Foreword

Welcome to the latest edition of *Worldwide Tax Summaries* (WWTS), one of the most comprehensive tax guides available. This year's edition provides detailed information on corporate tax rates and rules in 152 countries worldwide.

The country summaries, written by our local PwC tax specialists, include information on changes in legislation, residency, gross income, deductions, tax credits and incentives, tax administration, other taxes and tax rates. All information in this book, unless otherwise stated, is up to date as of 1 June 2012.

Our online version of the summaries is available at www.pwc.com/taxsummaries. The WWTS site is updated continuously and provides quick access to the latest information and changes. Some of the enhanced features available online include Quick Charts to compare rates across jurisdictions, and reference materials on OECD, EU, and WTO member countries, amongst other valuable information.

If you have any questions, or need more detailed advice on any aspect of tax, please get in touch with us. The PwC tax network has member firms throughout the world, and our specialist networks can provide both domestic and cross-border perspectives on today's critical tax challenges. A list of some of our key network and industry specialists is located at the back of this book.

I hope you will find these summaries useful, and please don't hesitate to contact any PwC specialist with comments or feedback on WWTS.

Significant developments

The double tax treaty (DTT) between the Republic of Albania and the Federal Republic of Germany has come into force from 1 January 2012, and a DTT has been signed with the Republic of Singapore.

Based on a recent change, non-resident taxable persons who are providing services related to immovable property located in Albania are liable to pay value-added tax (VAT) in Albania, regardless of the value of the services supplied, by appointing a tax representative in Albania.

Starting from 15 July 2011, taxpayers involved in business activities such as driving school services, city cleaning services, and fishing are allowed to credit VAT on the purchase of fuel used wholly and exclusively for their business activities, up to a limit represented by a certain percentage of the annual total turnover of the taxpayer.

Starting from 1 July 2011, the minimum and maximum monthly salaries for social and health contributions changed, respectively, from 16,820 Albanian lek (ALL) and ALL 84,100 to ALL 17,540 and ALL 87,700.

Starting from 24 August 2011, excise taxes on beer made from malt, either from local or foreign producers, changed. Details are included in the table below:

Amount (in hectolitres per year)	Previous excise tax (ALL/litre)	New excise tax (ALL/litre)
Up to 70,000	30	10
70,001 to 200,000	30	12
200,001 to 300,000	40	15
More than 300,000	40	30

Excise duty on heavy oil used as fuel (such as solar and mazut) rose from 20 ALL/kg to 37 ALL/kg, while excise duty on petroleum coke rose from 1 ALL/kg to 2 ALL/kg.

Starting from 24 August 2011, no custom duties are applicable on products such as leather used for clothes, cotton, viscose, velvet, sewing accessories, etc.

Starting from 6 December 2011, the minimum share capital required for joint stock companies increased from ALL 2 million to ALL 3.5 million. Joint stock companies established before the change are required to have completed the capital increase procedures by 6 December 2011. If the share capital drops below the minimum threshold set, the company should be dissolved.

Albania

Taxes on corporate income

Albanian law applies the principle of worldwide taxation. Resident entities are taxed on all sources of income in and outside the territory of Albania, while non-resident entities are taxed on income generated only in the territory of Albania.

The corporate income tax (CIT) rate in Albania is 10%. CIT is assessed on the taxable profits calculated as taxable income less deductible expenses.

Local income taxes

Entities with total annual turnover of lower than ALL 8 million are subject to local taxes on income.

Corporate residence

Based on Albanian legislation, a legal entity is deemed to be resident in Albania if it has its head office or its place of effective management in Albania.

Permanent establishment (PE)

PE in Albania means a fixed place of business where an entity carries out, wholly or partly, its business activities, including, but not limited to, an administration office, a branch, a factory, a workshop, a mine, and a construction or installation site.

The determination of a PE, where applicable, is based on the provisions of the double tax treaties (DTTs) that Albania has entered into with a number of countries. When dealing with DTT provisions, the Albanian tax authorities refer to the Organisation for Economic Co-operation and Development (OECD) commentaries.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 20%, and the standard VAT period is the calendar month.

Taxable transactions include goods and services supplied domestically as well as goods imported into Albania by a taxable person. The following transactions are also taxable:

- Transactions performed for no consideration or for a consideration less than market value.
- Barter transactions.
- The private use of taxable goods by a taxable person (self-supply).

Determination of VAT taxpayers

Taxable persons are all physical persons and legal entities registered, or required to be registered, for VAT purposes.

The VAT registration threshold in Albania is annual turnover over of ALL 5 million (37,000 euros [EUR]). Any person providing taxable supplies and whose annual turnover does not exceed ALL 5 million (EUR 37,000) is not required to register, although voluntary registration is possible.

Taxpayers who, in the course of their business activities, provide services in any of the following listed professions are required to register for VAT purposes in Albania, regardless of their annual turnover:

- Lawyer
- Engineer
- Attorney (notary)
- Laboratory technician
- Specialist doctor
- Designer
- Dentist
- Economist
- Specialist dentist
- Agronomist
- Pharmacist
- Certified Public Accountant
- Nurse
- Approved Accountant
- Midwife
- Property evaluator
- Veterinarian
- Hotelier business
- Architect

VAT obligations for non-resident entities

Foreign entities not registered with the Albanian tax authorities, carrying out business activities in Albania, are subject to 20% VAT in Albania when services rendered are related to immovable property located in Albania. This is applicable regardless of the value of the services supplied.

In this case, the foreign entity is obligated to register and pay VAT in Albania by nominating a VAT representative.

In cases where the foreign entity is in non-compliance with the above requirement, the tax liabilities and respective penalties derived from such non-compliance should be paid by the local beneficiary of the services.

Reduced-rate goods and services

The supply of drugs and health services provided by private or public institutions are subject to a reduced VAT rate of 10%.

Zero-rated goods and services

The following goods and services are subject to 0% VAT in Albania:

- Export of goods.
- The supply of goods related to the international transport of goods or passengers.
- The supply of goods and services in relation to trading and industrial activities at sea.
- Services related to transport of goods and passengers.
- Services related to international telecommunications.

VAT-exempt goods and services

The following are considered VAT exempt:

Albania

- The lease of land.
- The lease of buildings (only if the rental period is limited to two months), except in cases where there is a contract between parties in which the supply is deemed as taxable.
- Provision of services performed by Albanian subcontractors relevant to the processing of semi-finished goods intended for export.
- Financial services.
- Postal services (only if the post does not import or carry out other postal services and its annual turnover doesn't exceed ALL 5 million).
- Gambling, casino, and racetrack services.
- Written media and books.
- Advertising in electronic and written media.
- Interest payments on leasing transactions.
- Export of services.
- The sale of land and buildings, although the construction process itself is subject to VAT.
- The supplies made against a reduced payment by religious or philosophical organisations for the purpose of spiritual welfare.
- The supplies of packages and materials used for the manufacture and confection of drugs.
- Educational services.
- Hydrocarbon operations.
- Supply of free goods distributed for emergencies.

VAT calculation

The amount of VAT to be paid is calculated as the difference between the VAT applied to purchases (input VAT) and the VAT applied to sales (output VAT). If the input is higher than the output, then the difference is a VAT credit which can be carried forward to subsequent months. Otherwise, if the output VAT is higher than the input VAT, the difference represents VAT payable to the state.

Taxpayers who carry out taxable VAT activities, as well as VAT exempt activities, can credit only that portion of their input VAT that corresponds to the VAT-able activities. To determine the amount of input VAT that can be claimed from the state, the taxpayer should estimate a VAT credit coefficient, being the rate of the taxable VAT activities over total activities.

Items of machinery and equipment imported by Albanian registered entities for their own use in the business activity (i.e. not for resale) are subject to a VAT deferral scheme under which the payment of VAT is postponed up to 12 months with a possibility of extension for an additional 12-month period.

VAT reimbursement

Taxable entities have the right to claim VAT reimbursement if the period in which VAT credits are carried forward exceeds three consecutive months and the total amount of accumulated VAT credit is equal to or above ALL 400,000 (EUR 2,965).

Following the request for VAT reimbursement, taxable entities have the right to obtain the reimbursement of VAT credit within 30 days after the request is submitted.

VAT returns

The submission of VAT returns and sales and purchase books must be done electronically by all taxpayers.

Electronic submission deadlines fall on the dates below:

- For VAT books, the deadline is the fifth day of the following month.
- For VAT returns and for the payment of the related VAT liability, the deadline is the 14th day of the following month.

VAT representatives are not subject to electronic submission of VAT books and returns. Instead, they are required to submit (by sending to the tax authorities through courier) only the VAT books and make the related VAT liability payment by the 14th day of the following month.

Customs duties

Albania uses the Harmonized Code System for tariff classification.

The custom duty rates range from 0% to 15%, depending on the type of goods.

Import of machineries and equipment for use in the taxpayer's business activity are generally subject to custom duties at the zero rate.

Custom duties on imports of vehicles are 0%.

Excise duties

Any individual, or legal entity (including their fiscal representatives), that either produces or imports into the territory of the Republic of Albania any commercial goods defined to be subject to excise tax, is subject to excise tax in Albania.

Albania levies excise tax on the following products:

- Beer: ALL 10/litre to ALL 30/litre, depending on the annual quantity in hectolitre (*see the Significant developments section*).
- Wine: ALL 20/litre to ALL 35/litre, depending on the annual amount in hectolitre.
- Other alcoholic drinks: ALL 100/litre to ALL 400/litre.
- Tobacco and its by-products: ALL 1,500/kg to ALL 2,500/kg, and ALL 70/pack.
- Liquid by-products of petroleum: ALL 20/litre to ALL 50/litre.
- Solid by-products of petroleum: ALL 5/kg to ALL 40/kg.
- Fireworks: ALL 200/kg.
- Pneumatic tyres: ALL 20/kg to ALL 40/kg for new purchased tyres and ALL 100/kg for used tyres.
- Incandescent lamps: ALL 100/unit.
- Plastic, glass, and mixed packages: ALL 100/litre, ALL 10/litre, and ALL 20/litre respectively.

Reimbursement of excise tax can be obtained on:

- The excise tax paid on fuel used by entities engaged in the constitution of energy resources with installed capacities of not less than 5 MW for both its own needs and for sale.
- The excise tax paid on fuel used in green houses as well as in production of industrial and agricultural products.
- Plastic, glass, and mixed packaging used as input in the local recycling industries of these materials are reimbursed 50% of the excise paid for the packaging.

Real estate tax

Entities that own real estate property in Albania are subject to real estate tax.

Albania

Real estate tax on buildings

Real estate tax on buildings is calculated based on the type of activity the business entity owning the building carries out.

Type of activity	Tax rate (ALL/sq m/year)
Buildings used for commercial purposes and the rendering of services	
Health, handicraft, social, cultural, educational, and scientific services	140
Production activities	140
Commercial and administrative services	200
Other buildings used for commercial purposes and the rendering of services	200
Other buildings not used for commercial purposes and the rendering of services (e.g. buildings owned by non-governmental organisation [NGOs] or foundations; damaged, amortised, non-functional buildings that are state-owned properties or privatised ex-state-owned properties in which no activity is performed)	50

Real estate tax on agricultural land

Real estate tax on agricultural land is levied on each hectare and varies depending on the district where the agricultural land is located and on the land productivity categorisation.

Stamp duties and notary taxes

There are no stamp duties on the sale contract of land or other properties. There are, however, notary taxes which are, in nature, similar to stamp duties. The notary tax on sales contracts that relate to change in ownership of immovable properties is ALL 1,000. The notary tax on sales contracts that relate to change in ownership of movable properties is ALL 700.

Depending on the agreement reached between the seller and the buyer, the notary tax can be paid either by the seller, or by the buyer, or shared between both of them.

Registration taxes

The fee for the registration of a business entity is ALL 100.

Branch income

Branch offices in Albania are subject to the same taxes as all other forms of legal entities.

Income determination

Inventory valuation

Inventory is valued at the end of each tax period using the methods stipulated in the Accounting Law, which should be applied systematically. The methods stipulated in the National Accounting Standards for the valuation of inventory at year-end are the average cost and first in first out (FIFO) methods.

Capital gains

Capital gains are taxed at the same rate as the company's ordinary business income.

Dividend income

Dividends and other profit distributions received by a resident entity from another resident entity or from a non-resident entity are not subject to CIT for the resident beneficiary of such income. This applies despite the participation quote (in amounts or number of shares) of the entity distributing profits in the shareholder capital, voting rights, or its participation in initial capital of the beneficiary.

Interest income

Interest income is taxed at the same rate as the company's ordinary business income.

Foreign income

Albanian resident corporations are taxed on their worldwide income. If a DTT is in force, double taxation is avoided either through an exemption or by a granting tax credit up to the amount of the applicable Albanian CIT rate.

Albanian legislation does not contain any provisions under which income earned abroad may be tax deferred.

Deductions**Depreciation and amortisation**

Allowed tax depreciation and amortisation rates and methods for each category of fixed assets are shown below:

Asset category	Method	Rate (%)
Buildings and machinery and other fixed structures installed in the building.	Reducing-balance basis	5
Computers, software products, and information systems.	Reducing-balance basis	25
Other assets	Reducing-balance basis	20
Intangible assets (including goodwill and start-up expenses).	Straight-line basis	15

Land, fine art, antiques, and jewellery are non-depreciable assets.

Depreciation and amortisation of fixed assets at amounts higher than those allowed for tax purposes is considered a non-deductible expense.

Interest expenses

Interest paid in excess of the average 12-month credit interest rate applied in the banking system, as determined by the Bank of Albania, is a non-deductible expense. The amount of deductible interest expense may also be limited by thin capitalisation rules (see *Thin capitalisation in the Group taxation section*).

Bad debt

Bad debts are only deductible if the following conditions are met simultaneously:

- An amount corresponding with the bad debt was included earlier in income.
- The bad debt is removed from the taxpayer's accounting books.
- All possible legal action to recover the debt has been taken.

This applies to all entities except those operating in the financial sector.

Albania

Fines and penalties

Fines and other tax-related sanctions are non-deductible expenses.

Taxes

Income taxes, VAT, and excise duties are non-deductible expenses.

Other significant items

The Albanian legislation also defines the following specific costs as non-deductible:

- Expenses not supported with fiscal invoices.
- Expenses paid in cash of amounts exceeding ALL 300,000.
- Benefits in kind and gifts.
- Wages, bonuses, and any other form of income deriving from an employment relationship and paid to the employees in cash.
- Provisions and reserves (with some exemptions applicable to the financial sector).
- Expenses for technical services, consultancy, and management received from foreign entities that are not registered for tax purposes in Albania and for which no withholding tax (WHT) has been paid by 31 December, at the latest.
- Losses, damages, wastage incurred during production, transiting, or warehousing, exceeding the norms defined by laws and related instructions.
- Impairment losses on fixed assets.
- Representation and reception expenses exceeding 0.3% of annual turnover.
- Sponsorship expenses exceeding 3% of profit before tax and sponsorships of press and publications exceeding 5% of profit before tax.

The amounts allocated to special reserve accounts in banks and insurance companies are deductible, provided that they do not exceed the limits stated in the Bank of Albania regulations.

Employers' contributions towards the life and health insurance of employees are deductible.

Net operating fiscal losses

Fiscal losses may be carried forward up to three consecutive years. However, losses may not be carried forward if more than 25% of direct or indirect ownership of the share capital or voting rights of the company is transferred during the tax year.

Albanian legislation does not allow losses to be carried back.

Group taxation

There is no group taxation in Albania.

Transfer pricing

Transfer pricing adjustments may be made if the conditions set in a transaction between related parties differ from those that would have been set if the parties were independent. In particular, the following are regarded as related parties:

- A legal entity and any person who owns, directly or indirectly, at least 50% of the shares or voting rights in that entity.
- Two or more legal entities if a third person owns, directly or indirectly, at least 50% of the shares or voting rights in each entity.

Thin capitalisation

The interest paid on outstanding loans and prepayments exceeding four times the amount of net assets are not deductible. This rule does not apply to banks and insurance companies.

Controlled foreign companies (CFCs)

There is no CFC regime in Albania.

Tax credits and incentives

The following entities are exempt from CIT:

- Legal entities that conduct religious, humanitarian, charitable, scientific, or educational activities.
- Trade unions or chambers of commerce, industry, or agriculture.
- International organisations, agencies for technical cooperation, and their representatives, the tax exemptions of which are established by specific agreements.
- Foundations or non-banking financial institutions established to support development policies of the government through credit activities.
- Film studios and cinematographic productions (among other types of entity/activity) that are licensed and funded by the National Cinematographic Centre.

Foreign tax credit

Albania does not apply foreign tax credits except in the case of DTTs (see *Foreign income in the Income determination section*).

Withholding taxes

The gross amount of interest, royalties, dividends, and shares of partnerships' profits paid to non-resident companies is subject to a 10% WHT, unless a DTT provides for a lower rate.

The 10% WHT is levied on the gross amount of payments for technical, management, installation, assembly, or supervisory work, as well as payments to management and board members.

If a non-resident company does not create a PE in Albania, and a DTT exists between Albania and the home country of the non-resident company, the payment of WHT can be avoided.

Double tax treaties (DTTs)

Albania has signed 36 DTTs, of which 32 are in force.

WHT rates envisaged by applicable DTTs are provided in the following table:

Recipient	WHT (%)			Applicable from
	Dividends	Interest	Royalties	
Austria	5/15	5	5	1/1/2009
Belgium	5/15	5	5	1/1/2005
Bosnia and Herzegovina	5/10	10	10	N/A
Bulgaria	5/15	10	10	1/1/2000

Albania

Recipient	WHT (%)			Applicable from
	Dividends	Interest	Royalties

Turkey	5/15	10	10	1/1/1997

Notes

1. If the recipient company owns directly or indirectly 50% of the capital of the paying company, 0% rate of the gross amount of the dividends applies. If the recipient company owns directly or indirectly 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.
2. A tax rate of 5% of the gross amount of the interests applies in case of interests in a contracting state, which are paid to a loan granted by a bank or any other financial institution of the other contracting state, including investment banks and savings banks and insurance. A tax rate of 10% of the gross amount of the interests applies in all other cases.
3. If the recipient company or any other governmental body is resident of other contracting state, 0% rate of the gross amount of the dividend applies. If the recipient company (other than a partnership) owns directly or indirectly at least 10% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
4. If the recipient company (other than a partnership) owns directly or indirectly at least 75% of the capital of the paying company, 0% rate of the gross amount of the dividends applies. If the recipient company (other than a partnership) owns directly or indirectly at least 10% of the capital of the paying

- company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
5. If the recipient company (other than a partnership) owns directly or indirectly at least 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
 6. If the recipient company (other than a partnership) owns directly or indirectly at least 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.
 7. A tax rate of 10% of the gross amount of the royalties applies, unless it can be avoided.

Tax administration

Taxable period

The tax year is the calendar year.

Tax returns

The final CIT return is due by 31 March of the year following the tax year.

Payment of tax

Predetermined advance payments of CIT are due by the 15th day of each month. Advance payments of CIT payable by the small business category are payable on a quarterly basis.

According to the tax laws, CIT is paid during the year on a prepayment basis. The amount of monthly CIT prepayments is determined as follows:

Years of activities	Period from January to April	Period from May to December
Year 1	Taxpayer's estimation	Taxpayer's estimation
Year 2	Taxpayer's estimation	CIT of Year 1 divided by months of activity in Year 1
Year 3	CIT of Year 1 divided by months of activity in Year 1	CIT of Year 2 less CIT prepaid during January to April in Year 2 divided by 8 months

Companies should decide on the use of their prior fiscal year after-tax profit within six months of the subsequent year and submit the decision to the tax authorities no later than 31 July. The decision should state the amount allocated as statutory reserve, the amount to be used for investments and/or for increase in share capital, and the amount to be distributed as dividends.

The final due date for the payment of the final CIT for a fiscal year is 31 March of the following year. Note that this payment is calculated as the total amount of CIT self-assessed from the taxpayer for that particular fiscal year less total CIT instalments paid related to that year.

Companies have the obligation to pay the tax on dividends to the tax authorities no later than 30 July of the year the financial results are approved, regardless of the fact of whether the dividend has been distributed or not to the shareholders.

Statute of limitations

With regard to Albania's tax administration practices, the statute of limitations of a tax audit is five years. However, the statute of limitations can be extended by 30 calendar days in cases where:

Albania

- a new assessment is made as a result of an appeal against a previous tax assessment
- a tax assessment is made as a result of a tax audit or investigation of the taxpayer by the tax administration, or
- the taxpayer is subject to a penal case related to one's tax liabilities.

Significant developments

Under the ongoing Angolan Tax Reform, the following legislation was published in the Official Gazette:

- Amended Investment Income Tax (Presidential Decree Law nr 5/11): *See the Taxes on corporate income section.*
- New Stamp Tax Code (Presidential Decree Law nr 6/11): *See the Other taxes section.*
- Amendments to the Consumption Tax Regulation (Presidential Decree Law 7/11): *See the Other taxes section.*

Although only released at the end of February 2012, the Official Gazette dates back from 30 December 2011, and the changes now introduced are in force since 1 January 2012. Due to this time gap, the informal understanding of the authorities is that the changes are effectively in force since March 2012.

Some other very relevant tax changes are expected at the end of 2012, namely concerning corporate income tax (CIT) and employment income tax.

Taxes on corporate income

The standard CIT rate of 35% is levied on the taxable income of the following corporate income taxpayer groups (although, in practice, the last two are not applicable in actual Angolan economic reality):

- Group A - Tax is levied on actual profits as shown in taxpayers' accounting records (e.g. public and private companies, permanent establishments [PE] of foreign entities), adjusted accordingly with the provisions of the CIT Code.
- Group B - Tax is levied on taxpayers' presumable profit (taxpayers not included in groups A or C).
- Group C - Taxation is based on profits that taxpayers could normally earn/obtain (e.g. small family companies).

Resident entities are subject to CIT on worldwide income. Non-resident entities deemed to have a PE in Angola are subject to CIT on Angola-source income.

Special regimes, rules, and tax rates are provided for the oil and gas industry and the mining industry.

Exemptions from CIT are provided for:

- Agricultural companies (for up to ten years).

Angola

- Cooperatives.
- Culture associations.
- Non-resident shipping operators (as long as reciprocity exists).

Investment income tax (IAC)

Investment income tax (*Imposto sobre a Aplicação de Capitais* or IAC) is due on interest, dividends, royalties, and other income of a similar nature. In Angola, the IAC code divides such income into two taxable sections as follows:

Section A

Section A investment income includes the following:

- Interest on credit facilities.
- Interest on loans.
- Income derived from deferred payments.

Tax is due at the moment that the interest or income is earned or at the moment when it is presumed to have been earned.

Note that a minimum annual interest rate of 6% is deemed on loan agreements and credit facilities, except if another rate is proven through a written contract.

Section B

Section B investment income includes the following:

- Dividends.
- Capital remunerations of members of 'cooperatives'.
- Bond interest.
- Treasury bond interest.
- Interest on shareholders' loans.
- Income derived from profits of non public interest entities not collected until the end of the year.
- Gambling income.
- Royalties.

For the purposes of this group of income, note that:

- The concept of royalties includes the remuneration of any kind attributed to the use of or consent to use copyrighted literature; arts or science works, including movies and films or recordings for radio or television transmissions; patents; brands; drawings or models of a plan; formulas; or secret processes. The concept of royalties also applies to the use of or the consent to use industrial, commercial, or scientific equipment and information related to an experience acquired on the industrial, commercial, or scientific sector.
- A minimum annual interest rate equal to the rate used by commercial banks on credit operations is deemed interest for shareholders' loans.

Tax is due at the moment the effective attribution of income (dividends) is earned (interest) or paid (other income).

Exemptions

The following income is exempt from IAC:

- Interest on deferred payment of commercial transactions.
- Payment of dividends to Angolan CIT-payers that hold a share higher than 25% for more than one year.
- Interest from financial products approved by the Ministry of Finance that intend to encourage savings, capped to capital invested of 500,000 Angola kwanza (AOA) for each person.
- Interest from housing saving accounts intended to encourage savings for main permanent dwelling.

IAC rate

The IAC rate is 15%, except for the following income for which the rate is 10%:

- Dividends.
- Capital remuneration of members of 'cooperatives'.
- Bond interest.
- Interest from treasury bonds (or 5% for interest of bonds with a maturity equal to or greater than three years).
- Royalties.

Tax is withheld by the payer on Section B income.

For Section A income, tax is assessed by the taxpayer through a tax return to be filed in January of the following year. When the payment of that income is made to a non-resident entity, Angolan law provides that the tax payment obligation shifts to the Angolan resident entity paying the income.

Any IAC paid is regarded as a tax deductible cost and, in addition, 65% of that tax paid is deducted up to the CIT liability. The only exception will be any investment income tax paid on dividends exempted.

Corporate residence

Business entities with a head office or effective management in Angola are considered resident entities and are taxed on worldwide income.

Permanent establishment (PE)

Angola has not signed any double tax treaties, therefore its domestic tax provisions apply with regards to PE.

The Angolan concept of tax PE is inspired in the United Nations (UN) Double Tax Treaty Model. A foreign entity is deemed to create a PE in Angola if it:

- has a branch, an office, or place of management in Angola
- has a construction or installation site, or provides supervision over such site, only when such site or activities exceed a period of 90 days in any given 12-month period, or
- carries out services in Angola, including consulting, acting through employees or other personnel contracted for that end, when such services are provided for a period of at least 90 days in any given period of 12 months.

Angola

Other taxes

Consumption tax

There is no value-added tax (VAT) or sales tax in Angola. However, a consumption tax exists, which is similar to that of an excise duty. For goods imported or produced locally, the rates vary from 2% to 30%. For services, the following rates apply:

Type of service	Consumption tax rate (%)
Lease of areas designated for collection and parking of motor vehicles	5
Leasing of machinery and other equipment, as well as work carried out in tangible assets	10
Leasing of areas used for conferences, colloquiums, seminars, exhibitions, showrooms, advertising, or other events	10
Consultancy services, namely legal, tax, financial, accounting, IT, engineering, architecture, economics, real estate, audit services, and legal services	5
Photographic services, film processing and imaging, IT services, and construction of web sites	5
Port, airport, and custom agent services	5
Private security services	5
Tourism and travel services promoted by travel agencies or equivalent tour operators	10
Canteen, cafeteria, dormitory, real estate, and condominium management services	5
Access to cultural, artistic, and sporting events	5
Road, sea, train, and air transportation of cargo and containers, including the management of warehouses related to this transport, and passenger transportation, if provided in Angolan territory	5

For all the services mentioned above, the tax compliance obligations are the responsibility of the Angolan service providers, who can then add the tax to the amount charged to the acquirers. However, if the service providers are non-resident entities in Angola, the obligation will revert to the resident entities acquiring the services, if they are liable to pay CIT.

Customs duties

Duties are levied on imports at *ad valorem* rates varying from 2% up to 30%. The range of taxation for both consumption tax and import duties varies according to the type of goods. The rates are set out in the tariff book.

Listed equipment may be imported temporarily, if a bank guarantee is provided.

A 0.1% statistical fee and a 1% stamp duty is also due on importation plus custom fees (from 1% to 3%).

A special exemption regime applies for the oil industry for some listed equipment.

Stamp tax

Stamp tax is payable on a wide variety of transactions and documents, at specific amounts or at a percentage based on value.

Important examples include:

Type of operations	Stamp tax rates
<p>On receipts Stamp tax on receipts (in cash or in kind) is still applicable.</p>	<p>The rate of stamp tax for receipts is of 1%.</p>
<p>Financial operations Stamp tax is applicable to financial operations, such as credit utilisation (and not only open credit accounts) and bond guarantees, interest and commission charged by financial institution, as well as foreign withdrawals, foreigner public debt bonds, foreign notes, and coins.</p> <p>As a general rule, stamp tax is due for the entity that provides the credit and charge for the interest and commissions being then charged to the borrower or the interest/commissions debtor.</p>	<p>Credit facilities are subject to stamp tax on the utilisation of such funds, and, depending on the period, the rates of stamp tax will vary from 0.3% to 0.5%.</p> <p>For regular credit, bank overdrafts, or credit where the period is not determined, stamp tax applies at a rate of 0.001%.</p> <p>Housing credits are subject to stamp tax at a rate 0.001%.</p> <p>Financial leasing on real estate and financial and operational leasing of tangible assets (maintenance and technical assistance included) are now subject to stamp tax at a rate of 0.3% and 0.4%, respectively.</p>
<p>Real estate operations Stamp tax is due on a paid acquisition of real estate by the acquirer.</p> <p>Stamp tax is also due on letting and sub-letting, as well as on financial leasing of real estate, except when the leasing is for a permanent dwelling, which is exempt from stamp tax.</p> <p>It is now clear in the law that tenants and sub-tenants are liable to stamp tax on letting and sub-letting.</p>	<p>Stamp tax applies on the acquisition of real estate at a rate of 0.3%.</p> <p>Stamp tax applies on the registration of letting and sub-letting contracts at a rate of 0.4%.</p>
<p>Corporate operations Stamp tax is due on the initial or increase of share capital, whether made in cash or in kind.</p> <p>Insurance Insurance provided by national companies is subject to stamp tax, being the tax settled by the insurance company cost of insured person.</p> <p>The commissions generated in the insurance mediation business will also be subject to stamp tax.</p> <p>Premiums and commission related to life insurance products, insurance against accidents at work, health insurance, and agricultural processing and livestock insurance are exempt from stamp tax.</p>	<p>On share capital and increase of share capital stamp tax applies at a rate of 0.1%.</p> <p>The stamp tax applies on the amount of premium paid, and rates may vary from 0.1% to 0.3%, depending on the policy's nature.</p> <p>Commissions for mediation are subject to stamp tax at a rate of 0.4%.</p>

Angola

Type of operations	Stamp tax rates
Other operations In addition to the operations referred to above, the new table also refers the stamp tax applicable to written agreements, financial and operation leasing in tangible assets, custom operations, cheques, lending, civil deposits, gambling, licences, traders' books, deeds, report, credit bonds, and transfer of business, among other acts.	The following other stamp taxes are applicable: <ul style="list-style-type: none">• Transfer of industrial or agricultural business: Stamp tax applies at a rate of 0.2%.• Stamp tax of 1% on the import value.

