pakistan

- Advance tax.
- Payment of tax dues within the time prescribed.
- Audit of returns filed.
- Compliance by taxpayers.
- Collection of arrears.

Other issues

Special rules are applicable for computation of income from exploration and production of petroleum, mineral deposits, insurance business, and banking business.

Significant developments

Significant changes have been made on tax matters during fiscal year 2011 and 2012.

During fiscal year 2011, one of the most significant tax developments was the implementation of fiscal devices (printers and cashiers) to make sure that every transaction in the Republic of Panama is fully documented and that all taxes, withholdings, and deductions resulting from a commercial transaction are clearly printed on the invoice. These devices have to be authorised by the tax authorities for their use inside the territory of Panama. All commercial establishments had to purchase their fiscal device before 1 March 2012.

As a result of this purchase, the tax authorities will recognise a fiscal credit of 50% of the total value of the device, up to 700 United States dollars (USD). This fiscal credit recognition will be available one year after the date of purchase of the device and can be used on any tax except for value-added tax (VAT, known as ITBMS).

Another important change in tax law for 2011 was the implementation of the monthly advanced tax payment (AMIR), which replaced the yearly estimated tax payment for juridical persons. This new advanced tax calculation consists of the payment of 1% of the taxable income generated by the business in a monthly scale, which will constitute a fiscal credit to ensure the tax payment to the tax authorities.

As of May 2012, Panama has in force nine double taxation treaties (DTTs) to avoid double taxation: with Barbados, France, Luxembourg, Korea, Mexico, the Netherlands, Qatar, Singapore, and Spain. A treaty to exchange information with the United States (US) has also entered into force this year. There are two treaties to avoid double taxation that have been ratified by the National Deputies Assembly, with Portugal and Italy.

As of April 2011, loans to shareholders are deemed dividend distributions subject to a 10% withholding tax (WHT).

Taxes on corporate income

Panamanian income tax is levied based on the territoriality principle. Panamanian-source income is subject to taxation whether it is received by a resident or non-resident entity. Residency is only relevant to determine if the entity is subject to WHT or not.

As of 1 January 2011, corporations are subject to income tax at a fixed rate of 25%. Certain businesses and the related parties that render services to them were subject

Panama

to a 30% tax rate through 31 December 2011. As of 1 January 2012, this tax rate was reduced to 27.5%; and on 1 January 2014, it will be reduced even further to 25%.

The higher tax rate (i.e. the 27.5% rate) applies to either the generation or distribution of energy, telecommunication services in general, insurance, reinsurance, financial institutions regulated by Law No. 42 of 2001, cement industries, the operation and management of gambling games, mining in general, and entities dedicated to banking activities in Panama.

For companies in which the state owns more than 40% of the stock, the tax rate will remain at 30%.

The tax base (i.e. amount to which the tax rate will apply) for companies whose taxable income is greater than 1.5 million US dollars (USD) is the greater of:

- net taxable income calculated on the normal basis or
- 4.67% of the gross taxable income (excluding exempted and non-taxable income and foreign-source income); this is called the alternate calculation of income tax (*Calculo Alternativo del Impuesto sobre la Renta* or CAIR).

If the entity's tax year results in a loss due to the alternative calculation, the taxpayer may request to the Tax Administration (the General Directorate of Revenues, i.e. *Dirección General de Ingresos* or DGI) not to be subject to the CAIR.

The taxpayer may also request not to apply the CAIR if its effective income tax rate is higher than the applicable income tax rate (25% since January 2011). Here is an example of such an instance:

Net taxable income		USD
a	Total revenues	2,000.00
b	Deductible costs and expenses	1,950.00
c	Net taxable income	50.00

CAIR		USD
d	Presumptive net taxable income (4.67% x a)	93.40
e	Income tax (25% x d)	23.35

CAIR effective tax rate		
f	Presumptive income tax (e)	USD 23.35
g	Net taxable income (c)	USD 50.00
h	Effective tax rate (f/g)	46.70%

The DGI has a six-month period within which to reach a decision on such requests; otherwise, the petition will be considered as granted.

Corporate residence

A company is considered as a tax resident when it has been incorporated in Panama, regardless of where the main office is located or whether central management is exercised in Panama or abroad. Entities incorporated abroad may also be registered with the Tax Administration in order to avoid WHT.

Permanent establishment (PE)

Panama does not have formal PE rules. Under tax treaties signed, Organisation for Economic Co-operation and Development (OECD) rules will be applicable once treaties are in force.

Other taxes**Movable goods and services transfer tax (ITBMS)**

The movable goods and services transfer tax (*Impuesto de Transferencia de Bienes Muebles y Prestación de Servicios* or ITBMS) is the Panamanian VAT.

The general tax rate is currently 7%.

Alcoholic beverages and hotel accommodation are taxed at 10%, and tobacco and tobacco-derived products are taxed at 15%.

ITBMS is calculated on the value-added through a method of tax credits (i.e. ITBMS paid on transactions to produce taxable transactions) and tax debits (i.e. ITBMS collected on transactions).

Exports are not taxed, and the ITBMS paid to generate the exports may be refunded. The sale of goods such as medicines, foods, and certain products for babies are not taxed and may allow the supplier to recover the ITBMS as an exporter if certain criteria is met.

Medical services and transportation among other services are not taxed but do not produce ITBMS credit for the supplier.

In April 2011, with Law 31, a new transferring of goods was excepted from the payment of ITBMS, this being the purchase of cement, additives, and derivatives of such made by the contractors or subcontractors of the Panama Canal Authority for the construction of the third set of locks of the Panama Canal.

The statute of limitations is five years.

Customs duties

All goods introduced into the Panamanian territory from another country are subject to customs duties. The duty rates are provided by the Panamanian Customs and Tariffs Office.

Customs duties may only be assessed by authorised customs brokers.

Excise tax (selective consumption tax)

The selective consumption tax is applied to goods (e.g. jewellery, expensive automobiles, guns, tobacco, alcoholic beverages) and services (e.g. mobile, cable TV, satellite TV) that are considered as non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items and sales price for all other activities. The tax is levied at only one stage: on the importation of the taxed products; the sale of taxed goods produced in Panama; and for services, when the service is invoiced, the service is completely rendered, or upon receipt of advance payments, whichever first occurs.

Panama

Different tax rates apply depending on the type of service or good, with a minimum of 5% on sodas and 100% on tobacco products.

Stamp duty

Stamp duty is charged at a rate of USD 0.10 per USD 100 (or fraction thereof) only on certain commercial contracts.

Capital gains tax

The transfer of real estate property and securities is subject to WHT on the gross transactions amount, but the taxpayer may make a special income tax assessment to pay the capital gain and may request a rebate of the difference between the WHT and the capital gain.

In the case of the transfer of real estate property, a 2% real estate transfer tax plus a 3% income tax advance payment must be remitted (done over the gross transaction amount or the cadastral value, whichever is greater). The 3% may be deemed definitive; contrariwise, the tax will be assessed at 10% of the gain and the 3% of the advance payment will be credited. Any amount in excess may be subject to rebate.

The rates as described in the table below will be applicable to the transfer of real estate if:

- the transferor's core business is the sale of real estate with new constructions
- it is the first transfer of the real estate after the new construction is built, and
- the construction permit was issued after 1 January 2010.

New housing construction	Rate (%)
Up to USD 35,000	0.5
From USD 35,000 up to USD 80,000	1.5
Greater than USD 80,000	2.5
New commercial construction	4.5

When transferring new housing real estate, the real estate transfer tax (2%) does not apply.

If the first criterion is met but any of the other criteria needed to apply for the special tax rate table are not met, then the income tax will have to be assessed under the ordinary regime.

The transfer of securities is subject to a 5% WHT, and the tax rate on capital gain is 10%. The law establishes the application of a 5% WHT that will be applied by the buyer. The seller may accept the WHT as definitive or perform the calculation of the gain, apply the rate of 10%, and deduce the applied WHT. In case the WHT is superior, the taxpayer can choose to claim the return of payments made in excess.

Example:

Sales price (a)	1,000
Cost (b)	900
Benefit (c)	100
WHT at 5% of (a)	50
Tax at 10% of (c)	10
Payment in excess	40

The sale of fixed assets is subject to 10% on the capital gain, and there is no WHT.

Franchise tax

Franchise income tax must be paid by all corporations on an annual basis (USD 300 per year). The deadline for payment depends on the date of incorporation of the company. If the company was incorporated on any date during the first six months of the year, the due date for payment will be on 15 July of each year. If it was incorporated in the last six months, the due date will be 15 January of each year.

Non-profit organisations, cooperatives, and civil partnerships are not subject to franchise tax.

Operations notice tax

The notice of operations is an annual tax on equity at a rate of 2%, with a minimum tax amount of USD 100 and a maximum tax amount of USD 60,000. In the case of free zones or special trade areas, the tax will be calculated at a rate of 1% up to a maximum tax amount of USD 50,000.

The tax base is the outcome from total assets less total liabilities (excluding liabilities with related parties abroad).

Local municipal tax

Local municipal tax is charged based on the gross income generated by the business through the corresponding accounting period; it also depends on the type of activity being conducted by the corporation. In most cases, it cannot exceed USD 2,000 per month for each activity performed.

According to Municipal Agreement No. 40 of 2011, the monthly tax return was replaced by an Annual Municipal Tax Return for the District of Panama. This return must be filed before the Municipal Authorities in the first 90 calendar days after the ending of the fiscal year. In case the taxpayer does not file the return before the deadline, a USD 500 penalty will be applicable.

Branch income

For tax purposes, branches are considered separate entities from the head office and must therefore keep accounts separately and will have separate tax liability.

Branches located within the Panamanian territory must pay dividend tax through definitive WHT of 10% of net taxable income generated by the Panamanian branch, less all income taxes paid by the same corporation in Panama. This amount will be paid jointly on filing the corresponding income tax return.

Panama

Income determination

Under the territoriality principle, the following will not be considered as taxable income:

- All income produced outside Panama.
- All income generated from operations or services performed outside the Panamanian territory.

Inventory valuation

Inventory should be valued at the start of any business and, subsequently, at least once every accounting period. All assets must be put together, depending on their nature, and indicate different aspects (e.g. the unit of measurement, the name of the asset, the price of the unit, the total value of units). Reference to the accounting records should also be included.

Inventories are generally stated at cost and can be valued using the compound average cost method, first in first out (FIFO) method, retailer method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from using different methods of inventory valuation for tax purposes and financial purposes should be recorded and must be reported to the proper authorities. Once a taxpayer adopts a method, they must maintain it for at least five years.

Capital gains

See Capital gains tax in the Other taxes section for a description of how capital gains are taxed in Panama.

Dividend income

Panamanian legislation establishes that distribution of dividends is subject to definitive WHT, applied at the moment of distribution. Generally, dividends are subject to income tax at a rate of 10% without taking into consideration the form of payment, types of stock, assets, or money.

Dividend tax applies at a 5% rate on dividends paid from foreign source income, from income derived from exports, as well as exempt income from banking account interests and interests and earnings derived from securities issued by the government.

Free zone users are taxed at a 5% rate as well for local source income.

Loans to shareholders are deemed as dividend distribution, subject to a 10% withholding even in the cases where the 5% tax rate applies.

Notwithstanding the aforementioned, if the entity's shares are issued to bearer, they will be subject to dividend tax at a rate of 20%.

Dividend tax is levied if the entity meets one of the following criteria: (i) requires an operation permit to operate in Panama, (ii) requires an operation key to operate at the Colon Free Zone; (iii) is established in a Fuel Free Zone; (iv) is established in a free zone or special zone; (v) produces Panamanian-source taxable income. Dividend tax also does not apply to dividends paid on income received as a dividend if the entity is not required to withhold dividend tax or if the entity withheld the tax.

A complementary tax applies each tax year that the entity distributes less than 40% of the net profits after income tax. The complementary tax is an advance payment of the

dividend tax, calculated on the difference of the distributed dividends and 40% of the net profits after income tax and applies the corresponding tax rate. If complementary tax is paid, then the entity may offset the paid complementary tax with the dividend tax when the corresponding dividend is decreed.

Inter-company dividends

The distribution of dividends derived from income received as dividends from other entities is not subject to income tax or dividend tax as long as the entity that paid the dividend in the first instance was exempt from withholding any dividend tax, or if it was required to, made the corresponding withholding.

Foreign income

Panamanian resident companies are taxed on their income generated within the Panamanian territory. Any other income generated abroad will be exempt from income tax payment but may be subject to dividend tax (*see above*).

Deductions

Taxable income is determined by deducting from the Panamanian source income all costs, expenses, and non-taxable income applicable and permitted by law. The deductibility of costs and expenses depend on the relation of such costs and expenses with the generation or preservation of income source. Special restrictions apply to the following:

- Depreciation.
- Bad debt.
- Charitable contributions.

Costs and expenses related to non-taxable income are not considered as deductible. Thus, the taxpayer must split the expenses and costs related to taxable transactions from those related to non-taxable transactions. As of 1 July 2010, the expenses and costs allocated to taxed transactions may not exceed the amount from multiplying the portion of taxable income from the total income by the total costs and expenses.

Example:	Taxable	Non-taxable	Total
Income	100	50	150
	67%	34%	100%
Costs and expenses	83.75	41.25	125

The following deductions are subject to the deductions cap:

- Deductions on bad debts.
- Donations to the state, non-profit organisations, and education institutions (limited to 1% of the taxable income).

Depreciation and depletion

The straight-line and sum-of-the-years-digits methods of depreciation are allowed, as well as any other method.

Panama

Assets	Straight-line (%)
Buildings	3 ¹ / ₃ as maximum
Machinery and equipment	33 as maximum
Furniture and fixtures	33 as maximum
Vehicles	33 as maximum

In the case of mines, depletion will be deductible during the useful life or depending on the state contract methodology.

Goodwill

Goodwill expenses are deductible only when the transferring agent declares them as income.

Start-up expenses

Start-up expenses are deductible through the amortisation process, over a maximum term of five years.

Interest expenses

Interest expenses are deductible only in cases where the interest relates to the generation or conservation of taxable income from a Panamanian source. No thin capitalisation rules are in force.

Bad debt

A taxpayer may deduct bad debts by opting for one of the following options:

- Loading gains and losses annually to the value of such accounts in the fiscal year.
- Charging an annual profit and loss figure for the establishment of a reserve to meet contingencies of this nature.

Charitable contributions

Donations made in cash or in kind to the government, charitable or educational institutions, activities to promote HIV disease, or made for political parties are deductible, with certain restrictions.

Fines and penalties

Fines and penalties are not deductible.

Taxes

The national and municipal taxes that affect capital, sales, and other operations related to taxable income producing activity are deductible.

Net operating losses

Losses incurred by common taxpayers may be carried forward and deducted from the taxable profits for the following five years, at a rate of 20% each year, but limited to 50% of taxable income. Loss carrybacks are not allowed, and losses are not allowed for estimated income tax purposes.

Payments to foreign affiliates

A payment to a foreign entity (including affiliates) in a foreign country will be subject to WHT anytime it represents a deductible cost or expense for the payer. The tax base will be 50% of the remittance, and the income tax rate applicable is 25% as of 1 January 2011.

Group taxation

In Panama, there are no group taxation rules.

Transfer pricing

Transfer pricing rules are applicable only if a tax treaty to avoid double taxation is in use.

Thin capitalisation

There are currently no thin capitalisation rules in Panama.

Tax credits and incentives

Free zones

Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, and selective consumption tax derived from royalties on exportation and re-exportation activities. Aside from trading activities, the following businesses may also apply for the regime: higher education centres, scientific research centres, specialised centres for health services, high technology businesses, ensembling businesses, semi processed or finished products processing businesses, services businesses, environmental service businesses, general services, logistics services businesses, and manufacturing businesses.

Tourism, industry, and agriculture allowances

The Incentive Law for Tourism Development grants several tax benefits (e.g. exemption from import duties on certain tourism services and related goods, exemption from property tax for companies dedicated to tourism), but only for those corporations with a signed tourism agreement with the government. Income tax exemptions may apply in special cases.

In general, income from individuals or corporations that engage in agricultural production activities will be exempted from income tax if annual gross income is lower than USD 250,000.

Forestry plantations are totally exempted from income tax payment until 2018 if the lot planted has been duly registered at the Forestry Registry of the Environmental National Authority and resolution with approval from this authority has been issued.

Special laws

The Panamanian government has enacted special laws regarding tax exemptions for certain activities performed in Panama, such as call centres (Law No. 54 of 2001), and tax exemptions for certain appointed areas such as the Panama Pacific Economic Zone (Law No. 41 of 2004) and Law No. 41 of 2007, which creates a special regime for the establishment and operation of Regional Headquarters in Panama.

By means of Law No. 8 of 2010, Real Estate Investment Societies may deduct the profits distributed to their shareholders, provided that these Real Estate Investment Societies:

- raise long-term funds in a securities market
- are registered in the National Securities Commission
- distribute no less than 90% of their free cash flow
- register in the General Direction of Revenues, and

Panama

- withhold 20% of the profits distributed as an income tax advance payment on behalf of the shareholder, which may be deemed the definitive tax to be paid by the shareholder.

Withholding taxes

Royalties and commissions on services paid to foreign entities are taxed through the application of the corresponding tax rate (25% as of 1 January 2011) over 50% of remittance under the concept of WHT (effective tax rate is 12.5%). The taxpayer may decide not to withhold taxes and consequently not deduct the expense.

Payment of interest is also subject to income tax on 50% of the interest paid to a beneficiary abroad on loans invested in Panama, but the payer must proceed with the WHT even if one does not deduct the interest.

If the beneficiary is registered as a taxpayer in Panama before the Tax Administration, no WHT may be required.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Foreign corporations	5/10/20	12.5	12.5

In case of treaties, special rules are applicable in order to avoid double taxation.

Recipient	WHT (%)			
	Dividends	Interest	Royalties	Fees
Barbados	5/7.5	0/5/7.5	7.5	0/7.5
Korea	5/15	0/5	3/10	0
Luxembourg	5/15	0/5	5	5
Mexico	5/7.5	0/5/10	10	0/12.5
The Netherlands	0/15	0/5	5	0
Portugal	10/15	0/10	10	0/10
Qatar	6	0/6	6	0
Singapore	4/5	0/5	0/5	0
Spain	0/5/10	0/5	5	7.5

Tax administration

Taxable period

The accounting period is the period for which the company makes its accounts. Returns shall be made upon completion of the accounting period and may not exceed 12 months. For most companies, it is usually from 1 January to 31 December.

Tax returns

The due date for filing is three months after the end of the fiscal year, with the possibility for an extension of up to two additional months.

Payment of tax

Income tax payment shall be made depending on the income tax return and shall be made no longer than three months after closing of the corresponding accounting period.

Taxpayers must make income tax advance payments based on 1% of monthly gross income. The taxpayer will have to file monthly income tax returns assessing the advance payment within the next 15 days following the end of the month. VAT on purchases may be offset against this advance payment if the taxpayer is a seller in the local market of pharmaceutical products or food and meets certain criteria.

Statute of limitations

The Tax Administration may audit the income tax returns filed within the last three years from the last day of the year on which the tax return was filed.

Significant developments

There were a number of amendments to existing tax law announced when the 2012 National Budget was handed down on 6 December 2011. The majority of these changes are effective as of 1 January 2012. In summary, the key taxation developments announced in the 2012 National Budget included:

- The general corporate income tax (CIT) rates remains at 30% for resident companies and at 48% for non-resident company.
- To support the 2015 Pacific Games being hosted by Papua New Guinea (PNG), income tax exemptions for athletes or participants were introduced as was a 150% income tax deduction for donations in excess of 500,000 Papua New Guinea kina (PGK) made to prescribed bodies in connection with the games.
- The current exemption from income tax for certain new manufactured products will be abolished from 1 January 2015.
- Income tax and stamp duty amendments have been made to encourage the use of property unit trusts.
- The period of application for the Banking Community Service Obligation tax credit scheme has been extended to 31 December 2017 to encourage the continued establishment of banking service in rural areas.
- The Highlands Highway tax credit scheme was re-introduced with limited application to emergency repair expenditure. Also of interest to resource projects are the new special deduction provisions dealing with the treatment of rehabilitation costs, including a mechanism to transfer tax losses arising from site rehabilitation costs to another resource project in which that taxpayer has an interest.
- The goods and services tax (GST) registration threshold increased from PGK 100,000 to PGK 250,000.

It continues to be reported that Papua New Guinea has negotiated double taxation treaties (DTTs) with Indonesia, Thailand, and New Zealand. Those DTTs have not yet been ratified in Papua New Guinea.

The Internal Revenue Commission (IRC) released guidance on transfer pricing matters in the form of Taxation Circular No. 2011/2 in late 2011.

The Internal Revenue Commission also released new tax return forms in March 2012 that are required to be used by all taxpayers for all tax returns from that time forward (including returns outstanding from prior years). These include additional disclosures pertaining to tax losses and transactions with international related parties.

Taxes on corporate income

Papua New Guinea resident companies are liable for income tax on their worldwide income. Companies that are not resident in Papua New Guinea are only required to remit tax on income sourced in Papua New Guinea. A non-resident's PNG-sourced passive income, including dividends, interest, and royalties, is generally only subject to withholding tax (WHT). It is ordinarily the case that the payer of the dividend, interest, or royalty must withhold the relevant amount of the tax and remit this to PNG's IRC.

Papua New Guinea levies CIT on companies on a flat rate basis. The operations of a company, rather than the company's taxable income level, will dictate the rate applied to the company's taxable income.

Generally, trading profits and other income (except income which is specifically exempt) of resident companies in Papua New Guinea are assessed tax at a rate of 30%, whereas non-resident companies operating in Papua New Guinea are assessed tax at a rate of 48%. There are, however, different tax rates for income derived from mining, petroleum, and gas operations.

Specifically, trading profits and other income from operations in Papua New Guinea are liable for CIT at the following rates:

Source of income	CIT rate (%)
Income other than income from mining, petroleum, or gas operations:	
Resident company	30
Non-resident company	48
Income from petroleum operations: *	
Existing projects	50
New projects	45
Incentive rate projects	30
Income from mining operations:	
Resident company	30
Non-resident company	40
Income from gas operations *	30

* The same rates of CIT apply to income from the petroleum operations listed above or gas operations derived by a resident or non-resident company.

Overseas shippers

Income derived by overseas shippers or charterers carrying passengers, livestock, mail, or goods out of Papua New Guinea is taxable in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 5% of the gross income, which is taxable at the non-resident rate of 48% in the case of companies. The IRC may exempt the overseas shipper from tax if the shipper's home country exempts PNG shippers from a similar tax.

Local income taxes

There are no local income taxes in Papua New Guinea.

Papua New Guinea

Corporate residence

A company will be deemed a resident for CIT purposes if it meets either the (i) incorporation test or (ii) the management and control test.

Incorporation test

A company incorporated in Papua New Guinea is automatically regarded as a PNG tax resident. However, the operation of the law of another country and a relevant DTT may result in a company also being treated as resident in another country.

Management and control test

A company is a PNG tax resident if it is managed and controlled in Papua New Guinea, regardless of where it is incorporated. Generally, a company is managed and controlled in Papua New Guinea if key decisions affecting the company are made at directors' meetings held in Papua New Guinea. This also includes a company incorporated outside Papua New Guinea that trades in Papua New Guinea and has its voting power controlled by resident shareholders.

Dual residence

An entity may be a tax resident of both Papua New Guinea and another country by application of domestic legislation. A DTT entered into between Papua New Guinea and another country may contain a tiebreaker test to determine the country of residence for the purposes of the DTT.

Permanent establishment (PE)

The concept of 'permanent establishment' has limited significance in the domestic taxation law of Papua New Guinea and is defined to mean a place at or through which a person carries on any business. Under domestic taxation law, Papua New Guinea will seek to tax the PNG-sourced income of a non-resident irrespective of whether or not that income is derived at or through a PE in Papua New Guinea.

Where PNG has entered into a DTT, the concept of PE becomes more important as it will then be one of the factors determining Papua New Guinea's taxing rights over income sourced in Papua New Guinea, particularly with respect to the business profits of a non-resident company. In general terms, Papua New Guinea's DTTs:

- define a PE to be a fixed place at or through which the business of an enterprise is wholly or partly carried on, and
- deem a PE to exist in various circumstances, including those relating to the presence of substantial equipment in the contracting state and the time spent by personnel of an enterprise furnishing services in a contracting state.

Other taxes

Goods and services tax (GST)

The GST rate is 10% and applies to most goods and services supplied in Papua New Guinea. Exported goods and services attract a zero rate of GST. Goods and services, other than motor cars, supplied to mining, petroleum, or gas companies are also zero-rated. Some goods and services are exempt, including medical, educational, and financial services. Land is excluded from GST, but buildings and other improvements are subject to the tax.

Customs duties

The majority of manufacturing inputs (including plant and machinery) attract no custom duties, and other custom duty rates are being progressively reduced. The remaining rates for custom duties vary depending on the nature of the good being imported and are assessed on the total value of the goods imported, including cost, insurance, and freight (CIF). Customs bonds may be issued for the temporary importation of goods that are to be re-exported within 12 months.

Excise taxes

Although customs duties are now minimal in many cases, some goods, most notably motor vehicles, now attract excise tax. Private motor vehicles generally attract excise at the rate of 60%, whereas work vehicles attract excise tax of 10%. Excise taxes can also apply to some domestically produced goods, including refined fuel products, alcohol, and tobacco.

Land tax

Land tax is imposed by provincial governments on the unimproved value of the land, and the power to levy land tax is vested exclusively with the provincial governments. In Papua New Guinea, land tax is difficult to implement and faces major geographical and social problems.

Stamp duties

Stamp duty applies at varying rates on documents and certain transactions. Of particular note is duty charged on the conveyance of property, which rises to a maximum of 5% where the value of the property being transferred exceeds PGK 100,000. The duty is payable by the purchaser, and a 5% duty on the unencumbered value of land may also be payable where there is a transfer of shares in certain landholding companies.

Other dutiable transactions include share transfers (including some share buy-backs) which are subject to a rate of 1%. The Collector of Stamp Duties has the power to amend assessments and refund overpayments of stamp duty.

Stamp duty is payable on documents executed outside Papua New Guinea which relate to property or matters done or to be done in Papua New Guinea.

Export duties

Timber

Export duty on timber logs (not sawn timber or plantation logs) is calculated with reference to the FOB value per cubic meter of exported logs and rates that increase as the value of the exported logs increase.

Spices

Levies are imposed from time to time on the export of specified spices (e.g. vanilla).

Contributions to employee superannuation funds

Contributions to employee superannuation funds are compulsory for entities with 15 or more permanent employees. The employer's compulsory contribution is 8.4% of each employee's gross basic salary. The employee's minimum contribution is 6.0%.

Membership is generally compulsory for citizens. Non-citizens are currently exempt; however, this is under continuing review.

Papua New Guinea

Contributions must be paid to an authorised superannuation fund. Contributions paid to an authorised fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee's gross taxable salary. Contributions to non-resident funds are not tax-deductible.

Training levy

All businesses whose annual payroll exceeds PGK 200,000 are subject to a 2% training levy, calculated on the sum of the taxable salaries, including benefits, of all personnel. Qualifying expenses incurred in training PNG citizen employees are creditable up to the actual amount of the levy. The training levy, if payable, is not tax-deductible.

Departure tax

A departure tax is collected by airlines issuing tickets for persons departing Papua New Guinea.

Gaming machine tax

Papua New Guinea imposes a 74% tax on gross revenue from gaming machines.

Resource project production levies

Production royalties of 2% are payable to the national government on the net smelter return from mining operations. These royalties are tax-deductible. A royalty, at the rate of 2% of the wellhead value, is also payable from the production of petroleum and gas operations. Holders of new petroleum development licences are entitled to treat royalties as income tax paid. However, new petroleum projects will also pay a tax-deductible development levy calculated at the same rate of 2% of the wellhead value.

Mining projects are also required to pay a production levy to the Mineral Resources Authority calculated at a rate between 0.25% and 0.5% of the assessable income from production.

Branch income

Income derived by a non-resident contractor for services in Papua New Guinea is usually subject to a WHT at the rate of 12% of gross income. This amount is calculated on deemed taxable income of 25% of the gross contract income, which is taxed at the foreign contractor tax rate of 48% (subject to tax treaties). The provisions extend to payments for the following:

- The installation, maintenance, and use in Papua New Guinea of substantial equipment or machinery.
- Construction projects.
- For the lease or charter of any industrial, commercial, or scientific equipment or any machinery or vehicle.
- Consultancy or management services.

Where the non-resident contractor rules do not apply, the non-resident company will be subject to income tax at the foreign contractor tax rate of 48% on its PNG sourced taxable income (*see the Income determination section for a definition of taxable income*).

PNG branch remittances are not liable for dividends WHT or any branch profits or similar tax.

Income determination

Taxable income is defined as the sum of assessable income minus the allowable deductions. In practice, profits are calculated for tax purposes by reference to the profits reported in the financial accounts. Accounts must be prepared in accordance with PNG accounting principles, which follow the International Financial Reporting Standards (IFRS).

Inventory valuation

There is no form of stock relief or trading stock valuation adjustment to recognise the effects of inflation in Papua New Guinea. There is a once-only option to adopt the lowest of the cost amount, the market selling value, or the replacement value (which, in practice, may mean that book and tax valuations for trading stock are not aligned). Where the option is not exercised, the value of the stock is deemed to be the cost price; however, neither the income tax law nor the associated regulations provide detailed guidance on what constitutes 'cost price' (the Commissioner General of Internal Revenue has not produced any related guidance to date). It will generally be the case that where a taxpayer has determined a cost price in accordance with IFRS than that cost price will also be accepted for income tax purposes.

