A domestic corporation is taxable in Puerto Rico on its worldwide income. A foreign corporation engaged in trade or business in Puerto Rico is taxed at the regular corporate tax rates on income from Puerto Rico sources that is effectively connected income and at a 29% WHT rate on its Puerto Rico-source gross income not effectively connected with that business.

The current corporate income tax (CIT) rate is comprised of a 20% normal tax and a graduated surtax (computed on the 'surtax net income') up to a maximum combined and effective tax rate of nearly 30%. The 'surtax net income' is basically the net taxable income subject to regular tax less a surtax deduction in the amount of 750,000 United States dollars (USD).

Surtax tax rates are as follows: (i) 5% for income up to USD 1,750,000 and (ii) USD 87,500 plus 10% of income in excess of USD 1,750,000 for a maximum nominal tax rate of nearly 30%. This latter 10% surtax might only be applicable up to 2013, leaving the maximum nominal tax rate at nearly 25% from 2014 thereafter, provided certain fiscal and economical conditions are met.

Puerto Rico

The determination of the applicable surtax rate is now made on a consolidated basis for controlled groups and related companies, whereas the net taxable income of all the entities subject to tax in Puerto Rico within said groups has to be combined for the determination of the 5% or 10% applicable surtax rate.

Alternative minimum tax (AMT)

The AMT tax rate is 20%. For certain companies purchasing personal property from related parties, the tentative AMT is the greatest of the above-mentioned 20% or 1% of said purchases of personal property. For AMT purposes, expenses paid or incurred for services performed by a related party outside Puerto Rico are considered a permanent adjustment in the determination of the alternative minimum net income (i.e. non-deductible for AMT purposes).

Tax on improper accumulation of income

A surtax of 50% is imposed on corporations that improperly accumulate earnings to prevent the imposition of tax on shareholders or partners, rather than paying the earnings out as dividends. The tax is not imposed on accumulated earnings and profits but is imposed on the net income for the year computed without taking capital loss carryover or net operating loss (NOL) carryover deductions, and reduced by the following items: Puerto Rico income taxes paid or accrued, disallowed net capital losses, and charitable contributions in excess of the deductible amount. The net income does not include industrial income exempted from income taxes under Industrial Incentives Acts. However, an exempt business can be subject to the penalty tax on non-exempt income.

Corporate residence

A corporation organised or created under the laws of Puerto Rico is a domestic corporation. A domestic corporation is a resident corporation even if it does not conduct business operations in Puerto Rico. A corporation created elsewhere is considered a foreign corporation.

Permanent establishment (PE)

The Puerto Rico Tax Code does not provide specific guidance on PE. Facts and circumstances need to be analysed in order to determine if a corporation has created a PE in Puerto Rico or not. However, having an office or fixed place of business in Puerto Rico may deem the corporation to be engaged in a trade or business in Puerto Rico (i.e. having a PE).

Sourcing rules pursuant to Act 154

Act 154's source rules are segregated into two parts. The first part treats a non-Puerto Rico resident manufacturing entity as having an office or fixed place of business in Puerto Rico merely as a result of engaging in transactions above a certain threshold with a related Puerto Rico entity. The second part treats a portion of the income earned by a non-Puerto Rico resident entity as Puerto Rico-source income.

Act 154's source rule applies where a non-Puerto Rico resident purchases goods and services from a related company that manufactures personal property or performs services in Puerto Rico that account for 10% or more of the total gross receipts of the seller from sales of such property or services in Puerto Rico, or at least 10% of the purchase cost of personal property and services acquired by the purchaser, for the taxable year or any of the three prior taxable years.

Where Act 154's source rule applies, a portion of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as Puerto Rico-source income that is effectively connected with the conduct of a Puerto Rico trade or business. The portion of the non-Puerto Rico resident's income that is treated as Puerto Rico source is determined under an equally weighted, four-factor (i.e. purchases, sales, property, and payroll) formulary apportionment method. Where the purchaser fails to provide adequate documentation regarding the formulary apportionment factors, 50% of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as sourced where the property is manufactured or produced (i.e. Puerto Rico). The source rule also will apply to agency and commissionaire arrangements, in addition to buy-sell transactions involving related parties. In addition, the source rule contains an anti-abuse provision that disregards a transaction, for purposes of the source rule, where one of the principal purposes of the transaction is avoidance of the source rule.

Other taxes

Sales and use tax (SUT)

As a general rule, the SUT shall be applied, collected, and paid on all transactions of taxable items in Puerto Rico. Taxable items consist of tangible personal property, taxable services, admissions, and what is known as bundled transactions. Excluded from this definition are professional associations and certain membership fees; stamps issued by professional associations, the Commonwealth of Puerto Rico, or the federal government; human blood, tissue, and organs; maintenance fees paid to resident associations; air and maritime tickets; real property; and bingos, raffles, and lottery. Other transactions that are exempt from SUT include export transactions; duty-free stores located at airport or maritime ports; prescription medicines; insulin; taxable items acquired for certain manufacturing operations (e.g. raw materials); and food and ingredients for food (except for prepared food, diet supplements, sweets, and carbonated beverages).

SUT is imposed at the state level at a 5.5% and an additional 1.5% at the municipal level, for an aggregate tax of 7%. The 7% tax should be remitted to the Puerto Rico government as follows: 6% to the Puerto Rico Treasury Department (PRTD) and the remaining 1% to the corresponding municipality. However, there are some municipalities that have entered into an administration agreement with the PRTD by which the PRTD will collect the entire 7% of the sales and use tax from merchants and remit the 1% to the municipality (collected on the municipality's behalf).

Every natural or juridical person who does or wishes to do business of any kind in Puerto Rico shall request registration in the Merchant's Registry of the PRTD at least 30 days before starting operations. Once the registration application is filled out and approved, the Secretary of Treasury will grant a Merchant's Registration Certificate. This certificate constitutes the merchant's authorisation to do business in Puerto Rico, and confirms the merchant's obligation as a withholding agent. The Merchant's Registration Certificate shall be displayed, at all times, in a visible place for the general public in the commercial establishment for which it was issued. Please note that if a merchant is doing business in one or more of the 78 municipalities in Puerto Rico, the merchant only needs to register with the PRTD.

Puerto Rico

Unless specifically exempted, all persons selling taxable items are required to file a monthly tax return. This return shall be delivered to the PRTD no later than the tenth day of the calendar month following the month during which the sales occurred. If the merchant wishes to claim any exemption corresponding to taxable items, the merchant needs to file the monthly return and claim the exemption in it.

Merchants whose SUT deposits exceeded USD 12,000 are required to file the monthly SUT return and remit the payment electronically. In addition, merchants with volume of business of USD 200,000 or more should remit the SUT withheld electronically.

There is a credit for purchases of products manufactured in Puerto Rico for purposes of SUT. In general, the credit will be 10% of the excess of the purchases of eligible products over the average of the purchases of eligible products for three out of ten prior taxable years. This credit can be carried forward until exhausted. It is important to note that the credit used will be considered taxable income for income tax purposes of the year the credit is taken.

Customs duties and import tariffs

Puerto Rico does not have customs duty and import tariff provisions. Since Puerto Rico is a Commonwealth of the United States, it follows the United States' customs duties and import tariffs.

Excise taxes

There are certain articles subject to a special excise tax, such as cigarettes, fuels, crude oils, vehicles, alcoholic beverages, cement, sugar, and plastic products, among others.

Act 154's excise tax

Companies with manufacturing operations in Puerto Rico may be subject to an excise tax on goods or services provided to offshore-related entities under Act 154 of 2010. This Act created an excise tax that works in tandem with Act 154's source rules. Where the excise tax applies, it is in lieu of the tax that otherwise would arise from the application of Act 154's source rules. Under this excise tax rule, offshore purchasers that acquire goods from Puerto Rico sellers with gross receipts in excess of USD 75 million for any of the three preceding taxable years and that otherwise meet the source-of-income rule thresholds (set forth above) are subject to this excise tax equal to the 'applicable percentage of the value' of such personal property or services, which is essentially a scaled-back percentage. The excise tax rate phases out over a six-year period as follows:

- 4.00% between 1 January 2011 and 31 December 2011.
- 3.75% between 1 January 2012 and 31 December 2012.
- 2.75% between 1 January 2013 and 31 December 2013.
- 2.50% between 1 January 2014 and 31 December 2014.
- 2.25% between 1 January 2015 and 31 December 2015.
- 1.00% between 1 January 2016 and 31 December 2016.

Regulations 7970, issued in December 2010, provide the following tax credits to offset the excise tax mentioned above:

1. General credit: up to USD 4 million for 2011 and a reduced amount going forward on the same proportion that the excise rate is reduced.
2. Alternative credit based on gross receipts: in lieu of the above-mentioned credit, and provided the gross receipts per average monthly number of employees in Puerto

Rico is less than USD 550,000, a credit of up to USD 7 million for 2011 and a reduced amount going forward on the same proportion that the excise rate is reduced.

3. Alternative credit when taxable acquisitions exceed certain thresholds: in lieu of the above-mentioned credits, if taxable acquisitions equals or exceed USD 4 billion, average monthly employees engaged in manufacturing or production in Puerto Rico is at least 400, and payroll equals or exceeds USD 20 million, then the credit for 2011 could be between USD 20 million and USD 80 million.
4. Additional credit for incremental increase in employees: for taxpayers meeting the requirements established in credit 3 above, an additional credit of USD 187,500 for each additional 25 employees over the employee baseline, up to a maximum of USD 3,750 million, will be available. A reduced credit will be available for years after 2011 on the same proportion that the excise rate is reduced.
5. Credit for controlled groups with facilities in multiple municipalities: in addition to credits 1 and 2 above but in lieu of credits 3 and 4 above, in the case of a controlled group that has one or more members that are engaged in manufacturing and production or manufacturing services in facilities located in three or more different municipalities in Puerto Rico as of 24 October 2010, a credit of USD 5 million per each municipality shall be allowed for each facility that has a monthly average of more than 30 employees, up to a maximum credit of USD 20 million. A reduced credit will be available for years after 2011 on the same proportion that the excise rate is reduced.
6. Credit for economically disadvantaged or critical industrial suppliers: additional credit of 100% or 150% of increase in purchases from economically disadvantaged or critical industrial suppliers over the average purchases for the last two years.
7. Knowledge corridor and research and development (R&D) investment credit: additional credit of 100% of direct contributions to the Puerto Rico Science, Technology, and Research Trust or Special Economic Development Fund and of the excess R&D invested in Puerto Rico over the average investment for the two last years, subject to certain limitations.

The excise tax is collected by the Puerto Rico seller on receipts from the sale of personal property or services rendered to a related offshore purchaser. The tax has to be deposited with the Secretary of the Treasury on or before the 15th day of the month following the sale. Each person required to collect the excise tax must file a quarterly excise tax return on 30 April, 31 July, 31 October, and 1 January and pay any remaining tax liability not deposited on a monthly basis, as outlined above.

Act 154 sets forth the process for which a credit may be claimed for (i) taxes paid to any of the states of the United States on the acquisition of personal property and services and (ii) taxes paid to Puerto Rico by another member of the taxpayer's controlled group on a series of purchases.

Personal property taxes

Every corporation engaged in a trade or business in Puerto Rico which on 1 January of each year owns personal property used in its trade or business within Puerto Rico, whether it is leased to another entity, is subject to tax on such property. The tax is self-assessed by the corporation and it is paid together with the filing of an annual return. The tax ranges between 5.08% and 8.23%, depending on the municipality. A 5%

Puerto Rico

statutory discount is available if payment is made in full on the return due date (15 May of each year).

In general, all personal property not specifically exempted, including cash, finished goods inventory, supplies, and depreciable property, is subject to the tax. The personal property tax is generally based on the book value of the asset as of 1 January. Finished goods inventory, however, is assessed on the average of the monthly balances for the 12-month period preceding 1 January of each year.

The valuation of the personal property subject to tax is determined by multiplying the book value of such property by the applicable tax rate determined by the municipality in which the property is located. If the book value of depreciable property is below its estimated residual value, the property should be assessed at its estimated residual value.

Real property taxes

The property tax system is administered by the Municipal Revenue Collection Center (MRCC). The tax on real property is directly assessed by the MRCC and may be paid in two instalments. The tax, (which varies from a minimum of 7.80% to a maximum of 10.23%, depending on the municipality) is applied to an amount based on the hypothetical fair market value (FMV) of the relevant property in the year 1957. In general terms, this hypothetical FMV normally ranges between 40% and 50% of the cost of the property.

Transfer taxes

Puerto Rico does not have transfer tax provisions.

Stamp taxes

Puerto Rico does not have stamp tax provisions. However, recordation fees are imposed at the time of officially recording a real estate transaction with the Puerto Rico Property Registry.

Municipal license tax

Every corporation is required to file an annual volume-of-business declaration with each of the municipalities in which it establishes or conducts business operations during the year. The declaration must indicate the actual volume of business (i.e. net sales, gross income from any service rendered, and other gross receipts) attributable to each municipality. When a business operates in more than one municipality but does not receive income in all of them, the license tax shall be computed based on a distribution of sales apportioned to each municipality by square feet of the building used in each municipality.

For a non-financial business, the license tax payment varies from a minimum of 0.20% to a maximum of 0.50%, depending on each municipality. The payment must be made in two equal instalments on or before 15 July and 15 January on the basis of the volume of business generated by the entity during its accounting year ended within the immediately preceding calendar year before the due date of the declaration. A 5% discount is available when the tax is fully paid on the declaration due date (on or before five working days after 15 April of each year).

For the first six months after a new business is established, the new company is generally exempt from the municipal license tax, provided that the business informs the municipality that it has established a new business in the municipality within the first 30 days of operations and request the provisional license tax as established in each

municipality. A copy of the municipal licence is generally requested as a prerequisite for obtaining other licences and permits in Puerto Rico.

Branch income

Corporations operating in Puerto Rico as a branch may be subject to a 10% tax on the dividend equivalent amount (commonly known as the branch profit tax or BPT). The BPT should be determined and paid along with the CIT return. There would not be an income tax withholding at source at the time cash transfers are made by the Puerto Rico branch to its home office outside of Puerto Rico.

Income determination

The gross income of a corporation generally includes business income, profits from the sale of property, interest, dividends, and income derived from any source unless specifically exempted by law.

A corporation's net income is generally calculated in accordance with the method used for financial statement purposes, except for various items of income and expenses, which are treated differently. For example, the cash method of accounting may not be used by a corporation with inventory or with an average annual gross income in excess of USD 1 million. Long-term contract methods and the installment method can be used for regular tax calculations.

Inventory valuation

In general, inventory is valued at the lower of cost or market. Retail merchants can use the retail method of accounting.

Capital gains

Tax-advantaged treatment is provided for net long-term gains (holding period of more than six months) from the sale of capital assets. For corporations, net long-term capital gains, reduced by any short-term capital losses, are subject to an alternative (preferential) tax of 15% in lieu of the regular CIT rates.

Dividend income

Dividends from a corporation that derives 20% or more of its profits from sources within Puerto Rico are taxable in Puerto Rico. However, a dividend-received deduction may apply.

Dividends-received deduction

All corporations engaged in trade or business in Puerto Rico are entitled to an 85% deduction on dividends received from a domestic corporation but not in excess of 85% of the net income of the corporation. A 100% dividend-received deduction applies for dividends received from taxable controlled domestic corporations (if ownership in a corporation is 80% or more).

Interest income

Interest income is generally taxable, except interest from obligations of the federal government or any state, or territory, or political subdivisions; the District of Columbia; and the Commonwealth of Puerto Rico or any of its instrumentalities or political subdivisions.

Puerto Rico

Royalty income

Royalties from property located in Puerto Rico or from any interest in such property are included in gross income.

Partnership income

The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income (loss).

Other income

Service fees are generally taxable as ordinary income.

Foreign income

Generally, a Puerto Rico domestic corporation is taxed on its worldwide income, including foreign income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credit or deduction. In the case of resident foreign corporations, these are only taxed on their Puerto Rico-source income and on their effectively connected Puerto Rico income (i.e. foreign income won't be taxable for Puerto Rico purposes).

Deductions

All ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business are deductible by corporations operating in Puerto Rico.

Depreciation

A reasonable depreciation allowance is deductible for the exhaustion, wear and tear, and obsolescence of property used in business. The most common depreciation method used by corporations is the straight-line method. Nevertheless, any other consistent method may be used in lieu of the straight-line method as long as it is in accordance with the recognised trade practice. In addition, a corporation (other than one that is exempt under an Industrial Incentives Act) can elect an accelerated depreciation method for new or used tangible property acquired by purchase, on taxable years commencing after 30 June 1995.

For property acquired after 31 December 2009, when using the straight-line depreciation method, the useful life has to be determined based on the same rules of accelerated depreciation.

Assets	Useful life (years)
3 year property (e.g. computers, electronic equipment)	3
5 year property (e.g. automobiles, transportation equipment)	5
7 year property (e.g. certain furniture and fixtures, air transportation equipment)	7
10 year property (e.g. furniture and fixtures, printing equipment, other machinery and equipment)	10
15 year property (e.g. certain air transportation equipment, natural gas plants)	15
20 year property (e.g. vessels, land improvements)	20
Real property leased for residential purposes	30
Other real property	35

For intangibles (other than goodwill) acquired or created after 1 September 2010, the deduction is calculated using the straight-line method over the lower of a useful life of 15 years or the intangible useful life.

Goodwill

The cost of goodwill is generally capitalised and amortised ratably over 15 years.

Start-up expenses

Generally, start-up expenditures may be deducted in the tax year in which the trade or business begins or they may be ratably amortised over five years.

Interest expenses

In general, interest expense is deductible without limitation. However, interest expenses related to exempt income are not deductible. If interest is paid to a non-Puerto Rico resident related party, a 29% withholding at source would apply.

Bad debt

Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless (i.e. uncollectible). The reserve method is not admissible for Puerto Rico purposes.

Charitable contributions

Deductions for allowed charitable contributions are limited to 10% of net income, computed regardless of the contributions.

Rent expense

Corporations are entitled to a rent expense deduction if the rented property is used in the business.

Employee remuneration

Corporations may deduct payments of reasonable salaries or other compensation for services actually rendered.

Insurance premiums

Insurance premiums paid or accrued on risks related to a trade or business are deductible as well as premiums on group life policies covering employees, where the beneficiary is not the corporation. No deduction is allowed for premiums paid to an insurance company not authorised to provide insurance in Puerto Rico or through an agent or broker not authorised to operate in Puerto Rico.

Meals and entertainment

Meals and entertainment expenses are deductible, subject to a 50% limitation. Travelling expenses are fully deductible if the trip is for business purposes.

Automobiles expenses

A corporation is allowed to depreciate non-cargo automobiles used in trade or business over a five year useful life (three years in the case of sales persons) up to a maximum base of USD 30,000 for a maximum annual depreciation of USD 6,000.

On the other hand, for non-cargo automobile maintenance expenses (e.g. gas, repairs, insurance) a deduction based on USD 0.60 per mileage is allowed.

Puerto Rico

Taxes

A corporation is allowed a deduction for taxes paid (except for Puerto Rico CIT), including income tax paid to the United States, its other possessions, and any foreign country. The deduction is in lieu of claiming a foreign tax credit.

Other significant items

The cost of incidental repairs (not adding value to the property) is deductible as business expenses.

Subject to certain limitations, savings and retirement plans for the benefit of the employees are deductible, if qualified by the Secretary of the Treasury.

Net operating losses (NOLs)

All corporations are generally entitled to the NOL deduction in computing their tax. NOLs may be carried over for seven years (there are no carryback provisions). Also, losses from sales or exchanges of capital assets are allowed only to the extent of gains from such sales or exchanges. The carryforward period in this instance is, however, five years.

Act 171 increases the NOL carryforward period from seven taxable years to ten taxable years for NOLs generated from taxable years beginning after 31 December 2004 and before 31 December 2012.

Payments to foreign affiliates

Management fees paid to a foreign affiliate are deductible to the extent that they are reasonable compensation for the services rendered. However, the Secretary of the Treasury has the authority to reallocate items of income and expense to properly reflect the Puerto Rico taxable income.

Group taxation

Puerto Rico does not have group taxation rules. In other words, corporations can not file a consolidated return for Puerto Rico CIT purposes.

Transfer pricing

There are no specific transfer pricing rules in Puerto Rico.

Thin capitalisation

There are no specific thin capitalisation rules in Puerto Rico.

Tax credits and incentives

A corporation engaged in specific eligible activities may apply for a reduced CIT rate through the request of a Tax Exemption Grant to the Puerto Rico Office of Industrial Tax Exemption pursuant to Act 73 of 28 May 2008.

Tax rate incentives

Exempt entities may elect one of the following two scenarios:

- General scenario: 4% CIT rate with a WHT rate on royalty payments of 12%. Under this scenario, the amount of WHT on the royalty payments is creditable against the 4% CIT.

- Alternate scenario: 8% CIT rate with a WHT rate on royalty payments of 2%. Under this scenario, the WHT on royalty payments is creditable against the 8% CIT.

Companies may elect one of these scenarios at the time of applying for the benefits under the act. However, there are other possibilities:

- 4% fixed income tax rate on Incentive Development Income (IDI), excluding income from certain investments provided by Section 2(j).
- Existing exempt businesses currently taxed at a rate of 2% to 4% under the 1998 Act may continue to enjoy the same tax rate under the new act when it is determined by the Secretary of the Puerto Rico Economic Development (the Secretary) that said tax rate is in the best interest of Puerto Rico and the existing business complies with an employment commitment of at least 80% of its average employment during the three preceding years before the application of exemption under the new act. Note that the secretary could require a minimum income tax payment equal to the average income tax paid during said period.
- Pioneer industries are eligible for a 1% CIT rate.
- Activities for the development in Puerto Rico of intangible property are eligible for a 0% CIT rate.
- Any exempt business having operations at a municipality located in a 'low or intermediate development zone' may reduce its CIT rate by an additional 5%.
- Any exempt business having operations in Vieques and Culebra may be totally exempt from income taxes during the first ten years of operations as established in the new act. The remaining years covered by its tax decree may qualify for a 2% CIT rate.

Special deductions

Special deductions are eliminated, except for capital investment in buildings, structure, machinery and equipment, and the NOLs carryforward.

Credits

Credit for purchases of Puerto Rico manufactured product

Subject to certain limitations, the credit for purchases of products manufactured in Puerto Rico will remain at 25% (35% in the case of recycled products).

Job creation credit

There is a credit for every incremental job applicable to exempt business starting operations after 1 July 2008. The amount of the credit (maximum of USD 5,000 per each employment) depends upon the location of the industrial development zone.

R&D investment credit

A 50% credit is granted for the eligible investment in R&D activities, including operational expenditures, clinical trials, infrastructure, renewable energy, or intellectual property.

Energy investment credit

A 50% credit is granted for the eligible investment in the acquisition of machinery and equipment for the creation of energy.

Energy cost credit

There is also a 3% credit (which could be increased up to 10% if certain employment requirements are met) for payments made to the Puerto Rico Power Authority during the corresponding taxable year. This credit is available for a ten-year period starting as

Puerto Rico

of 1 July 2008. Additional credits (for the purpose of reducing the cost of energy) may be available to industrial units subject to certain limitations.

Technology transfer credit

A 12% credit (2% in the case of exempt businesses that opted for the alternate tax) is available for payments made to resident entities for the use or privilege of using intangible property in Puerto Rico.

Strategic projects investment credit

There is a 50% credit for eligible investment in strategic projects, including activities for the design, development, and construction of dams.

Industrial investment credit

There is a 50% credit, up to a maximum of USD 8 million, for cash invested in the purchase of 50% or more of the stock or operating assets of an exempt business that is in the process of shutting down operations, amount used to start-up small or medium-exempt business, or amounts used for a substantial expansion of an exempt business.

Several of the above-mentioned credits were also made available to entities operating under prior tax incentives acts.

On 3 January 2011, the PRTD issued Circular Letter 11-01 and Informative Bulletin 11-01 to introduce the new electronic system for integrated tax credits (CCI System, for its name in Spanish). Also, these communications introduced new processes to claim such credits against the income tax, notify of the sale of such credits, and to request the vouchers for the utilisation of these credits against the corporation's utilities, if applicable.

The CCI System will allow the PRTD to maintain an updated registry of the tax credits already granted.

Property tax incentives

Similar to the previous incentives laws, the current act allows for a 90% property tax exemption on personal and real property. However, the current act introduced a methodology for the classification and assessment of real property owned by the exempt businesses. Under the provisions of the current act, a taxpayer can self-assess one's real property tax responsibility (similar to the current personal property tax system) and remit the related tax liability due along with a real property tax return (to be issued by the MRCC) by 15 May of each year. The self-appraisal method is only applicable to real property that has not been appraised by the MRCC and is mainly limited to machinery and equipment classified as real property. Note that this method is not available for assets such as land, building, and building equipment.

Municipal license tax and other municipal tax incentives

The current act did not introduce many changes regarding treatment of exempted businesses for municipal license tax purposes. The tax exemption remains at the same 60% as it was under the 1998 Act. Exempt businesses operating in Vieques or Culebra are 90% exempt; small or medium-exempt businesses are 75% exempt; and central or regional corporate headquarters providing managerial services to affiliated companies are 100% exempt during the first five years after becoming eligible for the exemption.

Foreign tax credit

Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income and excess profit taxes paid or accrued

during the taxable year to any foreign country. A foreign tax credit reduces the Puerto Rico income tax liability dollar for dollar, while a deduction reduces the Puerto Rico income tax liability at the marginal rate of the taxpayer. There are no carryforward provisions for foreign tax credit purposes.

Withholding taxes

Corporations not engaged in a trade or business in Puerto Rico are subject to a 29% WHT at source on certain gross income items (considered fixed or determinable, annual or periodical [FDAP]) from Puerto Rico sources.

FDAP income may include interests received from a related person, rents, royalties, salaries, annuities, compensation, remuneration, and net capital gains. However, if the payment received is from dividends and partnership profits, a 10% WHT should apply.

The payer, as a withholding agent, is responsible for the deduction and remittance of the 29% (10% in the case of dividends) to the Puerto Rico Treasury Department. Such tax is due on or before the 15th day of the month following the receipt of the income by the non-resident corporation and it is reported in Form 480.31 'Deposit Slip of Non-residents Income Tax Withheld at Source'. An annual informative return is also required to be filed (Form 480.30 'Non-residents Annual Return of Income Tax Withheld at Source') no later than 15 April of the following year.

Tax treaties

There are no tax treaties between foreign countries and Puerto Rico. However, the Puerto Rico Supreme Court has recognised that, although Puerto Rico is generally not a signatory party to a treaty entered into by the United States, if an international treaty does not explicitly exclude Puerto Rico, the treaty would be applicable to Puerto Rico.

Tax administration

Taxable period

The annual accounting period may be on the basis of the calendar year, a fiscal year ending on the last day of a month, or a 52/53 week year.

Tax returns

The Puerto Rico tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual income tax return (generally Form 480.20) by the 15th day of the fourth month following the close of its tax year. In general terms, a taxpayer can obtain an automatic extension of three months to file its income tax return. Failure to timely file can result in penalties. Any tax not covered with the estimated tax payments should be paid along with this return.

A corporate taxpayer may also be subject to file a personal property tax return by 15 May and/or a volume of business declaration by the 5th business day after 15 April.

Payment of tax

A corporation must substantially satisfy its annual income tax liability, if any, through estimated income tax payments. The amount of estimated income taxes should be paid on equal instalments on the 15th day of the fourth, sixth, ninth, and 12th month of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual tax for the year or, in the case a CIT return was filed by the corporation in

Puerto Rico

the preceding year, 100% of such tax liability. Failure to pay the tax by the due dates indicated above may result in a penalty of 10% of the instalment due.

Annual report

Every corporation is required to file an annual corporation report with the Puerto Rico Department of State. This annual report must be filed by the 15th day of April along with a USD 150 annual fee and a balance sheet as of the close of operations of the prior year. The report should be filed through the Puerto Rico Department of State's website. In the case of for-profit corporations, if the volume of business exceeds USD 3 million, the annual report must be accompanied by a balance sheet certified by a certified public accountant (CPA) licensed in Puerto Rico. In the event that the volume of business does not exceed USD 3 million, a balance sheet prepared under generally accepted accounting principles (GAAP) by a person with a general knowledge in accounting has to be submitted along with the corporate annual report. An extension of 60 days, an additional 30 day period may be requested, for filing the annual report can be obtained if timely requested. The Secretary of State is authorised to impose penalty for failure to timely or accurately file the annual corporate report that would be between USD 75 and USD 2,000 if a non-profit corporation, and between USD 750 and USD 2,000 if a for-profit corporation.

Audited financial statements

Accounting records must be prepared in accordance with the general accepted accounting principles (GAAP) followed in the United States. Domestic corporations (i.e. incorporated in Puerto Rico) with volume of business of more than USD 3 million must include, with their CIT return, audited financial statements of the Puerto Rico operations for the accounting year ended on or before the preceding 31 December. The financial statements should be submitted with an audit report issued by a CPA licensed in Puerto Rico. Nevertheless, foreign corporations with volume of business of more than USD 3 million must include, with their CIT return, audited financial statements of the Puerto Rico operations.

Also, qualified and disclaimer opinions are now allowed to the extent that the qualification or disclaimer does not result from a restriction in scope. However, no adverse opinions are allowed. All groups of related entities engaged in a trade or business in Puerto Rico are required to file consolidated or combined financial statements (CFS), which should contain a consolidating schedule and general information of the related parties. The determination of the gross income threshold for purposes of the audited financial statement requirement should be made taking into consideration the volume of business of all the entities within a controlled group. In the case of foreign entities, these will be able to submit audited financial statements with their Puerto Rico operations on a stand-alone basis; in other words, the CFS will not be required. The requirement for audited financial statements will not apply to non-profit organisations. There was a waiver for the taxable year commencing after 31 December 2010 and before 1 January 2012. This waiver provided for the submission of stand-alone audited financial statements for all entities within a consolidated group with volume of business of more than USD 1 million, instead of the consolidated or combined audited financial statements.

With respect to the municipal license and personal property tax filings, the threshold amount for the audited financial statements requirement is gross revenues of more than USD 3 million, regardless the corporate residency (i.e. foreign or domestic).

Audit cycle

Many taxpayers are under audit by the PRTD. The audits may include income, payroll, withholding, and sales and use taxes.

Statute of limitations

The PRTD generally has four years after an original return is filed to assess income, payroll, and sales and use taxes. A return will be deemed to have been filed on the later of (i) its due date or (ii) the date the return was actually filed.

Topics of focus for tax authorities

Currently, the PRTD is focused on sales and use tax, intercompany loans, withholding at source, and payments to foreign affiliates, among others.

Significant developments

Publication of final executive regulations

Following the introduction of a new tax law in 2010, the related executive regulations, which provide guidance on how the Qatar tax authorities will interpret and apply the provisions of the Qatar tax law in practice, were published in the official gazette on 1 June 2011. These regulations provide greater clarity in respect of matters that were previously uncertain. The regulations became effective as of 1 July 2011.

Circulars issued by Qatar tax authorities

The Qatar tax authorities have also issued a number of circulars to provide guidance on, amongst other things, the appeals process, the application of the retention rules and withholding tax (WHT), the requirement to notify the Qatar tax authorities of contracts with non-residents, and the policy in relation to the granting of tax exemptions.

Taxes on corporate income

An entity that is wholly or partially foreign owned and that derives income from sources in Qatar is taxable in Qatar. In the case of a joint venture, the tax liability of the joint venture is dependent upon the foreign partners' share of the joint venture's profit. Currently, no corporate income tax (CIT) is levied on a corporate entity that is wholly owned by Qatari nationals and Gulf Cooperation Council (GCC) nationals.

Unless specifically exempt from tax, an entity will be taxable in Qatar if it has generated Qatar-source income, regardless of the place of its incorporation.

Taxable income generally is subject to a flat (CIT) rate of 10%, with certain exceptions available.

The following tax rates apply in the specific circumstances noted:

- If a special agreement has been reached with the government of Qatar prior to 1 January 2010, the rate specified in the agreement continues to apply. If no rate is specified in the agreement, a rate of 35% will be used.
- The rate applied with respect to oil operations, as defined in Law No. 3 of 2007, may not be less than 35%.
- Payments made to non-residents with respect to certain service activities not connected with a permanent establishment (PE) in Qatar are subject to WHT (*see the Withholding taxes section*).

The amount of tax payable is reduced for companies that are partly foreign owned, depending on the extent of local ownership.

Qatar Financial Centre (QFC)

The QFC was established in 2005 to attract companies in the financial services sector. It should be noted that this summary is directed towards non-Qatar Financial Centre (QFC) entities with Qatar-source income. The QFC has its own tax regulations and rules, and the State of Qatar tax laws do not apply to the licensed activities of entities established in the QFC. QFC entities are subject to CIT in respect of activities undertaken pursuant to their QFC licence at the rate of 10%.

Corporate residence

It is important to recognise that residence is not the basis used to determine whether an entity is taxable for CIT purposes in Qatar. Accordingly, a CIT exposure in Qatar may arise even if a company is not resident in Qatar. Residence is, however, relevant when considering whether WHT will apply on payments received rather than CIT.

A company is resident in Qatar if it is incorporated in accordance with Qatari laws, its head office is situated in Qatar, or its place of effective management and control is in Qatar.

Permanent establishment (PE)

A PE has also been defined as a fixed place of business through which the business of a taxpayer is wholly or partly carried on. A PE is deemed to include a branch, office, factory, workshop, mine, oil or gas well, quarry, a building site, an assembly project or a place of exploration, extraction, or exploitation of natural resources. A PE also includes activity carried on by the taxpayer through a person acting on behalf of the taxpayer or in the taxpayer's interest, other than an agent of an independent status.

Other taxes**Value-added tax (VAT)**

Qatar imposes no VAT or sales tax on operations in Qatar. However, the introduction of VAT in the GCC is currently under discussion.

Customs duties

Customs duties are applied to goods with an origin outside the GCC countries, normally at a rate of 5%. Higher rates sometimes apply for specific types of goods, such as tobacco products. Temporary import exemptions are sometimes available.

Excise taxes

There are no excise taxes in Qatar.

Property taxes

There are no property taxes in Qatar. However, fees may be payable to the government by the owner on the registration of property and by the landlord on the registration of leases.

Transfer taxes

There are no transfer taxes in Qatar.

Stamp taxes

There are no stamp taxes in Qatar.

Qatar

Branch income

The profits of a branch owned by a foreign parent entity are subject to the same tax rules as apply to other forms of taxable entities.

Income determination

CIT is levied on a company's Qatar-source income. Some examples of Qatar-source income include:

- Income derived from an activity carried on in Qatar.
- Income derived from contracts wholly or partially performed in Qatar.
- Income from real estate situated in Qatar, including income from the sale of shares of companies with assets consisting of mainly real estate situated in Qatar.
- Income from shares in companies resident in Qatar or listed on Qatar's stock market.

Inventory valuation

Inventory must be valued in accordance with International Financial Reporting Standards (IFRS).

Capital gains

Any chargeable gains on the sale of capital assets are taxed as ordinary income.

Dividend income

Dividends are not taxable in Qatar if received from profits that have been subject to Qatar tax or from companies that are exempt from Qatar tax.

Interest income

Interest arising in Qatar and bank interest realised outside Qatar, if it results from the taxpayer's activity in Qatar, are taxed as ordinary income.

Foreign income

Non-Qatar-sourced income is not subject to tax in Qatar.

Deductions

Taxable income is determined after deducting all expenditures, costs, and losses incurred to generate gross income. A deduction is usually available for expenses that are considered ordinary rather than 'capital' in nature and incurred in generating Qatar-source revenue.

Depreciation

Depreciation should be calculated in accordance with rates specified by the Qatar tax law and the related regulations.

For certain assets, depreciation is calculated on the cost on a straight-line basis. The rates of depreciation are as follows:

Assets	Depreciation rate (% per annum)
Buildings and constructions, including roads, bridges, pipelines, storage tanks, and port docks inside the establishment and excluding ready-made light constructions	5
Ships and boats	10
Airplanes and helicopters	20
Drilling instruments	15
Intangible assets:	
Pre-establishment expenses	50
Trademarks, patents, and the like	Amortised on the expected lifetime of the asset, provided that the amortisation allowance shall not exceed 15% per annum.

Other assets will be divided into groups and depreciated on a reducing-balance basis. The rates of depreciation are as follows:

Group	Asset	Depreciation rate (% per annum)
I	Computer hardware and software accessories	10
II	Machinery, plant, equipment, electrical devices, means of transportation of goods and persons, including cars, vehicles, trucks, and cranes	20
III	Furniture, fixtures and fittings, and other fixed assets	15

Interest expenses

Interest on loans used in the activity is deductible.

Bad debt

Bad debts approved by the tax authorities in accordance with the criteria set out in the tax law are deductible.

Charitable contributions

Donations, gift aid, and subscriptions to charitable, humanitarian, scientific, cultural, or sporting activities paid in Qatar to government authorities or public bodies are deductible, provided the value does not exceed 5% of net profit in the year in which the deduction is claimed.

Taxes

Taxes and duties other than the income tax provided for in the law are deductible.

Other significant items

Other deductible expenditures include the following:

- Employee costs (including salaries, wages, gratuities, and other end of service benefits).
- Losses resulting from the sale of assets.
- Rents.
- Insurance premiums.

Qatar

Net operating losses

Losses may be deducted from net income during the year. Losses can be carried forward for three years after the year in which they were incurred. Losses cannot be carried back.

Allocations of overhead to branches

The branch's share of head office expenses (i.e. indirect or allocated overhead) generally is deductible only up to a certain limit. The deduction is capped at 3% (1% for banks) of the total revenue less certain other costs.

Group taxation

There is no definition of a 'group' for Qatar tax purposes; therefore, there is no concept of group taxation.

Anti-avoidance provision

The Qatar tax law contains an anti-avoidance provision which gives the Qatar tax authorities wide powers to counteract transactions that have been carried out with a tax avoidance purpose. These powers include substituting an arm's-length value or recharacterising transactions.

Transfer pricing

The executive regulations have made it clear that the anti-avoidance provision will be applied to related-party transactions. In determining the arm's-length value, the Unrelated Comparable Price Method should be used (i.e. the price of services or goods that would have been applied should the transaction be between unrelated parties). It is possible to make an application to the Qatar tax authorities to use another method approved by the Organisation for Economic Co-operation and Development (OECD).

Thin capitalisation

There are no specific thin capitalisation rules in Qatar.

Tax credits and incentives

Foreign tax credit

Unless double tax relief is available under a double tax treaty (DTT), there is no tax relief available under the Qatar tax law for tax suffered by Qatari companies overseas.

Qatar Science and Technology Park

Qatar has established the QSTP, which is aimed at entities with research and development (R&D) activities. QSTP entities can be fully exempt from Qatar tax; however, tax exempt entities are required to file tax returns.

Other tax exemptions

An application for a tax exemption may be made for certain projects that are considered to be strategically significant to the Qatar economy. The exemptions are generally granted for a period of three or six years. Applications for an exemption are assessed based on certain criteria set out in the Qatar tax law.

Notwithstanding the fact that an exemption is granted, an entity that is exempt is still required to file a tax return under the Qatar tax law.

Withholding taxes

WHT is levied on certain payments made to non-residents in relation to royalties and technical services (the applicable rate is 5%) and on interest, commissions, brokerage fees, directors' fees, attendance fees, and any other payments for services carried out wholly or partly in Qatar (the applicable rate is 7%). WHT on interest was suspended until 1 July 2011, but is now applicable. The executive regulations have excluded certain payments from the scope of WHT.

The company that makes the payment to its foreign supplier is required to withhold the tax and remit to the tax department the funds that were withheld by the 16th day of the following month. In the event that the company does not make a payment to the tax department, the company will be liable for a penalty equal to the amount of unpaid tax due, in addition to the WHT.

Retention system

Pursuant to circulars issued by the tax department, a retention system is in place whereby certain final contract amounts are required to be retained from payments made by Qatari entities to foreign entities in connection with work performed in Qatar. All ministries; government departments; public, semi-public, and private establishments; and Qatar taxpayers are required to retain. Companies resident in Qatar and permanent branches can secure a release of the final payment by presenting a tax card. A retention equivalent to the higher of 3% of the contract value or the final contractual payment will apply to branches registered for activities of at least one year until they produce a tax clearance certificate from the Qatar tax authorities. All other non-residents are expected to be subject to WHT in respect of payments that fall within the scope of WHT.

Tax treaties

Qatar has a growing DTT network with around 50 DTTs currently in force. The WHT rates under these treaties in respect of dividends, interest, and royalties are as follows:

Recipient	WHT (%)			Effective date
	Dividends	Interest	Royalties	
Algeria	0	0	0/5 (12)	
Armenia	5/10 (1)	5	5	1 Jan 2008
Austria	0	0	5	1 Jan 2012

Notes

- 5% if capital exceeds USD 100,000, and 10% in all other cases.
- 0% if the beneficial owner is a company that owns at least 10%, 5% if 10% direct participation is held by an individual who has resided in the relevant state for a period of at least 48 months, and 10% in all other cases.
- 5% if the beneficial owner is a company that has owned directly or indirectly at least 25%, and 10% if participation is less than 25%.
- 5% if the beneficial owner is a company that owns at least 10%, and 10% in all other cases (i.e. less than 10% shareholding).
- 0% if the beneficial owner is a company that owns at least 7.5%, and 10% in all other cases (i.e. less than 7.5% shareholding).
- 5% if the beneficial owner is a company that owns at least 10%, and 15% in all other cases (i.e. less than 10% shareholding).
- 5% if the beneficial owner is a company that holds directly at least 10%, 10% if the beneficial owner is an individual that holds directly at least 10%, and 15% in all other cases.
- 10% if the beneficial owner is a company that has owned at least 25%, and 15% in all other cases (i.e. less than 25% shareholding).

9. 0% where the beneficial owner of the interest carries on business in the other contracting state where the interest arises (i.e. through a PE therein), and 5% if the contracting company does not have a PE.
10. 0% if interest arising in contracting state is derived from government debt, and 10% if the contracting company does not have a PE.
11. It should be noted that there is limited information available in respect of the treaty with this country, and the date provided above may be the date on which the treaty entered into force rather than its effective date.
12. Reduced to zero if the beneficial owner has a PE in the contracting state.
13. 10% if the beneficial owner is a company that has at least a 10% shareholding; 15% in all other cases.

Tax administration

Taxable period

The tax year is generally the same as the calendar year, although advance approval may be sought from the Qatar tax authorities to use a company's accounting year end.

Tax returns

The tax return is due within four months from the date of a company's tax filing period.

Payment of tax

The tax payable is based on the tax declaration and should be paid on the same day that the tax return is due.

Late filing penalties

The Qatar tax law contains a penalty regime, which imposes a penalty for the late filing of a tax return. In addition, a penalty applies where there is a late payment of tax.

Objection and appeals process

It is possible for a taxpayer to initially object directly to the tax department regarding a decision related to a tax position. If the objection is unsuccessful with respect to altering the tax department's decision, an appeal may be made by the taxpayer to the Tax Appeals Committee. Based on the Tax Appeals Committee's decision with respect to the appeal, a final appeal may be made by either the tax department or the taxpayer to the administrative chamber of the court. The law prescribes time limits for each stage of the appeal process.

Accounting and audit requirements

A company's CIT return is required to be accompanied by audited financial statements if the company's capital or profit exceeds 100,000 riyals (QAR) or the head office is situated outside Qatar. The audit report must be signed by a Qatar registered auditor.

Qatar tax law requires accounts to be prepared in accordance with IFRS.

Accounting record retention

All accounting books, registers, and documents relating to activity in Qatar are required to be retained in Qatar for a ten-year period.

Significant developments

Corporate taxation

- Specific fiscal rules have been introduced for financial institutions that apply the International Financial Reporting Standards (IFRS) as of 1 January 2012.
- If certain conditions are met, rescheduling of tax payment obligations may be granted upon request to taxpayers for a period of up to five years based on their financial situation and total tax burden.
- As of 1 October 2011, a new concept was introduced in the civil law regarding administration of patrimony fiduciary agreements. Specific tax treatment has also been provided for both profit and income tax purposes.
- As of 1 January 2013, taxpayers may opt to declare and pay the annual profit tax by making quarterly advanced payments, with some exceptions mentioned by the law (e.g. banks, non-profit organisations, taxpayers deriving income from agriculture).
- In cases where taxpayers have not submitted their tax returns, the tax authorities will assess by default the tax liabilities subject to self-assessment or withholding for every fiscal obligation in the taxpayer's fiscal liabilities records for each fiscal period for which tax returns were not submitted.
- Fuel expenses for vehicles, which meet certain characteristics, are now only 50% deductible for profit and income tax purposes. Starting 1 July 2012, this limitation will not apply for cars used exclusively for business purposes.
- For tax liabilities overdue as at 31 August 2011, late payment penalties can be reduced by 50% if the main fiscal obligations and the related interest are paid by 30 June 2012.

Value-added tax (VAT)

- Supplies of cereals and industrial crops performed in Romanian territory between companies registered for VAT purposes will be subject to the reverse charge mechanism. The measure applies until 31 May 2013.
- As of 1 February 2012, companies that are legally independent but are closely related in terms of financial, economic, and organisational purposes may choose to form a tax group, as long as they are administered by the same competent fiscal body.
- The VAT deduction right related to the acquisition of vehicles used exclusively for passenger transport, which meet certain characteristics, and also to the acquisition of fuel used for such vehicles is limited to 50%.
- The tax authorities may cancel *ex officio* a taxpayer's VAT registration if the taxpayer has not fulfilled certain compliance requirements.

Taxes on corporate income

The standard profit tax rate is 16% for Romanian companies and foreign companies operating through a permanent establishment (PE) in Romania. Resident companies are taxed on worldwide income, unless a double tax treaty (DTT) stipulates otherwise. Non-resident companies are taxed only on Romanian-source income.

The profit tax liability due from nightclubs and gambling operations cannot be less than 5% of the revenue obtained from such activities.

Micro-company tax regime

The 3% income tax for micro-companies was reintroduced as of 1 January 2011, with restrictive conditions for application. The tax is optional in the sense that qualifying taxpayers may apply for the micro-company tax regime or continue to be profit taxpayers.

Companies can opt for the micro-company regime if they the following criteria at the end of the previous year:

- Derive their turnover from activities other than banking, capital markets activity, insurance, gambling, consultancy, and management.
- Have between one and nine employees.
- Their annual turnover is lower than the Romanian leu (RON) equivalent of 100,000 euros (EUR).
- Their shares are not held by the state, local authorities, or a legal entity with more than 250 employees.

Payment of the tax and filing of the returns is made quarterly, by the 25th day of the month following the ending of the quarter for which the tax is computed.

The tax assessment base for micro companies' income is represented by income derived from any source.

The option to be transferred under this tax regime is communicated to the tax authorities by 31 January of the year for which tax on micro-company income is paid. The option is final for the respective fiscal year. If during the fiscal year one of the eligibility conditions is not met anymore, the micro-company is required to maintain for the respective fiscal year the same taxation system, without having the possibility to further benefit from these provisions for the next period, even if subsequently they return to being compliant.

Local income taxes

There are no local taxes on corporate income.

Corporate residence

A company is considered resident in Romania if it was set-up under Romanian law or has its place of effective management in Romania.

The tax code also introduced the concept of 'legal person set-up in accordance with European legislation'. Such legal persons become tax residents if they establish (or transfer) their registered office in Romania. As a result, such entities are subject to the same tax treatment as Romanian legal persons for taxation of profits and dividends.

Romania

Permanent establishment (PE)

PE is defined as being the place through which the activity of a non-resident is conducted, fully or partially, directly or through a dependent agent.

Once a PE is created, Romania has the right to tax the profits of the foreign enterprise derived from the activity performed on its territory.

The Romanian legislation explicitly states three conditions that should be met simultaneously in order to trigger a PE:

- A place of business must exist (e.g. premises, machinery, or equipment).
- The place of business must be fixed (i.e. must be established at a distinct place with a certain degree of permanence).
- The activity should be carried out through this fixed place of business (i.e. there are people dependent on the enterprise and conducting its business in the country where it is located).

The registration, filing, and payment requirements for a PE are similar to those for a Romanian company.

Other taxes

Value-added tax (VAT)

The standard rate of VAT is 24% and is applied to all supplies of goods and services (including imports) that do not qualify for an exemption (with or without credit) or for the VAT reduced rate.

The reduced VAT rate is 9% and is applicable to admission fees at museums, historical monuments, architecture and archaeological monuments, zoos and botanical gardens, fairs and exhibitions, cinema tickets, supply of school manuals, books, newspapers and periodicals, supply of prostheses and orthopaedic products (except for dentures), medicine for human and veterinarian use, and accommodation in hotels or in areas with a similar function.

VAT exemption without credit applies to a range of activities, including banking, finance, and insurance.

However, some financial services are also subject to a 24% VAT (e.g. factoring, debt collection, managing, and depositing certain equity papers).

There are also operations that are exempt with credit (i.e. deduction right) for input VAT, such as the following:

- Export of goods, transport, and related services.
- Intra-community supply of goods.
- International transport of passengers.
- Goods placed in free trade zones and free warehouses.
- Supply of goods to a bonded warehouse, a VAT warehouse, and related services.
- Supply of goods, which are placed under suspensive customs regimes.
- Supply of services in connection with goods placed under suspensive customs regimes.
- Supply of goods and services to diplomatic missions, international organisations, and North Atlantic Treaty Organization (NATO) forces.

VAT on imported goods continues to be paid at customs, except for taxable persons registered for VAT purposes that obtain an import VAT deferment certificate from the customs authorities. For these taxpayers, the VAT is not paid at customs but is shown in the VAT return as both input and output VAT. The import VAT deferment is available only to companies for which the value of the imports performed in the previous year/previous 12 consecutive months has reached the threshold of minimum RON 100 million.

The rules for establishing the place of supply of goods and services (and therefore the place of VAT taxation) are fully aligned with the Recast of the European Union (EU) VAT Directive. Services provided by offshore entities to Romanian companies with deemed place of supply in Romania are subject to Romanian VAT.

Reduced VAT at the rate of 5% for sale of buildings

Companies selling buildings can apply for a reduced VAT, at the rate of 5%, in the following cases:

- The buildings are part of a social policy, such as homes for the elderly, retirement homes, orphanages, or rehabilitation centres for children with disabilities.
- The building is supplied as housing to an individual or family and has a maximum useful surface of 120 square metres and a value of less than RON 380,000 (exclusive of VAT).

Reverse charge mechanism

Under the VAT reverse charge mechanism, VAT is not actually paid, but only shown in the VAT return as both input and output tax, provided the beneficiary is registered for VAT purposes.

The reverse charge mechanism applies for services performed by offshore entities, and the place of supply is where the beneficiary is established or has a fixed establishment (e.g. consultancy, marketing services, telecommunications, and electronically supplied services). This is possible provided the suppliers are not established in Romania for VAT purposes.

Supplies of cereals and industrial crops performed on the Romanian territory between companies registered for VAT purposes will be subject to the reverse charge mechanism. The measure applies until 31 May 2013.

VAT compliance

As a general rule, the fiscal period is the calendar month. For taxable persons registered for VAT purposes whose previous year-end turnover did not exceed EUR 100,000, the fiscal period is the calendar quarter.

Taxable persons must keep complete and detailed records for calculation of VAT liabilities.

VAT returns should be submitted to the tax authorities by the 25th day of the month following the end of the fiscal period; the VAT is due by the same date. The VAT return should be submitted using an electronic carrier.

Taxable persons not registered for VAT purposes are required to pay VAT and to submit a special VAT return on services rendered by non-residents, which have a deemed place of supply in Romania. These obligations must be fulfilled by the 25th day of the month following that in which the services are performed.

Romania

Taxable persons are required to file twice yearly for acquisitions and supplies of goods and services performed on Romanian territory, based on the existence of invoices.

A taxable person who does not exceed the exemption threshold of EUR 35,000 during a calendar year may request, during the year, deregistration from the records of the persons registered for VAT purposes in order to apply the special exemption regime. As of 1 July 2012, the threshold was increased to RON 220,000 (approximately EUR 50,000).

Customs regulations

Customs values are determined and declared by importers in accordance with the provisions of the World Trade Organisation (WTO) Customs Valuation Agreement (i.e. the Agreement pertaining to the implementation of Article VII of the General Agreement on Trade and Tariffs [GATT]).

For chain transactions with goods intended for import, the customs value may be determined, under certain conditions, based on the price in any of the transactions in the chain (first sale principle). This way, the customs value can be determined based on a price lower than that paid or payable by the importer (e.g. based on the price of the first transaction in the chain).

The customs value can be modified within 12 months of the acceptance of the customs declaration for the release of the goods for free circulation, in specific cases (e.g. in the case of defective goods).

Under specific conditions, determining customs value upon import is possible, even if certain elements that need to be added to the customs value are not quantifiable on the importation date (e.g. licence fees, royalties) or are missing.

The customs authorities may inspect the customs value either during the customs clearance or during a post-import audit (the customs authorities are entitled to perform such an audit during a five-year period following the date of import).

It is also possible to amend or invalidate the customs declaration, as follows:

- Amendment of the customs declaration before the customs clearance is obtained.
- Invalidation of the customs declaration within 90 days of the customs clearance being obtained.
- Amendment after the customs clearance is obtained, which can be performed at the request of the traders within five years of the customs clearance date.

Customs duties

The customs duties are those specified in the EU Common Customs Tariff and are expressed as a percentage applied to the customs value (i.e. *ad valorem* taxes) or as a fixed amount applied to a specific quantity (i.e. specific taxes).

Agricultural products (i.e. products from chapters 1-24 of the EU Common Customs Tariff) are subject to specific taxation.

In certain cases (e.g. meat), the customs duty rate is established with regard to the cost, insurance, and freight (CIF) or the entry price of the products. In other cases, the customs duty rate is established by adding additional duties, such as agricultural components, to the *ad valorem* tax.

Customs representation

Legal entities established in non-EU states can declare goods by indirect representation. The indirect representation can be used for customs regimes such as transit or temporary importation.

Moreover, legal entities established in non-EU states can occasionally declare goods on their own or through direct representation, provided that the customs authorities consider this to be justified.

Customs brokers can be authorised to use the local customs clearance procedure or to submit simplified customs declarations for the companies they represent (either directly or indirectly). Any Romanian legal person can act as an indirect representative for a sole person using the simplified customs clearance procedures.

Authorised Economic Operator (AEO) status

Operators that obtain AEO status benefit from simplifications regarding customs inspection, obtaining customs authorisations, and performing customs formalities.

Moreover, through the AEO certificate, the holder is recognised by the customs authorities as a reliable person, giving comfort as regards observance of the safety and security standards.

Customs rulings

Companies can obtain rulings (binding tariff information or BTI) from Romanian customs authorities regarding the tariff classification of imported goods that are binding for the customs authorities for a six-year period, whenever goods identical to those described in the BTI are imported.

A similar type of ruling can also be obtained regarding the origin of goods (binding origin information or BOI). The BOI is valid for a three-year period.

Excise duties

Harmonised excisable products

The following products are subject to harmonised excise duties: ethyl alcohol and alcoholic beverages, tobacco products, energy products (e.g. unleaded petrol, diesel oil, gas, coal), and electricity.

Excise duties are due when excise goods are released for consumption (e.g. imported into Romania, taken out of an excise duty suspension regime).

Excisable products can be produced, transformed, held, and received under a duty suspension arrangement only in a tax warehouse, which should have prior approval from the tax authorities. Such excisable products can also be received from within the European Union under excise duty suspension arrangements by registered consignees.

Mandatory guarantees should be established for the production, processing, and storage, as well as for the movement, of excise goods under the excise duty suspension regime.

Ethyl alcohol and other alcoholic products are exempt from the payment of excise duties if they are denatured and used in the nutritional, pharmaceuticals, or cosmetics industry. There are also exemptions for ethyl alcohol and other alcoholic beverages when used in a manufacturing process, provided that the final product does not

Romania

contain alcohol, or as samples for analysis, for necessary production tests, or for scientific purposes.

Some energy products, subject to movement control, can be purchased to be used for purposes excepted from excise duty, provided that an end-user authorisation is obtained and the payment of excise duties is secured.

In some cases, traders can claim a refund of the excise duties paid (e.g. excise duty paid for goods released for consumption in Romania, but intended for consumption in other EU Member States; excise duties paid for goods released for consumption and then returned to the production tax warehouse for recycling, reprocessing, or destruction; excise duties paid for goods acquired from the European Union or imported and then returned to the suppliers).

Before being released for consumption in Romania, spirit-based beverages and tobacco products have to be marked with duty stamps. The responsibility for such marking lies with the tax warehouse keepers, registered consignees, and importers releasing such goods for consumption.

For cigarettes, the excise duty owed is equal to the sum of the specific excise duty and the *ad-valorem* excise duty. The specific excise duty expressed in EUR/1,000 cigarettes is annually determined based on the ponderate medium retail price, the legal percentage related to the *ad-valorem* excise duty and the total excise duty.

The level of the minimum excise duty for cigarettes is 96%.

The total level of excise duty on cigarettes is set at EUR 76.60/1,000 cigarettes. The minimum excise duty payable has been set at EUR 74/1000 cigarettes at 1 July 2011.

Excise duty rates for fermented still beverages, other than beer and wines, are set at EUR 100/hectolitre of product, and for intermediary products are set at EUR 165/hectolitre.

The current level of excise duties on gasoline and diesel are EUR 467/tonne and EUR 358/tonne, respectively.

Companies selling fuel in gas stations have to register with the tax authorities.

Other excisable products

Other excisable products are green coffee, roasted coffee (including coffee with substitutes), and soluble coffee (including blends with soluble coffee).

Companies performing exports or intra-community supplies of coffee may benefit from the refund of the excise duty paid for the coffee used as raw materials.

Traders purchasing coffee are entitled to a refund of the excise duties paid, if the products are exported, supplied to another EU member state, or returned unchanged to the supplier.

Property taxes

Building tax

For buildings owned by companies, the building tax rate is set by the Local Council at between 0.25% and 1.5% of the entry value of the building, adjusted by the value of

reconstruction, consolidation, modification and extension works, and the revaluation, if applicable. If a building has not been revalued in the last three years, the rate will be increased by between 10% and 20%, while if it has not been revalued in the last five years, the rate will be increased by between 30% and 40%. The taxable value of fully depreciated buildings is reduced by 15%.

Building tax is paid twice a year, by 31 March and 30 September, in equal instalments. As a general rule, if the building tax due for the entire year is paid in advance by 31 March, a reduction of up to 10% may be granted by the Local Council.

Land tax

Owners of land are subject to land tax established at a fixed amount per square metre, depending on the rank of the locality where the land is located and the area or category of land use, in accordance with the classification made by the Local Council.

Companies are not subject to land tax on land where buildings are sited.

Similar to building tax, land tax is paid twice a year, in equal instalments, by 31 March and 30 September. A 10% reduction is granted for full advance payment of this tax by 31 March.

Transfer taxes

There are no transfer taxes for companies for the transfer of property. The income derived from such a transfer will be included into the taxable profits of the company and subject to the flat tax rate.

Stamp duty

For judicial claims, issue of licences and certificates, and documentary transactions that require authentication, stamp duty has to be paid.

Environmental taxes

All producers of electric and electronic equipment (EEE) have to provide a guarantee to the Environmental Fund for the EEE placed on the market. The guarantee consists either in a bank guarantee letter or collateral, a waste recovery insurance policy, or adhering to one of the authorised collective organisations with attributions regarding EEE waste management, which acts on behalf of the producers.

In certain cases (e.g. packaging waste), the contribution to the Environmental Fund depends on the degree to which companies achieve the recovery/recycling targets stipulated by the relevant legislation on waste management. Thus, for packaging waste, the contribution to the Environmental Fund is currently RON 2 per kilogram of packaging introduced onto the market and is owed for the difference between the recovery target stipulated by law and the percentage actually achieved by companies.

A tax of RON 2/litre is levied on any shortfall of targeted waste recovery for industrial oils and lubricants placed on the market.

Companies conducting activities that result in the discharge of air-pollutant emissions from fixed sources (e.g. nitrogen oxides, sulphur oxides, persistent organic pollutants, heavy metal emissions, such as lead, cadmium, mercury) have to pay contributions to the Environmental Fund of between RON 0.02/kg (about EUR 0.0046) and RON 20/kg (about EUR 4.65).

Romania

Importers and producers of hazardous substances have to remit to the Environmental Fund a contribution of 2% of the value of the substances hazardous to the environment placed on the market. Companies selling ferrous and non-ferrous waste and administrators or owners of forests also have to make contributions to the Environmental Fund, currently set at 3% and 2%, respectively, of the resulted revenues.

Companies that store recoverable waste (i.e. waste resulting from extraction and processing of crude oil, waste resulting from primary processing of wood, waste resulting from alcohol manufacturing, carboniferous slurry, furnace slag, ashes from thermal power plants, pyrites ashes, phosphogypsum, metal slag) on new plots of land have to pay tax to the Environmental Fund. This tax ranges from RON 0.2 (about EUR 0.046) per square metre to RON 4 (about EUR 0.93) per square metre per year, depending on the type of waste stored on the new land.

The contribution for tyres placed on the market is RON 2/kg.

Producers/importers wishing to place batteries and chargeable cells on the market are required to register with the National Agency for Environmental Protection.

Placement on the market of portable batteries containing more than 0.002% cadmium by weight is prohibited. Distributors are also prohibited from selling batteries originating from unregistered producers.

Chemical substances and preparations traded on the market must be registered with the European Agency for Chemical Products. Registration is the only way for producers and importers of chemical substances to be allowed to continue production and import of chemical substances and preparations.

Social security contributions

Employers must pay social security contributions, calculated on the gross salary costs, as follows: 20.8%, 25.8%, or 30.8%, depending on working conditions. The monthly contribution is capped at five average gross salaries multiplied by the number of insured individuals.

Other contributions payable by employers for employees, calculated on gross salary costs, are as follows:

- Contribution for medical leaves: 0.85%
- Health fund: 5.2%
- Unemployment fund: 0.5%
- Guarantee fund: 0.25%
- Work accidents insurance fund: 0.15% to 0.85%

Branch income

Branch

A foreign company can set up a branch in Romania, as long as the branch only operates in the same field of activity as the parent company.

Profits derived by the branch are taxed at the standard profit tax rate of 16%.

Representative offices

Representative offices are often established as a first step to operating in Romania. A representative office can undertake only auxiliary or preparatory activities, cannot trade in its own name, and cannot engage in any contractual activity. A representative office can perform only a limited range of activities without being considered a PE for profit tax purposes.

Representative offices are subject to a yearly flat tax of EUR 4,000 (payable in local currency, i.e. Romanian leu). It has to be paid in two instalments, by 25 June and 25 December. If a representative office is set up or closed down during a year, the tax due for that year is prorated on the basis of the number of months the representative office operated in that fiscal year.

Income determination

The taxable profit of a company is calculated as the difference between the revenues derived from any source and the expenses incurred in obtaining taxable revenues throughout the tax year, adjusted for fiscal purposes by deducting non-taxable revenues and adding non-deductible expenses. Other elements similar to revenues and expenses are also to be taken into account when calculating the taxable profit.

For taxpayers that apply IFRS, there are specific rules in relation to fiscal value assessment, profit tax computation, adjustments for step-down in value, amortisation, and fiscal treatment of deferred profit tax.

Inventory valuation

The methods permitted for inventory valuation under Romanian law are standard cost, detailed sale price, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO).

Assets are generally valued at their acquisition cost, production cost, or market value. Fixed assets may be revaluated at certain points in time for various purposes.

Capital gains

Capital gains earned by a Romanian resident company are included in ordinary profits and are taxed at 16%. Capital losses related to sale of shares are, in general, tax-deductible. Capital gains obtained by non-residents from real estate property located in Romania or the sale of shares held in a Romanian company is also taxable in Romania. However, the income may be subject to treaty protection.

Dividend income

Dividends received by a Romanian company from another Romanian company are not subject to the profit tax, but are subject to a final withholding tax (WHT) of 16%.

Dividends received by a Romanian company from a foreign company are taxed at the normal profit tax rate in Romania. Credit is available for tax paid abroad.

Dividends received from a foreign or Romanian legal person from all member countries of the European Economic Area (EEA) are not taxable if the Romanian legal person has held a minimum of 10% of the shares in the foreign legal person for an uninterrupted period of at least two years on the date when the dividend is paid.

Romania

Interest and royalty income

Interest and royalty payments by Romanian companies to other Romanian companies are taxable income in the hands of the beneficiary.

As of 1 January 2011, Romania-sourced interest and royalty payments of an affiliated company, resident in a EU or European Free Trade Association (EFTA) member state, are exempt from WHT, provided certain conditions are met, e.g.:

- 25% minimum direct holding of the share capital (i.e. one company holds minimum 25% of the share capital in the other company or a third company holds more than 25% of the share capital in both companies involved in the payment of interest and royalties).
- The minimum holding period of two years until the date when the interest or royalty payments are made has lapsed.
- The company receiving the interest or royalties payment must be the beneficial owner of these payments.

Fiduciary contracts

Provisions regarding the fiscal treatment applicable to income realised from fiduciary contracts entered into force as of 1 October 2011. Therefore, if the constitutor is also the beneficiary,:

- the transfer of the patrimony mass from the constitutor to the fiduciary is not considered a taxable transfer, and
- the fiduciary will keep separate bookkeeping entry for the fiduciary patrimony mass and will communicate to the constitutor, on a quarterly basis, the income and expenses resulted from the administration of the patrimony.

If the beneficiary is the fiduciary or a third party, the expenses recorded from the transfer of the patrimony mass from the constitutor to the fiduciary is considered non-deductible.

Other significant items

The other most relevant types of non-taxable revenues stipulated by the Romanian Fiscal Code include the following:

- Favourable differences of participation titles, registered as a result of incorporating reserves, benefits, or issue premiums from companies in which participation titles are held.
- Revenues from reversal or cancellation of provisions/expenses that were previously non-deductible, recovery of expenses that were previously non-deductible, and revenues from reversal or cancellation of interest and late payment penalties that were previously non-deductible.
- Income from the annulment of a reserve registered as a result of a participation in nature to the capital of other legal entities.
- Income from deferred income tax and those representing a change in fair value of real estate investments, by taxpayers applying IFRS.
- Non-taxable income expressly provided for under agreements and memoranda.

Foreign income

Resident companies are taxed on worldwide income, unless a DTT stipulates otherwise. However, in case of foreign subsidiaries of Romanian companies, income is not taxed in Romania until remitted back. Otherwise, there is no specific tax deferral regime in place.

Deductions

From the deductibility standpoint, expenses fall into three categories: deductible expenses, limited deductibility expenses, and non-deductible expenses.

Deductible expenses

As a general rule, expenses are deductible only if incurred for the purpose of generating taxable income.

Some of the deductible expenses specifically mentioned by the Fiscal Code include the following:

- Marketing and advertising expenses.
- Research and development (R&D) expenses that do not meet the requirements to be recognised as intangible assets for accounting purposes.
- Expenses incurred for environmental protection and resource conservation.
- Expenses incurred for management improvement; updating information technology (IT) systems; introducing maintaining, and developing quality management systems; and obtaining quality compliance confirmation.
- Bad debt expenses are fully deductible in any of the following cases: the bankruptcy procedure of the debtor was closed based on a court decision; the debtor is deceased and the receivable cannot be recovered from the heirs; the debtor is dissolved or liquidated; the debtor has major financial difficulties affecting its entire patrimony.
- Expenses determined by unfavourable differences in value of long-term participation titles in legal persons, as well as unfavourable value differences related to long-term bonds.
- Travel and accommodation expenses related to business; this also includes personnel's transport to and from the workplace.
- Expenses incurred from professional training and development of employees.
- Expenses resulted from benefits granted to employees as equity instruments settled with cash, at the moment of the grant, if the benefits are subject to personal income tax (PIT).
- Expenses incurred in relation to work safety, prevention of work accidents and occupational diseases, the related insurance contributions, and professional risk insurance premiums.
- Expenses incurred with the acquisition of packaging materials, during the useful life set by the taxpayer.
- Fines, interest, penalties, and other increased payments due under commercial contracts.

Beneficiaries that acquire goods and/or services from inactive taxpayers (while they are inactive) cannot deduct the expenses related to such acquisitions, except for purchases made during enforcement proceedings.

Limited deductibility expenses

The deductibility of certain expenses is limited, as follows

- Interest and foreign exchange losses under thin capitalisation rules (*see the Group taxation section for more information*).
- Depreciation of assets under fiscal depreciation rules (*see details below*).
- Perishable goods capped as set by the relevant central administration bodies.
- Protocol expenses are deductible up to the limit of 2% of the difference between total taxable revenue and total expenses related to taxable revenue, except for protocol and profit tax expenses.

Romania

- Daily allowances for expenses from domestic and foreign travel by employees are deductible up to the level of 2.5 times the ceiling set for public institutions.
- Social expenses are deductible up to 2% of salary expenses. Among others, they can include maternity allowances, expenses for nursery tickets, funeral benefits, and allowances for serious or incurable diseases and prostheses, as well as expenses for the proper operation of certain activities or units under taxpayers' administration (i.e. kindergartens, nurseries, health services supplied for occupational diseases and work accidents prior to admission to health establishments, canteens, sports clubs, clubs, etc); expenses incurred for benefits granted under a collective labour agreement are also deductible within this limit.
- Health insurance premiums are deductible for employers up to the limit of EUR 250 per year, per person; private pension insurance premiums are deductible up to the limit of EUR 400 per year, per person.
- Taxes and contributions paid to non-government organisations and professional associations related to the taxpayer's activity are deductible up to the limit of EUR 4,000 per year.
- Expenses from operation, maintenance, and repair of vehicles used by individuals in company leadership and management positions for business purposes are deductible within the limits, but only for one vehicle per person.
- Fuel expenses for company vehicles weighing under 3,500 kg and with fewer than nine passenger seats (including driver's seat) that are not used exclusively for business purposes are deductible in a quantum of 50%. Exceptions to this rule are vehicles used in the following activities:
 - Intervention, repair, safety and security, courier services, cars used by sales and acquisitions agents.
 - Paid transportation services and taxi activities.
 - Rental.
 - Driving schools.
 - Vehicles used as commodities.

Non-deductible expenses

Expenses which are specifically non-deductible include, among others, the following:

- Domestic profit tax and profit tax paid in foreign countries.
- Expenses related to non-taxable revenues; note that revenues from dividends have no corresponding expenses.
- Expenses related to WHT supported by Romanian taxpayers on behalf of non-residents.
- Interest, fines, and penalties due to Romanian or foreign authorities.
- Expenses incurred from management, consultancy, assistance, or other supply of services if no contracts or any other lawful agreements are entered into and the beneficiary cannot justify the supply of such services for the activities performed and their necessity.
- Sponsorship and patronage expenses and expenses for private scholarships. Taxpayers are, however, granted a fiscal credit up to whichever is the lower of 0.3% of turnover and 20% of the profit tax due.
- Other salary and/or similar expenses (if not taxed at the level of the individual), except for those specifically exempted from individual income taxation.
- Expenses resulted from benefits granted to employees as equity instruments settled with shares. These are elements similar to expenses at the moment of the grant, if the benefits are subject to PIT.
- Expenses incurred from insurance premiums unrelated to company assets or business, save for those regarding goods which are bank collateral on loans used to

conduct the activity for which the taxpayer is authorised or those used under rental or leasing contracts.

- Bad debt expenses in excess of the deductible provision.
- Expenses recorded without justifying documents.
- Expenses in favour of shareholders, other than those related to goods or services provided by the shareholders at market value.
- Expenses incurred from fixed assets impairments as well as losses in value defined as provisory adjustments by the accounting regulations transposing European Accounting Directives.
- Expenses incurred from deferred profit tax and those representing a change in fair value of real estate investments by taxpayers applying IFRS.
- In the case of fiduciary contracts, expenses registered from the transfer of the patrimony mass from the constitutor to the fiduciary (if the beneficiary is the fiduciary or a third person).

Depreciation

Romanian law distinguishes between fiscal and accounting depreciation. Companies should maintain a separate record to reflect the separate computation of the fiscal and the accounting depreciation. Any accounting revaluations of fixed assets are not taken into account in computing the tax depreciation.

Assets are generally depreciated using the straight-line method. However, accelerated or digressive depreciation methods may be used to determine fiscal depreciation, while the accounting depreciation method may be different.

The useful lives to be used for tax purposes are the ones stated in the Official Fixed Assets Catalogue, published under government decision. Ranges are provided for classes of fixed assets, from which the taxpayers can choose the useful life (e.g. office and housing buildings: 40 to 60 years, commercial buildings: 32 to 48 years, commercial furnishings: 9 to 15 years, automobiles: 4 to 6 years).

Land cannot be depreciated.

Accelerated depreciation

Under the Fiscal Code, machinery and equipment, computers and their peripherals, as well as patents, may be depreciated by using the accelerated method, under which a maximum of 50% of the asset's fiscal value may be deducted during the first year of usage, while the rest of the asset's value can be depreciated using the linear method over the remaining useful life.

Goodwill

As a rule, goodwill is to be considered as a non-depreciable asset from a Romanian fiscal perspective.

Start-up expenses

Although according to accounting rules, start-up expenses may be capitalised and depreciated over a maximum five-year period, according to the fiscal rules, start up expenses should not be depreciated for tax purposes.

Fiscal losses

Profit tax is not deductible, nor are late payment interest and fines related to tax liabilities or social security obligations.

Romania

Provisions and reserves

Amounts used for setting up or increasing reserves or provisions are deductible as follows:

- Setting up or increasing the legal reserve fund to a limit of 5% of the yearly accounting profit before tax (with adjustments), until it reaches 20% of the share capital.
- Provisions for doubtful debts recorded after 1 January 2006, up to the limit of 30%, if the related receivables meet the following conditions simultaneously:
 - Booked after 1 January 2004.
 - Not collected for a period exceeding 270 days from the due date.
 - Not guaranteed by another person.
 - Due by a person not affiliated with the taxpayer.
 - Included in the taxable income of the taxpayer.
- Bad debt provisions, if all the following conditions are met:
 - Receivables are booked after 1 January 2007.
 - The debtor is a company declared bankrupt by a court ruling.
 - Receivables are not guaranteed by another person.
 - The debtor is not a related party.
 - Receivables were included in the taxable income of the taxpayer.
- Specific provisions established by credit institutions, non-banking financial institutions, and other similar entities.
- Technical reserves set up by insurance and reinsurance companies, in accordance with their regulatory legal framework, except for the equalisation reserve.
- Risk provisions for transactions carried out on financial markets, in accordance with the rules issued by the National Commission of Movable Assets.

The reduction or cancellation of any provision or reserve deducted from the taxable profit, due to changing the destination of the provision or reserve, distribution towards shareholders in any form, liquidation, spin-off, merger or any other reason, is included in the taxable revenues and taxed accordingly. The reconstruction of the legal reserve is also non-deductible.

Net operating losses

Companies are allowed to carry forward fiscal losses as declared in the yearly profit tax returns for a period of five years (for losses incurred prior to 2009) or seven years, based on a FIFO method. No related adjustment for inflation is allowed.

For foreign legal persons, this rule (i.e. carry forward of losses) applies only to revenues and expenses attributable to their PE in Romania.

Any loss incurred by a PE of a Romanian company located in a non-EU/EFTA member state or in a country which does not have a DTT in place with Romania is only deductible for tax purposes from the revenues derived by that PE, and losses can be carried forward only for a period of five years.

Carryback of losses is not available in Romania.

Group taxation

There is no tax consolidation or group taxation in Romania. Members of a group must file separate returns and are therefore taxed separately. No provision exists for offsetting the losses of group members against the profits of other group members.

Transfer pricing

Transfer pricing requirements are applicable to transactions between Romanian related parties as well as foreign related parties.

Transactions between related parties should observe the arm's-length principle. If transfer prices are not set at arm's length, the Romanian Tax Authorities have the right to adjust the taxpayer's revenues or expenses so as to reflect the market value.

Traditional transfer pricing methods (i.e. comparable uncontrolled prices, cost plus, and resale price methods), as well as any other methods that are in line with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines (i.e. transactional net margin and profit split methods), may be used for setting transfer prices.

Transfer pricing documentation

Taxpayers engaged in related party transactions have to prepare and make their transfer pricing documentation file available upon the written request of the Romanian Tax Authorities.

Transfer pricing audit activity has significantly increased during the past year, and requests for presenting the transfer pricing documentation file have started to become common practice. We are aware of recent cases where the Romanian tax authorities adjusted the taxable result of a local taxpayer in accordance with the applicable regulations.

The content of the transfer pricing documentation file has been approved by order of the president of the National Agency for Tax Administration. The Order is supplemented by the Transfer Pricing Guidelines issued by the OECD Transfer Pricing Guidelines and the Code of Conduct on transfer pricing documentation for associated enterprises in the European Union Transfer Pricing Document (EUTPD).

The deadline for presenting the transfer pricing documentation file will not exceed three calendar months, with the possibility of a single extension equal to the period initially established.

Failure to present the transfer pricing documentation file or presenting an incomplete file following two consecutive requests may trigger estimation of transfer prices by the tax authorities, based on generally available information, as the arithmetic mean of three transactions considered similar.

Advance pricing agreement (APA)

Taxpayers engaged in transactions with related parties can request that the National Agency for Tax Administration issue an APA. These taxpayers can also schedule a pre-filing meeting to discuss the feasibility of the APA.

The request for an APA is filed together with the relevant documentation and payment evidence of the fee (ranging between EUR 10,000 and EUR 20,000). The required documentation is based on the EUTPD and suggests up-front the content of the APA.

The term provided by the Fiscal Procedural Code for issuance of an APA is 12 months for unilateral APAs and 18 months for bilateral and multilateral APAs. The APA is issued for a period of up to five years. In exceptional cases, such as long-term agreements, it may be issued for a longer period.

Romania

APAs are opposable and binding on the tax authorities as long as there are no material changes in the critical assumptions. In this view, the beneficiaries are obligated to submit an annual report on compliance with the terms and conditions of the agreement.

If taxpayers do not agree with the content of the APA, they can notify the National Agency for Tax Administration within 15 days. In this case, the agreement does not produce any legal effects.

Thin capitalisation

If the company's equity is negative or the debt-to-equity ratio is higher than 3:1, all the interest expenses and the net losses from foreign exchange differences related to credits or loans with a reimbursement period longer than 12 months are non-deductible in the year in which they are booked. These expenses are carried forward to the following fiscal years, and they will become deductible when the debt-to-equity ratio becomes lower than 3:1.

The interest expenses and the net losses from foreign exchange differences related to loans from Romanian or foreign banks, leasing companies, and other entities expressly mentioned by law are fully deductible, without being limited by the debt-to-equity ratio.

Loans contracted directly or indirectly from Romanian or foreign banks, leasing companies, mortgage companies, and other entities expressly mentioned by the law are no longer taken into account when computing the debt-to-equity ratio.

The tax deductibility threshold for interest on foreign currency loans from non-financial institutions is 6%.

Tax credits and incentives

Foreign tax credits

Tax credits may be obtained in Romania for foreign taxes only if the DTT concluded between Romania and the foreign state applies and proper documentation confirming the tax was paid is available.

Research and development (R&D) incentives

Companies can benefit from an additional deduction of 20% from the eligible expenses in respect of their R&D activities. Moreover, accelerated depreciation may be applied for devices and equipment used in the R&D activity.

Dividend tax exemption for reinvestments

Distributed dividends are exempted from taxation if they are invested in the same or in another Romanian company's share capital.

To benefit from this exemption, dividends must be reinvested to preserve and increase the number of employees and to boost existing lines of business.

Local tax exemptions for business located in industrial parks, and scientific and technological parks

Industrial parks

No property tax is due for buildings and constructions located in an industrial park. Also, land within industrial parks is exempt from land tax.

Scientific and technological parks

The incentives granted for the set-up and development of scientific and technological parks include:

- Lower taxes on tangible assets and land used by the park.
- Exemption of specific taxes on land.
- Development programmes for infrastructure, investments, and equipment endowments granted by the local and central public administration companies, and foreign financial assistance.
- Donations, concessions, and structural funds for development.

Employment incentives for special categories

For employment of recent graduates, employers can apply for a monthly grant of 1 to 1.5 (depending on the level of educational background) multiplied by the reference social indicator (currently set at RON 500) for each new graduate of a recognised institution for a period of 12 months. Employers benefiting from this incentive are obligated to keep this employment relationship for a time period of at least three years.

Moreover, employers may also be exempt for these 12 months from paying the unemployment contribution due for these graduates. In addition, grants amounting to the social security contributions for two years for recent graduates are available if they are still employed by the company for two additional years after the first three years pass.

The same incentives apply for the employment of recent graduates with disabilities, except that the period for which the exemption from contributions to the unemployment fund and the monthly grants apply is extended to 18 months.

Employers can also apply for exemption from unemployment fund contributions and for a monthly grant equal to the reference social indicator for each unemployed person with an age exceeding 45 years, or for each such person who is the sole family supporter. This monthly grant is available for a period of 12 months. Employers benefiting from this incentive have the obligation to keep this employment relationship for at least two years.

Employers running professional training programmes for their employees may apply for a refund of 50% of their expenses for up to 20% of their workforce, subject to certain conditions and limitations.

Other facilities granted to taxpayers

The tax authorities introduced, during 2011, the following series of measures aimed at supporting taxpayers who find themselves in difficulty due to temporary lack of funds as a consequence of the economic context:

- Rescheduling of tax payment obligations:
 - The rescheduling may be granted by the tax authorities to individuals and legal entities upon request. The time-frame for the rescheduling cannot be longer

Romania

than five years and is set after taking into consideration the taxpayer's financial situation and the total tax burden.

- In order to benefit from the rescheduling of the tax payment obligations, taxpayers must meet certain conditions and also constitute a guarantee which covers the rescheduled liabilities, interest, and also a supplementary percentage of the rescheduled liabilities, which will vary between 10% and 40% depending on the duration of the rescheduling time-frame.
- Possibility of reducing late-payment penalties:
 - Late payment penalties of fiscal obligations outstanding as at 31 August 2011 are reduced by 50% if the main fiscal obligations and related interest are paid or offset by 30 June 2012.
 - For late payment penalties calculated for local taxes outstanding at 31 August 2011, the annulment of 25% of the late payment penalties related to the main fiscal obligations is granted if the main fiscal obligations and 75% of the late payment penalties, calculated up to the date of payment, are paid or offset by 30 June 2012.

Withholding taxes

Domestic dividend tax

Dividend payments by a Romanian company to another Romanian company are subject to 16% dividend tax.

Dividends received by a Romanian company from another Romanian company are not taxed if the beneficiary has held at least 10% of the Romanian company's shares for a continuous period of at least two years by the date of dividends payment.

WHT for non-residents

Non-resident companies are subject to WHT at 16% on other revenues derived from Romania, such as interest, royalties, revenues from services performed in Romania, dividends, revenues obtained from management and consultancy, services (irrespective of where the services are performed), commissions, and revenues derived from liquidation of a Romanian legal entity.

A 25% WHT applies on gambling proceeds obtained by non-residents.

Certain specific provisions and exceptions apply to non-resident WHT, as follows:

- As Romania is an EU Member State, the provisions of the Parent-Subsidiary Directive are applied. Thus, dividends paid by Romanian companies to companies resident in one of the EU/EEA Member States are exempt from WHT if the dividend beneficiary has held a minimum of 10% of the shares of the Romanian company for a continuous period of at least two years by the date of dividends payment.
- Dividend and interest income obtained from Romania by EEA registered pension funds is exempt from WHT.
- Romania has implemented the Interest and Royalties Directive. As of 1 January 2011, payments of interest and royalties made by Romanian companies to companies resident in EU/EEA Member States and holding at least 25% of the share capital of the Romanian company for a continuous period of at least two years prior to the date of payment of interest or royalties are exempt from WHT .

To comply with European legislation, non-residents are required to present the certificate of tax residence and a declaration stating compliance with the necessary requirements, including that they are the beneficial owner of the income.

The following categories of income derived from Romania by non-residents are exempt from WHT:

- Bonds issued and/or guaranteed by the Romanian government.
- Revenues from consultancy services under free-financing agreements signed between the Romanian Government/public authorities and foreign Governments/public authorities or international governmental/non-governmental organisations.
- Revenues from international transportation and accessory services.
- Prizes paid from public funds.
- Income obtained from a partnership constituted in Romania by a non-resident company. Such income is to be taxed under title II of the Fiscal Code, with corporate profit tax.

* If certain conditions are met.

In case there are different taxation quotas in the domestic legislation or in the DTT, the more favourable of the taxation quotas shall apply. If a taxpayer is a resident of a member state of the European Union, the taxation quota that shall apply to the taxable income obtained by such taxpayer in Romania is the more favourable of the taxation quotas provided in the domestic legislation, in the legislation of the European Union, or in the DTT.

Tax administration

Taxable period

The fiscal year is considered to be the calendar year or the period during which the entity existed if it was set up or ceased to exist during that calendar year.

The accounting year is also usually the calendar year, but certain categories of entities (i.e. Romanian branches of foreign companies, Romanian consolidated subsidiaries and subsidiaries of the subsidiaries of foreign companies, except for credit institutions) are allowed to set an accounting year other than the calendar year, if the financial year of the parent company is different from the calendar year. However, establishing a financial reporting period different from the calendar year does not modify the period for which profit tax is calculated as defined by the Fiscal Code, namely the calendar year.

Tax returns

Taxpayers (except for banks, non-profit organisations, and taxpayers deriving most of their income from agriculture) must submit fiscal statements by the 25th day of the first month following the first, second, and third quarters. The annual income tax return is due by 25 March of the following year (25 April prior to 2013).

Banks and branches of foreign banks in Romania apply the system of anticipated quarterly profit tax payments.

Non-profit organisations and taxpayers that obtain income mainly from crop production have to declare annual profit tax by 25 February.

Large and medium size taxpayers have the obligation to submit fiscal forms online, using the www.e-guvernare.ro portal. The electronic signature of the tax returns can

only be made using a qualified certificate issued by a legally accredited certification services provider. Other categories of taxpayers may use the electronic submitting method as an alternative way of compliance.

Taxpayers required to withhold tax, with the exception of salary payers, are obligated to submit a statement to the tax authorities regarding the tax withheld for each beneficiary by 30 June of the following year. This declarative obligation refers to tax withheld and paid by Romanian residents for income obtained in Romania by non-residents.

In cases where taxpayers have not submitted their tax returns, the tax authorities will assess by default the tax liabilities subject to self-assessment or withholding for every fiscal obligation in the taxpayer's fiscal liabilities records for each fiscal period for which tax returns were not submitted.

Payment of tax

Taxpayers (except for banks, non-profit organisations, taxpayers deriving most of their income from agriculture) must pay the quarterly profit tax by the 25th day of the first month following the first, second, and third quarters. The annual income tax has to be paid by 25 March of the following year (25 April prior to 2013).

Banks and branches of foreign banks in Romania apply the system of anticipated quarterly profit tax payments. The anticipated quarterly payments are calculated as a quarter of the previous year's profit tax increased by the consumer price index (CPI) inflation rate, and the payments are due by the 25th day of the month following the end of the quarter. The CPI inflation rate will be published by Order of the Ministry of Finance by 15 April of the year for which the anticipated payments are made. For 2011, the CPI inflation rate was 3.2%.

Non-profit organisations and taxpayers that obtain income mainly from crop production have to pay annual profit tax by 25 February.

Newly established companies (e.g. without a previous year history) or those which incurred fiscal losses in the previous year make quarterly advance payments at the level of the amount resulted from applying the profit tax rate on the accounting profit of the period for which the anticipated payment is made.

As of 1 January 2013, taxpayers (except those specifically mentioned by law) may opt to declare and pay the annual profit tax by making quarterly advanced payments. Such option has to be transmitted by 31 January of the fiscal year for which the taxpayer wants to apply it and has to be kept for at least two consecutive years.

Statute of limitations

The general statute of limitations period is five years, as of 1 January of the year following the one when the taxable events occurred, but is suspended during a tax inspection.

Non-resident companies

Non-resident companies deriving income from real estate property located in Romania or the sales of shares held in a Romanian company are obligated to declare and pay the related profit tax. Non-residents may appoint a tax agent to fulfil this requirement. However, if the payer of the income is a Romanian company or a PE, the non-resident companies have the obligation to pay and declare the profit tax.

Romania

For capital gains tax declaration and payment, the Romanian legislation requires the following tax returns to be submitted as follows:

- Quarterly statements, starting the 25th day of the month following the quarter in which the non-resident first earned capital gains taxable in Romania.
- An annual profit tax return.

The quarterly statements and annual return must be submitted during the entire period of time the non-resident is registered with the Romanian tax authorities, even if it no longer carries out transactions generating taxable revenues in Romania.

Late-payment penalty

The late-payment interest is 0.04% for each day of delay, and the following late-payment penalties are due:

- 5% of the fiscal liabilities, if the payment is made after 30 days but before the expiry of the 90 days from the due date.
- 15% of the remaining unpaid fiscal liabilities, if the payment is made after 90 days from the due date.

Late-payment penalties for the fiscal claims due to local budgets are owed in the amount of 2% of the fiscal claims, calculated for each month or part thereof.

Other issues

Mergers and acquisitions

Mergers, spin-offs, transfers of assets, and exchanges of shares between two Romanian companies should not trigger capital gains tax.

In the case of a relocation of the registered office of a European Company (SE) and European Cooperative Society (SCE) from Romania to another EU member state, there is no tax on the difference between the market value of the transferred assets and liabilities and their fiscal value, if certain conditions are met. There will also be no tax on such movements at the shareholder level. Therefore, a tax basis step-up may be achieved in the case of Romanian shareholders.

If a Romanian company has a PE in another EU member state, and the Romanian company is dissolved as a result of a cross-border reorganisation, the Romanian tax authorities will not have the right to tax the former PE.

Significant developments

Recent significant changes in tax legislation

Transfer pricing legislation

The new transfer pricing legislation came into effect on 1 January 2012. Compared to the prior Russian transfer pricing rules, the new ones appear to be more technically elaborate and, to a certain extent, better aligned with the international transfer pricing principles developed by the Organisation for Economic Co-operation and Development (OECD).

The main changes are as follows:

- Change in the list of transactions where the Russian tax authorities may control prices for tax purposes.
- Expansion of the list of related parties.
- Burden of proof that prices of controlled transactions do not correspond to the market will rest with the Russian tax authorities.
- Introduction of the arm's-length principle as the fundamental principle of Russian transfer pricing rules.
- Abolishment of the 'safe harbor' provision (the 20% fluctuation of controlled transaction prices from market prices that was previously allowed).
- Expansion of the list of sources of information for determining market prices.
- Formally introducing a functional analysis as one of the comparability factors.
- Introduction of new methods for determining market prices, i.e. transactional net margin and profit split methods.
- Introduction of reporting and transfer pricing documentation requirements.
- Introduction of special transfer pricing audits to be performed by the Federal Tax Service.
- Introduction of penalties for non-compliance with reporting and transfer pricing documentation requirements. However, for the transitional period of 2012/13, no penalties can be assessed in case of transfer pricing adjustments.
- Introduction of unilateral and multilateral advance pricing agreements (APAs) for Russian companies registered as 'largest' taxpayers.

Consolidated taxpayer regime

The new consolidated taxpayer regime is available to large Russian groups starting from 1 January 2012.

A group can comprise two or more Russian organisations where the direct or indirect equity interest of one member in the charter/share capital of the other members equals at least 90%. To establish and apply the regime in 2013, all group members should meet the following requirements:

Russian Federation

- At least 10 billion Russian rubles (RUB) in total profits tax, value-added tax (VAT), excise tax, and mineral resources extraction tax (MRET) paid during 2011.
- At least RUB 100 billion in sales proceeds and other income in 2011.
- Total cost of assets of at least RUB 300 billion on 31 December 2011.

The advantages of application of the regime are the following. Firstly, transactions among members will not be controllable under the new transfer pricing legislation (with one exception - transactions with mineral resources subject to MRET with percentage rate will still be controlled). Secondly, for the purposes of calculating profits tax, it will become possible to consolidate members' profits and losses.

Social contributions

Social contributions of employers increased as of 1 January 2012. An additional 10% charge is imposed on salary that exceeds RUB 512,000 per annum per one employee (approximately 12,350 euros [EUR]). Contributions under RUB 512,000 are subject to contributions at a consolidated rate of 30% (previously, contributions under RUB 463,000 were subject to contributions at the rate of 34%).

Remuneration of foreign nationals temporarily staying in Russia is covered by pension insurance contributions at a rate of 22% within the threshold of RUB 512,000 and 10% top up charge on remuneration paid in excess of the threshold. The only exception is made for highly qualified specialists (with the respective work permit) and employees who have entered into a labour contract for a term of less than six months.

Significant changes expected in 2013 - 2015

The Russian government has approved the Key Directions in Russian tax policy for 2013 and the planning period 2014 and 2015. The document provides guidelines for taxpayers covering the next three years. It includes a range of measures to counter tax avoidance, including the introduction of international practices and concepts (e.g. controlled foreign company [CFC] rules). It also details measures to stimulate and support Russian taxpayers, as well as plans for the convergence of financial accounting with tax accounting. This, in turn, stands to reduce the administrative costs taxpayers incur when preparing their tax returns.

The following changes will have an impact on corporate taxpayers:

- Introduction of CFC rules.
- Introduction of the beneficial owner concept.
- Change of rules for establishing corporate tax residence based on several criteria.
- Changes in taxation for financing structures involving Eurobonds.
- Introduction of a cost sharing mechanism for a group of companies.
- Exemption of movable property from property tax.

Taxes on corporate income

Profits tax

The maximum profits tax rate for all taxpayers in the Russian Federation is established at 20% (2% is paid to the federal budget and 18% is paid to the budgets of constituent regions). The amount payable to the budgets of constituent regions may be reduced by such regions, so the total minimum tax rate may be 15.5% (e.g. the rate of 15.5% is established for certain categories of taxpayers located in the Smolensk region, the Arkhangelsk region, the Samara region, the Kaluga region, the Ulyanovsk region).

Russian legal entities pay tax on their worldwide income (credit relief is available for foreign tax paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules).

Foreign legal entities pay tax on Russia-source income derived through a permanent establishment (PE) (at the rate of 20%) and are also subject to withholding tax (WHT) on income from Russian sources not related to a PE (at rates varying from 10% to 20%, depending on the type of income and the method used to calculate it).

Local income taxes

There are no local taxes on income.

Corporate residence

The effective Russian tax legislation does not contain terminology of corporate residence. The tax system in Russia distinguishes between Russian and foreign legal entities on the basis of their incorporation.

Permanent establishment (PE)

A PE is broadly defined as 'a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Russia'. Russia's various double tax treaties (DTTs) may define a PE differently. Conducting business through an agent also may create a taxable PE in Russia.

Other taxes

Value-added tax (VAT)

VAT is a federal tax in Russia, payable to the federal budget.

There is no separate VAT registration in Russia. The established general tax registration requirements are applicable to all taxes, including VAT.

Taxpayers follow a 'classical' input-output VAT system, whereby a VAT payer generally accounts for VAT on the full sales price of the transaction and is entitled to recover input VAT incurred on inventory costs and other related business expenses. The Russian VAT system, although not originally based on the European Union (EU) model has moved towards it. However, it still currently differentiates from the EU VAT system in multiple ways.

Output VAT

Generally, VAT applies to the value of goods, works, services, or property rights supplied in Russia. The standard VAT rate is 18% in Russia (with a lower rate of 10% applicable for certain basic foodstuff, children's clothing, medicines and medical products, certain printed publications, etc). The same VAT rates apply for imports of goods into Russia.

Exports of goods, international transportation and other services related to the export of goods from Russia, international passenger transportation, and certain other supplies are zero-rated with an input VAT recovery right. The application of the 0% VAT rate and recovery of the respective input VAT should be confirmed by submitting a number of documents to the tax authorities within certain time limits. Special rules are provided in

Russian Federation

respect of the documentary confirmation of the right to tax export supplies to Customs Union member countries with a 0% VAT rate, including an input VAT recovery right.

The list of VAT exempt goods and services includes basic banking and insurance services, educational services by certified establishments, sale of certain essential medical equipment, passenger transportation, and certain other socially important services. Most accredited offices of foreign legal entities (as well as the accredited employees of these offices) may be exempt from VAT on property rental payments. Performance of VAT exempt supplies gives no right for the recovery of the attributable input VAT; instead, costs associated with non-recoverable input VAT are, in most cases, deductible for profits tax purposes.

Withholding VAT

Russian VAT law contains rules for determining where services are supplied from a VAT perspective. These rules divide all services into different categories for determining where they are deemed to be supplied for VAT purposes. For example, certain services are deemed to be supplied where they are performed, some where the 'buyer' of the services carries out the activity, others where the immovable property is located, etc.

Under the reverse-charge mechanism, a Russian company must account for VAT on any payment it makes to a non-tax registered foreign company, if the payment is connected to a supply of goods or services regarded as supplied in Russia, based on the VAT place of supply rules and not falling under any VAT exemption based on the domestic VAT law. In such circumstances, according to the law, the Russian buyer shall act as a tax agent for Russian VAT purposes by withholding Russian VAT at the rate of 18/118 from payments to the foreign supplier and remit such withheld VAT to the Russian budget. The withheld VAT may be recovered by the Russian payers in accordance with the standard input VAT recovery rules provided by law.

Input VAT recovery

Generally, taxpayers are eligible to recover input VAT associated with the purchase of goods, works, services, or property rights, provided a set of rules established by the VAT legislation is met. Input VAT could potentially be recovered by the taxpayer in the following cases:

- VAT related to goods, services, or works acquired for the purpose of conducting VATable transactions.
- VAT related to the purchased goods, works, or services used in non-VATable transactions, if the portion of expenses related to non-VATable operations does not exceed 5% of total amount of expenses.
- Input VAT related to advance payments performed to Russian suppliers of goods (works, services) provided such acquired goods (works, services) are aimed at being used in VATable activities. Please note that application of this rule is the right of taxpayers (rather than an obligation), and taxpayers may choose whether to enjoy this right or not.

VAT compliance requirements

Each taxpayer performing supplies of goods, works, services, or property rights is liable to issue VAT invoices and provide them to customers. VAT invoices shall be issued within five days after the supply has occurred. The form of the VAT invoice is a standard one, established by the government. Compliance with invoicing requirements is critical to the buyer's ability to recover input VAT.

E-invoicing is also allowed under the Russian Tax Code. However, the e-invoice format and the necessary protocol are not yet established by the respective authorities. E-invoicing requires digital signature and data transfer via operators and is subject to mutual agreement of the transaction parties. Operators are companies who provide services for exchange of open and confidential information via telecommunication channels.

Generally, incoming and outgoing VAT invoices shall be registered by taxpayers in special purchases and sales VAT ledgers.

VAT returns shall be submitted to the tax authorities on a quarterly basis. VAT must be paid to the Russian budget after the end of each quarter in three instalments not later than the 20th day of each of the three consecutive months following the quarter, except for the remittal of VAT withheld by Russian buyers under the reverse charge mechanism, which is to be transferred to the Russian budget at the date of the external payment.

Import VAT

Import VAT is payable in customs upon importation of goods. The tax base for import VAT purposes is generally the customs value of the imported goods, including excise payments. Either the 18% or 10% VAT rate may apply upon import of goods in Russia, depending on the specifics of the goods.

A limited range of goods is eligible for exemption from import VAT. The list of such goods includes, for example, certain medical products and goods designated for diplomatic corps. Relief from import VAT is available on certain technological equipment (including their components and spare parts) analogues of which are not produced in Russia. The list of such equipment is established by the Russian government.

Import duties

In addition to VAT, customs duties are levied on assets imported into the Russian Federation. The rate varies according to the tariff code of the goods imported and the country of origin (generally the rate varies from 0% to 20% of the customs value of imported goods). There is special relief from customs duties for qualifying goods contributed to the charter capital of Russian companies with foreign investments.

The foundation of the Customs Union and deeper integration processes amongst Russia, Belarus, and Kazakhstan (hereinafter 'the CU') has resulted in unification of the customs legislation of the members of the CU and creation of a single customs territory, within which goods in mutual trade between the CU member states are moved without any customs clearance formalities. Members of the CU should apply unified customs tariffs and customs valuation methodology, general rules of non-tariff regulation, uniform technical regulations, etc.

Customs processing fee

Goods transported across the Russian Federation customs border are subject to a customs processing fee with a flat rate. The fee depends on a customs value of transported goods. Generally the fee is not significant.

Excise duty

Excise taxes apply to the production and import of cars, tobacco, alcohol, petrol, and lubricants. Special excise rates for each type of excisable goods are established in the Tax Code. The rates are widely variable and are based on multiple factors.

Russian Federation

Property tax

The maximum property tax rate is 2.2%, and regional legislative bodies have the right to reduce this rate. The property tax base includes only the annual book value of fixed assets recorded on the taxpayer's balance sheet (including property leased out). Intangible assets, inventories, work-in-progress, and financial assets are not subject to property tax in Russia.

Certain types of property are exempt from the tax. Relief is also available to a limited number of categories of taxpayers.

Transport tax

A transport tax is imposed on certain types of land, water, and air transport registered in Russia. Fixed rates apply (per unit of horsepower, gross tonnage, or unit of transport), which are differentiated based on engine capacity, gross tonnage, and type of transport. The actual rates in the regions may be subject to a maximum ten-fold increase/decrease by the legislative bodies of Russian Federation constituent subjects. Reporting and payment rules are established by regional legislative authorities.

Social contributions

Social contributions of employers increased as of 1 January 2012. An additional 10% charge will be imposed on salary that exceeds RUB 512,000 per annum per one employee (approximately EUR 12,350). Contributions under RUB 512,000 are subject to contributions at a consolidated rate of 30% (previously, contributions under RUB 463,000 were subject to contributions at the rate of 34%).

Remuneration of foreign nationals temporarily staying in Russia will be covered by pension insurance contributions at a rate of 22% within the threshold of RUB 512,000 and 10% top up charge on remuneration paid in excess of the threshold. The only exception is made for highly qualified specialists (with the respective work permit) and employees who have entered into a labour contract for a term of less than six months.

Branch income

Foreign legal entities pay tax on profits attributable to a PE. A PE's profits are computed on substantially the same basis as Russian legal entities, including the composition of tax-deductible expenses. The tax code does not provide specifically for the deductibility of expenses incurred abroad by a head office with respect to its PE in Russia (including a reasonable allocation of administration costs), although most DTTs provide for such an option.

A new provision regarding taxable income of a PE has been included in the Russian tax legislation (with effect from 1 January 2012). Taxable income of a PE in Russia should be determined taking into account the PE's functions, assets, and economic/commercial risks. The provision does not contain any guidance on specific transfer pricing methods that taxpayers should follow.

If a foreign legal entity conducts free-of-charge preparatory and/or auxiliary services for the benefit of third parties, a PE is considered to have been formed, and the tax base is calculated as 20% of its expenses relating to such activities.

Foreign legal entities operating in Russia through a PE are to follow the filing and payment schedules established for Russian legal entities, although they do not make monthly advance payments, but pay profits tax on a quarterly and annual basis only.

Income determination

The accounting period in Russia is a calendar year. Different periods are not permitted. The taxable base is calculated on an accrual basis (only small-scale taxpayers are still allowed to use the cash basis).

Taxable income is to be computed following the rules and principles established in the tax code. Taxpayers must maintain tax accounting registers. Statutory accounts may be used for computing tax items for which accounting methods are the same. In practice, most taxpayers use statutory accounts as a basis and apply adjustments to arrive at the taxable income.

Inventory valuation

Inventory can be valued using one of the following methods: first in first out (FIFO), last in first out (LIFO), average cost, and individual unit cost.

Capital gains

Capital gains are subject to the same 20% profits tax rate and are added to ordinary income to arrive at the taxable income.

Four separate tax baskets are calculated for tax purposes: (i) results from general operations, (ii) results from operations with listed securities, (iii) results from operations with non-listed securities, and (iv) results from operations with non-listed derivatives. A loss in one basket cannot be offset with income in another basket. Results from operations with listed derivatives are included into the general tax basket.

Gains from the sale of fixed assets and other property equal the difference between the sale price and their net book value for tax purposes. Losses resulting from the sale of fixed assets should be deducted in equal monthly instalments during the period, defined as the difference between their normative useful life and the actual time of use.

A significant exemption was introduced for capital gains from the sale or other disposal (including redemption) of shares in Russian entities (interests in Russian entities' charter capital), provided that, as of the date of sale, they have been continuously held by the taxpayer on the basis of a right of ownership or another proprietary right for more than five years. One of the following conditions must be met in order to apply a 0% tax:

- The shares have been non-listed securities over the entire period of the taxpayer's ownership of such shares.
- The shares are listed securities, and the company issuing shares has belonged to the technology/innovative sector of the economy over the entire period of the taxpayer's ownership of such shares.
- As of the date of acquisition by the taxpayer, the shares qualified as non-listed securities and, as of the date of their sale by this taxpayer or of another disposal (including redemption) by this taxpayer, they are listed securities of the high technology/innovative sector of the economy.

The beneficial tax treatment will only apply to shares and interests in charter capital acquired by taxpayers after 1 January 2011 (it means that the exemption may be first used in 2016).

Russian Federation

Dividend income

Dividends received by Russian legal entities from Russian or foreign legal entities are taxed in Russia at a 9% flat rate.

Dividends received from 'strategic investments' are exempt from Russian income tax. An investment is considered strategic when:

- the owner (recipient of dividends) owns at least 50% of the capital of the payer of dividends or owns depository receipts entitling it to receive at least 50% of the total amount of paid dividends and
- the share or depository receipts have been owned for at least 365 calendar days on the day dividends are declared.

Dividends from companies residing in 'offshore' zones with preferential tax regimes are not eligible for the tax exemption. The list of offshore zones is established by the Ministry of Finance.

Tax on dividends from abroad withheld in the source country may be credited against Russian tax.

The standard 15% tax rate is applicable to dividends paid by Russian legal entities to foreign legal entities. The tax should be withheld by the Russian legal entity paying dividends. The tax may be reduced based on a relevant DTT, typically to 10% or 5% (*please see the Withholding taxes section for more details*).

Interest income

Interest income is taxed on the accrual basis. A standard tax rate of 20% is applied to interest income, except for interest on state and municipal securities, which is taxed at 0%, 9%, or 15%, depending on the type of security. The rate may be reduced (typically to zero) based on a relevant tax treaty.

Exchange gains and losses

Foreign exchange gains and losses are recognised for tax purposes on the accrual basis. However, gains and losses from settlements in a local currency of amounts denominated in (tied to) a foreign currency are taxable (deductible) on payment.

Foreign income

Russian legal entities pay tax on their worldwide income. Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

The effective tax legislation does not contain provisions that allow tax deferral in respect to foreign income.

Deductions

Expenses are deducted on the accrual basis. The main criteria for deductibility of expenses is that the expense is (i) incurred in the course of an income-generating activity, (ii) properly documented, and (iii) not mentioned in the tax code as non-deductible for tax purposes.

Depreciation and amortisation

Two methods of depreciation are allowed: the straight-line method and the declining-balance method. The ranges of useful life of assets for tax purposes are established in the Classification of Fixed Assets adopted by the Russian government, for example:

Fixed asset	Useful life (years)
Personal computer	2 to 3
Motor-car	3 to 5
Truck (capacity more than 5 tonnes)	7 to 10
Aircraft	10 to 15
Blast furnace	20 to 25

Accelerated depreciation is permitted for leased property, where a special ratio of up to three may be applied (with some exceptions).

An upfront premium is allowed, which means that a taxpayer has the right to deduct 10% (from 1 January 2009: 30% for certain categories of fixed assets) of the cost of fixed assets purchased (or constructed) in the month when the depreciation started. The balance is depreciated over the useful life of the asset. A premium must be recaptured if a relevant asset is sold within five years of its acquisition.

Intangible assets are amortised over their useful life (or over ten years if their useful life cannot be established).

Goodwill

According to the tax law, mark-up (difference between the acquisition value and net assets of the business [property complex] purchased) should be recognised as goodwill for tax purposes and may be amortised by a buyer over five years. The practice of implementation of such provision is not sufficient because the sellers hardly ever register the subject of a deal as a property complex.

Start-up expenses

Russian tax law does not contain specific provisions on deductibility of start-up expenses. In some cases, they may be lost for tax purposes.

Interest expenses

From 1 January 2011 till 31 December 2012, interest expenses are deductible within the following limits:

- The average interest rate on similar loans obtained within one quarter from Russian lenders multiplied by 1.2.
- If there are no similar loans, or at the taxpayer's discretion, the following limits are applied:
 - For loans denominated in a foreign currency: the refinancing rate of the Central Bank of Russia multiplied by 0.8 (the rate was established as 8% starting from 26 December 2011).
 - For loans denominated in rubles: the refinancing rate of the Central Bank of Russia multiplied by 1.8.

Bad debt

Generally, losses in the form of bad debts written off are deductible. Companies may create a bad debt reserve. The method of accrual for a bad debt reserve for tax purposes

Russian Federation

may differ from that in financial accounting because it is based only on the overdue payment period (i.e. if the delay exceeds 90 days, the full amount of the account receivable is included in the reserve).

Charitable contributions

Russian tax legislation does not provide any benefits in respect to charitable contributions. Such expenses are not deductible for tax purposes.

Research and development (R&D) expenses

Currently, R&D expenses (including R&D with a negative result) are deductible within one year after completion. Certain R&D expenses may be deducted using a coefficient of 1.5. The list of such types of R&D is established by the government.

The following amendments, with respect to R&D, were introduced on 7 June 2011 and came into effect on 1 January 2012:

- Expenses are recognised for tax purposes in the reporting (tax) period when the relevant R&D work (or work stage) is completed.
- Special reporting is introduced for taxpayers that deduct R&D expenses using a coefficient of 1.5.
- The amendments provide a right to set up a provision for future R&D expenses.

Insurance premiums

Expenses related to all types of obligatory insurance are deductible, subject to state tariff limitations, where established. Voluntary insurance expenses are deductible to the extent that they relate to the insurance of damage and losses related to certain classes of assets, and the insurance of construction activity risks. Contract liability insurance expenses are deductible to the extent that such insurance is required by an international treaty to which Russia is a party or a generally accepted international trade custom.

Long-term life and pension insurance is deductible within a limit of 12% of the payroll fund. Voluntary medical insurance is deductible within a limit of 6% of the payroll fund.

Fines and penalties

Fines and penalties paid to contractors for the violation of contractual terms may be deducted for tax purposes.

Fines and penalties paid to a budget are not deductible.

Taxes

Taxes paid by a taxpayer, as well as social contributions of employers, are deductible for tax purposes.

Net operating and capital losses

Tax losses may be carried forward for up to ten years without limitation (i.e. they can be used to offset the entire taxable profit before a loss carryforward deduction). Carryback of losses, however, is not allowed.

Losses from the sale of fixed assets are recognised evenly during the remaining useful life.

Losses and income from different tax baskets can't be offset (*please see Capital gains in the Income determination section for more details*).

Payments to foreign affiliates

There are no special tax provisions regarding deductibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met. Charges with respect to administrative support provided by foreign affiliates may be deductible, but due care should be taken with regard to documentary support of the nature and actual receipt of the service.

Group taxation

Consolidated taxpayer regime

The new consolidated taxpayer regime is available to large Russian groups starting from 1 January 2012.

A group can comprise two or more Russian organisations where the direct or indirect equity interest of one member in the charter/share capital of the other members equals at least 90%. To establish and apply the regime in 2013, all group members should meet the following requirements:

- At least RUB 10 billion in total profits tax, VAT, excise tax, and MRET paid during 2011.
- At least RUB 100 billion in sales proceeds and other income in 2011.
- Total cost of assets of at least RUB 300 billion on 31 December 2011.

The advantages of application of the regime are the following. Firstly, transactions among members will not be controllable under the new transfer pricing legislation (with one exception - transactions with mineral resources subject to MRET with percentage rate will still be controlled). Secondly, for the purposes of calculating profits tax, it will become possible to consolidate members' profits and losses.

Transfer pricing

The new transfer pricing legislation came into effect on 1 January 2012. Compared to the prior Russian transfer pricing rules, the new ones appear to be more technically elaborate and, to a certain extent, better aligned with the international transfer pricing principles developed by the OECD.

The main changes are as follows:

- Change in the list of transactions where the Russian tax authorities may control prices for tax purposes.
- Expansion of the list of related parties.
- Burden of proof that prices of controlled transactions do not correspond to the market will rest with the Russian tax authorities.
- Introduction of the arm's-length principle as the fundamental principle of Russian transfer pricing rules.
- Abolishment of the 'safe harbor' provision (the 20% fluctuation of controlled transaction prices from market prices that was previously allowed).
- Expansion of the list of sources of information for determining market prices.
- Formally introducing a functional analysis as one of the comparability factors.
- Introduction of new methods for determining market prices, i.e. transactional net margin and profit split methods.
- Introduction of reporting and transfer pricing documentation requirements.
- Introduction of special transfer pricing audits to be performed by the Federal Tax Service.

Russian Federation

- Introduction of penalties for non-compliance with reporting and transfer pricing documentation requirements. However, for the transitional period of 2012/13, no penalties can be assessed in case of transfer pricing adjustments.
- Introduction of unilateral and multilateral APAs for Russian companies registered as 'largest' taxpayers.

Thin capitalisation

Under the Russian Tax Code, interest on loans received from foreign shareholders (as well as their Russian affiliates, or loans guaranteed by foreign shareholders or their Russian affiliates) owning more than 20% of capital is deductible, provided the loans do not exceed by three times the amount of equity (12.5 times for banks and leasing companies). If the loans exceed this limit, the excess interest on the loans will be reclassified for taxation purposes as dividends paid to foreign shareholders. Such dividends are not deductible for profits tax purposes and are subject to WHT at the rate of 15% (treaty benefits may apply to reduce the rate).

Tax credits and incentives

At present, the following types of incentives exist in Russia:

- Regional incentives granted by regional or local authorities with respect to taxes paid to their budgets.
- Special tax regimes in special economic zones (SEZs).
- Incentives related to certain activities (e.g. activities related to R&D, information technology).
- Incentives related to particular projects (e.g. Skolkovo, Olympic Winter Games in Sochi).

The incentives are briefly described below.

It is also worth mentioning that the Russian tax legislation provides for special tax regimes to support small and medium-size businesses. Such regimes include a unified tax regime, simplified tax regime, and unified agricultural tax.

Regional incentives

Regional incentives in the form of reduced tax rates for taxes payable to regional budgets (primarily profits tax and property tax) are granted to certain classes of taxpayers (typically large investors or entities operating in specific industries). The extent of regional incentives and the willingness of regional authorities to grant them have been diminishing over time.

Special economic zones (SEZs)

The following types of SEZ are established in Russia:

- Technical research and implementation zones for scientific projects.
- Industrial production zones to develop industrial production.
- Tourism-recreation zones for the development and effective use of Russian tourist resources.
- Port zones.

SEZ residents may take advantage of different combinations of benefits, such as reduced profits tax, exemption from property tax and land tax, and, in some cases, exemption from customs duty and VAT.

Activities incentives

The following 'activities' incentives are available to taxpayers in Russia:

- Certain R&D services are exempt from VAT.
- Certain R&D service-related expenses, as listed by the government, are deductible using a coefficient of 1.5.
- Fixed assets used in the sphere of science and technology may be amortised with an accelerated coefficient up to 3.
- Reduced rates for contribution payments to social funds are established for information technology (IT) companies.

Special project incentives

The following 'special project' incentives are established in Russia:

- Participants in the Skolkovo innovation centre will enjoy a number of benefits, the primary of which are the following: exemption from profits and property taxes, exemption from VAT obligations, and reduced rates for mandatory contributions to social funds.
- Olympic Winter Games (Sochi 2014). The Russian tax legislation provides certain tax exemptions for foreign and Russian organisers of the Games, marketing partners of the International Olympic Committee, and official broadcasting companies in relation to their activity on the Games, as well as exemption from personal income tax for income received by sportsmen for participation in the Games.

Foreign tax credit

Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

Withholding taxes

In accordance with the general provisions of the tax code, income received by a foreign legal entity and not attributed to a PE in Russia is subject to WHT in Russia (to be withheld at source). WHT rates are as follows:

- 15% on dividends and income from participation in Russian enterprises with foreign investments.
- 10% on freight income.
- 20% on certain other income from Russian sources, including royalties and interest.
- 20% of revenue or 20% of the margin on capital gains (from the sale of immovable property located in Russia or non-listed shares in Russian subsidiaries where the immovable property located in Russia represents more than 50% of assets).

Taxation of the margin (rather than the gross amount of income received from the above sales) may be applied only if proper documentary support of expenses is available.

As of 1 January 2011, income of foreign organisations (not performing activity in Russia through a PE) from the sale of certain listed securities of Russian entities (and their derivatives) is not regarded as income derived from sources in Russia subject to WHT.

Tax should be withheld by the tax agent and paid to the Russian budget. WHT rates may be reduced under a relevant DTT, whose provisions may be applied based on confirmation of tax residence, to be provided by a foreign company to the Russian

Russian Federation

tax agent prior to the date of payment (no advance permission from the Russian tax authorities is required) and also provided general conditions are fulfilled (proof of beneficial ownership, etc.).

The Russian tax authorities recognise the terms of former Union of Soviet Socialist Republics (USSR) treaties until they are renegotiated by the Russian Federation (RF) government, and the tax treaty network is continuously updated.

The list below is current as of 20 May 2012, and indicates the WHT rates stipulated in the treaties.

Notes

- In most cases, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the government.
- If the resident of the other contracting state directly holds at least 25% of the capital of the company paying the dividends.
- If the resident of the other contracting state contributed at least 40,000 United States dollars (USD) (or an equivalent amount in the domestic currency of either of the contracting states) to the authorised capital of the enterprise paying the dividends.
- If the following conditions are met:
 - Dividends are paid to a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
 - The resident of the other contracting state has invested a minimum of 700,000 Australian dollars (AUD), or an equivalent amount in Russian rubles, in the capital of that company.
 - If the dividends are paid by a company that is resident in Russia, the dividends are exempt from Australian tax.
- If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends and the participation exceeds USD 100,000 or an equivalent amount in any other currency.
- If the resident of the other contracting state directly holds at least 25% of the capital of the company paying the dividends.
- If the beneficial owner of the dividends directly holds at least 20% of the total capital of the company paying the dividends.
- If the beneficial owner of the dividends is a company that owns at least 10% of the voting stock (or in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.
- 0% WHT is applied to the following types of Royalties:

Russian Federation

- Royalties for the production or reproduction of any literary, dramatic, musical, or other artistic work (but not including royalties for motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting).
 - Royalties for the use of, or the right to use, computer software.
 - Royalties paid to an unrelated party for the use of, or the right to use, any patent or any information concerning industrial, commercial, or scientific experience.
10. If the beneficial owner of the dividends is a company that directly holds at least 25% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).
 11. If the beneficial owner of the dividends is a company (excluding partnerships) that directly holds at least 25% of the capital of the company paying the dividends.
 12. The Protocol to the Russia-Cyprus DTT introduces some new provisions that will come into effect from 2013.
 13. If the beneficial owner of the dividends has directly invested in the capital of the company not less than USD 100,000 or its equivalent in another currency (according to the new version effective from 2013: EUR 100,000).
 14. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends, and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment when the dividends become due and payable.
 15. If the following conditions are met:
 - a. Where the beneficial owner of the dividends has invested in the company paying the dividends, irrespective of the form or the nature of such investments, a total value of at least 500,000 French francs (FF) or the equivalent in another currency; as the value of each investment is appreciated as of the date it is made.
 - b. Where that beneficial owner is a company that is liable to tax on profits under the general tax laws of the contracting state of which it is a resident and which is exempt from such tax in respect of such dividends.
 16. If only one of the conditions of 15 (a) or 15 (b) are met.
 17. If the beneficial owner of the dividends is a company that directly holds at least 10% of the basic or common stock of the company paying the dividends and such capital share amounts to at least EUR 80,000 or the equivalent value in rubles.
 18. If the beneficial owner of the dividends is a company (other than partnership) that directly holds at least 25% of the capital of the company paying the dividends.
 19. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currency of the contracting state.
 20. If the recipient of the dividends is a company (excluding partnership) that directly holds at least 25% of the capital of the company paying the dividends.
 21. If the beneficial owner of the dividends is a company that directly holds at least 10% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).
 22. Literary, artistic, or scientific work including cinematograph films and films or tapes for radio or television broadcasting.
 23. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends and invests not less than USD 100,000 or the equivalent in local currencies to the company paying the dividends.
 24. The 0% rate applies to dividends paid to governmental agencies, financial institutions or companies controlled by the government, or companies where the government holds at least 25% of the capital of the company paying the dividends and the capital directly invested by this beneficial owner is not less than USD 100,000 or the equivalent in the national currency of the contracting state.
 25. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and the capital directly invested by this beneficial owner is not less than USD 100,000 or the equivalent amount in the national currency of a contracting state.
 26. For the use of industrial, commercial, or scientific equipment.
 27. If the beneficial owner of the dividends directly holds at least 30% of the capital of the company paying the dividends and of an acquisition price of at least 75,000 European Currency Units (ECU) or its equivalent in national currency.
 28. The 15% rate applies to profits received from a joint venture by a resident of Malaysia.
 29. Any patent, trademark, design or model, plan, secret formula or process, or any copyright of scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
 30. Cinematograph films, or tapes for radio or television broadcasting, any copyright of literary or artistic work.
 31. If the invested amount equals or exceeds FF 1 million.
 32. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or the equivalent in the national currencies of the contracting states.
 33. If the beneficial owner of the dividends has invested in the capital of the company paying dividends of more than USD 500,000.

Russian Federation

34. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends and has directly invested in the equity share capital of that company not less than USD 100,000 or its equivalent in another currency.
35. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least ECU 75,000 or its equivalent in the national currencies.
36. If the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, directly owned at least 25% of the capital of the company paying the dividends.
37. The 0% rate applies to dividends paid to governmental agencies or financial institutions.
38. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or its equivalent in the national currencies of the contracting states.
39. If the beneficial owner of the dividends is the government of the other contracting state or if the beneficial owner of the dividends is a company that directly holds at least 15% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or its equivalent in other currencies.
40. If residents of the other contracting state hold at least 30% of the capital of the company paying the dividends and have directly invested in the equity share capital (authorised fund) of that company an amount of not less than USD 100,000 or its equivalent in the currency of the first state.
41. If the following conditions are met:
 - a. The beneficial owner of the dividends is a company (other than a partnership) that has invested at least ECU 100,000 or its equivalent in any other currency in the capital of the company paying the dividends.
 - b. Those dividends are exempt from tax in the other contracting state.
42. If only one of the conditions of 41 (a) or 41 (b) are met.
43. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
44. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds 100% of the capital of the company paying the dividends; or in the case of a joint venture not less than 30% of the capital of the joint venture; and in either case the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment of the actual distribution of the dividends.
45. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends and the foreign capital invested exceeds 200,000 Swiss francs (CHF) or its equivalent in any other currency at the moment when the dividends become due.
46. A 0% tax rate may be applied provided such interest is paid:
 - a. in connection with the sale on credit of any industrial, commercial, or scientific equipment or
 - b. in connection with the sale on credit of any merchandise by one enterprise to another.
47. In the case of a loan of any kind granted by a bank.
48. Cinematography films, programmes, and recordings for radio or television broadcasting.
49. Any copyright of literary, artistic, or scientific work.
50. Any patent, trademark, design or model, plan, secret formula or process, any computer software program, or for information concerning industrial, commercial, or scientific experience.
51. If the beneficial owner of the dividends directly holds at least 25% of the capital of the company paying the dividends.
52. If a resident of the other contracting state has invested in its joint-stock capital (registered fund) at least USD 50,000 or its equivalent in the national currencies of the contracting states.
53. If the beneficial owner of the dividends is a company that owns at least 10% of the voting stock (or, in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.
54. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends and has invested in this company not less than the equivalent of USD 100,000.
55. In the case of banks.
56. In the case of fees for technical assistance.
57. If the residents of the other contracting state have directly invested in the equity share capital of that company not less than USD 10 million.

Tax administration

All taxpayers are required to obtain tax registration and be assigned a taxpayer identification number, irrespective of whether their activities are subject to Russian taxation.

Taxable period

The taxable period runs from 1 January to 31 December.

Tax returns

An annual profits tax return must be filed by 28 March of the year following the end of the reporting year.

Payment of tax

Companies pay advance profits tax payments on a monthly basis. The final payment for the year is due by 28 March of the following year.

Statute of limitations

The statute of limitations is established as three years. For example, in 2012 the tax authorities may examine 2011, 2010, and 2009 profits tax returns through site tax audit.

Topics of focus for tax authorities

The recent court practice demonstrates that tax authorities concentrate on tax evasion schemes and relationships with one-day contractors.

Significant developments

There have been no significant corporate tax developments in Rwanda during the past year.

Taxes on corporate income

Rwanda principally operates a source-based system of taxation. This means that any income that is deemed to be from sources within Rwanda will be liable to tax in Rwanda unless it is specifically exempt from taxation under the law. The tax chargeable may either be corporate income tax (CIT) at 30% levied on adjusted taxable profit (for limited liability entities) or withholding tax (WHT) at 15%.

Resident entities are taxed on both domestic and foreign-sourced income, while non-resident entities are taxed on income sourced through a permanent establishment (PE).

The standard CIT rate is 30%; however, small businesses and individuals (whose business has a turnover of less than 20 million Rwanda francs [RWF] or 34,500 United State dollars [USD] in a tax period) pay profit tax at the rate of 4% of turnover.

Special CIT regimes

There are special CIT rates for certain industries or sectors of the economy.

Newly listed companies on capital markets are taxed as follows for a period of five years:

- If a company sells at least 20% of their shares to the public, the CIT rate is 28%.
- If a company sells at least 30% of their shares to the public, the CIT rate is 25%.
- If a company sells at least 40% of their shares to the public, the CIT rate is 20%.

Venture capital companies registered with the Capital Markets Authority in Rwanda enjoy a CIT rate of 0% for a period of five years. This is also the same rate applicable to companies that carry out microfinance activities.

Investment entities that operate in a Free Trade Zone or foreign companies that have their headquarters in Rwanda pay CIT at 0%.

Corporate residence

Rwanda incorporated companies or associations are treated as Rwanda resident entities. In addition, companies incorporated overseas are also treated as Rwandan

resident companies if they have a place of effective management in Rwanda at any time during the tax period. The term 'effective management' is not defined in the tax law.

Rwandan government companies are also considered to be residents in Rwanda.

Permanent establishment (PE)

The definition of a PE for Rwanda is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition. According to Rwandan tax law, a PE means a fixed place of business through which the business of a person is wholly or partially carried on.

For non-resident companies, CIT liability will be arise if they have a PE in Rwanda through which a trade is carried on. The profits attributable to the PE will be taxed in Rwanda. However, there are no rules or guidance on how the PE's profit should be evaluated for Rwanda tax purposes. The general understanding is that entities are required to use transfer pricing methods to determine the level of profits that should be attributable to the PE based on the functions it performs.

In particular, the existence of the following triggers a PE: an administrative branch; a factory; a workshop; a mine, quarry, or any other place for the exploitation of natural resources; a building site; or a place where construction or assembly works are carried out.

There are a number of specific exceptions from the definition of a PE. A person is deemed not to have a PE if that person:

- a. uses facilities solely for the purpose of storage or display of goods or merchandise
- b. maintains a stock of goods or merchandise solely for the purpose storage or display
- c. maintains a stock of goods or merchandise solely for the purpose of processing by another person
- d. has a place of operation aimed purposely at purchasing goods or merchandise or of collecting information related to one's business, or
- e. has a place of operation solely for the purpose of carrying on preparations of one's activities and performing any other activities that make them more effective.

Where an agent, except an independent person concerned with (e) above, acts on behalf of a company (or person) and the agent has capacity to conclude contracts in the name of that company, the company is considered as having a PE in respect of activities one's agent undertakes except if such activities of the agent are limited to those mentioned in (b) above.

However, a person is not considered as having a PE if it carries out activities through a broker, general commission agent, or any other private agent in accordance with procedures of the ordinary course of the activities of such an agent.

A company that controls or is controlled by another company does not of itself constitute either company to be a PE of the other.

Other taxes

Valued-added tax (VAT)

VAT is levied on the supply of taxable goods and services in Rwanda as well as on the importation of taxable goods and services into Rwanda.

Rwanda

The threshold for VAT registration is taxable turnover of RWF 20 million (approximately USD 34,000) in any relevant year or RWF 5 million in a calendar quarter.

The standard VAT rate is 18% and applies to goods and services which are neither exempt from VAT or zero rated.

Export of goods and services are subject to VAT at 0%. Supplies to privileged persons such as goods imported for official purposes of diplomatic missions, supplies made under special arrangements between the government of Rwanda and donors, and supplies or importation made under special technical aid agreements are subject to VAT at 0%. Persons entitled to zero rating of goods or supplies received by them are required to pay VAT at time of receiving the supply and then apply for a refund of the VAT paid.

Some supplies are exempt from VAT, the main categories being supply of water service, goods and services for health purposes, educational materials and services, transport services, books and newspapers, financial and insurance services, lending or leasing interests in land or building for residential purposes, funeral services, energy supplies, all unprocessed agricultural and livestock products, mobile handsets, and equipment for information, communication, and technology.

Suppliers who provide zero-rated services or goods are entitled to recover input VAT incurred in making the supply. This is unlike exempt supplies, where input VAT recovery is not allowed. Therefore, zero rating is preferable to exemption.

Goods and services are treated as taxable supplies where they are supplied by a taxable person (persons registered for VAT). Taxable persons include individuals, companies, partnerships, clubs, or associations who have satisfied VAT registration requirements and are registered for VAT and required by law to charge VAT on taxable supplies made by them.

For a transaction to fall within Rwandan scope of VAT, a supply of goods or services should take place and occur within Rwanda.

However, a person or business may not have a place of business in Rwanda but would be deemed to make a supply of services in Rwanda if the recipient of the service uses or obtains the benefit of the service in Rwanda.

Where a taxable supplier does not have a business establishment or usual place of residence in Rwanda, the Commissioner General may require the taxable supplier to appoint a 'tax agent' to act on one's behalf in matters relating to tax.

Where a local person imports services from a non-resident service provider, the law requires the local recipient to account for VAT reverse charge at 18% of the value of the services procured. The law further provides that the recipient may not reclaim the corresponding input VAT unless the services so procured are not available in the local market. The Rwanda Revenue Authority (RRA) may deem the services to be available in Rwanda even where the actual services procured are of a different specification/quality standard to those available locally. However, consumers of transport services are allowed to recover the VAT reverse charge even if the services are available in Rwanda.

The VAT returns and relevant payment are due to the RRA on a monthly basis by the 15th day of the following month. However, VAT taxpayers with annual turnover of RWF 200 million (USD 340,000) or below may elect to file VAT returns or make payments on a quarterly or monthly basis.

Customs duties

Rwanda is a member of the East African Community, which uses the East African Community Customs Act (EACMA) for levying import duty. The EACMA prescribes Common External Tariffs (CET) for goods originating outside the Customs Union. Goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods.

Goods will only enjoy the preferential community tariffs if they meet the EAC Customs Union Rules of Origin.

Certain industries and items are also entitled to exemptions under the customs law (e.g. assemblers of bicycles and motor cycle kits, importers of gas cylinders, certain hotel equipment, solar equipment, and energy saving bulbs).

Enterprises established in Free Trade Zones are exempt from customs duty on machinery and inputs for exported products. There also exists an import duty remission scheme, where import duty may be remitted for raw materials used to manufacture goods for export. This is subject to a requirement for proof of export and execution of the bond.