The following exemptions apply:

- Credit granted for a period of up to a maximum of five days, micro-credit, credit related to young accounts and old age accounts, and others of a similar nature that does not exceed the amount of AOA 17,600 each month.
- Credit derived from credit card utilisation, when the reimbursement is made free of interest, according to the terms of the contract.
- Credits related with exportation, when duly documented with the respective custom clearance.
- Amounts due on the mortgage for the acquisition of a permanent dwelling.
- On interest and commissions charged on financial operations, such as young accounts, old age accounts, and credits related to export under the terms mentioned above.
- Interest from Treasury Bonds and Angolan Central Bank notes.
- Commissions charged for subscriptions, deposit and withdrawal from units of investment funds, as well as the charges from pension funds.
- Commission charged on the opening and utilisation of saving accounts.
- Credit operations (including interest) for periods not exceeding one year, provided these are obtained exclusively to cover treasury needs, when realised between shareholders and entities in which a direct capital shareholding not lower than 10% is held and which has remained in their ownership for a year (consecutively), or since the incorporation of the respective entity.
- Loans bearing the characteristics of shareholder loans, including the respective interest, made by shareholders to the company in respect of which an initial period not shorter than one year is stated and no reimbursement is occurred before the end of that period.
- Treasury management operations, carried out between companies within the same group.
- Insurance premiums and commissions related to life insurance, work accidents, health, and agriculture and livestock insurance products.

Real estate income tax (IPU)

IPU is levied on rental income earned by individuals or companies owning real estate assets. It is based on actual rental income when the assets are leased and on the assets' registered value when the assets are not leased.

Leased assets

IPU is levied on rental income at a 25% rate.

The rental income is automatically reduced by 40% of its value, as it is presumed to finance all real estate related expenses.

Therefore, in practice, IPU applies at an effective 15% rate on rental income (i.e. 25% multiplied by 60% of rental income), with a minimum amount of 1% of the asset registered value.

A real estate asset is registered at the higher of (i) its valuation (based on criteria and tables to be published which will take into account the area (square metres) and the characteristics of the property) or (ii) the value of its latest transfer.

Assets that are not leased

IPU is levied as follows for assets that are not leased:

Patrimonial value (AOA)	IPU rate (%)
Up to 5 million	0
Over 5 million (on the excess) (1)	0.5

Notes

1. An asset registered at AOA 35 million will pay IPU only on AOA 30 million, resulting in an IPU payable of AOA 150,000.

Exemptions

The only accepted exemptions of IPU will be the following:

- State public institutions and associations that are granted with the public utility statute.
- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.

Payment

Rents paid by Angolan entities (individuals or companies) that carry out commercial activity must withhold the 15% IPU from rents paid. The IPU so withheld must be paid over to the tax authorities by the end of the following month.

For any other cases, owners of real estate assets must pay the IPU in January and July of the following year. At the request (by July each year) of the IPU taxpayer, if approved, the IPU is payable over four instalments in January, April, July, and October of the following year.

Filing requirements

IPU Model 1 must be filed by IPU taxpayers each January, disclosing the rents effectively received in the preceding year, distinguishing the leases agreed and received.

Real estate transfer tax (SISA)

SISA is levied at a 2% rate for all acts that involve onerous permanent or temporary transmission of real estate. The value liable to tax is the higher of (i) the sale value or (2) the registered value.

Exemptions of SISA are only applicable to the following entities:

- State public institutions and associations that are granted with the public utility statute.

Angola

- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.
- Real estate transferred for less than UCF 78,000 (currently UCF 1 = AOA 88) only when (i) at the first sale and (ii) for residential purposes.

Branch income

Branch taxable income is taxed on the same basis as separate legal entities. Income remitted by a branch to the head office is not subject to IAC.

Income determination

Inventory valuation

Inventory is valued at the historic acquisition cost. Any other method of valuation needs to be approved by the tax authorities.

Capital gains

Capital gains arising from the disposal of fixed assets are taxed as part of normal income.

Capital gains are determined by the difference between the sales proceeds and the acquisition value, deducted from tax deductible depreciation, adjusted by a devaluation coefficient.

Dividend income

Dividends received are exempt from CIT, provided that the share participation is owned for two consecutive years (or since the incorporation of the entity where the participation is held) and the share participation is not less than 25%.

Dividends from Angolan participations owned by insurance companies to fund their technical reserves are also exempt from CIT.

Interest income

Interest from public bonds is exempt from CIT.

Rental income

Rental income, as being liable to real estate income tax, is not liable to CIT. *See the Other taxes section for more information.*

Royalty income

Royalty income is taxed as normal income. Any IAC paid is regarded as a tax deductible cost and, in addition, 65% of that tax paid is deducted, up to the CIT liability.

Foreign income

An Angolan resident corporate income taxpayer is taxed on all its foreign income. Any income tax proved to be paid outside the country for activity carried out outside the country will be credited against the CIT liability.

No tax deferral provisions exist in Angola.

Deductions

Depreciation

Depreciation should be computed using the straight-line method; any other method must be approved by the tax authorities.

The tax depreciation rates should respect the limits imposed by Government Ruling 755/72, and, in absence in this Ruling, the tax authorities interpretation, as follows:

Type of asset	Rate (%)
Office building	2
Industrial building	4
Computers	33.33
Office equipment	10
Furniture	10
Software	33.33
Light passenger vehicles	33.33
Start-up expenses	33.33

Depreciation not accounted for at cost is not permitted as a deduction in the following years.

Further, depreciation of land and goodwill is not accepted for tax purposes.

30% of the increase on depreciation resulting from a legal revaluation of fixed assets is not accepted for tax purposes, as well as the total increase in depreciation resulting from free revaluation of the fixed assets.

Interest expenses

Interest costs are accepted as deductible for tax purposes.

Bad debt

Write-off of debts is considered as deductible only if the write-off resulted from a bankruptcy court process.

Provisions

The only provisions accepted as deductible for tax purposes are:

- Doubtful debts within an annual limit of 2% of the client's current total account value and provided that a 6% accumulated provision limit is not exceeded.
- Inventory depreciation within limits that vary from 1% and 8% (annual and accumulated) depending on the nature of the company's activity.
- Those respecting the limits and rules imposed by the Insurance Supervision Institute for insurance companies, as well as the Central Bank for Financial Institutions.
- Provisions for possible losses resulting from a court process.

Charitable contributions

Donations are accepted as deductible up to a limit of 2% of the taxable income if the donations are granted to Angolan education, science, charity, and cultural institutes. If granted to Angolan government, central and local administration bodies, the donations are fully deductible.

Angola

Fines and penalties

Fines and penalties are not accepted for tax purposes.

Net operating losses

Tax losses are deductible from the taxable income of the following three years. Carryback of losses is not allowed.

Payments to foreign affiliates

Payments to foreign affiliates are accepted for tax purposes, although the arm's-length principle should be respected.

Group taxation

There are no special rules for group taxation in Angola.

Transfer pricing

Despite the existence of the arm's-length principle in Angolan corporate tax law, there are no detailed regulations on transfer pricing. Taxpayers should be aware that, in light of existing generic rules included in the corporate tax code, the tax authorities do have means to adjust inter-company charges.

Thin capitalisation

There are no thin capitalisation rules in Angola.

Tax credits and incentives

Foreign tax credit

Any income tax proved to be paid outside the country for activity carried out outside the country will be credit against the CIT liability.

Investment incentives

Profits retained and then reinvested by the company in new installations or equipment during the following three financial years may be deductible from taxable income during the following three years after the investment is finalised. Note that this benefit is not yet regulated.

Special regulations also provide tax and customs incentives for investment projects in strategic economic development areas and sectors. One such incentive can provide up to 15 years of CIT exemption.

Withholding taxes

Withholding tax (WHT) is applicable on payments for services provided to Angolan entities. For Angolan taxpayers, this is regarded as an advance payment of the CIT due at the year-end. For non-resident companies, this is a final tax.

The payments subject to this WHT are those related to:

- Construction, improvement, repair, or conservation of immovable property withheld at a rate of 3.5% on the gross payments (CIT rate of 35% applicable on a 10% deemed margin).

- Other services, namely technical assistance and management fees, withheld at a rate of 5.25% on the gross payments (CIT rate of 35% applicable on a 15% deemed margin).

Due to the IAC, Angola does not have a separate WHT for dividends, interest, and royalties (*see the Taxes on corporate income section for more information*).

Tax administration

Taxable period

The tax year follows the calendar year.

Tax returns

The annual corporate tax return must be submitted by the last business day of May of the year following the year to which the income relates.

Payment of tax

Tax is paid in four instalments. The first three correspond to advance payments based on the expected tax to be paid or, if unknown at that date, 75% of the taxable income computed on the previous year multiplied by the tax rate (35%). The instalments are paid in January, February, and March, and the final instalment is paid with the submission of the annual tax return on the last business day of May.

Audit cycle

There are no specific provisions related to the audit process in Angola.

Statute of limitations

The statute of limitations in Angola is five years.

Antigua and Barbuda

PwC contact

Email: charles.walwyn@ag.pwc.com

Significant developments

On 1 January 2012, the Antigua and Barbuda Sales Tax (ABST) rate on hotel accommodation increased from the transitional rate of 10.5% to 12.5%. ABST is a value-added tax (VAT).

Taxes on corporate income

Companies incorporated in Antigua and Barbuda pay corporate income tax (CIT) on their worldwide income, with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from Antigua and Barbuda are liable for CIT and should be registered if they have a physical presence in Antigua and Barbuda.

Antigua and Barbuda imposes a flat CIT rate of 25%.

Taxable income or chargeable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Chargeable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior period losses up to 50% of chargeable income.

Where a person resident in Antigua and Barbuda makes to another person not resident in Antigua and Barbuda a payment which the payor is entitled to deduct in arriving at chargeable income, then a withholding tax (WHT) must be deducted. In addition, if the income received by the non-resident person would have been subject to tax under the Income Tax Act, then WHT must be deducted by the payor.

Reduced CIT rate for certain financial institutions

Financial institutions licensed under the Banking Act that maintain, throughout the tax year, residential mortgage rates at or below 7% are subject to a reduced CIT rate of 22.5%.

Corporate residence

A corporation is deemed to be a resident if it is incorporated in Antigua, if it is registered as an external company doing business in Antigua, or if the central management and control of its business are exercised in Antigua.

Permanent establishment (PE)

A PE is not defined in the Income Tax Act; however, any company which would meet the general definition of a PE must be registered.

Other taxes

Value-added tax (VAT)

Antigua and Barbuda Sales Tax (ABST) is a VAT applicable to a wide range of goods and services. The standard rate is 15%, and hotel accommodation carries a transitional rate of 12.5% (10.5% prior to 1 January 2012).

A number of services, including financial services, local transportation, sale of residential land, education, long-term accommodation (greater than 45 days), and medical and veterinary services, are exempt from ABST. Certain supplies are zero-rated, including exports, basic food items, water, electricity for residential use, sale of new residential property, construction of new residential premises, and fuel. Intergroup transactions are taxable.

A period in the ABST Act represent one month. The threshold for registration is 300,000 East Caribbean dollars (XCD) in taxable activity per 12-month period.

Customs duties

All imports are subject to customs duties, ABST, Antigua and Barbuda Revenue Recovery Charge, and an environmental levy. In all instances, certain exemptions will apply.

Customs duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. Customs duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

Antigua and Barbuda Revenue Recovery Charge

Antigua and Barbuda Revenue Recovery Charge is applied at a flat rate of 10% on the CIF value on all goods imported into or produced in Antigua and Barbuda. Exemptions will include entities with which the government has International Assistance Agreements, certain government entities, and most supplies or imports of fuel.

Property taxes

Property tax is levied annually at graduated rates on the basis of the market value of real property (as assessed by the Property Valuation Department) and its use (residential or commercial).

Property tax rates are as follows:

- Agricultural land 0.10%.
- Residential land 0.20%.
- Residential building 0.30%.
- Buildings classified as other property 0.50%.
- Land classified as other property 0.40%.

Allowances and tax rebates are available as follows:

- 5% rebate for payment of tax on or before the due date.
- Between 25% and 100% tax rebate available for special development property and property for public use; 25% for hotels.

Antigua and Barbuda

Non-citizens undeveloped land tax

Undeveloped land tax is levied on the basis of the value of land owned by non-citizens which has not been developed.

Rates of tax are as follows:

- Second year of ownership: 5%
- Third year of ownership: 15%
- Fourth and subsequent years of ownership: 20%

Stamp tax

Stamp tax applies to a very wide range of transactions (e.g. bill of sale, leases, mortgages, contract, bill of lading). Stamp tax on transfer of real property and shares are specifically covered below.

Transfer of real property

Stamp tax is imposed on both the buyer and the seller and is levied on the consideration for the sale or the value of property as assessed by the Chief Valuation Officer, whichever is higher. The stamp tax for vendors is 7.5%, and the stamp tax for purchasers is 2.5%.

Non-citizens vendors are required to pay a land value appreciation tax at the rate of 5%, which is assessed on the difference between the value of property when purchased, plus improvements, and the value of property at the time of sale.

Non-citizens purchasers are also required to pay 5% of the value of property with reference to a non-citizens license required to hold property in Antigua and Barbuda.

Transfer of shares

Stamp tax is imposed on both the buyer and the seller and is levied on the market value of the shares or book value of the shares, whichever is higher. The stamp tax for vendors is 5%, and the stamp tax for purchasers is 2.5%.

A non-citizen must obtain a licence (at a cost of XCD 400) to hold shares or be a director in a company that owns land or has a lease on land in excess of five acres for a period greater than five years.

Environmental levy

Environmental levy is calculated based on dollar value rates from XCD 0.25 to XCD 2,000 and is used to finance the cost of protecting and preserving the environment.

Life insurance premium tax

A premium tax of 3% is levied on the premium income (net of agent's commission) of all life insurance companies, whether resident or non-resident.

General insurance premium tax

A premium tax of 3% is levied on the premium income, excluding motor business (net of agent's commission), of all general insurance companies, whether resident or non-resident.

Branch income

Branch income is taxed on the same basis and at the same rate as that of corporations. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch are subject to WHT at a rate of 25%. The recharges have to be justifiable, consistent, and cannot just be based on a percentage allocation.

Income determination

Inventory valuation

Inventories are generally stated at the lower of cost or net realisable value. First in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Commissioner of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. Last in first out (LIFO) is not permitted for tax or book purposes.

Capital gains

Capital gains are not subject to tax in Antigua and Barbuda.

Dividend income

Dividends received by a company resident in Antigua from another company resident in Antigua are taxed at the CIT rate of 25%. Credit is given to the recipient for the tax already paid on the dividend in computing the tax liability.

Stock dividends

An Antiguan corporation may distribute a tax-free stock dividend proportionately to all shareholders.

Interest income

Interest income received by a company registered in Antigua is taxed at the CIT rate of 25%. Interest earned on local and other CARICOM government securities are normally exempt from the payment of CIT.

Foreign income

An Antiguan corporation is taxed on foreign branch income as earned and on foreign dividends as received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom [UK] and CARICOM). There is also relief from British Commonwealth taxes. *See Foreign tax credit in the Tax credits and incentives section for more information.*

Deductions

Depreciation

Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates (*see table below*). Initial allowances are granted on industrial buildings and on capital expenditures incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of

Antigua and Barbuda

2% is granted on all buildings. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

Assets	Depreciation rate (%)
Building, roads, fencing, and pavements	2
Plant and machinery, generators	10
Furniture, fixtures, fittings, and equipment	10
Air conditioning units	12.5
Motor vehicles	20
Computer hardware, accessories, and software	33.33

Goodwill

Goodwill and trademarks are not depreciating assets, and amortisation is not allowed.

Start-up expenses

There are no specific provisions in relation to deductions for start-up expenses. However, certain start-up expenses, such as costs of incorporation and other initial start-up costs, may qualify for a five year straight-line write-off.

Interest expenses

No deduction is allowed for interest on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Only interest paid to banks and financial institutions licensed under the Financial Institutions (Non-Banking) Act on loans borrowed at commercial rates and terms is deductible.

Bad debt

General allowances made for bad debts are not deductible. For a bad debt claim to be deductible, it must be specific and the taxpayer must prove to the Inland Revenue Department (IRD) that the debt became bad during the year.

Cultural and social contributions

A deduction of 50% of all substantial contributions made by any person with respect to sport, education, or culture in Antigua and Barbuda is allowed against a person's assessable income from trade, business, or profession. Contributions must be in excess of XCD 10,000 in any assessment year, and deductions during any assessment year will be limited to XCD 250,000.

Restriction on rents paid

Rents paid by a company to shareholders, directors, their spouses, children or relatives, or to any related parties in excess of 5% of the otherwise chargeable profits of the company may not be deducted.

Restriction on compensation

Salaries, wages, directors' fees and other payments made for services rendered by the shareholders, directors, their spouses, children, or relatives in excess of 25% of otherwise chargeable profits may not be deducted.

Fines and penalties

Fines and penalties imposed under Antiguan tax law are not deductible expenses.

Taxes

There are no provisions in the Income Tax Act in relation to the deductibility of taxes paid by a company. However, in general, ABST, ABST input tax credits, and adjustments under the ABST Act are disregarded for income tax purposes. Other taxes, including property tax, transfer taxes, payroll taxes, insurance, except income tax and share transfer tax, are deductible to the extent they are incurred in producing chargeable income.

Net operating losses

Income tax losses may be carried forward for six years following the year in which the loss was incurred. However, the chargeable income of a company in any one income year may not be reduced by more than one half by losses brought forward. No carryback of losses is permitted.

Payments to foreign affiliates

An Antiguan corporation may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm's-length test.

Group taxation

Group taxation is not permitted in Antigua and Barbuda.

Transfer pricing

There are no provisions for transfer pricing in the tax laws of Antigua and Barbuda.

Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of Antigua and Barbuda.

Tax credits and incentives

Tax incentives are currently available under the following legislation.

Fiscal Incentives Ordinance (1975)

The Fiscal Incentive Ordinance provides manufacturers of an 'approved product' with an exemption from taxes for varying periods, up to a maximum of 15 years. After the period of exemption, relief by way of tax credits of up to 50% of CIT paid on profits derived from certain export sales may be obtained. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and relieved against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

International Business Corporations (IBC) Act (1982)

An IBC is an entity incorporated under the IBC Act for the purpose of carrying on international trade or business. The IBC structure allows for a comprehensive range of business opportunities including international banking, trust business, insurance, manufacturing, and other international trade activities to persons outside of Antigua and Barbuda within a tax-free environment. An IBC is exempt from the payment of CIT, ABST, and WHT.

Antigua and Barbuda

The Investment Authority Act (2006)

The Investment Authority Act provides the framework for the promotion of investment opportunities in Antigua and Barbuda by introducing a system of registration of businesses, an investment code, and a range of incentives that are available to both resident and non-resident investors. The available incentives and concessions to which an investor may be entitled for consideration are as follows:

- Exemption from the payment of customs duty.
- Reduction of property tax.
- Exemption from CIT.
- Reduction of stamp duty.
- Exemption from WHT.

The amount of the incentives and concessions depend on the amount of the investment and the number of employees in the proposed business.

The investment categories are as follows:

- Capital investment of up to XCD 1 million or employs up to 26 persons: This investor may qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 10%, exemption from the payment of CIT and WHT for up to three years, and a reduction of stamp duty by up to 10% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 1 million, employs over 26 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 20%, exemption from the payment of CIT and WHT for up to five years, and a reduction of stamp duty by up to 20% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 10 million, employs over 51 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 30%, exemption from the payment of CIT and WHT for up to ten years, and a reduction of stamp duty by up to 30% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 25 million, employs over 75 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 40%, exemption from the payment of CIT and WHT for up to 12 years, and a reduction of stamp duty by up to 40% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 75 million, employs over 100 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 50%, exemption from the payment of CIT and WHT for up to 15 years, and a reduction of stamp duty by up to 50% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 100 million, employs over 150 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 75%, exemption from the payment of CIT and WHT for up to 20 years, and a reduction of stamp duty by up to 75% on the sale of land and buildings used in the business operation.

The Small Business Development Act (2007)

The Small Business Development Act provides the framework for the growth of the small business sector in Antigua and Barbuda by introducing a system of registration of small businesses and a range of concessions which are available to the business. The available concessions to any small business that would be entitled for consideration are as follows:

- Concession on customs duty of up to 100% (includes raw material, building material, equipment, vehicles, furniture, furnishings, appliances, fixtures and fittings, tools, spare parts, and machinery and equipment used in the construction and operation of the business).
- Property tax reduction of up to 75%.
- CIT exemption for a period not exceeding five years.
- CIT exemption after the initial five year period of up to 10%.
- WHT exemption for a period of up to three years.
- Stamp duty exemption on the registration of a mortgage.
- Stamp duty exemption on the transfer of property and any applicable non-citizen land holding licence.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Not a wholly owned or majority owned business or subsidiary of a larger company.
- Capital investment not exceeding XCD 3 million.
- Annual sales that do not exceed XCD 2 million.
- Majority owned by citizens of Antigua and Barbuda, or majority owned by non-citizens with all of the following restrictions:
 - Over 50% of the products must be exported.
 - Minimum investment of XCD 500,000.
 - At least 50% of the employees must be citizens of Antigua and Barbuda.
 - At least 40% of the goods and services used in production must be acquired from businesses in Antigua.

Foreign tax credit

Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and CARICOM). A foreign tax credit is also available to persons in Antigua and Barbuda who have paid or are liable to pay British Commonwealth income tax.

Residents

The relief available from tax in Antigua and Barbuda for a person resident in Antigua from tax paid in Antigua and Barbuda is the British Commonwealth income tax rate if that rate does not exceed one-half the tax rate in Antigua and Barbuda. If the British Commonwealth income tax rate exceeds the Antigua and Barbuda tax rate, then the relief will be limited to one-half the tax rate in Antigua and Barbuda.

Non-residents

The relief available from tax in Antigua and Barbuda for a person not resident in Antigua from tax paid in Antigua and Barbuda is one-half the British Commonwealth income tax rate if that rate does not exceed one-half the tax rate in Antigua and Barbuda. If the British Commonwealth income tax rate exceeds the Antigua and Barbuda tax rate, then the relief will be limited to the amount by which it exceeded one-half the rate of British Commonwealth income tax.

Antigua and Barbuda

No relief is available unless similar provisions exist in the laws of the relevant British Commonwealth country.

Withholding taxes

Tax is currently withheld from income as follows:

Recipient	WHT (%)				
	Dividends	Dividends (preferred shares)	Interest and rentals	Management fees, royalties, and other payments to a non-resident	Interest on bank deposits
Resident corporations and individuals	0	0	0	0	0
Non-resident corporations	25	25	25	25	25
Non-resident individuals	25	25	20	25	0
Residents of a CARICOM member state:					
Corporations	0	15	15	15	15
Individuals	0	15	15	15	0

Note that interest payments on bank deposits made to non-resident individuals are not subject to WHT. Interest payments on bank deposits made to non-resident corporations are taxed at the rate of 25%.

Where a non-resident lends money at arm's length for the purpose of promoting industrial, commercial, scientific, housing, or other development, the rate of WHT is 10%. Prior approval must be sought from the Commissioner of Inland Revenue, and it is recommended that Cabinet approval also be obtained.

WHT becomes due at the time of payment or accrual and must be paid within seven days thereof.

Tax treaties

There is a tax treaty with the United Kingdom and a DTA between member states of CARICOM.

The UK tax treaty provides that persons in either the United Kingdom or Antigua and Barbuda are entitled to relief from CIT and WHT. The treaty allows for the following relief:

- Where a UK resident is liable to pay income tax in the United Kingdom in respect of the same income which is taxable in Antigua and Barbuda, one will be entitled to relief at a rate that is equal to the amount by which the tax rate in Antigua and Barbuda exceeds one half the UK rate.
- If the tax rate in Antigua exceeds the UK tax rate, then one will be entitled only to relief at a rate equal to the half the UK tax rate.

Tax administration

Taxable period

Taxes are assessed on a fiscal-year basis.

Tax returns

The taxpayer must file a CIT return, which includes audited financial statements, within three months of the fiscal-year end. The authorities will subsequently raise an assessment.

If a return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 5% penalty for late filing (minimum of XCD 500). The taxpayer can object to assessments raised within 30 days and ask the Commissioner of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Tax Appeal Board. The Commissioner of Inland Revenue has the power to enforce the collection of tax prior to the determination of any objection or appeal. The Commissioner also has the discretion to order a stay on the collection and payment of all or part of any assessed tax until such time as the objection or appeal is finalised if it would be unjust not to do so.

Payment of tax

Advance tax is payable in monthly instalments and is ordinarily based on the tax chargeable and assessed in the previous fiscal-year. The standard amount of each instalment is determined as one-twelfth of the tax chargeable in the previous fiscal-year. If the assessment for the prior year has not been finalised, the Commissioner of Inland Revenue can raise an assessment based on best judgment.

The balance of tax due after deduction of advance tax, as notified in the assessment, is payable at the time of submitting the annual CIT return, which must not be later than three months after the financial year-end or one-month after service of the final assessment.

Tax is deemed to be in default if not paid within 30 days of the date on which it becomes due and payable. A penalty of 20% and interest of 1% per month is charged on unpaid taxes in default.

Audit cycle

The Antiguan tax system for companies is based on self-assessment; however, the IRD undertakes ongoing compliance activities to ensure that corporations are meeting their tax obligation. There is no specific approach used by the IRD in relation to compliance and audit activities. Compliance activities generally take the form of reviews of specific issues and audits.

Statute of limitations

The IRD can reassess CIT returns within a six year period. In addition, the IRD can make additional assessments of tax, interest, or penalties.

Topics of focus for tax authorities

The IRD does not have any specific compliance program; however, when an audit is done, the focus is mainly on the detection of basic non-compliance, such as omission of income, inclusion of non-deductible expenses, and classification of item between expenses and capital items.

Significant developments

Tax Penalty Amendments were introduced at the end of 2011, which became effective on 6 January 2012. The Criminal Tax Law now provides for up to nine years of imprisonment for tax and social security fraud and stipulates objective thresholds (a fixed amount of Argentine pesos [ARS]) for determining the amount of unpaid taxes that constitute a criminal offense. Those amounts had become outdated because of inflationary pressures in Argentina since the devaluation of the peso in early 2002. Because of the outdated amounts, almost every tax dispute before the amendments triggered a criminal tax issue because the previous thresholds were too low. The mentioned amendment quadruples the old thresholds, for example: increasing the amount that constitutes 'simple evasion' from ARS 100,000 to ARS 400,000 (from approximately 23,146 United States dollars [USD] to approximately USD 92,586), and the amount that constitutes 'aggravated evasion' from ARS 1 million to ARS 4 million (from approximately USD 231,465 to approximately USD 925,862).

An information system was established by the fiscal authorities on transfers of equity holdings in Argentine companies and, according to the case, also in foreign entities. It applies for transactions as of 1 January 2012, and, depending on the transaction, it should be completed by the seller, acquirer, transferred entity, or public notary intervener.

As of 1 April 2012, residents in Argentina who provide or receive services to or from overseas must complete, electronically, a tax return reporting information of these services so as to request approval from the tax authority (legal requirement in order to make the payment).

Fiscal authorities (AFIP) broadened the scope of the registration and reporting obligations (previously limited to domestic trusts) to target foreign trusts and other equivalent foreign structures that have a substantial nexus with an Argentine party (that is, when the settler, trustee, or any beneficiary is located in Argentina).

Since October 2011, there are new exchange controls that introduced restrictions on the exchange markets. The Argentine government imposed a requirement for mining companies and hydrocarbon to repatriate 100% of foreign exchange arising in their exports (it is worth reminding that previously they were only required to enter 30% of such amounts). Also, a control system was implemented through which the AFIP will approve the purchase of foreign currency.

The Argentine government has formally notified the Swiss authorities that it has terminated the provisional application of the double tax treaty (DTT) signed by both

countries in 1997. The notification was sent on 16 January 2012 but was not published in the Official Gazette until 31 January 2012.

On 23 April 2012, Argentina authorities signed an agreement with Uruguay for tax information exchange purposes and a clause related to avoid double taxation between the countries.

During 2011/12, Argentina has signed several tax information exchange agreements (TIEAs) based on Organisation for Economic Co-operation and Development (OECD) regulations with China, Ecuador, Guernsey, Bermuda, India, and Jersey. The TIEAs signed with China and Guernsey have entered into force.

Taxes on corporate income

Profits tax

The rate of profits tax on net taxable business profits is 35%. Legal entities resident in Argentina are subject to tax on Argentine and foreign-source income. Resident legal entities are able to claim any similar taxes actually paid abroad on foreign-source income as a tax credit. The tax rate applies on net income determined on a worldwide basis.

Corporations, limited liability partnerships (LLPs), and branches, as well as other entities, are required to make a flat and final income tax withholding of 35% from dividend payments to resident or non-residents beneficiaries, to the extent that the amount of such dividends exceeds the net taxable income determined at a corporate level in accordance with the general tax rules.

Argentine-source income (e.g. royalties, interests) received by foreign entities is subject to withholding tax (WHT) in full and final settlement at source (*see the Withholding taxes section*).

Tax on minimum notional income

In addition to the profits tax, there is a tax on minimum notional income. The rate is 1% on the value of fixed and current assets. The presumed tax, imposed annually, is applied only in excess of the profits tax of the same fiscal year. In addition, payment of this presumed tax, not offset by the profits tax, will be treated as payment on account of profits tax chargeable during a maximum period of ten years.

Banking and insurance entities are only subject to this tax on 20% of the corresponding taxable assets.

Corporate residence

Corporate residence is determined on the basis of centres of activity, which may be the location of a company's economic activity or management activity.

Permanent establishment (PE)

Centres of activity in Argentina of non-Argentine corporations are treated as PEs.

Argentina

Other taxes

Value-added tax (VAT)

VAT is assessable on the sales value of products (e.g. raw materials, produce, finished, or partly finished merchandise) with few exemptions, most services (e.g. construction, utilities, professional and personal services not derived from employment, rental), and on import of goods and services. The VAT rate is 21%, although certain specific items are subject to a 10.5% and 27% rate. It is payable by filing monthly tax returns.

The increased rate of 27% applies to 'utilities services' (e.g. telecommunications, household gas, running water, sewerage, and energy) not rendered to dwelling-purposes real estate.

A reduced rate of 10.5% applies to certain transactions, including (but not limited to) the following:

- Construction of housing.
- Interest and other costs on personal loans granted to final consumers by financial institutions.
- Sales and imports of living bovine animals, supply of publicity and advertising in some specific cases.
- Any passenger transportation operating inside the country when the distance does not exceed 100 km.
- Medical assistance in some specific cases.
- Certain capital goods depending on the Custom Duty Code.

VAT paid on purchases, final imports, and rental of automobiles not considered as inventory, cannot be computed by the purchaser as a VAT credit. The same tax treatment applies to other services, such as those provided by restaurants, hotels, and garages.