In special circumstances, the Commissioner General of Internal Revenue may accept a lower valuation.

Capital gains

There is no general capital gains tax in Papua New Guinea. However, profits arising on the sale of property acquired for the purpose of resale at a profit, or from the carrying out of a profit-making scheme, are taxable as ordinary income.

Dividend income

Unless otherwise exempt from CIT, dividends are included in the assessable income of a shareholder.

Inter-company dividends

Dividends received by a resident company from other companies, whether resident or non-resident, while being assessable to tax, are generally subject to a full tax rebate and are effectively received tax-free. However, where a company has losses on other activities or losses carried over from earlier years, those losses are applied against dividend income before the calculation of the dividend rebate.

Stock dividends

In most cases, the payment of a dividend by way of the issue of shares is subject to the same taxation treatment as the payment of a dividend by way of cash or the distribution of other property. However, dividends paid by the issues of shares wholly and exclusively out of profits arising from the sale or revaluation of assets not acquired for the purpose of resale at a profit are exempt from income tax and dividends WHT.

Interest income

Unless exempt under specific provisions, interest paid or credited by a financial institution, the Central Bank, or a company to a person resident in Papua New Guinea, is includable in income, and the person making the payment of or crediting interest in the account is liable to withhold and pay tax upon the amount.

Papua New Guinea

Partnership income

A partner's share of the assessable income of the partnership less all allowable deductions to the partnership is includable in the partner's assessable income for the year of income. Likewise, the partner's individual interest in a partnership loss incurred in the year of income is an allowable deduction. Further, if income is exempt income to the partnership, this income will be exempt income to the individual partner relative to their individual interest.

Unrealised exchange gains/losses

Generally, foreign exchange gains realised and derived from debts made on or after 11 November 1986 or denominated in a currency other than the Papua New Guinea kina are included in assessable income.

Foreign income

PNG resident companies are liable for CIT on their income from all sources (i.e. including foreign sourced income). A foreign tax credit may be available to offset foreign tax paid against PNG tax payable (*see the Tax credits and incentives section for more information*).

There are no provisions in Papua New Guinea that permit the deferral of the taxation of income derived outside Papua New Guinea. Subject to the operation of a DTT, foreign-sourced income derived by a resident of Papua New Guinea is subject to tax in Papua New Guinea in the year in which it is derived irrespective of whether or not that income is repatriated to Papua New Guinea.

Deductions

General deduction provisions provide that all losses and expenditures, to the extent incurred in gaining or producing the assessable income or are necessarily incurred in carrying on a business for the purpose of gaining or producing that income, are allowable deductions. However, the general deduction provisions do not allow a deduction to the extent a loss or expenditure is an outgoing of capital, or of a capital, private, or domestic nature, or incurred in relation to the gaining or production of exempt income.

Depreciation

Depreciation is allowed for equipment and other assets at prescribed rates. A taxpayer must use the diminishing-value method unless an election is made to use the prime-cost method. The applicable diminishing-value rates are 150% of the prime-cost rates.

Plant, machinery, and equipment

Plant, machinery, and equipment (including buildings) are depreciable at rates according to their estimated lives. A taxpayer other than a taxpayer who derives income from mining, petroleum, or gas operations may elect to claim special accelerated depreciation rates for certain capital items. For example, flexible depreciation rates (up to 100%) may be claimed on new industrial plant with a life exceeding five years that is used for manufacturing purposes. Other new plant and articles used in manufacturing, construction, transport, storage, communication, and agricultural production are eligible for an accelerated deduction equal to 20% of cost in the year of purchase. New plant and articles used for tourism are eligible for an accelerated deduction equal to 55% of cost in the year of purchase.

Motor vehicles

Motor vehicles are generally depreciable at 20% of prime cost. There is no upper limit in value for depreciation purposes.

Buildings

Buildings forming an integral part of plant, machinery, and equipment are depreciable at a prime-cost rate of up to 7.5% depending on the construction materials. Buildings housing plants eligible for the one-year write-off deduction (*see comments on new industrial plant under Plant, machinery, and equipment above*) can be written off in the year of construction. Other income producing buildings may qualify for the accelerated deduction of 20% in the year of purchase.

Agricultural and fishing plants

Most items of new agricultural and commercial fishing plants qualify for 100% depreciation as do boats and ships, including ancillary equipment, used solely as dive boats or for scuba diving by accredited tour operators. Other new items having a life exceeding five years used by a person carrying on agricultural operations are eligible for accelerated depreciation in the initial year of use.

Goodwill

A deduction is not available for goodwill or the amortisation of goodwill in Papua New Guinea (this being an amount not deductible under ordinary concepts and an item for which there is no specific deduction provision).

Start-up expenses

It will generally be the case that start-up expenses will not be deductible in Papua New Guinea. Such expenses are generally either capital, or of a capital nature, or incurred prior to the derivation of assessable income. There is no specific deduction provision for the deductibility of start-up expenses.

Interest expenses

A deduction is generally available for interest incurred on an arm's-length basis, subject to meeting the general principles for deductibility. Where interest is incurred in connection with the construction or acquisition of an item of plant or capital asset, that interest is not immediately deductible. Rather, such interest is deemed to form part of the cost of that asset (and in the case of plant will then form part of the base from which future depreciation deductions may be claimed).

Where the interest is incurred in connection with a resource project, a 3:1 debt-to-equity ratio (with the concepts of debt and equity being based on IFRS and all debt being considered) must be maintained in respect of that resource project by the taxpayer seeking to deduct that interest in order for a full deduction to be available. Those thin capitalisation provisions have specific application to taxpayers engaged in resource operations only, and Papua New Guinea does not have thin capitalisation provisions for other taxpayers.

Bad debt

Bad debts are deductible if they have previously been included in assessable income and written off by year end or if the bad debt was in respect of money lent in the ordinary course of the taxpayer's business of money lending.

Papua New Guinea

Double deductions

An additional amount equal to the actual amount of expenditure incurred is deductible in respect of certain expenditures (e.g. export market development costs, some staff training costs, and certain donations). In other words, a 'double deduction' is available with respect to these items.

Donations

It is considered that donations made by a corporate taxpayer meet the general principles for deductibility and hence will generally be deductible (notwithstanding the specific provision dealing with gifts to charitable bodies has no current effect as there are no charitable bodies approved by the Commissioner General of Internal Revenue for this purpose). There are specific provisions in Papua New Guinea's taxation law dealing with the deductibility of certain donations, some of which provide a deduction for up to 200% of the value of the amount donated.

Pension expenses

Contributions paid to an authorised superannuation fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee's gross taxable salary. Contributions to non-resident funds are not tax-deductible. *See the Other taxes section for more information.*

Fines and penalties

There are no specific provisions denying a deduction for fines or penalties in Papua New Guinea taxation law; however, arguably fines and penalties may not meet the general principles for deductibility, and their deductibility needs to be considered on a case-by-case basis.

Taxes

A deduction is not allowable in respect of payments of income tax or training levy. Other taxes may be deductible, subject to meeting the general principles for deductibility.

Net operating losses

Domestic

Trading losses may be offset against all income received in the same accounting period or carried forward and offset against future trading profits. The limitation period on the carryforward of losses is generally 20 years. Losses may not be carried back against prior years' profits. Primary production losses and resource project losses may be carried forward without a time limitation, although, again, they may not be carried back (*see the Tax credits and incentives section for more information*).

Note that the carryforward of losses is subject to a 50% or more continuity of shareholding and control test, or a continuity of business test where there is a breach of the ownership test.

Foreign

Losses incurred by a resident taxpayer from a source outside Papua New Guinea (other than in relation to export market development) are not deductible against assessable income derived within Papua New Guinea. In practice, overseas losses can be carried forward and offset against overseas income for up to 20 years.

Payments to foreign affiliates

The deduction available to a taxpayer for management fees paid to an associated person is limited to the greater of:

- 2% of assessable income derived from PNG sources by the taxpayer or
- 2% of the total allowable deductions, excluding management fees incurred by the taxpayer in Papua New Guinea.

The limitation applies to both resident and non-resident taxpayers. Special rules apply to mining, petroleum, and gas companies. These limits may not apply where the recipient of the management fee is resident in a country with which Papua New Guinea has a DTT or where it can be demonstrated that the management fee arrangements do not have the purposes or effect of avoiding or altering the income tax payable in Papua New Guinea.

Group taxation

Companies are assessed for CIT separately, regardless of whether they are part of a group of associated or related companies. Losses of one company within a group cannot be offset for tax purposes against the profits of another company within that group.

The Companies Act allows two or more companies to amalgamate and continue as one, and provisions are in place to allow this to occur without any adverse CIT consequences.

Transfer pricing

Papua New Guinea has transfer pricing provisions that require transactions with foreign affiliates to be conducted on an arm's-length basis.

Thin capitalisation

See *Interest expenses in the Deductions section for a description of thin capitalisation rules in Papua New Guinea.*

Tax credits and incentives

In this section, we comment on the more significant tax credits and incentives available in Papua New Guinea, followed by a summary of those with more limited application.

Foreign tax credit

A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to either the foreign tax paid or the average PNG tax payable on that foreign income, whichever is less. There is no mechanism to carry forward excess foreign tax credits for utilisation in subsequent year.

Research & development (R&D) deduction

A 150% deduction is available for expenditures on R&D. The deduction is available to all sectors of the economy. Broadly, R&D expenditures are defined as systematic, investigative, and experimental activities that involve innovation or a high degree of technical risk carried out for the purpose of acquiring new knowledge, or creating new or improved materials, products, devices, processes, or services.

Primary production incentives

Key incentives that are available with specific application to primary production activities include:

Papua New Guinea

- Outright deductions for certain capital expenditures, including clearing, preparing, or conserving land for agriculture; eradicating pests; providing labourers' accommodation; and for the conservation and conveyance of water.
- A 100% deduction is available for a new plant used directly for the purposes of agricultural production, and an initial 20% accelerated depreciation deduction is allowed for a new plant with a life exceeding five years.
- Losses incurred in carrying on a primary production business can be carried forward indefinitely; they are not restricted to the 20-year limit that generally applies to company tax losses.
- Agricultural companies may transfer to their shareholders the benefit of the outright tax deduction available for many types of capital expenditures. The total deduction available to shareholders may not exceed the amounts paid on their shares.
- As part of promoting investment in primary production, a 20% tax rate is prescribed in respect of 'incentive rate primary production income' derived by a company (as opposed to the normal 30% tax rate for a resident company or 48% for a non-resident company) for up to 10 years.

Agricultural production extension services deduction

A 150% deduction is available for expenditures on services provided free of charge to smallholder growers, including the provision of advice, training, and technical assistance in relation to primary production to assist growers with production, processing, packaging, and marketing issues.

Incentive rate for large scale tourist accommodation facilities

A 20% tax rate applies to income derived by a taxpayer from the operation of a large scale tourist accommodation facility or a substantially improved large scale tourist accommodation facility. The rate applies for 14 years after the end of the year of income in which the taxpayer first derives income from the facility.

Double deduction for staff training costs

Certain staff training costs, including the cost of full-time training officers and tourism training, are eligible for a double deduction. The total tax saving is limited to 75% of the expenditure incurred.

Double deduction for export market development costs

Expenditures incurred in the promotion for sale outside Papua New Guinea of goods manufactured in Papua New Guinea or tourism promotion is eligible for double deduction. The total tax saving cannot exceed 75% of the expenditures incurred.

Export incentives

The net export income from the export sale of certain types of goods is exempt for the first four years of income, with a partial exemption in the following three years. This exemption will cease to apply from 1 January 2015 (except in respect of goods which qualified for the exemption prior to that date).

Tax credit for infrastructure development by agricultural, mining, petroleum, and gas companies

A tax credit is available to agricultural, mining, petroleum, gas, and certain tourism companies that incur expenditures on a prescribed infrastructure development. In the case of taxpayers engaged in mining, petroleum, and gas operations, the credit is limited to 0.75% of the assessable income or the amount of tax payable for the year (in respect of that mining, petroleum, or gas project), whichever is less. Excess expenditures over the 0.75% or tax payable may be included in the following year's rebate claim.

Papua New Guinea

Unutilised credits or excess expenditures can generally only be carried forward for two years. In the case of taxpayers engaged in agricultural production, the credit is limited to 1.5% of the assessable income or the amount of tax payable for the year, whichever is less.

A prescribed infrastructure development includes a school, aid post, hospital road, and other capital assets that have been approved as such by the Department of National Planning and the IRC. It cannot be an expenditure required under the Mining Act or the Oil and Gas Act.

A 1.25% tax credit scheme also exists in respect of expenditure incurred in connection with the emergency repair of the Highlands Highway.

Other tax incentives in Papua New Guinea

Other tax incentives available in Papua New Guinea include:

- Manufacturers' wage subsidy.
- Immediate deduction for the costs of acquiring and installing solar heating plant.
- A ten year tax exemption for qualifying new business located in prescribed remote areas of Papua New Guinea.
- A specific deduction for environmental protection and clean-up costs.

Incentives for petroleum, mining, and gas operations

Special incentives and rules apply to mining, petroleum, and gas exploration, extraction, and production activities. The main aspects are as follows:

Project basis of assessment

A project basis of assessment (ring-fencing) is adopted for all resource projects. This means losses from other operations, regardless of whether or not they are resource related cannot generally be offset against resource project income from a particular ring-fenced project. However, there are some concessions to the ring-fencing principle in respect of exploration expenditures and expenditures in respect of discontinued projects and losses arising from site restoration costs.

In general, all costs incurred in the exploration and development phases of the project are accumulated and amortised over the life of the project. Once production starts, an immediate deduction is allowed for 'normal' operating and administration expenses. Capital expenditures incurred after the start of production are capitalised and amortised over the life of the project.

Rate of tax

The rates of tax in respect of income from a resource project are:

Source of income	CIT rate (%)	
	Non-resident companies	Resident companies
Mining	30	40
Petroleum:		
Existing projects	50	50
New projects	45	45
Incentive rate	30	30
Gas	30	30

Papua New Guinea

Interest deductions

Interest is not deductible prior to the commencement of a resource project. Following the issue of a resource development licence, a person carrying on a resource project or exploration in relation to a resource project may claim a deduction against resource income for interest on money borrowed for carrying on the relevant operations or exploration. This is subject to a number of conditions, including maintaining a debt-to-equity ratio of 3:1.

Capital allowances

Allowable exploration expenditures (AEE) are amortised over the life of the resource project. The deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. The amount of the deduction is limited to the amount of income remaining after deducting all other deductions, other than deductions for allowable capital expenditure. In other words, the deduction cannot create a tax loss.

Allowable capital expenditures (ACE) are amortised over the life of the resource project. The ACE is split into two categories: capital expenditures with an estimated effective life of more than ten years (long-life ACE) and capital expenditures with an estimated effective life of less than ten years (short-life ACE).

The annual deduction for long-life ACE is claimed on a straight-line basis over ten years.

Where the remaining life of the project is less than ten years, the rate at which the deduction is allowed is calculated by referring to the remaining life of the project. For short-life ACE, the annual deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. For new mining projects, the deductions for both long-life ACE and short-life ACE are calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less.

The amount of the deduction for ACE is limited to the amount of income remaining after deducting all other deductions. In other words, the deduction cannot create a tax loss.

Off licence exploration expenditure

A major easing of the ring-fencing principle applies to taxpayers, which are involved in a producing project, where the taxpayer or a related party incurs exploration expenditures outside the area of the productive project. In this situation, the taxpayer can elect (whether or not it is currently involved in a producing project) to add such exploration expenditures to an exploration pool that can be amortised against income from the producing project.

The amount allowable as a deduction from this exploration pool in respect of resource operations carried on by the taxpayer or a related corporation is the lesser of:

- 25% of the total undeducted balance of expenditures in the exploration pool or
- such amount as reduces CIT (other than additional profits tax [see below]) which would, but for this deduction, be payable by the taxpayer and its related corporations in respect of those resource operations for that year of income, by 10% (or 25% for mining projects).

Management fees

Once a resource project derives assessable income, the deduction for management fees is restricted to 2% of operating expenses other than management fees. During the exploration phase of a project, the amount of management fees which can be treated as allowable exploration expenditure is limited to 2% of the exploration expenditure other than management fees. Furthermore, during the development phase, the amount of management fees that can be treated as allowable capital expenditure is limited to 2% of the allowable capital expenditure other than management fees.

Transfer of expenditures

When interests are transferred from one taxpayer to another, the vendor and purchaser can agree to transfer deduction entitlements for the unamortised balances of allowable exploration expenditure and allowable capital expenditure to the purchaser.

Liquefied natural gas (LNG) project

A number of provisions with specific application to the PNG LNG project have been included in the Income Tax Act, Stamp Duties Act, Goods and Services Tax Act, Customs Act, and Excise Act.

Other provisions were added or amended at the same time as the PNG LNG project-specific provisions, the most notable being the re-introduction of additional profits tax for all designated gas projects.

Additional profits tax

Designated gas projects are potentially subject to additional profits tax (this tax does not currently have application to mining or petroleum projects). This is essentially a tax on positive cash flows arising from a gas project in excess of a hurdle rate of return. There are two calculations required and, in summary, they operate as follows:

- Under Calculation X, once the cash flows become positive, after exceeding a 17.5% accumulation rate, the positive cash flow is subject to tax at a 7.5% rate.
- Under Calculation Y, once the cash flows become positive, after exceeding a 20.0% accumulation rate and any additional profits tax paid under Calculation X, the positive cash flow is subject to tax at a 10.0% rate.

Withholding taxes

Interest, dividend, royalties, and technical/management fees

The following WHT rates apply to interest, dividends, royalties, and technical fees under PNG domestic law and tax treaties. PNG domestic legislation provides an exemption from WHT for interest and dividends in certain circumstances. The higher rates quoted are the maximum rates allowable under the treaties.

Recipient	WHT rate (%)			
	Dividends (1)	Interest (2)	Royalties	Technical fees
Resident	17	15	0	0
Non-resident corporations and individuals	17	15	10/30 (3)	17
Treaty				
Australia	17	10	10	0
Canada	17	10	10	0

Papua New Guinea

Recipient	WHT rate (%)			
	Dividends (1)	Interest (2)	Royalties	Technical fees
China	15	10	10	0
Fiji	17	10	15	15
Germany (4)	15	10	10	10
Korea, Republic of	15	10	10	0
Malaysia	15	15	10	10
Singapore	15	10	10	0
United Kingdom	17	10	10	10

Notes

- The rate of WHT on dividends paid by mining companies is 10%. Dividends paid to a resident or a non-resident out of income from petroleum or gas operations are exempt from income tax and are not subject to WHT. There are also some other specific exemptions from WHT on dividends.
- There is no WHT on interest when:
 - interest is paid or credited to a licensed financial institution in Papua New Guinea, the Bank of Papua New Guinea, or the state
 - interest is paid or credited by a resource company to a non-resident lender, or
 - the interest income is otherwise exempt income in the hands of the recipient.
- A royalty paid to a non-resident associate of the payee will suffer a 30% WHT. Where the non-resident is not an associate of the payee, the WHT rate will be 10% (or 48% of the taxable income derived from the royalty if the non-resident chooses to lodge an income tax return in Papua New Guinea).
- The treaty with Germany has not yet been ratified by Germany.

Business income withholding tax

Income derived by local contractors in certain industries is covered by the business income WHT regime. The industries affected include:

- Building and construction
- Road transport
- Motor vehicle repairs
- Joinery and cabinet making
- Architecture
- Engineering
- Surveying
- Security
- Cleaning and maintenance
- Advertising
- Entertainment
- Consultancy
- Equipment hire

Businesses affected are required to have a certificate of compliance and to produce it when entering into contracts with their customers. Payers are required to file an annual income reporting statement where they make either an eligible payment of PGK 500 or more in relation to one contract or eligible payments for several contracts exceeding PGK 3,000 in the year of income in relation to a single payee. Payers are required to deduct a 10% WHT if payees do not produce a certificate of compliance.

Non-resident insurer withholding tax

Premiums paid to non-resident insurers in respect of insurance contracts on property situated in Papua New Guinea or insured events that can only occur in Papua New Guinea are subject to tax in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 10% of the gross premium, which is taxed at the non-resident

tax rates of 48% (companies) or 30% (unincorporated associations). Tax treaties may limit the rate of tax applied.

Tax administration

Taxable period

The tax year is generally the period 1 January to 31 December; however, application may be made for a substituted tax year-end. These will normally be granted where the substituted tax year-end coincides with the accounting year-end of an overseas holding company. A company's tax year does not need to be the same as its accounting period.

Tax returns

Papua New Guinea operates on a full assessment basis, and companies are required to lodge an annual CIT return showing the calculation of taxable income for the year. In addition, the return must provide detailed disclosures in relation to income derived and expenses incurred during the year of income.

A company must file a tax return by 28 February in the year following the year of income to which the return relates. However, the following automatic extensions apply where the company lodges its return through a registered tax agent:

- To 30 June for taxable returns and partnership returns.
- To 31 August for resource company returns.
- To 31 October for non-taxable returns.

Payment of tax

CIT is collected under a provisional tax system. Under this system, tax is paid in respect of a company's current year profits (i.e. payments made in the year of income are in respect of income derived in the same year as the payment is due).

Provisional tax is assessed by the IRC based on the last return lodged. In the event that no tax was payable on the previous year's return, the Commissioner General has the right to estimate the amount of tax based on any other information available.

Provisional tax is payable in three equal instalments by 30 April, 31 July, and 31 October.

Applications may be made to reduce provisional tax assessed if the tax due for the year in question is expected to be lower than the provisional tax assessed. Where estimated provisional tax is less than 75% of the income tax ultimately assessed, additional tax may be levied. Additional tax at a rate of 20% will be assessed, based on the difference between the estimate lodged and the provisional tax originally determined, or the actual tax payable, whichever is less. The Commissioner General has the discretion to require payment of additional tax.

Mining, petroleum, and gas companies are subject to advance payments tax, a system that broadly mirrors the provisional tax system in place for non-resource companies. The main difference for resource companies is they have the option to lodge an estimate of their taxable income for the year prior to 30 April, 31 July, and 31 October each year, which the IRC uses to assess each advance payments tax instalment.

Following the lodgement of the CIT return, the IRC will serve a notice of assessment on the company. The balance of tax payable for a year of income, after the application of

Papua New Guinea

provisional tax (or advance payments tax in the case of a resource company) and other tax credits or rebates, is due to be paid within 30 days of the date of service of the notice of assessment.

Audit cycle

There is no prescribed audit cycle in Papua New Guinea, and resource constraints have limited the IRC's audit activities.

Period for amendment of assessments

Where the IRC considers that a taxpayer made a full and true disclosure of all the material facts necessary for assessing their returns as originally assessed, the IRC may only amend an assessment that increases the tax liability of the taxpayer within three years from the date from the date that tax became due and payable under the original assessment.

Where the IRC considers that a taxpayer did not make a full and true disclosure of all the material facts necessary for the assessment of their returns, and there has been an avoidance of tax, then:

- the IRC may amend any assessments previously issued to the participants if the IRC is of the opinion that the avoidance of tax was due to fraud or evasion (i.e. no time limit applies), or
- in cases of tax avoidance due to reasons other than fraud or evasion, the IRC may amend an assessment within six years from the date from the date that tax became due and payable under the original assessment.

Topics of focus for the Internal Revenue Commission (IRC)

The IRC released guidance on transfer pricing matters in the form of Taxation Circular No. 2011/2 in late 2011. The IRC has indicated to tax agents that over time it will increase its focus on transfer pricing matters.

The IRC has not otherwise publicly announced areas of focus for tax compliance or audit programs.

Significant developments

There have been no significant corporate tax developments in Paraguay during the past year.

Taxes on corporate income

Income is taxed in Paraguay according to the resource principle (i.e. the territorial system of taxation).

There are three tax systems in Paraguay, depending on the type of taxpayer, as follows:

- For income from commercial, industrial, and service activities, the general income tax rate of 10% applies. *See Capital gains and Dividend income in the Income determination section for a description of how such income is taxed.* Note that dividend distributions require an additional 5% tax that must be paid on the amount of dividend approved for distribution at the shareholder meeting.
- For income from agricultural and cattle activities, the rate ranges from 2.5% to 10% (determined by annual income).
- For those taxpayers with annual income of less than 100 million Paraguayan guaraníes (PYG), a single tax at a rate of 10% applies.

Corporate residence

Corporate legal residence is determined as the place where direction or central management takes place, unless the corporation's charter states otherwise.

Permanent establishment (PE)

The Paraguayan Tax Law establishes the definition of a PE.

The following activities may be considered as a PE in the country:

- Branches or agencies.
- A factory, industrial plant, or cattle ranch entity.
- Mine activities, or any other natural resources extraction activities.
- Civil construction or assemble activities that exceed 12 months.

If a person makes instructions related to the agreement of certain operations on behalf of a foreign entity, this operation may be considered as a PE in the country; except in cases where the mentioned instructions are related to goods purchasing.

Paraguay

Other taxes

Value-added tax (VAT)

VAT applies to all corporations and to individuals or associations of individuals rendering personal services.

The general VAT rate is 10%, but a special VAT rate of 5% applies for selling real estate, basic groceries, farming products, pharmaceutical products, and loan interest.

Custom taxes

As the products will be introduced into Paraguay directly by the local importer, the importer will be responsible for payment of the related taxes (VAT on imports) before clearing the goods from Paraguayan customs, apart from customs tariffs. The other expenses involved in the import of products are the following:

- Port rates (between 0.65% and 1.50% of customs valuation).
- Customs valuation service (0.5% of customs valuation).
- Consular fee (15 United States dollars [USD] for each commercial document receiving a visa from the Paraguayan consulate at the originating country and USD 30 for each document not subject to visa).
- Indian contribution fee (7% on consular fee).
- IT system utilisation fee (between USD 15 and USD 25 according to importation value).

Other expenses should be added to the above, such as photocopying, handling fees, customs agent fees, etc.

Excise taxes

The excise tax, called the selective tax on consumption, is assessed on local goods and imported products listed, either specifically or generically, in the legislation. The importation of goods listed and the first sale of goods produced in Paraguay are taxed. The selective tax on consumption is collected independently of custom duty.

Real estate tax

Real estate tax is levied annually at 1% of the fiscal value of the property, which is generally less than actual value. A tax rate of 0.5% applies if the area of rural property is smaller than five hectares and is used for agricultural or cattle ranching. In certain areas, an additional tax is levied on the fiscal value of vacant and semi-vacant land when the area of the built-up portion falls within certain determined percentage limits. Large tracts of land in rural areas are subject to an additional tax determined on a percentage basis and to a proportional tax of 0.5% to 1% on the fiscal value of tracts with areas ranging from 10,000 to 60,000 or more hectares.

The 1992 Paraguayan Constitution established that municipalities and departments are entitled to the tax revenues directly related to real estate. Collection of these taxes is the responsibility of municipal governments.

Stamp taxes

There are no taxes on acts and documents in Paraguay.

Branch income

Branches are taxed at the same rate as domestic corporations. Profits transferred or credited to the head office are subject to a 15% withholding tax (WHT) when remitted to the head office abroad.

Additionally, the payment of dividends (by the head office's instructions) is subject to a 5% WHT to be paid at the time of the remittance and charged to the local entity.

Income determination

Inventory valuation

Taxpayers may adopt any method of inventory valuation, provided it is technically acceptable according to Tax Administration criteria (e.g. first in first out [FIFO], average cost). The valuation must be applied consistently and may be changed only with the prior approval of the Treasury Ministry.

Damaged, deteriorated, and obsolete inventories may be written down to fixed values by the taxpayer. The tax administration can reject valuations that are not realistic.

Capital gains

Gains on all assets, tangible and intangible, are taxable as part of profits and subject to income tax at a rate of 10%.

Dividend income

Dividends are taxable income when the recipient (or shareholder) is a non-resident, in which case a 15% WHT applies. An additional 5% tax is charged to local entities when the income or dividend is distributed to a local or foreign (non-resident) shareholder.

Stock dividends

Stock dividends are not taxable income, except when dividends represent more than 30% of the taxable income of an investor. In the case when dividends represent more than 30% of an investor's taxable income, a tax rate of 15% and an additional tax rate of 5% apply.

Interest income

The income from interest for capital abroad of a Paraguayan resident is considering subject to income tax. This case is the only exception to the resource principle rules enacted under Paraguay Tax Law.

Foreign income

Foreign-source income is not taxable. Interest, commissions, and capital gains are considered Paraguayan-source income when the investor is resident in Paraguay.

Deductions

Depreciation and depletion

The maximum allowable depreciation rates range from 2.5% for urban buildings to 25% for computer equipment. Depreciation is calculated by the straight-line method based on the useful life of assets, as determined by the Treasurer. The Treasurer may also authorise the use of other depreciation or depletion methods that are deemed to be technically justified and generally accepted.

Paraguay

Fixed assets must be revalued annually based on the increase of the price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

Goodwill

Amortisation of goodwill is not deductible.

Start-up expenses

Amortisation of start-up expenses may occur over three to five years, depending on the taxpayer's decision.

Interest expenses

The interest expenses on loans taken for Paraguayan residents or Paraguayan taxpayers may be considered as deductible expenses.

Additionally, it is important to mention that certain investment projects may be subject to a special exemption of the taxes on the interest, commission, and other expenses for loans taken for banking entities abroad (*see Investment incentives in the Tax credits and incentives section*).

Extraordinary losses/bad debts

The deduction of extraordinary losses and bad debts require the meeting of certain conditions (e.g. communication to Tax Authority, evaluation of the actual loss in monetary terms, audit review).

Charitable contributions

The deduction of a donation is subject to a formal registration of the beneficiary entity as a public benefactor before the Treasury Ministry.

Executive remuneration

The deduction of executive remuneration is limited to a percentage defined according to the enterprise's profits.