Excise taxes

Excise tax is imposed on the manufacturer or importation of certain commodities, mainly soft drinks, bottled water, cigarettes, alcohol, fuels, and lubricants.

The following rates apply in respect of products and services for which excise duty is applied:

- Juice from fruits: 5%.
- Soda and lemonade: 39%.
- Mineral water: 10%.
- Beer: 60%.
- Brandies, liquors, and whisky: 70%.
- Cigarettes: 150%.
- Telephone communication: 8%.
- Fuel (excluding benzene), gas oil, and lubricants: 76%.
- Powdered milk: 10%.
- Vehicles with an engine capacity of above 2500cc: 15%.
- Vehicles with an engine capacity of between 1500cc and 2500cc: 10%.
- Vehicles with an engine capacity of less than 1500cc: 5%.

Property taxes/fixed asset tax

Local government levies fixed asset tax on:

- the market value of parcels of land
- the market value of buildings and all improvements thereto registered with the land registration centre and for which the owner has obtained a title deed from the time the building is inhabited or used for other activities
- the value of land exploited for quarry purposes, and
- the market value of usufruct with a title deed.

The tax rate is fixed at a thousandth (1/1000) of the taxable value per year. The tax payment must be paid not later than 31 March of the year.

Rwanda

Transfer taxes

There is a fixed fee of RWF 20,000 on transfer of property. However, no transfer of ownership of a fixed asset can be effected without a tax clearance certificate issued by the concerned decentralised entity.

Stamp taxes

There are no stamp duties in Rwanda.

Trading licence fee

Districts charge a trading licence fee, which is paid by any person who commences a profit-oriented activity in Rwanda. The tax year starts on 1 January and the trading licence fee must be paid for a whole year. If such activity starts after January, the taxpayer must pay a trading licence fee equivalent to the remaining months, including the one in which the activities started.

The tax declaration is done not later than 31 March of the tax year. The trading licence fee is calculated on the basis of turnover, and the amount of the fee varies between RWF 60,000 (for turnover of RWF 40 million) to RWF 250,000 (for turnover of over RWF 150 million).

The turnover applied is as per the amount approved in the previous year by the RRA. Every year, not later than 31 January, the RRA submits the necessary data to the concerned decentralised entity.

There are also different rates for trading licence fee for other small traders, such as small scale technicians, transport activities by boat, traders, and technicians.

Branch income

The tax law does not prescribe special provisions for taxation of branches; consequently, tax rates on the profits of PEs are the same as for domestic corporations. PEs are subject to tax at a rate of 30% and treated as domestic companies.

A branch is considered a PE for the parent company; therefore, it is taxed on the income that is sourced from Rwanda only.

Non-resident entities are taxed in Rwanda through income generated from activities carried on by a PE based in Rwanda.

Income determination

Inventory valuation

Trading stock is valued at a lower of cost price or market price on the last day of the tax period. Work in progress is valued at cost.

Capital gains

There is a general capital gains tax law in Rwanda that provides that capital gains arising from the sale of commercial immovable property are subject to tax at the rate of 30%. However, capital gains arising from secondary market transactions on listed securities are exempt from taxation.

In addition, capital gains and losses arising on reorganisation are exempt from tax in respect of the transferring company. Reorganisation is defined to include the following:

- a merger of two or more resident companies
- the acquisition or a takeover of 50% or more of shares or voting rights by number or value in a resident company in exchange for shares of the purchasing company
- the acquisition of 50% or more of the assets and liabilities of a resident company by another resident company solely in exchange of shares in the purchasing company, or
- splitting of a resident company into two or more resident companies.

Dividend income

Dividend income includes income from shares and similar income distributed by companies, cooperative societies, public business enterprise, and partnerships. Dividend income is subject to WHT at flat rate of 15%.

If dividend distribution has been subjected to WHT, this becomes the final tax.

In determination of taxable business profit of a resident company or partnership, dividends and other profit-shares received from a resident entity are therefore excluded.

Interest income

Interest income includes income from loans, deposits, guarantees, and current accounts. It also includes income from government securities, income from bonds, and negotiable securities issued by public and private companies income from cash bonds.

Interest income is subject to WHT at flat rate of 15%.

Foreign income

Income from business carried out outside Rwanda by resident companies and enterprises is taxed on a worldwide basis. However, a foreign tax credit is granted in respect of taxes paid on the foreign income, subject to the limit of the tax that would have been paid in Rwanda on the same income.

Deductions

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for purposes of the company's trade, provided these costs are not capital in nature and are charged to the profit and loss account.

The Rwandan tax law stipulates that deductible expenses should fulfill the following conditions:

- Used for direct purpose of and in normal course of business.
- Actual expenses substantiated by proper documents.
- Result in a decrease in net assets.
- Used for activities related to the tax period in which they are incurred.

Depreciation and amortisation

Accounting depreciation of fixed assets is not allowable as a deduction for tax purposes. The same applies in the case of amortisation of assets. However, businesses are allowed

Rwanda

specified deductions, referred to as tax depreciation in respect of specified classes of assets. This is deducted in arriving at taxable income.

Tax depreciation allowance is granted to persons who own depreciable assets at the end of the tax period and use such assets in the production of the income.

Land, fine arts, antiquities, jewellery, and any other assets that are not subject to wear and tear or obsolescence are not granted tax depreciation. Cost of refining or reconstruction of building, equipment, and heavy machinery fixed to the walls attract tax depreciation at the rate of 5%.

Intangible assets, including goodwill that is purchased from third party, enjoy tax depreciation at rate of 10%, while computers and accessories, information and communication systems, software products, and data equipment are granted tax depreciation at 50%.

Tax depreciation allowance is also available on all other classes at rate of 25%.

There is also an enhanced allowance in the form of an investment allowance that is granted to investors where they incur an investment of at least RWF 30 million (USD 50,000). The rate is 40% where the investment is within Kigali city or 50% where the investment is within priority sectors defined by the Rwandan Investment Code or registered business located outside Kigali. Businesses are required to hold the investment for at least three years in order to benefit from the investment allowance.

Goodwill

As already mentioned above, purchased goodwill will attract tax depreciation at the rate of 10%, which is an allowable deduction. However, amortisation of goodwill is not tax deductible.

Start-up expenses

There is no clear guidance on the tax treatment of start-up expenses. However, in practice, start-up expenses of a capital nature are not allowable for tax purposes. Where they relate to purchase of assets, respective tax depreciation is claimed. Start-up expenses of a revenue nature are tax deductible.

Interest expenses

Interest on borrowed money used for earning business profit or interest in respect of an amount payable for property acquired to earn income is deductible, provided the interest paid is pursuant to a legal obligation and is reasonable in the circumstances.

Thin capitalisation rules can limit interest deductions when debt owed to related entities exceeds four times the amount of the corporation's equity. Thin capitalisation does not apply to banks and insurance companies.

Bad debt

A bad debt provision will be deductible for tax purposes if it fulfils the following conditions:

- The amount was previously included in the income of the taxpayer.
- Debt is written off in the books of accounts.
- If all possible steps have been pursued by the taxpayer, and there is concrete proof that the debtor is insolvent.

It is the last condition that makes the criteria difficult to satisfy, and local taxpayers rarely obtain bad debt relief in practice.

However, licensed commercial banks and leasing entities duly licensed as such are allowed to deduct, in determining business profit, any increase of the mandatory reserve for non-performing loans as required by the directives related to management of bank loans and similar institutions of the National Bank of Rwanda. Similarly, the business profit is increased by the entire amount recovered from bad debts deducted from such reserves.

Charitable contributions

Donations and gifts to charitable organisations and other non-profit making organisations are tax deductible where the amounts are less than 1% of turnover. However, donations to profit making organisations are not allowed for tax, irrespective of the amount.

Fines and penalties

Fines and penalties imposed for breaking the law or for statutory offences, such as payment of taxes late, are not tax deductible.

The law does not specify which type of non-statutory fines or penalties are not allowed for tax. For example, there is no guidance on whether fines or penalties paid for breach of contract is deductible or not.

Taxes

Income tax paid on business profit and recoverable VAT are not-deductible for tax purposes. This includes any back taxes paid by the business.

Net operating losses

Tax losses can be carried forward for the next five tax periods, earlier losses being deducted before later losses.

If during a tax period, the direct or indirect ownership of the share capital or the voting rights of an unlisted company changes more than 25% by value or by number, such a company is restricted from carrying forward losses incurred during the tax period and previous tax periods.

Payments to foreign affiliates

Royalties, management fees, and similar payments to affiliated non-residents are deductible expenses to the extent that they are incurred to earn income of the Rwandan company and the payments adhere to the arm's-length principle and comply with transfer pricing requirements.

Group taxation

There is no provision for group taxation in Rwanda. Each individual corporate group member is required to submit their own tax return on a stand-alone basis.

Transfer pricing

Rwandan transfer pricing legislation and the prescribed transfer pricing methods are generally consistent with the OECD guidelines. The law requires that transactions between related parties be carried out under the arm's-length principle.

Rwanda

The tax law empowers the Commissioner General to adjust profits earned between related parties if he considers that the trading arrangements between related parties do not adhere to the arm's-length principle. The arm's-length principle requires that transfer prices charged between related parties are equivalent to those that would be charged between independent parties in the same circumstances.

Rwanda operates a self-assessment system; therefore, taxpayers are obliged to self assess their compliance to the tax legislation, which includes transfer pricing policy. However, there are no specific transfer pricing documentation requirements currently in place.

Rwanda's transfer pricing legislation provides an opportunity for advance pricing agreements (APAs) with the revenue authority, a progressive development giving businesses operating in Rwanda a greater degree of certainty. Taxpayers can discuss and negotiate their transfer pricing arrangements with the revenue authority and obtain an advance ruling confirming that their transfer pricing arrangement is appropriate. This is intended to minimise the potential for future disputes.

Thin capitalisation

The interest paid on loans and advances from related entities is not tax deductible to the extent that the total amount of loans/advances exceeds four times the amount of equity during the tax period. For purposes of determining the above, equity excludes provisions and reserves. This provision does not apply to commercial banks and insurance companies.

Tax credits and incentives

A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances). The incentives are granted based on the type of assets purchased and used for business and the amount of investment made (*see Depreciation and amortisation in the Deductions section*).

There are also tax incentives in the form of lower CIT rates (*see Special CIT regimes in the Taxes on corporate income section*). These are provided for certain sectors, such as microfinance companies, venture capital companies registered with Capital Markets Authority, and newly listed companies.

Rwanda also grants tax incentives in the form of profit tax discounts. This is based on the number of Rwandans employed and maintained during a six-month period. The rate of profit tax discount ranges between 2% (for employees between 100 to 200 Rwandans) to 7% (where a company employs more than 900 Rwandans).

Companies that export commodities and services that bring into the country export revenue are also entitled to profit discount as follows: between USD 3 million to USD 5 million, the discount is 3%; over USD 5 million, the discount is 5%.

Foreign tax credit

Rwanda allows a foreign tax credit on income generated from business activities performed abroad by a tax resident. The income tax payable is offset by the foreign tax paid on that income. However, the foreign credit is limited to the amount of tax that would have been applicable on that income in Rwanda.

The credit is allowed where it is supported by appropriate evidence, such as a tax declaration, a WHT certificate, or any other similar acceptable document.

Withholding taxes

A resident individual or resident entity is required to deduct a WHT of 15% when making the following payments:

- Interest.
- Dividends.
- Royalties.
- Service fees, including management and technical service fees with the exclusion of international transport.
- Performance payments made to artists, a musician, or a sports person.
- Lottery and other gambling proceeds.
- Goods supplied by companies or physical persons not registered in tax administration.

There is also a WHT of 5% that is applicable on goods imported for commercial use. Public institutions are required to retain 3% on payments to winners of public tenders. However, businesses that possess a tax clearance certificate are exempted from deduction of the above WHT.

The WHT deducted should be remitted to the RRA within 15 days following the month of deduction.

Rwanda has double tax treaties (DTTs) with Belgium, Mauritius, and South Africa.

The DTT between Rwanda and Belgium provide for a lower rate of 10% on interest and royalties, but 15% on dividends.

The DTT between Rwanda and Mauritius provides for a 0% rate of WHT on management and professional fees, dividends, and interest income.

The DTT between Rwanda and South Africa provides for a lower WHT rate of 10%.

The DTT agreements contain conditions to be complied with for the preferential rates to apply; therefore, it is recommended that professional advice is sought before application.

Tax administration

Taxable period

The normal taxable period is between January and December. However, a different tax period can be allowed on approval by the Minister of Finance.

Tax returns

Companies are assessed with reference to accounting periods. This refers to the period for which a company prepares its accounts. However, an accounting period for CIT purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one CIT return.

Rwanda

Rwanda operates a self-assessment regime. Quarterly tax returns are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). The annual tax return/declaration must be filed within three months after the tax period. The tax declaration must include audited financial statements as well as any other documents that may be requested by the tax administration.

Payment of tax

Advance CIT is payable in three instalments. Tax payments are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). Each instalment is 25% of the tax liability as calculated in the tax return/declaration of the previous tax period. This amount can be reduced by WHT paid during the tax period.

Audit cycle

Large taxpayers are selected for audit by the revenue authority on a regular basis. The revenue authority tends to audit two tax periods, but this can be extended on request by the taxpayer. Most audits are carried out onsite. From 26 March 2012, the RRA may conduct a desk audit of taxpayer's tax affairs where they note discrepancies on tax returns filed by the taxpayer or anomalies with turnover or any other situations that justify an audit.

Under normal in-depth audits, the RRA is required to issue a taxpayer with a draft notice of assessment following the completion of the field audit. The draft assessment is referred to as a rectification note. The taxpayer is granted 30 days within which to respond. In case the tax issues are not resolved, a final notice of assessment is issued. The taxpayer is allowed 30 days within which to appeal. Once an appeal is submitted to the Commissioner General, the RRA has 30 days within which to respond to the objection. This can be extended by another 30 days but not beyond this period. At this stage, the appeal is handled by the appeal committee, and the taxpayer and the taxpayer's agent are invited for a meeting to provide explanations.

Once the final assessment is issued, the tax due is payable, although the Commissioner has powers to suspend the payment pending the determination of the appeal.

A taxpayer that disagrees with response on the final assessment can appeal to the high court within 30 days.

Statute of limitations

Under the recent law, the revenue authority now has powers to audit a taxpayer for a period going back ten years. Taxpayers are now required to keep their records for a period of ten years.

Topics of focus for tax authorities

Topics of interest for the RRA include:

- Deduction of WHT on payments to non-resident persons and reverse VAT.
- Treatment of capital gains on disposal of assets.
- Recovery of reverse VAT on services that are regarded as being available on local market.
- Reconciliation of turnover per financial statements to receipts as per taxpayer bank statements.

Significant developments

There were no significant corporate tax developments during 2011; however, the government of Saint Kitts and Nevis (St. Kitts-Nevis) has indicated that it intends to introduce a new Corporate Income Tax Act in 2012.

Taxes on corporate income

Companies incorporated in St. Kitts-Nevis pay corporate income tax (CIT) on their worldwide income with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from St. Kitts-Nevis are liable for CIT and should be registered if they have a physical presence in St. Kitts-Nevis.

St. Kitts-Nevis imposes CIT at a flat rate of 35%.

Taxable income or assessable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Assessable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior period losses up to 50% of chargeable income.

Where a person resident in St. Kitts-Nevis makes to another person not resident in St. Kitts-Nevis a payment, *as noted in the Withholding taxes section*, then a withholding tax (WHT) at a rate of 10% must be deducted and remitted to the Inland Revenue within 15 days.

A company which carries on business exclusively with persons who are not resident in St. Kitts-Nevis is exempt from all income, capital gains, and WHTs.

Companies registered under the Condominium Act are governed by that act and are not required to pay CIT.

Corporate residence

A corporation is deemed to be resident if it is incorporated in St. Kitts-Nevis or if it is registered as an external company doing business in St. Kitts-Nevis under the Companies Act.

Permanent establishment (PE)

A PE is not defined in the Income Tax Act; however, any company which would meet the general definition of a PE must be registered.

Saint Kitts and Nevis

Other taxes

Value-added tax (VAT)

The standard VAT rate is 17%, while hotel accommodation, tour operators, and restaurants carry a reduced rate of 10%.

Persons who have made or are likely to make taxable supplies in excess of 96,000 East Caribbean dollars (XCD) for certain professional services and XCD 150,000 for other business activities in a continuous period of 12 calendar months are required to register for VAT.

Customs duties

All imports are subject to import duties, VAT, and customs service tax (CST). In all instances, certain exemptions will apply.

Customs duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. VAT is applied at a rate of 17%, and CST at a rate of 6%. Customs duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

Excise tax

The excise tax applies to a small range of goods, such as alcoholic beverages, tobacco products, petroleum products, motor cycles, aerated beverages, and firearms. The excise tax rate ranges between 5% and 25%.

Property tax

Saint Kitts

Property tax in Saint Kitts is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property classes and rates of tax are as follows:

- Residential use property: 0.2%.
- Commercial use property: 0.3%.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax will be assessed on any buildings, condominiums, etc. that are under construction.
- New residential use property and condominiums are exempt from tax for one year from the date certified by the valuation officer.

Note that residential use properties located in the South East Peninsula are assigned values based on fixed rates for land (XCD 20 per square foot) and building (XCD 300 per square foot). Property tax is then applied at a rate of 0.2%.

Where property situated in the South East Peninsula area is not developed within five years, a surcharge can be assessed at the rate of 1% of the assessed market value per annum, and increased annually at the rate of 1% thereafter until it reaches a maximum

Saint Kitts and Nevis

rate of 5% of the assessed market value while the property remains undeveloped. If property is less than one acre, undeveloped, and owned by a resident for the purpose of erecting a house, such property shall be exempt from the surcharge upon application in writing to the Comptroller of Inland Revenue.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

Nevis

Property tax in Nevis is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property class and rates are as follows:

Property class	Building tax rate (%)	Land tax rate (%)
Residential	0.156	0.075
Commercial	0.3	0.2
Accommodation	0.3	0.2
Certified farming	0	0.01
Institutional	0.2	0.15

Commercial use property is defined as property which does not include accommodation use property or property used for certified farming operations.

Accommodation use property is defined as property for short term accommodation and includes a guest house.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax will be assessed on any buildings, condominiums, etc. that are under construction.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

Alien land holding licences

To hold land as an owner, a non-citizen must first obtain an alien land holding licence and pay 10% of the market value of property or XCD 750, whichever is greater.

A non-citizen is required to obtain a licence to hold shares in a company which owns land, to vote at shareholders meetings of the company, and to be a director of the company. Each licence costs XCD 250.

If a non-citizen purchases land in the Frigate Bay area, then there is no requirement to obtain a licence and only a minimal fee of XCD 50 is payable.

Saint Kitts and Nevis

If a non-citizen wishes to purchase land in the South East Peninsula, the non-citizen is required to obtain a licence prior to purchasing the property; however, the payment of the 10% license fee will be waived.

Stamp duty

Stamp duty applies to a very wide range of transactions (e.g. bill of sale, leases, mortgages, contract, bill of lading). Stamp duty on transfer of real property, transfer of shares, mortgages, and bank loans to aliens is specifically covered below.

Transfer of real property

Stamp duty is levied on the consideration for the sale or the value of property as assessed by the Chief Valuation Officer, whichever is higher.

The vendor is responsible for the payment of all stamp duty on property transfers on the following basis:

Type of property transfer	Rate
a. Transfer of property for consideration in money or value in kind of not less than the value of the property	12%
b. Transfer of property for consideration in money or value in kind of less than the value of the property	12%
c. Transfer of property without consideration in money or value in kind	6%
d. Transfer of property in any Special Development Area other than the South East Peninsula	14%
e. Transfer of property situated in the South East Peninsula	18.5%
f. Transfer of property other than stock or debenture stock or funded debt or land	2%
g. Transfer of property between husband and wife and between parents and children and vice versa	XCD 100
h. Transfer of land by will or by similar instrument	XCD 100
i. Transfer of registered condominium units	5%

Where a developer has obtained concessions in connection with a house or building constructed on the land being transferred, the developer is required to pay stamp duty on the same basis as noted in a, b, and c above.

Where a developer has obtained concessions in connection with a house or building to be constructed on the land being transferred, then the developer will be required to pay stamp duty initially on the land on the same basis as noted in a, b, and c above. However, when the house or building is subsequently constructed on the land with the aid of the concession, the owner of the building shall pay stamp duty on the house or building as provided in a, b, and c above as if the concessions or any part thereof had not been utilised.

Where a developer has not obtained concessions in connection with a house or building constructed on the land being transferred, the developer will be required to pay stamp duty on the same basis as noted in a, b, and c in respect of the land only.

Transfer of shares

Stamp duty is levied on the value of the consideration for the sale of shares or debentures issued by or on behalf of a company or at the value assessed by the Chief Valuation Officer, whichever is higher. The stamp duty is levied at a rate of 2%. If

the company owns property and its value exceeds 50% of the value of the company's assets, then the stamp duty is calculated using the applicable rate on the transfer of real property (*see above*).

Mortgages

Stamp duty is levied on the total amount secured and is applicable to both the registration and discharge of the mortgage. The standard rate is 1%. For amounts secured in relation to a Special Development Area, the rate is 2%.

Bank loans to aliens

Stamp duty is levied on the total amount of a bank loan to aliens. The standard rate is 2.5%. For loans to finance development in a Special Development Area, the rate is 5%.

Life insurance premium tax

A premium tax of 5% is levied on the premium income of all life insurance companies, whether resident or non-resident. In addition, a registration fee of XCD 2 per XCD 1,000 of income or XCD 30, whichever is less, must be paid to the Comptroller of Inland Revenue.

General insurance premium tax

A premium tax of 5% is levied on the premium income (net of agent's commission) of all general insurance companies, whether resident or non-resident.

Branch income

Branch income is taxed on the same basis and at the same rate as the income of a corporation. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch will be subject to WHT at a rate of 10%; however, the recharges have to be justified and cannot be based on a percentage allocation.

Income determination

Inventory valuation

Inventories are generally stated at the lower of cost or net realisable value. The first in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Comptroller of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. The last in first out (LIFO) method is not permitted for tax or book purposes.

Capital gains

Capital gains tax will be imposed if an asset is sold within one year of the date of acquisition. The maximum rate of tax will be one half the CIT rate. Assets sold after one year will not attract capital gains tax.

Dividend income

Dividends received by a company resident in St. Kitts-Nevis from another company resident in St. Kitts-Nevis are taxed at source at the CIT rate of 35%. Credit is given to the recipient for the tax on the dividend in computing the tax liability.

Saint Kitts and Nevis

Interest income

Interest income received by a company registered in St. Kitts is taxed at the CIT rate of 35%. Interest earned on local and other CARICOM government securities are normally exempt from the payment of CIT.

Foreign income

A St. Kitts-Nevis corporation is taxed on foreign branch income when earned and on foreign dividends when received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom [UK] and CARICOM). There is also relief from British Commonwealth taxes. *See Foreign tax credit in the Tax credits and incentives section for more information.*

Deductions

Depreciation

Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. An initial allowance of 20% is granted on industrial buildings or structures and in respect of capital expenditure incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of between 2% and 5% is allowed on all buildings constructed after 1 March 1994. Concrete buildings are depreciated at a rate of 2%, while the rate varies for other buildings depending on the type of material used in construction. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

Initial allowances and annual allowances cannot reduce the tax that would have been otherwise payable by more than 50%. Any initial allowance or annual allowance not utilised may be carried forward indefinitely.

Goodwill

Goodwill and trademarks are not depreciating assets, and amortisation is not allowed.

Start-up expense

There are no specific provisions in relation to deductions for start-up expenses. However, the policy is that certain start-up expenses, such as costs of incorporation and other initial start-up costs, may qualify for a three to five year straight-line write-off, depending on the total dollar value.

Interest expenses

No specific restrictions will apply to interest paid on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Interest is only deductible to the extent that it was incurred in producing chargeable income.

Restriction on bad debts

Specific bad or doubtful debts in excess of 5% of total trade receivables will not be allowed as a deduction.

Charitable donations

Charitable donations are not deductible for tax purposes.

Contributions to a pension fund

Contributions made by an employer to a pension fund (approved by the Comptroller) on behalf of its employees are deductible, up to a maximum of 5% of annual earnings of the employee or a maximum of XCD 2,000. Application should be made to the Ministry of Finance or to the Pension Fund Committee.

Restriction on compensation expenses

Salaries, wages, leave pay, fee, commission, bonus, gratuity, or any other perquisite or such other payment which an employee of a company receives in the course of one's employment or the value of any benefit to such employee or to any member of an employee's family in excess of XCD 60,000 per annum will not be allowed as a deduction from chargeable profit. However, if a person receives XCD 180,000 in annual income, a deduction can be claimed in three equal amounts of XCD 60,000 from three different branches, subsidiaries, or other related entities. Effective 1 January 2012, the XCD 60,000 deduction for personal income will now only be deductible from one related group entity.

Fines and penalties

Fines and penalties imposed under tax laws of St. Kitts are not deductible expenses.

Taxes

There are no provisions in the Income Tax Act in relation to the deductibility of taxes paid by a company. However, in general, VAT, VAT input tax, and adjustments under the VAT Act are disregarded for income tax purposes. Other taxes, including property tax, transfer taxes, payroll taxes, insurance, except income tax, and share transfer tax, are deductible to the extent they are incurred in producing chargeable income.

Net operating losses

Income tax losses may be carried forward for five years following the year in which the loss was incurred. However, the chargeable income of a company after deducting initial and annual capital allowances in any one income year may not be reduced by more than 50% by losses brought forward. No carryback of losses is permitted.

Payments to foreign affiliates

A company incorporated in St. Kitts-Nevis may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm's-length test, and WHT will be payable at a rate of 10%.

S

Group taxation

Group taxation is not permitted in St. Kitts-Nevis.

Transfer pricing

There are no provisions for transfer pricing in the tax laws of St. Kitts-Nevis.

Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of St. Kitts-Nevis.

Saint Kitts and Nevis

Tax credits and incentives

Tax incentives are currently available under the following legislation.

Income Tax Act, No. 17 of 1966

The Income Tax Act provides that if a company is licensed under the Hotel Aids Ordinance and constructs a hotel with more than 30 rooms, the hotel will receive an exemption from CIT for a period of ten years beginning on the day it is first open for business. If the hotel has less than 30 rooms, then it will be entitled to a five year tax holiday. During the tax holiday period, no initial deductions or annual capital allowance deductions shall be allowed. Thereafter, only the annual allowance will be allowed and will be computed on the total capital expenditure incurred during the holiday period less any assets sold. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and reduced against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

The Income Tax Act also provides that if a licence is granted to a pioneer manufacturer under the Pioneer Industries Act, the manufacturer is entitled to a five year tax holiday (or up to ten years, at the discretion of the government) as provided in the licence.

Hotel Aids Act

The Hotel Aids Act provides that a licence may be granted to any person who desires to construct or extend an existing hotel to import building material and equipment free from import duties as specified in the licence for use in the construction of the hotel and to furnish and equip the hotel. The holder of a licence may not dispose of any hotel equipment within three years of being imported free of duties and taxes. Permission must be received from the Comptroller of Customs to dispose of any building material and hotel equipment within the three year period.

Fiscal Incentives Act

The Fiscal Incentives Act provides that if a company is declared to be an approved enterprise to manufacture certain 'approved products', then the manufacturer is entitled to a tax holiday period of between ten and 15 years depending on the classification of the approved enterprise. The net losses arising during the tax holiday period (i.e. excess of all losses over all profits) may be carried forward and set off against profits of the approved enterprise for the five year period following the tax holiday period.

Small Business Development Act, 2009

The Small Business Development Act provides the framework for the promotion of investment opportunities in St. Kitts-Nevis by introducing a system of registration of small businesses and a range of incentives which are available to locals. The available incentives and concessions to any small business that would be entitled for consideration are as follows:

- Concession on consumption tax applicable to professionals (e.g. engineers, doctors).
- Reduction on CIT for a minimum of three years to a maximum of five years.
- Relief on CIT by way of an allowable deduction on any monies borrowed from any financial institution including any bank, non-bank, or credit union.
- Export incentives.
- Rebate on CIT.
- Exemption from or reduction in customs duty on inputs imported for use in the small business.

Saint Kitts and Nevis

- Exemption from or reduction in customs duty on any plant, machinery, equipment, or motor vehicle imported for use in the small business.
- Reduction of property tax of up to 75%.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Net assets or paid up capital does not exceed XCD 1 million.
- Annual sales that do not exceed XCD 2 million.
- Owned by citizens of St. Kitts-Nevis.
- Not more than 25% owned or controlled by a company whose annual turnover or net assets exceed the limits noted above or by a subsidiary of a larger company.
- The composition of the board of directors is not controlled by a company whose annual turnover exceeds the criteria above.
- Has no agreement for managerial or other services to persons who are not citizens of St. Kitts-Nevis or other CARICOM territories.

The registration fee for an approved small business status is XCD 100. Each approved small business must, within six months after the end of its financial year, submit to the Registrar (person designated by the Minister to perform the functions of Registrar of Small Businesses) audited financial statements of its accounts audited by an auditor in accordance with generally accepted international auditing standards.

Other incentives

Approved manufacturing, agricultural, and tourist ventures are permitted to import building material and equipment free of customs duties.

A Memorandum of Understanding (MOU) between the government and small hotel operators provides for certain conditions under which small hotel operators will be eligible for duty free concessions on the refurbishment of their facilities every seven years, and on food and wine for their restaurant facilities where applicable. For the purposes of this new incentive package, a small hotel is defined as a hotel consisting of at least ten rooms and not exceeding 99 rooms.

Foreign tax credit

Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and CARICOM). A foreign tax credit is also available to persons in St. Kitts-Nevis who have paid or are liable to pay British Commonwealth income tax.

Residents

The relief available from tax in St. Kitts-Nevis for a person resident in St. Kitts-Nevis from tax paid in St. Kitts-Nevis is the British Commonwealth income tax rate if that rate does not exceed one-half the tax rate in St. Kitts-Nevis. If the British Commonwealth income tax rate exceeds the St. Kitts-Nevis tax rate, then the relief will be limited to one-half the tax rate in St. Kitts-Nevis.

Non-residents

The relief available from tax in St. Kitts-Nevis for a person not resident in St. Kitts-Nevis from tax paid in St. Kitts-Nevis is one-half the British Commonwealth income tax rate if that rate does not exceed the tax rate in St. Kitts-Nevis. In any other case, the relief will be limited to the amount by which the St. Kitts-Nevis tax rate exceeded one-half the rate of British Commonwealth income tax.

Saint Kitts and Nevis

Withholding taxes

A WHT at the rate of 10% should be withheld from payments made to non-residents in respect of the following:

- Dividends.
- Interest, annuity, premium, and discount.
- Rent, lease, contract, and royalty payments.
- A natural resource payment.
- Commissions, remuneration, fees, and licences.
- Charges for the provision of personal services, commercial advice, and managerial skills.
- Administration, management, or head office expenses.
- Profit.
- Technical, professional, vocational, and any other service fees.
- Accounting, actuarial, legal, and audit expenses.
- Non-life insurance premiums.
- Any other annual or periodic payment or distribution.

Tax treaties

There is a tax treaty with the United Kingdom and a DTA between member states of CARICOM.

Tax administration

Taxable period

Taxes are assessed on a fiscal-year basis.

Tax returns

The taxpayer must file an information return on Form CIT-01 by the 15th day of the fourth month after the fiscal year end along with the financial statements. The authorities either accept the self-assessment or issue a revised assessment. If a return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 2.5% penalty for late filing (minimum of XCD 1).

The taxpayer can object to assessments raised within one month and ask the Comptroller of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Commissioners of Income Tax.

Payment of tax

Advance tax is payable in quarterly instalments on 15 March, 15 June, 15 September, and 15 December of each year and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one-fourth of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised, the Comptroller of Inland Revenue can raise an assessment based on best judgment.

The balance of tax due after the final assessment is issued, as notified in the assessment, is payable on or before the 15th day of the fourth month after the fiscal year end. If the Comptroller of Inland Revenue revises the assessment, then payment of the balance of taxes due is due one month after the date of issue of the revised assessment.

Saint Kitts and Nevis

Tax is deemed to be in default if not paid by the 15th day of the fourth month after the fiscal year end or within one month of the date of the notice of assessment, whichever is later. Interest of 1% per month or 12% per annum is charged on unpaid taxes in default.

Statute of limitations

Assessments may be reviewed and revised by the Comptroller of Inland Revenue within the year of assessment or within six years of the expiration of the assessment year.

Significant developments

The government of Saint Lucia will introduce the value-added tax (VAT) on 1 September 2012. In doing so, the government will fulfil undertakings given to international institutions that VAT would be introduced during this financial year.

In the Budget Statement delivered by the Prime Minister and Minister of Finance on 8 May 2012, the overall rationale for the introduction of a VAT as a general tax on consumption is to broaden the tax base and move towards a system that decreases the tax burden on income in favour of consumption. This would allow for a removal of a number of other duties and direct taxes; however, consistent with its manifesto, the government promises it will:

- maintain a basket of goods that will be zero rated and
- delay the introduction of VAT on the payment of bills for electricity and water until the government is satisfied that the public is reasonably protected from arbitrary increases by the companies that provide these services.

In total, this should result in a simplification of the tax system.

Also, the following new tax measures were introduced:

- Reduce corporate tax after an impact assessment has been done following the introduction of VAT.
- Increase application fees for alien's landholding licences from 1,500 East Caribbean dollars (XCD) to XCD 4,050.
- Provide a 'short term' opportunity to the hotel sector by waiving 100% of both interest charges and penalties within the three-month period 1 June 2012 to 31 August 2012 for amounts paid towards hotel accommodation tax on principal payments and for amounts paid during the six-month period 1 September 2012 to 31 March 2013 by waiving 100% on penalties and 50% on interest charges.

Earlier this year, the government approved a tax amnesty on outstanding tax arrears which offers a 100% waiver on interest and penalties on taxes due prior to 1 January 2012.

Taxes on corporate income

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in and out of Saint Lucia, and are subject to tax at a flat rate of 30%. The 30% tax rate is only applicable to companies who prior to income year 2003 have no tax arrears and have complied with the requirements of any enactment administered

by the Inland Revenue Department. The tax rate of 33.33% will still apply to those companies who have tax arrears and have not complied with the requirement.

Non-resident companies are taxed on Saint Lucia-source income. The gross amount of such income is liable to 25% withholding tax (WHT), while WHT of 15% applies to interest.

Associations of underwriters are taxed at 30% on 10% of the gross premium arising in Saint Lucia, and life insurance companies are taxed at 30% on 10% of the gross investment income arising in Saint Lucia.

Corporate residence

Companies are regarded as resident if they are incorporated in Saint Lucia or managed and controlled through a permanent establishment (PE) in Saint Lucia.

Permanent establishment (PE)

A PE is defined in Saint Lucia as a fixed place or premises through which the business is wholly or partly carried on.

Other taxes

Value-added tax (VAT)

VAT will be implemented in Saint Lucia on 1 September 2012. VAT is designed to streamline the tax system in Saint Lucia. Upon implementation, VAT will replace consumption tax, hotel accommodation tax, motor vehicle rental fee, mobile cellular telephone tax, and the environmental protection levy.

A standard VAT rate of 15% and a rate of 0% will be charged on certain goods and services; however, in respect of the hotel sector and related services, a reduced rate of 8% will apply until 31 March 2013. Between 1 September 2012 and 31 March 2013, the impact on the sector will be assessed and a final determination will be made on the rate to be applied beyond 31 March 2013.

A threshold for registered taxpayers of XCD 180,000 per annum will be established. This means that it is not mandatory for business earning less than XCD 180,000 per annum to register for VAT. The threshold is based on the annual sales turnover of the taxpayer.

A VAT rate of 0% will be legislated on certain supplies. Some of these supplies include, but are not limited to, the following:

- Goods to be exported.
- Goods for sale at duty-free shops.
- Fuel.
- Water.
- Electricity.

The following goods and services will be exempted from payment of VAT, but this list is not exhaustive:

- Domestic residential rental.
- Educational services.

Saint Lucia

- Financial services.
- Insurance services.
- Medical services.
- Local transportation services.
- Certain food items (e.g. chicken, rice, milk, flour, bread).

While the standard VAT rate of 15% will be charged on medical supplies, the government has secured the Caribbean Community and Common Market's (CARICOM's) approval to remove the import duty on medical supplies.

The government has also agreed to the establishment of a special VAT Refund Account in accordance with the provisions of the Financial Administration Act. This is to facilitate the timely processing and payment of refunds to taxpayers.

Consumption tax

Consumption tax is levied on goods manufactured in Saint Lucia and on a wide range of imported goods. Rates range between 5% and 35%. For manufactured goods, the tax is charged on their open market value. For imported articles, consumption tax is charged as a percentage of the cost, insurance, and freight (CIF) value plus customs duty.

With the implementation of VAT on 1 September 2012, consumption tax will be eliminated.

Custom duties

Customs duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

Excise tax

Excise taxes are imposed on home-produced goods, mainly liquor, beer, and cigarettes. XCD 1.44 per litre of liquid applies to beer in glass bottles and XCD 3.50 per liquid gallon applies to beers in metal cans.

There is also an excise tax on fuel when fuel is imported by a wholesaler. Tax is included on the price of fuel paid at the gas pump. The tax rate formula is based on the current price provided by the supplier and regulated price at the gas pump.

Commercial property tax

Commercial property tax is currently assessed annually at 0.4% of the open market value of the property. The owner is required to obtain a commercial valuation assessing the open market value of the property. All new commercial properties completed after 1 April 2001 can benefit from a three-year tax exemption from commercial property tax.

Residential property tax

The property tax rate for residential property is 0.25% of the open market value.

Stamp tax

Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped, denoting the payment of taxes, which may be either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property transferred.

The current rate of stamp tax under the stamp duty regulations for the conveyance or transfer on sale of the debenture, stock, debt, or shares of a company and the release, renunciation, or reassignment of any shares or interest in any shares of a company or corporation is the greatest of the following:

- 0.5% of the net value of the assets of the company or corporation.
- XCD 10.
- Provided that at least 75% of the open market value of the assets of the company or corporation is comprised of immovable property, the stamp duty (including vendor's tax) based on the stamp duty on the sale of immovable property that would be payable on a conveyance or transfer on sale of such immovable property, as indicated below:
 - Conveyance or transfer on sale of any immovable property such duty to be paid by the purchaser: 2% *ad valorem*.
 - Conveyance or transfer on sale of any immovable property such duty to be paid by the vendor:
 - where the vendor is not a citizen of Saint Lucia or is a foreign company: 10% *ad valorem*.
 - where the vendor is a citizen of Saint Lucia or is a local company: 2.5% *ad valorem* from XCD 50,000 to XCD 75,000; 3.5% *ad valorem* from XCD 75,001 to XCD 150,000; 5% *ad valorem* from XCD 150,001 and over.

Branch income

The tax rate on branch income is the same as that on income earned by resident companies. No additional tax is withheld on transfers of profits to the head office.

Income determination

Inventory valuation

Stocks generally are valued at the lower of cost or market value. Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

Capital gains

There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.

Dividend income

Dividends are tax exempt in Saint Lucia.

Inter-company dividends

Inter-company dividends are not subject to tax in Saint Lucia.

Interest income

The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and income accruing from trading in securities under the Securities Act to any citizen or resident of any member state of the Organisation of Eastern Caribbean States or to any company incorporated in and registered in any member state of the Organisation of Eastern Caribbean States is tax exempt.

Saint Lucia

Any expenditure incurred for the purpose of producing exempt income is not deductible.

Royalty and rental income

The corporate tax rate applies to royalty and rental income. However, rental income from a residential accommodation shall be exempt from tax if certain requirements, as defined by regulations, are met.

Foreign exchange gains/losses

Foreign exchange gains or losses arising from foreign exchange transactions on trading items are assessable or deductible as realised gains or losses, if settled within normal credit terms. Gains or losses on other instruments, including inter-company loans, are recognised only when actually realised.

Unrealised exchange gains/losses are not taxable/deductible.

Bribes, kickbacks, illegal payments

Bribes, kickbacks, and illegal payments received by a company are includible in taxable income.

Foreign income

Resident companies are taxed in Saint Lucia on income earned outside Saint Lucia. Reciprocal understandings exist with some countries for the avoidance of double taxation, and foreign tax is allowed as a credit against tax charged in Saint Lucia. Saint Lucia has no tax treaties with other countries, except for the member states that make up CARICOM. There is an agreement among the governments of CARICOM for the avoidance of double taxation. Where no agreement exists, the foreign tax offset is the lesser of the foreign tax paid or the tax payable on that income in Saint Lucia.

Tax deferral is not permitted in Saint Lucia.

Deductions

Accrued expenses are deductible as long as they are business related. Contingent liabilities are deductible expenses once they are recognised in the book of accounts.

Depreciation

The following capital allowances are available in Saint Lucia:

- An initial allowance of 20% is granted on the acquisition of industrial, agricultural, and commercial buildings (except for hotels and rental properties); on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.
- Thereafter, annual allowances for wear and tear, ranging from 10% to 33.33%, are granted on the reducing-balance method, except for industrial and agricultural buildings, which are allowed an annual rate of 5% and commercial buildings (except for hotels and rental properties), which are allowed an annual rate of 2.5%.

The Comptroller of Inland Revenue may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Gains on disposal are taxable as ordinary income to the extent of depreciation recovered, and any proceeds in excess of the cost of the asset are treated as a capital

gain, which is not subject to tax. Where the proceeds on disposal are lower than the tax written-down value of the asset, a balancing allowance is granted for the shortfall.

Goodwill

Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

Organisational and start-up expenses

All expenditures incurred in connection with incorporation costs for the establishment of a new small business enterprise are allowable deductions. A small business enterprise is an enterprise incorporated during the year of income and

- is wholly owned by citizens of Saint Lucia who have not been owners of previously incorporated businesses in Saint Lucia
- employs not more than 50 persons
- has gross income that does not exceed XCD 1 million
- engages in an activity on the listing of preferred business activities as approved by the Minister of Finance, and
- satisfies the provision of any law in force with respect to micro or small scale business.

Interest expenses

Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

Bad debt

Bad debt expense is deductible provided it has been brought to account in generating the company's assessable income for any income year and that the company has taken all reasonable steps to establish that the collection of such debt is unlikely.

Charitable contributions

Charitable contributions are an allowable deduction when the contributions are made under a deed of covenant for a period of not less than three years to any religious, charitable, medical, or educational institution; sporting body; or fund of a public character, approved by Cabinet, if such contributions are made to the Saint Lucia National Trust. However, the deduction with respect to such contributions shall not exceed 25% of the assessable income of the company for that income year.

Pension expenses

Current annual contributions to an approved pension fund are deductible expenses. However, where a special payment is made to an approved pension fund, in relation to a period of service by an employee prior to the setting up of the approved pension fund, or to meet any actuarially ascertained insufficiency in the resources of the approved pension fund to meet its obligations to its employees, such amount shall be deductible as follows:

- (i) Where the special payment does not exceed the current annual contribution, such amount is wholly deductible.
- (ii) Where the special payment exceeds the current annual contribution, the special payment is an allowable deduction in such years of income, not exceeding five in number, as in the opinion of the Comptroller is reasonable in the circumstances.

Saint Lucia

- (iii) Where under (ii) above, annual deductions are allowable over a number of years of income, the first such deduction is allowable for the income year for which the special payment is made.

Taxes

Consumption taxes paid on goods imported or purchased, and sold in the ordinary course of business, are deductible for tax purposes. Property taxes are deductible where the property is used in producing assessable income. Income taxes, penalties, and interest on tax in arrears are not deductible.

Other significant items

Meals and entertainment, officer's compensation/life insurance, and payment to directors are deductible expenses, provided they are wholly and exclusively incurred by a company during that year of income for the purpose of producing its assessable income.

Net operating losses

Net operating losses may be carried forward for up to six years if the losses have not been fully absorbed earlier. In carrying losses forward, the amount that can be claimed in any subsequent year is restricted to one-half of the assessable income of that year. Losses may not be carried back.

Payments to foreign affiliates

There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm's length and at commercial rates. However, deductions for management charges, allocations of head office expenses, royalties, and other charges that are subject to 25% WHT are restricted to the lesser of the aggregate of those charges or 10% of all allowable business deductions, excluding cost of sales and capital allowances.

Group taxation

Group tax filing is not allowed in Saint Lucia; however, group tax relief is available under certain circumstances to allow the trading losses, excluding the current loss, of a resident company within a group to offset the profits of another resident company within the same group. A claim for group relief requires the consent of the Comptroller of the Inland Revenue Department and is only available to resident companies.

Transfer pricing

Related party transactions are accepted if they are made on an arm's-length basis. The Inland Revenue has the power under the Income Tax Act to make any adjustment deemed necessary to place such transactions at arm's length.

Thin capitalisation

No provision exists for thin capitalisation in Saint Lucia.

Tax credits and incentives

Foreign taxes credit

Where income has accrued to a resident and has been taxed in a foreign country with which there is no double tax agreement (DTA), or is income to which a DTA, if there

is one, does not relate, credit for tax on such income is allowed for the lesser of the tax payable in the foreign country or the tax charged under Saint Lucia tax law.

Tax holidays

Tax holidays are available for manufacturing companies. The incentives are aimed at increasing the manufacturing base of Saint Lucia, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise will be granted a tax holiday up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

Investment incentives

Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act, the Tourism Incentives Act, the Special Development Areas Act, and other concessions granted by the Cabinet of Ministers. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty-free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment generating activities, for periods of up to 15 years.
- Whole or partial waivers of property tax, stamp duties, Alien Landholding Licence fees, WHT, and consumption taxes with respect to investments in specific areas, or in specific industries and activities.
- Guaranteed repatriation of capital and dividends. Remittance of profits and dividends are tax-free as they are not subject to WHT.
- Export allowances for goods manufactured in Saint Lucia and exported. Companies who engage in such activity are given tax exemption on the export of such goods up to a maximum of 10 to 15 years.

Employment incentives

Employment incentives are available in the Income Tax Act for the following:

- Hiring university graduates. An additional deduction of 25% of salaries is provided for a maximum period of three years.
- Hiring persons in the offshore financial services industry with skills not available in Saint Lucia. A special tax concession is given to such persons that allows a prescribed percentage of an employee's or contractor's salary or fees to be exempt from income tax.

Other incentives

Complete or partial waivers of income tax are available on the taxable profits of companies engaged in providing services to the offshore financial services industry.

Special tax concessions are also available for capital construction in the hotel industry. Capital expenditures on the construction of a hotel may offset profits for up to 15 years.

Saint Lucia

Withholding taxes

Resident corporations and persons that make certain payments of an income nature to residents or non-residents are required to withhold tax on these payments as follows:

Recipient	WHT (%)
Resident corporations:	
Payments to contractors	10
Equipment hire	10
Non-resident corporations:	
Interest	15/15 CARICOM
Royalties	25/15 CARICOM
Management fees	25/15 CARICOM
Commissions or fees (not by way of employment)	25
Income of a trust	25
Premiums, including insurance premiums	25
Any other payment of an income nature	25

Saint Lucia has only one DTA. This treaty, between the Caribbean territories, is referred to as the CARICOM Double Taxation Agreement. CARICOM is comprised of the following states:

- Antigua and Barbuda
- The Bahamas
- Barbados
- Belize
- Dominica
- Grenada
- Guyana
- Haiti
- Jamaica
- Montserrat
- St. Kitts and Nevis
- St. Vincent and the Grenadines
- Suriname
- Trinidad and Tobago

Tax administration

Taxable period

Returns must cover a 12-month period, which may be changed only with the Comptroller's permission.

Tax returns

Tax returns must be filed within three months of the company's fiscal year-end. An extension of the filing date may be obtained.

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

The system is one of self-assessment. Upon receipt of the returns, the Inland Revenue Department examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The Revenue Department may also issue assessments in the absence of returns.

Payment of tax

Tax is payable in instalments on 25 March, 25 June, and 25 September in each year of income, based on the preceding year's income. Any remainder is payable within three months of the end of the financial year.

Appeals

Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the Revenue Department on any matters in such assessment or reassessment. If the Revenue Department confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises seven persons appointed by the Minister of Finance. A decision by that body may be further appealed to the Saint Lucia High Court within 30 days. An appeal against an order from this Court may be made to the Court of Appeal.

Audit cycle

The Inland Revenue Department carries out audits of a selection of tax returns, usually at the taxpayer's place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The Revenue Department has wide powers in determining the information it requires for these audits.

Statute of limitations

Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

Penalties and interest

The following civil penalties and interest, which are non-deductible, are imposed:

- For late filing or for failure to file: 5% of the tax charge at filing date.
- For late payment: 10% of the unpaid tax at the due date.
- On tax and penalties unpaid: monthly interest at a rate of 1.04%.
- Tax knowingly evaded or sought to be evaded: 100% of the tax.

Significant developments

Withholding tax (WHT) on technical and consulting services provided by related parties

The High Appeal Committee (HAC) has ruled recently that 5% WHT is applicable on payments to non-resident related parties for technical and consulting services fees instead of 15%.

The appeal arguments were purely based on the local regulations and certain mismatches in the interpretation of the regulations between the Department of Zakat and Income Tax (DZIT) and the taxpayer. In general, the tax appeal rulings in Saudi Arabia do not necessarily constitute part of the regulations. However, taxpayers can still claim their rights based on such rulings when they become final.

The ruling is not yet final since the DZIT has filed an appeal against the HAC ruling with the Board of Grievance (BOG).

The BOG process may take longer than expected before concluding on this issue.

The expectation is that the DZIT may issue further clarification to make it clear once and for all that the rate should be 15% as per the current application or reduce it to 5%. Until that unknown time, the DZIT will most likely continue to apply and claim the 15%.

However, considering the significant impact on the taxpayers, it is expected that this issue will be one of the hot topics that the DZIT should address to put an end to the expected high pressure and follow up by taxpayers.

Taxes on corporate income

The rate of income tax is 20% of the net adjusted profits. Withholding tax (WHT) rates are between 5% and 20%. *Zakat*, an Islamic assessment, is charged on the company's *Zakat* base at 2.5%. *Zakat* base represents the net worth of the entity as calculated for *Zakat* purposes.

Only non-Saudi investors are liable for income tax in Saudi Arabia. In most cases, Saudi citizen investors (and citizens of the Gulf Cooperation Council [GCC] countries, who are considered to be Saudi citizens for Saudi tax purposes) are liable for *Zakat*. Where a company is owned by both Saudi and non-Saudi interests, the portion of taxable income attributable to the non-Saudi interest is subject to income tax, and the Saudi share goes into the basis on which *Zakat* is assessed.

According to the income tax law, the following persons are subject to income tax:

- A resident capital company to the extent of its non-Saudi shareholding.
- A resident non-Saudi natural person who carries on activities in Saudi Arabia.
- A non-resident person who carries out activities in Saudi Arabia through a permanent establishment (PE).
- A non-resident person who has other income subject to tax from sources within Saudi Arabia.
- A person engaged in natural gas investment fields.
- A person engaged in oil and other hydrocarbon production.

It should be noted that although the income tax rate is 20%, income from the following two activities is subject to different rates:

- Natural Gas Investment Tax (NGIT) shall be determined on the basis of the internal rate of return (IRR) on the cumulative annual cash flows of the taxpayer derived from natural gas investment activities. The rate applicable will be 30% if the IRR is 8% or less. The rate increases progressively up to 85% if the IRR equals or exceeds 20%.
- Income from oil and hydrocarbon production is subject to tax at the rate of 85%.

Corporate residence

A company is considered a resident company if it is formed under the Saudi Arabian Regulations for Companies or if its central management is located in Saudi Arabia.

Permanent establishment (PE)

According to the Saudi tax regulations, the following are the requirements for considering a non-resident party to have a PE:

- A PE of a non-resident in the Kingdom, unless otherwise provided below, consists of the permanent place of activity of the non-resident through which one carries out business, in full or in part, including business carried out through an agent.
- The following are considered a PE:
 - Construction sites, assembly facilities, and the exercise of its related supervisory activities.
 - Installations or sites used for surveying for natural resources, drilling equipment, or ships used for surveying for natural resources, and the exercise of its related supervisory activities.
 - A fixed location where a non-resident natural person carries out business.
 - A branch of a non-resident company which is licensed to carry out business in the Kingdom.
- A place is not considered a PE of a non-resident in the Kingdom if it is used in the Kingdom only to do the following:
 - Store, display, or deliver goods or products belonging to the non-resident.
 - Keep an inventory of goods or products belonging to the non-resident only for the purposes of processing by another person.
 - Purchase of goods or products only for the collection of information for the non-resident.
 - Perform any other activities that are preparatory or auxiliary in nature for the interests of the non-resident.
 - Prepare contracts relating to loans, supply of products or perform technical services for signature.

Saudi Arabia

- Executing any group of the activities mentioned above.
- A non-resident partner in a resident personal company is considered an owner to a PE in the Kingdom in the form of a share in a personal company.

Furthermore, the agent mentioned in the above article is identified as a dependent agent who has any of the following authorities:

- Negotiate on behalf of a non-resident.
- Conclude contracts on behalf of a non-resident.
- Has a stock of goods, owned by a non-resident, on hand in the Kingdom to supply the clients' demands regularly on behalf of the non-resident.

A place from which a non-resident carries out insurance and/or reinsurance activity in the Kingdom through an agent is considered a PE of the non-resident even though the agent is not authorised to negotiate and conclude contracts on behalf of the non-resident.

Other taxes

Value-added tax (VAT)

There is currently no VAT system in Saudi Arabia.

Customs duties

Customs duties are imposed on imports according to tariffs rates that are effective on the payment date in accordance with the Saudi Customs regulations. Customs duties are imposed on the price of the imported goods. This price is assessed based on the actual cost paid or on the agreed upon cost denominated in the currency of the exporting country. The price consists of the price of the imported goods as packed for shipping from the port of export plus freight and insurance cost to the Saudi port which is converted to Saudi riyals at the exchange rates published by Saudi Arabian Monetary Agency (SAMA) on the date of the declaration. In case this procedure is not achievable, the imported goods will be priced based on the most proximate comparable value that could be ascertained. Imported goods that are subject to customs duties based on weight are assessed based on the gross weight or the net weight as shown in the tariff schedules. The gross weight of the goods includes the goods weight including all internal and external packing materials. Net weight of the goods excludes all internal and external packing materials including the items used for separating and arranging the goods.

To encourage joint ventures in manufacturing, the government grants tariff protection from competing imports to locally produced, quality goods. Rates can be as high as 20%.

Penalties on smuggling goods vary from confiscation, to collections of customs duties and penalties, to imprisonment.

Social insurance tax

Social insurance tax is paid monthly based on the monthly basic salary plus housing with an upper limit of 45,000 Saudi riyals (SAR), is computed at 2% for non-Saudi employees, and is paid by the employer. For Saudi employees, the rate is 20% and is paid by both the employee (9%) and the employer (11%).

Other taxes

There is no form of stamp duty, transfer, excise, sales, turnover, production, real estate, or property taxation except in so far as they may fall within the scope of *Zakat*, which is applicable only to Saudi nationals.

Branch income

Taxable income from a branch of a non-Saudi based corporation is taxed at 20%. Certain charges incurred by the headquarters are not deductible on the branch tax return.

Income determination

Inventory valuation

The weighted average-cost method is used for valuing inventory under Saudi tax law.

Capital gains

Capital gains are subject to income tax or *Zakat*, as appropriate, at the normal income tax or *Zakat* rate. However, capital gains realised from the disposal of shares in Saudi stock companies listed in the Saudi market are tax exempt, subject to certain conditions.

Dividend income

Dividend income that is received by a resident party is subject to income tax at the normal income tax rate. However, dividends paid to a non-resident party are subject to WHT at 5%.

Interest income

Interest income is subject to income tax at the normal income tax rate.

Imports and supply contracts

Saudi tax law provides that no profit will be considered to arise from a contract for the supply of goods to Saudi Arabia, provided delivery of the goods is either free on board (FOB) or cost, insurance, and freight (CIF) to a Saudi port. However, should the contract provide for the delivery and/or installation of materials at a point inside Saudi Arabia, the supplier may be considered to be carrying on business within Saudi Arabia, and, as a consequence, the contract may be subject to Saudi income taxation as follows:

- If the material cost was identified in the supply contract separately from the cost of work performed in Saudi Arabia, then, in the absence of a PE, a WHT on the work that will be performed in Saudi Arabia may be assessed, based on the type of services. However, if the contract qualifies the supplier to have a PE in Saudi, then income tax will be applied according to the Saudi tax regulations as for a normal taxpayer.
- If the supply contract indicates a total cost without segregation in the value of supply and the value of the other activities in Saudi Arabia, then the work performed in Saudi Arabia will be assigned a value equal to 10% of the contract value for each type of activity.

Foreign income

The gross income derived by a capital company resident in the Kingdom from its operations and of its branches inside and outside the kingdom is subject to tax in Saudi

Saudi Arabia

Arabia. However, in order to avoid double taxation on the same income, the following exceptions and clarifications are to be considered:

- With respect to the income realised from investments in other resident capital companies and in order to avoid double taxation, such income is to be excluded from being subject to tax under the following conditions:
 - That such income was subjected to tax in the Kingdom.
 - The percentage of ownership in the company invested in is not less than 10%.
 - The period of ownership of shares is not less than one year.
- With respect to the income realised from investments and operations outside the Kingdom, it will be subject to tax in the Kingdom unless an effective double tax treaty (DTT) between the Kingdom and the country invested in stipulates different provisions.

There are no restrictions on repatriation of profits, fees, capital, salaries, or other monies.

Deductions

All expenses that are necessary and normal to the business, paid or accrued, are allowable deductions, provided the expense meets the following conditions:

- It is an actual expense, supported by a verifiable document or other qualifying evidence.
- It is related to the generation of taxable income.
- It is related to the subject tax year.
- It is of a non-capital nature.

Depreciation

A depreciation deduction is allowed under the following limitations as stipulated by the law:

- The asset is not intended for resale and is to be used, in full or in part, for the entity's purposes.
- The asset is of a depreciable nature that loses value because of use or because of wear and tear and obsolescence and which has a value extending beyond the end of the taxable year.
- The asset is owned by the business, as per the ownership document for buildings and contracts and invoices for other assets.
- The asset depreciation is allowed even if the asset becomes inactive during the tax year.

Depreciation for tax purposes is calculated as follows, based on the following five categories of depreciable tangible or intangible assets, other than land:

Asset category	Depreciation rate (%)
Fixed buildings	5
Industrial and agricultural movable buildings	10
Factories, machines and equipment, computer application programs, passenger cars, and cargo vehicles	25
Expenditures for geological surveying, drilling, exploration, and other preliminary work to exploit and develop natural resources and their fields	20

Asset category	Depreciation rate (%)
All other tangible or intangible assets not included in previous categories, such as furniture, planes, ships and trains, and goodwill	10

The declining-balance method of depreciation, according to the above rates, should be followed for tax purposes.

There are also rules for depreciation relating to assets either acquired or disposed. Essentially, 50% of the allowable acquisition price or disposal proceeds is added to or subtracted from the asset pool in the first year, and the remaining 50% in the following year.

Assets under build, own, and transfer (BOT) and build, own, operate, and transfer (BOOT) are allowed to be depreciated over the contract period. This presumes, although it is not clear, that assets under the BOT and BOOT schemes actually will have a separate grouping in addition to the above prescribed groups.

Start-up expenses

Tax treatment of start-up expenses depend on how they were treated under Saudi generally accepted accounting principles (GAAP). Generally, they can be fully expensed at the first financial year or can be amortised.

Loan charges (interest expenses)

An interest deduction is limited to the lower of the loan charge incurred during the tax year, if related to income that is subject to tax, or the result of the following formula, whichever is less.

The taxpayer's total income from loan charges, plus 50% of (A minus B) as below:

A = income subject to tax other than income from loan charges.

B = expenses allowed under the law other than loan charge expenses.

Note that banks are not subject to this formula.

Bad debt

Bad debts are deductible, provided they meet all of the following conditions:

- The bad debt was previously declared in the appropriate year's income.
- The debt resulted from sale of goods or services.
- The company holds a certificate from the taxpayer's certified public accountant certifying that the debt has been written off in the taxpayer's books and records, based on a decision by the taxpayer at the appropriate management level.
- Serious efforts have been exerted by the taxpayer to collect the debt with no success and the inability of the debtor to pay has been proved based on a judicial ruling or bankruptcy.
- The debt is not from a related party.
- There is a commitment by the taxpayer to reinstate, as income, any written-off debt whenever collected.

Saudi Arabia

Charitable contributions

In determining the tax base of each taxpayer, a deduction is allowed for donations paid during the taxable year to public agencies or philanthropic societies licensed in the Kingdom which are non-profit organisations and are allowed to receive donations.

Allocations and reserves

Allocations and reserves formed during the year are deductible as follows:

- Bank allocations to a reserve fund for doubtful debts are allowable deductions. However, a bank must submit a certificate from the SAMA stating the amount of doubtful debts and the amount of doubtful debts collected during the year, which should be reinstated in the tax base of the year of collection.
- Insurance/reinsurance companies may deduct, based on industry standards, a reserve for unearned premiums and for unexpired risks, provided that it is reported in the tax base of the following year.

A reserve for unearned premiums means a part of premium amounts collected or stated in books that covers risks related to the future tax year(s). A reserve for unexpired risks means the amount of compensation claimed or reported, but for which the payment process falls short of completion during the tax year.

- A taxpayer may reduce its book profit by the amount of reserves used during the year that had been readjusted when made, to increase income or decrease expenses in the year of formation. Examples of such reserves are end-of-service awards, doubtful debt, and drops in prices. Such amounts are deductible, provided the following conditions are met:
 - The used amount was paid or accrued during the year, and it is supported by documentation.
 - The reserve had been adjusted in the year of formation to increase the tax base.

School fees

School fees paid by taxpayers for their employees' children are deductible expenses, provided they meet the following conditions:

- They are paid to a local licensed school.
- This benefit is stated in the employment contract.

Pension fund

Employers' contributions to employees' pension funds or savings funds established under Saudi Arabia's rules and regulations are deductible, provided that such contribution, one payment or in aggregate, is not in excess of 25% of the employee's income before the employer's contributions and that the fund meets the following criteria:

- The fund is established according to special provisions that clearly stipulate conditions of subscription and rights of subscribers.
- Such obligation is stated in the employment contract or in the Articles of Association of the establishment.
- The fund has a character independent of the establishment and has separate accounts audited by an independent certified public accountant.

Research and development (R&D)

A deduction is allowed for R&D expenditure incurred during the tax year in connection with the generation of income that is subject to tax. Such expenditure relates to technical, scientific, and engineering experiments; computer systems; or similar

research. This provision does not apply to the acquisition of land and facilities, or to equipment used for research. Such facilities and equipment are subject to depreciation under the law.

Fines and penalties

Fines and penalties related to income tax, paid or payable in Saudi Arabia or to other countries, are not deductible.

Financial fines or penalties paid or payable to any party in Saudi Arabia, such as traffic fines or fines for causing damage to public utilities are also not deductible.

Fines or penalties paid for breach of contractual obligations, such as fines on delayed or defaulted completion of contracts, are deductible, provided they are documented by the contracting party and the income from such penalties is reported in the year of recovery.

Taxes

Income taxes are not deductible.

Non-deductible expenses

The following expenses are non-deductible:

- Wages, salaries, and whatever is so deemed, in cash or in kind, paid to an owner, partner, or shareholder or to a member of their families, being a parent, spouse, sons/daughters, and siblings (this provision does not apply to stockholders in a stock company).
- Compensation in cash or in kind paid to a partner, shareholder, or to a family member including a parent, spouse, sons/daughters, and siblings for a property or service to the extent that the compensation is higher than the fair market value of such property or service at time of transaction.
- Entertainment expenses incurred for events such as parties, sports competitions, entertainment trips and activities, etc.
- Expenses of a natural person for personal consumption, such as personal withdrawals, dependents' cost of living, or education.
- Any bribe or similar payment which is considered an illegal practice in Saudi Arabia, even if paid abroad.
- Insurance commission in excess of 3% of total premiums collected in Saudi Arabia through an agent or others and regardless of whether or not the agent is a partner.

Net operating losses

A taxpayer may carry forward operational losses as adjusted, to the years following the loss year until the cumulative loss is fully offset. The maximum profit percentage of any year that could be used to offset cumulative losses should not exceed 25% of the year's profit as reported in the taxpayer's return. Carryback of losses is not allowed.

Payments to foreign affiliates

Payments made to headquarter offices located abroad by wholly owned local subsidiaries or branches are not deductible. Such payments include:

- royalties or commissions
- loan charges (interest expense) or any other financial fees, and
- indirect administrative and general expenses allocated on an estimated basis.

Saudi Arabia

The value of goods or services delivered to the taxpayer by related parties is not deductible to the extent that it is in excess of an arm's-length value.

Group taxation

Double taxation on the income of foreign investors realised from their investments in other resident companies is eliminated under the following conditions:

- Such income was subjected to tax in Saudi Arabia.
- The percentage of ownership in the company invested in is not less than 10%.
- The period of ownership of shares is not less than one year.

With respect to the income realised by a resident capital company from its investments and operations outside Saudi Arabia, it will be subject to tax in Saudi Arabia (unless an effective DTT between Saudi Arabia and the country invested in stipulates different provisions).

However, for *Zakat* purposes, the concept of consolidation is acceptable and relief may be obtained for wholly owned subsidiaries by Saudi/GCC companies that are subject to *Zakat*.

Note that an entity operating in Saudi Arabia that has undertaken more than one project under the same commercial registration is required to consolidate the results of such projects into the financial statements of that entity and subject them to taxation as a single operation.

Transfer pricing

There are no specific transfer pricing rules in Saudi Arabia that impose or deem a charge to arise where the DZIT has reason to believe that a transaction has taken place at a value other than on an arm's-length basis. However, there is a generic provision that allows the DZIT to re-characterise or re-allocate income or expenses arising from a transaction if it is undertaken for the purposes of avoiding or reducing a tax liability in Saudi Arabia.

Thin capitalisation

There is no special legislation governing thin capitalisation for tax purposes. A Saudi company may deduct interest payments to affiliates, but not the head office, provided that the amount of debt and rate of interest are at arm's length and that interest deductibility formula is met. A Saudi company may be financed with minimum capital, and there is no limit to the amount of debt that may be used.

Tax credits and incentives

Incentives for investment in less-developed regions

The government of Saudi Arabia has granted tax concessions to the following six less-developed regions in Saudi Arabia, with the intention of attracting more investment:

- Ha'il.
- Jazan.
- Najran.
- Al-Baha.
- Al-Jouf.

- Northern territory.

These tax privileges are granted for a period of ten years from the start of any project.

The qualifying investing company's annual tax bill may be reduced by:

- Half the annual training expenditure on Saudis.
- Half the annual salaries paid to Saudis.
- 15% of the non-Saudi capital share, subject to certain conditions.

More deductions are granted if investment capital for any project exceeds SAR 1 million and if more than five employees of Saudi nationality have jobs of a technical or administrative nature with contracts of at least one year.

Customs incentives

An exemption from customs duties is available on machinery and raw materials that are required for approved projects, provided that they are not available in the local market. Such exemptions should be applied for prior to their importation and are subject to certain terms.

Withholding taxes

Payments made from a resident party or a PE to a non-resident party for services performed are subject to WHT. The rates vary between 5%, 15%, and 20% based on the type of service and whether the beneficiary is a related party.

The WHT should be paid within the first ten days of the month following the month during which the payment was made.

The domestic rate for WHT is 5% on dividends, 15% on royalties, and 5% on interest.

Tax treaties

Saudi Arabia has entered into tax treaties with several countries. Treaties currently or about to be in force are listed below. A number of other treaties are at various stages of negotiation.

DTTs have not yet been effectively tested in Saudi Arabia. However, they generally follow the Organisation for Economic Co-operation and Development (OECD) model treaty and may provide certain relief, including WHT on dividends, interest, and royalties.

The following are the treaty WHT rates for payments made from Saudi Arabia to treaty country recipients. Each tax treaty should be studied carefully because there could be exceptions to the general rules:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non treaty country	5	5	15
Treaty country:			
Austria	5	5	10
Bangladesh	10	7.5	10

Saudi Arabia

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Belarus	5	5	10
China (P.R.C.)	5	10	10
France	0	0	0
Greece	5	5	10
India	5	10	10
Italy	5/10 (1)	5	10
Japan	5/10 (9)	10	5/10 (10)
Malaysia	5	5	8
Netherlands	5/10 (2)	5	7
Pakistan	5/10 (3)	10	10
Russia	5	5	10
Singapore	5	5	8
South Africa	5/10 (2)	5	10
South Korea (R.O.K.)	5/10 (4)	5	5/10 (10)
Spain	0/5 (5)	5	8
Syria	0	7.5	15
Turkey	5/10 (6)	10	10
United Kingdom	5/15 (7)	0	5/8 (11)
Uzbekistan	7	7	10
Vietnam	5/12.5 (8)	10	7.5/10 (12)

Notes

1. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that has owned directly or indirectly at least 25% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
 - 10% of the gross amount of the dividends in all other cases.
2. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
3. Shall not exceed:
 - 5% of the gross amount of dividends if the beneficial owner is (i) a company or (ii) an entity wholly owned by the government.
 - 10% of the gross amount of the dividends in all other cases.
4. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
5. Shall not exceed:
 - 5% of the gross amount of the dividends.
 - The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) which is a resident of the other contracting state, as long as it holds directly at least 25% of the capital of the company paying the dividends.
6. Shall not exceed:
 - 5% of the gross amount of the dividends:
 - if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends or
 - if the beneficial owner is central bank or an entity that is wholly owned by the government.
 - 10% of the gross amount of the dividends in all other cases.
7. Shall not exceed:
 - 15% of the gross amount of the dividends where qualifying dividends are paid by a property investment vehicle.
 - 5% of the gross amount of the dividends in all other cases.
8. Shall not exceed:

- 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 50% of the capital of the company paying the dividends, or has invested 20 million United States dollars (USD) or more, or any equivalent currency, in the capital of the company paying the dividends.
 - 12.5% of the gross amount of the dividends in all other cases.
9. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company that holds directly or indirectly, during the period of 183 days ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares or of the total issued shares of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
 10. Shall not exceed:
 - 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
 - 10% of the gross amount of the royalties in all other cases.
 11. Shall not exceed:
 - 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
 - 8% of the gross amount of the royalties in all other cases.
 12. Shall not exceed:
 - 7.5% of the gross amount of such royalties that are paid for rendering of any services or assistance of a technical or managerial nature.
 - 10% of the gross amount of such royalties in all other cases.

Tax administration

Taxable period

Tax filings are based on the company's fiscal year.

Tax returns

Returns are due to be filed with the DZIT within 120 days after the taxpayer's year-end. The system is one of self-assessment.

The tax authority has recently issued a circular requesting that companies that are owned by Saudis only, or by Saudis and non-Saudis, to file audited financial statements along with the tax return. However, this requirement is not applicable for companies that are 100% owned by non-Saudis.

Payment of tax

Final tax due must be paid with 120 days after taxpayer's year-end.

Three equal advance tax payments are required to be made on the last day of the sixth, ninth, and 12th months for a current tax year, provided that the taxpayer has earned income during the year. Each advance payment is equal to 25% of the amount resulting from the taxpayer's tax liability based on the previous year return minus the withheld tax on reported income, if any. The taxpayer is not required to make advance tax payments if the result of the said formula is less than SAR 500,000. Late payment of an advance payment is subject to a delay penalty of 1% of the amount due for every 30 days of delay.

Audit cycle

There is no specific audit cycle by the DZIT; however, the most common ways for the DZIT to select companies for tax audits are the size of the company, the companies' shareholders nationality (totally owned by foreigner and branches of foreign companies), and certain risk assessment measures.

Saudi Arabia

Statute of limitations

The DZIT may, with a reasoned notification, make or amend a tax assessment within five years from the end of the deadline specified for filing the tax declaration for the taxable year, or, at any time, upon a written consent of the taxpayer.

The DZIT may make or amend an assessment within ten years of the deadline specified for filing the tax declaration for the taxable year if a taxpayer does not file its tax declaration, or it is found that the declaration is incomplete or incorrect with the intent of tax evasion.

A taxpayer may request a refund of overpaid amounts at any time within five years from the end of the overpaid taxable year.

Topics of focus for tax authorities

It was noted recently that the DZIT is emphasising the submission of a certificate from General Organization for Social Insurance (GOSI) along with a reconciliation statement between salaries and wages subject to GOSI and salaries and wages charged to the taxpayer's accounts duly certified by a Saudi licensed CPA.

The DZIT started recently to focus on the payments made to non-resident parties to verify compliance with the WHT regulations by requesting a reconciliation statement for such payments with the annual WHT form.

The DZIT has also recently been requesting import value lists from the Customs Authority in order to confirm the value of goods imported and declared by taxpayers in their annual declarations during the financial period.

Significant developments

Through the Finance Bill for 2012, a 5% special contribution has been introduced by the Senegalese government. The contribution will apply to the cement industry as well as the fossil and mineral deposits industry.

The contribution shall apply on local sales, imports, and exports of the related products.

Phosphate, nitrates, salt, and mining products are exempt from the new contribution.

Taxes on corporate income

Branches and companies are liable for corporate income tax (CIT) at the rate of 25%.

Residents are taxed upon their worldwide income. Non-residents are generally taxed via the existence of a permanent establishment (PE) on Senegal-source income. Withholding taxes (WHTs) may also apply to non-residents, as per the services delivered to Senegalese taxpayers, subject to the application of a double tax treaty (DTT).

Minimum CIT

A minimum CIT is due in case of lack of profits, and the amount depends on the annual turnover, as follows:

Annual turnover (XOF*)	Minimum CIT (XOF)
Up to 250 million	500,000
250 million to 500 million	750,000
Over 500 million	1 million

* *Communauté financière d'Afrique* (Financial Community of Africa or CFA) francs (XOF)

Corporate residence

Companies are considered as Senegalese residents if they have a registered fixed establishment. Nonetheless, foreign companies that are not registered locally may be deemed to have a PE in Senegal in relation to their local activity, and will then be subject to tax liabilities.

Senegal

Permanent establishment (PE)

The criteria for a PE were derived from the General Tax Code and are close to the Organisation for Economic Co-operation and Development (OECD) standards. DTTs can be applicable and can provide specific definitions. These DTTs are based on the OECD model in most cases. *See the Withholding taxes section for a list of countries with which Senegal has concluded DTTs.*

Other taxes

Value-added tax (VAT)

Subject to certain exclusions, most commercial operations are subject to an 18% VAT.

As of 1 January 2011, VAT on tourism activities was reduced from 18% to 10%.

A 17% special tax on banking operations is applicable instead of the VAT.

VAT returns must be filed monthly.

Tax on built real estate

The tax on built real estate applies to owners of buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is 5% for common buildings and 7.5% for factories and industrial premises. It is applied on the basis of the rental value of the lands, buildings, etc.

Taxes on real estate are due annually.

Tax on non-built real estate

The tax on non-built real estate applies to owners of land without buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is fixed at 5%. It is applied on the basis of the rental value of the land.

Stamp/registration duties

There are many stamp and/or registration duties, depending on the operations, such as the following:

- 1% registration duty applicable to the incorporation of a company and the increase in cash of the share capital.
- 1% registration duty applicable to transfer of stocks.
- 1% registration duty applicable to transfer of debts.
- 15% registration duty applicable to sale of business.
- 15% registration duty applicable to transfer of real estate.
- 5% registration duty applicable to rent agreements.

Business license tax

Business license tax is an annual duty consisting of a fixed annual payment (fixed duty) and a proportional duty, calculated in most cases on the basis of the rental value of the premises used. The amounts and rates of these taxes are fixed according to the type and size of the activity carried out.

There is a table that includes several categories of business. For each category, a fixed tax is provided as well as the percentage that is applied on the assets at their fair value. In cases where the business does not fit any category, the closest business or the most

similar one is considered by the tax administration in order to calculate the business license tax for the taxpayer.

As an example, the 'merchant' business license tax fixed duty classification rates are provided below. As per this classification, a 'merchant' will be liable for business license tax depending on its annual turnover. Indeed, it will have to pay a tax determined as follows:

Merchant turnover (XOF)	Fixed amount of tax (XOF)
Over 10,000,000,000	10,000,000
Between 5,000,000,000 and 10,000,000,000	5,000,000
Between 1,000,000,000 and 5,000,000,000	3,000,000
Between 500,000,000 and 1,000,000,000	1,500,000
Between 300,000,000 and 500,000,000	1,000,000
Between 200,000,000 and 300,000,000	700,000
Between 100,000,000 and 200,000,000	400,000
Between 50,000,000 and 100,000,000	300,000

The general rate of proportional tax is 19%, and it is levied on the annual rental value of the offices, stores, warehouses, yards, workshops, stations, wharfs, sites, other premises, and installations considered as constructions used for the activities of the company. In addition to that, the basis of the proportional tax includes also the assets or rented materials at their fair value.

Tax on telecommunication

The tax rate is 5% on telecommunication use and access. To offset the tax, the purchase of mobile telephones (and other types of telephones) remains exempt from VAT and customs duty.

Tax on vehicles

An owner of a motor vehicle (car, truck, or motorbike) must pay an annual registration tax ranging from XOF 18,000 to XOF 200,000 per vehicle, depending on its nature and horsepower.

Company tax on vehicles

In addition to the tax on vehicles, companies owning or renting vehicles (more than 15 days a year) must pay a specific annual tax on them. Rates range from XOF 50,000 to XOF 200,000, depending on the type and horsepower of the vehicle.

Branch income

In general, the tax on branch income is similar to that of corporate income. Nonetheless, a 10% duty is automatically applied to profits generated after CIT. It corresponds to an automatic application of the 10% tax on payment on dividends applicable to a company.

Headquarter expenses, which are a proration of the worldwide office expenses, may be allocated to the Senegal branch. This proration is based upon a ratio of the local turnover of the branch and the worldwide turnover of the parent company. It applies to the total amount of headquarters' expenses incurred by the company. In addition, the deductibility of headquarters expenses is limited to 20% of the accounting profits

Senegal

before the deduction. This limitation does not apply to other types of services provided by headquarters, such as technical assistance.

Income determination

Inventory valuation

Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) are permitted. Book and tax conformity is required.

Capital gains

Capital gains derived from the transfer of assets are subject to the 25% CIT. There is no basket system. The taxable base will be reduced to one-third if the transfer of assets arises due to a cessation of activity. However, if the transfer of assets is made less than five years after the start of the business, a one-half reduction of the taxable base will be applicable.

Sales of stocks by a non-resident are liable to the 25% CIT, subject to the application of a DTT.

Dividend income

If a parent company domiciled in Senegal owns 20% of the subsidiary (main condition for the application of the parent-subsidiary corporation special taxation status), a 95% reduction on the dividends received is applicable for CIT purposes.

Stock dividends

Stock dividends are unusual in Senegal. However, this kind of distribution would be taxable at the general withholding tax (WHT) rate of 10% on the basis of its real value.

Foreign income

In general, profits generated in Senegal are taxed under Senegal's income tax law. Profits generated outside Senegal and constituting a PE in the relevant country are not taxed in Senegal. A DTT can provide different rules.

Deductions

Depreciation and depletion

The rates of depreciation are not provided by the law. The rate is determined on the normal and predictable duration of use of the asset by taking into account normal wear and tear. In practice, there are standard rates for common assets. Accelerated depreciation can be applicable, subject to conditions.

Goodwill

There are no provisions in Senegal for goodwill.

Start-up expenses

Start-up expenses are deductible if justified and approved by the shareholders.

Interest expenses

Interest paid to shareholders may be deducted when it relates to loans with an amount lower or equal to the amount of the share capital and whose rate is lower or equal to the base rate of the Central Bank of West African States plus two points.

Bad debt

There are no provisions in Senegal for bad debt.

Charitable contributions

Only payments made to specific chartered organisations are deductible, at a rate of up to 0.2/1,000 of turnover. On the contrary, payments made to non-chartered organisations are not deductible.

Fines and penalties

Fines and penalties are not deductible.

Taxes

CIT and the company tax on vehicles are deductible. Other local taxes are also deductible.

Other significant items

Provisions are deductible if they correspond to a risk or a probable cost that is more than possible and leads to a decrease in the assets. Provisions for paid holidays and retirement compensation are not deductible.

Net operating losses

Tax losses may be carried forward to the next three years. The carryback of losses does not exist. Losses corresponding to the depreciation of assets can be forwarded indefinitely.

Payments to foreign affiliates

Reasonable royalties, interest, and management service fees paid to foreign parent companies are tax-deductible. Supporting documents (e.g. invoices, contracts) will be necessary to prove that these expenses are justified.

Group taxation

Group taxation is not permitted in Senegal.

Transfer pricing

Transfer pricing regulations do not specifically exist in Senegal.

Thin capitalisation

There are no specific rules regarding thin capitalisation in Senegal. Nonetheless, the following tax and legal rules should be known:

- From a legal point of view (corporate law), the net assets must be equal at least half of the share capital of the company. In case the net assets are lower than this threshold, the situation should be regularised by any lawful means within a period of two years following the financial year it appears. Otherwise, any third party can request the closing of the entity before the courts.
- The deductibility of interest paid to a shareholder upon a loan or an advance in general is limited to a maximum rate calculated on the Central Bank base rate (currently fixed at 6.25%) plus 2 points, calculated on the amount of the share capital. Portions exceeding this limit are not deductible for CIT purpose.

Senegal

Tax credits and incentives

The Investment Code

The Investment Code applies to investments over XOF 100 million (mainly production, processing, industrial, tourism, agricultural, and complex trade). The benefits of the Investment Code include exemption from customs duties, suspension of VAT payment for three years, CIT limitation, etc.

Free export company status

Agriculture, industry, and telecommunications companies that have an exporting potential amounting to at least 80% of their turnover may qualify for the free export company status. There are several advantages for companies that qualify, including a CIT rate of 15%, exemption from dividend WHT, exemption from business license tax, exemption from taxes on real estate, and exemption from registration duty for incorporation or bylaws change purposes.

Miscellaneous incentives

There are a wide range of investment laws (i.e. negotiations with the government to set up a specific tax regime different from common rules) for investments greater than XOF 250 billion, including the mining code and the petroleum code, among others.

Withholding taxes

Senegal has various WHTs. The primary ones are as follows:

- 20% WHT on remuneration paid for services (including royalties) rendered by a foreign individual or foreign company.
- 10% WHT on dividends distributed.
- 13% WHT on bond interest.
- 8% WHT on deposits or guaranteed interest on accounts with a bank.
- 16% WHT on other revenues, notably interest on loans.

These WHTs may be limited by DTTs.

Double tax treaties (DTTs)

The DTTs concluded by Senegal are based on the OECD model in most cases.

Senegal has concluded such treaties with Belgium, Canada, France, Italy, Mauritania, Morocco, Norway, Qatar, Tunisia, and member states of the West African Economic and Monetary Union (WAEMU), including Benin, Burkina-Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, and Togo.

Treaty WHT rates are as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Belgium	10	16	10
Canada	10	16	15
France	10	15	15
Italy	10	15	15
Mauritania	10	16	N/A
Morocco	10	10	10

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Norway	10	16	16
Qatar	N/A	N/A	N/A
Tunisia	10	16	N/A
WAEMU	10	15	15

Tax administration

Taxable period

The tax year in Senegal is the calendar year.

Tax returns

Companies must file CIT returns by 30 April of the year following the tax year.

Payment of tax

CIT must be paid in two instalments (each equal to one-third of the previous year's tax) by 15 February and 30 April. The outstanding balance payment amount of the tax due must be paid by 15 June.

For the first financial year of a newly incorporated company, no instalment is due; the new company pays the whole CIT before 15 June of the following year.

Audit cycle

There is no specific tax audit cycle in Senegal.

Statute of limitations

The statute of limitations is, generally speaking, five years.

Serbia

Significant developments

The latest amendments of the Corporate Income Tax (CIT) Law, which came into effect in January 2012 (also applicable for 2011 CIT calculation), help create conditions for more tax efficient operations of free zones, create a more efficient process of financial restructuring of companies, and stimulate development of the market for government debt securities.

Taxes on corporate income

Residents are taxed on their income generated in Serbia, as well as on their worldwide income. Non-residents are taxed only on their income sourced through a permanent establishment (PE) in Serbian territory.

The CIT rate is 10%.

Corporate residence

A legal entity is considered to be a resident of Serbia if it is established or has its place of effective management and control in Serbia.

Permanent establishment (PE)

A PE is any permanent place of business through which a non-resident conducts its business.

Other taxes

Value-added tax (VAT)

The VAT was introduced on 1 January 2005 and generally follows the European Union's (EU's) Sixth Directive.

The standard VAT rate is 18% for most taxable supplies. A reduced VAT rate of 8% applies for basic food stuffs, daily newspapers, utilities, etc.

In addition to these tax rates, there is a 0% tax rate with the right of deduction of the input VAT which applies to the export of goods, transport and other services directly related to exports, international air transport, etc.

A 0% tax rate without the right of deduction of the input VAT applies to trading in shares and other securities, insurance and reinsurance, and the lease of apartments, business premises, etc.

A taxpayer for VAT purposes is a person who independently, and in the course of its business activities, undertakes the supply of goods and services or import of goods. Business activity is defined as the permanent activity of a manufacturer, salesperson, or service provider for the purpose of gaining income. A branch or other operating unit can be a taxpayer.

A non-resident without a head office or PE within Serbia cannot register for VAT purposes.

The VAT law requires taxpayers to file VAT returns and pay VAT within ten days of the end of each taxable period. The usual taxable period is a calendar month; however, if a taxpayer's total turnover (for the last 12 months) is less than 20 million Serbian dinars (RSD) or is forecast (for the next 12 months) to be so, the taxable period is three calendar months.

Customs duties

Goods imported into Serbia are subject to customs duty rates provided in the Law on Customs Tariff. These rates are *ad valorem* (the only exception is related to the importation of other cigarettes containing tobacco, where a combined *ad valorem* and specific customs duty rate is prescribed) and applies to goods originating in countries which have a most favoured nation (MFN) status in trading with Serbia. Goods originating in other countries are subject to MFN duty rates increased by 70%.

At the moment, the only trading partner with Serbia that does not have MFN status is Taiwan.

Customs duty rates in Serbia range from 0% to 57.6%, with most being under 30%. At the moment, the 57.6% rate only applies to cigarettes containing tobacco.

Excise duties

Excise duties are levied on producers and importers of the following goods:

- Oil derivatives.
- Tobacco products.
- Alcoholic beverages.
- Coffee (green, roasted, ground, and coffee extracts).

Excise duty in Serbia is specific (for oil derivatives, alcoholic beverages, cigars, and cigarillos), *ad valorem* (for coffee and pipe tobacco), and combined (specific + *ad valorem* on retail price for cigarettes).

Excise duties stated in Serbian currency are adjusted on a half-year basis according to variations of the consumer price index (CPI) declared by relevant government bodies in charge of statistics. For oil derivatives, the government can modify the specific excise duty amounts during the year according to changes in prices of crude oil on the market.

Property tax

Property tax is payable annually in Serbia by all legal entities and individuals who own or have rights over real estate located in Serbia, such as:

- Ownership rights.
- Right of occupancy.
- Tenancy rights over an apartment or a building for a period longer than one year or for an indefinite period.

Serbia

- Urban land usage right (municipal, public, and other state-owned land) larger than ten acres in area.

Where the taxpayer keeps books, the property tax on real estate is levied at a flat rate which cannot exceed 0.40%.

Transfer tax

Transfer tax is levied on the transfer for a consideration of rights over real estate (except first transfer of newly constructed buildings, which is subject to VAT), intellectual property rights, ownership over used vehicles, vessels, and aircrafts (unless owned by the state), right to use urban and/or public building land, as well as rights relating to expropriated real estate.

The contract price is used as a tax base; however, the tax authorities have the right to adjust the tax base in case they estimate that the price agreed to in the contract is lower than under market conditions. The tax is payable at a 2.5% rate.

Stamp taxes

There are no stamp taxes in Serbia.

Capital gains tax of non-residents

Capital gains realised by non-residents from both residents or other non-residents are subject to 20% capital gain tax. Non-residents should appoint a fiscal representative in Serbia who should submit a tax return within 15 days from the realisation of capital gain. Based on the tax return, tax authorities will issue a decision assessing tax liability (if any).

In order to benefit from application of a relevant double tax treaty (DTT), the same rules are applicable as for withholding tax (WHT). Non-residents (i.e. the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident's country of residence, and the income recipient must be the beneficial owner of income.

Branch income

Non-residents carrying on business in Serbia through a branch are taxed on their Serbian-sourced income at the CIT rate of 10%. A branch is considered to be a PE.

Income determination

Taxable profit is determined by adjusting the accounting profit as stated in the profit and loss statement (determined in accordance with International Financial Reporting Standards [IFRS] and local accounting and audit legislation) and in accordance with the provisions of the CIT Law.

For taxpayers who, according to local legislation, are not obliged to apply IFRS, taxable profit is determined according to the special guidelines prescribed by the Ministry of Finance.

Inventory valuation

Cost of materials and the purchase value of merchandise are tax-deductible up to an amount calculated by applying the average weighted cost method or the first in first

out (FIFO) method. If another method is used, an adjustment for tax purposes should be made.

Capital gains

Capital gains are generated by the sale or other transfer of real estate, rights related to industrial property, as well as shares, stocks, securities, certain bonds, and investment units. A capital gain is determined as the difference between the sale and purchase price of the asset concerned, determined in accordance with the provisions of the Law. If the amount is negative, a capital loss is realised.

Capital gains and operational profit are disclosed in the same tax return, but they are taxed separately. Consequently, capital gains/losses cannot be used to offset business losses/gains.

However, capital gains can be offset with capital losses occurring in the same period. A capital loss can be carried forward for five years.

The capital gains tax rate is 10%.

However, the rate applicable for capital gains incurred by non-residents is 20%, unless envisaged otherwise by a relevant DTT (*see the Other taxes section for more information*).

Dividend income

Dividends received by a Serbian company from another Serbian company are not subject to CIT.

Dividends received from a non-resident will be treated as taxable income of a Serbian company and subject to 10% CIT. However, a Serbian entity will have the right to decrease its tax liability by taking tax credit for the WHT and underlying CIT paid in a subsidiary's country (*see the Tax credits and incentives section for more information*).

Interest income

Interest income will be included in accounting profit determined in accordance with IFRS and will be taxable at the CIT rate of 10%. A Serbian resident has the right to decrease its CIT liability for WHT on interest paid abroad by its non-resident subsidiary.

Royalties

Royalty income will be treated as business income and subject to the general CIT rate.

A resident taxpayer also has the right to decrease its CIT liability for WHT on royalties paid abroad by its non-resident subsidiary.

Unrealised currency exchange gains

Unrealised currency exchange gains will be included in accounting profits under IFRS rules. Serbian legislation does not provide any exception of taxation of this income. CIT rate is 10%.

Foreign income

Companies resident in Serbia are taxed on their worldwide income.

When profit generated in another country is taxed in the foreign country, a company has the right to decrease its tax liability by claiming a tax credit from the tax authorities in Serbia (*see the Tax credits and incentives section for more information*).

Serbia

There are no provisions which provide for the possibility that taxation of income earned abroad may be deferred.

Deductions

Depreciation and amortisation

Fixed and intangible assets are divided into five groups, with depreciation and amortisation rates prescribed for each (Group I: 2.5%; II: 10%; III: 15%; IV: 20%; and V: 30%). A straight-line depreciation method is prescribed for the first group, which includes real estate, while a declining-balance method is applicable for assets in the other groups.

Assets subject to tax depreciation and amortisation are all tangible and intangible (except goodwill) assets with useful life longer than one year and acquisition value above the average monthly gross salary published in Serbia at the moment of acquisition.

Goodwill

Goodwill is not subject to tax amortisation.

Start-up expenses

Generally, start-up expenses are tax deductible for CIT purposes.

Interest expenses

Interest on related party loans exceeding thin capitalisation and transfer pricing thresholds are not deductible (*see the Group taxation section*).

Bad debts

Bad debt provisions are generally tax deductible if they are at least 60 days overdue.

Write-off of receivables is recognised as expense if all of the following conditions are met:

- The related revenue has already been accrued in accordance with IFRS (this condition does not apply in cases when IAS and IFRS do not envisage recognition of revenue in respect of the receivable in question).
- They were written off as uncollectable.
- The evidence of unsuccessful collection via court.

In case the above conditions are not fulfilled, the taxable base in the year in which the write-off is performed will be increased for the write-off expense in the current year, as well as for the total amount of bad debt provisions that were recognised in previous years.

Charitable contributions

Expenses for health care, scientific, educational, humanitarian, religious, ecological, cultural, and sport related purposes are deductible, up to 3.5% of total revenues.

Fines and penalties

Fines and penalties (both commercial and those charged by the authorities) are not deductible.

Taxes

All taxes, duties, and contributions that do not depend on the profitability of the company are deductible in the tax period that the liability in this respect was settled.

Other significant items

The following other expenses are not recognised for CIT purposes:

- Non-documented expenses.
- Provisions for receivables from entities that are creditors at the same time.
- Presents provided to political organisations.
- Presents provided to related parties.
- Penalty interest for late payment of taxes.
- Expenses related to forced collection of taxes and other liabilities.
- Non-business related expense.
- Share in the profit paid to employees or other individuals.
- Calculated but unpaid redundancy payments (deductible when paid).
- Impairment of assets (deductible in tax period in which asset is disposed of or used).
- Direct write-off of receivables (under certain conditions).
- Long-term provisions (except those for renewal of natural resources, expenses within warranty period, and other mandatory long-term provisions).

The following other expenses are recognised for CIT purposes only up to a certain limit:

- Advertising and promotional expenses, up to 5% of total revenues.
- Representation expenses, up to 0.5% of total revenues.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue.

Net operating losses

The taxpayer has the right to carry forward and utilise tax losses incurred over the following five years.

Carryback rules do not exist in Serbia.

Payments to foreign affiliates

Generally, there are no restrictions on the deductibility of royalties and service fees paid to foreign affiliates, provided they are at arm's length, appropriately documented (by agreements, contracts, calculation sheets, etc.), and incurred for business purpose only.

Payment of interest to foreign affiliates is restricted and regulated by thin capitalisation rules and transfer pricing rules (*see the Group taxation section*).

Group taxation

Tax grouping/consolidation is allowed to a group of companies where all members are Serbian residents and one company directly or indirectly controls at least 75% of the shares in another company. Each company files its own tax balance sheet, and the parent company files a consolidated tax balance sheet for the whole group.

In the consolidated tax balance sheet, losses of one or more companies are offset by the profits of other related companies. Each company is liable for the portion of tax attributable to its share of the group's taxable profit.

Serbia

Once approved by the Ministry of Finance, tax grouping/consolidation applies for at least five years.

Transfer pricing

A transfer price is the price of transactions between related parties. Related parties exist if there is a possibility of control or influence over business decisions between them. Ownership of 50% or more, or a majority of shares, is considered as potential control. Influence over business decisions exists when an associated party holds 50% or more, or individually holds the greatest portion, of votes in the taxpayer's management bodies. If the same persons participate in management or control of both companies, a connection between them will be deemed to exist.

A company should disclose transactions with related parties separately at transfer prices and at arm's-length prices in its CIT calculation. Positive difference between these prices (adjustments of expenses) and negative difference (adjustments of revenues) is included in taxable profit.

Transfer pricing rules for intra-group loans

Any interest incurred on related party loans exceeding the arm's-length interest rate is not tax deductible. Arm's-length interest is deemed to be the:

- weighted average key policy rate for the tax period, for loans denominated in dinars, and
- weighted average interest rate at which domestic banks borrowed from foreign lenders in related tax period, for foreign currency loans.

These indicators are determined by National Bank of Serbia and published by the Ministry of Finance.

Transfer pricing rules in this respect are applied up to the amount of tax deductible interest determined in accordance with the thin capitalisation threshold.

Thin capitalisation

The interest and related costs will be fully deductible provided that the loans from related parties do not exceed four times the taxpayer's net equity (ten times for banks). The amount of a taxpayer's net equity for this purpose is calculated as the average of the total assets less total liabilities on the beginning and the end of the year, while the amount of loan from related parties is calculated as a daily average for the year.

In cases where the loans from related parties exceed the prescribed threshold, the amount of non-deductible interest will be calculated as proportional to the amount of loans exceeding the 4:1 (10:1) threshold.

Tax credits and incentives

Profit earned on the basis of a concession is tax exempt for a period of five years.

Foreign tax credit

A Serbian entity is entitled to a tax credit for the WHT paid on distributed dividends and underlying CIT paid abroad (by its non-resident subsidiary). The tax credit cannot exceed the amount of CIT that would have been paid in Serbia. Non-utilised tax credit can be carried forward by the parent company for five years. The parent company is

required to own not less than 25% of a non-resident subsidiary for at least one year before filing the tax return.

A resident taxpayer also has the right to decrease its tax liability for WHT paid abroad by its non-resident subsidiary on interest and authorship fees up to Serbian CIT due. Carryforward of unused tax credit is not allowed.

Tax holidays

A ten-year tax holiday is available for companies with a minimum investment in property, plant, and equipment (PPE) of RSD 800 million. To qualify for the credit, a taxpayer must employ at least 100 new workers for an indefinite period. The tax holiday is available for the ten-year period in proportion to the investment made. The number of employees employed in the tax period in which the taxpayer qualified for the tax holiday must be retained throughout the whole tax holiday period.

A five-year tax holiday is available for companies conducting business in undeveloped regions that invest at least RSD 8 million in fixed assets. In addition, the company is obliged to employ at least five new workers for an indefinite period. The tax holiday is available for the five year period in proportion to the investment made.

Other tax credits

A tax credit of 20% (40% for small enterprises) is available for qualifying investments in fixed assets. The credit is limited to 50% (70% for small enterprises) of the assessed CIT liability in the current tax period. Unused tax credits can be carried forward for ten years.

Taxpayers generating profit in a newly established operating unit in an underdeveloped region may claim tax credits for a period of two years in an amount proportional to the profit generated by that unit.

Taxpayers classified into one of the following industries: agriculture, fishing, production of textile yarn and fabrics, garments, leather, base metals, standard metal products, machines, office machines, electrical machines, radio, television and communication equipment, medical instruments, motor vehicles, recycling, and video production are entitled to receive a tax credit in the amount of 80% of investments made in fixed assets which were not previously in use in Serbia. Unused tax credits can be carried forward up to ten years.

Withholding taxes

WHT is calculated and paid at the rate of 20% on payments such as dividends/share in profit, royalties (including neighbouring authorship rights, intellectual property rights, and related rights), interest income, income from distributed surplus of company in bankruptcy, income derived from the liquidation surplus of the company in liquidation, and lease payments for real estate and other assets made to a non-resident, unless a DTT applies to provide a reduced rate.

WHT is also payable on a non-resident's income realised on the basis of performing entertaining, artistic, sports, and similar programs in Serbia, which is not taxed as income of an individual (performer, musician, sportsman etc.).

Serbia

As of 2012, WHT is no longer payable on interest incurred on the basis of securities issued by the Republic of Serbia, autonomous province, local government, or National Bank of Serbia.

In order to benefit from application of a relevant DTT, non-residents (i.e. the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident's country of residence.

WHT rates envisaged by applicable DTTs are provided in the following table.

Recipient	WHT (%)			Applicable from
	Dividends (1)	Interest	Royalties (4)	
Albania	5/15	10	10	2006
Austria	5/15	10	5/10	2011
Azerbaijan	10	10	10	2011
Belgium	10/15	15	10	1982
Belorussia	5/15	8	10	1999
Bosnia and Herzegovina	5/10	10	10	2006
Bulgaria	5/15	10	10	2001
China	5	10	10	1998
Croatia	5/10	10	10	2005
Cyprus	10	10	10	1987

Turkey	5/15	10	10	2008
Ukraine	5/10	0/10 (6)	10	2002
United Kingdom	5/15	10	10	1983
Zimbabwe (3)	5/15	10	10	N/A

Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new DTT was signed with Denmark in 2009 and is applicable from 2010.
3. The treaty has not been ratified by one of the parties.
4. A tax rate of 5% will be applicable to literary, scientific, and work of art; films and works created like films; or other source of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedures.
5. Only in cases when dividends are to be paid to Serbian residents. If paid to Malaysian residents, they are taxable at 20% in Serbia.
6. A 0% rate is applicable in cases when the income recipient is the government or government owned banks.
7. WHT rate refers solely to dividends distributed from Serbia. In Malta, WHT cannot be higher than CIT on profit before dividend distribution.

Tax administration

Taxable period

The tax period in Serbia is the calendar year. However, entities have a possibility to opt for a different tax period other than the calendar year (subject to the approval of the Ministry of Finance), but still 12 months long. Once approved, such tax period must be applied for at least five years.

Tax returns

CIT returns, together with all supporting documents (e.g. tax depreciation and tax credit forms), must be filed with the tax authorities by 10 March of the following year.

A newly established company needs to register with the tax authorities within 15 days of registration with the court.

Serbia

Payment of tax

CIT is payable monthly in advance instalments by the 15th day of the following month for the prior calendar month. The amount of payable advances is determined on the basis of a company's CIT calculation for the previous year.

The due date for final settlement of CIT liability for the previous year is 10 March of the current year.

Audit cycle

There are no specific rules regarding the audit cycle in Serbia.

Statute of limitations

The statute of limitations period for assessment of tax liabilities is five years from the year in which tax should have been assessed. The statute of limitations for collection of tax liabilities is five years from the year in which tax was due for payment. This is with the exception of pension insurance contributions, which do not become statute barred.

The statute of limitations commences from 1 January of the year following the year in which the tax return/liability was due.

A tax period is considered to be closed for further audits after the audit by the tax authorities has been finalised and final decision issued. A tax period can be reopened for audits in case of existence of new information that was not available at the time of the audit.

Topics of focus for tax authorities

Historically, audits by the tax authority have been focused primarily on VAT, personal income tax, and social security contributions assessment.

Significant developments

The 2012 Budget was announced on 17 February 2012. Corporate tax changes include the following:

- Cash grant of 5% of the taxpayer's revenue (capped at 5,000 Singapore dollars [SGD]) for the year of assessment 2012 (i.e. income year 2011).
- Enhancements to the Productivity and Innovation Credit scheme.
- Enhancements to the Mergers and Acquisitions Allowance scheme.
- Introduction of guidelines to give certainty to investors when their gains from the disposal of equity investments will not be taxed.
- Introduction of enhanced writing down allowances for productive equipment placed overseas for approved projects.
- Changes to the incentives for the maritime, aviation, and financial sectors.
- Liberalisation of the double tax deduction for internationalisation activities.
- Changes to the filing and payment deadline for withholding tax (WHT).
- Liberalisation of writing down allowances for low-value assets and renovation costs.

Indirect tax changes include the following:

- Goods and services tax (GST) exemption on investment-grade gold and precious metals.
- Extension of the GST temporary import relief period.
- Extension of the GST Tourist Refund Scheme to certain international cruise tourists.
- Increase in the GST import relief for incoming travellers.
- Increase in excise duties for certain tobacco products.

For details of the 2012 Budget proposals, refer to our 2012 Budget Commentary at <http://www.pwc.com/sg/en/budget-commentary/index.jhtml>

S

Taxes on corporate income

Companies (resident and non-resident) which carry on a business in Singapore are taxed on their Singapore-sourced income when it arises and on foreign-sourced income when it is remitted or deemed remitted to Singapore. Non-residents are subject to WHT on certain types of income (e.g. interest, royalties, technical service fees, rental of movable property) where these are deemed to arise in Singapore (*for details, see the Withholding taxes section*).

Tax on corporate income is imposed at a flat rate of 17% for the year of assessment 2012 (i.e. income year 2011). There is an exemption of up to SGD 152,500 out of the first SGD 300,000 of taxable income.

Singapore

For qualifying start-up companies, a three-year tax exemption on the first SGD 100,000 and a further exemption of up to SGD 100,000 on the next SGD 200,000 of taxable income are available.

In addition, for the year of assessment 2012 (i.e. income year 2011), there is a one-off cash grant of 5% of the company's revenue (capped at SGD 5,000). The cash grant is available only to companies who have made contributions to the Central Provident Fund in 2011, which means they must have had at least one Singaporean or permanent resident employee in that year.

Singapore adopts a one-tier taxation system, under which all dividends are tax-exempt in the shareholder's hands.

Corporate residence

In Singapore, the tax residence of a corporation is determined by the place where the central management and control of its business is exercised. This is taken generally to mean the place where the directors meet to exercise *de facto* control, although the Inland Revenue Authority of Singapore (IRAS) has recently set out further qualifying criteria.

Permanent establishment (PE)

The presence of a PE is largely irrelevant, except for treaty purposes, as Singapore taxes with reference to the source of income rather than the presence of a PE.

However, a PE is a clear indication of source.

The definition of a PE in Singapore's double taxation agreements (DTAs) is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition.

It is generally taken to be a fixed place through which the business of an enterprise is wholly or partly carried on, and normally includes a place of management, a branch, an office, a factory, a workshop, and a place of extraction of natural resources, etc.

In addition, and subject to the terms of the relevant agreements, a non-resident may also have a PE in Singapore if one:

- has a building site or a construction, assembly, or installation project that lasts longer than a specified number of months, or supervisory activities connected with the building site or construction project
- furnishes services (including consultancy services) through employees in Singapore for more than a specified number of days or months, or
- has an agent in Singapore who has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of the enterprise.

The Singapore tax legislation defines a PE more broadly than most of the DTAs; however, as mentioned above, this is largely irrelevant where a treaty can take precedence.

Other taxes

Goods and services tax (GST)

GST is charged at 7% on the supply of goods and services made in Singapore by a taxable person in the course or furtherance of one's business.

The only exemptions from GST are prescribed financial services (including life insurance) and the sale or rental of residential properties. Zero-rating only applies to the export of goods and international services.

GST is also levied on imports of goods, at the time of importation. However, there are reliefs available to ease the cash-flow burden of import-export traders by suspending GST at the time of importation. GST is not currently charged on imports of services.

A taxable person is one who is, or is required to be, registered for GST. GST registration is required if one's taxable turnover exceeds SGD 1 million per year. Voluntary registration is permitted if the taxable turnover is below the registration limit, subject to conditions.

A supply of goods is made in Singapore if the goods are in Singapore at the time of supply, and a supply of services is made in Singapore if the supplier belongs in Singapore. Generally, a person belongs in Singapore if one's business (including carrying on a business through a branch or agency) or fixed establishment is in Singapore.

A taxable person is allowed to offset the input GST paid on taxable purchases against the output GST chargeable on supplies made. However, certain purchases are specifically denied an input GST deduction. These include supplies of goods and services such as non-business expenses, club subscription fees, family benefits, car rental expenses, motor vehicle expenses, medical expenses, and transactions involving betting, sweepstakes, lotteries, fruit machines, or games of chance.

A non-resident is not entitled to GST refunds except by appointing a resident tax agent to act on one's behalf. The resident tax agent can then recover import GST paid on behalf of the non-resident business but will be required to account for output GST on any subsequent supply of the non-resident's goods in Singapore.

Customs and excise duties

Singapore is essentially a free port with minimal import restrictions. Customs and excise duties are imposed on intoxicating liquors (SGD 48 to SGD 70 per litre of alcohol or SGD 90 per kilogram of non-liquid alcohol preparations), tobacco products (SGD 239 to SGD 352 per kilogram), motor vehicles (12% to 20% *ad valorem*), and petroleum products (SGD 3.70 to SGD 7.10 per dal).

Property tax

Property tax is levied annually at 10% on the annual value of houses, land, buildings, or tenements. The rates charged owner-occupied residential property, however, are graduated from 0% to 6% of the annual value of the property.

Stamp duties

Stamp duties are levied on written documents relating to stocks and shares at 0.2% and on those relating to immovable property in Singapore at graduated rates of up to 3%.

Leases with annual rents not exceeding SGD 1,000 are exempt from stamp duty.

Singapore

Seller's stamp duty is levied on the sale of residential property (this excludes sales by property developers) if the sale takes place within four years of the purchase date. Stamp duty rates of 4% to 16% apply, depending on the holding period.

Additional buyer's stamp duty (ABSD) is also levied on the purchase of residential property. A higher rate of 10% is applicable to purchases by foreigners and non-individuals, while 3% ABSD is levied on the second and subsequent property bought by permanent residents and on the third and subsequent property bought by Singaporeans.

Foreigners of certain nationalities who fall within the scope of the respective free trade agreements will be accorded the same treatment as Singaporeans.

Foreign Workers Levy (FWL)

The FWL is a monthly levy of up to SGD 470 that employers are liable to pay for each foreign employee (Work Permit or S Pass holders) hired. The levy rate depends on the employee's qualifications, the employer's industry, and the ratio of foreigners to Singaporeans and permanent residents employed in the company. The government has announced that the FWL will be gradually increased until July 2013.

Branch income

Tax rates on branch profits are the same as on corporate profits. There is no branch profits remittance tax on the repatriation of profits to the head office.

Income determination

Inventory valuation

There are no special rules as to which valuation basis should be adopted for inventories (stock-in-trade) in the case of a continuing business, as long as the basis is consistent from one year to another. However, a last in first out (LIFO) basis of valuation is not permitted for tax purposes. Generally, tax reporting conforms to book reporting.

Capital gains

There is no tax on capital gains. Where there is a series of transactions or where the holding period of an asset is relatively short, the tax authorities may take the view that a business is being carried on and attempt to assess the gains as trading profits of the corporation. The United Kingdom (UK) Badges of Trade, which are used in judicial decisions to distinguish capital and revenue transactions, are generally applied in determining this issue. They include the existence of a profit-seeking motive, the number of transactions, the nature of the asset, the existence of similar trading transactions or interests, changes to the asset, the way the sale was carried out, the source of finance, the interval of time between purchase and sale, and the method of acquisition.

During the 2012 Budget, it was announced that guidelines will be introduced to give certainty that gains from the disposal of equity investments that take place after 1 June 2012 will not be taxed if at least 20% of the shares in the investee company have been held for a continuous period of at least 24 months prior to the disposal. Further details will be released.

Dividend income

Singapore dividends are exempt in the hands of the recipient.

Stock dividends

Stock dividends generally are not taxable. However, certain distributions could be treated as deemed dividends in certain circumstances.

Deemed dividends

Certain distributions to shareholders under a capital-reduction scheme, a share buy-back, or a share redemption exercise may be treated as dividends paid by the company. Under the one-tier taxation system, this is not a significant issue unless the transaction is not correspondingly treated as a dividend in the hands of the shareholder. In which case, the gain may be taxable if it is in respect of a trade or business.

Interest income

Singapore-sourced interest income is taxable when it arises, and foreign-sourced interest is taxable when it is remitted or deemed to be remitted to Singapore. *For further details on foreign-sourced interest income and the availability of foreign tax credit, refer to Foreign income below.*

Foreign income

A corporation, whether resident in Singapore or not, is taxed on foreign income when it is received in Singapore. Legislative provisions govern the basis of treating foreign income as received in Singapore. There are no special rules for taxing the undistributed income of foreign subsidiaries.

Where income is earned from treaty countries, double taxation is avoided by means of foreign tax credit granted under those treaties. For non-treaty countries, unilateral tax credit is given in respect of foreign tax on all foreign-sourced income. These foreign tax credits may be pooled with effect from the year of assessment 2012 (i.e. income year 2011), subject to certain conditions.

Foreign dividends, foreign branch profits, and foreign service fee income remitted to Singapore may be exempt from tax if they fulfil certain conditions.

Deductions

Depreciation

Tax depreciation is allowable at specified rates on buildings used in qualifying industry sectors, subject to conditions. However, in 2010, industrial building allowances were replaced by a Land Intensification Allowance. The latter provides for faster depreciation but is subject to approval as it is allowed as a tax incentive. Transitional provisions for industrial building allowances are available for taxpayers who committed to qualifying capital expenditure before 22 February 2010.

Tax depreciation is available on machinery and equipment on a straight-line basis over their specified working life for all types of business. In lieu of the straight-line basis, accelerated tax depreciation allowances can be claimed by all businesses on all machinery and equipment in equal instalments over three years.

A 100% depreciation allowance is available on capital expenditure incurred on computers, robots, standby generators, pollution control and energy-efficient equipment, certain diesel-driven vehicles, and prescribed automation equipment.

Singapore

Writing down allowances on a straight-line basis over five years are allowable on the cost of acquisition of intellectual property, subject to certain conditions.

In addition, enhanced allowances may be available for the acquisition of automation equipment and intellectual property (*see Productivity and Innovation Credit in the Tax credits and incentives section*).

Gains on tax depreciable property (i.e. the excess of proceeds over tax base) are taxed as ordinary income to the extent that tax depreciation has been allowed; that is, there is a clawback of tax depreciation on the disposal of the asset.

Goodwill

Payments for the acquisition of goodwill are generally capital in nature and not deductible.

Start-up expenses

Generally, expenses incurred prior to the commencement of business are not tax deductible. However, from the year of assessment 2012 (income year 2011), most businesses are allowed to deduct expenses incurred in the 12 months immediately preceding the accounting year in which the business earned its first dollar of trading income. Deductible expenses are those that would have been allowed a deduction had they been incurred after the business commenced operations.

In addition, deductions and writing down allowances are available for certain types of pre-commencement expenditure (acquisition of plant and machinery, R&D, etc.) that are deemed to be incurred on the first day on which the taxpayer carries on one's business.

Interest expenses

Interest incurred on capital employed in the production of income, and borrowing costs that are incurred as a substitute for interest or to reduce interest costs, will be allowed as a tax deduction.

R&D expenses

Expenses incurred in respect of R&D carried out in Singapore qualify for a tax deduction of 150% of the expenses incurred. If the R&D is carried out overseas, the expenses incurred can be deductible if they meet certain conditions.

From year of assessment 2012 (income year 2011), expenditure incurred in relation to R&D cost-sharing arrangements will qualify and be accorded the same tax treatment as R&D expenses. The 100% writing down allowance for expenditure on approved R&D cost-sharing arrangements that is available for arrangements entered into on or after 17 February 2006 will be phased out. Details have yet to be announced.

Enhanced deductions may also be available under the Productivity and Innovation Credit scheme (*see Productivity and Innovation Credit in the Tax credits and incentives section*).

Bad debts

Bad trade debts and provisions for trade debts are deductible to the extent that they are incurred in the business. Doubtful debts are deductible if they are properly estimated and specific. General provisions for bad debts are not deductible.

Businesses that have elected to align their tax treatment of financial instruments with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement) will be allowed a tax deduction for impairment losses on trade debts when they are incurred (regardless of whether they are general or specific provisions). Correspondingly, any reversal will be taxed.

Charitable contributions

Donations are deductible only if they are made in cash or another prescribed form and to an approved recipient. The deduction allowed for qualifying donations is generally 250% of the value of the donation.

Fines and penalties

Fines and penalties imposed for violations of the law are not deductible.

Taxes

Income taxes are generally not deductible in determining corporate income. However, irrecoverable GST is deductible under certain circumstances. The FWL and property taxes are deductible to the extent they are incurred wholly and exclusively in the production of income.

Other significant items

Private automobile expenses are not deductible.

The tax deduction for medical expenses is limited to 2% of total payroll if the employer implements certain portable medical insurance or benefit schemes. Otherwise, the amount deductible will be limited to 1% of total payroll. Where the company is exempt or taxed at a reduced rate, the expenses disallowed are effectively taxed at the prevailing corporate rate.

A tax deduction for employee share-based remuneration (stock awards or stock option schemes) is allowed only if treasury shares in the company or its holding company are purchased to fulfil such obligations. From year of assessment 2012, a company may also claim a tax deduction when the share-based remuneration scheme is administered by a special purpose vehicle (SPV). The deduction is restricted generally to the lowest of the actual outlay incurred by the company, its holding company, or the SPV.

Net operating losses

Loss carryover, including unutilised tax depreciation allowance, is unlimited, provided shareholdings in the loss-making corporation have not changed beyond 50% of the issued and paid-up capital. Additionally, for tax depreciation allowances to be carried forward, the same trade needs to be continued. The tax authorities may exercise discretion to allow carryover of tax losses and unutilised tax depreciation even when there has been a change in shareholding beyond 50%, absent any tax avoidance motives. Losses of up to SGD 100,000 incurred by the company in the current year can be carried back for one year.

Payments to foreign affiliates

Payments to non-residents, including foreign affiliates, are deductible, provided they are fair and reasonable, are revenue in nature, and can be seen to be relevant to earning the payer's income.

Singapore

Group taxation

A company is allowed to transfer excess current year trade losses, current year tax depreciation, and current year approved donations to another company within the same group if certain conditions are satisfied.

Broadly, to qualify for group relief, companies must be incorporated in Singapore, belong to the same '75%' group of companies such that there must be at least a 75% ownership relationship between claimant and transferor, and have the same accounting year-end. In addition, a group must comply with certain prescribed offset and apportionment rules.

Transfer pricing

The Income Tax Act contains provisions that may be used in a transfer pricing context to effectively allow IRAS to challenge and revise inter-company transactions. Additionally, specific transfer pricing provisions were introduced in 2009 that define the arm's-length principle and provide the IRAS with a right to make transfer pricing adjustments in cases where taxpayers do not comply with the arm's-length principle.

The IRAS has also issued transfer pricing guidelines to supplement the provisions in the Income Tax Act and the various treaties signed by Singapore. The guidelines cover the application of the arm's-length principle and documentation requirements relating to all related party transactions, including local related party transactions. The intention of the guidelines is to help taxpayers substantiate their transfer prices with their related entities by maintaining adequate documentation to mitigate the risk of tax adjustment by the IRAS and to safeguard them from potential double taxation. The IRAS has also provided guidance on matters relating to mutual agreement procedures (MAPs) and advance pricing arrangements (APAs).

In 2009, the IRAS also issued guidance on the application of the arm's-length principle to related party loans and services.

Although Singapore's income tax rates are traditionally lower than the majority of its trading partners, the IRAS is increasing its focus on transfer pricing issues.

Thin capitalisation

There are no formal thin capitalisation rules in Singapore. However, general anti-avoidance and transfer pricing provisions may operate in cases of blatant abuse.

Tax credits and incentives

There are various tax incentives available to taxpayers involved in specified activities or industries identified as being beneficial to Singapore's economic development.

Pioneer tax incentive

Corporations manufacturing approved products with high technological content, providing qualifying services, or engaging in countertrade activities may apply for tax exemption for five to 15 years under the pioneer tax incentive. Corporations may apply for their post-pioneer profits to be taxed at a reduced rate under the Development and Expansion Incentive, as discussed below.

Development and Expansion Incentive

Under the Development and Expansion Incentive, corporations engaging in new high-value-added projects, expanding or upgrading their operations, or undertaking incremental activities after their pioneer or post-pioneer period may apply for their profits to be taxed at a reduced rate of not less than 5% for an initial period of up to ten years. The total tax relief period is subject to a maximum of 20 years (inclusive of the post-pioneer relief period previously granted, if applicable).

Investment allowance

Under the investment allowance, a tax exemption is granted on an amount of profits based on a specified percentage (of up to 100%) of the capital expenditure incurred for qualifying projects or activities within a period of up to five years (up to eight years for assets acquired on hire-purchase). With effect from year of assessment 2013 (income year 2012), capital expenditure incurred for productive equipment placed overseas on approved projects may likewise be granted integrated investment allowances.

Productivity and Innovation Credit (PIC)

The PIC scheme provides for an enhanced 400% deduction for qualifying expenditure incurred in respect of six qualifying activities during the accounting periods that end between 2010 and 2014 (i.e. years of assessment 2011 to 2015). The six qualifying activities are:

- The acquisition or leasing of prescribed automation equipment.
- Staff training.
- The acquisition of intellectual property.
- The registration of intellectual property rights.
- R&D.
- Design.

The enhanced deduction is available only on the first SGD 400,000 of qualifying expenditure incurred each year on each of the qualifying activities although this cap may be combined for certain years of assessment. Certain activities are subject to approval or minimum ownership requirements.

Merger and acquisition allowance

The merger and acquisition allowance allows a write-off, over five years, of 5% of the value of qualifying merger or acquisition deals executed between 1 April 2010 and 31 March 2015, subject to a cap of SGD 5 million per year of assessment. This incentive is available only to companies that are incorporated, tax resident, and carrying on a business in Singapore. A 200% tax allowance will also be granted on transaction costs (capped at SGD 100,000 per year of assessment) incurred on qualifying deals from 17 February 2012 to 31 March 2015.

Financial services incentives

Financial sector incentive (FSI) scheme

The FSI scheme covers approved bond intermediaries, Asian currency units, approved derivative traders, approved fund managers, equity capital market intermediaries, operational headquarters, syndicated offshore credit and underwriting facilities, providers of high-value-added processing services supporting financial activities, futures members of the Singapore Exchange Limited, and members of the Singapore Commodity Exchange Limited.

Singapore

High growth, high-value-added activities such as services and transactions relating to the bond market, derivatives market, equity market (i.e. futures, securities trading, which includes sale of stocks, shares, bonds and other securities, and extends to brokerage, nominee, and custodian services in relation to securities trading), credit facilities syndication, and Islamic finance will be exempt from tax or taxed at 5%, whilst other broader range financial activities will only qualify for a 12% tax rate. The tax incentive period may last for five, seven, or ten years, subject to certain conditions being met.

Finance and treasury centre (FTC)

Income derived by an FTC from approved finance and treasury centre activities is taxed at a reduced rate of 10%. Approved activities include international treasury and fund management activities, corporate finance and advisory services, economic and investment research and analysis, and credit control and administration.

Interest payments to overseas banks and approved network companies are also exempt from WHT where the funds borrowed are used for approved activities.

Debt securities incentives

A package of tax exemptions and reduced tax rates is available to various players in the Singapore bond market, including those involved in certain Islamic financing arrangements.

Offshore insurance incentives

Approved insurance companies engaged in the business of insuring and reinsuring offshore risks are taxed at a rate of 10% on qualifying income arising from offshore risks business and at a rate of 5% on qualifying income arising from writing offshore Islamic insurance (*takaful*) and reinsurance (*retakaful*) business. Tax exemption is available for qualifying income from the writing of both onshore and offshore marine hull and liability risk insurance and offshore specialised risk insurance and for qualifying income of approved offshore captive insurance companies. In addition, a concessionary tax rate of 10% is available to qualifying insurance and reinsurance brokers on income derived from the provision of insurance broking and advisory services to non-Singapore based clients.

Real Estate Investment Trusts (REITs)

Distributions made to foreign non-individual investors by a listed REIT out of rental from Singapore real estate are subject to a reduced tax rate of 10%, subject to certain conditions. Listed REITs investing in foreign properties can apply for tax exemption for certain foreign income received in Singapore. Distributions out of this income similarly are exempt. Stamp duty relief is available upon the transfer of immovable Singapore property to a REIT, and GST concessions are available in respect of overseas non-residential properties and SPVs or sub-trusts.

Islamic financing arrangements

The income tax, stamp duty, and GST treatment of (a) Islamic financing arrangements based on (i) the cost-plus (*Murabaha*) concept, (ii) the investment-partnership (*Mudaraba*) concept, (iii) the leasing-with-option-to-purchase (*Ijara Wa Igtina*) concept for mortgage financing; and (b) Islamic debt securities (*Sukuk*) are aligned with conventional financing contracts that they are economically equivalent to, subject to certain conditions. In addition, concessionary tax rates are available for certain activities relating to Islamic financing (*see FSI scheme and Offshore insurance incentives above*).

Infrastructure project finance incentives

Tax exemption is available for interest income earned from qualifying investments in qualifying infrastructure projects/assets. FSI companies that provide project finance advisory services related to qualifying projects/assets pay tax at 5% on their qualifying income, and companies that provide management services to qualifying business trusts and funds pay tax at 10% on their qualifying income. Stamp duty relief is available also on the transfer of such projects/assets to listed companies.

Sovereign wealth funds

Tax exemption is available for income derived by a sovereign fund entity and an approved foreign government-owned entity from funds managed in Singapore.

Headquarters (HQ) schemes

Approved regional headquarters in Singapore are taxed at a concessionary rate of tax of 15% on qualifying overseas income. Approved international headquarters can negotiate for various tax incentives, including tax exemption or concessionary tax rates on qualifying income.

Maritime Sector Incentive (MSI) scheme

The MSI scheme consolidates all existing incentives for the maritime sector with effect from 1 June 2011. These include the tax exemption for shipping companies, the 10% concessionary tax rate for international freight and logistics operators, and the existing Maritime Finance Incentive (MFI) under which approved ship investment managers are taxed at 10% on their qualifying management-related income. It also includes approved ship investment vehicles, which are tax exempt on their qualifying vessel lease income; approved container investment enterprises, which are taxed at 5% or 10% on qualifying income from container-leasing; and approved container investment management companies, which are taxed at 10% on qualifying management fees.

During the 2012 Budget, it was announced that qualifying ship operators and lessors under the MSI scheme will be granted automatic tax exemption on gains from the disposal of vessels, vessels under construction, and new building contracts. This takes retrospective effect from 1 June 2011.

Other incentives

Incentives for not-for-profit organisations, international arbitration, investment holding companies, oil traders, international traders, general insurance companies, leasing companies, trust companies, cyber traders, and the provision of international legal services include tax exemptions or concessionary tax rates of 10% for qualifying income. The concessionary tax rate for liquefied natural gas (LNG) trading, aircraft leasing, qualifying oil traders, and international traders is further reduced to 5%.

Foreign tax credit

See *Foreign income in the Income determination section* for a description of the foreign tax credit regime.

Withholding taxes

Domestic corporations paying certain types of income to non-residents are required to withhold tax.

Unless a lower treaty rate applies, interest on loans and rentals from movable property are subject to WHT at the rate of 15%. Royalty payments are subject to WHT at the rate

Singapore

of 10%. The tax withheld represents a final tax, and applies only to non-residents who are not carrying on any business in Singapore or who have no permanent establishment in Singapore. Technical assistance and management fees for services rendered in Singapore are taxed at the prevailing corporate rate. However, this is not a final tax. Royalties, interest, rental of movable property, technical assistance, and management fees can be exempt from WHT in certain situations or subject to reduction in tax rates applicable, usually under fiscal incentives, or DTAs.

Payments made to public entertainers and non-resident professionals who perform services in Singapore are also subject to a final tax of 15% on the gross income. For public entertainers, this appears to be a final tax unless they qualify to be taxed as Singapore tax residents. However, non-resident professionals may elect to be taxed at the prevailing tax rate for non-resident individuals of 20% on net income if this results in a lower tax cost. The WHT rate on payments to non-resident entertainers has been reduced to 10% from 22 February 2010 to 31 March 2015.

With effect from 17 February 2012, ship charter fee payments are no longer subject to WHT.

The WHT rates are shown in the following table.

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (2)

Notes

- Singapore has no WHT on dividends over and above the tax on the profits out of which the dividends are declared. However, some treaties provide for a maximum WHT on dividends should Singapore impose such a WHT in the future.
- The non-treaty rates (a final tax) apply only to non-residents who do not carry on business in Singapore or have a PE in Singapore. This rate may be further reduced by tax incentives.
- Interest:
 - Lower rate or exemption if received by a financial institution.
 - Exempt if paid to the government.
 - Lower rate or exemption if paid by an approved industrial undertaking.
 - Exempt if paid by a bank and received by a bank.
 - Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
 - Exempt if paid in respect of an approved loan or indebtedness.
 - Exempt if paid to an approved pension fund.
- Royalties:
 - Royalties on literary or artistic copyrights, including film royalties, are taxed at the non-treaty rate.
 - Lower rate for payments in connection with industrial, commercial, or scientific equipment.
 - Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
 - Exempt for approved royalties.
- Treaties:
 - Treaty with Chile covers only international ship operations.
 - Treaties with Hong Kong and the United States cover only shipping and air transport activities.
 - Treaty applies from 1 January 2012.
 - Treaty applies from 1 January 2013.

Tax administration

Taxable period

The tax basis period is the calendar year; however, for business profits, the accounting period will generally be adopted.

Tax returns

Tax is computed for each tax year based on the income earned in the preceding year (the tax basis period). The corporation files an estimate of its income within three months of the end of the accounting period followed by a return of income by 30 November of the tax year, and the tax is assessed by the Comptroller of Income Tax. There is no fixed date for the issue of assessments.

Payment of tax

Assessed tax is payable within one month after the service of the notice of assessment, whether or not a notice of objection to the assessment has been lodged with the tax authorities. Application may be made to the Comptroller to pay estimated tax liabilities on a monthly basis. However, the Comptroller is under no obligation to grant such an application.

Late payment of tax will attract penalties, up to a maximum of 17% of the outstanding tax.

Audit cycle

The IRAS now adopts a risk-based approach to identifying compliance risk, with a focus on improving the behaviour of taxpayers who pose a higher risk of non-compliance. It also prioritises and tailors specific compliance programmes which aim to identify taxpayers who have made mistakes in their tax returns, create an audit presence in the community to deter non-compliance by other taxpayers, educate taxpayers on their tax obligations and how to comply with these, and identify areas of tax law, policies, and processes where the tax system can be simplified.

Statute of limitations

The statute of limitations is six years from the year of assessment (if the year of assessment is 2007 or a preceding year of assessment) or four years from the year of assessment (if the year of assessment is 2008 or a subsequent year of assessment). It does not apply where there has been fraud or wilful default by the taxpayer.

Topics of focus for tax authorities

In the past, the IRAS has focussed its compliance efforts on:

- the timely filing of corporate tax returns
- accurate filing of income and expenses, especially by family-owned and managed companies
- abuse of the tax exemption scheme for new companies, and
- claims for capital allowances.

The IRAS has announced that, in addition to the above, it will also be focussing on:

- the classification of income and expenses by companies enjoying tax incentives
- related-party transactions and the allocation of development costs by real estate developers, and
- income declarations by companies whose principal activities are that of tutoring services or tuition agencies.

Other issues

Adoption of International Financial Reporting Standards (IFRS)

Companies incorporated in Singapore and Singapore branches of foreign companies are required by the Companies Act to prepare and present financial statements that comply with the Singapore Financial Reporting Standards (SFRS). In Singapore, the Accounting Standards Council (ASC) has the statutory authority to issue SFRS for adoption.

The SFRS is principally based on and substantially similar to the International Financial Reporting Standards (IFRS) that are issued by the International Accounting Standards Board (IASB). The ASC's strategic direction was the convergence of SFRS with IFRS by 2012 for use by listed companies. However, a few key outstanding issues remain to be resolved before full convergence can be implemented. These depend on the progress of certain IASB projects that are not expected to take effect before 1 January 2015. For unlisted companies, the development of IFRS for small and medium-sized entities is being observed and evaluated.

Companies are required to submit financial statements as part of their tax return filing. The IRAS generally accepts financial statements prepared for statutory filing, although companies that have been allowed to prepare their financial statements using standards

Singapore

other than SFRS, such as IFRS or the Generally Accepted Accounting Principles (GAAP) adopted by the United States, may be required to explain and/or account for any differences and make the necessary tax adjustments, if any.

In relation to financial instruments, the Income Tax Act was amended to align the tax treatment with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement). As a concession, the IRAS allows taxpayers to elect to align their tax reporting of lease income to the accounting treatment prescribed by SFRS 17 (Leases), which requires operating lease income to be recognised using the 'effective rent method'.

Sample corporate tax calculation

Accounting period ended 31 December 2011 (year of assessment 2012).