VAT exemptions

Among others, the following transactions are exempt from VAT:

- Sales of books, ordinary natural water, common bread, milk, medicine, postage stamps, aircraft used in commercial activities and for defence or internal safety, and ships or boats acquired by the national government.
- Supply of services such as: services rendered by the government (national, provincial, or local) or by public institutions, school or university education provided by private institutions subject to public educational programmes; cultural services supplied by religious institutions; hospital and medical care and related activities, transportation services for sick or injured persons in vehicles specially designed for the purpose; tickets for theatre, cinema, musical shows, and sport events, the production and distribution of motion picture films; local transport of passengers (e.g. taxis, buses) up to 100 km, international transportation.
- Rental of real estate for housing purposes.

VAT exemption on importation

The following transactions shall be exempted from VAT:

- Final importation of goods qualifying for exemption from customs duties under special regimes for tourists, scientists and technicians, diplomatic agents, etc.
- Final importation of samples and parcels exempted from customs duties.

VAT export reimbursement regime

Exports of goods and services are treated as a zero-rated transaction. Nevertheless, input VAT related to these transactions can either be used as a credit against output VAT or refunded pursuant to a special procedure.

Services rendered within the country shall be deemed to be exports if they are effectively applied or economically utilised outside the country.

Exporters must file an export return with the tax authorities, reporting the VAT receivables related to their exports to be reimbursed on VAT paid in relation to the export operations. This return has to be filed within the following tax period in which the export took place. A report certified by a public accountant with respect to the value, registrations, and other characteristics related to the refund must be attached to the export return.

The tax credit related to exports and other taxable activities can only be refunded in proportion to the exports, and can be fully refunded to a cap of 21% of the freight on board (FOB) value of the exported products.

There is no specific method stated in the legislation for allocating the tax credit related to exports, but taxpayers are able to use any methods of calculation that would be suitable to their business model. This calculation has to be approved by the tax authorities.

Finally, it is important to highlight that the tax authorities have to approve the tax credit to be refunded.

Electronic invoicing

The electronic invoicing regime is mandatory only for specific businesses according to Appendix I of R.G. 2485 (i.e. software development, consulting, accounting and audit services, exporters, advertising, mobile telecommunications, supplied services to government, etc.), and it is optional for the rest of the taxpayers. In order to opt for applying this regime, an authorisation must be obtained from the tax authorities. As a result, the tax authorities will assign an Electronic Authorization Code (*Código de Autorización Electrónico* or CAE).

The fiscal authorities are also allowed to nominate taxpayers to apply this regime, even though their activities are not included in Appendix I of R.G. 2485. This notification will be duly made to such taxpayers.

It is important to highlight that the fiscal authorities are expecting to make this regime mandatory for all the taxpayers in 2012.

Import and export duties

The levels of import duty currently range between 0% and 35%, except in cases where a specific minimum duty is applied or which involves merchandise with a specific treatment. These percentages were established considering the individual competitive conditions prevailing in different production sectors and the relative advantages of contributing to the introduction of equipment and technology for local industry. In general, merchandise originating from LAIA (Latin America Integration Association - ALADI) countries is entitled to preferential duty.

Argentina

In the case of export transactions, goods are valued based on the FOB clause, and the approach is based on their theoretical value, rather than a positive basis as in the case of imports.

Definitive exports of all goods are subject to export duties. The rates vary from 5% to 45%, depending on the tariff code of the merchandise (while 5% is typical, higher rates are considered for exports of agricultural products or hydrocarbons).

Excise taxes

Excise tax is assessable on a wide variety of items sold in Argentina (not on exports), principally on tobacco, wines, soft drinks, spirits, gasoline, lubricants, insurance premiums, automobile tires, mobile services, perfumes, jewellery, and precious stones. The bases of the assessment and tax rate of some items are as follows:

Products	Rates (%)	
	Nominal	Effective
Tobacco	16/20/60	19.05 to 25
Alcoholic drinks	20	25
Beers	8	8.70
Soft drinks	4 to 8	4.17 to 8.70
Jewellery and precious stones	20	25

Stamp tax

Stamp tax is levied by each of the 24 jurisdictions, and applies principally to contracts and agreements, deeds, mortgages, and other obligations, agreements and discharges of a civil, financial, or commercial nature of which there is written evidence or, in certain instances, that are the subject of entries in books of account. The average tax rate is 1% applicable on the economic value of the contract.

In the city of Buenos Aires, the standard tax rate is 0.8% of the aggregate amount of the transactions, contracts, and deeds that are subject to the stamp tax. Special rates of 0.5%, 1%, and 2.5% are also established; and, in the case of transactions involving uncertain consideration, a fixed tax of ARS 1,000 is applicable (on the fulfilment of certain conditions).

Turnover tax (gross income tax)

Each of the 24 jurisdictions into which Argentina is divided imposes a tax on gross revenues from the sale of goods and services. Exports of goods are exempt, and certain industries are subject to a reduced tax rate. Rates, rules, and assessment procedures are determined locally.

Information on tax rates of the economically largest jurisdictions is provided as follows:

Jurisdiction	General rate (%)	Commerce (%)	Services (%)	Industry (%)
Province of Buenos Aires	4.5	3 to 4.5	3.5 to 4.5	1 to 3
City of Buenos Aires	3/3.75 to 4	3.75 to 4	3.75 to 4	1
Córdoba	4	2 to 7.5	2 to 10.5	0.25 to 1.5
Mendoza	4	4 to 4.5	4 to 4.5	1.5/3 to 4
Santa Cruz	3	3	3	1.5
Santa Fe	3.5/3.8 to 4.2	1 to 4.5	1 to 4.5	0

Tax on financial transactions - on credits and debits on bank accounts

Bank account movements (deposits and withdrawals) are subject to this national tax at the following rates:

- 0.6% of deposits and withdrawals in bank accounts opened in local financial entities.
- 1.2% of any transactions made in a bank without using a bank account.

The 34% or 17% of the tax on financial transactions effectively paid on bank account deposit transactions (0.6%) and movement of funds (1.2%), respectively, is creditable against income tax and minimum notional income tax and/or respective tax advances.

Wealth tax

An annual wealth tax is levied on the shares or holding in the capital of local companies owned by individuals or undivided estates domiciled in Argentina or abroad, and/or companies and/or any other type of legal person domiciled abroad. It shall be assessed and paid directly by the local company, as a full and final payment on behalf of the shareholders (the issuing company has the right to recover from the shareholder the tax paid).

The applicable tax rate is 0.5% on the value of the participation, which is generally calculated on the difference between assets and liabilities arising from the financial statements closed at 31 December or during the respective fiscal year.

Payroll taxes

Foreign and local nationals working for a local company must be included on the local payroll and will be considered as local employees for local labour, tax, and social security purposes. Both the local company and the employees will be subject to the corresponding regulations.

All the compensation paid in Argentina or abroad for work performed for the local company will be considered as local compensation and should be reported to the tax and social security authorities, as the case may be, and included in the salary slips and recorded in the local labour books.

The local employer must withhold income tax on an actual and monthly basis and make the corresponding payments to the tax authorities through monthly WHT returns. Individual tax rates range from 9% to 35%, and personal deductions are available.

The local entity must issue salary slips every month for each employee included on its payroll, considering the total compensation mentioned above.

Employer social security contributions add between 23% and 27% to payroll costs. There is a compulsory 13th-month salary. There is no restriction regarding the employment of foreigners, provided they hold working visas.

Workers' (Employees') Compensation: Argentine labour regulations determine different forms of compensation for employees. These include, but are not limited to, the following:

- Vacation compensation.
- Compensation in a case of termination of employment contract with employee (prior notice of dismissal and to a severance payment, both based on seniority).

Main social taxes and contributions assessable on salaries are as follows:

Argentina

Social taxes and contributions	Percentage of gross monthly earnings (%) (including 13th month salary)	
	Employer (2, 3)	Employee (1)
Pension fund	17/21	11
National unemployment fund	-	-
Family allowances fund	-	-
Social services institute for pensioner	-	3
Social health care plan	6	3
Total	23/27	17

Notes

1. Social security charges borne by employees are applicable up to a monthly salary cap which currently amounts to ARS 19,070.55 (updated as of March 2012).
2. Contributions made by employers are applicable to total compensation without application of any cap.
3. Employers' contributions to the national unemployment fund, family allowances fund, and social services institute for pensioners is paid at a unified rate of 17%. The rate is increased to 21% for companies whose main activity consists of rendering services or commerce, provided the amount of their average total annual sales for the last three years exceeds USD 11.56 million (at the current exchange rate of USD 1.00 = ARS 4.45, equivalent to ARS 51.5 million).

Branch income

The rate of profits tax on net taxable profits from Argentine sources and from activities performed abroad by the branch is 35%. Branches are also subject to minimum notional income tax.

Income determination

Inventory valuation

Inventory valuation is based on the latest purchase. Thus, the last in first out (LIFO) method may not be elected for tax purposes. Conformity between book and tax reporting is not required.

Capital gains/losses

Capital gains and losses attract normal profits tax treatment, except that losses from the sale of shares and other equity interests may be offset only against the same type of income.

Capital gains on equity

Capital gains derived by foreign shareholders from the disposal of shares (either publicly or privately held) of Argentine companies (SAs) are currently tax exempt. Although, with certain risk, it may be argued that capital gains derived from the sale of quotas of the capital of Argentine limited liability companies (SRLs), or when the shares are sold by foreign 'offshore' entities, may also benefit from this tax exemption. Moreover, it's important to highlight that there is no mechanism to pay the tax when the transaction is between foreign parties.

Capital gains on debt

Capital gains derived by foreign beneficiaries from the sale of either public or privately held securities (*titulos valores*), such as '*obligaciones negociables*' (to the extent it is

accepted that they are equivalent to securities), notes issued by financial trusts (*títulos de deuda*), or public bonds (i.e. government bonds) should be exempt from income tax.

Any other capital gain derived from the sale of debt, not covered by the above exemption, should be subject to normal tax treatment (i.e. withholding of 17.5% of gross proceeds or withholding of 35% on the actual gain).

Dividend income

Dividends, including stock dividends, are not included in the tax base by the recipient if distributed by an Argentine company (see the *Withholding taxes section for additional information*). However, tax is levied if the dividends are distributed by a foreign company.

Foreign exchange gains/losses

The general rule is that foreign exchange results (gain or losses) have to be recognised on an accrual basis. However, in some cases, cash basis is applicable.

Foreign exchange losses can only be offset against foreign source taxable income.

Foreign income

Foreign income received or held undistributed abroad (in case of investments in non-stock companies) by resident corporations is subject to tax. Argentina does not have a controlled foreign company (CFC) regime. Tax losses from a foreign source can only be offset against income from a foreign source.

Deductions

Expenses necessary to generate, maintain, and preserve taxable income, and related to the company activity, are usually tax deductible, with a few exceptions, to the extent they are fair and reasonable.

Depreciation and depletion

Depreciation is generally computed on a straight-line basis over the technically estimated useful life of the assets or, alternatively, over the standard useful life (e.g. machinery and equipment: 10 years; furniture: 10 years). Depreciation of buildings and other construction of real estate is 2% per annum on cost (on a straight-line basis), unless it can be proved that useful life is less than 50 years.

Depreciation of automobiles whose original cost exceeds ARS 20,000 is not deductible. Related expenses (gasoline vouchers, insurance, rentals, repairs and maintenance, etc.) are deductible up to an amount of ARS 7,200 per automobile per year.

Conformity between book and tax depreciation is not required.

Profit or loss on the sale of depreciated property is determined with reference to cost less depreciation, restated for inflation as at March 1992, and is included in ordinary taxable income.

Percentage depletion is available for natural resources (mines, quarries, woods).

Argentina

Goodwill

The amortisation of goodwill cannot be deducted for income tax purposes. At the moment of sale, the taxable gain will be calculated deducting the cost expenses (purchase price).

With regards to self-developed goodwill, at the moment of sale the cost will be the amount of expenses incurred in obtaining it, if not deducted for income tax purposes before.

Research and development (R&D)

R&D expenditures (for the development of intangible assets) may be deducted when they are incurred or amortised over not more than five years, at the option of the taxpayer. Expenditures for R&D in connection with the creation of fixed assets form part of the assets' cost and are amortised over their useful lives.

The amortisation of brands and licences acquired can be deducted if they have a limited term of duration.

Start-up expenses

Start-up expenses may be deducted when incurred or amortised over not more than five years, at the option of the taxpayer.

Interest expenses

Tax law establishes a restriction on the deductibility of interest arising from debts of a financial nature, contracted by taxpayers with controlling/related non-resident entities, for income tax purposes (*see Thin capitalisation in the Group taxation section*).

Bad debt

The deduction of accounting bad debts is not allowed for tax purposes. However, if the debts fulfil certain characteristics (i.e. bankruptcy, prescription, among others), and with the corresponding supporting documentation, they can be deducted.

Charitable contributions

When made to societies and associations expressly exempt from assessment to profits tax, donations are admissible deductions up to a maximum of 5% of the donor's net taxable profits, provided certain requirements are fulfilled.

Representation expenses

If adequately documented, representation expenses are permissible deductions at up to 1.5% of the amount of salaries accrued during the fiscal year. According to the Regulatory Decree, representation expenses are payments made in order to represent the company in the market, to improve and maintain its relationship with suppliers and clients, etc.

Directors' fees

Amounts up to the greater of 25% of after-tax profit or ARS 12,500 per individual are deductible in the financial year to which they apply, provided they are approved and available for the director before the due date of the tax return, or in a later year of payment.

Taxes

Except for profits tax and the tax on minimum notional income, all taxes are deductible.

Net operating losses

Net operating losses may be carried forward for five years. Loss carrybacks are not permitted. Furthermore, foreign source losses must be offset by income from similar sources.

Losses on derivatives and hedging transactions can only be offset against income from the same transaction.

Payments to foreign affiliates

Transactions between related parties should be at arm's length (*see Transfer pricing in the Group taxation section for more information*). This principle is extended to transactions with companies located in low or no tax jurisdictions. Payments to foreign affiliates or related parties and companies located in low or no tax jurisdictions that represent income of Argentine source are tax deductible, provided they are paid before the due date for filing the tax return and the corresponding withholding is paid to the tax authorities. Otherwise they would be deducted in the fiscal year in which they are paid.

Technical assistance and services that involve transfer of technology should be covered by agreements duly registered with the National Institute of Intellectual Property for information purposes. These transactions are governed by the Transfer of Technology Law.

Group taxation

Group taxation is not permitted in Argentina.

Transfer pricing

The transfer pricing regulations governing inter-company transactions, adopt principles similar to those of the OECD pursuant to which companies must comply with the arm's-length principle in order to determine the value of goods and services in their transactions with foreign related companies.

The following taxpayers, among others, must generally file, together with their annual income tax return, a supplementary return (transactions encompassed by regulations governing transfer prices) and transfer pricing study:

- Taxpayers carrying out transactions with related individuals or legal entities set up, domiciled, or located abroad. Two or more persons are considered to be related parties when one of them takes part, either directly or indirectly, in the administration, control, or capital of the other, or when a person or group of persons takes part, either directly or indirectly, in the administration, control, or capital of those persons.
- Taxpayers carrying out transactions with related individuals or legal entities set up, domiciled, or located in countries with low or no taxation, whether related or not.
- Argentine residents carrying out transactions with PEs located abroad and owned by them.
- Argentine residents, owners of PEs located abroad, for transactions carried out by the latter with persons or other type of related entities domiciled, set up, or located abroad.

Argentina

The Regulatory Decree provides specific rules to determine the fairness of the transfer pricing methodology. These rules are similar to those set by the OECD and contemplate six methods, including the following:

- Comparable Uncontrolled Price (CUP).
- Resale Price Method (RPM).
- Cost Plus.
- Profit Split Method (PSM).
- Transactional Net Margin Method (TNMM).
- Special Method for Export of goods with prices quoted in transparent markets.

There is no specific hierarchy, as each particular transaction must be analysed based on the assets, functions, and risks involved and on information available. Regulations establish that the most appropriate method is that which reflects the economic reality of the transactions.

Thin capitalisation

Thin capitalisation rules apply as a restriction on the deductibility of interest arising from debts of a financial nature that are contracted by taxpayers with controlling non-resident entities and can be summarised as follows:

- For interest subject to a 15.05% withholding (i.e. paid on loans granted by certain banking institutions), the portion of interest stemming from financial liabilities exceeding two times the shareholders' equity is not deductible for tax purposes and is treated as dividends.
- Interest subject to a 35% WHT is fully deductible.

According to the Regulatory Decree of the Income Tax Law, the thin capitalisation rules are also applicable to any case where a lower withholding rate of 35% is applicable (for instance, interest payments to a controlling company resident of certain tax treaty countries).

Controlled foreign companies (CFCs)

Argentina does not have a CFC regime.

Tax credits and incentives

Foreign tax credit

National taxpayers are entitled to recognise a tax credit for any taxes actually paid in the countries where they have obtained foreign-source income, in respect of similar national taxes, up to a cap which is the increase in their Argentine tax liability due to the inclusion of the foreign income. Any excess not offset in a given fiscal year may be carried forward to the next five fiscal years.

Province of Tierra del Fuego Regime

Companies set up in the province of Tierra del Fuego enjoy a general tax exemption and important benefits in customs matters. Tax exemption includes income tax, tax on minimum notional income, tax on personal wealth, and excise tax. The VAT benefit consists of the release from payment of the technical balance of the tax (VAT debits less VAT credits). Also, a reduction of the prevailing rate for tax on financial transactions and the exemption from taxation on the transfer of fuels is contemplated.

Mining activity

An investment regime for mining activity is applicable to natural and legal persons. Mining ventures included within this regime enjoy fiscal stability (i.e. tax rates will remain basically the same) for a term of 30 years, except for VAT, which will adjust to the general regime. Furthermore, the regime grants incentives for profits tax, tax on assets, import duties, and any other tax for introduction of certain assets. Additionally, this mining investment law established an exploration recovery regime for the mining investors, which allows the reimbursement of the VAT credit balances originated in the mining exploration activity.

This regime allows the reimbursement of such VAT credits after a 12-month period since the expenditure was incurred, and only if it has been paid.

Through specific regulations, the authorities established the requirements (e.g. filing a tax return, filing a report certified by a public accountant with respect to the VAT, a presentation to the Mining Secretary) to be followed by the taxpayers in order to apply for this benefit.

Forestry

There is an investment regime for plantation, protection, and maintenance of forests. It contains rules similar to those for mining activity tax incentives:

- Fiscal stability for a period of 30 years. The period may be extended to 50 years.
- Refund of VAT resulting from the purchase or final importation of goods, leases, or services effectively for forestry investment project in a period of less than 365 days.

Export incentives

Exports of goods and services are exempt from VAT and excise taxes. The temporary importation of raw materials and intermediate and packaging goods for the manufacture of products for export is free from duties with the obligation of offering sufficient guarantees for the import. A reimbursement regime is in place for VAT credits paid to suppliers in relation to the export activity.

Oil and gas industry

The Argentine government has granted attractive benefits to the oil and gas sector to encourage the exploration of the nation's hydrocarbons reserves.

This legislation grants special incentives to investments in underdeveloped regions, speeding reimbursement of VAT (after a three-month period, inputs will be credited against other federal taxes or returned to the taxpayer), exemption from import duties, and offering an accelerated depreciation (over three years) for income tax purposes.

In addition, a three-year relief from minimum notional income tax, which is levied at 1% rate on the company assets, is provided by the law.

The incentive package will be in effect for 15, 12, or ten years, depending on whether the activities are performed in areas identified as (i) continental platform, (ii) within the country other than continental platform, and (iii) currently in production, respectively.

The benefits noted above will apply to the exploration permits granted as of the enactment of the law (1 November 2006) and up to five years, for the cases mentioned in (i), four years, for those described in (ii), and three years in the latter cases.

Argentina

There also exists a Promotion Regime, which grants similar benefits for the exploration of alternative sources of energy (e.g. wind energy).

Biotechnology industry

A promotional tax regime for development and production of modern biotechnology has been introduced. Pursuant to this law, the beneficiaries of the projects that qualify for this regime are entitled to the following benefits:

- Income tax: accelerated depreciation of capital goods, special equipment, parts, or components of newly acquired goods destined for the promoted project.
- VAT: Early refund of the tax applicable to the assets acquired for the project.
- Social security contributions: the amount representing 50% of social security contributions actually paid on the payroll salaries involved in the project shall be converted into a tax credit bond that may be applied to payment of national taxes.

Software industry

Under a software promotion regime, taxpayers carrying out software related activities as their main purpose may qualify for the following benefits:

- Fiscal stability for a ten-year period covering national taxes.
- Reduction of social security charges (70% of these charges may be credited against certain national taxes).
- Income tax relief (up to 60% of the applicable tax).

While most of the software related activities qualify for the fiscal stability benefit, the remaining incentives only apply to software R&D, quality control procedures, and software exports.

Some changes were introduced in 2011, and the period of application was extended until 31 December 2019. The possibility of using a bond tax credit, given by an amount equal to 70% of contributions to the social security system paid by the employer, as an 'advance payment' of the income tax was provided. There is also an increase in the control mechanisms.

Province incentives on local taxes

Most of the provinces have legislation establishing incentives for the development of industries within their boundaries, especially industries that utilise or develop their natural resources and provide work for their residents. The incentives, in general, consist of exemptions from provincial and municipal taxes.

Various provinces have investment promotion regimes. Even when there are certain differences among these regimes, generally they include the following incentives:

- Exemption from provincial taxes such as turnover tax, stamp duty, real estate tax.
- Reduced public utility rates.
- Support for infrastructure and equipment projects.
- Facilities for purchase, rental, or lease without charge of public property.

These regimes are not automatically applied, and a special procedure should be followed to be entitled to the respective benefits.

Free trade zones

The free trade zones offer exporters the possibility to import free from customs duties, statistics rate, and VAT all the necessary equipment for construction of a 'turnkey plant'

within the zones. Furthermore, exporters manufacturing within the zones enjoy the benefit of buying supplies and raw materials from third countries, without having to pay duties or taxes that lead to increased prices.

Customs authority regulating these goods considers them as stored in a third country; therefore, incoming products are subject to inspection with the sole purpose of classifying quantity and type. In other words, goods enjoy a duty-free status until they enter the Argentine customs territory. Goods may remain in the free zone for a maximum period of five years.

Withholding taxes

Equalisation corporate tax

Corporations, LLPs, and certain other entities are required to make a flat and final income tax withholding of 35% from dividend payments or profit distributions to resident or non-resident payees, to the extent that the amount of such dividends or profit distributions exceeds the taxable income of the distributing company, determined by applying the general tax rules (i.e. without considering any exemptions, abatements, and other adjustments arising from special promotional laws) included in their retained earnings at the end of the fiscal year, immediately preceding the date of payment or distribution.

Other payments

Other payments to residents and to non-residents are subject to WHT rates as follows:

Recipient	Interest (%) (1)	Royalties (%) (1, 2)
Resident corporations	6/28 (3)	6 (4)
Resident individuals	6/28 (3)	6 (4)
Non-resident corporations and individuals:		
Non-treaty:	15.05/35	21/28
Treaty:		
Australia	12	10/15
Belgium	0/12 (5)	3/5/10/15
Bolivia	15.05/35	21/28
Brazil	15.05/35	21/28
Canada	12.5	3/5/10/15
Chile	15.05/35	21/28
Denmark	12 (5)	3/5/10/15
Finland	15	3/5/10/15
France	15.05/20 (6)	18
Germany	10/15 (7)	15
Italy	15.05/20 (5)	10/18
Netherlands	12	3/5/10/15
Norway	12.5 (8)	3/5/10/15
Spain	12.5	3/5/10/15
Sweden	12.5	3/5/10/15
Switzerland (9)	12	3/5/10/15
United Kingdom	12 (5)	3/5/10/15

Argentina

Notes

1. Withholding from payments of interest and royalties to non-residents is based on a flat rate of 35% applied to an assumed percentage gross profit margin. This margin is not contestable, but the resultant rate may be limited by bilateral treaty. Under the 1998 tax reform, the general margin for interest paid for credits obtained abroad is 100%. However, a margin of 43% is applicable (i) if the debtor is a local bank, (ii) if the creditor is a foreign financial institution located in a country not considered as a low or no tax jurisdiction, or in countries that have signed an agreement with Argentina for exchange of information and have no bank secrecy laws, which are under the supervision of the respective central bank, (iii) if the interest is paid on a loan dedicated to the purchase of tangible assets other than cars, (iv) if the interest is paid on debt certificates (private bonds) issued by local companies and registered in certain countries that have signed an agreement with Argentina for the protection of investments, and (v) on interest paid on time deposits with local banks. 'Royalties' covers a variety of concepts. The rates given in this column relate specifically to services derived from agreements ruled by the Foreign Technology Law, as follows:
 - a. Technical assistance, technology, and engineering not obtainable in Argentina: 21% (35% on assumed profit of 60%).
 - b. Cessation of rights or licenses for invention patents exploitation and technical assistance obtainable in Argentina: 28% (35% on assumed profit of 80%). On non-registered agreements the rate is 31.5% (profit of 90% is assumed) or 35% (profit of 100% is assumed), depending on the case.

Several other concepts of 'royalties' are subject to rates that, in turn, may be limited by treaty. A broad sample of these concepts and the non-treaty effective rates are set forth in Note 2.
2. Payments to non-residents (only) for 'royalties', rentals, fees, commissions, and so on, in respect of the following are subject to withholding at the rates given below on the basis of assumed gross profit margins (Note 1) unless limited by treaty. The treaty concerned should be consulted to determine any limitation in each case.

Payment	WHT (%)
Freight and passenger bookings (other than those covered by special treaties), news and feature services, insurance underwriting	3.5
Containers	7.0
Copyright	12.25
Rental of movable assets	14.0
Motion picture, video, and sound tape rentals and royalties; radio, television, telex and telefax transmissions; any other means for projection, reproduction, transmission, or diffusion of image or sound; sale of assets located in Argentina (10, 11)	17.5
Rental of real estate (10)	21.0
Any other Argentine-source income (unless the non-resident is or was temporarily resident)	31.5

3. The higher tax rate is applicable on non-registered taxpayers. On interest paid to corporations by financial entities or stock exchange/open market brokers, income tax must be withheld at 3% (10% if not registered); individuals are tax exempt.
4. Resident corporations and individuals who are registered for tax purposes are subject to 6% withholding (28% if not registered).
5. Interest is exempt if paid on credit sales of machinery or other equipment, specific bank loans at preferential rate or loans by public entities.
6. The treaty limits taxation of interest to 20% (registered).
7. The 10% rate is applicable to interest on credit sales of capital equipment, any bank loan, or any financing of public works; otherwise 15%.
8. Interest paid on loans with guarantee of the Norwegian Institute for Credit Guarantees or paid in relation to imports of industrial equipment is tax exempt.
9. On 16 January 2012, the DTT with Switzerland was terminated.
10. Deduction of actual costs and expenses may be optionally exercised.
11. Gains on the sale of shares are exempt, except for companies, PEs, or other entities residing abroad whose main activity based on their statutes consists of investments to be made outside of their country of formation. These entities are subject to income tax withholding at the definite flat rate of 17.5%.

Tax administration

Taxable period

Tax is assessed on a fiscal-year, self-assessment basis.

Tax returns

The due date for filing the profits and the minimum notional income tax return is during the second week of the fifth month after the fiscal year end. Tax returns are filed electronically.

Payment of tax

Instalment payments on account of both profits tax and minimum notional income tax must be made in the course of the tax year. The instalment payments must be made on a monthly basis, beginning in the first month after the due date of filing of the tax returns.

Penalties

Penalties derived from tax infractions may be applied by tax authorities, as follows:

- Failing to file the tax return: Fines range between ARS 200 and ARS 400 (approximately USD 45 and USD 88).
- Tax omission or incorrect tax determination: Fines range from 50% to 100% of unpaid taxes or incorrect tax calculation.
- Tax avoidance: Fines range between two and ten times the avoided tax.
- Certain tax infractions may be penalised by closing the business premises for three to ten days. In addition, fines ranging between ARS 300 and ARS 30,000 (approximately USD 66 and USD 6,600) may be imposed.
- Simple evasion: Entities or individuals evading payment of social security contributions or withholdings, or both, payable to the Tax Authorities under the social security regime, through deceitful declarations, malicious concealment, or any fraudulent or deceitful procedure, either through action or omission, in excess of ARS 80,000 per fiscal period, shall be punished with two to six years' imprisonment. Such amount will be ARS 400,000 in the case of taxes, it being applied by tax and by fiscal year.
- If the infringement qualifies as aggravated evasion: Imprisonment could be extended from three years and six months to nine years in certain situations.

Interest on late payments

Late payment of taxes is subject to a monthly 3% interest rate. Interest will start accruing on the day after the filing due date.

Statute of limitations

The actions and powers of the tax authorities to determine and require payment of federal taxes, and to implement and enforce fines and closures planned, prescribe:

- five years in the case of registered taxpayers, as well as in the case of unregistered taxpayers who are not legally required to register in AFIP; or that, having that obligation, had not fulfilled them and, spontaneously, regularise their situation, and
- ten years in the case of unregistered taxpayers.

Audit cycle

The tax authorities are entitled to audit taxpayers within the statute of limitations period. Audits consist of revising the calculation of any national or provincial tax based on formal requirements. Where any assessment is issued by the tax authorities, the

Argentina

taxpayer is entitled to either accept it or file a claim. Assessments can be done under a real or estimated basis, depending on the specific case and the information that the taxpayers have on their transactions. In the case that the taxpayers do not accept the assessment during the administrative period, they can claim against Tax Courts before any judicial process.

There are no specific provisions about e-auditing.

Topics of focus for tax authorities

Topics of focus for tax authorities include the following:

- Increasing cooperation: tax information exchange.
- Tax treaty network under review (Chile and Spain).
- Tax treaty benefits: substance over form principle.
- High penalties and tax criminal law.
- Transfer pricing (inter-company charges and export of commodities to international intermediaries).
- Wealth tax: applicability on branches and the use of Montevideo Agreement.
- Possible tax modifications under analysis: the initiative seeks to make substantial changes in the income tax, with focus on financial income (taxability on securities sales), limitation of payments to tax havens, and the computation of tax losses.