Fines and penalties

Fines and penalties are considered as non-deductible expenses for income tax purposes.

Taxes

In general, all taxes mentioned in the *Other taxes section* are deductible. Income tax and any fiscal surcharges or fines are not deductible.

Other significant items

General provisions for expenses or other potential losses are not deductible.

Other specific non-deductible items include:

- Interest on capital, loans, or any other investment by an owner, partner, or shareholder in a business.
- Personal expenses of an owner, partner, or shareholder.
- Money drawn on account of future earnings.
- Direct expenses incurred in earning non-taxable income.
- Earnings from any fiscal period that are retained in the business as capital increases or reserve accounts.

Net operating losses

Net operating losses are not permitted to be carried forward and applied against future years. However, Congress is considering amending the law to permit carrying forward of losses for three years.

Losses may not be carried back in Paraguay. However, a taxpayer may modify one's tax returns at a later date.

Payments to foreign affiliates

There are no limits on the deductibility of payments to foreign affiliates, including management fees, research and development (R&D), and general and administrative expenses, provided that the taxpayer maintains corresponding legal documentation that includes the country of origin and applies appropriate WHT. *See the Withholding taxes section for the applicable WHT rates.*

Group taxation

Group taxation is not permitted in Paraguay.

Transfer pricing

A significant fact is that there are no transfer pricing rules in current Paraguayan legislation requiring compliance with certain conditions or minimum prices for the purpose of fiscal deductions, etc., except for the following regulation applicable to importations and exportations:

“In the case of importers, it will be assumed that, in the absence of proof to the contrary, the cost of goods introduced to the country may not exceed the wholesalers price ruling in their place of origin plus freight and insurance costs and expenses to Paraguayan territory, and therefore, the excess of such value will constitute taxable income for the importers.

In the case of exporters, where a price has been fixed or the price declared is lower than the wholesalers price in Paraguay plus the freight and insurance costs and expenses to point of destination, this latter aggregate value shall be taken as the basis for determining the exporter's taxable income.

To this effect, the nature of the goods and the transaction mode adopted will be taken into account.” (Section 16 of Law No. 2421/04).

Tax credits and incentives

Investment incentives

The framework of economic investment was established in the Law No. 60/90, which offers some special tax exemption benefits to foreign and local investors.

The benefits of the Law No. 60/90 may be available for the following investments:

- Cash, financing, provision of credit, or other financial instruments, under the conditions established by the administration of the President of Paraguay and the corresponding ministries.
- Capital goods, raw materials, and inputs for local industry for the fabrication of capital goods.
- Transfers of licensing rights with respect to trademarks, industrial processes and models, and other technologies.

Paraguay

- Technically specialised services.
- Capital leases.
- Other forms that the administration of the President of Paraguay and the corresponding ministries determined by law.

The investment incentives included in Law 60/90 that remain enacted after tax law modification (Law No. 2421/04) are the exemptions from certain fiscal, municipal, and customs duties taxes.

When the amount of financing for an investment is greater than USD 5 million, it will be exempt from WHTs on interest, commissions, and capital that have to be paid to financial or banking entities abroad. This benefit is for five years.

If the investment is at least USD 5 million and the project is approved for a term of at least ten years, the dividends and profits derived from the project are tax exempt. In this case, the taxes on those dividends and profits are not creditable in the country of origin.

Other incentives

Exports are exempt from certain customs duties and from VAT.

A Capital Market Law (No. 1284/98) established incentives for companies listed on the Asunción Stock Exchange.

In addition, Law 536/95 established incentives for forestry activities.

Withholding taxes

In accordance with the regulations in force, foreign entities may be subject to income tax withholdings in respect of services rendered to them deemed to be of Paraguayan source, including payments made by the branch or affiliate of a foreign home office.

Business income tax regulations consider that branches, agencies, or PEs of foreign entities are taxpayers, independently from the foreign home office status.

The withholdings are to be made from the payments made by local entities for such services.

WHT on payments made by a domestic corporation

Recipient	WHT (%)				
	Dividends (1)		Interest (2, 3)	Royalties (3, 4)	Fees (3, 5, 6)
	Portfolio	Substantial holdings			
Non-resident corporations	15	15	30	30	30
Non-resident individuals	10	10	30	10	10
Tax treaty with Chile					
Non-resident corporations	10	10	10/15 (7)		
Non-resident individuals	10	10			

Notes

1. Local entities are required to pay an additional 5% WHT when the income or dividend is distributed.
2. The WHT on interest is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the head office or shareholders that have control

- of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 30%. For financing loans, the WHT rate is 6%.
- VAT is withheld on interest, royalties, and other services provided for non-resident corporations or individuals at a rate of 9.09%, except on fees for financing, which are withheld at a rate of 4.76%.
 - The WHT on royalties is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 30%.
 - The WHT on fees is based on 100% of the amount paid when remitted to the head office abroad. In other cases, it is based on 50% of the amount paid. The tax rate is 30%.
 - Fees for personal services rendered by non-resident corporations are subject to withholding income tax at a rate of 50% on the amount paid. The tax rate is 30% (effective tax rate of 15%).

Fees for personal services rendered by non-resident individuals are subject to withholding of the personal income tax on 50% of the amount paid. The tax rate is 20% (effective tax rate of 10%). Congress is considering suspending this tax.

- In case of a loan to Chile, the WHT on the interest is 15% if the loan is from a bank or insurance company. On the other hand, if the loan is from an associated company or head office, the tax rate is 10%. Regarding VAT WHT, see Note 3.

Tax administration

Taxable period

For the commercial income tax and the agriculture income tax, the taxable period is the calendar year.

Tax returns

Income tax returns are submitted on a fiscal-year basis as a self-assessment and must be filed by the fourth month following the end of the fiscal year.

Payment of tax

Income tax is due on varying days in the fourth month following the end of the fiscal year, depending on the taxpayer ID number, according to a calendar established by the treasury ministry. Four equal advance payments are made throughout the year, calculated based on 100% of the tax due in the previous year. Payments must be made in May, July, September, and November of each year after the due date for filing the income tax return, according to the calendar established by the tax authorities.

Penalties

Tax legislation provides the following penalties:

- Late payment of income tax is penalised by a fine varying from 4% to a maximum of 14%, plus interest at 0.116 per day.
- Tax fraud is punished by a charge of from one to three times the value of the tax in default.
- Tax law infringements are penalised through fines varying from the equivalent of USD 10 to USD 250.
- Omission of payment incurs a fine of 50% of the tax pending.

Audit cycle

The auditing process is performed by the tax authorities when there is a certainty or suspicion of tax evasion.

Additionally, the taxpayer may be audited according to a draw process that is made by the tax authority.

Statute of limitations

The tax authority may audit the last five fiscal years.

Significant developments

The following changes to the Peruvian tax legislation were incorporated during the past year.

Tax Obligatory Payment System (SPOT) amendment

On 28 March 2012, Superintendence Resolution N° 063-2012-SUNAT was published amending the list of services subject to the SPOT, which were included within Appendix 3 of the Superintendence Resolution N° 183-2004/SUNAT, which created the SPOT applicable to the sale of certain goods and the rendering of certain services subject to Peruvian VAT.

Per the amendments, the SPOT is extended to all services subject to VAT, unless expressly excluded, applying a withholding rate of 9%. This modification is effective as of 2 April 2012 and will be applied as long as the amount of the operation exceeds 700 Peruvian *nuevos soles* (PEN) (approximately 260 United States dollars [USD]).

Value-added tax (VAT) rate

As of 1 April 2011, the VAT rate is 18%.

Taxation of indirect disposal of shares in Peruvian entities

On 21 July 2011, Law N° 29757 was enacted, introducing amendments to Law N° 29663, which taxes the indirect disposal of shares of Peruvian entities and incorporates rules on issues that were not established in Law N° 29663. The main rules of this law are as follows:

De minimis indirect transfers of Peruvian shares

Law N° 29663 did not provide any thresholds, so even *de minimis* transfers of a foreign entity's shareholding (which in turn owned, directly or indirectly, shares of a Peruvian entity) triggered a taxable indirect transfer of Peruvian shares, provided certain conditions were met.

Under Law N° 29757, a taxable indirect transfer of Peruvian shares is deemed to occur when shares of a foreign entity, which in turn owns, directly or indirectly through other entities, shares of a Peruvian entity, are transferred and both of the following conditions are met:

- During the 12 months prior to the transfer, the fair market value (FMV) of the shares of the Peruvian entity owned by the foreign entity equals 50% or more of the FMV of the shares of the foreign entity.
- During any given 12-month period, shares representing 10% or more of the foreign entity's share capital are transferred.

If these two conditions are met, the taxpayer, when calculating the amount realised from the foreign entity's share transfer, should consider the transfers that occurred during the 12-month period mentioned in the second condition.

There will be a deemed indirect transfer whenever a foreign corporation who, directly or indirectly, owns shares of a local corporation issues new shares or stock through an increase in equity as a result of new capital contributions, credit capitalisation, or a reorganisation and places them under their market value.

Note that even when the provisions of Law N° 29757 are not clear in such connection, we consider that the condition related to the 10% of the foreign entity's share capital is also applicable in the aforementioned scenario (i.e. when a foreign entity issues new shares as a consequence of a capital increase and such shares are issued below par value).

Calculation of gain from indirect share transfer

In connection with the calculation of gain arising from the indirect transfer of Peruvian shares, Law N° 29757 incorporates the following rules:

- The taxable income is determined by multiplying the FMV of the shares of the foreign entity that would be transferred by the proportion that the FMV of the Peruvian entity's shares bears to the FMV of the foreign entity's shares.
- The basis is determined by multiplying the basis of the foreign entity's shares being transferred by the proportion that the FMV of the Peruvian entity's shares bears to the FMV of the foreign entity's shares. This basis must be supported with documents issued in accordance with the laws of that foreign entity's jurisdiction or other documents listed by the Peruvian tax authorities (yet to be stipulated).

Note that the modifications to the Regulations to the Income Tax Law came in force through Supreme Decree N° 136-2011, since 10 July 2011, established that there is also no obligation to obtain a Certificate of Invested Capital in case of indirect transfer of Peruvian shares (which is a procedure that must be followed by foreign persons or entities to certify its tax cost of goods and/or shares prior to their disposal).

Basis of shares acquired prior to the effective date of Law N° 29663

For foreign entity shares acquired prior to the effective date of Law N° 29663, that is, 16 February 2011, Law N° 29757 provides that the basis is the greater of the FMV of these shares on 15 February 2011 or the basis itself. If the shares are traded in a centralised mechanism of negotiation (i.e. a stock exchange), then the FMV is deemed to be the closing price on 15 February 2011 or the last quote published. If they do not have a quote price or are not traded in a centralised mechanism of negotiation, then the FMV is determined based on the foreign entity's net equity based on a balance sheet audited by a firm with international prestige during the 12-month period prior to 15 February 2011.

Joint and several liability

Law N° 29663 provided that, in any event, the Peruvian entity whose shares are indirectly transferred has joint and several liability for the tax liability payment when, within any of the 12 months prior to the transfer, the foreign transferor qualified as a related party by reason of control, management, or equity.

However, Law N° 29757 narrows that joint and several liability because it includes a rule under which the Peruvian entity whose shares are transferred, directly or indirectly, would no longer be jointly and severally liable for the non-resident

Peru

transferor's capital gain tax liability, provided that the buyer is a Peruvian resident (since the buyer would have to withhold the corresponding capital gains tax).

Special taxation on mining industry

A new tax regime for the mining industry was recently introduced. The new mining royalty (NMR) regime, special mining tax (SMT), and special mining contribution (SMC) are economic considerations paid to the Peruvian government for the exploitation of mineral resources. The NMR applies to metallic and non-metallic mineral resources, while the SMT and SMC only apply to metallic mineral resources.

The SMC is only applicable to mining companies with projects with tax stability agreements in force. Such companies have voluntarily entered into agreements with the Peruvian government with the purpose of paying this contribution. This special contribution is determined for each stability agreement entered into.

In all three cases, the tax basis is the operating profit of the company and the special rates and considerations are explained below:

	New mining royalty (NMR)	Special mining tax (SMT)	Special mining contribution (SMC)
Concept	No tax stability	No tax stability	With tax stability
Regime	Previous mining royalty modified	New	New
Cumulative progressive scale based in operating margin	1% to 12%	2% to 8.4%	4% to 13.2%
Minimum payment	1% of the sales revenue	N/A	N/A

The amounts paid will be deductible for income tax purposes as long as they are actually paid during the fiscal year.

Taxes on corporate income

Companies incorporated in Peru are considered resident in Peru for tax purposes and thus subject to a corporate income tax rate of 30% on worldwide net income.

For purpose of determining taxable income, such entities are allowed to deduct expenses to the extent that they are necessary to generate or maintain the source of taxable income. Requirements, limitations and/or caps may apply to the deduction of certain expenses (thin capitalisation rules), bad debt provisions, salaries, travel expenses, gifts, donations, penalties, etc.

Peruvian Income Tax Law (PITL) allows crediting for various payments against income tax, including income taxes paid in advance, amounts paid for certain other taxes, and income taxes paid in foreign tax jurisdictions, provided that the foreign country's tax rate is not higher than the Peruvian corporate tax rate, and the taxable income qualifies as foreign-source income for Peruvian income tax purposes.

Dividends and any other type of profit distributions are taxed at a 4.1% rate, upon distribution, when the distribution is made to a non-resident entity (either individuals or legal entities) and, when the distribution is agreed to by the shareholders, if this happens first, to resident individuals (resident legal entities are not subject to 4.1%

withholding tax [WHT] over dividends received from other Peruvian corporations). The entity distributing dividends or profits is liable for WHT at a rate of 4.1%.

Nevertheless, enterprises are subject to an additional tax rate of 4.1% on every amount or payment in kind that, as result of a tax audit, is construed as taxable income to the extent that it is an indirect distribution of such income that escapes further control from the tax administration, including income that has not been declared.

On the other hand, companies incorporated abroad are considered as non-domiciled in Peru for tax purposes and thus subject, in most cases, to an income tax rate of 30% over the gross Peruvian-source income. As a general rule, foreign companies are not allowed to deduct expenses and are taxed on gross income.

Corporate residence

For income tax purposes, the following entities, among others, are considered as resident entities in Peru:

- Corporations duly incorporated in Peru.
- Branches, agencies, and permanent establishments (PE) in Peru of non-resident individuals or entities.
- Partnerships and limited liability companies.

Permanent establishment (PE)

According to PITL, a foreign company is considered to have a PE (i) if it has a fixed place of business through which it carries out business activities in whole or in part; (ii) if an individual has a power of attorney of a foreign entity and uses it on a regular base to sign agreements on behalf of the foreign entity; and (iii) if the person with powers of attorney of the foreign entity keeps in Peru inventory and/or goods to be negotiated in Peru on behalf of the foreign entity.

The consequence of a PE presence in Peru is that the PE would be obligated to comply with all the formal and substantial tax obligations of any domiciled taxpayer, meaning that it would have to be registered before with the tax administration (get a tax identification [RUC] number), keep full accounting books, file monthly and yearly tax returns, withhold taxes, allocate a reasonable income for its Peruvian source activities, etc. If a PE presence is determined, then the tax contingency will have to be quantified calculating the taxes, fines, and interest accrued as from the moment in which the PE presence can be deemed, except for the period barred by statute of limitations.

Other taxes

Value-added tax (VAT)

As of 1 April 2011, the general rate of VAT is 18% (19% prior to 1 April 2011) and is applicable to the following operations:

- Sale of goods within the country.
- Rendering or first use of services within the country.
- Construction contracts.
- The first sale of real estate made by construction firms.
- Import of goods.

Peru

For all transactions, the vendor is subject to VAT, except in the case of importation of goods or services rendered abroad, but economically used within Peru, for which VAT is self-assessed by the importers and users, respectively.

The VAT law follows a debit/credit system, and input VAT may be offset by output VAT. Should excess input VAT be obtained in a particular month, it shall offset output VAT obtained during the following months, until it is exhausted.

The export of movable goods (including the sale of goods in the international zone of ports and airports) is not subject to VAT, nor is the exportation of certain services. Thus, VAT paid upon the acquisition of goods, performance of services, construction agreements, and the importation of goods related to exported goods or services creates a positive VAT export balance.

The positive balance may offset output VAT, income tax, or any other outstanding tax debt in favour of the central government. If the positive balance is not completely offset, as the amount of the aforementioned tax obligations is insufficient, the taxpayer may apply for a refund.

Tax Obligatory Payment System (SPOT)

The SPOT was created by Superintendence Resolution N° 183-2004/SUNAT and is applicable to the sale of certain goods and the rendering of services subject to Peruvian VAT. The main purpose of the SPOT is to generate funds to enable the payment of tax obligations by the VAT-payer.

According to the SPOT, all the sales of goods and services listed in the appendices of the Resolution that are levied with VAT will be subject to withholding, applying the rates established for each kind of good and service.

Regarding services, Appendix 3 of the Resolution established that the services subject to the SPOT are:

1. Labour intermediation.
2. Lease of movable goods.
3. Maintenance and repair of movable goods.
4. Cargo movement.
5. Other entrepreneurial services.
6. Business commission.
7. Fabrication of goods by order.
8. People transport services.
9. Construction agreements.

As of 2 April 2012, item 10 has been included in the Appendix, so now any service subject to VAT, except expressly excluded, will be subject to the SPOT with a withholding rate of 9%. The exceptions mentioned in the law are the following:

- Services rendered by companies referred to in Article 16 of Law N° 26702, General Law of the Financial and Insurance System.
- Services rendered by the social system of health (EsSalud).
- Services rendered by the national pension fund (ONP).
- The sale of food and beverages in establishments open to the public, such as restaurants and bars.
- Non-permanent accommodation services, including its auxiliary services, rendered to the guest by the accommodation establishments referred to by the

Regulations of Accommodation Establishments, approved by Supreme Decree N° 029-2004-MINCETUR.

- Postal and fast courier services.
- Ground transport of goods mentioned on Superintendence Resolution N° 073-2006-SUNAT.
- Ground public passenger transport mentioned on Superintendence Resolution N° 057-2007-SUNAT.
- Services included in the exclusion envisage on numerals 6.a, 7.a, and 7.b of Appendix 3.

The purchaser or service recipient must withhold a percentage of the transaction price and deposit such amount within the seller's or service provider's State Bank (*Banco de la Nación*) account. It is important to note that the right of the purchaser or user of the service to offset input VAT related to such goods and services may be exercised only after the deposit with the State Bank has been executed.

The amount deposited is applied towards the payment of the seller or service provider's Peruvian tax obligations (not just VAT). If after four consecutive months such amount is not utilised, the seller or service provider may apply for a refund or use the amount to pay withholding applicable to purchasers or services recipients.

Customs duties

Customs duties applied to imports are linked to their classification under the Custom Tariff, given by NANDINA subheading that is determined by the information provided by the importer (through the invoice and other complementary information), as well as the physical recognition by the Customs Officer at the time of customs clearance.

As such, the taxes required are:

- *Ad valorem* custom duty (rates of 0%, 6%, and 11%, as the case may be).
- VAT (16%).
- Municipal promotion tax (2%).

Other taxes that may apply, depending on the equipment, include the following:

- Selective consumption tax.
- Specific duties.
- Antidumping and compensatory.
- VAT perception.

Excise tax

The sale of specific goods, including fuel, cigarettes, beer, liquor, and vehicles, is subject to excise tax.

Excise tax rates, and the manner on which the tax is applied, depend on the type of goods or services.

Real estate property tax

The real estate property tax is levied on the value of urban and rural real estate property. Individuals and legal entities owning the referred real estate properties are considered taxpayers for such purposes. The taxable base is calculated taking into account the value of all the properties owned in a specific local district, as reflected in the internal records of the corresponding local authorities.

Peru

The tax is calculated and paid on an annual basis applying the following progressive cumulative scale:

Real estate's value	Real estate property tax rate (%)
Up to 15 tax units	0.2
For the excess of 15 tax units and up to 60 tax units	0.6
Over 60 tax units	1.0

Real estate transfer tax (Alcabala)

The real estate transfer tax is levied on all transfers of urban and rural real estate property. The taxpayer is the purchaser of the property. The taxable base is equivalent to the consideration agreed upon by the parties to the transaction, provided it is higher than the property's value (in the relevant year for purposes of the real estate property tax) as reflected in the internal records of the corresponding local authorities.

The tax rate is 3% and must be borne exclusively by the buyer, regardless of whatever the parties agree. The first ten tax units (approximately USD 13,000) of the taxable base are exempt from this tax.

Financial transactions tax (FTT)

As of 1 April 2011, FTT is applied at a rate of 0.005% (0.05% prior to 1 April 2011) on all debits and/or credits on bank accounts held by the taxpayers.

The following operations, among others, are exempted from the FTT:

- Operations made between accounts of the same holder.
- Credits to bank accounts for payment of salaries.
- Credits and debits to bank accounts of diplomatic representations and international organisations recognised in Peru.

Payments of FTT are deductible as expenses for income tax purposes.

Temporary net assets tax (TNAT)

Companies subject to income tax are obliged to pay TNAT, except companies that are in preoperative stages or that commenced business on 1 January of the fiscal year in which TNAT must be paid.

The taxable basis is the value of the assets set forth in the taxpayer's balance sheet as of 31 December of the year prior to that of the tax payment, adjusted for deductions and amortisations accepted by the Peruvian law.

The amount of TNAT is determined by applying the following rates on the taxable basis:

- Up to PEN 1 million: 0%.
- Excess of PEN 1 million: 0.4%.

The amount paid for TNAT may be credited against the taxpayer's income tax.

Branch income

Branches, agencies, and PEs of non-resident companies or entities incorporated in Peru are subject to income tax at a 30% rate on their Peruvian-source income.

For tax purposes, branches or subsidiaries are subject to the same obligations applicable to all companies in Peru, including income tax, VAT, FTT, filing of the corresponding income tax and VAT returns, issuance of invoices, etc.

Nevertheless, the following important differences between subsidiaries and branches resident in Peru must be taken into account:

- Branches are subject to income tax only for their Peruvian-source income, while subsidiaries are subject to income tax on their global-source income (both Peruvian and foreign income).
- For branches, the 4.1% WHT on profit for distribution is applied on the date the annual income tax return is submitted. Subsidiaries are subject to the 4.1% WHT on the earlier of the date in which the corresponding shareholders agreement took place or the date when the beneficiary receives the dividends. For non-domiciled shareholders, the withholding will be applied whenever the dividend is actually paid, without taking into account the moment in which the shareholder agreement is executed.

Income determination

Inventory valuation

The first in first out (FIFO), average, specific-identification, retail, and normal or base-stock methods are allowed for inventory valuation. The last in first out (LIFO) method is not permitted.

Capital gains

Capital gains are taxed as ordinary income.

Dividend income

Cash dividends distributed to resident corporations are not subject to any taxes.

Interest income

PITL establishes that the WHT rate on interest arising from loans is 4.99%, provided the following requirements are met:

- In case of cash loans, the entrance into Peru of the foreign currency must be duly accredited.
- The credit must not accrue an effective interest that surpasses that of the LIBOR rate plus 7 points (for loans proceeding from Europe or the United States).
- The loan must be destined to finance business or taxable activities.
- The parties involved must not qualify as related parties for tax purposes.

If any of the above-mentioned conditions are not met, or to the extent they are not fulfilled, a withholding rate of 30% over the gross interest will be applied. A 30% WHT rate will also apply whenever the debtor and creditor are related parties or when the participation of the creditor only aims to conceal a transaction between related parties.

Peru

Foreign income

A Peruvian corporation is taxed on foreign-source income. Foreign-source income is recognised upon accrual. No tax deferral is allowed on this type of income. Double taxation may be avoided by means of foreign tax credits.

Deductions

Acceptable payment methods

Obligations that are fulfilled through cash payments exceeding PEN 3,500 must be made via bank account deposits, wire transfers, payment orders, credit cards, non-negotiable cheques, or other means of payment provided by entities of the Peruvian financial system. Failure to use one of these payment methods when such an obligation exists will result in the disallowance of deductions for any expenses or costs for income tax purposes and the disallowance of a credit for the corresponding VAT.

Expenses derived from transactions entered into with entities resident in tax havens

Certain expenses are not tax-deductible, including expenses incurred with respect to transactions with (i) entities resident in tax havens on the list attached to the PITL regulations, (ii) PEs located in tax havens, or (iii) entities that generate revenues or income through tax havens.

Nonetheless, expenses incurred from the following transactions are excluded from the above-mentioned limitations, provided the consideration paid falls within market value:

- Interest on loans.
- Insurance premiums.
- Leases of aircraft or ships.
- Maritime freight.
- Fees for passing through the Panama Canal.

Depreciation

Assets may be depreciated for tax purposes, via the straight-line method, capped at the following rates, but without exceeding the amount of the financial depreciation:

Assets	Depreciation rate (%)
Cattle (both labour and reproduction) and fishing nets	25
Vehicles (except trains) and any kind of ovens	20
Machines and equipment used for mining, oil and construction activities, excluding furniture, household, and office goods	20
Equipment for data processing	25
Machines and equipment acquired as of 1 January 1991	10
Other fixed assets	10

Buildings must be subject to a flat 5% depreciation rate, regardless of the financial depreciation.

Amortisation of intangibles assets

The amortisation of property rights, trademarks, patents, and manufacturing procedures, as well as other similar intangible assets, are not deductible for income

tax purposes. However, the price paid for intangible assets of a limited duration, at the taxpayer's choice, may be considered as an expense and applied to the results in a single year or amortised proportionally in a ten-year term.

The Peruvian tax administration, prior to an opinion from the corresponding technical organisms, is permitted to determine the real value of those intangible assets for tax purposes, when the price does not reflect the real one.

Organisational and start-up expenses

Organisation expenses, pre-operating expenses (including initial operations and further expansion of operations), and interest accrued during the pre-operating period may be expensed in the first period of operation or amortised using the straight-line method over a maximum of ten years. However, once a company has elected to recover start-up costs via the straight-line method, it may revoke such election only upon receiving approval of the tax authorities.

Interest expenses

In general terms, interest on loans and related expenses are deductible, provided they are related to the acquisition of goods or services incurred, or to be incurred, in order to obtain or produce taxable income or to maintain the source of such income.

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the net equity of the debtor as of the end of the previous fiscal year (*see Thin capitalisation in the Group taxation section*).

Bad debts

Write-offs of bad debts and equitable provisions are deductible, provided that the accounts to which they belong are determined. For the provisions of bad debts, it is necessary that:

- there is a debt due and the taxpayer can provide evidence of the financial difficulties of the debtor which could foresee a risk in the collection of the debt and
- the provision is registered separately in the inventory and balance book at the fiscal year closing. In this sense, generic bad debt provision will not be deductible in the assessment of the net taxable income, nor will bad debts whose terms have not yet elapsed.

Bear in mind that the following debts are not considered bad debts:

- Debts incurred between related parties.
- Debts guaranteed by banks or financial companies by means of rights over real property, money deposits, or purchase-sale agreements with reservation of right of legal ownership.
- Debts which have been subject to renewal or express extension.

Charitable contributions

Donations made to entities of the public sector, except companies, and to non-profit associations with certain purposes are deductible, provided that the receiver of the donation is duly qualified, through ministerial resolution, issued by the Ministry of Economy and Finance.

The deduction will be limited to 10% of the net income of the donor and only during the fiscal year in which it is granted (carryforward of the donation is disallowed). This

Peru

means that if the donor does not obtain taxable income in the fiscal year in which the donation is made, no deduction will be available.

Profit sharing

Entities with more than 20 employees, provided they obtain taxable income during the fiscal year, must distribute a percentage (5%, 8%, or 10% depending on the industry) of their profits (the basis is the tax profit of the fiscal year) among their employees. The amount of distribution for each employee depends on the effective working days during the year and annual remuneration.

Employee's retributions and health insurance premiums

Employee's retributions paid during a fiscal year may be deducted in such year, provided the payments are made by the employer before the term to file its annual income tax return expires. Likewise, health insurance premiums for employees, their spouses, and children are deductible.

Vehicle expenses deductions

Vehicle expenses may be deducted, provided the vehicles are essential to a company's business activities and are continually used for such purpose. There is a limitation on the tax deductibility of car expenses used for administrative or representation purposes, depending on the amount of income generated by the company. The number of company cars assigned to directors, managers, and representatives of a company may not exceed five under any circumstances.

Vehicles subject to these limitations are those classified in categories as A2, A3, and A4, pursuant to the provisions of the Ministry of Transportation and Communications.

Taxes

Other taxes assessable on properties and activities generating taxable income are deductible for income tax purposes.

Net operating losses

Tax losses may be offset according to either of the following systems:

- Against net income generated within the following four fiscal years after the year in which the loss is incurred. Any losses that are not offset within such period may not be carried forward to any future year.
- Against 50% of the net income generated in the following fiscal years after the year in which the loss was generated. Under this system, there is no time limitation for carrying forward the losses.

After choosing one of the aforementioned systems, the taxpayers may not change the system until the accumulated tax losses from prior fiscal years are exhausted. Losses may not be carried back to years prior to the year in which the loss is generated.

Payments to foreign affiliates

Payment of royalties to non-resident affiliates is permitted and deductible from gross income.

Group taxation

Group taxation is not permitted in Peru.

Transfer pricing

The rules related to market value and transfer pricing establish that in any kind of transaction, the value assigned to the goods and services must be market value for tax purposes. If such value differs from market value, either by overvaluation or sub-valuation, the tax administration will proceed to adjust it for both the purchaser and the seller. Should one of the parties be a non-domiciled company, such adjustment will be unilateral (only for the domiciled party). The adjustment will be imputed in the taxable period in which the operations with related parties were performed.