Significant developments

At this moment there are no proposed changes, nor have changes been implemented recently. However, the Minister of Finance has installed a committee to review the existing tax regulations and propose changes to improve the fiscal competitiveness of Sint Maarten (St. Maarten). The committee will be seeking ways to implement a significant reduction of the personal and corporate income tax rate in exchange for a major simplification by reducing or abolishing deductions, accelerated depreciation of assets, investment allowances, and tax holidays, as well as a broadening of the tax base in general. The government's aim is to introduce these changes by 2013.

Transitional legislation

While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

Taxes on corporate income

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following St. Maarten-source income:

- Income attributable to a permanent establishment (PE).
- Income from real property situated in St. Maarten.
- Interest on loans secured by a mortgage on property situated in St. Maarten.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 34.5%. Special minimum rates apply to the taxable income of certain companies:

Type of company	Rate (%)
New industries and hotels	2
Land development companies	2

Shipping business

Shipping companies are subject to the general profit tax rate of 34.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general tax rate of 34.5%.

Over (tons)	Not over (tons)	Profit per net ton (ANG*)
0	10,000	2.00
10,000	25,000	1.35
25,000		0.60

* Antilles guilders

Exempt companies

Please see the *Tax credits and incentives* section for more information on tax exempt companies.

Companies under transitional offshore rules

Transitional rules distinguish three types of offshore companies.

- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and which had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in St. Maarten is considered to be a resident. A company that has been established in St. Maarten will always be considered a resident of St. Maarten.

Sint Maarten

Offshore entities in St. Maarten must have a local managing director. This function is easily provided by one of the many trust companies established in St. Maarten.

Permanent establishment (PE)

The definition of a PE in St. Maarten is generally in line with the Organisation for Economic Co-operation and Development (OECD) model.

Transfer of legal seat

Legislation has been enacted under which a St. Maarten company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to St. Maarten.

Other taxes

Turnover tax

A 5% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company in St. Maarten. Note that non-resident service providers are also subject to this tax as of 11 February 2011.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Certain basic food and other products.
- Electricity and water.
- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.

An entrepreneur liable to turnover/sales tax must file a declaration, with the Tax Inspectorate before the 16th day of the month following the month concerned, at the Tax Collector's office.

Customs duties/import tariffs

In general, there are no customs duties or import tariffs on St. Maarten, except for a special import tariff on gasoline. The rate is ANG 29 per hectolitre.

Excise duties

There are no excise duties in St. Maarten.

Property taxes

There is no property tax in St. Maarten.

Transfer tax

The transfer of immovable property located in St. Maarten is subject to a 4% transfer duty.

Stamp taxes

A stamp tax is levied in two ways, in the form of stamps and as stamped paper.

Stamp tax applies to documents such as government licences, leases, agreements, and court documents. The rate depends on the type of document. As an example, the stamp tax for bank checks is ANG 0.25. The general rate for each page of a legal document is ANG 5.

Branch income

Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks in St. Maarten. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

Income determination**Inventory valuation**

Both the last in first out (LIFO) and first in first out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

Capital gains

Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation (*see Dividend income below*).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired asset. The reserve may be maintained for a maximum of four years. If the reserve has not been fully applied, the remainder will be liable to taxation in the fourth year.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

Dividend income

In general, a full participation exemption applies to all local as well as foreign participations for dividends as well as for capital gains. However, it is now required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax in St. Maarten.

Non-portfolio investment clause

A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

Subject-to-tax clause

A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

Sint Maarten

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 70% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.35% (30% x 34.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

Immovable property

The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

Definition of dividend

A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

Minimum cost-price threshold for participations

The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

Interest income

There is no specific regime for interest received. Interest income is therefore taxed at the same rate as other income.

Foreign income

A St. Maarten corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

St. Maarten has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE on Aruba, Curaçao, or the Netherlands, including the Caribbean Netherlands, are tax exempt in St. Maarten based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

Foreign real estate is always deemed to be part of a PE and, as such, is fully tax exempt.

Deductions

Depreciation and amortisation

Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets' depreciable basis may

be taken. The assets' remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

The tax department has issued the following estimated depreciation table:

Asset	Rate (%)	Residual value (%)
Buildings	2/2.5	10
Renovation	10	0
Inventory	10/20	10
Computer		
Hardware	33/50	0
Mainframe	10/12.5	0
Machinery and installations	10	10
Transportation		
Cars	20	10
Rental cars	33	15
Trucks and buses	10	15
Start-up costs	20	0
Goodwill	20	0

Start-up expenses

Start-up expenses should be capitalised and may be depreciated, comparable to goodwill, over five years.

Anti-abuse rules regarding interest and loans

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction, or in case the interest in the hands of the recipient is taxed at an effective tax rate that is considered adequate by St. Maarten standards, the interest may be deductible.

In case of intra-group financing, for profit tax purposes the amount of interest paid or received should be based on arm's-length principles.

In case of profit participating loans, the interest will be qualified as dividend and will not be deductible. Interest received on such loans may meet the definitions of the participation exemption if the creditor also holds a qualifying participation in the debtor.

A write-down of an intra-group loan may be denied in case of a profit-participating loan, or if at the time of issuance it was foreseeable that the loan would never be repaid fully.

Charitable donations

Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

Sint Maarten

Fines and penalties

Fines and penalties are not deductible in cases where they have been imposed by a criminal court in St. Maarten, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a government agency in St. Maarten.

Taxes

Taxes, other than the corporate tax itself, incurred in the course of doing business are deductible.

Bribes, kickbacks, and illegal payments

Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

Net operating losses

Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

Payments to foreign affiliates

The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

Group taxation

Fiscal unity

The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries could qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of St. Maarten, the Netherlands, Aruba, or Curaçao. The companies that invoke this relief must have their place of management in St. Maarten.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident in St. Maarten.

Transfer pricing

There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm's length.

Thin capitalisation

In cases where a company receives a loan from an associated exempt private limited liability company (*Besloten Vennootschap* or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.

Tax credits and incentives**Foreign tax credit**

A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the St. Maarten profit tax that is attributable to that foreign income.

Inward investment and capital investment

There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

Investment allowance

For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (for new buildings, 12%) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year, for businesses operating in St. Maarten.

Accelerated depreciation and tax rollover reserve

An accelerated deduction of one-third of the assets' depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

Tax exempt company

It is possible to elect tax-exempt status for a BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights, and other comparable property and usage rights, have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of St. Maarten. A profit tax regime is comparable to that of St. Maarten if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the old Netherlands Antillean rate, excluding island surcharges).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all European Union (EU) and OECD member states and all jurisdictions with which St. Maarten has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

Independent expert

Currently, an independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt

Sint Maarten

company consist of dividends from subsidiaries that are not subject to a tax comparable to that of St. Maarten, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.

Ocean shipping companies

Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of St. Maarten. As a result, the overall effective tax rate is 9.66%.

New industries and hotels

New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

Land development companies

Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of St. Maarten.

Private foundations

Private foundations are exempt from St. Maarten profit tax, and their distributions are exempt from St. Maarten gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor's country may be applicable.

The 'private' foundation is a variant of the long-existing 'common' foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

Withholding taxes

Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time in St. Maarten.

Tax treaties

St. Maarten currently has tax treaties in effect with the Netherlands, Aruba, Curaçao, and Norway. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. Furthermore, tax information exchange agreements (TIEAs) have been signed with several countries, including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, St. Maarten, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

Tax arrangement for the Kingdom of the Netherlands (TAK)

As part of the Kingdom of the Netherlands (TAK), St. Maarten is party to a federal tax agreement with the Netherlands, Aruba, and St. Maarten. Subject to this treaty, dividends, interest, and royalties paid out to a St. Maarten company may qualify for reduced rates of WHT in the subject countries.

Dutch dividend WHT is 15% if the St. Maarten company owns less than 25% of the Dutch company. In St. Maarten, only 5% of these dividends are taxed, at a rate of 34.5%, which results in an effective profit tax rate of 1.725%.

If the St. Maarten company's interest is 25% or more, Dutch WHT can be reduced to 8.3%. This tax is then paid, under a special procedure, to the St. Maarten tax authorities. These dividends are fully exempt from profit tax in St. Maarten.

Capital gains derived from shareholdings in Netherlands' corporations are fully exempt from profit tax in St. Maarten, provided that the shareholding amounts to at least 25% interest in the corporation. If the shareholding amounts to less than 25%, the capital gain is tax exempt for 95%.

The WHT regime in the TAK also applies to the old St. Maarten offshore companies.

The TAK is to be revised. Negotiations have already started between Aruba and Curaçao each with the Netherlands. In the end, the existing TAK will then be replaced by separate tax agreements between two countries (e.g. between Aruba, Curaçao, and St. Maarten each with the Netherlands), as well as separate agreements between the three islands Aruba, Curaçao, and St. Maarten. The aim is to have the new agreements in place in 2013.

Tax administration

Taxable period

Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar year basis or on a different book-year. On request, this may also apply, for example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year-end).

Tax returns

A provisional return must be filed within three months after the end of the book-year. A final return must be filed within six months after the end of the book-year.

For the provisional return, no extensions are granted. For the final return, an extension may be requested. In general, no extensions will be granted for more than 12 months after the book-year.

Payment of tax

Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment. This means that if the book-year equals the calendar year, the provisional return is due before 1 April of the following year, and the final return before 1 July of the following year.

Sint Maarten

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2011 was 100, then at the time of filing the provisional return for 2012, which is due before 1 April 2013, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2012 will be lower than for 2011, the estimated lower amount may be paid at the time of filing the provisional return, upon request.

At the time of filing the final return for the year 2012, which is due before 1 July 2013, the balance due must be paid; or if the total amount is less than the amount already paid up, a repayment will follow.

Audit cycle

As the profit tax is levied based on self-assessment, the tax department does not issue a final tax assessment. There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

Statute of limitations

A reassessment can be imposed until five years after the tax year. In cases where the tax payer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

Topics of focus for tax authorities

There are no specific topics of focus. In case an audit is started, each aspect may be investigated. Often the audit will not only focus on the profit tax, but also the other tax obligations, such as sales tax, wage tax, and social security premiums.

Other issues

Exchange controls

In general, exchange control regulations are very liberal for offshore companies. Offshore companies established in St. Maarten can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.

Business combinations

The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

Significant developments

The tax legislation in the Slovak Republic (Slovakia) has not been significantly amended recently. Nevertheless, the legislation is subject to frequent amendments and new official interpretations. Therefore, it is advisable to contact PwC Bratislava for up-to-date information.

The information included in this summary reflects the tax law as of 31 December 2011, unless otherwise stated.

Taxes on corporate income

As a member state of the Organisation for Economic Co-operation and Development (OECD), the Slovak Republic's system of corporate taxation generally follows OECD guidelines and principles.

Corporate income tax (CIT) applies to the profits generated by all companies, including branches of foreign companies.

Slovak tax residents are taxed on their worldwide income. Slovak tax residents may utilise a method of elimination of double taxation, if their income is taxed abroad. The exemption or credit method can be used to eliminate the double taxation depending on relevant double tax treaty (DTT) and the type of income.

Slovak tax non-residents are taxable in Slovakia on their Slovak-source income only. Slovak-source income is defined by local tax law and includes, inter alia, the business income of permanent establishments (PEs) and passive types of income, such as royalties, interest, and income from disposal of assets.

Slovakia has a flat CIT rate of 19%.

Local income taxes

Slovakia does not have local, state, or provincial CIT.

Corporate residence

A company is a tax resident in the Slovak Republic if it has its registered seat or effective place of management in the Slovak Republic.

Slovak Republic

Permanent establishment (PE)

A foreign company may create a PE if (i) its employees (or persons working for it) are present and providing services in the Slovak Republic on behalf of the foreign company where this activity is carried out through a permanent place of business, (ii) the employees conclude and negotiate agreements on the foreign entity's behalf, or (iii) the foreign entity establishes a building site within the territory of the Slovak Republic.

Other taxes

Value-added tax (VAT)

A basic VAT rate of 20% applies to all taxable supplies, with certain exceptions. Medical products and printed materials have a VAT rate of 10%. Exempt supplies without credit entitlement include postal services, financial and insurance services, education, public radio and TV broadcasting services, health and social services, the transfer and leasing of real estate (with exceptions), and lottery services. There are also other VAT-exempt transactions without credit entitlement, as well as exempt taxable supplies with credit entitlement.

VAT grouping is possible if certain conditions are met.

Customs duties

- Goods imported from non-European Union (EU) countries are subject to import customs clearance.
- Goods exported from the EU customs territory have to be declared for export customs clearance.
- The person responsible for paying the customs debt is the declarant.
- The declarant is the person making the customs declaration in one's own name, or the person in whose name the customs declaration is made.
- The custom declaration should be made in the prescribed form and manner (in writing or by another action).
- Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties, and charges under the common agricultural policy).
- The customs authorities require declarants to provide a deposit to cover the customs debt in the event that a customs debt arises. Such a deposit may be in cash, or may be provided by a guarantor.

To communicate with the customs offices, each person must have an Economic Operator Registration and Identification Number (EORI), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

The European customs rate, customs nomenclature, and customs tariffs are set by EU legislation.

Excise taxes

Excise tax is charged on the release to free tax circulation or import of tobacco products, wine, spirits, beer, mineral oil, electric energy, coal, and natural gas.

Immovable property tax

Immovable property tax, which is divided into land tax, building tax, and tax on apartments, is governed by the Act on Local Taxes. Immovable property tax is calculated based on the area of the real estate, its location, and its type, as well as the tax rate of each self-governing region.

Slovak Republic

The immovable property tax rate may vary significantly. Please find below the spread of the tax charges per square metre.

Tax rates in EUR	Four floor office building in centre of city of Bratislava	One floor hall rural area
Immovable property tax per square metre	8.30 *	0.73 - 1.012

* For each another floor, add an additional tax of EUR 0.33.

Transfer taxes

There are no transfer taxes in the Slovak Republic. Real estate transfer tax was abolished as of 1 January 2005.

Stamp taxes

There are no stamp duties or similar taxes on share or other property transfers in the Slovak Republic, although small administrative fees are payable to register such transactions.

Turnover taxes

There are no turnover taxes in the Slovak Republic.

Registration taxes

There are no registration taxes in the Slovak Republic.

Motor vehicle tax

Vehicle tax applies to vehicles that are used for business purposes in the Slovak Republic, regardless of where they may be registered. The taxpayer is the entity that uses the vehicle for business purposes. The tax rate depends on engine capacity, vehicle size, and the decision of each self-governing region.

Vehicle	Tons	Motor vehicle tax (EUR)	
		Bratislava region	Presov region
Personal vehicles (1)		67 - 235	56 - 195
Commercial motor vehicles and buses (2)			
Vehicles with one or two axletrees	0 to 12	75 - 667	63 - 554
	12 to 30	835 - 2,456	693 - 2,038
	above 30	2,678	2,224
Vehicles with three axletrees	0 to 15	613	507
	15 to 40	726 - 2,792	604 - 2,317
	above 40	3,015	2,503
Vehicles with four and more axletrees	0 to 23	781	647
	23 to 40	949 - 2,347	787 - 1,948
	above 40	2,570	2,134

Notes

1. Tax rate is raised proportionally to number of cubic centimetres of swept volume of cylinder.
2. Tax rate is raised proportionally to weight and number of axletrees of the vehicle.

Slovak Republic

Branch income

A foreign company may trade through a Slovak branch, which must be registered in the Slovak Commercial Register. The taxable income of the branch must not be lower than that which an independent entity (e.g. a Slovak company) would achieve from carrying out similar activities under similar conditions. If the branch's taxable income cannot be assessed based on its income less costs, as adjusted for tax purposes, certain other methods may be used. A taxpayer may ask the tax authorities in writing to approve such a method.

Income determination

The tax base is generally the accounting result as determined under Slovak statutory accounting rules, adjusted for tax purposes. Under the transfer pricing rules, the tax base should be increased by the difference in prices charged between a Slovak entity and its foreign related parties compared with those that would be charged between independent parties. Slovak tax law generally reflects OECD rules with respect to transfer-pricing methods (*see Transfer pricing in the Group taxation section for more information*).

Inventory valuation

Stock (i.e. inventory) is valued at cost. Slovak legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) may not be used. The tax treatment follows the accounting treatment.

Capital gains

Capital gains from the disposal of assets are included in the CIT base. The tax treatment of capital losses depends on the type of asset on which they arose.

Dividend income

Dividends paid out of profits earned on or after 1 January 2004, and liquidation surpluses and settlement amounts to which shareholders became entitled on or after 1 January 2004, are not subject to tax. Income from acquiring new shares due to an increase in share capital from retained profits or mergers and demergers within the Slovak Republic or the European Union is also not subject to tax.

Interest and royalty income

Slovak-source interest income earned by taxpayers with limited, as well as unlimited, tax liability is subject to withholding at a flat tax rate of 19%, except where the recipient of the deposit interest or the yield is a Slovak investment fund, Slovak supplementary pension fund, Slovak bank or the branch of a foreign bank, or the Slovak Export-Import Bank.

Royalty income is subject to the 19% corporate flat tax rate.

Interest and royalty income is exempt if it is paid by a Slovak payer to a recipient who is a tax resident in the European Union and is a beneficial owner of this income, provided that for 24 months before the payment:

- the payer owns at least 25% direct shareholding of the recipient of the income
- the recipient owns at least 25% direct shareholding of the payer of the income, or

- a third entity resident in European Union owns at least 25% direct shareholding on both the payer and the recipient of the income.

Unrealised foreign exchange gains/losses

The taxpayer may decide whether to include unrealised foreign exchange differences relating to unsettled payables and receivables in the tax base in the tax period when they are accounted for or in the tax period when they are realised. However, the decision to include these differences when they are realised must be made in writing to the Tax Office before the start of the tax period. Any subsequent decision to revert back to including these differences must be made before the end of the tax period concerned.

Foreign income

Companies resident in the Slovak Republic are taxed on their worldwide income, including income of its foreign branches. A Slovak tax resident entity is able to deduct from its tax base a tax loss made by its taxable PE (e.g. branch) outside the Slovak Republic, adjusted for Slovak tax purposes.

Credit relief is available for foreign tax paid under most of Slovakia's DTTs. Alternatively, exemption of foreign income taxed abroad from taxation in Slovakia may apply.

Slovakia does not have provisions related to deferral.

Deductions

Depreciation and amortisation

Tax depreciation is calculated on an asset-by-asset basis using a straight-line or reducing-balance method at statutory rates, and is generally available for expenditure incurred on tangible fixed assets. Some types of assets are excluded from depreciation (i.e. land, artwork, and national monuments).

Tangible fixed assets are classified into tax depreciation groups to which different depreciation periods apply, as follows:

Depreciation group	Assets	Depreciation (years)
1	Motor vehicles, office machines and computers, and tools and implements	4
2	Engines, most production line equipment, furniture	6
3	Buildings made of metal, turbines, air-conditioning systems, and ships	12
4	Buildings of a permanent nature	20

Taxpayers do not have to depreciate an asset every year. Tax depreciation may be interrupted in any year and continued in a later year without a loss of the total tax depreciation available.

A lessee can depreciate a tangible fixed asset held under a financial lease. For tax purposes, the depreciation period equals the leasing period, and the tax depreciation base equals the acquisition value of the leased asset without VAT and financing costs, plus expenses related to acquisition of the leased asset that the lessee incurred before the asset was put into use.

Slovak Republic

The value to be used as the basis for tax depreciation depends on how the asset is acquired and is usually based on one of the following:

- Acquisition costs (i.e. the price for which the asset was acquired).
- The taxpayer's own costs incurred, if the asset is acquired or produced internally.

Intangibles are amortised for tax purposes in line with their accounting amortisation (i.e. over the useful life of the intangible asset).

Goodwill

Amortisation of purchase goodwill, including the goodwill on purchase of a business as a going concern, if it represents an identifiable intangible asset, is tax deductible.

For goodwill created at the contribution of business as a going concern or goodwill created at a merger, the tax deductibility of the goodwill depends on the method of tax treatment of this reorganisation. If the reorganisation is performed for tax purposes in fair market values, the goodwill created will be tax effective. On the other hand, if the reorganisations are made in original values, the goodwill created is not tax effective.

Start-up expenses

Start-up expenses are tax deductible in the period when incurred.

Interest expenses

Interest expenses incurred in order to generate taxable income can be treated as tax deductible.

However, since dividends are tax exempt, the costs of interest on loan incurred to acquire the shares should be treated for tax purposes as costs incurred to generate non-taxable income, i.e. as not tax deductible.

Bad debt provisions

Provisions for unsecured receivables from loans created by banks, and bad debts of regular commercial companies, are fully tax deductible (subject to certain conditions) once the debt has been overdue for more than 1,080 days (20% of the bad debt is tax deductible when it has been overdue for more than 360 days, and 50% after 720 days), provided certain conditions are met.

Charitable contributions

Charitable contributions are treated as gifts, which are not tax deductible.

Pension expenses

Contributions to supplementary pension savings made by the Slovak employer on behalf of the employee, up to 6% of the gross salary of the employee participating in these plans, are tax deductible.

Fines and penalties

Statutory penalties and fines are not tax deductible. Contractual penalties and late payment interests are generally tax deductible on a cash basis.

Taxes

Road tax, real estate tax, and most of other taxes are tax deductible. Social security contributions paid by an employer with respect to employees are also tax deductible.

Income tax is not tax deductible.

Other non-deductible expenses

Expenses are generally tax deductible if incurred to generate, secure, and maintain the entity's taxable income. However, certain other costs are specifically not tax deductible. These include entertainment costs, various provisions (e.g. provisions to tangible and intangible assets, certain bad debt provisions), and certain expenses in excess of statutory limits (e.g. employee travel expenses and meal allowances).

Net operating losses

A company or branch may carry forward and utilise a tax loss for a period of up to five years following the year in which the loss arose, and for up to seven years for tax losses reported after 31 December 2009. Each year's tax loss should be considered separately, and can be utilised over its own five or seven-year period.

Carryback of losses is not available in the Slovak Republic.

Payments to foreign affiliates

Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length.

Group taxation

There is no concept of group CIT in the Slovak Republic. Each company in a group is taxed individually.

Transfer pricing

Under the transfer pricing rules, prices in transactions between a Slovak company and its foreign-related parties should be at arm's length, which means the prices should be at rates similar to those that would be charged between unrelated parties for the same or similar transactions under comparable conditions. Although the OECD Transfer Pricing Guidelines were formally not implemented, these are usually followed for determination of arm's-length prices.

If transactions between the related parties are not made at arm's length, and this results in a reduction in the Slovak entity's corporate tax base, then the tax authorities can adjust the corporate tax base to that which it would have been achieved if arm's-length prices had been used.

Transfer pricing documentation

All Slovak taxpayers must keep sufficient transfer pricing documentation to justify prices charged by or to their foreign related parties. The Slovak Ministry of Finance has issued a guideline setting out detailed requirements for transfer pricing documentation (the Guideline) for entities which are obliged to prepare their financial statements under International Financial Reporting Standards (IFRS).

The EU code of conduct was formally not implemented. However, the Guideline requires maintaining transfer pricing documentation in a form generally in line with the EU standards.

Slovak tax inspectors may require transfer pricing documentation during a tax inspection. Without such documentation, transfer pricing adjustments (increased tax base) are much more likely to be imposed. In addition, entities reporting under IFRS may be specifically penalised for not keeping transfer pricing documentation or for non-compliance of their documentation within the Guideline requirements.

Slovak Republic

Thin capitalisation

There are no thin capitalisation rules in the Slovak Republic.

Controlled foreign companies (CFCs)

There is no CFC regime in place in the Slovak Republic.

Treatment of inter-company items

Dividends are not treated as taxable costs if they are paid out of the profit after tax earned since 2004.

Royalties, commissions, and other payments paid to foreign related parties are tax-deductible, provided they would be taxable if paid to a third party and if the charges are in line with transfer pricing rules.

Tax credits and incentives

There are several types of investment incentives potentially available, including corporate tax credits, discounts on the price of publicly owned real estate, and financial support for creating jobs or for training employees. All of these are treated as state aid.

Various conditions must be met in order for a company to qualify for state aid. These include a minimum amount of investment in fixed assets, where the amount depends mainly on the type of project and where it is located.

Investment incentives

Investment incentives (including tax credits) are potentially available for projects in the following areas:

- Industry.
- Technology centres.
- Shared services centres.
- Tourism.

The granting of a tax relief is subject to approval of the Slovak authorities. If certain conditions are met, a taxpayer may apply tax relief in the five subsequent years following the tax period in which the relief was granted.

Research and development (R&D) incentives

R&D incentives currently available under Slovak law include the following:

- Subsidies for R&D projects from the state budget.
- Income tax relief at the amount incurred for R&D.

Types of projects which can be granted investment incentives include:

- Fundamental research projects.
- Experimental development projects.
- Applied research projects.
- Feasibility studies.
- Protection of intellectual and industrial property.
- Staffing of R&D functions.

Withholding taxes

Mainly, the following payments are subject to withholding tax (WHT) when made by Slovak companies to foreign parties. However, a DTT may reduce or eliminate the rate:

Payments	WHT (%)
Management fees for services provided in the Slovak Republic	19
Royalties *	19
Interest on loans and deposits *	19

* Royalties and interest paid to related EU-resident companies are not subject to WHT if certain conditions are met.

Dividends paid out of profits arising in 2004 and later years are not subject to Slovak WHT.

WHT should be paid to the Tax Office no later than 15 days from the end of the calendar month following that in which the payment was made. The withholding obligation lies with the Slovak resident taxpayer. The taxpayer must also notify the tax administrator of the tax withheld and transferred. If the tax is not properly withheld, the unpaid tax becomes the Slovak tax resident's tax liability, and a penalty may be assessed.

Double tax treaties (DTTs)

This table highlights countries with which Slovakia has entered into a DTT.

Recipient	Interest (%)	Royalties (%)
Australia	10	10
Austria	0	0/5 (1)
Belarus	0/10 (3)	5/10 (1)
Belgium	0/10 (2a)	5
Bosnia and Herzegovina	0	10

Notes

1. The lower rate applies to cultural royalties.
 - a. In the case of Romania, the rate of 10% applies to royalties in respect of the use of trademarks, patents, or know-how. The higher rate applies in any other cases.
 - b. In the case of Brazil, the rate of 25% applies to royalties for the use of trademarks. The lower applies in other cases.

2. The lower rate applies to interest on loans and credits granted by a bank for at least ten years in connection with the sale of industrial equipment; with the study, installation, or furnishing of industrial or scientific units; or with public works.
 - a. The zero rate applies to interest on certain commercial debt-claims, loans guaranteed by public entities for export promotion, accounts/loans between banks/public institutions of the two states, and interest paid to another state or political subdivision of a local authority.
3. The zero rate applies if the interest is received by the government/the central bank/other state institutions (see the respective treaty for exact wording).
4. The zero rate applies if the interest is received by the government or the central bank or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).
5. The rate of 10% applies to royalties for cinematography, TV broadcasting, and radio broadcasting, and to giving up rights related to royalties. The higher rate applies in other cases.
6. This rate also applies to payment for services.
7. WHT is 0% on bank loans.
8. The zero rate applies to copyrights; 1% applies to finance lease of equipment; 5% applies to equipment rental and royalties for software, cinematography, and TV and radio broadcasting; and 10% applies to payments for the use of trademarks and know-how.
9. The rate of 2% applies to state bonds, obligations, and loans insured or guaranteed by the National Bank of Slovakia/Israel, Slovak Society for Insurance of Foreign Credits and Loans, or Israel Society for Insurance of Foreign Trade; 5% applies if interest is received by a financial institution; and 10% applies in all other cases.
10. Slovakia can apply the rate of 5% to royalties for the use of trademarks, patents, or know-how paid from Switzerland to Slovakia, if Switzerland does not apply the 10% rate.
11. The zero-rate applies to interest on loans and credits in connection with the sale of industrial, business, or scientific equipment, or the sale of goods.
12. The zero-rate applies if the interest received is related to loans (monetary or non-monetary) provided to the government of the other contracting state corporation or any other institution with state shareholding or to loans provided to a bank institution under a governmental approval.
13. The zero-rate applies to copyrights.
14. The zero-rate applies to interest received by a resident of one state in respect of indebtedness of the other state government or political subdivision/local authority, or in respect of a loan made/guaranteed by the other state government in respect of imports/exports.
15. The zero-rate applies if the interest is received by the government, the central bank, or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).
16. The rate of 5% applies to royalties for the use or the right to use of patent, draft or model, plan, confidential formula or procedure, for information related to industrial or scientific experience and for the use or the right to use of an industrial, business, or scientific device. The rate of 10% applies to royalties for the use or the right to use of trademark or for information related to business experience. The rate of 15% applies to royalties, other than those stated above.
17. Slovakia is waiting for Egypt and Georgia to announce their approval of DTTs.
18. DTT between Slovakia and Libya is effective as of 21 June 2010.
19. Slovakia and Switzerland signed the Protocol to a DTT on 8 February 2011, which is not ratified yet. Based on this Protocol, the interest rate will be maximum 5%. Industrial royalties are subject to 10%, but the potential reduction of the rate is in case the royalties are paid within European Union, and entities are considered to be related companies with direct share exceeding 25% for more than 24 months, which is in accordance with the EU Directive on interest and royalty payments made between associated companies.

Tax administration

Taxable period

The standard fiscal year is a calendar year, but a Slovak entity may opt to change this to a different 12-month period.

Tax returns

A corporate tax return must be filed together with the entity's financial statements within three months following the fiscal year-end. A three-month extension to the filing deadline may be used. Also, if part of the income to be reported in the tax return is from sources abroad, the taxpayer may extend the filing deadline by up to six months. To extend the filing deadline, the taxpayer must notify the Tax Office before the normal filing deadline. After notification, the deadline is automatically extended.

Slovak Republic

Payment of tax

The balance of tax due for a fiscal year is payable by the filing deadline.

Advance payments of corporate tax must be paid monthly or quarterly during the current tax period. Instalments are usually based on the last known tax liability of the entity. It is not necessary to pay tax advances if the last tax liability did not exceed 1,659.70 euros (EUR).

Statute of limitations

A tax may not normally be assessed or additionally assessed more than five years (ten years when DTT treaty was applied, including transactions with foreign related parties) after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obliged to pay the tax. If a tax inspection is undertaken within this five-year period, another five-year period commences from the end of the year in which the taxpayer was notified of this action.

If a taxpayer utilises a tax loss, a tax or additional tax cannot be assessed more than seven years after the end of the year in which the obligation to file a tax return in which a taxpayer reported the tax loss arose.

However, tax may be assessed, or additionally assessed, no later than ten years after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obliged to pay the tax.

Audit cycle

Generally the tax authority selects the taxpayers subject to tax audit based on certain criteria, which are not communicated to the public.

The taxpayers that utilise state aid in form of tax relief are subject to specific tax audit in the year of utilisation of the tax relief.

The tax audit has to be finalised within one year.

Topics of focus for tax authorities

The tax authorities, within a tax inspection, generally focus on transfer pricing, VAT, limited tax deductibility of special types of costs (e.g. entertainment, promotion costs), and tax incentives.

Other issues

Reserve fund

When a joint-stock company is incorporated, it must create a reserve fund of at least 10% of its share capital. The statutory reserve fund must be increased annually by an amount set out in the company's Articles of Association, but not less than 10% of its net profit, up to a total of 20% of the share capital.

A limited liability company must create a reserve fund following the first year in which it reports a profit, at the latest. The minimum contribution is then 5% of the net profit each year (or more if specified in the company's Articles of Association) up to a total of at least 10% of the company's share capital.

A branch of a foreign company is not required to set up a reserve fund.

A reserve fund may be used to cover prior year losses of the company, and in certain other limited situations, but it is not distributable.

Business combinations

Two alternative tax treatments may be used for business combinations, including in-kind contributions to a company's share capital, mergers, and demergers.

Under the first alternative, the taxpayer should value assets for tax purposes using their current market values, and the revaluation difference must be reflected in the appropriate company's tax returns within seven years of the transaction.

Under the second alternative, the taxpayer should continue to use the original tax book values of the assets, and revaluation difference is not taxable/tax deductible.

When selling a business, the purchaser must include goodwill or negative goodwill, acquired as part of the purchase, in its tax base within seven tax periods.

Adoption of International Financial Reporting Standards (IFRS)

Slovakia has adopted most of the principles of IFRS in its accounting law. However, there are still some differences between IFRS and Slovak accounting standards.

Obligation to prepare statutory financial statements according to IFRS

Financial institutions (banks, insurance companies, etc.) must prepare their statutory financial statements according to IFRS. In addition, a company which fulfils two or more of the following conditions, in two consecutive accounting periods, must prepare its statutory financial statements according to IFRS:

- The total value of assets is more than EUR 165,969,594.
- Net turnover exceeds EUR 165,969,594.
- The average number of employees in the individual accounting period exceeds 2,000.

If the Slovak taxpayer is obliged to prepare its financial statements under IFRS, the tax base is derived from either:

- the profit before tax under IFRS, adjusted for tax purposes using the 'IFRS Tax Bridge' issued by the Slovak Ministry of Finance or
- the profit before tax under Slovak statutory accounting standards.

Significant developments

Amendments to corporate taxation

The Slovene Corporate Income Tax (CIT) Act was amended in 2012. The changes became effective retroactively as of 1 January 2012.

The amendments, which are summarised below, aim to reduce the tax burden on business during the global economic downturn and to facilitate investments in equipment, intangible assets, and research and development (R&D).

Progressive reduction of CIT to 15%

Changes to the CIT law aim to decrease the CIT rate by 2% in 2012 and by a further 3% in the coming three years (1% per year), lowering the CIT rate to 15% by 2015.

Increase in investment allowance

The tax allowance for investments into equipment and intangible assets increased from 30% to 40%, whereas the threshold of 30,000 euros (EUR) per period was abolished.

Increase in R&D allowance

The general tax relief for investments in R&D increased from 40% to 100%, regardless of the regional location of the company.

Amendments to value-added tax (VAT)

Input VAT deduction should no longer depend on the payment of the invoice

Up to 2012, in accordance with the Slovene VAT legislation, VAT was only deductible provided that the invoice was actually paid or reported to the debt collection offset payment system.

Pursuant to the decision of European Commission No. 2011/4182, such a rule is not in line with European VAT legislation.

Consequently, in 2012, the amendment of the Slovene VAT Law abolished this condition and allowed VAT-able persons to deduct input VAT regardless of the payment of the invoice.

Changes to double tax treaties (DTTs)

Slovenia has recently ratified four new DTTs that will come into force after both contracting countries finalise all their internal procedures. These treaties are between Slovenia and:

- Armenia
- Egypt
- Germany (amendments as to Article 26 of the DTT), and

- Kuwait.

A DTT with Belarus came into force in 2011.

Taxes on corporate income

Slovenian tax residents are liable to pay corporate income tax (CIT) on their worldwide income. Slovenian tax non-residents are taxed only on income from sources in Slovenia, including income earned through permanent establishments (PEs) in Slovenia.

In 2012, the CIT rate is a flat rate of 18% (previously 20%).

A special tax regime is granted for certain economic zones where additional tax allowances for investment and employment may be available (*see the Tax credits and incentives section*).

Taxpayers, such as non-profit or charitable organisations, associations, foundations, etc., are exempt from CIT on their non-profit-making activities.

Investment funds, as well as pension funds, pension insurance companies, and venture capital companies, may be taxed at a rate of 0% if certain conditions are met.

Tonnage tax

A company may request to be subject to tonnage tax instead of CIT if it meets certain conditions (i.e. it operates in maritime transport in international shipping) and notifies the tax authorities in advance.

The tax base for tonnage tax is the sum of the tax bases for each of an entity's ships that are included in the tonnage tax regime. The tax base for a particular ship is calculated by multiplying the number of ship operating days by the daily tax base shown in the following table:

Net tonnage (NT)	EUR/day for 100 net tonnes
For the first 1,000 tonnes	0.90
For the next 1,001 to 10,000 tonnes	0.67
For the next 10,001 to 25,000 tonnes	0.40
Above 25,001 tonnes	0.20

Local income taxes

There are no state or local taxes on income.

Corporate residence

A legal entity is considered to be a Slovenian tax resident if the entity has its statutory (registered) seat or place of effective management located in Slovenia. These conditions, however, do not exclude a society or any association of persons, including an association under civil or foreign law that does not have legal identity, from also being considered to be a Slovene tax resident.

Slovenia

Permanent establishment (PE)

The Slovene definition of a PE is generally in line with the definition set out in the Organisation for Economic Co-operation and Development (OECD) model tax treaty. Thus, it is a place of business in Slovenia in or through which the non-resident's activities are conducted in whole or in part. The following, in particular, are considered to constitute a PE:

- An office, branch, factory, workshop, mine, quarry, or other place where natural resources are obtained or exploited.
- A building site; construction, assembly, or installation site; or the supervision thereof, if the duration of the activities concerned exceeds 12 months.

A place of business is not considered a non-resident's PE if the non-resident:

- only uses the premises in question for storage, display, or delivery of goods belonging to oneself
- only maintains inventories of goods belonging to oneself for the purpose of storage, display, or delivery
- only maintains inventories of goods belonging to oneself for the purpose of processing by third parties
- only maintains the place of business in question for the purpose of purchasing goods or collecting information for oneself
- only maintains the place of business for the purpose of engaging in any other preparatory or auxiliary activity for oneself, or
- only maintains the place of business in question for the purpose of any combination of activities referred to above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

A basic VAT rate of 20% applies to all taxable supplies.

A lower VAT rate of 8.5% generally applies to foodstuffs, live animals, seeds, plants, water supplies, medicines, medical equipment, transport of passengers, books, admission fees, royalties for writers and performers, certain works of art, certain residential properties, hotel accommodation, use of sport facilities, burial and cremation services, public hygiene services, minor repairs of bicycles, shoes and clothing, domestic care services, and hairdressing services.

Exempt supplies without credit entitlement include financial and insurance/reinsurance services, rent and lease of immovable goods (with exceptions), tax and court stamps, lottery services, trade of land, health and social services, etc. There are also other VAT-exempt transactions without a credit entitlement as well as exempt taxable supplies with a credit entitlement.

VAT grouping is not possible within Slovenia.

Customs duties

Goods imported from non-European Union (EU) countries are subject to import customs clearance, and goods being exported from the EU customs territory must be declared for export customs clearance. The person responsible for paying the customs debt is the declarant. The declarant is the person making the customs declaration

in its own name, or the person in whose name the customs declaration is made. The customs declaration should be made in the prescribed form and manner (in writing or by another action specified by law). Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties, environmental tax, and motor vehicle tax).

For purposes of communication with the customs offices, each person has to be identified by an EORI number (Economic Operator Registration and Identification Number), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

Excise tax

Excise tax is charged on the release into free tax circulation or import of tobacco products, alcohol and alcoholic drinks, fuel and mineral oils, and electricity.

Types of product	Excise tax rate
Cigarettes	45.63% from retail price
Beer	EUR 11 per 1 vol.% alcohol in 1 hl
Alcohol drinks (except wine)	EUR 120 per 1 hl
Ethyl alcohol	EUR 1,200 per 100 vol.% alcohol in 1 hl
Unleaded petrol	EUR 490.67 per 1,000 l
Natural gas	EUR 0.0180 per m ³
Heating oil	EUR 15.02 per 1,000 kg
Electricity	EUR 3.05 per 1 MWh

Property tax

Slovenia has not yet introduced property tax.

Real estate tax

Real estate tax of 2% is charged on real estate transfers and leases, unless VAT has been charged on the transaction.

Stamp tax

There is no stamp duty in Slovenia.

Environmental tax

Environmental tax is charged on carbon dioxide (CO₂) emissions, waste disposal, lubricating oils and fluids, and used motor vehicles.

Motor vehicle tax

Motor vehicle tax applies to all vehicles that are registered for the first time in Slovenia. The taxpayer is the entity that imports the vehicle from EU or non-EU countries. The tax rate depends on fuel range and emission of CO₂ and ranges from 0.5% to 31%.

Insurance premium tax

Insurance premium tax is levied on insurance premiums at the rate of 6.5% and paid by insurance companies.

Slovenia

Branch income

If a branch meets the conditions, as set out in the tax legislation and relevant DTT, to be treated as a PE, then it will be liable to pay tax in Slovenia on profits that are attributable to the PE.

The profit that is attributed to a PE is determined broadly in line with OECD principles. Generally, the attributable profit is the profit that would be expected to be earned by the PE if it were an independent taxpayer performing the same or similar activities and/or business.

A branch whose activities do not create a PE is not subject to CIT in Slovenia.

Income determination

Taxable profits are assessed in accordance with Slovenian Accounting Standards 2006 or International Financial Reporting Standards (IFRS) and modified for certain revenues and certain expenses, which are partly or wholly tax non-deductible.

Inventory valuation

Slovenian law allows the application of all the most commonly used inventory valuation methods, including the first in first out (FIFO), weighted average cost, and floating average prices methods.

Capital gains

Under certain circumstances, the gains made by a Slovenian taxpayer on the disposal of an equity shareholding are effectively 47.5% exempt from taxation. Similarly, 50% of a loss arising on the disposal of such a shareholding would not be deductible for CIT. This treatment applies to the disposal of shareholdings of at least 8% that have been held for at least six months and where the taxpayer disposing of the holding employed at least one person during the six-month holding period.

The above treatment is not available for the disposal of a shareholding of a company which is resident in a country that:

- is outside the EU
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

Dividend income

Dividends and similar income received by a Slovenian taxpayer are generally 95% exempt from taxation as long as the distributor was subject to Slovenian CIT or to a comparable profits tax. The exceptions to this are where dividends represent untaxed reserves of the distributor or where the distributor is tax resident in a country that:

- is outside the EU
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

Interest income

Interest and similar income received by a Slovenian taxpayer is included in the taxable base and can be reduced in the amount of a tax liability paid abroad. Interest between related parties needs to be calculated in accordance with the arm's-length principle.

Foreign income

Foreign income, except dividends, received by a Slovenian entity from foreign sources is included in taxable income for CIT purposes in the same tax year as it arises unless the applicable DTT provides for an exemption.

Deductions

In general, business expenses which are necessary to generate taxable revenues are fully tax-deductible. The following expenses are considered unnecessary for the generation of taxable revenues and are not deductible for tax purposes:

- Expenses which are not directly necessary for performing business activities or are not incurred as a consequence of a business activity.
- Expenses of a private character.
- Expenses which do not correspond to standard business practice.

Some of the most common non-deductible expenses include:

- Penalties and the cost of bribes.
- Input VAT that could have been reclaimed in accordance with the VAT act.
- Entertainment costs, which are only 50% tax-deductible.
- Costs relating to the supervisory board, which are only 50% tax-deductible.
- Legal and other costs of incorporation, which may be deductible for the parent company but not for the entity being incorporated.

Depreciation and amortisation

Depreciation of tangible fixed assets, amortisation of intangible assets, and depreciation of investment property are recognised as expenditures in line with the accounting treatment, up to a maximum of the amount calculated using the straight-line depreciation method and the maximum tax depreciation rates listed below. Any accounting depreciation in excess of these rates is not tax-deductible in the period concerned, but may be deductible in subsequent tax periods, until the asset is fully depreciated or disposed of.

The maximum annual depreciation rates are as follows:

Depreciation category	Types of assets	Annual depreciation rate (%)
1	Buildings, including investment property	3
2	Parts of buildings, including investment property	6
3	Equipment, vehicles, and machinery	20
4	Parts of equipment, and equipment for research activities	33.3
5	Computer equipment, hardware, and software	50
6	Crops lasting several years	10
7	Breeding animals	20
8	Other fixed assets	10

Slovenia

Goodwill

In general, if goodwill is impaired for accounting purposes, then the impairment cost may be treated as tax-deductible. The amount that may be treated as tax-deductible in any one tax period is limited to 20% of the initial value of the goodwill.

Start-up expenses

In accordance with Slovene legislation, costs which occur prior to the entry of a legal entity into court register may not be treated as tax deductible. Such a principle arises from a common legal principle whereby an entity may be subject to rights and obligations only after its establishment date. The date of entry into the court register is deemed to be the date of the establishment.

Provisions

Certain provisions are only 50% tax-deductible when accrued, with the remaining 50% being treated as tax-deductible when the provision is utilised. The provisions which are subject to this treatment are provisions for warranties granted when selling products or providing services, reorganisations/redundancies, anticipated losses from onerous contracts, pensions, long-service bonuses, and severance payments on retirement.

Bad debt

Bad debt provisions are only tax-deductible if the amount does not exceed the lower of:

- the arithmetic mean of the bad debts written-off in the past three tax periods, under certain conditions specified in the tax law, and
- the amount corresponding to 1% of taxable revenues of the tax period.

In order to take advantage of this deduction, a company must be able to calculate amounts for both tests and then take the lower of the two amounts so calculated. If the company is not able to determine the amount for either, the cost of the bad debt provision is not tax-deductible until the provision is utilised.

Costs of bad debts are tax-deductible when the debt is finally written-off, provided there is a finalised court procedure, the creditor can demonstrate that it would cost more to pursue the debtor than the debt is worth, or the creditor can demonstrate that it has done everything required by good business practice to try to recover the debt.

Related-party interest

Companies may deduct interest expense on loans from their owners or other associated parties up to a maximum of the amount calculated by using the prescribed interest rate published by the Ministry of Finance. Taxpayers must increase taxable profits by the amount of any excess interest expense, unless they can prove that they could have received the loan on comparable terms from an unrelated party.

Charitable contributions

A taxpayer may claim a reduction of its taxable profits for donations made for humanitarian, disabled, charitable, scientific, educational, medical, sports, cultural, ecological, and religious purposes to residents of Slovenia or of EU or European Economic Area (EEA) member states, up to 0.3% of the taxable person's taxable revenues. An additional allowance of 0.2% of the taxpayers' taxable revenues is available for payments made for cultural purposes and to voluntary organisations that work for the public interest to protect the public from natural and other disasters.

A taxpayer may decrease its taxable base for payments made to political parties and representative trade unions, up to an amount equal to three times the average monthly salary per employee of the taxpayer.

Compensation

Salaries and other payments relating to employment (e.g. wage compensation, holiday allowances, employer's social security contributions, long-service awards, severance benefits paid upon retirement, solidarity assistance, and reimbursement of business related expenses) are generally fully tax-deductible.

The costs of benefits in kind are also tax-deductible if such benefits are taxed for the individual under the Personal Income Tax Act.

Pension allowances

Under certain conditions, a tax-deductible allowance for voluntary supplementary pension insurance may apply, of up to 24% of compulsory contributions for pension and disability insurance for insured employees, but may not exceed EUR 2,755.71 annually per employee.

Fines and penalties

Costs relating to compulsory collection of taxes and other levies are, in accordance with Slovene legislation, not tax deductible.

Taxes

Taxes paid by a shareholder as a natural person and VAT that was not deducted as an input VAT, even though there was a right to deduct, are not tax deductible. In addition, interests on late payment of taxes are not tax deductible.

Net operating losses

Tax losses may be carried forward to reduce taxable profits indefinitely, but loss carrybacks are not permitted. Loss relief may not exceed the amount of current taxable income. Generally, losses that are generated in multiple tax years are absorbed chronologically. The right to carry losses forward may be forfeited if the ownership of the capital or voting power of the taxpayer claiming the loss carry forward changes by more than 50% within the tax period and the taxpayer either has not performed business activities for two years prior to the change of ownership or substantially changes its business activity two years prior to or after the change in ownership.

Treatment of tax losses mentioned in the preceding paragraph does not apply for those losses that are generated in the year of the change of ownership or prior tax periods.

Payment to foreign affiliates

Payments to foreign affiliates are normally subject to withholding tax (WHT) if there is no right to apply exemptions in accordance with Slovenian legislation or DTT. Payments similar to dividends, including disguised distribution of profit, are not tax deductible. Any other payments to foreign affiliates are tax deductible if they are made in accordance with the arm's-length principle.

Group taxation

Group tax returns were abolished with the introduction of the CIT Act on 1 January 2007. However, special transitional provisions allow a group of taxable persons to

Slovenia

continue to file a group tax return, until the period for which approval was granted to file a group tax return expires.

Transfer pricing

Prices between a Slovenian entity and its related parties must be set, for tax purposes, at fair market value using the arm's-length principle. Broadly speaking, taxpayers are related by direct, indirect, or common shareholdings of over 25%; through a participation in management; or by control through other means, including through contractual terms.

For transactions between two related Slovenian tax residents, provided neither is in an 'advantaged' position (advantaged usually means having unutilised tax losses), there is no actual requirement for the companies to adjust their tax returns to reflect an arm's-length price.

Taxable persons must prepare transfer pricing documentation. The Slovenian rules regarding such documentation follow the EU Code of Conduct on transfer pricing documentation for associated enterprises in the EU (EU TPD).

Thin capitalisation

Interest payments on loans granted, or guaranteed, by a related party (a party which directly or indirectly owns at least 25% of the shares or voting rights in the taxpayer) are not tax-deductible to the extent that the loan amount exceeds the thin capitalisation threshold specified in law. This does not apply to loan recipients who are banks or insurance companies.

Generally speaking, the thin capitalisation threshold is exceeded if the debt-to-equity ratio exceeds 4:1.

Tax credits and incentives

Foreign tax credit

Tax paid abroad can be credited against tax liability in Slovenia. The amount of tax that can be credited is the amount of final and actually paid tax. If there is DTT made between countries in question, the amount of tax that can be credited is the amount calculated at the rate determined in the DTT. A taxpayer needs to provide proof of the amount of foreign tax, the basis for calculation of the tax, and the amount of the tax paid.

Investment allowances

A tax allowance for investment in equipment and intangible assets is available for investments made after 1 January 2008. The tax allowance is limited to 40% of the value of the assets acquired.

Research and development (R&D) allowances

A 100% investment allowance is granted for investments in R&D within the tax period, regardless of the location of establishment of the company within Slovenia. Such an investment tax allowance may be obtained for expenditures on:

- internal R&D activities within the company and
- the purchase of R&D equipment from related or unrelated parties or from a private research institution.

Allowances for employing certain individuals

A taxpayer that employs trainees or students to undertake practical work may reduce its taxable profits by an additional 20% of the average monthly payment paid to such persons, for every month the person carries out the work.

A taxpayer that employs disabled persons may decrease its taxable profits by an additional 50% of the salary paid to such persons (in addition to the deduction for their actual salary cost). A taxpayer that employs a severely disabled person or a person with a combination of total hearing loss and speech impairment may reduce its taxable base by an additional 70% of the salary paid to such a person (in addition to the deduction for their actual salary cost).

Tax relief for investments in the Pomurje region

Entities based in the Pomurje region of Slovenia may claim additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2015. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

Tax relief for employment of hard-to-place workers

A taxpayer who employs a hard-to-place worker may be able to benefit from a tax allowance for both CIT and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45% of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.

Withholding taxes

In Slovenia, tax must be calculated and withheld on the payments made by residents and non-residents on Slovenian-sourced income to recipients outside Slovenia.

Payments to which the WHT rules apply include payments for dividends, interest, copyrights, patents, licences, leases on real estate situated in Slovenia, services of performing artists, and services charged from low-tax jurisdictions.

The WHT rate is 15%.

If a DTT exists, the WHT rate may be reduced in line with the provisions of the treaty. Similarly for payments of interest, royalties, and dividends within Europe, the Interest and Royalties directive and the Parent Subsidiary directive, respectively, may also reduce this WHT rate to zero.

Furthermore, WHT is not deducted on dividends paid to a parent company in another EU member state if those dividends are subject to an exemption from tax in the hands of the recipient, provided certain conditions are met.

Subject to certain conditions, tax is not required to be withheld on interest on non-exchangeable debt securities issued outside Slovenia by a Slovenian tax resident corporation through a public placement on an international clearing system (i.e. Euroclear).

Notes

- Under certain treaties, the WHT rate depends on whether, and to what extent, the recipient participates in the capital of the distributor. Generally, if the recipient holds a participation of more than 25% in the distributing company, the dividends are subject to a lower 5% WHT rate. The higher WHT rate is, however, normally due when the participation is less than 25%.
- Some DTTs include specific provisions whereby interest payments are subject to a 0% WHT rate, if certain conditions are met.
- The rates shown apply from 1 January 2011, when the new treaty with Italy came into effect.
- These treaties have yet to be ratified by both parties.
- 5% rate if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividend; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which by virtue of the law of the state in which the payer is a resident, are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% rate applicable in all other cases.
- 5% rate applicable to the gross amount of: (i) royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work (but not including cinematograph films) and (ii) royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment, 10% rate applicable in all other cases.
- 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films or films or tapes used for radio or television broadcasting; 10% rate applicable to royalties for the use of, or the right to use, any patent, trade mark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
- 10% rate applicable to royalties for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment; 15% rate applicable to royalties in all other cases.

* Protocol amending Article 26 of the DTT otherwise in force.

Tax administration

Taxable period

The tax period should be the calendar year. However, a tax period may differ from the calendar year, but may not exceed a period of 12 months. In this case, the tax authorities must be informed about the chosen tax period, and the taxable entity will not be allowed to change its tax period for the following three years.

Tax returns

A tax return must be submitted to the tax authorities by the end of the third month following the end of the tax year.

Slovenia

Payment of tax

CIT is paid in advance in monthly instalments (if the amount of prepayment exceeds EUR 400 per month) or in quarterly instalments (if the amount of prepayment is less than EUR 400 per month) determined on the basis of the previous year's assessment.

The final CIT payment must be made within 30 days of the tax return submission.

Audit cycle

Slovene legislation does not define an audit cycle. However, we understand that the Slovene tax administration has its own criteria for how to determine audit targets, which is in accordance with their annual tax plan.

Statute of limitations

Under Slovene legislation, a tax inspection may be initiated within five years from the date when a tax return was due for submission to the tax authorities. However, the five year period runs following each interrupting act (generally, certain actions by the Tax Office or the taxpayer within the tax period may be considered as interrupting act), but may not surpass a maximum of ten years counting from the date when the tax return is due. A concluded tax inspection will foreclose any further tax authorities' inspection only for the period and the items that were subject of the concluded tax inspection. Any issue not examined remains open for a future tax inspection. The right of the tax authorities to assess and collect tax permanently expires after ten years counted from the date when the tax return is due.

Topics of focus for tax authorities

Recently, we have noticed that tax authorities focus on appropriateness of transfer pricing for multinational companies.

Significant developments

After the switch from the source-based taxation to the worldwide taxation of South African (SA) residents in 2000, and the introduction of capital gains tax in 2001, the SA tax system has not undergone fundamental changes. Smaller reforms, however, are ongoing. The most significant recent changes were:

- The introduction of new anti-avoidance provisions on corporate reorganisation transactions.
- Refinement of the headquarter company regime.
- New transfer pricing legislation from 1 April 2012.
- New statutory source rules from 1 January 2012.
- Additional anti-avoidance provisions for hybrid equity instruments and third-party backed shares.
- New anti-avoidance provisions for dividend cessions and borrowed shares.
- New incentive regimes for research and development (R&D) and film production.
- Reform of the controlled foreign company (CFC) provisions.
- The extension of corporate reorganisation relief to CFCs.
- Introduction of dividends tax from 1 April 2012 at a rate of 15%.
- Withholding tax (WHT) on interest (January 2013).
- Employer's contribution to retirement funds on behalf of an employee will be treated as a taxable fringe benefit in the hands of an employee (March 2014).
- Further tax relief for small and micro businesses.
- Increase in the capital gains tax effective rate from 14% to 18.67%.

Introduction of a dividend tax

The Secondary Tax on Companies (STC) was replaced on 1 April 2012 by dividends WHT imposed at a rate of 15%, which is an attempt to align the SA system of taxing corporate profits with worldwide practice. The tax is withheld by the company declaring the dividend but is ultimately borne by the beneficial owner of the dividend.

Administrative developments

The Tax Administration Bill 11 of 2011 has been introduced in Parliament. Its objective is to consolidate the administrative provisions of many of the 19 Tax Act's administered by the South African Revenue Service (SARS). It also introduces more powers to SARS (e.g. enhanced information gathering and collection powers) and introduces a Tax Ombud.

The submission of certain annual returns has been increased to a bi-annual basis. This includes reconciliation returns for employment taxes by employers as well returns by reporting institutions on investment returns (e.g. banks, certain financing organs of state, listed companies in respect of certain debt instruments).

South Africa

SARS has also increased its reporting and reconciling requirements on companies who now have to submit a new IT14SD form, which requires the taxpayer to reconcile its financial information and various taxes, including corporate income tax (CIT), employment taxes, value-added tax (VAT), and customs and excise duties.

Taxes on corporate income

An SA-resident company is subject to normal CIT on its worldwide income, irrespective of source. Non-residents are taxable on SA actual or deemed source income.

In South Africa, the normal CIT rate applicable for corporate income of companies for tax years ending between 1 April 2012 and 31 March 2013 is a flat 28%.

Close corporations, which are essentially a simplified form of company, are taxed at the same rate as companies and are subject to the same taxation rules.

Small business corporations (i.e. companies with only natural persons as members/owners and with gross income of not more than 14 million South African rand [ZAR]) are taxed at 0% on the first ZAR 63,556 of taxable income earned, 7% on the amount above ZAR 63,556 but not exceeding ZAR 350,000, and ZAR 20,051 and 28% on the amount exceeding ZAR 350,000.

A personal service provider company (i.e. a company that provides certain services that are performed by persons who have an interest in the company) is taxed at 28% of its taxable income. Similarly, a non-resident company is taxed at 28%.

Special CIT rates apply in certain industries, such as mining and insurance (see below).

Alternative turnover-based tax for very small companies

To reduce the compliance costs for very small companies, a turnover-based presumptive tax is available. Companies with a turnover of less than ZAR 1 million per year can elect to pay this tax instead of normal CIT, at a rate ranging from 0% to 6%, depending on the turnover. This election for the tax year commencing on or after 1 March 2012 must be made before 29 June 2012.

Dividends tax

Dividends tax is imposed at 15% from 1 April 2012 on dividends declared and paid by resident companies and by non-resident companies in respect of shares listed on the Johannesburg Stock Exchange (JSE) paid to SA residents.

Dividends are tax exempt if the beneficial owner of the dividend is an SA resident company, retirement fund, or other prescribed exempt person.

The tax is to be withheld by companies paying the taxable dividends or by regulated intermediaries in the case of dividends paid through a regulated intermediary. In the case of *in specie* dividends, the company declaring the *in specie* dividend is liable for the dividends tax and not the beneficial owner of the dividends.

Exemptions from dividends tax and treaty imposed reduced rates only apply if the beneficial owner of the dividend has made the required declaration to the declaring company or regulated intermediary.

The balance of STC credits as on 31 March 2012 that a resident company had prior to dividends tax remains available to that company to be set-off against dividends declared to reduce the amount subject to dividends tax. All STC credits must, however, be utilised before 31 March 2015, or they will be forfeited.

CIT for mining companies

Previously, there were two formulae for determining CIT for mining companies: one for gold-mining companies that were subject to STC and the other for such companies that had elected to be exempt from STC. However, with the implementation of the dividends tax, STC was repealed and all gold mining companies must now use the standard formula to calculate the tax rate from years of assessment ending during the 12-month period before 31 March 2013.

The maximum tax rate that applies to companies' income from oil and gas activities is capped at 28%.

CIT for long-term insurance companies

Life insurance companies are obliged to follow the 'four-fund approach', with policies divided into four funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Funds are treated as separate taxpayers and taxed at four separate rates. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, 28% for company policyholder funds, and 28% for corporate funds.

Local income taxes

No local government taxes on income apply to either SA-resident or non-resident companies.

Corporate residence

A company is resident in South Africa if it is incorporated, established, or formed in South Africa or has its place of effective management in South Africa. However, a company that is deemed to be exclusively resident in another country by the terms of a double taxation agreement (DTA) is excluded from SA residency.

The place of effective management is, in terms of an Interpretation Note issued by SARS, interpreted as the place where the strategic decisions of the directors are implemented. However, this approach has not yet been tested by the South African courts. Where international precedent applies a different meaning to the term, it is expected that the South African courts would interpret the term in accordance with international precedent for both domestic law and treaty purposes. SARS has indicated that it intends to amend the Interpretation Note in the near future to align it with internationally accepted principles.

Permanent establishment (PE)

South Africa does not, as a general rule, tax non-residents on the basis of having a PE in South Africa. Rather, non-residents are subject to income tax in South Africa on income derived or deemed to have been derived from a South African source. The primary exception to this rule is in relation to capital gains where non-residents are subject to tax on assets attributable to a PE in South Africa. A PE is defined by reference to the definition thereof in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

South Africa

Other taxes

Value-added tax (VAT)

VAT is an indirect tax, which is largely directed at the domestic consumption of goods and services and at goods imported into South Africa. The tax is designed to be paid mainly by the ultimate consumer or purchaser in South Africa. It is levied at two rates, namely a standard 14% rate and a zero rate (0%).

Very few business transactions carried out in South Africa are not subject to VAT. The tax is collected by businesses which are registered as vendors with SARS on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT.

VAT registration and administration

All suppliers of goods and services having an annual turnover currently exceeding ZAR 1 million are obliged to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors, provided their annual turnover exceeds ZAR 50,000. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services which they acquire.

Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called 'added-value' is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).

Taxable supplies

Standard rated and zero-rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies.

Goods and services

For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property, and real rights in such things and property. The meaning of 'services' is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

Imports

Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

Zero-rated supplies

The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified goods utilised for farming purposes, the sale of an enterprise as a going concern, fuel subject to the fuel levy, and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply, a vendor does not charge VAT on the consideration for the supply and

obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.

Exempt supplies

In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. While all fee-based financial services are subject to VAT, the charging of interest is exempt. Other exempt supplies include residential rentals, basic foodstuffs, non-international passenger transport by road or rail, and educational services.

Under exempt supplies by vendors, the vendors do not charge VAT on the supply, and they are not entitled to a deduction or credit for the VAT paid by them on goods and services supplied to them for the making of the exempt supply. Accordingly, vendors treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

Customs duties

Customs duties are charged on importation of goods into South Africa which range between 3% and 20%, excluding clothing and apparel which may be as high as 45%. The import duties may also include anti-dumping and countervailing duties of up to 150%. No customs duties are charged on trade between South Africa and Botswana, Lesotho, Namibia, and Swaziland, as these five countries constitute a Southern African Customs Union.

Excise duties

Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco (52% including excise and VAT) and liquor (23% to 43%), and an *ad valorem* duty (calculated as a percentage of price) on monitors (7%) cosmetics, televisions, audio equipment, and luxury automobiles (marginal rate of 25%). Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry, and (limited) manufacturing activities.

Property taxes

Local municipalities levy rates on land. These rates are based on a percentage of the municipal valuation of land and improvements and vary from municipality to municipality. Generally, a higher rate is levied on properties zoned for business use.

Transfer duty

Transfer duty levied on the sale of immovable property has been revised. The revised rate structure applies to properties acquired under purchase agreements concluded on or after 23 February 2011. The duty is payable by the person acquiring the property within six months from the date of acquisition at the following rates:

Purchase price (ZAR)	Transfer duty rate (%)
Not exceeding 600,000	0
600,000 to 1 million	3
1 million to 1.5 million	5
Exceeding 1.5 million	8

South Africa

Prior to 23 February 2011, the rate applicable to companies was 8% calculated on the higher of the purchase price or market value. Transfers of immovable property subject to VAT are exempt from transfer duty.

Securities transfer tax (STT)

STT is levied at a rate of 0.25% of the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security, if the consideration declared is less than the market value or if no consideration was paid. STT is payable by the company that issued the securities in question. However, the company can recover the tax from the person acquiring the shares. Slightly different rules apply in the case of listed securities.

Skills Development Levy (SDL)

SDL is a compulsory levy to fund the education and training as envisaged by the Skills Development Act. It is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees' salaries.

Unemployment Insurance Fund (UIF) contributions

Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee; however, the monthly cap of ZAR 124.78 applies. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

Compensation for Occupational Injuries and Diseases Act (COIDA) fund

Employers are liable for making annual contributions to the COIDA fund. COIDA contributions are a payroll cost that cannot be deducted from the employee's salary with a maximum salary cap of ZAR 292,032 per annum applying from 1 April 2012. The rates vary depending on the employer's industry (e.g. a rate of 1.62% is applied to the salaries of employees involved in the manufacture of pottery up to a maximum salary band of ZAR 292,032 per annum).

Donations tax

Disposals of assets below their market value are a deemed donation and, at least theoretically, subject to donations tax. Donations tax is payable by resident companies at a flat rate of 20% on donations made. An annual exemption of ZAR 10,000 is available.

Public companies, comprised of mostly listed companies, are exempt from donations tax. An exemption is also available for donations made to certain charities and other non-profit organisations.

Vehicle emissions tax

An environmental levy is levied on new motor vehicles based on gram per kilometre of CO₂ emissions of the vehicle over a stated level. The levy is currently ZAR 75 to ZAR 100 per gram per kilometre over the CO₂ threshold level.

Fuel levy

A fuel levy is charged on petroleum fuel sold. The general fuel levy for 2012/13 is 197.5 cents per litre of petrol and 182.5 cents per litre of diesel.

Electricity levy

To support energy efficiency, the government has implemented a levy on electricity generated from non-renewable sources at 3.5 cents/kWh (2.5 cents/kWh prior to 1 July 2012). The levy is collected at source by the electricity producer.

Air passenger tax

As of 1 October 2011, passengers departing on international flights must pay air passenger tax at the rate of ZAR 100 on flights to Botswana, Lesotho, Namibia, and Swaziland, and ZAR 190 on other flights. The tax is added to the price of the ticket. Departure prior to 1 October 2011 was subject to air passenger tax at the rate of ZAR 80 and ZAR 150 respectively.

Branch income

SA branches of foreign companies are not considered to be separate legal entities for tax purposes, and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 28% and are not liable for dividends tax or any branch profits repatriation tax.

Note that a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA-trading operations. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch.

In terms of DTAs, the taxation of branches is limited to cases where the branch constitutes a PE.

Income determination

Inventory valuation

Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. Last in first out (LIFO) is not accepted for tax purposes.

Capital gains

Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. Gains realised by companies are taxed at the normal CIT rate; however, only 66.66% of gains are included in taxable income.

Dividend income

As of 1 April 2012, dividends are taxed in the hands of the shareholder at a rate of 15%. The amount is withheld by the company declaring the dividend on behalf of the shareholder receiving it. *In specie* dividends are not subject to tax in the hands of the shareholders.

Foreign dividends received by or accrued to an SA resident taxpayer are included in income based on a formula and taxed at the normal CIT rate, which results in an effective tax rate of 15%. Qualifying foreign dividends are also generally not subject to tax where they are received by resident shareholders holding in excess of 10% of the equity shares and voting rights of the company declaring the dividend. Dividends

South Africa

received by residents holding less than 10% of such shares will generally be taxable in South Africa, subject to a tax credit for foreign taxes payable by the recipient shareholder.

Stock dividends

Stock dividends (capitalisation issues of shares) are not subject to CIT or dividends tax.

Interest income

Interest income for resident companies is taxed at the normal CIT rate. Interest received by non-resident companies is only subject to CIT if it is from a source in South Africa. As of 1 January 2012, statutory source rules apply to interest.

As of 1 January 2013, a 10% WHT on interest will apply to interest paid on certain debt instruments to non-resident companies.

Foreign income

Foreign income of an SA-resident company is subject to tax in South Africa on an earliest of receipt or accrual basis. However, income that may not be remitted to South Africa in terms of the laws of the country where the amount arose is deferred until the income can be remitted. Double taxation may be avoided under certain DTAs or by way of unilateral credit or deduction for foreign tax payable on foreign income (*see Foreign tax credit in the Tax credits and incentives section*).

Deductions

Depreciation and depletion

A depreciation (wear and tear) allowance may be deducted on movable assets used for the purpose of trade. There are no statutory provisions relating to rates of wear and tear, but SARS has published a table of periods over which the assets may be written off. The rates of wear and tear, based on the cash cost, are calculated either according to the straight-line or diminishing-balance method.

New and unused machinery used in the process of manufacture or in a similar process is depreciable at the rate of 40% in the first year of use and 20% in the three following years. If the machinery is not new and unused, an allowance of 20% per year over five years is available.

An accelerated depreciation allowance (50% in the first year of use, 30% in the second, and 20% in the third year) applies to the machinery and articles used in farming, production of biodiesel or bio-ethanol, and production of energy from certain renewable sources.

Specific allowances are also provided for pipelines, transmission lines, railway lines, airport property, ships, mining operations, and other qualifying industrial assets.

Buildings and other permanent structures may not be depreciated, apart from an annual allowance for each of the following:

- Buildings used in a process of manufacture or a process similar to a process of manufacture: For buildings erected before 1 January 1989, a 2% rate applies per year. For buildings erected after 1 January 1989, a 5% rate applies.
- Hotel buildings: For buildings built prior to 4 June 1988, a 2% rate applies per year. For hotel buildings erected after 4 June 1988, a 5% rate applies. Improvements

within the existing building framework that commenced on or after 17 March 1993 are depreciated at the rate of 20%.

- **Agricultural cooperative storage buildings:** For buildings built prior to 1 January 1989, a 2% rate applies per year. For buildings erected on or after 1 January 1989, a 5% rate applies.
- **Housing projects of not less than five units:** Housing projects of not less than five units of residential accommodation, which consist of more than one room and the erection of which commenced on or after 1 April 1982 and before 21 October 2008, are subject to a 2% rate of depreciation. After 21 October 2008, an allowance of 5% is available on this type of property. The 5% depreciation rate is available to the taxpayer provided that the unit is used by the taxpayer solely for trade purposes, the unit is situated in South Africa, and the taxpayer owns at least five units in South Africa used for the purposes of trade. An additional allowance is available for a low-cost residential unit. Additionally, from 21 October 2008, taxpayers are granted relief for the transfer of ownership on a contract for deed basis of employer provided low cost residential units to employees.
- **Buildings in urban development zones:** Improvements to an existing building in an urban development zone, where the existing structural or exterior framework is preserved and brought into before 31 March 2014, qualify for an accelerated allowance of 20% per year. Buildings that are erected, extended, or added to in an urban development zone on or after 21 October 2008 and which are not covered by the first mentioned allowance qualify for a 20% allowance in the first year and a 8% allowance in the following ten years. As of 21 October 2008, new and unused low-income residential units located in urban development zone demarcations are subject to an additional annual depreciation allowance. The rate is 25% in the first year, 13% in the succeeding five years, and 10% in the year following the last year. Improvements are subject to a depreciation allowance of 25% over a period of four years.
- **Commercial buildings:** The cost to the taxpayer of any new and unused building owned by the taxpayer, or any new and unused improvement to any building owned by the taxpayer, if that building or improvement wholly or mainly is used by the taxpayer for trade purposes, other than the provision of residential accommodation, is subject to a 5% rate of depreciation. This allowance is applicable to any building or improvement contracted for on or after 1 April 2007 and the construction of which commenced on or after 1 April 2007.

An allowance for assets disposed of or scrapped during a year of assessment is determined by reference to the cost less allowances already granted and the proceeds on disposal (if any). Recoupments of allowances granted are taxable where disposal proceeds exceed the tax basis at the time of sale. Such recoupments cannot exceed the cost of the asset. Proceeds above cost will be taxed as a capital gain.

Book depreciation does not need to be consistent with tax depreciation.

No cost or percentage depletion is available for natural resources.

Cost of inventory

The cost of inventory is, in principle, deductible as soon as the inventory is acquired. However, at the end of each year, the cost of the inventory still on hand has to be added to the company's income. Then in the next year, it can be deducted again. This has the effect of timing the deduction of the cost of inventory to match the time of its realisation.

South Africa

Assets acquired for shares issued

When assets are acquired by a company in return for the shares or debt instruments issued to the seller, the purchaser of the assets is deemed to have incurred expenditure of the lesser of the market value of the assets immediately after acquisition or the market value of the shares immediately after acquisition.

Taxes

Payroll taxes are deductible from taxable income for the corporation.

Net operating losses

Losses may be carried forward indefinitely, provided an active trade or business of a similar nature is carried on without interruption. There is no loss carryback in South Africa.

Payments to foreign affiliates

Deductions may be claimed for royalties, managerial service fees, and interest charges paid to foreign affiliates, provided such amounts approximate those that would be paid to an unrelated entity in an arm's-length transaction.

Interest deductions may be limited where the paying company is thinly capitalised (see *Thin capitalisation in the Group taxation section*).

Specific provisions apply for 'bullet interest' (i.e. a one-off, upfront lump sum payment of interest). Any interest expenditure must be spread over the life of the interest-bearing arrangement on the compounding accrual basis.

Group taxation

Group taxation generally is not permitted in South Africa. However, relief is given for transactions between group companies to allow for reorganisations, provided certain requirements are met.

In general, the relief will only apply to transactions between companies within the same group. A group of companies is defined as a controlling company and one or more controlled companies in relation to that controlling company. A controlling company means a company holding directly or indirectly at least 70% of the equity of any other company. Foreign-incorporated companies do not form part of a group of companies for the purposes of this relief, although relief is extended to CFCs in certain circumstances.

Corporate rollover relief is available for asset-for-share transactions, amalgamation transactions, intra-group transactions, unbundling transactions, and transactions relating to liquidation, winding-up, and deregistration.

The relief may cover the capital gains tax arising from the disposal of capital assets, income tax arising from the disposal of a depreciable asset, income tax arising from the disposal of trading stock, donations tax arising from the disposal of an asset, dividends tax, and transaction taxes.

As of 3 June 2011, companies that finance intra-group transactions and liquidation transactions with debt have to apply for approval to be able to claim the interest on the debt as a tax deduction.

Transfer pricing and thin capitalisation

Section 31 has been substantially amended with effect from years of assessment commencing after 1 April 2012. The amendments serve to modernise the transfer pricing and thin capitalisation rules in line with the OECD and international tax principles; to remove structural problems caused by a literal translation which focuses on isolated transactions rather than the overall arrangements; and to narrow focus which leads to the application of artificial arguments supporting certain arrangements, rather than focusing on the true economic substance.

Section 31 will no longer separately address transfer pricing and thin capitalisation. Rather, thin capitalisation will be treated as simply a breach of the general arm's-length standard.

The previous Section 31 departure points of resident and non-resident, and who are 'connected', are retained.

The most critical difference from the previous rules is the broadening and generalisation of the application concepts. Specifically, the combination of:

- the rules apply if any of the parties derive a 'tax benefit'
- the transactional concepts of 'goods and services' in Section 31(2) are removed and replaced with a much broader 'transaction, operation, scheme, agreement, or understanding'
- the use of 'directly or indirectly' in referring to the transactions entered into between the taxpayer and any connected person
- the general 'arm's-length' standard, and
- the introduction of secondary adjustments in the form of transfer pricing adjustments being deemed to be loans to which the transfer pricing provisions apply, thereby giving rise to further transfer pricing adjustments on the deemed loan.

Regarding 'financial assistance', the generalisation of the concepts discussed above make them broad enough to catch both excessive debt amounts as well as excessive interest rates. The previous concept of 'financial assistance' will be retained, i.e. including the provision of any loan, advance or debt, or any security or guarantee.

Importantly, the discretion given to SARS to adjust the price is removed, as the taxpayer is obligated in terms of the Income Tax Act to apply the arm's-length standard, i.e. "... the taxable income must be calculated as if the transaction (etc.) ... had been entered into ... had those persons been independent persons dealing at arm's length". This therefore removes uncertainty that taxpayers had in respect of performing self adjustments on the tax return.

The much broader concept of 'connected persons' in the previous provisions in respect of intellectual property will be retained in a new Section 31(3) but is extended to also apply in respect of financial assistance.

Controlled foreign companies (CFCs)

If one or more residents together, directly or indirectly, hold more than 50% of the voting or participation rights in a foreign company, then it is a CFC in relation to those residents. The income of a CFC is imputed to the residents in proportion to their holdings, subject to certain exclusions and tax credits, where applicable.

South Africa

Tax credits and incentives

Foreign tax credit

The South African Income Tax Act makes provision for a rebate against normal CIT tax in respect of foreign taxes paid on foreign sourced income or a deduction against income of foreign taxes paid on SA-sourced income. In both instances, the taxpayer must be an SA resident, the income must be included in taxable income and is not exempt, and that income was subject to a foreign tax which is not recoverable. The rebate is limited to the total normal tax payable calculated by applying the ratio of the total taxable income attributable to the foreign tax to the total taxable income. The deduction, however, may not exceed the income on which the foreign tax was levied.

A new foreign tax rebate applies from 1 January 2012 to grant relief to amounts relating to services rendered in South Africa that are subject to tax in a foreign jurisdiction where the general foreign tax rebate does not apply.

Tax exempt grants

Cash grants received within the terms of a Government Incentive Scheme by taxpayers with manufacturing operations or similar processes are exempt from CIT on such grants.

Research and development (R&D)

To encourage innovation, the current costs related to certain R&D activities carried on in South Africa are 150% deductible. However, the incentive has been revised from 1 April 2012 whereby the incentive has been split into two parts with 100% R&D expenses being automatically deductible and the other 50% being subject to pre-approval by a government appointed approval committee. The cost of machinery and other capital assets acquired for the purposes of R&D may be depreciated 50% in the first year of use, 30% in the second, and 20% in the third year. As of 1 April 2012, this changed to 40%/20%/20%/20% for machinery and other capital assets and to a 20-year write off for buildings used in the process of R&D.

Headquarter company regime

For years of assessment commencing on or after 1 January 2011, a 'headquarter company' regime is introduced to encourage the use of South Africa as a location for intermediate holding companies.

The benefits on offer to a headquarter company are:

- Exemption from South Africa's CFC rules.
- Exemptions on the headquarter company's dividend distributions.
- Exemption from South Africa's transfer pricing rules on back-to-back loans.
- Capital gains tax exemption upon the disposal of shares by the headquarter company.

The requirements for a headquarter company are as follows:

- The headquarter company must be SA resident.
- Each shareholder in the headquarter company must hold at least 10% of the headquarter company's equity shares and voting rights. This means that a headquarter company can never have more than ten shareholders.
- At least 80% of the headquarter company's assets (measured on a 'cost' basis and excluding cash and certain bank deposits) must be comprised of certain assets

related to the foreign companies in which the headquarter company holds at least 10% of the equity shares and voting rights. Specifically, these assets must be:

- the equity shares in those companies
 - loans to those companies, and
 - intellectual property licensed to those companies.
- At least 50% of the headquarter company's gross income must be comprised of dividends, interest, royalties, rentals, or fees from its 10%-plus holdings, where the gross income exceeds ZAR 5 million.

The requirements regarding the headquarter company's shareholders must be fulfilled from the incorporation of the headquarter company. The requirements regarding the headquarter company's assets and its receipts accruals are tested only at year-end but must, in the case of assets, be fulfilled every year over the lifetime of the headquarter company. If a company does not meet the gross income requirements in any year, it will not be a headquarter company for that year, but will not be permanently excluded on this ground.

Industrial policy projects

In 2008, a ZAR 20 billion incentive package for investors in energy efficient projects was announced. The incentive is available for industrial projects participating in the manufacturing sector (other than alcohol or alcohol related products, tobacco or tobacco related products, arms and ammunition, and bio-fuels, which have a negative impact on food security). Companies are divided into those with a qualifying status and those with a preferred status. The status is determined in terms of a point system.

The proposed project must either be a 'brownfield project' (expansion or upgrade of an existing industrial project) or a 'greenfield project' (a wholly new industrial project, which uses new and unused manufacturing assets). Approved projects may be granted a tax allowance known as an additional investment allowance equal to 55% (100% if located in an industrial development zone) of the cost of any manufacturing asset used in an industrial policy project with preferred status or 35% (75% if located in an industrial development zone) of the cost of any manufacturing asset used in any other approved industrial policy project.

Note that the additional investment allowance may not exceed ZAR 900 million in the case of any greenfield project with a preferred status, ZAR 550 million in the case of any other greenfield project, ZAR 550 million in the case of any brownfield project with a preferred status, or ZAR 350 million in the case of any other brownfield project.

In addition to the above, a company may also claim a deduction known as an additional training allowance.

Venture capital companies

In order to assist small and medium-sized businesses to raise capital to finance businesses, a tax incentive for investors in small and medium-sized enterprises through venture capital companies has been introduced.

A deduction is allowed from the income of a taxpayer in respect of expenditures actually incurred by that person in respect of shares issued to that person by a venture capital company.

South Africa

Withholding taxes

Payments to residents

No WHT, other than payroll taxes, are currently levied on payments to resident corporations.

Royalties payable to non-residents

Royalties and know-how payments made to non-residents for the use of or right to use intellectual property rights in South Africa are deemed to be from an SA source. The payer of the royalty or know-how payment is obliged to deduct a WHT of 12% of this payment, which is a final tax payable by the recipient of such income. The treaty rate is only the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.

Dividends payable to non-residents

A dividend WHT of 15% applies from 1 April 2012 to any dividend paid by a resident company or non-resident company in respect of shares listed on an SA exchange to SA residents. The tax is imposed on the beneficial owner of the dividend and not on the company, with the exception of *in specie* dividends. The payer of the dividend or regulated intermediary is obligated to deduct the 15% WHT from the payment. The treaty rate is only the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.

Interest payable to non-residents (as of 1 January 2013)

A 10% WHT on interest will apply to interest payable to non-residents that are not a CFC on certain debt instruments from 1 January 2013 on interest from an SA source. The resident payer of the interest is obligated to deduct the 10% WHT from the payment. The treaty rate is only the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.

Treaty rates for dividends, interest, and royalties

The WHT may be reduced by the terms of the relevant tax treaty, as follows:

Recipient	WHT (%)		
	Dividends	Interest	Royalties
Non-treaty	15	10	12
Treaty:			
Algeria (1, 11)	10/15	10	10
Australia (1, 2, 12D)	5/15	10	5

Notes

'D' refers to direct capital holding.

1. Recipient is the beneficial owner of the royalty.
2. Royalty is subject to tax in recipient country.
3. 15% is levied on royalties for cinematographic or television films.
4. The maximum rate for copyright royalties, royalties for use of computer software, and patents concerning industrial, commercial, and scientific experience is 6% of the royalties paid, otherwise 10%.
5. Maximum rate of 10% of the adjusted amount (being 70% of the gross royalties) for use of industrial, commercial, or scientific equipment.
6. The 5% rate applies to royalties for the use of a copyright. A 7% rate applies to royalties for the use of patents, trademarks, designs, models, etc.
7. In respect of right to use industrial, commercial, or scientific equipment and transport vehicles, a 10% rate applies.
8. The lower rate of 5% applies to any cultural, dramatic, musical, or other artistic work (but not including royalties in respect of motion picture films) as well as industrial, commercial, or scientific works. The lower rate of 10% applies in all other cases.
9. The 5% lower rate applies to use of literary, artistic, and scientific works. The 7% lower rate applies to right of use of patents, trademarks, designs, and models.
10. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state.
11. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital, and the higher rate applies in other cases.
12. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases.
13. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares, and the higher rate applies in other cases.
14. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum 12-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
15. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares and a minimum six-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
16. SA resident payor to Maltese resident beneficial owner (Maltese resident payor to SA resident beneficial owner is limited to tax on profits).
17. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum two-year uninterrupted holding period prior to the dividend payment, and the higher rate applies in other cases.
18. Lower rate applies to a beneficial owner who has a minimum holding of 30% of capital and a minimum direct investment of 100,000 United States dollars (USD) in the company declaring the dividend, and the higher rate applies in other cases.
19. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases. However, a 'most favoured nations' clause applies, which will limit the above rates to the lowest treaty rate in terms of any other treaty.
20. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 20% of capital, and the higher rate applies in other cases.
21. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 15% of capital, and the higher rate applies in other cases.

22. Lower rate of 5% applies to a beneficial owner that is a company and has a minimum holding of 10% of capital. Lower rate of 10% applies in all other cases. 15% rate applies to all dividends from property investment companies.
23. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of voting power (directly), and the higher rate applies in other cases.
24. The treaty contains no provisions regarding dividends WHT, thus the domestic rate will apply
25. The Netherlands Protocol has a 'most favoured nations' provision whereby the rate most favourable in any other treaty will apply over the default treaty rate. This, however, only applies to treaties concluded after this treaty.
26. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state.
27. The 5% rate applies to interest derived by a bank or any other financial institution, and the 10% rate applies in other cases.
28. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state and provided interest is taxable in that other state.
29. No provision is made for interest taxing in the DTA. Source state may therefore charge at its domestic rate.
30. The 10% rate applies to interest received by a financial institution (including an insurance company), and the 15% rate applies in other cases.
31. The 5% rate applies to interest on loans made by banks, and the 12% rate applies in other cases.
32. The 5% rate applies if the interest is paid to a bank; the 10% rate applies in other cases.
33. In Canada, a beneficial owner that is a company controls a minimum of 10% of the voting power (directly/indirectly), but excludes non-resident owned investment corporation resident in Canada.
34. In New Zealand, dividends are taxed at a flat rate of 15%.

Non-resident entertainers and sportspersons

A WHT at the rate of 15% applies to all payments made to non-resident entertainers and sports persons in respect of their activities exercised in South Africa.

Disposal of immovable property by non-residents

Any person who pays an amount to a non-resident in respect of the sale of immovable property in South Africa must withhold from the amount payable an amount equal to:

- 5% if the non-resident seller is an individual
- 7.5% if the non-resident seller is a company, or
- 10% if the non-resident seller is a trust.

The amount so withheld is not a final tax for the non-resident seller. Instead, this amount is regarded as an advance payment of the non-resident seller's normal tax liability for the year of assessment during which the property is disposed of. The non-resident seller is still obliged to submit an income tax return for that year.

Tax administration

Taxable period

The corporate fiscal year is the same as the company's financial year. It may be changed upon application showing reasonable cause.

Tax returns

Annual income tax returns must be submitted within one year from the end of the company's fiscal year.

Payments

Payments are made with provisional returns filed at six-month intervals from the fiscal year-end based on an estimate of taxable income for the year. Interest is charged on any underpayment outstanding for more than six months after the fiscal year-end except in the case of February year-ends, in which case it is seven months. Any balance (together with interest) is then paid following assessment.

South Africa

Audit cycle

There is no prescribed audit process, and an audit can be initiated by any factor as determined by SARS. The audit or inspection will commence with a request from SARS for the taxpayer to make available any such records or information as may be required.

Statute of limitations

Tax debts to the state prescribe after a period of 30 years. Tax returns submitted that have been assessed may not be reopened after a period of three years from date of assessment unless there has been fraud, misrepresentation, or non-disclosure by the taxpayer.

Topics of focus for tax authorities

SARS, in their 2012-2016 Compliance Program, stated that they will focus on the following areas:

- Large multinational business will be focused on in respect of transfer pricing, international tax compliance, and under declaration of provisional tax.
- The construction industry has been identified as having very low tax compliance, and this will be a focus, especially in relation to companies who receive government tenders.
- SARS envisages a clamp down on illicit cigarette trade whereby cigarette as smuggled via warehouses or cigarettes destined for export are diverted for local consumption.
- Undervaluation of imports in the clothing and textile industry is another focus area. The practice will be confronted by inter-governmental department cooperation and establishing a frequent revision of a reference pricing database and more cooperative border management.
- Small business registrations will be encouraged, with SARS conducting registration drives. Abuse of the VAT system by small business will also be focused on.

Significant developments

Over the past year, the following significant amendments have been made to Spanish law on the taxation of companies.

Royal Decree-Law 18/2012, on the write-down and sale of real estate assets by the financial sector, was published in the Official State Gazette on 12 May 2012. The main tax measures included in this reform that affect companies' taxation are as follows:

- Capital gains obtained on any type of transfer of urban real estate assets that are non-current assets or non-current assets held for sale purposes (not stock) and that were previously acquired for valuable consideration between 31 May 2012 and 31 December 2012 are exempt for 50% of the gains.

Royal Decree-Law 12/2012, published in the Official State Gazette on 31 March 2012, introduces several tax and administrative measures aimed at reducing the public deficit. The main tax measures are summarised below:

- Until 30 November 2012, personal income tax (PIT), corporate income tax (CIT) and non-resident income tax (NRIT) taxpayers owning assets or rights at 31 December 2010 that do not conform to the income declared for such taxes may file a return and pay in 10% of the amount involved or acquisition value of such assets or rights. Submission and payment of the return will not trigger penalties, interest, or surcharges. The regularisation will also release the taxpayer from criminal liability.

The above will not be applicable to taxes and tax periods where submission of the return and payment take place following the notification of the commencement of inspection or audit proceedings.

- For companies with turnover in the previous 12 months of 20 million euros (EUR) or more, advance payments will amount to at least 8% of the accounting profit for the first 3, 9, or 11 months of each calendar year, less any offsettable tax losses in accordance with the applicable limits.

The minimum advance payment for April 2012 will amount to 4%.

For companies whose turnover relates at least 85% to income to which the international double tax exemption or the internal 100% double tax deduction for dividends applies, the rate will be 4% (2% for the advance payment for April 2012).

This will apply to the tax periods commencing in 2012 and 2013.

Spain

- The rule concerning unrestricted depreciation of investments in new tangible fixed assets and investment property has been repealed effective 31 March 2012.

A transitional regime is provided for investments made prior to that date. Under this transitional regime, unrestricted depreciation tax relief may be applied to these investments although with certain limits during the tax periods commencing in 2012 and 2013.

- The amount of net deductible financial expenses in the tax period is generally reduced to 30% of operating profit (applying certain adjustments) for the year, financial expenses of less than EUR 1 million being in any event deductible. The limit will not apply to companies that do not form part of a group within the meaning of Article 42 of the Code of Commerce, with exceptions.

For such purposes, net financial expenses will be considered to be the excess of financial expenses (excluding the non-deductible expenses mentioned below) with respect to income deriving from the assignment of capital to third parties accrued in the tax period.

For companies taxed under the tax consolidation regime, the deduction limit will refer to the tax group. Nonetheless, the entity's net financial expenses available for deduction at the time of its inclusion in the group will be deducted up to the limit of 30% of operating profit. When an entity stops forming part of the group or the group is extinguished and there are net financial expenses available for deduction, the rule will be similar to that for assigning tax losses to the entities that formed part of the group.

These limits will apply to tax periods commencing on and after 1 January 2012.

- The financial expenses deriving from debts with group companies aimed at the acquisition of interests in other group companies or the contribution to capital or equity of other group companies will not be deductible unless it is evidenced that there are valid economic reasons, as has been required by the tax authorities in the last few years.

These limits will apply to the tax periods commencing on and after 1 January 2012.

- For the tax periods commencing in 2012 and 2013, the limits for the application of tax credits to promote the performance of certain activities are reduced from 35% to 25% of gross tax payable, less the tax credits for internal and international double taxation.

When the research and development (R&D) and technological innovation tax credits for expenses and investments in the year exceed 10% of the tax payable mentioned above, the limit is reduced from 60% to 50%. In parallel with the foregoing, the period for applying tax credits not applied owing to insufficient tax payable is extended to 15 years (18 years for R&D and technological innovation tax credits).

The limits will also apply to the tax credit for the reinvestment of extraordinary profits.

- Effective for tax periods commencing in 2012 and 2013, the deduction of goodwill is limited to 1%. This limit affects both goodwill on direct business acquisitions and resulting from corporate restructuring operations.

For dividends and capital gains on the transfer of interests in non-resident companies that do not fulfil the requirement envisaged in Article 21.1.b) of the CIT Law (i.e. that the investee has been subject to a foreign tax identical or analogous in nature to Spanish CIT) but which meet the other requirements set forth in the above mentioned Article 21.1. and which accrue before 1 December 2012, the taxpayer may opt not to include them in the tax base, in which case they will be subject to a special tax of 8%.

A Royal Decree-Law, passed on 30 December 2011 (RDL 20/2011), introduced urgent budgetary, tax, and financial measures to be taken to correct Spain's public deficit. The tax measures laid down in this legislation included, most notably, the following:

- The general rate of withholding has increased from 19% to 21%, applicable from 1 January 2012 to 31 December 2013.
- The reduced CIT rate for job maintenance or creation applicable for micro companies has been maintained for 2012.
- The tax treatment established for CIT for investments made and expenses incurred to train staff in the use of new communication and computing technologies has been maintained.
- The regulations regarding advance CIT payments have been updated.
- For 2012 and 2013, the tax rate for real estate tax has increased for urban real estate, depending on the year in which the corresponding official tables of values approved by local municipalities to assess the rateable values of properties came into force.
- Various rules laid down in the Spanish general tax law have been amended to ensure that the Council Directive 2010/24/EU, of 16 March 2010, concerning mutual assistance for the recovery of claims relating to taxes, duties, and other measures, is correctly transposed in Spanish law.

A Royal Decree-Law, passed on 19 August 2011 (RDL 9/2011), approved certain measures to improve the quality and cohesion of the Spanish national health system, contribute to fiscal consolidation, and increase the maximum amount of state guarantees for 2011. The tax measures laid down in this legislation included, most notably, the following:

- Advance payments of CIT made by companies whose turnover (in accordance with VAT law) exceeded EUR 6,010,121.04 during the 12 months prior to the beginning of the tax period (large companies) have been increased for tax periods beginning in 2011 (only for advance payments made in October and December), 2012, and 2013. *See Payment of tax in the Tax administration section for more information.*
- The amount of tax-loss carryforwards which may be offset in tax periods beginning in 2011, 2012, and 2013 is also limited for large companies. *See Net operating losses in the Deductions section for more information.*
- The maximum period to offset tax-loss carryforwards is extended from 15 to 18 years. This amendment takes effect for tax-loss carryforwards existing in tax periods beginning as of 1 January 2012, regardless of when the losses were or are incurred.
- Maximum 5% annual amortisation of financial goodwill arising from the acquisition of an interest in a non-resident entity has been temporally reduced to 1% for tax periods beginning in 2011, 2012, and 2013.

Taxes on corporate income

The general CIT rate in Spain is currently 30%. Other tax rates (ranging from 25% to 35%) may apply depending on the type of company that is taxed and the type of business carried out.

Spain

Resident companies are taxed on their worldwide income.

For permanent establishments (PEs) in Spain of foreign companies, non-residents' income tax is chargeable on their Spain-source taxable income at a 30% tax rate.

Non-residents' income tax is also chargeable on non-established foreign companies/individuals that obtain income in Spain (*see the Withholding taxes section*).

Small companies

Companies with a turnover under EUR 10 million in the preceding tax year are considered small companies for CIT purposes and are taxed at the following rates:

- Taxable income up to EUR 300,000 is taxed at a 25% tax rate.
- The part of the taxable income which exceeds this threshold is taxed at the general tax rate of 30%.

The tax rate levied on companies forming part of a group depends on the total amount of the group companies' turnovers. The general 30% tax rate is levied when the sum of the group companies' turnovers exceeds EUR 10 million.

Micro companies

Lower tax rates are established for companies that maintain or increase their staff levels in the tax years 2009 through 2012:

The rates for tax years 2011 and 2012 are as follows:

- Taxable income up to EUR 300,000 is taxed at a 20% tax rate.
- The part of the taxable income which exceeds this threshold is taxed at the general tax rate of 25%.

These lower rates of 20% and 25% are applicable subject to compliance with, amongst others, the following requirements:

- The income generated by all of the company's business activities does not exceed EUR 5 million.
- The company's total staff does not exceed 25 employees.
- The company's average number of employees during the 12-month period following the commencement of the tax year in question is not less than one employee and not less than the company's average number of employees during the 12-month period prior to the first tax year commencing as of 1 January 2009.

Business and professional activities tax

The business and professional activities tax is a local direct tax levied annually on the performance in Spain of business, professional, or artistic activities, regardless of whether or not they are carried out in a particular premises. The tax payable depends on different factors, such as the type of activity carried out and the location and size of the premises where the activity is carried out. As regards limits, it may not exceed 15% of the presumed average profits of the professional/economical activity.

CIT payers and non-resident companies carrying on an activity in Spain through a PE are exempt from this tax if their net turnover for the tax year of the last corporate/non-residents' income tax return filed prior to the date of accrual of the local tax (1 January) was less than EUR 1 million.

Corporate residence

A company is resident in Spain and subject to CIT on its worldwide income when:

- it has been incorporated in accordance with Spanish law
- its registered office is in Spain, and/or
- its 'effective' head office is in Spain.

Under Spanish law, a company's 'effective' head office is in Spain when its business activities are managed and controlled from Spain.

Companies established in a country or territory where no tax is levied or which is a tax haven are deemed to be tax resident in Spain in the following cases:

- When the company's main assets consist, directly or indirectly, of property located or rights fulfilled or exercised in Spain.
- When the company's core business activity is carried on in Spain.

This presumption may be refuted by the company if it can prove that it is effectively administered and managed in the country or territory in which it is established and that it was incorporated and operates for valid economic and business reasons and not merely for the purpose of managing securities or other assets.

Permanent establishment (PE)

Taxpayers operating in Spain through a PE are subject to non-residents' income tax.

Most Spanish tax conventions for the avoidance of double taxation contain a definition of PE in line with Organisation for Economic Co-operation and Development (OECD) criteria.

In the absence of a tax convention, internal law states that an individual or company is considered to operate through a PE when, by any legal means, one has continuous or habitual work facilities in Spain or a place to do any kind of work where one performs all or part of one's activity, or when one acts in Spain through an agent with powers to enter into an agreement in the name and on behalf of the non-resident individual or company, provided said powers are exercised on a regular basis.

In particular, management offices, branches, offices, factories, workshops, warehouses, shops or other establishments; mines, oil or gas wells, quarries, farms, forestry facilities, livestock farms, or any other site where natural resources are collected; and construction, installation, or assembly sites whose duration lasts more than six months will be considered PEs.

S

Other taxes

Value-added tax (VAT)

Spanish VAT is payable on supplies of goods and services carried out in Spanish VAT territory and on imports/intra-European Union (EU) acquisitions of goods and services. There are three rates for the different types of goods and services, which are as follows:

- Ordinary rate of 18%, applied on regular supplies of goods and services.

Spain

- Reduced rate of 8%, applied on basic necessities (e.g. food and agricultural products not included in the 'super reduced' 4% rate, dwellings, and other qualifying services).
- Super reduced rate of 4%, applied on basic necessities other than those classified under the reduced rate (e.g. bread, milk, books, medicine).

In the Canary Islands, a specific tax is applied in lieu of VAT, called the Canary Island General Indirect Tax (IGIC). The ordinary IGIC rate is 5%, and the other IGIC rates are 0%, 2%, 9%, and 13% (20% for tobacco). IGIC is similar to VAT but it has some significant differences, such as the exemption established for telecommunications services. Imports of tangible goods into the Canary Islands are subject to this tax.

In Ceuta and Melilla, sales tax is applied instead of VAT.

Customs duties

Many goods imported into Spain from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

Excise duties

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in Spain. Purely as examples, most road fuels carry a duty of about EUR 0.31 per litre, cigarettes carry a duty of about EUR 12.7 per thousand (plus 57% of the maximum retail sale price), tobacco of about EUR 8 per thousand (plus 41.5% of the maximum retail sale price), most wines of EUR 0 per litre, and spirits of about EUR 8.3 per litre of pure alcohol included.

Tax on non-resident companies owning real estate in Spain

Non-resident companies which own real estate or hold real property rights in Spain are subject to a special levy accrued on 31 December and declared and paid in January of the following year in the place and manner established by law. The tax is equal to 3% of the assessed value of the real estate. This special levy is not applicable to companies resident in a country which has signed a convention for the avoidance of double taxation with Spain, including an exchange-of-information provision, if the ultimate shareholders of such companies are individuals resident in Spain or individuals that may benefit from the application of a convention for the avoidance of double taxation.

In addition, some other exceptions are established for this levy.

Transfer tax

A transfer tax of 6% to 10%, depending upon the region, is generally levied on *inter vivos* transfers, including real estate transfers and real estate leases that are exempt from VAT.

Second and ulterior transfers of buildings are exempt from VAT and thus, they are in principle, subject to transfer tax.

Residential leases are exempt from VAT and therefore subject to transfer tax.

Transfers of quoted or unquoted (listed or unlisted) securities are, in principle, exempt from both transfer tax and VAT, except in the following cases:

- Transfers of securities of a company whose real estate assets in Spain represent more than 50% of its total assets or whose assets include securities in another company

whose real estate assets in Spain represent at least 50% of its total assets are subject to and not exempt from transfer tax if the acquirer gains control of the real estate company as a result of the transfer.

- Transfers of securities received in exchange for real estate contributions carried out on the incorporation of a company or on the execution of a subsequent capital increase are also subject to and not exempt from transfer tax provided that not more than three years have elapsed between the date on which the contribution was made and the date on which the securities are transferred.

From 12 May 2012, these exceptions will not apply to transfers of securities received as a result of the incorporation by banks of asset management companies and to transfers of securities of banks affected by the integration plans regulated by Royal Decree-Law 9/2009, which will therefore be exempt from transfer tax. In addition, acquisitions of assets by new businesses in the Canary Islands are exempt from transfer tax, subject to compliance with certain requirements.

Restructuring transactions are exempt from transfer tax. For these purposes, mergers, spin-offs, exchanges of shares, and certain in-kind contributions are considered to be restructuring transactions.

Stamp duty

A stamp duty is mostly levied on notarial instruments and records documenting transactions which have an economic value and need to be registered in public registries (e.g. company, land, and industrial property registries). Stamp duty is incompatible with transfer tax and capital duty, but compatible with VAT. The general rate is between 0.75% and 1.2% depending on the region of Spain and the taxable event.

Stamp duty is also levied on certain commercial documents (e.g. bills of exchange, promissory notes), court, and administrative documents.

Capital duty

Incorporations of companies, capital increases, contributions by shareholders, and the transfer to Spain of the place of effective management or the registered office of a company where neither one nor the other were previously located in a member state of the European Union are exempt from capital duty.

Restructuring transactions are not subject to capital duty. For these purposes, mergers, spin-offs, exchanges of shares, and certain in-kind contributions are considered to be restructuring transactions.

The transfer of the place of effective management or the registered office between EU member states is not subject to capital duty. 1% capital duty is levied on capital reductions and company dissolution, to be paid by the shareholders.

Capital duty is incompatible with transfer tax and stamp duty in certain cases, but it is compatible with VAT.

Other local taxes

In addition to the taxes stated above, the following other local taxes may be charged on companies:

- Real estate tax, levied annually by local authorities on the ownership of real estate.

Spain

- Local tax levied on the increase in the value of urban land, chargeable when urban real estate is sold.
- Motor vehicle tax, charged on the ownership of vehicles.
- Tax on constructions, installations, and building works, charged on the cost of certain works which require town planning licences.
- Waste collection fees.

Branch income

Income obtained by a branch in Spain of a non-resident company is taxed at the standard CIT rate of 30% and, in most cases, the regulations established by tax law for resident companies are applicable.

Payments made by a branch to its head office or a PE of its head office for royalties, interest, commissions, or technical assistance fees are not tax deductible. Management and general administrative expenses incurred by the foreign head office that can be allocated to the branch are tax deductible if the payments for these expenses are made following a criteria of continuity and rationality and provided that certain documentary requirements and other formalities are fulfilled.

Under Spanish law, income obtained by a branch that is repatriated to its head office is taxed at source at the general withholding tax (WHT) rate of 21% (applicable rate from 1 January 2011 to 31 December 2013). This tax is not chargeable in the case of a PE of a company resident in the European Union (unless the company is resident in a tax haven). Most tax treaties signed by Spain do not establish any provisions on this matter, and, in such cases, no tax is chargeable on income repatriated by branches. Some tax treaties, such as the treaties with Canada, Indonesia, the United States (US), expressly establish a tax on income repatriated by branches. For example, US head offices are taxed at a 10% rate on the repatriated profits of a Spanish branch under the US/Spanish tax treaty.

Income determination

The general rule for determining income for CIT purposes is that accounting rules must be followed unless tax law establishes otherwise. In order to maintain this consistency, CIT/PE non-residents' income tax returns include pages in which the company's accounting/commercial balance sheet and profit and loss account figures must be entered.

In Spain, the tax authorities are authorised to modify accounting results exclusively for the purpose of determining tax results if they observe that a company's accounting results have not been calculated in accordance with Spanish Generally Accepted Accounting Principles (GAAP).

Inventory valuation

Inventory is valued at acquisition price or production cost under the average and first in first out (FIFO) valuation methods (the replacement and base stock valuation methods may only be used in exceptional cases). Again, since there are no specific tax rules for determining taxable income, accounting rules are also applicable for calculating valuation and obsolescence provisions for inventory.

Capital gains

Capital gains are taxable in the tax year in which they arise. They are treated as normal income and taxed at the standard CIT rate of 30% (in the case of gains from real estate after taking into consideration an increase in the cost base for tax indexation purposes). *Please see the Tax credits and incentives section for a description of a tax credit for reinvestment of capital gains.*

Dividend income

The amount of dividends included in the calculation of taxable income must be the gross amount.

Upon meeting certain requirements, companies may be eligible for a tax credit for dividends equal to the tax rate applied by the company on the dividends received. This tax credit is generally allowed for the total dividends received from taxable domestic companies when the interest of the company receiving the dividend in the other company is 5% or more and such interest has been held for at least one year. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.

This tax regime is to some extent the same as a tax exemption regime. When an interest in a company is less than 5% or is held for less than one year, the tax credit is 30% of half of the amount of the dividends received.

In addition, taxation on capital gains arising from the sale of shares in domestic companies by a company with at least a 5% interest in the subsidiary held for at least one year prior to the sale can be reduced by means of a tax credit at the tax rate applicable on the undistributed part of the subsidiary's profits generated during the company's holding period. The reason for this tax relief is that this capital gain is understood to be an underlying dividend.

Internal tax credits for the avoidance of double taxation may be carried forward for up to seven years.

Stock dividends

CIT is not levied on bonus shares (i.e. shares partially or totally given to shareholders in a capital increase charged against distributable reserves), although they must be taken into account when calculating the average cost of shares held for the levying of tax when the shares are sold.

Interest income

Interest income is treated as normal income and taxed at the standard CIT rate of 30%.

Other significant items

The following items, amongst others, are excluded or deferred from taxable income:

- Distributed dividends corresponding to profits obtained by companies in tax years in which the flow-through tax regime (internal and international) has been applied.
- Assets written up in accordance with revaluation laws and tax-protected restructuring transactions involving accounting capital gains.

Foreign income

Resident companies are taxed on their worldwide income. For foreign-source income, total or partial tax relief in the form of tax credits or exemptions is given if tax is

Spain

levied on the income in both Spain and the foreign country where the income has been generated.

This tax relief may be available for the following:

- Economic double taxation, which is when the same income is taxed in the hands of two different taxpayers. For example, another government taxes a foreign company on the income earned in that country and a Spanish resident shareholder is taxed on the dividends that it receives from the foreign company or the capital gains from transfers of its shares.
- Juridical double taxation, which is when the same income is taxed in two countries in the hands of the same taxpayer. For example, the income is taxed (via a WHT) in the country where the income is generated and again in the other country where the recipient is resident.

The main characteristics of double tax relief are discussed below.

Dividends or profit-sharing income received by a Spanish company from a foreign company are tax exempt, subject to compliance with the following requirements:

- The Spanish company has at least a 5% interest in the foreign company during the entire tax year prior to the tax year in which the dividend is paid. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.
- The foreign company is subject to a similar tax to Spanish CIT and is not resident in a tax haven. The foreign tax is deemed to be similar to Spanish CIT if the foreign company is resident in a country with which Spain has signed a tax treaty containing an exchange-of-information provision.
- The income out of which the dividend is paid is generated from the business activities of the foreign company carried out abroad stipulated in CIT law.

Capital gains arising from the sale of shares in foreign companies also qualify for a tax exemption provided that the requirements stated above are complied with during the holding period and the acquiring company is not resident in a tax haven. Tax exemption is limited in certain cases.

As an alternative to this 'tax exemption' regime and applicable to dividend distributions only, a tax credit based on imputation is established. This tax credit allows the crediting of the foreign tax paid abroad on the income from which the dividends are paid and the foreign WHT paid on the profit distribution, up to the limit of the tax that would have been paid on the gross amount in Spain. The only requirement for the application of this 'tax imputation' regime is that the Spanish company has at least a 5% interest in the foreign company during the 12 months prior to the date on which the dividend is due and payable. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. This tax relief may be carried forward for up to ten years.

Spanish international legislation provides for CIT relief on 'juridical' double taxation by applying the 'tax imputation' regime. Under this regime, gross foreign income (including foreign WHT paid) is included for Spanish tax calculation purposes, and a tax credit for the foreign WHT paid is applicable up to the amount of the CIT that the company would have paid if such gross income had been obtained in Spain. The tax credit can be carried forward for up to ten years, but the rate will be the rate applicable at the moment when the tax credit is applied.

Under Spanish tax treaties and implemented EU tax directives, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties which allows for the deduction of not only the tax actually paid but a higher amount of tax.

Deductions

Depreciation, amortisation, and depletion

All assets, except land, are depreciable for tax purposes. Guideline tables of tax depreciation rates are established which state maximum per annum rates and maximum years of useful life for each asset type, classified by business sector. Please see the table below as an example of the maximum per annum rates and maximum years of useful life of some assets that are typically depreciated:

Asset	Maximum per annum depreciation rate (%)	Maximum useful life (years)
Industrial buildings and warehouses	3	68
Administrative and commercial buildings	2	100
Passenger cars	16	14
Furniture and office equipment (excluded computers)	10	20
Computers	25	8
Software	33	6
Tools	30	8

The straight-line depreciation method is normally used, calculated over the asset's useful life and applied on the asset's cost or written-up value (if such a write-up is acceptable for tax purposes). Off-book adjustments must be included in tax assessments if accounting depreciation exceeds tax depreciation.

Qualifying assets with a useful life of more than one year can also be depreciated using one of the following declining-balance methods:

- By applying a constant percentage on the carrying amount of the asset multiplied by 1.5, 2, or 2.5 depending on the useful life of the asset (below five years, between five and eight years, and over eight years, respectively).
- By using the sum-of-digits method, whereby the asset's acquisition price is multiplied by the ratio between the number of the years in which it is depreciated in a descending order (e.g. in a three-year useful life, three for the first year, two for the second, and one for the third) and the total numbers for the years of the asset's useful life ($1 + 2 + 3 = 6$ for 3 years of useful life).

Buildings, furniture, and fittings cannot be depreciated using the declining-balance methods.

Special depreciation plans for new assets can be approved by the tax authorities upon request, when they are subject to wear-and-tear at a higher rate than the normal rate applicable.

Spain

Recorded depreciation is fully tax deductible, even when it is higher than the depreciation which would arise by applying any of the tax depreciation methods stated above, if the taxpayer is able to justify that the depreciation is real.

Mining assets and assets used for R&D, amongst others, but not including buildings, can be freely depreciated/amortised for tax purposes.

Free depreciation

Unrestricted depreciation of investments in new tangible fixed assets and real estate used in business activities was regulated for investments made by taxpayers in tax periods commencing in 2011, 2012, 2013, 2014, and 2015. This tax relief was also available for tax periods commencing in 2009 and 2010, but it could only be availed of if the requirement that the taxpayer's staff levels were maintained or increased was met.

Due to the tax reform carried out by Royal Decree-Law 12/2012, this tax incentive has been repealed effective 31 March 2012.

A transitional regime is provided for investments made prior to that date. Under this transitional regime, unrestricted depreciation tax relief may be applied to these investments although with certain limits during the tax periods commencing in 2012 and 2013.

Amortisation of intangibles

A 50% reduction may be applied for income obtained from licensing certain intangible assets, subject to compliance with certain requirements (the effective tax on this income would be 15%).

Goodwill cannot be amortised under Spanish GAAP. However, it can be amortised for tax purposes at a maximum annual rate of 5% (1% for tax periods commencing in 2012 and 2013), subject to compliance with certain requirements (e.g. it is acquired for consideration from an unrelated party in accordance with the provisions of Section 42 of the Spanish Commercial Code and an obligatory non-distributable reserve is established).

Intangible assets with a specific useful life may be amortised and such amortisation is tax deductible even if it is not recorded in the company's profit and loss account, when the company complies with the following requirements:

- The assets are acquired for consideration.
- The company does not form part of a group as defined in Section 42 of the Spanish Commercial Code. The tax deduction of the amortisation is up to 10% per annum, unless a lower useful life can be evidenced.

If the two requirements stated above are complied with, amortisation on intangible assets which do not have a specific useful life is also tax deductible up to the 10% annual limit, regardless of whether they are amortised under Spanish GAAP or not.

Depletion

Depletion is allowed for mining companies and companies involved in exploring/investigating natural oil resources as established in applicable legislation.

Financial goodwill

To promote the internationalisation of Spanish companies, in 2002 a rule was introduced that financial goodwill arising from the acquisition of an interest in a non-resident company (financial goodwill being, in this case, the excess price paid for the acquisition of the business over its net book value at the date of the acquisition that cannot be allocated to the non-resident company's assets in Spain) could be amortised up to a maximum of 5% per year.

To apply this tax relief, the following requirements had to be met:

- A minimum 5% interest had to be held in the non-resident company.
- The non-resident company had to be subject to a similar tax to Spanish CIT.
- The income obtained by the non-resident company had to be generated from business activities carried out abroad in accordance with Spanish CIT law.

Decisions of the European Commission dated 28 October 2009 (regarding interest in non-resident EU companies) and 12 January 2011 (regarding interest in non-resident non-EU companies) considered that this tax relief was unlawful state aid.

According to the Commission's decisions, only acquisitions of interests in non-resident companies carried out before 21 December 2007 (or before 21 May 2011 for majority interests in non-resident companies established in countries with explicit obstacles to cross-border business combination transactions) can continue applying this tax relief until the financial goodwill is wholly amortised.

For companies that, in accordance with the above, can continue applying financial goodwill tax relief, the maximum 5% annual amortisation is temporally reduced to 1% for tax periods commencing in 2011, 2012, and 2013.

Start-up expenses

According to Spanish GAAP, start-up expenses are considered to be expenses in the financial year in which they are incurred. As no special rule is provided for tax purposes, they are deductible for CIT purposes in the year in which they are incurred.

Financial expenses

With effect for tax periods commencing on or after 1 January 2012, Royal Decree-Law 12/2012 has introduced the following rules for the deduction of financial expenses.

General limits on the deduction of financial expenses

The amount of net deductible financial expenses in the tax period is generally reduced to 30% of operating profit (similar to EBITDA, applying certain adjustments) for the year, financial expenses of less than EUR 1 million being in any event deductible. The limit will not apply to companies that do not form part of a group within the meaning of Article 42 of the Spanish Code of Commerce, with exceptions.

This limit will not be applicable to advance CIT payments for April 2012.

For such purposes, net financial expenses will be considered to be the excess of financial expenses (excluding the non-deductible expenses mentioned below) with respect to income deriving from the assignment of capital to third parties accrued in the tax period.

For companies taxed under the tax consolidation regime, the deduction limit will refer to the tax group. Nonetheless, the company's net financial expenses available for

Spain

deduction at the time of its inclusion in the group will be deducted, up to the limit of 30% of its operating profit. When a company stops forming part of the group or the group is extinguished and there are net financial expenses available for deduction, the rule will be similar to that for assigning tax losses to the companies that formed part of the group.

Specific limit on the deduction of financial expenses on acquisitions of intra-group ownership interests

Over the past few years, a large number of tax inspections have adjusted the tax effects of acquisitions of shares from group companies with intra-group debt. Many of these operations were acquisitions of shares in non-resident companies, so that the dividends and capital gains arising from the acquisition of the shares were covered by the exemption for the avoidance of double taxation established in Article 21 of the Spanish CIT Act. In addition, the lenders of these operations were usually located in low tax territories.

In the absence of specific limitation rules on financial expenses tax deductibility in previous years, the reaction of the tax authorities to these kinds of operations has been to apply general anti-abuse rules.

With this scenario, Royal Decree-Law 12/2012 has introduced a limitation rule for the deduction of intra-group financial expenses that is applicable for tax periods commencing on or after 1 January 2012. In accordance with this rule, financial expenses arising from debts with group companies generated from acquisitions of interests in other group companies or contributions to capital or equity of other group companies will not be deductible unless there is evidence that there are valid economic reasons for such expenses.

Bad debt provisions

Provisions for covering the risk derived from possible bad debts are tax deductible when, at the time the tax accrues, any of the following circumstances exists:

- Six months have elapsed since the obligation became due.
- The debtor is declared bankrupt.
- The debtor is prosecuted for an offence of embezzlement.
- The obligations have been claimed judicially or are the subject of a legal dispute or arbitration proceedings, and collection depends on the solution thereof.

Provisions for the credits listed below are not tax deductible unless they are the subject of arbitration or legal proceedings concerning their existence or the amount thereof:

- Credits owed or guaranteed by Public Law entities.
- Credits guaranteed by credit entities or mutual guarantee societies.
- Credits guaranteed by pledges (real property rights), ownership reservation agreements, or liens, except in the event of loss or degradation of the guarantee.
- Credits guaranteed by a credit or guarantee insurance contract.
- Credits that have been expressly extended or renewed.

Provisions to cover the risk derived from possible bad debts of persons or companies related to the creditor will not be deductible, except in the case of legally declared insolvency, and neither will provisions made on the basis of overall estimates of the risk of bad debts of clients and debtors.

Special rules apply to bank entities.

Charitable donations

Donations are considered to be non-deductible expenses for CIT purposes.

This notwithstanding, a tax credit may be availed for donations to non-profit organisations that comply with certain requirements. The tax credit in this case is 35% of the donation.

In addition, the tax credit is not limited to 35% of the donating company's gross tax payable less the tax credits for internal and international double taxation and tax relief for income obtained in Ceuta and Melilla, for export activities, and for local public services that is applicable for other tax credits (25% in 2012 and 2013).

The tax credit base cannot exceed 10% of the taxable income of the financial year. Any excess may be carried forward for a period of ten years.

For donations to listed priority sponsorship activities, the tax credit may be increased by 5% (up to 40%) and the tax credit base 10% limit can be increased to 15%.

Fines and penalties

Penalties imposed due to the failure to pay taxes and surcharges for late filing/payment or for other tax infringements are not tax deductible.

Late-payment interest recorded as an expense is, in principle, tax deductible.

Taxes

Taxes, other than CIT, that are recorded as an expense due to their nature (e.g. business and professional activities tax, but not withholdings) are tax deductible expenses. In some cases, indirect taxes such as non-deductible VAT or transfer tax could be added to the value of assets for depreciation purposes.

Net operating losses

Tax losses may be carried forward for 18 years, but they cannot be carried back. There are no tax loss 'baskets' (operating/capital) under Spanish law.

The amount of tax-loss carryforwards that may be offset in tax periods beginning in 2011, 2012, and 2013 is limited for large companies as follows:

- For companies whose turnover in the 12 months preceding the beginning of the tax period was between EUR 20 million and EUR 60 million, the amount of tax-loss carryforwards which may be offset is limited to 75% of their previous taxable income.
- For companies whose turnover in the 12 months preceding the beginning of the tax period was EUR 60 million or more, the amount of tax-loss carryforwards which may be offset is limited to 50% of their previous taxable income.

Complex rules may limit the use of tax losses of a company dissolved as a result of a restructuring operation and, in certain circumstances, when it has a change of shareholders.

Payments to foreign affiliates

Supplies of goods or services by a company not established in Spain to a Spanish group company must be valued at arm's length. If recorded expenses for such goods/services exceed arm's-length price, the tax deductibility of the excess amounts could be challenged in a tax inspection. The tax deductibility of expense charges received

Spain

from tax havens is fully disallowed unless proper evidence of an actual service valued at arm's length can be provided.

Management services received from outside Spain and recorded as distributions of costs of a group centre do not have to be documented in a written agreement entered into before the commencement of the services to ensure the tax deductibility of the expenses (as previously was the case), although it would be recommendable to have such an agreement. For any other types of services, an agreement recorded before a notary public is not obligatory under Spanish law, but it is advisable.

As regards the taxation in Spain of the foreign company which supplies the services, the WHT rate to be applied on the gross income obtained by the company is 24.75%. Dividends, interest, and capital gains generated as a result of a transfer of assets are taxed at a 21% WHT rate. If management services, technical assistance, or the performance of studies are solely used outside Spain and are linked to business carried on abroad, then no WHT is applicable. In addition, under most tax treaties signed by Spain, 'business profits' obtained in Spain by non-residents are exempt from WHT. However, 'business profits' is a miscellaneous residual category. For instance, if the amount obtained qualifies as a royalty payment, WHT is applicable at the reduced tax treaty rates if the foreign company can obtain a document from the tax authorities of its country of residence certifying its tax residence. If no tax treaty applies, then the above 24.75% WHT rate is applicable (*see the Withholding taxes section for more information*).

Group taxation

Tax groupings for CIT purposes

Under Spanish tax law, companies can form a group and apply a special tax consolidation regime for CIT purposes. Companies forming a tax group must formally pass a resolution agreeing to do so before the beginning of the first tax year in which the tax consolidation regime will be applied.

To apply the tax consolidation regime, the controlling company of the tax group must hold a 75% or higher interest, either directly or indirectly, in the companies forming the tax group at the beginning of the first tax year in which the tax consolidation regime is applied, and this interest must be maintained during the year unless the dependent company is dissolved. The interest requirement is 70% for companies listed on a stock exchange.

The main characteristics of the tax consolidation regime are as follows:

- The taxable income of the tax group is the sum of the taxable incomes of each of the companies forming the group.
- The tax losses of any of the companies forming the group can be offset against the tax profits of any of the other group companies.
- For the calculation of consolidated taxable income, the tax profits (losses) generated from transactions carried out between group companies are eliminated and only included in consolidated taxable income when:
 - they are carried out with third parties
 - a group company participating in the internal operation ceases to form part of the tax group, and
 - the tax consolidation regime is no longer applied by the group for whatever reason.

- Specific limitations apply regarding the offsetting of tax losses or the application of tax credits generated by the group companies before they formed part of the tax group. Such tax losses/credits may be offset (applied) by the tax group up to the limit of the tax profits/tax liability of the company which generated the losses/credits.
- No WHT is chargeable on payments made between companies of the tax group (e.g. interest, dividends).

Tax groupings for VAT purposes

Groups of companies may also choose to be taxed under a special tax consolidation regime for VAT purposes. This special regime is optional, but once it has been opted for, it must be applied for a minimum of three years which is extendible unless it is expressly waived by the companies.

The VAT consolidation regime may only be applied by groups resident in Spanish VAT territory which do not form part of any other VAT grouping.

The controlling company of the group must be a legal entity or PE which is not dependent on any other entity established in Spanish VAT territory, and it must hold at least a 50% interest in the subsidiary companies of the group for the entire calendar year.

With the application of the VAT consolidation regime, there are two different options for taxation:

- The aggregation system, where the balances of the VAT returns of the individual companies of the group are totalled. The right to a tax deduction is exercised by the individual companies.
- The consolidation system, where an individual company can opt to reduce VAT taxable income for inter-company operations which is limited to the 'external' cost.

Transfer pricing

All related-party transactions must be valued at market price, following the arm's-length standard (e.g. the value which in normal market conditions would have been established between unrelated parties).

For this purposes, related persons or entities shall be:

- A company and its shareholders or members.
- A company and its board members or directors.
- A company and the spouses of or persons related to its shareholders or members, board members, or directors, either in a direct line or collaterally, by consanguinity or affinity up to the third degree.
- Two companies of a group.
- A company and the shareholders or members of another company, when both companies form part of a group.
- A company and the board members or directors of another company, when both companies form part of a group.
- A company and the spouses of or persons related to the shareholders or members of another company, either in a direct line or collaterally, by consanguinity or affinity up to the third degree, when both companies form part of a group.
- A company and another company in which the former company has at least a 25% holding, held indirectly, in its share capital or shareholders' equity.

Spain

- Two companies in which the same shareholders or members or their spouses, or persons related to them either in a direct line or collaterally, by consanguinity or affinity up to the third degree, have at least a 25% holding, whether directly or indirectly, in their share capital or shareholders' equity.
- A company resident in Spanish territory and its PEs abroad.
- A company not resident in Spanish territory and its PEs in Spanish territory.
- Two companies forming part of a group taxed under the tax regime for groups of cooperative companies.

For cases where association exists as a result of a shareholder/member-company relationship, the shareholding must be 5% or more, or 1% if the shares are quoted on a regulated stock exchange. The reference to directors shall include *de facto* and *de jure* directors.

The determination of the market value by taxpayers must be done through the application of one of the following transfer pricing methodologies, in order of preference as follows: Comparable Uncontrolled Price (CUP) method, Cost Plus (CP) method, or Resale Price Method (RPM), usually referred to as traditional transaction methods.

If the application of any of the above methods is not possible, the Profit Split Method (PSM) or Transactional Net Margin Method (TNMM) could be applied, usually referred to as transactional profit methods.

Documentation is also a requirement, with taxpayers required to produce group-level and taxpayer-specific documentation for each tax year. Related persons or entities must keep such documentation available for the tax authorities as from the end of the voluntary return or assessment period in question. Exceptionally, no documentation requirements will be applied in the following cases, among others:

- With some exceptions, transactions carried out within a tax period with one related person or entity will not be subject to documentation requirements when the sum of the considerations of all these transactions does not exceed EUR 250,000.
- Transactions carried out within a group of companies taxed under the Spanish special tax consolidation regime.
- Transactions carried out by economic interest groups and temporary business associations.
- Transactions involving the purchase or sale of publicly traded shares.

Documentation is always required for transactions with entities, whether related parties or otherwise, which are resident in tax havens.

Please note that specific penalties may be imposed in the event of the absence of documentation or where data are omitted, inaccurate, or false.

Thin capitalisation

Thin capitalisation rules have been repealed effective for tax periods starting on or after 1 January 2012.

Controlled foreign companies (CFCs)

Spanish CFC rules seek to avoid the effects produced when Spanish tax resident entities or individuals place their capital in low-taxed foreign entities to avoid including passive income generated by such capital in their taxable bases.

Under this regime, Spanish tax resident entities are subject to Spanish CIT on certain kinds of positive passive income obtained by entities which are not resident in the European Union for tax purposes in which they own, individually or together with tax related entities or persons, more than 50% of the share capital, equity, profits, or voting rights, provided that the CIT due by the non-resident entity is below 75% of the tax that would have been due in Spain.

The types of passive income to which CFC rules apply are as follows: (i) income from immovable property not used for business activities; (ii) income derived from equity in other entities or from capital assigned to third parties (interest and dividends); (iii) transfer of the above mentioned immovable property and financial assets; and (iv) income arising from credit, financial, insurance, and service activities carried out directly or indirectly with related Spanish tax resident entities in which a tax deductible expense is generated.

Passive income mentioned in numbers (i) to (iii) above obtained by the non-resident entity will not be considered taxable income of the Spanish tax resident entity when it arises from entities in which the latter holds a direct or indirect interest of over 5%, provided that the non-resident entity controls and manages the interest using the relevant human and material resources and provided at least 85% of the income obtained from such participated entities comes from business activities.

Moreover, the passive income mentioned in numbers (i) to (iii) above will not be included in the Spanish entity's taxable base when it amounts in total to less than 15% of the total profits obtained by the CFC or less than 4% of its total turnover.

Tax credits and incentives

Foreign tax credit

See *Foreign income in the Income determination section for a description of double tax relief.*

CIT relief

No specific tax relief is established in Spanish law for foreign investors. Relief may be availed of by Spanish and foreign-owned companies alike. The tax relief available under CIT law in Spain is as follows.

Most of the tax credits that have been established to promote certain investments have been or must be reduced and eliminated. However, the largest tax credits are maintained (tax credit to prevent internal and international double taxation, tax credit for the reinvestment of extraordinary profits, and tax credit for R&D).

Tax relief for business activity/place of business activity

- 50% tax credit on CIT levied on income obtained in Ceuta and Melilla through companies established and carrying on activities during a full business cycle in these enclaves.
- 99% tax credit on the CIT levied on income obtained from the supply of local public services, except when the state company in question is owned, partially or wholly, by a quoted/non-quoted company or individual.
- 25% tax credit on the CIT levied on income obtained from exports of films, books, and similar cultural items if profits are reinvested in the acquisition of assets used for such activities. This tax credit will be gradually reduced over the coming years and eliminated in 2014.

Spain

R&D credits

A 25% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average R&D expenses incurred by the company during the previous two years, the tax credit is 42% for the excess amount.

An additional tax credit of 17% can be availed of for staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.

An 8% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets which are exclusively assigned to R&D activities.

Technological innovation credits

A 12% tax credit can be availed of for technological innovation activities.

Tax credit for environmental investments

The tax credit for environmental investments in installations is 8%

The tax credit for environmental investments in vehicles and the tax credit for environmental investments in assets to promote the exploitation of renewable energies have been eliminated.

Reinvestment of extraordinary income

A 12% tax credit can be availed of for sales of assets which are used for the company's business activities when the amount obtained from the sale is reinvested in similar types of assets during a four-year period (as from one year prior to the sale up to three years after the sale). This tax credit therefore reduces the effective tax levied on sales of certain assets to 18%.

In the case of a sale of company shares, to be eligible for this tax credit, the interest in the company must be a minimum of 5% and must have been held for more than one year prior to the sale.

The asset in which the reinvestment is made must be maintained for five years (three in the case of moveable assets) unless its useful life is shorter.

Other CIT relief

The tax credit for film productions will be eliminated for tax periods commencing on or after 1 January 2013.

The tax credit for investments in heritage assets (4% in 2012 and 2% in 2013) and book publishing (2% in 2012 and 1% in 2013) will be eliminated for tax periods commencing on or after 1 January 2014.

A tax credit of 1% to 2% may be obtained on expenses incurred in, or related to, financing ongoing staff education programmes. This tax credit can also be availed of for expenses incurred by companies to familiarise staff in the use of new technologies. These expenses are not a benefit in kind for the staff. The tax credit related to education programmes was eliminated in 2011, but the tax credit related to expenses incurred to familiarise staff in the use of new technologies will not be eliminated until 2013.

A tax credit can be applied for increases in the number of disabled workers contracted per year on a permanent and full-time basis (EUR 6,000 per worker contracted). This increase is calculated by taking the average number of company workers meeting these

requirements in the tax year in question and comparing it with the company's average number of staff in the previous tax year.

Limits on the amount of tax credit applied

The combined sum of all investment tax credits may not exceed 35% of the company's gross tax payable less any tax credits for internal and international double taxation and tax relief for income obtained in Ceuta and Melilla, for export activities, and for local public services. This percentage is reduced to 25% for tax periods commencing in 2012 and 2013.

When R&D and technological innovation tax credits for expenses and investments in the year exceed 10% of the company's gross tax payable, less tax credits and relief mentioned above, the limit will be 50% (60% for tax periods commencing on or after 1 January 2014).

For tax periods commencing in 2012 and 2013, these limits will also apply for the tax credit for reinvestments of extraordinary profits.

Time limits for the application of tax credits

Tax credits that are not applied in the tax period owing to insufficient tax payable may be applied in tax periods ending in the 15 years immediately thereafter (ten years for the tax periods commencing before 1 January 2012). However, R&D and technological innovation tax credits may be applied in tax periods ending in the 18 years immediately thereafter (15 years for tax periods commencing before 1 January 2012).

Special tax regimes

Special tax regimes are applicable, among others, in the following cases:

Spanish and European Economic Interest Groupings and Temporary Consortia of Entities

- Spanish Economic Interest Groupings (SEIGs) that meet certain requirements will not be subject to Spanish CIT on the part of the taxable income which corresponds to members resident in Spain for tax purposes. Such part of the positive or negative taxable income shall be deemed to be the profits/losses of the SEIG members. The proportional part of tax credits and payments in advance will also be assigned to the Spanish tax resident members of the SEIG where they are subject to CIT or PIT. Dividends distributed to SEIG members that have been subject to imputation will not be taxed under CIT or PIT on distributions. Dividends distributed to Spanish non-resident SEIG members will be taxed in accordance with the Spanish Non-Resident Income Tax Act and Conventions for the Avoidance of Double Taxation.
- European Economic Interest Groupings (EEIGs) will be taxed under the above-mentioned regime with the following exception: EEIG will not be subject to Spanish CIT.