Other issues

Convertibility Law

Although the Convertibility Law (which by Argentina's currency board established a fixed pegging of one-to-one parity between the peso and the US dollar during the 1990's and up to 2002 and inflation adjustment was not allowed) is no longer in place, the adjustment of inflation for tax purposes is not yet in force. There is a strong debate regarding the reinforcement of this procedure for fiscal years ended up to December 2002. However, a final decision has not yet been reached. The wholesale price index from 2004 to 2010 fluctuated in the range of 8% to 12% (reaching a peak of 15% in 2007) according to government statistics that seem to differ from those estimated by private consultants (2 or 2.5 times higher).

Exchange control regime

As a result of the devaluation of the Argentine peso at the beginning of 2002, several regulations were issued to limit the transfer of money abroad. They have been made more flexible up to date.

Regulations referring to the entrance of funds to the country, the obligation of liquidation of foreign currency in the Exchange Market of payments of exports of goods and services, remain in force. The terms to comply with the liquidation obligation vary between 60 and 360 days.

There are no restrictions for the payment abroad of interest, dividends, profits, royalties, and other commercial payments duly supported by the corresponding documentation. Payment abroad for other concepts may be subject to further filing requirements.

In addition, it should be particularly highlighted that a rule issued by the central bank in mid-2005 requires a compulsory one-year temporary deposit equivalent to 30% of funds brought by non-residents to Argentina, which must be kept in a reserve

(*encaje*) for the term of one year. This deposit is made in foreign currency and does not earn interest.

There are some exceptions, for instance, direct investments such as interest in Argentine companies (minimum 10%) or real estate are not subject to this rule, or if the funds were borrowed for the acquisition of fixed assets and the re-payment term is longer than two years.

Legal entities

Foreign companies in Argentina, carrying out their business or activity in Argentina, must have a local legal vehicle, of which the most common legal entity types are the following:

- Branch.
- Corporation (*Sociedad Anónima* or SA).
- Local Limited Liability Company (*Sociedad de Responsabilidad Limitada* or SRL).

Argentine corporations and LLPs, as Argentine residents, are subject to the Argentine tax system. Branches of foreign companies, whatever the nature of their activities, are taxed under the same rules as those applicable to corporations and LLPs.

Several documents are required to register an entity with the relevant authorities. Some of said documentation must be filed in the original language, duly translated and certified with the Apostille issued pursuant to The Hague Convention or legalised by the Argentine Consulate of the company's place of origin.

At present, the minimum capital requirement to incorporate an SA is ARS 12,000 (approximately USD 2,800). There are no special requirements regarding the minimum amount of capital for SRLs.

A branch does not require capital contributions unless it is engaged in certain specific activities (e.g. banking and financing). The branch must carry its financial statements separately from those of the foreign company.

The three legal types are subject to the same legal, tax, and accounting regulations.

Significant developments

The following amendments generally became effective in January 2012:

- In addition to the existing cap (twice of the Armenian Central Bank's settlement rate), the deductible interest expense payable within the tax year should not exceed:
 - nine times the value of net assets of a taxpayer, if borrowings received from banks and credit organisations, or
 - twice the value of net assets of a taxpayer, if borrowing received from other entities.

The net assets are a positive difference between the taxpayer's assets and liabilities. The value of net assets should be considered based on results of the reporting year.

The restriction does not apply to the banks and credit organisations and to the funds borrowed from international organisations specified by the government. The restriction also does not apply to the interest payable on funds attracted from publicly placed debt instruments (securities).

- If prepayments for goods and fixed assets are made to a non-resident offshore entity and those assets are not received within one year, then corporate income tax (CIT) at the 20% rate will apply on the amount of the prepayment.
- The deductibility of management service expenses has also been limited by the law. However, the limits and definition of 'management services' is still to be established by the government.
- Excise tax on alcoholic beverages is now the same for both local producers and importers.
- Customs duty on cars that cost more than 25 million Armenian drams (AMD) has been raised by 20% (luxury tax).
- Presumptive tax for the organisation of casinos, games with winnings, games with winnings by internet, and lottery has been raised (*see new rates under Presumptive tax system in the Taxes on corporate income section*).
- Some activities became subject to license payments, shifting from the presumptive tax system (*see the types of activities and rates under License payments in the Taxes on corporate income section*).

Double tax treaties (DTTs) with Cyprus, Hungary, Kazakhstan, Spain, and the United Kingdom and Northern Ireland have become effective in 2012.

Taxes on corporate income

Armenian resident entities, and non-resident entities doing business in Armenia through a branch or a representative office, are liable for CIT. Armenia taxes residents on their worldwide income; non-residents are subject to CIT only on their Armenian-source income.

The standard CIT rate is 20%.

Taxable income is defined to be the difference between a taxpayer's gross income and deductible expenses:

- Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempted under the law.
- Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

Taxpayers engaged in agricultural production are exempt from CIT on that income.

Note that resident entities, branches and representative offices of foreign entities, and individual entrepreneurs are required to withhold income tax at source on payments to non-residents not having a permanent establishment (PE) in Armenia (*see the Withholding taxes section*).

Investment funds pay CIT based on 0.01% of net assets.

Presumptive tax system

Taxpayers engaged in certain activities must use the presumptive tax system. Under this system, the taxpayer pays a fixed tax based on the location and area occupied by the business and will not be required to pay CIT or value-added tax (VAT). The rate of tax depends on the activity undertaken, as follows:

Type of business	Base data	Adjustment ratio	Monthly presumptive payment (AMD)
Activity related to vehicles	Transportation of passengers by cars: 1.0	In Yerevan: 3.4; Depends on region: 3.1 or 2.8	2,000 times the product of the base data and the adjustment ratio(s)
	For activities carried out by trucks: the lading in terms of tons	Depends on region: 1.1 to 1.9	
	For activities carried out by buses: the number of seats	Depends on region: 0.5 to 1.2	
Gambling house (casinos) organisers	Number of game tables		5 million times the base data
Gambling machine exploiters	Area in square metres		18,750 times the base data
	Number of machines		156,250 times the base data

Armenia

Type of business	Base data	Adjustment ratio	Monthly presumptive payment (AMD)
Lottery games organisers	Total value of lotteries sold during a month		25% of base data
	Number of computers for totalisators		75,000 times the base data in case of totalisators
	Number of websites provisioned for organising internet totalisator		1 million times the base data if connected to the global internet network

Activities connected with gambling house, gambling machine exploitation, and lottery games will be invalid from 1 January 2013.

License payments

Individuals (individual entrepreneurs) and legal entities engaged in certain activities should make license payments, which replace CIT and/or VAT. Under this system, the taxpayer pays a fixed tax based on the location and the business activity base data.

Type of activities	Base	Quarterly rate of license payment for 1 unit (thousand AMD)					
		Yerevan	Regions	In other cities and communities within 20 km from the Yerevan city's administrative borders	Other bordering location	Remote and locations	
Commercial trade activity outside of locations designed for implementation of trade, through the use of kiosks with the area of 7 m ² (in Yerevan) or 10 m ² in other regions	Total area of kiosk, m ²	5.0	2.5		2.0	2.0	1.0
Transportation of passengers with passenger cars		20.5	18.75		17.5	17.5	17.5
Organisation of billiard game	Game table	120.0	60.0		60.0	60.0	60.0
Organisation of table tennis	Game table	40.0	20.0		20.0	20.0	20.0
Barber's shops		45.0	36.25		36.25	27.0	27.0
Technical maintenance and repairs of vehicles		45.0	36.25		36.25	36.25	36.25
Organisation of computer games	Monitor	62.5	60.0		45.0	30.0	25.0

Local income taxes

Armenia does not have any local government taxes on income.

Corporate residence

Resident entities are legal and business entities whose existence is established under Armenian law. Non-resident entities are those whose existence is established under foreign law.

Permanent establishment (PE)

The domestic definition for a PE essentially adopts the definition for PE found in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes**Value-added tax (VAT)**

Armenia's current VAT law is based loosely on the principles of the European Union (EU) VAT Directive. Armenia operates the input-output model of VAT. VAT-registered persons may deduct the VAT paid on their inputs from the VAT charged on their sales and account for the difference to the tax authorities.

The standard rate of VAT on domestic sales of goods and services and the importation of goods is 20%. Exported goods and related services are zero-rated. Advertising, consulting, engineering, legal, accounting, translation, data processing, banking, financial, and insurance services provided to non-residents are zero-rated if the non-resident's place of business is outside Armenia. Various supplies, including most financial and education services, are VAT-exempt.

Services supplied in Armenia by non-residents that are not registered in Armenia are subject to application of a VAT reverse charge.

The liability to account for VAT is based on taxable turnover for transactions implemented in the previous calendar year. If those revenues exceed AMD 58.35 million, the taxpayer must account for VAT on all sales. If the previous year's revenues were less than AMD 58.35 million (e.g. the taxpayer is in the first year of operations), the taxpayer is obliged to account for VAT only on sales in the current year that exceed AMD 58.35 million. Taxpayers whose revenues are below the AMD 58.35 million threshold may voluntarily elect to account for VAT.

Businesses that require a license costing more than AMD 100,000 to operate and businesses producing/importing excisable goods are required to account for VAT on their sales.

Generally, VAT payers should file VAT returns on a quarterly basis. However, taxpayers with sales (excluding VAT) in the previous calendar year exceeding AMD 100 million are required to file VAT returns monthly. VAT payments must be made and VAT returns filed within 20 days following the end of the reporting period.

As of 1 January 2012, VAT payers must be registered at tax authorities based on VAT payer registration numbers.

Also starting from 1 January 2012, those VAT payers whose monthly turnover exceeds AMD 100 million are required to increase their VAT tax base by 20% (effectively pay 24% VAT on their supplies) if 10% or more of their transactions are implemented without issuing proper VAT invoices or specified accompanying documents. This rule

Armenia

only applies to those VAT payers who directly import goods into the country or produce them locally.

Customs duties

The Customs Code of Armenia regulates customs procedures in Armenia. The most frequently used customs regimes are import for free circulation, temporary import, temporary export, and export for free circulation.

Customs levies are payable by persons whose goods cross the customs border of Armenia. Customs levies consist of customs duties, taxes, duties, and other mandatory charges.

Generally, customs duty is imposed as an *ad valorem* duty, which means that the tax is calculated as a percentage of the customs value of the goods. Armenia uses only two *ad valorem* rates: 0% and 10%.

Customs duty is collected on the customs value of the imported goods. Importers must take into account specific rules (based on World Trade Organization [WTO] rules) to determine the customs value on which the import tax will be applied. The general rule is that the customs value will be the price actually paid or payable for the goods when sold for export to Armenia.

Customs fees are payable within three days from the provision of customs services, but not later than the release of goods from customs.

Excise tax

Excise tax is payable on alcoholic beverages and tobacco products, whether imported or produced domestically, as follows:

Goods	Unit of measure	Tax rate
Beer	1 litre	30%, but not less than AMD 105 for 1 litre
Grape and other wines, wine ingredients	1 litre	10% of factory price, but not less than AMD 100 for 1 litre
Vermouth and other types of wine that contain vegetarian and other aromatic extracts	1 litre	50%, but not less than AMD 750 for 1 litre
Other brewed drinks (apple cider, pear cider, honey-drinks)	1 litre	25%, but not less than AMD 270 for 1 litre
Ethyl spirit	1 litre (by recalculation of 100% spirit)	50%, but not less than AMD 900 for 1 litre
Alcoholic drinks	1 litre	50%, but not less than AMD 500 for 1 litre
Tobacco substitutes	1 kilogram	AMD 1,500
Raw oil and oil materials	1 ton	AMD 27,000
Gases produced from oil and other hydro-carbons (except natural gas)	1 ton	AMD 1,000
Petrol	1 ton	AMD 25,000
Diesel fuel	Customs value or 1 ton	10%, but not less than AMD 32,500 for 1 ton

Goods	Unit of measure	Tax rate
Motor oil	1 kilogram	10%, but not less than AMD 400 for 1 kg
Cars having more than AMD 25 million customs value	Customs value of importation	20%

Taxpayers producing excisable goods in Armenia should submit a quarterly excise tax return and pay the tax liability by the 20th day of the month following the quarter.

Land tax

Land tax is assessed and collected at the municipal level and is paid bi-annually by landowners and the permanent users of state-owned land. Tax on rented land is levied on the lessor. The land cadastre (valuation system) is used to determine the value of the land. Land tax for agricultural land is calculated at 15% of the net income determined by the cadastral evaluation. For non-agricultural land, the rate is 0.5% to 1.0% of the cadastral value of the land.

Property tax

Property tax is assessed and collected at the municipal level on buildings, motor vehicles, and means of water transport. The tax rate on buildings is 0.3%, which is paid on the cadastral value.

Property tax for motor vehicles with up to ten seats is calculated as follows:

Capacity (horsepower)	Tax rate (per horsepower)
Up to 120	AMD 200
121 to 150	AMD 300
151 to 250	AMD 300 + AMD 1,000 per horsepower in excess of 150
251 and over	AMD 500 + AMD 1,000 per horsepower in excess of 150

Property tax for motor vehicles with more than ten seats is calculated as follows:

Capacity (horsepower)	Tax rate (per horsepower)
Up to 200	AMD 100
201 and over	AMD 200

The annual property tax on motorcycles is calculated at the rate of AMD 40 for each horsepower of tax base. The annual rate of property tax on watercraft is calculated at AMD 150 for each horsepower of tax base.

Beginning from the fourth year after the year of production, the tax base for motor vehicles and means of water transport is reduced by 10% per year, up to a maximum reduction of 50%.

Legal entities should calculate property tax and pay this to the municipal budget on a semi-annual basis. The semi-annual property tax calculations should be submitted to the local tax inspectorates not later than the 20th day following the reporting half-year.

Transfer taxes

Armenia does not have any transfer taxes.

Armenia

Stamp taxes

Armenia does not have any stamp taxes.

Branch income

When a non-resident company conducts business in Armenia through a subdivision (i.e. a branch or a representative office) and maintains separate accounting records for that subdivision, taxable income generally should be determined on the same basis as for resident entities. Note that a subdivision is taxable on dividends received from Armenian companies and may not carry forward losses, which differs from the treatment of resident entities (*see the Deductions section for more information*). However, the subdivision may be able to overcome these restrictions under a relevant tax treaty.

If it is not possible to determine taxable profit based on the direct method (i.e. taxable income less deductible expenses) for the subdivision of the foreign entity in Armenia, income is determined based on a method agreed upon between the taxpayer and the tax authorities. The law explicitly recognises the allocation method (the taxpayer allocates a portion of its worldwide income and expenses to Armenia) as a possible approach.

Armenia has no special tax rules for non-commercial representative offices established to engage in liaison-type activities. Such offices are subject to the normal CIT, but an exemption from CIT may be available under a relevant tax treaty if the activities of the representative office are not sufficient to constitute a PE for the foreign entity.

See the Withholding taxes section for a list of countries with which Armenia has a tax treaty.

Income determination

Taxable profits are defined as a positive difference between a taxpayer's gross income and deductible expenses. Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempt from inclusion under the law. Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

Inventory valuation

Inventories are generally stated at the lower of cost and net realisable value. First in first out (FIFO) and average cost methods of valuation are generally used for tax purposes.

Capital gains

Capital gains are included in taxable income. Non-residents are taxable on the realised capital gains from the increase of the value of the assets (including shares) located in Armenia.

Dividend income

Dividends derived by an Armenian entity from another Armenian entity are exempt from tax. Dividends derived by non-residents from Armenian entities are subject to 10% withholding tax (WHT), unless relief is available under a relevant tax treaty (*see the Withholding taxes section*).

Interest income

Interest income attracts normal CIT treatment.

Foreign income

Resident entities are liable to Armenian tax on their worldwide income. Foreign taxes should be available for credit against Armenian tax liabilities, up to the amount of Armenian tax payable on the foreign income.

There are no provisions in Armenian tax law allowing any tax deferral on income earned abroad.

Deductions

Expenses incurred in the furtherance of a taxpayer's business activities generally are deductible, unless a specific provision in the law provides otherwise. Expenses that are not supported by relevant documentation are not deductible.

The deductibility of following common items is limited for CIT purposes:

- Expenses incurred for advertising outside Armenia are limited to the greater of 3% of gross income or 20% of the value of services or goods exported from Armenia.
- Expenses for training of staff outside Armenia is limited to the lesser of 4% of the gross income of the reporting year or AMD 3 million per employee.
- Expenses for foreign trips are limited to 5% of the gross income of the reporting year.
- Representative expenses are limited to the lesser of 0.5% of the gross income of the reporting year or AMD 5 million.

Depreciation and amortisation

Fixed assets are required to be depreciated using the straight-line method.

The maximum rates per annum for depreciating fixed assets are:

Asset	Maximum depreciation rate per annum (%)
Other industrial and commercial buildings, constructions and transmission devices	5
Hotels, resorts, rest houses, educational institutions	10
Robot equipment and assembly lines	33.3
Calculating devices and computers	100
Fixed assets with the value up to AMD 50,000	100
Industrial and commercial buildings, constructions and transmission devices located in a designated disaster area (currently Gyumri)	100
Other fixed assets	20

Land may not be depreciated.

Intangible assets may be amortised using the straight-line method over the lesser of the asset's useful economic life or ten years.

Armenia

Goodwill

Payments with respect to goodwill and amortisation of goodwill are not deductible in Armenia.

Start-up expenses

Start-up expenses are fully deductible, provided they are properly documented.

Interest expenses

As a general rule, interest is deductible if the related debt is used to fund business activities of the taxpayer and the interest rate is not more than double the Central Bank of Armenia rate (currently, the deductible interest rate is capped at 24%).

In addition to the existing cap (twice of the Armenian Central Bank's settlement rate), from January 2012 the deductible interest expense payable within the tax year should not exceed:

- nine times the value of net assets of a taxpayer, if borrowings received from banks and credit organisations, or
- twice the value of net assets of a taxpayer, if borrowing received from other entities.

The net assets are a positive difference between the taxpayer's assets and liabilities. The value of net assets should be considered based on results of the reporting year.

The restriction does not apply to the banks and credit organisations and to the funds borrowed from international organisations specified by the government. The restriction also does not apply to the interest payable on funds attracted from publicly placed debt instruments (securities).

Bad debt

A taxpayer is entitled to deduct bad debts if the taxpayer creates a reserve and allocates the amount of bad debt in the following proportions:

- Up to 90 days from the due date: 0%.
- From 91 to 180 days from the due date: 25%.
- From 181 to 270 days from the due date: 50%.
- From 271 to 365 days from the due date: 75%.

Beyond 365 days, bad debts of less than AMD 100,000 may be deducted. For larger debts, the company would need to have pursued the debt through the courts before a deduction may be taken.

Charitable contributions

Charitable donations and contributions to non-profit organisations are deductible in amounts of up to 0.25% of gross income.

Lease payments

Lease payments on operating leases are deductible. The lessor claims a deduction for depreciation of the leased assets. Financial leasing is treated for tax purposes as if a sale had been made. The lessee includes the value of the property in the relevant group of fixed assets and claims depreciation charges. The lessee also deducts the interest and commission elements of the lease payments in the period in which they are payable. Similarly, the lessor recognises taxable income for the total principal amount of the lease at the time when the asset is transferred and recognises the interest and commission element of the payments over the term of the lease.

Fines and penalties

Commercial fines and penalty expenses are deductible for CIT purposes. Fines and penalties paid to the state or municipal budgets are not deductible.

Taxes

Non-refundable (non-credited) taxes (e.g. property tax, land tax, expensed VAT), duties, and other obligatory payments are deductible for CIT purposes.

Net operating losses

Companies are entitled to carry forward losses to the five subsequent income years. Armenian law does not allow the carryback of losses.

Payments to foreign affiliates

Payments to foreign affiliates are deductible, if they meet the normal tests for deductibility.

Group taxation

There are no group taxation provisions available in Armenia.

Transfer pricing

Armenia does not have formal transfer pricing rules. The tax authorities may apply market prices in limited cases, but this does not happen very often.

Thin capitalisation

Armenia does not have thin capitalisation rules. However, there are certain limitations on deductibility of interest expenses (*see Interest expenses in the Deductions section*).

Tax credits and incentives

Taxpayers engaged in agricultural production are exempt from tax on that income.

Resident companies listed on the Armenian Stock Exchange, as well as companies that list on the Exchange by 31 December 2012, with at least 20% of their shares publicly held by 100 or more shareholders, are entitled to a reduction in CIT.

Provided such companies prepare and publish their financial statements under International Financial Reporting Standards (IFRS), they are entitled to a 50% reduction in their CIT (up to a maximum of AMD 300 million per year). The incentive applies to the 2009 to 2012 income years. The incentive will be repayable (plus penalties) if the company delists, liquidates (other than for bankruptcy), or reduces the public issue below 20% before 31 December 2015.

Foreign tax credit

Tax residents are allowed to credit foreign taxes paid on income received abroad against their Armenian tax liabilities. The amount of foreign tax credit is limited to the amount of Armenian tax that would arise from the equivalent income in Armenia.

Armenia

Withholding taxes

Payments to non-residents are subject to the following WHT rates:

- Payments for insurance, reinsurance, and transportation are subject to WHT at the rate of 5%.
- Other income received from Armenian sources is subject to WHT at the rate of 10%.

WHT is required to be transferred to the budget not later than the 20th day of the month following the payment of income. A WHT return should be submitted by 20 February following the reporting year.

WHT rates for non-residents may be reduced under a relevant tax treaty.

Recipient	Dividends (%)		Interest (%) (1)	Royalties (%)

Notes

- Several treaties contain a 0% rate on interest paid to or guaranteed by a government or one of its agencies. The table does not analyse such provisions.
- The ownership threshold for the non-portfolio rate is 10%.
- The 0% rate applies to the sale on credit of industrial, commercial, or scientific equipment, and capital goods, and interest on loans granted by banking enterprises. The 10% rate applies in other cases.
- The ownership threshold for the non-portfolio rate is 30%.
- The ownership threshold for the non-portfolio rate is direct investment of 40,000 United States dollars (USD).
- The ownership threshold for the non-portfolio rate is 25%, and the direct investment must exceed USD 100,000.
- The ownership threshold for the non-portfolio rate is 25%.
- The 0% rate applies if the dividends are paid to a foreign company that has owned more than 25% of the Armenian company for at least two calendar years preceding the distribution and the dividends are not subject to profit tax in the foreign company's country of residence.
- The 0% rate applies if the beneficial owner has invested at least 150,000 euros (EUR) in equity.
- The 0% rate applies to government debt and government-assisted debt; the 5% rate applies to interest on loans or credit granted by banks; and the 10% rate applies in other cases.
- The 5% rate applies to literary, artistic, or scientific work copyright royalties and to film and broadcasting royalties. The 10% rate applies in other cases.
- The lower rate applies to consideration for the use of, or the right to use, any computer software, patent, trademark, design or model or plan, secret formula or process, or information concerning industrial, commercial, or scientific experience (know-how).
- The 0% rate applies to the credit sale of industrial, commercial, or scientific equipment, to the credit sale of merchandise or services, and to loans granted by a bank. Higher rate applies in other cases.
- The 5% rate applies to copyright royalties, and the 10% rate applies in other cases.
- The ownership threshold for the non-portfolio rate is 10%, and the direct investment must exceed USD 100,000.
- The 0% rate applies to interest on a loan granted by a banking enterprise. The 10% rate applies in other cases.
- The ownership threshold for the 5% non-portfolio rate is 10%. The 0% rate applies if the dividends out of which the profits are paid have been effectively taxed at the normal rate for CIT and the dividends are exempt income to the Dutch recipient.
- The ownership threshold for the non-portfolio rate is direct investment of USD 100,000.
- The ownership threshold for the non-portfolio rate is 25%, and the direct investment must exceed 200,000 Swiss francs (CHF).
- The 0% rates applies if the beneficiary owner is resident of the other contracting state, the beneficiary owns at least 25% of shares at least two years prior to the payment, and dividends are exempted for CIT purposes in the other contracting state.
- Lower rate applies when the actual owner owns at least 25% of the capital and has made at least a 1 million British pound (GBP) investment prior to the payment. Higher rate applies when dividends are paid from an investment in real estate.
- Provisions of the treaty generally apply from 22 March 2012.
- Treaty provisions will apply in Armenia from 1 January 2013. In the United Kingdom, the provisions for income subject to WHT will apply from 1 January 2013. For income tax and capital gain tax, from 6 April 2012, and for corporation tax from 1 April 2012.

Tax administration

Taxable period

In Armenia, the taxable period is the calendar year.

Tax returns

The annual CIT return for resident entities must be filed by 15 April.

Armenia

Presumptive payment payers should submit application on base data and adjustment ratios twice a year or by the 15th day of the following month (depending on the type of activities).

Payment of taxes

The tax corresponding to the CIT return for resident entities is payable by 25 April.

Taxpayers are also required to make advance CIT payments by the 15th day of the last month of each quarter. Each advance payment is equal to 18.75% of the CIT paid for the previous year. For payments before the previous year's tax is calculated (e.g. January to March), tax is paid based on the last filed tax return, and an adjustment is made in the first advance tax payment made after the previous year's tax is calculated to correct the amount paid. If advance payments exceed the CIT liability for the year, the excess may be refunded.

Advance payments are not required if a taxpayer's profit for the proceeding year was less than AMD 500,000. Thus, newly established companies do not need to make advance payments until 25 April of the year following the start of operations.

Armenia also has a quarterly minimum CIT. If the advance CIT payable is less than 1% of revenues for the previous quarter less depreciation charges (up to a maximum of 50% of revenues), the excess is paid as a minimum CIT. The minimum CIT is applied against CIT payable for the year. Any excess is applied against the CIT liability for the subsequent year.

Taxpayers are required to make either advance payments or minimum CIT, whichever is higher.

Branches of foreign companies pay advance CIT biannually, but only if their CIT for the proceeding year exceeded AMD 2 million. Each advance payment is equal to ¼ of the CIT paid for the previous year. Branches are not subject to the minimum CIT. The annual tax return for branches is filed by 15 April. The corresponding tax is payable by 25 April.

Taxpayers are required to make presumptive payments within 15 days after the end of each month.

Audit cycle

Risk based audits

For the purposes of planning audits, the authorities develop risk criteria that are approved by the Armenian government. Based on the risk criteria, entities are classified into the following three categories:

- High risk entities.
- Medium risk entities.
- Low risk entities.

The authorities should approve the audit plan (list of audit targets) for the following year before 1 December of the preceding year.

Tax audits

The tax authorities may carry out scheduled audits a maximum of once each year for high risk taxpayers, once each three years for medium risk taxpayers, and once each five years for low risk taxpayers.

Business entities must be notified of the audit in writing at least three days before the scheduled audit.

For normal business entities, the scheduled audit should be carried out within 15 business days, although the period may be extended by up to ten days. For companies whose annual revenue exceeds AMD 3 billion (approximately USD 8.3 million), the period may be extended by up to 75 business days.

The actual period of the inspection for normal business entities should not exceed 30 business days and 90 business days for large companies.

Before starting an audit, the tax inspector must present a written order to the taxpayer outlining the scope and period of the tax audit. The written order specifies the names of the officials who may participate in the audit.

Statute of limitations

The statute of limitations is three years.

Topics of focus for tax authorities

There are no specific topics of focus for the tax authorities. In practice, the tax authorities perform a comprehensive audit of the taxpayer's books, covering all taxes and mandatory payments.

Significant developments

The free zone company

As of 1 January 2012, service companies are no longer required to be established in one of the current designated free zones. As per the abovementioned date, service companies may have an office elsewhere in Aruba other than the designated free zones. However, these service companies should have the approval from Free Zone Aruba N.V. and the Aruba tax authorities and should further comply with specific rules. The prohibition to provide services to the local market remains effective.

Previously, the free zone company was allowed to generate a maximum of 25% of its turnover with local consumers. The percentage of the turnover allowed with local consumers had to be reduced annually, for seven years from 25% to 5%. As a result, after seven years, only 5% of the turnover was allowed to be generated with local consumers. As of 1 January 2012, this is no longer the case. The free zone company is allowed to generate a maximum of 25% of its turnover with local consumers and no longer has to reduce this percentage to 5%. However, all activities performed for residents will remain subject to the regular corporate income tax (CIT) rate of 28%. Furthermore, import duties and excise tax are due on goods sold to local consumers.

Tax reform

The government of Aruba instituted a tax reform commission. The tax reform commission is in charge of the review and optimisation of the current Aruba tax system, taking into consideration:

- fair social income distribution
- increased tax base
- attracting new investors
- better tax collection
- improvement of the competitive position of Aruba, and
- transparency and substance in accordance international trends and rules.

The current corporate taxes that are subject to review by the tax reform commission are CIT, social security premiums, wage tax, dividend withholding tax (WHT), land tax, transfer tax, import duties and excise tax, turnover tax, and foreign exchange commission (FEC).

Taxes on corporate income

Resident companies are taxed on their worldwide income. Non-resident companies are taxed on the following Aruba-source income:

- Profits allocated to a permanent establishment (PE) or permanent representative in Aruba.
- Profits from real estate located in Aruba.
- Profits on loans secured by a mortgage on real estate located in Aruba.

Aruba has a flat CIT rate of 28%. Aruba also has special tax regimes (e.g. the imputation payment company, the Aruba exempt company, the fiscal transparent company, the free zone company, the so-called oil refinery or oil terminal regime), which are ultimately taxed at a lower tax rate. *For a full discussion of these special tax regimes, see the Tax credits and incentives section.*

CIT is levied on the income as reflected in the profit and loss statement less any allowable deductions based on Aruba tax and case law.

Corporate residence

The place of residency of a corporation, association, society, foundation, or body is determined based on the circumstances. If the aforementioned entities are managed and controlled in Aruba, they will, in principle, be deemed to be resident in Aruba. If the legal form of an entity is governed by the Aruban law, then its place of residency will be considered continuously to be in Aruba.

Permanent establishment (PE)

If a foreign entity carries on a business through a PE or a permanent representative in Aruba, it will be subject to CIT in Aruba. While Aruba does not have rules and regulation as to the definition and interpretation of the term 'permanent establishment', a PE is deemed to exist if the place of execution of a building site or construction, excavation, maintenance, cleaning, assembly, or installation activities surpasses a period of 30 days. The memorandum of explanation refers to the commentary on Article 5 of the Organisation for Economic Co-operation and Development (OECD) model convention for the definition and interpretation of the term 'permanent establishment'.

Other taxes

Turnover tax

Aruba does not have a value-added tax (VAT) or sales tax, but it does have a business turnover tax. Turnover tax is levied at the rate of 1.5% on the delivery of goods or services rendered in Aruba. Goods that are imported into Aruba are not subject to turnover tax. A turnover tax exemption is applicable on exports. The exemption is applicable if the entrepreneur has asserted that the turnover is realised in connection with the delivery of goods to customers located outside of Aruba, where the goods in connection with the delivery are sent or transported to a destination outside Aruba.