In case of transactions between related parties or those entered with tax havens, the market value will be equivalent to the value agreed with independent parties in similar transactions, being mandatory to support such value with a transfer pricing study.

Thin capitalisation

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the entities net equity as of the end of the previous fiscal year. In this connection, even though Peruvian corporate law has no requirements as to a minimum amount of share capital to incorporate a legal entity, it should be noted that having a small share capital may jeopardise the deductibility of interest payable for loans granted by related entities since, in case of newly incorporated entities, the share capital (equity) to be considered for calculating the thin capitalisation limit is the original one (this is, the one with which the entity was incorporated). In any case, this will only trigger a deductibility problem for the fiscal year in which the entity is incorporated, since for the following fiscal year the thin capitalisation rule will be calculated on the basis of the net equity at the end of the prior fiscal year (which, at that moment, may have already been increased through new contributions or capitalisations).

Tax credits and incentives**Foreign tax credit**

Pursuant to PITL, taxpayers will deduce the foreign income taxes paid due to their foreign-source income levied by PITL, provided that it doesn't exceed the amount that results from applying the average rate of the taxpayer to the incomes obtained abroad, or the tax paid abroad. The amount that, for any circumstance, is not used in the corresponding fiscal year cannot be set off (or compensated) in others fiscal years or be refunded.

Also, the following will be taken into account:

- Tax credit will be granted for the entire tax paid abroad that falls upon income taxed by PITL.
- Taxes paid abroad, whatever its denomination, shall bear the characteristics of income taxes.
- Tax credit will only be granted when the payment of the foreign income tax is supported by reliable documentation.

Early recovery of VAT

Companies in a preoperative stage with large projects in process may apply for early recovery of VAT prior to commencing operations. An investment agreement with the government (the Ministry of its sector) is required.

Peru

Stability agreement

Investors may enter into stability agreements with the government, either under the general regime or specific regimes (i.e. mining and petroleum).

Under the general regime, investors may enter into Juridical Stability Agreements that guarantee the following advantages for a ten-year period:

- Stability of the income tax regime in force at the time the agreement is entered into with respect to dividends and profit distribution.
- Stability of the Peruvian government monetary policy, according to which there is a complete absence of exchange controls, foreign currency can be freely acquired or sold at whatever exchange rate the market offers, and funds can be remitted abroad without any previous authorisation.
- Right of non-discrimination between foreign and local investors.

Under the mining regime, local mining companies may enter into stability agreements of guarantees and investment promotion measures that guarantee the following for ten or 15 years:

- Stability of the overall tax regime.
- Stability of the overall administrative regime.
- Free disposition of funds (foreign currency) arising from export operations.
- No exchange rate discrimination.
- Free trade of products.
- Stability of special regimes for tax refunds, temporary importation, etc.

Oil companies may enter into stability agreements that guarantee the following for the term of the contract:

- Stability of the overall tax regime.
- Free disposition of funds (foreign currency) arising from export operations.
- Free convertibility of its funds.
- Free trade of products.

Investment promotion in the Amazon

Certain tax benefits with regard to VAT and income tax have been established for taxpayers located in the area designated by the law as the 'Amazon' and that are engaged in the following activities:

- Agriculture and livestock enterprises.
- Aquaculture.
- Fishing.
- Tourism.
- Manufacturing activities linked to the processing, transformation, and commercialisation of primary products originating in the activities listed above and in forest transformation, provided these products are produced in the area.

Special zones - Centres of Export, Transformation, Industry, Commercialisation, and Services (CETICOS)

CETICOS are geographical areas duly delimited with custom primary zone status and special treatment, destined to generate development poles through industrial, maquila, assembling, or storage activities. CETICOS are located in Paita, Ilo, and Matarani cities.

Agribusiness and agro-exporting activities may be performed within a CETICOS.

Agribusiness activity is primarily the transformation of agro-farming products produced in the country. Such transformation must be carried out at CETICOS.

Companies engaged in industrial, maquila, or assembling activities, established or set up in the CETICOS, until 31 December 2012, are exempt from income tax, VAT, excise tax, municipal promotion tax, as well as from any other taxes, fees, contributions levied by the Central Administration, and even taxes that require express exempt regulation.

Withholding taxes

Domestic corporations are required to withhold income tax with respect to income paid to non-resident entities at the following rates:

Type of payment	WHT (%)
Interest on non-related party loans, provided certain requirements are fulfilled	4.99
Interest on related party loans	30
Interest paid by Peruvian financial entities or banks to foreign beneficiaries for credit lines used in Peru	4.99
Royalties	30
Digital services	30
Technical assistance	15
Lease of vessels or aircraft	10
Dividends or profit distributions	4.1
Other income	30
Sale of securities within Peru	5
Sale of securities outside Peru	30

Note that resident taxpayers may not deduct the WHT of a third party, except in the case of loans provided by non-resident creditors, to the extent that the debtor has contractually assumed the obligation of bearing the WHT cost.

Capital gains derived from the sale of stocks issued by a Peruvian company through the stock exchange performed by a non-resident company are taxed at a 5% rate and are not subject to any withholding. In these cases, the income tax must be paid directly by the non-domiciled entity.

In the case of the services mentioned below that entail the execution of activities both in Peru and abroad, non-resident entities are subject to a 30% WHT on deemed Peruvian-source income determined by applying the following percentages to gross income:

Type of payment	Deemed Peruvian-source income (%)
Insurance	7
Lease of vessels	80
Lease of aircraft	60
Air transport	1
Maritime transport	2
Telecom services	5
International news services	10

Peru

Type of payment	Deemed Peruvian-source income (%)
Distribution of movies, records, and similar products	20
Rights for broadcasting live foreign TV shows within Peru	20

Tax treaties

Peru has entered into treaties with Brazil, Canada, and Chile regarding double taxation on income tax (the last three entered into in accordance with the Organisation for Economic Co-operation and Development [OECD] Model). Recently, Peru has entered into a double-taxation treaty (DTT) with Spain and Mexico (also entered into pursuant to the OECD Model), but the treaties have not yet entered into force, as the Peruvian Congress ratification required for such purpose is still pending. In addition, Peru is a member of the Andean Community of Nations (ACN), which also includes Bolivia, Colombia, and Ecuador.

Pursuant to the provisions of the tax treaties entered into in accordance with the OECD Model, income is taxable in the country of the service provider's residence, unless a PE is configured, in which case both countries are entitled to levy tax on income and the country of residence allows a credit for taxes paid in the other country.

On the other hand, according to the treaties with the ACN, income is taxable in the country in which its source is located, unless a PE is configured, in which case income tax is levied in the country where the PE is located. Thus, in transactions with entities resident from one of the member countries of the ACN, in certain cases income is taxable in Peru if the source of such income is located within Peru. For such purpose, the term 'source' is defined as the place where the activity, right, or goods that generates or will generate income is located.

Tax administration

Taxable period

According to law, the fiscal year is the calendar year.

Tax returns

The filing deadline for the income tax return is generally the first week of April. The system is one of self-assessment, but the tax return filed with the tax authorities is subject to review.

Payment of tax

Income tax is paid in advanced instalments calculated based on monthly revenue, either by applying a 2% rate or by a factor equivalent to the effective tax rate on net revenue of the prior year. Income tax is paid in 13 instalments (12 monthly payments and the annual income tax return). As noted, the first 12 payments must be made on a monthly basis and the last payment is due at the time that the annual tax return is filed. Late payment of interim or final instalments is subject to moratorium interest. Excess payments are subject to indexation up to the date of reimbursement or application to future taxes.

Tax authority

The tax authority in Peru is called 'Superintendencia Nacional de Administración Tributaria' (SUNAT). SUNAT is responsible for administering all of the aforementioned

taxes (income tax, VAT, etc.). Companies resident in Peru must be registered with the tax administration (Taxpayer's Registry).

The Tax Court (Tribunal Fiscal) is a specialised administrative tribunal, which depends on the Ministry of Economy and Finance, but is otherwise autonomous regarding its specific functions. Its mission is to rule over tax controversies that may arise between the tax administration and the taxpayers, by interpreting and applying the corresponding tax legislation, issuing mandatory observance jurisprudence, establishing homogenous criteria that continue to support the progress of the tax system.

Finally, taxpayers are entitled to file an appeal before the Judiciary (Superior Court) against resolutions issued by the Tax Court, but payment of the tax debt must be performed or guarantees must be provided.

Significant developments

Threshold for value-added tax (VAT) exempt transactions

The threshold for entities required to register for VAT was increased by the Philippine Bureau of Internal Revenue (BIR) from annual sales or receipts of 1,500,000 Philippine pesos (PHP) to PHP 1,919,500, effective 1 January 2012.

Taxes on corporate income

A domestic corporation is subject to tax on its worldwide income. On the other hand, a foreign corporation is subject to tax only on income from Philippine sources (*see the subsections on Resident foreign corporations and Non-resident foreign corporations below*).

Domestic corporations

The following corporate income tax (CIT) rates apply to domestic corporations:

Income	CIT rate (%)
In general, on net income from all sources	30
Minimum corporate income tax (MCIT) on gross income, beginning in the fourth taxable year following the year in which business operations commence. MCIT is imposed where the CIT at 30% is less than 2% MCIT on gross income.	2
Proprietary educational institutions and non-profit hospitals:	
On net taxable income if gross income from unrelated trade, business, and other activities does not exceed 50% of the total gross income from all sources	10
On total net taxable income if gross income from unrelated activities exceeds 50% of income	30
Non-stock, non-profit educational institutions (all assets and revenues used actually, directly, and exclusively for educational purposes)	Exempt

Certain passive income from domestic sources is subject to final tax rather than ordinary income tax (*see the Income determination section*).

Improperly accumulated earnings tax

An improperly accumulated earnings tax of 10% is imposed on improperly accumulated income. The tax applies to every corporation formed or used for the purpose of avoiding income tax with respect to its shareholders, or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed. Exceptions are made for publicly held corporations, banks and non-bank financial intermediaries, and insurance companies.

Local income taxes

Local government units impose local business taxes that are generally based on the prior year's gross sales or gross receipts. The local business tax shall not exceed 3%.

Resident foreign corporations

Resident foreign corporations are taxed in the same manner as domestic corporations (except on capital gains on the sale of buildings not used in business, which are taxable as ordinary income), but only on Philippine-source income. International carriers are subject to an income tax of 2.5% on their gross Philippine billings. Where there is a tax treaty, the preferential rate provided in it applies.

Income of offshore banking units (OBUs) and foreign currency deposit units (FCDUs) of depository banks from foreign currency transactions with non-residents, other OBUs, or FCDUs and local commercial banks (including branches of foreign banks) authorised by the Bangko Sentral ng Pilipinas (central bank) to transact business with OBUs and FCDUs are exempt from all taxes except net income specified by the Secretary of Finance upon recommendation of the Monetary Board. Interest income from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to a 10% final income tax.

Non-resident foreign corporations

In general, non-resident foreign corporations are taxed on gross income received from sources within the Philippines at 30%, except for reinsurance premiums, which are exempt, and on interest on foreign loans, which is taxed at 20%. Dividends from domestic corporations are subject to a final withholding tax (WHT) at the rate of 15% if the country in which the corporation is domiciled does not impose income tax on such dividends or allows a tax deemed paid credit of 15%. If the recipient is a resident of a country with which the Philippines has a tax treaty, the treaty rate applies, if lower. Otherwise, the normal corporate rates apply.

Rentals and charter fees payable to non-resident owners of vessels chartered by Philippine nationals on leases or charters approved by the Maritime Industry Authority are subject to a final tax of 4.5%. Rentals, charter fees, and other fees payable to non-resident lessors of aircraft, machinery, and other equipment are subject to a final tax of 7.5%.

Regional or area headquarters of multinational corporations that do not earn or derive income from the Philippines, and that act as supervisory, communications, and coordinating centres for their affiliates, subsidiaries, or branches in the Asia-Pacific region and other foreign markets are not subject to CIT.

Corporate residence

A domestic corporation is a corporation that is created or organised under Philippine laws. A foreign corporation that is duly licensed to engage in trade or business within the Philippines is referred to as a 'resident foreign corporation'.

Permanent establishment (PE)

The business profits in most Philippine treaties permits the Philippines to tax only those profits attributable to a PE. While Philippine treaties adopt the United Nations (UN) Model Convention, Organisation for Economic Co-operation and Development (OECD) commentaries have often been cited by tax authorities to support their interpretation of treaty provisions. The main implication is that most Philippine treaties contain a rule

Philippines

deeming a PE to arise when services are performed in the Philippines for a specified period of time.

Other taxes

Value-added tax (VAT)

VAT applies to practically all sales of services and imports, as well as to sales, barter, exchange, or lease of goods or properties (tangible or intangible). The tax is equivalent to a uniform rate of 12%, based on the gross selling price of goods or properties sold, or gross receipts from the sale of services. On importation of goods, the basis of the tax is the value used by the Bureau of Customs in determining tariff and customs duties plus customs duties, excise taxes, if any, and other charges. Where the valuation used by the Bureau of Customs is by volume or quantity, the VAT basis is the landed cost plus excise taxes, if any.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated.

Certain sales of services exempt from VAT, including services provided by financial intermediaries, are subject to percentage taxes based on gross sales, receipts, or income. A 3% percentage tax also applies to persons who are not VAT-registered because their annual sales or receipts do not exceed PHP 1,919,500.

Customs duties

Applicable customs duties are determined based on the tariff classification of the import product. As with the rest of the Association of South East Asian Nations (ASEAN) countries, tariff classification in the Philippines is based on the ASEAN Harmonised Tariff Nomenclature (AHTN), which is patterned after the Harmonised Commodity Classification and Coding System (HS) Convention and its 2002 revisions. The latest edition, HS 2007, was implemented in late 2007. HS 2007, in comparison with the 2004 edition, will impact 350 tariff classification numbers by mandating changes in both classification codes and customs duty rates. Recently, Executive Order No. 61 has been released to implement the Comprehensive Tariff Reform Program (CTRP) for 2012.

The Philippines adopts the World Trade Organization (WTO) Valuation Agreement, where the declared invoice price is used as the basis for determining customs duties.

As a protective measure, the Philippines retains higher tariff rates (20% to 50%) on sensitive agricultural products, such as grains, livestock and meat products, sugar, certain vegetables, and coffee. A few agricultural commodities are subject to minimum access volumes, but these represent less than 1% of all tariff lines.

In view of the existing free trade agreements in the region, such as the ASEAN Free Trade Area (AFTA), ASEAN-China Free Trade Area (ACFTA), ASEAN-Korea Free Trade Area (AKFTA), the ASEAN-Australia-New Zealand Free Trade Area (AANZFTA), the ASEAN-Japan Comprehensive Economic Partnership Agreement (AJCEPA), and the ASEAN-INDIA Free Trade Area, which has been implemented just recently, the Philippines has taken steps to progressively eliminate tariffs. Tariff reductions for the Philippines range from 10% to 35% for most products included in the Normal Track list.

Excise taxes

Excise tax is payable at varying rates on alcohol products, tobacco products, petroleum products, mineral products, and automobiles. Excise tax is also payable on all goods

commonly or commercially known as jewelry, whether real or imitation; perfumes and toilet waters; and yachts and other vessels intended for pleasure or sport at 20% of the wholesale price or value of the importation used by the Bureau of Customs in determining tariff and custom duties.

Documentary stamp tax (DST)

DST is payable at varying rates on various documents and transactions. The following table contains selected examples:

Taxable document/transaction (tax base)	DTS rate
Original issue of shares	PHP 1.00 for every PHP 200 or fractional part of par value
Sale, barter or exchange of shares of stock listed and traded through the local stock exchange	Exempt
Other sales agreement, agreement to sell, memoranda of sales, delivery or transfer of shares or certificates of stock	PHP 0.75 for every PHP 200 or fractional part of par value
Certificate of profits, interest in property or accumulations	PHP 0.50 for every PHP 200 or fractional part of face value
Non-exempt debt instruments	PHP 1.00 for every PHP 200 or fractional value of the issue price.
Bank check, draft, certificate of deposit not bearing interest, other instruments	PHP 1.50 for each instrument
Life insurance policy	PHP 10 to PHP 100 depending upon the amount of insurance
Lease/hiring agreement	PHP 3.00 for the first PHP 2,000 or fractional part of amount stipulated in contract, and PHP 1.00 for every PHP 1,000 or fractional part in excess of PHP 2,000 for each year of contract term
Mortgage, pledge, deed of trust	PHP 20.00 for the first PHP 5,000 of amount secured, and P 10.00 for every PHP 5,000 or fractional part in excess of PHP 5,000
Deed of sale, conveyance of real property	PHP 15.00 for each PHP 1,000 of consideration/value or fractional part thereof

Capital gains tax

Capital gains arise from the sale or exchange of 'capital assets'. Capital assets are property held by the taxpayer (whether or not connected with its trade) other than the following:

- Inventories or property held primarily for sale to customers in the ordinary course of business.
- Real property or depreciable property used in trade or business.
- Property of a kind that would be included in the inventory of the taxpayer if on hand at the close of the taxable year.

Capital losses are deductible only to the extent of capital gains.

There are no holding period requirements for capital assets of corporations.

Philippines

A 6% final tax is imposed on the higher of the gross selling price or fair market value upon the sale, exchange, or disposition of land or buildings not actually used in the business of a corporation. The tax is withheld by the buyer at the time of sale.

Net capital gains derived from the sale, exchange, transfer, or similar transactions of shares of stock not traded through a local stock exchange are taxed at 5% of gains not over PHP 100,000, and 10% of gains in excess of PHP 100,000. Sales of shares of stock listed and traded on a local stock exchange, other than the sale by a dealer in securities, are subject to a stock transaction tax of 0.5%, based on the gross selling price.

Capital gains from the sale of bonds, debentures, or other certificates of indebtedness with a maturity of more than five years are exempt from tax.

A tax is levied on every sale, barter, exchange, or other disposition through an initial public offering (IPO) of shares of stock in closely held corporations. A 'close corporation' is any corporation of which at least 50% in value of the total outstanding capital stock, or at least 50% of the total combined voting power of all classes of stock entitled to vote, is owned directly or indirectly by, or for, not more than 20 individuals. The tax rates provided hereunder are based on the proportion of the gross selling price, or gross value in money, of the shares of stock sold, bartered, exchanged, or otherwise disposed of to the total outstanding shares of stock after listing on the local stock exchange.

Proportion of sale to total shares	Tax rate (%)
25% or less	4
Over 25% but not over 33.33%	2
Over 33.33%	1

Fringe benefits tax

A final tax of 32%, payable by the employer, is imposed on the grossed-up monetary value of fringe benefits (e.g. housing, expense accounts, vehicles of any kind, household personnel, interest on loans at lower than market rates (the current benchmark rate is 12%), membership dues for social and athletic clubs, foreign travel expenses, holiday and vacation expenses, educational assistance, insurance) furnished or granted to managerial or supervisory personnel by the employer. An exception is for fringe benefits required by the nature of or necessary to the trade, business, or profession of the employer, or when the fringe benefit is for the convenience or advantage of the employer.

The following fringe benefits are not subject to the tax:

- Those authorised and exempted from tax under special laws.
- Contributions of the employer for the benefit of the employee to retirement, insurance, and hospitalisation benefit plans.
- Those granted to rank-and-file employees (however, the employees may be subject to WHT on compensation).
- Those of relatively small value or *de minimis* benefits.

The fringe benefits tax is payable on the calendar quarter basis and is an additional deductible expense for the employer. Fringe benefits already subjected to fringe benefits tax will no longer be included in the employee's taxable income.

The grossed-up monetary value of the fringe benefit is generally computed by dividing the actual monetary value of the benefit by 68%.

Local government taxes

Local government units impose local (business) taxes and permit fees, which are generally based on the prior year's gross sales or gross receipts, and real property taxes, which are levied on the basis of a fixed proportion of the value of the real property (taxable value). Real property located in a province may be subject to real property tax of not more than 1% of its taxable value, while real property in a city (or municipality in Metro Manila) may be subject to real property tax of not more than 2% of its taxable value.

Branch income

The income tax rate on branch profits is the same as on corporate profits. In general, profits remitted abroad by a branch office are subject to a 15% tax rate, based on the total profits applied or earmarked for remittance, without any deduction for the tax component thereof. A lower rate may apply under certain tax treaties. Profits from qualified activities remitted by a branch registered with the Philippine Economic Zone Authority (PEZA) are exempt.

Regional operating headquarters (ROHQ) pay a tax of 10% of their taxable income. A ROHQ is a branch established in the Philippines by a multinational company that is engaged in any of the following services: general administration and planning, business planning and coordination, sourcing and procurement of raw materials and components, corporate finance advisory services, marketing control and sales promotion, training and personnel management, logistic services, research and development services and product development, technical support and maintenance, data processing and communication, or business development.

Income determination

Inventory valuation

Inventories are generally stated at cost or at the lower of cost or market. Last in first out (LIFO) is not allowed for tax purposes. Generally, the inventory valuation method for tax purposes must conform to that used for book purposes.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. See *Capital gains tax in the Other taxes section for more information.*

Dividend income

Dividends received by a domestic or resident foreign corporation from another domestic corporation are not subject to tax. These dividends are excluded from the taxable income of the recipient.

Dividends received by a non-resident foreign corporation from a domestic corporation are subject to a final WHT at the rate of 15% if the country in which the corporation is domiciled either does not impose income tax on such dividends or allows tax deemed paid credit of 15%. If the recipient is a resident of a country with which the Philippines has a tax treaty, the treaty rate applies if lower. Otherwise, the normal CIT rate of 30% applies.

Philippines

Stock dividends

A Philippine corporation can distribute stock dividends tax-free, proportionately to all shareholders.

Interest income

Interest on bank savings, time deposits, and money market placements received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

Interest income of domestic or resident foreign corporations from FCDU deposits is subject to a final tax of 7.5%. Such income is excluded from gross income reportable in CIT returns.

Interest income of OBUs and FCDUs from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to 10% tax.

Royalty income

Royalties received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

Other significant items

Other items exempt from CIT include the following:

- Proceeds of life insurance policies.
- Return of policy premium.
- Gifts, bequests, and devises.
- Interest on certain government securities.
- Income exempt under a treaty.
- Gains from sale, exchange, or retirement of bonds.
- Gains from redemption of shares of stock in mutual fund companies.

Foreign income

A Philippine (domestic) corporation is taxed on its worldwide income. A domestic corporation is taxed on income from foreign sources when earned or received, depending on the accounting method used by the taxpayer.

Income earned through foreign subsidiary is taxed only when paid to a Philippine resident shareholder as dividend. Meanwhile, income earned through a foreign branch is taxed as it accrues. The losses incurred by the foreign branch are deductible against other income earned by the Philippine corporation.

Double taxation is generally relieved through a credit for foreign taxes. However, a taxpayer can take a deduction for foreign taxes instead, if that leads to a more favourable outcome.

Deductions

Note that corporate taxpayers are given the option to avail themselves of the optional standard deduction computed at 40% of gross income. The optional standard deduction is in lieu of the itemised operating expenses.

Depreciation and depletion

Depreciation is generally computed on a straight-line basis, although any reasonable method may be elected if the aggregate amount of depreciation, plus salvage value at the end of the useful life of the property, will equal the cost of the property. Gain on the sale of depreciated property is taxable as ordinary income. Generally, tax depreciation should conform to book depreciation, unless the former includes incentives.

Properties used in petroleum operations may be depreciated over a period of ten years using the straight-line or declining-balance method, at the option of the service contractor. Properties used in mining operations with expected life of more than ten years may be depreciated over any number of years between five years and their expected life.

A cost depletion allowance is available as follows:

- For oil and gas wells, depletion is based on actual reduction in flow and production ascertained, not by flush flow, but by the settled production or regular flow.
- For mines, depletion is allowable up to an amount not to exceed the market value, as used for purposes of imposing the mining *ad valorem* taxes, of the products mined and sold during the year.

Goodwill

Goodwill is not deductible for tax purposes.

Start-up expenses

Start-up expenses are deductible when incurred.

Interest expenses

The allowable deduction for interest expense is reduced by an amount equal to 33% of interest income that is subject to final tax.

Bad debts

Bad debts are deductible expenses when written-off, subject to certain requirements.

Charitable contributions

The deduction for charitable contributions ordinarily may not exceed 5% of taxable income. However, contributions to certain institutions are 100% deductible, subject to certain conditions.

Entertainment expenses

Entertainment, amusement, and recreation expenses should not exceed 0.5% of net sales for taxpayers engaged in sale of goods or properties, or 1% of net revenue for taxpayers engaged in sale of services, including professionals and lessors of properties.

Special deductions

Special deductions are allowed for certain businesses (e.g. insurance, mining, petroleum, and real estate investment trust).

Fines and penalties

Fines and penalties are deductible as necessary and ordinary business expenses. Surcharge and compromise imposed for non-payment or late payment of taxes is not deductible for tax purposes.

Philippines

Taxes

Corporate taxpayers can claim a deduction for all taxes paid or accrued within the taxable year in connection with their trade or business, except for the following:

- Philippine CIT.
- Income taxes imposed by authority of any foreign country, unless the taxpayer elects to take a deduction in lieu of a foreign tax credit.
- Estate and donor's taxes.
- Taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

In the case of a foreign corporation, deductions for taxes are allowed only if they are connected with income from sources within the Philippines.

Net operating losses

A net operating loss for any taxable year immediately preceding the current taxable year, which had not been previously offset as a deduction from gross income, may be carried over as a deduction from gross income for the next three consecutive taxable years immediately following the year of this loss (except losses during the period when the taxpayer was tax-exempt), provided there has been no substantial change in the ownership of the business or enterprise.

For mines, other than oil and gas wells, a net operating loss calculated without the benefit of incentives provided for under Executive Order (EO) No. 226, or the Omnibus Investments Code of 1987, as amended, incurred in any of the first ten years of operation may be carried over as a deduction from taxable income for the next five years immediately following the year of such loss.

Loss carrybacks are not allowed.

Payments to foreign affiliates

A Philippine corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are equal to what it would pay an unrelated entity, and the appropriate WHTs are withheld and remitted.

The registration of licensing and management agreements, now known as technology transfer arrangements (TTAs), has been liberalised. Only TTAs not conforming to certain provisions of the Intellectual Property Code require approval by, and registration with, the Documentation, Information, and Technology Transfer Bureau of the Intellectual Property Office (formerly Bureau of Patents, Trademarks, and Technology Transfer) to render the contracts enforceable.

Head office expense allocations

A resident foreign corporation is allowed to claim allocated head office expenses as a deduction, subject to compliance with certain requirements.

Group taxation

Group taxation is not permitted in the Philippines.

Transfer pricing

There are no specific consolidated transfer pricing rules in the Philippines, but the OECD transfer pricing guidelines are being used until the tax authorities issue transfer pricing regulations.

Thin capitalisation

There are no thin capitalisation rules in the Philippines.

Controlled foreign companies (CFCs)

There are no CFC rules in the Philippines.

Tax credits and incentives

Foreign tax credit

Domestic corporations are allowed to claim a credit for any income taxes paid to a foreign country, provided that the taxes are not claimed as deductions. Foreign corporations are not allowed foreign tax credits.

Credits for foreign taxes are determined on a country by country basis. The amount of foreign tax credit in respect to the tax paid in a country shall not exceed the same proportion of the tax against which the tax credit is taken, which the taxpayer's income from the country bears to its entire taxable income. There is, however, a further limitation based on the total amount of foreign-sourced income that the taxpayer earns. The total amount of foreign tax credits shall not exceed the same proportion of the tax against which the tax credit is taken, which the taxpayer's foreign-sourced income bears to its entire taxable income.

Export incentives

Tax incentives available to export enterprises registered with the Board of Investments (BOI) are as follows:

- Income tax holiday (ITH) giving full exemption from CIT for six years for pioneer firms and those locating in less-developed areas and four years for non-pioneer firms from the date of commercial operation, or target date of operation, whichever is earlier. Expanding export-oriented firms are given three years. If prescribed conditions are met, an income tax holiday may be extended by up to three years. In no case, however, can an income tax holiday exceed eight years. Subject to certain exceptions, new and expansion projects located in the National Capital Region (NCR) or Metro Manila are no longer entitled to the income tax holiday.
- Tax and duty exemption on imported spare parts and supplies for export producers with a customs bonded manufacturing warehouse exporting at least 70% of annual production, if foreign-owned or 50%, if Filipino-owned.
- Full deduction of the cost of major infrastructure undertaken by enterprises in less-developed areas.
- Additional deduction of 50% of the incremental labour expense if the prescribed ratio of capital assets to annual labour is met and 100% of the incremental labour if located in less-developed areas within five years from date of registration (this incentive cannot be availed of simultaneously with the income tax holiday).
- Ten-year exemption from taxes and duties on importation of breeding stock and genetic materials.
- Tax credit on domestic breeding stocks and genetic materials (ten years).
- Exemption from wharfage, any export tax, duty, impost, or fees.

Philippines

- Tax credits equivalent to taxes and duties paid on purchases of raw materials, supplies, and semi-manufactured products forming part of the products for export.

Other incentives

Export and free-trade enterprises, information technology (IT) enterprises, and special economic zone developers/operators (including IT buildings located in Metro Manila and IT parks) registered with PEZA are entitled to an ITH of six years for pioneer firms and four years for non-pioneer firms. Foreign articles brought into the zones will be exempt from import duties and taxes. Local purchases of goods from VAT-registered suppliers outside the economic zones are zero-rated. After the lapse of the income tax holiday incentives, enterprises registered and operating within special economic zones/export processing zones (EPZ) will pay only 5% final tax on gross income earned, in lieu of paying all local and national taxes.