If the EEIG is not resident in Spain for tax purposes, Spanish tax resident members will include the corresponding part of the profits or losses determined for the grouping, corrected by applying the rules for determining taxable income for CIT or PIT purposes, as applicable. When the activity carried out by the members through the grouping determines the existence of a PE abroad, the rules provided for in this Law or in the respective treaty for the avoidance of double international taxation will be applicable.

Spain

Non-Spanish tax resident members will only be subject to Spanish Non-Resident Income Tax when the activity they perform through the grouping determines the existence of a PE in Spanish territory.

Dividends distributed to non-Spanish tax resident members that have been subject to imputation will not be taxed in Spain on the distribution.

- Temporary Consortia of Entities (TCEs) are taxed under the SEIG regime. As an exception, members of a TCE that operates abroad may benefit from exemptions for income obtained abroad.

Restructuring transactions

For restructuring transactions, the special tax regime is a tax neutrality regime implemented under EU Directive 90/434. As a general rule, under this regime, asset transfers carried out through such transactions do not have any tax implications (either from a direct, indirect, or other Spanish tax perspective) for the parties involved (transferor, beneficiary, and shareholder), until a subsequent transfer takes place which is not protected by this regime.

The transactions which can be taxed under this regime are mergers, global transfers, spin-offs of business units/majority interests, splits, share-to-share transactions, contributions of business units, and contributions of assets (this last transaction is not fully tax-protected). Each of them must comply with a series of requirements for the application of the regime.

The tax credit position of a company dissolved as a result of a tax-protected restructuring transaction is 'acquired' in full by the beneficiary company in the case of universal succession.

The 'acquired' tax credits only include tax credits which are obtained in relation to assets transferred in transactions where the transferor is not dissolved or the succession is not a full succession for Spanish commercial purposes.

Regarding tax losses, the Spanish tax authorities hold the view that tax losses may not be transferred when the transferring company is not dissolved. When the transferring company is dissolved, the tax losses may be applied by the beneficiary company up to certain limits and subject to certain restrictions.

Financial goodwill arising in a merger transaction is amortised for tax purposes at a maximum annual rate of 5% at the level of the Spanish beneficiary company of the merger (1% for tax periods commencing in 2012 and 2013), if the seller of the shares giving rise to the 'merger' goodwill has been actually taxed for the equivalent capital gain in Spain or in any other EU country (excluding tax havens), and provided that certain requirements are met. Amortisation of financial goodwill does not have to be recorded in the profit and loss account for it to be tax deductible, although an annual amount must be charged to a non-distributable reserve (either from annual profits or from freely-distributable reserves), which must be at least the tax deductible amount.

This tax regime cannot be applied if the transaction is carried out for the purpose of tax fraud or evasion (anti-abuse clause). An additional anti-abuse clause in line with the clause established by the EU directive is established in Spanish law to ensure that the tax regime cannot be applied if the transaction is not carried out for valid economic reasons, such as the streamlining of activities or group restructuring to gain efficiency, but to obtain a tax benefit.

The tax authorities must be notified of the application of this tax regime.

Tax transparency

Tax transparency (under international CFC rules) is not applicable for companies resident in the European Union. *See CFCs in the Group taxation section for more information.*

Venture capital companies and funds

Venture capital companies (VCCs) and funds (VCFs) may benefit from the following tax regime if certain requirements are met:

- Dividends from target companies may benefit from a 100% tax credit for the avoidance of double taxation or tax exemption.
- Capital gains arising from the transfer of shares in target companies may be 99% exempted from CIT, provided that such shares have been held for a period between 2 and 15 years.
- Profit distributions to VCC and VCF shareholders may benefit from a 100% tax credit for the avoidance of double taxation if the shareholders are Spanish tax residents or have a PE in Spain. Income from profit distributions to non-Spanish tax resident shareholders without a PE in Spain is not subject to taxation in Spain unless it is obtained through a tax haven. The same regime applies to the transfer of shares in VCCs and VCFs.

Collective Investment Institutions (CIIs)

CIIs are subject to CIT at a reduced rate of 1%. They are not entitled to apply any tax credits. Dividends distributed by these institutions are subject to the general WHT regime. Shareholders are taxed on dividends received from the CII and on capital gains obtained for the transfer of the CII without being entitled to the application of a tax credit for the avoidance of double taxation.

Lease transactions

Financial leasing contracts with a purchase option that may be exercised at the end of the lease period may benefit from a special tax regime if they meet certain requirements. According to this regime, the lessee may deduct the following expenses from its taxable income:

- The part of the lease instalments corresponding to the financial charge (interest) paid to the lessor.
- The part of the lease instalments paid which corresponds to the recovery of the cost of the good. Tax deductibility for this amount may not exceed the result of applying twice the straight-line depreciation rate which corresponds to the good in question in accordance with the officially-approved depreciation tables.

Spanish holding companies of foreign companies (Entidad de Tenencia de Valores Extranjeros or ETVE) regime

Spanish resident companies whose corporate purpose includes the holding and management of foreign companies' shares are granted some tax benefits subject to compliance with certain requirements.

The tax authorities must be notified of the application of this tax regime.

Companies taxed under this tax regime are granted a tax exemption on dividends and capital gains when they have a 5% direct interest or, if their interest is less than 5%, when the acquisition value of their interest is at least EUR 6 million.

Spain

In addition, the distribution of profits by the holding company to non-resident companies or individual shareholders is not taxable in Spain (unless the profits are distributed to a tax haven). Resident company shareholders are now entitled to an internal tax credit on dividends under Spanish law.

Small and medium-sized companies

Small and medium-sized companies are eligible for tax relief such as accelerated depreciation/amortisation, or more favourable bad debt provision treatment. Accelerated depreciation/amortisation can be applied for assets acquired using amounts obtained from sales of trading assets. To be eligible for this relief, turnover in the previous tax year must not exceed EUR 10 million. In the case of a group, the turnover of all the companies must be considered for this purpose.

A reduced CIT rate of 25% is levied on the first EUR 300,000 of annual tax profits.

Special economic and tax regime of the Canary Islands

Due to the distance to and isolation of the Canary Islands, they have traditionally enjoyed a special economic and tax regime with specific economic and tax measures different to those established for the rest of Spain.

Regarding direct taxes, the Canary Island economic and tax regime establishes the following tax benefits for companies and businesses domiciled in the Canary Islands or with a PE in the Canary Islands:

- Up to 90% of annual undistributed accounting profits can be allocated to a special investment reserve and not taxed providing that they are invested within a four-year period (including the period during which the profits are obtained) in qualifying assets in the Canary Islands, or in certain public debt securities or shares in other companies operating in the Canary Islands which invest in qualifying assets.
- Most Spanish CIT relief is 80% higher for companies and businesses located in the Canary Islands.
- A 25% tax credit can be availed of for investments in new tangible fixed assets and, subject to compliance with certain requirements, second-hand assets.
- A tax credit of 50% of the CIT liability is granted for taxable income generated from the production of tangible goods while carrying on agricultural, farming, industrial, and fishing activities.
- A tax credit of 90% of the CIT liability is granted for profits of shipping companies generated from ships registered in the Canary Islands Special Ships and Shipping Companies Register. For sailors of such ships, a 50% tax exemption can be applied to PIT levied on their employment income and a 90% reduction to the part of their Social Security contributions paid by their employers.

Regarding indirect taxes, in addition to lower taxation through the Canary Island general indirect tax (IGIC at the general rate of 5%) compared to VAT and specific IGIC exemptions, the following should be noted:

- Companies domiciled in the Canary Islands which are CIT-payers and which are newly incorporated, start new activities or improve their existing activities may benefit from the following tax relief:
 - Exemption from IGIC on supplies and imports of capital goods if the company has a deduction percentage that is not 100%.
 - Shipping companies qualify for an exemption from transfer tax for any contracts related to ships registered in the Canary Islands Special Ships and Shipping Companies Register.

- Custom Free areas are available. Upon EU demand, there are restrictions on the application of certain tax relief (special investment reserve, tax credits for production, and new business indirect tax relief) for the following industrial sectors: shipbuilding, synthetic fibres, automobile, iron and steel, and coal.

Canary Islands Special Zone tax regime

In January 2000, a special Canary Island Special Zone tax regime was approved by the European Union. The main regulations of this regime, established by the Spanish government, are as follows:

- New companies may qualify for the application of this tax regime and, on the approval of the tax authorities, may be registered up to 31 December 2013 (applying the tax regime up to 31 December 2019). This may be extended by the European Union.
- To qualify for this tax regime, the company must:
 - covenant to make an investment in fixed assets of at least EUR 100,000 in Gran Canaria or Tenerife, or EUR 50,000 in Fuerteventura, Lanzarote, La Palma, El Hierro, or La Gomera, within the first two years of their business activity
 - covenant to create at least five new jobs in Gran Canaria or Tenerife, or three in the other islands
 - provide a description of the business activities to be carried out which support the company's solvency, viability, international competitiveness, and contribution to the economic and social development of the Canary Islands
 - establish its registered office and place of effective management in the Special Area
 - have at least one company director who resides in the Canary Islands, and
 - carry out one of the qualifying business activities.
- The territory where this tax regime can be applied includes all the Canary Islands, except for companies which intend to carry out industrial or commercial activities involving tangible goods, which must be located in specific controlled areas.
- Companies applying the tax regime may operate outside the Canary Islands through branches if separate accounting books are kept, but the tax regime will not be applicable to such branches' activities.
- Activities for which the tax regime can be applied include a wide range of industrial and commercial activities, most services and holdings. Credit and insurance entities are excluded, and no stock exchanges are allowed.
- Companies applying the tax regime are subject to CIT in Spain at a 4% rate for companies authorised from 1 January 2007 onwards and at a variable rate of between 1% and 5% for companies authorised before this date. The special 4% rate shall be levied on a maximum amount of the taxable income, which will depend on the number of jobs created and the type of activity carried out by the company. The general CIT regime establishes a 30% tax rate for Spanish companies. For small companies, the tax rate is 25% for the first EUR 300,000 of profits and 30% for remaining profits.
- Under this tax regime, companies can avail themselves of large tax exemptions for IGIC, transfer tax, and stamp duty, and large reductions and simplified regulations for local taxes.
- Interest and some other returns from moveable goods paid by companies under this tax regime are exempt from Spanish non-residents' income tax, except when paid to residents in tax havens.
- Benefits established in the EU Parent-Subsidiary Directive are extended to non-EU residents. These benefits are not applicable when the income is paid to residents in tax havens.

Spain

- A fee of EUR 732.51 is payable to be registered as a company which applies this tax regime, and an annual fee of EUR 1,098.76 is payable to continue to be registered as qualifying for the tax regime.

Finally, the Spanish Parliament has recently proposed some amendments to the law regulating the Canary Island Special Zone tax regime, including, among other tax benefits, a reduction in the special CIT rate for companies which apply the regime to 1% for the first tax base segment.

Withholding taxes

Ordinarily, WHT is the mechanism by which the Spanish tax authorities collect the final tax levied on non-residents. In the case of resident beneficiaries, however, it is simply an advance payment of a tax that is then normally self-assessed by the resident taxpayer in the final annual tax return.

The advance payment system of WHT for resident beneficiaries referred to above also applies if non-resident companies/individuals not established in Spain sell their title to Spanish real estate. In this case, the acquirer of the real estate must levy a 3% WHT on the selling price on account of the 21% tax chargeable to the seller on its capital gain. Other capital gains (for instance, from a sale by a non-resident of a substantial interest in a Spanish company where neither a tax treaty nor internal rules establish a tax exemption) are taxed in the hands of the non-resident transferor, but the mechanics of levying the tax are not those of a WHT. In this case, the non-resident's tax is paid directly, through its representative or by the depositor or manager of the assets in question, if any.

The following table states the general WHT rates on income obtained by resident/non-resident companies. The most significant peculiarities regarding the rates for each type of income are stated in footnotes to the table.

Withholding rates

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations and individuals	21 (1)	21 (2a)	21 (2b)
Non-resident corporations and individuals:			
Non-treaty	21 (3)	21 (4)	24.75 (5)

Notes

The general rates in the table above are for guidance only and should not be treated as tax advice.

The rates above are for income obtained by non-residents which is not related to any PEs they may have in Spain.

(*) Aside from these tax treaties, the following tax treaties are not yet in force as they are currently being negotiated or are not yet approved or published: Azerbaijan, Belarus, Dominican Republic, Kuwait, Namibia, Nigeria, Oman, Peru, Senegal, Singapore, and Syria.

1. If a corporate taxpayer, as a shareholder, is entitled to full tax relief on the dividend received, no WHT is levied. As a general rule, corporate shareholders with at least a 5% interest held for at least one year are granted full tax relief.
2.
 - a. The 21% WHT rate does not apply if, amongst other cases, the recipient is a resident bank or savings or other financial institution subject to CIT, provided that this income is not portfolio income. In addition, no WHT is levied on interest arising between companies taxed under the tax consolidation regime.
 - b. A 21% WHT rate is levied on income generated under royalty and technical assistance agreements, from leases or from the granting of rights when ownership is not transferred. A 24.75% rate is levied on fees received by a company for the transfer of rights to an image or consent or authorisation to its use.
3. Implementation of the EU Parent-Subsidiary Directive in Spanish law gives EU shareholders a WHT exemption on dividends from Spanish companies, subject to compliance with certain requirements. Luxembourg recipients of income which are companies under paragraph 1 of the protocol to the Tax Treaty with Spain (holding companies) are not allowed this exemption.
4. The EU Interest and Royalties Directive WHT exemption for interest obtained by EU lenders is applicable when appropriate.
5. Taxable income from supplies of services, technical assistance, or assembly/installation work under engineering contracts provided or carried out by non-resident companies with no PE in Spain does not follow the general rule for gross income. In such cases, total income can be reduced by related staff costs, certain supplies (water, electricity, telephone) and materials used for the services/work, provided that, in the case of staff costs, evidence can be furnished that they were actually taxed in Spain. According to the EU Interest and Royalties Directive, royalties paid to other EU member state associate companies are exempt from WHT as of 1 July 2011.

6. A 5% WHT is levied if the recipient is a company which holds at least 10% of the capital of the company paying the dividends; no WHT is levied if the recipient company holds at least 75% of the capital of the company paying the dividends.
7. Levied if the recipient is a company holding at least a 10% interest in the paying company; otherwise, a 15% rate is levied.
8. Interest paid by certain public institutions is tax exempt.
9. Interest paid to certain public institutions is tax exempt.
10. Interest arising from the acquisition of commercial, industrial or scientific equipment is tax exempt.
11. Interest paid on loans granted by a bank or other financial institution is tax exempt.
12. For royalties for any copyright of artistic, scientific, or literary work (including cinematograph films and films or tapes for radio or television broadcasting), the rate levied is 14%.
13. Levied if the recipient is a company holding at least a 25% interest in the paying company; otherwise, a 15% rate is levied.
14. No WHT is levied on interest when both contracting states agree this and the loan is for no less than five years.
15. A 3% WHT rate is levied on royalties for the use of or right to use news. A 5% WHT rate is levied on royalties for any copyright of artistic, theatrical, musical, or literary work. A 10% WHT rate is levied on royalties for the use of or right to use copyright of industrial property, know-how, or scientific, commercial, or industrial equipment.
16. Levied if the recipient is a company holding a direct interest of at least 50% in the paying company for at least one year; otherwise, a 15% rate is levied.
17. No WHT is levied if the recipient is a company holding at least a 25% interest in the paying company.
18. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 50% of whose shares are directly or indirectly held by non-residents. This clause will not apply if the company can prove that it carries out important industrial or commercial activities and does not merely manage or hold shares.
19. A tax exemption can be applied to interest on commercial loans, loans guaranteed by public bodies for the promotion of exports, and on current accounts in banks or nominative advances between banks of both contracting states.
20. Royalties for any copyright of literary, theatrical, musical, or artistic work (with some exceptions, such as films and TV programs) are exempt from WHT.
21. 5% WHT is levied if the recipient (beneficial owner) is the shareholder of the paying company with at least a 20% interest; otherwise, 10% WHT is levied.
22. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions; (iv) the recipient is a financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
23. Levied if the recipient is a company with at least a 25% interest in the paying company with voting rights; otherwise, a 15% rate is levied.
24. The maximum WHT is 10% for interest paid to financial institutions for loans and credits granted for a minimum term of ten years for the purchase of capital equipment.
25. Interest arising from securities issued by a contracting state is exempt from WHT.
26. A 10% WHT rate is levied on royalties for copyrights of any literary, scientific, or artistic work (including films and TV programs).
27. Levied if the beneficial owner is a company (excluding partnerships) with at least a 25% interest in the paying company held directly or indirectly; otherwise, a 15% rate is levied.
28. A reduced WHT rate is only levied if the income is taxed in Canada; otherwise the general rate is levied.
29. Levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly; otherwise, a 10% rate is levied.
30. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipment are taxed at a 5% tax rate.
31. A 5% WHT rate is levied on royalties for the use of industrial, commercial or scientific equipment.
32. WHT is levied on 60% of gross royalties for the use of industrial, commercial or scientific equipment.
33. A 0% WHT rate is levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly.
34. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a loan granted by a bank or financial institution resident in a contracting state.
35. A 5% WHT is levied if the beneficial owner is a company which directly holds at least 20% of the capital of the company paying the dividends.
36.
 - a. 5% WHT is levied if the interest is paid on a long-term loan (more than five years).
 - b. No WHT is levied: (i) if interest is paid to a Croatian bank, (ii) on interest arising from the acquisition of commercial, industrial, or scientific equipment, (iii) on interest arising from a credit sale.
37. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment

Spain

- to a company of a contracting state; or (iii) interest is paid on a long-term loan (five or more years) granted by a bank or financial institution resident in a contracting state.
38. Royalties for copyrights of any literary, theatrical, musical, or artistic work, excluding films and TV programs, are tax exempt if the recipient is resident in the other contracting state and taxed on such income in such state.
 39. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial or scientific equipment, the sale of merchandise from one business to another business, or the financing of construction, installation or assembly works. No WHT is levied if the interest is paid on a long term loan (more than five years) or if the interest is paid to the other contracting state or one of its political subdivisions or a financial institution totally owned by the other contracting state or one of its political subdivisions.
 40. A 5% WHT rate is levied on royalties for copyrights of any literary, theatrical, musical, or artistic work (excluding films and TV programs).
 41. A 9% WHT rate is levied on the gross amount of the dividends if the beneficiary owner is a company (other than a partnership) which has at least a 25% direct interest in the company paying the dividends.
 42. WHT is not levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its public bodies or local authorities, or if the interest is paid to the Central Bank of the other contracting state.
 43. No WHT is levied if the recipient is a company with at least a 50% direct interest in the company paying the dividends, provided that the dividends are distributed from profits taxed in Spain.
 44. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank or its political divisions; (ii) the payer is a contracting state or its political divisions, (iii) the interest arises from a loan or credit granted by a contracting state or its political divisions, (iv) the recipient is a qualifying financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
 45. No WHT is levied if the French company has at least a 10% direct interest in the company distributing the dividend.
 46. No WHT is levied if the French company receives interest (i) from the other contracting state or any of its political divisions, (ii) from a resident in the other contracting state from an underlying commercial or industrial activity, (iii) in connection with a credit sale of industrial, commercial or scientific equipment, or (iv) for a loan granted by a financial institution.
 47. No WHT is levied on royalties on copyright of any literary or artistic work (excluding films and TV programs) if the recipient is the beneficiary owner or royalties paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
 48. No WHT is levied on interest paid to 'Deutsche Bundesbank' or 'Kreditanstalt für Wiederaufbau'.
 49. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 10% rate is levied.
 50. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions, or one of its local entities; (ii) the interest is paid to the other contracting state, one of its political subdivisions, or one of its local entities or to a body (including financial institutions) of such contracting state; or (iii) the interest is paid to another body (including financial institutions) in relation to loans granted by virtue of an agreement between both contracting states.
 51. No WHT is levied on interest paid to the Central Bank of the other contracting state.
 52. No WHT is levied on interest paid to companies in the other contracting state if the operation that generates the debt has been authorised by the government of the state where the company paying the interest is resident.
 53. A 10% WHT rate is levied on royalties for the use or cession of use of industrial, commercial, or scientific equipment. The general 20% WHT rate is levied on technical services and other royalties.
 54. No WHT is levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its local entities or if the interest is paid to the Central Bank or a financial institution controlled by the other contracting state, its political subdivisions, or its local entities.
 55. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment.
 56. Levied if the recipient is a company with at least a 20% interest in the paying company; otherwise, a 10% rate is levied.
 57. Royalties for copyright on literary, theatrical, musical, or artistic work are taxed at a 5% WHT rate. Royalties on films or other means of audio or video transmission, for the use or right to use industrial, commercial, or scientific equipment, or on scientific works or under agreements between both states are taxed at an 8% rate.
 58. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business or loans granted by a financial institution.
 59. No WHT is levied on interest if the beneficial owner of the interest is a resident of the other contracting state and: (i) the beneficial owner of the interest is that contracting state, its central bank, a political subdivision, or a local authority; (ii) the interest is paid by the contracting state in which the interest arises or by a political subdivision, a local authority, or non profit-making statutory body thereof; (iii) the interest is paid in respect of a loan, debt-claim, or credit that is owed to, or made, provided, guaranteed, or insured by that contracting state or a political subdivision, a local authority, or an export facilitating agency thereof; (iv) the beneficial owner of the interest is a financial

- institution; or (v) the beneficial owner of the interest is a qualifying pension fund and the income of that fund is generally exempt from tax in that other contracting state.
60. A 4% WHT rate is levied on royalties for copyright on literary, theatrical, musical, or artistic work (excluding films and TV programs).
 61. Reduced WHT rates are not levied when more than 75% of the shares of the recipient company resident in a contracting state are owned directly or indirectly by non-residents and the income generated by the paying company is not taxed in its country of residence.
 62. Levied if the recipient is a company with at least a 25% interest in the paying company; otherwise, a 15% rate is levied.
 63. No WHT is levied on interest arising from a loan guaranteed by a contracting state.
 64. Consideration received for waiving, either totally or partially, the use or right to use goods or rights is considered to be a royalty.
 65. No WHT is levied on interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or on interest paid on a long-term loan (five or more years) granted by a bank or credit institution resident in a contracting state.
 66. No WHT is levied if the recipient is a company with at least a 5% direct interest in the paying company.
 67. A 5% WHT rate is levied on royalties for technical services.
 68. No WHT is levied on dividends paid to a shareholder resident in the other contracting state of the company distributing the dividend with at least a 25% interest.
 69. A 10% WHT rate is levied on interest received by a bank (beneficial owner).
 70. Levied if the recipient is a company with at least a 50% direct interest in the paying company. A 5% WHT rate is levied if the recipient is a shareholder with at least a 25% direct interest; otherwise, a 10% rate is levied. WHT is reduced to 5% if the recipient company is not taxed in the Netherlands for this dividend.
 71. WHT is reduced to 10% if the recipient is a Dutch company with at least a 50% direct interest in the paying company or if the recipient holds 25% of its capital and another Dutch company holds at least the other 25%.
 72. No WHT is levied on capital gains from sales of assets/rights when they are considered to be a royalty.
 73.
 - a. No WHT is levied on fees paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
 - b. A 5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 50% of voting shares of the company paying the dividends; a 7.5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 25% of voting shares of the company paying the dividends.
 74. Levied if the recipient is a shareholder of the paying company holding voting rights with at least a 10% direct interest; otherwise, a 15% rate is levied.
 75. A 10% WHT rate is levied on interest paid for bonds or similar securities generally offered to investors and related to transfers of industrial, commercial, or scientific equipment. No WHT is levied on interest from bonds or similar securities issued by the state or a local entity or from loans given or guaranteed by either of the two contracting states, Central Banks, or financial institutions as agreed between the contracting states.
 76. A 20% WHT rate is levied on royalties for films or audio or TV tapes.
 77. No WHT is levied on interest from loans granted or guaranteed by a contracting state.
 78. If the recipient has invested more than EUR 100,000 in the company that pays the dividend or the dividend is tax exempt in its country of residence, the WHT rate levied is 10%. If both of these requirements are fulfilled, the rate applicable is 5%.
 79. Interest on loans with a maturity period of over seven years is tax exempt.
 80. A 10% WHT rate is levied on any patents, trademarks, designs or models, plans, secret formulae, or processes and computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experiences. A 5% WHT rate is levied on any copyright of literary, artistic, or scientific work, excluding computer software and including cinematographic films or tapes used for radio or television broadcasting.
 81. No WHT is levied on interest paid to a contracting state, one of its political subdivisions, or one of its local entities or interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or interest paid on any long-term loan (seven years minimum) granted by a bank resident in a contracting state.
 82. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment or merchandise.
 83. No WHT is levied on dividends when they are paid to a shareholder with at least a 25% interest held for at least two years, provided that the company distributing the dividends is effectively taxed.
 84. No WHT is levied on interest paid to a bank resident in Switzerland on a long-term loan (over five years).
 85. No WHT is levied if the royalties are paid between associated companies, affiliated by at least a 25% direct interest held for at least two years or both held by a third company with at least a 25% interest in both companies, and CIT is levied on all of the companies.
 86.
 - a. A 10% WHT rate is levied on interest received by financial and insurance entities. No WHT is levied on interest from loans granted by the government, Central Bank, or certain institutions.

Spain

- b. A 5% WHT rate is levied on royalties for any copyright of literary, artistic, theatrical, musical, or scientific work (excluding cinematograph films and films or tapes for radio or television broadcasting); an 8% WHT is levied on financial leasing related with the use or the right to use industrial, commercial, or scientific equipment.
- 87.
- a. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 75% of whose shares are directly or indirectly held by non residents and such income is not subject to taxation in such contracting state.
- b. Levied if the recipient is a shareholder of the paying company with at least a 50% interest; otherwise, a 15% rate is levied.
88. A 5% WHT rate is levied for long-term loans (more than seven years).
89. The WHT rate is 10% if the interest arises from a loan granted by a bank or is related to a credit acquisition of merchandise or equipment.
90. Levied if the recipient is a shareholder of the paying company with at least a 10% interest; otherwise, a 15% rate is levied.
- 91.
- a. No WHT is levied on royalties paid for the use or licensing of containers used in international trade.
- b. No WHT is levied on dividends when they are paid to a company holding at least a 75% direct interest in the paying company.
92. No WHT is levied if the interest is paid on a long-term loan (more than three years) to finance investment projects, if the interest is paid to a pension fund that meets certain requirements, or if the interest is paid in relation to a credit acquisition of merchandise, equipment, or services.
93. A 5% WHT is levied on royalties for any copyright of literary, artistic, or scientific work.
94. A 4.95% WHT rate is levied on interest received by financial institutions.
95. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the interest is paid by one contracting state or its political divisions, (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state to promote exports and development, (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income generated from the fund is tax exempt in the contracting state paying the dividend, or (v) the interest is paid in relation to the credit acquisition of industrial, commercial or scientific equipment.
96. Levied if the recipient is a shareholder of the paying company with at least a 50% interest. A 10% WHT rate is levied if the recipient is a company with at least a 25% direct interest; otherwise, a 15% rate is levied.
97. No WHT is levied on interest arising from loans granted or guaranteed by qualifying public institution or interest paid to public financial institutions.
98. No WHT is levied if the recipient is a company (other than a partnership) with at least a 25% direct interest in the paying company; otherwise, a 5% rate is levied.
99. No WHT is levied if the recipient is a company with at least a 10% direct interest in the paying company; otherwise, a 10% rate is levied.
100. 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least a 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents in third countries provided that a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.
101. Reduced rates/exemptions are not applicable when a Panama tax-resident company pays dividends, interest, or royalties to a Spanish tax resident and such income has been obtained either in Spain or in a country that has not signed a tax treaty for the avoidance of double taxation with Spain.
102. Levied if the recipient is a company (excluding partnerships) with at least a 10% direct interest in the paying company; otherwise, a 5% rate is levied. In the case of distributions made out of a real estate investment trust, 5% is levied if the beneficial owner holds, directly or indirectly, less than 10% of the value of the capital in such trust.
103. No WHT is levied on interest if: (i) the recipient is a contracting state of the treaty, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the payer is a financial institution of a contracting state and interest is paid to a financial institution of the other contracting state (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend;(v) the interest is paid in respect of a loan, debt-claim or credit that is owed to, made, provided, guaranteed or insured by an export financing agency of a contracting state or political division, or guaranteed or insured by that state or political division; (vi) the recipient is an institution wholly or mainly owned by a contracting state as may be agreed from time to time between the competent authorities; (vii) the recipient is the government of Singapore Investment Corporation Pte Ltd.
104. No WHT is levied on dividends if the beneficial owner is a company resident in the other contracting state whose capital is wholly or partly divided into shares and it has held at least 25% of the capital of the company paying the dividends for at least two years before the date of such payment and such dividends are not subject to profit tax in the other contracting state.

105.5% WHT rate is levied on royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films or films and tapes used for radio or television broadcasting.

106.No WHT is levied on dividends if the beneficial owner is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends.

Tax administration

Taxable period

The tax year for CIT purposes is the company's accounting year. The tax year cannot exceed 12 months, and the commencement, termination, or change of a tax year can give rise to a period of less than one year.

Tax returns

The tax system in Spain is a self-assessment system, and tax returns may be inspected by the tax authorities.

Annual CIT returns must be filed within 25 calendar days following the six months subsequent to the end of the tax year (i.e. if the tax year coincides with the calendar year, the return must be filed between 1 July and 25 July of the following calendar year).

Payment of tax

For CIT, three advance payments of the annual tax payment must be made during the first 20 calendar days of April, October, and December. The final CIT payment must be made with the annual CIT return.

For companies whose turnover, in accordance with Spanish VAT law, for the 12 months prior to the beginning of a tax period exceeds EUR 6,010,121.04, the advance payments are calculated by applying the following percentages to the taxable income (reduced by any applicable tax-loss carryforwards) for each advance-payment period, i.e. at 31 March, 30 September, and 30 November:

- Generally, 21%.
- For tax periods commencing in 2011, 2012, and 2013, this percentage is increased to:
 - 24% for companies whose turnover, in accordance with Spanish CIT law, for the 12 months prior to the beginning of the tax period was between EUR 20 million and EUR 60 million.
 - 27% for companies whose turnover, in accordance with Spanish CIT law, for the 12 months prior to the beginning of the tax period was EUR 60 million or more.

Some allowances and the previous advance payments of the year can be credited against this percentage of taxable income.

Small and medium-sized companies can opt to calculate their advance payments in the same way as large companies (applying a percentage of 21%) or to apply a rate (currently 18%) on the tax liability of their last advance CIT return filed on 1 April, 1 October, or 1 December.

Minimum advance payment for 2012 and 2013

For companies whose turnover, in accordance with Spanish CIT law, for the prior 12 months is EUR 20 million or more, the advance payments should be at least 8% of the

Spain

company's accounting profits for the first 3, 9, or 11 months of the calendar year less any tax-loss carryforwards that may be applied in accordance with the applicable limits.

The minimum advance payment for April 2012 is 4%.

For companies whose turnover, in accordance with Spanish CIT law, is income for which the international double tax exemption or the internal 100% double tax deduction for dividends applies (to at least 85% of the income), the tax rate is 4% (2% for the advance payment for April 2012).

This will apply to tax periods commencing in 2012 and 2013.

Tax inspections

The Spanish tax authorities have a tax inspection department that is responsible, amongst other things, for verifying that taxpayers' obligations are correctly complied with and, if necessary, for making adjustments to their tax affairs by issuing one or more tax assessments.

As part of its responsibilities, the tax inspection department may investigate a taxpayer's tax affairs to ensure that they are correct and verify the accuracy of filed tax returns.

Taxpayers' tax returns to be examined by the tax inspection department are chosen on the basis of different criteria, such as: (i) by random sample, (ii) if debt push down restructuring transactions have been carried out that involve Spanish companies with material debt levels, (iii) if companies have recurring tax-loss carryforwards, or (iv) if companies are related to a family group and lack a production or commercial structure and where their personal and business assets are not clear.

If taxpayers disagree with a tax assessment issued by the tax inspection department as a result of a tax inspection, they may file an appeal firstly with the Spanish economic-administrative tribunal for tax appeals, and if the appeal is not upheld by the tribunal, with the ordinary courts.

If taxpayers have paid incorrect amounts of tax to the tax authorities, they may claim a refund of any excess tax paid from the authorities within the statute of limitation period (four years) by means of a special procedure that commences with the filing of a request with the tax authorities.

Statute of limitations

The statute of limitations for taxes in Spain is four years commencing from the day following the date of termination of the voluntary tax filing period.

This four-year period may re-start for a tax if the tax authorities carry out any actions or procedures, with the formal acknowledgement of the taxpayer, to acknowledge, adjust, review, inspect, guarantee, or collect all, or any part of, a tax obligation, or due to actions by the taxpayer such as the filing of a new or late tax return that alters or rectifies a previous tax return or the filing of an appeal or claim by the taxpayers regarding the tax.

Topics of focus for the tax authorities

Every year, the Spanish tax authorities issue general guidelines on the authorities' annual tax and customs control plan. These guidelines identify areas where the tax authorities intend to adopt a greater role of verification, inspection, and monitoring during a certain tax year.

Other issues

Special tax regime applicable in the Basque Country

The three provinces that make up the region of the Basque Country (Alava, Guipúzcoa, and Vizcaya) have an 'economic agreement' with Spain's central government (laid down and regulated by Law 12 of 23 May 2002) in accordance with which these regions are granted the right to regulate their own tax regimes.

There are certain provisions in this law regarding CIT which make this area of Spain more attractive for companies.

General tax rate

The general tax rate is 28%.

Lower tax rates

A reduced rate of 24% is levied on small companies. A small company is considered to be a company that meets the following requirements in the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover or assets under EUR 10 million.
- Average number of staff under 50.

An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

For real estate companies that comply with the following requirements, a 20% tax rate is levied on taxable income up to EUR 10,000 and 22% on any excess for companies in Alava and Vizcaya, and a 20% tax rate is levied on taxable income up to EUR 4,000 and 23% on any excess for companies in Guipúzcoa:

- Their share capital is wholly owned by individuals during the whole tax year.
- More than half of their assets are securities or more than half of their assets are not used for economic business activities during at least 90 days of the tax year.
- At least 90% of their profits are generated from investment income and capital gains.

A 21% rate is levied on companies that are floated on the Bilbao Stock Exchange and on brokerages and cooperatives. Companies that are floated on the Bilbao Stock Exchange are taxed at this rate for three years, as long as they are in compliance with certain requirements.

Tax-loss carryforwards

Tax losses may be carried forward for the following 15 years in Guipúzcoa. In Vizcaya and Alava, there is no time limit for the offsetting of tax losses.

For tax years commencing from 1 January 2012, companies that do not comply with the requirements to be considered a small company can offset tax-loss carryforwards of prior years up to a maximum of 70% of their prior taxable income. There is no limit for small companies. Before 1 January 2012, no limit was applicable for any companies.

Tax deductibility of amortisation of goodwill and intangible assets

Amortisation recorded for intangible assets (irrespective of whether they have a specific useful life or not), including goodwill, is tax deductible up to a maximum annual limit of 20%, subject to compliance with the following requirements:

Spain

- The assets have been acquired for consideration.
- The acquiring and transferring companies are not associated parties.

Financial goodwill

Financial goodwill is tax deductible over a period of five years when at least a 5% interest is acquired in the company and these shares are not quoted on a stock exchange or, if they are quoted on a stock exchange, they are shares of group or associated companies.

If the company from which the shares have been acquired has an interest in another company, the equity, assets and rights recorded in the group's consolidated annual accounts must be taken into consideration for the purpose of calculating the amount of the financial goodwill.

If the company from which the shares have been acquired is a non-resident company, in addition to the requirements stated above, the following requirements must be fulfilled:

- The company is subject in its country of residence to a tax which is identical or similar to Spanish CIT.
- The company carries on business activities abroad.

If the shares are not acquired on a stock market, the company which acquires the shares must not be in any of the situations provided for in Article 42 of the Spanish Commercial Code in relation to the transferring company.

Depreciation periods

The depreciation periods for assets are shorter than those under state CIT law.

Reinvestment of extraordinary income

Income obtained from the sale of tangible fixed assets or intangible assets can be deducted from taxable income, subject to compliance with the following requirements:

- The amount obtained from the sale is reinvested in similar types of assets within a four-year period (as from one year prior to the sale up to three years after the sale).
- The asset in which the reinvestment is made is maintained for five years (three in the case of movable assets), unless its useful life is shorter.
- For sales of shares in other companies when the interest held is at least 5% and has been held for a period of one year prior to the date of sale, 60% of the income obtained from the sale can be deducted from taxable income.

Income generated from intellectual or industrial property

30% of the income obtained from the transfer of intellectual or industrial property rights can be deducted from taxable income, subject to compliance with certain requirements, and 60% if the company has created the intellectual or industrial property itself. There are no quantity limits to be complied with for the application of this deduction.

Investments in new tangible fixed assets

A 10% tax credit can be applied to investments in new tangible fixed assets, subject to compliance with certain requirements. The minimum depreciation period for the assets, excluding computer equipment, is five years.

The total amount of the investment must be over EUR 60,100 and the investment must comply with at least one of the following requirements:

- Exceeds 10% of the carrying amounts (minus depreciation/amortisation) of the company's tangible fixed assets, buildings and software during the previous year.
- Exceeds 15% of the carrying amount of the same type of tangible fixed assets of the company during the previous year.

Special reserve for investments in production

A tax credit can be applied for the distribution of profits to a special reserve for investments in production, subject to compliance with the following requirements:

- The company invests the amount distributed to the reserve in new tangible fixed assets during the following two years.
- These assets are maintained by the company during a five-year period or during their useful life if it is less than five years.
- The company's shareholder's equity is increased by the amount distributed to the reserve, and this increase is maintained for a five-year period as from the date on which the investment was made.

The tax credit is 10% of the profits distributed to the reserve.

Research and development (R&D)

A 30% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average expenses incurred by the company during the previous two years, the tax credit is 50% on the excess amount.

An additional tax credit of 20% can be availed of for the following expenses:

- Staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.
- Expenses incurred for projects contracted from certain universities and public organisations.

A 10% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets which are exclusively assigned to R&D activities.

Technological innovation

A 20% or 15% tax credit can be availed of for certain expenses incurred for technological innovation.

Expenses incurred for environmental conservation and improvement and for conservation of energy

Companies are eligible for a 30% tax credit for investments made in the equipment listed in the Basque List of Environmental Technologies, subject to compliance with certain requirements.

Companies may also qualify for a 15% tax credit for investments made and expenses incurred in respect of tangible fixed assets, subject to compliance with certain requirements.

Export investments (e.g. foreign advertising, formation of companies, and branches abroad)

As in state CIT law, for periods commencing from 1 January 2011, there is no tax credit for export investments.

Spain

Staff training

A 10% tax credit can be applied for expenses incurred in staff training. If the expenses are higher than the average training expenses incurred by the company during the previous two years, there is an additional tax credit of 15% for the excess amount.

A tax credit can also be applied for expenses incurred to obtain the Occupational Health and Safety Assessment Sequence (OHSAS) 18001 certificate and to train staff in new technologies.

Job creation

For tax years commencing on or after 1 January 2012, the following tax credits can be availed of for job creation, subject to compliance with the requirements stated:

- EUR 4,900 for each job created provided that a permanent employment contract is signed with the employee (for tax years commencing before 1 January 2012, the amount was EUR 4,600 per employee).
- EUR 9,200 for each job created provided that a permanent employment contract is signed with the employee and a person who has special difficulties in finding employment is contracted (for tax years commencing before 1 January 2012, the amount was EUR 8,600 per employee).

The company's average number of staff with permanent employment contracts must be increased by at least the same number of contracts that generated the tax credit and this increase must be maintained by the company for two years.

Corporate contribution to an EPSV

For tax years commencing on or after 1 January 2012, a tax credit of 10% applies to corporate contributions to certain pension schemes in favour of the staff of the company, up to the limit of EUR 6,000 per employee each year (for tax years commencing before 1 January 2012, the amount was EUR 8,000 per employee.)

For tax years commencing before 31 December 2011, an additional tax credit of 50%, up to the limit of EUR 200 per employee, could be applied on the excess amount contributed in comparison with the previous year's contribution.

Time limits for the application of tax credits

In Guipúzcoa, tax credits can be carried forward for a period of 15 years as from the date on which the company qualifies for them. In Vizcaya and Alava, there is no time limit for the application of tax credits.

Limits on the amount of tax credit applied

For tax years commencing on or after 1 January 2012, the combined sum of all investment tax credits, excluding tax credits for R&D and technological innovation, may not exceed 35% of the company's CIT liability (45% for small companies). For tax years commencing before 1 January 2012, the rate was 45% for all companies.

Advanced CIT tax

There is no obligation to make advanced payments on account of CIT.

Special regime for small and medium-sized companies

A small company is considered to be a company which meets the following requirements during the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover or assets under EUR 10 million.
- Average number of staff under 50.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

A medium company is considered to be a company which meets the following requirements during the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover under EUR 50 million or assets under EUR 43 million.
- Average number of staff under 250.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

The benefits derived from this special tax regime are as follows:

- Free depreciation for new tangible assets (except buildings) for small-sized companies (general free depreciation relief set forth for tax years 2009 to 2015 is not applicable in the Basque Country).
- Accelerated depreciation for new tangible assets (except buildings) for medium-sized companies.
- Global bad debt provisions up to 1% of credit sales and services of small and medium-sized companies are tax deductible for CIT purposes. Provisions for possible insolvency of credit sales and services are tax deductible up to a limit of 1% of the amount of credit sales and services at the end of the tax period.

Significant developments

In the determination of business profits, a deduction will now be allowed for the following:

- 50% of the cost of acquisition (as depreciation allowance) on high tech plant, machinery, or equipment for energy efficiency purposes acquired on or after 1 April 2012.
- Local and foreign travel expenses incurred by companies exclusively providing the service of design development or product innovation.

Businesses that are liable to corporate income tax (CIT) will not be liable for Economic Service Charge (ESC) from 1 April 2012. Accordingly, ESC will be applicable only if the business is enjoying a CIT exemption or is incurring a loss during the tax year immediately prior to the tax year to which each quarter belongs. The prior threshold for ESC of 25 million Sri Lankan rupees (LKR) per quarter has been increased to LKR 50 million per quarter, effective from the tax year commencing from 1 April 2012.

Taxes on corporate income

Resident companies and public corporations are liable for CIT on their worldwide taxable income. Non-resident companies are liable for CIT of their Sri Lanka-source taxable income.

CIT rates are based on the nature of the income and the institution earning the income, as follows:

Income/Institution	CIT rate (%)	
	2011/12	2012/13
Undertaking for manufacture of any product for export or for supply to an exporter for export, being a product having domestic value addition over 65% and a Sri Lanka brand name with patent rights received in Sri Lanka	10	10
Undertaking for operation and maintenance of facilities for storage, local development of software, or supply of labour	10	10
Agricultural undertakings referred to in Section 16 of the Act for any tax year commencing from 1 April 2011	10	10
Educational services	10	10
Undertaking (not being a holding company, subsidiary company, or any associate company of a group of companies) with an annual turnover not exceeding LKR 300 million, other than buying and selling activities	10	10

Income/Institution	CIT rate (%)	
	2011/12	2012/13
Unit trusts and mutual funds *	10	10
Shipping agents approved by the Director of Merchant Shipping in respect of profits attributable to agency fees connected to transshipment activity and received in foreign currency	15	15
Companies engaged in non-traditional export (other than exempt), including deemed exporters and suppliers of specified services to garment exporters; performance of any service of ship repair, ship breaking, and refurbishment of marine cargo containers; and provision of computer software, programmes, systems, or recording of computer data paid for in foreign currency	12	12
Undertakings engaged in agriculture, manufacture of animal feed, promotion of tourism, or construction work carried on by a resident person	12	12
Venture capital companies	12	12
Any company of which the taxable income does not exceed LKR 5 million (not applicable to a company of a group of companies)	12	12
Petroleum exploration	12	12
Local manufacture of handloom products	28	12
Healthcare services	28	12
Joint venture between a grower cum manufacturer or a manufacturer of tea with a tea exporter for exporting Sri Lanka tea in value added form, on the manufacturing income attributable to the quantum of tea purchased	28	12
Research and development (R&D) activities	28	20
Branch of commercial bank dedicated to development banking	28	24
Any company with taxable income of LKR 5 million or more; banks, including profits from offshore banking activities; public corporations and government owned business undertakings; and holding companies, subsidiary companies, or associated companies of a group of companies	28	28
Manufacture and sale, or import and sale, of liquor or tobacco products	40	40
Business of lottery, betting, or gaming activity	40	40

* Unit trusts and mutual funds are treated like resident companies for CIT purposes. Units of investment are treated like company shares, and returns to investors are treated like company dividends. The tax rate is 10% on the profits derived by any unit trust or mutual fund.

Marginal relief

Where the taxable income of any company (other than a group company) for any year of assessment exceeds LKR 5 million but does not exceed LKR 6,111,111, then such part of the CIT computed for such year of assessment as is attributable to such excess shall not be more than such excess (i.e. the maximum CIT on LKR 6 million taxable income is LKR 1.6 million, *see below*).

	LKR
Taxable income	6,000,000
CIT for LKR 5 million at 12%	600,000
Excess LKR 1 million	1,000,000
Total CIT	1,600,000

Sri Lanka

Dividend tax

A dividend tax is payable at 10% on the gross dividends distributed by a resident company, other than such dividends distributed out of any dividend received from another resident company (and few other exceptions).

Deemed dividend tax

A deemed dividend tax of 15% is payable by any resident company in any tax year if the said company has, in the preceding tax year, distributed dividends of less than 10% of the distributable profits (duly defined) for that preceding tax year.

The tax base for the 15% deemed dividend tax is the book profits of the company reduced by the aggregate of the CIT payable by that company for that tax year, the cost incurred by the company in that tax year in the acquisition of any land or any capital asset, and any notional profit computed on the basis of a revaluation of any capital asset included in such book profit and increased by the aggregate of the allowance for depreciation deducted in respect of any capital asset and any notional loss computed on the basis of a revaluation of any capital asset included in such book profit.

Special tax on public corporations

In the case of a public corporation, where not less than 75% of the capital is provided by the government (other than via a loan), a tax of 25% of the balance profits, after deducting CIT payable, will be charged. However, where the total gross dividends distributed are not less than 25% of such balance, no special tax will be charged in the relevant years. Where the total gross dividends distributed are less than 25% of such balance, the tax chargeable will be the difference between such balance and the dividends distributed.

Remittance tax

Where profits of a non-resident company are remitted in a tax year, a remittance tax of 10% of the remittances is payable.

Corporate residence

A company is treated as resident for tax purposes in Sri Lanka if its registered or principal office is in Sri Lanka or if the control and management of its business is exercised in Sri Lanka.

Permanent establishment (PE)

PE is only a treaty concept in Sri Lanka. If a non-resident company creates a PE in Sri Lanka in terms of a double tax treaty (DTT), then such company is liable to Sri Lanka CIT. In this absence of a DTT, the domestic tax laws will apply.

Other taxes

Value-added tax (VAT)

VAT is payable on imported goods and on the supply of goods (excluding, in particular, the supply to merchants who purchase goods locally) and services in Sri Lanka. Provisions are made for filing returns monthly or quarterly, based on specified criteria. Even where returns can be filed quarterly, the tax payments are required to be made on a monthly basis. Certain specified imports and domestically supplied goods and/or services are exempt.

VAT is payable on the prescribed valuations of imports and domestic supplies at a standard rate of 12%. Exports and certain specified international services are zero-rated.

No registration for VAT is necessary if the total value of taxable supplies is LKR 650,000 or less in a quarter, or LKR 2.5 million or less in a year.

The input tax paid on the imports and supplies of goods (including capital goods) and services in a month, and used in the business of making taxable supplies in that month, can be deducted from the tax payable (output tax) on such supplies, subject to a limitation of the lesser of 100% of output tax or the actual input tax paid.

Refunds of excess VAT paid are available to zero-rated supplies, to suppliers who are qualified to issue suspended tax invoices, and to new businesses registered under Section 22 (7) of the VAT Act.

Customs duties

Customs duty is levied on the value for customs duty (i.e. transaction value). World Trade Organization (WTO) rules on customs valuations are implemented. Sri Lanka has a simplified four tier tariff structure. The rates are published in the government gazettes. The current rates are 5%, 15%, 30%, and 0% (applies to few goods).

Excise duties

Excise duties and special excise levies are charged on tobacco, cigarettes, liquor, motor vehicles, selected petroleum products, paints, air conditioners, dishwashers, household washing machines, and other products at various rates and at unit rates.

Stamp duty

Stamp duty is payable on specified instruments and documents at rates prescribed in the Gazette.

Economic Service Charge (ESC)

Effective from 1 April 2012, ESC is payable quarterly by businesses that are enjoying a tax holiday or incurring a loss in the previous tax year at 0.25% of the aggregate turnover of the trade, business, profession, or vocation if the total turnover exceeds LKR 50 million for that quarter. ESC so paid is deductible from the CIT payable for that tax year. ESC is not refundable but can be carried forward for four immediately succeeding tax years to be set off against CIT payable. Maximum ESC payable for any quarter is LKR 30 million.

Prior to 1 April 2012, every person was liable to pay ESC in respect of the aggregate turnover at rates varying from 0.1% to 1%, depending on the business activity, if the total turnover exceeded LKR 25 million for that quarter.

Nation Building Tax (NBT)

NBT is chargeable at 2% from every person (a person includes a company) who imports any article on the 'liable turnover' from such importation and who carries on the business of manufacture of any article, providing a service of any description, or wholesale or retail sale of any article (other than such sale by the manufacturer of that article) on the liable turnover of the relevant quarter. Certain specified articles or services are exempt from NBT.

Liable turnover means:

Sri Lanka

- In the case of importer, the value of any article ascertained under Section 6 of the VAT Act for the purpose of importation.
- In the case of manufacturer, the proceeds receivable, whether received or not, from the manufacture and sale of goods in Sri Lanka.
- In the case of service provider, the proceeds receivable, whether received or not.
- In the case of wholesale or retail traders, the proceeds receivable, whether received or not, other than pharmaceuticals, gems and jewellery sold for payment in foreign currency, and any article subject to the Special Commodity Levy sold by an importer.

In case of wholesale and retail traders, 50% of the liable turnover will be taxed at a zero rate and the remaining 50% will be taxed at 2%. In the case of a distributor as defined in the ESC Act, 75% of the liable turnover will be taxed at a zero rate and the remaining 25% will be taxed at 2%.

Bad debts, VAT, excise duty rebate under export development, or services in relation to an international event should not be included in the liable turnover.

Construction industry guarantee fund levy

Construction industry guarantee fund levy is payable by each construction contractor or subcontractor on the contract value arising from any contract entered into, calculated at rates varying from 0.25% to 1%, depending on the value of the construction contract. As of 1 April 2009, any person or partnership that makes any payment, which is subject to such levy, to a contractor or subcontractor should deduct such levy as a withholding tax (WHT) and remit the amount withheld to the Commissioner General of Inland Revenue.

Tourism development levy

Tourism development levy is payable by tourist hotels and institutions licensed under the Tourist Development Act on the turnover of such institution at the rate of 1%.

Employees Provident Fund (EPF)

Employers and employees are required to contribute specified percentages (employer 12%; employee 8%) of each employee's monthly emoluments/salary to the EPF established by the government. Alternatively, employers and employees can contribute to certain private provident funds approved by the labour authority.

Employees Trust Fund

Employers are also required to contribute a specified percentage (currently 3%) of each employee's monthly emoluments/salary to the Employees Trust Fund established by the Government.

Share transaction levy

Share transaction levy at the rate of 0.3% is chargeable from both the buyer and the seller on the sale value of listed shares transacted through the Colombo Stock Exchange.

Local taxes

Taxes (more usually called rates) are currently assessed and collected annually from the owners of land and premises by the local authorities of the areas in which the properties are located. These authorities also charge and collect annual licence fees from certain businesses as well.

Branch income

Foreign companies are permitted to register a place of business in Sri Lanka or to be registered as an overseas company under local company law, where the business carried on conforms to the stipulations made under the Exchange Control Law.

An overseas company registered under the Companies Act may also carry on in Sri Lanka any non-commercial, non-trading, or non-industrial activities, such as the activities undertaken or carried on by a liaison office, representative office, regional office, or other similar office, provided such activities do not provide any income directly or indirectly to the company.

In addition to paying the standard CIT, a trading branch is also subject to the 10% remittance tax on remittance to its foreign head office.

The Sri Lanka-source income of foreign companies from a local 'place of business' is taxed at the CIT rate. However, under most DTTs that Sri Lanka has entered into, the income of a turnkey or service project will not be liable for CIT if its duration is less than the period specified in the treaty concerned.

Where branch or project income is liable for CIT but the income is not readily ascertainable, the tax authority may prescribe that the income be computed on a fair percentage (not less than 6%) of the branch or project turnover in Sri Lanka.

Income determination

Business accounting for CIT purposes should, unless otherwise specified by the tax statute, conform to Sri Lanka Accounting Standards.

Inventory valuation

Inventories should be measured at the lower of cost and net realisable value.

Capital gains

There is no capital gains tax. Capital gains from transfer of property are exempt from CIT.

Dividend income

Resident company dividends paid on shares held by resident or non-resident persons are not assessable to the recipients if income tax is withheld on such dividends (*see the Withholding taxes section*), the dividends are exempt from income tax, or the dividends are paid out of dividends received from resident companies.

Stock dividends

Stock dividends (bonus shares) are not taxable in the hands of a shareholder at the time of issue; however, where such shares are capitalised out of company profits and there is a return of this capital to the shareholder within six years from the date of issue, the amount of capital returned to the extent of the paid-up value of the bonus shares is treated by definition as a dividend and is taxable in the hands of the shareholder. However, if the shareholder is a company, this dividend may not be assessable, as explained above.

Sri Lanka

Interest income

Interest income forms part of the total statutory income, if not exempt under the tax statute.

Foreign income

Foreign income of a resident person forms part of the total statutory income, if not exempt under the tax statute.

Deductions

In ascertaining the total income liable to CIT from the financial accounts filed by a company, deductions from revenue are permitted for outgoing and matching expenses incurred in producing the income, including special deductions.

Depreciation

An annual allowance for depreciation for wear and tear is calculated at:

- 50% for high tech plant, machinery, or equipment for energy efficiency purposes acquired on or after 1 April 2012.
- 33 $\frac{1}{3}$ % for plant, machinery, or equipment for a period of three years.
- 25% of the cost of any information technology for a period of four years.
- 20% of the cost of acquisition of any motor vehicle or furniture for a period of five years.
- 10% of the cost of any qualified building for a period of ten years.

The cost of renewal of any capital asset, if no allowance exists, is deductible for the purpose of ascertaining profits and income.

Goodwill

Amortisation is not allowed on the acquisition of goodwill.

Formation or liquidation expenses of a company

In the case of a company, expenses incurred in the formation or liquidation of that company are allowed in computing the taxable income.

Interest expenses

Interest paid or payable on borrowings for purposes of business are deductible, subject to the thin capitalisation rules (*see the Group taxation section*).

Bad debts and doubtful debts

A sum equal to the bad debts incurred in any trade, business, profession, or vocation that have become bad debts during the period for which the profits are being ascertained is allowed for tax purposes.

In the case of a bank or financial institution, deductibility of a specific bad debt provision is restricted to the lesser of the actual amount of the provision or 1% of the aggregate debts as of the end of the period for which profits are ascertained.

Charitable contributions

Relief is available as a deduction from assessable income for contributions in money to an approved charity, if the charity is established for the provision of institutionalised care for sick or the needy, and contributions in money or in kind to the Government of Sri Lanka. The deduction for the former is subject to a ceiling of one-fifth of the

assessable income of the company. In the case of the latter, there is no limit to the deduction, and any un-recouped excess of such contributions over the assessable income can be carried forward and deducted from the following year's assessable income and so on.

Terminal gratuities

Termination gratuities paid to employees on cessation of business and annual payments made to an approved fund, held for payment under compulsory legislation of gratuities to employees upon termination of their services, are deductible.

Fine and penalties

Fine and penalties, paid or payable, are not allowed for tax purposes.

Taxes

Sri Lanka income tax payable or any income tax or other similar tax payable in any country with which Sri Lanka has a DTA is not deductible, other than the excess of the foreign-country tax on doubly taxed income over the maximum amount of the credit allowed in the foreign country for the Sri Lanka income tax on that income.

Taxes paid in a foreign country that does not have a tax treaty with Sri Lanka may be deducted.

NBT paid/payable is fully deductible.

Input VAT is not deductible from CIT if creditable against output VAT.

Any other prescribed tax or levy is not deductible.

Non-deductible expenses

Deductions not permitted for certain expenses or allowances, in the determination of total income, are itemised below:

- Business entertainment expenses incurred or entertainment allowances paid to executive officers.
- Any expenditure of a capital nature or any loss of capital, including book depreciation of capital assets.
- Depreciation allowances or rentals or annual payments or renewals in respect of vehicles used for purposes of business travel, or capital assets provided for the use of employees at their places of residence, other than motorcycles or bicycles used by non-executive staff and motor coaches used to transport employees to and from their places of work.
- The excess of management fee paid over LKR 2 million or 1% of turnover, whichever is lower, or such amount as may be determined by the tax authorities. This restriction does not apply to a venture capital company, unit trust, or mutual fund.
- Royalties paid to a person outside Sri Lanka to another person outside Sri Lanka.

Other significant items

Expenses incurred solely in connection with the promotion of the export trade or the provision of any services for payment in foreign currency or in carrying out an approved programme for the promotion of tourism are fully allowed.

As of 1 April 2011, any foreign travel or foreign training expense incurred in the production of income of any trade, business profession, or vocation is also deductible,

Sri Lanka

subject to a maximum limit of 2% of the previous year's statutory income from the respective trade or business.

Deductions from the total income from all sources of a company are allowed for any interest payable on loans used for the construction or purchase of any building or the purchase of any site for construction of a building; for any annuity, ground rent, or royalty payable; or for a business loss.

Net operating losses

No deduction from total income is allowed in a tax year for a business loss if, at any time in that year, more than one-third of the issued share capital of the loss-making company is held by persons who did not hold such share capital at any time in the year in which the loss was incurred. In such circumstances, the loss is deferred for deduction only from profits of the particular business in which the loss was incurred.

Any loss incurred in any business of life insurance can be deducted to the extent of any profits from such business included in such total statutory income. Similarly, any loss incurred in any business of finance leasing can be deducted to the extent of any profits from such leasing business included in such total statutory income.

Losses incurred in the conduct of a trade or business may be carried forward indefinitely but only up to 35% of statutory income of a given tax year.

Carryback of losses is not permitted.

Payments to foreign affiliates

Any payment made to an affiliate is allowed for tax purposes, if such payment is in the nature of revenue and is incurred in the production of income.

Group taxation

There are no special provisions for taxation of companies in a group in Sri Lanka. Each company is taxed independently of others in the group.

Transfer pricing

Any profits and income arising, derived, or accruing from, or any loss incurred in, any transaction entered into between two associated undertakings shall be ascertained with regard to the arm's-length price.

Thin capitalisation

Deductible interest payments made between members of a group of companies, including holding companies, are restricted to the debt-to-equity ratio of 3:1 for manufacturing companies and 4:1 for other companies.

Tax credits and incentives

Foreign tax credit

Where any DTT is entered into between the government of Sri Lanka and the government of any other territory outside Sri Lanka, a credit is to be granted in respect of any tax paid or payable outside Sri Lanka in respect of profit or income arising outside Sri Lanka. Such credit should not exceed the amount of the Sri Lanka tax payable in respect of such profits or income.

Where any non-resident person or any partnership registered outside Sri Lanka providing certain services is liable to pay income tax in Sri Lanka and income tax in any other country, then such person or partnership shall be entitled to relief from income tax payable in Sri Lanka of an amount equal to the excess, if any, of the income tax in respect of such income payable in Sri Lanka over the income tax in respect of such income payable in such other country.

Tax holidays

Exemptions for new enterprises

Qualifying enterprises	Qualifying criteria		
	Specified activities	Investment criteria	Tax holiday (years)
Small scale enterprises	Agriculture and/or agro processing, animal husbandry and/or processing, fisheries and/or fish processing, and creative work including art work	Minimum investment of LKR 25 million	4
Medium scale enterprises	Any specified activity	LKR 50 million to LKR 100 million	4
		LKR 100 million to LKR 200 million	5
		More than LKR 200 million	6
Large scale enterprises	Agriculture or forestry, animal husbandry, specified manufacture, specified services, processing and solid waste management, and any other activity approved by the Minister of Finance	LKR 300 million to LKR 500 million	6
		LKR 500 million to LKR 700 million	7
		LKR 700 million to LKR 1,000 million	8
		LKR 1,000 million to LKR 1,500 million	9
		LKR 1,500 million to LKR 2,500 million	10
		More than LKR 2,500 million	12
New enterprises in specified activities	Cement	USD* 50 million	5 and a 12% concessionary tax rate thereafter
	Steel	USD 30 million	
	Pharmaceuticals	USD 10 million	
	Fabric	USD 5 million	
	Milk powder	USD 30 million	

* United States dollars

- A five-year tax holiday is available to a new venture capital company satisfying specified criteria.
- A five-year tax holiday is granted for the profits from the new undertaking of a company that is engaged solely in R&D in the field of science or technology with the object of using the results thereof for the production or improvement of products with a minimum investment of LKR 2 million.
- Tax holidays outside the purview of the tax statute are also available in specified areas of investment to companies that enter into agreements with the BOI and to any strategic development projects indentified in accordance with the provisions of the

Sri Lanka

Strategic Development Projects Act No 14 of 2008. The specified areas include non-traditional export-oriented manufacturing and thrust industries, export-oriented services, large-scale projects of which the project cost exceed LKR 500 million. Generous waiver of import duties on specified imports and other concessions are also available for these companies.

- Profits and income derived from the sectors of fishing, cultivation, and primary processing of agricultural seeds or planting materials will be exempt from CIT for a period of five years reckoned from the tax year commencing from 1 April 2011.

Inbound investment incentives

- Exemption from CIT is granted on the profits and income earned in foreign currency by any resident company in Sri Lanka from any services, excluding commissions, discounts, or similar type of receipt, rendered in or outside Sri Lanka, if such profits and income (less such amount expended outside Sri Lanka as is considered by the Commissioner General to be reasonable expenses) are remitted to Sri Lanka through a bank.
- Exemption from CIT is granted in respect of dividends or interest received on investments made outside Sri Lanka, provided that dividends and interest are remitted to Sri Lanka through a bank.

Other incentives

- New or existing companies that export non-traditional goods are entitled to be taxed on the profits from these exports or services at a concessionary rate of 12% for a period of 20 years, ending on 31 March 2014 and 2015, respectively. Dividends paid by such companies out of profits earned from the exports of non-traditional goods, which are taxed at 15%, are in turn liable to tax of 10% in the hands of corporate shareholders where the income tax is already withheld from the dividends (*see the Withholding taxes section*).
- Exemption from CIT is granted on the profits arising from trading in shares, rights to any share, bonus, or share warrants in respect of which the share transaction levy has been charged.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any non-resident person or to any licensed commercial bank in Sri Lanka by the issuer of any sovereign bond denominated in foreign currency, issued on or after 21 October 2008, by or on behalf of the government of Sri Lanka and on the profits and income from the sale of such sovereign bond.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any person on or after 1 April 2009, on any Sri Lanka Development Bond denominated in United States dollars, issued by the Central Bank of Sri Lanka and on the profits and income from the sale of such Sri Lanka Development Bond.
- Exemption from CIT is granted on the profits and income derived by or accruing to any person or partnership from investment in Economic Resurgence Certificates, utilising money lying to credit of any account opened in any commercial bank or in any specialised bank with the approval of the Central Bank of Sri Lanka from and out of monies deposited in such account on or after 1 February 2009.

Withholding taxes

Resident companies are entitled to withhold income tax at 10% of gross dividends payable to any shareholder that is chargeable with CIT, excluding any dividend received from another resident company and any dividend that is exempt from CIT.

Any person in Sri Lanka who pays or credits to a person or partnership outside Sri Lanka any sum due as interest, rent, ground rent, royalty, or annuity is required to withhold income tax at a rate of 20% of the sum, but the requirement to withhold income tax does not apply to (i) interest not sourced in Sri Lanka, (ii) interest on any loan or advance made by a banker, (iii) interest paid in foreign currency held in an account with a foreign currency banking unit, (iv) interest on any corporate debt security, or (v) any interest that is exempt from income tax under any provisions of the Income Tax Act.

In particular instances, the tax authority may prescribe that CIT be withheld at a rate other than 20%, or the rate may be reduced for sums falling due as interest or royalties in respect of persons resident in countries with which Sri Lanka has DTAs in force. Sri Lanka-source income from loan interest or royalties accruing to a non-resident company is taxed at a flat 15%, in the absence of a lower rate in the tax treaty with the home country of the non-resident.

However, interest accruing to any overseas lender from a loan granted by that overseas lender to the Sri Lanka government or institution, public corporation, any commercial bank, or to any other undertaking if such loan is granted on or after 1 April 2012, is exempt from income tax.

Every bank and financial institution is required to withhold income tax at 10% on the amount of any interest paid to a company on any sum of money deposited with it. The depositor is entitled to receive a certificate setting out the gross amount of interest, the amount of tax withheld, and the net amount of interest paid. With respect to Treasury bills and Treasury bonds issued by the Central Bank, the WHT rate of 10% applies to an investor from any country. This WHT is deducted at the time of the sale of the Treasury bills and Treasury bonds by the Central Bank in the primary market.

Notes

- 0% for copyright royalties.
- 0% in certain circumstances.
- 50% of normal tax, which is 7.5%.
- These treaties are limited to the avoidance of double taxation of income from international transport by air.
- 10% applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends. In all other cases, the rate is 15%.
- 10% applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. In all other cases, the rate is 15%.

Tax administration

Taxable period

A tax year is any period of 12 consecutive months reckoned from 1 April in any calendar year to 31 March of the following year.

Tax returns

CIT returns are due on 30 November, immediately following the end of the tax year.

Statement of accounts

Where any trade, business, profession, or vocation is being carried on or exercised by any quoted public company or any other company having a turnover of not less than LKR 250 million or net profit of not less than LKR 100 million, such quoted company or such other company should furnish a statement of accounts in support of a return of income. Such statement of accounts is to be prepared by an approved accountant on the basis of an audit carried out by such approved accountant.

Payment of tax

Sri Lanka has a pay-and-file system under which the CIT payable for each tax year is required to be paid in four instalments, on or before 15 August, 15 November, and 15 February of the tax year and 15 May immediately following the end of the tax year. If each instalment is not less than one-quarter of the CIT payable for the tax year

immediately preceding, the balance of any CIT payable may be paid on or before 30 September immediately following the end of the tax year without incurring penalties.

Statute of limitations

No assessment of the income tax payable by any person:

- a. who has made a return of one's income on or before the 30th day of November of the tax year immediately succeeding that tax year shall be made after the expiry of a period of two years from the 30th day of November of the immediately succeeding tax year or
- b. who has failed to make a return on or before such date as referred to in paragraph (a) shall be made after the expiry of a period of four years from the 30th day of November of the immediately succeeding tax year.

However, such limitation shall not apply where any fraud, evasion, or wilful default has been committed.

Significant developments

As of 1 January 2011, the Swaziland Revenue Authority was established. This Authority amalgamated the Department of Customs and the Department of Taxes. Although no amendments were made to their corresponding governing legislation, the letter of the law is being applied with a policy of zero tolerance for non-compliance.

Taxes on corporate income

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

All companies generating income within Swaziland are taxed on that income at a flat rate of 30%.

Corporate residence

Permanent establishment (PE)

PE in Swaziland is determined according to physical presence.

Other taxes

Value-added tax (VAT)

As of 1 April 2012, VAT replaced the sales tax as the standard rate of 14%.

Prior to 1 April 2012, sales tax was levied at a rate of 14% (25% for liquor and cigarettes) on goods imported into Swaziland and on the first sale of goods manufactured for sale in Swaziland. Customs and excise duties were also imposed on such goods. The 14% sales tax was also applicable to most professional services.

Customs duties

Swaziland has a provision for customs duties for various goods imported into the country. Details are available in the Harmonized Tariff Schedule (HTS).

Excise duties

Swaziland has an excise duty provision for various goods manufactured in the country.

Goods	Excise duty rate (%)
Cigarettes	6.34
Cigarette tobacco	8.00
Cigars	6.19
Other tobacco products	16.10
Spirits	8.90
Beer	8.20
Alcoholic fruit beverage	8.30
Wine	8.10

Property taxes

There are no property taxes in Swaziland.

Transfer taxes

Transfer taxes are applied on a variable rate basis to property transfers based on the fair market value of the property being transferred.

Stamp taxes

Swaziland has a provision for stamp taxes on various documents. The tax is determined either by way of a set fee or on a sliding scale percentage basis.

Branch income

Income tax on registered branch profits is calculated as for a resident company, and a branch profits tax of 15% is assessed for deemed repatriated income. In practice, however, branches are rare since most foreign companies incorporate local subsidiary companies.

	SZL*
Net profit before tax	100
Tax @ 30%	(30)
Repatriated income	70

* Swaziland lilangeni

Income determination**Inventory valuation**

Inventory valuation is not specific but is effectively at the lower of cost (i.e. first in first out [FIFO] or average cost) and net realisable value.

Capital gains

Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e. not recurring transactions).

Swaziland

Dividend income

Dividend income is taxable via withholding tax (WHT) for non-residents (*see the Withholding taxes section*). No tax is due if received from another local company.

Inter-company dividends

Inter-company dividends are not subject to income tax.

Stock dividends

Stock dividends are paid out of taxed profits. Such dividends are not subject to income tax when received by a local company, but they are subject to taxation in the hands of local individual taxpayers at the rate of 10%.

Interest income

Interest income sourced in Swaziland is taxable.

Foreign income

Foreign income is not subject to income tax unless it is deemed to be from a Swaziland source.

Deductions

Depreciation

Depreciation (wear-and-tear) allowances calculated by the net-reducing-balance method are available as follows:

Asset	Depreciation rate (%)
Aircraft	25
Casino equipment	15
Construction equipment	25
Computer hardware	33.33
Computer software	33.33
Furniture and fittings	10
Hotel soft furnishings, including carpets	10
Legal and professional libraries	5
Lifts and elevators	25
Motor vehicles:	
Buses	33.33
Cars	20
Light delivery vehicles	25
Lorries	33.33
Office equipment	10
Plant and machinery	10
Sound and projection equipment	20
Television sets	20
Tractors	25
Trailers	20
Video recorders	33.33
Videotapes	25

For the first year after the addition of an asset, the wear-and-tear allowance is calculated on a monthly basis. With respect to leased assets, the lessor's claim for wear-and-tear allowance is usually spread over the lease period.

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

Interest expenses

Interest is deductible as long as it is incurred in the production of income.

Bad debt

Swaziland does allow a deduction for bad debts, subject to the Commissioner's approval and provided that the debts were included in the taxpayer's income in the year of assessment or in years past.

Charitable contributions

Subject to the Commissioner's approval in regard to the amount allowable as a deduction in the year of grant and subsequent years, Swaziland allows a deduction for, among other things, grants made to the government for the building of schools and hospitals.

Fines and penalties

Fines and penalties resulting from late payment of any tax or levied as payable under any Act administered by the Commissioner will be a non-deductible expense.

Taxes

Taxes are not deductible.

Net operating losses

Losses may not be carried back but may be carried forward for as long as trading continues (i.e. indefinitely). If any break in trading occurs, however, the losses are forfeited.

Payments to foreign affiliates

Deductions may be claimed for payments of management service fees, interest, and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable, and receive exchange control approval for transfers outside the rand monetary area. Note that this approval is routinely given without any significant delay for bona fide transactions.

S

Group taxation

Swaziland does not have group taxation legislation. All companies are assessed on their individual profits and losses.

Transfer pricing

Swaziland does not have transfer pricing legislation; however, under the anti-avoidance provision, the Revenue Authority will look for arm's-length transactions.

Thin capitalisation

Swaziland does not have thin capitalisation rules.

Swaziland

Tax credits and incentives

Development Approval Order

The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e. a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, such as a lower corporate tax rate.

Withholding taxes

Non-resident WHTs are levied as follows.

Dividends

WHT for dividends is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho, and the Republic of South Africa). The rate drops to 10% under the double taxation agreement (DTA) with South Africa where the holding company owns more than 25% of the shares. Non-resident shareholders' WHT is payable within 30 days of the date on which the dividend is payable.

Interest

WHT for interest is payable at the rate of 10%. Non-resident WHT on interest is payable within 14 days of the date of the accrual of the interest.

Royalties

WHT for royalties is payable at the rate of 15%. The rate drops to 10% if there is a DTA in place.

Entertainers and sportsmen

WHT is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

Contractors or professionals

WHT is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

Tax administration

Taxable period

The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year end unless another year end date is approved by the Commissioner of Taxes; such approval is routinely given.

Tax returns

Income tax returns should be submitted within 90 days of 30 June, unless an extension of time for submission is granted, which also is routinely given.

Payment of tax

Notice of the date of payment is usually given on the tax assessment.

Provisional tax payments

With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company's financial year-end, and the other payment is due no later than the last day of the company's financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment, for which an assessment has been issued not less than 21 days before the date the estimate is made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is found to be both less than 90% of the taxable income as finally determined and less than the taxable income as assessed for the immediately preceding tax year.

Significant developments

There have been just a few significant corporate tax developments in Sweden during the past year.

In March 2012, the Ministry of Finance issued a proposal for new Swedish interest stripping restrictions, to become applicable for interest expenses accruing after 31 December 2012. The current restrictions from 2009 disallow a tax deduction for interest payments on intra-group loans related to an acquisition of shares from an affiliate unless either the creditor is taxed for the interest at least at 10% or it is shown that both the share transfer and the debt are based on commercial reasons. The new proposal extends the scope of the current restrictions to apply in respect of interest expenses on any loans within a group, whatever its purpose. The minimum 10% tax test at the creditor level (the person entitled to the interest) will still allow interest deduction according to the proposal, but the tax agency is given powers (with hindsight) to still refuse a deduction if it is shown that mainly tax reasons were behind the loan. Commercial reasons for the loan are still an alternative test for deduction; however, according to the proposal, only if the creditor is resident within the European Economic Area (EEA) or in a jurisdiction with which Sweden has a full tax treaty. As the proposed new restrictions apply for interest accruing in 2013, they might also naturally affect many existing, old loans. Usual legislative and parliamentary procedures still remain to be completed in respect of this proposal, but there is little doubt from a political standpoint that the current restrictions actually will be extended (in some way).

A governmental committee has, for some time, been appointed for a major review of the corporate tax system with the aim of broadening the tax base and, *inter alia*, creating neutrality between equity and debt, with reports scheduled in 2013.

New tax administration rules apply, including, *inter alia*, a split of the current single tax filing date in May into four different dates and new tax payment dates, as from 2013 year-endings.

Taxes on corporate income

State (national) income tax

Resident legal entities are liable for tax on their worldwide income unless tax treaties or special exemptions apply. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

Taxable income is subject to tax at the rate of 26.3%. All income of corporate entities is treated as business income.

Local income taxes

No local income taxes apply to Swedish corporations.

Corporate residence

A company is considered to be a tax resident of Sweden if it is incorporated in Sweden.

Permanent establishment (PE)

The term 'permanent establishment' is defined in Sweden as a fixed place of business through which the business is carried on from a specific establishment, such as a place of management, branch, office, factory, or workshop. Places where construction work is carried on are also regarded as PEs, as well as if an agent who is dependent upon the foreign company habitually exercises authority in Sweden.

Other taxes**Value-added tax (VAT)**

The Swedish VAT system is harmonised with the European Union (EU) rules. The general VAT rate of 25% is chargeable on most goods and services. Reduced rates apply to a few goods and services, such as foodstuffs, restaurant meals, and non or low alcoholic drinks (12%), as well as to transport of passengers (6%). Certain financial and insurance services are exempt from VAT.

VAT returns are filed and tax is paid monthly or quarterly. However, for companies with a turnover of less than 1 million Swedish kronor (SEK), VAT may be reported in the income tax return.

Customs duties

As a member of the European Union, Sweden is also part of the Customs union enforcing the community Customs code. Most EU Customs duties are calculated as a percentage of the value of the goods being imported. All imported goods must be classified according to the EU Customs tariff (TARIC), and the duty rates applied depend on the economic sensitivity of the goods. The actual duty rate to be applied also depends on other factors, such as the country of origin of the product and any free trade agreements that may be applicable.

Excise duties

The three main Swedish excise duties are harmonised with EU rules. These are alcohol tax, tobacco tax, and tax on fuels and electricity.

Fuels are subject to energy tax, carbon dioxide tax, and sulphur tax. Depending on the use of fuels, taxes may be partly or fully reduced. For bio-fuels, certain exemptions may also apply.

Other Swedish excise duties are waste tax, tax on advertisement, and the on traffic insurance premiums.

The Swedish parliament has decided on changes in the Energy Tax Act, meaning that the reductions for industrial manufacturing activities will be changed. The reductions are applicable on taxable fuels, and the changes will be introduced gradually by 2015. For an industrial company that does not participate in emissions trading systems (EU

Sweden

ETS), the tax cost will increase significantly. For participants in the EU ETS, the tax cost will be slightly lower.

Real estate tax

The annual real estate tax rate on business premises is 1% of the tax assessed value. For industrial property, the tax rate is 0.5%. Other rates exist for special property.

Stamp tax

Stamp tax at 4.25% is payable on a transfer of real estate. The tax base consists of the highest of the purchase consideration or the tax assessed value of the real estate. Stamp tax on an intra-group transfer of real estate may be deferred as long as the real estate remains within the group.

Social fees

Mandatory social security charges payable by employers on remuneration to employees (or by the self-employed) are levied at approximately 31%. Reduced rates apply for very young or old people. Social security charges are deductible for corporate tax purposes.

Pension benefits beyond the mandatory system are customary amongst most Swedish employers. A special salary tax is levied at approximately 24% on these additional pension premiums/commitments and is deductible for corporate tax purposes.

Branch income

Branch income (i.e. PE income) is taxed at the corporate tax rate of 26.3%, and general corporate tax rules apply for branch offices in Sweden. No withholding tax (WHT) is levied on the outbound repatriation of taxed profits.

The receipt of Swedish source royalties or fees for use of tangible or intangible assets by a foreign resident is also (subject to treaty restrictions) regarded as a special form of PE income.

Income determination

Inventory valuation

Inventories (stock-in-trade) are valued at acquisition cost or market value, whichever is lower. As an alternative, inventories may be valued at 97% of the total acquisition cost, which is determined on a first in first out (FIFO) basis. The last in first out (LIFO) method is not permitted. Generally, inventories should be stated at the same amount for tax and accounting purposes.

Capital gains

There is a capital gains tax exemption for Swedish corporate entities on gains related to the disposal of shares held for business reasons. This abolishment of capital gains taxation for corporations, under the participation exemption provisions, has made Sweden a favourable holding company location.

Note that non-tax-exempt capital gains are included in business income and taxed at the corporate tax rate.

Shares in Swedish corporations as well as in foreign companies can qualify as shares held for business reasons. Unquoted/unlisted shares will always be considered as held

for business reasons. Quoted/listed shares are considered held for business reasons provided that the company has a holding corresponding to at least 10% of the voting rights or the shares are held in the course of the business. An additional condition regarding quoted/listed shares is that the shares must be held for a period of at least one year.

Shares in partnerships (tax transparent entities) and indirect holdings via partnerships are also included in the participation exemption regime.

An exception from the capital gains tax exemption applies for the sale of shares in a 'shell company', which is a company or partnership where the market value of cash, shares and other marketable instruments (other than shares held for business reasons), and similar assets exceeds 50% of the consideration paid for the shares. The sale of a shell company results in harsh taxation of the gross consideration. Provided certain formalities are fulfilled, however, it is possible to avoid such taxation.

A consequence of the participation exemption is that capital losses on shares or participations held for business reasons are not deductible.

Capital losses on portfolio holdings of shares, share options, convertible debentures, and similar financial instruments are allowed only as an offset to capital gains on the same group of financial instruments.

Certain special rules apply to computation of capital gains and losses on real estate.

Dividend income

A participation exemption applies for dividends received on shares held for business reasons (*see above*) and on qualifying holdings via partnerships.

Interest income

Interest received by a corporation is included in the corporate tax basis.

Foreign income

Companies resident in Sweden are taxed on their worldwide income. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

A Swedish corporation is taxed on foreign branch income. Double taxation normally is avoided by means of either a deduction for foreign tax, or a foreign tax credit.

Dividends and capital gains from foreign subsidiaries are generally exempt from taxation according to the participation exemption provisions applicable to shares held for business reasons (*see above*).

Deductions

Depreciation, amortisation, and depletion

Depreciation on fixed assets

Land improvements may be depreciated at the rate of 5% per year of the acquisition cost. The maximum allowance is 100% of the tax basis of the improvement.

Buildings may be depreciated at rates between 2% and 5% per year of the taxable basis, depending on type and usage of the building. The maximum allowance is 100% of the tax basis of the building.

Sweden

For machinery and equipment, the depreciation for tax purposes should correspond to the depreciation charged in the books and accounts, as long as the total net value of the assets is not less than the 70% of net value in previous accounts plus additions less proceeds of sales (i.e. 30% declining-balance depreciation) or cost less 20% per year (i.e. 20% straight-line depreciation on remaining assets). An alternative 25% declining-balance method without correspondence to the books also exists.

Immediate deduction of certain assets

The cost of assets having an expected life of not more than three years and the cost of assets not exceeding certain limits, depending on size of operations, may be deducted immediately. Certain costs for repairs, maintenance, and modifications of buildings may also be deducted immediately.

Amortisation of intangibles and goodwill

The amortisation of patents, leaseholds, and goodwill follows the same rules as depreciation for machinery and equipment (*see above*).

Depletion of mines and quarries

The entire cost of mines and quarries may be depleted over their expected exploitation period. These depletion amounts may be deducted annually but are limited to 100% of the acquisition cost of the mine or quarry.

Start-up expenses

General start-up expenses for generating and maintaining business income are, as a rule, deductible for Swedish tax purposes.

Interest expenses

Interest expenses are, as a general rule, fully deductible, provided that the arm's-length principle is complied with in outbound accruals to a foreign affiliate. Sweden has enacted anti-debt push down provisions (i.e. interest stripping restrictions) under which a deduction is not allowed for interest accruing on any intra-group loan for the acquisition of shares from an affiliate, unless the creditor (i.e. the person entitled to the interest) is taxed on the interest income at a rate of at least 10% or it is shown that the share transfer and the debt is based on commercial reasons.

Bad debt

Business bad debts are deductible if they are proven wholly or partially worthless.

Charitable contributions

Purely charitable contributions are generally non-deductible.

Fines and penalties

Fines and penalties are non-deductible for Swedish tax purposes.

Taxes

Generally, Swedish taxes are not deductible for tax purposes. However, specific taxes, fees, and foreign taxes may be deductible. Recoverable VAT is not treated as an expense or cost.

Net operating losses

Tax losses may be carried forward indefinitely, subject to restrictions or forfeiture upon ownership changes, mergers and demergers, dispositions with creditors, and certain other reorganisations. No carryback of losses is possible.

Payments to foreign affiliates

Transactions with an affiliate not liable for tax in Sweden must be at arm's length. Formal transfer pricing documentation requirements apply.

Group taxation

Swedish companies are not taxed on a consolidated basis. However, it is possible for qualifying groups (i.e. a holding of greater than 90% of the capital which must have been owned during the whole fiscal year) to effectively offset operating losses of one Swedish company against operating profits of another Swedish company by way of group contributions, which are tax deductible for the contributor and taxable for the recipient. EEA companies are regarded as Swedish companies for these purposes, if the recipient is taxable in Sweden.

A similar Swedish deductibility is, under certain circumstances, also available for cross-border consolidation within the EEA for final subsidiary losses.

Transfer pricing

The Swedish transfer pricing regime is generally an Organisation of Economic Co-operation and Development (OECD) type of regime. Sweden has formal transfer pricing documentation requirements in place.

Thin capitalisation

There are no thin capitalisation rules for tax purposes in Sweden; however, interest stripping restrictions exist.

Controlled foreign companies (CFCs)

Sweden's CFC provisions aim at taxing a Swedish resident shareholder for shareholdings in low-taxed foreign entities. A Swedish resident shareholder with a holding in a CFC-entity will annually be taxed for its ownership portion of the CFC's income, according to provisions applicable to a Swedish corporation. For a corporation, the portion will be taxed at the Swedish corporate tax rate. Only holdings, direct or indirect through other foreign entities, corresponding to at least 25% (capital or voting rights) in the foreign entity could lead to CFC taxation. A foreign company is considered lowly taxed if the income in the company, calculated in accordance with Swedish provisions, is taxed at a rate below 14.47%. However, if the foreign entity is resident in an 'approved country', CFC taxation should not arise. Approved countries appear in an official 'black/white' list. Active EEA entities are, under certain circumstances, excluded from CFC taxation.

Tax credits and incentives

There are no specific tax incentives in Sweden for corporations. However, some generally applicable regimes exist.

For example, Sweden has an accruals reserve regime. The accruals reserve regime allows for a tax-deductible appropriation for corporations of 25% of the taxable profit before appropriation to a reserve. Each year's appropriation forms a separate reserve that must be reversed to income no later than the sixth year following the appropriation. However, a standardised interest income is imposed on former years' appropriations at 72% of the interest rate on governmental debt notes.

Sweden

Foreign tax credit

A foreign tax credit is generally available, provided certain conditions are fulfilled, and the tax credit allowed is limited to an amount corresponding to the Swedish tax on the foreign income. Unutilised foreign taxes may be carried forward for five years. Tax treaty implications may exist.

Withholding taxes

There are no Swedish taxes on interest and service fees paid to non-resident corporations or individuals. Such payments to resident corporations and individuals are taxed as ordinary income.

WHT on dividends, royalties, and certain rentals vary according to domestic law and tax treaties, as shown below.

Apart from the highlighted treaties, Sweden has concluded agreements on exchange of information in tax matters and partial tax treaties with many tax haven jurisdictions.

Notes

- According to domestic law there is no WHT on dividends to a foreign company on shares held for business reasons (for the definition of shares held for business reasons, see *Capital gains in the Income determination section*), provided that the foreign company is similar to a Swedish limited liability company (and some other legal entities) and is subject to income tax at similar level to that imposed on a Swedish company. Further, there is no tax liability for a legal entity of a member state of the European Union if the entity owns 10% or more of the share capital in the distributing company and fulfils the conditions of the Directive (90/435) regarding parent company and subsidiaries.
- The reduced rate shown before a stroke (/) refers to payments to corporations having requisite control. Where appropriate, the particular treaty should be consulted to see whether the reduced rate is applicable.
- Swedish source royalties and certain rental fees are treated as a special form of PE, taxable at the corporate tax rate, subject to treaty reduction or waiver. Royalties paid from Sweden to a company within the European Union should not be taxed in Sweden if one of the companies holds at least 25% (capital) of the other, or where there are two companies concerned, at least 25% are held by another company within the European Union. Indirect participation does not benefit from the legislation. Both the payer and the recipient must be legal entities under the EU directive.
- Payments to resident corporations and individuals are taxed as ordinary income. Only resident banks and similar entities are required to withhold tax on payments of cash dividends to resident individuals.
- Royalties and certain rentals paid by Swedish licensees are treated as business income taxable in Sweden and do not incur WHT (see Note 3).
- Note also the domestic provision stating a 0% WHT on dividends distributed on shares held for business reasons to qualifying entities (see Note 1).
- Dividends: 10% of the gross amount if the company receiving the dividends owns at least 25% of the foreign company's capital. Royalties: of the gross amount paid for the use of, or the right to use:
 - News: 3%.
 - Copyright of literary, dramatic, musical, or other artistic work: 5%.
 - Any patent, trademark, design or model, plan, or secret formula or process; industrial or scientific equipment or information concerning industrial, commercial or scientific experience; payments for the rendering of technical assistance: 10%.
 - All other cases: 15%.
- Royalties are normally taxable only in the recipient's home country. However, where the royalty is paid by a Swedish legal entity that is more than 50% owned by one Austrian recipient, entity or individual, the tax in Sweden is a maximum of 10%.
- Literary, artistic, or scientific royalties: 0%; other royalties: 5%.
- Royalties for use of industrial, commercial, or scientific equipment: 5%; with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 3%; other royalties: 10%.
- Royalties for use of copyright and literary, dramatic, musical, and artistic royalties: 0%. Other royalties: 10%. (Treaty should be consulted).
- The treaty has effect on income derived on or after 1 January 2006.
- The double taxation treaty does not include Hong Kong.
- The same treaty is applicable to the Czech Republic and the Slovak Republic.
- According to the Nordic multilateral tax treaty.
- Dividends are exempt from tax if the recipient of the dividends is a company directly owning at least 10% of the capital of the company paying out the dividends. Certain rentals are subject to tax if there is a PE in a country other than the home country and the claim is connected with the business carried on from the PE. Concerning Iceland, dividends are normally exempt from tax for companies, but the tax rate is 15% if the dividends have been deducted from the income of the distributing company.
- Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.
- Royalties with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 5%; other royalties: 12.5%.
- Royalties for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience: 10%; other royalties: 15%. (Treaty should be consulted.)
- Literary, artistic, or scientific royalties including films: 15%; other royalties: 10%. (Treaty should be consulted.)

21. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial or scientific experience: 5%; other royalties: 15%.
22. Commercial royalties, including films: 20%; copyright, literary, dramatic, musical, or artistic royalties: 0%.
23. Commercial royalties, including films: 15%; literary, dramatic, musical, or artistic royalties: 5%.
24. Literary, artistic, scientific, or film royalties: 10%; other royalties: 7%.
25. Royalties with respect to patents, designs or models, secret formulas or processes, or for information concerning industrial or scientific experience or for the use of industrial, commercial, or scientific equipment involving a transfer of know-how: 5%; other royalties: 15%.
26. The treaty is applicable to all republics and autonomous provinces of the former Yugoslavia with the exception of Macedonia, with which Sweden has concluded a bilateral treaty.

Tax administration

Taxable period

If the income is derived from business, the basis for tax assessment is the financial year. The year-end for a company may be fixed at any calendar month ending. Swedish subsidiaries of foreign parents are generally permitted to adopt the same year-end as the parent company, provided it ends on the last day of the month.

Tax returns

Every corporate entity or registered branch must file an annual corporate income tax return, which generally should be filed by 2 May each year, covering the financial year ending during the preceding calendar year. An extension may be available. The annual assessments are made by the local tax offices during the calendar year following the income year and should be completed by the end of November. Employer returns (employee Pay As You Earn [PAYE] and employer withholding) are normally due on a monthly basis.

For financial year endings in 2012, these rules still apply. For financial years ending in 2013, however, the tax administration system will be revised and the due dates will depend on the month in which the financial year ends.

Payment of tax

Income taxes are collected during the year in which the income is earned, under a preliminary tax system. A corporate entity's preliminary tax liability is determined by a preliminary tax assessment based either on the latest available final tax assessment or on a preliminary tax return filed by the company. The preliminary taxes are payable in monthly instalments. Interest surcharges on underpayment of preliminary taxes, however, generally apply from 12 February the year after the financial year (the assessment year). Any balance owed by the taxpayer is payable in 90 days after the assessment has been made. Normally, any balance owed to the taxpayer is refunded in December of the assessment year.

For financial year endings in 2012, these rules still apply. For financial years ending in 2013, however, the tax administration system will be revised and the due dates will depend on the month in which the financial year ends.

Tax penalty

A taxpayer that submits incorrect or insufficient information in a tax return is charged a penalty amounting to up to 40% of the tax which, if the incorrect information had been accepted, would have been imposed or credited. The penalty and the rate may vary depending on the type of the incorrect information given.

Sweden

Appeals

Taxes are assessed by the tax agency. Depending on the circumstances, reassessments and/or appeals generally can be initiated within one and five years after the assessment year. Appeals can be made to the administrative court, and onwards to the administrative court of appeal, and in case of granted trial dispensation, onwards to the supreme administrative court.

Significant developments

Abolition of issuance stamp tax on the issuance of Swiss bonds and money market instruments

On 1 March 2012, the amendment of the Swiss banking act (so called ‘too big to fail rules’) was enacted. These rules include the abolition of Swiss issuance stamp tax on the issuance of Swiss bonds and money market instruments. Accordingly, the issuance of Swiss bonds and money market instruments will no longer be subject to Swiss issuance stamp tax.

In addition, the conversion of contingent convertible bonds (CoCos) into equity will also not trigger Swiss issuance stamp tax on the newly created equity. This relief applies to CoCos according to the Swiss banking law only; other convertible bonds will still trigger Swiss issuance stamp tax if converted into equity. The abolition of issuance stamp tax on debt instruments is to be seen as a starting point in the promotion of issuing debt instruments in Switzerland.

Taxes on corporate income

Resident companies are subject to Swiss corporate income tax (CIT) on their taxable profits generated in Switzerland. CIT is levied at the federal, cantonal, and communal level. Foreign-source income attributable to foreign permanent establishments (PEs) or real estate property located abroad is excluded from the Swiss tax base and only taken into account for rate progression purposes in the cantons that apply progressive tax rates.

Non-resident companies may be subject to Swiss CIT if they are (alternatively) partners of a Swiss business, have a PE in Switzerland, own real estate property in Switzerland, have loan receivables secured by a mortgage on Swiss real estate property, or deal with or act as a broker of Swiss real estate property. Non-resident companies are taxed on their income generated in Switzerland only (*see the Branch income section*).

Federal level

Switzerland levies a direct federal CIT at a flat rate of 8.5% on profit after tax. Accordingly, CIT is deductible for tax purposes and reduces the applicable tax base (i.e. taxable income). Consequently, the direct federal CIT rate on profit before tax amounts to approximately 7.83%. At the federal level, no corporate capital tax is levied.

Cantonal/communal level

In addition to the direct federal CIT, each canton has its own tax law and levies cantonal and communal income and capital taxes at different rates. Therefore, the tax burden of

Switzerland

income (and capital) varies from canton to canton. Some cantonal and communal taxes are imposed at progressive rates.

Overall tax rates

As a general rule, the overall approximate range of the maximum CIT rate on profit before tax for federal, cantonal, and communal taxes is between 11.5% and 24.2%, depending on the company's location of corporate residence.

Corporate residence

A company is considered resident in Switzerland if its domicile is in Switzerland. Residency is also linked to the place of effective management, which may be the centre from which day-to-day activities are directed or the place from which managerial decisions are made.

Permanent establishment (PE)

For Swiss tax law purposes the term 'permanent establishment' means a fixed place of business through which the business activity of an enterprise is wholly or partly carried on. In particular, PEs are branches, factories, workshops, sales agencies, permanent representations, mines and other places of extraction of natural resources, as well as building or construction sites that last at least 12 months. This definition is generally in line with the criteria according to Article 5 paragraph 2 of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and Capital.

Other taxes

Value-added tax (VAT)

As a matter of principle, proceeds of sales and services conducted in Switzerland are subject to VAT at the standard rate of 8%. Goods for basic needs are subject to VAT at the rate of 2.5%. These rates include a temporary increase that went into effect on 1 January 2011 and will remain applicable until 31 December 2017. On 1 January 2018, if no extension or change is enacted, the rates should decrease from 8% to 7.6%, and from 2.5% to 2.4%. Services in connection with the provision of lodging are subject to VAT at the rate of 3.8% (limited until 31 December 2013).

Any person, regardless of legal form, objects, and intention to make a profit is liable to VAT if that person carries on a business and is not exempt from the tax liability. A person carries on a business if one independently performs a professional or commercial activity with the aim of sustainably earning income from supplies and acts externally under one's own name. Persons, who are taxable, must register with the Swiss Federal Tax Administration of their own accord in writing within certain deadlines. Anyone, who in Switzerland generates less than 100,000 Swiss francs (CHF) turnover within a year from taxable supplies is exempt from the aforementioned liability. A registered taxpayer generally is entitled to offset the amount of VAT charged by suppliers or paid on imports against the VAT payable.

The VAT rates are dependent on the goods sold or the services provided. Some supplies are just exempt from the tax without credit (e.g. hospital treatment, cultural services, insurance and reinsurance turnovers, specific turnovers in the field of money and capital transactions) and some supplies are fully exempt from the tax (e.g. supply of goods that are transported or dispatched directly abroad). The difference relates to the

fact that the input VAT related to supplies exempt from the tax without credit cannot be deducted, whereas supplies exempt from the tax are fully eligible for input VAT deduction.

Customs duties

All goods arriving in Switzerland from abroad are generally subject to customs duty and import VAT. The customs duty is calculated on the gross weight of imported goods, where category-specific weight rates apply. Products like alcoholic drinks, tobacco products, food, and textiles are typical categories of higher duty rates. Furthermore, imported goods are subject to import VAT of generally 8%. A reduced rate of 2.5% applies on certain goods, like food, non-alcoholic beverages, books, magazines, pharmaceutical products, etc.

Excise taxes

In Switzerland, various excises taxes are levied. To name a few, the following excise taxes are levied at the federal level:

- VAT (*see above*).
- Petroleum tax.
- Performance-related Heavy Vehicle Fee.
- National road tax (motorway tax sticker).
- Beer excise tax/Tax on alcohol.
- Tobacco excise tax.

Property taxes

With regard to the ownership and the transfer of real estate property in Switzerland, property taxes may apply. Dependant on the location of the real estate property, ownership related property taxes are levied at the cantonal and/or communal level or do not exist at all.

In case of the sale of real estate property, real estate transfer tax and taxes on the capital gain may apply.

At the federal level, the capital gain realised on the sale of real estate property is subject to ordinary income tax. At the cantonal and communal level, the capital gain realised is either subject to the ordinary income tax (dualistic method) or subject to the real estate capital gain tax (monistic method).

It is in the authority of the cantons to decide how real estate capital gains shall be taxed within their territory.

Securities transfer tax

Swiss securities transfer tax (often called 'securities turnover tax' or 'transfer stamp tax') is levied on the transfer of Swiss or foreign securities in which Swiss security dealers participate as contracting parties or as intermediaries. The ordinary tax rate of Swiss securities transfer tax is 0.15% for securities issued by a tax resident of Switzerland and 0.3% for securities issued by a tax resident of a foreign country.

Swiss security dealers are defined as any person professionally engaged in the buying or selling of securities for one's own account or for another person, including Swiss banks and other Swiss bank-like institutions. The definition also includes companies holding taxable securities whose book value exceeds CHF 10 million and remote members of a Swiss stock exchange.

Switzerland

Taxable securities include, but are not limited to, shares and bonds. Options and many other derivative instruments are not subject to Swiss securities transfer tax. However, the exercise of such financial instruments or derivatives may result in a taxable transfer of a security.

Various transactions are exempt from the Swiss securities transfer tax. Generally, no Swiss securities transfer tax is levied in the case of a merger or a reorganisation in which a Swiss security dealer is involved and taxable securities (including participations) are transferred. Furthermore, the like-kind exchange of a participation by a Swiss security dealer is also exempt from the Swiss securities transfer tax. This is particularly important for holding companies, which may qualify as Swiss security dealers.

Issuance stamp tax

Issuance stamp tax (often known as capital duty) on the issuance and the increase of the equity of Swiss corporations is levied at the rate of 1% on the fair market value of the assets contributed, with an exemption on the first CHF 1 million of capital paid in, whether it is made in an initial or subsequent contribution.

A tax ruling may be obtained to apply for and confirm exemption of a multitude of transactions from issuance stamp tax. In particular, special tax provisions allow for most reorganisations to take place on a tax neutral basis. In addition, an existing non-resident company may generally transfer assets to Switzerland without incurring Swiss issuance stamp tax. However, if the company was formed abroad and re-domiciled to Switzerland exclusively or mainly in order to avoid Swiss stamp taxes, the issuance stamp tax may apply.

On 1 March 2012, the amendment of the Swiss banking act (so called 'too big to fail rules') was enacted. These rules include the abolition of Swiss issuance stamp tax on the issuance of Swiss bonds and money market instruments. Accordingly, the issuance of Swiss bonds and money market instruments will no longer be subject to Swiss issuance stamp tax.

In addition, the conversion of contingent convertible bonds (CoCos) into equity will also not trigger Swiss issuance stamp tax on the newly created equity. This relief applies to CoCos according to the Swiss banking law only; other convertible bonds will still trigger Swiss issuance stamp tax if converted into equity. The abolition of issuance stamp tax on debt instruments is to be seen as a starting point in the promotion of issuing debt instruments in Switzerland.

Capital tax

Corporate capital tax is only levied at the cantonal and the communal level (not at the federal level). It is based on a corporation's equity (i.e. the taxable equity corresponds to the sum of nominal capital, paid in surplus, retained earnings, other equity reserves, and - according to Swiss thin capitalisation rules - potential deemed equity). The ordinary capital tax rates vary between 0.001% and 0.525%, depending on the company's location of corporate residence. Reduced capital tax rates are applicable for companies subject to a special cantonal tax regime (e.g. holding companies, mixed trading companies).

Since 1 January 2009, the cantons are allowed to credit CIT against a corporation's capital tax. As of 10 May 2012, the following cantons have implemented such credit system: Argovie, Appenzell Innerrhoden, Berne, Basel-Land, Geneva, Glarus, Neuchâtel, St. Gallen, Solothurn, Schwyz, Thurgau, and Vaud.

Branch income

Foreign legal entities having a branch in Switzerland become subject to limited taxation in Switzerland. Such branches generally qualify as PEs in line with the OECD Model Tax Convention. The branch's income is, in general, subject to the same CIT rules that apply for Swiss corporations. It is worth noting that there is no Swiss withholding tax (WHT) on profit transfers from the Swiss branch to its foreign head office.

Income determination

The statutory accounts of a Swiss company (or in the case of a non-resident company, the branch accounts) serve as the basis for determining taxable income. There are generally very few differences between statutory profit and taxable profit apart from the participation relief for dividend and capital gains income (*see below*), adjustments required by tax law, and the usage of existing tax loss carryforwards (*see Net operating losses in the Deductions section*).

Inventory valuation

Swiss CIT treatment does, in principle, follow underlying Swiss statutory accounting treatment. Inventory valuation is therefore determined according to the accounting rules of the Swiss code of obligations.

Accordingly, the maximum inventory value represents the inventory's acquisition costs or its production costs. In case these costs exceed the inventory's market value at the balance sheet date, the latter lower market value must be applied. In order to determine the inventory's acquisition or production cost, various methods exist.

It is at the corporate taxpayer's discretion to determine which method shall apply (e.g. weighted average method, first in first out [FIFO], last in first out [LIFO], highest in first out) (*see Obsolete inventory provision in the Deductions section*).

Participation relief

Participation relief is the name generally attributed to the tax relief on qualifying dividend income and capital gains from the disposal of a subsidiary. Participation relief is not an outright tax exemption, but rather a tax abatement mechanism. It is therefore also commonly referred to as 'participation deduction'.

Participation relief is a percentage deduction from CIT that is equal to net participation income divided by taxable income. Net participation income consists of the gross participation income from qualifying dividends and (usually) qualifying capital gains less related administration and financing costs and any depreciation of the participation that is linked to the dividend distribution. In most cases, participation relief results in a full exemption of participation income from federal CIT, or one close thereto. Note that participation relief may be diluted in certain cases (e.g. if loss carryforwards are offset).

The participation relief on dividend income is mandatory at the federal CIT as well as at the cantonal/communal level. The participation relief on capital gains is voluntary for cantonal/communal tax purposes, but nevertheless implemented by all cantonal tax acts. Specific privileged cantonal/communal tax regimes may foresee more favourable rules for dividend income and capital gains than the participation relief (*see Privileged cantonal tax regimes in the Tax credits and incentives section*).

Switzerland

Dividend income

Dividends qualifying for participation relief are those from participations representing at least 10% of the share capital or 10% of profits and reserves of another company or those having a market value of at least CHF 1 million. Note that there is neither a minimum holding period nor a requirement that the dividend paying subsidiary is liable to income tax in its jurisdiction of residence.

Capital gains

Capital gains derived from the disposal of a qualifying participation are entitled to participation relief if the following conditions are cumulatively met:

- The participation sold was owned by the company for a period of at least one year.
- The amount sold constitutes at least 10% of the share capital or 10% of profits and reserves of the underlying subsidiary. Partial sales of residual holdings of less than 10% are possible, provided their market value at the beginning of the year still amounted to at least CHF 1 million.

It is noteworthy that capital gains are only entitled to participation relief to the extent the sales price exceeds the original investment costs of the participation, whereas the so-called 'recaptured depreciation' (i.e. the amount of former depreciations) is taxable.

Interest income

Interest income earned is taxable income. It is of no relevance whether the payment of the interest was made by a related party (affiliated company or shareholder) or by a third party (*see Interest expense in the Deductions section*).

Foreign exchange gains

Realised foreign exchange gains (transaction gains) are included in the tax basis of a corporation as taxable. Based on a federal court decision in 2009, unrealised gains (or losses) resulting from the translation of financial statements in a foreign (functional) currency to CHF (presentation currency) may not be taxable (respectively tax deductible).

Foreign income

Swiss tax resident corporations are basically taxed on their worldwide income. However, income attributable to a foreign PE (i.e. outside Switzerland) is not taxed in Switzerland. It may only be taken into account to determine the applicable tax rate, in case progressive tax rates apply. The same rule applies for income from real estate property situated abroad.

Dividends, interest, and royalties from Swiss or foreign sources are included in taxable income. However, in certain cantons, special methods of assessment may apply for dividend and other income originating outside Switzerland. For dividend income, a relief generally is available at the federal income tax level as well as at the cantonal/communal level (*see Participation relief above*). The irrecoverable portion of foreign WHT of most treaty countries can be credited against the related Swiss income taxes on the same income. Foreign WHT of all non-treaty countries generally are not creditable, but they are deductible for income tax purposes.

There are no controlled foreign company (CFC) rules in Switzerland. Consequently, undistributed income of foreign subsidiaries is usually not taxed in Switzerland (*see Controlled foreign companies [CFCs] in the Group taxation section*).

Deductions

The statutory accounts of a Swiss company are the basis for determining taxable income. To be tax deductible, an expense has to be booked in the statutory accounts accordingly.

Generally, all business expenses that are booked in the statutory accounts are tax deductible assuming they are economically justified from a tax perspective. If an expense is not a justifiable business expense in the sense of the tax law, it will be added back to taxable income. Examples typically include excessive depreciation, non-justified payments to related parties (e.g. hidden profit distributions), etc.

Depreciation and amortisation

Maximum depreciation/amortisation rates allowed for tax purposes are issued by the Federal Tax Administration. Higher depreciation/amortisation is allowed for tax purposes if the taxpayer can prove that such higher depreciation/amortisation is required (not only allowed) from a statutory accounting perspective. Some cantons follow the federal guidelines, whereas some cantons apply their own (more liberal) applicable depreciation/amortisation rates.

The following summary of the rates specified by the Federal Tax Administration provides the general range of tax accepted depreciation:

Assets	Declining-balance (%)	Straight-line (%)
Commercial buildings		
Buildings alone	4	2
Buildings and land combined	3	1.5
Equipment		
Office furniture and equipment	25	12.5
Computer hardware and software	40	20
Other assets		
Motor vehicles	40	20
Intangible assets	40	20

Some cantons (e.g. Basel-City, Berne, Grison, Zurich) take a more liberal approach and even permit a write-down of certain assets (including fixed assets) to 20% or nil of the purchase price in the first year, provided that such write-downs do not, in the aggregate, result in a drastic decline in taxable income or even a tax loss. For tax purposes, such write-downs must be booked in the statutory accounts and generally disclosed in the tax return. As the cantonal tax authorities are responsible for assessing not only cantonal/communal CIT but also federal CIT, the accelerated depreciation will typically be accepted for federal CIT purposes as well.

Goodwill

Only acquired goodwill (derivative goodwill) may be capitalised in the statutory accounts and be amortised. Amortisation is generally allowed straight-line over five years. Special limitations apply to acquired shares, whereas the purchase price for these shares partly represents inherent goodwill.

Switzerland

Interest expense

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliated company or shareholder) has to reflect the fair market rate and is subject to limitations (see *Thin capitalisation in the Group taxation section*).

With respect to related parties, the Federal Tax Administration annually issues safe harbour interest rates to be used on loans denominated in CHF on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates used are at arm's length and more appropriate in the present case. The cantons usually follow these federal guidelines.

The safe harbour rules for loans denominated in CHF applicable as of 1 January 2012 are as follows:

For loans made to related parties	Minimum interest rate (%)
Financed from equity	1½
Financed from debt (actual costs plus at least):	
On amount up to CHF 10 million	½
On amounts of more than CHF 10 million	¼
But in all cases at least	1½

For loans from related parties	Maximum interest rate (%)	
	Home construction/ agriculture	Industry and business
Type of loan		
Real estate loans	1½	2
A loan up to the amount generally acceptable for mortgages (i.e. 2/3 of the market value of the real estate)		
Rest, whereby the following maximum interest rates for debt are applicable:	2¼	2¾
Land, villas, residences, vacation houses, business premises up to 70% of the market value		
Other real estate up to 80% of the market value		
Operational loans		
Made to trading and production companies	-	3¾*
Made to holding and asset administration companies	-	3¾*

* In calculating the amount of the maximum interest permissible from a tax perspective, any potentially existing hidden equity (under Swiss thin capitalisation rules) has to be considered.

Bad debt provision

Based on a longstanding but not published practice in Switzerland, it is admissible to set up an accounting provision for specific impaired debts, which will be accepted for income tax purposes. Unlike most other countries, it is also possible in Switzerland to account for an additional ('lump sum') bad debt provision of 5% on all domestic and 10% on all foreign receivables (i.e. after deduction of specific impaired debts), except for intercompany receivables and receivables to the public, enabling the taxpayer to defer the related tax liability until this provision has been released. Some cantons, such as Zurich, accept an even higher reserve (i.e. 10% on domestic and 20% on foreign receivables). This additional bad debt provision may have the character of a 'hidden'

(i.e. undisclosed) reserve and is appropriate because the Swiss accounting standards favour prudence over true and fair view accounting principles.

Obsolete inventory provision

Similarly to the bad debt provision, it is also possible to account for a 'hidden' (i.e. undisclosed) reserve on a company's inventory. This provision, which must also be booked in the statutory accounts, is accepted for tax purposes (similar to the bad debt provision). Specifically, a company may book a provision for obsolete inventory as well as a hidden reserve on 33.3% of the inventory value after deduction of the obsolete inventory.

Charitable contributions

At the federal level, charitable contributions up to 20% of the net profit (after tax) of a company are tax deductible, if certain criteria are met. In particular, the charitable contribution has to be remitted to (i) Swiss legal entities which are exempt from taxation based on their public welfare or exclusively charitable objective or to (ii) the Swiss Federation, a Swiss canton or municipality, or their agencies (*Anstalten*). The cantons usually apply the same rules and similar thresholds.

Sponsoring contributions are only tax deductible if commercially justified (without specific thresholds).

Royalties

Royalty payments are generally deductible for tax purposes as long as the royalty rate is at arm's length.

Costs of employee share plans and stock option plans

The cost of employee share plans and stock option plans are generally deductible, assuming the employees eligible for the plan are employed by the Swiss company. The same holds true for the recharge of costs for plans covering local employees.

Fines and penalties

Under Swiss tax law, tax fines are not tax deductible. The potential tax deductibility of other fines or penalties has to be analysed with respect to the specific case.

Tax expenses

Corporate income and capital taxes paid to the federal government as well as to the cantons and the municipalities are tax deductible.

Net operating losses

Tax losses can be carried forward for, at maximum, seven years and can be offset against the taxable income of the following seven years. There is no carryback of tax losses in Switzerland.

Payments to foreign affiliates

Management and services fees paid by a Swiss company to a related party are generally tax deductible as long as the fees are at arm's length.

Group taxation

Tax is levied on each corporation as a separate entity. A parent company and its Swiss subsidiaries are taxed separately, and only the dividends from the subsidiaries (but not their profits) are taxable in the parent company's hands. However, usually for dividend

Switzerland

income, the participation relief is applicable (*see Participation relief in the Income determination section*). For income and capital taxes, no rules on group taxation exist.

Transfer pricing

Switzerland is of the opinion that transfer pricing matters cannot be addressed by legislation and therefore has no plans to issue any domestic provisions on transfer pricing in the near future. There is, however, an increasing awareness of the issue and concern on the part of the Swiss tax authorities that taxpayers may transfer profits without economic justification to countries with strict transfer pricing rules and documentation requirements in order to avoid challenges by the respective local tax authorities. In this context, Swiss tax authorities take an increasing interest in a company's transfer pricing position in order to defend their own position. Some cantonal tax authorities started to particularly focus on low risk/low profit entities located in Switzerland.

Switzerland follows the OECD Guidelines as closely as possible and recognises the arm's-length principle based on interpretation of actual legislation. To clarify transfer pricing issues, Switzerland offers an informal procedure for agreeing to pricing policies in advance.

Thin capitalisation

Swiss thin capitalisation rules are, in general, only applicable for related parties. In case of a thin capitalisation, the related party debts can be treated as taxable equity. The respective circular letter issued by the Federal Tax Administration provides for debt/equity ratios as safe harbour rules. As an example, the debt/equity ratio is generally fixed at 6:1 for finance companies (safe harbour). Interest paid on loans that exceed the relevant ratios are not deductible; further, these interest may be deemed as a hidden distribution and hence subject to Swiss WHT. There are no limitations on the financing of Swiss corporations by independent third parties (e.g. banks).

Interest rates paid to affiliated companies are also subject to periodically fixed ceilings (*see Interest expense in the Deductions section*). The deduction of interest in excess of the permitted rate may be disallowed and treated as a hidden distribution subject to Swiss WHT.

Controlled foreign companies (CFCs)

In Switzerland, no CFC or 'subject to tax' rules exist. Foreign companies are therefore recognised for Swiss tax purposes if they are managed and controlled offshore and are not set-up purely for the reason of avoiding Swiss taxes.

Tax credits and incentives

Generally, cantons offer competitive tax rates for cantonal and communal tax purposes. Depending on the specific cantonal and communal tax location in Switzerland, the ordinary overall (federal, cantonal, and communal) effective CIT rates may vary between 11.5% and 24.2% (*see the Taxes on corporate income section*). The cantons continually try to improve their attractiveness as business locations. As a result of the corporate tax reform II, the cantons may now choose to credit CIT against the capital tax to reduce the overall tax burden (*see Capital tax in the Other taxes section*). As a further example, the canton of Nidwalden introduced a tax relief for certain licensing income (so-called license-box), whereupon net licence income from the use of intangible assets is taxed separately at a reduced corporate tax rate of $\frac{1}{5}$ of the regular rate.

In addition, many cantons offer tax incentives for newly established companies or for expansion investments, such as tax holidays or significant tax relief for cantonal and communal tax purposes for up to ten years. In some cantons or for specific regions, a tax holiday may even be granted for federal CIT purposes if certain conditions are met.

Privileged cantonal tax regimes

Many cantons offer privileged corporate tax regimes. Usually, an up-front confirmation for such privileged tax regimes can be obtained by way of an advance tax ruling with the respective cantonal tax authorities. Such ruling process usually takes at least four to six weeks.

The privileged tax regimes, as described below, are usually granted for an unlimited period of time and can be relied upon unless the Swiss company's circumstances change materially.

Holding company tax regime

A qualifying holding company is exempt from all cantonal/communal CIT (with the exception of income from Swiss real estate, which is subject to tax after deduction of typical mortgage expenditures on such real estate).

Consequently, a holding company is in principle only subject to an effective income tax rate of 7.83% (i.e. federal CIT rate) prior to participation relief for qualifying dividends and capital gains. Further, usually a reduced capital tax rate at the cantonal/communal level applies.

Companies which meet the following conditions are eligible for the holding company tax status:

- The primary purpose of the company must be to hold and to manage long term equity investments in subsidiaries, and this purpose must be stated in the by-laws.
- The company must not be engaged in a commercial activity in Switzerland.
- The company must pass an alternative asset or income test, whereby either two-thirds of the company's assets must consist of substantial shareholdings or participations or two-thirds of total income of the company must consist of participation income (dividend income or capital gains) from such shareholdings and participations.

A tax ruling may be obtained from the cantonal tax authorities in the proposed canton of residence in order to confirm eligibility for the holding company status prior to forming the holding company.

Domicile company tax regime

Companies which only carry out administrative functions in Switzerland but have no commercial activities are eligible for the domicile company tax status.

Insofar as a company fulfils the above mentioned criteria, it may apply with the cantonal tax authorities in the proposed canton of residence for a tax ruling entitling it to the following taxation:

- A modest portion of foreign source income (i.e. from 0% to 15%) is subject to tax in accordance with the importance of the administrative function in Switzerland.
- Income from qualifying participations (including dividends, capital gains, and re-evaluation gains) is usually tax exempt (whereas losses deriving from qualifying participations usually are not tax deductible).

Switzerland

- All income from Swiss sources is taxed at ordinary rates.
- Expenditures which are justified for business purposes are deductible from the income to which they have a business correlation.
- Reduced capital tax rates usually are applicable.

The conditions to qualify as a domicile company vary from canton to canton. This is particularly the case with regard to determining the percentage of income from foreign sources subject to tax in Switzerland and to the definition of exactly what type of income is considered foreign source income.

A domicile company can be expected to be subject to an effective tax rate of 7.83% to 11% on foreign-source income.

Mixed trading company tax regime

This tax status, which is very similar to the domicile company tax status, was given different names by the cantons. Internationally, it is most often referred to as the 'mixed trading company' tax status.

In contrast to the pure domicile company tax status, a mixed trading company is allowed to undertake limited commercial activities in Switzerland. As a general rule, at least 80% of the income from commercial activities of a mixed trading company must derive from non-Swiss sources (i.e. a maximum of 20% of income may be linked to Swiss sources). Many cantons additionally require that at least 80% of the costs must be related to activities undertaken abroad.

Insofar as a company fulfils the above mentioned criteria, it may apply with the appropriate cantonal tax authorities for a tax ruling entitling it to a tax treatment analogous to the rules set forth above for domicile companies. Depending on the concrete Swiss activity and infrastructure, the portion subject to cantonal and communal income taxes generally varies between 5% and 25% of the foreign source income and is generally higher than is the case for domicile companies. The exact portion needs to be clarified with the responsible cantonal tax authorities in the tax ruling.

Foreign tax credit

Swiss tax resident corporations may suffer foreign non-recoverable WHTs on dividend, interest, and royalty income derived from foreign sources. As such foreign-source income is generally subject to income taxation in Switzerland, a double taxation occurs. In case a double tax treaty (DTT) exists and in order to mitigate or to avoid double taxation, Switzerland usually applies the credit method. Specific conditions and formalities will need to be met to benefit from foreign tax credits.

Withholding taxes

The statutory rate of Swiss WHT is 35%. Relief, if any, is generally granted by refund. With respect to related companies, a mere notification/reporting procedure may be requested for the fraction of the Swiss WHT exceeding the residual WHT. The table further below shows the residual/remaining tax for the recipient. Credit for the unrelieved portion of Swiss WHT may (in case the notification/reporting procedure does not apply) be available in the country of the recipient.

Capital contribution principle

Since 1 January 2011, the capital contribution principle allows the repayment of qualifying shareholders' capital contributions without deduction of Swiss WHT at the level of the distributing company and without income tax implications at the level of Swiss individual shareholders (holding the shares as private assets). Based on the applicable legal provisions, capital contributions that were accumulated after 31 December 1996 and meet some further requirements (e.g. special and timely recordings in the statutory books and vis-à-vis the tax authority) are deemed 'qualifying capital contributions'. In general, the capital contribution principle applies for premiums, additionally paid-in capital, and contributions into the reserves of a company without increasing the nominal share capital.

* Bilateral Agreements (in particular Article 15 of the Savings Agreement) between Switzerland and the European Union (EU) apply as of 1 July 2005 and provide the following benefits:

Upon request, Swiss WHT on dividends paid by a Swiss subsidiary company to its EU parent company may be reduced to 0% (reduction at source) and is only subject to a notification/reporting procedure, if the following conditions are cumulatively met:

- Direct minimum holding of 25% of the subsidiary's capital for at least two years.
- Both companies are subject to CIT.

Upon request, WHT on interest and royalty payments made between associated companies or their PE resident respectively situated in Switzerland and the European Union may be reduced to 0% (reduction at source) in the source state, if the following conditions are cumulatively met:

- Direct minimum holding of 25% for at least two years (parent/subsidiary) or direct holding by a third company of minimum 25% in the capital of both companies for at least two years (sister companies).
- Both companies are subject to CIT.

Transition periods/rules:

- Greece, Latvia, Poland, and Portugal: WHT rate on interest is at maximum 5% as of 1 July 2009 to 30 June 2013, afterwards 0%.
- The above mentioned transition rules only cover the Swiss outbound perspective. Further transition rules may apply for Swiss inbound payments (e.g. for royalties paid to a Swiss company), e.g. with respect to Czech Republic and Spain.

In general, the Bilateral Agreements between Switzerland and the European Union are applicable with all EU countries. Consequently, the 35% Swiss WHT can also be reduced in connection with the EU countries, if the requirements above are met. In lack of a DTT, this is in particular to be mentioned with respect to Malta and Cyprus. The application of the Bilateral Agreements is subject to foreign and Swiss misuse conditions.

DTTs between Switzerland and EU countries with more favourable tax treatment of dividend, interest, and royalty payments remain unaffected.

Notes

1. In Switzerland, there is no WHT on interest deriving from regular loan agreements. The Swiss WHT of 35% is only levied on interest paid by banking institutions (or paid by entities tax-wise qualified as 'banking institutions') to non-banks, interest on bonds, and interest on bond-like loans. Further, the Swiss WHT of 35% may be levied on interest paid on mortgage loans with respect to Swiss located real estate; however, this is not covered in the table above.

Switzerland

2. There is no Swiss WHT on royalties, licences, and similar fees payable by Swiss individuals or corporations (provided that the dealing at arm's-length principle is met).
3. The statutory Swiss WHT rate of 35% is levied but refunded, provided that the respective earnings are declared as income for tax purposes.
4. Between Swiss group companies, the Swiss WHT of 35% is usually fully refundable; in many cases, the tax liability can be met by the notification/reporting procedure. For this purpose, a substantial holding is a participation of at least 10% in the share capital or profits and reserves or otherwise a market value of at least CHF 1 million.
5. Certain types of interest payments income deriving from several countries are exempt from WHT.
6. 15% residual tax for companies with more than 10% shareholding if the company receiving the dividend is directly or indirectly controlled by a shareholder not resident in the European Union or Switzerland and cannot prove that the company is not set up only to profit from the 0% WHT on dividends.
7. Full relief of the WHT on interest paid for a loan granted by the Israel Government (including political subdivisions and local corporate bodies) or granted by the Israel Central Bank.
8. Interest on bank loans is 5%.
9. Full relief if certain requirements are met.
10. Interest on bank loans is 10%.
11. Full relief for certain dividend payments to certain United States (US) pension funds.
12. Full relief on certain categories of interest.
13. Interest on bank loans is 0%.
14. According to the territorial principle of Venezuela, only certain persons can benefit from the tax relief.
15. Interest on bank loans to corporations is 0%.
16. 0% WHT rate on dividends of participations of at least 25% if participation was held for at least two years.
17. 20% minimal shareholding plus foreign investment of minimal 200,000 United States dollars (USD).
18. 20% minimal shareholding plus foreign investment of minimal CHF 200,000.
19. 30% only on income bonds ('*Gewinnobligationen*') and on profit participating loans ('*partiarische Darlehen*').
20. 5% for specific power houses ('*Grenzkraftwerke*').
21. 10% WHT for shareholdings between 20% and 50%; 7% WHT for shareholdings of more than 50%.
22. 5% WHT for shareholdings of more than 20%; 10% WHT for others.
23. 5% WHT on loans from banks and insurance institutions, bonds or other securities traded on a stock market and on certain credit buying; 15% on any other interest.
24. 5% WHT if the shareholding of 10% was held less than two years, 0% WHT if the shareholding of 10% was held longer than two years.
25. 5% WHT if interest is paid to a bank or a securities dealer or an insurance/reinsurance institution; 10% Swiss WHT in all other cases.
26. Only applicable if holding period is at least 12 months.
27. Only applicable if holding period is at least six months.
28. Only applicable if holding period is at least 24 months.
29. As of 1 July 2013, WHT on interest will be reduced to 0%.
30. New DTT between Switzerland and Turkey, in force since 8 February 2012, applicable from 1 January 2013.
31. 5% WHT on interest in connection with export promotion; 10% on any other interest.

Tax administration

Taxable period

The tax year is the business year. Thus, the basis for corporate taxation is the applicable accounting period, which may end at any date within a calendar year.

Tax returns

The tax system is based on taxpayers' declarations, with subsequent assessments being issued by the tax authorities on the basis of the tax returns filed. The tax return filing deadlines vary from canton to canton. Companies are initially assessed on a provisional basis, with the final assessments being issued after the tax base was either subject of a tax audit or declared final by the authorities.

Payment of tax

Unless instalment payments are specifically requested, federal, cantonal, and communal taxes on income and capital are, in most cantons and for federal tax purposes, payable only upon receipt of a demand based on a provisional or final assessment.

Note that cantonal exemptions apply. As an example, based on the date of maturity of the respective tax year (30 September), the canton of Zurich levies late payment interest to the extent that the full (final) tax amount had not been paid in time (independent from any earlier provisional tax invoices). About one month before the due date, a (provisional) tax bill based on the latest tax return filed or the assessment of the preceding period is sent to the taxpayer. Payment is usually made in two or three instalments. If the entire amount is paid up front, a discount may be granted.

The provisional federal CIT is usually due by 31 March of the year following the tax period at question. The due date of the final federal CIT and the provisional and definitive cantonal CIT varies.

Other issues

Reorganisations

Most corporate reorganisations (e.g. mergers, de-mergers, transfer of business assets within a group of companies, vertical and horizontal spin-off of business or part of business, share-for-share transactions and cross-border reorganisation where the Swiss tax residence is maintained, and replacement of participations) are typically possible without triggering adverse tax consequences (tax neutrality). In addition, special rules provide for a legal framework to tax neutrally substitute assets and qualifying shareholdings.

Significant developments

Decree 23, dated 8 December 2011, has reduced the consumption tax imposed on a number of food items and on the hospitality sector. In addition, the decree now levies a fixed price measured in Syrian pounds (SYP) per kilogram (kg) (instead of a percentage on the value of the invoice) on a number of food items, from SYP 1 per kg to SYP 10 per kg, depending on the food item.

Due to the political instability in Syria, there have been no other significant corporate tax developments during the past year.

Taxes on corporate income

Except for the special cases listed below, common corporate income tax (CIT) rates (including branches of a non-resident entity) vary between 10% and 28% of profits, as follows:

Taxable profit (SYP)	CIT rate (%)
Up to 200,000	10
From 200,001 to 500,000	15
From 500,001 to 1,000,000	20
From 1,000,001 to 3,000,000	24
Over 3,000,000	28

CIT is levied on all corporeal and incorporeal persons, residents and non-residents, on all profits generated in Syria. Profits are considered to be realised in Syria if they occurred from efforts exerted in Syria, irrespective of the taxpayer's identity or place of residency.

Syria does not tax residents on a worldwide basis. Syria's tax is based on territoriality.

Surtaxes

Depending on the location of the taxpayer, an additional local administration surtax of 4% to 10% (of the CIT amount) will apply.

Joint stock companies (JSCs) with more than 50% shares offered to the public

JSCs offering more than 50% of their shares to the public are subject to a flat CIT rate of 14% on profits. In this case, the 4% to 10% administration surtax does not apply.

Other JSCs, limited liability companies (LLCs), and projects included under investment encouragement laws

JSCs offering less than 50% of their shares to the public, LLCs, and projects signed with Syrian companies included under the investment encouragement laws are subject to a flat CIT rate of 22% on profits. In this case, the 4% to 10% local administration surtax applies.

Hotels, restaurants, and recreational establishments

International standard, first and second-class hotels, restaurants, lodging houses, related services, and all recreational establishments are subject to tax based on their turnover. The tax rate is 3%, and it covers both CIT and salary tax.

Contracts with public sector, oil companies, and non-residents

A Syrian company contracting with the public sector and/or with an oil company or with a non-resident entity will be subject to a withholding tax (WHT) based on the contract value (on that specific contract only) rather than CIT on real profits.

The same tax rate applies to non-residents operating directly from abroad; they are subject to a 1%, 2%, 4%, 7%, or 10% WHT on the value of the contract. The applicable rates vary according to the nature of the contract and the customer. The non-resident tax covers both income tax and salary tax of the foreign and local employees working on the contract.

Corporate residence

The following entities are considered Syrian residents for tax purposes:

- An entity whose principal activities are administered in Syria.
- An entity that adopts the Syrian Arab Republic as its headquarters.
- Branches or offices of foreign companies in Syria.

Permanent establishment (PE)

In Syria, the law does not discuss PE.

Other taxes

Value-added tax (VAT)

There is no VAT in Syria.

Customs duties

In setting the rules for valuation of merchandise, Syrian customs take into consideration the related explanatory notes issued by the World Trade Organization (WTO).

Customs duties classified in the Harmonized Tariff Schedule apply to goods introduced into Syria. Import operations are subject to prior licenses granted to all importers after they present their documents to the commercial registration and chambers of commerce or industry in Syria.

The value of the goods imported to Syria that should be declared is based on the transaction value. It includes the price which is actually paid or payable for the goods when purchased for the purpose of being exported to Syria and any and all other subsequent expenses incurred by the buyer that were not covered by the price

Syria

(including but not limited to, shipment, insurance, unloading, etc.) until the arrival of goods to Syria.

In practice, customs duty is levied on the higher of the value of the transaction to which are added subsequent expenses or the price specified by the General Foreign Trade Organization (GFTO).

Ordinary tariffs and preferential tariffs

Ordinary tariffs apply to goods which are not qualified for preferential tariffs.

Preferential tariffs apply to all goods or part thereof originating from a country or a group of countries with which Syria is bound by special customs agreements that qualify these goods for preferential status within limits specified in the said agreements.

Merchandise that has been put into use in a country other than its country of origin, and that is imported from that country, is subject to the higher customs tariff between country of origin and country of import. Merchandise that has been manufactured in a country other than its country of origin is subject to customs tariff related to country of origin or country of manufacture depending on the degree of manufacture in each country and according to the rules set by the Minister.

Consumption tax/Excise tax

Consumption tax is imposed on certain services and luxury goods, with rates ranging from 1.5% to 40%. Taxpayers are required to register for consumption tax purposes, and tax is withheld by the party provided the service or goods or by customs (at import) and paid on a monthly basis to the Ministry of Finance.

Decree 23, dated 8 December 2011, has reduced the consumption tax imposed on a number of food items and on the hospitality sector. In addition, the decree now levies a fixed price measured in Syrian pounds per kg (instead of a percentage on the value of the invoice) on a number of food items, from SYP 1 per kg to SYP 10 per kg, depending on the food item.

Property taxes

Tax on real estate ranges from 14% to 60% annually, based on the type of property. Property tax is also paid on rental income at progressive rates ranging from between 14% and 60%.

Stamp duty

Stamp duty generally is imposed on transactions (e.g. the formation of corporations, the execution of documents, licences, contracts) at a rate ranging from 0.4% to 0.7%.