Goods are all physical objects as well as electricity, gas, heating, cooling, and such. Services are all performances rendered against payment. A payment is defined as all proceeds in connection with the delivery of goods or services rendered. If a payment is not completely made via money, the fair market value of the compensation should be taken into account.

In the case of goods, the place of the taxable event is either where the transportation starts (if sold abroad) or at the physical location of the goods at the moment it is

Aruba

delivered. The place of the taxable event with regard to services is generally the place where the entrepreneur is established or from where one has a PE from which the service is rendered. As an exception to the aforementioned general rule, the place of the taxable event for certain services (e.g. services related to a real property) is the place where the actual services are rendered (e.g. the place where the real property is situated).

Some exemptions apply. For example, no turnover tax is levied on the sale of immovable property if it is also subject to transfer tax. Furthermore, exemptions also apply to interest received or payments for hotel rooms or leasing of apartments (insofar as room tax has been paid on the proceeds) and casino revenues (insofar as gambling duties are due on these revenues).

The turnover tax is due within 15 days of the calendar month following the calendar month over which the turnover tax is due. A turnover tax return must be submitted to the tax authorities together with payment of the amount due.

Import duties

Import duties are imposed by a tariff, which is set as a percentage of the cost, insurance, and freight (CIF) value of the product. A classification rule has been published that categorises various imported products into groups. A tariff ranging from 0% to 50% is levied on the various groups of products.

Excise duties

Excise duties are imposed on products such as spirits, cigarettes, mineral oil, and distillery. The taxable base of the excise duties is based on either the weight, volume, and/or the amount of the aforementioned products.

Ground tax

A person or entity that, as of 1 January of each year, owns real estate in Aruba or uses real estate based on property rights is subject to ground tax. The ground tax is levied on the registered value, which is determined once every five years by the tax authorities, and can only be protested in the first year of the aforementioned period (taking into account the two month objection period as of the date of the assessment). The rate amounts to 0.4% of the registered value of the real estate minus a general exemption of 60,000 Aruban florins (AWG). If the real estate is not used or is empty for more than six months in a year, a reduction in the ground tax due can be requested from the tax authorities.

Real estate transfer tax

If real estate situated in Aruba is transferred, the buyer of the real estate must pay transfer tax on the sales price of the real estate (unless the value registered at the tax authorities is higher, in which case the registered value is the basis for the levy). The rate for the transfer of the legal ownership of real estate with a value not exceeding AWG 250,000 is 3%. The rate for the transfer of the legal ownership of real estate with a value exceeding AWG 250,000 is 6% (due on the total amount).

If shares in a real estate company are sold, no transfer tax is due.

Stamp taxes

Stamp taxes are, in principle, due on all documents as indicated in the Stamp State Ordinance. In practice, it is usually only levied on the documents used in the course of a legal suit.

Registration taxes

Aruba does not impose registration taxes.

Foreign exchange commission (FEC)

An FEC is due when residents make a payment abroad in connection with certain legal transactions. The FEC is calculated as 1.3% of the payment abroad. Based on the State Ordinance, a payment abroad is considered:

- a payment with local currency or a payment from a florin account, whether or not by electronic transfer
- a payment with foreign currency or a payment from a foreign currency account, whether or not by electronic transfer, or
- a payment from a foreign currency account held abroad or from an inter-company account held by a person or entity abroad, whether or not by electronic transfer.

FEC is due to the extent the abovementioned payment is a result of one or more of the following legal transactions:

- the purchase of foreign instruments of payments or foreign monetary instruments
- obtaining control over receivables in one or more foreign currencies, or
- the crediting of an account in name of a non-resident of Aruba held at a foreign exchange bank or an institution abroad.

An exemption of the FEC was applicable for certain inter-island bank transactions. However, in connection with the dissolution of the Dutch Antilles as of 10 October 2010 and due to the fact that the United States dollar (USD) is the official currency of the islands of Bonaire, St. Eustatius, and Saba (BES islands), the general exemption of the FEC from Aruba to the BES islands for inter-island transactions in florins is no longer applicable as of 1 January 2011.

As a result, the FEC of 1.3% is applicable on all transactions from Aruba to Curaçao, St. Maarten, and the BES islands.

Furthermore, FEC will be levied on the purchase of foreign currencies with Aruban florins.

According to the policy of the Central Bank of Aruba, another exemption for the FEC applies when cash is transferred to a foreign bank account of an Aruban resident. In order to apply for this exemption, certain formalities must be met. First, the foreign bank account of the Aruba resident must be registered at the Central Bank of Aruba. Secondly, the Central Bank of Aruba must grant a so-called exemption for requirements. In addition, certain overviews of transactions regarding the foreign bank account must be filed with the Central Bank of Aruba on a quarterly basis.

Tourist levy

The tourist levy rate is 9.5% of the compensation (including charges) that the tourist pays for the use of lodging or a hotel room.

Also, the fixed fees for timeshare units have been increased. The taxable base for the tourist levy on timeshare units is set on:

- AWG 179 per day for studio units.
- AWG 193.95 per day for one bedroom units.
- AWG 223.75 per day for other than the abovementioned units.

Aruba

Abovementioned fixed fees are not applicable in the event the time-share unit is made available to other guests that are not time-share guests. In that case, 9.5% tourist levy is due per day on the compensation paid by other guests for the use of the unit.

With regard to all-inclusive packages, the taxable base is set on 40% of the price of the all-inclusive package with a minimum of AWG 162 per day, increased with charges (e.g. service charges and energy charges).

Local citizens registered in the Aruban municipal register are not subject to the tourist levy. The owner of a condominium is also exempted from the tourist levy.

Branch income

Branch income is, in principle, determined according to the separate entity approach. Branches of foreign insurance companies apply a specific profit determination method. Furthermore, the transfer of profits to the head office is not subject to taxation.

Branch profits are subject to the normal CIT rate of 28%.

Income determination

Inventory valuation

Inventories may generally be stated on a last in first out (LIFO) or first in first out (FIFO) basis, provided the method chosen conforms to sound business practices. Conformity of book and tax reporting is not required.

Capital gains

Capital gains are taxed as ordinary income. However, capital gains realised on the disposal of a shareholding qualifying for the participation exemption are tax exempt.

The participation exemption applies, in general, if an Aruban company holds shares or participation certificates in companies, associations, or foundations that carry on a business. If shares or participation certificates are held in a foreign entity, the participation exemption only applies if they are not held as an investment and the foreign entity is subject to a tax on profits.

The capital gain realised on the disposal of assets may be carried over to a special tax deferral reinvestment reserve but must be deducted from the acquisition costs of the new asset. In principle, this reinvestment reserve cannot be maintained for more than four consecutive years. If the reserve has not been used after four years, the remainder will be subject to taxation.

Capital losses are tax-deductible unless these losses are incurred on shares to which the participation exemption is applicable.

Dividend income

Provided the conditions of the participation exemption are met (*see the Capital gains section above*), an Aruban company is exempt from taxation on all benefits from the participation, including inter-company (cash) dividends.

Costs made in connection with the ownership of the participation (i.e. administration costs, interest, management expenses) are not deductible from the taxable result of the Aruba parent company.

Stock dividends

Stock dividends are allowed and treated as regular dividend income. The stocks will be valued at market value for tax purposes.

Foreign income

A resident taxpayer is subject to CIT on its worldwide income. Double taxation of certain foreign source income is avoided by means of the exemption method. If there is no legal possibility to exempt income and prevent double taxation, the foreign tax paid can be claimed as a deduction.

An Aruba corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

The profits of a PE in Curaçao, St. Maarten, or the Netherlands, including the Caribbean Netherlands, are tax exempt on Aruba based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. other than the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt.

Deductions

Depreciation

Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The tax department has issued the following estimated depreciation table:

Assets	Depreciation rate (%)	Residual value (%)
Buildings	2/2.5	10
Renovation	10	0
Inventory	10 /20	10
Computer		
Hardware	33/50	0
Mainframe	10/12.5	0
Machinery and installations	10	10
Transportation		
Cars	20	10
Rental cars	33	15
Trucks and buses	10	15
Start-up costs	20	0
Goodwill	20	0

The basis for the depreciation includes all costs incurred with the purchase of this asset less the residual value. The straight-line method is customary; however, the declining-balance method is also acceptable.

Aruba

As of 1 June 2010, accelerated depreciation has been introduced on assets which are used in the course of an industrial business and whose acquisition or production costs are above AWG 90 million. Aforementioned assets may be depreciated in ten equal annual parts. Note that imputation payment companies (IPCs) can not apply this facility.

Charitable contributions

The allowable gift deduction is AWG 50,000. The institution must be established in Aruba and serve one of the following interests:

- Religious.
- Charity.
- Cultural.
- Sportive.
- Scientific.
- Public interest.

Taxes

Taxes paid by the company, with the exception of CIT, are tax-deductible. Taxes paid by the company with respect to the purchase of an asset (e.g. real estate transfer tax paid while obtaining real estate) should be capitalised in the cost of the asset.

Net operating losses

A net operating loss may be carried forward to the five years following the tax year in which the loss was incurred. If the net operating loss has not been offset against profits within this period, the remaining net operating losses will expire. Net operating losses incurred by an IPC and companies operating an oil refinery or oil terminal as of 1 January 2010 may be carried forward indefinitely. Carrybacks of net operating losses are not permitted.

Payments to foreign affiliates

If interest or other payments (e.g. remunerations paid for the use of material and/or immaterial goods or services rendered) are made to entities, these payments should be made at arm's length. If the transaction is not at arm's length, only the arm's-length payment may be deducted from the taxable income.

Even if the transaction is at arm's length, the interest or other payments may still not be deductible from the taxable result of the Aruban company unless the Aruban company asserts that one of the following circumstances is applicable:

- The receiving company is not affiliated (*see below*) to the Aruban company.
- The receiving company is subject to an effective tax rate of at least 15%.
- The shares in the receiving company are all held directly or indirectly by a company whose shares (for at least 50% of the outstanding shares and representing at least 50% of the voting rights) are listed at a qualified stock exchange.

An affiliation with the taxpayer is deemed to exist in each of the following cases:

- The taxpayer has an interest of at least one third in another entity.
- An individual or entity has an interest of at least one third in the taxpayer.
- A third party has an interest of at least one third in another entity, while this third party also has an interest of at least one third in the taxpayer.

If an arm's-length payment is made to an affiliated company that is subject to taxation but pays an effective tax rate of less than 15%, only 75% of the payment made is allowed as a deduction.

Group taxation

Fiscal unity

Based on a policy of the Aruban tax authorities, Aruban resident public limited companies (*naamloze vennootschap* or NV) with at least 99% of the shares in other Aruban resident NVs can file a consolidated tax return (i.e. fiscal unity). In order to apply for this facility, a request must be filed with the Aruban tax authorities. Certain conditions must be met for the application of this regime, for instance the companies in the fiscal unity must be of the same tax regime. Advantages of this facility are that the recognition of inter-company profits may be deferred and losses may be offset with profits of other companies within the fiscal unity.

Transfer pricing

The arm's-length principle (ALP) rule is codified in the Aruban State Ordinance Profit Tax (SOPT). If a corporate entity or individual participates, directly or indirectly, in the management, supervision, or the capital of two or more corporate entities, the conditions related to all transactions between these affiliated parties should be at arm's length. The ALP is applicable on all transfer pricing between affiliated companies with regard to all mutual legal relations (e.g. purchase prices, management fees, remunerations for services provided, royalty payments). The conditions should be business like, whereas the same conditions should apply as they would have been if the same transaction would take place with a third party.

A documentation obligation is applicable in the SOPT. The explanatory notes on the bill state that for the meaning and application of the ALP and the documentation obligation, the OECD guidelines for Multinational Enterprises and Tax Administration should be considered. The documentation obligation is applicable at the moment that a transaction takes place.

Non-compliance to the documentation obligation leads to a reversed burden of proof to the taxpayer. From the explanatory notes of the profit tax return forms, it seems that the tax authorities require, as a minimum amount of documentation about the transfer pricing method used, the reason why the method was chosen and a substantiation of the manner of how the price was determined.

In light of the extensive OECD guidelines and considering the small-scale economy of Aruba, it is unclear to what extent the aforementioned requirements and the OECD guidelines should be followed. Up to this moment, the legislature has not provided detailed implementation guidelines on the documentation obligation.

Thin capitalisation

Aruba does not have thin capitalisation rules.

Controlled foreign companies (CFCs)

Aruba does not have CFC legislation.

Aruba

Tax credits and incentives

Aruban CIT legislation no longer provides tax incentives. The legislation does, however, provide incentives for certain special tax regimes that can be used to reduce the overall tax liability, such as the IPC, the Aruba exempt company, the fiscal transparent company, the free zone company, and the so-called oil refinery and oil terminal regime.

Temporary investment allowance

A temporary investment allowance applies for the year 2011 and 2012. The investment allowance amounts to 6% of the investment. The investment allowance is a deduction on the taxable profit of a company and is applicable on investments greater than AWG 5,000 that are made in a financial year. One of the conditions is that the investment must take place with an Aruban company or entrepreneur. An Aruban company or entrepreneur includes an individual or legal entity that is respectively established and carries out business in Aruba. PEs of foreign legal entities are also included in the definition of an Aruban company for investment allowance purposes. Legal entities that are incorporated for the sole purpose of making investments in the context of the investment allowance do not qualify as an Aruban company or entrepreneur for investment allowance purposes.

Certain investments do not qualify for the investment allowance (e.g. land, houses, and cars for personal use; stocks and shares; goodwill; animals; investments designated for the use by third parties or as part of the exploitation of an oil refinery or an oil terminal). Furthermore, there are also certain transactions that do not qualify for the investment allowance (e.g. certain inter-company transactions).

The investment allowance does not apply to investments by oil refineries, free zone companies, and IPCs.

If an investment, on which the investment allowance was claimed, is sold within six years after the start of the calendar year in which the investment took place, a capital disposal charge of 6% of the sales price is due.

The imputation payment company (IPC)

The IPC is, in principle, an NV or a limited liability company (*vennootschap met beperkte aansprakelijkheid* or VBA) that pays the regular CIT rate of 28%. However, when certain stringent conditions are met, the shareholder of the IPC can request an imputation payment of 26/72 of the (formal) dividend distributed. Provided that the 0% dividend WHT is applicable, the effective tax rate can be lowered to 2%.

In order to qualify for the IPC status, the following requirements must be met:

- The IPC must perform qualifying activities (*see below*) in Aruba.
- An Aruba-resident individual must be a member of the board of managing directors of the IPC.
- The articles of association state that the shares of the IPC are registered and that the directors keep a shareholders registry in which all shareholders are registered.
- The articles of association state that the financial statements are drawn up according to internationally accepted principles (like IAS or GAAP) and an audit by a qualified (group of) independent certified public accountant(s) is necessary.
- The board of managing directors must notify the tax authorities within a restricted period, and after the dividend has been distributed, that the shareholder will claim the imputation payment.

An independent certified public accountant must provide a yearly opinion regarding the compliance of the abovementioned first three requirements for the IPC status.

The shareholder must also meet certain requirements before the imputation payment can be granted, including:

- The shareholder must hold the (economic and legal ownership of the) shares for an uninterrupted period of at least 12 months to be eligible for the imputation payment.
- The shareholder must file a request (with several enclosures) with the tax authorities to receive the imputation payment.

The activities of the IPC are limited. The IPC company is not allowed to conduct non-qualified activities, no matter how small. The following activities are regarded as qualified activities:

- Exploitation of quality hotels. A quality hotel exists when the average revenue per available room (RevPar) amounts at least AWG 354 (USD 200), the hotel has a hotel licence, and is operated at its own risk and account. Note that the RevPar can be changed annually.
- Exploitation of shipping enterprises.
- Exploitation of aviation enterprises.
- Developing, acquiring, holding, maintaining, and licensing of intellectual and industrial ownership rights.
- Insuring special entrepreneurial risks (captive insurance).
- Holding of shares or other participation certificates. The IPC may not hold more than 5% of low taxed shares or other participation certificates in foreign companies. The aforementioned are low taxed if they are subject to a 'profit' tax rate of at least 14%.
- Active financing (not being a credit institution) of other enterprises or companies, whether or not intra-group.
- Investing of funds, except in real estate and funds that are put at the disposal of group companies.
- Exploitation of a company aimed on generating sustainable energy.

The Aruba exempt company (AVV)

The Aruba exempt company (*Aruba Vrijgestelde Vennootschap* or AVV) is a particular form of a NV and is often used for international tax planning purposes. The AVV is, in principle, subject to CIT against the normal CIT rate and the dividend WHT. However, the profit of the AVV may be exempted completely from CIT and dividend WHT if its activities are limited to one or more of the following qualified activities:

- Holding of shares or other participation certificates. The IPC may not hold more than 5% of low taxed shares or other participation certificates in foreign companies. The aforementioned are low taxed if they are subject to a 'profit' tax rate of at least 14%.
- Financing (not being a credit institution) of other enterprises or companies, whether or not intra-group.
- Investing of funds, except in real estate.
- Licensing of intellectual and industrial ownership rights.

As mentioned below, the AVV may, if certain conditions are met, also opt for the fiscal transparency regime for which it will not be subject to CIT and dividend WHT. In this case, the AVV is not required to perform the abovementioned qualified activities in order to enjoy the fiscal transparency status.

Aruba

Fiscal transparent company

An NV, VBA, or AVV may opt, if certain conditions are met, to be treated as a partnership (fiscal transparent company). The fiscal transparent company is not subject to CIT, unless the fiscal transparent company carries on a business on Aruba. In that case, the shareholder would be subject to CIT with regard to the business it carries through a PE.

Dividends distributed by the fiscal transparent company to its shareholder are not subject to dividend WHT, since due to its transparency, all income and asset and liabilities are deemed to be attributed to its shareholder. The main requirements for this status is that all the company's shares must be registered, and a notification for the application for this status must be filed with the tax authorities within one month after the company has been incorporated.

The free zone company

The free zone is a specially designated area in Aruba where goods can be stored, processed, adapted, assembled, packaged, displayed, spread out, or subject to other treatments or where services can be provided.

Services include activities consisting of maintenance or repairs of goods of a non-Aruba enterprise, maintenance or repairs abroad of goods of a non-Aruba enterprise, or providing advice to or research on behalf of a non-Aruba enterprise/institution/private person. Financial services, however, are not allowed.

Conditions

A free zone company has to be a limited liability company that is incorporated according to the laws of Aruba. The free zone company is also only allowed to perform qualifying activities in the free zone (a designated area on Aruba). If activities are performed that are not allowed, the company may be banned from the free zone.

Taxation

- All profits generated from activities abroad are subject to 2% CIT. The free zone company must have a licence to perform activities for residents. All activities performed for residents are subject to the regular CIT rate of 28%. The free zone company is allowed to generate a maximum of 25% of its turnover with local consumers.
- No import duties are due if the products are imported, used in the activities in the free zone on Aruba, and exported abroad.
- No turnover tax is due by the free zone company on cross border supply of goods and/or the rendering of services.
- The free zone company is subject to the dividend WHT, which implies an effective tax rate of the free zone company of 11.8% or 6.9% (equal to the IPC).
- On request, the free zone company can be exempted from 1.3% foreign exchange commission (subject to approval of the Central Bank of Aruba). Normally this approval is a formality and no foreign exchange commission is due by the free zone company.

Other characteristics

The free zone company does not have to apply for a business licence or an establishment licence. Furthermore, a free zone company is subject to a so-called free zone facility charge of 1.1% of the sales over its turnover.

Oil refinery or oil terminal regime

In connection with the aim of the Aruba government to improve the investment climate for the exploitation of oil refineries or oil terminals, a so-called oil refinery or

oil terminal regime was introduced as of 1 June 2010. The regime regards application, under certain conditions, of a lower CIT rate. Oil refineries or terminals whose shares are all held directly or indirectly by a company listed on a stock exchange recognised by the Minister are subject to a 7% CIT rate, while all other oil refineries or oil terminals are subject to a rate of 12%.

As of 1 January 2010, an unlimited carryforward loss compensation applies for companies operating an oil refinery or oil terminal.

Moreover, a 0% dividend tax rate applies as of 1 June 2010 for distributions from profits from the operation of an oil refinery and oil terminal.

Foreign tax credit

A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the Aruba profit tax that is attributable to that foreign income.

Withholding taxes

Dividend WHT

A dividend WHT is levied on all (formal and non-formal) dividend distributions of Aruba-resident entities. The tax rate is:

- 10% of the dividend distribution.
- 5% of the dividend distribution, if the shares (at least 50% of the outstanding shares and representing at least 50% of the voting rights) of the distributing company are listed at a qualified stock exchange. The same tax rate applies if all the shares of the distributing entity are held directly or indirectly by a company whom shares are (at least 50% of the outstanding shares and representing at least 50% of the voting rights) listed at a qualified stock exchange.
- 0% if the participation exemption (*see Capital gains in the Income determination section*) is applicable on the receiving company.

Dividends distributed from Aruba to countries within the Dutch Kingdom are subject to the Regulation for the Dutch Kingdom (the Regulation).

In certain situations, the Regulation reduces the rate of the dividend WHT from 10% to 7.5% or even 5%. The dividend WHT can be reduced to:

- 7.5% if the parent company owns at least 25% of the paid in capital of the distributing company.
- 5% if the parent company owns at least 25% of the paid in capital of the distributing company and the dividend at the parent company level is subject to a profit tax of at least 5.5%.

If a company is incorporated under Aruba law and transfers its factual place of management to another country, all dividend distributions by this relocated company will remain subject to the Aruba dividend WHT.

Dividend distributions include, among others:

- Formal dividend distributions.
- Liquidation payment.

Aruba

- Bonus shares.
- Paying back of share capital, unless strict conditions are met.
- Imputation payment.

Formal requirements

Within 15 days (based on the tax return: within one month) after a dividend becomes payable, a dividend WHT return must be filed together with payment of the amount due. A dividend is payable if it is at the disposal of the shareholder (i.e. the board of directors of the distributing company does not have to take any more action in order for the shareholder to claim the dividend). A dividend is also payable if the debt becomes interest bearing because of the distribution.

A statement of approval of the Central Bank of Aruba is required if dividends are distributed to a foreign shareholder. If the dividend exceeds AWG 750,000, a licence from the Central Bank of Aruba is required.

Tax administration

Tax returns

Once a CIT return is issued by the tax authorities, the taxpayer is obligated to file the tax return within two months after date of issuance. If, within six months after the tax year has ended, no tax return has been issued, the taxpayer is obligated to request a return within 15 days after the six months period. It may be argued that this obligation does not exist if a taxpayer is not subject to taxation.

If the final CIT return cannot be filed within the required two-month period, a request for an extension may be filed. The tax inspector may grant an extension for a maximum period of 12 months.

Payment of tax

CIT is due upon receipt of an assessment. The amount of tax due should be paid within two months after the date of the assessment.

The dividend WHT is due within 15 days after the dividend has become payable. A dividend WHT return must be submitted to the tax authorities together with payment of the amount due.

Audit cycle

There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

Statute of limitations

An additional assessment can be imposed, in general, until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, this period can be extended up to ten years or, in some cases, up to 12 years (e.g. if the tax differences relate to a component that is being held in a foreign country) after the tax year.

Topics of focus for tax authorities

There are no specific topics of focus. In case an audit is started, each aspect may be investigated. Often, the audit will not only focus on the profit tax, but also the other tax obligations, such as turnover tax, wage tax, and social security premiums.

Significant developments

Legislation was enacted in early September 2011 to change the tax treatment of expenditure on research and development (R&D). The concessional deductions have been replaced with an R&D tax credit with effect from 1 July 2011. For companies with an annual turnover of less than 20 million Australian dollars (AUD), there will be a 45% refundable tax credit, equivalent to a 150% tax concession, and for companies with a turnover of greater than AUD 20 million, they will have access to a non-refundable 40% tax credit, equivalent to a 133% tax concession. *See the Tax credits and incentives section for more information.*

A 'carbon pricing mechanism' is now legislated to apply with effect from 1 July 2012. There are a number of income tax and indirect tax impacts of the measure, both for those directly liable under the carbon emissions regime and for those impacted by associated measures, such as changes to the fuel tax and excise rates, and for small business impacted by the tax-related compensation measures.

Since the release in May 2010 of the government's interim response to the recommendations made following the comprehensive review of Australia's tax system (Henry Review), one of the key changes implemented by the government has been the new Minerals Resource Rent Tax (MRRT) applicable to iron ore and coal projects in Australia and an extension of the existing Petroleum Resource Rent Tax (PRRT) to apply to all Australian onshore and offshore oil and gas projects, including the North West Shelf. The MRRT and extended PRRT apply from 1 July 2012. *See Minerals Resource Rent Tax and Petroleum Resource Rent Tax in the Other taxes section for more information.*

To further develop the Australian tax reform landscape, the government hosted a Tax Forum on 4 and 5 October 2011 to continue the debate of the Henry Review with a focus on business tax, state taxes, environmental and social taxes, personal tax, and system governance and to assist the government in prioritising its agenda for further tax reforms. One of the key outcomes of the Tax Forum was the establishment of a Business Tax Working Group that will look at reforms that can increase productivity and deliver tax relief to businesses. The Working Group initially considered reforms to the treatment of business tax losses, and recommended a loss carryback regime, which was subsequently accepted by the government. The loss carryback regime is proposed to apply to all companies for tax losses incurred from 1 July 2012. *See Net operating losses in the Deductions section for more information.*

Australia

The Working Group is now considering longer term options for business tax reform, such as reducing the corporate tax rate or moving to a business expenditure tax system (such as an allowance for corporate equity).

In February 2011, the Assistant Treasurer released exposure draft legislation setting out the proposed legislative details of the taxation laws to modernise the controlled foreign company (CFC) rules and to implement new foreign accumulation fund (FAF) rules. The government announced the modernisation of the CFC rules in May 2009 as part of wider reforms to Australia's foreign source income anti-tax-deferral (attribution) rules. The foreign investment fund (FIF) rules were repealed with effect from the 2010/11 income year and are proposed to be replaced with the proposed FAF regime which, in broad terms, is directed at investments in non-CFCs or fixed trusts which fail 'bright line' investment and accumulation tests. The changes are yet to be finalised and given legislative effect. The commencement date for the new rules is currently unknown. See *Foreign income in the Income determination section for more information.*

Taxes on corporate income

Companies are subject to federal tax on their income at a flat rate of 30%.

Companies that are resident of Australia are subject to Australian income tax on their worldwide income. Generally, non-residents are subject to Australian income tax on Australian-sourced income only. However, where a company is resident in a country with which Australia has concluded a double tax agreement (DTA), generally Australia's right to tax business profits is limited to profits attributable to a permanent establishment (PE) in Australia.

Local income taxes

There are no state or municipal taxes on income.

Corporate residence

A company is a resident of Australia for income tax purposes if it is incorporated in Australia or, if not incorporated in Australia, it carries on business in Australia and either (i) its central management and control are in Australia or (ii) its voting power is controlled by shareholders who are residents of Australia.

Permanent establishment (PE)

The concept of a PE is established in both domestic law and various DTAs that have been concluded with Australia. Where a company is resident in a country with which Australia has a DTA, it is important to have regard to the definition of PE contained therein as this will generally apply in priority to the domestic law.

Broadly, under Australia's domestic law, a PE is a place at or through which a person carries on any business, and includes:

- A place where the person is carrying on business through an agent (except where the agent does not have, or does not habitually exercise, a general authority to negotiate and conclude contracts on behalf of the person).
- A place where the person has, is using, or is installing substantial equipment or substantial machinery.
- A place where the person is engaged in a construction contract.

- Where the person is engaged in selling goods manufactured, assembled, processed, packed, or distributed by another person for, or at or to the order of, the first-mentioned person and either of those persons participates in the management, control, or capital of the other person or another person participates in the management, control, or capital of both of those persons, the place where the goods are manufactured, assembled, processed, packed, or distributed.

Most DTAs contain a definition of PE which is similar, though not identical to, the definition under domestic law.

Other taxes

Goods and services tax (GST)

The federal government levies GST at a rate of 10%, and distributes the revenue to state governments. The GST is a value-added tax (VAT) applied at each level in the manufacturing and marketing chain and applies to most goods and services, with registered suppliers getting credits for GST on inputs acquired to make taxable supplies.

Food with some significant exceptions; exports; most health, medical, and educational supplies; and some other supplies are 'GST-free' (the equivalent of 'zero-rated' in other VAT jurisdictions) and so not subject to GST. A registered supplier of a GST-free supply can recover relevant input tax credits, although the supply is not taxable.

Residential rents, the second or later supply of residential premises, most financial supplies, and some other supplies are 'input-taxed' ('exempt' in other VAT jurisdictions) and are not subject to GST. However, the supplier cannot recover relevant input tax credits, except that financial suppliers may obtain a reduced input tax credit of 75% of the GST on the acquisition of certain services.

Health insurance is GST-free. Life insurance is input-taxed. General insurance is taxed. Reverse charges may apply to services or rights supplied from offshore, where the recipient is registered or required to be registered, and uses the supply solely or partly for a non-creditable supply.

Wine equalisation tax (WET)

The federal government levies WET at the wholesale level at a rate of 29%, in addition to 10% GST, which is calculated on the price including the WET, and it applies to wine from grapes, fruit and certain vegetables, mead, and sake. Retailers do not receive an input tax credit for WET. A rebate is available to a wine producer of 29% of the wholesale price (excluding WET or GST) for wholesale sales, and of 29% of the notional wholesale selling price for retail sales and applications for own use (up to a maximum of AUD 500,000).

Luxury car tax

The luxury car tax is levied by the federal government at the rate of 33% of the value of the car that exceeds the luxury car tax threshold (AUD 57,466 for both the 2010/11 and 2011/12 financial years) and is payable on the GST-exclusive value above the threshold. No input tax credit is available for luxury car tax, regardless of whether the car is used for business or private purposes.

Customs duties

Imports into Australia are subject to duties under the Australian Customs Tariff. The top duty rate is 5%, other than for clothing and finished textiles which are currently taxed

Australia

at 10% (to be reduced to 5% in 2015). A textile, clothing, and footwear (TCF) strategic investment program will operate until 2015.

Australia currently has comprehensive free trade agreements with Chile, New Zealand, Singapore, Thailand, and the United States. In addition, a regional free trade agreement between Australia, New Zealand, and Southeast Asian nations commenced on 1 January 2010, which progressively eliminates all barriers to trade in goods, services, and investments.