A regional or area headquarters established in the country as a supervisory, communications, and coordination centre for a corporation's subsidiaries, affiliates, and branches in the Asia-Pacific region, and whose headquarters do not derive income from the Philippines, are not subject to any CIT nor VAT and are entitled to certain non-tax incentives.

ROHQ that are allowed to derive income in the Philippines by performing qualifying business services to its affiliates, subsidiaries, or branches in the Philippines, in the Asia-Pacific Region, and other foreign markets may avail itself of the following incentives:

- Income tax at the preferential rate of 10% of its taxable income.
- Exemption from all kinds of local taxes, fees, or charges imposed by a local government unit, except real property tax on land improvements and equipment.
- Tax and duty-free importation of equipment and materials for training and conferences which are needed and used solely for its functions as ROHQ and which are not locally available, subject to the prior approval of the BOI.
- Importation of new motor vehicles, subject to the payment of corresponding duties and taxes.
- Exemption from travel tax, specific immigration fees, and requirements, subject to certain conditions.

The following are the incentives granted to exporters under the Export Development Act (Republic Act No. 7844):

- Exemption from Presidential Decree No. 1853 (requiring 100% of Letter of Credit), provided that the importation shall be used for the production of goods and services of export.
- Tax credit for incremental export performance. The tax credit for increase in current export revenues shall be computed as a percentage to be applied on the incremental export revenue converted to pesos at the current rate. The percentages or rates are as follows:
 - For the first 5% increase in annual export revenues over the previous year: 2.5%.
 - For the next 5% increase: 5.0%.
 - For the next 5% increase: 7.5%.
 - In excess: 10.0%.

Note that this incentive is not available for exporters enjoying ITH or VAT exemption or whose local VAT is below 10%.

In addition to the above incentive, all existing incentives being enjoyed by the enterprise if registered with the BOI, PEZA, Subic Bay Metropolitan Authority (SBMA), Clark Development Corporation (CDC), or other ecozone regulating agencies.

Withholding taxes

Corporations and individuals engaged in business and paying certain types of income to non-residents are required to withhold the appropriate tax, which generally is 30% in the case of payments to non-resident foreign corporations or 25% for non-resident aliens not engaged in trade or business. *For WHT on resident corporations, see the discussions in the Income determination section.*

Tax treaty rates

For countries with which the Philippines has concluded tax treaties, the taxes to be withheld are as follows:

As of April 2012:

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%)
Australia	15/25 (3, 4)	10/15 (5)	15/25 (6)
Austria	10/25 (37)	10/15 (5, 8)	10/15 (6, 9)
Bahrain	10/15 (7)	10	10/15 (10)
Bangladesh	10/15 (11)	15	15
Belgium	10/15 (7)	10	15
Brazil	15/30	10/15 (5)	15/25 (12)
Canada	15/25 (3, 7)	10/15 (5)	25 (9)
China, P.R.	10/15 (7)	10	10/15 (13)
Czech Republic	10/15 (7)	10	10/15 (14)
Denmark	10/15 (11)	10	15
Finland	15/30 (3, 7)	10/15 (5)	15/25 (15)
France	10/15 (3, 7)	10/15 (5)	15
Germany	10/15 (11)	10/15 (5, 16, 17)	10/15 (13)
Hungary	15/20 (3, 11)	15	15 (9)
India	15/20 (3, 7)	10/15 (5, 17)	15/30 (6)
Indonesia	15/20 (3, 11)	10/15 (5)	15/25 (6)
Israel	10/15 (7)	10	15 (9)
Italy	15	10/15 (5)	15/25 (6, 18)
Japan	10/15 (3, 7)	10	10/15 (20)
Korea, Republic of	10/25 (3, 11)	10/15 (5)	10/15 (6)
Malaysia	15/25	15	15/25 (6, 18)
Netherlands	10/15 (7)	10/15 (5, 16, 17)	10/15 (6)
New Zealand	15/25	10	15/25 (6)
Norway	15/25 (3, 7)	15	7.5/10/25 (9, 21)
Pakistan	15/25 (3, 11)	10/15 (5)	15/25 (6)
Poland	10/15 (11)	10	15
Romania	10/15 (11)	10/15 (5, 16, 17)	10/15/25 (22)
Russia	15	15	15
Singapore	15/25 (3, 23)	10/15 (5)	15/25 (6, 18)
Spain	10/15 (7)	10/15 (5, 16)	10/15/20 (24)

Philippines

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%)
Sweden	10/15 (11)	10	15
Switzerland	10/15 (7)	10	15
Thailand	15/30	10/15 (5)	15/25 (6, 18)
United Arab Emirates	10/15 (7)	10	10
United Kingdom	15/25 (3, 7)	10/15 (5)	15/25 (6, 20)
United States	20/25 (3, 7)	10/15 (5)	15/25 (6, 9)
Vietnam	10/15 (11)	15	15

Notes

- The lower rate generally applies if the beneficial owner of the dividends is a company with a substantial ownership in the dividend paying company.
- Interest derived by a foreign government or its agencies is typically exempt from Philippine tax. Many treaties also contain special rules for both Philippine and home country taxation of interest paid on instruments secured by a government agency of one of the countries. Such provisions have been excluded from the analysis.
- A 15% rate applies under domestic law if the home country exempts the dividend from tax or permits a 15% or greater credit for corporate taxes paid by the company paying the dividend.
- Entitlement to the lower rate depends on how the dividend will be taxed in Australia.
- The 10% rate applies to interest paid in respect of the public issues of bonds, debentures, or similar obligations.
- The lower rate applies to royalties paid by an enterprise registered with the Philippine BOI and engaged in preferred areas of activity.
- The threshold for substantial ownership is 10%.
- The 10% rate also applies to interest paid by a company registered with the BOI and engaged in preferred pioneer areas of investment in the Philippines.
- The treaty also contains a most-favoured-nation rule, limiting the Philippine tax on royalties to the lowest rate of Philippine tax that may be imposed on royalties of the same kind paid in similar circumstances to a resident of a third state.
- The 15% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films or tapes for television or broadcasting.
- The threshold for substantial ownership is 25%.
- The 25% rate applies to royalties arising from the use or the right to use trademarks and cinematographic films, films or tapes for television or radio broadcasting. The 15% applies to any other royalties.
- The 10% rate applies to the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. Strictly, application of the rate is generally at the discretion of the Philippine Competent Authorities, but the BIR has never raised this as an issue.
- The 10% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work (other than copyright of cinematograph films), any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
- The 15% rate applies to royalties paid by an enterprise registered and engaged in preferred areas of activities, and to royalties in respect of cinematographic films or tapes for television or broadcasting, and for the use of, or the right to use, any copyright. The 25% rate applies to other royalties.
- The 10% rate also applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
- The 10% rate also applies to interest paid on any loans granted by a bank.
- The 15% rate also applies to royalties in respect of cinematographic films or tapes for television or broadcasting.
- The 10% rate applies to interest paid on government securities, or bonds or debentures. The 15% rate applies to any other interest income.
- The 15% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting.
- The 7.5% rate applies to the lease of containers. The 10% rate applies to royalties paid by an enterprise registered with the BOI. The 25% rate applies to other royalties.
- The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 15% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 25% rate applies to all other royalties.
- The threshold for substantial ownership is 15%.

24. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.

Tax administration

Taxable period

The accounting period may be either a calendar year or a fiscal year. With prior approval of the Commissioner of Internal Revenue, corporations may change their accounting period from calendar year to fiscal year, or vice versa.

Tax returns

Corporations should file their returns and compute their income on the basis of an accounting period of 12 months.

Corporate taxpayers file self-assessing returns. Electronic filing and payment of taxes are available under the Electronic Filing and Payment System (EFPS) of the BIR.

A domestic or resident foreign corporation is required to file income tax return on a quarterly basis. Within 60 days from the close of the first three quarters in its taxable year, the corporation must file in duplicate a return summarising its gross income and deductions for the year to date. A final annual income tax return must be filed on or before the 15th day of the fourth month following the close of the tax year.

Payment of tax

Every corporation files cumulative quarterly income tax returns for the first three quarters and pays the tax due thereon within 60 days after each quarter. A final adjustment return covering the total net taxable income of the preceding taxable year must be filed on the 15th day of the fourth month following the close of the taxable year. The balance of the tax due after deducting the quarterly payments must be paid, while the excess may be claimed as refund or tax credit. Excess estimated quarterly income taxes paid may be carried over and credited against estimated quarterly income tax liabilities for succeeding taxable years. Once the option to carry over has been made, such option is irrevocable for that taxable period, and no cash refund or tax credit certificate (TCC) is allowed.

Audit cycle

An annual statutory audit is required for all corporations with authorised capital stock or paid-up capital exceeding PHP 50,000, including branches of foreign corporations. It is also required for any corporation whose gross sales or earnings exceed PHP 150,000 in any quarter.

Statute of limitations

There is no statutory obligation on the Commissioner to make an assessment for internal revenue taxes, and most taxes are collected based on the taxpayer's self-calculation. If an assessment is to be issued, however, it must be done within three years from the deadline or the date of actual filing of the return, whichever comes later. The taxpayer and the Commissioner can, however, agree in writing to extend this period.

In the case of a false or fraudulent return or of failure to file a return, the tax may be assessed or a proceeding in court for collection may be commenced without assessment at any time within ten years from the discovery of the falsity, fraud, or omission.

Philippines

Any internal revenue tax that has been assessed within the period of limitation may be collected by distraint or levy or by a proceeding in court within five years following the assessment of the tax.

The prescription periods are suspended in certain circumstances, such as when the offender is absent from the Philippines, the Commissioner grants a taxpayer's request for a reinvestigation, or the taxpayer and the BIR agree to extend the prescriptive period for assessment through a written waiver.

In the case of overpayment of tax, a claim for refund or credit may be filed with the BIR within two years from the date of erroneous payment of the tax. If the claim is denied or no decision is received from the BIR, a petition for review may be filed with the Court of Tax Appeals (CTA). This must be filed before the two-year period expires, and in the case of a denied claim, within 30 days from the receipt of the denial.

Topics of focus for tax authorities

The BIR generally prepares an annual audit program that provides for mandatory cases subject to tax audit, as well as priority taxpayers.

Significant developments

Value-added tax (VAT) developments

As of 1 January 2012, the standard VAT rate will apply to supplies of children's clothing and footwear. Prior to 1 January 2012, the 8% reduced VAT rate is applicable for those goods.

New excise duty on coal

As of January 2012, there is an excise duty placed on coal. In practice, there are a wide range of excise duty exemptions; nevertheless, many new administrative obligations have been set for entities producing, distributing, and using coal. The fulfilment of those obligations is necessary in order to apply an excise duty exemption.

See Excise duties in the Other taxes section for more information.

Taxes on corporate income

The corporate income tax (CIT) is the only tax levied on corporate income. The CIT rate is 19%.

Polish residents are subject to tax on their worldwide income. Non-residents are taxed only on their Polish-sourced income. The tax authorities' right to tax a non-resident is further limited if the non-resident's home country concluded a double-tax treaty (DTT) with Poland. In this case, the Polish tax authorities are entitled to tax only the portion of the non-resident's income that is derived through a permanent establishment (PE) located in Poland. The exceptions relate to specific types of income such as royalties, interest, dividends, and capital gains that are taxed based on special DTT rules.

Further to these rules, the CIT applies to companies with foreign participation. Such companies may be set up as either limited liability companies or joint-stock companies. There is no limitation on the percentage of foreign participation. Both types are subject to the general CIT rules, including the 19% tax rate. The same rate applies to branches of foreign companies (*see the Branch income section for more information*).

Local income taxes

There are no provisions relating to local income taxes in the Polish Law.

Corporate residence

A company is considered to be a resident in Poland if its registered office or management is located in Poland.

Poland

From the group of taxpayers, certain entities are explicitly excluded in the CIT Law (e.g. Treasury, National Bank of Poland). As of 1 January 2011, European Union (EU)/European Economic Area (EEA) based investment funds are also exempted on the grounds of such provision (before this date, only Polish investment funds enjoyed the exemption).

Permanent establishment (PE)

PE under Polish CIT Law

According to Polish CIT Law, a PE should be understood as:

- a permanent place of business through which a non-Polish tax resident conducts its business activities, in whole or in part, within the territory of Poland, in particular a branch, agency, office, factory, workshop, or place of extraction of natural resources
- a construction site, construction, assembly, or installation works carried on within the territory of Poland by non-Polish tax resident, or
- a person who, on behalf and for the benefit of non-Polish tax resident, operates in Poland, if such person holds and exercises a power of attorney to enter into agreements on one's behalf.

We note that Polish CIT Law:

- does not encompass any provisions concerning the period required for construction works to create a PE
- does not include provisions indicating that an independent agent does not create a PE, and
- does not include provisions indicating that actions of an auxiliary or preparatory character do not lead to creation of a PE in Poland.

PE from a DTT perspective

In general, the provisions of DTTs concluded by Poland are based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital (OECD Model), except for provisions related to taxation of royalties, which are based on the United Nations (UN) Model Double Taxation Convention.

As a principle, treaties based on the OECD Model provide for the following concepts, which determine whether activities of a foreign entrepreneur constitute a PE (usually in Article 5):

- Fixed place of business concept.
- Dependant agent concept.
- Construction PE concept.

Note that some DTTs concluded by Poland also encompass other PE concepts (e.g. service PE concept or offshore PE concept).

Other taxes

Value-added tax (VAT)

Polish VAT applies to the following activities:

- Supplies of goods and services within the territory of Poland.

- Exports of goods outside the territory of the European Union.
- Imports of goods from countries that do not belong to the European Union.
- Intra-Community acquisitions of goods (imports from countries belonging to the European Union).
- Intra-Community supplies of goods (exports to the countries belonging to the European Union).

VAT rates

The VAT rates are 23% (standard rate), 8%, 5%, 0%, and exemption.

The standard 23% VAT rate generally applies to the supply of all goods and services, except for those that are covered by special VAT provisions that provide other rates or treatments.

Supplies covered by a reduced rate of 8% include, among others, supplies of pharmaceutical products and passenger transport services and also supply of goods for the Social Housing Programme (no greater than 150 square metres).

Supplies covered by a reduced rate of 5% include books and journals, unprocessed food, and basic food.

Zero-rated activities include, among others, exports of goods to countries outside the European Union.

VAT-exempt supplies include, among others, certain financial, insurance, and educational services.

As of 1 January 2012, the standard VAT rate applies to supplies of children's clothing and footwear. Prior to 1 January 2012, the 8% reduced VAT rate was applicable for those goods.

Basic calculation rules

In general, the VAT due equals the VAT on outputs decreased by the VAT on inputs (in other words, input VAT is deducted from output VAT). Input VAT may be deducted from output VAT when a business (with a VAT payer status) receives an invoice for goods or services purchased. Input VAT may not be deducted unless a purchased supply is linked to the VAT-able activities. Furthermore, the deductibility of input VAT is restricted by the VAT law with respect to the purchase of certain goods and services. In addition, subject to numerous conditions, output VAT may be reduced when receivables, resulting from VAT-able sales, become uncollectible.

VAT refunds

The Polish VAT law allows direct refunds when input VAT (available for deduction) exceeds output VAT.

A Polish business may also be entitled to the VAT refund owed by another country under certain circumstances. Likewise, a foreign business having seat or fixed place of business for VAT purposes in Poland may be, in most cases, entitled to the refund of Polish VAT. If the respective countries belong to the European Union, the procedure is substantially simplified due to the EU Directive which provides favourable rules for businesses based in EU countries that are seeking VAT refunds in other EU countries (i.e. electronic VAT refunds are possible).

Poland

Reporting rules

Generally, the VAT reporting period is one month. VAT returns should be submitted by the 25th day of the month following the VAT reporting period. All taxpayers may opt for a quarterly, instead of monthly, reporting period. Note that businesses involved in intra-community acquisitions or supplies of goods are obliged to submit additional VAT returns with respect to these particular transactions.

International services

The treatment of international services largely depends on the place of supply, since it is determinative of whether particular services are subject to the Polish VAT. The Polish VAT applies only to those services that are supplied within Poland.

Generally, the place of supply depends on the recipient of services. If the recipient is a business entity, the place of supply is determined to be the recipient's country; if the recipient is a private person, the place of supply is determined to be the service provider's country. Thus, according to general rules, if a Polish entity supplies services to a foreign business entity, the place of supply is outside Poland (these services are not subject to Polish VAT); if a foreign company supplies services to a Polish business entity, the place of supply (taxation) is in Poland. However, these general rules are subject to several exceptions.

If services are supplied by a taxpayer without seat or fixed place of business in Poland and the place of supply (taxation) is Poland, the purchaser who is the Polish VAT taxpayer has to apply the reverse-charge mechanism. Since 1 April 2011, the reverse charge is mandatory (i.e. the foreign supplier cannot voluntarily register and settle the Polish VAT).

As of 1 April 2011, an obligatory reverse-charge mechanism also applies to a domestic supply of goods performed by a taxpayer not having seat or fixed place of business in Poland to a purchaser who is a taxpayer and has seat or fixed place of business in Poland or is a legal entity (and is not taxpayer) and has a seat in Poland.

Customs duties

As a member of the European Union, Poland belongs to a customs union, thus only goods imported from non-EU countries or exported from Poland to the non-EU countries are subject to customs duties and formalities. Moreover, all the Community customs regulations are directly applicable in Poland. The most important act is the Community Customs Code and its implementing provisions, as well as the Community Customs Tariff.

These regulations are supplemented with certain Polish national rules, especially in respect to procedures and specific areas which are not defined in the Community customs law (e.g. strict regulations concerning the export of works of art and animals, limits on the amount of cash that may be brought from Poland to non-EU countries).

Excise duties

Excise duties are levied on the production, sale, import, and intra-community acquisition of 'excise goods', which are listed in the excise duty law and include (among others) alcohol, cigarettes, energy products (e.g. petrol, oils, gas), passenger cars, and electricity.

Depending on the excise goods in question, one of four methods of calculating excise tax may be applicable:

- A percentage of the taxable base.
- An amount per unit.
- A percentage of the maximum retail price.
- An amount per unit and a percentage of the maximum retail price.

The excise rate for car petrol is 1,565 Polish złoty (PLN) per 1,000 litres.

Passenger cars are subject to the following excise rates:

- 3.1% for cars with engine cubic capacity that does not exceed 2,000 cc.
- 18.6% for cars with engine cubic capacity that exceeds 2,000 cc.

Notwithstanding the above, Polish excise duty law provides for a wide system of excise duty exemptions as well as 0% taxation. Under specified circumstances, such preferential treatment may apply to specified goods that are otherwise taxed based on general rules. This concerns, for example, specific energy products used for other purposes than as a fuel or for heating.

As of January 2012, there is an excise duty placed on coal. Depending on the type of coal product, the excise rates are PLN 30.5 per 1,000 kg of coal, PLN 11 per 1,000 kg of lignite, and PLN 35.2 per 1,000 kg of coke. In practice, there are a wide range of excise duty exemptions (practically, Poland has used all the exemption options provided in the EU directive); nevertheless, many new administrative obligations have been set for entities producing, distributing, and using coal. The fulfilment of those obligations is necessary in order to apply an excise duty exemption.

Property taxes

Property tax rates are fixed by municipalities within limits set in the Law on Local Taxes and Fees. In 2012, land used for business purposes is subject to a rate limit of PLN 0.84 per square metre. Buildings used for business purposes are subject to a rate limit of PLN 21.94 per square metre.

Stamp duty

In Poland, there is no stamp tax, but some activities are charged by stamp duty. Method of payment are signs of stamp duty. Payment is required, for example, in connection with the submission of a power of attorney, after completion of an official act, or the issue of a certificate or permit.

Capital tax

A share capital increase (in case of corporations) and contribution/contribution increase (in case of partnerships) is subject to a 0.5% capital tax, payable by a company or partnership that receives a capital contribution. This tax applies equally to limited liability companies as well as joint-stock companies. A merger, division, or transformation of a corporation into another corporation is not subject to capital tax, even if the transaction results in a share capital increase. A similar exemption applies to a capital increase resulting from (i) an in-kind contribution of an enterprise or its organised part or (ii) contribution of shares of other corporation giving the majority of votes in this corporation or contribution of additional shares in case the corporation to which the shares are contributed already has the majority of votes.

Poland

Branch income

Foreign businesses are allowed, under certain conditions, to establish their branch offices (exclusively within the scope of their 'foreign' business activity) and representative offices (exclusively with regard to promotion and advertising) in Poland.

A branch office almost always has PE status in Poland. Once a branch is established, the foreign company pays CIT at the standard rate of 19%, based on the income attributable to the operations of the Polish branch. For this purpose, as well as for accounting purposes, a branch is obliged to keep accounting books that include all the data necessary to establish the taxable base. In this respect, general income determination rules relevant to Polish companies apply to branches as well. In the few cases in which a branch can demonstrate, based on a DTT, that its business presence in Poland does not amount to a PE, its profits are not subject to Polish CIT.

Income determination

The tax base is the overall income, which is the difference between aggregated taxable revenue and aggregated tax-deductible costs. A tax-deductible cost is defined as a 'cost incurred in order to generate revenue' as well as the cost incurred to 'protect a source of revenue'.

Subject to numerous exemptions, the tax base includes all sources of income. Consequently, there is no special treatment for income such as capital gains or interest.

In practice, taxable income is calculated by adjusting the profit reported for accounting purposes. The relevant adjustments are necessary due to differences between tax and accounting treatment of numerous revenue and cost items. As a result, the taxable base is usually higher than the accounting profit.

Inventory valuation

Generally, the value of inventory shortages may be included as a tax-deductible cost. Other write-offs in the value of inventory are not recognised for tax purposes until the inventory in question is sold.

When inventory is lost or sold, a tax deduction is allowed for the costs incurred when the inventory was purchased. The methods acceptable for inventory valuation for tax (and accounting) purposes are standard cost, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO).

Capital gains

There is no separate capital gains tax. Capital gains or losses are aggregated with an entity's other taxable income or losses. Capital losses are tax-deductible.

Dividend income

Domestic dividend income

Dividends received from Polish residents (domestic dividends) are excluded from overall income. Instead, such dividends are subject to a 19% withholding tax (WHT), which is withheld and remitted to the tax office by the payer of dividends. Based on a participation exemption, however, domestic dividends are not subject to the 19% WHT if the Polish beneficiary holds at least a 10% share in the paying company for at least two years.

The revenue arising from voluntary redemption of shares is not treated as a dividend for tax purposes and does not enjoy the benefits of the participation exemption (i.e. the method of redemption, whether voluntary or automatic, will matter).

Dividend income from abroad

Generally, dividends collected by a Polish corporate tax resident, if paid by a non-resident, are treated as regular income and taxed at the standard CIT rate. CIT on such dividends paid in other countries may be credited proportionately against Polish CIT. The CIT law also provides for an 'underlying tax credit', which is related to the CIT paid by a foreign subsidiary under a foreign tax jurisdiction, subject to a number of conditions. Specifically, a DTT between Poland and the subsidiary's country of residence should be in place and the Polish recipient of the dividend should hold at least 75% of the shares in the foreign subsidiary.

Additionally, dividends received from entities seated in the European Union (including Poland), EEA member states, or Switzerland can benefit from CIT exemption, if the Polish company owns respectively at least 10% (in respect to companies seated in the EU/EEA member states) or 25% (in respect to companies seated in Switzerland) in the share capital of the payer for two consecutive years (and certain other conditions are met).

Dividends received from non-EU/non-EEA member states may benefit from underlying tax credit. If a Polish company or a PE of a company from an EU/EEA member state located in Poland receives a dividend from a company seated in a non-EU/non-EEA country, it may deduct the tax paid by the payer on profits out of which the dividend was paid. The deduction is only possible provided that the Polish company/company from EU/EEA, which PE is located in Poland, holds (for two consecutive works) at least 75% of shares of the dividend payer. The tax may be deducted in an appropriate proportion. Furthermore, the deduction is possible provided that there is a DTT. Based on the provisions of the relevant DTT or other agreement concluded by Poland, the Polish tax authority may exchange tax information with its counterparty.

Interest income

Interest income is aggregated with an entity's other taxable income.

Foreign income

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland (*see Foreign tax credit in the Tax credits and incentives section*).

Deductions

Generally, a tax-deductible cost is defined as a cost incurred in order to generate taxable revenue or to 'protect a source of income'. The last element of the definition of a tax-deductible cost was added a few years ago to reduce uncertainties surrounding the deductibility of business expenses that do not directly generate revenue.

The CIT law provides a list of items that are not deductible for tax purposes, even if the items meet the general conditions described above. This list contains over 60 items including, among others, the following:

Poland

- Written-off, lapsed accounts receivable.
- Entertainment costs.
- Accrued but unpaid interest.
- Accounting and comparable provisions.
- Tax penalties and penalty interest.
- A portion of the insurance premium paid on a passenger car (i.e. the portion calculated on the excess of the car value over 20,000 euros [EUR]).
- A portion of the depreciation write-offs made on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).

Furthermore, expenses incurred in connection with the acquisition of fixed and intangible assets (e.g. licences, trademarks, know-how) are not deductible directly. Instead, the acquired assets are subject to depreciation. If such assets are sold, a business is entitled to deduct the net value (cost of acquisition reduced by the overall value of the tax depreciation allowances made). Similar treatment relates to the acquisition of shares or land, except that these particular assets are not depreciable. Therefore, the full cost of an acquisition of shares or land may be deducted when such assets are sold.

Depreciation

Depreciation is treated as a tax-deductible cost. Generally, depreciation allowances are calculated based on the straight-line method and the maximum rates provided in the CIT law. If this is the case, a taxpayer deducts equal annual write-offs, calculated by multiplying the maximum rate of depreciation by the asset's initial value until the total value of write-offs equals the initial value (typically, the initial value equals the purchase price).

For certain categories of machinery and vehicles (but not passenger cars), the reducing-balance depreciation method may be applied. Under this method, the tax depreciation may be accelerated during the initial period of the asset's use by multiplying the statutory maximum rate by two. The rate is then applied to the net value of fixed assets (i.e. initial value reduced by earlier annual write-offs). The reducing-balance method is applied until the annual depreciation write-off equals the hypothetical write-off that would be made under the straight-line method. From this point, the depreciation allowance is taken based on the straight-line method for its remaining useful life.

The main categories of assets and the related statutory annual tax depreciation rate are as follows:

Assets	Depreciation rate (%)
Various buildings and constructions	1.5 to 10
Machinery and equipment (general)	7 to 20
Machinery for road building and construction	18 to 20
Machinery for paper industry	14
Office equipment	20
Computers	30

Apart from the above, the Polish CIT law includes provisions for accelerated depreciation (within specified limits) for assets used in deteriorated conditions and for second-hand assets.

Goodwill

Under the provisions of CIT Law, goodwill is subject to tax amortisation if it is created as a result of acquisition of an enterprise, or its organised part, made in one of the following ways: (i) purchase; (ii) payable use, provided that the user of such enterprise/organised part of an enterprise makes the depreciation write-offs; or (iii) contribution to a company based on commercialisation and privatisation regulations. The goodwill is amortised for tax purposes for a minimum period of five years.

Start-up expenses

There are no specific provisions in the Polish CIT Law relating to start-up expenses; the general rules of tax deductibility described above apply.

Interest expenses

Capitalised, accrued, and paid interest on loans and credit can be deductible from CIT. Polish CIT Law provides some exceptions, such as instances where costs are not associated with earning revenue.

In Poland, there are also some limitations of interest tax deductibility connected with thin capitalisation regulations. See *Thin Capitalisation in the Group Taxation section for more information*.

Bad debt

As a general rule, debts written off as uncollectable cannot be considered as tax deductible. However, in certain situations, the provisions of Polish CIT Law provide some exceptions. According to these provisions, only strictly defined uncollectable debts (which based on the CIT Law were booked as taxable revenues) may be considered by the taxpayer as a tax-deductible cost, provided that their uncollectability was properly documented (e.g. by a court decision). In some cases, uncollectability may be considered probable (e.g. debtor's death).

Also, a VAT-payer has a possibility to correct the output tax on the supply of goods or the provision of services, in addition to 'bad debts' whose uncollectability was made plausible. To do so, a few conditions must be met. They mainly concern the debtor's and creditor's VAT status, lapse of the time limit for payment (specified in an invoice), and proper notifications made by the taxpayer.

Charitable contributions

Companies are entitled to deduct donations for the purposes of public benefit and to volunteer activity organisations up to the total amount not exceeding 10% of income; however, deductions may not be made for donations to:

- natural persons or
- legal persons or organisational units having no legal personality who carry on economic activity consisting in the production of electronic goods; fuel; tobacco; spirits, wines, beers, and other alcohol beverages containing over 1.5% alcohol; products made of noble metals or containing such metals; or incomes received from trading in such goods.

Donations for religious practice purposes can be deducted up to the total amount not exceeding 10% of income.

Additionally, the donations of food products made for the purposes of so-called public benefit constitute tax deductible costs in the amount of production costs or purchase price.

Poland

Fines and penalties

Fines and penalties can be recognised as tax deductible items if they meet the general conditions. However, the Polish CIT Law provides some exceptions, which include contractual penalties and indemnities for defects in supplied goods, works, and services performed; delayed supply of non-defective goods; and delay in the elimination of defects in goods, works, and services performed.

Taxes

Income tax and, in most cases, VAT incurred on purchases are not deductible. However, as a rule, VAT is deductible for CIT purposes if it cannot be offset against the company's output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

Net operating losses

A tax loss reported in a tax year may be carried forward over the next five consecutive tax years; however, in any particular tax year, the taxpayer may not deduct more than 50% of the loss incurred in the year in which it was reported. For example, a taxpayer that incurred PLN 100 annual loss in 2010 may carry it forward to 2011 through 2015. However, the maximum loss deduction in any of these years may not exceed PLN 50 (assuming that there are no other losses available for deduction).