The surtax is applicable on the stamp duty tax.

Registration taxes

The estimated cost of establishing a company ranges from 4,000 United States dollars (USD) to USD 8,300 plus 0.5% of the capital stamp duty plus local administration tax of 5% of the stamp duty.

For branch offices, establishment costs are lower and may be estimated at USD 3,000.

Branch income

The taxes on branch income are the same as taxes on corporate income (i.e. tax rate varies between 10% and 28%). *See the Taxes on corporate income section for more information.*

Income determination**Inventory valuation**

Inventory is typically valued at the specific cost. Otherwise, inventory may be valued via the first in first out (FIFO) or weighted average cost method.

Capital gains

Capital gains are considered taxable income and are taxed at the normal CIT rates (10% to 28%).

Capital gains include dividends, interest, revenue, premiums, and other cash income sources.

Dividend income

Dividends paid by Syrian corporations on previously taxed income are not subsequently subject to tax upon distribution.

Dividends received from a non-resident entity are subject to tax upon distribution in Syria of 7.5%.

Interest income

Interest income is taxed at the normal CIT rates (10% to 28%).

Rental income

Rental income should be deducted from the accounting result to reach the taxable result.

Property tax is paid on rental income at progressive rates ranging between 14% and 60%.

Royalty income

Royalties received are taxed as ordinary income.

Partnership income

Profits of partnerships are deemed to be distributed and are taxed at progressive rates of 10% to 28%.

Foreign income

Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches. However, all income considered to be managed from Syria is considered to be sourced in Syria and will be taxed in Syria.

Syria

Deductions

Depreciation

Depreciation of property, plant, and equipment (at rates fixed by ministerial decree) is deductible. The depreciation method to be used is the straight-line method.

Goodwill

Goodwill is not amortised over a specific period of time. An annual impairment test is performed, and the result is recorded as a gain or loss that is included in the CIT calculation.

Start-up expenses

There are no specific regulations concerning the deductibility of start-up expenses.

Interest expenses

There are no specific regulations concerning the deductibility of interest expenses.

Bad debt

There are no specific regulations concerning the deductibility of bad debt.

Charitable contributions

Grants paid by taxable persons against official receipts for known public or private entities are deductible on condition that the grants do not exceed 3% of net profits.

Fines and penalties

Fines and penalties are not deductible in Syria.

Taxes

Taxes and duties levied during the year, except CIT, are deductible.

Other significant items

The following expenses are also deductible:

- Cost of goods sold.
- Cost of services rendered.
- Rent paid for the business premises (or rent value if the taxable entity owns the property).
- Salaries and incentives paid to employees/workers.
- Payments representing employer's portion of social security contributions.
- Indemnities and allowances (end of service) paid according to the labour law.

The following expenses are not deductible:

- Expenses leading to the increase of the value of fixed assets (capital expenditures).
- Personal expenses considered by the business owner (or/and his partner) as personal compensation.
- Compensations for partners in some business entities.

Net operating losses

Losses may be carried forward for five years. The carryback of losses is not available.

Payments to foreign affiliates

Payments to foreign affiliates are considered normal payments because Syria has no transfer pricing rules. However, the payments may be subject to WHT.

Group taxation

There is no group taxation in Syria.

Transfer pricing

No transfer pricing rules exist in Syria.

Thin capitalisation

No thin capitalisation rules exist in Syria.

Tax credits and incentives

Investment incentives

Investment encouragement regulations allow foreign investors to benefit from customs exemptions for the imports used in the investment.

Permanent CIT exemptions

Physical and moral persons and associations exempted from CIT, either through the real profit or lump-sum profit method, are the following:

- Types of consumers and investors' cooperative associations.
- Farmers harvesting and selling crops; this exemption includes animals and livestock bred on their farming lands.
- Facilities in which stocks are bred or where poultry farming is exercised; subject to CIT according to the real-profit tax.
- Day-care centres.
- Institutes and associations taking care of people with special needs.
- 75% of the yearly net profits for air and maritime transportation.
- 50% of net profits of stock breeding and poultry farming facilities.

Withholding taxes

Interest

The income, revenue, and interest earned from accounts opened at Syrian banks and from treasury bonds are subject to an 8.25% total WHT (i.e. 7.5% WHT and 10% surtax).

Royalties

Royalties paid to non-residents are subject to a 7% total WHT (i.e. 5% CIT as well as a 2% salary tax).

Resident contractors

When a Syrian company performs contracts with the public sector, with an oil company, or with a non-resident entity, it will be subject to a WHT based on the contract value (on that specific contract) rather than CIT on real profits.

Non-resident contractors

Revenue earned by non-resident contractors in Syria is subject to a WHT based on the contract value (of that specific contract) rather than CIT on real profits.

Syria

Double taxation treaties (DTTs)

The table below shows the treaty and non-treaty WHT rates. If the treaty rates are higher, the recipient may choose the non-treaty rates.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	0	7.5	7
Treaty:			
Algeria	10	10	18
Armenia	10	10	12
Bahrain	(1)	10	18
Bulgaria	10	10	18
Croatia	(10)	10	12
Cyprus	15	10	(8)
Czech Republic	10	10	12
Egypt	15	15	20

Tunisia	0	10	18
Turkey	10	10	(8)
Ukraine	(1)	10	18
United Arab Emirates	(1)	10	18

Notes

1. Taxed only in the dividend beneficiary's jurisdiction (when the beneficiary is owner of the shares).
2. Tax should not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that owns at least 10% of the shares of the company paying the dividends or
 - 10% of the gross amount of the dividends in all other cases.
3. Tax should not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 25% of the capital of the company paying the dividends or
 - 10% of the gross amount of the dividends in all other cases.
4. Total Malta or Syrian tax on the profits of a company and the dividends distributed by such company, as the case may be, shall not exceed the maximum tax chargeable on the company's profits out of which the dividends are paid.
5. Tax should not exceed:

- 18% of the gross amount for any patent, trademark, design or model, plan, secret formula or process, industrial or scientific equipment, or for information concerning industrial or scientific experience
 - 15% of the gross amount paid for any copyright of literary, artistic, or scientific work, or
 - 10% of the gross amount paid for any copyright of cinematographic films, or tapes for television, or radio broadcasting.
6. Tax should not exceed:
- 10% of gross amount paid for cinematographic films, magnetic films, and tapes for television and radio or
 - 5% of the sum paid for any copyright of a literary, artistic, or scientific work, including cinematographic films and films and recordings for other forms of radio transmission or television transmission; any patent, trademark, design or model, plan, secret formula, or secret process, as well as for the use or right to use industrial, commercial, or scientific equipment, and for information related to experience in the industrial, commercial, or scientific area.
7. Tax should not exceed:
- 18% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, any computer software program, or for information concerning industrial, commercial, or scientific experience
 - 13.5% of the gross amount of royalties paid for any copyright of literary, artistic, or scientific work, or
 - 4.5% of the gross amount of royalties paid for cinematographic films, programmes, and recordings for radio or television broadcasting.
8. Tax should not exceed:
- 15% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience or
 - 10% of the gross amount of the royalties for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
9. Tax should not exceed:
- 20% of the gross amount of royalties paid for any patent, trademark, design or model, plan, or any industrial or scientific equipment, or for information concerning industrial or scientific experience or
 - 15% of the gross amount of the royalties for any copyright of literary, artistic, or scientific work including cinematographic films, or tapes for television or radio broadcasting.
10. Tax should not exceed:
- 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends or
 - 10% of the gross amount of the dividends in all other cases.

Tax administration

Taxable period

The tax year in Syria is the calendar year.

Tax returns

Taxpayers in Syria shall comply with the following requirements:

- Tax returns must be filed by 31 May for JSCs and LLCs and 31 March for other types of companies.
- Salary WHT should be submitted by the employer on a semi-annual basis.

Payment of tax

Payment is due at the time of filing.

Penalties

A penalty is assessed for late payments 30 days after the filing date at a rate of 10%, up to the amount of the tax liability.

Statute of limitations

In Syria, the statute of limitations with respect to tax is five years.

Other issues

Choice of business entity

In 2011, a bill was issued (Law No. 13/2011) to encourage Syrian companies to transfer to limited liability and shareholding forms. This law extends the facilities provided by Law No. 61/2007 and grants additional ones to companies. The law provides for companies to pay between 1% and 2% of the difference in the value of their assets as taxes after their revaluation, instead of a rate of between 14% and 28%, and exempts them from any additional taxes or fees that would fall on them because of the revaluation.

In 2011, Syria also approved a law regulating the establishment and operations of companies, less than three years after a similar bill was passed. The new text, Law No. 29/2011, brings a number of additions and improvements to the rules regulating the establishment of companies in Syria, such as:

- the establishment of one-person limited liabilities
- the transformation of state-owned entities into companies (currently state-owned institutions operate under specific regulations)
- the establishment of holding firms as limited liabilities, and
- the establishment of non-public shareholding companies.

The minimum face value of shares to be sold by JSCs is SYP 100.

In order to ease the establishment of LLCs, investors are able to apply to set their company up through the regional offices of the Syrian Investment Agency, the Industrial Cities located across the country, or the Domestic Trade Directorate of the Governorates.

Holding companies are now able to assume the form of a limited liability, while previously constrained to JSC form. Also, state owned entities can now opt to become public JSCs, post-approval from the Prime Minister, and abide by the Company Law.

In addition, one person LLCs are a new type of company allowed by Law No. 29/2011 that may be established by either Syrian or foreign persons or entities. However, foreign shareholders may establish one person LLCs only in the case where they have projects licensed by specified Syrian authorities.

The minimum capital for such LLCs has been set at SYP 5 million, which is well above the capital set for a standard LLC of SYP 400,000.

These one person LLCs may be transformed into standard LLCs or JSCs at a later stage.

Significant developments

The Taiwan-Switzerland tax treaty came into effect on 13 December 2011. Under this tax treaty, the withholding tax (WHT) rate imposed on dividends has been reduced from 20% to 15%, and may be further reduced to 10% under specified circumstances. WHT rates on royalties and interest have been reduced from 20% to 10%. Taiwan currently has effective double taxation agreements (DTAs) with 23 countries.

Taxes on corporate income

The current corporate income tax (CIT) rate is 17%.

Resident companies in Taiwan are taxed on their worldwide income as follows:

Taxable income (TWD*)	Tax thereon
Up to 120,000	Exempt
120,001 and over	17% of total taxable income

* New Taiwan dollars

A non-resident company is taxed on income derived from Taiwan sources. A non-resident company with a fixed place of business (FPOB) or business agent in Taiwan will be taxed similarly to a resident company (i.e. subject to filing of an annual CIT return based on the same CIT rate provided above). A non-resident company having no FPOB or business agent in Taiwan is subject to WHT at source on its Taiwan-sourced income. WHT rates on dividends, interest, and royalties may be reduced if the recipient is a tax resident of a tax treaty country and the relevant treaty provides for a reduced rate. See the *Withholding taxes* section for more information.

Tonnage tax system

A qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system, where a lump sum tax is calculated on the net tonnage of their fleet. Once the application is approved, the enterprise must remain under the tonnage tax system and cannot switch to the regular tax system at its discretion for ten consecutive years. Furthermore, loss carryforwards and tax incentives are not eligible under the tonnage tax system.

Profit retention tax

An additional 10% profit retention tax is imposed on any current earnings that remain undistributed by the end of the following year.

Taiwan

Imputation tax system

Taiwan operates an imputation tax system to eliminate double taxation on earnings of a corporation. The 17% CIT and 10% profit retention tax already paid by the corporation can be distributed to the resident individual shareholders as tax credits to offset against their individual income tax. However, the tax credits distributable to shareholders are subject to certain limitations.

Non-resident shareholders may credit the 10% profit retention tax previously paid by the investee company against the dividend WHT where the dividends are distributed from retained earnings that have already been subject to the 10% profit retention tax. Please note that credit for profit retention tax from dividend WHT is calculated based on a prescribed formula.

Income basic tax (IBT)

All Taiwan resident companies, as well as non-resident companies with a FPOB or business agent in Taiwan, should calculate IBT if they earn certain income that is tax-exempt. The basic income of a company is the amount calculated in accordance with a formulae stipulated by the government, with a deduction of TWD 2 million. Currently, the IBT rate is 10%. If the IBT amount is greater than the regular CIT amount, taxpayers must pay income tax based on the regular CIT amount plus the difference between the IBT amount and the regular CIT amount. On the other hand, if the regular CIT amount is greater than the IBT amount, no special action is required.

Corporate residence

A company is a resident of Taiwan for CIT purposes if it is incorporated in Taiwan. A non-resident company which has a FPOB or business agent in Taiwan is obligated to file a CIT return in Taiwan on its Taiwan-sourced income.

Permanent establishment (PE)

The term 'permanent establishment' only exists under the underlying DTAs with Taiwan. Taiwan domestic tax regulations only refer to FPOB and business agent, which generally follows the definitions of FPOB and agency PE in the Organisation for Economic Co-operation and Development (OECD) model tax convention.

Other taxes

Business tax

All sales of goods and services in Taiwan, as well as the importation of goods into Taiwan, are subject to business tax. There are two types of business tax systems: value-added tax (VAT) and gross business receipts tax (GBRT).

The sellers and service providers are generally obligated to pay business tax for the sales of goods or services within Taiwan unless the law provides otherwise. For importation of goods, the business tax will be paid by the goods receivers or buyers via customs. For importation of services sold by foreign companies to Taiwanese buyers, business tax shall be paid by the service buyers. However, if the foreign service purchased is under TWD 3,000 per transaction, the business tax shall not apply. Furthermore, the service buyer (corporate entity) will not be required to pay business tax if it adopts the VAT system and is exclusively engaged in taxable transactions.

Value-added tax (VAT)

VAT is applicable to general industries, and the VAT rate is 5%. Under the VAT system, each seller collects output VAT from the buyer at the time of sale, deducts input VAT paid on purchases from output VAT, and remits the balance to the tax authority.

Gross business receipts tax (GBRT)

GBRT is applicable to specified industries (e.g. financial institutions, small businesses). For banks, insurance companies, investment trust companies, securities and futures firms, short-term commercial paper enterprises, and pawnshops, the rate is 2%. For re-insurance enterprises, the rate is 1%.

Customs duties

Taiwan uses the Customs Cooperation Council Nomenclature (CCCN) to classify goods and set duty rates. The customs duty is payable by the consignee or the holder of the bill of lading for imported goods and is based on the dutiable value or the volume of goods imported.

Commodity tax

Commodity tax (excise duty) is levied on certain commodities, as specified in the Commodity Tax Act (including rubber tyres, beverages, cement, plate glass, oil and gas, electrical appliances, and vehicles), at the time when such goods are dispatched from a factory or when imported. Tax rates vary from 8% to 30% and are applicable to different types of commodities based on the value of the goods or the volume in specific circumstances.

Type of commodity	Tax rates/Amount
Rubber tyres	10% or 15%
Beverages	8% or 15%
Cement	TWD 280 to TWD 600 per ton
Plate glass	10%
Oil and gas	TWD 110 to TWD 6,830 per kiloliter or TWD 690 per ton
Electrical appliances	10% to 20%
Vehicles	15% to 30%

Property tax

A tax is levied on land and buildings annually. The land tax rate ranges from 1% to 5.5% of the assessed land value. The building tax rate for business properties is 3% of the assessed value and the rate for non-business properties is 1.2% or 2% of the assessed value.

Stamp tax

Stamp taxes are imposed on each copy of the following documents executed within the territory of Taiwan (with the following respective tax rates):

- Monetary receipts must have a revenue stamp of 0.4% of the amount received per piece. However, a receipt for the money deposited by the bidder requires a revenue stamp of 0.1% of the amount received per piece.
- Contract or deed for the sale or purchase of movable property must have revenue stamp of TWD 12 per piece.
- Contractual agreement under which one party agrees to complete a specific piece of work for the other party for consideration must have a revenue stamp of 0.1% of the contract price.

Taiwan

- Contract for the sale, transfer, and partition of real estate must have a revenue stamp of 0.1% of the contract price.

Securities transaction tax

Tax is levied on securities transactions at the rate of 0.3% on gross proceeds from the sale of domestic shares. Trading in corporate bonds and financial bonds issued by Taiwan companies is temporarily exempt from securities transaction tax assessment.

Luxury tax

With an aim to curb real estate speculation, Selective Goods and Services Tax (also known as luxury tax) of 10% applies on real estate properties purchased not for self use and sold within two years, as well as various luxury products, such as upscale automobiles, yachts, private jets, helicopters, fur, ivory, high-end furniture, and membership rights. However, the rate is increased to 15% where real estate properties purchased not for self use are sold within one year.

Branch income

A non-resident company whose head office is located outside of Taiwan must keep separate books for its branch in Taiwan. A head office or regional headquarters' general and administrative expenses may be allocated to the branch under certain conditions. CIT is assessed only on the branch's profits. A Taiwan branch should complete an annual CIT return.

A Taiwan branch of a foreign company may remit after-tax profits to its foreign head office without further tax due.

Motion picture leasing

A foreign motion picture's branch in Taiwan can deem 45% of its revenue from leasing of motion pictures as cost. However, if a foreign enterprise with no branch office in Taiwan leases motion pictures through agents, 50% of the revenues can be deemed as taxable income.

Deemed profit method

A non-resident company which is engaged in international transportation, construction contracting, provision of technical services, or machinery and equipment leasing within Taiwan, and where the cost and expenses are proven to be difficult to calculate, may apply for an advance approval from the National Tax Administration (NTA) to adopt the deemed profit method to determine the taxable income as 10% or 15% of the gross revenues. This will effectively reduce the WHT rate to 2% to 3% on gross revenues once the approval is obtained from the NTA.

Income determination

A Taiwan resident company is taxed on its net income, which is defined as gross annual income after deduction of costs, expenses, losses, and taxes. Except for certain exempt items, income from all sources, including offshore and onshore, is subject to CIT.

A non-resident company is only taxed on its Taiwan-sourced income. Article 8 of the Income Tax Act and the related Guideline defines the types of income that should be regarded as sourced from Taiwan. For example, fees received by a non-resident

company for service performed entirely outside of Taiwan are exempt from income tax assessment, subject to supporting evidentiary documents.

Inventory valuation

Inventory must be valued at cost. If cost exceeds the net realisable value, the latter may be used as the valuation basis. Cost may be determined by the first in first out (FIFO), moving-average, weighted-average, specific identification, or any other method approved by the tax authorities. Conformity between financial and tax reporting is not required.

Capital gains

Gains on the disposal of fixed assets are taxable as current-year income of the company, with the exception of gains on the sales of land. The capital gains tax on marketable securities is currently exempt. Instead, securities transaction tax is levied on the sales proceeds (*see the Other taxes section*). However, if a non-resident company has a FPOB or business agent in Taiwan, capital gains on the sale of marketable securities may trigger IBT.

Dividend income

Dividends received from resident investee companies by a resident corporate shareholder are not included in taxable income. In addition, the imputation tax credit derived from the dividend income of the investee corporation can be distributed to the domestic corporate shareholders, but this tax credit cannot be used to offset the domestic corporation's income tax liability; rather, the tax credits must be recorded in a separate book until they are further distributed to the resident individual shareholders of the resident corporate shareholders.

Dividends received from foreign subsidiaries are taxable, but credits are given for the WHT paid offshore, limited to the incremental tax liability that would result if the dividends were added to the Taiwan corporate shareholder's taxable income and taxed at the Taiwan CIT rate.

Interest income

Interest received on commercial paper and certain other interest-bearing financial instruments are subject to WHT of 10% and 15% for resident and non-resident taxpayers, respectively (*see the Withholding taxes section*). This income should be reported as current-year income, and the WHT paid can be deducted against the income tax payable.

Foreign income

Taiwan adopts a worldwide tax system to tax its resident company (including the Taiwan subsidiaries of foreign companies). In theory, taxation on foreign investment income of a Taiwanese company is deferred until cash is repatriated to Taiwan and then subject to CIT. However, given Taiwan also taxes undistributed profits based on net income shown on the income statement (*see Profit retention tax in the Taxes on corporate income section*), foreign investment income may still be taxed in Taiwan before cash is repatriated back to Taiwan.

Deductions

Depreciation

Depreciation on all fixed assets other than land, including premises, plants (buildings), and equipment, used to generate income is allowed as a deduction. The straight-line,

Taiwan

fixed percentage on diminishing book value, sum-of-years-digit, unit-of-production, and working-hour methods are acceptable depreciation methods to the tax office. The useful lives of typical assets are shown below:

Asset category	Useful life
Computer equipment	3
Furniture and fixtures	5
Automobile	5
Building	50

With the approval of the tax authority, a company may revalue its fixed assets each time the government's wholesale price index increases by 25% over the base period. A company's base period is established at the time of purchase of fixed assets or at such time when a company revalues its fixed assets. Any increase in fixed assets may then be depreciated for tax purposes.

Goodwill

Goodwill is commonly realised from merger and acquisition, which should follow the purchase method as defined under Taiwan Generally Accepted Accounting Principles (GAAP). Goodwill should be amortised for 15 years if a valuation report is issued by a creditable professional valuation firm and the net identifiable assets are valued separately. However, in practice, the amortisation of goodwill is frequently challenged by the Taiwan tax authority.

Start-up expenses

Start-up expenses during the start-up period can be deducted in the year incurred. The start-up period is from the preparatory stage to the date the business starts to generate significant revenue from its primary business operation.

Interest expenses

Interests on loans that are used for business purposes are deductible in the year incurred. However, for a loan from a non-financial institution, the interest rate shall not exceed 15.6% per annum. As for interest on inter-company loans, the deductible amount is subject to the thin capitalisation rule and transfer pricing regulations (*see the Group taxation section*).

Bad debt

Actual losses on bad debts are allowed for deduction when certain legal proceedings or time requirements have been satisfied. The loss should first be charged against the bad debt provision, which should not exceed either 1% of accounts receivable and notes receivable outstanding or actual average bad debt ratio for the past three years.

Charitable contributions

Charitable contributions to support national defence construction, troop morale, contribution to government of any level, and donation made with special approval of the Ministry of Finance (MOF) are not subject to any tax limit. Donations to other parties are subject to prescribed limits under the relevant regulations.

Fines and penalties

Fines and penalties arising from violation of various tax laws are generally not deductible.

Taxes

All taxes other than income tax are generally deductible, unless where such taxes are related to tax-exempt income. However, tax penalties are not deductible. The tax associated with the acquisition of real estate should be included in the cost of the land or building.

Other significant items

If a company invests in a foreign entity and holds at least 20% equity ownership (this limitation does not apply if special approval is obtained from the Executive Yuan), the company can attribute 20% of the investment amount to a 'reserve for foreign investment loss'.

Net operating losses

A company's net operating losses can be carried forward for ten years. Losses cannot be carried back.

Payments to foreign affiliates

Royalties, interest, and service fees paid to a foreign affiliate are subject to WHT. Royalties or service fees paid to a foreign entity may be tax-exempt if certain requirements are met and prior approval is obtained.

Group taxation

Group enterprises meeting certain criteria under the Financial Holding Company Act and Business Mergers & Acquisitions Act may file consolidated tax returns for the Taiwan parent and its first tier Taiwan subsidiaries. For other enterprises, group taxation is not permitted. The Taiwan parent is eligible to file consolidated tax returns if it continuously holds over 90% of the shares of the subsidiaries for 12 months in a tax year.

Transfer pricing

Transfer pricing regulations were established to constrain multinational corporations from leaving their profits in countries with lower tax rates. For applicable companies, the disclosure of related party transactions in the CIT return and the preparation of a transfer pricing report is required. Upon request, the transfer pricing report will have to be submitted to the Taiwan tax authority within one-month of notice. The transfer pricing report must demonstrate the company's good faith effort to comply with the assessment rules. Without proper reason, failure to comply with such rules will result in additional tax payable and financial penalties. The types of transactions governed by these regulations include the following: transfer of tangible assets, use of tangible assets, transfer of intangible assets, use of intangible assets, rendering of services, use of funds, and other types of transactions prescribed by the MOF.

Thin capitalisation

In January 2011, Taiwan introduced a thin capitalisation rule in the amended Income Tax Act. From 2011 onwards, deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio of 3:1. The thin capitalisation rule generally applies to profit-seeking enterprises, except banks, credit cooperatives, financial holding companies, bills finance companies, insurance companies, and securities companies.

Taiwan

Tax credits and incentives

Certain tax incentives are provided to investors if they are located in prescribed areas, such as science parks, economic processing zones, free-trade-zones, etc. Other tax credits are granted to qualifying companies that invest in specific businesses or industries promoted by the government, such as biotech.

Research and development (R&D) tax incentive

Under the Statute for Innovating Industries (SII), R&D credits are available for up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses were incurred, including the 10% profit retention tax. Unutilised R&D credits will be forfeited and cannot be carried back or carried forward.

According to Regulation Governing R&D Investment Tax Credit (ITC) Available to Profit-seeking Enterprises, a single annual application for R&D ITC should be made with the central competent authorities within four months prior to the CIT return filing due date. Information relating to R&D ITC should be provided with the CIT return.

Tax concessions on merger

Under the Business Mergers and Acquisitions Act, a merger or consolidation of companies can be exempt from stamp tax, deed tax, securities transaction tax, and business tax if certain conditions are met. After the merger or consolidation, any tax concession previously enjoyed by the merged entities will continue to be applicable to the surviving company (or new company) after the merger or consolidation. However, the surviving company is required to manufacture the same products or provide the same services which were approved for tax concessions by the merged entities in order to continue the concessions obtained previously.

The unexpired and unutilised NOLs of the participating entities prior to the merger or consolidation may be carried over to the surviving or newly-created entity according to the percentage of shareholding in the surviving or newly-created entity held by all shareholders of the participating entities.

Free-trade-zones

According to the Statute for the Establishment and Management of Free-trade-zones, foreign companies or their branch offices in Taiwan that apply for establishment in the free-trade-zone or delegate companies already established in the free-trade-zone to store and/or perform simple processing in the free-trade-zone and selling the goods to customers within and outside of Taiwan shall be exempted from CIT. However, in the event that the annual domestic sales exceed 10% of the total annual domestic and foreign sales, the portion in excess shall not be exempted from CIT.

Foreign tax credit

Taiwan uses the credit method to avoid double taxation of income. Foreign taxes paid on foreign-sourced income may be credited against a company's total Taiwan income tax liability. However, the credit is limited to the incremental taxes derived from foreign-sourced income.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations and individuals	N/A	10	10
Non-treaty	20	15/20 (1)	0/20 (2)
Treaty:			
Australia	10/15 (3)	10	12.5
Belgium	10	10	10
Denmark	10	10	10
France	10	10	10
Gambia	10	10	10
Hungary	10	10	10
India (8)	12.5	10	10
Indonesia	10	10	10
Israel	10	7/10 (4)	10
Macedonia	10	10	10
Malaysia (5)	12.5	10	10
Netherlands	10	10	10
New Zealand	15	10	10
Paraguay	5	10	10
Senegal	10	15	12.5
Singapore	(6)	Not prescribed	15
Slovakia (9)	10	10	5/10 (10)
South Africa	5/15 (7)	10	10
Swaziland	10	10	10
Sweden	10	10	10
Switzerland	10/15 (11)	10	10
United Kingdom	10	10	10
Vietnam	15	10	15

Notes

- For non-resident enterprises, a 15% WHT applies to interest income derived from short-term bills, securitised certificates, corporate bonds, government bonds, or financial debentures, as well as interest derived from repurchase transactions involving these bonds or certificates. The rate in all other cases is 20%, unless reduced under a tax treaty.
- Royalties received by foreign enterprises that are specially approved in advance by the government are exempt from income tax.
- A rate of 10% for shareholders that are companies (other than partnerships) with at least a 25% shareholding.
- 7% of the gross amount of the interest arising in a territory and paid on any loan of whatever kind granted by a bank of the other territory.
- The WHT rate on technical service fee is reduced to 7.5%.
- The total tax burden of CIT and dividends tax is not to exceed 40% of the total profits of the company.
- A rate of 5% for shareholders with at least a 10% shareholding.
- Reduced WHT rates on dividends, royalties, and interests are effective from 1 January 2012 onward for those derived from Taiwan and are effective from 1 April 2012 onward for those derived from India.
- Reduced WHT rates on dividends, royalties, and interests are effective from 1 January 2012 onward.
- A rate of 5% for the use of (or the right to use) industrial, commercial, or scientific equipment.
- A rate of 10% for shareholders with at least a 20% shareholding.

Tax treaties

Tax treaties entered into with Australia, Belgium, Denmark, France, Gambia, Hungary, India, Indonesia, Israel, Macedonia, Malaysia, Netherlands, New Zealand, Paraguay,

Taiwan

Senegal, Singapore, Slovakia, South Africa, Swaziland, Sweden, Switzerland, the United Kingdom, and Vietnam relate to corporate and individual income tax.

Treaties with Canada, the European Union, Germany, Israel, Japan, Korea, Luxembourg, Macau, Netherlands, Norway, Sweden, Thailand, and the United States relate to certain earnings from the operation of ships and/or aircraft.

Tax administration

Taxable period

The tax year in Taiwan runs from 1 January to 31 December. Businesses may request approval from the local collection authority to file CIT returns using a fiscal year-end other than 31 December.

Tax returns

Tax returns are filed on a self-assessment basis. CIT returns are due no later than five months after the end of the tax year.

Payment of tax

Tax is paid on a self-assessment basis in two instalments. The first payment is based on 50% of the tax liability of the prior year's tax return and is made in the ninth month of the enterprise's fiscal year. However, if the taxpayer meets certain requirements, it may self-assess the provisional tax based on the taxable income of the first half of the current fiscal year. The second payment is made at the time of filing the annual tax return. The returns are subsequently reviewed by the tax authorities, and a final assessment is issued.

Any overpaid tax as a result of the tax collection authority's mistake shall be refunded to the taxpayer within two years of acknowledgement of such mistake and shall not be subject to the original five-year period for applying for refund where the taxpayer is responsible for the mistake.

Audit cycle

Taiwan does not have a fixed audit cycle. Tax audit can be carried out any time prior to the expiration of the statute of limitations. Companies may be selected for audit if certain criteria are met.

Statute of limitations

The statute of limitations in Taiwan is five years from the tax return filing date if the return is filed on time. Where a taxpayer fails to file annual tax return within the statutory deadline or evades tax by fraud or any other unrighteous means, the statute of limitations is extended to seven years.

Recent focus of Taiwan tax authorities

The tax authorities have developed sophisticated and comprehensive tax audit techniques and approaches over the years. The following sets out some of the common items frequently challenged or audited by the tax authorities:

- Management fees allocated from the foreign parent company or affiliates: The tax authorities frequently question the economic substance of the services rendered, the allocation method, and the availability of sufficient documents to support the tax deduction claim.

- Amortisation of goodwill: The tax authorities frequently challenge the valuation report supporting the calculation of goodwill and whether the transaction itself should give rise to goodwill.
- Amortisation of business rights: The tax authorities have taken a more conservative view which limits 'business rights' to those explicitly authorised by laws (e.g. those regulated under certain public utilities act).
- Eligibility for R&D tax credits.
- WHT compliance.
- Transfer pricing compliance.
- Business tax audit.

Significant developments

On 7 June 2011, Tajikistan and Austria signed a double tax treaty (DTT) that will provide support and development in economic and trade procedures between the countries. The DTT is not yet ratified.

On 2 November 2011, the government introduced the Concept of Tax Policy until 2015, which should develop tax legislation, as well as cooperation of Tajik entrepreneurs and individuals with tax authorities, for improving the economic situation in the country and provide more understandable tax services to taxpayers.

Taxes on corporate income

All Tajik legal entities are subject to corporate income tax (CIT) in Tajikistan. CIT is computed by applying the statutory 15% rate to taxable income (25% for enterprises operating in transport, communication, banking, and service sectors), which is calculated based on gross income decreased by allowed deductions and losses carried forward from previous periods.

Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. Non-residents operating through a permanent establishment (PE) are generally subject to the same CIT provisions.

Minimum income tax

In Tajikistan, there is a minimum income tax on company income at the rate of 1% of aggregate annual income. The minimum income tax should always be paid in full. If CIT is less than the minimum income tax, then CIT should not be paid. If CIT is greater than the minimum income tax, then only the positive difference between CIT and the minimum income tax should be paid.

Local income taxes

There are no local income taxes in Tajikistan.

Corporate residence

Legal entities formed under Tajik law, as well as legal entities whose effective control (management) is in Tajikistan, are recognised as residents for CIT purposes.

Permanent establishment (PE)

Under general provisions of the Tax Code, any place of activity associated with production, assembling, packaging, supply, construction, and exploration activity on

the territory of Tajikistan, regardless of duration of such activities, will be deemed as PE of a non-resident.

Non-residents providing services in the territory of Tajikistan continuously during 90 days in any consecutive 12-month period also create PE in Tajikistan.

Other taxes

Value-added tax (VAT)

VAT is generally assessed on taxable turnover, which includes goods and services. The current VAT rate is 18%. Individuals and businesses are required to register as VAT payers if the taxpayer's taxable turnover exceeds a threshold of 200,000 Tajikistan somoni (TJS) (approximately 42,000 United States dollars [USD]) for the preceding 12-month period.

Generally, the Tax Code exempts the following from VAT: goods and services that are not provided in Tajikistan under the place of supply rules; sale, transfer, or rent of real property; financial services; medical services; publishing; and certain other goods and services.

For goods, the place of supply is determined as the initial point of transportation. Services are generally considered to be provided at the place of business of the service provider or the actual place where services are rendered. However, for certain types of services, such as consulting and accounting, the services are considered to be provided at the location of the buyer.

A VAT refund is generally available for qualified exporters if input VAT exceeds assessed VAT.

VAT returns, together with issued and received invoices, are filed monthly, not later than the 15th day of the month following the reporting month. Payments are due by the same date.

Customs duties

The tariff rates established by the government, ranging from 0% to 15%, are applied on an *ad valorem* basis, at a specific rate, or via a combination of the two. The tax rate of 0% is granted to certain types of goods (e.g. some types of printed publication, unwrought wool, gaseous hydrocarbons, electricity).

Note that Tajikistan is signatory to several free trade agreements, primarily among the following Commonwealth of Independent States (CIS) countries: Russia, Belarus, Kazakhstan, and Kyrgyzstan.

Customs fees

Customs clearance could not be performed without certification of goods, for which importer should pay based on time spent by certification specialist. Fees for customs clearance range from approximately USD 10 to USD 450, depending on customs value.

Excise taxes

Excise tax is assessed on beverages, tobacco products, fuel, tyres, and passenger automobiles. Excise tax rates are established by the government.

Tajikistan

Land tax

Land tax is paid annually based on the area of the land plot and varies depending on the location. The land tax rate ranges from TJS 180 to TJS 500 (approximately USD 39 to 108) per hectare, depending on the location of the land plot.

Real estate tax

Real estate tax is paid annually and applies to immovable real property such as buildings, houses, and flats. The real estate tax rate is calculated by multiplying the land tax rates by relevant coefficients (from 15 to 60), which depend on the purpose of real property and may be adjusted by the state authorities in each specific case.

Transfer taxes

There are no transfer taxes in Tajikistan.

Stamp taxes

There are no stamp taxes in Tajikistan.

Social tax

An employer is obliged to make social tax payments at the rate of 25% of salary.

Road tax

The formula for calculating road tax is total deductions of the reporting year multiplied by the 2% tax rate (0.5% for trade companies). If actual deductions do not exceed 70% of gross income, the tax base for road tax would be 70% of gross income.

Vehicle tax

Vehicle tax is computed as a percentage of the calculation index applied for horsepower of the vehicle engine. The percentage ranges from 2.5% to 13.75%.

Branch income

In addition to CIT, PEs are subject to branch profit tax at the rate of 8% of net profit after CIT, unless a lower rate is prescribed by an applicable DTT.

Income determination

Income tax is assessed on taxable income, which is the difference between gross income and allowed exemptions and deductions.

Inventory valuation

Inventory accounting for tax purposes follows inventory accounting for financial reporting purposes. Starting from 2011, legal entities should apply International Financial Reporting Standards (IFRS).

Capital gains

In general, capital gains on securities are taxed as business profits.

Dividend income

Under the Tax Code, dividends are defined as any distribution of income or property of legal entity between its shareholders. Dividends should be included into annual aggregate income.

Inter-company dividends

Inter-company dividends received by a resident parent company from a resident subsidiary are exempt from annual aggregate income.

Interest income

The Tax Code defines interest income as income received from any fees associated with a debt obligation, including the tax liability, payments for any loans, and contributions on deposit (accounts). Interest income is subject to CIT in Tajikistan and should be included into the annual aggregate income.

Foreign income

Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. There are no provisions in the Tax Code for tax deferral.

For information about Controlled foreign company provisions, see the Group taxation section.

Deductions

In general, all business expenses (e.g. materials, payroll) are allowed as a deduction if the expenses are connected with the earning of income, not of a capital nature, and supported by proper documentation.

Depreciation

The deduction for costs related to fixed assets generally is made through depreciation at rates ranging from 7% to 20%, using the declining-balance method.

Goodwill

There are no special provisions for goodwill deduction in the Tax Code; however, goodwill is not deductible in accordance with the general rules on intangible assets amortisation.

Interest expenses

Interest deductibility is generally limited to three times the refinancing rate of the National Bank of Tajikistan (currently 9%). For certain entities, additional limitations may apply.

Bad debts

A taxpayer is allowed a bad debts deduction in cases where the income associated with such bad debts is already recognised for CIT purposes. Bad debts are deductible when they are written-off in the accounting books. Special provisions apply for banks and other financial institutions.

Charitable contributions

Charitable contributions are limited to 10% of taxable income.

Fines and penalties

Fines and penalties paid to the budget of Tajikistan and other states are not deductible.

Taxes

Taxes paid to the budget of Tajikistan and other states are deductible, except for CIT and minimum income tax.

Tajikistan

Other significant items

Among other deductions specifically mentioned in the Tax Code are research and development (R&D), repair expenses, and geological and geophysical expenses.

Non-deductible expenses

Non-deductible expenses specifically mentioned by the Tax Code include meals and entertainment, personal expenses, passenger vehicles, and non-business expenses.

Net operating losses

Net operating losses may be carried forward for three years but may not be carried back.

Payment to foreign affiliates

No special provisions for deduction of payments to foreign affiliates exist in the Tax Code; therefore, general rules for deductibility of expenses should apply.

Group taxation

There are no rules permitting grouping for tax purposes in Tajikistan.

Transfer pricing

The tax authorities have the right to review prices applied in the following transactions for their compliance with market-level pricing:

- Transactions between related parties.
- Barter transactions.
- Cross-border transactions.
- All transactions with deviation of more than 30% from market level.

Thin capitalisation

There are no thin capitalisation rules in Tajikistan; however, interest deductibility is limited as described in the *Deductions* section.

Controlled foreign companies (CFCs)

The Tax Code contains controlled foreign company (CFC) provisions, according to which, income received by the resident's subsidiary (more than 10% ownership) registered in countries with privileged taxation should be included in the income of the resident.

Tax credits and incentives

Foreign tax credit

Taxes paid outside Tajikistan may be credited against the same types of taxes in Tajikistan, if appropriate supporting documents are provided. The amount of credit may not exceed the amount of tax assessed in respect of such income at the rates applicable in Tajikistan.

Special economic zones

Tax incentives include the special economic zones of Sogd, Panj, Ishkoshim, and Dangara. Sogd and Pyandj are actively functioning economic zones.

Free Economic Zone (FEZ) ‘Sogd’ was formed in October 2008 and has 14 operating business units. The main activities of businesses should be connected with industrial production and attracting international technologies in production of local goods. To date, this FEZ has attracted international investments of USD 1.7 million out of USD 48 million planned.

FEZ ‘Panj’ has two operating units and is a manufacturing and trade free zone for agricultural products, specifically vegetables, fruit, meat, leather, and cotton.

Both FEZs has created over 110 workplaces for local people and produced goods in amount of USD 5 million. The businesses that work in the FEZs pay only social tax and some portion of import duties. Foreigners who wish to work there have a 50% discount on visa application duties. These two FEZs will be working for 50 years.

In addition, there are two FEZs, ‘Ishkoshim’ and ‘Dangara’, that are currently at the developing stage and will mainly provide industrial products. The tax incentives and regimes will be the same as for the active FEZs.

CIT exemptions

An exemption from CIT is available for taxpayers that have made a certain amount of investments into chartered capital of a production company, as follows:

- Two years exemption if volume of investments is up to USD 500,000.
- Three years exemption if volume of investment is from USD 500,000 up to USD 2 million.
- Four years exemption if volume of investment is from USD 2 million up to USD 5 million.
- Five years exemption if volume of investment exceeds USD 5 million.

Withholding taxes

Tajikistan-source income of non-residents is subject to withholding tax (WHT) at its source at the rates shown in the following table:

Types of income at source of payment	Tax rate (%)
Dividends and interest	12
Insurance and reinsurance premiums	4
International transport and telecommunications	4 to 6
Royalties, rent, lease income, management fees, and other income	15

In accordance with the DTTs as of 1 January 2012, the rate of WHT may be reduced as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
No treaty	12	12	15
Armenia	10	10	10
Azerbaijan	10	10	10
China	5/10 (1)	8	8
Czech Republic	5	7	10
Germany	5/15 (2)	0	5

Tajikistan

Recipient	Dividends (%)	Interest (%)	Royalties (%)
India	10	10	10
Kazakhstan	10/15 (3)	10	10
Kyrgyzstan	5/15 (4)	10	10
Latvia	0/5/10 (5)	7	5/10 (6)
Moldova	5/10 (7)	5	10
Pakistan	5/10 (7)	10	10
Poland	5/15 (8)	10	10
Russia	5/10 (9)	10	15
Switzerland	5/15 (11)	10	5
Turkey	10	10 (10)	10
Turkmenistan	10	10	10
Ukraine	10	10	10

Notes

1. A rate of 5% of the gross amount of the dividends if the recipient is an enterprise (except a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
2. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
3. A rate of 10% of the gross amount of the dividends if the beneficial owner is a legal entity and directly holds no less than a 30% stake in the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
4. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds at least 50% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
5. A rate of 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 75% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
6. A rate of 5% of the gross amount of the royalties paid for the use of or the right to use software, or industrial, commercial, or scientific equipment; 10% of the gross amount of the royalties in all other cases.
7. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
8. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
9. A rate of 5% of the gross amount of the dividends if the beneficial owner is a person who holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
10. Interest arising in Tajikistan and paid to the government of Turkey or to the Central Bank of Turkey shall be exempt from Tajikistan tax; interest arising in Turkey and paid to the government of Tajikistan or to the National Bank of Tajikistan shall be exempt from Turkish tax.
11. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

Tax administration

Taxable period

The Tax Code prescribes a calendar year as the tax year.

Tax returns

Annual CIT declarations are due by 1 April in the year following the tax year-end.

Taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

Payment of tax

With respect to CIT, advance payments are due every 15th day of the month. Payment of any outstanding CIT liabilities is required not later than 10 April following the reporting tax period.

The settlement of minimum income tax should be done by 10 April following the reporting tax period in cases where it exceeds CIT liability.

Fines and interest penalties

The fine for failure to file a tax return ranges from a minimum amount of 1 calculation index (CI), which is currently TJS 40 (approximately USD 8.4), to a maximum fine of 100 CI, or TJS 4,000 (approximately USD 840). The amount of the fine depends on the taxpayer's category and should be assessed based on each ten days of delay. In the absence of tax returns, the tax authorities are entitled to assess taxes based on any information available.

Fines may be assessed in the amount of 10% to 20% of the understated tax liabilities. In severe cases, a violation may be considered a criminal offence.

A fine for failure to withhold and remit tax may be assessed in the amount of 3 to 200 CI (approximately TJS 120 to 8,000 [approximately USD 25 to 1,680]) of the tax not withheld.

Interest penalties may apply to late tax payments in the amount of 0.08% of the underpaid tax amount, for each day of tax underpayment.

Statute of limitations

Taxpayers are allowed to make changes to prior period tax returns within the statute of limitations (three years). No fines should apply to corrections in this case.

Other issues

Accounting system

In accordance with the governmental Resolution of the Republic of Tajikistan concerning International Standards of Financial Statements, the Ministry of Finance of the Republic of Tajikistan shall adopt IFRS through a step-by-step approach. Starting from 2011, juridical legal entities should apply IFRS.

Accounting policies and practices are being revised in light of the legal requirement that companies adopt IFRS and International Accounting Standards. Such revised accounting policies should be adopted by companies' boards of directors and disseminated to all the accounting units with clear instructions on how to introduce and follow the new policies and procedures.

Significant developments

No significant changes were announced in 2011. However, for most entities, 2011 is the first year of income to be affected by the thin capitalisation rule introduced in the 2010 Finance Act. This thin capitalisation rule replaced the predecessor interest cover provision (see *Thin capitalisation in the Group taxation section*).

Taxes on corporate income

A Tanzanian resident is taxed on worldwide income, irrespective of source. Non-residents are taxable on income with a source in Tanzania.

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation. Certain payments to non-residents are subject to tax at the relevant non-resident withholding tax (WHT) rates (see the *Withholding taxes section for the relevant rates*).

Income from the disposal of investments in Tanzania is subject to income tax where such investments fall within the source rules, and, in such a case, the income will be taxed at a rate of 30%.

Reduced rate for newly listed companies

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the Dar es Salaam Stock Exchange (DSE). To qualify, at least 30% of the company's shares must be issued to the public.

Alternative minimum tax

Alternative minimum tax applies at a rate of 0.3% of the gross turnover of a company that is in 'perpetual loss status' for a period of at least three consecutive years as a result of tax incentives. The practical application of this tax is unclear.

Local income taxes

There are no local income taxes levied by local authorities.

Corporate residence

A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

Permanent establishment (PE)

A non-resident entity has a PE in Tanzania if it carries on business in Tanzania. This includes a place where a person (i) is carrying on business through a dependent agent; (ii) has used or installed, or is using or installing, substantial equipment or machinery; and (iii) is engaged in a construction, assembly, or installation project for six months or more, including a place where a person is conducting supervisory activities in relation to such a project.

Other taxes**Value-added tax (VAT)**

VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. For imported goods, VAT is payable at the time of importation together with any customs and excise duties. For imported services, VAT is accounted for by registered businesses through a 'reverse charge' mechanism. The standard rate of VAT is currently at 18%, but the export of goods and certain services is eligible for zero rating. Businesses with an annual taxable turnover of more than 40 million Tanzanian shillings (TZS) must register for VAT.

The Commissioner for VAT has the discretion to register as intending traders those investors whose projects have not commenced production but who wish to be VAT-registered in order to reclaim the tax they incur on start-up costs. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be permanently deferred, subject to certain procedures being followed.

Exempt supplies include supplies of unprocessed food, crops and livestock supplies, health supplies, transport services, financial and insurance services, and certain petroleum products. This list is not exhaustive. A business that only makes exempt supplies is unable to register for VAT and consequently unable to recover the VAT incurred on inputs. However, businesses in this category that import taxable services with a value over the registration threshold must register for VAT to account for the VAT on such services.

Certain goods and services supplied to specified entities are eligible for 'special relief' from VAT. The 'special relief' provisions enable supplies, which would otherwise be chargeable with VAT, to be made VAT free, provided certain administrative requirements are followed.

Registered businesses must submit VAT returns, and pay any tax due, on a monthly basis.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor's certificate. Businesses in a consistent refund position (e.g. exporters) can apply for approval to lodge their refund claims on a monthly basis.

Zanzibar has its own VAT Act, but it is similar to the Mainland Tanzania Act.

Customs duties

Tanzania is a member of the East African Community, which became a Customs Union on 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for a common external tariff (CET), elimination of internal

Tanzania

tariffs, rules of origin, anti-dumping measures, a common customs law, and common export promotion schemes.

The customs duty rates applicable under the CET are as follows:

Category	Rate (%)
Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines	0
Semi-finished goods	10
Finished final consumer goods	25

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc, such as SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.

Excise duties

Excise duty rates apply as follows:

Item	Rate for FY 2011/12 (TZS)
Sugared mineral water, sugared carbonated drinks, and sugared aerated water	69 per litre
Other not containing sugar, including club soda	54 per litre
Malt beer	420 per litre
Clear beer (with 100% local unmalted barley)	249 per litre
Wine with more than 25% imported grapes	1,345 per litre
Wine with domestic grapes content exceeding 75%	420 per litre
Spirits	1,993 per litre
Cigarettes without filter containing more than 75% domestic tobacco	6,830 per 1,000
Cigarettes with filter containing more than 75% domestic tobacco	16,114 per 1,000
Other cigarettes not mentioned above	29,264 per 1,000
Cut rag/filler	14,780 per kg
Motor spirit (gasoline) premium	339 per litre
Motor spirit (gasoline) regular	339 per litre
Gas oil (diesel)	215 per litre
Jet fuel	0 per litre
Illuminated kerosene	400 per litre
Other medium oil and preparation	9.32 per litre
Industrial diesel oil	392 per litre
Heavy furnace oil	40 per litre
Lubrication oil	500 per m3
Lubrication greases	0.75 per kg

Item	Rate for FY 2011/12 (%)
Satellite and cable television broadcasting	5
Airtime for mobile phones	10
Disposable plastic bags	50
Liquefied petroleum gas (LPG)	0
Motor car with cylinder capacity exceeding 1000cc but not exceeding 2000cc	5

Item	Rate for FY 2011/12 (%)
Motor vehicle with engine size greater than 2000cc	10
Old motor vehicles (ten years or more)	20

Fuel levy

Fuel levy is charged on petroleum products at a rate of TZS 200 per litre.

Stamp duty

Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, and issue and transfer of debentures.

The current rate is 1% of the transaction value.

Payroll taxes

Payroll taxes include a skills and development levy at 6% of payroll cash costs and a 20% social security contribution. The social security contribution is normally split equally between employer and employee (i.e. 10% each).

Local taxes**Property taxes**

The local government levies a property tax based on the value of a premise. The rates vary depending on the value and location of the property.

Service levy

The local government is entitled to charge a 0.3% service levy based on turnover generated in the relevant district.

Cess levy

For agricultural produce and livestock, there is a cess levy, currently capped at 5% of the producer price.

Branch income

The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30%.

The PE is also subject to a tax on 'repatriated income', which applies at a rate of 10% (the same rate as a company would withhold on dividends).

In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised, other than the transfer of an asset or liability between the two. Amounts derived (or payments received) and expenditures incurred (or payments made) that relate to assets held by, or liabilities owed by, the business of the PE are attributed to the PE.

Tanzania

Income determination

Subject to any provision to the contrary in the Income Tax Act, income is to be calculated in accordance with generally accepted accounting principles (GAAP). Corporations must apply an accrual basis of accounting.

Inventory valuation

Trading stock is valued at the end of the year at the lower of cost and market value. Special rules apply for the valuation of long term work in progress.

Capital gains

There is no separate capital gains tax in Tanzania. Instead, income tax is charged on the taxable profit arising on a gain arising from the realisation of an 'investment asset' (a term that [subject to certain exceptions] includes shares, interests in land and buildings, and a beneficial interest in a non-resident trust). The gain is determined as the difference between costs incurred and sale proceeds.

Dividend income

Dividend payments are taxed by way of WHT, and this is a final tax.

No WHT applies to a dividend paid by a resident corporation to another resident corporation holding 25% or more of shares and voting rights in the corporation paying the dividend.

Interest income

Interest income is treated as income from investment. The term 'interest' is defined as payment for the use of money and includes payment made or accrued under a debt obligation that is not a repayment of capital, any gain realised by way of a discount, premium, swap payment, or similar payment.

Interest income is taxed by way of WHT.

Foreign income

A resident person's foreign-source income or loss (from employment, business, and investment) is calculated as that person's worldwide income or loss less any income sourced in Tanzania and plus any loss sourced in Tanzania.

A resident person may claim a foreign tax credit on any foreign tax paid by the person on foreign income. However, such credit should not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to the 'change in control' provisions). An election may be made to relinquish foreign tax credit and claim a deduction for the amount of foreign income tax.

Deductions

In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

There are special rules with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

There is ring-fencing of mining operations per licence area.

Depreciation

The categories of depreciable assets and their tax depreciation rates are set out in the table below.

Expenditures on plant and machinery are generally written off on a reducing-balance basis at rates of 37.5%, 25%, or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming, and tourist hotels benefit from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.

Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land, excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock, or fish farming are written off on a straight-line basis over five years.

Mining companies are entitled to a 100% capital deduction with respect to capital expenditures on exploration and development.

Depreciation allowances rates

Class	Depreciable assets	Rate (%)
1	Computers and data handling equipment, together with peripheral devices; automobiles, buses, and minibuses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than seven tonnes; construction and earth-moving equipment.	37.5
2	Buses with a seating capacity of 30 or more passengers, heavy general purpose or specialised trucks, trailers, and trailer-mounted containers; railroad cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft, other self-propelling vehicles; plant and machinery (including windmills, electric generators, and distribution equipment) used in manufacturing or mining operations; specialised public utility plant and equipment; and machinery or other irrigation installations and equipment.	25
3	Office furniture, fixtures, and equipment; any asset not included in another class.	12.5
4	Natural resource exploration and production rights and assets in respect of natural resource prospecting, exploration, and development expenditure. (However, note that the Income Tax Act 2004 does provide for predecessor capital deduction provisions in the Income Tax Act 1973 to continue for the holders of mining rights.)	20
5	Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock farming, or fishing farming.	20
6	Buildings, structures, and similar works of permanent nature other than those mentioned in Class 5.	5

Tanzania

Class	Depreciable assets	Rate (%)
7	Intangible assets other than those in Class 4.	1 divided by the useful life of the asset in the pool and rounded down to the nearest half year
8	Plant and machinery (including windmills, electric generators, and distribution equipment) used in agriculture.	100

Goodwill

Goodwill does not qualify for depreciation allowance as it is excluded from the definition of 'depreciable asset'.

Start-up expenses

Start-up expenses are deductible to the extent that they meet the general deduction criteria (i.e. they are revenue in nature and were incurred wholly and exclusive in the production of income). The definition of 'business' includes a prospective business.

Interest expenses

Interest expenses are deductible on an accrual basis, subject to thin capitalisation rules (see *Thin capitalisation in the Group taxation section*).

Bad debt

In order to claim relief for bad debt, it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied.

Charitable contributions

The Income Tax Act allows deduction for contributions made:

1. to charitable institutions (approved by the Commissioner to operate as such) and social development projects
2. under Section 12 of the Education Fund Act 2001, or
3. to local government authorities under statutory obligations to support community developments projects.

The deduction available under item (1) above is restricted to 2% of the company's taxable income before such deduction.

Fines and penalties

Fines and similar penalties payable to a government or a political subdivision of any country for the breach of any law or subsidiary legislation are not deductible.

Taxes

Taxes payable under the Income Tax Act 2004 are not deductible.

Net operating losses

There is no limit on the carryforward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Foreign source losses can only be offset against foreign source profits.

- Losses on investments can only be offset against investment income.
- Foreign source losses on investments can only be offset against foreign source investment income.

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.

Tax losses can be carried back only in long-term contracts in a case where a contract is completed and a person has unrelieved losses for that period or a previous period that is attributable to the long-term contract. These losses can then be carried back to a previous year of income and treated as unrelieved loss for that year.

Payments to foreign affiliates

Payments to foreign affiliates are deductible to the extent they are wholly and exclusively incurred in the production of the company's income. The deduction is subject to transfer pricing provisions as detailed in the *Group taxation* section.

Group taxation

There are no provisions for tax consolidation or group relief in Tanzania.

Transfer pricing

With respect to transactions between related parties, there is an obligation to 'quantify, apportion, and allocate amounts' for income tax purposes on an arm's-length basis. If the Commissioner considers that a person has failed to comply with this requirement, the Commissioner may make such adjustments as the Commissioner thinks appropriate.

The Commissioner has the power to make counteractive adjustments to a person's tax liability where the Commissioner considers that an arrangement is a tax-avoidance arrangement.

Thin capitalisation

There is a thin capitalisation restriction on the amount of deductible interest for what are termed 'exempt-controlled resident entities', where the debt-to-equity ratio exceeds 70:30.

Controlled foreign trusts and corporations

There are provisions that relate to the treatment of unallocated income of controlled foreign trusts and corporations; however, in practice, this is more of academic interest as there is limited outward investment from Tanzania.

Other anti-avoidance provisions

Other anti-avoidance provisions exist to address the following:

- A change in the underlying control of an entity, accompanied by some change in the conduct of the business.
- Income or dividend stripping arrangements.
- Income splitting.

Tanzania

Tax credits and incentives

Foreign tax credit

See *Foreign income in the Income determination section* for a description of the foreign tax credit.

Agriculture, manufacturing, mining, and tourism incentives

Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining, and tourism. See the *Deductions section* for more information.

Export processing zones (EPZs) and special economic zones (SEZs)

There are special benefits for EPZs and SEZs. Included in the benefits available to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a ten-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

Withholding taxes

** Signed but awaiting ratification.

Tax administration

Taxable period

While the year of income for tax purposes is the calendar year, an entity may apply to use its own accounting period rather than the calendar year.

Tax returns

A statement of estimated tax payable, which contains an estimate of the chargeable income and the tax payable thereon, is due for submission within three months from the beginning of the accounting period. A final tax return must be furnished within six months from the end of the accounting period.

WHT returns must be submitted every half year.

A late filing penalty applies monthly at an amount equal to the higher of (i) TZS 100,000 or (ii) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty may also apply.

Payment of tax

Instalment tax is payable in four equal instalments not later than three months, six months, nine months, and 12 months from the beginning of the accounting period. Final tax is payable on the date on which the final return is due for submission, namely six months after the end of the accounting period.

WHT is due seven days after the month of deduction.

Interest on late payment is charged at the Bank of Tanzania discount rate plus 5%.

Audit cycle

The normal practice is for the Revenue Authority to carry out a review every two or three years.

Statute of limitations

There is a three year time limit for the Revenue Authority to adjust an income tax return filed by a taxpayer. The three years runs from the due date of filing the final tax return.

Tanzania

Topics of focus for tax authorities

The current topics of focus for the Revenue Authority are transfer pricing, WHT on payments to non-residents, and compliance on payroll taxes.

Functional currency

Taxable income and deductible expenditure is quantified in Tanzanian shillings. The Commissioner has the power, by notice in writing, to permit quantification in a foreign currency convertible to Tanzanian shillings.

Significant developments

Reduction of corporate income tax (CIT) rate

The general 30% flat rate of CIT has been temporarily reduced to 23% for the accounting period which begins on or after 1 January 2012 and to 20% for the following two accounting periods that begin on or after 1 January 2013.

The above reduced rates also apply to companies listed on the Stock Exchange of Thailand (SET) and the Market for Alternative Investment (MAI) for the same periods.

The reduced rates and qualifications for companies with low paid-in capital have also been changed.

Taxes on corporate income

Thailand incorporated companies are taxed on worldwide income. A foreign incorporated company is taxed on profits arising from or in consequence of the business carried on in Thailand. A foreign company not carrying on business in Thailand is subject to a withholding tax (WHT) on certain types of assessable income (e.g. interest, dividends, royalties, rentals, and service fees) paid from or in Thailand. The rate of WHT is generally 15%, except for dividends which is 10%, while other rates may apply under the provisions of double tax treaties (DTTs).

The general 30% flat rate of CIT has been temporarily reduced to 23% for the accounting period which begins on or after 1 January 2012 and to 20% for the following two accounting periods that begin on or after 1 January 2013.

Reduced rates for companies with low paid-in capital and income

Companies and juristic partnerships with a paid-in capital not exceeding 5 million Thai baht (THB) at the end of any accounting period and income from the sale of goods and/or the provision of service not exceeding THB 30 million in any accounting period will be subject to CIT at the following rates:

For the accounting period beginning on or after 1 January 2012:

Net profit (THB)	CIT rate (%)
0 to 150,000	0
150,001 to 1,000,000	15
Over 1,000,000	23

Thailand

For accounting periods beginning on or after 1 January 2013:

Net profit (THB)	CIT rate (%)
0 to 150,000	0
150,001 to 1,000,000	15
Over 1,000,000	20

Reduced rates for banks

Banks are subject to CIT at the rate of 10% with respect to profits derived from lending to non-Thai residents from foreign currency funds obtained from non-Thai sources (so-called 'out-out' business).

Petroleum income tax

Taxation on income from petroleum operations is imposed on petroleum concessionaire companies by the Petroleum Income Tax Acts (PITA). Companies taxed under the PITA are exempt from taxes and duties on income imposed under the Revenue Code and under any other laws. The exemption applies so long as the company pays taxes and duties on income subject to the PITA or on dividends paid out of income subject to the PITA.

Petroleum companies are taxed at the rate of 50% of their annual net profit from petroleum operations, including profit from the transfer of their concession interests and other activities incidental to petroleum operations. Deductions are allowed for 'ordinary and necessary' business expenses, as well as depreciation on capital expenditure, petroleum royalties, and other charges. Certain types of expenses are specifically disallowed for deduction, including interest.

Local income taxes

There are no local government taxes on income in Thailand.

Corporate residence

Corporate residence is determined by the place of incorporation. A company incorporated under the laws of Thailand is a resident company.

A company incorporated abroad is subject to CIT in Thailand if it is considered to be carrying on business in Thailand. The term 'carrying on business in Thailand' is broad and, subject to the provisions of DTTs, includes the presence of an employee, representative, or go-between that results in a foreign corporation deriving income or gains in Thailand.

Other taxes

Value-added tax (VAT)

VAT, at the current rate of 7%, is levied on the sale of goods and provision of services. However, exports are zero rated while a number of goods and services are exempt (e.g. basic groceries, education, healthcare, interest, leasing of immovable property, and sale of real estate).

Customs duties

Basis of taxation

Customs duties are imposed under the Customs Act and the Customs Tariff Decree. Customs duties are collected on both imports and a very limited number of exports. Classification of imports is based on the Harmonized Commodity Description and Coding System (the so-called 'Harmonized System'). Thailand has adopted the ASEAN Harmonized Tariff Nomenclature ('AHTN') 2012, which is based on the Harmonized System 2012, as its latest import tariff nomenclature.

Duties are levied on a specific or an *ad valorem* basis, whichever is the higher, and the applied *ad valorem* duties range between 0% and 80%. Exemptions from import duties are available on particular items of goods as prescribed in the Customs Tariff Decree. Preferential duty rates are available on imported goods from countries that have a preferential free trade agreement (FTA) with Thailand.

Currently, Thailand has FTAs with the following countries:

- ASEAN member states (i.e. Singapore, Vietnam, Malaysia, Indonesia, Philippines, Cambodia, Laos, Myanmar, and Brunei).
- Peru.
- New Zealand.
- Australia.
- India.
- Japan.

Also, as part of ASEAN, Thailand has preferential trade agreements with the following countries:

- China.
- Korea.
- Japan.
- Australia and New Zealand.
- India.

Generally, the value of imports is based on their CIF (cost, insurance, and freight), whereas exported goods are based on their FOB (free on board).

Thailand has implemented the World Trade Organization (WTO) Valuation Agreement. The primary basis for the customs value is transaction value (i.e. the price actually paid or payable for the goods when sold for export). This is subject to adjustments for certain elements which are considered to form a part of the value for customs purposes, but are not yet included in the selling price. The elements that may need to be added include: royalties and license fees that are related to the goods and paid as a condition of sale; proceeds from subsequent resale in the importing country; value of goods or services supplied by the buyer, such as design or development fee related to imported goods; etc. If the declared price is evidently low or is unlikely to be the true value of such goods, Thai Customs will dispute the declared price.

Customs controls and procedures

Customs procedures for goods arriving in Thailand in any manner are similar to those existing in most other countries.

Thailand

An importer is required to file an entry form together with other requisite documents, including a bill of lading, invoice, and packing list via the e-Customs system.

Customs duties are due upon the arrival of the vessel carrying the imported goods, and goods may be stored in a bonded warehouse. Landing and storage charges must be paid before the goods are released.

Customs incentives schemes

Various customs incentives schemes, each with its own specific conditions and duty privileges, are available in Thailand, including the following:

- Duty and tax compensation (“Tax Coupons”).
- Duty drawback under Section 19 bis for imported raw materials used in export production.
- Duty drawback for re-export in the same state under Section 19.
- Free zones (Customs or Industrial Estate Authority of Thailand Free Zones).
- Manufacturing bonded warehouses.
- General bonded warehouses.
- Board of Investment (BOI) promotion.

Excise tax

Basis of taxation

Excise tax is imposed on the sale of a selected range of commodities, whether manufactured locally or imported. Tax rates are based on *ad valorem* or a specific rate, whichever is higher. Tax liabilities arise on locally manufactured goods when leaving the factory and at the time of importation for imported goods.

Taxable goods and services

Commodities	Excise tax rate (%)
Fuel oil and petroleum products	0 to 36
Certain non-alcoholic beverages	0 to 25
Certain electrical appliances	0 to 30
Crystal glassware	0 to 15
Motor vehicles	0 to 50
Boats	0
Perfume products and cosmetics	0 to 15
Entertaining services, turf courses, and golf courses	0 to 10
Alcoholic beverages	0.1 to 60
Cigarettes containing tobacco	0.1 to 79
Woollen carpets	20
Motorcycles	3 to 5
Batteries	5 to 10
Playing cards	THB 30/100 card board
Ozone depleting substances	30

The manufacturer of the products must file a return and remit the tax due prior to taking the goods from the factory or bonded warehouse. If a VAT liability arises before the goods are taken out of such locations, the manufacturer must file a return and remit the excise tax to the Excise Department within 15 days from the end of the month.

Stamp duty

Stamp duty is levied on 28 different types of documents and instruments, including contracts for hire of work, loans, share transfers, leases of land or buildings, and insurance policies. The rate of stamp duty varies depending on the type on agreement, but ranges from THB 1 per THB 1,000 of value on most contracts and agreements to a fixed amount per instrument on most commercial and other documents. Unstamped documents are not admissible as evidence in a civil lawsuit, and the surcharge can be as high as 600% of the duties for failure to pay the stamp duty on a timely basis.

Specific business tax (SBT)

SBT is collected on the gross revenue of certain businesses, not subject to VAT, at fixed rates. Commercial banking, similar financial businesses, and the sale of immovable property are taxed at 3% and life insurance at 2.5%.

The rate of SBT has been reduced to 0.01% for certain revenue derived by commercial banks and finance, securities, and credit foncier businesses as well as businesses with regular transactions similar to commercial banking.

An additional 10% of SBT is levied as municipality tax.

Capital taxes

There are no capital taxes in Thailand.

Local taxes

There are three major local taxes:

Household and land tax

Household and land tax is levied at 12.5% of assessable economic rental income.

Signboard tax

Signboard tax is levied at varying rates according to size. The minimum tax is THB 200 per annum.

Local development tax

Local development tax is levied at rates ranging between 0.25% and 0.95% of the value of land assessed by local authorities. This tax does not apply if the property is subject to household and land tax.

Branch income

Branches of foreign corporations pay income tax at the CIT rate on locally earned profits only. Branch profits remitted to the foreign head office are subject to additional tax at the rate of 10%. However, this is a tax on disposition of profits abroad and is not limited to remittances. For example, a credit of profits to the head office account in the books is held to be a disposition of profits abroad even though no remittance of funds takes place.

Income determination

Inventory valuation

Inventory is valued at the lower of cost or market price. Any recognised method of ascertaining the cost price may be used, but a change in the method may be made only

Thailand

with the prior approval of the director-general of the Revenue Department. Conformity between book and tax reporting is required.

Capital gains

There is no specific legislation governing capital gains. All capital gains earned by a Thai company are treated as ordinary revenue for tax purposes. Capital gains on the sale of investments derived from or in Thailand by a foreign company not carrying on business in Thailand are subject to a tax of 15%, withheld at source by the purchaser, unless otherwise exempt under a DTT.

The following income earned by a foreign company not carrying on business in Thailand is subject to 15% WHT:

- Interest on bonds/debentures issued by state enterprises.
- Difference between the redemption price and the initial sale price of bonds issued by the government, state enterprises, and specified institutions.
- Gains on the transfer of bonds issued by the government, state enterprises, and specified institutions.

Dividend income

Dividends received from a Thai company by a company listed on the SET are exempt from tax. Dividends received by a non-listed company from other Thai companies are also exempt from tax, provided that the company receiving the dividends holds at least 25% of the total voting shares without any cross-shareholding. The tax exemption applies on the condition that the shares must be held for at least three months before and three months after the dividends are received.

In other cases, where one Thai company receives dividends from another Thai company, one half thereof is exempt from tax.

Dividends received from outbound investment are exempt from tax provided that the Thai company receiving the dividends holds at least 25% of the shares with voting rights of the company paying the dividends for a period of not less than six months before the date on which the dividends are received and the dividends must be derived from net profit in the foreign country taxed at a rate of not less than 15%. In the event that a 'special law' in a particular foreign country provides a reduced tax rate or exemption for the net profit, the limited company which receives the dividends is still eligible for tax exemption.

Share of profits received by a Thai company or a foreign company carrying on business in Thailand from an unincorporated joint venture carrying on business in Thailand are exempt from CIT.

Stock dividends

Stock dividends are taxable to the recipient as ordinary income.

Interest income

Interest is taxable as income on the accrual basis.

Foreign income

Thailand incorporated companies are taxed on worldwide income. The Revenue Code does not describe how foreign income received by a Thailand-incorporated company is taxed, but the Revenue Department regards foreign branch income as taxable when earned and foreign dividend income as taxable when received. Double taxation is

relieved by way of a credit against the tax chargeable in Thailand (see *Foreign tax credit in the Tax credits and incentives section*).

Deductions

Depreciation, amortisation, and depletion

Deductions for wear and tear and depreciation are allowed as a percentage of cost. If the rate of deduction adopted by a company under its own accounting method is lower than the maximum percentage of cost permitted, a deduction will be allowed only at the rate adopted by the company. The straight-line basis is the method most commonly used by companies, but any generally accepted basis, such as sum-of-the-years-digits method or double declining method, is permitted. The maximum permitted rates are as shown:

Asset	Maximum permitted rate (%)
Buildings:	
Durable buildings	5
Temporary buildings	100
Cost of acquisition of depletable natural resources	5
Cost of acquisition of lease rights:	
If there is no written lease agreement or if there is a written lease agreement containing a renewal clause whereby continual renewals are permitted	10
If there is a written lease agreement containing no renewal clause or containing a renewal clause but restricting renewable periods to a definitely limited duration	Percentage rate equals 100 divided by the sum of years of the original and renewable lease periods
Cost of acquisition of the right in a process, formula, goodwill, trademark, business license, patent, copyright, or any other right:	
If the period of use is unlimited	10
If the period of use is limited	Percentage rate equals 100 divided by the number of years of use
Other assets not mentioned above, excluding land and inventory	20

Special depreciation methods for certain assets

- Machinery and equipment for research and development (R&D) may initially be depreciated at 40% of cost with the remaining balance being depreciated at the above maximum rate of 20% per annum.
- Computer hardware and software may be depreciated within three accounting periods.
- Machinery acquired by companies located in officially-declared flooded areas and which have suffered from floods during the period from 25 July 2011 to 31 December 2012 may initially be depreciated at 40% of cost with the remaining balance being depreciated at the maximum rate of 20% per annum. The machines can be used for manufacturing own products or provision of manufacturing services and must be acquired and be ready for use between 25 July 2011 and 31 December 2012.

Thailand

Special depreciation method for small companies

Companies and juristic partnerships with fixed assets, excluding land, at a value of no more than THB 200 million and with no more than 200 employees are entitled to the following special depreciation methods in addition to those noted above:

- Machinery and equipment may initially be depreciated at 40% of cost, and the remaining balance will then be depreciated at a maximum rate of 20%.
- Computer hardware and software may initially be depreciated at 40% of cost, and the remaining balance can then be depreciated within three accounting periods.
- Factory buildings may initially be depreciated at 25% of cost, and the remaining balance will then be depreciated at a maximum rate of 5%.

Start-up expenses

Start-up expenses, such as incorporation expenses and registration fees, are deductible when the expenses are incurred.

Interest expenses

Interest on money borrowed for the purpose of acquiring profits or for the purpose of business is deductible. Interest incurred in respect of the construction or installation of fixed assets that require a period of time to get them ready for their intended use is considered to be capital expenditure.

Bad debts

Bad debts written off are deductible, provided that they are consistent with the rules, procedures, and conditions prescribed by the Ministerial Regulations.

Charitable contributions

Deductions for allowable charitable contributions and certain other donations may not exceed 2% of net taxable profit. Deductions for educational support as approved by the Ministry of Education may be allowed at the rate of 200% of the actual expense, but not exceeding 10% of net profit before deductions of the allowable charitable contributions and certain other donations. Furthermore, deductions for the support of public recreational facilities may also be allowed at the rate 200% of the actual expense, but not exceeding 10% of net profit before deductions of the allowable charitable contributions and certain other donations after including the educational support expense.

Fines and penalties

Fines, penalties, and surcharges charged under the Revenue Code are not deductible.

Taxes

In general, all taxes are deductible except CIT and VAT.

Other significant items

Other non-deductible expenses include, but are not limited to, the following:

- Expenses in the nature of provisions or reserves.
- Contributions to any fund (except an approved provident fund).

Net operating losses

Losses may be carried forward for the following five accounting periods. Carryback of losses is not permitted. A change in control of a loss company does not impact its loss carryforward.

Payments to foreign affiliates

A Thailand incorporated company may claim a deduction for royalties, management service fees, and interest charges, provided they are expended exclusively for the purpose of generating profits or for purposes of business in Thailand and are determined on an arm's-length basis.

Group taxation

Group taxation is not permitted in Thailand.

Transfer pricing

Thailand has no detailed transfer pricing legislation. However, transfer pricing guidelines issued by the Revenue Department define the term 'market price', detail the permitted transfer pricing methods, describe the transfer pricing documentation requirements, and allow taxpayers to apply for advance pricing agreements (APAs) in respect of any intended related party transaction.

The transfer pricing guidelines do not have the status of legislation but are internal directives that the Revenue officials must adhere to when conducting tax audits, reviews, or investigations. The guidelines are also intended to inform taxpayers about transfer pricing practices.

The guidelines authorise the use of both transactional transfer pricing methods (e.g. the comparable uncontrolled price, the resale price, and the cost plus methods) as well as profit based methods, in order to determine the market price of a transaction. No one method is preferred over another, and there is no hierarchy of acceptable methods. Although the Revenue Department would generally accept a taxpayer's chosen method, it retains the right to select an alternative method if it deems it to be more appropriate.

Thin capitalisation

There are no thin capitalisation rules. However, for certain businesses or as part of tax incentive conditions, a minimum capital requirement is needed.

Tax credits and incentives

The Board of Investment (BOI), by virtue of the Investment Promotion Act, provides tax incentives to certain activities within the following categories:

- Agriculture and agricultural products.
- Mining, ceramics, and basis metals.
- Light industry.
- Metal products, machinery, and transport equipment.
- Electronic industry and electrical appliance.
- Chemicals, paper, and plastics.
- Service and public utilities.

The tax incentives available include the following:

- Exemption from or reduction of import duties on imported machinery.
- Exemption from import duties on raw materials and components imported for manufacturing for export.

Thailand

- A reduction of up to 90% of import duties on raw or essential materials imported for manufacturing for domestic sale.
- Exemption from CIT equal to the amount of the investment, excluding the cost of land and working capital, for up to eight years depending on the promoted activity and location.
- Exclusion of dividends derived from promoted enterprises from taxable income during the period of exemption from CIT.

Additional incentives for enterprises located in an industrial estate or promotion zone include the following:

- Reduction of 50% of CIT for five years after the end of the tax holiday.
- Double deduction from taxable income of the cost of transportation, electricity, and water supply.
- Deduction from net profit of the project's infrastructure installation or construction costs in addition to normal depreciation; such deduction can be made from the net profit of one or several years within ten years from the date when revenue was first derived from the promoted activity.
- 75% import duty reduction of the normal rate on raw or essential materials used in manufacturing for domestic sales for five years.

Privileges for sustainable investment

Under a BOI policy in regard to sustainable investment, all areas of the country, except Bangkok, are designated as Investment Promotion Zones until December 2012. The BOI also provides special privileges to target industries, which have been classified in three categories as follows:

- Activities related to energy conservation and alternative energy.
- Activities related to eco-friendly materials and products.
- High-technology businesses.

Any activity which is classified under the above categories will obtain special privileges as a priority activity, e.g. CIT exemption for a period of eight years with no limit on the amount, import duty exemption for the import of machinery, 50% reduction in the rate of CIT on net profit for five years after the end of the tax holiday, etc.

Applications for the above measures must be submitted before 31 December 2012.

Special development zone

A special development zone has been established in five provinces in the far south of Thailand in which a company or juristic partnership located therein will be subject to CIT at the rate of 3% of the net profit derived from the revenue earned from the manufacture or sale of goods or provision of services from the accounting period that begins on or after 1 January 2010, until the accounting period that ends on or after 31 December 2012.

Regional operating headquarters (ROH)

ROH means a company organised under the Thai law providing administrative, technical assistance, or supporting services to its domestic or overseas affiliated enterprises or branches in at least three countries other than Thailand with a paid-in capital of at least THB 10 million on the last day of any accounting period.

Tax incentives available to ROH are under two packages, known as the old and the new package, either of which taxpayers may elect to follow. However, the applications to obtain the privilege under the new package have to be made before 14 November 2015.

The following corporate tax incentives are available under the old package:

- 10% CIT on service income derived from foreign branches or affiliated enterprises.
- 10% CIT on interest income received as a result of re-lending to foreign branches or affiliated enterprises funds borrowed by the ROH.
- 10% CIT on royalty income derived from foreign branches or affiliated enterprises and which is generated from R&D work performed in Thailand.
- CIT exemption on dividends received from domestic or overseas affiliated enterprises.
- WHT exemption on dividends received by foreign corporate shareholders not carrying on business in Thailand from the qualified ROH profit.

The corporate tax incentives available under the new package are as follows:

- In the case where service fees and royalties received by the ROH from affiliated enterprises in foreign countries amount to at least 50% of the total income of the ROH (ROH income plus non-ROH income):
 - CIT exemption for ten years on service income derived from foreign branches or affiliated enterprises (*see Note below*).
 - 10% CIT for ten years on service income derived from domestic branches or affiliated enterprises and on qualified royalties and qualified interest income (*see Note below*).
 - CIT exemption for ten years on dividends received by ROH from domestic or overseas affiliated enterprises (*see Note below*).
 - WHT exemption on dividends received by foreign corporate shareholders not carrying on business in Thailand from the qualified ROH profit.
- In the case where service fees and royalties received by the ROH from affiliated enterprises in foreign countries amount to less than 50% of the total income of the ROH (ROH income plus non-ROH income):
 - CIT exemption for ten years on service income derived from foreign branches or affiliated enterprises (*see Note below*).
 - 10% CIT for ten years on service income derived from domestic branches or affiliated enterprises (*see Note below*).

Note: The corporate tax benefits will be extended to 15 years provided that as at the end of the tenth fiscal year, the accumulated business spending paid to recipients in Thailand for ten fiscal periods has exceeded THB 150 million.

International procurement center (IPC)

The IPC will be subject to CIT on its net profit from qualified income at the rate of 15% for five consecutive accounting periods. IPC refers to a company established under Thai law carrying on the business of procuring and selling goods, raw materials, and parts to affiliated companies.

Qualified income includes:

- Income from procuring and selling goods outside Thailand to affiliated companies situated abroad whereby the goods must not be brought into Thailand.
- Income from procuring parts and raw materials either in Thailand or abroad for sale to affiliated companies situated abroad for manufacturing goods outside Thailand by the affiliated companies.

Thailand

Applications to obtain the privilege must be submitted within two years from 9 May 2011.

Foreign tax credit

A Thai company can use foreign tax paid on business income or dividends as a credit against its CIT liability. However, the credit cannot exceed the amount of Thai tax on the income.

Notes

1. The zero rate applies to a recipient company listed on the SET.
2. The 1% rate applies to interest paid to all resident corporations other than banks or finance companies, except where interest arises from bonds or debentures.
3. The progressive rate is in accordance with the personal income tax schedule.
4. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
5. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work excluding cinematograph films and films, tapes or discs for radio, or television broadcasting.
6. The 5% rate applies to royalties paid for the production or reproduction of any literary, dramatic, musical, or artistic work excluding royalties with respect to motion picture films and works on film or videotape for use in connection with television.
7. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work including software, cinematograph films or films or tapes used for radio or television broadcasting; and the 10% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience.
8. The 5% rate applies to royalties paid for the alienation or the use of, or the right to use, any copyright of literary, artistic, or scientific work excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.
9. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
10. The 3% rate applies to interest paid on loans or credits granted for four years or more with the participation of a financing public institution to a statutory body or to an enterprise in relation to the sale of any equipment or to the survey, the installation, or the supply of industrial, commercial,

Thailand

or scientific premises and of public works. The 10% rate applies to interest paid to any financial institution.

11. The zero rate applies to royalties paid to a contracting state or state-owned company with respect to films or tapes, and the 5% rate to royalties for the alienation or the use of, or the right to use, any copyright of literary, artistic, or scientific work.
12. The 10% rate applies to (i) interest paid to a bank or financial institution (including an insurance company) and (ii) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
13. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work and the 10% rate for the use of, or the right to use, any patent, trademark, design, or model, plan, secret formula, or process.
14. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work excluding cinematograph films or films, or tapes used for radio, or television broadcasting.
15. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright; or the use of, or the right to use, any industrial, scientific, or commercial equipment; or the use of, or the right to use, any motion picture film, or film or videotape or any other recording for use in connection with television, or tape or any other recording for use in connection with radio broadcasting; or the reception of, or the right to receive, visual images or sounds, or both, transmitted to the public by satellite or, cable, optic fibre, or similar technology; or the use in connection with television or radio broadcasting, or the right to use in connection with television or radio broadcasting, visual images, or sounds, or both, transmitted by satellite or cable, optic fibre, or similar technology.
16. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, and the 10% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
17. The 10% rate applies to (i) interest paid to a bank or financial institution (including an insurance company) and (ii) interest from a loan or debt claim that is guaranteed by the government.
18. The zero rate applies to royalties paid to a contracting state or a state-owned company with respect to films or tapes, and the 10% rate applies to royalties paid for the alienation or the use of, or the right to use, any copyright of literary, artistic, or scientific work.
19. The zero rate applies to royalties paid to a contracting state or a state owned company with respect to films or tapes. The 5% rate applies to royalties paid for the alienation or the use of, or the right to use, any copyright of literary, artistic, or scientific work excluding cinematograph films or tapes used for television or broadcasting.
20. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment.
21. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work excluding cinematograph films or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties in consideration of financial leasing for the use of, or the right to use, industrial, commercial, or scientific equipment.
22. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work including software, motion pictures, and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
23. The 10% rate applies to interest paid (i) to a recipient that is a bank or financial institution (including an insurance company); (ii) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (iii) in connection with the sale on credit of any merchandise by one enterprise to another enterprise.
24. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work. The 10% rate applies to royalties for the consideration for any services of a managerial or consultancy nature or for information concerning industrial, commercial, or scientific experience.
25. The 10% rate applies to interest paid to the following recipients (i) in the case of a resident of Russia, any institution having a license to carry on banking operations; and (ii) in the case of a resident of Thailand, any financial institution (including an insurance company).
26. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
27. In case of interest arising in Thailand, the 10% rate applies to interest paid to a Philippines financial institution (including an insurance company). In the case of interest arising in the Philippines, the 10% rate applies in respect of public issues of bonds, debentures, or similar obligations.
28. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work including software and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. The 10% rate applies to the use of, or the right to use, any patent, trademark, design, or model, plan, secret formula, or process.

Tax administration

Taxable period

The tax year for a company is its accounting period, which must be of 12 months' duration. However, it may be less than 12 months in the case of the first accounting period after incorporation, the accounting period of dissolution, or after approval for a change in the accounting period has been received from the Revenue Department and the Business Development Department.

Tax returns

The Thai system is one of self-assessment. A company prepares and files its tax returns by the due dates and at the same time pays the taxes calculated to be due. The annual CIT return is due 150 days from the closing date of the accounting period.

Payment of tax

CIT is paid twice in each year. A half-year return must be filed within two months after the end of the first six months of an accounting period. The tax to be paid is computed on one-half of the estimated profit for the full accounting period, except for listed companies, banks, certain other financial institutions, and other companies under prescribed conditions where the tax is based on the actual net profit for the first six months. The balance of the tax due is payable within 150 days from the closing date of the accounting period, along with the annual tax return. Credit is given for the amount of tax paid at the half-year.

Audit cycle

If, within a period of two years from the date of filing a tax return, the assessment officer has reason to believe that false or inadequate information has been declared in a return, the assessment officer has the power to issue a summons requesting the presence of the person responsible, or a witness, for examination, and to order either of them to produce accounts or other relevant evidence, provided that advance notice of seven days is given. The subsequent examination of the books and records is normally carried out at the company's offices if it is inconvenient to transfer all the documents to the tax office. After completion of the examination, the assessment officer has the power to adjust the amounts previously assessed or included in a return on the basis of the evidence, and issue a further assessment for tax together with penalties and surcharges, or adjust the amount of losses available for carryforward.

Tax audits may cover the previous five accounting periods from the date of filing a tax return with the approval of the Director-General if the assessment officer has evidence of an intention to evade tax or in the case of a claim for a refund of tax.

However, under the Civil and Commercial Code, the Revenue Department can assess tax for up to ten years.

Statute of limitations

The statute of limitations for tax is ten years.

Topics of focus for tax authorities

Topics of focus for tax authorities include the following:

- Deductibility of management service fees or expenses allocated to Thailand by foreign affiliates.
- International inter-company transactions and transfer pricing.

Timor-Leste

Significant developments

Timor-Leste initially adopted the Indonesian tax laws in place in 1999 with appropriate modifications. In 2008, however, Timor-Leste embarked upon a policy of taxation reform. The cornerstone of this reform was the introduction of the Tax and Duties Act (TDA). The TDA provided for the consolidation of the taxation regimes previously applicable to Timor-Leste. This consolidation extended to the taxation of petroleum operations with the general exception of petroleum operations in the Joint Petroleum Development Area (JPDA). As a result, considerable tax variation continues to exist in relation to petroleum activities according to the oil and gas concession in question.

Taxes on corporate income

Timor-Leste residents are subject to income tax on taxable income that is essentially the difference between gross income and allowable deductions. The income of companies is generally subject to corporate income tax (CIT) at a flat rate of 10%.

Companies, etc. are taxable on a stand-alone basis (i.e. there is no grouping or ability to transfer tax losses). Timor-Leste has also not entered into any double tax treaties (DTTs).

Industry-specific CIT rates

The rate of CIT for oil and gas contractors is, however, 30%, while sub-contractors are subject to CIT at the flat rate of (generally) 6%.

Supplemental Petroleum Tax (SPT) also applies for oil and gas contractors and is imposed on 'accumulated net receipts' using a specific formula. SPT is deductible for CIT calculation purposes.

Separate tax arrangements apply for petroleum activities in the JPDA (*see the Other issues section*).

Corporate residence

The definition of a corporate resident (resident legal person) covers a wide range of entities, such as companies, partnerships, trusts, governmental institutions, and unincorporated associations incorporated, formed, organised, or established in Timor-Leste.

Permanent establishment (PE)

A PE is defined as a fixed place of business through which the business of a person is wholly or partly carried on, including:

- A place of management.
- A branch.
- A representative office.
- An office.
- A factory.
- A workshop.
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, including any place of drilling for mineral exploration.
- A fishery, place where animal husbandry is conducted, farm, plantation, or forest.
- A construction, installation, or assembly project.
- The furnishing of a service through employees or other personnel, if conducted for more than 60 days in any 12-month period.
- A natural or legal person acting as dependent agent.
- An agent or employee of a non-resident insurance company, if the agent or employee collects premiums or insures risks in Timor-Leste.

Other taxes

Sales tax

Sales tax is imposed on the sales tax value of:

- taxable goods imported into Timor-Leste and
- taxable goods sold or taxable services provided in Timor-Leste on or after the date specified by Parliament.

Taxpayers liable for sales tax are as follows:

- A taxpayer who imports taxable goods into Timor-Leste.
- A taxpayer who sells taxable goods in Timor-Leste.
- A taxpayer who provides taxable services in Timor-Leste.

The rates of sales tax are 2.5% for taxable goods imported into Timor-Leste and 0% for the sale of taxable goods and provision of taxable services in Timor-Leste.

Services tax

Services tax is imposed at 5% on any gross consideration of more than 500 United States dollars (USD) received by a taxpayer for the provision of hotel, restaurant and bar, or telecommunication services.

Import duties

Import duty applies to imported goods (except for specifically exempted goods) at 2.5% of the 'customs value' of the goods. Customs value is the fair market value including cost, insurance, and freight (CIF), as stated in the General Agreement on Tariffs and Trade (GATT) rules.

The following goods are exempted from import duty:

- Goods accompany a person arriving in Timor-Leste from another territory (limitations apply).
- Imports of the type exempted under specific international conventions.
- Goods re-imported in the same condition as when they were exported.
- Goods, other than alcohol or tobacco, imported by registered charitable organisations, registered under any law of Timor-Leste, provided the goods are to

Timor-Leste

be used for charitable purposes of humanitarian assistance and relief, education, or health care.

- Other goods for temporary admission, if the importer has provided security for the import duty in the prescribed manner.
- Goods for consumption by international staff of the United Nations Integrated Mission in East Timor or members of peace keeping forces from contingent countries, if the goods are sold in conformity with prescribed rules of sale.
- Certain infant and female hygiene products.
- Other goods imported into Timor-Leste other than as personal goods accompanying a traveller and where the import duty that would be imposed on the import would be USD 10 or less.

Excise tax

Excise tax is imposed on excisable goods where removed from a warehouse by a registered manufacturer for consumption in Timor-Leste or imported into Timor-Leste.

Below is the list of excisable goods and the respective rates of excise tax:

Goods	Excise tax rate
Beer	USD 1.90/litre
Wine, vermouth, fermented beverages (such as cider)	USD 2.50/litre
Ethyl alcohol (other than denatured) and other alcoholic beverages	USD 8.90/litre
Gasoline, diesel fuel products, and other petroleum products	USD 0.06/litre
Tobacco and tobacco products	USD 19.00/kg
Cigarette lighters	12% of the excise value
Smoking pipes	12% of the excise value
Arms and ammunition	200% of the excise value
Motor cars and small passenger vehicles (with an excise value exceeding USD 70,000)	35% of the excise value
Private boats and aircrafts	20% of the excise value

Note that the excise value of excisable goods imported into Timor-Leste is the total of the customs value and any import duty imposed. The excise value of excisable goods manufactured in Timor-Leste is their fair market value at the time of removal from the manufacturer's warehouse.

Goods on the above list are excisable goods, other than:

- goods imported into Timor-Leste that are exempt from import duty, or
- goods exported from Timor-Leste within 28 days after their production or import, as long as the taxpayer liable to excise tax submits to the Banking and Payments Authority documentary proof of the export of goods.

Branch income

The taxable income of a non-resident carrying out business activities through a PE is calculated by reference to:

- the income attributable to the PE

- any sales of goods or merchandise of the same or similar kind as those sold through the PE, and
- any other business activities carried on in Timor-Leste of the same or similar kind as those effected through the PE.

Other principles for determining the taxable income of a PE in Timor-Leste are:

- Profit is calculated as if the PE was a Timor-Leste entity engaged in the same or similar activities under the same or similar conditions and dealt with wholly independently from the non-resident person of which it is a PE.
- Subject to this, deductions may be claimed for expenses incurred for the purposes of the business activities of the PE, including head office expenditures, whether incurred in Timor-Leste or elsewhere.
- No deductions may be claimed for amounts paid or payable by the PE to its head office or to another PE of the non-resident person, other than towards the reimbursement of actual expenses incurred by the non-resident person to third parties, by way of:
 - royalties, fees, or other similar payments
 - compensation for any services (including management services) provided to the PE, and
 - interest on money lent to the PE (except for banking businesses).

Income determination

Taxable business profits are determined on the basis of net profit for financial accounting purposes in accordance with International Financial Reporting Standards (IFRS), subject to certain modifications in the TDA. In general, income is assessable when 'receivable', while expenses are deductible when 'payable'. A taxpayer with turnover of less than USD 100,000 may, however, elect to pay tax on a cash basis.

Gross income is defined widely to mean "any realised increase in economic capacity in whatever name or form which can be used for consumption or to increase the wealth of the taxpayer other than wages that are subject to Wages Income Tax (WIT)".

The gross income for a tax year is the total amount earned by the taxpayer, including but not limited to, business income, property income, lottery prizes or awards, and refunds of tax payments previously deducted as an expense.

Exempted income

The following income is tax exempt:

- Any aid or donations, provided that the donor and recipient do not have any business or control relationship.
- Gifts received by relatives within one degree of direct lineage, or by a religious, educational, or charitable organisation, provided that the donor and recipient do not have any business or control relationship.
- Inheritance.
- Assets (including cash) received by a resident in exchange for shares or a capital contribution.
- Any amount paid by an insurance company to a resident in connection with health, accident, life, or education.
- Dividends.
- Any contribution paid by an employer or employee to an approved pension fund.

Timor-Leste

- Income derived by an approved pension fund.
- Remuneration received for services provided by a natural person (individual) if the remuneration is financed out of the Trust Fund for East Timor.

Foreign income

Under the worldwide income principle, a resident taxpayer is required to calculate income that is not only Timor-Leste sourced but also foreign sourced. In the case that the foreign-sourced income is taxed at source, Timor-Leste allows a foreign tax credit for the particular tax year (*see Foreign tax credit in the Tax credits and incentives section*).

Deductions

The taxable income of residents and non-residents who have a PE in Timor-Leste shall be determined on the basis of gross income reduced by:

- expenditure and losses incurred from the alienation of assets or the discharge of debt in the conduct of a taxable business activity
- expenditure incurred in deriving any other amounts included in gross income
- any loss on disposal of an asset other than assets held on personal account
- contributions to an approved pension fund, and
- bad and doubtful debts (subject to various tests).

Depreciation and amortisation

‘Depreciable assets’ include any tangible movable property with a useful life exceeding one year that is wholly or partly used for taxable business activities. ‘Intangible assets’ include property, other than tangible movable property or immovable property, with a useful life exceeding one year that is used for taxable business activities.

There are provisions for election of either straight-line or double-declining methods, the pooling of assets and *de minimis* exceptions.

The rate of tax depreciation/amortisation (for non-petroleum operations) is, however, set at 100%, meaning that taxpayers are, in effect, entitled to a full and up-front deduction. In circumstances where the asset is only partly used for the conduct of taxable business activities, the deduction is reduced by the proportion of its non-taxable business use.

Deductions not allowed or conditional deductions

The following are not deductible to a resident or non-resident with a PE in Timor-Leste:

- The distribution of profits in whatever name or form.
- Expenses incurred for the personal benefit of a taxpayer, a taxpayer’s dependents, shareholders, partners, or members.
- Reserves, other than as provided for under the TDA.
- Insurance premiums for health, accident, life, or education insurance paid by a natural person, except where paid by an employer and treated as part of the income of the employee.
- Excessive compensation paid by a legal person to a member of the legal person, or paid between associates.
- Gifts, aid, donations, or inheritances if exempt from income tax in the hands of the recipient.
- Timor-Leste or foreign income tax.
- Salaries paid to a partner in a partnership.

- Tax and other penalties for violation of law and regulation.
- Interest expenses, unless the expense is incurred by a financial institution.
- A bribe, or any similar payment.
- Expenditure or losses incurred to the extent recoverable under an insurance policy or a contract of indemnities.
- Bad debts.

Losses

Losses from previous years may be carried forward indefinitely. However, the carried forward loss from the disposal of assets may only be utilised against gains arising the disposal of assets. Foreign-sourced losses may be offset only against foreign-sourced income of a particular country.

Group taxation

Companies, etc. are taxable on a stand-alone basis (i.e. there is no grouping or ability to transfer tax losses).

Tax credits and incentives

Foreign tax credit

A resident taxpayer is entitled to a credit for any foreign income tax paid in respect of foreign-source income. The foreign tax credit is calculated separately for each foreign country from which income is derived by a taxpayer. The value of such tax credits is limited to the value of the Timor-Leste income tax payable on that income. There is no deduction or carryforward of any excess foreign tax credit.

Withholding taxes

Withholding tax (WHT) is imposed on the following payments by residents to a resident:

Type of payment	WHT rate (%)	Final/non-final tax
Royalties	10	Not final, except where paid to an individual
Rent (land and building)	10	Not final, except where paid to an individual
Prize and winnings	10	Final
Construction/building activities	2	Final *
Construction consulting services	4	Final *
Air and sea transportation	2.64	Final *
Mining and mining support services	4.5	Final *

* The default position is that such amounts will be final taxed. The income recipient can elect to have these payments for services not subjected to final tax by submitting a notification letter to the Timor-Leste Revenue Service.

Payments of Timor-Leste source income made by a resident to a non-resident are subject to WHT at 10%. Timor-Leste has also not entered into any DTTs.

Timor-Leste

Where WHT is applied as a final tax, the taxed income is not included in the recipients' taxable income for income tax purposes. Accordingly, expenses incurred in deriving income that is subject to final tax are not deductible for income tax purposes.

Tax administration

Taxable period

The standard tax year is the calendar year, although different accounting year-ends can be granted upon application.

Tax returns

CIT returns are to be filed annually by the 15th day of the third month following the year end.

Service tax, excise tax, sales tax, and WHT are to be filed monthly by the 15th day of the following month.

Payment of tax

CIT due shall be settled to the Banking and Payments Authority or another entity nominated by the Tax Administration by the date of filing (*see above*).

Service tax, excise tax, sales tax, and WHT should be settled to the Banking and Payments Authority or another entity nominated by the Tax Administration by the 15th day after the end of the following month.

Penalties

If a taxpayer fails to deliver the tax form on time, it shall be liable to an additional tax of USD 100. If a taxpayer failed to deliver all or part of any tax due by the due date, that taxpayer shall be liable to an additional tax of 5% of the amount due plus an additional 1% of the tax due on the 15th day of each month following the due date and:

- if the failure was due to gross carelessness on the part of the person, further additional tax of 25% of the tax that remains unpaid, or
- if the failure was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax that remains unpaid.

If a taxpayer has understated the tax due in the tax form, that taxpayer shall be liable to an additional tax of 15% and:

- if the understatement was due to gross carelessness on the part of the taxpayer, further additional tax of 25% of the tax understated, or
- if the understatement was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax understated.

Statute of limitations

The Timor-Leste tax authority may issue an assessment notice or amend an assessment notice only within five years from the date of filing of the return. In the event of a deliberate tax evasion or fraud, there is no time limit for the issuance of an assessment notice.

Assessments may occur upon the following:

- The delivery of a tax return form and payment.

- After receipt of a return where the Commissioner believes a return is incorrect.
- Where a taxpayer fails to file a return.

Assessments may be amended according to the following events:

- By the taxpayer upon delivery to the Commissioner of an amended assessment.
- Via a taxpayer request to the Commissioner.
- Via specific amendment by the Commissioner.

Other issues

Taxation of petroleum operations

The taxation of petroleum operations in Timor-Leste is partly covered by the TDA. However, the TDA operates only to modify the taxation of petroleum activities pursuant to a number of legacy tax regimes. These modifications apply to contractors, sub-contractors, and any other parties receiving income from the supply of goods or services to a contractor or sub-contractor.

A contractor is defined as a person who has an interest in a petroleum agreement (being a Production Sharing Contract or PSC) with the designated authority in Timor-Leste. A sub-contractor includes any person supplying goods or services directly or indirectly to a contractor in respect of petroleum operations.

Specific provisions for the taxation of petroleum operations include:

- A CIT rate for contractors of 30% on taxable income, while sub-contractors will generally be taxed on a final WHT basis at rate 6% (*although see JPDA below*).
- No tax on branch profit remittances (*although see JPDA below*).
- Where 'net receipts' exceed specified levels, a SPT can apply.
- The 'ring fencing' of income and expenditure within the contract area.
- Modified deductibility rules, including around the deductibility of interest for contractors and a modified depreciation regime.
- A specific WHT regime.

Special tax regime for the JPDA

The JPDA is a geographical area in the Timor Sea known to be rich in hydrocarbon deposits. The JPDA covers the 'Annex F' PSCs (see below) known as Bayu-Undan (including the Elang Kakatua and Kakatua North fields) PSCs, and Greater Sunrise. The JPDA also covers a number of non-Annex F PSCs.

Pursuant to the Timor Sea Treaty (TST), the JPDA is technically within the taxation jurisdiction of both in Timor-Leste and Australia and therefore falls under the joint control and management of Timor-Leste and Australia. Annex F of the TST refers to the PSCs with commercial discoveries at the time of the TST signing and so imbeds a number of historical tax principles.

Control of the JPDA is exercised by a 'Joint Authority' containing representation from Australia and Timor-Leste. The petroleum activities covering the exploration, development, processing, transportation, and marketing of hydrocarbons are carried out pursuant to PSCs entered into between the designated authority and the oil company in question.

Timor-Leste

Under the TST, revenue from the JPDA PSCs is split 90% for Timor-Leste and 10% for Australia. Accordingly, for tax calculation purposes, business profits or losses of an entity carrying on business in the JPDA are reduced by the 'reduction percentage' of 90% for Timor-Leste and 10% for Australia. This effectively means that the tax rates applied by Timor-Leste and Australia are at 90% and 10% of their respective national level.

For Timor-Leste, these tax rates are generally 30% for all participants with PEs and an 8% or 20% final WHT for non-residents (according to the PSC). A 10% VAT also applies.

The tax regime as outlined under 'Taxation of petroleum operations' above also applies in the JPDA (except for Annex F PSCs). This is, however, with a number of important modifications, including the exclusion of the service tax, excise tax, sales tax, import duty, and WIT.

Significant developments

The following developments occurred in the last year:

- The VAT registration threshold for companies making commercial supplies increased from 200,000 Trinidad and Tobago dollars (TTD) to TTD 360,000 for a 12-month period.
- Furniture and fittings previously allocated to Class A and subject to wear and tear allowance (tax depreciation) at the rate of 10% under the declining-balance method have been re-allocated to Class B and now attract wear and tear at the rate of 25%.
- 130% wear and tear allowance is now available for expenditure incurred in compressed natural gas (CNG) related initiatives.
- An allowance of 50% of the expenditure incurred on the purchase of equipment for the retail dispensing of CNG and liquefied natural gas (LNG) is now available, up to a maximum of TTD 2 million per station.
- 150% wear and tear allowance is now available on the expense incurred in relation to solar heaters, wind turbines, and photovoltaic systems.

Taxes on corporate income

A Trinidad and Tobago resident corporation is taxed on worldwide income. A non-resident company engaged in business in Trinidad and Tobago is taxed only on income directly or indirectly accruing in or derived from Trinidad and Tobago.

The standard corporation tax rate is 25%, but this varies in the case of certain classes of companies. The current corporation tax rates are as follows:

Type of company	Corporation tax rate (%)
Ordinary companies	25
Petroleum related companies	35
Life insurance companies	15
Petroleum production companies (petroleum profits tax)	50

Business levy

Corporations are subject to a business levy at the rate of 0.2% of gross revenue or receipts where the levy exceeds the corporation tax liability. Exemption is available for certain companies, including petroleum companies and companies whose annual turnover is less than TTD 200,000. The levy is a non-deductible expense for corporation tax purposes.

Trinidad and Tobago

Green fund levy

A green fund levy of 0.1% is applicable to companies and partnerships doing business in Trinidad and Tobago. This levy is payable quarterly and is neither a deduction in computing chargeable income nor a credit against corporation tax due.

Unemployment levy

Only petroleum companies remain liable to the unemployment levy, at the rate of 5% of taxable profits. No set-off for prior year losses is permitted in computing the liability.

Supplementary petroleum tax (SPT)

SPT is chargeable on the gross income (derived from the sale of crude oil) less royalties and overriding royalties paid on the crude oil sold. The tax is computed separately in respect of land and marine operations and is a quarterly tax based on the actual gross income for each quarter.

The SPT is deductible in arriving at profits subject to petroleum profits tax.

Corporate residence

Corporate residence is determined by reference to the location of the central management and control of the business of a company.

Other taxes

Value-added tax (VAT)

VAT is applicable to a wide range of goods and services. The standard rate applicable to commercial supplies is 15%.

Certain basic unprocessed foods and agricultural supplies are zero-rated, as are crude oil, natural gas, and all exported goods and services. Hotel accommodations and yachting services to non-residents are zero-rated.

A number of services, including financial services, real estate brokerage, residential rentals, and educational services, are exempt. However, certain financial services are subject to a transaction tax at a rate of 15%. Imported inputs of highly capital-intensive manufacturers are exempt from VAT.

The VAT registration threshold for companies making commercial supplies is TTD 360,000 for a 12-month period.

Hotel accommodation tax

Hotels are subject to a hotel accommodation tax at a rate of 10% of the value of the accommodation.

Insurance premium tax

A tax at the rate of 6% has been imposed on insurance premiums in respect of general insurance contracts. Life insurance and reinsurance premiums are exempt.

Branch income

A branch is subject to Trinidad and Tobago taxation on all income directly or indirectly accruing in or derived from Trinidad and Tobago. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporation tax and reinvestments, are subject to withholding tax (WHT) at the rate of 5%. This may be varied by the provisions of any applicable double tax treaties (DTTs).

Income determination

Inventory valuation

Inventories are generally stated at the lower of cost or market value. Cost may be determined by the first in first out (FIFO) or the average-cost method. The last in first out (LIFO) and base-stock methods are not generally accepted for tax purposes.

Capital gains

Gains on the disposal of chargeable assets within 12 months of acquisition are subject to tax at standard corporation tax rates. *See Depreciation in the Deductions section for capital gains information on the sale of tax-depreciable assets.*

Dividend income

Dividends received by a Trinidad and Tobago company from both domestic subsidiaries and other domestic corporations are fully exempt from tax.

Stock dividends

A Trinidad and Tobago corporation can distribute tax-free a dividend of common stock (bonus issue) proportionately to all resident common stockholders.

Deductions

Depreciation

Tax depreciation rates (wear-and-tear allowances) have been standardised by statute. Fixed assets are to be classified into one of four classes:

Asset class	Depreciation rate (%)
Class A: Buildings and improvements	10
Class B: Motor vehicles, furniture and fittings, plant and machinery	25
Class C: Heavy equipment, motor lorries, trucks, and computer equipment	33.3
Class D: Extra heavy equipment, airplanes	40

The allowance will be calculated at the rate applying to aggregate expenditure incurred on assets within the class on a declining-balance basis.

Accelerated tax depreciation is allowed to manufacturers in the form of an initial allowance at the rate of 90% on capital expenditure on plant and machinery. The allowance is to be claimed in the year that the asset is first brought into use. For those companies engaged in the production of sugar, petroleum, or petrochemicals, or enjoying concessions under the Fiscal Incentives Act, the rate is 20%.

Trinidad and Tobago

Gains on the sale of tax-depreciable assets are taxable as ordinary income (i.e. a balancing charge) but only when the written-down value of the assets of a class goes into credit. Prior to this, the proceeds of sale are credited to the particular class thereby reducing the written down value of the class. Tax depreciation is not required to conform to book depreciation.

Petroleum operations

A company engaged in petroleum production business is entitled to capital allowances on tangible costs and intangible drilling and development costs as follows:

- Tangible costs: Initial allowance at 20% and annual allowance at 20% under the straight-line method.
- Intangible costs: Initial allowance at 10% and annual allowance at 20% under the reducing-balance method.

Allowances in respect of petroleum operations are granted from the earlier of (i) the year following the year in which the expenditure was incurred or (ii) the year in which commercial production commences (save that in the case of exploration activity the allowances are to commence from the year incurred).

Charitable contributions

Charitable contributions under deeds of covenant to approved charities are deductible, up to a maximum of 15% of total income.

Taxes

Other than SPT, taxes or levies are not generally deductible in arriving at taxable profit.

Other significant items

Contributions by local insurance companies to 'catastrophe reserve funds' are deductible for tax purposes, up to the value of 20% of net premium income from property insurance business.

Net operating losses

A trading loss may be carried forward indefinitely to be set-off against future profits. Loss carrybacks are not permitted.

A limited form of group loss relief has been introduced, whereby current year losses may be surrendered to a claimant company within a group, except that the claimant's tax liability cannot be reduced by more than 25%. Such companies must be resident in Trinidad and Tobago.

Payments to foreign affiliates

A corporation engaged in business in Trinidad and Tobago may claim a deduction for royalties and interest charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted. For interest to be deductible for tax purposes, the funds borrowed must have been utilised in the production of income and the recipient must be subject to tax in Trinidad and Tobago or otherwise specifically exempt from local tax.

Deduction for management charges (as this term is defined) paid to a non-resident is restricted to the lower of the management charges or 2% of outgoings and expenses exclusive of the charges. Tax depreciation allowances may not be treated as an expense for this purpose. WHT may also be applicable to management charges paid to non-resident persons.

Group taxation

There is no provision for group taxation in Trinidad and Tobago; however, a limited form of group loss relief is available (*see Net operating losses in the Deductions section*).

Tax credits and incentives

Foreign tax credit

Double taxation is avoided or mitigated by means of foreign tax credits.

Tax holidays

Fiscal Incentives Act, 1979

An approved enterprise, which must be a locally incorporated resident corporation, may be granted an exemption from corporation tax for a period of up to ten years, depending on the category under which it is approved. Exemption may be total or partial. Subject to approval, profits may be distributed tax free to shareholders, except in the case of certain non-resident shareholders, where the relief is restricted to so much of the tax as exceeds their liability in their country of residence. Net losses during the tax holiday period (i.e. the excess of total losses over total profits) may be carried forward for set-off without limitation for five years from the end of the tax holiday period, after which the normal set-off provisions for losses apply. As of 1 January 2007, the tax holiday in respect of corporation tax is no longer granted.

Approved tourism projects

Under the Tourism Development Act 2000, approved tourism development projects, including hotels, are granted a tax holiday for periods of up to seven years. In addition, a carryover from a tax exemption period is permitted of any loss arising out of the operation or renting of an approved tourism project to be written off against profits in accordance with normal income tax loss provisions, subsequent to the tax holiday period. An approved tourism project means a project declared to be so by the government.

Approved mortgage and other companies

The profits of an approved company are exempt from corporation tax. The exempt profits, when distributed to shareholders, are exempt from corporation tax and income tax. Expenses incurred in the course of the approved mortgage business remain fully deductible.

Business expansion scheme

The business expansion scheme was introduced in 1988 to allow approved small companies carrying on business in a regional development area and companies carrying out certain approved activities a tax credit of 15% of their chargeable profit. This scheme is to be restructured to encourage both individual and corporate investors to invest in venture capital companies by allowing a 'tax rebate' on their investment. As of 2006, the tax credit has been removed and replaced by a five year tax holiday.

Free Zone

The profits of an approved company operating in a designated Free Zone are free from corporation tax. In addition, payments to non-residents are free of WHT. Approved activities include manufacturing.

Trinidad and Tobago

Other allowances/incentives

Promotional expenses

Promotional expenses incurred by local firms to promote the expansion of existing markets and/or the creation of new ones for the export of specified services or locally produced goods are tax deductible as an expense at 150% of the actual outlay. Tax-deductible promotional expenses are defined as those expenses incurred in respect of specified services or goods produced in Trinidad and Tobago. This includes such items as advertising in foreign markets and participation in trade fairs and missions.

Scholarship allowance

Companies can deduct the actual expenses incurred in granting scholarships to nationals who are not employees, directors, or associates of directors of the company for tertiary education.

Market development grants

An Export Development Corporation was established to manage government export-development programs and also to do all things necessary and appropriate for the encouragement, promotion, and expansion of export-oriented business. The Corporation was empowered to give financial assistance to exporters by way of market development grants. In 1994, the Tourism and Industrial Development Corporation was formed to incorporate in a single entity the functions of the Export Development Corporation, the Tourism Development Authority and the Industrial Development Corporation. This is now the authority responsible for administering the grants.

These grants are not exempt from taxation unless (i) they have been made in respect of expenses incurred by an exporter prior to the export of the first commercial shipment of goods produced in Trinidad and Tobago and (ii) the foreign market is not in a country specified as an 'excluded country'.

Market development grants will be awarded to exporters that meet the criteria set out by the Corporation. Qualifying expenses include costs incurred in research in foreign markets, product design, and testing abroad.

Production company allowance

An allowance equal to 150% of actual expenses incurred in respect of the company's own audio, visual, or video productions for educational or local entertainment, or local culture, is available.

Allowances are granted in respect of each of the following activities, based on the actual expenditure incurred but not exceeding TTD 2 million in aggregate:

- Art and culture allowance.
- Sportsman/sporting activity allowance.
- Audio, visual, or video production allowance.

Child care/Home work facility

A deduction is allowed for the actual cost incurred in setting up a facility for dependents of employees who are minors, up to a maximum of TTD 500,000 for each facility, subject to an aggregate sum of TTD 3 million in any year.

Trinidad and Tobago

Withholding taxes

WHT is imposed at varying rates up to 15%, depending on the nature of the payment, the status of the payee, and the applicability of DTTs. The tax treaty rate in some instances is now higher than the statutory rate. In such cases, the lower statutory rate applies. The rates below have been adjusted to reflect these reductions:

Recipient	Dividends (%)			Interest (%)
	Portfolio	Substantial holdings		
Resident corporations and individuals	0	0		0

Notes

1. Individuals.
2. Corporations. The lesser rate applies to parent companies.
3. The lesser rate applies to companies, other than investment companies, that control at least 10% of the voting power.
4. The rate is 10% of the gross amount if interest is paid to a resident of France; it is 0% if the interest is paid to the French government or to any agency or instrumentality of the French government.
5. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Germany, 0% where interest is paid to certain stated governmental institutions, and 15% of the gross amount in all other cases.
6. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Sweden, 0% where interest is paid to certain specified governmental institutions, and 15% of the gross amount in all other cases.
7. The rate is 15% of the gross amount if the interest is paid to a bank or financial institution in the United States (US) that does not have a permanent establishment (PE) in Trinidad and Tobago, 0% where the interest is paid to the US government or to any agency or instrumentality wholly owned by the US government, and 20% of the gross amount in all other cases.
8. The rate applies to patent royalties.
9. The rate applies to copyright royalties and similar payments.
10. The rate applies to royalties paid in respect of the operations of mines or quarries or of the extraction or removal of natural resources.

Tax administration

Tax returns

The taxpayer is required to file a tax return with the Board of Inland Revenue (BIR) by 30 April following the end of the fiscal period. An automatic six-month grace period is allowed, following which a penalty is imposed of TTD 1,000 for every six months or part thereof that the return remains unfiled.

Payment of tax

Corporation tax, business levy, and green fund levy are payable quarterly in advance on 31 March, 30 June, 30 September, and 31 December. Any balance of tax due is payable on or before 30 April of the following year. Instalments of corporation tax are based on an estimate of the current year's liability or on the actual chargeable profits for the previous year, whichever is greater. If the current year's estimate is lower, the company may apply to the BIR to reduce its quarterly instalment. The levy liabilities are based on the actual receipts for the quarter.

Significant developments

The following significant corporate tax developments occurred during the past year.

Wholly exporting companies

Wholly exporting companies are allowed to continue to benefit from the total deduction from their taxable results of the benefits derived from their activity until 31 December 2012.

Capital gains

Prior to 1 January 2011, capital gains derived from the sale by non-Tunisian tax resident persons of shares held in the capital of Tunisian resident corporations were exempt from corporate tax and any related withholding tax (WHT).

As of 1 January 2011, capital gains derived by non-Tunisian tax resident persons from the disposal of shares held in the capital of Tunisian resident corporations are subject to the following tax regime:

- With regard to shares listed in the Tunisian Stock Exchange:
 - In cases where the shares were purchased prior to 1 January 2011, then capital gains will not be subject to tax in Tunisia.
 - In cases where the shares are purchased after 1 January 2011 and will be sold before the end of the year following the one during which they were acquired, then capital gains will be subject to tax. Otherwise (i.e. in case the shares will be sold after the expiry of the year following the one during which they were acquired), capital gains will not be subject to tax.
- With regard to shares not listed in the Tunisian Stock Exchange:
 - Capital gains derived from the disposal by non-Tunisian resident persons of non-listed shares are subject to tax in Tunisia.
- The due tax will be levied through WHTs due at the rate of:
 - 10% on the basis of the realised capital gains, with a ceiling of 2.5% of the selling price in cases where the seller is an individual.
 - 30% on the basis of the realised capital gains, with a ceiling of 5% of the selling price in cases where the seller is a company.

However, in cases where the seller realises, during the same fiscal year, capital gains and capital losses derived from the disposal of shares, then the seller may opt for filing an annual tax return with the Tunisian tax authorities and the payment of the tax due at the rate of:

- 10% for individuals, on the basis of the balance between the realised capital gains and realised capital losses, minus 10,000 Tunisian dinars (TND).
- 30% for corporations, on the basis of the balance between the realised capital gains and realised capital losses.

Exploitation losses

Exploitation losses (other than deferred amortisation) are to be carried forward for five years, starting from the year following the one during which they are booked.

Taxes on corporate income

Benefits subject to corporate tax in Tunisia are those realised by all Tunisian-resident companies as well as any other revenue realised by non-Tunisian-resident companies in case the taxation is attributable to Tunisia by virtue of a double taxation treaty (DTT).

Permanent establishments (PEs) of non-Tunisian-resident companies are subject to corporate tax in the same way and under the same conditions as Tunisian-resident companies. However, certain particularities, related mainly to deductions, exist.

Corporate tax is also due by non-resident not established companies on Tunisian-sourced income, and this through WHTs.

Corporate tax is broadly levied on the total net income resulting from the statutory financial statements of the company, duly adjusted according to the specific tax rules.

Positive/negative items of income are taxed/deducted based on the accrual basis. Income items accruing in a tax period where the above principle is not met are not allowed for tax deduction nor taxed in that tax period. Tax deduction/taxation is correspondingly deferred to the future tax periods where the principle will be met.

Income items have to be certain in their occurrence and objectively determined or determinable in their amount.

Corporate tax rates

The general corporate tax rate is 30%.

However, specific rates are foreseen for specific sectors of activity. Indeed, corporate tax is due at the rate of:

- 10% for:
 - companies carrying out craft activities, agricultural and fishing activities, and fitting out fishing boats
 - trading groups of retail businesses organised as service cooperatives, governed by the general cooperation legislation
 - service cooperatives formed between producers for the wholesale of their production
 - consumer cooperatives governed by the general cooperation legislation, and
 - exporting companies that realise their first exportation operation as of 1 January 2013. Corporate tax is also due at the rate of 10% for exporting companies during the first decade of activity ending, at the latest, on 31 December 2012.
- 35% for:
 - financial institutions governed by the law n° 2001-65, as modified and completed by the law n° 2006-19
 - offshore financial institutions governed by the code related to financial services destined to non residents, and this only for the benefits derived from services provided to non-resident persons
 - investment companies governed by the law n° 88-92, as modified and completed by the subsequent laws, mainly by the law n° 2005-104

Tunisia

- insurance and reinsurance companies governed by the assurance code promulgated by the law n° 92-24, as completed and modified by the subsequent laws, mainly the law n° 2005-86
- debt collection companies governed by the law n° 98-4, as modified and completed by the subsequent laws, mainly the law n° 2003-42
- telecommunication companies governed by the telecommunications code promulgated by the law n° 2001-1, as modified and completed by the law n° 2002-46
- companies operating in the oil and gas service field and governed by the Hydrocarbons code promulgated by the law n° 99-93, as modified and completed by the subsequent laws, mainly the law n° 2004-61
- companies operating in the production and the transport of hydrocarbons and governed by particular conventions, as well as companies operating in the transfer of hydrocarbons via pipeline, and
- companies operating in the oil refining sector and the wholesale of hydrocarbon products, foreseen by the law n° 91-45.

Minimum corporate tax

A minimum corporate tax is due at the rate of 0.1% of the local turnover, including value-added tax (VAT), in case:

- the company realises losses or
- the corporate tax due at the rate of 10%, 30%, or 35% is less than the minimum corporate tax of 0.1% of the local turnover, including VAT.

The minimum corporate tax is not due by companies established in the regional development zones during the period of tax holidays. These latter are fixed by decree.

Corporate residence

A company is tax resident in Tunisia if it is registered or has its effective place of management therein.

Permanent establishment (PE)

No definition of PE is given by the Tunisian domestic law. In practice, the Tunisian tax authorities refer to the definitions given by DTTs.

Other taxes

Valued-added tax (VAT)

VAT scope and rates

VAT is levied under the Tunisian VAT Code and is due on all transactions taking place in Tunisia. The sale of goods is considered as taking place in Tunisia and thus subject to VAT if the goods sold are delivered in Tunisia. The sale of services is considered as taking place in Tunisia and thus subject to VAT if the services sold are exploited or used in Tunisia.

The standard rate of VAT is 18%. Lower rates of 6% and 12% apply to specifically designated operations.

Some operations, products, or services are out of the scope of VAT in Tunisia, and some others are expressly exempt from VAT.

Some goods and services may be acquired VAT free, based on a certificate delivered for the purpose by the relevant tax authorities. This exemption is granted mainly to wholly exporting companies, oil and gas companies, their contracts, and their subcontractors.

Registration for VAT purposes may be either obligatory or optional.

Voluntary registration is allowed where persons:

- carry out activities that are outside the scope of the Tunisian VAT, in which case the option has to be a full option, which means that all the activities carried out by these persons will be subject to VAT, and
- carry out operations that are exempt from VAT and that are destined for export, or supply products and services that are exempt from VAT to persons liable to VAT, in which case the option may be a partial or a full option.

Output VAT

Output VAT is calculated on the basis of the amount of the invoice excluding VAT.

Input VAT

Individuals and companies that are subject to VAT may deduct the input VAT incurred on the purchase of goods and services necessary to carry out activities subject to VAT.

VAT incurred on the following expenses may not be deducted as input VAT:

- Purchases of passenger cars, other than those that constitute the main activity of the business.
- Expenses related to the functioning or maintenance of passenger cars.
- VAT unduly charged (charged by mistake by a supplier who is not liable for VAT).
- VAT mentioned on invoices that do not comply with the VAT requirements, i.e. invoices that do not mention the compulsory information, such as the amount excluding VAT, rate and amount of the VAT, amount including VAT, and the name and address of the client.

In order to allow the deduction of the input VAT, invoices have to be properly issued and have to include:

- the name and address of the supplier
- the name and address of the client
- the VAT identification of the supplier
- the designation of the goods or services
- the transaction date
- the amount excluding VAT
- the VAT rate, and
- the VAT amount.

Partial exemption

Partial exemption applies if the company is carrying on two or more activities and one or several activities are not subject to VAT. In this case, the input VAT to be deducted is a portion of the whole input VAT incurred. This portion is calculated by multiplying the total amount of the input VAT by a quotient where:

Tunisia

- the numerator is the total amount of the turnover subject to VAT plus the turnover realised from exportations increased by the hypothetical VAT (due on the turnover derived from exportation), plus the turnover realised from sales made to persons allowed to acquire goods and services necessary for their activities VAT-free, based on a certificate issued by the tax authorities, and
- the denominator is the total amount of the numerator increased by the turnover realised from sales exempt from VAT and sales outside the scope of VAT.

Adjustments

During the course of the year, the company deducts the input VAT on a *pro rata* basis (as described above). The quotient applied is calculated by using the data of the previous year. At the end of the current year, the company must calculate the quotient to be applied and corresponding to that year. If the difference exceeds 5%, the company must adjust the input VAT.

VAT declaration

The VAT is declared and paid on a monthly basis.

Refunds

If the input VAT exceeds the output VAT, the VAT credit resulting from the difference between the input VAT and the output VAT may be reimbursed on the basis of a written request made to the tax authorities.

The VAT credit is refundable if it arises from:

- exportation operations of goods and services, sales made to clients allowed to acquire goods and services VAT-free, and WHT made on the remunerations paid to companies that are neither resident nor established in Tunisia (such VAT credit is refundable if it is shown at least on one monthly tax return)
- investments destined for the carrying out of new projects as provided for in the Tunisian Incentives Investment Code (such VAT credit is refundable if it is shown on at least three successive monthly tax returns)
- suspension of activity (such VAT credit is refundable after a tax audit), or
- other operations (such VAT credit is refundable if it is shown on at least six successive monthly tax returns).

In order to benefit from the refund of VAT credits, the taxpayer has to file supporting documents, such as declarations relating to exportation of goods, documents proving that the service rendered by the Tunisian taxpayer was used or consumed outside Tunisia, authorisations to sell VAT-free, and WHT certificates.

To benefit from the refund of VAT credits, the taxpayer must already have submitted all tax returns and paid all taxes due at the time of submission of the request for the refund.

An advance payment of 15% of the VAT credit is to be paid to the taxpayer as soon as the taxpayer presents the request for refund if the VAT credit arises from operations other than export, suspension of activity, and operations of companies that are neither resident nor established in Tunisia. This rate is to be increased to 50% if the taxpayer is a company of which the financial statements are subject to legal audit, and to 100% if the VAT credit is originated from exports.

Time limits

The taxpayer may claim for the VAT credit within three years starting from the date from which the VAT credit becomes refundable.

Customs duties/Import tariffs

Import VAT

Importation of goods and services are subject to import VAT unless:

- the imported good is expressly exempt, e.g.:
 - Fresh milk, uncondensed and unsweetened, whether skimmed or full-fat.
 - Milk flour.
 - Devices intended for use by physically disabled persons.
 - Pure-bred breeding animals.
 - Equipment with no similar manufactured locally, expressly designated.
 - Boats destined to maritime navigation and fishing, other pleasure boats.
- The importer benefits from the acquisition of goods necessary to its activity VAT free (e.g. oil and gas companies).

Customs duties

Customs duties are due on importations other than those made from the European Union (EU).

Some equipment expressly designated by the Tunisian domestic law is exempt from customs duties, whether imported from EU countries or not.

Customs duties are not due in cases where the importer is expressly exempt, even if the goods are imported from outside the European Union.

For temporary importation of equipment, the due customs duties are to be calculated in proportion to the period spent in Tunisia. 1/60 of the total customs duties are due per month spent in Tunisia.

Property taxes

A real estate tax (RET) is calculated by the relevant municipalities and is notified annually to the taxpayers at the beginning of the civil year.

For companies subject to the payment of the local authority tax (LAT) (*see below*) and in case the LAT paid over the year is less than the RET notified by the municipalities, then the differential is due and is payable as complementary LAT. In other words, the RET constitutes a minimum of due LAT per year.

Transfer taxes

The registration of some operations is compulsory. In these cases, the registration fees are expressly determined by the Registration and Stamp Fees Code.

The registration remains optional for certain operations. In case of optional registration, the registration fees due to be paid are equal to TND 20 per page and per copy.

In case of compulsory registration, the fees due depend on the nature of the transaction and the goods involved.

Some transactions are subject to proportional registration fees, for example:

- 5% on the transfer of immovable properties.
- 2.5% for the transfer of goodwill (*fonds de commerce*).

Tunisia

Transactions that are not subject to proportional registration fees, as well as transactions the registration of which is optional, are subject to insignificant fixed registration fees (TND 20 per page, TND 100 per contract, etc.)

Stamp taxes

Stamp duties are due in general on certain contracts expressly designated as well as invoices, unless the customer is expressly exempt.

In general, stamp duties range from TND 0.4 for invoices, to TND 2 per page for contracts, to TND 60 for passports.

Certain documents are expressly exempt from stamp duties, mainly judgments, checks, etc.

Social logging tax

Employers established in Tunisia, regardless of being liable or not to income tax, are subject to a social logging tax, calculated at 1% of the gross amount of salaries paid to its employees, including benefits in kind.

The social logging tax is filed on the monthly tax return through which VAT and other direct taxes, except corporate tax, are filed.

This tax is payable monthly before the 28th day of the following month.

Vocational training tax

Entities subject to corporate tax are subject to vocational training tax, calculated at 2% of the gross amount of salaries paid to its employees, including benefits in kind. The rate of this tax is 1% for industrial companies.

This tax is payable monthly before the 28th day of the following month.

Local authority tax (LAT)

LAT is payable by entities subject to corporate tax, except entities operating in the tourism sector. The tourism sector is defined as accommodation, entertainment, tourist transportation, thermals, congressional tourism, companies managing hotels and entertainment centres, and travel agencies.

If a company is engaged in several activities, some of which are subject to LAT and the remaining are not subject to LAT, the taxable base to be considered is constituted only by the turnover of the activities which are subject to LAT.

The LAT paid to the local authority is of 0.2% of the total turnover of the entity, with a minimum calculated on the basis of the number of square metres of construction used by the entity.

LAT is payable monthly before the 28th day of each month.

Hotels tax

The hotels tax is due by entities operating in the tourism sector under the law decree n° 73-3, which defines the activities covered as any entity that works with tourists, providing accommodation, food and beverages, or organises leisure activities for these clients. The tax is calculated at 2% of the gross turnover generated from the tourism and relating activities.

This tax is payable monthly before the 28th day of the following month.

Tourism Sector Development Fund (FDCST)

The FDCST tax is a tax that is paid by entities operating in the tourism sector. The tax is calculated at 1% of the turnover, excluding VAT, generated from tourism and relating activities.

Branch income

The income attributable to a PE corresponds to:

- the revenues generated directly by the PE further to the exercise of its activity
- the revenues corresponding to works carried out by it, even if invoiced by the head office, and
- the revenues that would have been realised by an independent company carrying out the same business, in case the activity of the PE is provided for free.

The following charges are deductible for the purpose of the determination of the taxable results of a PE:

- All the charges incurred directly by this PE and necessary for its proper functioning. These charges have to be supported by proper documentation.
- Direct charges incurred by the head office exclusively for the PE and supported by proper documentation.
- A proportion of the indirect charges (real central administration costs) incurred by the head office. The proportion tax admitted for deduction is most often calculated on the basis of the turnover of the Tunisian branch against the global turnover of the head office. The deduction is limited to 10% of the Tunisian turnover in case this latter is resident of state which did not conclude a DTT with Tunisia.

Income determination

Inventory valuation

Inventory is valued at cost.

Capital gains

According to the provisions of article 11 of the Income and Corporate Tax Code, “the net income of a company is determined as the result of all the operations undertaken by the company, including mainly the transfer of assets...”

Consequently, capital gains, if any, arising from the transfer of assets will be considered as taxable income and will be subject to corporate tax.

However, capital gains are not to be subject to tax separately, in the meaning that they are to be added to the global taxable income and as such, they will increase or reduce the company's tax liability.

Capital gains are calculated as the difference between the sale price, which is supposed to be equal to the fair market value, and the net book value.

Tunisia

In the particular case of goodwill (*fonds de commerce*) generated internally, capital gains will be equal to the total sale price, as goodwill, other than derived from acquisitions, has no value on the books of the company.

All tangible and intangible transaction assets have to be valued at their fair market value.

The goodwill (*fonds de commerce*) generated internally, even if not booked as an asset of the company, also has to be valued at fair market value.

Particular case of capital gains resulting from mergers

Capital gains arising from the transfer of assets, other than inventories, on the occasion of a merger operation are deductible from the taxable income of the merged company and are to be added back to the taxable income of the absorbing company at up to 50% of their amount, spread out over five years.

Dividend income

Dividends distributed by Tunisian resident companies are exempt from corporate tax.

Dividends distributed by non-resident companies are subject to tax in Tunisia, unless otherwise provided for by the DTTs concluded by Tunisia.

Interest income

Interest arising from Tunisia or outside is part of the taxable results of the company, unless expressly exempt by the law (e.g. interests on deposits in foreign currencies).