Excise taxes

Excise duties are imposed at high levels on beer, spirits, liqueurs, tobacco, cigarettes, and petroleum products. These excise rates are indexed bi-annually in February and August based on movements in the consumer price index (CPI). Some examples of current excise rates include:

- Beer not exceeding 3% by volume of alcohol packaged in an individual container not exceeding 48 litres: AUD 37.86 per litre of alcohol calculated on that alcohol content by which the percentage by volume of alcohol of the goods exceeds 1.15.
- Tobacco in stick form not exceeding in weight 0.8 grams per stick actual tobacco content: AUD 0.34681 per stick.
- Petroleum condensate, crude petroleum oil, and diesel: AUD 0.38143 per litre.
- Liquefied petroleum gas, other than liquefied petroleum gas exempted from excise duty: AUD 0.025 per litre.

A fuel tax credit system provides a credit for fuel tax (excise or customs duty) that is included in the price of taxable fuel. Broadly, credits are available to entities using fuel in their business and to households using fuel for domestic electricity generation and heating.

Land tax

All states and territories (except the Northern Territory) impose a tax based on the unimproved capital value of land. In general, the principal place of residence and land used for primary production is exempt from land tax.

Stamp duty

All states and territories impose a stamp duty on a wide variety of transactions at different rates. All jurisdictions impose a stamp duty on real estate conveyances, but most exempt conveyances of goods (not associated with other property) from stamp duty. The imposition of duty on share transfers involving unlisted entities differs from state to state. Corporate reconstruction exemptions are available. Advice from a stamp duty specialist should usually be obtained where substantial stamp duty may be imposed because the amount of duty may depend on the form of the transaction.

Fringe benefits tax (FBT)

The federal government levies FBT on employers at the rate of 46.5% on the 'grossed-up value' of non-salary and wages fringe benefits provided to employees (and/or the employee's associates) by the employer or associates. The grossing-up of the value ensures tax neutrality between providing benefits and cash remuneration. FBT generally is deductible for income tax purposes. There are some exemptions from FBT, including some minor benefits, remote area housing in certain circumstances, and specified relocation costs. In addition, there are some concessional valuation rules, in particular for living-away-from-home benefits (although the government is proposing to remove the concessions for living-away-from-home allowances from 1 July 2012, subject to certain transitional rules).

In relation to car fringe benefits, a new 'statutory formula' method applies to new cars acquired under contracts entered into after 7.30pm (AEST) on 10 May 2011. The new statutory formula is a flat 20% (phased in over four years) applied to the FBT base of the car, regardless of the annual kilometres travelled, and replaces the previous four-tiered statutory rate system.

Payroll tax

States and territories impose a tax on employers' payroll (broadly defined). The various jurisdictions have harmonised their payroll tax legislation, but some differences remain, particularly tax rates and the thresholds for exempting employers whose annual payroll is below a certain level, after taking into account grouping rules. For example, in New South Wales from 1 July 2011 the rate is 5.45% per annum with an annual exemption threshold of AUD 678,000. In Victoria, the rate is 4.9% from 1 July 2010, and the annual exemption threshold is AUD 550,000. A variety of rates and thresholds apply in other state and territory jurisdictions.

Superannuation guarantee levy

The federal government effectively requires employers to contribute 9% of an employee's earnings base, subject to limited exceptions, to a registered superannuation fund or retirement savings account on behalf of the employee. Failure to make these contributions will result in the employer being liable for a non-deductible superannuation guarantee charge.

The superannuation guarantee percentage is currently 9% but will gradually increase up to 12% starting from 1 July 2013.

No level of Australian government imposes a social security levy.

Insurance tax

States impose taxes on insurance premiums, which may be substantial.

Minerals Resource Rent Tax (MRRT)

MRRT is a new tax effective from 1 July 2012 applied to the mining profit made from extracting iron ore, coal, anything produced from a process that results in iron ore or coal being consumed or destroyed without extraction, or coal seam gas extracted as a necessary incident of mining coal from the ground before it undergoes any significant processing or value add.

The MRRT liability for each mining project interest in a MRRT year is calculated as follows:

$$\text{MRRT liability} = (\text{Mining profit} - \text{MRRT allowances}) \times \text{MRRT rate}$$

The effective MRRT rate is 22.5%, being the headline rate of 30% reduced by a 25% extraction allowance to recognise the miner's employment of specialist skills.

MRRT allowances reduce the mining profit and include appropriate recognition for mining royalties paid under a Commonwealth, State or Territory law, mining losses, and recognition for the investment in assets relating to upstream mining operations from a mining project interest that exists at 1 July 2012.

Australia

A miner's MRRT payable for a MRRT year is then calculated as follows:

MRRT payable = Sum of MRRT liabilities for each mining project interest – Low-profit offset (if applicable) – Rehabilitation tax offset

Small miners are subject to the MRRT but may be entitled to compliance concessions, including a low-profit offset that will ensure that a miner who (together with certain connected entities) has total mining profits for a MRRT year of AUD 75 million or less has no liability for MRRT. The offset is phased-out for profits between AUD 75 million and AUD 125 million.

Similar to income tax, MRRT is self assessed by the miner. The miner is, in most cases, required to give the Commissioner of Taxation a MRRT return for each MRRT year in which it has a mining project interest or pre-mining project interest. MRRT is generally payable by quarterly instalments.

MRRT applies in addition to normal income tax. MRRT payments (including quarterly instalments) are, however, deductible for income tax purposes.

Petroleum Resource Rent Tax (PRRT)

PRRT applies from 1 July 1986 to all petroleum projects in Australian offshore areas (or Commonwealth adjacent areas) other than production licences derived from the North West Shelf project and the Joint Petroleum Development Area in the Timor Sea. From 1 July 2012, PRRT applies to all Australian onshore and offshore oil and gas projects, including the North West Shelf.

PRRT is applied to a 'project' or 'production licence area' at a rate of 40% of the taxable profits derived from the recovery of all petroleum in the project, including:

- crude oil
- condensate
- sales gas
- natural gas
- liquefied petroleum gas (LPG), and
- ethane.

The taxable profit of a project is calculated as follows:

Taxable profit = Assessable receipts – Deductible expenditure

Deductible expenditure broadly includes exploration expenditure, all project development, and operating expenditures.

PRRT is self assessed by the relevant taxpayer. The taxpayer is, in most cases, required to give the Commissioner of Taxation a PRRT return for each PRRT year. PRRT is generally payable by quarterly instalments.

PRRT applies in addition to normal income tax. PRRT payments (including instalments) are, however, deductible for income tax purposes.

Local municipal taxes

Local taxes, including water, sewerage, and drainage charges, are levied based on the unimproved capital value of land and include a charge for usage (for example water usage).

Branch income

Branch profits are subject to ordinary corporate rates of taxation, and there is no withholding on repatriated profits.

Income determination**Inventory valuation**

Inventory generally may be valued at cost (full absorption cost), market selling value, or replacement price. Where, because of obsolescence or other special circumstances, inventory should be valued at a lower amount, the lower valuation generally may be chosen, provided it is a reasonable valuation. Special rules apply, however, regarding the valuation of trading stock for certain companies joining a consolidated group. Last in first out (LIFO) is not an acceptable basis of determining cost, nor is direct costing in respect of manufactured goods and work-in-progress.

Conformity is not required between book and tax reporting. For tax purposes, inventory may be valued at cost, market selling value, or replacement price, regardless of how inventory is valued for book purposes. Those who choose to come within the small-business entity measures (broadly defined as taxpayers who carry on business and who, together with certain 'connected' entities, have an aggregated turnover of less than AUD 2 million for the year) may ignore the difference between the opening and closing value of inventory, if on a reasonable estimate this is not more than AUD 5,000.

Capital gains

A capital gains tax (CGT) applies to assets acquired on or after 20 September 1985. Capital gains realised on the disposal of such assets are included in assessable income and are subject to tax at the company's corporate tax rate, if the disposal is by a company. In order to determine the quantum of any gain for any assets acquired before 21 September 1999, the cost base is indexed according to price movements since acquisition, as measured by the official CPI until 30 September 1999. There is no indexation of the cost base for price movements from 1 October 1999. Disposals of plant and equipment are subject to general rules rather than the CGT rules. Capital losses are allowable as deductions only against capital gains and cannot be offset against other income. In calculating capital losses, there is no indexation of the cost base.

Residents of Australia generally are liable for the tax on gains on the disposal of assets wherever situated, subject to relief from double taxation if the gain is derived and taxed in another country. However, the capital gain or capital loss incurred by a company from a CGT event in relation to shares in a foreign company is reduced by a percentage reflecting the degree to which the foreign company's assets are used in an active business, if the company holds a direct voting percentage of 10% or more in the foreign company for a certain period before the CGT event. Attributable income from CGT events happening to shares owned by a CFC are reduced in the same way. Capital gains and capital losses made by a resident company in respect of CGT events happening in respect of 'non-tainted' assets used to produce foreign income in carrying on business through a PE in a foreign country are disregarded in certain circumstances.

For CGT events occurring on or after 12 December 2006, non-residents are subject to Australian CGT only where the assets are taxable Australian property (i.e. Australian real property, or the business assets of Australian branches of a non-resident). Australian CGT also applies to indirect Australian real property interests, being non-portfolio interests in interposed entities (including foreign interposed entities), where

Australia

the value of such an interest is wholly or principally attributable to Australian real property. 'Real property' for all these purposes is consistent with Australian treaty practice, extending to other Australian assets with a physical connection with Australia, such as mining rights and other interests related to Australian real property. A 'non-portfolio interest' is an interest held alone or with associates of 10% or more in the interposed entity.

Dividend income

A 'gross-up and credit' mechanism applies to franked dividends (dividends paid out of profits which have been subject to Australian tax) received by Australian companies. The corporate shareholder grosses up the dividend received for tax paid by the paying company (i.e. franking credits attaching to the dividend) and is then entitled to a tax offset (i.e. a reduction of tax) equal to the gross-up amount. A company with an excess tax offset entitlement converts the excess into a carryforward tax loss using a special formula.

Dividends paid to another resident company that are unfranked (because they are paid out of profits not subject to Australian tax) are taxable, unless they are paid within a group that has chosen to be consolidated for tax purposes. Dividends paid between companies within a tax consolidated group are ignored for the purposes of determining the taxable income of the group.

Franked dividends paid to non-residents are exempt from dividend withholding tax (WHT).

An exemption from WHT is also available for dividends that are 'unfranked' under the dividend imputation rules and are declared to be conduit foreign income (CFI) received by non-resident shareholders (or unitholders) in an Australian corporate tax entity (CTE). These rules may also treat the CFI component of an unfranked dividend received by an Australian CTE from another Australian CTE as not taxable to the recipient, provided it is on-paid within a specified timeframe. Broadly, income will qualify as CFI if it is foreign income, including certain dividends, or foreign gains, which are not assessable for Australian income tax purposes or for which a foreign income tax offset has been claimed in Australia.

Foreign dividends are not assessable and are not eligible for a tax offset if received by an Australian resident company from a foreign affiliate where the recipient company has a voting power of at least 10% in the foreign affiliate. Income of a non-resident entity in which Australian residents hold interests is not assessable when repatriated to Australia where the income has been previously attributed to those residents and taxed in Australia (*see below*).

Stock dividends

Stock dividends, or the issue of bonus shares, as they are known under Australian law, are, in general, not taxed as a dividend, and the tax treatment is the spreading of the cost base of the original shares across the original shares and the bonus shares. However, if a company credits its share capital account with profits when issuing bonus shares, this will taint the share capital account (if it is not already a tainted share capital account), causing the bonus share issue to be a dividend. Certain other rules may apply to bonus share issues, depending on the facts.

Financial arrangements

Special rules apply to the taxation of financial arrangements (TOFA). 'Financial arrangement' is widely defined to cover arrangements that involve a cash settleable legal

or equitable right to receive, or obligation to provide, something of economic value in the future.

These measures provide six tax-timing methods for determining gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting gains or losses to the extent that the gain or loss is made in earning assessable income or carrying on a business for that purpose. The default methods are the accruals method and the realisation method, one or other of which will apply depending on the relevant facts and circumstances of a particular financial arrangement. The accruals method will apply to spread an overall gain or loss over the life of the financial arrangement where there is sufficient certainty that the expected gain or loss will actually occur. A gain or loss that is not sufficiently certain is dealt with under the realisation method.

Alternatively, a taxpayer may irrevocably choose one of four elective methods (i.e. fair value, retranslation, financial reports, and hedging) to determine the tax treatment of financial arrangements covered by the legislation. Qualification criteria must be met before the elective methods may be used. Generally, these criteria require that the taxpayer prepare a financial report in accordance with Australian (or comparable) accounting standards and be audited in accordance with Australian (or comparable) auditing standards.

Exemptions from this regime may be available having regard to the duration of the arrangement or the nature of the relevant taxpayer and the annual turnover or value of assets of that taxpayer. Certain types of financial arrangements are excluded from these rules, including leasing and hire purchase arrangements. Foreign residents are taxable on gains from financial arrangements under these measures to the extent that the gains have an Australian source.

Foreign exchange gains and losses

Foreign currency gains and losses are recognised when realised, regardless of whether there is a conversion into Australian dollars, and are included in or deducted from assessable income, subject to limited exceptions. There are exceptions to the timing and characterisation aspects of the realisation approach where the foreign currency gain or loss is closely linked to a capital asset. To reduce compliance costs with foreign currency denominated bank accounts, taxpayers may elect to disregard gains or losses on low balance transaction accounts that satisfy a *de minimis* exemption or may elect for retranslation by annually restating the balance of the account by reference to deposits, withdrawals, and the exchange rates at the beginning and end of each year (or by reference to amounts reported in accordance with applicable accounting standards).

For foreign exchange gains and losses associated with financial arrangements as defined, the compliance impact of the foreign exchange rules will be reduced for those taxpayers eligible to elect the retranslation or financial reports tax-timing methods under the TOFA measures (*as discussed above*).

Entities or parts of entities, satisfying certain requirements, are able to choose to account for their activities in a currency other than Australian dollars for income tax purposes as an intermediate step to translating the result into Australian dollars.

Foreign income

On 17 February 2011, the government released exposure draft legislation for public comment setting out the legislative design of reforms to modernise the CFC rules and to implement new foreign accumulation fund (FAF) rules, which broadly, are aimed at

Australia

investments in non-CFCs and fixed trusts. The commencement date for the new CFC and FAF rules has not been announced.

The current basis upon which the foreign income of corporations resident in Australia is taxed is set out below.

- Non-active income of foreign companies controlled by Australian residents (determined by reference to voting rights and dividend and capital entitlements) may be attributed to those residents under rules which distinguish between companies resident in 'listed countries' (e.g. Canada, France, Germany, Japan, New Zealand, the United Kingdom, and the United States) and in other 'unlisted' countries. In general, if the CFC is resident in an unlisted country and it fails the active income test (typically because it earns 5% or more of its income from passive or tainted sources), the CFC's tainted income (very broadly, passive income and gains, and sales and services income which has a connection with Australia) is attributable. If a CFC is resident in a listed country, a narrower range of tainted income is attributed even if the CFC fails the active income test.
- When income previously taxed on attribution is repatriated, it is not assessable for tax.
- Dividends received directly by a resident company from a foreign company are not assessable for tax where the resident company has a (non-portfolio) voting interest of at least 10% in the foreign affiliate and does not receive the dividend in its capacity as a trustee. The basis upon which distributions may qualify for such relief (i.e. where the payee has a voting interest of at least 10% in the payer) is currently under consideration as part of the redesign of the CFC rules.
- Active foreign branch profits of a resident company from carrying on business through a PE in a foreign country and capital gains made by a resident company from the disposal of non-tainted assets used in deriving foreign branch income (except income and capital gains from the operation of ships or aircraft in international traffic) are not assessable for tax.
- Foreign income of Australian resident corporations, and income of such taxpayers which is subject to foreign income taxes that is not effectively exempt, is subject to tax; however, in most cases, an offset for foreign income tax paid is allowed to the extent of Australian tax payable on such income.
- Generally, limited partnerships are treated as companies for Australian tax purposes. In certain circumstances, foreign limited partnerships, foreign limited liability partnerships, United States (US) limited liability companies, and United Kingdom (UK) limited liability partnerships will be treated as partnerships (i.e. as a flow-through entity) rather than as a company for the purposes of Australia's income tax laws.

Deductions

Depreciation and depletion

A capital allowances regime allows a deduction for the decline in value of depreciating assets held by a taxpayer. The holder of the asset is entitled to the deduction and may be the economic, rather than the legal, owner. A 'depreciating asset' is an asset that has a limited effective life and can reasonably be expected to decline in value over the time it is used, but does not include land, trading stock, or, subject to certain exceptions, intangible assets. Deductions are available for certain other capital expenditure.

Intangible assets that are depreciating assets (if they are not trading stock) are:

- Certain mining, quarrying, or prospecting rights and information.
- Items of intellectual property.
- In-house software.
- Indefeasible rights to use an international telecommunications submarine cable system.
- Spectrum licences under radio communications legislation.
- Datacasting transmitter licences.
- Telecommunications site access rights.

Taxpayers that do not qualify as a small business must depreciate the asset over its useful life (known as 'effective life') using either straight-line (known as the 'prime cost' method) or diminishing-value method (straight-line rate multiplied by 200% for depreciating assets acquired on or after 10 May 2006).

Taxpayers may self-determine the effective life of a unit or plant or may choose the effective life contained in a published determination of the Commissioner of Taxation.

Non-small-business taxpayers are able to choose to write-off all items costing less than AUD 1,000 through a low-value pool at a diminishing-value rate of 37.5% per annum.

For those who satisfy the small business entity threshold (broadly defined as taxpayers who are carrying on business and who, together with certain connected entities, have an aggregated turnover of less than AUD 2 million for the year), a simplified depreciation system applies with more attractive depreciation rates, including (with effect from 1 July 2012) an immediate write off for depreciating assets with a cost of less than AUD 6,500.

'Project pool' rules allow expenditures that do not form part of a depreciating asset to be deductible over the life of a project that is carried on for a taxable purpose. Amongst other things, items that fall within the rules include the following:

- Amounts paid to create or upgrade community infrastructure for a community associated with the project.
- Site preparation costs for depreciating assets (except horticultural plants in certain circumstances).
- Amounts incurred for feasibility studies for a project.
- Environmental assessment costs applicable to the project.
- Amounts incurred to obtain information associated with the project.
- Amounts incurred in seeking to obtain a right to intellectual property.
- Costs of ornamental trees or shrubs.

The so-called 'blackhole' expenditure provisions allow a five-year straight-line write-off for capital expenditure in relation to a past, present, or prospective business, to the extent that the business is, was, or is proposed to be carried on for a taxable purpose. The expenditure is deductible to the extent that it is not elsewhere taken into account (e.g. by inclusion in the cost base of an asset for capital gains tax purposes) and that it is not denied deductibility for the purposes of the income tax law (e.g. by the rules against deducting entertainment expenditure).

Special rules apply for primary producer assets, such as horticultural plants, water and land care assets, and the treatment of expenditure on R&D (*see the Tax credits and incentives section for more information*) and expenditure on certain Australian films.

Australia

A luxury car cost limit applies for depreciating the cost of certain passenger motor vehicles (AUD 57,466 cost limit for both the 2010/11 and 2011/12 income years).

Expenditure on the development of in-house software may be allocated to a 'software development pool' and written off over three years, starting in the year after the expenditure was incurred (40% in year two, 40% in year three, and 20% in year four). Amounts spent on acquiring computer software or the right to use it (except where the acquisition is for developing in-house software) generally is treated as incurred on acquiring a depreciating asset, deductible over its effective life (taken to be four years) commencing in the first year it is first used or installed ready for use. 'Shrink-wrapped' software acquired or manufactured for sale generally will be treated as trading stock.

A loss arising on the sale of a depreciating asset (depreciated value of the asset less sale consideration) is generally an allowable deduction. A gain on the sale of a depreciating asset, to the extent of depreciation recaptured, generally is taxed as ordinary income. Gains exceeding the amount of depreciation recaptured are also taxed as ordinary income.

Subject to exceptions referred to below, capital expenditure incurred after 15 September 1987 in the construction or improvement of non-residential buildings used for producing assessable income is amortised over 40 years at an annual 2.5% rate. Capital expenditure on the construction of buildings used for short-term traveller accommodation (e.g. hotels, motels) and industrial buildings (typically factories) is amortised over 25 years at an annual 4% rate where construction commenced after 26 February 1992. The cost of eligible building construction that commenced after 21 August 1984 and before 16 September 1987 (or construction contracted before 16 September 1987) is amortised over 25 years at an annual 4% rate. There is no recapture of the amortised amount upon disposal of the building, except where the expenditure is incurred after 13 May 1997, in which case recapture will apply, subject to certain transitional rules.

Similar provisions apply in relation to income-producing residential buildings on which construction commenced after 17 July 1985.

The cost of income-producing structural improvements, the construction of which started after 26 February 1992 is eligible for write-off for tax purposes on the same basis as that of income-producing buildings, that is, at a rate of 2.5% per annum.

The cost of consumables may be either written off immediately, or as used.

The following expenditure attracts an immediate 100% deduction: environmental protection activities, dealing with pollution and waste; landcare operations; exploring or prospecting for minerals (and from 1 July 2012 for exploration of geothermal energy sources); mine site rehabilitation; and certain expenditure in respect of the establishment of carbon sink forests.

Tax depreciation is not required to conform to book depreciation.

Percentage depletion based on gross income or other non-cost criteria is not available.

Goodwill

Goodwill and trademarks are not depreciating assets, and tax amortisation is not available.

Start-up expenses

There are no specific provisions in relation to deductions for start-up expenses. However, certain start-up expenses, such as costs of company incorporation or costs to raise equity, may qualify for a five-year straight-line write-off to the extent that it is capital expenditure in relation to a current or prospective business that is, or is proposed to be, carried on for a taxable purpose.

Interest expenses

Special rules classify financial arrangements as either debt or equity interests. These rules focus on economic substance rather than legal form and take into account related schemes, and extend beyond shares. In this situation, interest expense on non-share equity would be treated as a dividend, which is potentially frankable, and would be non-deductible for the paying company/group.

Thin capitalisation measures apply to the total debt of the Australian operations of multinational groups (including branches of those groups). See *Thin capitalisation in the Group taxation section* for more information.

Bad debts

A deduction may be available for bad debts written off as bad before the end of an income year. Generally, a deduction will only be available where the amount of the debt was previously included in assessable income, or the debt is in respect of money lent in the ordinary course of a money lending business. The ability to claim a deduction for a bad debt is also subject to other integrity measures.

The amount of a commercial debt forgiven (other than an intra-group debt within a tax consolidated group) that is not otherwise assessable or does not otherwise reduce an allowable deduction is applied to reduce the debtor's carryforward tax deductions for revenue tax losses, non-deducted capital losses, non-deducted capital expenditure, and other capital cost bases in a certain order. Any amount not so applied generally is not assessable to the debtor. Forgiveness includes the release, waiver, or extinguishment of a debt (other than by full payment in cash) and the lapsing of the creditor's recovery right by reason of a statute of limitations.

Charitable contributions

Charitable contributions are generally deductible where they are made to entities that are specifically named in the tax law or endorsed by the Commissioner of Taxation as 'deductible gift recipients'. However, deductions for such gifts cannot generate tax losses. That is, generally the deduction is limited to the amount of assessable income remaining after deducting from the assessable income for the year all other deductions.

Entertainment

Subject to limited exceptions, deductions are denied for expenditure on 'entertainment', which broadly is defined as entertainment by way of food, drink, or recreation, and accommodation or travel to do with providing such entertainment.

Fines and penalties

Fines and penalties imposed under any Australian and foreign law are generally not deductible. This includes fines and penalties imposed in relation to both civil and criminal matters.

Australia

The General Interest Charge (GIC) and Shortfall Interest Charge (SIC), which are imposed for failure to pay an outstanding tax debt within the required timeframe, or where a tax shortfall arises under an amended assessment, are deductible for Australian tax purposes.

Taxes

In general, GST input tax credits, GST, and adjustments under the GST law are disregarded for income tax purposes. Other taxes, including property, payroll, MRRT, PRRT, and fringe benefits tax, as well as other business taxes, excluding income tax, are deductible to the extent they are incurred in producing assessable income or necessarily incurred in carrying on a business for this purpose, and are not of a capital or private nature.

Other significant items

Where expenditure for services is incurred in advance, deductibility of that expenditure generally will be prorated over the period during which the services will be provided, up to a maximum of ten years.

General value shifting rules apply to shifts of value, direct or indirect, in respect of loan and equity interests in companies or trusts. Circumstances in which these rules may apply include where there is a direct value shift under a scheme involving equity or loan interests, or where value is shifted out of an asset by the creation of rights in respect of the asset, or where there is a transfer of assets or the provision of services for a consideration other than at market value. The value shifting rules may apply to the head company of a tax consolidated group or multiple entry consolidated (MEC) group for value shifts also involving entities outside the group, but not to value shifting between group members, which the tax consolidation rules address (*see the Group taxation section for more information*).

Net operating losses

Losses may be carried forward indefinitely, subject to compliance with tests of continuity of more than 50% of ultimate stock ownership or compliance with a same business test. For consolidated group companies, the ability to utilise these losses is determined by a modified version of these tests (*see the Group taxation section for more information*).

In May 2012, the government announced that a loss carryback regime will apply to companies from 1 July 2012. Under this regime, companies will be able to 'carryback' tax losses to offset prior year profits, and obtain a refund of tax previously paid on those prior year profits. While the specific details of the regime are still to come, key features of the proposal include:

- an initial one year carryback period from the 2012/13 income year (i.e. 2012/13 tax losses can be carried back and offset against tax paid in 2011/12)
- a two year loss carryback period to apply from the 2013/14 income year
- an AUD 1 million cap on the amount of losses able to be carried back, and
- refunds will be limited to the balance of a company's franking account.

Payments to foreign affiliates

A corporation can deduct royalties, management service fees, and interest charges paid to non-residents, provided the amounts are commercially realistic and referable to activities aimed at producing assessable income.

Group taxation

A tax consolidation regime applies for income tax and capital gains tax purposes for companies, partnerships and trusts ultimately 100% owned by a single head company (or certain entities taxed like a company) resident in Australia. Australian resident companies that are 100% owned (either directly or indirectly) by the same foreign company and have no common Australian head company between them and the non-resident parent are also allowed to consolidate as a multiple entry consolidated (MEC) group. The group that is consolidated for income tax purposes may differ from the group that is consolidated for accounts or for GST purposes. Groups that choose to consolidate must include all 100%-owned entities under an all-in rule, and the choice to consolidate is irrevocable. However, eligible tier-1 companies (being Australian resident companies that have a non-resident shareholder) that are members of a potential MEC group are not all required to join an MEC group, when it forms, but may form two or more separate MEC groups, if they so choose, of which the same foreign top company is the 100% owner. If an eligible tier-1 company joins a particular MEC group, all 100% subsidiaries of the company must also join the group. While the rules for forming and joining MEC groups allow more flexibility than with consolidated groups, the ongoing rules for MEC groups are more complex, particularly for tax losses and on the disposal of interests in eligible tier-1 companies, which are subject to cost pooling rules, although for practical purposes these rules are relevant only if the non-resident is holding or disposing of an indirect Australian real property interest (see *Capital gains in the Income determination section for more information*).

A single entity rule applies to members of a consolidated or MEC group so that for income tax purposes the subsidiary members are taken to be part of the head company, while they continue to be members of the group and intra-group transactions are not recognised. In general, no group relief is available where related companies are not members of the same consolidated or MEC group. Rollover relief from CGT is available on the transfer of unrealised gains on assets, which are taxable Australian property between companies sharing 100% common ownership where the transfer is between non-resident companies, or between a non-resident company and a member of a consolidated group or MEC group, or between a non-resident company and a resident company that is not able to be a member of a consolidated group.

Consolidated groups file a single tax return and calculate their taxable income or loss ignoring all intra-group transactions.

When a consolidated group acquires 100% of an Australian resident entity, so that it becomes a subsidiary member, the cost base of certain assets (in general, those that are non-monetary) of the joining member are reset for all tax purposes, based on the purchase price plus the entity's liabilities, subject to certain adjustments. In this way, an acquisition of 100% of an Australian resident entity by a consolidated group is broadly the tax equivalent of acquiring its assets. Subject to certain tests being passed, tax losses of the joining member may be transferred to the head company and may be utilised subject to a loss factor, which is broadly the market value of the joining member divided by the market value of the group (including the joining member). The value of the loss factor (referred to as 'the available fraction') that applies for transferred losses may be reduced by capital injections (or the equivalent) into the member before it joined, or into the group after the loss is transferred.

Australia

Franking credits and tax losses remain with the group when a member exits, and the cost base of shares in the exiting member is calculated based on the tax value of its assets at the time of exit, less liabilities subject to certain adjustments.

Generally, members of the group are jointly and severally liable for group income tax debts on the default of the head company, unless the group liability is covered by a tax sharing agreement (TSA) that satisfies certain legislative requirements. A member who enters into a TSA generally can achieve a clean exit from the group where a payment is made to the head company in accordance with the TSA.

Transfer pricing

Australia has a comprehensive transfer pricing regime aimed at protecting the tax base by ensuring that dealings between related, international parties are conducted at arm's length. The arm's-length principle, which underpins the transfer pricing regime, uses the behaviour of independent parties as a benchmark for determining the allocation of income and expenses between international related parties.

Where the Commissioner of Taxation is satisfied that the arm's-length principle has not been maintained, the Commissioner has the power to make transfer pricing adjustments.

Legislation is currently proposed (with retrospective effect from 1 July 2004) to allow the Commissioner of Taxation to issue transfer pricing assessments under the Associated Enterprises or Business Profits Articles of Australia's DTAs in addition to the Commissioner's existing ability to raise transfer pricing assessments under domestic law.

Thin capitalisation

Thin capitalisation measures apply to the total debt of the Australian operations of multinational groups (including branches of those groups). The measures cover investment into Australia of foreign multinationals and outward investment of Australian-based multinationals, and include a safe-harbour debt-to-equity ratio of 3:1. Interest deductions are denied to the extent that borrowing exceeds the safe-harbour ratio. Where borrowing exceeds the safe-harbour ratio, multinationals are not affected by the rules if they can satisfy the arm's-length test (that the borrowing could have been borne by an independent entity). A further alternative test is available for outward investing entities based on 120% of their worldwide gearing.

As mentioned above, the thin capitalisation rules apply to inward investment into Australia. In particular, they will apply where a foreign entity carries on business through an Australian PE or to an Australian entity in which five or fewer non-residents have at least a 50% control interest, or a single non-resident has at least a 40% control interest, or the Australian entity is controlled by no more than five foreign entities. Separate rules apply to financial institutions. To facilitate their inclusion in the rules, branches are required to prepare financial accounts.