Currently, there is no possibility to carry back tax losses in Poland.

Payments to foreign affiliates

Deductions may be claimed for royalties, management services, and interest charges paid to foreign affiliates. However, note that interest expenses are subject to the thin capitalisation restrictions (*see Thin capitalisation in the Group taxation section for more information*). Furthermore, note that transactions with related companies should be made according to the market conditions. Where a company shifts income to another entity (especially a foreign entity), the tax authorities may adjust the taxable base upward (*see Transfer pricing in the Group taxation section for more information*).

Group taxation

The CIT law includes provisions on group taxation (i.e. in theory, a group of companies) if it meets certain conditions and can be treated as a single taxpayer. However, the required conditions are extremely demanding and very few taxpayers of this type exist.

Transfer pricing

Transactions between related parties should be conducted in accordance with the arm's-length principle. The tax authorities may increase the taxable base if the pricing used between related parties differs from what would have been used between unrelated parties in a similar business transaction and the difference results in income being shifted from a Polish taxpayer to another entity (whether a Polish resident or not). Similar rules apply to transactions between Polish residents and the residents of tax haven countries. These transactions may be subject to the transfer pricing principles even if the parties thereto are not related. The CIT law also contains detailed requirements for transfer pricing documentation.

Taxpayers can reduce the transfer pricing risk by applying for an advance pricing arrangement (APA). An APA decision shall be issued by the Minister of Finance in response to a taxpayer's application. An APA will oblige a taxpayer to follow a specified methodology when calculating the transfer prices applicable to transactions between

related entities. In exchange, the tax authorities may not challenge the agreed upon methodology.

Thin capitalisation

A portion of the interest paid by a Polish company on a loan granted by a qualified lender (a qualified shareholder or a qualified sister company) will not be considered a tax-deductible cost if the value of the Polish company's overall debt from the shareholders and other affiliates mentioned in the tax law exceeds three times the value of the Polish company's share capital (3:1 debt-to-equity ratio). A qualified shareholder is defined as a holder of 25% or more of the voting power of a Polish company. A qualified sister company is a company of which a shareholder holds at least 25% of the value of the shares.

Tax credits and incentives

Special Economic Zones (SEZs)

Polish legislation provides investment incentives related to business activities carried out in 14 zones defined as SEZs. A business entity can benefit from tax incentives, provided that the entity obtains a permit from the Ministry of the Economy to conduct business activities there and meets other legal requirements. Note that a CIT credit applies only to income earned on activity conducted within the territory of SEZs and covered by permit.

In general, the amount of the tax incentive depends on project location and size of the enterprise. For large enterprises, it can be 30%, 40%, or 50% of eligible expenditures (i.e. investment expenditures or two-year labour costs). In other words, the CIT credit allows the investor to avoid paying income tax up to the limit calculated on the basis of eligible expenditures and state aid intensity (percentage as above). In case of investment valued PLN 20 million and intensity aid of 40%, the investor would be entitled not to pay tax due up to PLN 8 million. If the available limit of the tax credit exceeds the annual tax due generated on SEZ activity, the excess may be utilised in the following tax years. Consequently, in the case of significant investments, it is possible for businesses that run activities in the SEZs to enjoy exemption from income tax for a considerable period. According to current regulations, the deadline for utilising available tax credit is the end of 2020.

Note that in the case of small enterprises, the limit of the tax credit may be increased by 20%. In the case of medium-sized enterprises, the limit of the tax credit may be increased by 10%.

Foreign tax credit

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland. In all other cases (in particular, when the income is not covered by any treaty), Poland uses the ordinary credit method to avoid double taxation. Therefore, a Polish resident is liable for income tax imposed on its worldwide income, but the tax is proportionately reduced by the income tax paid abroad.

Poland

Withholding taxes

Domestic provisions: General rules

The general domestic WHT rate for dividends is 19%. Dividends encompass also income from liquidation of a company and the income from the redemption of shares (with the exception of gain from voluntary redemption, which is treated as a capital gain subject to 19% CIT rate in Poland if the gain is realised by a taxpayer from non-treaty country or the treaty includes a so-called real estate clause).

The general WHT rate on interest and royalties paid to non-residents is 20% (10% regarding services of sea or air transportation). These WHT rates may be reduced by DTTs.

There is also a 20% WHT on payments made to non-residents for intangible services (such as consulting services). However, if a payment is made to a country that has a DTT with Poland, this tax may be avoided with the completion of certain minimal administrative formalities. Few treaties treat payments for technical services as royalties (e.g. India).

Special treatment: EU directives

The CIT law provisions and certain EU directives provide special treatment for dividends, royalties, and interest paid to numerous European countries.

When joining the European Union, Poland was granted a transitional period to phase out the WHT on interest and royalty payments paid by Polish corporate residents to associated EU or EEA companies. As of 1 July 2009, the WHT rate on these payments is 5%. Starting on 1 July 2013, a full exemption will apply. In general, the transitional rules, as well as the full exemption after 1 July 2013, only apply to interest and royalty payments between associated companies (parent-subsidiary relationships or sister-sister relationships) in which capital involvements are significant.

Dividends paid to corporate residents of EU and EEA countries are exempt from WHT, subject to certain conditions specified in the CIT law. The basic requirement is that the foreign beneficiary holds at least 10% of the shares in the Polish company for a minimum of two years. This condition is also fulfilled if the required period passes after the day of payment of the dividend. If the period is interrupted afterwards, the company is obliged to pay the tax with standard rate with interest.

Note that several additional conditions have to be met for the reduced rate/exemption from the WHT based on the Directive to be applied (e.g. the company receiving the dividend/interest/royalty cannot be exempt from tax on all its income, regardless of its source; the recipient has to have ownership title to the shares in the Polish company).

Additionally, the amendments state that in order to enjoy the exemption from WHT on dividends and decreased WHT rate on interest and royalties, based on the Directives' provisions, the relevant DTT or other agreement concluded by Poland should allow exchange of tax information between the tax authorities of Poland and the country of the payment recipient.

Given the fact that Poland did not conclude a DTT with Liechtenstein, payments made to tax residents of Liechtenstein should not benefit from the Directive.

Treaty rates

If EU special rules do not apply, the domestic WHT rates can be decreased by a DTT concluded between Poland and the payment recipient's country of residence if certain administrative conditions are met (i.e. the payer obtains a valid certificate of a fiscal residence of the payment recipient/beneficial owner).

The following table lists the WHT rates as provided in the treaties concluded by Poland. Notably, the following table shows only rates that result from general treaty provisions; the treaties themselves occasionally include special provisions (applicable in special circumstances or to special entities) that provide lower WHT rates than the ones listed.

Furthermore, if a treaty rate is higher than a domestic one, the latter should apply.

Recipient	Dividends (%)	Interest (%)	Royalties (%)

Notes

1. When the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends.
2. When interest is paid to the government, the central bank of the state, including local authorities or other government bodies.
3. When the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.
4. When interest is paid to the government, a political subdivision, or a local authority in connection with:
 - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
 - a sale on credit of any industrial, commercial, or scientific equipment, or
 - any loan granted by a bank.
5. When the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends.
6. When the interest is paid:
 - to the Central Bank of Poland
 - to the Central Bank of Bangladesh
 - to the government of the Republic of Poland or the government of the Republic of Bangladesh, or
 - in respect of a loan made or guaranteed or insured by the government of the other state, or any agency including a financial institution owned or controlled by the government.
7. When the beneficial owner is a company (other than a partnership) that holds directly at least 30% of the capital of the company paying the dividends.
8. When the beneficial owner is a company (other than a partnership):
 - that holds directly at least 25% of the capital of the company paying the dividends or
 - that holds directly at least 10% of the capital of the company paying the dividends, and the value of investments in the company is at least EUR 500,000 or is equal to the amount in the other currency.
9. When interest is paid:
 - on loan granted, guaranteed, or insured, or a credit granted, guaranteed, or insured, by a general system organised by the state, including political subdivisions or local authorities for purposes of promoting exports
 - on loan of whatever kind, except in the form of bearer securities, granted by a banking company, or
 - to other states, including political subdivisions and local authorities.
10. When interest is paid to the government, including local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government.
11. When interest is paid in respect of a loan made, guaranteed, or insured by the state or agreed public body.
12. Copyright royalties and other similar payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work (not including royalties in respect of motion picture films and works on film or videotape for use in connection with television).
13. When the beneficial owner is a company that controls directly 20% of the voting stock of the company paying the dividends.
14. For the use of, or the right to use any industrial, commercial, or scientific equipment.
15. When interest is paid:
 - to the government, a local authority, and the central bank or any financial institution wholly owned by that government or
 - to the other resident of the other state with respect to debt-claims indirectly financed by the government of the other state, a local authority, and the central bank or any financial institution wholly owned by the government.
16. For the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films, and films or tapes for radio or television broadcasting, or any patent, know-how, trademark, design or model, plan, secret formula, or process.
17. When interest is paid to the government, including political sub-divisions and local authorities, the central bank or any statutory body of the state with respect to loans or credits made or guaranteed by the government of the other state, including political sub-divisions and local authorities, the central Bank, or any statutory body of the other state.
18. When the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends.
19. When the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period.
20. When the beneficial owner is a pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement benefits, when such pension fund or other similar institution is established, recognised for tax purposes and controlled in accordance with the laws of the other state.
21. When interest is paid:
 - on loan whatever kind granted, insured, or guaranteed by a financial institution owned or controlled by the state
 - in connection with the sale on credit of any industrial, commercial, or scientific equipment

Poland

- in respect of a bond, debenture, or other similar obligations of the government of the state, or of a political subdivision or local authority, or
 - to the other state, or to a political subdivision or local authority.
22. When interest is paid to the government of the other state, including local authorities and the central bank.
23. When the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
24. When interest is paid to the government of the other state, including political subdivisions and local authorities, the central bank, or any financial institution owned by the government or on loans guaranteed by the government.
25. From copyright of literary, artistic, or scientific work.
26. When the beneficial owner is the government of the other state or central bank.
27. When the interest, subject to certain exceptions related to silent shareholders, is paid:
- to the government of Poland or Germany on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports
 - in connection with the sale on credit of any industrial, commercial, or scientific equipment
 - in connection with the sale on credit goods between companies, or
 - on any loan of whatever kind granted by a bank.
28. If the following conditions are met:
- Interests paid to:
 - the government, a political sub-division, or a local authority of the other contracting state or
 - the central bank of other contracting state.
 - When the beneficial owner is a resident of the other contracting state and is derived in connection with a loan or credit extended or endorsed by:
 - Bank Handlowy (in scope of financing export and import) - for Poland
 - the Export-Import Bank of India (in scope of financing export and import) - for India
 - any institution in the other contracting state in charge of public financing of external trade, or
 - any other person, provided that the loan or credit is approved by the government of the first mentioned contracting state.
29. When the beneficial owner is the government, ministry, other governmental institution, municipality, central bank, or any other bank wholly owned by the government of the other contracting state.
30. When the beneficial owner is a resident of the other contracting state and holds directly at least 25% of the voting power of the company paying the dividends.
31. Interest paid in connection with:
- the sale on credit of any industrial, commercial, or scientific equipment
 - the sale on credit of any merchandise by one enterprise to another, or
 - on any loan of whatever kind granted by the bank.
32. When the beneficial owner is a company that holds directly at least 15% of the capital of the company paying the dividends.
33. If the following conditions are met:
- When the payer of interests is the government or contracting state or a local authority of thereof.
 - Interest is paid to the government of other contracting state or local authority thereof (including financing institutions) wholly owned by other contracting state or local authority thereof.
 - Interest is paid to any other entity, including financial institutions, in relation to loans made in application of an agreement concluded between governments of contracting states.
34. When beneficial owner is the government of other contracting state, including local authorities thereof, the central bank, any financial institutions controlled by that government or any resident of the other contracting state with respect to debt-claims, guaranteed or indirectly financed by institutions mentioned above.
35. For payments connected with copyrights, literary, artistic, and scientific activity, including payments connected with films for cinemas and films and tapes for TV.
36. When the beneficial owner is a company that holds directly or indirectly, at least 20% of the capital of the company paying the dividends.
37. When interest is paid to the government or local authorities.
38. When interest:
- arising in contracting state and received by the government of the other contracting state, including political subdivision or a local authority thereof or the central bank of that other contracting state
 - arising in contracting state is paid in respect of loans and credits made or guaranteed:
 - by the Bank Handlowy - for Poland
 - by the Export-Import Bank of Korea and Korea Development Bank - for Korea
 - is paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or
 - is paid in connection with the sale on credit of any merchandise by one enterprise to another.
39. Interest paid to government or central bank.
40. When the beneficial owner is:
- the government of the other contracting state, entity, or any governmental institution or
 - a company that is a resident of the other contracting state and at least 25% of its capital is owned directly or indirectly by the entities mentioned above.
41. If the following conditions are met:
- When the beneficial owner is:
 - the government of the other contracting state, entity, or governmental institution or

- a company that is a resident of the other contracting state and at least 25% of its capital is owned directly or indirectly by the entities mentioned above
 - When interest is paid in connection with loans guaranteed by the entities mentioned above.
42. When interest is paid:
- to the government, including the local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government or
 - to the resident in the other contracting state.
43. If the following conditions are met:
- When the beneficial owner is other contracting state.
 - When interest is paid in connection with loans and credits granted by bank.
44. Dividends paid by:
- a resident of Poland to a resident of Malaysia who is subject to Malaysian tax in respect thereof or
 - a resident of Malaysia to a resident of Poland who is subject to Polish tax in respect thereof.
45. Interest paid to resident of Poland on an approved loan or a long-term loan.
46. Royalties paid to resident of Poland by resident of Malaysia and approved by the competent authority of Malaysia.
47. If the following conditions are met:
- When the beneficial owner is:
 - a contracting state, a political subdivision, or a local authority, or The National Bank of Poland or Banco de Mexico or
 - a recognised pension or retirement fund provided that its income is generally exempt from tax in this state.
 - When interest:
 - is paid by any of entities mentioned above
 - arises in Poland and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by Banco de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. or Banco Nacional de Obras y Servicios Publicos S.N.C., or
 - arises in Mexico and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by PKO S.A., Corporation of Credit Insurance, and Bank Handlowy in Warsaw.
48. If the following conditions are met:
- When the beneficial owner is a bank or insurance company.
 - When interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market.
49. When dividends are paid to the company that holds directly at least 10% of the capital paying the dividends on the day they are paid and has done (or will do) so for an interrupted 24-month period from which that date falls.
50. When interests is paid:
- by a resident of Pakistan to a Polish company or enterprise on loans approved by the Ministry of Finance of the government of Pakistan
 - to the State Bank of Pakistan from sources in Poland, or
 - to Bank Handlowy in Poland from the sources in Pakistan.
51. For payments of any kind received in consideration for the use of, or the right to use:
- any copyright, patent, trademark, design or model, plan, secret formula, or process
 - an industrial, commercial, or scientific equipment, or
 - motion picture films, and works on films and videotapes for use in connection with television.
52. For payments received in consideration of technical know-how concerning industrial, commercial, or scientific experience.
53. Interests paid in respect of:
- a bond, debenture, or other similar obligations of the government, state, political subdivision, or local authority thereof or
 - a loan or credit extended, guaranteed, insured, or refinanced by:
 - Central Bank of Philippines - for Philippines
 - Central Bank of Poland - for Poland, or
 - other lending institutions as specified and agreed in letters of exchange between competent authorities of the contracting states.
54. When dividends are paid to the company that holds directly at least 25% of the capital stock of the company paying the dividends for an uninterrupted 24-month period prior to the payment.
55. If the following conditions are met:
- When the debtor of such interests is the government, a political subdivision, or local authority.
 - When the interest is paid to the government of other contracting state, a political subdivision, or local authority thereof, or an institution or body in connection with any financing granted by them under an agreement between the governments of the contracting states.
 - Loans or credit made on central banks of contracting states and any other financial institution controlled by the state and financing external business that may be agreed upon between the competent authorities of the contracting states.
56. Interests paid to government, administrative, territorial, or the central bank.
57. Dividends paid by:
- the company that is a resident of Singapore to a resident of Poland (as long as Singapore does not impose a tax on dividends in addition to the tax chargeable on the profits or income of a company) or

Poland

- to government of either contracting state with respect to shares in joint stock companies of that other state.
58. Interest paid to government.
59. Interests paid to government, local authorities, or the central bank.
60. Exempt income tax in Sri Lanka, not exceeding 33 1/3% on the company that pays dividends and other than the additional tax not exceeding 6% on companies whose shares are not movable property situated in Sri Lanka for the purpose of the law of Sri Lanka relating to Estate duty.
61. Interests:
- received by any banking institution that is a resident of contracting state
 - derived from contracting state of the other contracting state either directly or through any agency, or
 - accruing to any company, partnership, or other body of persons resident in the contracting state for any loans in money, goods, and services or in any other form, granted by them to the government of the other contracting state, or to a state corporation, or to any state institution, or to any other institution, to the capital of which, the other contracting state has made any contribution, or to a credit agency, or an undertaking in that other contracting state with the approval of the government of the same state.
62. For payment in consideration, for the use of, or the right to use, any copyrights or cinematograph films.
63. As long as Switzerland will not tax royalties paid to foreign recipients, the payments are taxed only in the country of residence of the recipient (currently there is no WHT in Switzerland).
64. If the following conditions are met:
- When recipient is a contracting state, or one of its local authorities, or the statutory body of either, including the central bank; or when interests are paid by a contracting state, or one of its local authorities, or the statutory body of either.
 - Such interest is paid in respect of any debt-claim or loan guaranteed, insured, or supported by a contracting state or another person acting on state's behalf.
65. Payments payable to contracting state or a state owned company in respect of tape or films.
66. Royalties made as consideration, for the alienation, or the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic films or tapes for television or broadcasting.
67. When the beneficial owner is the government or a government institution.
68. When dividends are paid to a company that is the resident of the other contracting state and that holds directly at least 10% of the capital, paying the dividends on the day they are paid and has done (or will do so) for an uninterrupted 24-month period from which that date falls.
69. When interests are paid to the government, a political subdivision, or a local authority in connection with:
- a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
 - the sale on credit of any industrial, commercial, or scientific equipment, or
 - any loan granted by a bank.
70. When the beneficial owner is a company that holds directly at least 10% of the outstanding shares of the voting stock of the company paying the dividends.
71. When the beneficial owner is a company that holds directly at least 20% of the capital of the company paying the dividends.
72. When the beneficial owner is:
- the government or a local authority or
 - the National Bank of Poland or the Central Bank of Uzbekistan Republic.
73. For payment of any kind, received in consideration, for the use of, or the right to use:
- any patent, design or model, plan, secret formula, or process or
 - any information concerning industrial or scientific experience.
74. Treaty allows application of the domestic tax rate.
75. As long as Iceland does not levy tax at source of income, interest is taxable only in the contracting state of which the beneficial owner of the interest is a resident.
76. When interest is paid to the government, a political subdivision, or a local authority in connection with:
- a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
 - a sale on credit of any industrial, commercial, or scientific equipment
 - any loan granted by a bank
 - in respect of a bond, debenture, or other similar obligations of the government of a contracting state, or of a political subdivision or local authority thereof, or
 - to the other contracting state, or to a political subdivision or local authority thereof.
77. Provided that any new contribution is made to the capital of a company resident in Sri Lanka by a company resident in Poland.
78. When the tax is charged by Poland.
79. When the dividends are paid by a company resident of Poland to a resident of Malta that holds directly at least 10% of the capital company paying the dividends on the date they are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls.
80. When the recipient is the beneficial owner.

Tax administration

Tax returns

The annual CIT return should be submitted to the tax office within three months following the end of the tax year.

Payment of tax

The same deadline as the CIT return applies to the settlement of the annual CIT liability. In financial terms, the final settlement is not significant since most of the annual liability is paid by CIT advances throughout the tax year.

The CIT advances should be paid for each month by the 20th day of the following month. Entities that started business activities (except for companies organised as a result of certain transformations) and entities whose gross sales revenue (including VAT) in the prior tax year did not exceed EUR 1.2 million are entitled to opt to make advance settlements on a quarterly basis (instead of a monthly basis).

Audit cycle

The tax authorities generally shall notify its intention to initiate a tax audit. The inspection shall be initiated not earlier than after seven days and not later than 30 days from the receipt of the notice.

The duration of all audits in one calendar year may not exceed the following:

- For micro entrepreneurs: 12 working days.
- For small entrepreneurs: 18 working days.
- For medium entrepreneurs: 24 working days.
- For large entrepreneurs: 48 working days.

Statute of limitations

Tax liability expires five years after the end of the calendar year in which the tax payment deadline passed. There are also situations when the statute of limitations can be suspended or interrupted (e.g. litigation).

Topics of focus for tax authorities

The Ministry of Finance publishes tasks for audit authorities every year. It is not an official document but rather an internal ordinance.

In 2012, the topics of focus for tax authorities include the following:

- Excise duty, especially connected with liquid fuels trade.
- VAT on intra-Community transactions.
- Tax frauds in VAT on domestic transactions.

In practice, the main fields of control held by audit authorities are as follows:

- Validity of the VAT refund.
- Possibility to correct excise duty resulting from post-transaction rebate.
- Correctness of VAT returns concerning scrap sales.
- Correctness of settlements concerning the use of a trademark.

Significant developments

May 2012: Amending 2012 State Budget

The 2012 State Budget Law, approved by Law No. 64-B/2011, dated 30 December, was amended following the publication of Law No. 20/2012, published in the Official Gazette of 14 May 2012. The following changes are relevant.

Property taxes

Rates

The aggravated rate of 7.5% of annual property tax (IMI) applicable in case of real estate owned by entities resident in blacklisted jurisdictions applies only to corporations; it is no longer applicable in case of ownership by individuals resident in blacklisted jurisdictions, which will now be subject to the standard rates (between 0.3% to 0.8%). The new rule applies to property tax due in 2012, assessed in 2011.

The aggravated rate of 10% of property transfer tax (IMT) applicable in case of real estate owned by entities resident in blacklisted jurisdictions applies only to corporations; it is no longer applicable in case of ownership by individuals resident in blacklisted jurisdictions, which will now be subject to the standard rates (5% for rural real estate and 6.5% for urban real estate and land for construction).

Tax benefits

The exemption from annual property tax (IMI) applicable to entities licensed to operate within the Madeira International Business Center does not apply in case of entities engaged in financial brokerage and insurance, including auxiliary entities related with such activities, as well as entities providing 'intra-group services' (coordination, treasury, and distribution centres).

Tax administration

It is mandatory that payments above 1,000 euros (EUR) (previously EUR 9,700) are made by a means that allows the identification of the recipient of the income (e.g. bank transfer, nominative cheque, or direct debit).

January 2012: 2012 State Budget Law

The 2012 State Budget Law was published in the Official Gazette of 30 December 2011. Law No. 64-B/2011 is effective as of 1 January 2012.

Corporate income tax (CIT)

Rates

CIT will now be levied at the single rate of 25%, as the 12.5% rate, previously applicable to taxable profits equal or below EUR 12,500, has been revoked.

The CIT applicable to entities with their head office in the Autonomous Region of Madeira (but not licensed to operate in the Madeira International Business Centre) is harmonised with the CIT rate levied in Portugal mainland, increasing from 20% to 25%. The reduced 10% CIT rate applicable in the Autonomous Region of Madeira to taxable profits equal to or below EUR 12,500 has also been revoked.

Withholding tax (WHT) rates

A new 30% WHT rate is applicable to capital income paid or made available to non-resident entities without a permanent establishment (PE) in Portugal that are resident in a country, territory, or region subject to a more favourable tax regime.

Information technology (IT) equipment

Impairment losses resulting from the write-off in 2012 of invoicing software and computer equipment, which is to be replaced as a result of new requirements for software certification, are fully deductible for tax purposes without the need of approval by the tax authorities.

In addition, the acquisition of this type of equipment and software in 2012 may be totally tax deducted in the period.

The use of invoicing software and equipment previously certified by the tax authorities is now mandatory.

Deduction of tax losses

There is an extension from four to five years for the tax-loss carryforward period, which applies to tax losses assessed in tax years starting on or after 1 January 2012.

It is no longer possible to fully offset the total amount of taxable profit with tax losses from prior years, as the deduction is capped at 75% of the taxable profit assessed in the relevant tax year. This limitation is applicable as of 2012 and applies to tax losses generated in tax years prior to 2012.

Payments to non-residents subject to a more favourable tax regime

Payments made or due, indirectly, to non-resident entities subject to a more favourable tax regime, when the taxable person has or should have had knowledge of the final purpose given to such payments, will be non-deductible for tax purposes, except if the taxpayer demonstrates that such charges relate to genuine transactions and are not of an abnormal or exaggerated amount. Such knowledge is presumed whenever there are special relations between the taxpayer and the entities subject to the more favourable tax regime or between the taxpayer and the legal representative, fiduciary, or intermediary.

Attribution of profits to non-residents entities subject to a more favourable tax regime (controlled foreign companies or CFCs)

CFC rules are also applicable whenever the profits or income resulting from an indirect holding is achieved through a legal representative, fiduciary, or intermediary. Nevertheless, the CFC regime shall no longer be applicable to entities resident in the European Union (EU) or in the European Economic Area (EEA) when the incorporation

Portugal

and functioning of such controlled entities has valid economic reasons and the entity develops agricultural, commercial, industrial, or services activities.

Additionally, the tax credit for international double taxation not used due to insufficient tax due may no longer be carried forward to subsequent tax periods.

Group taxation

The parent company will be responsible for demonstrating that the requirements for the application of the group taxation regime are fulfilled.

It has been clarified that in case the special tax regime for group taxation applies, the municipal surcharge should be individually computed by each of the companies included in the group, as it has been the opinion of the tax authorities, and not at the level of the group's taxable income.

Autonomous taxation rates

The application of the increased autonomous taxation rate on undocumented expenses (of 70%) is extended to entities with income subject to tax on gambling.

The rate of autonomous taxation on profits distributed to entities wholly or partially exempt from CIT, when the shareholding has not been held for a minimum period of one year has been increased from 20% to 25%.

State surcharge (Derrama Estadual)

The state surcharge is aggravated through the introduction of two taxation brackets: the first, with a 3% rate, applicable to taxable profits between EUR 1.5 million and EUR 10 million, and a second bracket, with a 5% rate, applicable to taxable profits exceeding EUR 10 million.

The rules for calculating the additional payments on account were revised accordingly. A rate of 2.5% is applicable to the taxable profits between EUR 1.5 million and EUR 10 million and a 4.5% rate is applicable to taxable profit above EUR 10 million, with reference to the previous tax year.

The new rules on the calculation of the state surcharge and additional payments on account are applicable to fiscal years 2012 and 2013.

Tax representation of non-resident entities

The appointment of a tax representative for non-resident entities without a PE in Portugal that obtain income derived from Portugal is not mandatory whenever the entity is resident in the EU or in the EEA.

Value-added tax (VAT)

Restructuring of reduced and intermediate rates

Several goods formerly subject to the reduced rate (6%) and intermediate rate (13%) are now subject to the standard VAT rate (23%).

VAT rates in Madeira

Effective as of 1 April 2012, the VAT rates in the Autonomous Region of Madeira have been increased to 22% (standard rate), 12% (intermediate rate), and 5% (reduced rate).

VAT-able amount of operations between related parties

A new anti-avoidance rule is introduced that ensures that, in respect of the supply of goods or services involving related parties, the taxable amount is the open market value.

The rule applies regardless of whether the purchasers or recipients are taxable persons or not.

The open market value may not be applied if the taxpayer proves that the price derives from circumstances other than the existence of special relations.

Sales of goods to national exporters

New conditions on the VAT exemption regime on sales to national exporters were introduced in order to simplify its application and increase the control of the application of the VAT exemption. Export certificates will be issued by electronic means.

Micro entities

Taxable persons that may benefit from the accounting standard for micro entities are relieved from filing the annual tax and accounting information declaration.

Excise duties

Excise duty on electricity

An excise duty on the consumption of electricity has been introduced, which is due at the time of:

- supply to the end-consumers
- self-consumption, or
- acquisition from end-consumers in organised markets.

Taxable persons (i.e. entities responsible for charging and paying the excise duty to the state) are retailers and producers who sell electricity directly to end-consumers, self-producers, and consumers who purchase electricity from organised markets.

The rate, set by Ruling No. 320-D/2011 of 30 December 2011, is EUR 1/MWh.

The supply of electricity is exempt if used:

- to produce or maintain the productive capacity for electricity
- for transport of passengers and goods by rail, metro or tram, and trolley bus, or
- by economically vulnerable end-consumers who benefit from the social tariff.

Other excise duties

The maximum tax rates of excise duties have been significantly increased, namely by 4.6% on spirit drinks, 17.9% on petrol, 16.9% on methane and petrol gases, and 53.8% on heating diesel.

Property taxes

Real estate acquired by entities resident in black-listed jurisdictions

There has been an increase of 2% (from 8% to 10%) in the property transfer tax (*Imposto Municipal sobre as Transmissões Onerosas de Imóveis* or IMT) rate for real estate acquired by entities resident in a black-listed jurisdiction.

Portugal

Forfeiture of benefits

Having been assigned benefits with a forfeiture term, the statute of limitations term for IMT is now counted only from the date on which the benefits expired.

Changes in the property tax (Imposto Municipal sobre Imóveis or IMI) rate

Both the minimum and maximum rates for urban real estate are increased by 0.1%, rising to 0.5% and 0.8% for real estate not yet valued according to the rules of the new code and 0.3% and 0.5% in case of urban real estate already valued according to the same rules.