Royalty income

Royalty income is part of the taxable results of the company, except those derived from exports.

Deductions

Depreciation

Depreciation expenses of fixed assets that are the ownership of the company and within the limit of the depreciation expense calculated according to the straight-line method are deductible for the purpose of determination of taxable income at a maximum depreciation rate fixed by decree.

Buildings may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 5%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

Equipment and machinery may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

The equipment and machinery depreciation rate may be increased by 50% if the equipment is used at least 16 hours a day, or doubled if used 24 hours a day, but the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15% according to the straight-line method, multiplied by 1.5 or by 2 depending on whether the equipment will be used 16 or 24 hours.

Depreciation expenses of assets exploited under leasing contracts are also deductible for the purpose of determination of taxable income. In fact, even if assets exploited under leasing contracts are not the ownership of the company, they are booked as assets in the balance sheet and depreciated accordingly over a minimum period fixed by decree, as follows:

Asset exploited under leasing contracts	Minimum period (years)
Constructions	7 years
Machinery and equipment	4 years
Transportation equipment	3 years

Goodwill

Goodwill (*fonds de commerce*) amortisation expenses are not tax deductible for the purpose of the determination of the taxable results.

Start-up expenses

Star-up expenses, as per the Tunisian accounting legislation, are to be capitalised and amortised over a three-year period.

Tax wise, the maximum amortisation expense allowed for deduction is equal to 100% of the start-up expenses.

Bad debt

Provisions for bad debts are tax deductible within the limit of 50% of the taxable result (after adjustments: deduction of non-taxable revenues and add back of non-deductible charges).

For this purpose, provision for bad debts have to be first of all, added back totally to the accounting result, among the other non-deductible charges to be added back.

Then, once the taxable result is determined, the company may deduct provisions for bad debts only up to 50% of this latter. Consequently, the deduction of provisions for bad debts never results in creating or increasing losses.

The deduction of bad debts is subject to the presentation of a detailed statement of the concerned creditors, while filing the annual corporate tax return, as well as court cases against these latter in order to claim payment.

Reversal on bad debts provisions are deductible within the limit of the correspondent provisions that were subject to tax during the tax year of their built-up (provisions that were added back but not limited within the authorised deduction limit).

Charitable contributions

Charitable contributions are either:

- deductible totally in cases where they are granted to proprietary organisms, the list of which is fixed by decree, or
- within 0.2% of the revenue, in the other cases.

The deduction of charitable contributions is subject to the presentation of a detailed statement of the beneficiaries, while filing the annual corporate tax return of the year during which these charitable contributions were granted.

Tunisia

Fines and penalties

Transactions, fines, and any other penalties for violating legal provisions are not tax deductible.

However, contractual penalties (for late payment for example) remain tax deductible.

Taxes

All taxes due by the company are considered as tax deductible charges, except corporate income tax.

Note that when the tax due by non-resident not established persons on royalties is borne by a Tunisian established company (the debtor), then the correspondent charge is not tax deductible.

Net operating losses

Under the Tunisian tax legislation, tax losses are divided into two categories:

- operating losses, and
- deferred depreciation.

Operating losses are to be carried forward for five years starting from the year following the one during which they were booked.

Deferred depreciation is to be carried forward indefinitely starting from the year following the one during which they were booked.

To benefit from the previous regime, the amount of the deferred depreciation has to be mentioned separately in the Notes to the Financial Statements.

Payments to foreign affiliates

See Transfer pricing in the Group taxation section.

Group taxation

According to article 49 of the Income and Corporate Tax Code, companies belonging to the same group have the possibility, if certain requirements are met, to opt for the tax consolidation regime.

The tax consolidation regime allows the determination of one taxable basis given by the algebraic sum of the taxable profits/losses determined by each of the companies participating in the scheme, with apportionment in relation to the corporate tax rate applicable to each company in comparison with the corporate tax rate applicable to the consolidating entity.

The tax consolidation regime is applicable for a minimum period of five years, renewable by tacit agreement for a five-year period each time.

The election to the tax consolidation scheme is subject to the prior authorisation of the Ministry of Finance if certain conditions are met:

- The mother company has to be listed in the Tunisian Stock Exchange. In case the mother company is not listed in the Tunisian Stock Exchange, it has to undertake to be listed by no later than the end of the year following the first year during which the

tax consolidation regime comes into effect; this deadline may be extended by one additional year.

- Participations held by the mother company in the capital of the other group-companies electing to the tax consolidation regime, whether directly or indirectly, have to be equal to at least 75% of the capital of each company during the whole period of the tax consolidation scheme.
- Companies electing to the tax consolidation regime have to be resident in Tunisia.
- Companies electing to the tax consolidation regime have to be subject to corporate tax.

According to the tax law into force, companies benefitting from tax holidays during a certain period of time may elect to the tax consolidation scheme even if no minimum tax is due.

- Companies electing to the tax consolidation scheme have to consider the same opening and closing dates for the fiscal years covered by the scheme.

The taxable result of each group-company participating in the tax consolidation scheme is determined according to the common law.

However, and unlike the general rules applicable to the determination of the taxable result, interests generated by sums of money deposited in inter-company current accounts are not taken into consideration for the purpose of determination of the taxable base subject to corporate tax.

Differed depreciation as well as operating losses generated by a group-company prior to the tax consolidation scheme enters into effect are to be carried forward at the level of the same company.

Taxable results of companies subject to the same corporate tax rate as the mother company are to be considered for their whole amount whereas taxable results of companies subject to corporate tax rates different from the one applicable to the mother company are to be reprocessed.

In fact, in this latter case, only a proportion of the taxable result is to be considered for the sake of computation of the consolidated tax.

This portion is determined according to the following formula:

Taxable base * (corporate tax rate applicable to the company / corporate tax rate applicable to the mother company)

Once the taxable results of the group-companies are added together, they are to be reprocessed by the mother company as follows:

- Add back provisions for bad debts booked and deducted by a group-company, before the tax consolidation scheme enters into effect, for doubtful receivables from the other group-companies.
- Add back benefits reinvested by a group-company in the capital of another group-company after tax consolidation scheme enters into effect, unless they are reinvested lately within the receiving entity itself.
- Deduct remission of debts by a group-company to the benefit of another group-company, both of them participating in the tax consolidation scheme.

Tunisia

Corporate tax is calculated at the rate applicable to the consolidating entity on the basis of the consolidated taxable result calculated as outlined previously.

However, a minimum corporate tax equal to 0.1% of the total gross turnover of the group-companies participating to the tax consolidation scheme remains due in case the taxable results shows a deficit or in case the minimum corporate tax is greater than the one calculated by applying the corporate tax rate applicable to the consolidating company to the consolidated taxable profit.

All pre-payments, WHTs, instalments, and tax surpluses generated by a group-company before the election to the tax consolidation scheme are creditable against the corporate tax to be paid by the consolidation entity.

The surplus, if any, remains deductible from corporate tax due on the subsequent years.

Transfer pricing

According to the Tunisian tax legislation, where there is evidence for the tax authorities of the existence of commercial or financial business transactions between a company and other dependent companies, which, for the determination of their value, are based on rules that differ from those governing relations between independent companies and which result in the reduction of taxable benefits, the tax department is allowed to add back to the taxable result of the invoicing company the differential between the benefits that would have been realised if the practiced prices were in line with the arm's-length principle and those actually accounted for by the company.

The burden of proof is on the tax department.

Thin capitalisation

Projects may be financed by shareholder's equity, shareholder's loans, or external debts.

Interest due on shareholder's loans is tax deductible within the limit of an interest rate of 8%, provided that the following conditions are met:

- the capital is fully paid-up and
- the amount of the sums put at the disposal of the company must not exceed 50% of the capital.

In case shareholders loans exceed 50% of the share capital, then interests due in the part exceeding 50% are not tax deductible.

Tax credits and incentives

In order to harmonise investment legislation with general economic objectives , the Incentives Investment Code (IIC) has been promulgated.

The IIC provides a number of incentives applicable to all projects covered by the code and approved by the competent government institutions and specifically developed in the following sectors:

- Agriculture and fisheries.
- Manufacturing industries.
- Public works.
- Tourism.

- Handicrafts.
- Transport.
- Education and learning.
- Professional training.
- Cultural production and industries.
- Promotion of young people and children's education.
- Healthcare.
- Environmental protection.
- Property promotion.
- Other non-financial activities and services.

The IIC foresees common and specific incentives.

The considered common incentives are detailed as follow:

- Deduction by an entity from the taxable base of profits reinvested by subscribing to initial capital or to capital increases in companies operating under the IIC, within the limit of 35% of its net taxable profits, and within the limit of the minimum corporate tax rate, which means that the corporate tax cannot be less than 20% of what it would have been without deducting the considered profits.

The main conditions for benefiting from the aforementioned incentives are that the:

- subscribing company keeps its accounts in accordance with Tunisian accounting standards
- new shares must be issued for the subscribed amount
- registered subscribed capital may not be reduced during the five years following 1 January of the year following the reinvestment, except for the purpose of absorbing losses
- subscribing company must join to its corporate tax return a certificate proving that the capital in which they subscribed is entirely paid.
- subscribed shares must not be sold before the end of the two years following the payment of the capital, and
- reinvested profits have to be posted in a 'special investment reserve account' under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.
- Deduction from the taxable base of profits reinvested in the company itself (activities extension) providing the respect of the minimum tax rate condition of 20% and the following other conditions:
 - The reinvested profits have to be posted in a 'special investment reserve account' under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.
 - The benefits posted in the 'special investment reserve account' have to be incorporated/included in the capital of the company before the end of the year during which the reserve was posted/booked.
 - An investment plan is to be joined to the income tax return.
 - The investment must be realised before the end of the year during which the reserve was posted/booked.
 - The assets acquired must not be transferred during at least two years after the date of the start of production.

Tunisia

- The registered capital must not be reduced during the five years following the date of the incorporation of the reinvested benefits in the capital, except for the purpose for absorbing losses.

The IIC foresees specific advantages which apply to:

- Exportation activities.
- Investments in regional development zones.
- Agricultural development.
- Environmental protection.
- Research and development (R&D) and technological development.
- Small enterprise and trade development.
- Investments of support (learning, training, etc.).

Wholly exporting activities

The following are considered as wholly exporting companies:

- Companies the production of which is totally destined to be sold outside Tunisia.
- Companies the services they provide are totally utilised/exploited outside Tunisia.
- Companies working exclusively with wholly exporting companies as defined above.
- Companies working exclusively with financial and banking institutions working mainly with non-Tunisian resident persons.
- Companies set up in the Economical Free Zones in Tunisia.

Note that wholly exporting companies may commercialise locally, during a given year, up to 30% of the turnover of the previous year, and this without losing the status of a wholly exporting company.

Profits derived from exportation by companies that have already obtained an investment certificate from the relevant authorities (the Agency of Promotion of the Investment in the particular case of industrial companies) before 1 January 2013 and that will enter into production during 2013 may benefit from the deduction of the benefits derived from exportation operations during the first decade of activity, and this starting from the first exportation operation.

In addition to the above mentioned deduction, the company may also benefit from the deduction of other profits in connection with exportation during the first decade of activity.

The concerned profits are detailed as follows:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
- Capital gains derived from the sale outside Tunisia or to other wholly exporting companies of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (*fonds de commerce*).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.

However, all the other profits (financial interests, rentals, etc.) remain subject to corporate tax at the rate of 30%.

After the expiry of this period, profits derived from the main activity are to be subject to corporate tax at the rate of 10% and all other revenues will be subject to corporate tax at the rate of 30%.

According to article 12 of the IIC, wholly exporting companies created as of 1 January 2013 will be subject to corporate tax at the rate of:

- 10% of the basis of the benefits derived from exportation and
- 30% on the basis of the benefits derived from local sales as well as the other profits.

To note that companies are subject to a minimum corporate tax calculated at the rate of 0.1% on the basis of the local turnover.

According to the same article, wholly exporting companies, benefit from:

- the exemption from VAT on purchases based on a certificate delivered for the purpose by the relevant tax authorities, to be presented by the Tunisian entity to its suppliers and the exemption from VAT at sales based on a certificate delivered for the purpose by the relevant tax authorities to be presented by the client to the Tunisian entity
- the exemption from other indirect taxes, including customs duties
- the exemption from LAT due at the rate of 0.2% of the gross turnover
- the exemption from professional training tax due at the rate of 1% of the gross salaries
- the exemption from registration fees and stamp duties, and
- the exemption from social logging tax due at the rate of 1% of the gross salaries.

However, they remain subject to the payment of the following insignificant taxes and duties only:

- Taxes and duties to passenger cars.
- The single compensation tax on road transport.
- Taxes on real estate: calculated on the number of square metres of construction used by the entity.
- Taxes and duties by virtue of services rendered directly in compliance with the current legislation.

Regional development zones activities

The IIC provides that investments in certain activities (industry, tourism, handicraft, and certain other services) carried out by entities established in regional development zones benefit from a number of tax advantages, detailed as follows:

- Deduction from the taxable profits of the entity of the profits derived from the investments in the regional development zones during a period of:
 - Five years, in case the investments are realised in the development zones enumerated in category one.
 - Ten years, in case the investments are realised in the development zones enumerated in category two.
 - Ten years, in case the investments are realised in the development zones of priority. During the second decade of activity, the deduction is reduced to 50% of the profits generated on the investments.

In addition to the above mentioned deduction, companies carrying out investment in regional development zones may also benefit from the deduction of other profits in connection with the main activity.

Tunisia

The concerned profits are detailed as follows:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
- Capital gains derived from the sale of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (*fonds de commerce*).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.

Other benefits include:

- Deduction from the taxable profits of the revenues reinvested in the subscription to initial capital or to capital increases in these companies, up to 100% of the taxable result and without any minimum tax. However, the deduction is subject to the remaining conditions listed under the common incentives section.
- Exemption from social logging tax (1% of the gross salaries).
- Exemption from vocational training tax (2% of the gross salaries).

Support activities

The supporting investments activities are defined as being the following:

- Training of children.
- Education.
- Teaching.
- Scientific research.
- Professional training.
- Cultural production and co-ordination of young people.
- Healthcare services.

The investments made by institutions for these considered activities give entitlement to the following tax incentives:

- Exemption from customs duties and taxes with a similar effect.
- Suspension of VAT and consumption duty for imported equipment with no locally manufactured equivalent that is necessary for the realisation of the investments, as well as suspension of VAT on equipment manufactured locally.

Foreign tax credit

In the absence of DTTs, corporate tax (or any WHT in connection with) paid outside Tunisia is not deductible from the tax due in Tunisia.

However, in the presence of DTTs, in cases where profits derived from outside Tunisia were subject to corporate tax in Tunisia, the foreign tax, if any, is deductible, but only up to the correspondent Tunisian tax on these profits.

Withholding taxes

The payments of certain remunerations are subject to corporate WHT in Tunisia.

The WHT is an advance payment of corporate tax and is thus deductible from the corporate tax due by the invoicing entity. To this end, the paying entity shall withhold the tax at the appropriate rate. It shall then issue a WHT certificate to the invoicing company

to enable the latter to use the certificate as proof of the payment at the moment of filing its corporate tax return. The paying entity subsequently pays the withheld amount to the tax authorities.

The withheld tax is to be declared and repaid by the paying entity each month before the 28th day of the following month.

The rates of the WHT differ according to the nature of the goods/services, and the rates applicable within the framework of the DTTs.

Applicable WHT rates in Tunisia are as follows:

- 15% of the gross amount of the invoices related to fees, commissions, brokerage fees, rentals, payment of non-commercial activities (non-commercial activities include especially independent scientific, literary, artistic, educational, or teaching activities, such as independent activities of physicians, dentists, lawyers, consultants, architects, engineers, accountants, etc.).

This rate is reduced to 5% for fees (including those paid for non-commercial activities) and hotel rentals when these amounts are paid to entities subject to corporate tax and individuals who keep proper accounts in accordance with the Tunisian accounting principles.

- 20% on interest and director's attendance allowance. This does not include interest on deposits and bonds in foreign currency or convertible dinars.
- 5% on bank loans extended by non-Tunisian resident banks.
- 2.5% on the sales price indicated in a real estate sale, in case the seller is an individual.
- 1.5% on payments, the amount of which exceeds TND 2,000 (including VAT), made for the acquisition of goods and services necessary to the activity and which are not subject to specific WHT rate.
- 15% on payments made to non-Tunisian tax resident persons.

DTT rates

Note that the following interest WHT rates are applicable to interest payable to non-resident, not established companies and financial institutions according to DTTs concluded by Tunisia.

Notes

- 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
 - 15% of the gross amount of the royalties for:
 - cinematographic films and TV films, patents, trademarks, designs or models, plans, secret formulae, or processes
 - technical and economical studies
 - information concerning industrial, agricultural, commercial, or scientific experience, and
 - the use of or the right to use agricultural, industrial, commercial, or scientific equipment.
- 11% of the gross amount of the royalties for the use of:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information concerning industrial, commercial, or scientific experience

- the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities, and
 - economical and technical studies, and technical assistance realised in the state of source.
3. 15% of the gross amount of royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information concerning industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, and
 - technical assistance and studies in all fields.
 4. 20% of the gross amount of the royalties for:
 - the use of, or the right to use, licences, trademarks, cinematographic films, and films and discs for radio or television broadcasting, and
 - the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities.

15% of the gross amount of the royalties for all the other cases, mainly:

- technical and economical studies
 - the use of, or the right to use, copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes, and
 - information concerning industrial, commercial, or scientific experience.
- However, royalties paid for the use of, or the right to use, copyrights of literary, dramatic, musical, or artistic work, except royalties in respect of cinematographic films and films and discs for TV broadcasting, are taxable in the state of residency and thus cannot be subject to tax nor to any WHT in connection with the state in which they arise.
5. 10% of the gross amount of the royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and
 - information in respect of industrial, commercial, or scientific experience.

5% of the gross amount of the royalties for technical and economical studies and technical assistance.

6. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic and films for TV and radio broadcasting.

15% of the amount of the royalties for:

 - the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, and
 - technical and economical studies and technical assistance rendered in the state in which they arise.
7. 15% of the gross amount of royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, and
 - technical and economical studies.
8. 15% of the gross amount of royalties for:
 - the right to publish any literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, and
 - cartoons, films, and videos for TV broadcasting.
9. 5% of the gross amount of royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
10. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work.

15% of the gross amount of the royalties for:

- the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes
- information in respect of industrial, commercial, or scientific experience, and
- economical and technical studies.

20% of the gross amount of the royalties for:

- the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities, and

Tunisia

- licences, trademarks, cinematographic films, and films for TV broadcasting.
- However, payments made to public entities for the use of cinematographic films or broadcasting on radio and TV are exempt from WHT.
11. 10% of the gross amount of the royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work
 - information concerning agricultural, industrial, commercial, or scientific experience, and
 - technical and economical studies.

 - 15% of the gross amount of the royalties for:
 - patents, trademarks, designs or models, plans, secret formulae, or processes, and
 - cinematographic films or films for television.
 12. 10% of the gross amount of the royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information concerning industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities, except remunerations for chartering of vessels and aircrafts, and
 - technical and economical studies.
 13. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation, at a maximum rate of 12%.
 14. 15% of the gross amount of royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, and
 - technical services such as technical and economical studies and technical assistance.
 15. 8% of the gross amount of royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities, except remunerations for the chartering of vessels and aircrafts used for international transport.
 16. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work.

12% of the gross amount of the royalties for:
 - the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - economical and technical studies.

 - 16% of the gross amount of the royalties for:
 - the use of, or the right to use, industrial, commercial, or scientific equipment
 - licences, trademarks, cinematographic films, and films for TV broadcasting.
 17. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation and according to the legislation of that state for:
 - the use of, or the right to use, any copyright of literary, artistic or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
 18. 5% of the gross amount of royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and
 - information in respect of industrial, commercial, or scientific experience.
 19. 5% of the gross amount of royalties for:
 - the use of, or the right to publish, any literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, a transmission by satellite or optical fibre transmission or similar means of transmission, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
 20. 12% of the gross amount of royalties for:
 - the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes

- information in respect of industrial, commercial, or scientific experience, except remuneration for vessels and aircrafts chartering in respect of international transport
 - the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, and
 - technical services, such as technical and economical studies, and technical assistance carried out in the debtor state of the correspondent remuneration.
21. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films recording for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
22. 12% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, and
 - technical and economical studies and technical assistance.
23. 2.5% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, except remunerations for the chartering of vessels and aircrafts used for international transport.
24. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation; but if the recipient is the beneficial owner of the royalties, the tax so charged shall not exceed 11% of their amount.

However, this rate is reduced to 7.5% in case royalties received by a resident of Tunisia are not subject to WHT in the Netherlands and as long as the Netherlands does not proceed to the modification of its tax legislation.

Remunerations paid for the following are considered royalties:

- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, except remunerations paid for the exploitation of vessels and aircrafts in respect of international transport, and
 - technical and economical studies and technical assistance rendered in the state from which royalties are paid.
25. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, except cinematographic films and films for TV broadcasting.
- 15% of the gross amount of the royalties for:
- the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - economical and technical studies.
- 20% of the gross amount of the royalties for:
- the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities, and
 - the use of, or the right to use, trademarks and cinematographic films and films for TV broadcasting.
26. 10% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes
 - the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities, except remuneration for vessels and aircrafts chartering in respect of international transport, and
 - technical and economical studies and technical assistance.
27. 12% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience

Tunisia

- the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities, and
 - technical and economical studies and technical assistance.
28. 10% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, and
 - technical and economical studies and technical assistance in respect of the use of, or the right to use, the equipments, rights, and information mentioned above.
29. 5% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
30. Royalties are subject to tax in the state of residency of the beneficiary.

However, the non-exclusive taxation right attributable to the state of residency does not prohibit the taxation of such royalties in the state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation.

Remunerations paid for the following are considered royalties and thus are subject to tax in the state in which they arise:

- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment that is not considered as an asset in the meaning of article 6 of the present treaty.
31. 10% of the gross amount of the royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and
 - information in respect of industrial, commercial, or scientific experience.
- 12% of the gross amount of the royalties for technical services, such as technical and economical studies and technical assistance.
32. 15% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, and
 - economical and technical studies and technical assistance.
33. 10% of the gross amount of royalties for:
- copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes
 - studies and information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, and
 - cinematographic films and video tapes for TV broadcasting.
34. 5% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, except chartering of ships and aircrafts used for the international transport.
35. 5% of the gross amount of royalties for remunerations paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, software, designs or models, plans, secret formulae, or processes.
36. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic and films for TV and radio broadcasting.
- 15% of the amount of the royalties for:
- the use of, or the right to use, cinematographic films, films for TV and radio broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, commercial, or scientific equipment, and
 - technical and economical studies.
37. 10% of the gross amount of royalties for:

- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and technical and economical studies and technical assistance related to these information, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
38. 18% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
39. 10% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
40. 7.5% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment.
41. 15% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, and
 - technical and economical studies.
42. Royalties are only taxable in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience
 - the use of or the right to use industrial, commercial, scientific equipment or port facilities, and
 - economical and technical studies and technical assistance.
43. 15% of the gross amount of the royalties for:
- copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes
 - information in respect of industrial, commercial, or scientific experience, and
 - profits from any ownership, depending from the productivity, the use, or the alienation of that ownership.
- 10% of the gross amount of the royalties for:
- the use of, or the right to use, industrial, commercial, or scientific equipment, other than vessels and aircrafts used for international transport, and
 - technical studies paid from public funds or political subdivisions or local authorities or technical assistance for the use of the ownership of the rights above mentioned, in case the service is realised in the state of source.
44. 7.5% of the gross amount of royalties for:
- the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and
 - the use of, or the right to use, industrial, commercial, or scientific equipment and port facilities, except remunerations paid for vessels and aircrafts used in international transport.
45. These rates are applicable, in certain cases, to the loans extended by the Central Bank.
46. 5% for loans extended by banks and not represented by bonds or other debt securities.
47. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the Chinese state.
48. 0% for loans granted by financial institutions, the capital of which is held at least up to 50% by the Ethiopian state, its political subdivisions, or local authorities.
49. 0% for loans granted by the Deutsche Bundesbank, Kreditanstalt für Wiederaufbau, and the Deutsche Gesellschaft für wirtschaftliche zusammenarbeit GmbH. (Entwicklungsgesells).
50. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Iran.
51. 0% for loans granted by financial institutions, the capital of which is totally held by the Italian state or its local authorities.

Tunisia

52. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Kuwait.
53. 0% for loans granted by financial institutions, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.
54. 0% for loans granted by companies, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.
55. 7.5% for loans guaranteed or granted by financial institutions and the reimbursement period of which exceeds five years.
56. 7.5% as long as the tax legislation of the Netherlands provides that interest paid by a company resident in the Netherlands to a company resident in Tunisia is exempt from any WHT.
57. 0% for loans, the reimbursement period of which exceeds seven years.
58. 5% for loans, the reimbursement period of which exceeds seven years, and 10% in the other cases.
59. 2.5% for bank loans, as long as the Tunisian domestic tax legislation provides that interest on bank loans extended by non-established banks is subject to a 2.5% WHT rate, and 5% for the above-mentioned bank loans in cases where an increase of the WHT rate is applicable to interest paid to non-established banks.
60. 0% for loans granted by financial institutions, provided that the reimbursement period exceeds seven years.

Tax administration

Taxable period

Under Tunisian law, both the accounting year and tax year follow the calendar year. However, derogation is possible if prior authorisation is obtained from the Ministry of Finance.

Tax returns

Tunisian established companies have the obligation to file monthly tax returns, an annual corporate tax return, and an annual Employer's Declaration.

Monthly tax returns include WHTs, VAT, LAT, social logging tax, and professional training tax, and must be filed each month before the 28th day of the following month. Filing and payment take place simultaneously.

The annual tax return is the corporate tax return, which must be filed before 25 March of the following year. The deadline for filing the corporate tax return is moved to 25 June for public liability companies and private liability companies subject to statutory audit. Filing and payment take place simultaneously.

The Employer's Declaration has to be filed each year before 28/29 February of the following year. This declaration must list all fees and salaries paid or incurred, even if not yet paid, to service suppliers and employees during the concerned year. No payment is due in connection with this filing, but fees not listed on this declaration are not recognised as deductible costs.

Payment of tax

Corporate tax is paid through:

- WHTs applied on certain payments and operated by the debtor on behalf of the taxpaying entity.
- Beginning from the second year of activity, three provisional instalments, each calculated at 30% of the total corporate tax due for the previous year. The instalments fall due on 28 June, 28 September, and 28 December.
- An annual tax return.

Both WHTs and provisional payments of income tax are creditable against the annual/final tax due.

Filing and payment take place simultaneously.

The most common process is the filing in person at the tax office. In this case, payment is made cash or by check.

However, companies, the turnover of which exceeds TND 1 million, are constrained to file their tax returns electronically. Electronic filing remains optional for other companies. In this case, payment is made through bank transfer.

Audit cycle

Tax controllers may proceed either with preliminary tax audit or an in-depth tax audit.

Preliminary tax audit

In case of a preliminary tax audit, the taxpayer under control is not notified prior to starting the audit.

The tax audit is conducted in the offices of the tax administration and deals with the documents made available to them (tax returns, registered contracts, etc.). However, preliminary tax audits can never deal with the taxpayer's accounts.

The results of the tax control are notified in writing to the taxpayer within a tax audit report, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated.

It is worth pointing out that the tax audit report is not an executive act against the taxpayer and does not bear any request for payment of taxes or penalties.

Indeed, the taxpayer has the possibility to answer to the tax audit report within 30 days starting from the date of the receipt of this report. Failing that, the taxpayer will receive a tax assessment notice which brings forth requests for payment of taxes and penalties to the tax payer.

However, in case the taxpayer answers to the notification of the results of the tax audit and brings additional explanations, clarifications, and documents to the tax auditors, then these will be constrained to examine the evidence provided by the taxpayer and answer to the taxpayer's opposition, but no deadline is fixed.

Once the taxpayer receives the answer of the tax authorities to the taxpayer's opposition, the taxpayer will have the possibility to file a second opposition, in case the taxpayer still disagrees with some or all the points raised by the tax controllers.

Once the second answer is filed by the tax payer, there will be no other written correspondences with the tax auditors.

In cases where the tax administration agrees to the clarifications, explanations, arguments, and documents provided by the taxpayer, then the tax audit will be closed.

However, in cases where the tax administration still disagrees with some or all the evidence provided by the taxpayer, then the taxpayer will receive a tax assessment notice and will have to pay the notified taxes.

The tax assessment notice has to take into consideration the taxpayer's observations enclosed in the first and the second opposition filed by the taxpayer.

Tunisia

Further to the receipt of the tax assessment notice, the taxpayer may make an appeal to the relevant court.

A preliminary tax audit does not prevent an in-depth tax audit of the same period and the same taxes.

In-depth tax audit

In case of an in-depth tax audit, the taxpayer under control is notified 15 days prior to starting the audit. This period may be extended to a maximum period of 60 days.

In-depth tax audits deal with the accounts of the taxpayer under control (in cases where the taxpayer has the obligation to maintain accounts according to the accounting legislation into force) as well as any other evidence (presumptions, registered contracts, etc.)

In-depth tax audits take place, as a general rule, in the business premises of the taxpayer.

However, and upon the request of the taxpayer or the tax controllers, the tax audit can be conducted in the tax authorities' office. In this case, books, records, and any other documentation deemed necessary to the tax auditors to complete the audit have to be moved to the tax auditors' office

In-depth tax audits last for:

- six months, in case the taxpayer under control is constrained by the law to maintain accounts, and
- one year, in the other cases.

At the end of this period, the tax audit must come to an end and the tax auditors must draw up a tax audit report to be sent to the taxpayer, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated.

Once the tax audit report is sent to the taxpayer, the procedure will be the same as for preliminary tax audits.

Statute of limitations

The period open for tax audit, unless it was subject to a previous in-depth tax audit, is:

- Four years, in case of partial omission; an omission is considered as partial in case the tax return is filed but the taxable base is not determined properly or in case the WHT rates applied to payments made to third parties are lower than the rates provided for by the law.
- Ten years, in case of total omission; an omission is considered as total in case the tax return is not filed at the date when the company becomes under tax control.

The four-year period and the ten-year period begin to run from 1 January (in case the fiscal year coincides with the calendar year) of the year following the completion of sales, earnings, receipt, or disbursement of any sum to be taxed.

Significant developments

Accounting rules

Please note that the new Commercial Code has now been approved. According to this new legislation, the International Financial Reporting Standards (IFRS) based accounting and reporting rules will apply starting from 2013.

For the current and previous periods, unless a company operates as a financial institution or is listed in a stock exchange, it is not compulsory for them to consider IFRS in their books. Accordingly, such companies are required to keep their books in accordance with the requirements of tax legislation and Turkish Generally Accepted Accounting Principles (GAAP), which is tax driven.

New tax law

Law No. 6322, which makes amendments to various tax laws, was promulgated in the Official Gazette dated 15 June 2012. The Law comprises 44 articles together with enforcement and effectiveness articles. The Law amends some articles of Corporate Income Tax (CIT) Law, which are summarised below.

Incentives for overseas services

50% of the earnings derived from architecture, engineering, design, software, medical reporting, bookkeeping, call centre, and data storage services, as well as training and health services, rendered to parties located outside of Turkey can be deducted from the CIT base on condition that such services are rendered in Turkey and benefitted from abroad. Please note that such earnings must be shown separately on the CIT return.

Deductible activities can be divided into two groups. The first group includes services of architecture, engineering, design, software, medical reporting, bookkeeping, call centre, and data storage rendered in Turkey and benefitted from abroad. Education and health services fall into the second group. To benefit from the deduction, the companies involved in these activities:

- should perform their activities by obtaining the necessary permits, and
- should provide the service to parties not resident in Turkey.

The requirement that the service should be exclusively benefitted from abroad does not apply to education and health services.

Restriction on financial expenses

A portion (yet to be determined by the Council of Ministers) of interest and similar expenses incurred on foreign resources will not qualify as a deduction for CIT purposes. According to the arrangement:

Turkey

- credit institutions, financial institutions, financial leasing, factoring, and financing companies shall not be subject to finance cost restrictions
- cost restrictions shall apply exclusively to the portion of liabilities that exceed a company's shareholder's equity
- restrictions shall not exceed 10% of financial expenses and the rate may be amended per industry by the Council of Ministers, and
- restrictions shall not apply to interest and similar payments added to investment costs.

The arrangement shall be effective as of 1 January 2013.

Taxes on corporate income

Corporations are liable for CIT at a rate of 20% on net profits generated, as adjusted for exemptions and deductions and including prior-year losses carried forward, to a limited extent.

According to Turkish tax legislation, income taxation differs significantly based on the taxpayer's place of residence. Resident entities are subject to tax on their worldwide income, whereas non-resident entities are taxed solely on the income derived from activities in Turkey.

Corporate residence

If both the legal and the business headquarters of a company are located outside Turkey, the company is regarded as a non-resident entity for Turkish tax purposes. If one of these headquarters is located within Turkey, the company is regarded as a resident entity for Turkish tax purposes.

Note that there is no distinction between CIT and value-added tax (VAT) registration in Turkey. Therefore, corporations or PEs are liable for all taxes (e.g. CIT, VAT, withholding tax [WHT], stamp tax) once they are registered for tax purposes in Turkey.

Permanent establishment (PE)

Unlike the provisions of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, there is no minimum period of presence in Turkey before a presence is regarded under the Turkish tax legislation as a PE. In this regard, we believe that the PE evaluation should be made for each case depending on the merit of the cases both from a local legislation perspective and from a treaty (if applicable) perspective.

Other taxes

Value-added tax (VAT)

Deliveries of goods and services are subject to VAT at rates varying from 1% to 18%. The general rate is 18%. VAT payable on local purchases and on imports is regarded as 'input VAT', and VAT calculated and collected on sales is considered 'output VAT'. Input VAT is offset against output VAT in the VAT return filed at the related tax office. If output VAT is in excess of input VAT, the excess amount is paid to the related tax office. Conversely, if input VAT exceeds output VAT, the balance is carried forward to the following months to be offset against future output VAT. With the exception of a few situations such as

exportation and sales to an investment incentive holder, there is no cash refund to recover excess input VAT.

Turkish VAT principles contain a 'reverse-charge VAT mechanism', which requires the calculation of VAT by resident entities on payments to persons in foreign countries. Under this mechanism, VAT is calculated and paid to the related tax office by the resident entity. The resident entity treats this VAT as input VAT and offsets it in the same month. This VAT does not create a tax burden for the resident or non-resident entity, except for its cash flow effect on the former if there is insufficient output VAT to offset the input VAT.

Banking and insurance transactions tax (BITT)

The transactions being performed by licensed banks and insurance companies are generally exempt from VAT but are subject to BITT at a rate of 5%, which is due on the gains of such corporations from their transactions.

The purchase of goods and services by banks and insurance companies are subject to VAT, but this is considered an expense or cost item. Therefore, it is not recoverable (i.e. for VAT purposes by offsetting against the output VAT) in the hands of these corporations.

Special consumption tax

There are four main product groups that are subject to special consumption tax:

- Petroleum products, natural gas, lubricating oil, solvents, and derivatives of solvents.
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts.
- Tobacco and tobacco products, alcoholic beverages.
- Luxury products.

Unlike VAT, which is applied on each delivery, special consumption tax is charged only once (except for some activities such as production).

Customs and foreign trade

PwC Turkey's customs and foreign trade specialist team would be pleased to assist in determination of customs duties and in providing extensive information regarding the local excise regime.

Property taxes

Buildings and land owned in Turkey are subject to real estate tax at different rates.

Stamp tax

Stamp tax applies to a wide range of documents, including but not limited to agreements, financial statements, and payrolls. Stamp tax is levied as a percentage of the value stated on the agreements at rates varying between 0.165% and 0.825%.

Salary payments are subject to stamp tax at a rate of 0.66% over the gross amounts, whereas a lump-sum stamp tax is calculated for certain types of documents such as the printed copies of the financial statements.

Resource utilisation support fund (RUSF)

Foreign loans (including trade payables) obtained by Turkish resident individuals or legal entities (except for banks or financial institutions) are subject to RUSF at the following rates:

Turkey

- 6% at the customs stage on purchases on credit.
- 3% over the principal or the interest amount (note that this depends on the currency denomination and on the average maturity).
- 0% in case of locally obtained loans.

Note that special exemptions may apply in cases where one is investing in certain industries.

Branch income

Branches are taxed solely on the income derived from activities in Turkey since they are regarded as non-resident entities for Turkish tax purposes. Branch profits are subject to Turkish CIT at the rate of 20%.

The branch profit transferred to headquarters (i.e. upstream income repatriation) is subject to dividend WHT at a rate of 15%, which might be reduced if there is a bilateral tax treaty between Turkey and the country of which the principal is a resident for income tax purposes. *See the Withholding taxes section for a list of countries with which Turkey has an applicable tax treaty.*

Income determination

Inventory valuation

The weighted average and first in first out (FIFO) methods are allowed for calculating the value of year-end stock or goods sold. Last in first out (LIFO) is not permitted. Stock-count deficits are recorded as disallowable expenses, whereas stock-count surpluses are treated as income at year-end for CIT purposes. Necessary VAT adjustments should also be made accordingly.

Capital gains

No separate rules exist with respect to capital gains taxation in Turkey. Capital gains and losses are included in the determination of taxable corporate income.

See Capital gains exemption in the Tax credits and incentives section for information about an incentive that can reduce the effective CIT rate on capital gains in certain instances.

Dividend income

In dividend distribution's between Turkish resident companies, the dividend payer is exempt from WHT and the recipient is exempt from CIT.

Interest income

In principle, all interest income is subject to tax. Interest income on bank deposits denominated in both Turkish lira and foreign currency is subject to WHT. Interest income is recorded at gross, and any WHT incurred on this income is offset against CIT calculated.

Foreign income

In principle, foreign-sourced income is taxable in Turkey. However, foreign-sourced dividend income may also be subject to a participation exemption, if certain conditions are fulfilled. A participation exemption for capital gains generated from a foreign subsidiary may also be available in Turkey, under certain conditions.

Other foreign-sourced income, such as royalties and interest, is fully taxable in Turkey. Partial relief from taxation is granted insofar as the foreign tax paid does not exceed the rate of tax payable for the same income in Turkey.

Although undistributed income of foreign subsidiaries should not be taxable in Turkey, controlled foreign company (CFC) rules should also be taken into consideration in this respect. See *Controlled foreign companies (CFCs) in the Group taxation section for more information*.

Deductions

Turkish CIT legislation allows a deduction for all the “ordinary and necessary expenses paid or incurred for the generation and sustenance of income during the taxable year in carrying on any trade or business”.

The general principle for tax deductibility is that the payment should be a necessary business expense and it should be properly documented in accordance with the relevant provisions of the Turkish transfer pricing regulations and those in the local tax procedural law.

Depreciation and amortisation

Fixed assets are subject to depreciation at rates determined by the Turkish Ministry of Finance (MoF), based on their useful life.

Intangible assets (i.e. licence, franchise, copyright, etc.) and goodwill are depreciated over 15 years and five years, respectively. Additionally, leasehold improvement is depreciated based on lease period.

Depreciation can be calculated by applying either the straight-line or declining-balance method, at the taxpayer’s discretion. The taxpayer may also change the option from declining-balance to straight-line (but not vice versa) at any time during the life of the asset. The applicable rate for the declining-balance method is twice the rate of the straight-line method, subject to certain limitations. Furthermore, in special cases, the tax authorities may determine higher depreciation rates.

Intangible assets are amortised by the straight-line method over their estimated useful lives, if objectively determinable.

Profits or losses on disposal of fixed assets (i.e. the difference between the proceeds and the written-down values) are included in taxable income in the year of disposal. If the renewal of disposed-of assets is considered necessary by the owners of the business concern, the profit accrued may be retained for a certain amount of time. After the purchase of new fixed assets, the profits may be offset against the depreciation of the new assets.

Start-up expenses

Start-up expenses are considered as deductible expenses as incurred. Also, the taxpayer has the option to capitalise such expenses and to depreciate them over five years.

Bad debt

Bad and doubtful accounts receivable are deductible under certain conditions. Amounts of the receivables collected afterwards are added to the profits of the year in which they are collected.

Turkey

Pensions and employee termination benefits

Payments for pensions and employee termination benefits are deductible for CIT purposes under certain conditions and are not subject to WHT beyond a certain limit.

Fines and penalties

In principle, fines and penalties incurred due to the wrong-doings of the taxpayer or its employees are not tax deductible.

Taxes

Essentially, the CIT itself and VAT are, subject to certain exceptions, not deductible for CIT purposes.

Fees and duties paid in relation to assets of the company are, in principle, deductible in determining taxable corporate income.

Net operating losses

Corporate losses may be carried forward for five years. Losses cannot be carried back.

Payments to foreign affiliates

Charges for royalties and interest by foreign affiliates may be deductible for CIT purposes, provided that transfer pricing and thin capitalisation rules are followed (*see the Group taxation section for more information*).

Group taxation

Consolidation of the accounts of group companies for tax purposes is not allowed in Turkey since each company is regarded as a separate taxpayer.

Transfer pricing

The new corporate income tax law includes considerable amendments to transfer pricing regulations, using the OECD's guidelines as a basis. If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties in which prices are not set in accordance with the arm's-length principle, the related profits are considered to have been distributed in a disguised manner through transfer pricing. Such disguised profit distribution through transfer pricing is not accepted as deductible for CIT purposes. The methods prescribed in the law are the traditional transaction methods described in the OECD's transfer pricing guidelines.

Thin capitalisation

According to local thin capitalisation regulation, if the ratio of the borrowings from shareholders or from persons related to the shareholders exceeds triple the shareholders' equity of the borrower company at any time within the relevant year, the exceeding portion of the borrowing will be considered thin capital and the corresponding interest will not be deductible. Accordingly, the ratio of loans received from related parties to shareholders' equity must be no more than 3:1 in order to eliminate Turkish thin capitalisation issues.

Controlled foreign companies (CFCs)

A CFC is a company established abroad with at least 50% of the organisation controlled directly or indirectly by tax-resident companies and real persons by means of separate or joint participation in the capital or dividends voting rights. A CFC also must meet certain conditions (e.g. 25% or more of its gross revenue must be comprised of passive

income), and it must be subject to an effective income tax rate lower than 10% for its commercial profit in its home country.

The CFC's profit is included in the CIT base of the controlling resident corporation at the rate of the shares controlled, irrespective of whether it is distributed.

Tax credits and incentives

Foreign tax credit

A partial relief from income taxation is granted for the foreign tax paid that does not exceed the rate of tax payable for the same income in Turkey.

Participation exemption for dividends

There is an unconditional CIT and dividend WHT exemption for dividend income between Turkish companies. If a Turkish company has a shareholding in a foreign company, this dividend income is exempt from CIT, under certain conditions.

Exemption for income from foreign construction and repair activities

The profit from construction and repair activities carried out by Turkish corporations in foreign countries may be exempt from CIT in Turkey under the Turkish CIT law. It should be noted that if loss occurs from these activities, it is not possible to deduct this loss amount from the income generated through domestic activities since deduction of a loss relating to foreign activities that are exempt from CIT in Turkey is not allowed for deduction.

Capital gains exemption

For capital gains generated from the sale of shares in a company, a 75% CIT exemption is applicable under certain conditions. This partial exemption may also be applicable for the capital gains derived from the alienation of real estate investments under certain conditions.

In the event a foreign subsidiary is sold by a Turkish company, a CIT exemption at the rate of 100% is applicable under certain conditions.

Investment incentives

The Turkish government provides investment incentives (state aids) to eliminate inter-regional economic imbalance, facilitate a larger capital contribution by public and foreign investors to the capital build-up of the country, and support activities that have a positive effect on employment. Generally speaking, state aid can be classified as either a tax or a non-tax incentive.

The principal prerequisite for benefiting from state aid, except investment allowance, is to obtain an Investment Incentive Certificate (IIC). The IIC is a document granted to investors for their investments by the Undersecretariat for the Treasury. It allows utilisation of the said benefits. The import of machinery and equipment (excluding raw materials, intermediate, and operating products) is exempt from customs duty and RUSF payments. In addition, a VAT exemption is also applicable on the importation of eligible machinery and equipment.

According to investment incentive legislation, in order to obtain an IIC, the minimum amount of total investment should be at least 1 million Turkish lira (TRY), except for certain geographical locations with lower requirements.

Turkey

The advantages of an IIC can be summarised as exemption from customs duty, RUSF, and VAT.

From an income tax perspective, the legislation related to investment incentives has changed substantially. There are six main components of the new investment regulation:

- Reduced CIT rate.
- VAT exemption.
- Exemption for social security premium (employer's portion).
- Customs duty exemption.
- Interest support.
- Allocation of land for investments.

Free trade zone

Free trade zones are special sites that lie geographically within the country but are deemed to be outside the customs territory. In these regions, the normal regulations related to foreign trade and other financial and economic areas are either inapplicable, partly applicable, or superseded by new regulations.

In general, activities such as manufacturing, storage, packing, general trading, banking, insurance, and trade may be performed in Turkish free trade zones. Goods moving between Turkey and the zones are treated, for all purposes, as exports or imports. However, operations within the zones are subject to the supervision of the zone management (and customs authorities), to whom regular activity reports must be submitted. Consequently, there is a requirement for zone users to maintain full accounting records (in Turkish) with respect to their activities. These accounting requirements extend to inventory records. Customs duty is levied on any unexplained inventory losses as though the goods had been imported into the country.

The right to operate in a free zone is conferred by an operating licence obtained from the Undersecretariat for Foreign Trade, which reviews the application for conformity with the objectives and types of activity specified by the Economic Affairs Coordination Council.

Portfolio investment income

In line with the amendments in the Turkish income tax law certain investment income (e.g. capital gains on listed equities acquired after 1 January 2006 and interest and capital gains from domestic government bonds or treasury bills issued after 1 January 2006), derived by non-resident corporations without having a PE in Turkey and by non-resident individuals, is currently subject to WHT at source.

The following investors will qualify for WHT at a rate of 0%:

- Turkish resident capital corporations (limited liability companies, joint stock companies, and comandite companies whose capital is divided into shares).
- Non-resident corporations which have the same characteristics as Turkish capital corporations.
- Turkish investment funds (regulated in accordance with the Capital Markets Board or CMB).
- Non-resident investment funds similar to Turkish investment funds.
- Those non-residents similar to Turkish investment funds and trusts which engage in investment in securities and other capital markets instruments as their only business

in Turkey, to derive income and capital gains from these instruments, and to exert the rights attached to these instruments.

WHT is applied at a rate of 10% for both resident and non-resident individuals and for all other entities which are not qualified for 0% WHT (i.e. those who are not listed above).

The withholding will be applied by local intermediary banks, brokerage houses, or local custodian banks, instead of the conventional self-declaration mechanism, and this withholding would be the final taxation in Turkey both for non-residents and Turkish individuals.

Research and development (R&D) activities

In the last decade, the Turkish Parliament has enacted several regulations to provide incentives for R&D activities in Turkey. The three primary R&D incentives include significant advantages granted to investors planning R&D activities in science, software, and technology in special zones known as 'techno-parks', cash subsidies from the Scientific and Technological Research Council of Turkey (TUBITAK), and corporate tax deductions.

One of the objectives of the special R&D law is to attract foreign investors with significant R&D activities abroad to invest in Turkey, by enabling non-resident companies with a subsidiary or branch in Turkey to benefit from R&D tax incentives. The main incentives introduced by this R&D law are listed as follows:

R&D deduction

All eligible innovation and R&D expenditures made in technology centres or R&D centres, which must employ at least 50 full-time equivalent R&D personnel, or R&D and innovation projects supported by foundations established by law or international funds can be deducted from the CIT base at a rate of 100%. The same expenditures can also be capitalised and expensed through amortisation over five years in the case of successful projects, whereas the R&D expenditure on failed projects can be expensed immediately.

Companies with separate R&D centres employing more than 500 R&D personnel can, in addition to the aforementioned deduction, deduct half of any increase in R&D expenditures over similar money spent in the previous period.

Any unutilised R&D deduction can be carried forward for an unlimited period of time, indexed to the revaluation rate, which is an approximation of the inflation rate.

Income WHT exemption on salaries

80% of the salary income of eligible R&D and support personnel is exempt from income WHT. However, this rate is increased to 90% for personnel with a doctorate degree.

Support for the contributions to the Turkish social security institution

The MoF will pay half the employer portion of social security premiums for R&D and support personnel for five years.

Stamp tax exemption

Documents prepared in relation to R&D activities are exempt from stamp tax.

Turkey

Withholding taxes

There is no WHT on payments to resident corporations by other resident corporations, except for a 3% WHT on progress payments to contractors, both domestic and foreign, within the scope of construction work spanning more than one calendar year.

The local WHT rates are as follows:

Income derived by non-resident individual or corporation not constituting PE in Turkey	WHT (%)
Rental from immovable assets	20
Leasing of goods (within the scope of the conditions regulated under Turkish Financial Leasing Law No. 3226)	1
Royalties (e.g. on patents, copyrights, licence)	20
Professional services	20
Petroleum services	5
Wages & salaries (progressive rates are applied for employees' income taxes)	15 to 35
Interest on loan arrangements	
Interest payments made to foreign banks and corporations that are authorised in their own jurisdictions and customarily lend not only to related parties but also to third parties	0
Interest payments made in relation to securitisation loans	1
Other loans	10
Interest on time deposits	15
Reverse-repo income derived from bonds	15
Income derived by resident eligible entities *	WHT (%)
Capital gains on Treasury bills and domestic government bonds issued after 1 January 2006	0
Interest income on Treasury bills and domestic government bonds issued after 1 January 2006	0
Capital gains from listed equities purchased after 1 January 2006	0
Income derived by other entities and individuals	WHT (%)
Capital gains on Treasury bills and domestic government bonds issued after 1 January 2006	10
Interest income on Treasury bills and domestic government bonds issued after 1 January 2006	10
Capital gains from listed equities purchased after 1 January 2006 (excluding those purchased by securities investment trusts after 1 January 2006)	0
Capital gains from equities of securities investment trusts purchased after 1 January 2006	10
Turkish investment funds	WHT (%)
Eligible entities * (both residents and non-residents)	0
Other entities and individuals ** (both residents and non-residents)	10

* Under the *Communiqué* No. 277 of Income Tax Law, the eligible entities refer to the following:

- Turkish resident capital corporations (limited liability companies, joint stock companies, and commandite companies whose capital is divided into shares).
- Non-resident corporations which have the same characteristics as Turkish capital corporations.
- Turkish investment funds (regulated in accordance with the Capital Markets Board).
- Non-resident investment funds similar to Turkish investment funds.
- Those non-residents similar to Turkish investment funds and trusts which engage in investment in securities and other capital markets instruments as their only business in Turkey, to derive income and capital gains from these instruments and to exert the rights attached to these instruments.

Under the aforementioned *Communiqué*, the investor should be an institutional portfolio investor. However, what is meant by 'institutional' is not crystal clear. It seems to us that the intention of the MoF is to treat all non-resident portfolio investors (other than the individuals) as institutional portfolio investors. The *Communiqué* does not have a principle based approach, rather it enlists a number of 'institutional investor' examples, such as limited liability partnerships (LLPs), sovereign funds, investment funds, investment institutions, and investment companies.

** Income derived from the redemption of participation certificates which continuously invest at least 51% of their assets in equities that are registered on the Istanbul Stock Exchange are not subject to WHT if they are held at least for one year.

Please refer to the following tables for local WHT on interest, royalties, and dividends, respectively:

Turkish WHT on interest and royalties

Recipient	Interest (%)	Royalties (%)
Albania	10	10
Algeria	10	10
Austria	5/10/15 (1, 2, 15)	10 (2)
Azerbaijan	10	10
Bahrain	10	10
Bangladesh	10	10
Belarus	10	10
Belgium	15 (1)	10
Bosnia Herzegovina	10	10
Bulgaria	10	10
Canada	15 (1, 19)	10
China (People's Republic of)	10	10
Croatia	10	10
Czech Republic	10	10

Notes

1. The local rate of 10% will be applied in the event a higher rate is stipulated in the agreement.
2. Provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
3. A rate of 10% if the loan or other debt claim is for a period exceeding two years; 15% in all other cases (1).
4. A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases (1).
5. A rate of 10% if the loan/credit is taken from a financial institution; 15% in all other cases (1).
6. A rate of 10% if the loan is taken from a bank or a financial institution; 15% in all other cases (1).

7. A rate of 10% if the credit/loan is taken from a bank, financial or savings institution, insurance company; 15% in all other cases (1).
8. A rate of 7.5% if the loan is taken from a financial institution; 10% in all other cases.
9. A rate of 10% if the interest is the result of a loan provided/given by a bank or if the interest is paid in return for an article of merchandise, or equipment given to the contracting state on credit; 15% in all other cases (1).
10. A rate of 10% if the loan is taken from a financial institution, including insurance companies; 15% in all other cases (1).
11. A rate of 10% for the use of, the right to use, or the sale (contingent on the productivity, use, or disposition) of any copyright of literary, artistic, or scientific work, including royalties in respect of motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process, or for information concerning, industrial, commercial, or scientific experience; 5% for the use of or the right to use industrial, commercial, or scientific equipment.
12. A rate of 5% for the use of industrial, commercial, or scientific equipment; 10% in all other cases.
13. A rate of 15% for patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
14. The treaty has been terminated by Germany. The termination is applied for the periods following 1 January 2011.
15. A rate of 5% in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by the *Oesterreichische Kontrollbank AG* or a similar Turkish public entity the objective of which is to promote the export; 10% if the interest is derived by a bank; 15% in all other cases (1).
16. If the beneficial owner of the 'income from debt claims' is a resident of Saudi Arabia, the tax so charged shall not exceed 10% of the gross amount of income.
17. A rate of 10% in respect of a loan or other debt claim for a period exceeding two years or if the interest is received by a financial institution; 15% in all other cases (1).
18. Interest arising in one of the contracting states and paid to the government of Turkey or the Central Bank of Turkey shall be exempt from income taxes in the contracting state. Similarly, interest arising in the Republic of Turkey and paid to the government or the Central Bank of the other contracting state shall be exempt from income taxes in Turkey.
19. Interest arising in Turkey and paid to the government of Canada or to the Bank of Canada shall be exempt from Turkish tax. Similarly, interest arising in Canada and paid to the government of Turkey or to the Central Bank of Turkey (*Türkiye Cumhuriyet Merkez Bankası*) shall be exempt from Canadian Tax.
20. The rate of the income tax shall not exceed (i) 10% if the interest is paid to a bank (also note that in the case of Turkey, a lower rate of 0% may apply for eligible financial institutions' and banks' loans under the domestic regulation) or (ii) 5% if the interest is paid to the Norwegian Government Pension Fund (*Statens Pensjonsfond*), the Norwegian Guarantee Institute for Export Credits (*Garantiinstituttet for Eksportkreditt*), the Turkish Social Security Fund (*Sosyal Güvenlik Fonu*) and the Eximbank of Turkey (*Turkiye ihracat Kredi Bankasi*).
21. The rate of the income tax (i) shall not exceed 10% if the interest is paid to a bank (also note that in the case of Turkey, under the domestic regulation, a lower rate of 0% may apply for the loans provided by eligible financial institutions and banks). The interest shall be exempt from income taxes in the contracting state where it arises, if the payment is made to the government of Turkey, to the Central Bank of Turkey (*Turkiye Cumhuriyeti Merkez Bankasi*), to the government of New Zealand, or to the Reserve Bank of New Zealand.

Turkish WHT on dividends

Dividend distributions to individuals and to non-resident persons who are shareholders are subject to WHT at a local rate of 15%. This rate might be reduced for non-resident shareholders in the presence of a tax treaty. Please note that dividend distributions to resident entities and branches of non-resident entities are not subject to WHT.

Notes

- The local rate is 15% for dividends. Unless a lower rate is stated in the Agreement, the local rate is applied.
- As per the provisions of the protocol amending the agreement, the rate may be (partially or wholly) reduced:
 - For the Netherlands: to 10%, as long as, under the provisions of the Netherlands Company Tax Act and to the future amendments thereto, a company which is a resident of the Netherlands is not charged tax with respect to dividends the company receives from a company which is a resident of Turkey.
 - For Belgium: to 10%, as long as, under the provisions of the Belgian laws and of the future amendments thereto, a company which is a resident of Belgium is not charged tax with respect to dividends the company receives from a company which is a resident of Turkey.
 - For Austria: to 5%, if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends, provided that such dividends are exempt from tax in Austria.
 - For Ireland: to 5%, where the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the voting power of the company paying the dividends. 15% in all other cases.
- Subject to 5% of the gross amount of the dividends if the recipient is the government, or a public institution which is wholly owned by the government or its political subdivisions, or local authorities of the UAE.
- The tax rate shall be 15% where the amount of the Turkish tax imposed on the income of the company paying dividends is less than 40% of such income derived in the accounting period ending immediately before the date when such dividends become payable.
- The income should be subject to full corporate taxation in the hands of the Turkish tax-resident subsidiary.
- The treaty has been terminated by Germany. The termination is applied for the periods following 1 January 2011.
- The provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
- If the beneficial owner of the dividends is a resident of Saudi Arabia, the tax so charged shall not exceed 5% of the gross amount of the dividends provided: (i) the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the Turkish company

- paying the dividends or (ii) the beneficial owner is a central bank or an entity which is wholly owned by the government.
9. In case of Turkey, the tax rate shall not exceed 5%, to the extent that they are paid out of profits that have been subject to full rate of CIT in Turkey (i.e. without benefiting from tax exemption).
 10. The rate of the income tax shall not exceed 5% if it is derived by the Government Pension Fund (*Statens Pensjonsfond*) or by the Government Social Security Fund (*Sosyal Guvenlik Fonu*), provided that such dividends are exempt from tax in the contracting state where the beneficial owner is a resident.
 11. The treaty-reduced rate of 5% shall apply if such dividends are exempt from tax in the contracting state of which the beneficial owner is a resident.

Anti-tax haven provisions

According to the law, all sorts of payments made to corporations (including branches of resident corporations) that are established or operational in countries that are regarded by the Turkish Council of Ministers to undermine fair tax competition (through taxation or other practices) may be subject to taxation in Turkey through withholding at a rate of 30%.

In the meantime, the Turkish Council of Ministers has not yet determined which countries receiving payments are considered 'tax havens'.

Tax administration

All Turkish taxes are imposed under laws drafted by or with the involvement of the Turkish MoF and are promulgated by the Turkish Parliament. The central government, acting through the MoF, imposes most of them, although local authorities have certain rights over some minor transaction charges. Tax procedures are governed by the Turkish tax procedural law.

Taxable period

The taxable period is the calendar year. Note that a different fiscal year is also allowed.

Tax returns

A self-assessment system is used in Turkey.

In principle, residents and non-resident entities having a PE in Turkey are obligated to be registered for all taxes in Turkey (e.g. CIT, VAT, WHT, stamp tax) and file annual CIT returns.

The last date of submission of the CIT return is the 25th day of the fourth month following the fiscal year-end. This date will be 25 April if CIT returns are filed on a calendar-year basis.

Payment of tax

Taxable income is declared on a quarterly-basis as advance tax on the 14th day of the second month following each quarter, and corresponding tax is payable on the 17th day of the same period. Advance CIT paid is offset against the final (i.e. fiscal year-end) CIT calculated in the annual CIT return.

The last date of payment of CIT is the 30th day of the fourth month following the fiscal year-end.

Turkey

Audit cycle

The tax authorities in Turkey do not have a regular audit cycle for every taxpayer. Tax audits are usually performed based on selection through risk assessment software, where they can conduct either sector-specific or issue-specific audits.

Statute of limitations

The Turkish tax system is based on self-assessment, and there is no procedure to agree the filed tax returns with the tax authorities that can prevent further inspections. Tax returns filed by companies remain open to tax inspection until the end of the five-year statute of limitations according to the provisions of Turkish Tax Procedural Law.

Corporate income tax certification

In Turkey, a special kind of tax control mechanism is established called 'corporate income tax certification'. Under this mechanism, the tax authority accepts accounts and tax returns of taxpayers whose accounts are audited and certified by Sworn Fiscal Advisors (SFAs) to be true and correct unless proved to be incorrect. On the other hand, the MoF has announced that those companies that do not have their tax returns certified as such will be on the priority list for tax inspection. The Ministry sets standards of work to be done for any taxpayer wanting to use an SFA. At the end of each year, SFAs have to prepare a comprehensive report to be submitted to the MoF and to certify the accuracy of the CIT return.

The work is carried out over the statutory financials that are subject to tax calculations. Note that this service is not of a 'statutory audit' nature, technically it is a 'non-audit assurance' work.

The tax certification process helps to identify and take corrective measures against erroneous applications that may otherwise be detected only upon a tax investigation by the Turkish MoF.

Other issues

Significant developments

A new law on currency regulations allows branches of foreign legal entities to execute transactions in foreign currencies within Turkmenistan.

A new law on state pension insurance, effective 1 January 2013, introduces obligatory pension insurance contributions payable by employers at the rate of 20% of total remuneration of the employees (Turkmen citizens and foreign individuals permanently residing in Turkmenistan). At this time, it is unclear whether the new pension insurance contribution is to replace the existing Social Security Contribution, which is currently paid by employers on payroll related to Turkmen citizens at the rate of 20%.

Taxes on corporate income

Residents of Turkmenistan are subject to corporate income tax (CIT) on worldwide income; non-residents are subject to CIT only in respect of their Turkmenistan-sourced income. The CIT base is determined as gross income less allowable deductions.

Branches of foreign legal entities are subject to a 20% CIT, whereas Turkmen legal entities are subject to an 8% CIT.

Companies involved in oil and gas operations are subject to a 20% CIT, irrespective of the legal status/ownership structure.

Special purpose duty for improvement of urban and rural territories

A special duty aimed at improving urban and rural territories is imposed on registered entities (e.g. legal entities and branches). The duty applies at 1% of the taxable base for CIT purposes. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this duty.

Local income taxes

Contributions to Agriculture Development and Ashgabat City Development Funds

The contributions to the Agriculture Development Fund and Ashgabat City Development Fund are outside of the general tax legislation (tax code) and are provided for by specific decrees. Permanent establishments (PEs)/branches of foreign legal entities are subject to these contributions on the same terms as local legal entities.

Contribution to the Ashgabat City Development Fund only applies to entities located in Ashgabat City.

Turkmenistan

The base for the contributions is comprised of the accounting income. The contribution rate for the Agriculture Development Fund is 3%, and the contribution rate for the Ashgabat City Development Fund is 0.5%.

Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from these contributions.

Corporate residence

Legal entities are treated as residents for CIT purposes if they are established in accordance with Turkmenistan law or their place of effective management is located in Turkmenistan.

Permanent establishment (PE)

The general definition of a PE under domestic legislation is similar to the one per the Organisation for Economic Co-operation and Development (OECD) model convention. A PE is a permanent place of the foreign legal entity in Turkmenistan, through which it, fully or partially, conducts entrepreneurial (commercial) activity, including that through an authorised person.

Other taxes

Value-added tax (VAT)

VAT is generally payable at the rate of 15%. A zero-rate applies to exports of goods (except for oil and gas) and international transport services. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this tax.

The tax base is sales turnover including excise tax. If a sale is made by state-fixed prices, then the tax base is the respective sales turnover including VAT and excise tax. The amount of input VAT incurred may be offset against the amount of output VAT. The amount of input VAT related to capital expenditures should be capitalised.

Customs duties

The import of certain goods into Turkmenistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Although the list of items that are subject to customs duty is relatively limited (i.e. around 50 items) the rates of customs duties may vary from 5% (e.g. products from cement) to 100% (e.g. carbonic acid) depending on the type of imported goods. In most cases, the customs duty is set on an *ad valorem* basis. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

Excise taxes

Excise tax is paid on goods or products that are considered in the list of excised goods or products. Normally, excised goods consist of alcoholic beverages, tobacco products, and automobiles. Excise rates vary based on the type of goods as well as by domestic production or import.

Property tax

Property tax in Turkmenistan generally applies at the rate of 1% on the average annual net book value of fixed assets and average annual value of tangible assets used for business purposes and located in Turkmenistan. Generally, contractors and

subcontractors operating under the umbrella of the petroleum law may be exempt from this tax.

Transfer taxes

There are no transfer taxes in Turkmenistan.

Stamp taxes

Although state duties of various amounts set forth by the government may apply to certain actions (e.g. branch registration), there is no unified stamp tax/duty mechanism as normally practiced in other countries.

Subsurface-use tax

Subsurface-use taxpayers are legal entities and individual entrepreneurs extracting natural resources and using land or subsoil waters for the extraction of chemical products. This tax does not normally apply to contractors and subcontractors operating under the umbrella of the petroleum law.

Taxable operations include the sale of natural resources extracted by taxpayers and utilisation of natural resources for consumption. Tax rates vary depending on the goods being extracted. Natural or associated gas extraction is taxed at 22%, and crude oil extraction is taxed at 10%. Tax rates for other mineral resources vary depending on profitability (internal rate of return) from 0% to 50%.

Social security payments

Social security is payable by employers at 20% of the total remuneration provided to local employees. Income paid to expatriate employees should not be subject to the social security contribution.

Advertising levy

An advertising levy is imposed on the amount of expenses on commercial advertising and is to be paid quarterly at the rate of 3% to 5% depending on the location of the payer within Turkmenistan. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this levy.

Branch income

Branches pay CIT at the rate of 20%.

Branches are taxed on profits received from activities in Turkmenistan. The gross income is reduced for expenses incurred (both inside and outside of Turkmenistan) in relation to the activities in Turkmenistan. The procedure for determining the taxable base for branches is generally similar to the one for Turkmen legal entities.

Branches subject to the standard tax regime also pay and file returns with respect to the other taxes described in this summary.

Income determination

Inventory valuation

Inventory is valued at cost, including costs relating to its acquisition. The law permits the use of the weighted average, first in first out (FIFO), and last in first out (LIFO) methods for tax purposes.

Turkmenistan

Capital gains

Capital gains are taxable as normal business income in Turkmenistan.

Dividend income

Generally, dividend income paid by Turkmen taxpayers is subject to taxation at the source of payment at the rate of 15%, irrespective of whether paid to residents of Turkmenistan or to non-residents.

Inter-company dividends

The tax code provides for relief from economic double taxation of inter-company dividends.

The withholding tax (WHT) rate on dividends payable by Turkmen legal entities to their foreign shareholders may be reduced under applicable double tax treaties (DTTs).

Technically, Turkmen branches of foreign legal entities may also be subject to 15% WHT on repatriation of income to their head offices. However, if the head office collects the income from its clients directly to its bank account abroad, the mechanism of collecting the dividend tax is unclear.

Interest income

Turkmenistan sourced interest income paid to non-residents that do not have PEs in Turkmenistan is subject to WHT of 15%. The above rate may be reduced under the applicable DTTs.

Foreign income

A resident company is subject to tax on its worldwide income (including capital gains). There are no provisions for tax deferrals in Turkmenistan tax legislation.

Deductions

In general, taxpayers may deduct expenses paid or accrued during the year in connection with their business and aimed at income generation. All expenses must be substantiated by documentary proof.

The deduction of certain expenses is subject to specific ceilings. Such expenses include representation expenses, which are deductible at up to 1% of gross income. Furthermore, deductible norms for business travel expenses are established periodically by the government.

Depreciation

Tax depreciation is based on accounting depreciation. Depreciation is accrued based on the straight-line method. Accelerated depreciation is also allowed based on specific consent of the Ministry of Finance. A new Presidential Decree establishes the maximum depreciation rates ranging from 5% to 25% for five different groups of assets.

Generally, for the purposes of CIT, depreciation accrued is deductible. Fixed assets acquired free of charge as well as assets of non-commercial legal entities, budget organisations, and public associations should be excluded from depreciable assets for CIT purposes, even if they are used for generating income.

Fixed assets provided under operational lease shall be depreciated by the lessor. Fixed assets provided under financial lease shall be depreciated by the lessee.

Goodwill

There are no provisions for goodwill in Turkmenistan tax legislation.

Start-up expenses

Pre-incorporation costs are generally non-deductible.

Interest expenses

Interest expense occurring from debt instruments of any kind should be deductible for CIT purposes provided that the purpose of the underlying debt relates to the entrepreneurial activity of the taxpayer.

Interest expense incurred by a foreign legal entity abroad and recharged to its branch in Turkmenistan is generally not deductible, unless specifically addressed by applicable DTTs.

Bad debts

The Tax Code permits a taxpayer to include provisions for uncollectable debts as well as losses incurred as a result of expiration of the collection period for accounts receivable.

Charitable contributions

There are no specific restrictions on deductibility of charitable contributions. However, they may be disallowed under the general restriction of non-business related deductions.

Repair and maintenance expenses

Deductible expenditures for the repair of fixed assets shall be comprised of the cost of spare parts and consumable materials used for repair, remuneration of employees carrying out the repairs, and other expenditures associated with such repairs, including payments to third parties for the purpose of such repairs.

Research and development (R&D) expenses

R&D costs (including those that produced no positive result) shall be subject to deduction from gross revenue, except for costs associated with the purchase of fixed assets, their installation, and other costs of a capital nature.

Fines and penalties

Fines, penalties, and other financial sanctions (except for tax-related ones) are deductible for CIT purposes.

Taxes

For CIT purposes, the following taxes are deductible: property tax; subsurface-use tax; levies established by the tax code (except the special-purpose duty for the improvement of urban and rural territories); accrued amounts of VAT in selling goods, performing work, and rendering of services; and amounts of excise tax included in the price of sold excisable goods by manufacturers of such goods.

Net operating losses

Loss is defined as excess of allowable deductions over gross revenue. Losses shall be carried forward and deducted in subsequent tax (reporting) periods, but not for more than three years. Losses cannot be carried back.

Payments to foreign affiliates

Administrative and management expenses incurred by the head office of a branch in Turkmenistan are not deductible at the branch level.

Turkmenistan

Group taxation

There is no group taxation in Turkmenistan.

Transfer pricing

The Turkmenistan Tax Code contains provisions concerning state supervision of transfer pricing. According to these rules, the tax authorities monitor and control transfer pricing of certain types of transactions, including transactions between related parties, foreign trade operations, and transactions where the tax authorities during tax audits perceive considerable deviation from the market price (i.e. more than 20%).

Thin capitalisation

There are no provisions for thin capitalisation in Turkmenistan tax legislation.

Tax credits and incentives

Tax and investment incentives may be negotiated on a case-by-case basis. The President has often issued special decrees granting taxation exemptions and other privileges to specific investors. However, since adopting a new edition of the tax code in 2004, such practice has been significantly reduced.

Foreign tax credit

Foreign tax credits are available to tax residents of Turkmenistan based on the provisions of the respective tax treaties. The tax credited shall not exceed the tax liability computed in accordance with Turkmenistan regulations.

Withholding taxes

Turkmenistan-source income generated by a foreign legal entity that has no PE in Turkmenistan generally is subject to WHT at the source of payment at 15% (6% for income from the lease of sea vessels and aircrafts).

Relief may be available for WHT if a foreign entity is a resident of a country that has a valid DTT with Turkmenistan and if the foreign entity complies with certain administrative procedures.

Currently, Turkmenistan has only a few DTTs in force. Turkmenistan is a successor to a number of DTTs concluded by the USSR, while some treaties were concluded and ratified by the government of Turkmenistan. The countries listed below are considered to have valid tax treaties with Turkmenistan:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Armenia	5/15 (1)	10	10
Austria *	0	0	0
Belarus	15	10	15
Belgium *	15	0/15 (2)	0
China	5/10 (3)	0/10 (4)	10
France *	15	0/10 (5)	0
Georgia	10	0/10 (6)	10
Germany *	15	0/5 (6, 7)	0

Turkmenistan

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Great Britain *	0	0	0
India	10	0/10 (6, 8)	10
Iran	10	0/10 (9)	5
Japan *	10	0/15 (9)	10
Kazakhstan	10	0/10 (6)	10
Malaysia	10	0/10 (6)	10
Pakistan	10	10	10
Romania	10	10	15
Russia	10	5	5
Slovakia	10	0/10 (6)	10
Tajikistan	10	0/10 (6)	10
Turkey	10	0/10 (6)	10
Ukraine	10	0/10 (6)	10
United Arab Emirates	0	0	10
United States *	0	15	0
Uzbekistan	10	0/10 (10)	10

* USSR treaties honoured by Turkmenistan.

Notes

- 5% where beneficial owner holds at least 25% of the authorised capital of the company paying the dividends.
- 0% where one of the following conditions is met: (i) interest paid to the government of the other contracting state or interest paid in respect of a loan guaranteed by that other state or by an institution authorised by that state; (ii) interest from commercial debt-claims relating to installment payments for supplying merchandise, goods, or services; (iii) interest on loans, not represented by bearer instruments, from banks; or (iv) interest on cash deposits, not represented by bearer instruments, with banks, including public credit institutions.
- 5% where beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- Interest arising in a contracting state and paid to, or on loans guaranteed or insured by, the government or a local authority thereof, the Central Bank, or any financial institution wholly owned by the government of the other contracting state, shall be exempt from tax in the first-mentioned state.
- Interest on bank credits and loans and interest on commercial credits arising from sources located in one of the states and received by a resident of the other state shall not be taxable in the first state.
- 0% where interest is paid by the governments, Central Bank, or National Bank of the contracting states.
- 0% where the loan has been guaranteed by the state or by an organisation authorised by it for that purpose.
- 0% where interest is paid by government, a political sub-division, or a local authority of the other contracting state.
- Interest paid by government, ministries, other governmental institutions, municipalities, Central Bank, and other banks wholly owned by the government of the other contracting state shall be exempt from tax.
- 0% where the recipients of the interest are governments of contracting states or any governmental body, as well as the Central Banks ('the bank of banks' of a contracting state), a state export or import credit underwriting organisation, or another similar organisation to which, in accordance with the law of a contracting state, the relevant rights were delegated.

Tax administration

Taxable period

The taxable period comprises a calendar year (i.e. 1 January to 31 December).

Turkmenistan

Tax returns

Reports are generally filed quarterly within the month following the reporting quarter. Annual income tax declaration and financial statements of branches of foreign legal entities are due by 20 March of the year following the reporting one.

Tax agents must file WHT reports not later than the 20th day of the month following the one when the respective tax liability occurred.

Payment of tax

Advance CIT payments under the standard tax regime are made before the 13th and 28th days of each month (unless agreed otherwise with tax authorities). Final payments upon results of the first quarter, first half-year, nine months, and tax year are made within five days from the reporting deadlines.

Under the Petroleum Law tax regime, CIT is reported and paid once annually based on dates indicated in the respective Product Share Agreement (PSA).

Audit cycle

Statutory financial audit is required on an annual basis. Auditor's opinion is submitted along with annual financial statement to tax authorities.

Statute of limitations

Statute of limitations for tax purposes is five years.

Topics of focus for tax authorities

The tax administration environment in Turkmenistan is form-driven. Therefore, the quality of documentation supporting the deductions should be of particular importance.

Cross-border transactions are normally scrutinised by tax authorities during statutory tax audits in view of WHT and reverse charge VAT implications.

Another area of focus for tax authorities is the deductions taken by Turkmenistan branches of foreign legal entities in respect of expenses incurred by their head offices abroad.

Significant developments

Following the reading of the national budget in June 2011, a few amendments were made to the Income Tax Act, the Value-added Tax (VAT) Act, and the Finance Act. The key notable amendments include the following.

Income tax

- Definition of a branch has been widened to include a place where a person is installing substantial equipment or substantial machinery for 90 days or more.
- Income derived from agro-processing is exempt from income tax based on the following criteria:
 - The tax exemption cannot be claimed by a company that has an associate or sister company that is already engaged in the business of agro-processing of a similar or related agricultural product in Uganda.
 - For a person to qualify for the tax exemption, they must invest in new plant and machinery that has not been previously used in Uganda by any person in agro-processing to process agricultural products for final consumption.
 - An application has to be made to the Commissioner for a certificate of exemption, and the certificate, if issued, will last for one year; it is renewable annually.
- Transfer pricing regulations (i.e. 'The Income Tax Transfer Pricing Regulations 2011') were introduced effective July 2011.

Value-added tax (VAT)

- Exemption of the following items from VAT:
 - The supply of ambulances.
 - The supply of power generated by solar.
- Thermal and electric energy, heating, gas, refrigeration, air conditioning, and water were deleted from the definition of goods, meaning that the supply of any of these is now a service.
- VAT paid on imported services cannot be claimed back as input tax.
- Zero rating the supply of water, excluding mineral water.
- Importation of VAT exempt services will no longer be subject to reverse VAT.
- Place of supply of goods is now amended to apply to all goods delivered, made available, or whose transportation commences in Uganda.
- Supply of services is now amended to imply that a supply of services takes place in Uganda if the business of the supplier from which the services are made is in Uganda.
- The investment trader incentive was scrapped; consequently, a person can no longer claim input VAT before making taxable supplies.

Uganda

Taxes on corporate income

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of:

- Mining companies.
- Non-resident air transport, shipping, and some telecommunication services.
- Resident companies whose turnover is less than 50 million Ugandan shillings (UGX).

Chargeable income is gross income for the year less the total deductions allowed under the Income Tax Act (ITA). A resident company is taxed on its income from all geographical sources. A non-resident company is only subject to Uganda income tax on income derived from sources in Uganda.

Mining companies

The income tax rate applicable to mining companies is calculated according to the following specified formula:

Annual tax rate = 70 minus (1500/x), where x is the ratio of the company's chargeable income to the gross revenue for the year.

Note that the derived tax rate is subject to a minimum tax rate of 25% and a maximum tax rate of 45%.

Non-resident air transport, shipping, and some telecommunications services

Non-resident ship operators, charterers, and air transport operators who derive income from carriage of passengers who embark, or cargo or mail which is embarked, in Uganda, as well as road transport operators who derive income from carriage of cargo or mail which is embarked in Uganda, are taxed at the rate of 2%.

A non-resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite communication and derives income through transmission of such messages by apparatus established in Uganda, whether or not such messages originated from Uganda, is taxed on one's gross income at a rate of 5%. Similarly, a non-resident person who derives income from providing direct-to-home pay television services to subscribers in Uganda is taxed on one's gross income at a rate of 5%.

Resident companies with turnover of less than UGX 50 million

A rate of 1% of turnover is used to determine income tax payable by a resident company whose turnover is between UGX 20 million and UGX 50 million (approximately between 10,000 United States dollars [USD] and USD 25,000), subject to certain thresholds.

However, on application to the Commissioner, a resident company with a turnover of less than UGX 50 million may be taxed at 30%.

This category excludes professionals, public entertainment services, public utility services, or construction services.

Corporate residence

A company is resident in Uganda for a year of income if it meets one of the following criteria:

- Is incorporated or formed under the laws of Uganda.
- Has its management and control exercised in Uganda at any time during the year of income.
- Undertakes the majority of its operations in Uganda during a year of income.

Permanent establishment (PE)

A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such.
- A place where a person has, is using, or is installing substantial equipment or substantial machinery.
- A place where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.

Other taxes

Value-added tax (VAT)

VAT is governed by the VAT Act and administered by the Uganda Revenue Authority (URA). VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services, as well as exports outside of Uganda, attract a zero rate of tax.

Some supplies are exempt from VAT, the main categories being government subsidies, the supply of unprocessed foodstuffs, agricultural products and livestock, financial services, insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, petroleum products subject to excise duty, machinery for processing agricultural or dairy products, accommodation in hotels outside specified areas, computers, computer accessories, software, and biodegradable packaging materials. The supply of power generated by solar is also now exempt from VAT.

The supply of specialised vehicles, plants, and machinery; engineering designs; feasibility studies; consultancy services; and civil works related to hydro-power, road and bridge construction, public water works, agriculture, education, and health sectors is also exempt.

Zero rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while that incurred in making an exempt supply cannot be recovered.

The zero rated supplies include the supply of goods and services exported from Uganda; the supply of drugs and medicines; the supply of seeds, fertilisers, pesticides and hoes; the supply of machinery, tools, and implements suitable for use only in agriculture; the supply of milk, including milk treated in any way to preserve it; and the supply of

Uganda

leased aircraft, aircraft engines, spare engines, spare parts for aircraft, and aircraft maintenance equipment.

The annual threshold for VAT registration is UGX 50 million (approximately USD 25,000). Persons who make supplies that are VAT-able and whose turnover exceeds UGX 50 million are required to register for VAT with the URA. VAT registered persons are required to:

- Charge VAT whenever they make supplies that are VAT-able.
- File monthly returns before the 15th day of the month following the reporting month.

Credit for input tax

A person making exempt, zero-rated, and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

Imported services

The VAT Act defines a supply of service to mean any supply which is not a supply of goods or money, including the performance of services for another person.

An imported service is one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to regulation 14 of the VAT Regulations 1996, any person who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service to account for the VAT at the time when performance of the service is completed, when payment for the service is made, or when the invoice is received from the foreign supplier, whichever is earliest.

The tax on such imported services is computed at the rate of 18% of the cost of the service. VAT registered companies are no longer required to prepare self-billed tax invoices, thus they are unable to claim the VAT paid as input tax. Further, if the importer of the services is not registered for VAT, the importer is required to calculate and pay the VAT to URA.

The VAT on imported services is now a cost to the importer whereas prior to 1 July 2011 there was no effect on the cash flow position due to the requirement for the preparation of a self-billed tax invoice, which has now been abolished. Failure to pay VAT on non-exempt imported services is tantamount to lack of compliance with the law, and a penalty of 2% per month compounded may apply.

VAT representative for non-resident persons

The VAT Act provides for the appointment of a VAT representative by a non-resident person who may be required by the Commissioner to register for VAT in Uganda but has no fixed place of business. If the non-resident person does not appoint the VAT representative within 30 days after being required to register for VAT, the Commissioner may appoint the representative for the non-resident person. The VAT representative of the non-resident person shall be a person who is ordinarily residing in Uganda, may be an agent for more than one non-resident person, and will have the responsibility for doing all things required of the non-resident person under the VAT Act.

Customs duties

Many goods imported into Uganda are subject to customs duties. However, exemptions are available to various classes of plant and machinery imported into Uganda. The rates of duty are provided by the East African Community common external tariff code. Certain products imported from the East African Community and the Common Market for Eastern and Southern Africa (COMESA) region enjoys special custom duty rates. Imported items are classified according to the nomenclature established under the international convention on the harmonised commodity description and coding system. Duty's range from 0% to 60% depending on the item imported.

Excise taxes

Excise duties are imposed on goods considered luxuriant. Examples include locally manufactured soft drinks, cigarettes, alcoholic drinks, and spirits. A schedule of some of the rates is provided below:

Goods	Excise tax
Cigarettes	Between UGX 20,000 and UGX 50,000 per 1,000 sticks subject to the type of cigarette
Cigars and other smoking tobacco	150%
Beer made from malt	60%
Beer made from local raw material	20%
Beer produced from barley grown and malted in Uganda	40%
Spirits	60%
Wine produced from local raw materials	20%
Other wine	70%
Air time	12%
Fuel and oils	Between UGX 200 and UGX 720 per litre depending on the type of fuel/oil

Property taxes

Property taxes are administered by the local authorities annually. They are based on the value of the property as assessed by the local authorities.

Stamp taxes

Stamp duty is charged on a number of transactions at varying rates. Stamp duty is charged at 1% of the total value for a number of instruments, including hire purchase agreements, composition deeds, leases, exchange of property, conveyance, transfers, share warrants, gifts, and agreement relating to deposit of title deeds.

Stamp duty of 0.5% is incurred on formation of a company, capital-raising activities such as increase of share capital, debentures, equitable mortgages, and mortgage deeds.

Stamp duty of 1% applies on transfer of shares.

No stamp duty is charged on the increase of share capital where it is in fulfilment of a condition precedent for acquiring loan funds for a development project or where it is made on becoming public through the stock exchange.

Stamp duty of UGX 5,000 is also charged in a number of various other instruments.

Uganda

Turnover taxes

Every promoter of gaming and pools promoted within Uganda and every principal agent of a promoter of gaming and pools promoted outside Uganda is liable to tax at 15% of the total amount of money received or the total amount of bets.

A tax of 5% is charged on gross income earned by non-resident persons carrying on the business of transmitting messages by cable, radio, optical fibre, satellite, or provision of direct to home pay television services to subscribers in Uganda.

Environmental taxes

Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item depending on the nature of the item.

Branch income

Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of allowable expenses.

In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the $A + (B - C) - D$ approach. Where A is the net assets at the beginning of the year, B is the net profit for the year, C is the tax charge for the year, and D is the net assets at the end of the year.

Income determination

In arriving at chargeable income (taxable income) one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed.

Inventory valuation

A taxpayer is allowed a deduction for the cost of trading stock disposed of during the year, which is determined by adding to the opening value of the trading stock the cost of trading stock acquired during the year and subtracting the closing value of stock. The opening value of the stock is the closing value for the previous year or, where the taxpayer commenced business during the year, the market value at the time of commencement of the business of the trading stock acquired prior to commencement. The closing stock valuation method is the lower of cost or market value. Trading stock is allowed to be valued using either the absorption costing or prime cost method. The stock valuation method chosen may not be changed, except with written permission of the Commissioner.

Capital gains

Capital gains are included in and taxed together with the business income at a rate of 30%. There is no separate capital gains tax. Capital gains arise on disposal of non-depreciable business assets as well as sale of shares.

Dividend income

The general rule is that dividend income is taxable as part of business income at a rate of 30%. Dividend income is also subject to withholding tax (WHT) at the rate of 15%. The WHT paid in respect of the dividend income is creditable where the income is subject to the corporation tax rate of 30%. The WHT rate for dividend payments to resident persons is 15%. For dividends paid out by companies listed on the stock exchange to individuals, the rate is 10%.

Dividend income is exempt from tax if the recipient company directly or indirectly controls the paying company through ownership of 25% or more of the voting power of the paying company.

Interest income

The general rule is that interest income is taxable as part of business income at a rate of 30%. Interest income is also subject to WHT at the rate of 15%. The WHT paid in respect of the interest income is creditable where the income is subject to the corporation tax rate of 30%. However, interest income earned by financial institutions with respect to agricultural loans is not subject to tax. Also, interest income earned by financial institutions with respect to government securities is subject to tax at 15% as a final tax.

Rental income

Rental income for companies is included in gross income and taxed at the 30% corporate tax rate.

Foreign income

Foreign income is taxable on resident recipients, and tax suffered in the country where it is sourced (if any) is creditable subject to the provisions of any double taxation agreements (DTAs). This credit is limited to the amount of Ugandan tax payable on that income.

Deductions

The ITA sets out the following conditions for deductibility of an expense:

- There must be an expenditure or loss.
- The expenditure or loss must be incurred by a person during the year of income.
- The expenditure must be incurred in the production of income included in gross income.

A taxpayer who is accounting for tax purposes on an accrual basis derives income when it is receivable by the taxpayer and incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

- with respect to the acquisition of services or property, at the time the services or property are provided
- with respect to the use of property, at the time the property is used, or

Uganda

- in any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

Contingent liabilities are not tax-deductible in Uganda.

Depreciation

A deduction is allowed for the depreciation of the person's depreciable assets, other than minor assets, in accordance with the appropriate applicable rates. The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing balance basis. Depreciable assets are classified in four classes as follows:

Class	Assets included	Rate of tax depreciation (%)
1	Computers and data handling equipment.	40
2	Automobiles, buses, and mini-buses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tonnes; construction and earth moving equipment (cost of motor vehicle sealed at approximately USD 24,000).	35
3	Buses with a seating capacity of 30 or more passengers; goods vehicles designed to carry or pull loads of 7 tonnes or more; specialised trucks, tractors; trailer-mounted containers; plant and machinery used in farming, manufacturing, or mining operations.	30
4	Rail cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft, specialised public utility plant, equipment, and machinery; office furniture, fixtures, and equipment, and any depreciable asset not included in another class.	20

Initial allowance

Where a taxpayer places an item of eligible property into service for the first time during the year of income, they qualify for a tax deduction for that year of income which is equal to 75% of the cost of the asset if the property is put into use outside Kampala, Entebbe, Namunve, Jinja, and Njeru. However, if the property is put into use in the above named areas, the tax deduction is equal to 50%.

Eligible property is defined to mean plant and machinery wholly used in the production of income included in gross income but does not include goods or passenger vehicles; appliances of a kind ordinarily used for household purposes; or office or household furniture, fixtures, and fittings.

Industrial building allowance

A company is eligible for an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% per annum on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

In addition to the above, a company is entitled to an initial allowance at the rate of 20% on an industrial building in the first year the building is put to use. The industrial building allowance is computed on the residual value after the initial allowance of 20%.

An industrial building is defined to mean any building which is wholly or partly used, or held ready for use, by a person in manufacturing operations, research and development into improved or new methods of manufacture, mining operations, an approved hotel business, an approved hospital, or approved commercial buildings.

Goodwill

Goodwill is treated as an intangible asset and is amortisable over its useful life.

Start-up expenses

A company setting up business for the first time or engaged in the initial public offer at the stock market will be entitled to a tax deduction for all its start-up costs that are of capital nature that would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years at a straight-line basis at the rate of 25% per annum.

Interest expenses

Interest is deductible if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company's gross income. Interest arising from non-trade-related debt obligation is not deductible.

Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of two times the company's equity will not be allowed (*see Thin capitalisation rules in the Group taxation section for more information*).

Bad debt

A deduction is allowed for bad debt only if:

- the amount was included in the person's income in the year of income
- it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income, or
- the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry, or similar operations.

For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken and that the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses which subsequently materialise, has been made.

Charitable contributions

Charitable donations are deductible if made to amateur sporting associations; religious, charitable, or educational institutions of public character; trade unions; and other similar associations which have been issued with a written ruling by the Commissioner currently in force stating that it is an exempt organisation. The donations should not exceed 5% of the person's chargeable income.

Meals, refreshments, and entertainment

Expenses for meals, refreshments, and entertainment are deductible only where the value is included in the employment income of the employees or is excluded from employment income owing to the fact that it is provided on equal terms to all workers.

Pension expenses

Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand, do not get a deduction for the contributions they make to pension funds.

Uganda

Payment for directors

Directors are treated as employees, so expenses incurred in respect of directors are deductible expenses.

Bribes, kickbacks, illegal payments

Non-business expenses are not tax-deductible, including those of a private nature.

Fines and penalties

No deduction is allowed for any fine or similar penalty paid to a government or its subdivision for breach of any law.

Taxes

No deduction is allowed for income tax payable in Uganda or in a foreign country.

Other significant items

No deduction is allowed for the following other expenditures:

- Any expenditure or loss of a domestic or private nature.
- Any expenditure or loss of a capital nature.
- Any expenditure or loss recoverable under insurance contract or indemnity.
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person (e.g. National Social Security Fund (NSSF) contributions).
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person.
- Any income appropriated to a reserve fund or capitalised in any way.
- The amount of pension paid to any person.

Net operating losses

A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:

- Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change:
 - continues to carry on the same business after the change as it carried on before the change and
 - does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.
- In cases where losses relate to farming, the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

There is no provision for carryback of losses in Uganda.

Payments to foreign affiliates

Payments to foreign affiliates are deductible as long as they are charged at an arm's length and incurred in the production of income.

Group taxation

There are no specific provisions in the law covering groups, so companies in a group do not get any special treatment for tax purposes in Uganda.

Transfer pricing

Uganda introduced transfer pricing regulations that came into force on 1 July 2011. The regulations apply to controlled transactions if a person who is a party to the transactions is located in and is subject to tax in Uganda and the other person who is a party to the transaction is located in or outside Uganda.

The URA Practice Note issued on 14 May 2012 gives details on the transfer pricing documentation to be maintained by the taxpayer. These include company details and transaction details, including agreements and the pricing methodology used in determining the arm's-length price.

In addition, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at arm's-length basis. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda. The Commissioner has yet to issue guidelines in respect of records expected to be maintained by a taxpayer as evidence that related party transactions are consistent with the arm's-length principle.

Thin capitalisation

Where a company intends to finance some of its Uganda operations by use of foreign debt, the ITA provides for thin capitalisation rules in Uganda, and the safe harbour debt: equity ratio is 2:1.

The thin capitalisation rules are provided for in Section 89 (1) of the ITA. According to this Section, where a foreign controlled resident company which is not a financial institution has a foreign debt to foreign equity ratio in excess of 2:1 at any time during that year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt which exceeds the 2:1 ratio.

Controlled foreign companies (CFCs)

Uganda does not have a CFC regime.

Tax credits and incentives

Foreign tax credit

A resident taxpayer is entitled to a foreign tax credit for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The foreign tax credit allowed is subject to the income tax rate (i.e. 30%) in Uganda.

Uganda

Tax holidays for exporters

A tax holiday of ten years is available to exporters who export at least 80% of their produce of finished goods, subject to certain conditions.

Scientific research expenditure, training expenditure, and mineral exploration expenditure

A 100% allowance is available for scientific research expenditures, training expenditures, and mineral exploration expenditures in the year of expenditure.

Incentives for the importation of plant and machinery

Plant and machinery is exempt from customs duty and WHT on importation. Also a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

Employment incentives

A deduction of 2% of income tax payable is granted to any employer who can prove to the URA that at least 5% of their employees on full time basis are people with disabilities.

Other incentives

- Income derived from agro processing is exempt from income tax, subject to certain conditions.
- Business income derived by a person managing or running an educational institution is exempt from income tax.

Withholding taxes

According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment, or management charge from sources in Uganda. WHT at a rate 15% therefore applies on gross dividend payments, interest, management fees, and royalty payments in respect of non-treaty countries.

However, Section 83(5) exempts interest paid by a resident company in respect of debentures, which:

- were issued by the company outside Uganda for the purpose of raising a loan outside Uganda
- were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character, and
- the interest is paid outside Uganda.

A debenture is defined in the ITA as any form of debt, including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured. The term widely issued is also specifically defined.

Double taxation agreements (DTAs)

A taxpayer may benefit from the provisions of a DTA that Uganda has with another country. Please find below a table showing the countries with which Uganda has DTAs and the applicable WHT rates on various categories of income.

According to Section 88 (2) of the ITA, the terms of the international agreement to which Uganda is a party prevails over the provisions of ITA in case the terms of the international agreement are inconsistent with the provisions of the Act.

Recipient	WHT (%)				
	Dividend	Royalty	Management fees	Taxation of branch profits	Repatriation of branch profits
Denmark	15	10	10	30	15
India	10	10	10	30	15
Mauritius	10	10	10	30	15
Netherlands	15 (1)	10	15	30	15
Norway	10	10	10	30	15
South Africa	10	10	10	30	15
United Kingdom	15	15	15	30	15

Note

- With respect to the Uganda/Netherlands DTA, the rate applicable on dividends is 15%, except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).

For new investments and expansions of current investment, the rates are:

- 0% if the beneficiary holds at least 50% of the shares in the company paying the dividends.
- 5% if the beneficiary holds less than 50% of the shares in the company making the payment.

Tax administration

Tax returns

The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the twelfth month of the accounting year.

The Self Assessment Return (SAR) is due by the sixth month after the end of the accounting year.

Electronic filing has been introduced for all tax returns.

Payment of tax

For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment of 50% is due in the sixth month of the accounting period and the second payment is due in the 12th month. The balance is expected to be paid together with the SAR.

Statute of limitations

The ITA requires a taxpayer to maintain records for at least five years after the end of the year to which the records relate.

The VAT Act provides for records to be maintained for six years after the end of the tax period to which they relate.

Topics of focus for tax authorities

The focus of the URA keeps shifting but is generally based on the risk analysis of the information availed to them. Currently, the focus is on transfer pricing.

Significant developments

Ukraine continues to develop its tax system. Specifically, the Tax Code has been modified and now includes the following:

Corporate income tax (CIT)

The CIT rate has been reduced from 23% to 21% for the year 2012.

Taxes on corporate income

CIT applies to taxable profits earned by resident entities in Ukraine and abroad and non-residents with a permanent establishment (PE) in Ukraine. Resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Ukrainian-source income.

As of 1 January 2012, Ukraine's CIT has a uniform rate of 21% (standard CIT rate). The rate will be reduced to 19% from 1 January 2013 and to 16% from 1 January 2014.

Withholding tax (WHT) at a rate of 15% applies for the majority of income payments for non-residents, unless relief is given under a double taxation treaty (DTT). Ukraine has 68 effective DTTs in place. *See the Withholding taxes section for more information.*

Favourable tax regime for agricultural producers

Agricultural producers are entitled to use a very favourable tax regime, provided certain requirements are met. The main criterion requires that income from the sale of their own agricultural products constitutes not less than 75% of their total gross revenue.

Reduced rates for insurance companies

Reduced CIT rates of 0% and 3% are applicable for income of insurance companies in 2012. Long-term life insurance premiums and pension insurance premiums are subject to 0% rate. Otherwise, the 3% rate applies for gross insurance premiums regarding other insurance. Profits earned by insurance companies from non-insurance activities are taxed at the standard CIT rate.

Simplified (unified) tax regime

Starting from 1 January 2012, entities and individuals (i.e. private entrepreneurs) are entitled to use a simplified tax regime if certain requirements concerning the level of income (up to 3 million Ukrainian hryvni [UAH] for private entrepreneurs and UAH 5 million for entities) and number of employees (up to 20 and 50 individuals accordingly) are met. This regime foresees a lower effective tax rate (from 1% of minimal salary per month up to 5% of turnover, depending of the type of taxpayer) and easier reporting for small businesses. However, specific types of business activities are prohibited under

such tax regime (*inter alia*, transactions with certain excise products, exploration/production/sale of precious metals and stones, company management, communication services).

Local income taxes

No CIT is levied at the regional or local level.

Corporate residence

Corporate residence is determined by the place of incorporation.

Permanent establishment (PE)

The Ukrainian definition of a PE generally follows the PE definition from the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, but with stronger agency tests.

In particular, a non-resident PE is defined as a fixed place of business through which the business activity of a non-resident entity is wholly or partly carried out in Ukraine. A PE includes, among other things, a place of management, affiliate, office, etc.

The Tax Code has introduced the concept of a service PE whereby the provision of services (apart from the provision of personnel), including consultancy services, by a non-resident through its employees or other personnel in Ukraine, shall constitute a Ukrainian PE of this non-resident, provided such activities (within the frame of one project) last more than six months in any 12-month period.

Moreover, a construction site in Ukraine may also give rise to a taxable presence of a non-resident in Ukraine in the form of PE, if the length of the construction activities exceeds six months.

Recent amendments to the Tax Code introduced the concept of a non-dependent agent. Specifically, a Ukrainian agent acting on behalf of more than one non-resident in the ordinary course of its business should not constitute a PE in Ukraine.

The Tax Code has also contributed a list of exclusions from the PE definition. In particular, auxiliary and preparatory services of a non-resident should not result in the creation of a PE.

In practice, the Ukrainian tax authorities usually interpret the term 'business activity' in a very broad sense, and, without DTT protection, may consider any type of activity as giving rise to a taxable presence (i.e. a PE) of a foreign entity in Ukraine.

Other taxes

Value-added tax (VAT)

There are two VAT rates: 20% and 0%. The rate of 20% applies to almost all transactions subject to VAT except the export of goods and related services, which is taxable at 0%. The zero rate also applies to the supply of international transport services (confirmed by a single international shipping document) and toll manufacturing services.

Ukraine

Provision of services to a non-resident is not considered to be zero rated. Such services are subject to 20% VAT or considered to be outside the scope of VAT (effectively exempt with no right to claim input VAT), depending on the place of supply.

Transactions that are subject to VAT include the following:

- The supply of goods and services when the place of supply is in Ukraine, including when the supply is made free of charge without consideration.
- The importation of goods and ancillary services (i.e. services costs which are included in goods customs value) into Ukraine.
- Exportation of goods.

Transactions that are not subject to VAT include the following (among others):

- The issue, sale, and exchange of securities.
- The transfer of property from a lesser to a lessee under an operating lease and the return of property upon expiration of the operating lease (other than in the course of import operations).
- Interest/commission element of lease payments under financial lease agreements.
- Provision of financial loans and bank guarantees.
- Insurance and reinsurance services supplied by licensed insurers and services of insurance/reinsurance agents and brokers.
- Payment of royalties.
- Reorganisation of a legal entity (merge, spin-off, accession, division).
- Transit of cargo and passengers through Ukrainian territory.

VAT registration

Tax registration as a VAT payer is compulsory if the volume of an entity's taxable transactions exceeds the compulsory registration threshold. The current registration threshold is UAH 300,000 for the previous 12 months. An entity qualifying as a taxable entity should register with the tax authorities at the place of its location and obtain a VAT registration number. In addition, voluntarily VAT registration is available if a person makes taxable supplies within 12 previous months and at least 50% of supplies are to VAT payers, or the amount of its statutory share capital or the book value of its assets exceeds UAH 300,000. There is no mechanism for a non-resident to register without a PE in Ukraine. Accordingly, any Ukrainian VAT incurred by a non-resident is non-recoverable.

VAT recovery and refunds

Generally, VAT incurred by a registered entity on the purchase and/or importation of goods and services used for the purpose of its own business (except for VAT incurred in relation to exempt supply) may be recovered by way of a credit against output VAT. In case VAT credit exceeds VAT output for two months consecutively, a VAT refund is available in the form of a cash payment or an offset against future VAT liabilities (subject to certain rules and limitations).

As of 2011, an automatic VAT refund procedure has been introduced for eligible exporters. In practice, obtaining a VAT refund by other taxpayers is difficult.

VAT returns

VAT returns must be filed by the taxpayer on a monthly basis. Monthly tax returns are due within 20 calendar days following the end of the reporting month. Taxes payable assessed on the basis of tax returns are due within ten calendar days following the deadline for filing the relevant tax returns.

Customs duties

Customs duties are payable by the importer upon import of the goods into Ukraine and applicable in accordance with the Customs Tariff. Currently there are two duty rates: relieved and full rates. Relieved rates of duty apply to goods originating from World Trade Organization (WTO) countries and countries which have granted Ukraine 'most favoured nation' trade status. Full rates of duty apply to goods originating from all other countries or where the country of origin cannot be determined.

Ukraine has concluded free-trade agreements with Georgia, the Commonwealth of Independent States (CIS) countries, and Macedonia. Ukraine has also ratified a free-trade agreement with the European Free Trade Association (EFTA) countries, which is expected to come into force starting from 1 June 2012. These agreements allow many goods to be imported into Ukraine duty-free, subject to compliance with preferential rules of origin. The 2009 CIS Preferential Rules of Origin are used to determine whether goods originate from a particular CIS country to qualify for these duty exemptions.

The Ukrainian government is now negotiating a free-trade agreement with the European Union.

Ukraine has no export duties except on natural gas, scrap metal, livestock, rawhide, barley, and certain oil seeds.

Special kinds of import duties (i.e. seasonal, special, anti-dumping, countervailing) may be applicable on the import of certain goods.

Excise taxes

Excise tax applies to certain goods imported to or produced in Ukraine. Excisable goods include alcoholic beverages, tobacco and tobacco products, cars and car bodies, as well as liquefied gas, petrol, and diesel fuel. Ukraine is currently experiencing a gradual augmentation of excise tax on tobacco goods, ethyl alcohol, and alcoholic beverages.

Rates of excise tax can be *ad valorem* (a percentage of the value of the goods), specific (in monetary units per unit of goods), or combined.

Property taxes

There is no tax on commercial property in Ukraine (apart from the land tax). A local tax on residential property owned by entities and individuals (a real estate tax) will be introduced from 1 July 2012.

Land tax

Land tax is assessed annually for the following year and is paid monthly in equal instalments by the owners or users of the land. The rate of land tax depends on the category, location, and the existence of a state valuation for each particular land plot.

Stamp taxes

Stamp duty is imposed on certain actions, including the notarisation of contracts and the filing of documents with the courts. In most cases, the amounts involved are nominal. Operations carried out at commodity exchanges and the sale of real property attract a stamp duty of 1%.

Special Pension Fund charges

The following special charges are payable to the State Pension Fund:

Ukraine

- 3% charge based on the transfer value of a car.
- 1% charge on the acquisition of real estate payable by individuals and legal entities that purchase real estate.
- 7.5% charge on mobile communication services.
- 5% charge on sales of jewellery.

Charges on environmental pollution

Environmental pollution charges (ecological taxes) are imposed on any legal entity that discharges contaminants into the environment (air or water) or disposes of waste. The actual rate depends on the type and toxicity of each contaminant.

Charge for subsoil usage

Companies engaged in extracting mineral resource in Ukraine, regardless of the form of their ownership, are liable to a charge for use of subsoil. For gas and gas condensate, the specific tax rates are applied to the volume of the extracted mineral resources. The payments to be made are calculated as follows:

volume of extracted mineral resources X specific tax rate X a coefficient

Separate charge rates for the use of subsoil apply to the storage of oil and gas products (the amounts are immaterial).

Charges for the use of subsoil are deductible for CIT purposes.

Rental payments (oil and gas industry)

Rental payments are to be made by companies that have the appropriate licences authorising the extraction of oil, gas, and gas condensate.

The tax base is calculated as the volume of extracted mineral resources multiplied by the tax rate. The adjusting coefficients apply to tax rates on rental payments for oil, gas condensate, and for natural gas other than that sold to a buyer authorised by the Cabinet of Ministers. Such coefficient is calculated by the Ministry of Economy (for oil and gas condensate) and the Ministry of Finance (for natural gas) for each reporting period.

Rental payments are deductible for CIT purposes. Product Sharing Agreements (PSA) covered by the Tax Code provide an exemption from these rental payments.

Other local taxes

According to the Tax Code, there are four local taxes that may be levied at the discretion of the local authorities: tax on real estate other than land plots (will come into force starting from 1 July 2012), vehicle parking place duties, duties for the exercise of some entrepreneurial activities, and tourism duty.

Branch income

Domestic incorporated branches or other separate units are treated as separate taxpayers for CIT purposes. However, their head offices may pay consolidated CIT.

In Ukraine, it is not currently possible to register a branch of a foreign legal entity. A foreign company may set up a representative office in Ukraine, which is similar to an unincorporated branch. A non-resident company conducting business activities via a representative office is deemed to carry out business in Ukraine through a PE and may

be subject to CIT at 21% in 2012 (19% starting from 1 January 2013) unless protected by a DTT. When a foreign company conducts business in Ukraine through a PE, taxable income should be determined on the same basis as for domestic entities. If the PE has no separate accounts, the taxable income may be determined as 30% of sales proceeds attributed to the PE.

Distributions made by a PE (out of after-tax income) to its head office should not trigger any further taxation in Ukraine, provided that the head office is in a jurisdiction which has an effective DTT with Ukraine.

Income determination

The Tax Code determines taxable profits as taxable income (items of income defined by the Tax Code) less deductible expenses (expenses allowed for deduction by the Tax Code), including depreciation charges. Taxable income includes any operational (business) income received or accrued within a reporting period (e.g. quarter) and other income, which includes generally passive and irregular receivables. Items of income are recorded when a legal title on goods is transferred or when a document confirming the rendering of services is signed by the parties.

Inventory valuation

A taxpayer is entitled to adopt any of the methods of inventory valuation prescribed by the accounting standards, namely: the first in first out (FIFO) method, weighted average methods, identified cost of unit of goods, normative cost, or sale price. The last in first out (LIFO) method does not apply.

Capital gains on the sale of property

Capital gains realised by the local entity on the sale of buildings are calculated as the difference between the sales price of the fixed asset and its net book value. Capital gains on the sale of land are computed as the difference between the sale price of the land and adjusted purchase price of the land.

Income from securities

Income from securities is calculated separately from other income and is based on the so called 'pooling method'. Taxable income is determined by deducting the aggregate cost of acquiring each class of securities from the aggregate proceeds from selling such securities. If aggregate acquisition costs for the year exceed aggregate sales proceeds, the excess is carried forward and applied against sales of securities in subsequent years.

Recent amendments to the Tax Code introduced separate tax accounting rules for transactions with derivatives and repurchase agreements.

Dividend income

Dividends received by a Ukrainian entity from another Ukrainian entity are exempt from CIT. Dividends received by Ukrainian companies from foreign companies controlled (at least 20% shareholding) by these Ukrainian companies (except for those having 'offshore status') are exempt from CIT.

Companies paying dividends are required to pay advance CIT at the standard rate, unless the dividends are paid to individuals or out of received dividends (with some other exceptions). The advance payment is used to meet subsequent CIT liabilities (other than for insurance companies). If the advance tax is not able to be used in the year the dividend is paid, it is carried over to future years, but cannot be refunded.

Ukraine

Interest income

Interest received by taxpayers is included in their taxable income on a general basis.

Rent/royalties income

Income from rent/royalties received by taxpayers is included in their taxable income on a general basis.

Foreign exchange gains/losses

Taxable income in foreign currency is revaluated in Ukrainian hryvni at the National Bank of Ukraine's (NBU's) official exchange rate at the date when the respective taxable income should be recognised under the general rules of the Tax Code, and, in terms of previously received payments, at the exchange rate on the receipt date.

Expenses incurred (and not paid) by the taxpayer in a foreign currency on the purchase of goods, works, and services are recognised at the NBU's official exchange rate on the date of such purchase, and, in case of a previous payment, at the exchange rate on the payment date.

Realised and non-realised foreign exchange gains/losses are generally treated as taxable/deductible. Foreign currency differences arising from unsettled debt balances and foreign currency account balances are computed according to accounting standards.

Other significant items

Ukrainian tax legislation does not provide special tax treatment for bribes, kickbacks, or illegal payments. However, all income should be included in taxable income unless a specific provision in the law says otherwise.

Funds or property returned to the holder of corporate rights issued by a legal entity after that entity's liquidation, but not in excess of the shares' par value, are not taxable.

Interest-free loans from non-residents are taxable (and deductible upon repayment), unless they are received from shareholders for a period not exceeding 365 calendar days.

Foreign income

Foreign income is taxed under the general rules, and there are no special rules regarding anti-deferral or unremitted earnings.

Deductions

Deductible expenses include any operational (related to the cost of goods/services sold) or other expenses actually incurred or accrued in respect of the taxpayer's business, excluding non-allowable expenses specified by the Tax Code.

Generally, operational expenses are recognised at the date of income recognition from the goods/services sold; other expenses are recognised when they are actually incurred.

Depreciation and amortisation

Assets costing more than UAH 2,500 for the year 2012 that have a useful life exceeding one year are required to be depreciated. Depreciation is determined on a monthly basis and is computed using the following methods:

- Straight-line.
- Reducing balance.
- Method of accelerated reduction of a residual value.
- Cumulative.
- Production-based.

Fixed assets are divided into 16 groups according to their statutory minimal useful life. The useful life of fixed assets may be extended by a taxpayer.

Land value may not be depreciated unless the land plot is purchased together with a building (object of Group 1).

Intangibles may be amortised according to the standard depreciation methods over the assets' useful economic lives as defined in the documents certifying the rights to the intangibles. If such term is not set by these documents, the intangible is amortised over ten years of usage.

Goodwill

Payments in respect of goodwill and amortisation of goodwill are not deductible.

Organisational and start-up expenses

Deduction of organisational and start-up expenses incurred prior to the entity's registration is not explicitly allowed by the law.

Research and development (R&D) expenses

R&D expenses other than those subject to amortisation are deductible when incurred, provided they are business-related.

Interest expenses

Interest paid is generally deductible for CIT purposes if incurred for business needs. However, a limitation for deducting interest expense applies if at least 50% of the borrower's capital belongs to non-residents and the interest is payable to non-residents (and related entities) that have a holding on the borrower's capital. The deductible interest paid to those persons and their related parties cannot exceed the amount of interest income derived plus 50% of the company's taxable profit (excluding interest income and before the deduction of interest). Any interest paid to affiliates in excess of this limit is carried forward to future tax periods.

Bad debt

The decrease of taxable income for bad and doubtful debt is allowed if (i) the creditor applies to the court with a claim for debt collection or for initiating bankruptcy proceedings or (ii) the creditor has a note of execution for collection executed by a notary. At the same time, the cost of goods/services sold should be adjusted as well.

When a creditor pursues action to recover the debt, the debtor is required to adjust its deductions at the moment of (i) taking effect of the court's decision or (ii) delivery of the note on debt collection by the notary.

Charitable contributions

Charitable donations made by a CIT taxpayer in monetary or non-monetary form to certain types of non-profit organisations are deductible, up to a limit of 4% of the prior year's taxable profit.

Ukraine

Pension expenses

The obligatory Ukrainian social security insurance contributions, including state pension contributions charged on payroll expenses, are deductible for employers.

If an employer pays non-state pension contributions at its own expense, such contributions may be deducted. Based on the Transition Provisions of the Tax Code, such deduction is limited to 15% of the annual salary of each employee insured (cumulatively for the year), but shall not exceed the respective limit (the amount of social tax allowance - UAH 1,500 per employee per month in 2012).

Payment for directors

Payments (including bonuses) of a business nature are normally deductible payments, if properly structured.

Fines and penalties

Fines and penalties are not deductible.

Taxes

CIT, personal income taxes, WHT/remittance taxes, and VAT incurred on purchases are disallowed for deductions. Fines and penalties paid to the budget are not deductible.

VAT is deductible if it cannot be offset against output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

Other significant items

Examples of other non-deductible items include the following:

- Expenses that are not supported by relevant documents (e.g. contracts, vouchers, receipts, cheques).
- Service fees paid to related entities, unless there is documentation to prove that the fees are paid in relation to services actually performed.
- Expenses related to receptions, presentations, entertainment, sampling, and the free of charge provisions of goods and services. However, advertising expenses are deductible according to the general rule.
- Fees for consultancy, marketing, and advertising services, as well as royalties, paid to non-residents, are limited for deduction (up to 4% of net revenue separately for royalties and the services for the year preceding the reporting one, excluding VAT and excise). They are not deductible entirely if their recipient is not a beneficial owner (for royalty payments) or residents in an offshore jurisdiction. In addition, royalties paid to a person who shall not be taxed with regard to such royalty in the country of its residence or for intellectual property rights generated in Ukraine are also not fully deductible.
- Engineering fees payable to a non-resident are deductible only up to 5% of the customs value of the equipment imported under a related contract. The engineering fees are not deductible entirely if their recipient is not a beneficial owner or a resident in an offshore jurisdiction.
- Business trip expenses for individuals that are not employees or members of the taxpayer's management/supervising bodies. Business trip expenses for employees are deductible within the limits set by the Cabinet of Ministers of Ukraine.
- Expenses relating to providing employees with uniforms, safety clothes, shoes, and food, if the amount exceeds the norms established by the Cabinet of Ministers of Ukraine.
- Banks will be entitled to a tax deduction of 20% of loan-loss provisions, excluding off-balance (including interest and commissions accrued, the amount of guarantees

issued, and in respect of all securities purchased, etc.). There will be a deduction limit of 30% on such provisions in 2012. Other financial institutions are entitled to a deduction of up to 10% of all loan-loss provisions.

Net operating losses

Ukrainian tax legislation does not provide refunds for deductions. However, tax losses may be carried forward indefinitely. In the past, Parliament regulated specific losses that could be carried forward. For example, taxpayers were able to use only 20% of their losses on 1 January 2010 when paying tax under a return for 2010. No such restriction has been adopted for 2012. At the same time, the current position of the Ukrainian tax authorities regarding tax losses that arose in periods before 1 January 2011 is restrictive.

Ukrainian tax legislation does not provide for refunds for losses carried back.

Payments to foreign affiliates

Payments of a business nature are normally deductible payments. When such payments are made to related parties, however, the payer is required to hold documentary evidence that the payments are for services actually rendered. The amount of the payment may also not exceed the 'usual' (market) price. Reimbursement of costs incurred by holding companies is directly prohibited for deduction.

Payments for goods or services, as well as interest, to foreign entities registered in listed jurisdictions operating offshore tax regimes (36 tax haven jurisdictions are listed by Ukraine's Cabinet of Ministers) are deductible at 85% of payments, unless evidence is held that the foreign entity is subject to the ordinary tax rules of the respective foreign jurisdiction (i.e. it does not benefit from the offshore tax regime).

Group taxation

In Ukraine, each company is taxed individually. However, companies that have domestic unincorporated branches may pay consolidated CIT or as separate branches.

Transfer pricing

Ukraine's transfer pricing rules are based on the arm's-length principle for transactions between related parties. Parties are 'related' if, among other things, one party controls, directly or indirectly, a shareholding interest representing more than 20% of the charter capital of the other party.

The law places strong emphasis on the comparable uncontrolled price (CUP) method. If it is not possible to determine the usual price because information on comparable transactions is absent or not publicly available, the law deems the contractual price to be the usual price. The Tax Code introduced a 'safe harbour' threshold whereby no adjustments to the tax records are required, provided the contractual price in the transactions with related parties and non-CIT payers is within a 20% deviation from the market (usual) price.

Starting from 2013, new transfer pricing methods similar to those of the OECD will be introduced.

Thin capitalisation

Ukraine does not have thin capitalisation rules as such. Instead, there are restrictions on related parties' interest deductibility rules. The interest paid to a related party (as

Ukraine

defined in the Tax Code) is deductible within the amount of interest income plus 50% of the company's taxable profit (excluding interest income and before the deduction of interest). Any interest paid to affiliates in excess of this limit is carried forward to future tax periods.

Controlled foreign companies (CFCs)

There are no specific CFC rules in Ukraine.

Treatment of intercompany items

Ukrainian tax legislation provides the following treatment for intercompany items:

- Dividends paid by Ukrainian companies are not tax deductible. Dividends received are not generally taxable.
- The payer of royalties is required to hold documentary evidence that the royalty payments are made for services actually rendered. The amount of the payment also may not exceed the 'usual' (market) price. Royalties paid to a non-resident are deductible only up to 4% of net revenue of the previous year. Royalties are completely non-deductible in respect of intangibles originated in Ukraine and paid to residents of the offshore jurisdictions, paid to persons who are not beneficial owners, or paid to persons that will not be taxed with regard to such royalty in the country of residence.
- Expenses in relation to the financing of management bodies, including holding companies, are not tax deductible.
- Cost-sharing and similar intra-group payments, other than remuneration for services actually rendered, may not be deductible.
- Transactions for the receipt (provision) of financial aid between a taxpayer and its branches and other separate units without the legal entity status located in Ukraine shall not affect their taxable income or deductible expenses.
- Interest on loans is limited (*see Interest expenses in the Deductions section*).

Tax credits and incentives

Ukraine currently has very few tax incentives, although some are available. The following businesses are entitled to benefit from them:

- Income of publishing and agricultural entities may be tax exempt.
- Income received by investment funds is tax exempt.
- For enterprises selling domestically produced energy saving goods in Ukraine, up to 80% of profits may be tax exempt; and for enterprises adopting energy saving projects, up to 50% of profits may be exempt.
- A tax exemption is available for producers of electric and heat energy generated from bio-energy fuel, as well as for producers of bio-energy powered domestic equipment. Tax incentives are also available for producers of gas (methane).
- Certain tax incentives are granted to the Union of European Football Associations (UEFA) and its companies during the hosting stage of 2012 UEFA European Football Championship in Ukraine and to specific segments of the tourism industry (including ten years of CIT exemption for 3, 4, and 5-star hotels).
- The light industry is tax exempt until 2021.

Tax holidays

The Tax Code introduced tax holidays for small businesses, which are unlikely to impact international businesses. In particular, till the end of the year 2015, a zero income tax rate is applicable for those taxpayers who met certain criteria (including

maximum amount of total income for reporting period, minimal amount of salary paid to employees, date of incorporation, etc.)

Foreign tax credit

Tax residents are allowed a credit for foreign taxes paid on income received abroad, provided there is a DTT between Ukraine and the relevant foreign state. The amount of foreign tax credit is limited to the amount of Ukrainian tax that would arise from the equivalent income in Ukraine (i.e. maximum 21%, 19% as of 1 January 2013). To claim a tax credit, the taxpayer requires an official confirmation of payment issued by the relevant foreign tax authority.

Withholding taxes

WHT must be remitted to the authorities no later than the date when the payment is made to the income recipient.

Passive income (dividends, interest, royalties) from Ukrainian sources that is paid to non-resident entities is generally subject to 15% WHT. Other payments, including payments for engineering services, lease payments, and agency and brokerage fees, are also subject to 15% WHT, but payments for most other services are not subject to withholding.

A 15% WHT rate applies to income on the sale of real estate and on profits from the sale of securities.

Payments for freight services (including sea freight) are subject to 6% WHT.

WHT rates may be reduced under a relevant tax treaty.

The non-resident recipient of income sourced in Ukraine must also be considered the beneficial owner of such income in order to benefit from reduced tax rates under relevant tax treaties. According to the Tax Code, agents, nominee holders, and other intermediaries in respect of received income cannot be beneficial owners of income sourced in Ukraine, and, therefore, are not entitled to favourable treaty provisions.

Payments to non-resident persons for advertising services are not subject to withholding. However, the resident payer is required to pay, from its own funds, a 20% remittance tax based on the value of such services.

A resident payer is similarly required to pay, from its own funds, a 12% remittance tax if a payment is made to a foreign insurer or reinsurer whose rating of financial reliability does not meet requirements set by the authorised state agency. Otherwise, 0% or 4% rates apply.

As taxes on advertising and insurance are levied on a resident party, they cannot be relieved using a tax treaty.

Notes

1. The ownership threshold for the non-portfolio rate is 10%, 20%, 25%, or 50%, depending on the specific provisions in the treaty.
2. Several treaties contain a rate of 0% on interest paid to or guaranteed by a government or one of its agencies.
3. If more than one rate is shown, this means that the rate will depend on the type of royalties paid.
4. The lower rate applies to interest on current or deposit bank accounts and certificates of deposit until 1 January 2015.
5. The lower rate applies to interest paid on certain credit sales and on loans granted by a financial institution.
6. The treaties with Cyprus, Japan, Malaysia, and Spain were entered into by the USSR before it dissolved. Ukraine will continue to honour these treaties, unless they are superseded.
7. The lower rate applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, unless the indebtedness is between associated enterprises.
8. The 0% rate applies if the investor holds at least 50% of the capital of the company paying the dividends and the capital invested is at least 1 million United States dollars (USD); the payer of dividends should not operate in the field of gambling, show business or an intermediation business, or in auctions.
9. The 0% rate will apply if a French company or companies hold, directly or indirectly, at least 50% of the capital of the Ukrainian company, and the aggregate investments exceed 5 million French francs.
10. The lower rate applies to interest paid on any loan granted by a bank.
11. The 0% rate applies if the investor directly holds at least 50% of the capital of the company paying the dividends, and the capital invested is at least USD 300,000.
12. The 10% rate applies if the company receiving the dividend has, for an uninterrupted period of two years before the dividend is paid, owned at least 25% of the capital stock of the company paying the dividends.
13. The 5% rate applies if the capital invested is at least USD 50,000.
14. The 0% rate applies if the Swedish company directly holds at least 25% of the voting power of the company paying the dividends and at least 50% of the Swedish company is held by Swedish residents.

Ukraine

15. The 0% rate applies only if the royalties are taxable in the United Kingdom.
16. The 15% rate applies to dividends from privileged shares or other fixed payments on shares, as well as to disguised employment income.
17. The 10% rate applies if the company receiving the dividend directly owns at least 25% of the capital stock of the company paying the dividends.

Tax administration

Taxable period

The reporting year for companies generally follows the calendar year. The exception is for agricultural manufacturers, whose reporting period starts from 1 July of the current reporting year and ends on 30 June of the next reporting year. Returns are submitted and payments of tax are made on a quarterly basis, generally reflecting the accumulated taxable profit for the year to date.

Tax returns

Quarterly returns are due within 40 calendar days following the last day of the reporting quarter. Resident companies and non-resident entities with a PE in Ukraine must keep records that comply with the tax rules.

Payment of tax

Taxes payable assessed on the basis of tax returns are due within ten calendar days following the deadline for filing of the relevant tax returns.

Audit cycle

The tax authorities may carry out scheduled audits once a year. Taxpayers must be notified of the audit in writing at least ten days in advance. In addition, the tax authorities may perform out-of-schedule audits in certain circumstances (e.g. if a taxpayer does not file tax returns on a timely basis or is reorganised or liquidated).

Statute of limitations

Under Ukrainian tax legislation, a three year statute of limitations applies on any outstanding Ukrainian tax liability, starting from the date a tax return is due to be filed and/or tax, if assessed by the tax authorities, is due to be paid. There is no limit on the period in which an assessment may be made if a taxpayer has deliberately evaded tax (if proven in court) or when a taxpayer fails to file a return.

Penalties

The tax authorities will charge significant penalties for late filing or understatement of tax liabilities. If a taxpayer fails to withhold tax when required, a penalty of up to 75% of the deficient tax is imposed.

Tax advice

Tax advice may be sought from the tax authorities, who are required to issue such clarifications. Tax advices are not legally binding and may be challenged in court. A taxpayer may use the tax advice as guidance on the methodology to be applied by the taxpayer. In practice, the tax advice often does not provide solid protection against assessment of tax, but protects from penalties.

Other issues

Exchange controls

The key issues regarding Ukraine's current exchange control regulations are as follows:

- Trade related settlements between residents and non-residents can be made in foreign currency and Ukrainian hryvni.
- Payments in foreign currencies between residents in the territory of Ukraine are generally prohibited.
- Salaries to Ukrainian staff must be paid in Ukrainian currency (but expatriate employees can be paid in hard currency).
- Foreign loans must be registered with the NBU before funds are remitted to Ukraine. The NBU has reinstated a maximum interest rate and other charges that may be applied to foreign currency loans obtained from non-residents.
- The maximum allowable interest rates for foreign fixed rate loans in hard currency (inclusive of any fees and charges due under the loan agreement) are 9.8% per annum for loans up to one year; 10% per annum for loans for one to three years; and 11% per annum for loans over three years. For loans with floating interest rates, the maximum allowable interest rate is three months of USD LIBOR plus 7.5%.
- Proceeds from exports must be credited to the exporter's Ukrainian bank account within 180 days from the date of customs clearance (for goods) or the date of service delivery. Similarly, prepaid goods must be imported and cleared through customs within 180 days of payment. Failure to do so results in a fine of 0.3% of the amount due or paid for each day of delay.

Payments by Ukrainian business entities for services rendered by non-residents for amounts exceeding 100,000 euros (EUR) (annually) require confirmation from the Foreign Markets Monitoring Centre (FMMC) that the fee for the services does not exceed market prices. Provided the relevant documentation is in place, this should not delay payment. However, the process cannot be taken lightly. If the FMMC rejects an application, no payment will be permitted.

A number of foreign currency transactions may be undertaken only if an individual licence has been obtained from the NBU.

Choice of business entity

Generally, a limited liability company is the most widely used corporate vehicle in Ukraine for both residents and non-residents. A limited liability company has a simple registration procedure, is inexpensive, and is easy to maintain. It also provides more flexibility in terms of repatriating dividends from Ukraine.

Business and tax treatment of intellectual property

Ukrainian laws concerning intellectual property rights provide for a rather developed background for intellectual property usage. Economic rights of authors and neighboring rights owners may be assigned or licensed. Moral rights are not transferable. However, in the fields of enforcement, tax, and court practice, there is an enormous lack of practical experience.

Tax treatment for intellectual property transactions is subject to separate analysis on case-by-case basis, as the Ukrainian tax legislation provides different approaches depending on the nature of the concluded agreement. For instance, the transfer of intellectual property may be treated as its sale, as the provision of services, or as a royalty agreement.

Ukraine

Mergers and acquisitions (M&A) from a business and tax perspective

There are no specific laws regulating public takeovers or mergers in Ukraine.

M&A activity in the Ukrainian market continues to recover after the global financial crisis, and it is expected that the market will increase further in 2012, provided there is stability at the local and international economic level.

The Ukrainian Tax Code provides some guidance on the tax regime for corporate mergers and acquisitions that is generally favourable for M&A transactions. However, no VAT refund in cash will be available for 12 months after the transaction. Also, no deduction of tax losses is available if the acquired entity was a related party to its acquirer for less than 18 months.

Significant developments

There is a growing trend of tax reforms in the Middle East region, and this may result in changes to the tax laws in the United Arab Emirates (UAE).

In particular, the United Arab Emirates (along with the other Gulf Cooperation Council or GCC states) has committed to introduce a value-added tax (VAT) system. The UAE government has made significant progress towards the introduction of VAT; however, there is no formal legislative announcement yet on its introduction.

Advice should therefore be sought to confirm the current status of the UAE tax laws and reforms.

Taxes on corporate income

The United Arab Emirates is a federation of seven emirates: Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al-Qaiwain, Ras Al-Khaimah, and Fujairah. Currently, the UAE federation does not impose a federal corporate income tax (CIT) in the emirates. However, most of the emirates introduced income tax decrees in the late 1960s, and taxation is therefore determined on an emirate-by-emirate basis.

Under the emirate-based tax decrees, CIT may be imposed on all companies (including branches and permanent establishments [PEs]) at rates of up to 55%. However, in practice, CIT is currently imposed only on branches of foreign banks and companies that produce, trade in, or trade in rights over oil, gas, or other hydrocarbon products (i.e. oil & gas companies) having operations in the emirate.

In addition, some of the emirates have introduced their own specific banking tax decrees, which impose tax on branches of foreign banks at the rate of 20%.

Corporate residence

Tax residence under the tax decrees of the various emirates is based upon the French concept of territoriality. Basically, the French territoriality concept taxes profits based on territorial nexus, rather than taxing profits earned outside the country.

Permanent establishment (PE)

For non-resident companies, the CIT liability will also depend on the existence of any kind of PE. Most of the emirate tax decrees include a definition of a PE that generally

United Arab Emirates

includes a branch, management or other fixed place of business, and presence through an agent that has and habitually exercises authority to conclude contracts on behalf of such corporation. The definitions need to be considered individually under the applicable tax decree.

Other taxes

Value-added tax (VAT)

The United Arab Emirates does not currently operate a VAT regime. However, the United Arab Emirates has made significant progress towards its introduction, and it is known that the introduction of a VAT is expected in the near future.

Customs duties

Generally, a customs duty of 5% is imposed on the cost, insurance, freight (CIF) value of imports. Other rates may apply to certain goods, such as alcohol and tobacco, and certain exemptions may also be available.

Excise taxes

Currently, there are no separate excise taxes levied in the United Arab Emirates.

Municipal or property tax

Most emirates impose a municipality tax on properties, mostly by reference to the annual rental value. It is generally the tenants' obligation to pay the tax; however, the tenants' employer will typically pay the tax on behalf of the employee. In some cases, separate fees are payable by both tenants and property owners. For example, in Emirate of Dubai, it is currently imposed at 5% of the annual rental value for tenants or for property owners at 5% of the specified rental index.

Further, a land registration fee may also be levied on transfer of ownership of land or property. For example, a land registration fee is levied in the Emirate of Dubai at a rate of 2% of the sale value of the property (shared between the buyer and seller), payable to the Dubai Land Department.

These levies are imposed and administered differently by each emirate.

Stamp taxes

Currently, there are no separate stamp taxes levied in the United Arab Emirates.

Hotel tax and tourism levies

Most emirates impose a hotel tax of 5% to 10% on the value of hotel services and entertainment. In addition, there may be tourist fees/charges of up to 10% levied for practice of certain tourist/entertainment activities (e.g. events and shows).

These levies are imposed and administered differently by each emirate.

Branch income

As each emirate has a different CIT decree, the decree of each emirate must be consulted to determine the treatment of branches of foreign corporations.

In certain emirates, branches of foreign banks are governed by special banking tax decrees where they are taxed at 20% of their adjusted taxable income.