International Financial Reporting Standards (IFRS), equivalents of which currently apply in Australia, make it more difficult for some entities to satisfy thin capitalisation rules because of the removal of internally generated intangible assets from the balance sheets. Accordingly, thin capitalisation law allows departure from the Australian equivalents to IFRS in relation to certain intangible assets and excludes deferred tax assets and liabilities and surpluses and deficits in defined benefit superannuation funds from applicable calculations.

Tax credits and incentives

Foreign income tax offsets

Foreign income tax offsets (FITOs) are available to avoid double taxation in respect of foreign tax paid on income which is assessable in Australia. Generally, a corporation will be entitled to claim a FITO where it has paid, or is deemed to have paid, an amount of foreign income tax, and the income or gain on which the foreign income tax was paid is included in assessable income for Australian tax purposes.

The amount of the FITO available is limited to the greater of AUD 1,000 and the amount of the 'FITO limit'. The FITO limit is broadly calculated as the difference between the corporation's actual tax liability and its tax liability if certain foreign taxed and foreign-sourced income and related deductions were disregarded. Excess FITOs are not able to be carried forward and claimed in later income years.

Inward investment incentives

Depending on the nature and size of the investment project, state governments may give rebates from payroll, stamp, and land taxes on an *ad hoc* basis and for limited periods.

Capital investment incentives

Incentives for capital investment are as follows:

- Accelerated deductions are available for capital expenditures on the exploration for and extraction of petroleum and other minerals (and, from 1 July 2012, for exploration of geothermal energy sources), the rehabilitation of former mineral extraction sites, certain environmental protection activities, the establishment of certain 'carbon sink' forests, certain expenditure of primary producers, and for certain low cost depreciating assets held by small business entities.
- There are a number of tax concessions aimed at encouraging investments in the venture capital sector. Non-resident pension funds that are tax-exempt in their home jurisdiction, are residents of Canada, France, Germany, Japan, the United Kingdom, the United States, or another country prescribed by regulation, and satisfy certain Australian registration requirements, are exempt from income tax on the disposal of investments in certain Australian venture capital equity held at risk for at least 12 months. A similar exemption is extended to other tax-exempt non-resident investors, including managed funds and venture capital fund-of-funds vehicles and taxable non-residents holding less than 10% of a venture capital limited partnership. These investors are able to invest in eligible venture capital investments through an Australian resident venture capital limited partnership or through a non-resident venture capital limited partnership. Eligible venture capital investments are limited to specified interests in companies and trusts. Detailed rules in the legislation prescribe the nature of such investments and the characteristics, which such companies and trusts, and their investments, must possess.
- There is a venture capital tax concession applicable to an 'early stage venture capital limited partnership' (ESVCLP). The thresholds for qualification include requirements that, amongst other things, the committed capital of the ESVCLP must be at least AUD 10 million but not exceed AUD 100 million, the investments made must fall within prescribed parameters as to size and proportion of total capital, and the ESVCLP must have an investment plan approved by Innovation Australia. Where the thresholds for their application are met, the ESVCLP provisions provide flow-through tax treatment to domestic and foreign partners, with the income and capital received by the partners being exempt from taxation. As the income will be tax exempt, the investor will not be able to deduct investment losses.

Australia

- The taxable income derived from pure offshore banking transactions by an authorised offshore banking unit in Australia is taxed at the rate of 10%.
- Refundable tax offsets are available to companies for certain expenditure incurred in Australia in producing specified classes of film or undertaking specified post, digital, or special effects production activities in respect of specified classes of films. The concessions are only available to a company that is either an Australian resident or a non-resident carrying on business through an Australian PE and which has been issued with an Australian Business Number (ABN). The availability of the offsets is subject to a number of conditions, including meeting registration and minimum spend requirements. The rate of the offset varies from 15% to 40% depending upon the nature of the relevant film and activities undertaken.
- Up until the 2011/12 income year, there was an Entrepreneurs' Tax Offset (ETO) of up to 25% for businesses run by small business entities, which can include companies with an annual turnover of up to AUD 75,000.

Research & development (R&D) tax credit

The tax treatment of expenditure on R&D was changed for income years commencing on or after 1 July 2011, such that the previously applicable concessional deduction is replaced with an R&D tax credit. For companies with an annual turnover of less than AUD 20 million, there is a 45% refundable tax credit, equivalent to a 150% tax concession. This equates to a cash savings of 15% on every dollar of R&D spend and will be refundable where the company is in a tax loss position. Companies with a turnover of greater than AUD 20 million have access to a non-refundable 40% tax credit, equivalent to a 133% tax concession. This equates to a cash savings of 10% on every dollar of R&D spend.

Generally, only R&D activities undertaken in Australia qualify for the new R&D tax incentive. However, R&D activities conducted overseas also qualify in limited circumstances where the activities cannot be undertaken in Australia. The 175% premium concession and international premium concession have been abolished. Eligibility criteria have been tightened to support 'only genuine R&D'. Special grant programmes also may be available to assist corporations in the conduct of certain R&D in Australia. These grants are awarded on a discretionary basis.

Other incentives

Cash grants for export-market development expenditure are available to eligible businesses seeking to export Australian-source goods and services.

Withholding taxes

Withholding tax (WHT) rates are shown in the following table.

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (3)
Resident corporations or individuals	0	0	0
Non-resident corporations or individuals:			
Non-treaty	30	10	30
Treaty:			
Argentina	10/15 (4)	12	10/15 (5)
Austria (46)	15	10	10 (6)
Belgium	15	10	10 (6)

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (3)
Canada	5/15 (7)	10 (7)	10 (6, 7)

United States	0/5/15/30 (31)	0/10/15 (32)	5 (6, 33)
Vietnam	10/15 (34)	10	10 (6)

Notes

1. Dividends paid to non-residents are exempt from dividend WHT except when paid out of a company that has not borne Australian tax (i.e. unfranked dividends). Dividends include those stock dividends that are taxable. The rates shown apply to dividends on both portfolio investments and substantial holdings other than dividends paid in connection with an Australian PE of the non-resident. Unfranked

Australia

- dividends paid to non-residents are exempt from dividend WHT to the extent that the dividends are declared by the company to be conduit foreign income. There is also a deduction from 1 July 2000 in certain cases to compensate for the company tax on inter-entity distributions where these are on-paid by holding companies to a 100% parent that is a non-resident (see *Dividend income in the Income determination section*). Dividends paid to a non-resident in connection with an Australian PE are taxable to the non-resident on a net assessment basis (i.e. the dividend and associated deductions will need to be included in the determination of the non-resident's taxable income, the dividend is not subject to dividend WHT), and a franking tax offset is allowable to the non-resident company for franked dividends received.
- Australia's interest WHT rate is limited to 10% of gross interest, although the treaty may allow for a higher maximum limit. An exemption from Australian WHT can be obtained for interest on certain public issues or widely held issues of debentures. Provisions exist to ensure that discounts and other pecuniary benefits derived by non-residents on various forms of financings are subject to interest WHT. Interest paid to non-residents by offshore banking units is exempt from interest WHT where offshore borrowings are used in offshore banking activities (including lending to non-residents). An offshore borrowing is defined as a borrowing from (i) an unrelated non-resident in any currency or (ii) a resident or a related person in a currency other than Australian currency.
 - Royalties paid to non-residents (except in respect of a PE in Australia of a resident of a treaty country) are subject to 30% WHT (on the gross amount of the royalty), unless a DTA provides for a lesser rate.
 - For Australian-sourced dividends which are franked under Australia's dividend imputation provisions and paid to a person who directly holds at least 10% of the voting power of the company, the limit is 10% (although note that Australia does not impose WHT on franked dividends). For Argentinean-sourced dividends paid to a person who holds at least 25% of the capital in the company, the limit is 10%. A 15% limit applies to other dividends.
 - Source-country tax is limited to 10% of the gross amount of royalties in relation to copyright of literary, dramatic, musical, or other artistic work; the use of industrial or scientific equipment; the supply of scientific, technical, or industrial knowledge; assistance ancillary to the above; or certain forbearances in respect of the above. Source-country tax is limited to 10% of the net amount of royalties for certain technical assistance. In all other cases, it is limited to 15% of the gross amount of royalties.
 - Tax is limited to the indicated percentage of gross royalty.
 - Under a protocol signed on 23 January 2002, the maximum WHT rate on interest is 10%. The Protocol adopts a 5% dividend WHT rate to franked dividends paid by an Australian resident company and, in the case of dividends paid by a Canadian resident company (other than a non-resident owned investment corporation), to a company that holds directly at least 10% of the voting power in the dividend company (although note that Australia does not impose WHT on franked dividends). Otherwise, the maximum WHT rate on dividends will continue to be 15%. The protocol has effect in Australia in relation to dividends, interest, and royalties derived on or after 1 January 2003.
 - Except Hong Kong and Macau.
 - The treaty between Australia and the Czech Republic allows Australia to impose a 5% WHT on the franked part of a dividend in certain circumstances (although note that Australia does not impose WHT on franked dividends). In the Czech Republic, a rate of 15% applies to the gross amount of dividends if the dividends are paid to a company which holds directly at least 20% of the capital of the company paying the dividend.
 - East Timor does not have a comprehensive DTA with Australia. However, the Timor Sea Treaty governs the taxation rights between the two countries for petroleum-related activities conducted in the Joint Petroleum Development Area of the Timor Sea by any person or entity, irrespective of the residency status of that person or entity.
 - Where the Timor Sea Treaty applies to third-country resident payees, only 10% of the total gross interest, dividend, or royalty payment is subject to Australian WHT, as follows:
 - Interest: 10% of total gross interest paid is subject to WHT at a rate of 10%.
 - Dividends: 10% of total gross unfranked dividends paid are subject to WHT at a rate of 15%, or at the relevant DTA rate of the recipient.
 - Royalties: 10% of total gross royalties paid is subject to WHT at a rate of 10%, or at the relevant DTA rate of the recipient. However, the other 90% of each such amount is subject to East Timorese WHT at the same rates.
 - The current agreement came into force on 10 November 2007 and has effect in Australia in respect of WHT for income derived on or after 1 January 2008 and in respect of other income, profit, or gains derived on or after 1 July 2008.
 - On 20 June 2006, Australia and France signed a new agreement. The new agreement has effect in Australia in respect of WHT on income derived on or after 1 January 2010, being the calendar year next following 1 June 2009, which was the date on which the new agreement entered into force. The source country will exempt inter-corporate non-portfolio (i.e. minimum 10% shareholding) dividends paid out of profits that have borne the normal rate of company tax. There is a 5% rate limit for all other non-portfolio dividends. A rate limit of 15% will continue, otherwise, to apply for dividends. A rate limit of 10% applies to interest, except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country. The rate limit for royalties reduced to 5% from 1 January 2010. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.

14. The source-country limit under the Indian agreement is 10% for royalties paid in respect of the use of or rights to use industrial, commercial, or scientific equipment or for the provision of consulting services related to such equipment. In other cases the limit is 15%.
15. The source-country limit under the Indonesian agreement is 10% for royalties paid in respect of the use of or the right to use any industrial, commercial, or scientific equipment or for the supply of scientific, technical, industrial, or commercial knowledge or information, and it is 15% in other cases.
16. A zero dividend WHT rate applies to franked dividends paid by an Australian resident company to an entity that holds directly at least 10% of the voting power in the dividend paying company, otherwise a 15% WHT rate applies. In relation to dividends paid by a company resident of Malaysia, no WHT applies.
17. Source-country tax in Malta is limited to the tax chargeable on the profits out of which the dividends are paid.
18. A zero dividend WHT rate applies to franked dividends paid (in Mexico, those dividends that have been paid from the net profit account) to a company that holds directly at least 10% of the voting power in the dividend paying company. In all other cases, a 15% WHT rate will apply to dividends.
19. Source-country tax is limited to 10% when interest is paid to a bank or an insurance company, derived from bonds and securities that are regularly and substantially traded on a recognised securities market, paid by banks (except where the prior two criteria apply), or paid by the purchaser to the seller of machinery and equipment in connection with a sale on credit. It is 15% in all other cases.
20. For Australian-source dividends, the limit is 15%. Where dividends are sourced in Papua New Guinea, the limit is 20%.
21. Source-country tax is limited to 15% where relief by way of rebate or credit is given to the beneficial owner of the dividend. In any other case, source-country tax is limited to 25%.
22. Source-country tax generally is limited to 15% of gross royalties if paid by an approved Philippines enterprise. In all other cases, the rate is limited to 25% of the gross royalties.
23. Source-country tax (Australia) is limited to 5% where a dividend is paid to a Romanian resident company that holds directly at least 10% of the capital of the Australian company paying the dividend to the extent that the dividend is fully franked. Source-country tax (Romania) is limited to 5% where a dividend is paid to an Australian resident company that holds directly at least 10% of the capital of the Romanian company paying the dividend if the dividend is paid out of profits that have been subject to Romanian profits tax. In other cases, it is limited to 15%.
24. Source-country tax generally is limited to 15%. However, a rate of 5% applies where the dividends have been fully taxed at the corporate level, the recipient is a company which has a minimum direct holding in the paying company, and the recipient has invested a minimum of AUD 700,000 or the Russian ruble equivalent in the paying company. Where the dividends are paid by a company that is a resident in Russia, the dividends are exempt from Australian tax.
25. The agreement with the Russian Federation is the first of Australia's new treaties to include spectrum licences in the definition of royalties.
26. Source-country tax (Taiwan) is limited to 10% of the gross amount of the dividends paid to a company which holds at least 25% of the capital of the company paying the dividends. A rate of 15% applies in all other cases. To the extent that dividends are franked because they are paid out of profits that have borne Australian tax, they are exempt from dividend WHT (See *Note 1 above*). The treaty allows Australia to impose a 10% WHT on the franked part of a dividend.
27. The source-country limit where the recipient has a minimum 25% direct holding in the paying company is 15% if the paying company engages in an industrial undertaking; 20% in other cases.
28. The source-country limit is 10% when interest is paid to a financial institution. It is 25% in all other cases.
29. Source-country tax is generally limited to 15%. However, an exemption applies for dividends paid to a listed company which satisfies certain public listing requirements and which controls 80% or more of the voting power in the company paying the dividend, and a 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company.
30. Source-country tax is generally limited to 10%. However, generally zero interest WHT is payable where interest is paid to a financial institution or a government body exercising governmental functions.
31. Source-country tax is generally limited to 15%. No source country tax is chargeable on dividends to a beneficially entitled company which satisfies certain public listing requirements and holds 80% or more of the voting power in the company paying the dividend. A 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company. No limit applies to US tax on dividends paid on certain substantial holdings of Australian residents in US real estate investment trusts (REITs). In practical terms, US tax on these dividends is increased from 15% to the current US domestic law rate of 30%. The 15% rate applies to REIT investments made by certain listed Australian property trusts subject to the underlying ownership requirements not exceeding certain levels. Investments in REITs by listed Australian property trusts acquired before 26 March 2001 are protected from the increased rate.
32. Source-country tax generally is limited to 10%. However, generally zero interest WHT is payable where interest is paid to a financial institution or a government body exercising governmental functions. Rules consistent with US tax treaty policy and practice will allow interest to be taxed at a higher 15% rate (the rate that generally applies to dividends) and for tax to be charged on intra-entity interest payments between a branch and its head office.
33. Amounts derived from equipment leasing (including container leasing) are excluded from the royalty definition.

Australia

34. Source-country tax is limited to 15% (Australia) and 10% (Vietnam).
35. A zero WHT rate will apply in certain cases to inter-corporate dividends where the recipient holds directly at least 80% of the voting power in the dividend paying company for the 12-month period prior to payment. A rate of 5% applies to all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the company paying the dividend. A general limit of 15% applies to all other dividends.
36. Prior to 1 January 2009, a zero WHT rate applied to dividends paid out of profits that have borne the normal rate of company tax and are paid to a company which holds directly at least 10% of the capital of the dividend paying company. A 15% rate applied in all other cases.
37. For dividend income derived on or after 1 January 2008, a zero WHT rate applies to inter-corporate dividends where the recipient holds directly 80% or more of the voting power of the company paying the dividend. A 5% rate limit applies on all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the company paying the dividend. A 15% rate applies in all other cases.
38. A rate limit of 10% will apply to interest, except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country.
39. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits. The rate of 5% applies to royalties derived on or after 1 January 2008. Before that date, a 10% rate applied.
40. On 31 January 2008, Australia and Japan signed a new agreement. The new agreement has effect in Australia in respect of WHTs on income derived on or after 1 January 2009. The source country will exempt inter-corporate dividends where the recipient holds directly 80% or more of the voting power of the company paying the dividend and certain limitation of benefit thresholds are met. A 5% rate limit will apply on all other inter-corporate dividends where the recipient beneficially holds directly 10% or more of the voting power of the company paying the dividend. A rate limit of 10% will otherwise apply for dividends. However, where the dividends are paid by a company that is a resident of Japan, which is entitled to a deduction for the dividends in Japan, the rate limit is 15% where more than 50% of the assets of the paying company consist, directly or indirectly, of real property situated in Japan and 10% in all other cases. Special rules apply to distributions to Japanese residents by REITs. A rate limit of 10% applies to interest, except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political subdivision or local authority or central bank or other specified entity of the other country. As of 1 January 2009, a 5% WHT rate on royalties applies. Before 1 January 2009, a general limit of 10% WHT on royalties applied. Under the new agreement, amounts derived from equipment leasing (including certain container leasing) will be excluded from the royalty definition and treated either as international transport operations or business profits.
41. A general rate limit of 10% applies to interest. However, in respect of interest derived on or after 1 January 2008, no tax will be chargeable in the source country on interest derived by a government of the other country (including its money institutions or a bank performing central banking functions) from the investment of official reserve assets and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement).
42. The rate limit for royalties of 5% applies to royalties derived on or after 1 January 2008. Before that date, a 10% rate applied.
43. On 31 March 2008, Australia and South Africa signed a protocol amending the agreement. The provisions of the new Protocol relating to Australian WHTs have effect in respect of income derived by a non-resident on or after 1 January 2009. A 5% rate limit will apply on all inter-corporate dividends where the recipient beneficially holds directly 10% or more of the voting power of the company paying the dividend. A rate limit of 15% will otherwise apply for dividends. As of 1 January 2009, a general rate limit of 10% applies to interest. However no tax will be chargeable in the source country on interest derived by a government of the other country (including a bank performing central banking functions) and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement). As of 1 January 2009, a 5% rate on royalties applies. Before 1 January 2009, a general limit of 10% WHT on royalties applied.
44. On 28 October 2008, it was announced that the Australian and the United Kingdom governments would commence negotiations on a revised tax treaty. No further announcements have been made in relation to the progress of treaty negotiations.
45. On 26 June 2009, a new double tax agreement was signed between Australia and New Zealand. The new treaty took effect for WHT purposes on 1 May 2010. As of 1 May 2010, a zero WHT rate applies in certain cases to inter-corporate dividends where the recipient holds directly at least 80% of the voting power in the dividend paying company. A rate of 5% applies on all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the company paying the dividend. A general limit of 15% applies for all other dividends, including those paid prior to 1 May 2010. As of 1 May 2010, source-country tax on interest continues to be limited to 10%. However, no tax is chargeable in the source country on interest derived by a government or a political subdivision or local authority of the other country (including a government investment fund or a bank performing central banking functions) or on interest derived by a financial institution which is unrelated to and dealing wholly independently of the payer (excluding interest paid as part of a back-to-back loan arrangement and, for New Zealand payers, where that person has not paid approved issuer levy). As of 1 May 2010, the royalty WHT rate reduced from 10% to 5%.

46. The government announced on 4 February 2010 that negotiations to update Australia's tax treaty with Austria would take place in March 2010. No further announcements have been made in relation to the progress of treaty negotiations.
47. Australia and Chile signed a new DTA on 10 March 2010. The new agreement has not yet entered into force.
48. On 29 April 2010, the Australian and Turkish Governments signed a DTA. The DTA will enter into force when both countries advise that they have completed their domestic requirements.
49. Once in force, the DTA will apply a 5% WHT rate to inter-corporate dividends where the recipient owns directly 10% of the voting power of an Australian resident company or directly owns 25% of the capital of a Turkish resident company where the profits out of which the dividend is paid has been subject to the full rate of corporation tax in Turkey. In all other cases, a 15% WHT rate will apply.
50. Once in force, the DTA will apply a general limit of 10% WHT on interest. However, interest derived from the investment of official reserve assets by the either the Australian or Turkish Government, the Australian or Turkish central bank, or a bank performing central banking functions in either Australia or Turkey shall be exempt from interest WHT.

Other payments

A Pay-As-You-Go (PAYG) withholding regime applies to require the deduction and remittance of taxes on behalf of foreign resident individuals and entities that are in receipt of the following types of payments:

Type of payment	Rate of withholding (%)
Payments for promoting or organising casino gaming junket arrangements	3
Payments for performing artists and sportspersons, including payments to support staff such as art directors, bodyguards, coaches, hairdressers, and personal trainers:	
if recipient is a company	30
if recipient is an individual	the applicable non-resident marginal tax rate
Payments under contracts entered into after 30 June 2004 for the construction, installation, and upgrading of buildings, plant, and fixtures, and for associated activities	5

Managed investment trust distributions

For managed investment trust fund payments to a non-resident investor, a WHT regime applies, with divergent outcomes, depending upon whether or not the recipient of such fund payments is resident of a country identified as being one with which Australia has an effective exchange of information (EEOI) arrangement and which is regulated as such for purposes of these rules. For a resident of a regulated EEOI country, a final WHT at a 7.5% rate applies for distributions relating to income years starting before 1 July 2012 (a final WHT at a 15% rate is proposed to apply to distributions relating to subsequent income years).

EEOI countries that have been identified by regulation are Anguilla, Antigua & Barbuda, Aruba, the Bahamas, Belize, Bermuda, the British Virgin Islands, the Cayman Islands, Gibraltar, Guernsey, Isle of Man, Jersey, Monaco, the Netherlands Antilles, San Marino, St. Christopher and Nevis, St. Vincent and the Grenadines, and the Turks and Caicos Islands, as well as countries with which Australia has concluded DTAs, other than Austria, Greece, Korea, the Philippines, and Switzerland. Australia has entered into EEOI agreements with Andorra, Bahrain, the Cook Islands, Costa Rica, Dominica, Grenada, Liberia, Liechtenstein, Macao, the Marshall Islands, Mauritius, Montserrat, Saint Lucia, Samoa, and Vanuatu; however, these countries have not yet been identified in regulations to be EEOI countries.

Australia

Tax administration

Taxable period

The Australian tax year runs from 1 July to 30 June. However, a corporation may apply to adopt a substitute year of income, for example, 1 January to 31 December.

Tax returns

A corporation (including the head company of a tax consolidated group) lodges/files a tax return under a self-assessment system that allows the Australian Taxation Office (ATO) to rely on the information stated on the return. Where a corporation is in doubt as to its tax liability regarding a specific item, it can ask the ATO to consider the matter and obtain a binding private ruling.

Generally the tax return for a corporation is due to be lodged/filed with the ATO by the 15th day of the seventh month following the end of the relevant income year or such later date as the Commissioner of Taxation allows. Additional time may apply where the tax return is lodged/filed by a registered tax agent.

Payment of tax

A PAYG instalment system applies to companies other than those whose annual tax is less than AUD 8,000 that are not registered for GST. Most companies are obliged to pay instalments of tax for their current income year by the 21st day of the fourth, seventh, and tenth months of that year and by the 21st day of the month immediately following that year. Instalments are calculated on a quarterly basis by applying an instalment rate to the amount of the company's actual ordinary income (ignoring deduction) for the previous quarter. The instalment rate is notified to the taxpayer by the ATO and determined by reference to the tax payable for the most recent assessment. The ATO may notify a new rate during the year on which subsequent instalments must be based. Taxpayers can determine their own instalment rate, but there may be penalty tax if the taxpayer's rate is less than 85% of the rate that should have been selected.

Final assessed tax is payable on the first day of the sixth month following the end of that income year or such later date as the Commissioner of Taxation allows by a published notice.

Audit cycle

The Australian tax system for companies is based on self-assessment; however, the ATO undertakes ongoing compliance activity to ensure corporations are meeting their tax obligations. The ATO takes a risk-based approach to compliance and audit activities, with efforts generally focused on taxpayers with a higher likelihood of non-compliance and/or higher consequences (generally in dollar terms) of non-compliance. Compliance activities take various forms, including general risk reviews, questionnaires, reviews of specific issues, and audits.

Statute of limitations

Generally, the Commissioner of Taxation may amend an assessment within four years after the day of which an assessment is given to a company. Under the self-assessment system, an assessment is deemed to have been given to the company on the day on which it lodges its tax return. The four year time limit does not apply where the Commissioner is of the opinion there has been fraud or evasion, or to give effect to a decision on a review or appeal, or as a result of an objection made by the company, or pending a review or appeal.

Topics of focus for tax authorities

The ATO annually releases its compliance program that identifies issues that are attracting its attention, what it sees as risks for the upcoming year, and how it plans to respond to these risks. The following areas were identified in the *2011/12 Compliance Program*:

- For large businesses, a focus on good tax corporate governance, corporate restructures, mergers and acquisitions, capital gains of foreign residents, stapled group financing, blackhole expenditure, tax and capital losses, R&D claims, and implementation of the TOFA provisions.
- For small to medium enterprises, a focus on detection of basic non-compliance, such as omission of income and inappropriate access to small business concessions. Other risks subject to ongoing compliance activity include classification of items between revenue and capital account, access to company profits other than via dividends, overseas interests and international dealings, and arrangements involving trusts.

Significant developments

On 15 November 2011, the ‘*Budgetbegleitgesetz 2012*’ passed the Austrian parliament. This act includes numerous amendments having significant impact on the Austrian Income Tax Act and the Austrian Corporate Income Tax Act, such as the following:

- Further to a European Court of Justice (ECJ) decision, the deductibility of donations to organisations performing research and education activities was expanded to donations to foreign institutions with residence in the European Union/European Economic Area (EU/EEA) or third countries with which Austria has concluded an agreement on mutual assistance and collection of taxes. The requirement for deductibility is that the activities of the organisation are carried out mainly for the benefit of Austrian science or the Austrian economy. *See the Deductions section for more information.*

On 29 March 2012, the ‘*Stabilitätsgesetz 2012*’ was enacted, which resulted in several changes to the Austrian Income Tax Act and the Austrian Corporate Income Tax Act.

- One change relevant for corporations is the introduction of additional requirements for receiving a research and development (R&D) premium. *See the Deductions section for more information.*

In April 2012, the draft of a tax reform (‘*Abgabenänderungsgesetz 2012*’) was published. This draft is still subject to examination; however, it seems that there will not be any significant changes to the Austrian corporate tax system.

Taxes on corporate income

Basis of corporate income tax (Körperschaftsteuer)

Corporations (i.e. GmbH, AG) are subject to unlimited taxation in Austria of their entire (domestic and foreign) income if they have their legal seat or place of effective management in Austria. A non-Austrian corporate tax resident (with neither a legal seat nor place of effective management in Austria) is subject to limited taxation on certain sources of income in Austria.

Rates of corporate income tax (Körperschaftsteuer)

Due to the qualification of corporations as independent tax subjects, a distinction must always be made between tax ramifications at the level of the company and those at shareholder level. At the level of the company, profits are taxed at the standard corporate income tax (CIT) rate of 25%, regardless of whether profits are retained or distributed. At the shareholder level, the profit distributions are usually subject to withholding tax (WHT) of 25%.

There is also a minimum CIT, payable by companies in a tax-loss position. The minimum CIT amounts to 437.50 euros (EUR) for limited liability companies (GmbH) and EUR 875 for stock corporations (AG) for each full quarter of a year. To promote the formation of new companies, the minimum CIT is reduced to EUR 273 for the first four quarters. The minimum CIT can be carried forward without time limitation and be credited against future CIT burdens of the company.

Local income taxes

There is no additional local income tax levied at the company level.

Corporate residence

A corporation is resident in Austria for tax purposes if either it is registered in Austria (legal seat) or its place of effective management is located in Austria. The 'place of effective management' is located where the day-to-day management of the company is actually carried out and not where singular board decisions are formally made.

However, the definition of place of effective management under Austrian tax law does not significantly deviate from its definition under the Organisation for Economic Co-operation and Development (OECD) guidelines.

Permanent establishment (PE)

An Austrian PE is defined under Austrian tax law as a fixed establishment where a business is carried out, in particular:

- the place where the management is carried out
- plants, warehouses, purchase and sales establishments, and other establishments where an entrepreneur or one's permanent representative carries out one's business, or
- construction sites, which last for more than six months.

However, the definition of PE is different in some tax treaties. The Austrian tax authorities generally follow the commentary to the OECD model convention regarding the PE concept.

Other taxes

Value-added tax (VAT) (Mehrwertsteuer)

Generally, the Austrian VAT law is based on the 6th European Union (EU) VAT Directive. Under the Austrian VAT law, companies and individuals carrying out an active business on a permanent basis are qualified as entrepreneurs for VAT purposes. As entrepreneurs, they have to charge the supply of goods or services provided to their customers with Austrian VAT at a rate of 20%. A certain limited range of goods and services (such as food, books, passenger transportation, cultural events) is taxed at the reduced rate of 10%. Certain other transactions are exempted from Austrian VAT (e.g. export transactions).

Input VAT

Entrepreneurs are entitled to deduct Austrian input VAT insofar as the input VAT does not result from goods/services purchased which are directly linked to certain VAT exempt sales (e.g. interest income, insurance premium). However, certain transactions are exempt from Austrian VAT (e.g. export transactions) without limiting the ability of

Austria

the entrepreneur to deduct the related input VAT. To be entitled to deduct input VAT, the entrepreneur must obtain an invoice from one's supplier which fulfils certain formal requirements.

VAT filing and payment

Entrepreneurs have to file monthly or quarterly VAT returns by the 15th day of the second month following the month concerned or by the 15th day of the second month following the quarter concerned. The balance of the VAT due and the input VAT deducted has to be paid to the tax office (if VAT burden) or is refunded by the tax office (if in a net input VAT position) to the electronic tax account of the entrepreneur. A separate report has to be filed by the entrepreneur at the tax office showing the cross-border intra EU-transactions made.

Customs duties

Certain cross-border inbound movements of goods from non-EU countries trigger Austrian customs duty. The duty is levied according to the Austrian customs duty scheme, which is based on the EU-customs duty scheme. It defines the customs duty tariffs, dependent on the nature of the good.