Extension of the exemption from property taxes in Areas of Business Location (Áreas de Localização Empresarial or ALE)

The exemption from IMT and IMI on buildings acquired or completed in ALE has been extended until 31 December 2012.

The exemption from IMI is applicable for a period of ten years.

Vacant real estate

IMI rates are now increased three times when the urban real estate is vacant for a period of over one year.

Real estate owned by entities resident in black-listed jurisdictions

Real estate held by entities that have fiscal domicile in countries, territories, or regions subject to more favourable tax regime are subject to IMI at 7.5% (formerly 5%).

Real estate taxable value (VPT) regular updating

The taxable value of real estate used for commercial, industrial, and service purposes is now updated annually (previously on a triennial basis), based on the coefficients of currency devaluation.

Remaining urban real estate continues to be updated on a triennial basis, based on 75% of the coefficients of currency devaluation.

Tax benefits

Tax regime of holding companies (Sociedade Gestora de Participações Sociais or SGPS)

The tax regime of SGPS will remain unchanged and in force, including the exemption from taxation on capital gains.

Capital gains realised by non-residents

The exemption from CIT on capital gains realised on the transfer of shares, other securities, autonomous warrants, and derivatives does not apply in cases where the non-resident is domiciled in a black-listed jurisdiction.

Tax regime for investment support (Regime Fiscal de Apoio Ao Investimento or RFAI)

The RFAI has been extended until 31 December 2012.

Madeira International Business Centre (MIBC)

The tax benefits granted to shareholders of entities licensed in the MIBC, namely the exemption from CIT on dividends paid and interest on shareholders loans were revoked.

As of 1 January 2012, dividends and interest paid by MIBC entities to their shareholders are subject to a WHT rate of 25% (or 30% for black-listed entities).

For all MIBC entities with a licence issued between 1 January 2007 and 31 December 2013, the exemptions previously granted remain in force, namely exemptions from stamp duty and from WHT on interest (except interest on shareholders loans, as above); royalties; technical assistance; information provided and related with an experience in the industrial, commercial, and scientific sector; and services paid to non-resident entities, provided that these are related to the activity of the MIBC licensed entity.

Foreign pension funds - CIT exemption

As per the procedure set by the European Commission against Portugal (Case C-493/09, income obtained by pension funds established in another EU country or in an EEA member state (bound to administrative cooperation on tax matters) will be exempt from CIT. Foreign pension funds should cumulatively fulfil the following requirements:

- Exclusively assure the payment of retirement pensions granted from elderly, handicapped, surviving, pre-retired, health, and post-employment benefits, as well as death benefits when complementary and ancillary to the previously mentioned.
- Are managed by pension funds professional institutions to which Directive 2003/41/EC, of the European Parliament and Council, dated 3 June 2003, applies.
- Are the effective beneficiaries of the income.
- In the case of dividend distributions, the related shareholding should have been held for a consecutive one-year period.

Furthermore, proof should be made available to the entity responsible for the WHT, before the date on which income is made available, that all the necessary requirements are verified. These requirements should be certified by a statement to be issued, confirmed, and authenticated by the member state regulatory authorities.

Tax regime applicable to external loans

The CIT exemption applicable on interest derived from ‘*Schuldscheindarlehen*’ loan agreements signed by the Public Treasury Institute (IGCP), on behalf of the Portuguese Republic, provided the creditor is not resident in Portugal and has no PE herein to which the loan can be allocated to, is extended to 2012. The tax exemption depends on the verification by IGCP of the established requirements.

Special tax regime applicable to debt securities issued by non-resident entities

A CIT exemption on income from debt securities representing public and non-public debt issued by non-residents is maintained.

The exemption applies provided the income is considered to be obtained in the Portuguese territory under Portuguese tax rules and paid by the Portuguese state as a guarantor of the obligations undertaken by the entities in which it owns participation together with other EU member states.

This exemption applies to effective beneficiaries that fulfil the requirements stated in the legal diploma of the debt securities regime.

Repo operations

The CIT exemption on gains obtained by non-resident financial institutions on securities’ repo operations, undertaken with resident credit institutions, is maintained. The exemption applies, provided such gains are not attributable to Portuguese PEs of non-resident financial institutions.

Portugal

Inland region investment

Inland region tax benefits have been revoked. These tax benefits established reduced CIT rates (10% and 15%), IMT exemption, additional deductions of costs, and extension of the period to carry forward tax losses, among others.

Tax administration

Increase of tax penalties

The general limits for tax penalties for companies have been increased by 50%, meaning new maximums of EUR 165,000 in the case of *dolus* and EUR 45,000 in the case of negligence.

There are new specific tax penalties regarding transfer pricing documentation and the CFC regime (between EUR 1,000 and EUR 20,000 for companies) and regarding omissions or inaccuracies regarding ruling requests (between EUR 750 and EUR 45,000 for companies in the case of urgent rulings or 25% of the previous amounts in the case of non-urgent rulings).

Fiscal crimes

Prison sentences for individual taxpayers have been increased in the case of qualified fraud above EUR 200,000 (from five to eight years), which may lead to serving effective jail time. Maximum fines for corporate taxpayers have been doubled, in case of qualified customs crimes. In addition, an (illegal) activity that leads to an economic tax gain above EUR 50,000 is considered as qualified fraud.

Late payment interest

The maximum three-year term for late payment interest is revoked, and such interest is due until the actual payment of the tax debt. The late interest payment rate is doubled (to around 14%) in cases where the taxpayer does not comply with a court decision.

Increase of statute of limitations

The statute of limitations, foreseen in the General Tax Law, has increased from four years to 12 years in the case of facts related to deposit and securities accounts in financial institutions outside the European Union, the existence and identification of which is not mentioned by taxpayers in the CIT return of the respective year.

The time limit for tax corrections involving black-listed jurisdictions has been raised to 12 years (the general term is four years) and the limit for tax collections to 15 years (the general term is eight years).

Anti-avoidance rules

The exceptional three-year term to initiate the procedure has been revoked, thereby applying the general term. The introduction of this procedure, now explicitly restricted to situations where it is applied to anti-avoidance rules, is more flexible in terms of proof by the tax authorities.

Anti-avoidance rules are not applicable in cases where a request for obtaining binding information is not answered by the tax authorities within 150 days.

Binding rulings

Regarding urgent binding rulings, the response terms by the tax authorities have been extended to 30 days (from 15 days) to accept an urgent binding ruling request and to 120 days (from 60 days) to provide the taxpayer with a binding position.

In addition, the underlying tax facts do not need to be previous to the request any longer. As to fees, the maximum amount is increased from EUR 10,200 to EUR 25,500. In the case of non-urgent rulings, the response term is extended from 90 days to 150 days.

Tax amnesty (RERT III)

The Budget foresees the introduction of a new tax amnesty, incentivising the declaration of assets that are located abroad, until 31 December 2010, and determining the payment of a flat rate of 7.5% on the corresponding values for which the actual repatriation is no longer necessary.

The term for the tax amnesty is 30 June 2012. This regime grants the exoneration of the responsibility for fiscal infractions and, within the relevant assets, includes shareholdings and other securities. In the absence of the declaration, as well as in case of omissions and inaccuracies, the tax due is subject to an increase of 60%, instead of 50%.

Tax arbitration

The Decree-Ruling, issued jointly by the Minister of Finance and the Minister of Justice, that binds the tax authorities to the tax arbitration will also establish both the type and maximum amount of the tax conflicts that can be analysed under a tax arbitration court.

These limits have already been established by Decree-Ruling No. 122-A/2011, dated 22 March.

Increase from eight days to 20 days of the deadline for the tax authorities to amend the act, before the settlement of the tax arbitration court.

The assessment of the tax is no longer suspended in case an issue related with the taxable income is being analysed by the tax arbitration court.

Taxes on corporate income

Resident companies in Portugal are taxed on their worldwide income. Tax is also applicable to Portugal-source income attributable to a PE of a non-resident company in Portugal. Special WHT rates apply to income generated in Portugal that is attributable to non-residents without a PE in Portugal (*see the Withholding taxes section for more information*).

From 1 January 2012 onwards, CIT income brackets were eliminated, and a flat rate of 25% applies on the global amount of taxable income realised by companies resident for tax purposes in Portugal mainland or in the Autonomous Region of Madeira (also applicable to Portuguese PEs of foreign entities).

Entities that do not carry out a commercial, industrial, or agricultural activity as their main activity are subject to a 21.5% CIT rate on the global amount of their taxable income.

A lower CIT rate of 17.5% applies to companies that are tax resident in the Autonomous Region of Azores, including PEs of foreign entities registered therein.

Portugal

Surtaxes

The following surtaxes may also apply:

- A local surtax (*Derrama*) of up to 1.5% of taxable income, prior to the deduction of any available carryforward tax losses, is levied in certain municipalities. The local surcharge is assessed and paid when filing the CIT return.
- A state surtax (*Derrama Estadual*) applies at the following rates:
 - 3% applicable to the taxable profit exceeding EUR 1.5 million up to EUR 10 million, prior to the deduction of any available carryforward tax losses.
 - 5% applicable to the taxable profit exceeding EUR 10 million.

The state surtax is levied on resident taxpayers carrying on commercial, industrial, or agricultural activity and by non-residents with a PE in Portugal, and it is expected to apply in the 2012 and 2013 tax years. The state surtax is paid in three instalments.

Autonomous taxation

The following autonomous taxation, self-assessed with CIT, applies at the rates provided:

- Representation and entertainment expenses: 10%.
- Company car expenses: 10%.
- Mileage allowance: 5%.
- *Per diem* allowance: 5%.
- Non-documented payments: 50% (70% for partially or fully exempted taxpayers).
- Company car expenses for which acquisition cost exceeds certain limits as established in the law: 20%.
- Dividends distributed to wholly or partially exempt taxpayers regarding participations held for less than one year: 25%.
- The total amount of the expenses incurred with any compensation paid as a result of the termination of functions of managers or board members, if not related to the productivity targets previously established under the existing labour relation; or the amount that exceeds the remuneration that would be received by the manager or the board member until the term of the labour agreement, in case of redundancy prior to that term; or in all cases, if the liability for the payment is shifted to another entity: 35%.
- The total amount of the expenses incurred with bonuses paid to managers or board members if the respective amount corresponds to more than 25% of the annual salary and exceeds EUR 27,500: 35%.

All the above-mentioned rates of autonomous taxation are increased by 10% if the taxpayer has tax losses in the same tax year.

Corporate residence

A resident company is one whose head office or effective management is located in Portugal.

Permanent establishment (PE)

Under Portuguese tax law, any fixed place of business in Portugal through which the business of an enterprise is wholly or partly carried on is deemed to constitute a PE in Portugal.

A fixed place of business comprises, among others, a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, and also building site or a construction or installation project if it lasts more than six months (time period may differ considering the applicable tax treaty).

A PE may also be deemed to exist in case of a person (a dependent agent), which is not an independent agent, acting, in the Portuguese territory on behalf of a company, with powers to intermediate and conclude binding contracts for that company, within the scope of its business activity.

No PE should exist where a fixed place of business in Portugal is used solely for carrying out ancillary or preparatory activities, or, in case a company, carries out its activities in Portugal through a broker, general commission agent, or other agent of an independent status, acting in the normal course of its business, bearing all related business risks.

Additionally, the term PE shall be deemed not to include the following actions:

- Use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display, or delivery.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise.
- Maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise.
- Maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character.
- Maintenance of a fixed place of business solely for any combination of activities mentioned above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

Portuguese VAT is applicable at the standard rate of 23% (22% in the Autonomous Region of Madeira; 16% in the Autonomous Region of the Azores), at an intermediate rate of 13% (12% in Madeira; 9% in the Azores), and at a reduced rate of 6% (5% in Madeira; 4% in the Azores).

Following a revision of the respective reduced rates lists, several goods and services that in 2011 were subject to the reduced or intermediate VAT rates are now subject to the standard VAT rate, namely gyms, flowers and ornamental plants, as well as some legal services.

Restaurant services, basic canned foods, fruit jellies, fats, honey, coffee, natural water, fruit juices, decorative flowers, petroleum for heating and marked diesel fuel for agriculture and fishing activities, and certain ecological equipment are subject to the intermediate VAT rate of 13%. Basic food, some pharmaceutical products, milk products, and certain services are subject to the reduced VAT rate of 6%. Exports and intra-EU supplies of goods are zero-rated.

Portugal

There are two general rules for defining the deemed place of supply of services. The general rule for taxation of business-to-business (B2B) services is the place where the customer is established or has a PE, has a permanent address, or usually resides. For business-to-consumer (B2C) services, the general rule remains the place where the supplier is established. The place of supply of organisations of cultural, artistic, sporting, scientific, educational, entertainment, or similar events is determined according to the general rule; on 1 January 2013 and 1 January 2015, additional adjustments to the VAT rules will become effective.

The existing proceeding for obtaining a VAT refund in another EU member state other than the member state of establishment has been replaced by a new electronic proceeding, with a four month average payment term.

Customs duties

Custom duties are regulated by the Community Customs Code. Therefore, the rules foreseen for the import and export of goods in Portugal are similar to the rules applicable in other EU member states.

The custom duties' rates applied in Portugal vary according to the origin of the goods. There are several origin agreements which exempt from custom duties the importation of goods from certain countries or that determine reduced rates.

Excise duties

There are different types of excise duties, such as:

- petroleum and energy products tax
- alcohol and alcoholic beverages tax
- tobacco tax, and
- vehicle tax.

The tax applicable to petroleum and energetic products depends on the goods supplied, namely it varies between EUR 650 per 1,000 litres for leaded petrol and EUR 2.78 per gigajoule for natural gas used as fuel.

The tax applicable to alcohol and alcoholic beverages also depends on the type of good supplied, varying between EUR 7.11 per hectolitre for a certain type of beer and EUR 1,031.57 per hectolitre for spirits.

The tax applicable to tobacco also varies in accordance with the type of product supplied, namely it varies between 60% of the sale price for fine-cut tobacco for the rolling of cigarettes and 13% of the sale price for cigars and cigarillos.

The tax applicable to vehicles varies in accordance with the type of vehicle, the fuel used, and the cylinder of the vehicle. The higher taxation is applicable for cars used for the transport of passengers using petrol as fuel and the lower taxation is applicable for motorcycles.

An excise duty on consumption of electricity applies as of 1 January 2012, at a rate varying between 0 and EUR 1 per MWh due by producers, traders, self-producers, and consumers that buy electricity in organised markets.

Furthermore, the introduction in consumption of the products subject to excise duties is simplified, considering that the arrival of these goods from other EU member states is supported through an electronic document (e-DA).

The e-DA may also be issued by Portuguese entities to export the above goods and certify winery products. It is also possible to change or cancel an electronic document received.

Property tax (*Imposto Municipal sobre Imóveis or IMI*)

IMI is a municipal property tax upon which the taxable basis is calculated by reference to a formula based on objective criteria, such as the construction cost per square meter, area, age, construction quality, and comfort indexes.

Following the Memorandum of Understanding between the Portuguese Republic and the European Commission, the European Central Bank, and the IMF, which covers the financial assistance to be granted to Portugal by the European Fund for Financial Stability, reassessments of the tax value of real estate are expected in 2012 (increase to close the market value).

IMI is levied at the following rates, in addition to corporate or individual tax assessed on actual income generated by real estate:

Property type	IMI (%)
Urban real estate	0.5 to 0.8
Urban real estate (valued under the new rules)	0.3 to 0.5
Rural real estate	0.8

Note that the tax rate of IMI on properties owned by entities resident for tax purposes in a black-listed territory is 7.5% as of 2012 (previously 5%). This rule does not apply where the owner is an individual.

The list of countries, territories, and regions that provide a more favourable tax regime is presented below:

- Andorra (1)
- Anguilla (1)
- Antigua and Barbuda (1)
- Netherlands Antilles
- Aruba
- Ascension Island
- Bahamas
- Bahrain
- Barbados
- Belize (1)
- Bermuda (1)
- Bolívia
- Brunei
- Cayman Islands (1)
- Channel Islands (1, 2)
- Cocos (Keeling)
- Cook Islands
- Costa Rica
- Djibouti
- Dominica (1)
- Falkland Islands or Malvinas
- Fiji Islands
- Gambia
- Grenada
- Gibraltar (1)
- Guam
- Guyana
- Honduras
- Hong Kong
- Jamaica
- Jordan
- Queshm Island
- Kiribati
- Kuwait
- Labuan
- Lebanon
- Liberia (1)
- Liechtenstein
- The Maldives
- Isle of Man (1)
- Marianas
- Marshall Islands
- Mauritius
- Monaco
- Montserrat
- Nauru
- Christmas Island
- Niue Island
- Norfolk Island
- Sultanate of Oman
- Pacific Islands (3)
- Palau Islands
- Panama
- Pitcairn Island
- French Polynesia
- Porto Rico
- Qatar
- Solomon Islands
- American Samoa
- Western Samoa
- Saint Helena
- Saint Lucia (1)
- Saint Kitts and Nevis (1)
- San Marino
- Saint Pierre and Miquelon
- St Vicente and the Grenadines
- Seychelles
- Swaziland
- Svalbard (4)
- Tokelau
- Kingdom of Tonga
- Trinidad and Tobago

Portugal

- Tristan da Cunha
- Turks and Caicos (1)
- Tuvalu
- United Arab Emirates
- Uruguay
- Vanuatu
- British Virgin Islands (1)
- United States Virgin Islands
- Yemen Arab Republic

Notes

1. The Portuguese authorities have signed tax information exchange agreements (TIEAs) with these jurisdictions (in case of the Channel Islands, only with Guernsey and Jersey). The following TIEAs are in force: Andorra, Bermuda, Cayman Islands, Gibraltar, Jersey, Isle of Man, and Saint Lucia.
2. Alderney, Guernsey, Jersey, Great Stark, Herm, Little Sark, Brechou, Jethou, and Lihou.
3. Not included in the remaining numbers.

IMI rates are increased three times when the urban real estate is vacant for a period of over one year.

Property transfer tax (*Imposto Municipal sobre as Transmissões Onerosas de Imóveis or IMT*)

IMT is a municipal tax payable in Portugal on the onerous transfer of local real estate. The tax is levied on the purchaser, and the taxable basis is the same as for IMI or the price agreed upon by the contracting parties, whichever is higher.

The IMT rates are set at 5% for rural real estate and 6.5% for urban real estate and land for construction. For non-residents located in black-listed jurisdictions, the rate is 10%. This rule does not apply where the acquirer is an individual.

Stamp duty

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis. Important examples include the following:

Item	Stamp duty (%)
Loans (on the principal)	
With determined term, over one year	0.5 to 0.6
Current account/overdraft/credit with undetermined term or determined term under one year	0.04 per month or fraction
Credit to consumers	
With a term up to one year/current account, overdraft, or other form of credit with undetermined term	0.07 per month or fraction
With a term equal to or higher than one year	0.9
With a term equal to or higher than five years	1
Guarantees *	
Undetermined/five or more years	0.6
Over one year	0.5
Under one year or with undetermined term	0.04 per month or fraction
Bank interest and fees	4
Insurance premiums	3 to 9
Real estate purchases and sales	0.8
Donations and inheritances	10
Sale of business as a going concern	5

* Guarantees provided in favour of the state or social security institutions upon the payment of debt by instalments under enforcement procedures or relating to the recovery of tax and social security credits are exempt from stamp duty in 2012.

Branch income

Branch profits are taxed on the same basis as corporate profits. Income remitted by a branch to the head office is not subject to taxation.

Income determination

Taxable profit is based on accounting income adjusted according to specific provisions of the tax legislation, when applicable.

Inventory valuation

Inventories are valued at the lower of the following values: cost or net realisable value. The first in first out (FIFO) and average-cost methods of valuation are accepted. The last in first out (LIFO) method is not allowed.

Inventory adjustments are deductible for tax purposes on the amount accounted for in the tax year, capped at the difference between the acquisition or production value and, if lower, the net realisable value (duly documented) with reference to the balance sheet.

Capital gains

The positive net difference between capital gains and capital losses arising from the disposal of fixed assets or shares, held for more than one year, is taxed as part of normal income.

Capital gains and capital losses are determined by the difference between the sales proceeds, deducting any related cost, and the acquisition value, deducting impairment losses and tax deductible depreciation or amortisation, adjusted by the inflation index (in the case of at least two years of ownership).

Only half the amount of the negative difference between capital gains and capital losses arising from the disposal of shares or other negative net worth variations related to participations or other parts of the equity of a company, such as supplementary capital contributions, are considered for purposes of assessing the taxable income.

In certain circumstances, only 50% of the net gains on disposal of tangible fixed assets or shares are taxed, provided the sales proceeds are reinvested.

Capital losses regarding shares owned for less than three years when acquired from related companies, from black-listed entities, or from Portuguese companies subject to a special tax regime are not deductible. Capital losses are also not tax deductible if the shares are transferred to related parties to black-listed entities or to Portuguese resident entities subject to a more favourable tax regime.

Capital gains/losses realised by holding companies (*Sociedade Gestora de Participações Sociais* or SGPS) are not taxed/deductible, if the underlying shares have been held for more than one year (or three years if the shares were acquired from related parties, offshore companies, or Portuguese resident entities subject to a special tax regime).

Portugal

Dividend income

For Portuguese-resident companies holding shares in other Portuguese companies, or in companies resident in Portuguese African speaking countries, or in companies resident in the EU or the EEA (meeting the EU Parent/Subsidiary Directive 90/435/CEE), 100% of the dividends distributed are excluded from the taxable income. In case of Portuguese, EU, and EEA subsidiaries, the shares should represent at least 10% of total capital and have been held for at least one year (this minimum holding period should be met before or after distribution).

This also applies to regional development corporations (*Sociedades de desenvolvimento regional*), investment companies, securities dealers, and insurance companies (where technical reserves are concerned).

The deduction of the dividends when distributed by Portuguese, EU, or EEA subsidiaries only applies if the underlying income has been subject to 'effective taxation'. According to the Portuguese tax authorities, following Tax Circular 24/2011 released in November 2011, it is considered that profits have been subject to 'effective taxation' when they:

- have been subject to Portuguese CIT or to a comparable tax (no minimum amount of tax effectively paid is required)
- have been taxed at the level of the immediate subsidiary distributing the profits, or at any other lower tier of the corporate structure, or
- refer to profits distributed by a EU or EEA subsidiary, which are subject and not exempt from CIT.

The burden of proof lies with the Portuguese parent company (recipient of the dividends), which should be able to demonstrate that the profits received derive from income that has been effectively subject to taxation.

Foreign income

A Portuguese company is taxed on all its foreign income. Taxes paid abroad can be offset against corresponding Portuguese tax (*see Foreign tax credit in the Tax credits and incentives section for more information*).

There are no provisions concerning tax deferral of income earned abroad.

Deductions

Depreciation, amortisation, and depletion

The qualifying cost of an asset for tax purposes is the acquisition or production cost.

Depreciation must be computed by using the straight-line method or the declining-balance method. The latter cannot be applied to buildings, passenger vehicles, furniture, social welfare equipment, or second-hand assets. Straight-line rates of depreciation are normally consistent with rates privately used by business and industry and are increased, for the purposes of applying the declining-balance method, by coefficients of:

- 1.5 if assets have a useful life of less than five years.
- 2 if useful life is five or six years.
- 2.5 for useful lives in excess of six years.

Different depreciation methods may be applied without previous approval from the tax authorities (annual depreciation cannot, however, exceed the depreciation resulting from using either the straight-line or declining-balance methods).

Some examples relating to the maximum straight-line depreciation rate are as follows:

Type of asset	Depreciation rate (%)
Office building	2
Industrial building	5
Electronic equipment	20
Computers	33.33
Ordinary tool and paintings	25
Engines and machine tools	12.5
Office equipment	20
Furniture	12.5
Software	33.33
Light passenger vehicles	25

Rates can be reduced by 50% in any one year at the taxpayer's option. If the reduction is more than 50%, the difference is allowed for tax purposes at a future date. Any depreciation in excess of the maximum allowed must be subsequently adjusted in the accounting records to be allowed for tax purposes in future years. A total of 60% of additional depreciation on revaluation of fixed assets, as permitted by law from time to time, is allowed for tax purposes.

Depreciation rates of tangible assets may be increased by 25% in the case of companies with a schedule of two shifts (for three shifts, 50%), given the faster deterioration of those assets.

Assets with an acquisition value lower than EUR 1,000 can be depreciated in the acquisition year, unless the assets are part of a set of elements that should be depreciated as a whole.

Depreciation of yachts and airplanes that are not essential for business activities is not allowed as a cost for tax purposes.

Depreciation of passenger cars and certain other vehicles on the part of their cost of acquisition that exceeds certain amounts (as defined by law), with reference to their acquisition value, is also disallowed as a cost for tax purposes. The following caps apply (i.e. disallowed cost above the values below):

- EUR 40,000 of acquisition cost, in the case of vehicles acquired until 31 December 2010.
- EUR 30,000 of acquisition cost, in the case of vehicles acquired from 1 January 2011 onwards.
- EUR 45,000 of acquisition cost, in the case of electric vehicles acquired from 1 January 2011 onwards.
- EUR 25,000 of acquisition cost, in the case of vehicles acquired from 1 January 2012 onwards.
- EUR 50,000 of acquisition cost, in the case of electric vehicles acquired from 1 January 2012 onwards.

Portugal

Development expenses, patents, trademarks, licenses, and similar rights may be amortised for tax purposes if acquired for a limited period of time.

Depreciation of non-consumable biological assets is tax deductible.

Expenses relating to assets generated internally are deductible for tax purposes in the tax year in which the cost is incurred.

Goodwill

Goodwill cannot be amortised for tax purposes (unless subject to an effective economic amortisation approved by the Portuguese tax authorities).

Organisational and start-up expenses

Start-up and research expenses are deductible for tax purposes in the respective tax year. Transitional adjustments of remaining start-up expenses incurred prior to the adoption of the new accounting system (*Sistema de Normalização Contabilística* or SNC) should be written off the balance sheet against equity and are deductible over a five-year period.

Interest on shareholder loans

If the rate applicable to interest and other compensation regarding loans provided by the shareholders to the company is higher than the Euro Interbank Offered Rate (EURIBOR) 12-month rate rounded up with a spread of 1.5% (at the date the loan was granted), the amount paid in excess is not tax deductible. This rule does not apply when the shareholder is a resident of a tax treaty country or when the interest rate is at arm's length under the transfer pricing provisions.

In the case of small and medium-sized companies, shareholders' loans with an interest rate of EURIBOR 12-month rate plus a spread up to 6% is tax deductible.

Bad debt

Impairment losses on doubtful debts are deductible for tax purposes when an insolvency or recovery has been requested or the credits have been claimed in court.

The annual amount of accumulated impairment losses on doubtful debts due for more than six months, with evidence that measures towards its perception were taken, is capped at the following percentages of the debts:

- More than 6 and less than 12 months: 25%.
- More than 12 and less than 18 months: 50%.
- More than 18 and less than 24 months: 75%.
- More than 24 months: 100%.

Amounts guaranteed by insurance or mortgage, or due or secured by the state, autonomous regions, or municipalities, or due by related parties (e.g. 10% shareholding) are not considered as doubtful debts, and the respective impairment loss is disallowed for tax purposes.

The ageing of bills of exchange is calculated from the date when the respective payment is due.

Uncollectable debts are allowed as tax deductible costs if supported under insolvency, recovery enforcement, or in an out-of-court conciliation procedure for the viability of insolvent companies or companies in difficult economic situation (mediated by the

Institute for the Support of Small and Medium-Sized Enterprises or IAPMEI). This rule applies to the amount of the uncollectable debts which were not deducted for tax purposes as impairment losses (or for which the amount was insufficient).

Charitable contributions

Donations to authorised charitable institutions are allowable up to 0.8% of turnover, with the possibility of the cost being raised up to 150%. Donations to authorised cultural institutions are allowable up to 0.6% of turnover, with the possibility of the cost being raised up to 130%.

Donations to the state, municipalities, and foundations where the state or municipalities participate in the initial capital are fully deductible, with the possibility of the cost being raised up to 140%. Special application may be made by certain entities in order to be included under the referred regime.

Donations of computers, software equipment, training, and consultancy in the area of computers granted to the state, municipalities, foundations, museums as well as to authorised charitable and cultural institutions are allowable up to 0.8% of turnover, with the possibility of the cost being raised up to 140%.

Vacation accrual

Vacation allowance is tax deductible in the year in which the benefit accrues, regardless of the year in which payment is made.

Pension expenses

Pension, invalidity, and health schemes are tax deductible up to a rate of 15% of annual staff expenses, provided they are available to all employees and the management and disposition of the benefits are outside the control of the taxpayer, such as under an insured scheme with vested benefits.

A specific regime applies for deduction of the additional (mandatory) contributions made to pension funds by insurance companies as a result of the adoption of the new accounting system (SNC). These contributions are not considered for purposes of computing the maximum annual amount accepted as a cost, but are considered as a cost in accordance with an annual instalment plan, during a term of five years that began in 2008.

Taxes

All taxes other than CIT, state surtax, and municipal surtax constitute a normal business expense.

Other significant items

The costs borne from the acquisition of social passes are regarded as tax-deductible costs to the extent the employer attributes them on a general basis.

Uninsured losses, including indemnities to third parties, are disallowed unless the risk could not be insured.

Non-documented expenses are not tax deductible and are subject to a 50% tax surcharge for fully taxable entities.

In the course of 2012, exceptional write-off arising from the replacement of invoicing programs or equipments, replaced due to software certification requirements, are

Portugal

considered as impairment losses, without the need of obtaining an approval by the tax authorities.

In the course of 2012, expenses on the acquisition of certified invoicing programs and hardware will be accepted as a cost for tax purposes in the relevant fiscal year.