Income determination

The tax decrees of the various emirates levy taxation on financial accounting profits. The tax decrees may provide for additional adjustments in specific situations. Currently, these adjustments may not be too relevant given that CIT is not imposed for most companies (except for oil & gas companies and branches of foreign banks having operations in the emirate) in the United Arab Emirates.

Deductions

Deductions are determined based on accounting principles and the tax decrees of the various emirates. Currently, these deductions may not be too relevant given that CIT is not imposed for most companies (except for oil & gas companies and branches of foreign banks having operations in the emirate) in the United Arab Emirates.

Group taxation

The United Arab Emirates does not currently permit group taxation.

Tax credits and incentives

The United Arab Emirates offers numerous incentives in the form of tax holidays/exemptions, including offering a range of free trade zones.

Free trade zones (FTZs)

Currently, there are over 30 FTZs (and business parks) in the United Arab Emirates, each having its own regulations. Businesses (and their employees) established in FTZs are generally eligible for guaranteed tax holidays for ten to 50 year (renewable) periods. The FTZs also offer exemption from customs duties. The laws granting these holidays and exemptions are not consistent among the various FTZs, and each FTZ therefore needs to be considered separately.

Withholding taxes

There are currently no withholding taxes (WHTs) in the United Arab Emirates.

Tax treaty network

Taxpayers resident in the United Arab Emirates have access to an extensive tax treaty network. These treaties may not be immediately relevant for UAE WHTs (which are not imposed under the UAE tax decrees); however, they may continue to allow for other beneficial tax provisions (e.g. right to tax in the other treaty country). For completeness, the treaties currently in force are listed below. A number of other treaties are at various stages of negotiation.

Significant developments

Several notable changes to the United Kingdom's (UK's) corporate tax system have been made in the past year. The government has also announced a number of reform measures for corporation tax, together with a programme of future changes and consultations, including a roadmap of how reform will develop in the years to 2015. The overall aim is to improve the international tax competitiveness of the UK economy by reforming four main areas:

- Rate of corporation tax.
- The corporate tax base.
- Policy making.
- Administration and collection.

Because the UK legislative process can lag behind the announcement of proposals, certain changes are already law, others are very likely, or practically certain, to become law, whilst others are issues announced for wider consultation and future enactment into law.

The Finance Act 2011 became substantively enacted on 5 July 2011 and fully enacted on 19 July 2011, with implications for financial reporting under UK and US Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards (IFRS).

Significant measures introduced and fully enacted in law, which have full impact in 2011 and 2012, include a reduction in the rates of corporation tax, together with reductions in capital allowances (tax depreciation). These changes and other areas of future reform and consultation are discussed below.

Changes that have taken effect in the past year

The recent introduction of complex and far reaching reforms of the taxation of foreign profits impacts UK inbound, outbound, and purely domestic businesses through 2012 and beyond. The elements of the reform package which took effect in 2011, or after, include:

- The main rate of corporation tax was reduced to 24% as of 1 April 2012. There are proposals for reductions after that (*see below*).
- Profits of foreign branches of UK companies can be elected out of UK corporation tax with effect for accounting periods commencing after the election.
- The introduction of a principles-based rule to neutralise any UK tax advantage that arises as a result of financial 'group mismatches', i.e. where intra-group financial transactions are treated differently for tax purposes in the individual group members concerned.

- Simplification of certain elements of the corporate capital gains regime, effective as of July 2011. These elements include reducing the impact of degrouping charges (by election, a group can take advantage of these changes from 1 April 2011), and facilitating group reorganisations and other corporate transactions.
- With effect from 1 April 2012, the main rates of capital allowances (in effect, statutory tax depreciation rates) were reduced; the general rate for plant and machinery was reduced from 20% to 18% per annum, and the rate for long-life and special plant from 10% to 8% per annum.

The rate of the bank levy will increase on 1 January 2013. *See Bank levy in the Other taxes section for more information.*

Changes enacted but not yet in force

There are no significant changes enacted but not in force, but a number of important proposed reforms for 2012 and beyond are described elsewhere.

Consultations and proposals - ongoing

There are a number of announced proposals for future reform, on which consultations are currently in progress or proposed, most significantly:

- Further reductions in the main rate of corporation tax to 23% as of April 2013 and 22% as of April 2014.
- The simplification of reliefs and allowances, including reform of capital allowances on fixtures within buildings.
- Measures to tackle tax avoidance, including use of high-risk tax avoidance schemes and consultation on the introduction of a moderate and narrowly focussed general anti-avoidance rule (GAAR). Legislation will be introduced in 2013, although commencement is uncertain and could be earlier.
- Major reform of the complex controlled foreign company (CFC) regime, with effect as of 1 January 2013, so that most genuine overseas businesses will be exempt from the CFC charge. The proposals include a gateway test to exempt smaller businesses entirely, together with safe harbours which will exclude many others. A partial participation exemption is proposed for the finance income of UK-based businesses. In effect, this will tax such income at no more than 5.50% by 2014 and permits UK businesses to lend to associated companies in a tax advantaged manner.
- A review of the practical application of the recent debt cap rules which restrict, for tax purposes only, the UK deduction of financing costs by reference to the worldwide position of the group.
- Abolition of the 2% 'entry charge' for property businesses wishing to convert to the tax advantaged regime for real estate investment trusts (REITs) as of April 2012 together with measures making them a more likely prospect for residential investment.
- A refocusing of research and development (R&D) tax credits on hi-tech companies, small firms, and start-ups, and a proposal for an 'above the line' R&D credit from 2013.
- An increase in the rate of R&D credit for small and medium companies to 225% from 1 April 2012.
- The introduction of a reduced 10% rate of corporation tax on UK patent income as of April 2013, otherwise to be known as the UK 'patent box'.
- The introduction in 2012 of a tax advantaged scheme to encourage investment in small start-up businesses.
- The introduction of a remote gambling tax regime based on the place of consumption.

United Kingdom

- Establishing the future relationship between the tax agent community and Her Majesty's Revenue and Customs (HMRC).

The overall impact of the reduced rates of corporation tax and income tax, together with the improved CFC regime, the existing dividend exemption, substantial shareholdings exemption, 0% rate dividend withholding tax (WHT), and greater certainty over interest deductibility, are designed to make the United Kingdom a more attractive holding company and business hub location.

Most of the above reforms, together with other measures which have also been the subject of new or additional consultation documents and draft legislation published during 2011 and 2012, are included in the Finance Bill in March 2012. This is expected to become law in Finance Act 2012 in July 2012, although the effective date for many of the provisions will be earlier or later.

The European Union (EU) is presently working towards a common consolidated corporate tax base (CCCTB) (and/or a common corporate tax base [CCTB]) to harmonise the corporate tax base (but generally not corporate tax rates, although Germany and France intend to adopt a common rate) across the European Union. It is not clear whether the United Kingdom will adopt any final proposal, nor when it will take effect.

Taxes on corporate income

Resident companies are taxable in the United Kingdom on their worldwide profits (subject to an opt out for non-UK branches), while non-resident companies are subject to UK corporate tax only on the trading profits attributable to a UK permanent establishment (PE) plus UK income tax (generally by way of withholding, though this is not the case with UK-source rental profits) on certain UK-source income. *See the Corporate residence section for more information.*

General corporation tax rates

The normal rate of corporation tax is 24% for the year ending 31 March 2013. The rate for the year ending 31 March 2012 was 26% and for 31 March 2011 was 28%. The rate from 2008 to 2011 was 30%. This main rate applies to companies with profits in excess of 1.5 million pound sterling (GBP). It is proposed that this rate will fall to 23% from 1 April 2013 and to 22% from 1 April 2014.

For UK resident companies with tax-adjusted profits below GBP 300,000, a lower rate is generally applicable. This small profits rate is 20% from 1 April 2011 (21% to 31 March 2011). For companies with tax-adjusted profits between GBP 300,000 and GBP 1.5 million, there is a sliding scale of tax rates. For corporate entities with associated companies, both profit limits are divided by the number of active companies worldwide. There are no proposals for future changes to this small profits rate.

Special corporation tax regimes

With two specific exceptions, there are no special regimes for specific types of business activity; in general, all companies in all sectors are subject to the same corporate tax rates.

Profits which arise from oil or gas extraction, or oil or gas rights, in the United Kingdom and the UK Continental Shelf ('ring-fence profits') are subject to tax in the United Kingdom in accordance with rates applicable in 2006, i.e. a full rate of 30% and a small

profits rate of 19%. Such activities also attract 100% capital allowances on most capital expenditure. A supplementary tax charge of 32% (increased from 20% from 24 March 2011) applies to 'adjusted' ring fence profits in addition to normal corporation tax.

Life insurance businesses are also taxed under a special regime, which effectively includes different corporate tax rates as well as special rules for quantifying profits.

Petroleum revenue tax (PRT)

A tax of 50% is levied on profits accruing from oil and gas extracted in the United Kingdom and in the UK territorial sea and continental shelf in respect of fields given development consent before 16 March 1993. PRT has effectively been abolished, together with associated relief and allowances, for fields that received development consent after 15 March 1993. PRT paid is deductible in computing corporation tax on the company's total profits.

Income tax for non-resident companies

A non-resident company is subject to UK corporation tax only on the trading profits of a UK PE. Any other UK-source income received by a non-resident company is subject to UK income tax at the basic rate, currently 20%, without any allowances (subject to any relief offered by a double tax treaty [DTT] if applicable). This charge most commonly arises in relation to UK rental income earned by a non-resident landlord (NRL). The United Kingdom therefore operates an NRL scheme which requires the NRL's letting agent or tenants to withhold the appropriate tax at source unless they have been notified that the NRL has applied for and been given permission to receive gross rents.

Local income taxes

There are no local or provincial taxes on income.

Corporate residence

UK incorporated companies are generally treated as UK resident. However, companies resident in the United Kingdom under domestic law, but treated as solely resident in a different country under that country's DTT with the United Kingdom, are not treated as UK resident for the purposes of UK domestic tax law.

Additionally, subject to the above exception, companies incorporated overseas are also treated as UK resident if their central management and control is situated in the United Kingdom. That is, if the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business, is in the United Kingdom.

Permanent establishment (PE)

For non-resident companies, the liability to corporation tax depends on the existence of any kind of PE through which a trade is carried on. The meaning of PE for UK tax purposes is set out in statute; it is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition, but is not identical in all respects. Subject to the terms of the relevant double taxation agreement, a non-resident company will have a PE in the United Kingdom if it either:

- has a fixed place of business in the United Kingdom through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in the United Kingdom.

United Kingdom

A fixed place of business includes (but is not limited to) a place of management; a branch; an office; a factory; a workshop; an installation or structure for the exploration of natural resources; a mine, oil or gas well, quarry, or other place of extraction of natural resources; or a building, construction, or installation project. However, a company is not regarded as having a UK PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

Special rules exist to explain how the PE's profits should be evaluated for UK tax purposes (*see the Branch income section for more information*).

Other taxes

Value-added tax (VAT)

The standard VAT rate of 20% applies to most goods and services, apart from domestic fuel and power and certain other reduced-rate supplies, which are subject to VAT at 5% (note that the standard rate was increased from 17.5% with effect from 4 January 2011).

Most exports, most food, most public transport, books and publications, and certain other essential goods and services are zero-rated. Some supplies are exempt, the main categories being the grant of certain interests in land, insurance, financial services, betting and gaming, education, certain sports services, cultural services, and health and welfare. Zero-rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while that incurred in making an exempt supply cannot.

VAT is chargeable on the supply of most goods and services made in the United Kingdom by 'taxable persons' in the course of business, when their taxable turnover exceeds the registration thresholds. Taxable persons include individuals, companies, partnerships, clubs, associations, or charities.

Taxable persons who are not normally resident in the United Kingdom, do not have a business establishment in the United Kingdom, and, in the case of companies, are not incorporated in the United Kingdom, but who make taxable supplies, sales to unregistered persons in the United Kingdom, or acquisitions of goods in the United Kingdom above the relevant limits, may be required to register and account for VAT in the United Kingdom.

If the value of taxable supplies is over a specified limit, registration for VAT is compulsory unless the taxable supplies made are wholly or mainly zero-rated, in which case it is possible to apply for exemption from registration. The government confirmed in Budget 2012 that with effect from 1 December 2012, a zero VAT registration threshold will apply for businesses not established in the United Kingdom.

The rules applying to VAT and territoriality are different to those applying to direct tax in that they derive from the principles of the place of supply in EU law, as enshrined in European Commission (EC) VAT Directives. Having determined that a supply of goods or services has taken place, the second condition to be determined, if the transaction is to fall within the scope of UK VAT, is whether the supply takes place within the United Kingdom. The place of supply rules are different for goods and for services. A person or business belonging outside the United Kingdom, with no place of business in the United

Kingdom, may nevertheless be liable to UK VAT registration where the place of supply of those goods or services is in the United Kingdom.

For goods, the basic rule is that a supply of goods is taxable in the territory where those goods are physically located at the time of supply. Hence, if goods are supplied in the United Kingdom by a non-established taxable person, there will still be a liability for VAT purposes, and the person must register for VAT in the United Kingdom if the taxable supplies exceed the current UK VAT registration thresholds.

For services, the basic rule is that services are treated as made where the customer 'belongs' or is established for VAT purposes, and the customer is responsible for accounting for the VAT due via the reverse charge procedure. However, this is subject to a number of special rules and exceptions. Determining where a business is established for VAT purposes is based on EU law criteria.

For business to consumer (B2C) supplies, the basic rule is that services are treated as made where the supplier 'belongs' or is established for VAT purposes.

VAT returns and payments

VAT returns must be completed at preset intervals (usually every three months). Larger companies may be required to file monthly returns or make monthly payments on account. As of 1 April 2012, all businesses are required to file VAT returns online and make electronic payments. Smaller enterprises can apply for annual returns. VAT returns are usually required to be filed 30 days after the end of the period.

Annual accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

Cash accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

In addition, a flat rate scheme operates for small businesses and is intended to simplify VAT accounting procedures.

Customs and excise duties

Many goods imported into the United Kingdom from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in the United Kingdom. Examples include the following:

Products	Excise duty (GBP)
Road fuels	0.5795 per litre
Cigarettes	167 per thousand (plus 16.5% of the retail price)
Tobacco	164 per kg
Wines	2.53 per litre
Spirits	26.81 per litre of pure alcohol included

United Kingdom

Stamp taxes

Stamp duty is charged at 0.5% on instruments effecting sales of shares. Agreements to sell shares usually attract stamp duty reserve tax (SDRT) at 0.5%. The liability to SDRT may be cancelled by paying the stamp duty due on a stock transfer form (or other transfer instrument) executed in pursuance of the agreement. Stamp duty is not usually charged on an issue of shares, but is charged at a higher rate of 1.5% on an issue of shares in bearer form. Issues or transfers of shares to clearance services or depository receipt systems may attract SDRT at 1.5% (stamp duty at 1.5% may be payable on instruments effecting transfers of shares to such services or systems).

Transfers of non-residential or mixed land and buildings are charged stamp duty land tax at graduated rates up to 4%. Acquisitions of residential property by companies are charged at graduated rates of up to 15% (whereas acquisitions by individuals are capped at 7%). Grants of new leases are charged stamp duty land tax at 1% of the net present value of the rents payable in excess of GBP 150,000 (or GBP 125,000 for residential property) plus up to 4% (or 15% for grants of new leases of residential property to companies) on any premium paid.

Bank levy

A bank levy was introduced as of 1 January 2011 and takes the form of an annual tax on certain liabilities of most UK-based banks and building societies. The tax is levied at the following annualised rates:

- January and February 2011: 0.05% of a bank's short-term relevant liabilities and 0.025% of long-term equity and liabilities.
- March and April 2011: 0.1% of a bank's short-term relevant liabilities and 0.05% of long-term equity and liabilities.
- 1 May 2011 to 31 December 2011: 0.075% of a bank's short-term relevant liabilities and 0.0375% of long-term equity and liabilities.
- From 1 January 2012: 0.088% of a bank's short-term relevant liabilities and 0.044% of long-term equity and liabilities.
- From 1 January 2013: 0.105% of a bank's short-term relevant liabilities and 0.0525% of long-term equity and liabilities.

The levy is not charged on the first GBP 20 billion of chargeable liabilities and is not deductible for corporation tax purposes.

Insurance premium tax (IPT)

IPT at the standard rate of 6% applies to premiums for most general insurance, such as for buildings and contents and motor insurance, where the insured risk is in the United Kingdom (note that the standard rate was increased from 5% from 4 January 2011). Life assurance and other long term insurance remain exempt, though there are anti-avoidance rules surrounding long-term medical care policies.

As an anti-avoidance measure, a higher rate of 20% applies to insurance sold by suppliers of specified goods or services, e.g. mechanical breakdown insurance, travel insurance (irrespective of supplier), insurance sold with TV and car hire, and 'non-financial' guaranteed asset protection (GAP) insurance sold through suppliers of motor vehicles or persons connected with them. Further anti-avoidance rules affect administration or similar fees connected with contracts of insurance, charged under separate contracts by brokers and other intermediaries (note that the higher rate was increased from 17.5% from 4 January 2011).

Airport passenger duty

Individuals leaving the United Kingdom by air are obliged to pay a duty, which in practice is invariably included in the cost of the air ticket. Rates of duty are based on a system of geographical banding and class of travel, ranging from a reduced rate of GBP 13 for short haul destinations in the lowest class of travel to GBP 184 for long haul destinations in higher classes of travel. Certain exemptions and lower rates apply for some geographically outlying areas of the United Kingdom.

Environmental taxes

There are several environmental taxes, including the following.

Landfill tax

The landfill tax is a tax on waste disposal in landfill sites. The standard rate from 1 April 2012 is GBP 64 per tonne, increasing to GBP 72 per tonne from 1 April 2013 and GBP 80 from 1 April 2014. The reduced rate for inert waste is GBP 2.50 per tonne.

Climate change levy

The climate change levy is a tax on energy used in the United Kingdom, such as electricity, gas, coal, etc., and is charged at rates that depend on the nature of the fuel used. There are reduced rates and exclusions from the charge, e.g. supplies to domestic or charitable users and to those who carry out specific energy-saving measures.

Aggregates levy

The aggregates levy is a tax on the extraction or importation of sand, gravel, and crushed rock for commercial exploitation in the United Kingdom. The rate of tax is GBP 2.00 per tonne increasing to GBP 2.10 per tonne from 1 April 2013.

Employers' national insurance contributions (NICs)

Employers are obliged to pay NICs based on a percentage of each employee's earnings. For the year ending 5 April 2012, the rate is 13.8% on all earnings above GBP 140 per week. There is some reduction for employees 'contracted out' of the state pension scheme into a private scheme.

Pension protection fund levy

All defined benefit pension schemes pay a levy, based on pension fund liabilities and the financial risk of the employing company. This levy funds a compensation fund for pensioners and employees of failed schemes.

Local municipal taxes

Local taxes are not based on income, but rather are levied on the occupiers of business property by reference to a deemed annual rental (or 'rateable') value for the property concerned. These taxes (known as 'rates') are administered by regional local government authorities rather than central government. The amounts paid are deductible for corporation tax purposes, provided they meet all the usual requirements for deductibility.

Branch income

Tax rates on the profits of PEs are the same as for domestic corporations, except that the small profits rate is not available to non-UK resident corporations unless under the terms of a DTT.

United Kingdom

There are specific rules setting out how the PE's profits should be evaluated for UK tax purposes, which broadly seek to treat the business as if it were a standalone company. Financing arrangements between the branch and head office must be disregarded, and there are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

No tax is withheld on transfers of profits to the head office.

Taxable income determination

A UK resident company is taxed on its worldwide total profits.

The UK tax system requires those total profits to be calculated by finding the aggregate of (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets.

The main sources of income recognised by the legislation are (i) profits of a trade, (ii) profits of a property business, (iii) non-trading profits (or losses) from loan relationships, mainly interest receivable or payable, (iv) non-trading gains (or losses) on intangible fixed assets, and (v) non-exempt dividends or other company distributions. Determining income for sources (i) to (iv) relies heavily on the company's accounts. Taxable income from non-exempt dividends and calculating chargeable gains or income from other sources is based on actual amounts.

The rules for determining the gross income in each category differ in certain respects according to the source concerned and are different again when calculating gains. Likewise, there are also subtle differences in the rules concerning the deductions that are permissible in respect of different sources of income and in respect of gains. Because of this continuing reliance on taxing companies on a 'source-by-source' basis, the UK system is not well suited to being analysed in terms of income determination and deductions as two wholly separate topics.

Basic rules for accounts-based sources

A company's trading profits are based on its worldwide profit before tax in its accounts. Adjustments are made for non-trading receipts (such as dividends from other companies and income from property) and non-deductible expenditure (such as capital expenditure or expenditure which is not incurred for the purposes of the trade). Depreciation for tax purposes (known as capital allowances) is calculated and substituted for the depreciation charged in the accounts. There are also a number of other statutory adjustments to be made; three important ones are that pension contributions and deferred pay are broadly deductible only when paid, that a deduction is available for the notional cost of certain share awards to employees, and that where acquired intangibles are not depreciated in the accounts a 4% flat-rate deduction can usually be claimed. There are, however, many other adjustments.

Similar principles apply in relation to the calculation of profits of a property business.

The profits from a company's trading and non-trading loan relationships and related matters are based on the accounts. For this source of income, the distinction between 'capital' and 'revenue' receipts and deductions is not relevant. All credits and debits in the accounts are aggregated in order to find the net profit or deficit. Certain statutory adjustments have to be made, which include an interest capping limitation ('debt

cap'). Broadly, the same regime applies to income and expenses relating to intangibles, including goodwill. For a trader, these are therefore specific areas where capital amounts can be taxed or allowed.

For traders, any profit or loss on loan relationships, and/or on intangibles, is generally included within the trading profits; they become a single source of profits. For loan relationships and intangibles not connected with a trade, the company has a separate source of profits or a separate class of loss.

Income losses

Where a loss arises in respect of a particular source of income, there are detailed rules regarding the possible offset of the loss. Carryback and sideways reliefs are often allowed within limits; carryforward is generally allowed and carried forward losses do not time expire. Losses can also be utilised by other group companies (*see the Group taxation section*).

More specifically, dealing with the main sorts of income losses,

- trading losses may be set off against any other source of profit (or gains) in the same year, may be carried back one year (three years on the cessation of the trade) against any other source of profit (or gain), or may be carried forward without time limit against profits of the same trade only
- property losses may also be set off against any other source of profit (or gains) in the same year, or may be carried forward without time limit against profits of any sort; they cannot, however, be carried back, and
- non-trading deficits (i.e. interest and financing losses) can again be set off against any other source of profit (or gains) in the same year, may be carried back one year against non-trading credits (i.e. interest and financing profits), or may be carried forward without time limit against non-trading profits.

Non-trading companies may deduct non-capital management expenses incurred in managing their investments from their total profits. Any excess management expenses can be carried forward without limit to set against profits in future years.

While income losses can generally be offset against capital gains of the same accounting period, capital losses are never available for offset against any type of income.

Inventory valuation

In general, the book and tax methods of inventory valuation will conform. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

Capital gains

Gains on capital assets are taxed at the normal corporation tax rates. The chargeable gain (or allowable loss) arising on the disposal of a capital asset is calculated by deducting from gross proceeds the costs of acquisition and subsequent improvements, plus the incidental costs of sale and indexation allowance. Indexation allowance compensates for the increase in costs based on the percentage rise (if any) in the UK retail prices index to the date of disposal. Indexation allowance is, however, limited; it cannot create or increase a capital loss, it can only reduce or eliminate a chargeable gain. These calculations must be done in sterling, so any foreign exchange gains and losses will be taxed (or relieved) on disposal.

United Kingdom

Special rules apply to assets held since 31 March 1982.

Most acquisitions and disposals between UK group companies are treated as made on a no gain no loss basis (i.e. at base cost plus indexation). Otherwise, acquisitions from, or disposals to, affiliates are treated as made at fair market value, as are other acquisitions or disposals not at arm's length.

Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a company's accounting period may be carried forward without limitation but may not be carried back.

There is a good deal of anti-avoidance legislation concerning the computation of chargeable gains, notably to stop losses being created or gains avoided where assets are depreciated by intra-group transactions, or where losses are 'bought in' from third parties.

Gains realised on certain types of assets can be deferred where all or most of the proceeds are reinvested in other assets of those types within a specified period (generally three years). The 'rolled-over' gain then crystallises as and when the latter assets are sold. At present, the main asset categories qualifying for roll-over are land and buildings used for a trade.

Most disposals by trading groups of shareholdings of 10% or more are exempt from tax. The main exceptions will be those of non-trading subsidiaries or subgroups, or of companies acquired within the previous year. Note that gains on goodwill and other intangibles acquired after March 2002 are taxed as income, not as capital gains.

Dividend income

Most foreign and UK dividends received by UK companies have been exempt from corporation tax since July 2009; one of several criteria has to be met, but these are widely drawn (one test, for example, is that the recipient controls the payer). For non-exempt foreign source dividends, double tax relief (DTR) will be available on a dividend by dividend basis. It is unusual for companies to be taxed on UK dividends because of the breadth of the exemption; however, where they are taxed, there is no concept of DTR for UK dividends.

Realised and unrealised exchange gains/losses

Unrealised exchange gains and losses tend to arise on debts and derivatives; they are then taxed or allowed, together with realised amounts, on an accounts basis in the same way as other debits and credits arising out of loan relationships. Where gains or losses arise on other payables or receivables, to a trader or property investor, they will again generally be taxed or allowed on an accounts basis. For a trader, the taxable or allowable amount will become simply part of the trading profit or loss; for other companies, it will become a separate source of taxable profit (a 'non-trading credit') or loss (a 'non-trading deficit').

Where unrealised differences arise on other capital assets, they will not generally be taxable or allowable at that stage; instead, the exchange difference becomes part of the computation and is effectively taxed or allowed when the asset is disposed of and any difference is realised.

Partnership income

In broad terms, if companies participate in UK partnerships (whether general partnerships, limited partnerships, or limited liability partnerships) they will be taxed

on a flow through basis. This will, in very broad terms, mean that UK corporate partners will be taxed on trading, property, or financing income as it arises in the partnership accounts, and on non-exempt dividends on a receipts basis.

When considering overseas entities, the UK authorities will not be bound by how the entity is classified in its country of origin. Case law has determined a number of matters that should be considered when establishing whether a non-UK entity should be taxed in the UK as if it were a company or a partnership. HMRC also maintains a public list of non-UK entities and the decisions it has previously made regarding their classification. However, if the parties have flexibility regarding the constitution of such entities, then their classification may be viewed differently, either by HMRC or the courts. This area is complex and therefore specialist advice should be sought.

Foreign income

In principle, the United Kingdom taxes on a worldwide basis, although non-UK branch profits can be exempted from UK taxation by election. The election can be made at any date on or after 19 July 2011 and applies to all accounting periods starting after the election is made and to all the branches of the company (so it cannot be made on a PE by PE basis). The election is irrevocable and has the effect of exempting all profits of the branch, including gains (other than for close companies). Equally, relief for branch losses will be denied. Profits will be measured by reference to double taxation treaties, or, in absence, OECD principles. Certain businesses may not elect to exempt profits (e.g. life insurance, shipping and aircraft operations, and most investment activity).

Where no election is made, profits from non-UK branches are computed and taxed in the normal way for UK tax resident companies. However, UK tax will generally be reduced by credit for local direct taxes paid, either under a treaty or via the UK's unilateral relief rules (*see Foreign tax credit in the Tax credits and incentives section for more information*).

General rules for deductions

As noted in the income section, the UK tax system requires taxable profits to be calculated by aggregating (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets. This approach gives rise to a particularly complicated regime so far as deductions are concerned. Expenses are usually allocated to the source of income (or occasionally by reference to income generally) or to the particular gain to which they relate. The rules governing their deductibility differ according to whether the expense relates to a capital gain or to income, and indeed according to the particular source of income concerned. For example, there is a considerable difference in the manner in which tax relief is given for expenses incurred by companies trading in property as compared to those that invest in property. The regime also has a large number of specific rules dealing with particular types of deductions which take priority over the more general rules for each type of income.

We have therefore set out the general rule for trading expenses, being the most common category and, following that analysis, considered some specific common exceptions.

General rules for trading expenses

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for the purposes of the company's trade, provided those costs are not capital in nature and are charged to the profit and loss account. There is a significant

United Kingdom

amount of case law surrounding whether expenses have been incurred wholly and exclusively for the purposes of a company's trade and whether they are capital or not.

Relief is generally given in the period the expenses are accrued in the accounts, subject to some specific exceptions. In particular, contributions to a registered pension scheme are only allowed on a 'paid' basis, with some further provisions under which some contributions may be spread over a number of years; and if bonuses and other staff costs are paid out more than nine months after the end of the accounting period in which they are accrued, they are only allowed on a paid basis.

The general rule is made subject to a raft of specific statutory provisions, some of which allow deductions and others of which limit them; some of the more important of these are discussed below, but there are many others. There is, as one example, a bar to deducting the costs of business entertainment, except within quite strict limits.

Depreciation and amortisation

Depreciation of fixed assets (other than of goodwill and other assets within the intangible fixed asset regime, *see below*) is not allowable as a deduction from any source of income. However, traders, and most non-traders, are instead allowed specified rates of annual deduction in respect of specified classes of assets, together referred to as 'capital allowances', which are deducted in calculating trading income for traders, and (broadly) against income derived from the use of the fixed assets for non-traders.

In the period of expenditure, capital allowances are available, generally at 18% (post April 2012) of the cost of machinery and equipment acquired for use in a trade or property rental business; thereafter, capital allowances are taken generally at 18% per annum on the reducing-balance basis. With some exceptions (notably cars, ships, and machinery and equipment in offices and other non-industrial buildings), the rate of capital allowances for machinery and equipment with an expected useful life when new of at least 25 years, and purchased after 25 November 1996, is 8%. Since 1 April 2008, this 8% rate also applies to certain integral features in buildings and thermal insulation.

Capital allowances are given on cars at rates dependent on emission levels.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 25,000 per year of most qualifying expenditure (from April 2012, previously GBP 100,000 since 2010). This is restricted to a single allowance for groups of companies or associated businesses.

Enhanced allowances, typically at a rate of 100%, are available for expenditure on certain energy saving plant and other specific categories. The products and technologies supported by this regime are reviewed and updated regularly.

The rate of capital allowance of most plant or machinery leased to non-residents is restricted, generally to 8% but in some cases to nil. However, HMRC now accept that in some circumstances these rules may be contrary to EU law, and for leases finalised on or after 1 April 2006 where the lessee is resident in an European Economic Area (EEA) country which does not give the lessee relief broadly equivalent to the UK's capital allowances, HMRC will accept that the lessor is entitled to allowances at the normal 18% rate; in addition, the 0% rate will not be enforced in the case of other EEA lessees.

No capital allowance is normally allowed on buildings, apart from certain machinery and equipment embodied in the fabric of the buildings. Prior to April 2011, limited

capital allowance was given for new industrial buildings, agricultural buildings, and certain hotels. This allowance is now withdrawn.

Capital allowance of machinery and equipment, and of industrial buildings, can be disclaimed in whole or in part, thereby deferring allowances.

Capital allowances may also be available in respect of the cost of the acquisition of mineral assets and other qualifying expenditures relating to mineral extraction, generally at the rates of 10% and 25% respectively on the reducing-balance basis, and in respect of various other types of capital expenditure, including the cost of ships, construction of public roads, and dredging.

Excess capital allowances are generally recaptured on disposal. The recapture is calculated on a 'pool' basis for most machinery and equipment, in which case there is no recapture unless the sale proceeds exceeds the total tax written down value of the pooled assets. The rules concerning which pool an asset goes into can be complex; a large company will generally have several pools ranging from single asset pools to a single large pool for most of its plant and machinery. There is no recapture for sales of industrial buildings.

Where assets are leased, capital allowances are generally available to the lessor rather than the lessee. However, this is an area of complexity, and in some situations (generally relating to finance leases), the allowances are only available to the lessee.

Intangible fixed assets

A special regime applies to intangible assets, such as patent rights, know-how and trademarks, and including goodwill. Royalties are generally deductible on an accounts basis, and, except in relation to 'grandfathered' assets owned by the group on 31 March 2002, the accounts' amortisation of intangible assets is also deductible (with an option to take a flat 4% deduction even if not amortised in the accounts). Traders will take the deductions in computing trading income; non-traders will create a 'non-trading loss on intangible fixed assets' which can be relieved as a loss against any profits of the year, carried back one year, or carried forward indefinitely.

Income costs relating to R&D are normally deductible in any event, but there is a special incentive connected with R&D which generally allows an additional deduction (*see the Tax credits and incentives section for more information*).

Management expenses

Holding companies are permitted a deduction for expenses to the extent that they are expenses of managing the company's investment business and are not capital in nature. Such costs would typically include audit fees, directors' costs, rent, local rates, and office costs. These costs can be set against any sources of profit the company may have (such as financing income). For the top company of a listed group, such expenses can be very substantial.

If the company has inadequate income (given that most dividend income will not be taxable), the excess can be surrendered as group relief. Alternatively, it can be carried forward to set against future income, with no time limit.

Many of the specific prohibitions on the deduction of trading expenses (though not all) are extended to create a similar bar on the deduction of such costs as management expenses for non-traders; conversely, many rules giving traders a specific deduction for certain costs are extended to allow non-traders similar relief. But this is not invariably

United Kingdom

the case. For example, traders can only deduct costs ‘wholly and exclusively’ incurred for the purposes of the trade; there is no similar rule for management expenses. However, the two specific limitations on trading deductions referred to above (pension contributions and late-paid remuneration) are extended to management expenses.

Employee share schemes

A deduction is often available to an employing company for the deemed cost of providing shares to employees, on a formula basis rather than the accounts charge (if any); this depends on the nature of the share plan and of the shares provided. This regime will generally allow a deduction to a subsidiary company whose employees receive shares (or options over shares) in the parent company.

Funding costs

Funding costs (primarily fees and interest) are broadly deductible on an accounts basis, even if capital in nature, but subject to thin capitalisation constraints (with no explicit safe harbours) and an interest cap based on the group’s external debt levels. This extends to foreign exchange deductions relating to debts owed and receivable.

Traders will generally take the deductions in computing trading income (which is also accounts based). Deductions relating to loans not used for trading purposes will give rise to ‘non-trading deficits’ which, if not group relieved, can be offset against profits of that year generally, carried back one year (against that year’s funding profits), or carried forward indefinitely against non-trading profits.

Bad debts, provisions, and reserves

A provision will be deductible for tax purposes if (or to the extent that) it:

- is in respect of allowable revenue expenditure
- is made in accordance with acceptable accounting practice
- does not conflict with any statutory rule governing the timing of relief (e.g. in relation to payment of staff costs), and
- is estimated with sufficient accuracy.

This rule extends to bad debts on trading account. Generally, however, bad debts are dealt with under the ‘loan relationships’ rules for financing costs and financing income. The rules there, however, are broadly the same; if the bad debt can be identified specifically enough to allow a bad debt provision which satisfies UK accounting standards, it should be deductible.

Charitable donations

Most donations to charities by companies are deductible.

Fines, penalties, and bribes

Any payments that would constitute a criminal offence (e.g. a bribe), or would do so if paid inside the United Kingdom, are expressly not deductible as trading expenses or management expenses. Likewise, fines and penalties imposed for breaking the law are also not deductible, although a deduction is usually available for legal costs incurred in defending such an action. Civil penalties, interest, and default surcharges (e.g. relating to certain VAT defaults) are also generally non-deductible, except for damages which are compensatory rather than punitive (e.g. damages for defamation payable by a newspaper company).

The rule that any amount paid by way of a penalty for breach of the criminal law is not deductible derives largely from case law and was explicitly said to be a policy rule. It is

applied strictly; parking fines and fines for breaches of regulations, or for price-fixing, are not deductible.

The rule does not, however, extend to compensatory payments which are not punitive. So settlements in relation to negligence which harms customers or patients, or for breach of contract, or with employees for wrongful dismissal, ought to remain deductible.

Taxes

Local municipal taxes (business rates) may be deducted from taxable income.

Net operating and capital losses

Income losses may be carried forward indefinitely, and, in general, set against any type of non-trading profits; in contrast, losses of a particular trade can be carried forward only against profits of the same trade. Unlimited loss carryback is available for trading losses against total profits of (normally) the previous 12 months (provided the same trade was being carried on in that period). There is a more limited facility to carry back certain non-trading losses, also normally for 12 months. Losses can also generally be surrendered to other group companies to set against their taxable profits for the same period.

Capital losses may also be carried forward indefinitely but may not be carried back. There is no ability to surrender capital losses to fellow group members, but gains or losses arising on a particular asset can be allocated to another group member (by means of a joint election on an asset-by-asset basis). Therefore, there is a limited ability for the capital losses of one company to be offset against the gains of a fellow group member in the same or subsequent period.

Note that there are complex anti-avoidance rules which restrict the utilisation of losses where there is a change in ownership of the company.

Payments to foreign affiliates

There are no special rules for payments to foreign affiliates, so their tax treatment follows the basic rules for deductions set out above. The transfer pricing rules will impose an arm's-length price.

Group taxation

Each individual corporate group member is required to submit their own tax return on a stand-alone basis, with the exception of the election available with respect to VAT (*discussed below*). However, there are a variety of ways in which one's relationship with fellow group members is recognised in the UK tax system for the purposes of corporation tax, VAT, and stamp duty.

Corporation tax

The corporation tax system includes a number of measures that advantage UK members of qualifying groups, all of which are subject to anti-avoidance measures.

Operating taxable profits and losses arising in the same period can usually be offset between UK resident 75% affiliates within a worldwide group. This extends to offsetting the UK profits attributed to a UK PE of a non-UK resident group member. There are some restrictions, primarily where one of the two companies is not an economic 75%

United Kingdom

subsidiary of the group or is subject to arrangements under which it might leave the group.

Intra-group transfers of capital assets between UK companies, including UK PEs, are normally tax-free, though the definition of group for these purposes is slightly different than the definition of group relief for losses. This treatment is also extended to intra-group transfers of loan relationships, derivatives, and intangibles. There is generally a 'degrouching' charge if the transferee company leaves the group within six years.

There is no automatic offset of capital gains and losses where these arise in different group companies, but it is normally possible for offset to be arranged by the appropriate tax-free transfer of the asset being disposed of to the third party. Such a tax-free transfer can either be actually done (prior to the third party disposal) or notionally only (by election between the companies concerned).

A UK resident parent company is able to claim group relief for income losses of a non-UK subsidiary which is resident in the EEA or which has incurred the relevant losses in a PE within the EEA, provided that all possibilities of non-UK relief for the losses have been exhausted and future relief is unavailable. The EC has referred the United Kingdom to the European Court of Justice (ECJ) over this 'all possibilities' test and the fact that it must be met immediately after the end of the accounting period in which the loss arises, together with the fact that this extension of loss relief only applies to losses incurred after 1 April 2006.

In addition, the corporation tax system also has a number of measures that seek to prohibit groups unfairly manipulating the tax system by shifting profits between group members (either internationally or within the United Kingdom) in a way that is considered unacceptable.

A debt cap applicable to accounting periods beginning on or after 1 January 2010 limits the aggregated UK tax deductions group members may claim for finance costs to the level of a group's external finance expense.

VAT

Group companies can, subject to certain requirements, elect to account for VAT as if they were one taxable person; where this is done, no VAT is charged on intra-group supplies of goods or services. The registration is made in the name of the representative member, who is responsible for completing and rendering the single return on behalf of the group. All the companies are jointly and severally liable for any VAT debts. VAT grouping is subject to detailed anti-avoidance provisions.

Stamp duty and stamp duty land tax

Transfers of assets within worldwide 75% groups are generally exempt from stamp duty and stamp duty land tax. For stamp duty land tax, the relief can be retrospectively withdrawn in certain circumstances, primarily where the transferee leaves the group within three years of the transfer.

Transfer pricing and thin capitalisation

The United Kingdom has widely drafted transfer pricing rules that are intended to apply to almost any kind of transaction made or imposed between related parties that gives rise to:

- a provision that differs from one that would have been made between third parties and

- a UK tax advantage (potential or actual) to one or more of the parties.

These rules apply to UK-to-UK transactions as well as cross-border transactions.

The regime therefore applies not only to the provision of products and services but also to finance arrangements, including both the rate of return charged and the amount of loan principle (or equivalent) made available. It is therefore the mechanism by which the UK's revenue authorities address the issue of thin capitalisation. Unlike many other territories, the United Kingdom does not operate any 'safe harbours' of any kind in relation to the amount of debt or interest (or equivalents) it considers demonstrates that a UK company or group is not thinly capitalised. Note that the United Kingdom also has a debt cap regime which limits the amount of finance expense for which a UK tax deduction will be available by reference to the worldwide group's external finance expense.

Parties are considered related for this purpose where either one controls the other or both are under common control. Control here is not confined to situations in which one party is the majority shareholder in the other. Effectively, control exists where one party has the power to ensure that the affairs of another party are conducted in accordance with the first party's wishes. The concept is also subject to two important extensions:

- The rules apply to many joint venture companies where two parties each have an interest of at least 40%.
- There are attribution rules to trace control relationships through a number of levels in determining whether parties are controlled for the purposes of the transfer pricing rules.

In addition, the regime restricts interest deductions to an arm's-length basis where a financier and persons who collectively control a company or a partnership have 'acted together' in relation to the financing arrangements of that company or partnership. The financier (usually a bank) can then be taken as controlling the company or partnership, and the loan becomes subject to transfer pricing limitations.

There are a number of exemptions which essentially exclude small or medium-sized enterprises (SMEs) and dormant companies from the regime.

The effect of the rules is to require an arm's-length provision to be substituted for the actual one, thereby increasing the party's UK tax liability and cancelling out the UK tax advantage that would otherwise have arisen.

Where both parties to the transaction are UK taxpayers, the disadvantaged party will generally be entitled to claim a compensating adjustment (except where the transaction falls within the transfer pricing regime because of the 'acting together' provisions), but only after the UK adjustment has been made. The legislation also provides that parties may make balancing payments to each other in such circumstances, of any amount up to the transfer pricing adjustment, which will neither be taxable for the recipient nor tax deductible for the payer.

Where the disadvantaged party is outside the UK tax net, they can pursue a claim for relief under the relevant double tax agreement, if that provides a mechanism for such relief; where the adjustment in the United Kingdom is to reduce a deduction for an amount paid under deduction of UK tax, the compensating adjustment rules should allow the overseas party to reclaim any WHT paid on the disallowed amount.

United Kingdom

UK taxpayers are required to self assess their compliance with this arm's-length principle. Companies and partnerships must therefore identify and make transfer pricing adjustments when submitting their tax returns. This is the case even where the disadvantaged party would be entitled to claim a compensating adjustment equal to the transfer pricing adjustment. An important implication of this approach is the potential for interest and penalties if the adjustment made is subsequently held to be wrong.

Controlled foreign companies (CFCs)

Under the CFC regime, a UK resident company may be taxed on a proportion of the undistributed profits of certain UK-controlled non-resident companies in which the resident company has an interest.

No liability arises where one of a number of tests (e.g. the 'exempt activities' test) can be satisfied. An 'acceptable distribution' exemption was withdrawn in 2009 when the rules regarding the taxation of dividends were changed.

As a result of a ECJ decision that the EC Treaty allows intra-EU CFC charges only where the arrangements are 'wholly artificial', an additional exemption (not written into the statute) is available to those CFCs that are actually established in an EEA state and carry on genuine economic activity there.

The government is currently consulting on a radical overhaul of the CFC regime. Some interim changes were made in Finance Act 2011, with more major reform under consultation for 2012, *as noted in the Significant developments section*.

Tax credits and incentives

Foreign tax credit

The United Kingdom has an extensive network of DTTs. Unilateral relief is generally available, in any event, to credit overseas tax paid on non-UK source profits against the UK tax on the same profits; while the relevant treaty might sometimes extend that relief, their main function for UK companies is to limit overseas WHTs that would otherwise be payable on passive income.

The United Kingdom has a complex regime allowing 'underlying' tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved (at least in part) where dividends flow to the United Kingdom via a chain of companies. This exemption is of limited application since 2009 because most foreign dividends are now exempt from tax.

Enhanced capital allowances

A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances, *see Depreciation and amortisation in the Taxable income determination section*). Some of these incentives are given by reference to the expenditure concerned and others by reference to the size of the company incurring that expenditure.

For example, a full write-off can be claimed in the year of expenditure on a range of 'green' products and technologies. The list of items supported in this way is reviewed annually. It currently consists of the following: designated energy saving equipment; designated environmentally beneficial plant and machinery; cars with low emissions; plant or machinery relating to gas stations for refuelling vehicles with natural gas or hydrogen fuel incurred prior to 31 March 2013; and conversion or renovation

of business premises in designated disadvantaged areas of the UK for expenditure incurred up to 11 April 2012.

Annual investment allowance

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 100,000 per year of most qualifying expenditure but reducing to GBP 25,000 from April 2012. This is restricted to a single allowance for groups of companies or associated businesses.

R&D incentives

A deduction currently equal to 130% of the qualifying expenditure on R&D can also be claimed by large companies. For small and medium companies, as defined, a deduction equal to 225% (from April 2012, previously 200%) of the qualifying expenditure on R&D is given in the year in which it is incurred, which can be surrendered for a cash payment (at a rate of GBP 24.75 for each GBP 100 of qualifying R&D spend) by companies that are trading at a loss or have not yet started to trade.

Other incentives

A deduction equal to 150% of the qualifying expenditure on the remediation of contaminated or derelict land is given in the year incurred, which can be surrendered for a cash payment (at a rate of GBP 16 for each GBP 100 of qualifying land remediation spend) by companies that are trading at a loss. This relief is likely to be abolished during 2012.

There are special tax reliefs available for certain expenditure on UK film production.

There are no tax holidays and no foreign investment incentives in the United Kingdom.

Withholding taxes

Under UK domestic law, a company may have a duty to withhold tax in relation to the payment of either interest or royalties (or other sums paid for the use of a patent). The circumstances in which such a liability arises are discussed below.

There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable DTT.

Please note, however, that this is not an exhaustive list of all the deductions that might be required to be made in respect of UK tax from payments made to or by companies. In particular, non-resident companies that are subject to UK income tax on UK-source rental profits (*see the Taxes on corporate income section for more information*) will find their letting agent or tenants are obliged to withhold the appropriate tax at source (currently 20% without any allowances) from their rental payments unless the recipient has first applied and been given permission to receive gross rents under the Non-Resident Landlord Scheme. Two other important examples are the UK's deduction at source regime for entertainers and sportsmen, and the scheme under which payments to unregistered subcontractors working on big building projects may need to have tax deducted at source.

Interest WHT

As a general rule, UK domestic law requires companies making payments of interest to withhold tax at 20%. However, there are a number of exceptions to this general rule. The key exclusions are:

United Kingdom

- Payments of interest by UK resident companies if the beneficial owner of the interest is also a UK resident company, or a UK PE, provided the interest concerned will be taxed in the United Kingdom as part of the PE's trading profits.
- Payments of interest on a quoted Eurobond.
- Payments of interest that qualify for exemption under the EU Interest and Royalties Directive.
- Payments of interest paid to or by a UK bank (or a UK branch of a foreign bank).
- Payments of 'short' interest. This is, broadly speaking, interest on loans that will not be in place for more than a year. However, the definition can be contentious, and detailed advice should be taken on this if intending to utilise this exemption.
- Payments of interest that do not 'arise' in the United Kingdom. Whether a payment constitutes UK-source interest is a complex issue, and specialist advice needs to be taken if seeking to use this exception.

If none of these exceptions apply, a payment of interest must be made after the deduction of WHT unless (or until) HMRC has given authorisation that the payment may be made gross (or with a reduced rate of WHT) because of the applicability of treaty relief for the recipient.

Royalties WHT

UK domestic law requires companies making payments of patent, copyright, and design royalties that arise in the United Kingdom to deduct WHT at 20%. In addition, there is also the possibility that other royalties that arise in the United Kingdom may also be subject to the same rate of WHT if they constitute 'qualifying annual payments', so specialist advice will be needed to clarify this. However, certain types of royalties, such as film royalties and equipment royalties, will generally not be subject to UK WHT.

Unlike the rule regarding interest, a company may make a royalty payment gross of WHT (or subject to a reduced rate of WHT under a treaty) without prior clearance having been given by HMRC if they reasonably believe at the time the payment is made that the payee is entitled to relief under the treaty. However, if that belief is later found to be incorrect, HMRC may direct that the payment must be made net of WHT, with the WHT paid to HMRC, and the payer may be subject to interest and penalties in respect of the WHT that should have been withheld (even if their belief was reasonable).

Double taxation treaties (DTTs)

The table below sets out the rates of WHT applicable to payments of dividends, interest, and royalties under UK domestic law where such a liability arises and the reduced rates that may be available under an applicable DTT.

Notes

- A tax credit is available to UK resident individual shareholders on dividends received, as described above. Some DTTs allow a half or full tax credit (less, normally, a 5% to 15% notional WHT) also to non-resident individuals and usually to corporate portfolio investors. Treaties that allow a payable credit are indicated by an asterisk (*). However, since 6 April 1999, the credit has been reduced from one quarter to one ninth, which has the result that, unless note 14 below applies, the tax credit indicated by the asterisk is now in effect useless, since it is wholly eliminated by the (usually 15%) WHT allowed by the treaty.
- WHT applies only to 'annual interest' (i.e. excluding interest on certain short-term loans). Banks and similar financial institutions are also normally able to pay annual interest to non-UK residents free of WHT. In addition, most of the UK treaties provide for a zero-rate of withholding on interest paid to governmental and quasi-governmental lenders. Such exemptions are not separately indicated in the table below.
- Some types of royalties are not subject to UK WHT, including film royalties and equipment royalties. Treaty provisions specifically relating to these are therefore not mentioned here.
- From 6 April 2001, payments to any UK resident company (not just banks, as before) can be made free of WHT if the recipient is chargeable to tax on the interest or royalty. Discussions continue as to whether this provision will be extended to recipients who are exempt from UK tax on the interest or royalty.
- Where a reduced rate of withholding is allowed by any treaty, whether on interest or royalties, it is usual for this reduced rate to be stated not to apply to amounts which are in excess of a normal commercial rate of interest/royalty, or where the interest/royalty is effectively connected to a PE in the United Kingdom of the recipient or where the debt/license was created primarily to obtain the advantage of the treaty; such general limitations are not specifically indicated in the table below.
- Zero-rate on certain loans.

United Kingdom

7. Treaty rate not applicable to certain loans held by tax-exempt holders and resold within three months of acquisition.
8. Lower rates, primarily of 3% on use of news, 5% on copyright royalties other than films and TV, and 10% on certain intellectual property, will in practice apply in almost all cases.
9. No repayable tax credit for companies.
10. A 5% rate on literary/artistic copyright royalties.
11. A 7.5% rate on interest paid to banks and other financial institutions.
12. The United Kingdom announced that the old UK/USSR treaty ceased to apply to certain former Soviet Republics on 5 April 2002 (such that from that date there was no treaty in force with any of those countries), whilst it continued to apply to others until new treaties were concluded. Treaties have subsequently been signed with a number of these states such that the old UK/USSR treaty currently only continues to apply to Tajikistan, Turkmenistan, and Belarus (the last of which concluded a new treaty with the United Kingdom in 1995 which is not yet in force). The only remaining states without a treaty in force with the United Kingdom post 5 April 2002 are Armenia and Kyrgyzstan. Moldova signed a new treaty with the United Kingdom on 8 November 2007 which took effect in the United Kingdom from 6 April 2009.
13. Zero-rate on literary/artistic or scientific copyright royalties, excluding payments in respect of cinematograph films and films or tapes for radio or TV broadcasting.
14. The United Kingdom's treaty with the former Yugoslavia is regarded as still in force between the United Kingdom and Croatia, Montenegro, Serbia, and Bosnia-Herzegovina. Macedonia signed a new treaty with the United Kingdom on 8 November 2006, which took effect for UK WHT purposes on 1 January 2008. A new treaty with Slovenia was signed on 13 November 2007 and came into effect in the United Kingdom in April 2009.
15. The independent states of the Czech Republic and the Slovak Republic have confirmed that they will honour the treaty between the United Kingdom and the former Czechoslovakia.
16. The 10% rate applies to royalties for use of industrial, commercial, or scientific equipment or experience as well as royalties in respect of patent, trademarks, and know-how. Zero-rate on all other royalties.
17. A rate of 10% on certain bank loans.
18. A rate of 10% in certain cases.
19. A rate of 15% on film and TV royalties.
20. A rate of 5% on royalties for use of industrial, commercial, or scientific equipment.
21. Zero-rate on government and local authority loans. The rate is 5% where the beneficial owner is a bank or insurance company or the interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market. The rate is 10% where the beneficial owner is not a bank or insurance company but the interest is paid by a bank or by the purchaser of machinery and equipment to a person who sold that equipment on credit.
22. A rate of 7% on interest paid to banks.
23. A rate of 10% on interest on bonds issued to the public.
24. A rate of 15% on royalties on films, TV, and radio broadcasting.
25. A rate of 10% on copyright royalties.
26. A rate of 10% on interest paid to banks and other financial institutions.
27. A rate of 5% on literary/artistic/scientific copyright royalties.
28. Full relief for copyright royalties.
29. Lower rate may be substituted to match any lower rate agreed in a treaty between Uzbekistan and a third OECD country.
30. A rate of 10% for royalties on industrial, commercial, or scientific equipment.
31. Zero-rate on certain government loans.
32. A rate of 2% for royalties on industrial, commercial, or scientific equipment.
33. Zero-rate on literary/artistic copyright royalties, patent royalties, and royalties for use of industrial, commercial, or scientific know-how and computer software.
34. The new treaty effective for UK income tax (and therefore WHT) from 6 April 2007 reduced WHT on both interest and royalties to the rates shown in the table. Prior to this, the rate of WHT on interest and royalties was 15% in both cases (subject, in the case of interest, to note 7).
35. A rate of 5% on royalties for the use of a patent, etc. concerning industrial, commercial, or scientific experience.
36. A rate of 10% can be withheld if the recipient of the royalties controls more than 50% of the voting power of the payer.
37. A rate of 15% can be withheld on royalties in respect of cinematograph or television films.
38. A rate of 5% can be withheld on royalties in respect of cinematograph or television films.
39. Full relief is available for literary, artistic, or scientific copyright (excluding royalties on cinematograph films and films or tapes for TV or radio broadcasting). No relief is available for amounts paid in respect of the extraction or removal of natural resources.
40. A new treaty with Poland was signed on 20 July 2006 and entered into force on 27 December 2006. It took effect in respect of UK withholding taxes from 1 January 2007, changing the rates to those shown in the table above. The rates were previously zero in respect of interest and 10% in respect of royalties.
41. HMRC continues discussions on new or revised treaties with Australia, Croatia, Israel, New Zealand, Spain, and Thailand.
42. Relief may be restricted to 15% in certain circumstances.

43. New tax treaties/protocols have been signed but have not yet entered into force. These agreements will enter into force once both countries have completed the required Parliamentary procedures and exchange of diplomatic notes and will take effect on the dates set out therein.
44. Treaty effective in the United Kingdom for WHT purposes from 6 April 2009.
45. The first tax treaty between the United Kingdom and Libya entered into force on 8 March 2010 and has effect in the United Kingdom for WHT purposes from 6 April 2010.
46. The first tax treaty between the United Kingdom and Hong Kong entered into force on 8 March 2010 and has effect in the United Kingdom for WHT purposes from 6 April 2011.
47. Provided one of several conditions is specified, one of which is that the recipient is quoted, another being that HMRC accepts that the interest is not paid in connection with tax avoidance (broadly).
48. In force February 2012, with varying implementation dates.
49. Effective January 2012.
50. Reduces to 0% under treaty of May 2012 when it is fully in force on completion of Parliamentary procedures.

Tax administration

Taxable period

Companies are assessed by reference to accounting periods. Normally, the accounting period is the period for which the company makes up its accounts. However, an accounting period for corporation tax purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one corporation tax return.

Tax returns

Companies must file their statutory accounts and tax return within one year from the end of the accounting period; the return must include a self-assessment of the tax payable, eliminating the need for assessment by HMRC (though HMRC retains assessing powers for certain cases where it is not satisfied with the return, or where the company fails to make a return).

Payment of tax

For smaller companies, corporation tax is payable nine months after the end of the accounting period to which it relates (i.e. before the return must be filed). For larger companies and groups, a system of quarterly payments on account (based on estimated profits) is in place, with the first payment being due in the seventh month of the accounting period concerned. A company will generally be considered large for this purpose in any accounting period in which it has taxable profits in excess of GBP 1.5 million (that limit being reduced by reference to the number of companies under common control, where relevant).

Electronic filing requirements

Requirements to file online and pay electronically are being phased in for corporation tax from 2011. As of 1 April 2011, returns for accounting periods ending after 31 March 2010 must be filed online, and such returns must be filed in a specified format which is machine readable by the tax authorities.

Other filing requirements

Large companies (those with turnover greater than GBP 200 million or balance sheet assets over GBP 2 billion) are required to notify HMRC of the identity of their senior accounting officer, who must certify annually that the accounting systems are adequate for the purposes of accurate tax reporting. Penalties are chargeable on the officer and the company for careless or deliberate failure to meet these obligations.

Certain tax planning and structuring transactions and arrangements must be disclosed to HMRC either before or on implementation of the transaction under the Disclosure

United Kingdom

of Tax Avoidance Schemes (DOTAS) regime. This scheme covers most taxes and is a reporting system only, with responsibility placed on taxpayers and advisors to report. HMRC are not required to respond to the reporting, and this is not an advance clearance or approval process. It is a reporting mechanism only, and, on occasions, new legislation has been introduced to block specific arrangements reported.

Statute of limitations

For companies which are members of medium or large groups, there is generally a period of one year after the statutory filing dates for the tax authorities to start an enquiry into any aspect of the return. For other companies, enquiries can be started up to 12 months after the date of actual filing. These periods are extended for returns submitted after the filing deadline, that are amended by the taxpayer, or where an issue is subsequently discovered that was not sufficiently disclosed within the standard period.

Penalties

The UK tax system can impose numerous penalties for failing to adhere to the self-assessment system. These include penalties for late filing of returns, failing to maintain appropriate records, submitting an incorrect return, making errors in certain documents sent to HMRC, unreasonably failing to report errors in assessments by HMRC, and failing to respond to a notice of enquiry from the tax authorities within the specified time limit.

Other issues

Adoption of IFRS

IFRS is mandatory for the consolidated financial statements of listed UK companies.

All companies continue to have the choice of adopting IFRS or remaining on UK GAAP for their non-consolidated (solus) accounts. Many groups therefore continue to apply UK GAAP in their solus accounts.

The UK Accounting Standards Board (ASB) is proposing a new three-tier system of reporting. It is proposed that all publicly accountable UK registered companies will have to report under IFRS (as endorsed by the EU) in accounting periods beginning on or after 1 January 2014. In addition, UK registered SMEs (broadly entities that do not have public accountability and publish general purpose financial statements for external users) must apply the Financial Reporting Standard for Medium-Sized Entities (the 'FRSME' based on a simplified IFRS) from the same date. Finally, the Financial Reporting Standard for Smaller Entities (FRSSE) will still be an option for small companies or small groups as defined by the Companies Act 2006. However, the options available to a company are subject to the requirements of the UK Company Law framework for consistency of GAAP within a group.

In our experience, many large groups are considering early adoption of EU-endorsed IFRS. However, under current UK law, early adoption of the FRSME or FRSSE is not possible.

UK tax legislation

Announcements of proposed new legislation generally occur at least once a year. The main announcement is made on Budget Day (generally in March), when tax rates are set for the coming year. Other announcements can be made at other times and, subject to becoming approved and adopted law, can apply from a specified date. The new

United Kingdom

legislation is then included in an annual Finance Act, which is normally finalised in July. Much of the legislation introduced in recent years has been due to challenges under the EC treaty, or as a result of the tax planning being notified under the UK's tax avoidance disclosure regulations. In years of a general election (such as 2010), there may be additional Budget Days and Finance Acts.

UK tax law is periodically consolidated. Until recently, the latest consolidation Act dated from 1988, which covered both income tax and corporation tax. Over the last few years, income tax and corporation tax legislation has been consolidated separately, and currently the latter is to be found in the Corporation Tax Acts 2009 and 2010, and the Taxation (International and Other Provisions) Act 2010.

Significant developments

Numerous temporary tax provisions expired at the end of 2011. The fate of these provisions is unclear. The general business incentives that have expired include the following provisions:

- 100% bonus depreciation.
- Increased Section 179 expensing limit of 500,000 United States dollars (USD) with USD 2 million phaseout threshold and expanded definition of Section 179 property (see the *Deductions* section for a description of the Section 179 deduction).
- Research credit.
- Subpart F exception for active financing income (see the *Income determination* section for a description of Subpart F income).
- Look-through treatment of payments between related controlled foreign companies (CFCs) under the foreign personal holding company rules.
- 15-year straight-line cost recovery for qualified leasehold improvements, restaurant buildings and improvements, and retail improvements.
- Seven-year recovery period for motor sports entertainment complexes.
- Work opportunity tax credit.
- Wage credit for employers of active-duty military members.
- Railroad track maintenance credit.
- Special expensing rules for qualified film and television productions.
- Expensing of qualified brownfield decontamination costs.
- Mine rescue team training credit.
- Expensing of advanced mine safety equipment.
- Treatment of some dividends of regulated investment companies.
- Special rule for regulated investment company (RIC) stock held in estates of non-resident noncitizens.
- RICs considered qualified investment entities under the 1980 Foreign Investment in Real Property Tax Act.
- Special rules for qualified small business stock.
- Reduction in S corporation recognition period for built-in gains tax (see the *Taxes on corporate income* section for a description of S corporations).

Taxes on corporate income

In the United States (US), resident corporations are taxed based on worldwide income. Generally, a foreign corporation engaged in a US trade or business is taxed at regular US corporate tax rates on income from US sources that is effectively connected with that business and at 30% on US-source income not effectively connected with that business.

The US corporate income tax (CIT) rate is based on a progressive rate schedule; however, an alternative minimum tax (AMT) provides for a flat rate with fewer deductions.

2012 taxable income				CIT	
OVER (USD)	But not over (USD)	Pay + (USD)	% on excess	of the amount over (USD)	
0	50,000	0	15	0	
50,000	75,000	7,500	25	50,000	
75,000	100,000	13,750	34	75,000	
100,000	335,000	22,250	39	100,000	
335,000	10,000,000	113,900	34	335,000	
10,000,000	15,000,000	3,400,000	35	10,000,000	
15,000,000	18,333,333	5,150,000	38	15,000,000	
18,333,333			35	0	

The 39% tax rate applies to taxable income between USD 100,000 and USD 335,000 to eliminate the benefit of the 15% and 25% rates, and the 38% tax rate applies to taxable income between USD 15,000,000 and USD 18,333,333 to eliminate the benefit of the 34% rate. Special rules apply to personal service corporations and personal holding companies.

Alternative minimum tax (AMT)

An AMT is imposed on corporations other than S corporations (*see below*) and small C corporations (generally those with no three year average annual gross receipts exceeding USD 7.5 million). The tax is 20% of alternative minimum taxable income (AMTI) in excess of a USD 40,000 exemption amount (subject to a phase out). AMTI is computed by adjusting the corporation's regular taxable income by specified adjustments and 'tax preference' items. Tax preference or adjustment items could arise, for example, if a corporation has substantial accelerated depreciation, percentage depletion, intangible drilling costs, or non-taxable income.

S corporations

Corporations with 100 or fewer shareholders, none of whom may be corporations, that meet certain other requirements may elect to be taxed under Subchapter S of the Internal Revenue Code (IRC or 'the Code') and are thus known as S corporations. S corporations are taxed in a manner similar, but not identical, to partnerships (i.e. all tax items [e.g. income, deductions] flow through to the owners of the entity). Thus, S corporations generally are not subject to US federal income tax.

Gross transportation income taxes

Foreign corporations and non-resident alien individuals are subject to a yearly 4% tax on their US-source gross transportation income (USSGTI) that is not effectively connected with a US trade or business. Transportation income is any income derived from, or in connection with, (i) the use (or hiring or leasing) of any vessel or aircraft, or (ii) the performance of services directly related to the use of any vessel or aircraft.

Local income taxes

CIT rates vary from state to state and generally range from 1% to 12% (although some states impose no income tax). The most common taxable base is federal taxable income, which is modified by state provisions and generally is allocated to a state on the basis of a three factor formula: tangible assets and rental expense, sales and other receipts,

United States

and payroll. State and municipal taxes are deductible expenses for federal income tax purposes.

Corporate residence

A corporation organised or created in the United States under the law of the United States or of any state is a domestic corporation. A domestic corporation is a resident corporation even though it does no business or owns no property in the United States.

Permanent establishment (PE)

A PE generally is defined as a fixed place of business.

Other taxes

Sales taxes

No provisions exist for a sales tax or value-added tax (VAT) at the federal level. However, sales and use taxes constitute a major revenue source for the 45 states that impose such taxes and the District of Columbia. Sales and use tax rates vary from state to state and generally range from 2.9% to 7.25% at the state level. Most states also allow a 'local option' that permits local jurisdictions such as cities and counties to impose an additional percentage on top of the state-level tax and to keep the related revenues.

In general, a sales tax is a tax applied to the retail sale of tangible personal property and certain services. Although the form of the tax may vary, it is usually imposed either directly upon the retail sale of the taxable item, on the gross receipts from the sales of taxable items, or on the person engaged in the business of making retail sales of taxable items. The use tax complements the sales tax and is usually assessed on purchases made out of state and brought into the jurisdiction for use, storage, or consumption. Typically, either a sales tax or a use tax can be assessed on a transaction, but not both.

Customs duties and import tariffs

All goods imported into the United States are subject to entry and are dutiable or duty-free in accordance with their classification under the applicable items in the Harmonized Tariff Schedule of the United States. The classification also identifies eligibility for special programs and free trade agreement preferential duty rates.

When goods are dutiable, *ad valorem*, specific, or compound duty rates may be assessed. An *ad valorem* rate, which is the type of rate most often applied, is a percentage of the value of the merchandise, such as 7% *ad valorem*. A specific rate is a specified amount per unit of weight or other quantity, such as 6.8 cents per dozen. A compound rate is a combination of both an *ad valorem* rate and a specific rate, such as 0.8 cents per kilo plus 8% *ad valorem*. Customs requires that the value of the goods be properly declared regardless of the dutiable status of the merchandise.

Liability for the payment of duty becomes fixed at the time an entry is filed with US Customs and Border Protection (CBP). The obligation for payment is upon the person or firm in whose name the entry is filed, the importer of record.

Excise taxes

Excise taxes are generally imposed by the federal and state governments on a wide range of goods and activities, including gasoline and diesel fuel used for transportation, air travel, manufacturing of specified goods, and indoor tanning services.

The excise tax rates are as varied as the goods and activities upon which they are levied. For example, the excise imposed on indoor tanning services is 10% of the amount paid for the services while the excise imposed on the sale of coal mined in the United States is the lower of USD 1.10 per ton or 4.4% of the sale price.

Property taxes

Most states, and some cities, impose a variety of property taxes on both real and personal property.

Stamp taxes

No provisions exist for a stamp tax at the federal level. However, state and local governments frequently impose stamp taxes at the time of officially recording a transaction based upon the value of real estate. The sales tax on real estate may be a stamp tax on the documents recording the transfer of the real estate.

Capital gain taxes

On current transactions, the long-term capital gains tax rate is the same as the tax rates applicable to ordinary income. Thus, the maximum rate is 35%, excluding the additional phase out rates. However, differences may arise where AMT is imposed.

Accumulated earnings tax

Corporations (other than S corporations, domestic and foreign personal holding companies, corporations exempt from tax under Subchapter F of the Code, and passive foreign investment companies) accumulating earnings and profits for the purpose of avoiding shareholder personal income tax are subject to a penalty tax in addition to any other tax that may be applicable. The accumulated earnings tax is equal to 15% of 'accumulated taxable income'. Generally, accumulated taxable income is the excess of taxable income with certain adjustments, including a deduction for regular income taxes, over the dividends paid deduction and the accumulated earnings credit. Note that a corporation can justify the accumulation of income, and avoid tax, based on its reasonable business needs.

Personal holding company tax

US corporations and certain foreign corporations that receive substantial 'passive income' and are 'closely held' may be subject to personal holding company tax. The personal holding company tax is 15% of undistributed personal holding company income and is levied in addition to the regular tax.

Payroll taxes

Employers are subject to federal unemployment insurance tax (FUTA) of 6.2% on the first USD 7,000 of wages paid to employees meeting certain criteria. In addition, states impose workers' compensation insurance tax at varying rates depending on state law and the nature of employees' activities. For 2012, employers also are subject to social security contributions tax of 7.65% (including 1.45% Medicare tax) on the first USD 110,100 (up from USD 106,800 for 2011) of wages paid to employees and 1.45% of Medicare tax on any wages in excess of USD 110,100 (up from USD 106,800 for 2011).

Environmental tax

Importers, manufacturers, and sellers of petroleum or other ozone-depleting chemicals (ODC) are subject to an environmental tax calculated per weight of the ODC used in the manufacture of the product. The tax is determined under an exact or table method provided in the instructions to Form 6667. If the weight cannot be determined, the tax is 1% of the entry value of the product.

United States

Other state and municipal taxes

Other taxes that states may impose, in lieu of or in addition to taxes based on income, include franchise taxes and taxes on the capital of a corporation. State and municipal taxes are deductible expenses for federal income tax purposes.

Branch income

Tax rates on branch profits are the same as on corporate profits. The law also imposes a 30% branch profits tax in addition to US corporate level income taxes on a foreign corporation's US branch earnings and profits for the year that are effectively connected with a US business. The taxable base for the branch profits tax is increased (decreased) by any decrease (increase) in the US net equity of the branch. The branch profits tax on profits may be reduced or eliminated entirely if a relevant treaty so provides (subject to strict 'treaty shopping' rules). The purpose of the branch profits tax is to treat US operations of foreign corporations in much the same manner as US corporations owned by foreign persons.

With certain exceptions, a 30% (or lower treaty rate) branch profits tax also will be imposed on interest payments by the US branch to foreign lenders. In addition, the tax will apply if the amount of interest deducted by the branch on its US tax return exceeds the amount of interest actually paid during the year.

Income determination

Inventory valuation

Inventories generally are stated at the lower of cost or market on a first in first out (FIFO) basis. Last in first out (LIFO) may be elected for tax purposes on a cost basis only and generally requires book and tax conformity.

The tax law requires capitalisation for tax purposes of several costs allocable to the manufacturing process that frequently are expensed as current operating costs for financial reporting (e.g. the excess of tax depreciation over financial statement depreciation).

Capital gains

Gains or losses on the sale or exchange of capital assets held for more than 12 months are treated as long-term capital gains or losses. Gains or losses on the sale or exchange of capital assets held for 12 months or less are treated as short-term capital gains or losses. The excess of net long-term capital gain over net short-term capital loss is considered net capital gain. Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a taxable year may be carried back three years and carried forward five years to be used against (offset) capital gains.

For dispositions of personal property and certain non-residential real property used in a trade or business, net gains are first taxable as ordinary income to the extent of the depreciation/cost recovery, with any remainder generally treated as capital gain. For other trade or business real property, net gains generally are taxed as ordinary income to the extent that the depreciation or cost recovery claimed exceeds the straight-line amount, with any remainder treated as capital gain.

An exception to capital gain treatment exists to the extent that losses on business assets were recognised in prior years. A net loss from the sale of business assets is treated as an

ordinary loss. Future gains, however, will be treated as ordinary income to the extent of such losses recognised in the five immediately preceding years.

Dividend income

A US corporation generally may deduct 70% of dividends received from other US corporations in determining taxable income. The dividends received deduction is increased from 70% to 80% if the recipient of the dividend distribution owns at least 20% but less than 80% of the distributing corporation. Generally, dividend payments between US corporations that are members of the same affiliated group (*see the Group taxation section*) are deferred or eliminated until a transaction with a third party occurs. With minor exceptions, a US corporation may not deduct dividends it receives from a foreign corporation.

Stock dividends

A US corporation can distribute a tax-free dividend of common stock proportionately to all common stock shareholders. If the right to elect cash is given, all distributions to all shareholders are taxable as dividend income whether cash or stock is taken. There are exceptions to these rules, and extreme caution must be observed before making such distributions.

Interest income

Interest income is generally includible in the determination of taxable income.

Rental income

Rental income is generally includible in the determination of taxable income.

Royalty income

Royalty income is generally includible in the determination of taxable income.

Partnership income

The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income.

Foreign income (Subpart F income) of US taxpayers

Generally, a US corporation is taxed on its worldwide income, including foreign branch income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credits. Alternatively, a deduction may be claimed for actual foreign taxes that are paid. In the case of foreign subsidiaries that are more than 50% owned (by vote or value) by US shareholders (commonly known as controlled foreign companies or CFCs), certain types of undistributed income will be taxed currently to the US shareholders (Subpart F income). Generally, Subpart F income includes income that is easily transferred to a low-tax jurisdiction.

Income from certain passive foreign investment companies (where 75% or more of the income is passive or at least 50% of the assets held produce passive income) also is subject to current taxation. Current taxation occurs if the corporation elects to be a qualified electing fund (QEF) or there are actual distributions. If a QEF election is not made and the corporation makes an actual distribution, the distribution will be treated as an excess distribution to the extent it exceeds 125% of the average of the distributions made with respect to the stock over the three immediately preceding years. The excess distribution is spread over the taxpayer's holding period, and the amount allocated to each year in the holding period is subject to tax at the highest marginal tax rate in effect for that year. This deferred tax amount also is subject to an interest charge. The interest

United States

charge is designed to pay the benefit of the tax deferral that arises out of having an overseas investment that pays no US income taxes.

Deductions

Depreciation and amortisation

Depreciation deductions are allowances that may be taken for capital outlays for tangible property. For property placed in service after 1986, capital costs must be recovered by using the modified accelerated cost recovery system (MACRS) method. Depending on the type of tangible property, the general cost recovery periods are three, five, seven, ten, 15, 20, 27.5, and 39 years (31.5 years for property placed in service before 13 May 1993). The cost recovery methods and periods are the same for both new and used property. Most tangible personal property is in the three, five, or seven year class. Property placed in the three, five, seven, or ten year class is depreciated by first applying the 200% declining-balance method and then switching to the straight-line method at such a time as when use of the straight-line method maximises the depreciation deduction. Property in the 15 or 20 year class is depreciated by using the 150% declining-balance method and later switching to the straight-line method. An election may be made to use the alternative depreciation system (basically, the straight-line method over prescribed lives). Residential rental property generally is depreciated by the straight-line method over 27.5 years. Non-residential real property is depreciated by the straight-line method over 39 years (31.5 years for property placed in service before 13 May 1993).

An election to use the straight-line method over the regular recovery period or a longer recovery period also is available. Alternatively, taxpayers may elect to use the 150% declining-balance method over the regular recovery period for all property other than real property. This method is required for AMT purposes.

For most tangible personal and real property placed in service in the United States after 1980 but before 1 January 1987, capital costs were recovered using the accelerated cost recovery system (ACRS), which applied accelerated methods of cost recovery over periods specified by statute. The general ACRS recovery periods were three, five, ten, 15, 18, and 19 years.

Special rules apply to automobiles and certain other 'listed' property. Accelerated depreciation deductions can be claimed only if the automobile is used 50% or more for qualified business use as defined in related regulations. Further, for automobiles placed in service after 1986, the allowable yearly depreciation deduction cannot exceed specific dollar limitations.

Separate methods and periods of cost recovery are specified by statute for certain tangible personal and real property used outside the United States.

Rapid amortisation may be allowable for certain pollution control facilities.

Tax depreciation is not required to conform to book depreciation. Tax depreciation generally is subject to recapture on the sale or disposition of certain property, to the extent of gain, which is subject to tax as ordinary income.

The cost of most intangibles assets is generally capitalised and amortisable rateably over 15 years.

Section 179 deduction

Corporations can elect to expense, up to a statutory amount per year, the cost of certain eligible property used in the active conduct of a trade or business. This is commonly referred to as the Section 179 deduction. As of 2011, the maximum annual expensing amount is USD 25,000. The maximum deduction amount is reduced dollar for dollar where the corporation places in service during the tax year qualified tangible personal property in excess of USD 200,000 for tax years that begin in 2011.

In addition, the deduction under this election is limited to the taxable income of the business. The annual expensing limit is increased by an additional USD 35,000 for qualifying assets placed in service in certain distressed communities. The annual expensing limit also is increased for certain property placed in service in the Gulf Opportunity Zone or Kansas disaster area.

Bonus depreciation

A 50% special first year depreciation allowance (i.e. bonus depreciation) applies (unless an election out is made) for new MACRS property with a recovery period of 20 years or less, certain computer software, water utility property, and certain leasehold improvements acquired after 31 December 2007 and before 1 January 2010. The special allowance applies for regular income tax and AMT purposes. No AMT adjustment is made if the special allowance is used. The property must be placed in service before 2010 (before 2011 for certain longer lived property). The special allowance does not apply to property that must be depreciated using the alternative depreciation system or to 'listed property' not used predominantly for business. The special allowance reduces basis before regular depreciation is figured. Additionally, claiming bonus depreciation on automobiles may affect the first year depreciation limits on such automobiles.

The 'Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010', signed into law on 17 December 2010, extends bonus depreciation and temporarily increases the available deduction. Bonus depreciation, which provides an additional first-year depreciation deduction equal to 50% of the cost of qualifying property, is extended through 31 December 2012 (31 December 2013 for long-production period property [LPPP] and certain aircraft). This provision was set to expire on 31 December 2010 (31 December 2011 for LPPP and certain aircraft) as extended by the Small Business Jobs Act of 2010.

- The legislation provides a temporary 100% bonus depreciation deduction for qualifying property acquired and placed in service after 8 September 2010, through 31 December 2011 (31 December 2012 for LPPP and certain aircraft). Under this provision, property acquired pursuant to a written binding contract entered into before 1 January 2008 is not qualified property for purposes of the 100% bonus depreciation deduction.
- The legislation does not change the definition of eligible property under the current bonus depreciation rules. Current-law rules generally provide that property with a recovery period of 20 years or less, water utility property, certain computer software, and qualified leasehold improvements are eligible.
- The 100% bonus depreciation provision in the legislation operates by substituting '100' for '50' in the applicable 100% period. Thus, property that meets the 100% bonus depreciation requirements will not be eligible property for purposes of the 50% bonus depreciation requirement. For such property, a taxpayer could claim 100% bonus depreciation or elect to forego the bonus depreciation deduction altogether.
- The bonus depreciation provisions, including 100% bonus depreciation, are mandatory. However, as indicated above, a taxpayer may make an election out of

United States

bonus depreciation for any particular tax year. This election is made on a class-by-class and entity-by-entity basis.

- The legislation re-enacts the provision allowing a corporation to elect to accelerate AMT credits in lieu of bonus depreciation. This election is available for property placed in service after 31 December 2010, and before 1 January 2013 (1 January 2014 for LPPP and certain aircraft).

Depletion

For natural resource properties other than timber and certain oil and gas properties, depletion may be computed on a cost or a percentage basis.

Cost depletion is a method of depletion applied to exhaustible natural resources, including timber, which is based on the adjusted basis of the property. Each year, the adjusted basis of the property is reduced, but not below zero, by the amount of depletion calculated for that year. The current year cost depletion deduction is based on an estimate of the number of units that make up the deposit and the number of units extracted and sold during the year.

Percentage depletion is a method of depletion applied to most minerals and geothermal deposits, and, to a more limited extent, oil and gas. Percentage depletion is deductible at rates varying from 5% to 25% of gross income, depending on the mineral and certain other conditions. Percentage depletion may be deducted even after the total depletion deductions have exceeded the cost basis. However, percentage depletion is limited to 50% (100% for oil and gas properties) of taxable income from the property (computed without allowance for depletion). Generally, percentage depletion is not available for oil or gas wells. However, exceptions exist for natural gas from geopressurised brine and for independent producers of oil and gas.

Goodwill

The cost of goodwill is generally capitalised and amortisable rateably over 15 years.

Start-up expenses

Generally, start-up expenditures must be amortised over a 15 year period; however, certain taxpayers may elect to deduct some expenses in the tax year in which the trade or business begins.

US manufacturing deduction

Over the last several decades, various tax incentive systems have been enacted in the United States to encourage exports and were later repealed, including the extraterritorial income (ETI) regime, which was repealed as a result of a World Trade Organization (WTO) ruling that the ETI regime favoured US goods and violated the national treatment provisions of the General Agreement on Tariffs and Trade. In response, the United States enacted the American Jobs Creation Act of 2004, which introduced a phase-out repeal of ETI and introduced the domestic production activities deduction under Section 199, seeking to compensate US manufacturers for the loss of ETI benefits.

Under Section 199, taxpayers are allowed a 9% deduction for qualified production activities (QPA) income (subject to a taxable income limitation). The deduction is available to all taxpayers actively engaged in QPA. For corporate taxpayers, the deduction generally will mean a federal income tax rate of 31.85% on QPA income. Importantly, the deduction also applies in calculating the AMT. There is a limit on the amount of the deduction equal to 50% of W-2 wages allocable to QPA (subject to a specific effective date), and the deduction is not allowed for taxpayers that incur a loss

from their production activities or have an overall loss (including a carryover loss) from all activities.

A taxpayer's QPA income is calculated using the following formula: domestic production gross receipts less the sum of cost of goods sold allocable to such receipts and other expenses, losses, or deduction which are properly allocable to such receipts.

Bad debt

Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless. Determining the date the debt becomes worthless may present difficulty.

Charitable contributions

Deductions for allowable charitable contributions may not exceed 10% of taxable income computed without regard to certain deductions, including charitable contributions themselves. Deductions for contributions so limited may be carried over to the five succeeding years, subject to the 10% limitation annually.

Employee benefit plans (pension plans and expenses)

Through the Code, the government provides incentives for employers to provide retirement benefits to workers, including employee benefit, qualifying profit-sharing, or stock bonus plans. Usually, the employer will be allowed a current deduction for any contributions made to the fund, and the employee's tax liability will be deferred until the benefit is paid. For profit, non-government employers generally have two types of available plans, which generally are subject to the reporting and disclosure requirements set forth under the Employee Retirement Income Security Act of 1974 (ERISA).

The first category of employee benefit plans is the defined benefit plan, or more commonly known as a pension plan, to which an employer contributes money, on an ongoing basis, to cover the amount of retirement income owed to retired employees under the plan (which will vary based on years of service, average salary, and/or other factors). Any investment gains or losses will not affect the amount of benefits paid to participants but will affect the amount an employer needs to contribute in order to cover its obligation.

The second category of employee benefit plans is the defined contribution plan, or more commonly known in the United States as a '401(k) plan', to which an employer's contributions (if any) are allocated amongst the separate accounts of participating employees, who also may contribute to their respective accounts. Investment gains or losses and the history of contributions will affect the value of a participant's account at retirement but would not affect an employer's contributions since the employer is not obligated to ensure any specified level of benefit in the plan.

Non profits, including churches and government entities, have similar employee benefit plans, except different requirements apply. Small employers and self-employed individuals also have similar options available but are subject to different requirements.

Fines and penalties

No deduction generally is allowed for fines or penalties paid to the government for violation of any law.

Bribes, kickbacks, and illegal payments

An amount paid, directly or indirectly, to any person that is a bribe, kickback, or other illegal payment is not deductible.

United States

Taxes

State and municipal taxes are deductible expenses for federal income tax purposes.

Other significant items

- No deduction generally is allowed for a contingent liability until such liability is fixed and determinable.
- Costs incurred for entertainment must meet strict tests in order to be deductible. The deduction for business meal and entertainment expenses is 50% of the expenses incurred. There are also limitations on the deductibility of international and domestic business travel expenses.
- Royalty payments, circulation costs, mine exploration, and development costs, and other miscellaneous costs of carrying on a business are deductible, subject to certain conditions and limits.
- Depending on the taxpayer's tax accounting method, research and experimental expenditures may be deducted as incurred or treated as deferred expenses and amortised over a period of not less than 60 months; however, in general, the method used must be consistently applied.

Net operating losses (NOLs)

An NOL is generated when business deductions exceed gross income in a particular tax year. Depending on current tax law, an NOL may be carried back to offset past income and possibly obtain a refund or carried forward to offset future income. Generally, a loss may be carried back two years and, if not fully used, carried forward 20 years. For tax years beginning before 6 August 1997, a loss may be carried back three years and, if not fully used, carried forward 15 years. For state tax purposes, carryback and carryforward provisions are often similar to the federal provisions, except that several states do not permit any carrybacks or carryforwards.

Special rules surrounding NOLs may apply if a taxpayer is located in a qualified disaster area.

Special rules also apply relating to specified liability losses.

Complex rules may limit the use of NOLs after a reorganisation or other change in corporate ownership. Generally, if the ownership of more than 50% in value of the stock of a loss corporation changes, a limit is placed on the amount of future income that may be offset by losses carried forward.

Payments to foreign affiliates

A US corporation generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, to the extent the amounts are actually paid and are not in excess of what it would pay an unrelated entity, (i.e. are at arm's length). In addition, US withholding on these payments may be required.

Group taxation

An affiliated group of US 'includible' corporations, consisting of a parent and subsidiaries directly or indirectly 80% owned, generally may offset the profits of one affiliate against the losses of another affiliate within the group by electing to file a consolidated federal income tax return. A foreign incorporated subsidiary may not be consolidated into the US group, except for certain Mexican and Canadian incorporated entities. A partnership may not be included in a consolidated return, even if it is 100% owned by members of an affiliated group, since a partnership is not a corporation. However, a member's earnings

that flow through from a partnership are included as part of the consolidated group's taxable income or loss. Filing on a consolidated (combined) basis is also allowed (or may be required or prohibited) in certain states.

Sales, dividends, and other transactions between corporations that are members of the same group generally are deferred or eliminated until such time as a transaction occurs with a non-member of the group. Losses incurred on the sale of members of the group are disallowed under certain circumstances.

Transfer pricing

Transfer pricing regulations govern how related entities set internal prices for the transfers of goods, intangible assets, services, and loans in both domestic and international contexts. The regulations are designed to prevent tax avoidance among related entities and place a controlled party on par with an uncontrolled taxpayer by requiring an arm's-length standard. The arm's-length standard generally is met if the results of a controlled transaction are consistent with results that would have been realised if uncontrolled taxpayers had engaged in a similar transaction under similar circumstances. If a company is not in compliance with the arm's-length standard, the Internal Revenue Service (IRS) may raise taxable income and tax payable in the United States. After a transfer pricing adjustment, a multinational company may face double tax, paying tax twice on the same income in two countries. Multinational companies may request competent authority relief from double taxation through a tax treaty.

In order to avoid potential transfer pricing penalties, one avenue available to companies may be to obtain an advance pricing agreement (APA) with the IRS, unilaterally, or with the IRS and another tax authority, bilaterally, covering inter-company pricing.

Thin capitalisation

Thin capitalisation rules may apply to disallow interest payments related to excess debt and to re-characterise such payments as dividends. The interest expense deduction can be limited and suspended if more than 50% of the adjusted taxable income of a thinly-capitalised corporation (with similar rules for a corporate partner in a partnership) is sheltered by interest paid to a related party (or paid to a third-party but guaranteed by the related party) who is not subject to US tax on the income.

Controlled foreign companies (CFCs)

Under the Subpart F regime, a CFC is any foreign corporation with respect to which more than 50% of either the voting power of all classes of stock entitled to vote or the total value of all classes of the corporation's stock is owned by US shareholders on any day during the foreign corporation's taxable year.

Tax credits and incentives

Foreign tax credit (FTC)

Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income, war profits, and excess profit taxes paid or accrued during the taxable year to any foreign country or US possession. An FTC reduces US income tax liability dollar for dollar, while a deduction reduces the US income tax liability at the marginal rate of the taxpayer. For taxpayers with NOLs, the FTC is of no value in such year. However, a benefit might be received either in an earlier year (through a refund of previously paid taxes) or a later year (through a reduction of future taxes). It also should be noted that a taxpayer has an ability to switch from credit to deduction (or from deduction to credit) at any time in a ten-year period commencing

United States

when the foreign taxes were paid or accrued. Generally, an FTC may be carried back one year and, if not fully used, carried forward ten years.

In addition, the FTC goes beyond direct taxes to include foreign taxes paid 'in lieu of' a tax upon income, war profits, or excess profits, which would otherwise generally be imposed. It also includes deemed-paid (indirect) taxes paid for certain US corporate shareholders of non-portfolio foreign corporations when actual or deemed dividends are received. Furthermore, the FTC system has numerous limitations to mitigate the potential abuses of the credit by the taxpayer.

General business credit

Various business credits are available to provide special incentives for the achievement of certain economic objectives. In general, these credits are combined into one 'general business credit' for purposes of determining each credit's allowance limitation for the tax year. The general business credit that may be used for a tax year is limited to a tax based amount. In general, the current year's credit that cannot be used in a given year because of the credit's allowance limitation may be carried back to the tax year preceding the current year and carried forward to each of the 20 years following the current year.

In general, the current year business credit is a combination of the following credits:

- Investment credit.
- Work opportunity credit (currently expired).
- Alcohol fuels credit.
- Research credit (currently expired).
- Low-income housing credit.
- Enhanced oil recovery credit.
- Disabled access credit for certain eligible small businesses.
- Renewable electricity production credit.
- Empowerment zone employment credit.
- Indian employment credit.
- Employer social security credit.
- Orphan drug credit.
- New markets tax credit (currently expired).
- Small employer pension plan startup cost credit for eligible employers.
- Employer-provided child care credit.
- Railroad track maintenance credit (currently expired).
- Biodiesel fuels credit (currently expired).
- Low sulfur diesel fuel production credit.
- Marginal oil and gas well production credit.
- Distilled spirits credit.
- Advanced nuclear power facility production credit.
- Non-conventional source production credit.
- New energy efficient home credit (currently expired).
- Energy efficient appliance credit (currently expired).
- A portion of the alternative motor vehicle credit.
- A portion of the alternative fuel vehicle refueling property credit.
- Hurricane Katrina housing credit.
- Hurricane Katrina employee retention credit.
- Hurricane Rita employee retention credit.
- Hurricane Wilma employee retention credit.
- Mine rescue team training credit (currently expired).
- Agricultural chemicals security credit for eligible businesses.
- Differential wage payment credit.

- Carbon dioxide sequestration credit.
- A portion of the new qualified plug-in electric drive motor vehicle credit for vehicles that will vary based on the date of purchase.

Employment credits

A 'work opportunity tax credit' is available for employment of certain types of workers who began work for an employer after 30 September 1996 and before 1 September 2011. 'Creditable' wages generally are the first USD 6,000 of wages paid to each qualified employee for the year. The credit is 40% of creditable wages, for a maximum credit of USD 2,400.

Research and development (R&D) credit

The credit for qualified research expenses, as noted above, expired at the end of 2011 and has not yet been renewed or extended. It therefore is not currently available with respect to qualified research expenses (QREs) incurred after 31 December 2011. For QREs incurred on or before that date, a credit against the federal income tax equal to 20% of the sum of QREs in excess of the 'base amount' and basic research payments (*as discussed below*) to a qualified organisation may be obtained for certain periods.

The base amount cannot be less than 50% of current-year QREs. In tax years ending after 8 August 2005, the research expense credit also includes 20% of the taxpayer's expenditures on qualified energy research undertaken by an energy research consortium.

In addition, for tax years ending after 2006, taxpayers may be able to use the new alternative simplified credit (ASC), which does not use a gross receipts factor. The ASC generally equals 12% for tax years ending after 2006 and beginning before 2008 for QREs that exceed 50% of the average QREs for the three tax years preceding the credit determination year. For other tax years, the applicable ASC percentage is 14%.

The deduction for R&D expenditures must be reduced by the entire amount of the credit unless an election is made to reduce the amount of the credit.

Inbound investment incentives

There generally are no specific incentives related to inbound investment at the federal level, other than certain portfolio debt and bank deposit exceptions. The portfolio debt exception enables non-residents and foreign corporations to invest in certain obligations (which must meet certain statutory requirements to qualify as 'portfolio debt') in the United States without being subject to US income (or withholding) tax on the interest income. Certain state and local benefits may also be available.

Qualified private activity bonds

Interest income received on certain qualified private activity bonds generally is exempt from federal income tax. This enables a business enterprise to issue the bonds at a lower interest rate.

Other tax incentives

State and local governments provide numerous incentives to encourage business and, thus, employment in their jurisdictions.

United States

Withholding taxes

Under US domestic tax laws, a foreign person generally is subject to 30% US tax on its US-source income. US persons making payments ('withholding agents') to foreign persons generally must withhold 30% of the payment amount as tax withheld at source on payments, such as dividends and royalties, made to foreign persons. In other situations, withholding agents may apply reduced rates or be exempted from withholding tax (WHT) at source when there is a tax treaty between the foreign person's country of residence and the United States.

The United States has entered into various income tax treaties with countries in order to avoid double taxation of the same income and to prevent tax evasion. The table below, from IRS Publication 901 (April 2011), summarises the benefits resulting from these treaties.

Recipient	Interest paid by US obligors in general (%)	Dividends paid by US corporations in general (%) (1)	Dividends qualifying for direct dividend rate (%) (1, 2)	Royalties* (%)

Notes

* Please note the tax rates and associated footnotes appearing in the 'Royalties' column in the table address three types of royalties, as denoted in the most recent IRS publication. These three are industrial royalties, motion picture and television copyright royalties, and 'other' copyright royalties. The slashes '/' between each figure and associated footnote(s) are meant to demarcate these three types of royalties, respectively.

1. No US tax is imposed on a dividend paid by a US corporation that received at least 80% of its gross income from an active foreign business for the three-year period before the dividend is declared.
2. The reduced rate applies to dividends paid by a subsidiary to a foreign parent corporation that has the required percentage of stock ownership. In some cases, the income of the subsidiary must meet certain requirements (e.g. a certain percentage of its total income must consist of income other than dividends and interest). For Italy, the reduced rate is 10% if the foreign corporation owns 10% to 50% of the voting stock (for a 12-month period) of the company paying the dividends. For Japan, dividends received from a more than 50% owned corporate subsidiary are exempt if certain conditions are met.
3. The exemption or reduction in rate does not apply if the recipient has a PE in the United States and the property giving rise to the income is effectively connected with this PE. Under certain treaties, the

United States

- exemption or reduction in rate also does not apply if the property producing the income is effectively connected with a fixed base in the United States from which the recipient performs independent personal services. Even with the treaty, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States under IRC Section 894(b).
4. The exemption or reduction in rate does not apply if the recipient is engaged in a trade or business in the United States through a PE that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States to apply the reduced treaty rate to that item of income.
 5. The rate is 5% for royalties for the use of, or the right to use, a trademark and any information concerning industrial, commercial, or scientific experience provided in connection with a rental or franchise agreement that includes rights to use a trademark.
 6. Interest determined with reference to the profits of the issuer or one of its associated enterprises is taxed at 15%.
 7. Contingent interest that does not qualify as portfolio interest is treated as a dividend and is subject to the rates under those columns, as appropriate.
 8. The exemption applies only to interest on credits, loans, and other indebtedness connected with the financing of trade between the United States and the CIS member. It does not include interest from the conduct of a general banking business.
 9. The rate for royalties with respect to tangible personal property is 7%.
 10. Tax imposed on 70% of gross royalties for rentals of industrial, commercial, or scientific equipment.
 11. The rate in column 3 applies to dividends paid by a RIC or a real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest (25% in the case of Portugal, Spain, and Tunisia) in the REIT.
 12. The rate is 8% for copyrights of scientific work.
 13. The rate is 5% for interest (i) beneficially owned by a bank or other financial institution (including an insurance company) or (ii) paid due to a sale on credit of any industrial, commercial, or scientific equipment, or of any merchandise to an enterprise.
 14. The rate is 10% if the interest is paid on a loan granted by a bank or similar financial institution. For Thailand, the 10% rate also applies to interest from an arm's-length sale on credit of equipment, merchandise, or services.
 15. This is the rate for royalties for the use of, or the right to use, industrial, commercial, and scientific equipment. The rate for royalties for information concerning industrial, commercial, and scientific know-how is subject to the rate in column 5 ('other royalties').
 16. The rate is 15% for copyrights of scientific work.
 17. Amounts paid to a pension fund or employee benefit organisation that are not derived from the carrying on of a business, directly or indirectly, by the fund or organisation are exempt.
 18. The rate in column 3 applies to dividends paid by a RIC. Dividends paid by a REIT are subject to a 30% rate.
 19. An election can be made to treat this interest income as if it were industrial and commercial profits taxable under article 8 of this treaty.
 20. The rate is 4.9% for interest derived from (i) loans granted by banks and insurance companies and (ii) bonds or securities that are regularly and substantially traded on a recognised securities market. The rate is 10% for interest not described in the preceding sentence and paid (i) by banks or (ii) by the buyer of machinery and equipment to the seller due to a sale on credit.
 21. The rate is 15% (10% for Bulgaria; 30% for Germany and Switzerland) for contingent interest that does not qualify as portfolio interest.
 22. The rate is 15% for interest determined with reference to (i) receipts, sales, income, profits, or other cash flow of the debtor or a related person, (ii) any change in the value of any property of the debtor or a related person, or (iii) any dividend, partnership distribution, or similar payment made by the debtor to a related person.
 23. Interest received by a financial institution is tax exempt. For Venezuela, the rate is 4.95% if the interest is beneficially owned by a financial institution (including an insurance company).
 24. The rate in column 3 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual (or pension fund, in the case of France or New Zealand) holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.
 25. Interest paid or accrued on the sale of goods, merchandise, or services between enterprises is exempt. Interest paid or accrued on the sale on credit of industrial, commercial, or scientific equipment is exempt.
 26. Dividends received from an 80%-owned corporate subsidiary are exempt if certain conditions are met.
 27. Exemption does not apply to amount paid under, or as part of, a conduit arrangement.
 28. Interest is exempt if (i) paid to certain financial institutions, or (ii) paid on indebtedness from the sale on credit of equipment or merchandise.
 29. Amounts paid to a pension fund that are not derived from the carrying on of a business, directly or indirectly, by the fund are exempt. This includes amounts paid by a REIT only if the conditions in footnote 31 are met. For Sweden, to be entitled to the exemption, the pension fund must not sell or make a contract to sell the holding from which the dividend is derived within two months of the date the pension fund acquired the holding.

30. The rate in column 3 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual or a pension fund holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified. Dividends paid to a pension fund from a RIC, or a REIT that meets the above conditions, are exempt. For Sweden, the pension fund must also satisfy the requirements in footnote 30.
31. The exemption does not apply if the recipient of the gain is an individual who is present in the United States for more than 119 days during the year.
32. The rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual holding less than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

Tax administration

Taxable period

US corporate taxpayers are taxed on an annual basis. Corporate taxpayers may choose a tax year that is different from the calendar year. New corporations may use a short tax year for their first tax period, and corporations may also use a short tax year when changing tax years.

Tax returns

The US tax system is based on the principle of self assessment. A corporate taxpayer is required to file an annual tax return (generally Form 1120) by the 15th day of the third month following the close of its tax year. A taxpayer can obtain an additional six month extension of time to file its tax return. Failure to timely file may result in penalties.

Important tax return due dates

Form No.	Title	Purpose	Due date
W-2	Wage and Tax Statement	Employers must provide employees with statements regarding total compensation and amounts withheld during year.	Must be sent to employees on or before 31 January.
1099 series	Various	Information returns to be provided to recipients of dividends and distributions, interest income, miscellaneous income, etc.	Must be sent on or before 31 January.
1120 series, including 1120S (for S Corps)	US Corporation Income Tax Return	Income tax returns for domestic corporations or foreign corporations with US offices.	15 March (Form 7004 may be filed to obtain an automatic six-month extension)
Schedule K-1	Partner's Share of Income (Loss) from an Electing Large Partnership	Information returns to be provided to partners by large partnerships.	15 March
1065	US Return of Partnership Income	Information returns to be filed by large partnerships.	15 April (Form 7004 may be filed to obtain an automatic six-month extension)
State tax returns	Various	Income tax returns for states where corporation carries on trade/business.	Varies, often 15 April

United States

Payment of tax

A taxpayer's tax liability generally is required to be prepaid throughout the year in four equal estimated payments and fully paid by the date the tax return is initially due for that year. However, because a corporation that expects its tax liability for the tax year to exceed the small sum of \$500 (based on its tax liability for the preceding year), almost all corporations are required to pay their full estimated tax liability for the year in their four estimated tax payments. For calendar year corporations, the four estimated payments are due by the 15th day of April, June, September, and December. For fiscal year corporations, the four estimated payments are due by the 15th day of the fourth, sixth, ninth, and 12th month of the tax year. Generally, no extensions to pay are allowed. Failure to pay the tax by the due dates as indicated above can result in estimated tax and late payment penalties and interest charges.

The instalment payments must include estimates of regular CIT, AMT, environmental tax, and, for foreign corporations, the tax on gross transportation income. To avoid a penalty, corporations must calculate the instalment payments based on at least 25% of the lesser of (i) the tax shown on the current tax return or (ii) the prior year's tax liability, provided that the tax liability was a positive amount in the prior year and that such year consisted of 12 months. However, corporations with taxable income of at least USD 1 million (before use of NOLs or capital loss carryforwards) in any of the three preceding years are not permitted to calculate the instalment based payment on the prior year's tax liability, except in determining the first instalment payment. Instead, such corporations must calculate the instalment payments based on the tax shown on the current tax return.

Corporations with more than USD 1 billion in assets will be required to make estimated tax payments that are 100.25% of the amount otherwise due in July, August, or September of 2014. Such overpayments will be balanced out in October, November, or December of 2014 when payments of 99.75% of the amount otherwise due will be paid by corporations with more than USD 1 billion in assets.

Audit cycle

Generally, the US tax system is based on self-assessment; however, many large and mid-size businesses are under continuous audit by the IRS and state tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller business and persons with lower incomes are generally subject to audit on a random basis.

Statute of limitations

The IRS generally has three years after an original return is filed to assess income taxes. A return will be deemed to have been filed on its due date, even if the return is actually filed on an earlier date.

Topics of focus for tax authorities

Currently, the IRS is focused on abusive payments related to contribution to capital of a corporation, domestic manufacturing deduction, foreign earnings repatriation, FTC generators, repairs vs. capitalisation change in accounting method, research credit claims, transfer of intangibles/offshore cost sharing, WHTs, and employee classification.

Tax shelter

Treasury regulations require taxpayers to disclose transactions determined to be abusive or possibly abusive. Current information on these transactions, known as listed and reportable transactions, is available from the IRS website (www.irs.gov).

Accounting for income taxes

For US federal tax purposes, the two most important characteristics of a tax method of accounting are (i) timing and (ii) consistency. If the method does not affect the timing for including items of income or claiming deductions, it is not an accounting method and generally IRS approval is not needed to change it. In order to affect timing, the accounting method must determine the year in which an income or expense item is to be reported.

In general, in order to establish an accounting method, the method must be consistently applied. Once an accounting method has been adopted for federal tax purposes, any change must be requested by the taxpayer and approved by the IRS. Changes in accounting methods cannot be made through amending returns. The two most common methods of accounting are the accrual basis and cash basis methods.

Penalties

Civil and criminal penalties may be imposed for failing to follow the Code when paying US taxes. The civil penalty provisions may be divided into four categories: delinquency penalties, accuracy-related penalties, information reporting penalties, and preparer, promoter, and protester penalties. Many, but not all, have exception provisions to cover reasonable cause. In addition, many have provisions directing how the penalties interact with the other penalties.

These four main civil penalty categories may further be divided. First, the delinquency penalties may be divided into failure to file, failure to pay, and failure to make timely deposits of tax. Failure to make timely deposits of tax applies to taxpayers required to make instalment payments and WHT payments.

Second, the penalties relating to the accuracy of tax returns are divided into the negligence penalty, the substantial understatement penalty, substantial overstatement of pension liabilities, substantial estate or gift tax valuation underestimate, and the valuation penalties. These penalties are also coordinated with the fraud penalty to eliminate any stacking of the penalties. Again, like other provisions, the fraud penalty is not intended to be imposed as a stacked penalty.

The third category of penalties is the information reporting penalties. These penalties may be imposed upon those who only have a duty to report information to the IRS.

The fourth and final major categories of civil penalties are the preparer, promoter, and protester penalties. Currently, the most notable of these is the return preparer penalty for which there is a penalty for a position on a return for which the preparer did not have substantial authority. Also included in this provision is a penalty for wilful or reckless attempt to understate the tax liability of another person. Additionally, return preparer penalties may be imposed for failure to furnish a copy of a return or claim for refund to the taxpayer, sign the return or claim for refund, furnish his or her identifying number, or file a correct information return.

Other promoter and protestor penalties include a penalty for promoting abusive tax shelters, aiding and abetting the understatement of tax liability, and filing frivolous income tax returns. Additionally, a court may award sanctions and costs if a person institutes or maintains a proceeding primarily for delay, takes a position that is frivolous, or unreasonably fails to pursue available administrative remedies.

In addition to these major civil penalties, international tax related penalties for failures other than timely and accurate filing (e.g. wilful failure to report international boycott

United States

activity, failure of an agent to furnish a notice of a false affidavit relating to the WHT on dispositions of US real property interests, failure of a US person to furnish information relating to CFCs and controlled foreign partnerships, failure of a US person to report foreign bank accounts, etc.) exist. Pension and employee benefit related tax penalties exist that protect the policy reasons for the tax incentives including, most notably, early withdrawal of pension funds. Another group of specialised penalties apply to exempt organisations.

Criminal penalties exist for situations when the failures to stay within the tax system are more egregious. Although applicable to corporate taxpayers, they are applied more frequently to individuals.

In addition to the penalty provisions, interest at statutory rates generally applies to underpayments of tax.

Other issues

Tax accounting and internal controls

Accounting Standards Codification (ASC) 740, Income Taxes (formerly known as Financial Accounting Standards Board [FASB] Statement No. 109, Accounting for Income Taxes) addresses how companies should account for and report the effects of taxes based on income. ASC 740's principles and requirements apply to domestic and foreign entities in preparing financial statements in accordance with US generally accepted accounting principles (GAAP), including not-for-profit entities with activities that are subject to income taxes. This scope includes: (i) domestic federal (national) income taxes (US federal income taxes for US enterprises) and foreign, state, and local (including franchise) taxes based on income; and (ii) an enterprise's domestic and foreign operations that are consolidated, combined, or accounted for by the equity method.

In recent years, controls around the accounting for income taxes have been a critical source of material weaknesses in companies' internal controls over financial reporting. Accounting for income taxes also has been a primary reason for restating financial statements. Management should ensure that its judgments and estimates are reasonable (e.g. assessing the need for a valuation allowance on deferred taxes) and that the underlying internal control processes are reliable.

The adoption of International Financial Reporting Standards (IFRS) in the United States is set by the Securities and Exchange Commission (SEC). The timeline included in the SEC's roadmap provides for adoption of IFRS in the United States between 2014 and 2016. The SEC has stated that it will reassess the transition to IFRS in 2011.

Corporate reorganisations

In general, a corporate reorganisation involving a merger, acquisition, or consolidation is a taxable event under the general recognition provisions of the Code. However, a corporate reorganisation that meets certain statutory and judicial requirements may qualify as a tax-free transaction, with gain or loss generally not recognised or deferred to a later date.

US possessions

Puerto Rico, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the US Virgin Islands have their own independent tax departments. Accordingly, they have their own rules. *See the Puerto Rico summary for more information about Puerto Rico taxation.*

Significant developments

Uruguay has signed double tax treaties (DTTs) following, in general, the model of the Organisation for Economic Co-operation and Development (OECD) with Germany (renegotiation in force since December 1991), Hungary (in force since 1994), Mexico (in force as of December 2010), Spain (in force as of April 2011), and Switzerland (in force as of December 2011), as well as a memorandum to cooperate in the exchange of information with France (in force as of December 2010). DTTs with Portugal, Liechtenstein, Ecuador, Malta, India, and Finland are currently undergoing the approval processes in the national Parliament. DTTs with South Korea, Norway, Sweden, Denmark, Faroe Islands, Greenland, and Argentina have reached the stage of a 'technical agreement' (most of them being a memorandum to cooperate in the exchange of information). Finally, DTTs with Belgium, Canada, Romania, Australia, Malaysia, Luxembourg, Holland, the United Kingdom, Italy, and Brazil are under negotiation.

The government is implementing an electronic invoicing plan, which consists of replacing the paper-based system. This new development will help to achieve an important improvement in the business negotiation process, will reduce costs, and make e-commerce easier. Those who request to be approved or those who are notified by the authorities are going to be implementing this system.

During this year, nearly 250 companies will be included in this program, and it will be mandatory for the rest of the national companies in 2014. In September 2011, the Senate issued a decree giving tax benefits to those companies that invest in the necessary hardware and software for the implementation of the electronic billing system.

On 29 December 2011, the Executive Power approved a Law that creates the Rural Real Estate Concentration Tax (ICIR, for its Spanish abbreviation). This tax will be imposed on the ownership of rural real estate.

Taxes on corporate income

Net income derived from business activities conducted in Uruguay, obtained by legal entities resident in Uruguay and non-residents operating through a permanent establishment (PE) in Uruguay, is taxed at a corporate income tax (CIT) rate of 25% under the source principle (i.e. the territorial system of taxation). Accordingly, Uruguay taxes only income that is derived from activities conducted within its borders, income generated from property located in Uruguayan territory, or income derived from the economic use of rights within its territory (see *Foreign income in the Income determination section for an exception to this principle*).

Uruguay

In order to determine the net taxable income, all accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer will be able to deduct expenses from its gross income if such expenses are subject to taxation (either foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than 25%.

A 12% withholding tax (WHT) is imposed on Uruguayan-sourced income obtained by non-residents, except in cases where the income is obtained through the operations of a PE in Uruguay (*see the Withholding taxes section for more information*).

Trading companies

Uruguayan corporations that sell and buy foreign goods or services from Uruguay (which are not physically introduced to the country, in the case of goods, or which are not economically used in Uruguay, in the case of services) may determine the net Uruguayan-source income on a notional basis of 3% of the gross margin (difference between the selling price and the purchase price). This gross margin has to be compliant with transfer pricing rules (in line with OECD guidelines). The applicable effective CIT rate is 0.75% (25% x 3%).

Local income taxes

No taxes on corporate income may be levied by municipal authorities or other local governments.

Corporate residence

Legal entities are deemed to be resident in Uruguay when they are incorporated according to the local legislation.

Permanent establishment (PE)

The concept of PE in the Uruguayan tax legislation follows, in general terms, the definition provided in the OECD Model Tax Convention, although it has some special clauses that may be found in the United Nations (UN) Model Tax Convention. From a Uruguayan law perspective, the term PE means a fixed place of business through which the business of an enterprise is wholly or partly carried on in Uruguay. The term PE especially includes: (i) places of management; (ii) branches; (iii) offices; (iv) factories; (v) workshops; (vi) mines; oil or gas wells; quarries or any other place of extraction of natural resources; (vii) buildings, constructions, installation projects, or the management activities associated to them, when they last more than three months; and (viii) services rendered (in particular consultancy) by a non-resident through employees or hired personnel in Uruguay during a period or periods exceeding six months on an annual basis. Please note that item (viii) constitutes an exception to the OECD model and is based on the provisions of the UN model.

Other taxes

Value-added tax (VAT)

Uruguayan VAT is levied at a general rate of 22% on the provision of services and on the circulation of goods within the limits of the Uruguayan territory. The import of goods and value-added in regard to the construction of immovable assets are also within the scope of this tax.

The following items are either subject to a reduced 10% VAT rate or exempt from VAT entirely.

Items subject to the 10% VAT rate:

- Food and medicines.
- Hotel services.
- Health services.
- The first sale of immovable assets.

Items exempt from VAT:

- Milk.
- Books.
- Magazines.
- Agricultural machinery.
- Certain bank services.
- Accessories.

Exports are VAT zero rated. VAT on purchases of the exporters can be recovered in the form of credit certificates that can be (i) used to pay other taxes, (ii) used to pay social security contributions, or (iii) endorsed to suppliers who can pay their own national taxes or their own social security contributions.

This tax requires monthly payments and may require monthly or annual tax returns, depending on the qualification of the taxpayer.

Customs duties

- Consular duty: 2%.
- Customs computer services duty: a scale flat duty, with a limit of 50 United States dollars (USD).
- Customs extraordinary duty: a scale flat duty, with a limit of USD 600.
- Global customs duty (TGA): depends on the origin of goods. If they come from Mercosur, the TGA is generally zero (some goods still apply the payment of the TGA). If not, it varies depending on the type of product, with a maximum rate of 20%, with exceptional levels that range from 23% to 55% (corresponding mainly to certain types of shoes, sugar, automobiles, and peaches). For goods classified as capital goods or information and telecommunication goods, there is a special regime.

All imports and exports duties are applied on the 'customs value' (in general, in imports it is considered as cost, insurance, and freight [CIF], and in exports as freight on board [FOB]).

On imports, VAT is also applicable according to the following detail:

- Goods subject to the general VAT rate (22%):
 - 'Import VAT' at the rate of 22%.
 - 'Advanced payment import VAT' at a rate of 10%.
- Goods subject to the reduced VAT rate (10%):
 - 'Import VAT' at the rate of 10%.
 - 'Advanced payment import VAT' at a rate of 3%.

The tax base of VAT on imports is the customs value plus the customs duties.

Uruguay

Additionally, some goods are also subject to an 'advanced payment import on account of CIT' at a rate of 10%, which can be deducted from the amount of CIT for the fiscal year.

Export duties

Exports are not subject to any taxes, and there are almost no prohibitions regarding the type of goods to be exported. On the contrary, several instruments are offered to promote exports, such as the reimbursement of taxes. *For VAT on exports, please see VAT above.*

For the reimbursement of indirect taxes, the exporter may recover internal taxes that are added to the cost of the products exported. The amount to be reimbursed is a percentage of the FOB value set by the Executive Power for each product.

Additionally, temporary admission consists of the import of raw materials, pieces, motors, package material, and other industrial input without import duties or taxes. To be subject to this customs duties exemption, the company has to export the finished goods within 18 months from the introduction of the exempt goods or materials. The subsequent local sale of such finished goods is not entitled to this benefit.

Excise tax

In general, excise tax applies on the first transaction effected in the domestic market by manufacturers or importers of goods. Exports are not taxable.

Excise tax rates vary for each item, and they are generally fixed by the government within maximum parameters established by law.

Goods subject to the highest rates are alcoholic beverages (from 20.20% to 80%, depending on the alcohol degree), tobacco (from 28% to 70%), lubricants (from 5% to 35%) gasoline, fuel, and other petroleum products (from 5% to 133%).

This tax requires monthly payments and/or tax returns.

Net wealth tax (NWT)

All types of legal entities and business enterprise owners are subject to an annual NWT at a rate of 1.5% on the value of net assets. This tax also follows the source principle, whereby only assets located or economically used in Uruguay are taxable. Taxpayers may reduce their capital tax liability in determining the NWT basis, up to their total amount of CIT for the fiscal year. In practice, taxpayers deduct 1%, which was established prior to the tax reform law.

The deduction of liabilities from the amount of taxable assets to determine the NWT basis is limited to: (i) the average of debts with financial institutions, (ii) debts with suppliers of goods and services, (iii) taxes not yet due, (iv) debts with governments, international credit offices of which Uruguay is a member and with foreign state financial institutions that lend funds for long-term productive projects, and (v) debts documented in debentures and obligations, if their emission is done in a public offering and such papers are quoted in a stock exchange.

Property taxes

Regarding taxes of relevance for those doing business in Uruguay, *please see Net Wealth Tax above.* There are additional property taxes of less significance, levied by Municipal authorities (e.g. *Contribución Inmobiliaria*) and by National authorities (e.g. *Impuesto de Primaria*).

Tax on real estate transfer

A tax on real estate transfer applies to the transfer of immovable assets. Transfer is defined in an ample sense, as a sale, a cession of the right to use, a transfer of inheritance rights, etc.

Both parties to the transfer contract are subject to this tax at a rate of 2% on the property's tax value (according to a National Register, a value generally lower than market value). When the property is transferred without payment, the beneficiary pays tax at a rate of 4% on the property tax valuation, except in instances where the property is transferred to direct heirs or legatees, who pay this tax at a rate of 3%.

Stamp taxes

Stamp taxes are not applicable in Uruguay.

Tax of control of corporations

Upon the set up of a corporation, a tax is payable at a 1.5% rate on a notional basis amount, which is determined annually by the authorities. For fiscal year 2012, the estimated amount of this tax (lump sum) is approximately USD 1,026.

This tax is also due annually at the end of each fiscal year, at a rate of 0.75% on said notional amount, and can be deducted from the NWT. For fiscal year 2012, the estimated amount of this tax (lump sum) is approximately USD 512.

Rural Real Estate Concentration Tax (ICIR)

ICIR taxes the rural real estate ownership that, as a whole, exceeds 2,000 hectares with a CONEAT index of 100 (C100) or equivalent (the CONEAT index is established by the government and represents the productivity of the soil).

The tax is levied as a fixed amount (expressed in 'indexed units') and may vary from approximately USD 0 to USD 16 per hectare, depending on the amount of hectares (not progressive).

The ICIR will be determined taking into account the situation of the taxpayers as of 31 December 31 every year. Furthermore, the law empowers the tax authorities to settle advanced payments for this tax, although they have not executed that power yet.

Social Security Contributions (SSC)

The Uruguayan Social Security regime states that hiring personnel under a dependency relationship implicates the obligation (both for employer and employee) of making contributions over the compensations that constitute the taxable basis.

Taxable basis consists of all earning that in a regular and permanent basis, in cash or kind, susceptible to pecuniary appreciation, is perceived by the dependant personnel, in concept of remuneration and product of its personal activity in the frame of the working relationship. As a general rule, any compensation originated in activities carried out in Uruguay are subject to SSC.

The SSC rates are applicable on gross remunerations, according to the following percentages:

Concept	Employer contributions (%)	Employee contributions (%)
Retirement contributions *	7.5	15
Health insurance	5	3/4.5/6/8 **

Uruguay

Concept	Employer contributions (%)	Employee contributions (%)
Labor restructuring fund	0.125	0.125
Total SSC	12.625	18.125 to 23.125

* Both employer and employee retirement contributions rates are applicable, up to the monthly amount of 84,202 Uruguayan pesos (UYU) (approximately USD 4,200); the exceeding amount will be exempt.

** May vary depending on whether the employee is married and whether they have children.

Branch income

CIT is imposed at a rate of 25% on net income derived from business activities carried out in Uruguay. A 7% WHT is imposed on profits remitted or credited to a home office. Dividends and/or profits paid or credited to non-resident shareholders will not be subject to WHT when they are paid out of non-taxable income for CIT purposes.

Income determination

Inventory valuation

Replacement cost is permitted for tax purposes, as well as the first in first out (FIFO), last in first out (LIFO), or average cost methods, irrespective of the inventory valuation method used for accounting purposes.

Capital gains

Capital gains are treated as ordinary income for CIT purposes.

As a general rule, capital gains are calculated as the selling price minus the fiscal cost (usually acquisition cost updated by certain inflationary indexes) of goods being sold. In certain cases, not all the fiscal cost may be deductible depending on the application or not of the compulsory proportional deduction mentioned previously in the *Taxes on corporate income section*.

Furthermore, for certain capital gains, there are special ways of determining the taxable income (e.g. based on notional income).

Dividend income

Dividends received from local subsidiaries are exempt. Dividends received from foreign subsidiaries are out of the scope of this tax since they are considered foreign-sourced, thus non-taxable, income.

Interest income

Uruguayan-sourced interest income, derived by companies resident in the country, is subject to CIT under the general regime (i.e. taxed at 25%).

Foreign income

Uruguayan legal entities (CIT taxpayers) and non-residents operating through a PE in Uruguay are only subject to tax on income from Uruguayan sources under the territorial system of taxation. Hence, foreign-source income is not subject to tax.

However, there is an exception to this principle, as follows. When a CIT taxpayer obtains income as a consequence of rendering technical services outside the limits of Uruguayan

territory to another CIT taxpayer and such technical services are used by the recipient to obtain its income subject to CIT, the income obtained by the company rendering the services will be subject to CIT, even when foreign sourced. Technical services are those rendered in the fields of management, technical administration, or advice of any kind.

Income derived from activities performed, assets located, or rights utilised outside Uruguay, regardless of the nationality, domicile, or residence of the parties participating in the transactions and the place where the transaction agreements are subscribed, is not subject to CIT.

Income adjustment for inflation

An income adjustment for inflation has been in force since 1 January 1981 and is calculated by multiplying the variation in the wholesalers' price index for the financial year by the difference between:

1. total assets at the beginning of the year (excluding fixed assets) and
2. total liabilities at the beginning of the year.

If (1) is higher than (2), then an inflation loss adjustment is deducted from gross income. However, if (2) is higher than (1), then an inflation gain adjustment is added.

Deductions

As a general rule, duly documented expenses that are necessary to obtain and preserve gross taxable income are tax deductible. On the contrary, those expenses associated with deriving or preserving income not subject to CIT are not deductible from the taxable basis. Furthermore, for CIT purposes, all costs and expenses will be subject to the compulsory proportional deduction mentioned in the *Taxes on corporate income section (with some exceptions)*.

Depreciation and depletion

Straight-line depreciation over useful life is mandatory. Specific rates exist for the following cases: (i) 2% per year for urban buildings, (ii) 3% per year for rural buildings, and (iii) no less than 10% per year for new vehicles. Other rates are accepted if economically justified. No conformity between book and tax depreciation is required.

Percentages for depletion computed on the cost of natural resource properties are allowed in accordance with generally accepted criteria.

Depreciation and depletion percentages are computed on the historical cost of fixed assets revaluated at year-end, based on the variation of the wholesalers' price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

Goodwill

When transferring a business or a business unit, the difference between selling price and fiscal costs of the assets being transferred constitutes 'goodwill'. This goodwill constitutes an asset for the buyer and must not be depreciated neither for CIT nor NWT purposes.

Start-up expenses

Start-up expenses should be depreciated within a period of three to five years. The taxpayer may elect the number of years to depreciate those expenses within those period limits.

Uruguay

Interests expenses

Interests expenses, as well as other costs and expenses, are subject to the compulsory proportional deduction mentioned in the *Taxes on corporate income* section.

When companies derive both income subject to CIT and either income exempt or not included in CIT (e.g. from a foreign source), interest expenses associated to the former (i.e. deductible interest) will be determined by applying a proportion based on assets.

Bad debt

As a general rule, only those debts that are at least 18 months old will be deductible as 'bad debts'. However, national rules allow deductions under some other special situations.

Charitable contributions

Deductibility of charitable contributions will depend on the organisations receiving them.

Furthermore, there is a special regime to certain charitable contributions under which the contributor may deduct 25% of the contribution and the other 75% will be recovered through credit certificates that may be used to pay taxes (with certain limitations).

Fines and penalties

Fines and penalties generated in unduly paid taxes are not deductible for CIT purposes.

Taxes

CIT and NWT are not deductible.

Net operating losses

Losses may be carried forward and deducted from the net taxable income of the following five years, once adjusted for inflation. There are no loss carrybacks.

Payments to foreign affiliates

All accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer may deduct expenses from its gross income provided such expenses are subject to taxation (either via foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than the CIT rate of 25%.

Group taxation

Group taxation is not permitted in Uruguay.

Transfer pricing

As a general principle, transfer pricing rules are applicable to international transactions between related parties. However, Uruguayan legislation has extended the scope of these regulations to transactions carried out with low-tax or no-tax jurisdictions or regimes (either international or domestic) and to certain operations through third intermediaries. Domestic transactions with Uruguayan Free Zone users fall under this category.

The definition adopted by the law for related parties is quite broad. Such a relationship is configured when both parties are subject (directly or indirectly) to the management or control of the same individuals or legal entities, or when they have power of decision

to direct or define the taxpayer's activities due either to their participation in capital interest, the level of their credit rights, or their functional or any other type of influence (whether contractual or not).

Thin capitalisation

Thin capitalisation rules do not apply in Uruguay.

Tax credits and incentives

CIT reduction for income reinvested in fixed assets

40% of income reinvested in the purchase of (i) industrial and agricultural machinery, (ii) vehicles and installations, (iii) computers, (iv) telecommunications equipment, and (v) some assets for the tourism industry is exempt from CIT.

20% of income reinvested in the construction and expansion of industrial, agricultural, and tourism buildings is exempt from CIT (limited to 40% of net taxable income in the year of expenditure).

The joint amount of said investments can be deducted from the taxable basis, with a limit of 40% of the annual net profit, once the amount of other exemptions has been deducted. The excess can be deducted (with the same limitations) in the following two tax periods. It is important to mention that income exempt by these provisions cannot be distributed and must be retained as a reserve account, which ultimately can only be capitalised.

NWT exemption

Movable fixed assets directly connected to the industrial cycle and equipment for data processing are exempt from NWT.

All assets directly associated to the development of agricultural and/or farming activities will be exempt from NWT as long as the owners are individuals or companies with nominative shares also owned by individuals.

Investments law (IL)

Uruguay has modified the IL, achieving a better framework for local and foreign investments carried out in the country. To obtain tax benefits, the IL requires that enterprises obtain a government statement in this regard. The Bureau of Investor Assistance is in charge of monitoring the correct compliance of these projects.

The IL grants two types of benefits:

Automatic benefits

This kind of benefit is only for manufacturing, extractive, or farming/ranching activities, and includes:

- Exemption from NWT for chattel property directly engaged in the production cycle and data-processing equipment.
- Exemption from VAT and CIT paid on the importation of such goods, and reimbursement of VAT in the case of locally purchased items.

Discretionary benefits

Benefits that may be obtained at the discretion of the Executive Power for any type of business activity (not cumulative with automatic benefits) include:

Uruguay

- VAT and CIT exemptions (among other taxes) on importation of fixed assets items.
- NWT exemptions: permanent for chattel property items, for a period of eight years for construction work in Montevideo (capital city), and for a period of ten years in the rest of the country.
- VAT reimbursement on local purchase of goods and services for civil construction work.
- Increased deductions for CIT in respect of fees and remunerations related to technological developments.
- Exemption from CIT, depending on the nature and size of the project to be carried out. The Executive Power takes into account the following criteria to grant this benefit:
 - Addition of technology to improve competitiveness.
 - Contribution to export growth and diversification.
 - Contribution to geographic decentralisation.
 - Improvement of technological investigation, innovation, and development.
 - Generation of employment.

Auto-saving ‘direction’ benefit

The auto-saving ‘direction’ benefit allows a company to deduct from the CIT basis the amount of the capital increase that occurred as a consequence of the reserves capitalisation or of the in-kind distribution of shares, for an amount equivalent to the investment carried out with the investor’s own funds. The amount of the CIT deduction and the period/s to which said exemption will apply is granted by the government through a statement issued by the Executive Power.

Free zones (FZs)

Following the approval of the FZ law in 1987, this system has become an important tool for attracting investments to Uruguay.

It has been utilised for carrying out traditional activities in the FZs (warehousing, logistics, and distribution), for the provision of services (software, finance, call centres, etc.) and for manufacturing activities such as cellulose pulp and leather production. In a clear sign of stability, none of the administrations in office over the last three decades has modified the basics of the FZ system.

The law defines FZs as privately or publicly owned isolated and fenced off areas of Uruguayan territory determined by the Executive Branch with the purpose of carrying out all types of manufacturing, commercial, and service activities within the zone, while enjoying tax exemptions and other benefits envisaged in the law.

Companies in these areas cannot carry out industrial, trading, or service activities in the non-FZ Uruguayan territory, except for services expressly authorised by the government (listed below) but are allowed to render all types of services within the FZs or to third countries.

FZ users are allowed to render the following services to the non-FZ Uruguayan territory (the provision of these services is subject to the general tax system, not to the tax holidays):

- International call centres, except for those whose main destination is the non-FZ Uruguayan territory.
- E-mail, distance learning, electronic signature certificate issuance.
- Software production, technology consulting, and related training services.

- Accounting, administration, and management services rendered to related companies who carry out port and shipping logistics activities, if said services are lower than 20% of the total income obtained during the fiscal year.
- Processing of film material and data.

FZ users are exempt from all current and future national taxes, including those taxes for which a specific legal exemption is required, in connection with the activities performed within the FZs. The Uruguayan government guarantees all the exemptions and benefits granted by the law for the term of their contracts. FZs can be located outside or inside the cities; it depends on the kind of FZ.

Social security taxes, as well as certain WHTs, are excluded from the exemption. WHT on payments of dividends made by these companies to their non-resident shareholders are exempt.

Industrial park incentives

Individuals or legal entities that establish industrial parks within Uruguayan territory, as well as companies located within such industrial parks, are entitled to CIT exemption for their industrial equipment, excise tax and VAT exemption on the acquisitions of such goods, and other benefits.

Holding companies

Uruguayan legal entities holding shares in non-resident entities or investing in assets not located in Uruguay are not subject to tax (due to the application of the source principle).

Industry-specific incentives

Printing industry incentives

Companies that print books and educational material are exempt from the NWT and VAT.

Electric power industry incentives

Companies which generate electric power from non-traditional energy sources have special benefits regarding CIT (from 40% to 90% exemption).

Machinery industry incentives

Companies that build and/or assemble (under certain conditions) machinery with agricultural purposes have special benefits regarding CIT (from 50% to 90% exemption).

Shipping industry incentives

Imports of material, supplies, and equipment required for the construction, maintenance, and repair of shipyards or vessels are exempt from VAT. The shipbuilding industry has special benefits regarding CIT (from 50% to 100% exemption).

Water and air transportation incentives

The income of water and air transportation companies is tax exempt. In the case of foreign companies, the exemption is subject to reciprocal treatment. The Government may exempt from CIT companies engaged in transportation by land, subject also to the conditions of reciprocal treatment.

Forestry plantation incentives

Income derived from forestry plantations up to July 2007 is tax exempt. Income derived from new forestry plantations is also tax exempt, but under strict conditions, such as wood quality.

Uruguay

Software industry incentives

Software production and related services are exempt from CIT as long as either the final product or the related services are entirely used in a foreign country.

Electronic industry incentives

The production of electronic devices has special benefits regarding CIT (from 50% to 100% exemption).

Tourism industry incentives

Investments in the tourism industry have tax benefits related to CIT, VAT, and NWT, as follows:

- Deduction of up to 40% of CIT in investments made in the fiscal year in hotel equipment and equipment for improving entertainment and information services to tourists and deduction of up to 20% of CIT in investments made in construction and expansion of hotel buildings, with the limits mentioned in previous sections (40% of the annual net profit, once the amount of other exemptions has been deducted).
- VAT refund included in local acquisitions of goods and services for construction, improvement, or expansion of tourist complexes.
- VAT exemption on import of goods for construction, improvement, or expansion of tourist complexes.
- The list of operations included in the concept of exports of services for VAT purposes (thus zero-rated) was broadened to include, among others, services related to accommodation that hotels, apartments, and rural tourism establishments provide to tourists.
- NWT exemption for ten years on investments in infrastructure and civil work for construction, improvement, or expansion of tourist complexes.
- NWT exemption for four years on fixed assets investment for tourist complexes.
- 50% exemption of import duties on materials and goods for construction, improvement, or expansion as well as fixed assets of tourist complexes.

Withholding taxes

All Uruguayan-sourced income obtained by non-residents (other than those obtained through a PE in Uruguay) is taxed at flat rates of up to 12% on gross income, with some exceptions. This tax is basically collected by way of WHT.

The exceptions are as follows:

- Interest on deposits in local currency for terms exceeding one year is taxed at 3%.
- Interest on public bonds is not taxed.
- Dividends paid or credited by CIT taxpayers are taxed at 7%, provided they are derived from taxable income.