Net operating losses

Tax losses generated prior to 2012 can be carried forward for four years (six years in the case of tax losses generated prior to 2010).

Tax losses generated from 2012 onwards can be carried forward for five years. As of the tax year of 2012, the deduction of tax losses carried forward (even in case of tax losses generated before 2012) will be limited to 75% of the taxable profit assessed in the relevant fiscal year. The unrelieved tax losses can be carried forward for the respective carryforward period (six years, four years, or five years, depending on whether the tax losses were generated respectively before 2010, in 2010 and 2011, or from 2012 onwards).

Carryback of losses is not allowed. The tax losses carried forward are lost if one of the following situations occurs:

- Change in direct ownership of the company of at least 50% shareholding or voting rights.
- Change in the scope of the business as stated in the articles of association or, regardless of any formal change, if the nature of the activity carried out by the company is substantially modified.

In special cases of economical merits, the Ministry of Finance may authorise the use of tax losses upon a request filed by the taxpayer before those changes occur.

Payments to foreign affiliates

A Portuguese corporation is allowed to deduct royalties, interest, and other costs paid to foreign affiliates, provided the amounts are at arm's length. Service fees paid are allowed if there is adequate proof that the service was effectively rendered, has economic substance, and qualifies as indispensable for the generation of taxable revenue, as well as if the amount is at arm's length.

Payments to non-residents subject to a more favourable tax regime

Payments made or due, indirectly, to non-resident entities subject to a more favourable tax regime, when the taxable person has or should have had knowledge of the final purpose given to such payments, will be non-deductible for tax purposes, except if the taxpayer demonstrates that such charges relate to genuine transactions and are not of an abnormal or exaggerated amount. Such knowledge is presumed whenever there are special relations between the taxpayer and the entities subject to the more favourable tax regime or between the taxpayer and the legal representative, fiduciary, or intermediary.

Group taxation

Special regime for group taxation

Taxation under the special tax regime for groups or companies is available, upon the filing of a special form with the tax authorities, to companies with head office and effective management in Portugal.

The group taxation regime may apply, provided one of the companies, directly or indirectly, holds 90% or more of the statutory capital of the others and more than 50% of the voting rights. Tax grouping generally enables the group companies to offset losses incurred by one company against profits of another company.

Tax losses obtained prior to the beginning of the tax grouping can be carried forward only against the particular company's taxable income (*for the carryforward of tax losses regime, see Net operating losses in the Deductions section*).

To be taxed under this regime, the group companies must meet the following conditions:

- Must be tax resident in Portugal.
- Must be subject to the normal regime of taxation at the highest corporate tax rate.
- Must maintain a minimum holding participation of 90%.
- All companies must be held by the parent company for more than one year (excluding newly incorporated companies).
- Cannot be dormant for more than one year.
- Cannot be dissolved or insolvent.
- Cannot have tax losses in the three years prior to the regime application, unless the companies have been held by the parent company for more than two years.
- Cannot have a tax period different from that of the parent company.

Additionally, the parent company:

- should not be controlled by any other Portuguese-resident company that fulfils the requirements to be the parent company and
- should not have renounced to the application of this regime in the three previous years.

When the regime comes to an end or when one company ceases to qualify for this regime, the tax losses obtained during the regime cannot be carried forward and deducted against future individual taxable income of the companies.

The parent company is responsible for demonstrating that the requirements for the application of the group taxation regime are met.

Transfer pricing

The tax authorities are entitled to adjust taxable income if the taxpayer and another individual or entity, due to their special relationship, have established particular conditions which diverge from the conditions normally agreed upon between independent entities and distort the results that would arise if those relations were at arm's length. Portugal's transfer pricing legislation broadly follows the Organisation for Economic Cooperation and Development (OECD) guidelines.

Companies with sales and other profits higher than EUR 3 million are required to prepare transfer pricing documentation, which should be filed with the tax authorities if requested. Penalties arise from non-compliance with this obligation.

An advance pricing agreement (APA) mechanism has been introduced for taxpayers and Portuguese Tax Authorities (PTA) to establish agreements on a taxpayers' future transfer pricing policy. This aims to guarantee compliance with the arm's-length principle. This regime applies to transactions carried out with related parties and between a PE and the respective head office.

Portugal

The conclusion of an APA implies the payment of a charge calculated with reference to the taxpayers' turnover, capped at EUR 35,000. This charge is reduced by 50% in the case of a renewal or revision of an existing APA.

The assessment of an APA procedure takes 180 days for unilateral APAs, and 360 days for bilateral or multilateral APAs. This period is reduced to 100 business days for APAs concluded in connection with a relevant investment project in Portugal, as foreseen in the Tax Investment Code (*Código Fiscal do Investimento*).

For the PTA to confirm compliance of the transfer pricing method(s) with the terms and conditions set out in the APA, the taxpayer must prepare an annual report. The report must be made available to PTA before the last business day of May in the year following that in which the transactions took place (i.e. when the tax year corresponds to the calendar year). Failure to comply invalidates the APA.

Thin capitalisation

Where loans from non-EU-resident related parties exceed twice the parties' capital in the borrowing Portuguese entity, the interest on the excess borrowing is not tax deductible. This rule may not apply if the company (as long as it is not resident in a black-listed territory) proves under a safeguard clause, that takes into account the type of activity, the sector in which it operates, the dimensions, and other relevant criteria, that it would be possible to obtain the same loan on similar terms from an independent entity.

Controlled foreign companies (CFCs)

Profits derived by an affiliate resident in a black-listed offshore jurisdiction, or in a jurisdiction where it is subject to an effective tax rate equal to or lower than 60% of the Portuguese standard CIT rate, are imputed to the Portuguese shareholder, provided it holds, directly or indirectly, a minimum holding participation of 25% (10% if more than 50% of the capital is held by Portuguese shareholders). Upon distribution of the profits, a deduction is available for previously imputed income.

As of 2012, CFC rules also apply if the controlled company (*as defined above*) is held by a Portuguese entity through a legal representative, fiduciary, or intermediary.

CFC rules do not apply if the CFC is resident in another EU country or in an EEA member state (bound to administrative cooperation on tax matters), provided that there are valid economic reasons underlying the incorporation and running of such company and it carries out agricultural, commercial, industrial, or services activities.

Upon a dividend distribution by the CFC, the tax credit of the tax paid abroad, which is not used, cannot be carried forward to subsequent tax years.

Tax credits and incentives

Foreign tax credit

Taxes paid abroad can be offset against corresponding Portuguese tax capped at the lower of (i) the tax liability corresponding to the foreign income, net of costs directly or indirectly incurred, or (ii) the foreign tax paid. In both cases, it is limited to the foreign tax as foreseen in the applicable double-taxation treaty. No carryforward of foreign tax is allowed.

General tax benefits and incentives

Following the enactment of the 2012 State Budget, several tax benefits ceased to exist as a result of the implementation of the measures foreseen in the Memorandum of Understanding between the Portuguese Republic and the European Commission, the European Central Bank, and the IMF, which covers the financial assistance to be granted to Portugal by the European Fund for Financial Stability.

Contractual tax incentives

Relevant investment projects up to 2020 (minimum investment of EUR 5 million) that qualify for strategic economic interest and promote the creation of jobs are eligible for tax incentives, as foreseen in the Tax Benefits Code and the Investment Tax Code.

These are granted on a case-by-case basis under a government contract for a period not exceeding ten years and include a tax credit of 10% to 20% of the investment and exemptions or reductions from property transfer tax, property tax, and stamp duty.

Investment funds

Portfolio investment funds are taxable at the following final rates:

Portfolio investment fund activity	CIT rate (%)
Capital gains (net of capital losses) on shares held less than 12 months, realised by closed or mixed investment funds	21.5
Capital gains (net of capital losses) on shares held greater than 12 months, realised by open investment funds	21.5
Other income:	
Earned in Portugal	20/25
Earned abroad	20/25

Real estate investment funds are subject to corporate tax at the following rates:

Real estate investment fund activity	CIT rate (%)
Rents (net of expenses)	20
Real estate capital gains (net of capital losses)	12.5
Capital gains (net of capital losses) on shares held less than 12 months, realised by closed or mixed real estate investment funds	20
Capital gains (net of capital losses) on shares held greater than 12 months, realised by open real estate investment funds	0
Other income:	
Earned in Portugal	20/25
Earned abroad	20/25

Income paid by portfolio and real estate investment funds to individuals is not subject to taxation. Income paid to companies is taxed as normal income, and taxes paid by the fund are considered as payment on account against the final CIT due.

Funds of funds

Income paid by investment funds of funds is exempt from CIT. Other income is subject to the same taxation as investment funds. Income received by individuals is not subject to further taxation. Income received by companies is taxed at the standard CIT rate on 40% of the respective amount as normal income.

Portugal

Pension funds

Pension funds are exempt from CIT and IMT.

The CIT exemption, which was only applicable to pension funds incorporated under the Portuguese law, is extended from 1 January 2012 onwards to pension funds established in another EU country or in an EEA member state (bound to administrative cooperation on tax matters) that cumulatively fulfil the following requirements:

- Exclusively assure the payment of retirement pensions granted from elderly, handicapped, surviving, pre-retired, health, and post-employment benefits, as well as death benefits when complementary and ancillary to the previously mentioned.
- Are managed by pension funds professional institutions to which Directive 2003/41/EC, of the European Parliament and Council, dated 3 June 2003, applies.
- Are the effective beneficiaries of the income.
- In the case of dividend distributions, the related shareholding should have been held for a consecutive one-year period.

Contractors for North Atlantic Treaty Organization (NATO) infrastructures

Contractors for NATO infrastructures are exempt from CIT.

Net young employment creation

150% of the costs related to net increase job creation, under labour contracts without term, for employees up to 35 years (including) of age and for long-term unemployed individuals may be deducted from taxable income. For this purpose, the fixed remunerations paid and the contributions made by the employer to social security should be considered. The maximum amount of annual increase on deductible costs for each eligible employee is 14 times the national minimum retribution (EUR 485 in 2012).

The increase in 50% of the expenses incurred with the same employer is applicable to more than one employee provided that there are no special relations.

This tax benefit is not cumulative with any tax benefits or other incentives (e.g. social security) concerning the same employee.

This deduction applies for a period of five years for each employee.

Research and development (R&D) (*Sistema de Incentivos Fiscais em Investigação e Desenvolvimento Empresarial* or SIFIDE II)

Portuguese tax resident companies carrying out commercial, industrial, or agricultural activities, and non-resident companies with a PE in the Portuguese territory, are allowed to deduct from the CIT due, up to the respective amount, the value of eligible expenses incurred with R&D, in a double percentage as follows:

- Base rate: 32.5% of the R&D expenses incurred; this rate is increased by 10% in case of small and medium-sized companies that do not benefit from the incremental rate of 50% (applicable to entities that had completed two years of activity).
- Incremental rate: 50% of the difference between the R&D expenses made in the tax year and the average amount of the R&D expenses made in the previous two years, up to the limit of EUR 1.5 million.
- The incremental rate is increased to 70% and the deduction limit is increased to EUR 1.8 million with respect to expenses incurred with the employment of people with a doctorate degree.

Expenses that, due to insufficient tax due, cannot be deducted in the tax year they were incurred can be carried forward for six years.

Eligible expenses related to allowances paid to personnel directly involved with R&D tasks are capped at 55% of the operational expenses incurred.

The deductibility of eligible expenses related to allowances paid to personnel directly involved with R&D tasks is capped at 90% of the respective value, in the case of entities that are not small and/or medium-sized enterprises.

Expenses related to demonstrations are eligible for the SIFIDE II regime, provided they are notified up front.

Expenses incurred with the execution of R&D projects, and related with mandatory public contractual obligations, are no longer eligible.

Expenses incurred with the acquisition, registration, and maintenance of patents, essential for the performance of R&D activities and audits, will be accepted only for micro, small, or medium-sized companies. The deduction of R&D expenses requires that the entity develops agricultural, industrial, or commercial activities or services as its main business activity.

The applications should be submitted by the end of July of the year following the year in which the investment was made, and applications referring to years previous to that fiscal year will not be accepted. This rule is only applicable to fiscal years beginning on or after 1 January 2012. Applications concerning fiscal years prior to 2012 should be submitted until the end of July 2012.

Tax regime aimed at fostering investment (*Regime Fiscal de Apoio Ao Investimento* or RFAI)

The tax regime aimed at fostering investment, which establishes several tax incentives to investment realised within specific business sectors, will remain in force during 2012.

Among other incentives, companies will still benefit from a deduction against CIT otherwise payable (capped at 25% of the CIT due) of 20% (for qualified investments lower than EUR 5 million) or 10% (for qualified investments higher than EUR 5 million) of the qualified investment; from being able to carry forward any unused credit for four years; and from an exemption from property transfer tax, property tax (IMI), and stamp duty on the acquisition of real estate for investment purposes. The property transfer tax exemptions are subject to the approval of the municipality where the real estate is located and where the investment is made.

Dividends from entities resident in the Portuguese Speaking African countries (*Países Africanos de Língua Oficial Portuguesa* or PALOP) and in East Timor

The payment of dividends from entities resident in Portuguese Speaking African countries (Angola, Cape Verde, Guinea-Bissau, Mozambique, and São Tomé e Príncipe) and in East Timor, are not subject to CIT at the level of the Portuguese parent, provided that:

- The entity in Portugal is subject and not exempt to CIT.
- The entities in the PALOP and in East-Timor are subject to and not exempt from a corporate tax.

Portugal

- The entity in Portugal holds a direct participation in the share capital of the subsidiary of not less than 25% for at least two years.
- Dividends distributed have been taxed at a rate of at least 10% and do not arise from a determined type of income expressly mentioned in the law.

Loan interest and lease rentals on imported equipment

When paid by the state, regional authorities, and public services, loan interest and lease rentals on imported equipment can qualify for partial or full exemption from tax upon an appropriate application.

Real Estate Investment Fund for Residential Lease (REIFRL)

A regime is applicable: (i) both to REIFRL and to Real Estate Investment Companies for Residential Lease (REICRL) incorporated in accordance with the Portuguese law within a term of five years following the entering into force of the State Budget for 2009; and (ii) to the real estate properties acquired by those entities during that same term, i.e. from 1 January 2009 until 31 December 2014.

The incorporation of the REIFRL will be done in accordance with the provisions applicable to the Real Estate Investment Funds (REIFs) laid down in the Portuguese law. The REIFRL portfolio is required to be comprised of at least 75% real estate properties located in Portugal destined for the lease of permanent residences.

The following benefits are established for this tax regime:

- CIT exemption on income obtained by REIFRLs.
- CIT exemption for the income obtained by participation unit holders, except for the capital gains arising from the sale of such participation units.
- Local property tax exemption established for the real estate properties destined for the lease of permanent residences that integrate the REIFRL.
- Municipal property transfer tax exemption on real estate property acquisition made within this regime by the REIFRL, as well as the acquisitions arising from the option for the acquisition by the lessees, until 2020, of the real estate properties that integrate the assets of the REIFRL.
- Stamp duty exemption is established for the acts arising from the transfer of the real estate properties by means of the conversion of holdings rights in real estate properties into a lease right with the option of acquisition in respect of the same real estate property by the lessee.

The above-referred tax regime and respective exemptions will not be applicable to entities resident in a country or jurisdiction with a more favourable taxable regime included in the Decree-Ruling published by the Ministry of Finance.

Incentives to urban rehabilitation

Incentives are applicable to real estate property covered by rehabilitation projects undertaken between 1 January 2008 and 2020.

Real estate investment funds incorporated between 2008 and 31 December 2012 may benefit from:

- CIT: the income obtained by real estate investment funds is tax exempt when the funds are incorporated in accordance with the Portuguese law, and respective assets are comprised of at least 75% real estate subject to rehabilitation projects in qualifying areas.

- Property transfer tax: urban property (buildings or autonomous units) destined for permanent residence and located in a rehabilitation area may benefit from an IMT exemption on the first transfer of such urban property upon undertaking of rehabilitation works. The granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.
- Property tax: the IMI exemption granted in respect of urban properties subject to rehabilitation works is extended from eight to ten years (it is granted for a five years term and renewable for an additional five-year period). Again, the granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.

Areas of Business Location

Buildings acquired or completed until 31 December 2012, located in Areas of Business Location (*Áreas de Localização Empresarial* or ALE) are exempt from IMT and IMI, for a period of ten years.

ALE are geographical areas in municipalities, and have a structuring nature. The exemption from IMT and IMI implies that municipalities renounce to the respective revenue in order to attract investment. The licensing regime of ALE is foreseen in Decree-Law no. 72/2009, dated 31 March 2009.

Public transportation vehicles

In 2012, the exemption from CIT on capital gains obtained on the sale of public passenger and goods transportation vehicles and taxis will be maintained if re-investment of the sales proceeds is made on the acquisition of new vehicles produced not before 2011. The re-investment should be undertaken in the same tax year or up to the end of the second tax year to which the sale relates to. The referred exemption is applicable to taxpayers licensed by the respective regulatory authority.

Tax benefits and incentives for non-resident corporate entities

Capital gains

Capital gains on the sale of shares and quotas held in a Portuguese company by a non-resident company may be tax exempt. However, there are some important exceptions, such as:

- Where the non-resident shareholder is owned more than 25%, directly or indirectly, by a Portuguese resident company.
- Where the non-resident shareholder is located in a country that is included in a black list from the Ministry of Finance.
- Where the assets of the company sold consist mainly of immovable property.

Government and corporate bonds

Interest and capital gains on government and corporate bonds are tax exempt (where held by entities not located in black-listed offshore jurisdictions) under certain conditions.

Interest paid by resident credit institutions

Interest paid by resident credit institutions to non-resident financial companies deriving from loans as well as gains arising from swap transactions are tax exempt.

Interest obtained by resident credit institutions

Interest obtained by non-resident credit institutions derived from term deposits held on resident entities authorised to receive such deposits are tax exempt.

Portugal

Madeira International Business Centre (MIBC)

Entities licensed to operate in the MIBC in the period between 2007 and 2013 benefit from a special tax regime, which is applicable until 31 December 2020. The MIBC is not available to entities pursuing financial and/or intra-group activities.

The 2007 MIBC special tax regime applies to companies licensed until 31 December 2013 and provides, besides full exemptions from taxation to non-resident shareholders (except for dividends and interest) and service providers, for the following reduced CIT rates for these entities, on their qualifying foreign source income, based on thresholds of income and subject to job creation requirements:

- 4% in 2012.
- 5% from 2013 to 2020.

MIBC based companies generally benefit from Portugal's network of double taxation treaties (DTTs). EU laws and regulations apply to Madeira.

MIBC based companies are, in general, exempt from annual property tax (IMI) regarding real estate used to pursue its business activity. This exemption does not apply in case of entities engaged in financial brokerage and insurance, including auxiliary entities related with such activities, as well as entities providing 'intra-group services' (coordination, treasury, and distribution centres).

Withholding taxes

General WHT rates

Recipient	Residents (%) (1)	Non-residents (%) (1)
Dividends	25 (2)	25 (3, 4)
Interest	25	25 (4)
Royalties	16.5	15
Interest & Royalties EU Directive	N/A	5 (5)
Banks deposits	25	25 (4)
Property income	16.5	15
Service charges	0	15 (6)
Other	25	25

Notes

1. For residents, tax withheld constitutes a payment on account of final corporate or individual income tax due. For non-residents, tax withheld is the final tax unless in case of property income, in which case it is a payment on account.
2. Not subject to WHT in the case of holdings of at least 10% owned for at least one year.
3. Not subject to WHT if the EU Parent/Subsidiary Directive 90/435/EC applies.
4. WHT rate is increased to 30% when the income is paid or due to entities resident in black-listed jurisdictions.
5. Until 30 June 2013, the applicable rate will be reduced to 5% and will be 0% from 1 July 2013 onwards.
6. Not subject to WHT if a tax treaty is applicable.

Tax treaty rates

Tax treaties reduce the above-mentioned rates as follows:

Portugal

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Algeria (3)	10/15	15	10

Notes

1. The lower of the listed rates applies to royalties when the beneficiary holds 50% or less of the paying company's share capital.
2. There is no WHT on dividends if the EU Parent/Subsidiary Directive applies.
3. The lower of the listed rates applies to dividends when the beneficiary directly holds 25% or more of share capital. Depending on each DTT, a two year holding period may be required.
4. The lower of the listed rates applies to interest on debentures raised in France after 1 January 1965 or on significant loans or debentures raised in Portugal or abroad under major development projects listed in the treaty annex.
5. The lower of the listed rates applies to bank loans, but if interest is payable from Portugal, the bank loans must qualify as being of economic or social interest or fall under an approved development plan.
6. The lower of the listed rates applies to interest received by financial institutions.
7. The lower of the listed rates applies to technical assistance.
8. The lower of the listed rates applies on interest related to loans with a minimum maturity of two years.
9. The rate of 5% regarding interest applies to bonds interest or other securities transacted in the stock market. The rate of 10% applies to loans from banks or insurance companies or credit selling of equipment.
10. The rate of 5% regarding royalties applies to equipment lease.
11. The rate of 10% applies if the company which is paying the dividends is a resident of Israel and the dividends derive from profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israel company tax. The rate of 5% applies if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends.
12. Treaty signed, not yet in force; wording of the treaty not yet known.

13. The rate of 5% on dividends applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends. Depending on each DTT, a one year holding period may be required.
14. Treaty signed in 2011 which will replace the treaty currently in force. The rate of 5% on dividends applies if the beneficial owner is a company (other than a partnership) that for an uninterrupted period of at least 12 months prior to the payment of the dividends or if the company paying the dividends has existed for less than 12 months, during the lifetime of the company, holds directly at least 10% of the capital of the company paying the dividends, or if the beneficial owner of the dividends is: (i) in the case of Portugal, the state, a political or administrative subdivision, or a local authority thereof, or the Bank of Portugal; and, (ii) in the case of Norway, the government of Norway, a political or administrative subdivision, or a local authority thereof, or the Central Bank of Norway.
15. Treaty signed, but not yet in force.

Tax administration

Taxable period

The tax year is, as a general rule, the calendar year. A different tax year is allowed in the case of companies obliged to the accounting consolidation and of PEs of non-resident entities, which can adopt the tax period of the non-resident company. If this option is taken, the new tax period must be maintained for a minimum of five years. The five year minimum period is not applicable if the taxpayer is transferred to a group of companies that are subject to consolidation of financial statements and the holding company has a fiscal year different from the one that was being adopted by the taxpayer.

Other entities may apply for a different tax period based on economic grounds.

Tax returns

The annual CIT return must be submitted by electronic data transmission by the last day of May of the year following the year of income.

Whenever the tax year ends on a date other than 31 December, the annual CIT return shall be submitted by electronic data transmission by the last day of the fifth month following the year end.

The system is one of self-assessment.

Payment of tax

Tax is paid in instalments. Three payments on account due on 15 July, 15 September, and 15 December of the year in which taxable income arises correspond to 90% of the previous year's corporate tax assessment (for taxpayers with a turnover above EUR 498,797; 70% if below this amount). A last instalment is paid (or received) through self-assessment upon filing the annual tax return in May of the following year.

If the tax year ends on a date other than 31 December, interim payments take place in the seventh, ninth, and 12th months of the tax year. Filing of the annual tax return together with the final payment is in the fifth month following the close of the tax year.

Given the introduction of a state surtax of 3% on the excess of taxable profit above EUR 1.5 million to EUR 10 million and 5% on the excess of taxable profit exceeding EUR 10 million, before the deduction of carryforward tax losses, three additional payments on account are due on the same dates as the interim payments mentioned above. The additional payments on account correspond to 2.5% of taxable profit above EUR 1.5 million and EUR 10 million and 4.5% of taxable profit above EUR 10 million assessed in the previous year.

Portugal

Payments on account are not required if the previous year's corporate tax assessment is less than EUR 199.52 and may be suspended upon declaring that no further tax is due in respect of the current year. However, interest is assessed at a rate of 4% if this results in postponing more than 20% of the tax that would otherwise have been paid.

In particular situations, a special payment on account is due of a minimum of EUR 1,000 up to EUR 70,000, paid in March, or in March and October (the third or the third and tenth month of the tax year if it ends on a date other than 31 December).

Interest and penalties

Late assessment interest is due in case of delay on the assessment of taxes due. Late assessment interest is computed on a daily basis, according to the following formula: tax due * interest rate * number of days outstanding / 365. The current rate of late assessment interest is 4% (year).

Late penalty interest is due in case of delay in the payment of the tax assessed. The current rate of approximately 7% has been established by Statement 24866-A/2011, dated 28 December 2011, issued by the Public Institute of Treasury Management and Public Credit.

Tax penalties for companies are capped at EUR 165,000 in the case of *dolus* and EUR 45,000 in the case of negligence.

In general, in case of failure or late payment of CIT, companies are liable to a penalty varying between 30% to 100% of the tax due, capped at EUR 45,000 (in case of negligence).

There are new specific tax penalties regarding transfer pricing documentation and the CFC regime (between EUR 1,000 and EUR 20,000 for companies) and regarding omissions or inaccuracies regarding ruling requests (between EUR 750 and EUR 45,000 for companies in the case of urgent rulings or 25% of the previous amounts in the case of non-urgent rulings).

There is the possibility of applying for penalty reduction, provided certain requirements are met (e.g. regularisation of the tax situation/payment of the tax due; situation where there was no damage to the Revenue).

Statute of limitations

The statute of limitation period is four years, but can be extended in case of tax losses. Regarding facts involving black-listed jurisdictions, the statute of limitation for the right to assess taxes is extended to 12 years while the time period allowed to collect taxes is extended to 15 years. The statute of limitation period is also increased from four to 12 years, in case of facts related to deposit and securities accounts in financial institutions outside the European Union.

Anti-avoidance

A general anti-avoidance provision is in force, pursuant to which contracts and other acts are ineffective whenever it is demonstrated that they were tax driven to reduce taxation that would be due under contracts bearing a similar economic effect, in which case taxation would be based on the latter.

The anti-avoidance procedure is initiated within the general term foreseen (statute of limitation) and is now more flexible in terms of proof by the tax authorities.

Anti-avoidance rules are not applicable in cases where a request for obtaining binding information is not answered by the tax authorities within 150 days.

Binding rulings

Binding rulings can be:

- Urgent: A decision should be taken in 120 days; these are subject to the payment of a fee ranging between EUR 2,500 and EUR 25,500, depending on the complexity of the matter; if no decision is taken within the deadline established, there is a tacit approval of the taxpayer's understanding of the tax matter.
- Non-urgent: A decision should be taken in 150 days; no fees are charged; a decision is required (no tacit approval, as in case of an urgent ruling).

Tax amnesty

The 2012 State Budget Law approved a tax amnesty regime (*Regime Excepcional de Regularização de Dívidas Tributárias* or RERT III).

RERT III is a special regime for tax regularisation, which is applicable to Portuguese tax residents (in 2010 and previous years) who held assets outside Portugal, as of 31 December 2010, which income was not declared to the tax authorities.

This regime allows that, until 30 June 2012, taxpayers regularise their tax situation, through the payment of a flat rate (7.5%) applicable to the value of the assets held outside Portugal.

The regime applies both to individuals and companies.

Under this regime, 'assets' includes deposits, deposit certificates, shareholdings, securities, and other financial instruments (including life insurance policies linked to investment funds).

The indirect ownership of the assets may also be subject to regularisation under RERT III, i.e. ownership via trusts, fund, fiduciary agent and nominee, beneficial ownership contract, etc.

The regularisation is made through the submission of a form, disclosing the assets to be regularised.

Payment of the rate associated with the regularisation (7.5% on the value of the assets held outside Portugal) is made at the moment of submission of the regularisation form, or within ten days of being filed with the Central Bank of Portugal or a bank established in Portugal.

It is not required to repatriate the regularised assets to Portugal.

The regime determines the extinction of any tax obligations and ruling out of liability for any tax fault in relation to the assets which income was not declared to the tax authorities for taxation periods that have ended by 31 December 2010.

It is a confidential process between the Central Bank of Portugal and the taxpayer.

As the regularisation is made with effects to 31 December 2010, any income obtained in 2011 is not covered by the regime.

Portugal

The non-submission of the tax regularisation declaration for the assets, as well as any omissions or inaccuracies in it, imply, in relation to them, an increase of 60% in the tax that would be due for the income corresponding to the referred assets.

If the taxpayer decides not to regularise its situation under RERT III, it will be liable for the taxes that were not paid to the Portuguese tax authorities, and also for the compensatory interest and penalties.

Not disclosing such income may also be considered tax fraud, and such income may be liable to tax penalties and/or legal penalties.

Fight against tax fraud and evasion

It is mandatory that payments above EUR 1,000 (previously EUR 9,700) are made by a means that allows the identification of the recipient of the income (e.g. bank transfer, nominative cheque, or direct debit).

Significant developments

One of the most significant developments of 2011 was the enactment of Act 232, Technical Amendments to the 2011 Puerto Rico Internal Revenue Code (2011 Tax Code). This Act amended numerous provisions of the 2011 Tax Code, including corporate, individual, and partnership's provisions. Most relevant amendments have been included in the appropriate sections of this summary.

Act 218 was enacted on 7 November 2011, providing an amnesty covering various Puerto Rico taxes to alleviate and assist taxpayers with the payment of their debts. The amnesty was applicable to income tax, estate and gift tax, the special real property tax, withholding (WHT) tax, and payroll tax. This amnesty eliminated interests, surcharges, and penalties; therefore, taxpayers only had to pay the principal amount. This amnesty was effective until 29 February 2012.

On 19 April 2012, Act 64 was enacted to extend the previous tax amnesty. Act 64 is in effect from 1 March 2012 to 15 June 2012. In general, benefits of Act 64 are the same as of Act 218.

Taxes on corporate income