Profits originated in the alienation of stock of CIT taxpayer companies obtained by non-residents are exempt only if the capital of the local company is expressed in bearer shares. The alienation of registered stock is taxed at a rate of 12%.

Although the Uruguayan tax law follows the source principle, technical services (defined as services rendered in the fields of management, technical administration, or advice of any kind) rendered in another country by non-residents but associated with taxable income obtained by the local user in Uruguay are considered to be Uruguayan sourced for tax purposes and subject to WHT. However, when the taxable income obtained by

the local user of the service does not exceed 10% of its total income, then only 5% of the service fee paid or credited abroad will be subject to non-resident WHT. Therefore, in these cases, the effective WHT rate is only 0.6% (5% x 12%).

This WHT should be declared and paid to the Tax Office on the month following the one in which the tax is withheld.

For those countries with which Uruguay has entered DTTs, the WHT rates are the following:

Country	Dividends (%)	Interest (%)	Royalties (%)
Internal law	0/7	0/12	0/12
Germany	5/15 (4)	10	10
Hungary	15	15	15
Mexico	5	10	10
Spain	0/5 (1)	10	5/10 (2)
Switzerland	5/15 (3)	10	10

Notes

1. Source country may tax at a rate not higher than 5%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 75% of the capital of the company distributing dividends, then the WHT will be 0%.
2. Will depend on the kind of royalty paid.
3. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.
4. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.

Tax administration

Taxable period

The taxable period may be chosen by the company. However, certain sectors or industries have mandatory fiscal year closing dates.

Tax returns

CIT and NWT are self assessed and their tax returns are filed on the fourth month following the date of the year-end.

Payment of tax

Income and capital taxes are paid monthly by way of advanced payments, which are calculated on the basis of the previous year's tax. The difference between the advanced tax payments and the total annual tax calculated at fiscal year-end is paid four months after the fiscal year-end.

Significant developments

There have been no significant corporate tax developments in Uzbekistan during the past year.

Taxes on corporate income

Resident corporations pay corporate income tax (CIT) on their worldwide income, whereas non-residents (i.e. foreign legal entities that have a permanent establishment [PE] in Uzbekistan or have income from sources in Uzbekistan not associated with a PE) pay CIT on income resulting from activities/sources in Uzbekistan.

Non-resident corporations are taxed directly at the level of their Uzbek PE, if there is one, or via withholding tax (WHT) at the source of payment of the Uzbek-source income.

CIT is charged on taxable profit calculated as a difference between gross income and deductible expenses reduced by applicable incentives granted by the Tax Code, other laws, or presidential decrees.

The CIT rate is set annually by presidential decree. By virtue of the government's annual initiatives for rate reduction, the CIT rate has been reduced over time as follows:

2012: 9%	2007: 10%	2002: 24%
2011: 9%	2006: 12%	2001: 26%
2010: 9%	2005: 15%	2000: 31%
2009: 10%	2004: 18%	1999: 33%
2008: 10%	2003: 20%	1998: 35%

In 2012, enterprises (i.e. legal entities) are generally subject to CIT at the rate of 9%. Commercial banks are subject to CIT at the rate of 15%.

Local income taxes

There is a local tax on accounting profit (less CIT), an infrastructure development tax, which is charged at a maximum rate of 8%.

Corporate residence

For Uzbek tax purposes, corporations are classified as resident or non-resident. A resident corporation is a legal entity that passed state registration in Uzbekistan (i.e. Uzbek legal entity). Other legal entities would be regarded as non-resident corporations for tax purposes.

Permanent establishment (PE)

PE is defined by the Tax Code as “any place through which non-resident carries out entrepreneurial activity in the Republic of Uzbekistan, including activity carried out through an authorised person. PE would also be existent where non-resident carries on entrepreneurial activity for 183 days (or more) in any consequent 12-month period ending in the current tax period”.

Other taxes

Value-added tax (VAT)

Legal entities are subject to VAT, which is applied to taxable turnover and taxable imports. The rate for taxable turnover is 20%. This rate also applies to taxable imports, for which the tax base is determined as the customs value plus import duties and excise tax (on excise-liable goods). Export of goods for hard currency is generally zero-rated. Insurance and most types of financial services are exempt.

Customs duties

Import of certain goods to Uzbekistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Rates of customs duties vary from 5% to 40% depending on the type of imported goods. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

Excise taxes

Legal entities producing or importing excise-able goods (e.g. cigarettes, jewellery, petrol, alcohol drinks) are subject to excise tax. Rates vary from 5% to 200% depending on the type of goods produced/imported. The taxable base is determined as the value of produced/imported goods excluding VAT.

Property taxes

The property tax rate in 2012 is 3.5% for legal entities. The tax is computed quarterly, based on the net book value of the fixed assets, adjusted for the effect of revaluation, which should be performed annually on 1 January, the residual value of intangibles, and the value of overdue construction-in-progress. The rate is doubled for equipment not installed in due time.

As of 1 January 2011, a charge of 0.25% of the historic value of outdated equipment is collected from legal entities (except for micro-firms and small enterprises) for exploitation of fully depreciated equipment.

Newly opened enterprises are exempt from property tax for a period of two years from their date of registration, unless such enterprises have been created on the basis of production facilities or assets of existing enterprises. There is also a rate reduction benefit available to companies engaged in production and export of goods (work, services). Property tax exemption is also available in respect to leased property, for a period of the lease, and new technological equipment, for a period of up to five years.

Uzbekistan, Republic of

Land tax

Enterprises, including foreign legal entities operating in Uzbekistan via a PE, owning land plots or rights of their use are subject to land tax or land lease payment annually. Land tax is charged at fixed fees that vary depending on the quality, location, and level of water supply of each land plot. Land lease payment is charged at negotiable rates; however, the minimum amount cannot be less than the land tax rate for the respective land plot. Land tax and land lease payment are computed based on the area of the land being in use.

Stamp duties

According to Uzbek legislation, stamp duty is an obligatory payment charged for performance of legal actions and/or issuance of legal documents. The following actions, among others, are subject to stamp duties: filing claims, performing notary actions, civil registration, state registration of a legal entity, obtaining licences/ permits to carry out certain activities, etc.

The rates of stamp duties generally vary from 0.5 to 20 times minimum monthly wage (MMW, approximately 35 United States dollars [USD]), depending on the type of action executed. For instance, duty for filing a claim depends on the amount of claim. If the amount is less than 20 MMW, the duty comprises 5% of this amount; if the amount exceeds 80 MMW, the duty is 20% of this amount. Duty for notarisation of copies of documents for legal entities is 2% of the MMW per each page of the document. Duty for registration of legal entities with foreign investment comprises five times the MMW plus USD 500.

Turnover taxes

There are three mandatory contributions that are charged on the enterprise's gross annual turnover (less VAT and excise tax):

- Road fund to be imposed at a rate of 1.4%.
- Pension fund at a rate of 1.6%.
- Educational and medical institutions fund (for reconstruction, capital repair, and equipment) at a rate of 0.5%.

The taxable base (and tax rate in exceptional cases) for these mandatory contributions may differ depending on the type of activity of a company.

Water-use tax

Enterprises (including PEs) using water in their production are subject to water-use tax. The tax rate is set by the Cabinet of Ministers and depends on the source of water consumption (i.e. surface or underground). Water-use tax is calculated based on the volume of the water consumed.

Unified social payment (USP)

Employers are subject to USP assessed on total payroll cost related to local and expatriate staff. This payment is collected by the tax authorities. The rate of USP is 25%.

As of 1 January 2012, income of foreign personnel paid to non-resident legal entities as part of secondment fees under personnel provision agreements is subject to USP. The taxable base for calculation of USP on such income shall be the income of foreign personnel provided, but not less than 90% of the secondment fee payable under the personnel provision agreement.

Taxes of subsurface users

In addition to standard taxes, subsurface users (i.e. legal entities and individuals exploring and extracting natural resource) are subject to subsurface users' specific taxes, as listed below:

Subsurface use tax (royalty)

Subsurface use tax is charged on volume of produced (extracted) natural resources that are ready for sale or transfer (including free of charge) and consumption for internal purposes. Taxable base is determined as average weighted sales price.

Business activity	Tax rate examples
Extraction of natural resources	natural gas 30%, precious stones 24%, oil 20%, gold 5%, silver 8%
Utilisation of by-products received during the extraction of natural resources	30% of tax rate applicable to main natural resources extracted

Excess profits tax

Excess profits tax is assessed on the difference between the selling price of the extracted natural resources (as per the list) and the statutory price set by the legislation. Excess profits tax is not payable by entities operating under production sharing agreements.

The list of natural resources and goods subject to excess profits tax includes copper, cement, natural gas, polyethylene granules, and clinker. Excess profits tax is paid at 50% of the taxable base.

Signing and commercial discovery bonuses

Signing and commercial discover bonuses are one-off payments to the state budget. The signing bonus is payable for the right to engage in exploration and extraction of natural resources and range from 100 to 10,000 times the MMW, depending on the type of minerals. The commercial discovery bonus is paid for each field where a subsurface user discovers the natural resources and comprises 0.1% from the cost of the proved reserve volume.

Branch income

There is no concept of a 'branch' of a foreign legal entity in the Uzbek legislation. Instead, such entities use a PE registration to perform business activities without establishing an Uzbek company.

In addition to CIT, non-residents operating in Uzbekistan via PE pay net profit tax assessed at 10% on accounting profit less CIT.

Income determination

Inventory valuation

Uzbek legislation permits the application of the weighted average cost method (AVECO) and the first in first out (FIFO) method for the valuation of inventory for tax purposes.

Uzbekistan, Republic of

Capital gains

Capital gains arising from the disposal of tangible and intangible assets are calculated as the difference between the selling price and the net book value of an asset. The capital gain is included in taxable profits (unless specifically exempt), and the capital losses are deductible (only if the disposed asset had been used for business purposes for three or more years). This is applicable to Uzbek legal entities and PEs of foreign legal entities. Capital gains on non-resident companies may be subject to WHT at 20% as 'other' income.

Dividend income

Dividends paid by a domestic subsidiary are subject to 10% WHT at the source. The net dividends received by its domestic parent company are then excluded from its CIT base. Such net dividends received by a foreign parent company are taxed in accordance with the respective country's internal legislation or DTT provisions (if Uzbekistan has a DTT with this country). *See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.*

Interest income

Interest income is subject to 10% WHT at the source. The net interest income received by companies is then excluded from its CIT base. Such net interest income received by foreign companies is taxed in accordance with the respective country's internal legislation or DTT provisions (if Uzbekistan has a DTT with this country). *See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.*

Foreign income

Gross foreign income of a resident corporation (e.g. income from its foreign branch) should be included in its aggregate income on an accrual basis, regardless of remittance date. Expenses incurred abroad in relation to such foreign income would be deducted subject to provisions of the Uzbek Tax Code. Foreign income tax paid on such income should be credited against the Uzbek CIT only if this branch is registered in a country with which Uzbekistan has a DTT. There are no deferrals for foreign income to be recognised for Uzbek tax purposes.

Deductions

The tax base for CIT purposes varies significantly from the computation of taxable profits in most Western jurisdictions. Expenditures such as entertaining, benefits-in-kind, and business trip allowances exceeding the statutory norms (that are generally low) are non-deductible.

There are additional costs that cannot be deducted by PEs of foreign legal entities, such as interest on head office loans; commission fees charged by the head office; and royalty, administrative, and management expenses of the head office incurred outside Uzbekistan. However, PEs are eligible to deduct expenses incurred outside of Uzbekistan if they directly relate to their business in Uzbekistan.

Depreciation and amortisation

For tax purposes, depreciation/amortisation is calculated with application of rates defined by the Tax Code. If depreciation for accounting purposes is charged at higher rates (compared with the Tax Code rates), the difference would be treated as a temporary difference for CIT purposes (i.e. deducted in future periods).

Uzbekistan, Republic of

Depreciation is calculated from a month following the month when the asset was put into use until it is fully depreciated, disposed, or written off. The maximum annual depreciation rates applicable to different types of fixed assets are outlined in the table below.

Depreciable item	Rate (%)
Buildings and other structures	5
Cars, tractors, special equipment, computers and related hardware	20
Lorries, buses, special cars and trucks, industrial machinery and equipment, agricultural machinery and equipment, oil extraction and mining equipment, office furniture	15
Railway, river and air transport vehicles, thermo-technical equipment, turbines, electric and diesel drives, power supply and communication lines, pipelines	8
Depreciable assets not mentioned above	10

For statutory accounting purposes, fixed assets can be depreciated using one of the following methods:

- Straight-line method.
- Production method.
- Double-declining-balance method.
- Sum-of-the-years' (cumulative) method.

Intangible assets, including leases and other property rights, are amortised over the shorter of an asset's useful life or the period of activity of the enterprise. Where an asset's useful life cannot be determined, the asset would be amortised over five years.

Expenses related to geological exploration and developmental works necessary for the extraction of natural resources are deductible for CIT purposes through depreciation at the rate of 15% per annum.

Goodwill

For tax purposes, expenses incurred for acquisition of goodwill should be deductible through monthly amortisation charges at norms calculated by the taxpayers based on historical cost of goodwill and its useful life.

Start-up expenses

Current legislation does not provide specific guidance on tax treatment of start-up expenses. However, as per Uzbek accounting legislation, certain types of start-up expenses (e.g. expenses for acquisition of right for production, right for rendering services and carrying out works, right to use economic or other privileges) can be considered as expenses for procurement of intangible assets and, respectively, can be deducted through monthly depreciation charges.

Interest on short-term loans

Interest is deductible, except for interest on overdue/delayed loans (i.e. 'penalty interest') and interest capitalised in the value of fixed assets (i.e. in cases where a loan was obtained to purchase fixed assets).

Bad debt

Bad debts are deductible for tax purposes in cases where they are recognised in accordance with Uzbek accounting legislation. Otherwise, such expenses should be

Uzbekistan, Republic of

considered as non-deductible. According to the current Uzbek legislation, arrears are recognised as bad debts upon expiration of three-years from their due date.

Charitable contributions

Charitable contributions are generally treated as non-deductible expense and added-back to the taxable base.

However, taxable income can be reduced for the amount of charitable contributions to ecological and charitable foundations and cultural, medical, educational, and municipal institutions, not exceeding 2% of the taxable income.

Fines and penalties

Fines and penalties are considered as non-deductible expenses.

Taxes

Generally, taxes are deductible for CIT purposes. The exceptions are the infrastructure development tax based on after-tax profits and the net profit tax for PEs.

Other tax losses

In cases where goods or services are sold below cost (or given for free), the revenue should be adjusted for tax purposes to the cost or purchase price of the goods or services.

Production wastes and defects within statutory norms, and losses resulting in *force-majeure* circumstances, are generally deductible.

Losses from the disposal of fixed assets also may be deducted, if the fixed asset has been used for three or more years.

Net operating losses

Tax losses may be carried forward for a period of five years, allowing a reduction of taxable income of the respective year by up to 50%. Loss carrybacks are not permitted.

Payments to foreign affiliates

There are no special tax provisions regarding deductibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met (*see Transfer pricing in the Group taxation section*).

Group taxation

There is no provision for consolidation of income or losses by related companies for tax purposes in Uzbekistan. A foreign legal entity that has several PEs in Uzbekistan may not consolidate those for tax purposes.

Transfer pricing

As of 1 January 2010, the transfer pricing concept was reintroduced in the Uzbek Tax Code. However, it is limited to a couple of paragraphs stating that tax authorities may adjust prices used by interrelated parties if these prices differ from the prices which would have been used in transactions with independent parties. There is no further guidance for application of this rule, which gives rise to different interpretation by tax authorities and taxpayers.

Thin capitalisation

Effective legislation does not provide for thin capitalisation rules, except for debt-to-equity ratios set up by the Central bank of Uzbekistan (CBU) for commercial banks.

Tax credits and incentives

The current tax legislation offers tax incentives for enterprises in oil and gas exploration/development projects, enterprises engaged in the production and export of goods for foreign currency (when export share exceeds 15%), and companies rendering certain services.

Incentives for oil and gas exploration and extraction companies

Foreign companies carrying out oil and gas exploration works, as well as their foreign contractors/subcontracts engaged in such works, are exempt from payment of all forms of taxes and contributions to non-budget funds during the exploration period. Additionally, import by these companies of equipment, material, and technical resources and services necessary for the exploration and related works is exempt from customs duties.

Resident corporations supplying materials and rendering services to foreign companies carrying out oil and gas exploration are exempt from VAT.

Furthermore, if foreign companies carrying out oil and gas exploration form joint venture companies for extraction of oil and gas at respective fields, such companies are granted a seven-year CIT holiday starting from the date of commencement of extraction.

Incentives for carrying out export activities

Enterprises exporting goods (works, services) of their own production for freely convertible currency may apply reduced rates of CIT as follows:

- If export share of total sales ranges from 15% to 30%, the effective rate shall be reduced by 30%.
- If export share of total sales is 30% or more, the effective tax rate shall be reduced by 50%.

This incentive is applied likewise in regards to property tax as follows:

- If export share ranges from 15% to 30%, the property tax rate is reduced by 30%.
- If export share is 30% or more, the property tax rate is reduced by 50%.

The incentive in both cases is subject to a restriction that it does not apply to wholesale/retail sale or intermediary companies, nor to revenues from the export of specific items such as cotton fibre, oil, gas, precious metals, etc.

Producers can also defer payment of their import VAT in respect of material and technical resources used for production of goods to be exported. The deferral is granted for up to 90 days without application of any interest.

Incentives for service companies

Micro-firms and small enterprises engaged in certain types of activity are exempt from CIT and unified tax payment until 1 January 2014. These types include, without

Uzbekistan, Republic of

limitation, leasing, insurance, auditing/bookkeeping services, and repair of footwear and leather goods.

Exemptions from customs payments

There are certain customs exemptions offered by the legislation for the following:

- Technological equipment imported by foreign investors as their charter fund contribution.
- Technological equipment imported under projects for creation of new or the modernisation of existing production facilities (with appropriate certificates issued by an authorised bank).
- Property imported for production needs by foreign investors and enterprises with foreign investment with foreign participation in the equity of not less than 33%.

Foreign tax credit

In accordance with international tax treaties of the Republic of Uzbekistan, legal entities/residents of Uzbekistan can obtain a tax credit in respect of CIT paid outside of Uzbekistan. In order to claim tax credit, legal entities should provide a copy of tax payment order, confirmation from a competent tax authority, or any other document confirming payment of the tax outside of Uzbekistan.

Withholding taxes

WHT is to be withheld and remitted to the state budget by entities paying income to non-residents if these entities qualify under a tax agent definition (i.e. by (i) Uzbek legal entities and (ii) non-residents operating in Uzbekistan via PE).

The domestic WHT rates are as follows:

Payment	WHT (%)
Dividends and interest	10
Insurance and reinsurance payments	10
Freight	6
Royalties, services (including management, consulting services), rents, other income	20

Double taxation treaty (DTT) relief

Foreign legal entities that do not carry on activities in Uzbekistan through a PE are subject to WHT on income from sources in Uzbekistan, subject to the terms of a relevant DTT. Uzbekistan has signed DTTs with 50 countries; 48 of them are in force.

DTTs in force establish WHT rates as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Austria	5 (2)/15	10	5
Azerbaijan	10	10	10
Bahrain	8	8	8
Belarus	15	10	15

Notes

1. Where the beneficial shareholder owns no less than 10% of the voting shares.
2. Where the beneficial owner holds at least 10% of the capital of the paying entity.
3. Where royalties are paid for patents, trademarks, know-how, etc.
4. Where royalties are paid for copyrights on literature, cinema, musical works, etc.
5. Where royalties are paid for secret formulas, processes, or know-how.

Uzbekistan, Republic of

6. Where royalties are paid for computer software, patents, designs, models, or plans.
7. Where one of the following conditions is met: (a) recipient is a local authority or corporate body constituted under public law, including the central bank of the state, or interest is paid by the local authorities or corporate bodies; (b) interest is paid in respect to debt claims or loans, guaranteed, insured, or aided by the state or on behalf of the state; (c) interest is paid in respect to credit sales of industrial, commercial, scientific equipment of goods and merchandise or provision of services by an enterprise to another enterprise; or (d) interest is paid in respect to a loan of any kind granted by a bank.
8. Where the beneficial shareholder owns no less than 25% of the capital of the paying entity.
9. Where the recipients of the interest are governments of contracting states or any governmental body (such interest is exempt from WHT).
10. Where royalties are paid in respect to uses or the rights to use industrial, commercial, or scientific equipment.
11. Where the beneficial shareholder owns no less than 20% of the voting shares.
12. Where interest is paid in respect to: (a) a loan made, guaranteed, or insured by the government of the other state; (b) the sale on credit of industrial, commercial, or scientific equipment; (c) the sale of merchandise by an enterprise to another enterprise; or (d) a loan of any kind granted by a bank.
13. Where the interest is received by any financial institution (including insurance companies).
14. Where interest is beneficially owned by the other contracting state or local authority or an instrumentality of such other state authority and is not subject to tax by that other state.
15. Where the recipients of the interest are governments of contracting states, National Bank of Hungary, Eximbank Hungary Pte. Ltd., Central Bank of Uzbekistan, or the National Bank of Uzbekistan for foreign economic activity (such interest is exempt from WHT).

Note that there may be other WHT rates offered by protocols to the individual treaties.

Tax administration

Taxable period

The taxable period for CIT is a calendar year.

Tax returns

CIT is reported quarterly before the 25th day of the month following the reporting quarter, with an annual return due by 25 March following the reporting year for enterprises with foreign investment and 15 February following the reporting year for other categories of CIT payers. PEs report on CIT once a year prior to 25 March following the reporting year.

Payment of tax

Uzbek enterprises, including enterprises with foreign investment, are required to make advance instalments of CIT in each quarter based on estimated profits in the quarter. The instalments are payable by the tenth day of each month. Final quarterly payments based on actual profit figures are payable no later than the filing deadline for the quarterly tax returns (which is the 25th day of the month following the period of assessment). In case the final quarterly payment is more than 10% higher than advance instalments made in this quarter, tax authorities have the right to recalculate the advance instalments based on the actual quarterly profit figures and charge late payment interest accordingly.

Final CIT payment should be made no later than the date set as the deadline for annual return submission.

Payment of CIT by PE is made annually within a month after the filing deadline.

Audit cycle

Scheduled statutory tax audits are to be carried out once in three years (once in four years for micro-firms, small enterprises) by the tax authority of the district where the

enterprise is registered, i.e. district tax inspectorates. However, in certain cases, the tax audit is undertaken by the State Tax Committee, which is the highest tax authority.

The tax audits are aimed at verification of the tax returns submitted by the taxpayer. Normally, the tax authorities will review the accounting records, copies of tax returns, and source documents as required.

There can also be un-scheduled tax audits (e.g. in case of liquidation of the enterprise) and counter tax audits (e.g. to review transactions with the enterprise's supplier/customer who is under the scheduled tax audit).

In case of tax breaches revealed during tax audits, taxpayers should remove tax violations and pay respective taxes/obligatory payments and late payment interest within 30 days after the tax authority's decision is released. If accomplished within the deadline, the tax authority's decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from (i) the taxpayer's bank accounts (by issuing tax liability claim without acceptance), (ii) the taxpayer's debtors (by issuing tax liability claim on the debts payable to taxpayer), (iii) the taxpayer's property (by issuing tax liability claim upon decision of the court).

Another form of monitoring accuracy and completeness of fulfilment of tax liabilities imposed by the tax authorities is 'cameral control', which is performed at the time of tax returns submission. The tax authorities may require the taxpayer to amend the tax return(s) if they have revealed mistakes or inconsistencies therein. The amended tax returns should be filed within ten days.

Statute of limitations

The statute of limitations for tax purposes in Uzbekistan is set to five years.

Topics of focus for tax authorities

There are no officially announced areas of focus during tax audits. In practice, the tax authorities usually focus on currency control, cash discipline, deductibility of expenses for CIT purposes, and taxes on resources (e.g. excess profits tax, subsurface use tax).

Significant developments

Tax reforms and new taxes taking place in year 2011 mainly correspond to those elaborated in the Other taxes section (*see the Other taxes section for more information*).

Taxes on corporate income

Corporations resident in Venezuela are subject to corporate income tax (CIT) on their Venezuelan and foreign-source income, whereas corporations resident abroad with a permanent establishment (PE) in Venezuela are levied CIT on only their Venezuelan and foreign-source income attributable to said PE. Corporations are able to claim any similar taxes paid abroad on foreign source income as a tax credit. Non-resident corporations without a PE are subject to CIT only on Venezuela-source income.

Corporate income is taxed at the following progressive rates based on tax units (TU) (*see below*) (i.e. Tariff 2):

Taxable income		Rate (%)	Subtract (TU)
Over (TU)	Not over (TU)		
0	2,000	15	0
2,000	3,000	22	140
3,000	-	34	500

Tax units (TU)

The 1994 Income Tax Law reform established the concept of a taxable unit as an element that reduces the negative effects created by inflation on the determination of the tax rates. The tax code established the initial TU at 1 *bolívar fuerte* (VEF), with annual basis adjustments according to the variation on the consumer price index (CPI) from the previous year. For 2011, TU was VEF 76. For 2012, TU is VEF 90.

Additional rates and considerations

Income for oil exploitation and certain related activities is taxed at a flat rate of 50%. Related activities are comprised of those such as refinery, transportation, and purchases for the exports of hydrocarbons and by-products for the exploitation. Joint venture corporations are also subject to a 50% CIT rate.

The above indicated regime does not apply to corporations engaged in the exploration and exploitation of non-associated gas (and the processing, refining, transportation, distribution, commercialisation, and exportation of the gas and its components) or

companies exclusively engaged in the refining of hydrocarbons or improvement of extra heavy oil, which are subject to Tariff 2.

Local income taxes

See *Municipal business licence tax in the Other taxes for a description of local taxes on income.*

Corporate residence

According to the Venezuelan tax code, the following companies are regarded as resident:

- Companies incorporated in Venezuela and registered with the Mercantile Registry as established by commercial law.
- Foreign companies registered with the Superintendence of Foreign Investments (SIEX) to be resident in Venezuela as branches duly registered with the Mercantile Registry.

The following companies are non-residents but subject to Venezuelan taxes:

- Foreign companies registered with SIEX to provide technical assistance, technological services, royalty items, and professional services from abroad.
- Foreign banks granting loans to local companies.
- Foreign companies leasing goods to local companies.
- Foreign companies deriving income from economic activities carried out in Venezuela or from assets in Venezuela.

Permanent establishment (PE)

According to the Venezuela Income Tax Law (VITL), generally, a passive party is deemed to be carrying out operations in Venezuela through a PE when:

- The passive party owns, directly or through an agent, employee, or representative in the Venezuelan territory,
 - an office, fixed place of business, or an activity centre where its activities are totally or partially carried on
 - management head quarters, branches, offices, factories, shops, facilities, warehouses, stores, construction, installations, or assembling works, when the duration thereof exceeds six months, or
 - agencies or representatives authorised (according to the VITL) to contract in the name of or on behalf of the passive party.
- The passive party performs, directly or through an agent, employee, or representative in the Venezuelan territory, professional, artistic activities.
- The passive party possesses, directly or through an agent, employee, representative, or other contracted personnel in the Venezuelan territory, other work places where the operations are wholly or partially performed.

Any agent acting independently shall be excluded from this definition, except if such representative has the power to conclude contracts in the name of the principal.

Venezuela

Other taxes

Value-added tax (VAT)

Federal VAT (*Impuesto al Valor Agregado* or IVA), is a one-time tax payable by the ultimate consumer of all types of products and services. However, each business entity involved in the process from the sale of raw materials to the production and distribution of finished products to the ultimate consumer is required to include the tax on its products to customers (output tax) and to pay the tax on its purchases or imports of goods and services (input tax), crediting the amounts paid against the amounts due on its own activities. The net amount payable by each entity is considered to represent a tax on the value added.

In general, VAT does not represent an additional cost to business enterprises because even though all types of business enterprises, including government departments and agencies (with some exceptions), are required to accept charges of the tax by suppliers on their purchases of goods and services, such amounts are normally deductible from the liability of the business enterprises for the tax on their bills to customers.

There are exceptions, principally when the sales of an enterprise are exempt from VAT, in which case the enterprise is treated as the final consumer and must absorb any VAT charges on its purchases except insofar as its activities are subject to the zero rate (*see below*). However, input tax paid on goods or services used to produce items that are exempt from VAT may be deducted for CIT purposes.

Taxable transactions

In general, VAT is payable on all sales, rental, and importation of goods, and rendering of services executed or used in the country, although a number of significant exceptions are provided by law.

Sales of goods

The law defines a sale as any transmission of tangible goods, including those made on a conditional basis or through an irrevocable trust. The taxable amount of a sale includes the sale price as well as other amounts charged to the purchaser for other taxes, duties, interest, or surcharges of whatever nature. VAT becomes payable when the goods are invoiced or shipped to the customers or when the price is paid in full or in part.

Exempt sales include the following:

- Certain foods and other products for human consumption.
- Fertilisers as well as any natural gas used in the manufacturing thereof.
- Some products for animal consumption.
- Medicine.
- Products derived from hydrocarbons and some raw materials intended to improve the quality of gasoline.
- Wheelchairs.
- Books, magazines, newspapers, and the paper used in producing these products.
- Vehicles, aircraft, and trains for passenger transport.
- Machinery and equipment for agribusiness.
- Scientific equipment purchased by the government.

Services

Taxable services are those rendered within Venezuela by one person to another on an independent basis, transportation of passengers or goods, agency activities, technical assistance, and transfer of technology. VAT is payable to service providers at the

time the invoice is issued, the service is rendered, or the fee becomes demandable, whichever comes first. The taxable amount includes not only the price of services, but also charges to the customers for other taxes, interest, etc.

Exempt services include the following:

- Domestic land and maritime transportation of passengers.
- Educational services.
- Accommodations for students and persons with disabilities.
- Healthcare and dental services, surgery, and hospitalisation.
- Theatres, sports, and cultural events.
- Food services for employees and students.
- Certain utilities (e.g. electricity, water).
- Housecleaning.
- Transport services for hydrocarbon-derived fuels.
- Services involving livestock, poultry, and other minor species including breeding and production.

Exports

Exports are zero rated. Consequently, VAT is not payable on exports, including exports of in-bond processing companies, technical fees to foreign residents, and sales to in-bond processing companies and companies that export their entire production. Sale of natural hydrocarbon by joint ventures regulated by the Hydrocarbon Law to Petroleos de Venezuela S.A. (PDVSA) and affiliated companies are also taxable at 0%. Though exporters do not collect VAT on export sales, they may recover VAT charges on their purchases of goods and services by means of a refund certificate. This certificate may be used to pay other tax obligations. If such exporters carry out sales in the country, they will be entitled to recover only input VAT related to foreign sales.

Additionally, a zero rate applies to independent personal services provided by residents in Venezuela that are used solely by and for the benefit of persons abroad without a PE or fixed base in Venezuela.

Tax rates

The rate may change every year, within the range of 8% to 16.5%. Currently the general VAT rate is 12%.

An additional tax rate of 10% is applicable to the sale and imports of luxury products (e.g. vehicles valued at more than 30,000 United States dollars [USD], motorcycles with a cylinder capacity of 500 cc, nickel or token game machines, aircraft used for recreational or sport purposes, fighting bulls, trained horses, caviar, jewellery with precious stones valued at a price exceeding USD 500).

An 8% VAT applies to the following transactions:

- Goats, sheep, and minor species for slaughter or breeding.
- Meats in their natural state, or refrigerated, frozen, or salted meats, or meats in brine of goats, sheep, and poultry.
- Shortening.
- Rendering of professional services to any government entity, in any level or branch of government, provided such services do not involve any commercial transactions but rather predominantly intellectual work or efforts.
- Domestic air passenger transportation.

Venezuela

Payment and collection

Excess VAT charged or chargeable to customers over VAT paid to vendors or customs authorities (*Servicio Nacional Integrado de Administración, Aduanera y Tributaria* or SENIAT) including the correspondent payment, must be remitted to SENIAT within the first 15 days of the following month.

VAT exoneration

Among the fiscal policy measures applicable pursuant to the conjuncture, sector, and regional situation of the country's economy, the National Executive is entitled to exonerate the import and sales of goods and the rendering of services set forth in the respective decree from the payment of VAT.

Refunds/special regime for industrial projects

The VAT law stipulates a special regime for taxpayers engaged in the execution of industrial projects, whose duration exceeds six taxable periods. Pursuant to this regime, taxpayers will be able to suspend the use of input VAT generated during their operating stage, until such time as they begin generating fiscal output VAT.

Taxpayers engaged in the execution of industrial projects aimed at exporting or generating foreign currency may (with prior consent of the tax authorities), choose to recover the tax supported in construction operations involving the project, provided that they are carried out during the pre-operating stage of such project.

Input VAT subject to recovery must be determined after computing output VAT. In other words, input VAT originated from purchases of goods and reception of services is not subject to recovery if output VAT was not subtracted.

VAT withholding regimes

Taxpayers qualified by the tax administration as special taxpayers and public entities are designated as liable parties in their capacity as withholding agents in regard to payment of the VAT generated in their purchase of tangible goods or services received by providers that are regular taxpayers for VAT purposes.

The amount to be withheld on the part of the agents will be equal to multiplying the invoiced price of the taxed goods or services by 75% of the tax rate, except for those cases in which the VAT does not appear separately from the price, when the respective invoice does not comply with the formalities or requirements set forth in the tax law, or when the supplier is not registered for tax purposes. In these latter cases, 100% of the generated tax is to be withheld.

Suppliers may discount the VAT withheld from the tax liability determined for the period in which the VAT was withheld, provided that they have the receipt issued by the withholding agent. In those cases in which the tax withheld from the taxpayer exceeds the taxpayer's VAT liability corresponding to the relevant tax period, such taxpayer may discount the tax withheld from VAT liability corresponding to the following tax periods until their total exhaustion.

Customs duties

As a general rule, the importation of goods into Venezuela is subject to customs duties. These duties are generally levied on the cost, insurance, and freight (CIF) value of the product being imported, excluding VAT.

Custom duty rates generally range from 5% to 35%. The duty rates vary depending on the product involved. In general, import tariffs are 5% for capital goods, 10% to 15%

for raw materials and intermediate goods, and 15% to 35% for finished products. In addition, all imports are subject to customs handling charge, a duty import, and VAT.

Excise taxes

Tax on alcohol and alcoholic beverages

In general terms, the manufacture, commercialisation, and importation of alcohol and alcoholic beverages are subject to excise taxes. The Law of Tax on Alcohol and Alcoholic Beverages provides for three main types of excise taxes:

- Tax on the national production and importation of alcohol and alcoholic beverages, which is established on the basis of TU per litre and varies depending on the type of product.
- Additional excise tax per litre for national and imported beer and for other alcoholic beverages is levied on the sale of those products to the public, which is also provided on the basis of TU per litre, depending on the type of product.
- In addition to the above, another excise tax is imposed on the importation or local sale of national and imported alcoholic beverages to the public, which is levied on the sales price, which is provided on the basis of a percentage on the price of sale to the public and varies depending on the type of product.

Tax on cigarettes and manufacturing of tobacco

The importation and national production of cigarettes and tobacco to be consumed in Venezuela is subject to an excise tax. This proportional tax is levied at a rate of 70% on the retail price of cigarettes, tobacco, and its derivatives.

Urban Property Tax

The Urban Property Tax is a local or municipal tax payable by any person who owns property rights or any other real rights on urban real estates. The taxable basis is the value of the urban real estate. For these purposes, the fair market value of the real estate is provided as a point of reference. The applicable rate varies according to each municipality.

Public registry tax

Commercial companies are registered with the Mercantile Registry Office and are subject to a tax levied upon incorporation of a company and registration of capital increases. The tax is 1% of the amounts of subscribed or increased capital.

The sale of a going concern is also registered in the Mercantile Registry Office and is subject to a tax levied upon the total amount of the sell. The tax is 2% of the amount.

Stamp duties

The Stamp Duties Law establishes a number of stamp duties on the issuance of official documents (e.g. certificates, permits, authorisation, registrations). Stamp duties may be levied at fixed amounts (ranging from TU 0.01 to TU 10,000) or at a rate based on the value of the transaction or work in question.

District Capital stamp tax

Until May 2012, under their own interpretation of the District Capital Stamp Law, Mercantile Registries of the District Capital were charging 10% of the amount of subscribed or increased capital of companies and 20% for the sale of a going concern. An amendment on this Law enacted on 2 May 2012 reduced the applicable stamp tax to subscribed or increased capital of companies to 2%.

Venezuela

Gift tax

Overall, the Inheritance and Donations Tax Law, published on 1999, stipulates the taxes attributable to inheritances left by individuals. Nonetheless, this Law provides regulation about donations, which are significant to corporations. Subject to payment of the gift tax are the beneficiaries of gifts in the form of movable or real property, rights, or shares located in the country.

For tax calculation purposes, the progressive tax rate (up to 55%) set forth in the Law will be applied to the donated good. Both donors and donees are jointly liable for the tax generated from the gift.

The gift tax is applicable from the time in which the donors manifest before the National Treasury their will to donate and must be paid before the registration of any document formalising or evidencing the authenticity of the gift. Should the donation not be perfected due to express will of the donor or rejection on the part of the donee, the obligation to pay the tax will be eliminated and reimbursement may be requested of the amounts paid in this connection.

Under the transfer pricing rules contained in the Venezuelan Income Tax Law, the tax authorities are empowered to impute income in inter-company transactions at a price reflecting the fair market value of the property being transferred.

Before the introduction of transfer pricing rules, under the Inheritance and Donations Tax Law, the tax authorities could and still can presume in transactions involving a sale, assignment, barter, or transfer, the existence of a donation if, for instance, the price stipulated in such transaction does not reflect the real value of the property being transacted. In such a case, a gift tax may be imposed on the difference between the fair market value of the property being transacted and the consideration received in return.

Also, a cancellation of a debt gives rise to gift tax issues. In this regard, the Inheritance and Donations Tax Law provides that the total or partial forgiveness or cancellation of a loan must be viewed as a gift and, as such, subject to gift tax.

Increase of the windfall tax on oil production

Decree N° 8.163, dated 18 April 2011, provides for the increase of the windfall tax on oil companies. The aforesaid Decree abrogates the regulations on the tax published on April 2008. According to the enacted Decree, the tax is provided in the following terms:

- The contribution on extraordinary oil prices is a 20% tax on the difference in price when the internationally quoted price per barrel exceeds the budgeted price per barrel (for purposes of the Venezuelan Annual Budget Law), provided that the quoted price per barrel is equivalent or lower than USD 70 per barrel (i.e. the maximum basis is the difference between USD 70 per barrel and the current budgeted price of USD 50).
- The contribution on exorbitant oil prices is comprised of the following:
 - 80% tax on income generated by quoted oil prices between USD 70 and USD 90 per barrel (i.e. 80% on the range from USD 70 to USD 90 quoted price per barrel).
 - 90% tax on the difference in the quoted oil prices between USD 90 and USD 100 per barrel.
 - 95% tax on the difference over the threshold of USD 100 per barrel.

The tax is payable by oil companies exporting with sale purposes. Also, the Decree provided that the mixed companies (*empresas mixtas*) created in accordance with the

Master Hydrocarbons Law that sell oil and by-products to the state-owned company (PDVSA), or any of its affiliates, are also obliged to pay the above described tax.

On the other hand, tax exemption is provided for the following cases:

- For mixed companies working on the execution of projects on the development of new oil fields and those projects aimed at boosting oil production as declared by the Ministry of the Popular Power for Oil and Energy, until they have recovered their total investment. Parameters to determine the recovery of investment are to be separately established by the aforesaid Ministry by Resolution.
- Exports executed in connection with cooperation or financing international agreements.
- Exonerations may be granted by the National Executive Power for exports executed under economic or international cooperation measures.

The tax is payable on a monthly basis in foreign currency. Other terms of payments are to be regulated by Resolution.

The Decree also establishes USD 70 per barrel as the maximum price to be used as calculation basis for the payment of royalties, extraction tax, and export registration tax provided for in the Master Hydrocarbons Law.

The Decree was partially amended on 27 February 2012 to establish that PDVSA will act as perception agent.

Hydrocarbons Organic Law

The state is entitled to 30% of the volume of hydrocarbons extracted from any deposit, by way of royalties. The National Executive can reduce this within certain limits, when it is shown that certain types of deposits are not economically exploitable.

Persons conducting activities related to hydrocarbons must pay the following taxes:

Surface tax

For the portion of the surface area granted that is not under development, the equivalent of 100 TU for each square kilometre or portion of a square kilometre for every elapsed year is due as a surface tax. This tax will increase annually by 2% during the first five years and 5% during the following years.

Tax on own consumption

10% of the value of each cubic metre of hydrocarbon byproducts produced and consumed as fuel in wholly-owned operations, based on the price of the end consumer, is due as a tax. In the case that said product fails to be sold in a domestic market, the Ministry of Energy and Mines shall provide the price.

General consumption tax

For every litre of hydrocarbon byproducts sold in the domestic market, a tax is due at the rate of between 30% and 50% of the price paid by the end consumer, whose aliquot should be implemented annually between the two extremes under the Budget Law. This levy to be paid by the end consumer should be withheld at the supply source, to be handed over to the National Treasury on a monthly basis.

The National Executive may waive, in whole or in part, by the time specified, the general consumption tax, in order to encourage certain activities of public or general

Venezuela

interest. The National Executive can also reinstate this levy to its original level when the causes for the waiver cease to exist.

Gaseous Hydrocarbons Organic Law

The Gaseous Hydrocarbons Organic Law establishes a system of royalties, determinable by the volumes of gaseous hydrocarbons extracted from any deposit and not re-injected. The state is also entitled to a 20% share for this item.

The exploitation companies of gaseous hydrocarbons shall pay for the gaseous hydrocarbons consumed like fuel, the taxes settle down on the matter by applicable laws.

Contribution to support Organic Law on Sports, Physical Activity, and Physical Education

The Organic Law on Sports, Physical Activity, and Physical Education (Sports Law) was published on 23 August 2011. The purpose of the Law is to establish the public service nature of physical education and the promotion, organisation, and administration of sports and physical activity, as well as their organisation as an economic activity with social aims.

The provision of the Sports Law are of a public nature and are applicable to the public national, state, and municipal administration and organisations, and also to individuals and legal entities that conduct any activity related to the practice, promotion, organisation, sponsorship, administration, or any economic activity associated with sports or physical activities and education.

The Sports Law creates the National Fund for the Development of Sports, Physical Activity, and Physical Education, which will be constituted with the contributions made by companies or other public or private organisations that perform economic activities for profit in the country; by donations, gifts, or any other special contribution made by the Republic, the states, the municipalities, or any other public or private entity; and by the revenue produced by such funds.

The contribution will be 1% of the annual net of accounting profit and will be payable by all companies or other public or private organisations that perform economic activities within the country and obtain an annual net or accounting profit of more than TU 20,000. Up to 50% of the contribution can be for the implementation of the taxpayer's own projects, provided the respective project follows the guidelines to be issued by the National Sports Institute, which will be updated every two years.

Anti-drugs contribution

The Organic Drug Law published on 15 September 2010 stipulates that any company employing 50 or more employees must make an annual contribution from their operating profit equivalent to 1%. On the other hand, corporations with the specifications mentioned before but that are dedicated to the manufacture or import of alcohol beverages, tobacco, or their mixtures are required to make a contribution equivalent of 2% from their operating profit. Under the definitions established by this Law, operating profit can be understood as the result from subtracting the operating expenses from the income profit in accordance with the accepted Venezuelan general accounting principles.

This contribution will be collected by the National Anti-Drug Fund (FONA), within 60 continuous days counted from the end of the fiscal year.

Note that this contribution can be retrieved if the company performs:

- prevention programs and projects intended for the company employees and their family environment
- prevention programs for children and adolescents, or
- programs to fight drug trafficking.

Payroll taxes and other contributions

Contributions applicable to resident companies in Venezuela:

Contributions	Basis	Contribution basis (cap)	Employer contributions (%)	Employee contributions (%)	Notes
Mandatory social security regime contribution	Wages (normal or regular wages)	Up to five minimum salaries for urban workers	9/10/11	4	(1, 2, 5)
Employment benefit regime contribution	Wages (normal or regular wages)	Up to ten minimum salaries for urban workers	2	0.5	(1)
Housing regime contribution	Total monthly (or integral) salary	No cap (5, 6)	2	1	(5, 6)
Employee training contribution (INCES)	Total salaries paid by the employer for purposes of the employer's contribution.	No cap	2	0.5 (4)	(3, 4)
Workplace prevention, conditions, and environment contribution (LOPCYMAT)	Total salaries paid to employees	No cap is established	From 0.75 to 10	N/A	(7, 8)

Notes

1. As of 1 May 2012, the minimum monthly metropolitan salary amount was increased to VEF 1,780.45, and it will increase to VEF 2,047.52 as of 1 September 2012.
2. According to the current system, the employer's contribution to social security will depend on the company's risk qualification (minimum risk, middle risk, or maximum risk).
3. Regarding *Instituto Nacional de Capacitación y Educación Socialista* (INCES) contribution, the employer must contribute 2% of the total wages and salaries paid to employees.
4. Employers are also required to withhold 0.5% of the annual profit-sharing bonus paid to employees.
5. According to the *Ley Orgánica del Sistema de Seguridad Social* (LOSSS), the general rule for contribution basis for the new systems may not exceed ten minimum salaries. The transition rules establish a contribution basis of five metropolitan minimum salaries for urban workers for social security purposes. No cap is expressly established in the transition rules for the housing system and work, security, and health regime.
6. The basis of calculation of the housing contributions is the 'Integral Salary'. The Integral Salary is a concept established in the Organic Labour Law, and it comprises the following payments: commissions, gratifications, profit sharing bonuses, vacation bonus as well as surcharges for holidays, overtime, night shifts, among others, all of which are made to the employee and correspond to the services rendered by the individual.
7. Contributions to be made to this regime are exclusively for the employer and vary depending on the risk associated to the company. A company's risk is to be determined by the *Instituto Nacional de Prevención, Salud y Seguridad Laborales* (INPSASEL). To date, INPSASEL has not been created and employers will continue making their contributions to the Venezuela Social Security Institute.
8. *Ley Orgánica de Prevención, Condiciones y Medio Ambiente de Trabajo* (LOPCYMAT) regulations do not establish a cap for the contribution. However, as mentioned, the LOSSS establishes a maximum of the minimum urban salaries. For this reason, there are several contrary interpretations on whether a cap should be applied in this case.

Venezuela

Other contributions	Basis	Contribution basis (cap)	Employer contributions (%)	Employee contributions (%)
Science, technology, and innovation contribution (LOCTI) (1)	Total annual income	N/A	0.50/1/2	N/A
Anti-drug contribution (LOD) (2)	Operating profit	N/A	1/2 (3)	N/A

Notes

1. *Ley Orgánica de Ciencia, Tecnología e Innovación* (LOCTI) (see below).
2. *Ley Orgánica de Drogas* (LOD).
3. 2% in the case of companies that manufacture or import alcohol beverages or tobacco. 1% for companies that employed 50 or more employees.

Science, technology, and innovation contribution

The Law on Science, Technology, and Innovation (LOCTI, by its Spanish acronym), dated 16 December 2010, establishes a mandatory contribution to be paid by companies that obtained, in the previous fiscal year, over TU 100,000 in gross income.

The kind of companies that are required to pay this contribution are stock companies, limited liability companies, partnerships, communities, irregular associations, associations, foundations, and permanent establishments or fixed bases located inside or outside the national territory with current activities in Venezuela.

Contributions established in the LOCTI are as follows:

- Contributions made from companies related to bingos and casinos activities, alcoholic drinks, or tobacco: the companies engaged in activities related to bingos and casinos, alcoholic drinks, or tobacco must contribute annually the equivalent of 2% of gross income.
- Contributions made by private companies engaged in hydrocarbon or mining activities: the companies that are engaged in hydrocarbon activities, including gaseous hydrocarbons, or mining activities, must contribute the equivalent amount of 1% of gross income.
- Contributions made by companies engaged in other economic activities: these companies must contribute annually the equivalent of 0.5% of gross income.
- The company that performs activities with two different percentages will apply the highest one.

The National Fund for Science, Technology, and Innovation (FONACIT) is the entity responsible for the administration, collection, control, verification, and qualitative and quantitative determination of the contributions.

Although the contribution to FONACIT is mandatory, companies can retrieve these resources, providing in the third quarter of each year an annual investment in science, technology, and innovation containing the projects planned for the next year, in line with priority areas and guidelines established by the national authority.

At present, the National Government has given informally the following areas as a priority to which projects should focus on the annual plan:

- Housing and habitat.
- Dynamics, trends, and challenges for urban development.
- Impact of climate change.
- Energy efficiency.

Municipal business licence tax

Companies and business entities, as well as individuals and unincorporated companies, are subject to municipal tax on gross income from industrial or trade activities carried on in the municipality during the fiscal year. The rates range from 0.1% to 10.0%, depending on the activity and the municipality.

Other municipal taxes

Municipalities also tax vehicles, public entertainment, legal bets, and commercial advertisements. There also are various municipal tariffs and fees.

Branch income

Branches of foreign corporations are subject to the same tax rules as Venezuelan corporations. Inter-branch income and deductions must be eliminated. The positive difference between a branch's annual book and taxable income is deemed to be remitted to the branch's head office (branch profits tax). Such remittances are subject to the 34% flat dividend tax (*see Dividend tax in the Income determination section for more information*) regardless of whether there is an actual payment unless the branch can provide proof of reinvestment of its profits for a five-year period. If such proof is established, no deemed remittance is assumed.

A Venezuelan taxpayer has to recognise, annually on an accrual basis, income generated in a company or other legal entity it controls which is located in a jurisdiction with low fiscal taxation (JLFT). Further, investments in JLFT must be declared to the SENIAT.

Income determination

Inventory valuation

Inventories may be valued at cost or the lower of cost or market value. Any method generally accepted for accounting purposes can be accepted for tax purposes.

Capital gains

Capital gains are taxable as ordinary income, and capital losses are deductible from ordinary income. Note that capital losses resulting from the sale of stock, capital reduction, or liquidation of a company are only deductible if they meet one of the following conditions:

- The cost of the capital stock was not in excess of the price quoted on a stock exchange or an amount with a reasonable relationship to the book value of the capital stock.
- The holding period of the investment was for at least two years immediately preceding the date of the sale.
- The stockholder proves that the company selling the shares carried on economic activities for at least two years, preceding the date of sale.

At present, the tax law contains two different rulings relevant to the deductibility of losses incurred through operations on the Venezuelan Stock Market, one of which has

Venezuela

been described above. The second ruling pertains to income obtained from operations on the local market. This income is subject to a final 1% tax that is withheld at the source. Losses in this kind of operation are not deductible against other income. Corporate shareholders not domiciled in Venezuela may not deduct such losses from other taxable income other than dividends arising from Venezuelan sources.

Gains upon liquidation or reduction of capital are taxable to the liquidating entity.

Dividend income

A dividend tax is levied at a flat rate of 34% on the positive difference between book income and tax income generated after 2000. Book income is understood to be that approved at a shareholders' meeting and based on the financial statements prepared pursuant to generally accepted accounting principles (GAAP). To determine the applicable difference, a last in first out (LIFO) method applies. The tax is triggered when dividend is paid and shall be remitted via withholding. Withholding is to be made at the moment a dividend is declared or credited to the account a recipient. The 34% (domestic) rate can be mitigated under tax treaties.

Dividends obtained from companies incorporated or resident abroad or incorporated abroad and resident in Venezuela are taxed at a flat 34% rate.

Stock dividends

Dividends of stock are subject to payment of the aforementioned dividend tax. Moreover, stock dividends are subject to an advanced payment of dividend tax equivalent to 1% of the dividend distributed. Stock dividends have no cost for tax purposes.

Interest income

Unless the debtor can prove otherwise, any sum paid by a debtor in excess of the principal is deemed to be interest. As a general rule, interest is sourced in Venezuela if it is derived from activities carried out in Venezuela or from property located in Venezuela. Specifically, interest is deemed to be derived from activities carried out in Venezuela if the loan principal is used or enjoyed in the country. Interest received by non-resident corporations is therefore subject to Venezuelan income tax if the loan is granted or invested in Venezuela.

Interest paid on loans granted by non-resident financial institutions is subject to a final withholding tax (WHT) at source at a rate of 4.95% on gross income. Interest paid to other non-resident legal entities is subject to tax at a rate of 34% applied to 95% of the gross income.

Foreign income

Extraterritorial income is subject to Venezuelan CIT based on the concept of worldwide income taxation, according to which:

- Resident companies must pay a tax on total income whether from national or foreign source.
- Non-resident companies with PE in Venezuela will pay tax on their income, whether of national or foreign source, attributable to the Venezuelan PE.
- Non-resident companies will pay taxes on their income originated or caused in Venezuela.
- Resident companies as well as non-resident companies with PE in Venezuela may credit the tax paid abroad for earnings of an extraterritorial source against the income tax payable in Venezuela, subject to limitations.

- In general terms, taxation of foreign-source income is ruled by domestic provisions on taxation of territorial-source income. Foreign source dividends are taxable when dividends are received. However, in case of investments located in JLFT, anti-deferral rules in the international fiscal transparency regime apply (*see below*).

Foreign technical assistance and services

Taxable income of foreign taxpayers providing technical assistance or technological services from abroad to individuals or entities that use them in Venezuela or assign them to third parties is presumed to be 30% of gross income for technical assistance fees and 50% of gross income for technological service fees. If the contract does not specify the proportion in which the services are rendered, the law provides that 60% of the technical assistance and technological service fees are deemed to be rendered abroad (i.e. foreign-source), with the other 40% deemed to be rendered in Venezuela. The law also provides that 75% of the entire income related to technological services and 25% of that related to technological assistance is rendered abroad if not otherwise specified in the contract. *See the Withholding taxes section for more information.*

International fiscal transparency regime

A regime of international fiscal transparency is created for the purpose of establishing special standards of fiscal control, governing capital investments in countries classified as JLFT, or tax havens. Under certain conditions, a Venezuelan taxpayer may be required to recognise income generated in its JLFT subsidiary on an accrual basis in its tax return.

Inflation adjustment

A system for the adjustment of non-monetary assets, non-monetary liabilities, and shareholder's equity has been established. 'Non-monetary assets' include land, construction, machinery, vehicles, installations, inventories, and investments other than in securities (e.g. bonds and stocks).

There are two phases to the adjustments: (i) initial adjustments and (ii) annual adjustments. Both phases are mandatory adjustments for taxpayers engaged in commercial, industrial, financial, and insurance operations, and in the exploitation of mines and hydrocarbons. The annual adjustment is optional for taxpayers performing non-business activities.

Initial adjustment

The initial adjustment on depreciable fixed assets requires a registration tax of 3% on the amount of the adjustment.

The initial adjustment must be filed at the closing date of any fiscal year ending after 1 January 1993. This adjustment is applicable to all non-monetary assets and non-monetary liabilities.

The initial adjustment is calculated by applying the variations between the CPI of the Caracas Metropolitan Area prevailing in the month in which the non-monetary assets were acquired and the month corresponding to the initial adjustment. Assets acquired before 1950 are deemed to have been acquired in January 1950.

A registry tax of 3% is applied exclusively to the initial revaluation adjustment of depreciable fixed assets. For payment, taxpayers must be registered with the Asset Revaluation Registry, maintained by the tax administration. The resulting tax may be paid in three consecutive annual instalments, beginning on the date of registration.

Venezuela

Companies in the pre-operating stage, deemed to end with the first invoice, must determine and pay a 3% tax once the pre-operating period has ended.

Depreciation or amortisation on the revaluation adjustment is allowed, based on the original estimated life of the asset.

Annual adjustment

The annual adjustment is applied each year in determining taxable income. The adjustment factor must be applied to the following balance sheet items at the closing date of the fiscal year. The resulting adjustment will increase or decrease taxable income.

Balance sheet items	Adjustment factor	Tax effect
Non-monetary assets:		
Inventories (including inventories in transit) (2)	Annual variation of the CPI	Increase taxable income
Fixed assets (3)	Annual variation of the CPI	Increase taxable income
Other assets, trademarks, patents, production licenses, other rights, and investments in stock not registered in the <i>Superintendencia Nacional de Valores</i> (SNV) and deferred charges (except interest).	Annual variation of the CPI	Increase taxable income
Investments in shares registered in the SNV	Adjusted to the share market value at the end of the year	Increase taxable income
Non-monetary liabilities:		
Deferred credits (except interest)	Annual variation of the CPI	Decrease taxable income
Equity:		
Tax initial equity (1)	Annual variation of the CPI	Decrease taxable income

Notes

1. Tax initial equity is defined as the difference between assets and liabilities at the beginning of the tax year, less accounts receivable from administrators, affiliated, and related companies. In order to determine the initial tax equity, assets not located in the country as well as goods, debts, and liabilities entirely applied to the production of deemed, exempt, or exonerated income are excluded.
2. Inventories are to be valued at historical cost for purposes of applying the CPI. The provisions of the income tax law detail the procedures for applying the CPI. The revaluation of inventories in the tax year is included as part of the initial inventories of the following year.
3. The annual revaluation adjustment of fixed assets is considered part of the cost when the assets are sold.

Net losses arising from the annual adjustment that have not been offset may be carried forward only to the next tax period (one year).

Gains or losses originating from the adjustment of accounts receivable or investments, as well as debts and liabilities in foreign currency or with a re-adjustability clause, are deemed to be carried out during the fiscal year in which they become demandable, collected, or paid, whichever comes first.

Deductions

Depreciation and amortisation

Companies may deduct depreciation of tangible fixed assets and amortisation of intangible fixed assets that are used in the production of income. Depreciation is generally computed on a straight-line basis although any other generally accepted method for accounting purposes is also accepted. Depreciation is not allowed on real estate used as rental property. Depreciation on the stepped-up portion of assets revalued by any method other than the inflation adjustments (*see the Income determination section*) is not permitted. In principle, useful lives of assets shall be consistent with the parameters used in accordance with accounting principles. Although domestic standards provide that tables with depreciation and amortisation rates to be applied by taxpayers may be provided via the Income Tax Rules, such a table has not been provided to date.

Organisational and pre-operating expenses

Domestic income tax regulations do not provide for specific guidance as to the treatment of organisational and pre-operating expenses. The accepted practice is to follow GAAP.

Interest expenses

Interest paid on a loan, the principal of which is invested to generate income, is deductible.

Bad debt

Losses arising from bad debts are deductible provided:

- the loan concerned was granted as part of the taxpayer's business
- the amount of the debt was previously included in the taxpayer's gross revenue (except in the case of loans granted by financial institutions or by employers to their employees), and
- either the debtor and his guarantors are insolvent or the amount of the loan does not justify collection expenses.

Charitable contributions

Deductions for allowable charitable contributions are limited to 10% of taxable income (before deducting contributions) when taxable income does not exceed TU 10,000. When taxable income exceeds TU 10,000, charitable contributions are limited to 8% of taxable income. For oil extraction companies, the deduction is limited to 1% of the pre-contribution tax amount.

Taxes

Municipal, state, and local taxes are deductible in determining taxable income. Corporate taxes are not deductible.

Other significant items

Payments required by the labour law, such as profit sharing (generally between 15 days and four months' salary) and severance indemnity accruals are also deductible. In cases of unjustified dismissals, double severance indemnities must be paid. However, accruals for such additional indemnities are generally not deductible until paid.

Venezuela

Net operating losses

Losses may be carried forward for three years. Losses may not be carried back. Note that losses from inflation adjustments may be carried forward only one year.

Foreign losses may be offset only against foreign profits.

Payments to foreign affiliates

A Venezuelan corporation may claim a deduction for royalties and technical assistance and for technical service fees paid to foreign affiliates, subject to the following conditions:

- The contract is registered within 60 days of execution with the SIEX.
- Income tax payable by the recipient is withheld at the source.
- Transfer pricing requirements are met.
- In the case of technical assistance and technological services fees, the expenses may be deducted if such services cannot be otherwise provided in Venezuela.

Foreign companies domiciled in Venezuela are allowed to deduct royalties paid to parent companies or foreign affiliates. Companies must notify the SIEX of payments made within 60 days (*see the Withholding taxes section for more information*). Branches of foreign companies, however, may not deduct such payments to head offices or related parties.

Group taxation

Group taxation is no longer possible in Venezuela.

Transfer pricing

Taxpayers that carry out operations with related parties abroad must calculate their income, costs, and deductions by applying a defined methodology of transfer pricing. This regime is applicable to imports, exports, and interest paid to recipients abroad as well as technical assistance, technological services, and royalty fees.

Thin capitalisation

Thin capitalisation rules limit the deduction of interest from debt with related parties in excess of a 1:1 debt-to-equity ratio. Under these rules, if the average of a taxpayer's debt (with related and unrelated parties) exceeds the average amount of its equity for the respective fiscal year, the excess debt is treated as equity for income tax purposes. Consequently, the ability to deduct interest on related-party loans may be affected.

Tax credits and incentives

Foreign tax credit

Foreign income tax paid on taxable foreign income may be offset by the payable Venezuelan tax, up to the proportion of Venezuelan payable tax related to foreign-source income. Taxpayers must keep documentation of foreign tax. No carryforward rules are provided for in domestic regulations.

Capital investment

A special 10% investment tax credit is granted on the value of new investments in fixed assets (excluding land) made by those legal entities obtaining income from industrial and agro-industrial activities, construction, electricity, telecommunications,

science, technology, and generally any industrial activity that represents an investment in advanced technology. This tax credit may be taken if such new investments are dedicated to effectively improving the productive capacity or creating a new enterprise.

The tourist sector is entitled to a 75% investment tax credit on the amount of new investments. The agricultural sector enjoys an 80% investment tax credit.

An additional 10% tax credit is granted on the amount of investments in assets, programmes, and activities aimed at the preservation and protection of the natural environment.

Investment tax reductions may be carried forward up to three years.

Other incentives

Customs duty incentives are also available, such as drawbacks on the import of materials used for exporting products. This may take the form of a tax refund certificate issued by the Ministry of Finance. The certificate is a negotiable bond and will be accepted by the Treasury Funds Office for payment of national taxes. Determination of the amount of the refund will take into account the import duties effectively paid at the time the materials used in the manufacture of the exported product were received in Venezuela.

Withholding taxes

Resident corporations making certain types of payments must withhold taxes. T2 refers to Tariff 2. These include the following:

	Resident (%) (1)		Non-resident (%)	
	Corporation	Individual	Corporation	Individual
Commissions (2)	5	3	5	34
Dividends (5)	34	34	34	34
Royalties (3)	5	3	T2 on 90	34 on 90
Interest to foreign financial institutions	N/A	N/A	4.95	N/A
Other interest	5	3	T2 on 95	34 on 95
Professional fees	5	3	T2 on 90	34 on 90
Technical assistance fees (3)	5	3	T2 on 30	34 on 30
Technological service fees (3)	5	3	T2 on 50	34 on 50
Real estate rentals	5	3	5	34
Tangible personal property rentals	5	3	5	34
Contractor and subcontractor services	2	1	T2	34
Film and television exhibition rights	5	3	T2 on 25	34 on 25
Insurance and reinsurance premiums	N/A	N/A	10 on 30	N/A
Payments to international media organisations	5	3	T2 on 15	N/A
Acquisition of Venezuela commercial funds	5	3	5	34
Payments to non-domiciled international transportation companies (4)	N/A	N/A	T2 on 5	N/A

Venezuela

Notes

1. WHTs constitute prepayments against final tax liabilities as determined by the income tax return when filed.
2. Includes commissions earned in instances other than through a dependent relationship (e.g. employer/employee). Commissions are subject to withholdings in the same manner as salaries and wages.
3. The rates for non-residents are similar to those rates applicable for payments to a non-domiciled corporation not resident in a treaty country and rendering services from abroad with no PE in Venezuela.
4. Excludes payments exempted under international shipping agreements.
5. Withholding applicable only on the excess on profits taxed at the corporate level (see *Dividend income in the Income determination section*).

Tax treaties

There are currently comprehensive treaties for the avoidance of double taxation with the following countries:

Recipient	WHT (%)		
	Dividend	Interest	Royalties
Non-treaty (1)	34	4.95/T2 on 95 (2)	T2 on 90
Austria	5/15 (3)	4.95/10 (4)	5
Barbados	5/10 (5)	5/15 (6)	10
Belarus	5/15 (7)	5	5/10 (8)
Belgium	5/15 (9)	10	5
Brazil (not in force)	10/15 (10)	15	15
Canada	10/15 (11)	10	5/10 (12)
China	5/10 (13)	5/10 (14)	10
Cuba	10/15 (15)	10	5
Czech Republic	5/10 (16)	10	12
Denmark	5/15 (17)	5	5/10 (18)
France	0/5/15 (19)	5	5
Germany	5/15 (20)	5	5
Indonesia	10/15 (21)	10	10/20 (22)
Iran	5/10 (23)	5	5
Italy	10	10	7/10 (24)
Korea	5/10 (25)	5/10 (26)	5/10 (27)
Kuwait	5/10 (28)	5	20
Malaysia	5/10 (29)	15	10
Mexico (not in force)	5	4.95/10/15 (30)	10
Netherlands	0/10 (31)	5	5/7/10 (32)

Spain	0/10 (41)	4.95/10 (42)	5
Sweden	5/10 (43)	10	7/10 (44)
Switzerland	0/10 (45)	5	5
Trinidad and Tobago	5/10 (46)	15	10
United Kingdom	0/10 (47)	5	5/7 (48)
United States	5/15 (49)	4.95/10 (50)	5/10 (51)
Vietnam	5/10 (52)	10	10

Notes

1. Domestic rate applicable to payments to non-resident corporations.
2. The 4.95% rate applies to non-resident financial institutions, and the Tariff 2 on 90% on the gross income in all other cases of non-resident entities.
3. The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
4. The 4.95% rate applies to interest paid to banks, and the 10% rate applies in other cases.
5. The 5% rate applies when the beneficial owner is a company that holds at least 5% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
6. The 5% rate applies to interest paid to banks, and the 15% rate applies in other cases.
7. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
8. The 5% rate applies to payments for the use or the right to use copyrights on scientific work, software, trademarks or for the use or the right to use any type of equipment or transportation vehicles. The 10% rate applies in all other cases.
9. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
10. The 5% rate applies when the beneficial owner is a company that holds at least 20% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
11. The 10% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
12. The 5% rate applies to artistic copyright, computer software, patent, and industrial, commercial, and scientific royalties.
13. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
14. The 5% rate applies to interest paid to banks, and the 10% rate applies in other cases.
15. The 10% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
16. The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
17. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
18. The 10% rate applies to royalties, and the 5% rate applies to technical assistance.
19. No withholding applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends. The 5% rate applies in all other cases. The 15% rate applies to a resident of Venezuela who receives from a company that is a resident of France dividends that would give the right to a tax credit (*avoir fiscal*) if they were received by a resident of France and shall have the right to a payment from the French Treasury of an amount equal to this tax credit (*avoir fiscal*), subject to deduction of the tax.
20. The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
21. The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
22. The 20% rate applies to royalties, and the 10% rate applies to technical assistance.
23. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
24. The 7% rate applies to literary, artistic, and scientific work copyright royalties, and the 10% rate applies in other cases.
25. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
26. The 5% rate applies to interest in case of banks, and the 10% rate in other cases.
27. The 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment. The 10% rate applies in other cases.
28. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
29. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
30. The 4.95% rate applies to interest in case of banks and insurance companies. The 10% rate applies to the aforesaid entities when the payment is carried out by banks. The 15% applies in other cases.
31. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
32. The 7% rate applies to patent royalties and to industrial, commercial, and scientific equipment royalties, the 7% rate applies to trademark royalties, and the 10% rate applies to literary, artistic, and scientific work copyright royalties.
33. The 5% rate applies if the beneficial owner is a company that directly controls at least 10% of the company paying the dividends.
34. The 5% rate applies to interest paid to banks, and the 15% rate applies in other cases.
35. The 12% rate applies in case of royalties, and the 9% rate applies to technical assistance.
36. The 12% rate applies in case of royalties, and the 10% rate applies to technical assistance.

Venezuela

37. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
38. The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends and has invested in this company not less than the equivalent to USD 100,000. The 10% rate applies in all other cases.
39. The 5% rate applies to interest in case of banks, and the 10% rate in other cases.
40. The 15% rate applies to royalties, and the 10% rate applies to technical assistance.
41. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
42. The 4.95% rate applies to interest in case of banks. The 10% rate applies in other cases.
43. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
44. The 10% rate applies to literary, artistic, and scientific work copyright royalties, and the 7% rate applies in other cases.
45. No withholding applies when the beneficial owner is a company that controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
46. No withholding applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
47. No withholding applies when the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.
48. The 5% rate applies to patent and trademark literary, artistic, or scientific work copyrights, including films, and the 7% rate applies in other cases.
49. The 5% rate applies if the beneficial owner is a company that owns at least 10% of the voting stock of the company paying the dividends. The 15% rate applies in other cases.
50. The 4.95% rate applies to interest to financial institutions (including insurance companies), and the 10% applies in other cases.
51. The 5% rate applies to industrial, commercial, and scientific equipment royalties, and the 10% rate applies in other cases.
52. The 5% rate applies if the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.

The treaties with Brazil and Mexico have been published in the Official Gazette and signed by the contracting parties but have not entered into force since diplomatic notes have not been exchanged.

Treaties with other countries outside the countries listed above are being negotiated.

Tax administration

Tax returns

Final tax returns must be filed within three months following the end of the tax year. The system is one of self-assessment.

Payment of tax

The total amount of tax due must be paid at the time of filing the annual return. Estimated tax payments must be paid consecutively in six monthly instalments. Companies engaged in mining, hydrocarbon exploitation, and related activities must make 12 equal monthly estimated tax payments.

Other issues

Corporate tax calculation

Taxable income (manufacturing company)	VEF	290,000.00
Divided by the value of the TU (VEF 76/1 TU)	VEF	90
Taxable income in TU	TU	3,222.22
Tax thereon:		
Tariff 2: 34%	TU	1,095.56

Subtract (per tax table)	TU	(500)

Net income tax payable in TU	TU	395.56
Net Income tax payable in VEF *	VEF	35,600.00

* Multiplied by the TU value, (i.e. VEF 90/1TU)

Exchange control

In January 2003, the Venezuelan government and the Venezuelan Central Bank (VCB) restricted the free trade of foreign currency and established an Exchange Control Regime, which is characterised by the following aspects:

- VCB centralises the purchase and sales of foreign currency.
- All foreign currency derived from the export of goods, services, and technology must be sold to the VCB, through the financial system and at the official exchange rate. Exporters are to be registered with the Users Registry and are to consign certain documentation certifying good fiscal status. Likewise, the sale of every foreign currency, introduced in the country for various concepts, including direct foreign investment, to the VCB is mandatory. In such case, said foreign currency is to be registered with the SIEX for re-exportation and remittance purposes. The acquisition of foreign currency for imports is also subject to application for 'Foreign Currency Authorisation', which is subject to certain conditions.
- As of 14 June 2010, a mechanism was put in place that regulates the purchase of securities denominated in foreign currency through the System of Transactions with Securities stated in Foreign Currency (SITME by its Spanish acronym), which is regulated and controlled by the VCB. The aforesaid mechanism is limited to certain transactions, and companies are allowed to purchase up to USD 350,000 per month (i.e. USD 4.2 million per year).

The Law on Foreign Exchange Crimes is in effect, thereby establishing the actions that constitute exchange crimes and their respective penalties. Said penalties may be both criminal and pecuniary.

Significant developments

The government has released amended Decrees on special sales tax (SST), value-added tax (VAT), and corporate income tax (CIT) respectively. Subsequently, Circulars providing guidance to these new Decrees on SST and VAT have also been issued by the Ministry of Finance. Their effective dates are as follows:

- Decree 113 and guiding Circular 05 on SST took effect from 1 February 2012.
- Decree 121 and guiding Circular 06 on VAT took effect from 1 March 2012.
- Decree 122 on CIT took effect from 1 March 2012 but applies from the 2012 tax year.

The notable amendments are described below.

CIT amendments

Amounts treated as 'other' taxable income

Other taxable income is treated separately and generally does not qualify for tax incentives.

To be treated as other income	To be treated as operating income
Income from the transfer of (i) projects or (ii) rights to exploit, explore, and process minerals.	Reversal of provisions for inventory devaluation, financial investment loss, bad debts, warranties, and salary.
Income from selling scrap that is not directly related to tax incentivised activities.	
Exchange gains on revaluation of payables dominated in foreign currencies at the end of the fiscal year.	
Gains on revaluation of fixed assets on conversion of a state owned enterprise to a joint stock company	

Determination of taxable income

Income from leasing assets can now be either allocated over the lease term or recognised in full in one tax year. However, in order to determine taxable income during a period eligible for tax incentives, the rental must be allocated over the lease term.

Taxable income includes profits from share swaps upon restructuring or the transfer of securities for non-cash consideration.

Gains on revaluation of land use rights used for capital contribution are spread over a maximum of ten years.

Profits from the transfer of projects or rights to exploit, explore, and process minerals must be separately recorded and profits/losses of these activities are not allowed to be offset against the results of other business activities (but may be set off amongst themselves or against transfers of property).

Non-taxable income

- Income from transferring Certified Emission Reductions (CERs) within one year from the date of issuance.
- Share premiums on the issue of shares.

Deductible expenses

- Foreign exchange losses on revaluation of payables denominated in foreign currency.
- Bonuses and life insurance premiums for employees, subject to documentation requirements.
- Commissions for multi-level marketing will not be subject to the advertising and promotion cap (which normally limits the deduction of advertising and promotion costs to 10% of total other deductible expenditure).

Provisions for severance allowance are not deductible, except for enterprises that are not subject to mandatory unemployment insurance contributions (e.g. those with less than ten employees).

Tax incentives

Taxpayers with tax incentives based on export criteria that have been removed from the end of 2011 may select and notify the tax authorities of alternative CIT incentives and apply them for the remaining period in accordance with either:

- the regulations effective during the period from when the enterprise was incorporated until Decree 24/2007 came into effect (i.e. 21 March 2007) or
- the regulations effective at the time the CIT incentives are revised due to World Trade Organization (WTO) commitments (i.e. 31 December 2011).

Generally, the former will provide more generous incentives.

Foreign contractor withholding tax (FCWT)

Certain FCWT CIT rates are amended as follows:

	Old tax rate (%)	New tax rate (%)
Casino/hotel/restaurant management services	5	10
Interest	10	5
Re-insurance	2	0.1
Drilling rig rental	5	5 *
Financial derivatives	2	2 *

* No change. Previous official letter position elevated to Decree status.

FCWT will not apply to foreign companies brokering sales of services overseas (previously this only applied to brokering sales of goods overseas).

Vietnam

VAT amendments

0% VAT on exported services

A number of conditions must be met in order for exported services to enjoy VAT zero-rating. In particular, the foreign customer must not have a permanent establishment (PE) and not be a 'VAT payer' (widely defined) in Vietnam.

Circular 06 now adds a further requirement for a written confirmation by the foreign customer that it does not have a PE and is not a VAT payer in Vietnam in order for exported services to enjoy 0% VAT. No guidance on what form this confirmation should take is given, but, clearly, companies that export services will need to address this issue as soon as possible given that this Circular is now in force.

The Circular also sets out various services provided in Vietnam to foreign customers that are not entitled to 0% VAT, including online payments, digitised services, sports competitions, arts and cultural performance, entertainment, conferences, hotels, training, advertising, and tourism.

New activities not subject to output VAT

A new category was introduced that includes supplies not subject to output VAT, but related input VAT can, nevertheless, be claimed. This category includes the following:

- Goods and services provided outside Vietnam.
- Other financial income, except interest income of non-bank lenders. This exception appears to indicate that interest charged on loans made by onshore non-bank lenders is VAT-able, and interest on loans from overseas non-bank lenders is subject to VAT withholding.
- Fixed assets that are transferred between a parent company and its subsidiaries, or between subsidiaries of the same parent company, and which are used for producing/providing VAT-able goods/services; capital contributions in the form of assets; transfers of assets between dependent units of the same company, or in the case of split/merger/restructuring.
- Collections of compensation/indemnities by insurance companies from third parties.
- Collections on behalf of other parties that are not related to the provision of goods/services (e.g. if company A purchases goods/services from company B, but pays to company C and subsequently company C pays to company B, then the payment from company C to company B is not subject to VAT).
- Commissions earned by (i) agents selling services, including postal, telecommunications, lottery, airlines/bus/ship/train tickets, at prices determined by principals; and (ii) agents for international transportation, airlines and shipping services entitled to 0% VAT; or (iii) insurance agents.
- Commissions from the selling of goods/services not subject to VAT.

New provisions on input VAT

- Input VAT on goods (either purchased or produced by the company itself) that are used as gifts to promote the sale of VAT-able goods/services is creditable.
- Where an invoice supplementing/revising an original invoice is issued, the six month timeframe to claim input VAT now counts from the date on which the amending invoice is issued.
- Input VAT on goods/services purchased by authorised parties is creditable (including pre-operating expenses paid by parent companies).
This is a welcome development, and will help in a number of scenarios. For example, a company can now claim input VAT on expenses arising during its pre-operating

period, which are paid for by the foreign parent company to local suppliers, as long as a payment authorisation is in place.

- Companies using goods for internal consumption are allowed to claim input VAT credits on these goods if the internal consumption relates to the making of VAT-able supplies.
- Various cases of what constitute payments via the banking system mentioned in official letters are formalised in the Circular.
- Input VAT incurred during a pre-operating period is not creditable if the project terminates before generating revenue from its registered main business activities.

VAT-able value

- For sales of real estate, expenses such as payments to the state budget for land use rights, land rental fee, and site clearance expense can be deducted from the sales price in calculating the VAT-able value.
- For services provided both inside and outside Vietnam, where there is no separation of the revenue relating to the onshore and offshore portions, the VAT-able value of each is calculated based on the ratio of the expenses incurred in Vietnam over the total expenses.

VAT taxable supplies

The definition of VAT taxable supplies is expanded to include sales of assets held as collateral where the borrower is a VAT payer or the ownership of the assets has been transferred to the lender.

VAT-exempt supplies

The definition of VAT-exempt supplies is expanded to include:

- Rediscount of negotiable instruments and other valuable papers.
- Credit card issuance.
- Debt factoring (including selling of debts).
- Management of securities investment companies, services related to securities registered or deposited with the Vietnam Securities Depository, loans granted for margin trading, and advances to sellers of securities.
- Foreign exchange trading.
- Certain public utility services.

Application of VAT 'direct' method

Where there is negative value added from the trading of gold, silver, or precious stones in a period, it can be offset against the positive value added of those activities. Any remaining negative balance can be carried forward to a subsequent period in the same calendar year.

Taxpayers having both gold/silver/precious stone trading and processing activities should declare VAT for both activities under the direct method.

The use of the direct method is no longer permitted for foreign entities or individuals providing goods or services for carrying out prospecting, exploration, development, or exploitation of oil and gas fields. Instead, the Vietnamese customer is required to withhold VAT on their behalf, at a rate to be determined by the Ministry of Finance. Such withheld VAT may be offset against the foreign party's VAT liability where they are VAT registered and file normal VAT returns.

Vietnam

SST amendments

Out of scope of SST:

Circular 05 supplements conditions for certain goods not subject to SST, including:

- Cars designed by manufacturers to use as ambulances, vehicles transporting prisoners, cars operating in entertainment and sporting areas, etc.
- Air conditioners less than 90,000 BTU installed in transportation vehicles.
- Some specific chemicals (e.g. naphtha, condensate) used as input material for production (excluding fuel production).

In case these specific goods are used for other purposes, they will be subject to SST.

Taxable price

In respect of goods, price for SST calculation is exclusive of SST, VAT, and environment protection tax (EPT) (if any).

Where a manufacturer produces goods subject to SST and sells such goods through an agent, the minimum price for calculation of SST shall be 90% of the average selling price of the agent. However, for automobiles, the agent's average selling price used for this purpose shall exclude the cost of additional equipment and accessories installed at the customer's request.

Where a manufacturer produces goods under a licensing agreement and delivers goods to a branch or representative of an overseas company in Vietnam, the SST price shall be the selling price set by the branch or representative.

Tax credit

Taxpayers producing SST liable goods from SST liable raw materials shall be entitled to claim a credit for the SST amount already paid on raw materials imported or directly purchased from domestic manufacturers.

Taxes on corporate income

Standard rates

All taxes are imposed at the national level. The standard CIT rate is 25%. Enterprises operating in the oil and gas industry will be subject to CIT rates ranging from 32% to 50%, depending on each project.

There is no concept of tax residency for CIT. Business organisations established under the laws of Vietnam are subject to CIT and taxed on worldwide income. 25% CIT shall be applicable to foreign income. There are no provisions for tax incentives for such income.

Foreign organisations/individuals carrying out business in Vietnam without setting up a legal entity in Vietnam and/or having Vietnam-sourced income are considered foreign contractors, irrespective of whether the services are performed inside or outside Vietnam. Payments to foreign contractors are subject to FCWT, which consists of VAT and CIT elements. *See the Withholding taxes section for more information.*

Preferential rates

Preferential CIT rates of 10% and 20% are available where certain criteria are met. *See the Tax credits and incentives section for more information.*

Calculation of taxable profits

Taxable profit is the difference between total revenue, whether domestic or foreign sourced, and deductible expenses (*see the Deductions section*), plus other assessable income.

Taxpayers are required to prepare an annual CIT return that includes a section for making adjustments between accounting profits and taxable profits.

Local income taxes

There are no local, state, or provincial income taxes in Vietnam.

Corporate residence

There is no concept of tax residency for CIT. Enterprises established under the law of Vietnam are subject to CIT in Vietnam. In addition, Vietnam has a broadly worded PE definition.

Permanent establishment (PE)

In Vietnam, a PE is defined as “a fixed place of business through which a foreign enterprise carries out part or the whole of its business or production activities in Vietnam and earns income. The permanent establishment of a foreign enterprise shall include:

- A branch, an operating office, a factory, a workshop, means of transportation, a mine, an oil and gas field, any place relating to the exploitation of natural resources in Vietnam.
- A building site; a construction, installation, or assembly project.
- An establishment providing services including consultancy services through its employees or other persons.
- An agent for a foreign enterprise.
- A representative in Vietnam where [one] has authority to sign contracts under the name of the foreign enterprise, or where [one] does not have authority to sign contracts under the name of the foreign enterprise but regularly delivers goods or provides services in Vietnam.”

Foreign enterprises with their PEs in Vietnam shall pay tax on the taxable income earned in Vietnam (irrespective of whether it relates to the PE) and on the taxable income generated out of Vietnam and related to operations of the PEs.

Where a treaty on avoidance of double taxation to which Vietnam is a signatory contains different provisions relating to PE, such treaty shall apply (*see the Withholding taxes section for a list of countries with which such treaties exist*).

Other taxes**Value-added tax (VAT)**

VAT is applied to goods and services used for production, trading, and consumption in Vietnam (including goods and services purchased from abroad), with certain exemptions. Depending on the category of goods or services, the VAT rates are as follows:

Vietnam

- A 0% rate applies to exported goods, including goods sold to enterprises without PEs in Vietnam (including companies in non-tariff zones), goods processed for export or in-country export, goods sold to duty free shops, exported services, construction and installation carried out abroad or for export processing enterprises, aviation, marine, and international transportation services.
- A 5% rate applies generally to areas of the economy concerned with the provision of essential goods and services. This includes clean water, fertiliser production, teaching aids, books, foodstuffs, medicine and medical equipment, husbandry feed, various agricultural products and services, technical/scientific services, rubber latex, sugar and its by-products.
- The 10% 'standard' rate applies to activities not specified as exempt or subject to the 0% or 5% rate.

Activities not subject to output VAT

A new category was introduced that includes supplies not subject to output VAT, but related input VAT can, nevertheless, be claimed. This category includes the following:

- Goods and services provided outside Vietnam.
- Other financial income, except interest income of non-bank lenders.
- Fixed assets that are transferred between a parent company and its subsidiaries, or between subsidiaries of the same parent company, and which are used for producing/providing VAT-able goods/services; capital contributions in the form of assets; transfers of assets between dependent units of the same company, or in the case of split/merger/restructuring.
- Collections of compensation/indemnities by insurance companies from third parties.
- Collections on behalf of other parties that are not related to the provision of goods/services (e.g. if company A purchases goods/services from company B, but pays to company C and subsequently company C pays to company B, then the payment from company C to company B is not subject to VAT).
- Commissions earned by (i) agents selling services, including postal, telecommunications, lottery, airlines/bus/ship/train tickets, at prices determined by principals; and (ii) agents for international transportation, airlines and shipping services entitled to 0% VAT; or (iii) insurance agents.
- Commissions from the selling of goods/services not subject to VAT.

Exempt goods and services

There are stipulated categories of VAT exemptions, including transfer of land use rights, various financial services, capital assignments, certain types of insurance, medical services, education, printing/publishing, public transportation, export of unprocessed natural resources, etc.

When a supply cannot be readily classified based on the tax tariff, VAT must be calculated based on the highest rate applicable for the particular range of goods which the business supplies.

Taxpayers must file monthly VAT returns and remit the VAT payable no later than the 20th day of the following month.

Customs duties

Import duty rates are classified into three categories: ordinary rates, preferential rates, and special preferential rates.

Preferential rates are applicable to imported goods from countries that have most-favoured-nation (MFN, also known as normal trade relations) status with Vietnam. The

MFN rates are in accordance with Vietnam's WTO commitments and are applicable to goods imported from other member countries of the WTO.

Special preferential rates are applicable to imported goods from countries that have a special preferential trade agreement with Vietnam.

Import duty exemptions are provided for encouraged projects and goods imported in certain circumstances.

Export duties are charged only on a few items, basically certain natural resources. Rates range from 0% to 30%.

Special sales tax (SST)

SST is a form of excise tax that applies to selected goods and services, such as alcohol, imported automobiles having less than 24 seats, motorcycles, airplanes, boats, petroleum, air-conditioners up to 90,000 British thermal units (BTU), cigarettes, playing cards, discotheques, massages, karaoke, casinos, gambling, golf clubs, and entertainment with betting and lotteries. For goods, SST is charged at the production or importation stage.

The SST rates are as follows:

Products/services	SST rate (%)
Cigar/cigarette	65
Spirit/wine	25 to 45
Beer	45
Automobiles having less than 24 seats	10 to 60
Motorcycle of cylinder capacity above 125cm ³	20
Airplane	30
Boat	30
Petrol	10
Air-conditioners (not more than 90,000 BTU)	10
Playing cards	40
Votive paper	70
Discotheques	40
Massage, karaoke	30
Casinos, jackpot games	30
Entertainment with betting	30
Golf	20
Lottery	15

Property taxes

The rental of land use rights by foreign investors (if not contributed as capital) is, in effect, a form of property tax. It is usually known as land rental, and the range of rates is wide depending upon the location, infrastructure, and the industrial sector in which the business is operating.

Stamp taxes

Certain assets, including houses, land, automobiles and motorcycles, etc., that are subject to registration of ownership are subject to stamp duty. The stamp duty rates vary depending on the asset transferred.

Vietnam

Production royalties

Production royalties in the form of a natural resource tax (NRT) are payable in industries exploiting natural resources such as oil and gas, other minerals, forests, fisheries, and natural water. The tax rates vary depending on the natural resource being exploited, ranging from 1% to 40%, and are applied to the production output at a specified taxable value per unit. Various methods are available for the calculation of the taxable value of the resources, including cases where the commercial value of the resources cannot be determined.

Environment protection tax (EPT)

EPT took effect from 1 January 2012. It is an indirect tax applicable to the production and importation of certain goods, including petroleum products. The tax is calculated as an absolute amount on the quantity of the goods.

The tax rates are as follows:

Goods	Unit	Tax range (VND*)
Petrol, oil, grease	Litre/kg	300 to 4,000
Coal	Tone	10,000 to 50,000
HCFC	Kg	1,000 to 5,000
Nylon bags	Kg	30,000 to 50,000
Limited usage chemicals	Kg	500 to 3,000

* Vietnamese dong

The previously stipulated regulations on petrol, oil fee are superseded. Organisations/individuals engaged in petrol/oil trading activities are not required to declare and pay EPT for the petrol/oil volume of which fee was already declared and paid before 1 January 2012.

Branch income

Branches of foreign entities are subject to the same CIT regime as entities incorporated in Vietnam.

Income determination

Inventory valuation

At present, there are no provisions for valuing inventories or determining inventory flows. The tax treatment follows the accounting treatment.

Asset revaluation

Gains from the revaluation of assets for the purposes of capital contribution or transfer upon division, demerger, consolidation, merger, or conversion of business are subject to 25% CIT.

Capital gains

Gains made by a foreign investor on the transfer of an interest (as opposed to shares) in a limited liability company are subject to 25% CIT. The assignee is required to withhold the tax due from the payment to the assignor, and account for this to the tax authorities.

Gains earned by a foreign investor from selling securities (i.e. bonds, shares of public joint-stock companies, irrespective of whether they are listed or non-listed) are subject to CIT at a deemed rate of 0.1% of the sales proceeds. 25% CIT will apply to any gains earned by a foreign company (not incorporated in Vietnam) upon a sale of shares in a non-public joint-stock company.

Dividend income

Dividends received from investments in other companies in Vietnam are from after tax profits and are not subject to CIT.

Interest income

Interest income is subject to 25% CIT and is not entitled to tax incentives (including preferential tax rate and exemption/reduction).

Other significant items

The following other income items are subject to 25% CIT and are not entitled to tax incentives (including preferential tax rate and exemption/reduction):

- Income from transfer of real estate.
- Income from royalty, leasing of assets.
- Income from transfer of assets.
- Income from trading of foreign currency.
- Reversal of provisions, except for reversal of provisions for inventory devaluation, financial investment loss, bad debts, warranties, and salary.
- Collected written off debts.
- Unidentified payables.
- Difference between penalties and compensation for breaching economic contracts.
- Gain from the revaluation of assets.
- Income from the transfer of projects and the rights to exploit, explore, and process minerals.
- Income from selling scrap, which is not directly related to tax incentivised activities.
- Exchange gains on revaluation of payables denominated in foreign currencies at the end of the fiscal year.

Foreign income

Foreign income, under the domestic tax law, is subject to 25% CIT with tax credits available (see *Foreign tax credit in the Tax credits and incentives section*).

Foreign income shall be taxed when earned. There are no provisions for tax deferral or preferential tax rates for foreign income.

Deductions

Depreciation and amortisation

Tax depreciation may differ from accounting depreciation. Depreciation in excess of the rates specified in the regulations on tax depreciation is not deductible. These regulations specify maximum and minimum permissible effective lives for various classes of assets, including intangibles. Current straight-line tax depreciation rates are as follows:

Vietnam

Asset	Rates (%)
Buildings	2 to 16.67
Office equipment	10 to 20
Automobiles	3.33 to 16.66
Machinery and equipment	5 to 33.33
Intangible assets	Not more than 5
Goodwill	33.33

Start-up expenses

Pre-establishment expenses (i.e. expenses for setting up a company) and certain expenses (i.e. training, advertising before establishment, costs for the research stage, relocation cost) can be amortised over a period of up to three years from the commencement of operations. In order for pre-establishment and pre-operating expenses to be deductible for CIT purposes, supporting documents to substantiate the fact that these pre-operating expenses were necessarily and legitimately incurred for the establishment of the company should be available.

Interest expenses

Interest on loans corresponding to the portion of charter capital not yet contributed is not deductible.

Interest on loans from non-economic and non-credit organisations exceeding 1.5 times the interest rate set by the State Bank of Vietnam is not deductible.

Bad debt

Provisions for bad debts are deductible if the provision is made in accordance with the guidance by the Ministry of Finance. Certain conditions must be satisfied in order to set up a provision for bad debts (e.g. the debts must be supported by original documentation, confirmation from clients of the overdue amounts, and that the debt is overdue under the terms of an economic contract). In the absence of satisfying the necessary conditions, the provision for bad debts will generally not be deductible until incurred and supported by invoices.

Charitable contributions

Donations are generally non-deductible, except certain donations for education, health care, natural disasters, or building charitable homes for the poor.

Fines and penalties

Administrative penalties and fines are specifically considered non-deductible.

Taxes

Creditable input VAT, CIT, and other fees/charges are not deductible for CIT purposes.

Other significant items

The following other expenditures are specifically stated to be non-deductible:

- Depreciation of fixed assets, which is not in accordance with the prevailing regulations.
- Employee remuneration expenses that are not actually paid or are not stated in a labour contract, collective labour agreement, or the financial regulations of the company.

- Life insurance premiums for employees that are not stated in a labour contract, collective labour agreement, or the financial regulations of the company.
- The portion of costs of raw materials, materials, fuel or goods that are used in excess of the reasonable consumption levels.
- Reserves for research and development (R&D) not in accordance with the prevailing regulations.
- Provisions for stock devaluation, bad debts, financial investment losses, product warranties, or construction work, which are not in accordance with the prevailing regulations.
- Advertising, promotion (except certain items), conferences/parties, commissions, and prompt payment discounts exceeding 10% of total other deductible expenses (this cap is increased to 15% for newly-established enterprises for the first three operating years).
- Unrealised foreign exchange gain/losses due to the revaluation of foreign currency items other than account payables at the end of a financial year.
- Management expenses allocated to PEs in Vietnam by the foreign company's head office, which are not in accordance with the regulations.

For certain businesses (e.g. insurance companies, securities trading, lotteries), the Ministry of Finance provides specific guidance on deductible expenses for CIT purposes.

Net operating losses

Losses may be carried forward fully and consecutively for a maximum of five years. Carryback of losses is not permitted.

Payments to foreign affiliates

There are no special restrictions on the deductibility of royalties, loan interest, and service fees paid to foreign affiliates (except for those paid by branches). However, the payment must be defensible on an arm's-length basis as required by transfer pricing regulations (*see Transfer pricing in the Group taxation section*). Certain contracts for the transfer of technology and foreign loans must be registered with the competent authorities.

Group taxation

There is no provision for any form of consolidated filing or group loss relief in Vietnam.

Transfer pricing

Vietnam has transfer pricing regulations that outline various situations where transactions will be considered as being between related parties and the mechanisms for determining the market 'arm's length' transaction value (e.g. comparable uncontrolled price, cost plus, resale price, comparable profits, and profit split).

Under the wide ranging definition of associated parties, the control threshold is lower than in many other countries (20%), and the definition also extends to certain significant supplier, customer, and funding relationships between otherwise unrelated parties.

Compliance requirements include an annual declaration of related party transactions and transfer pricing methodologies used, which is required to be filed together with the annual CIT return.

Vietnam

Companies that have related party transactions must prepare and maintain contemporaneous transfer pricing documentation.

Thin capitalisation

There are no thin capitalisation requirements in the tax legislation. However, the level of permitted debt funding will be limited by virtue of licensing requirements. The maximum amount of debt funding is the difference between the licensed investment capital and charter capital.

Tax credits and incentives

Foreign tax credit

In respect of Vietnamese enterprises earning income from overseas investment, CIT (or a kind of tax with a nature similar to CIT) paid in a foreign country or paid on behalf by its partner in the country receiving the investment (including tax levied on the dividend) is allowed to be creditable. The credit shall not exceed the CIT amount payable in Vietnam.

The foreign income tax that is entitled to exemption or reduction in accordance with the foreign law shall also be credited.

Inbound investment incentives

Tax incentives are granted based on regulated encouraged sectors and difficult socio-economic locations. The sectors that are encouraged by the Vietnamese government include education, health care, sport/culture, high technology, environmental protection, scientific research, infrastructural development, and computer software manufacture.

The two preferential rates of 10% and 20% are available starting from the commencement of operating activities. When the preferential rate expires, the CIT rate reverts to the standard rate.

Criteria for preferential tax rates are as follows:

- 10% tax rate for 15 years shall be applied to the newly-established enterprises which:
 - operate in regions with specially difficult socio-economic conditions, in economic zones, and high technology zones
 - invest in high technology, science research and technology development, development of water plants, power plants, water supply, and drainage systems; bridges, roads, railways; airports, sea ports, river ports; airfields, stations, and other especially important infrastructure facilities decided by the Prime Minister, or
 - invest in production of computer software.
- 10% tax rate for the duration of operations is available for the income earned from activities in the fields of education/training, vocational training, public health, culture, sport, and environment (socialised fields).
- 20% tax rate shall be applied for 10 years to new enterprises established from investment projects in regions with difficult socio-economic conditions.
- 20% tax rate for the duration of operations is available for the income earned from agricultural service cooperatives and people's credit fund.

Tax holidays

Investors may be considered for tax holidays and reductions. The holidays take the form of a complete exemption from CIT for a certain period beginning immediately after the enterprise first makes profits, followed by a further period where tax is charged at 50% of the applicable rate. However, where the enterprise has not derived profits within three years of the commencement of operations, the tax holidays/tax reduction will start from the fourth year of operation. Criteria for eligibility to these holidays and reductions are set out in the CIT regulations as follows:

- Four years of tax exemption and nine subsequent years of 50% reduction shall be applied to the newly-established enterprises which:
 - operate in regions with specially difficult socio-economic conditions, in economic zones, and high technology zones
 - invest in high technology, science research and technology development, development of water plants, power plants, water supply, and drainage systems; bridges, roads, railways; airports, sea ports, river ports; airfields, stations, and other especially important infrastructure facilities decided by the Prime Minister
 - invest in production of computer software, or
 - operate in the socialised fields and in regions with difficult or especially difficult socio-economic conditions.
- Four years of tax exemption and 50% tax reduction for five subsequent years shall be given to new enterprises operating in the socialised fields and in regions not included in the list of regions with difficult or especially difficult socio-economic conditions.
- Two years of tax exemption and four subsequent years of 50% reduction shall be applied to newly-established enterprises operating in regions with difficult socio-economic conditions.

From 1 January 2012, tax incentives based on export criteria and domestic material usage ratios have been removed. Taxpayers with previously awarded tax incentives based on export criteria may select and notify the tax authorities of alternative CIT incentives and apply them for the remaining period.

Employment incentives

Additional tax reductions may be available for engaging in manufacturing, construction, and transportation activities that employ several female staff and/or ethnic minorities. CIT reduction must correspond with the actual payment for those employees.

Research and Development Fund

Business entities in Vietnam are allowed to set up a tax deductible Research and Development Fund. Enterprises can appropriate up to 10% of annual profits before tax to the fund. Various conditions apply.

CIT reduction and deferral

Eligible small and medium size enterprises (SMEs, as regulated) and labour intensive enterprises engaged in (i) production and processing of agriculture products, forestry and aquatic products, textiles and garments, footwear and electronic components; and (ii) construction/installation of certain infrastructure projects (e.g. water, power, roads, railroads, airports, hospitals, schools) can be entitled to 30% CIT reduction and enjoy a one year deferral of 2011 CIT payments.

However, the incentives are not provided for enterprises earning profits from lotteries, property trading, securities business, finance, banking, insurance or goods/services

Vietnam

subject to special sales tax; SMEs belonging to State Economic Groups and classified as first or special rank; and SMEs which are majority owned by a holding company which is not a SME. In addition, 30% CIT reduction is not allowed to profits from the exploitation and processing of minerals.

The Prime Minister has recently approved a further three month deferral of CIT payments for Quarter I and Quarter II of 2011.

Withholding taxes

Interest

The interest withholding tax (WHT) applied to payments to an overseas lender was reduced from 10% to 5% from 1 March 2012. Interest on pre-1999 loans may be exempt from WHT. Offshore loans provided by certain government or semi-governmental institutions may obtain an exemption from the interest WHT where a relevant double taxation agreement (DTA) or Inter-Government Agreement applies.

Interest earned from bonds (except for tax-exempt bonds) and certificates of deposit are subject to 5% WHT (10% prior to 1 March 2012). The sale of bonds and certificates of deposits are subject to deemed tax of 0.1% of the gross sales proceeds.

Royalties, licence fees, etc.

A 10% royalty WHT applies in the case of payments made to a foreign party for transfers of technology, unless the transfers are contributed as part of legal capital (akin to equity). Transfers of technology are defined very broadly. Certain contracts for the transfer of technology must be registered with the competent authorities.

Management fees and head office charges

WHT applies on management fees and head office charges at the rates applicable to services (*see below*).

Payments to foreign contractors

FCWT on payments to foreign contractors applies where a Vietnamese contracting party (including a foreign-invested enterprise incorporated in Vietnam) contracts with a foreign party that does not have a licensed presence in Vietnam, irrespective of whether the services are provided in Vietnam or overseas.

Foreign contractors can apply to be deduction-method VAT payers if they adopt the Vietnamese accounting system. If accounting records are adequate, the foreign contractor will pay CIT on actual profits, but otherwise on a deemed-profit basis.

For direct (non-deduction-method) foreign contractors, VAT and CIT will be withheld by the contracting party at a deemed percentage of taxable turnover. Various rates are specified according to the nature of the contract performed. For CIT, the WHT rate varies from 0.1% to 10%. For VAT, the effective WHT rate can also range from 3% to 5%. The VAT withheld by the contracting party is an allowable input credit in its VAT return.

A summary of VAT and CIT WHT rates follow:

Types of payment	Effective VAT rate (%)	Deemed CIT rate (%)
Trading: distribution, supply of goods, materials, machinery, and equipment in Vietnam.	Exempt (1)	1
Casino, hotel, and restaurant management services	5	10
Other services	5	5
Services together with supply of machinery and equipment	3	2
Construction, installation (2) without supply of materials or machinery, equipment.	5	2
Construction, installation (2) with supply of materials or machinery, equipment.	3	2
Leasing of machinery and equipment	5	5
Leasing of aircraft, vessels (including components)	Not specified	2
Transportation	3	2
Interest	Exempt	5
Royalties	Exempt	10
Insurance	Exempt	0.1
Transfer of securities	Exempt	0.1
Manufacturing, other business activities	3	2
Financial derivatives	Exempt	2

Notes

1. On the basis that import VAT is paid.
2. Relates to VAT only.

Cross-border leases

A Vietnam-based lessee is required to withhold tax from payments to an offshore lessor. 5% VAT and 5% CIT is applicable to the rental charge if it is an operating lease. If it is a finance lease, the interest portion will be exempt from VAT and subject to 10% CIT.

Tax treaties

The above WHT rates may be affected by a relevant DTA.

Notes

1. The treaty is not yet in force
2. In some cases, the limits set by the treaty are not lower than the present withholding rate under domestic law. Therefore, the domestic rates will apply.
3. Interest derived by certain government bodies is exempt from WHT.
4. Royalty WHT rates vary for certain types of royalties.

Tax administration

Taxable period

The standard tax year is the calendar year. However, different accounting year-ends can be used if approval is obtained from the authorities.

Tax returns

The annual final CIT return and the audited financial statements must be filed within 90 days from the end of the financial year.

Payment of tax

CIT shall be declared and paid provisionally on a quarterly basis (based on actual revenues and expenses of each quarter). Quarterly CIT returns and payment must be made no later than the 30th day of the next quarter.

Final payment of CIT is due with the final CIT return (i.e. the 90th day of the following financial year).

Audit cycle

Tax audits are carried out regularly and often cover a number of tax years. Prior to an audit, the tax authorities send the taxpayer a written notice of time and scope of the audit inspection.

Statute of limitations

The general statute of limitations for imposing tax administration penalties is two years. The tax authorities can collect under declared and unpaid tax at any time.

Penalties

There are detailed regulations setting out penalties for various tax offences. These range from relatively minor administrative penalties through to tax penalties amounting to various multiples of the additional tax assessed.

In practice, imposition of penalties has been arbitrary and inconsistent. However, in recent periods there has been a much tougher stance adopted by the tax authorities. Hence, where tax is paid late (e.g. as a result for of a tax audit investigation), there is a significant likelihood of penalties being imposed. Notably, where tax adjustments are made at a tax audit, any resulting additional taxable profits are not eligible for any CIT incentives to which a company may be entitled.

Vietnam

Other issues

Foreign investment restrictions

In several fields, foreign investment will not be licensed or will only be licensed under special conditions. The List of Conditional Investment Sectors include television, production and publishing cultural products, telecommunication, transportation by all means, cigarette production, exploring and processing natural resources, real-estate business, education, and medical services and distribution.

Exchange controls

All buying, selling, lending, and transfer of foreign currency need to be made through credit institutions and other financial institutions authorised by the State Bank of Vietnam (SBV).

Outflow of foreign currency by transfer is authorised for certain transactions such as payments for imports and services abroad, refund of loans contracted abroad and payment of interest accrued thereon, transfer of profits and dividends, and revenues from transfer of technology.

All monetary transactions in Vietnam must be undertaken in Vietnamese dong. Exceptions are applicable to payments for exports made between principals and their agents, and payments for goods and services purchased from institutions authorised to receive foreign currency payments such as for air tickets, shipping and air freight, insurance, and international communications.

Forms of doing business

According to the Law on Enterprises, a foreign-invested enterprise may be established as either a single member limited liability or a limited liability with more than one member, a joint-stock company, or a partnership.

Intellectual property

Intellectual property rights are protected by the Civil Code (1995 and 2005), the Law on Intellectual Property (2005), and a host of subordinate legislation.

Vietnam is signatory to the Paris Convention, the Madrid Agreement on International Trademark Registration, and the Patent Cooperation Treaty and is a member of the World Intellectual Property Organisation. Vietnam has entered into an agreement on copyrights with the United States. According to the Vietnam-United States (US) Bilateral Trade Agreement, Vietnam is further under the obligation to adhere to the Berne Convention.

Significant developments

Zimbabwe's annual budget presentation was held on 24 November 2011 by the Minister of Finance, the Honorable Tendai Biti, and the proposed changes have been promulgated into law.

The announcements relating to corporate tax can be summarised as follows.

Value-added tax (VAT)

Beginning 1 January 2012, it is mandatory for all registered operators with an annual turnover exceeding 240,000 United States dollars (USD) to use electronic fiscal registers (EFRs) that can be linked to the Zimbabwe Revenue Authority (ZIMRA). Penalties of up to USD 25 per day per point of sale may be imposed.

Customs duties

25% surtaxes have been imposed on a number of imported goods (including footwear, clothing, and foodstuffs) in order to protect the local manufacturing sector.

Corporate income tax (CIT)

There have been no significant CIT developments in Zimbabwe during the past year.

Taxes on corporate income

The corporate tax rate for companies (other than mining companies with special mining leases, but including branches) continues at 25.75%. This rate includes a base rate of 25% plus a 3% AIDS levy.

Zimbabwe presently operates on a source-based tax system. This means that income from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The specific circumstances of a transaction should always be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Income earned by foreign companies from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obliged to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.

Zimbabwe

Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax (WHT). *See the Withholding taxes section for additional details.*

Note that Zimbabwe is currently considering a move to a residence-based tax system.

Local income taxes

There are no local income taxes payable in Zimbabwe.

Corporate residence

Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived, or deemed to be derived, from sources within Zimbabwe is subject to tax.

Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may, in the hands of a domestic company, be deemed to arise in Zimbabwe and be taxed as such. Examples include interest and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

Permanent establishment (PE)

In the event that Zimbabwe has entered into a double taxation agreement with the country where the foreign company resides, the entity will only be taxable in Zimbabwe if it operates through a PE, which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered. If a PE exists, only the portion of the income attributable to the PE will be subject to tax in Zimbabwe.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance.

Other taxes

Value-added tax (VAT)

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT shall be levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe which involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption into Zimbabwe, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated). Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed USD 60,000 in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due by the 25th day following the month to which the VAT relates.

Beginning 1 January 2012, it is mandatory for all registered operators with an annual turnover exceeding USD 240,000 to use EFRs that can be linked to ZIMRA. Penalties of up to USD 25 per day per point of sale may be imposed.

Customs duties

Zimbabwe is a member of the Southern African Development Community (SADC) as well as the Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries, while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

25% surtaxes have been imposed on a number of imported goods (including footwear, clothing, and foodstuffs) in order to protect the local manufacturing sector.

A security deposit is required by Customs on all temporary importations to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Excise duties

Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries. Examples of the excise products and applicable rates include the following:

- Cigarettes: 40% + USD 5 per 100.
- Spirits: USD 2 per litre.
- Wine: USD 0.50 per litre.

Excise and fuel levies are also levied on petrol, diesel, and illuminating kerosene.

Zimbabwe

Property taxes

Property taxes are levied by cities, towns, and rural councils. Each of these bodies conducts periodic valuations of the properties in their area and annually set out a 'rates schedule' based on a percentage of the valuations. These may alter each year depending upon the entities budgetary requirements for funds. Valuations of the properties are usually based on estimates as there are very few qualified property valuers operating in Zimbabwe at present.

Transfer duty

Transfer duty is payable on the acquisition value of property acquired at the following rates:

Value of the property (USD)	Rate of transfer duty
0 to 5,000	1%
5,001 to 20,000	2% of the value above 5,000
20,001 to 100,000	3% on the value above 20,000
100,001 and above	4% of the value above 100,000

Transfer duty is normally payable by the buyer, but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 3% (plus 15% VAT) must be added on.

Stamp duty

Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

Transaction	Stamp duty
Bonds	0.4% (USD 0.40 for every USD 100 or part thereof)
Brokers notes - purchase of securities	0.25% (USD 0.25 per every USD 100 or part thereof)
Brokers notes - purchase/sale of any movable property other than a security	0.10% (USD 0.10 per every USD 100 or part thereof)
Brokers notes - purchase/sale of any immovable property	1% (USD 1.00 per every USD 100 or part thereof)
Off market share transfer instruments	2% or USD 2
Cheques	0.05% (USD 0.05)

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

Capital gains tax

It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed (on the Zimbabwean Stock Exchange) or unlisted companies at the following rates:

Acquired pre-February 2009

- Listed securities: 1% of proceeds.

- Property: 5% of proceeds.
- Unlisted securities: 5% of proceeds.

Acquired post-February 2009

- Listed securities: 1% of proceeds.
- Property: 20% of capital gain.
- Unlisted securities: 20% of capital gain.

Branch income

Branch income that is received or has accrued from a source within, or deemed to be within, Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 15% WHT is imposed on any payments made in respect of head office charges.

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

Income determination

The Zimbabwe Income Tax Act (Act) tax base for CIT is taxable income rather than profits. The source and nature of the income determines whether the amount is taxable or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

Inventory valuation

The legislation permits three methods of inventory valuation: historic cost, cost of replacement, or net realisable value. Standard cost based on first in first out (FIFO) is normally used for accounts valuations and is an accepted basis for tax purposes. Last in first out (LIFO) is not permitted for tax or for accounting purposes. The tax valuation may differ from the accounting valuation; this is a rare occurrence in Zimbabwe but is acceptable.

Capital gains

See *Capital gains tax in the Other taxes section*.

Zimbabwe

Dividend income

Dividends received from Zimbabwe incorporated companies are tax exempt. When received from non-Zimbabwe companies, they are taxed at a flat rate of 20%; however, relief is granted by allowing any foreign tax suffered as a tax credit.

Interest income

Interest accruing from 'financial institutions' is subject to a 15% WHT and thereafter is exempt from CIT (the WHT becomes a final tax). Interest from other local or foreign sources is included in gross income and is taxed at the normal CIT rate. Relief will be granted for any foreign tax paid, up to the maximum Zimbabwe tax rate.

Partnership income

The partnership itself is not taxed directly; however, the taxable income of the partnership is calculated in the same way as corporate income and is then allocated amongst the partners in accordance to their agreed profit sharing ratios. This income is taxed in their hands at the basic CIT rate.

Rent/royalties income

Rents and royalties are generally treated as normal taxable income and are taxed at the basic CIT rate. Rent arising in respect of land and buildings situated outside of Zimbabwe, however, is exempt from local tax.

Foreign income

Where income (including business profits) is deemed to be from a Zimbabwe source, it will form a part of the local company's taxable income and will be subject to tax at the basic CIT rate. Relief in respect of foreign taxes suffered will be granted unless it is clear that the true source of the income is, in fact, Zimbabwe.

Deductions

The Act makes provisions for specific deductions. Some of the deductions, such as the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, and manufacturing allowances can be more complex.

Capital allowances

The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of construction cost in the year they enter service. Thereafter, an annual allowance of 25% is deductible for each year following the year of construction. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of construction and not the cost of acquisition. In the latter case, the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. Subsequent development expenditure is presently written off in the year expended. Note that this aspect of Zimbabwe's mining legislation is currently under review.

Capital allowances may also be deducted with respect to patents, trademarks, and leasehold improvements.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is presently calculated on the capital allowances previously granted.

Goodwill

Goodwill is not deductible for tax purposes in Zimbabwe.

Start-up expenses

Start-up expenses may be deducted if incurred within 18 months of commencement of business and not considered to be capital in nature.

Interest expenses

Zimbabwe has thin capitalisation rules based on a 3:1 debt-to-equity ratio. A portion of the overall interest may be disallowed if this ratio is exceeded.

Bad debt

Bad debts written off may be claimed, but not a provision for bad debts.

Charitable contributions

Donations (with varying maximum limits) made to specified charities and educational bodies may be claimed.

Entertainment expenses

Entertainment expenses are not deductible for tax purposes.

Fines and penalties

Fines and penalties are not deductible for tax purposes.

Net operating losses

Assessed tax losses may be carried forward (but not backwards) for up to six years, provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

Payments to foreign affiliates

The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses, as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75% respectively for a company already in production and prior to production of total tax-deductible expenses.

Zimbabwe

Group taxation

No taxation of combined operations is allowed in Zimbabwe, including where operations are conducted by more than one company.

Transfer pricing

No detailed transfer pricing legislation is currently in place in Zimbabwe. The law does, however, allow the Commissioner General to substitute a new sales price for a transaction in which the Commissioner General considers the declared sales price to be too high or low.

Thin capitalisation

The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt-to-equity ratio exceeds 3:1.

Tax credits and incentives

It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.

Person for whom incentive is available and duration of incentive	Tax incentive	Tax treatment for normal taxpayers
Taxpayers operating at designated growth point areas.	The capital allowance is calculated as 25% of the cost of construction of a commercial or industrial building in growth point areas in the year when the building enters service and 25% during the three years that follow the year of construction.	Capital allowances are calculated as 25% of the cost of construction of industrial building in the year when the building enters service and 25% during the three years that follow the year of construction.
Taxpayers operating at designated growth point areas.	Deduction of an investment allowance at 15% on cost of specified assets.	No investment allowance granted.
For all taxpayers in build, own, operate, and transfer (BOOT) or build, operate, and transfer (BOT) arrangements.	First five years: Taxed at 0%. Second five years: Taxed at 15%. Thereafter: Taxed at normal rate.	Taxed at 25%.
Exporting taxpayers.	An additional allowance of 100% of cost incurred in an export country in order to export Zimbabwean goods to such country may be deducted.	Export expenditure incurred is deductible for tax purposes.
For all manufacturing taxpayers exporting 50% or more of output (by volume).	Taxed at a reduced rate of 20%.	Taxed at 25%.
Mining company holding a special mining lease.	Taxed at a reduced rate of 15%.	Taxed at 25%.

Person for whom incentive is available and duration of incentive	Tax incentive	Tax treatment for normal taxpayers
Operator of a tourist facility in a tourist development zone.	First five years: Taxed at 0%. Thereafter: Taxed at normal rate.	Taxed at 25%.
Industrial park developer.	First five years: Taxed at 0%. Thereafter: Taxed at normal rate.	Taxed at 25%.

Withholding taxes

WHTs are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).

Dividends

Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within ten days after declaration of the dividend.

Royalties or similar payments

WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within ten days of the date of payment.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

Fees

Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within ten days of the date of payment.

Interest

WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are exempt from any WHT on interest.

Zimbabwe

Summary of WHT payable

The non-residents WHT rates and treaty relief for Zimbabwean double tax agreements can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, royalties, and interest in the various treaties should also be considered.

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Fees (%)
Zimbabwe tax legislation	15*	15**	15	15
Bulgaria	10	N/A	10	10
Canada	10	N/A	10	10
France	10	N/A	10	10
Germany	10	N/A	7.5	7.5
Malaysia	10	N/A	10	10
Mauritius	10	N/A	15	15
Netherlands	10	N/A	10	10
Norway	15	N/A	10	10
Poland	10	N/A	10	15
South Africa	15	N/A	15	15
Sweden	15	N/A	10	10
United Kingdom	5	N/A	10	10

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

** Resident persons have a 15% WHT on interest arising from financial institutions. Interest from other sources is taxed at the corporate tax rate.

'N/A' means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwean rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within ten days of the date of distribution or accrual.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

- Botswana
- Democratic Republic of the Congo
- Indonesia
- Iran
- Jamaica
- Namibia
- Serbia and Montenegro
- Seychelles
- Tanzania
- Tunisia
- Zambia

Tax administration

Taxable period

The tax year end is 31 December each year. Applications may be made for a different year-end if good reasons are given (e.g. to comply with the international group year-end). In the first year of trade, a longer or shorter period than 12 months may be accepted to tie in with a future year end.

Tax returns

The CIT return is due by 30 April in the following tax year.

Payment of tax

Zimbabwe regulates the payment of CIT on four dates during the course of the current tax year; these are referred to as Quarterly Payment Dates (QPDs). The first payment of 10% is due by 25 March of the respective tax year. The second payment of 25% is due by 25 June of the respective tax year. The third payment of 30% is due by 25 September of the respective tax year. The fourth payment of 35% is due by 20 December of the respective tax year.

All taxes are expected to have been paid by the 25th day of December. If there is an adjustment after the year end accounts have been finalised, a top-up payment must be made. There is no set date for this. However, in practice, this payment should not be more than 10% of the annual tax liability. ZIMRA often imposes a 10% per annum interest charge on any underpayments of QPDs.

WHT payments are due within ten days from the date of distribution or accrual.

Audit cycle

Tax audits do not, at present, have a set cycle; however, the aim is to establish a three year cycle in the future.

Statute of limitations

The statute of limitations is generally three years unless ZIMRA considers that there is fraud or misrepresentation involved. In those circumstances, there is no set limit on how far back ZIMRA can go, but they usually do not go beyond six years in practice.

Topics of focus for tax authorities

ZIMRA is focused on ensuring that all compliance issues are in order and that VAT and payroll taxes have been correctly calculated.

Anti-avoidance

Please note that Zimbabwe legislation contains basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

- such a transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Zimbabwe Income Tax Act
- it was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or
- it has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question.

The Commissioner General may, at the Commissioner General's sole discretion, impose this legislation on any transaction or scheme, which will place the burden of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Zimbabwe

Other issues

Exchange control

Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetised effective April 2009. This has had a significant impact on the country's exchange control regulations.

The Exchange Control Handbook in Zimbabwe is not available to the public; only banking institutions have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to bank approval.

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. Under recent legislation, a limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.

The increasing Tax burden is one of the most important concerns of CEOs¹, driving the adoption of proper internal controls and robust financial reporting processes to satisfy tax authorities, regulators and other stakeholders. At the same time, tax authorities worldwide are concerned with ensuring both increased compliance amongst taxpayers, and that their fiscal policies are not overtaken by global business and economic developments.

¹ CEO Survey 2012 - <http://www.pwc.com/gx/en/ceo-survey/key-findings/business-risk.jhtm>.

PwC is the leading provider of tax services worldwide both in terms of the size and scope of our tax practice and our reputation². Clients engage us because we combine a strong understanding of their business and economic environments with specialist tax knowledge in hundreds of national and local jurisdictions across the globe. As tax codes become increasingly complex and tax planning more controversial, we help companies to:

- identify and manage tax risks,
- understand and meet their compliance obligations,
- implement tax strategies that complement their business and operational objectives,
- resolve disagreements with tax authorities when they arise, and
- manage tax accounting and reporting issues and design of best in class tax functions.

The advice we provide to clients is based on our Global Tax Code of Conduct, which guides the way as we help organizations think through the legal basis for their planning and the reputational issues that may result. In difficult economic times when companies are focused on paying their fair share of taxes as efficiently as possible and governments need to collect the maximum amount of tax revenue, we look forward to being a productive participant in these discussions.

We take pride in our role as an essential and productive part of global tax administration and compliance. Our policy specialists advise regulators, governments, corporations, and supra-national bodies worldwide on the technical and practical aspects of developing and implementing tax policy initiatives. We lead the debate with tax authorities and governments around the world, changing the way we all think about tax.

² The Global Tax Monitor recognises PwC as the leading tax adviser globally, by reputation, with a very strong lead over the competition. These results are based on the year-ending Q1 2012 figures, with a sample size of 3,297 primary buyers of tax services globally.

Launched in 2000, the Global Tax Monitor (GTM) is an independent survey conducted by research agency TNS, that examines the competitive position of the top firms in the tax advisory market – globally, regionally, nationally and on an industry basis. It provides a comprehensive measure of firm reputation, client service and brand health, gained currently from just over 3,000 telephone interviews annually with key decision makers (CFOs and Tax Directors) in 33 key markets.

Human Resource Services

*One of the world's
largest human resource
advisory networks*

Global Leader, Human Resource Services

peter.clarke@us.pwc.com

Employees are probably your organisation's greatest asset and your biggest challenge. The PwC Human Resource Services (HRS) network helps you create value by helping you actively manage your people. We have one of the world's largest human resource (HR) advisory networks with solid grounding in areas such as HR transformation, compensation, benefits, pensions, HR transactions, labour law, HR data metrics and deploying talent around the world. We can put together the team that is right for you to give you all the support you need. And our 6,000 professionals in over 100 countries follow the same multi-disciplinary approach to people management to give you the consistency that is so important when working across borders.

Indirect Taxes

*We customise the support
we give you, and use the
latest technology*

Global Leader, Indirect Taxes

Stephen Coleclough

+44 20 7212 4911

stephen.coleclough@uk.pwc.com

To give the best advice on indirect taxation, we believe you need to work closely with the people devising it. At PwC we do this. And we have a thorough understanding of indirect taxes from every perspective - we appreciate that indirect taxes can be very different depending on which industry sector you work in. Across the world, our indirect tax and customs specialists work closely with PwC industry specialists to really understand the specific issues in your sector, and give you advice with genuine insight. And because the implications of indirect taxes can be so important to your business, we customise the support we give you, and use the latest technology, to provide you with what you need, wherever you are and whenever you need us. We can assist you with strategy, risk, process and margin improvement.

International Tax Services

*It's this combination of
local and global expertise
that gives you real insight*

***Global Leader,
International Tax Services***
Tony Clemens
+61 2 8266 2953
tony.e.clemens@au.pwc.com

The pressures on business to manage tax across borders, along with growing regulation and the need to stay competitive in a global market, means that a local perspective on international tax is not enough. With specialists experienced in complex international tax matters across the world, our network is well positioned to give you top quality advice. It's this combination of local and global expertise that gives you real insight into managing tax across borders.

Legal Services

*Over 2,000 corporate
lawyers in more than
80 countries*

Global Leader, Legal Services

Leon Flavell

+44 20 7212 1945

leon.flavell@pwclegal.co.uk

We understand that one size doesn't fit all when it comes to legal services.

With over 2,000 corporate lawyers in more than 80 countries, we're able to tackle problems in a way that is genuinely specific to your business. As well as specialist legal advice, we also offer day-to-day general counsel support. We support businesses with teams drawn from the range of skills within the PwC global network. Depending on your legal issues, we might include tax advisers, human capital consultants, corporate finance specialists, actuaries, management consultants, or accountants. We'll put together whatever it takes to give you a creative solution in the least possible time.

Mergers and Acquisitions

An international network of almost 1,000 Mergers and Acquisitions specialists, experienced in every type of transaction

**Global Leader,
Mergers and Acquisitions**

Hans-Martin Eckstein
+49 69 9585 6382
hm.eckstein@de.pwc.com

Whether you're buying, selling or merging, it's vital to extract as much value as possible from a transaction. With an international network of almost 1,000 Mergers and Acquisitions (M&A) specialists, experienced in every type of transaction, we know how to help you structure and finance the transaction to your best advantage. Our M&A Tax specialists support you through every stage of the transaction. They work closely with our transactions services, corporate finance and legal teams, so that all aspects of the transaction are covered by experienced specialists.

Sustainability and Climate Change Tax

Advice that anticipates what legislative and policy changes are likely to happen

Global Leaders, Sustainability and Climate Change Tax

Stephen Coleclough
(Global Indirect Taxes)
+44 20 7212 4911
stephen.coleclough@uk.pwc.com

James Koch
(Global Energy, Utilities & Mining Tax)
+1 713 356 4626
james.koch@us.pwc.com

John Preston
(Global Tax Policy)
+44 20 7804 2645
john.preston@uk.pwc.com

Sustainability and climate change continues to evolve as a business issue.

Momentum is building. As such, you need more than advice on the current state – you need advice that anticipates what legislative and policy changes are likely to happen. You need that advice to help you to predict how these developments will impact your business. You also need to understand how your organisation is changing to address sustainability and climate change as a business issue and how existing taxes impact on those changes. Our Sustainability and Climate Change Tax network helps businesses and investors in two ways: it helps them stay on top of global trends and developments in climate change related policy; and it helps businesses address the tax implications of climate change related policy and their own organisation's response to the business issue.

Tax Controversy and Dispute Resolution

*We think being effective
is about more than just
knowledge; it's about
having an insight into
what could happen next*

**Global Leader,
Tax Controversy and Dispute Resolution**
David Swenson
+1 202 414 4650
david.swenson@us.pwc.com

By giving you insight into your company's risks and exposures across different territories and disciplines, we can be the effective option to help you deal with tax disputes, audits, and examinations, from prevention through to management and resolution. Our specialists also use their experience to help businesses put in place consistent and defensible practices and policies, so they know what to expect in the future. The Tax Controversy and Dispute Resolution network brings together former revenue authorities and government officials, accountants, economists, international tax litigators, and industry sector specialists, in all areas of direct and indirect tax, as well as customs duties, employment taxes, and tax fraud. We think being effective is about more than just knowledge; it's about having an insight into what could happen next, so we build strong relationships with governments and policy makers worldwide. That way, we're close to the people who are setting the dispute agenda, and know how to work with them to get the right results.

Tax Management and Accounting Services

*Insight and credentials
that help teams navigate
today's business changes*

**Global Leader,
Tax Management and Accounting Services**
Buddy Tinley
+1 678 419 8838
buddy.tinley@us.pwc.com

Today, when it comes to managing taxes, many businesses find that the approaches they've taken in the past are no longer optimal nor sustainable to manage risks and the dynamics of today's operating environment. This could be due to changes in their industry or organization, changing legislation, structural transformations, pressure from shareholders and regulators, or budget pressures. Our global Tax Management and Accounting Services (TMAS) network has the experience to help you define and implement an operating model that works for your business, so that you retain effective control over your global taxes. PwC's TMAS network can provide insight and credentials that help teams navigate today's business changes and build efficient, effective and adaptable tax functions to support global tax management responsibilities. In addition to assisting you in building internal capabilities, we can also coordinate the outsourcing of your compliance – enabled by software that gives you central control and visibility to the status of your compliance across borders – for direct and indirect taxes, statutory financial statement production and tax reporting.

Our Tax Policy and Administration network provides insight into today's policy trends and issues worldwide. There are a number of elements to this which include:

- helping our clients to understand and comply with their fiscal and regulatory obligations in relation to tax,
- helping our clients maximise value for all stakeholders over time on the basis of full disclosure and in compliance with our Global Code of Conduct,
- using our knowledge and experience to assist policy makers in both developed and developing countries improve the efficiency and effectiveness of their tax systems, and
- being seen as acting fairly, openly and consistently with all stakeholders such that we are trusted by all parties.

For this purpose, 'stakeholders' include, as well as our clients, revenue authorities, governments, legislators, governmental departments and their officials, non-governmental organisations, supra-national bodies, regulators, the media, professional bodies and trade associations.

Our specialist knowledge and expertise in these areas sits mainly with the members of our network and tax country leaders. For assistance in tax policy and administration matters please do not hesitate to contact us.

Transfer Pricing

Extensive experience in dealing with revenue authorities around the world

Global Leader, Transfer Pricing

Garry Stone

+1 312 298 2464

garry.stone@us.pwc.com

The scrutiny of transfer pricing by tax authorities worldwide has intensified and our network of 2,000 transfer pricing specialists in over 75 countries has extensive experience in dealing with revenue authorities around the world. Using their expertise in accounting, economics, dispute resolution and your industry, they can help you prepare for the challenges this scrutiny will present. As a network of specialists, we help companies develop sustainable arm's length pricing, tax efficient structures, help make them more compliant with legal requirements and help them respond quickly to an audit and resolve transfer pricing disputes. More importantly, we work to ensure they're less exposed to transfer pricing risks in the future.

Business transformation invariably leads to complex operational, tax and legal implications. PwC's Value Chain Transformation (VCT) can help. VCT is defined as the integrated and cross-border portfolio of capabilities to support organizations to align their tax, legal and operating models to achieve sustainable financial and operational benefits during business transformation. VCT helps you to align and optimizing key elements to improve profitability, efficiency, controls and visibility throughout the value chain. Our deep industry experience in key sectors and our international network of 600 cross-disciplinary VCT specialists allows us to manage the complexity involved in business transformation and help clients build the foundation for sustainable growth.

The Worldwide Tax Summaries – Corporate Taxes 2012/13 guide represents the combined efforts of more than 500 local PwC tax specialists in over 150 countries and territories. While too numerous to name individually, we thank them for their efforts in preparing this guide.

To obtain regularly updated information on the corporate and individual tax rules in operation in over 150 countries, please visit the Worldwide Tax Summaries online at www.pwc.com/taxsummaries.

To download an ebook version of the Worldwide Tax Summaries - Corporate Taxes 2012/13, please visit www.pwc.com/taxsummaries/ebook.

Worldwide Tax Summaries editorial team

Essential tools, always up-to-date

WWTS Online

Our online version of the summaries is available free at www.pwc.com/taxsummaries. WWTS online is updated continuously and provides quick access to the latest information and changes in corporate and individual taxation worldwide, as well as tools such as the Quick Charts, which allow you to compare rates and due dates across jurisdictions.

WWTS Mobile

WWTS online is also available on your mobile device at www.pwc.com/taxsummaries/mobile

Quick Charts

The Worldwide Tax Summaries Quick Charts provide access to country-by-country tax information and international organisation membership information in an easy-to-use chart format.

Quick Charts are currently available for corporate income tax rates and due dates, VAT rates, withholding tax rates, EU member countries, OECD member countries, and WTO member countries.

Tell us what you think

Our goal is to make WWTS your go-to guide for tax information in jurisdictions across the globe. If you have comments or feedback on either this book or WWTS online, please go to www.pwc.com/taxsummaries/survey to provide feedback.

The world's taxes at your fingertips

If you are responsible for managing taxes in a business which trades or operates across a number of different territories, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of those countries, notwithstanding the fact that these frequently change.

Worldwide Tax Summaries – Corporate Taxes 2012/13 is a useful reference tool, to help you manage taxes around the world. It offers quick access to information about corporate tax systems in 152 countries worldwide, in an easily digestible format.

Written by local PwC¹ tax specialists in each country, it covers the latest changes in legislation, residency, gross income, deductions, tax credits and incentives, tax administration, other taxes and tax rates, up to date (unless otherwise stated) as of 1 June 2012. Also included is a global directory of PwC contacts organised by their tax specialty area.

Visit our online version
www.pwc.com/taxsummaries

¹ "PwC" is the brand under which member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide services. Together, these firms form the PwC network. Each firm in the network is a separate legal entity and does not act as agent of PwCIL or any other member firm. PwCIL does not provide any services to clients. PwCIL is not responsible or liable for the acts or omissions of any of its member firms nor can it control the exercise of their professional judgment or bind them in any way.