Excise taxes

Excise taxes are imposed on certain products including petroleum (approximately EUR 40 to EUR 600 per 1,000 litres), tobacco products (13% to 47% of price), and alcoholic beverages (tax rate depends on type of alcohol).

Real estate tax

Local authorities annually levy real estate tax on all Austrian real estate property whether developed or not. The tax is levied on the assessed standard ratable value (*Einheitswert*) of immovable property. The assessed value is usually substantially lower than the market value. The effective tax rate depends on the intended use of the real estate and is calculated using a special multiplier.

Tax rates:

- Agricultural area and forestry
 - 1.6‰ for the first EUR 3,650 of the assessed standard ratable value.
 - 2‰ for the amount of the assessed standard ratable value exceeding EUR 3,650.
- Buildings and property are taxed at 2‰ of the assessed standard ratable value. This multiplier is reduced for:
 - Single family houses
 - to 0.5‰ for the first EUR 3,650 of the assessed standard ratable value and
 - to 1‰ for the next EUR 7,300.
 - Leasehold and shared property
 - to 1‰ for the first EUR 3,650 of the assessed standard ratable value and
 - to 1.5‰ for the next EUR 3,650.
 - All other property
 - to 1‰ for the first EUR 3,650 of the assessed standard ratable value.

After the assessed standard ratable value is multiplied by the relevant multiplier, the real estate tax is calculated by using a special municipal rate fixed by each municipality (maximum 500%). Finally, the tax amount is reduced by a general reduction of 25% as stated by law and increased by a 35% inflation adjustment.

Real estate transfer tax

Tax is levied at 3.5% on any transaction which causes a change in the ownership of Austrian real estate or in the person empowered to dispose of such property (e.g. direct owner). Real estate transfer tax is generally calculated on the basis of the acquisition price. However, in the case of corporate restructuring under the Reorganisation Tax Act and in case of real estate transfers free of consideration, the two-fold (in the case of the former) and the threefold (in the case of the latter) assessed standard ratable value for tax purposes is taken as the tax base.

Real estate transactions with a tax base of EUR 1,100 or below are exempt.

Note that an additional 1.1% registration fee (same tax base as real estate transfer tax) becomes due upon incorporation to the land register.

Capital transfer tax (*Gesellschaftsteuer*)

Capital transfer tax is imposed at a rate of 1% on the initial contribution of capital, other contractual or voluntary contributions in cash or in kind, and certain hybrid financing instruments to Austrian corporations. However, in many cases a taxable event for capital transfer tax purposes can be eliminated by careful structuring (e.g. contributions made by the indirect shareholder of an Austrian company (so called 'grandparent contributions') do not trigger capital transfer tax).

Stamp duty

Stamp duty is imposed in connection with certain legally predefined transactions for which a written contract has been established (e.g. lease contracts, bills of exchange, assignments of receivables). The Austrian administration's understanding of a 'written contract' is very broad and covers not only paper contracts but also contracts concluded by electronic means (e.g. electronically signed emails).

The stamp duty is triggered upon the establishment of a legal relationship if at least one Austrian party is contractually involved or, even if a contract is concluded between non-Austrian parties only, if the subject of the contract relates to Austria (e.g. lease contract on Austrian real estate). However, various possibilities are available for most legal transactions subject to stamp duty to structure them in a way without triggering stamp duties (e.g. setting up of contracts abroad, offer-acceptance procedure, usage of audio-tapes).

Loan and credit agreements are not subject to stamp duty.

The stamp duty rates for the most common legal transactions are as follows:

Legal transactions	Stamp duty (%)
Lease agreements	1.00
Certificates of bonds	1.00
Bill of exchange	0.13
Assignment of receivables	0.80

Payroll taxes

Payroll taxes are income taxes levied on employment income, withheld by the employer. A progressive tax rate is applied to the tax base, being the salary after deduction of allowances and various expenditures (e.g. social security contribution). The employer is legally obligated to withhold the payroll tax and liable to do so vis-a-vis the Austrian tax

Austria

authority. For more information, see *Other taxes in Austria's Individual summary* at www.pwc.com/taxsummaries.

Branch income

Austrian branches of foreign corporations are taxed in the same way as Austrian corporations, except that inter-company dividends received by Austrian branches of non-EU corporations are not tax exempt (see the *Income determination section*) and Austrian tax losses can be carried forward only if they exceed non-Austrian profits. Books and records generally can be kept abroad but must be brought to Austria in case of a tax audit (upon official request).

Income determination

Taxable income is determined based on statutory accounts under Austrian generally accepted accounting principles (GAAP) adjusted for certain deductions and additions prescribed by the tax law.

Inventory valuation

In general, inventories are valued at the lower of cost or market. If specific identification during stock movements is not possible, other methods, such as last in first out (LIFO) and first in first out (FIFO) are permitted when shown to be appropriate. Conformity between financial book keeping and tax reporting is required.

Capital gains/exit taxation/inbound transfer

Generally, capital gains (short and long-term) are part of the normal annual result of a corporation and therefore are taxed at the ordinary CIT rate (25%).

A special tax treatment applies to capital gains with respect to the exit of taxable assets. In the case of a transfer of assets which formed part of a business from Austria to a foreign country (e.g. allocation of assets to foreign branch), latent capital gains generally are taxed at the time of the transfer. However, if these assets are transferred to an EU member state, capital gains taxation can be postponed upon request until the assets are sold or transferred outside the European Union.

In case of an inbound transfer, generally, the fair market value of the assets is considered for Austrian income tax purposes (step up). Therefore, any hidden reserves accumulated abroad are not taxed in Austria.

Dividend income

Dividends received from an Austrian company at the corporate shareholder level are generally excluded from the tax base (no minimum stake, no minimum holding period). This tax exemption refers to domestic dividends only, not to capital gains or losses.

Additionally, dividends received from companies located within the European Union or from countries within the European Economy Area with which Austria has concluded a comprehensive agreement on mutual assistance regarding the exchange of information are also tax exempt if the foreign company is subject to a tax similar to the Austrian CIT and if the foreign CIT rate is not below 15%.

In cases where the dividends from foreign investments are taxable, foreign CIT can be credited against the Austrian CIT.

Portfolio dividends

Portfolio dividends (i.e. dividends from an investment below 10%) received from corporations located in member states of the European Union, as well as dividends from corporations which are located in those EEA countries with which Austria has concluded a comprehensive agreement on mutual assistance regarding the exchange of information, are generally exempt from CIT. However, under special circumstances, a switch-over to the credit method, as outlined under *International participation exemption for dividends and capital gains below*, has to be considered.

In the past, the exemption of portfolio dividends applied to dividends from EU/EEA countries only, but not to those from third countries. According to a decision of the ECJ of February 2011 (C-436/08 and C-437/08, Haribo/Salinen), the limitation of the exemption to portfolio dividends received from countries within the EU/EEA is contrary to EU law. Therefore, an extension of the exemption to portfolio dividends from third countries with which Austria has concluded a comprehensive agreement on mutual assistance regarding the exchange of information was implemented for the fiscal years from 2011 onwards in the course of the 'AbgÄG 2011'. For fiscal years before 2011, the credit method has to be applied.

Stock dividends

A conversion from revenue reserves (retained earnings) to capital by a company does not lead to taxable income for the shareholder (but triggers 1% capital transfer tax). However, capital reductions are treated as taxable income if within ten years prior to the capital reduction the above-mentioned increase in capital was repaid to the shareholder. Otherwise, they are tax exempt.

International participation exemption for dividends and capital gains

Dividends received from a foreign company are also tax exempt at the corporate shareholder level if the Austrian company holds at least 10% of the issued share capital for a minimum holding period of one year (international participation exemption). Furthermore, both capital gains and capital losses derived from shares qualifying for the international participation exemption are tax neutral. This means a deduction of capital losses is no longer available. However, the parent company can exercise an (irrevocable) option for each single participation acquired to treat both capital gains and capital losses as taxable (spread of losses and depreciations over a period of seven years). The option refers to capital gains (losses) only and does not affect the tax treatment of ongoing dividend distributions.

In the case of presumed tax abuse, the participation exemption for dividends and capital gains is replaced by a tax credit (switch-over-clause). The credit system is applied if the foreign subsidiary does not meet an active-trade-or-business test (i.e. passive income from royalties, interest, etc. is greater than 50% of total income of subsidiary) and is not subject to an effective foreign minimum CIT rate of more than 15%. The domestic and foreign participation exemptions are available to Austrian resident corporations and to Austrian branches of EU corporations only, but not to Austrian branches of non-EU corporations.

Interest income

Interest income is taxed at the general CIT rate of 25%.

Rental income

Rental income is treated as normal business income.

Austria

Foreign income

Austrian resident corporations are taxed on their worldwide income. If a double taxation treaty (DTT) is in force, double taxation is mitigated either through an exemption or by granting a tax credit equal to the foreign WHT at the maximum (capped with the Austrian CIT incurred on the foreign source income). If foreign WHT cannot be credited at the level of the Austrian corporation (e.g. due to a loss position), Austrian tax law does not allow to carry forward the foreign WHT to future assessment periods. However, if the source of the income is a non-treaty country, exemption or a tax credit shall be available based on unilateral relief (representing a discretionary decision of the Austrian Ministry of Finance only but no legal entitlement for the applicant). Austrian tax law does not provide for a deferral of taxes on foreign income. Special rules for taxing undistributed income of foreign subsidiaries are applicable only to foreign investment funds.

Please note that Austrian Tax Law does not define special controlled foreign company (CFC) rules. However, under certain circumstances, the Austrian tax administration, under a substance over form approach, taxes passive income of foreign subsidiaries of Austrian companies located in low tax jurisdictions (*see switch-over-clause under International participation exemption for dividends and capital gains above*).

Deductions

Depreciation and amortisation

Only the straightline method is accepted for tax purposes, whereby the cost is evenly spread over the useful life of an asset. For certain assets, depreciation rates relevant for tax purposes are prescribed by the tax law and shown in the following chart:

Assets	Depreciation rate (%)
Buildings (industrial use)	3.0
Buildings (banking, insurance)	2.5
Other buildings	2.0
Automobiles	12.5

Tax depreciation is not required to conform to financial depreciation under Austrian GAAP. If depreciated property is sold, the difference between tax value and sale proceeds is taxed as a profit or loss in the year of sale.

Trademarks are usually amortised over 15 years. Other intangibles have to be amortised over their useful lives.

Goodwill

Goodwill arising in the course of an asset deal for tax purposes must be amortised over 15 years. Goodwill arising in the course of a share deal can be amortised only if the acquired company is included in a tax group (*see the Group taxation section*). Goodwill arising as a result of a corporate merger cannot be amortised.

Organisational and start-up expenses

Generally, organisational and start-up expenses are tax deductible.

Interest expenses

Interest payments (also inter-company) are generally tax deductible if they meet the general arm's-length requirements. See *Thin capitalisation in the Group taxation section* for more information.

Financing costs

According to current tax law, interest expenses resulting from the debt financed acquisition of shares are usually tax deductible. This is so even if the Austrian participation exemption regime applies (see the *Income determination section*).

As of 2011, interest expenses relating to the debt-financed acquisition of shares from related parties or (directly or indirectly) controlling shareholders are generally non-deductible. This disallowance of interest also applies in circumstances where the shareholder acquiring the shares has been funded by a debt-financed equity contribution (insofar as the equity contribution was made in direct connection with the share acquisition). Interest expenses resulting from intra-group share acquisitions conducted prior to 1 January 2011 are also covered by the new regulation. The deductibility of interest expenses incurred in connection with the debt-financed acquisition of shares from a third party is not impacted.

Other financing costs (e.g. fees, legal advice) directly related to tax exempt dividend income are not deductible. However, foreign exchange expenses or profits accumulated in connection with the financing of tax exempted international participations are treated as a deductible or taxable (respectively) item.

Accrued expenses

Certain accruals (such as provisions for liabilities and impending losses) running for more than 12 months as of the closing date of the accounts are accepted for tax purposes at 80% of their value only. Exempted from this reduction are provisions for personnel benefits (severance payments, pensions, vacations, and anniversary awards) for which specific reduction and computation methods have been provided and provisions that were already calculated by discounting a future obligation.

In general, lump-sum accruals and accruals for deferred repairs and maintenance are not allowed for tax purposes.

Bad debt

Valuation allowances for bad debts are, in principle, deductible for tax purposes, unless they are calculated on a lump-sum basis. In case of intercompany receivables, appropriate documentation regarding the compliance with the arm's-length principle is required.

Charitable contributions

Donations to certain charitable institutions are generally tax deductible, up to a limit of 10% of the prior year's profit.

Furthermore, donations to certain public Austrian institutions, such as universities, art colleges, or the academy of science, and to non-profit organisations performing research and educational activities mainly for the benefit of the Austrian science or economy may also be deducted as operating expenses, up to the limit of 10% of the prior year's profit. Further to a decision of the ECJ (C-10/10, issued in June 2011), the limitation of the privilege to Austrian institutions is contrary to EU law. As a result, in the course of the '*Budgetbegleitgesetz 2012*', the deductibility of donations was expanded to donations granted to foreign institutions with residence in the EU/EEA or

Austria

third countries with which Austria has concluded an agreement on mutual assistance regarding the exchange of information. The requirement for deductibility is that the activities of the organisation are carried out mainly for the benefit of Austrian science or the Austrian economy.

Meals and entertainment

The deductibility of costs for business lunches generally is limited to 50% of actual expenses incurred (provided the business lunch had the purpose of acquiring new business).

The deductibility of entertainment expenses is restricted to advertising expenses.

Payment to directors

Payments to a member of the supervisory board (*Aufsichtsrat*) are tax deductible up to a limit of 50%. Payments to members of the executive (managing) board are tax deductible without special limitation.

Fines and penalties

Fines and penalties are generally not tax deductible.

Taxes

Austrian and foreign taxes on income and other personal taxes, as well as VAT insofar as it relates to non-deductible expenditures, are non-deductible. Other taxes, such as payroll or capital transfer taxes, are deductible.

Net operating losses

Tax losses can be carried forward without any time limit. However, tax loss carryforwards generally can be offset against taxable income only up to a maximum of 75% of the taxable income for any given year. Some exceptions apply (e.g. in connection with tax groups or in the case of liquidations), allowing a company to charge tax loss carryforwards available against 100% of annual taxable income.

The Austrian tax law does not provide for a carryback of tax losses.

Loss-trafficking (Mantelkauf)

Tax loss carryforwards may be lost in the case of a share deal being classified as loss-trafficking (so called '*Mantelkauf*') or in the course of a legal restructuring leading to similar results.

Under Austrian tax law, a share deal against compensation is classified as a *Mantelkauf*, if, from a substance over form perspective, the 'economic identity' of a company is changed due to the transaction. The change of economic identity of a company is realised if all of the following structural changes are made to the acquired Austrian company having the tax loss carryforwards available:

- Change of shareholder structure.
- Change of the organisational structure.
- Change of the business structure.

All three conditions cumulatively have to be met. There is no exact time period defined within which they have to be met; however, meeting them within one year after the share transfer usually is regarded as a strong indication for a *Mantelkauf*.

Payments to foreign affiliates

Generally, there are no restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided they are at arm's length (which should be appropriately documented by agreements, contracts, calculation sheets, etc.). Payments to affiliated companies not meeting arm's-length standards are treated as a hidden distribution of earnings (i.e. they are not tax deductible, and WHT is usually triggered at source). See *Transfer pricing in the Group taxation section for more information*.

Note that the domestic implementation of the EU Interest Royalty Directive which abolishes WHT on cross-border payments of interest and license fees (regardless of whether taken out by deduction or by assessment) between affiliated companies in the member states should be considered.

Group taxation

Two or more companies can form a tax group, provided the parent company directly or indirectly owns more than 50% of the shares in the subsidiaries. The tax group also can include foreign group members. If a group member withdraws from the group within a minimum commitment-period of three years, all tax effects derived from its group membership must be reversed.

Within a tax group, all of the taxable results (profit and loss) of the domestic group members are attributed to their respective group parent. From foreign tax group members, tax losses in the proportion of the shareholding quota are attributed to the tax group parent. The foreign tax loss has to be calculated in accordance with Austrian tax law. However, it is capped with the amount actually suffered based on foreign tax law. Foreign tax losses utilised by the Austrian tax group parent are subject to recapture taxation at the time they are utilised by the tax group member in the source state, or in the moment the group member withdraws from the Austrian tax group. Under the recapture taxation scheme, the Austrian tax group has to increase its Austrian tax base by the amount of foreign tax losses used in prior periods.

For the purpose of the application of the recapture taxation scheme, a withdrawal from the tax group is also assumed if the foreign group member significantly reduces the size of its business (compared to the size of the business at the time the losses arose). Reduction of size is measured on the basis of business parameters such as turnover, assets, balance sheet totals, and employees, while the importance of the respective criteria depends on the nature of the particular business.

Goodwill arising in the course of a share deal (acquisition of an active business company from a third party contractor) must be amortised over 15 years, provided that the acquired company is included in a tax group.

Write-downs of participations in tax group members are not tax deductible.

Transfer pricing

Under Austrian Tax Law, there are no explicit transfer pricing regulations available defining in detail the local requirements with regards to arm's length, the documentation standards required, penalties, etc. In general, Austria applies the OECD transfer pricing guidelines referring to the OECD model tax convention. Furthermore, Austrian transfer pricing guidelines were recently issued by Austrian tax authorities. The guidelines represent the Austrian authority's understanding of

Austria

intercompany business relationships with regards to their arm's-length classification and are based on the OECD transfer pricing guidelines.

According to these guidelines, all business transactions between affiliated companies must be carried out under consideration of the arm's-length principle. Where a legal transaction is deemed not to correspond to arm's-length principles, the transaction price is adjusted for CIT purposes. Such an adjustment constitutes either a constructive dividend or a capital contribution. Currently, there is the option of applying for a non-binding ruling of the tax authorities. Additionally, a reform of the Austrian CIT Act was recently enacted, which contains the introduction of an advanced ruling opportunity. With the implementation of this new regulation, binding information in the fields of transfer pricing, group taxation, and mergers and acquisitions (M&A) can be requested from the Austrian tax authorities against payment of an administrative fee (the fee rate depends on the size of the applicant's business). The advanced ruling opportunity is applicable as of the 2011 fiscal year.

Thin capitalisation

There are no explicit tax regulations available under Austrian tax law stipulating the minimum equity required by a company ('thin capitalisation rules'). Basically, group financing has to comply with general arm's length requirements. Therefore, an Austrian group entity being financed by an affiliated entity must be able to document that it would have been able to obtain funds from third party creditors under the same conditions as from an affiliated financing entity. Therefore, the appropriate ratio between an Austrian company's equity and debt will mainly depend on the individual situation of the company (profit expectations, market conditions, etc.) and its industry. Nonetheless, the fiscal authorities in administrative practice (i.e. no 'safe-harbour' rule) tend to accept a debt-equity ratio of approximately 3:1 to 4:1. However, the debt-equity ratio accepted by tax authorities also strongly depends on the average ratio relevant for the respective industry sector. If in intercompany loan for tax purposes is not accepted as debt, it is reclassified into hidden equity and related interest payments into (non-deductible) dividend distributions.

Furthermore, under Austrian commercial law (for companies subject to statutory audits), a minimum equity ratio of 8% is claimed. If the equity ratio of the company falls below 8% and its earning power (virtual period for debt redemption) at the same time does not meet certain requirements, a formal and public reorganisation process will have to be initiated.

Tax credits and incentives

Foreign tax credit (matching credit)

Generally, foreign WHT can be credited against Austrian CIT (*see Foreign income in the Income determination section*). In special cases (e.g. Brazil, China, Korea), the DTT provides for a matching credit, which allows the credit of a pre-defined amount which exceeds the actually paid foreign WHT.

Research and development (R&D) incentives

R&D costs are fully deductible at the time they accrue. An R&D premium of 10% (i.e. R&D expenses x 10% = tax refund) may be claimed for R&D activities performed in Austria.

As a result of the 'Stabilitätsgesetz 2012', an expert report (issued by an Austrian research promotion organisation) is required in order to receive the R&D premium of 10%.

The R&D premium is also available in case of contract R&D; however, R&D incentives cannot be claimed by both principal and agent. In case of contract R&D, the privileged R&D costs are capped at EUR 1 million per year.

Employment incentives

A tax bonus payment of 6% or, alternatively, an allowance of 20% can be claimed for expenditures in connection with the training of employees. These incentives can be claimed for external training expenditures and for in-house training expenditures, provided that there is a dedicated in-house training department (for in-house training expenditures, only the allowance can be applied for).

A premium scheme for apprenticeships is available and based on the amount of actual wage as set out in the applicable collective contract. It provides tax free subsidies, depending on the duration of the apprentice's employment.

Investment incentives

For investment in certain regions, government grants and subsidies are available and are generally individually negotiated.

Withholding taxes

Dividend WHT

Under Austrian domestic law, there is generally a 25% WHT on dividends (profit distributions) paid to a foreign parent company. The WHT has to be deducted and forwarded by the Austrian subsidiary to the tax office.

To end up with the reduced WHT rate as defined under the DTT applicable, Austrian tax law provides for the following alternative methods of WHT relief: refund method or exemption at source method.

Refund method

The Austrian subsidiary generally has to withhold 25% WHT on profit distributions to the foreign parent company, and the parent company has to apply for a refund (of the difference between 25% WHT and the lower DTT rate). In the course of the refund process, the Austrian tax administration analyses whether the foreign shareholder can be qualified as beneficial owner of the dividends paid. If the refund is approved by the Austrian tax authority, dividend distributions within the following three years can be done without deduction of WHT (for distributions of a comparable size and provided the foreign holding structure did not change in the meantime).

Exemption at source method

Relief at the source is available only if the direct parent company issues a written declaration confirming that it is an 'active' company carrying out an active business that goes beyond the level of pure asset management (holding activities, group financing, etc.) and has its own employees and office space at its disposal (substance requirements).

Austria

WHT on dividends paid to EU companies

With regard to dividends paid to EU resident corporate shareholders, Austria has implemented the EU Parent/Subsidiary Directive according to which domestic WHT is reduced to zero. The requirements for the reduction are that the EU resident parent company, which also has to meet the substance requirements mentioned above (see *Exemption at source method*) at the moment of the dividend distribution, must directly own at least 10% of the share capital of the Austrian subsidiary for a period of at least one year. In case of foreign EU shareholders being qualified as pure holding companies, the Austrian tax administration does not allow an exemption at source but claims the application of the refund method.

Provided the requirements according to the EU Parent/Subsidiary Directive are not met, Austrian WHT has to be deducted. If an EU parent company cannot credit the Austrian WHT deducted against the CIT of its resident state (e.g. because the foreign dividend income is exempted from the CIT or due to a loss position of the shareholder), it is entitled to apply for a refund of the Austrian WHT. This application has to include a confirmation/documentation that the Austrian WHT could (fully or partly) not be credited at the level of the parent company.

Repayment of equity

The tax wise equity of a company has to be annually reported to the Austrian tax authority as part of the CIT return (so called '*Evidenzkonto*'). This equity can be repaid to the domestic or foreign shareholders without triggering Austrian WHT. However, the tax wise classification of a dividend as 'capital repayment' has to be shown in the shareholder resolution about the distribution.

Interest WHT

Interest payments to non-resident companies are not subject to WHT (provided no Austrian real estate property is used as security).

Royalties WHT

On royalties paid to a non-resident company, Austrian WHT at a rate of 20% has to be deducted. This tax rate can be reduced under an applicable DTT or under the application of the EU Interest Royalty Directive which was implemented in Austrian Tax Law.

Tax treaties

The following table lists the countries with which Austria has signed a DTT and provides details of the amount of Austrian WHT.

Recipient	WHT (%)

Notes

1. Dividend distributions attributable to a prior release of paid-in surplus or other shareholder contributions (classified as capital reserves) are deemed to be a repayment of capital, i.e. no WHT is incurred. At the shareholder's level, dividends received and those classified as contribution refund will reduce the tax basis assessment for investments. To the extent to which the tax basis would become negative, such dividends are treated as taxable income (unless taxation is eliminated by a tax treaty).
2. Under certain treaties, the amount of the WHT is dependent on the extent of the proportion of issued share capital held by the recipient. Where this is the case, all rates are given. Those marked with + refer to an investment of 10%, ++ to 15%, those marked with +++ refer to an investment of 20%, those marked with * refer to an investment of 25%, those marked with ** refer to an investment of 50%, and those marked with *** refer to an investment of 70%.
3. Interest on cash deposits in euro or foreign currency in bank accounts and fixed interest bearing securities in foreign currency (issued after 31 December 1988) and on fixed interest bearing securities denominated in Austrian Schillings or EUR (issued after 31 December 1983) are subject to a 25% WHT. If the recipient is an individual, this WHT is final (no further income taxation and inheritance taxation). Companies receiving interest payments may obtain an exemption from WHT if they provide the bank or other custodial agent with a written confirmation from the recipient that such interest payments constitute a part of the recipient's operating revenues (exemption statement). Interest payments to non-residents without a PE in Austria are generally not subject to WHT. At interest payments between affiliated companies, the regulations stipulated by the EU interest directive have to be taken into consideration.
4. In case of payments to countries marked with **, the rate is 0% unless more than 50% of the issued share capital of the company paying the royalties is held by the recipient, in which case the rate given applies. At royalty payments between affiliated companies, the regulations stipulated by the EU interest directive have to be taken into consideration.
5. If the recipient holds a participation of less than 10% in the distributing company, the dividends are subject to a 25% WHT. Since dividends distributed by an Austrian corporation to another Austrian corporation are generally not subject to taxation, the WHT is credited against CIT upon assessment of the recipient corporation for the respective tax year.
6. WHT on dividends from Austrian companies is final, i.e. no further income tax is collected from the recipient (provided it is an individual).
7. The treaty was signed on 14 December 2007 and entered into force on 1 September 2008. It is applicable as of the beginning of fiscal year 2009.
8. The treaty was recalled by Argentina in 2009. Austrian tax citizens are protected by section (§) 48 BAO (*Bundesabgabenordnung* (Austrian Fiscal Federal Code)) against double taxation. Austria will try to enter into new negotiations with Argentina.
9. 5% for shares of at least 25% and worth at a minimum of 250,000 United States dollars (USD); 10% for shares of at least 25% and worth at least USD 100,000; 15% in all other cases.
10. 5% for industrial licences and know-how not more than three years old; 10% in all other cases.
11. The treaty entered into force on 17 February 2011 and is applicable as of the beginning of fiscal year 2011.
12. The treaty entered into force on 1 April 2007 and is applicable as of the beginning of fiscal year 2008.
13. The treaty entered into force on 1 January 2012 and is applicable as of the beginning of fiscal year 2012.
14. 10% for copyright licence fees in connection with literature, science, and art; 25% for trademarks licence fees; 15% in all other cases.
15. The new treaty has entered into force on 3 February 2011 and is applicable as of the beginning of fiscal year 2011.
16. 6% for industrial, commercial, or scientific equipment; 10% in all other cases.
17. The treaty entered into force on 22 March 2007 and is applicable as of the beginning of fiscal year 2008.
18. 5% for licence income from copyrights, brands, plans, secret formulas or procedures, computer software, industrial, commercial or scientific use of equipment, and information.
19. 0% for copyright royalties in connection with the production of literary, dramatic, musical, or artistic work; 5% in all other cases.
20. The new treaty was signed on 25 May 2007 and entered into force on 27 March 2008. It is applicable as of the beginning of fiscal year 2009.
21. 20% for films.
22. 5% for leasing of mobile goods, and 10% for other licences.
23. 0% for shares of at least 50% and worth at a minimum of EUR 2,000,000; 5% for shares of at least 10% and worth at least EUR 100,000; 10% for shares in all other cases.
24. The treaty entered into force on 1 April 2009 and is applicable as of the beginning of fiscal year 2010.
25. The treaty entered into force on 1 January 2011 and will be applicable as of the beginning of fiscal year 2012 (Austria: 1 January 2012, Hong Kong: 1 April 2012).
26. 2% for licence income from industrial, commercial, or scientific use, and 10% for other licences.
27. The treaty entered into force on 16 May 2007 and is applicable as of the beginning of fiscal year of 2008.
28. 5% for the use of commercial or scientific equipment; 10% in all other cases.
29. The treaty was signed on 16 September 2010. It has not yet been decided when it will enter into force.

Austria

30. 5% in case of direct (or indirect over a patent-realisation-company) payments of royalties by companies of the other member state (with an industrial establishment in the other member state), and 10% for other licences.
31. 5% in case of licence income from industrial, commercial, or scientific use, and 10% for other licences.
32. 15% for films.
33. 0% for copyright licence fees in connection with literature, art, and scientific use, and 10% for other licences.
34. The treaty was signed on 7 September 2007 and entered into force on 20 January 2008. It is applicable as of the beginning of fiscal year 2008.
35. 10% for the right of use of copyrights to artistic, scientific, or literary as well as cinematographic works, and 5% for other licences.
36. The new treaty was signed on 13 September 2006 and entered into force on 13 November 2006. It was applicable as of the beginning of fiscal year 2007.
37. The treaty was signed on 21 September 2006 and entered into force on 1 December 2007. It is applicable as of the beginning of fiscal year 2008.
38. The treaty entered into force on 1 June 2007 and is applicable as of the beginning of fiscal year 2008.
39. For Portugal, the rate of WHT is 5%, but 10% if more than 50% of the issued share capital is owned by the recipient.
40. 5% if capital share amounts to at least 10% and worth at least USD 100,000; 15% in all other cases.
41. The treaty applies to Tajikistan and Turkmenistan. With Russia, a new treaty has been ratified.
42. The treaty entered into force on 1 June 2007 and is applicable as of the beginning of fiscal year 2008.
43. The treaty entered into force on 17 December 2010 and is applicable as of the beginning of fiscal year 2011.
44. 5% for copyright licence fees; 10% for other licences.
45. Until a new treaty will be established, the treaty with Czechoslovakia remains applicable.
46. For dividend distributions retroactive as of 1 January 2000.
47. The treaty was signed on 3 March 2009. It has not yet been decided when it will enter into force.
48. 15% for films.
49. The new treaty was signed on 28 March 2008 and entered into force on 1 October 2009. It is applicable as of the beginning of fiscal year 2010.
50. 10% for films.
51. The treaty entered into force on 17 March 2007 and is applicable as of the beginning of fiscal year of 2008.
52. The new treaty was signed on 2 June 2008 and entered into force on 1 January 2010. It is applicable as of the beginning of fiscal year 2011.
53. 7.5% for fees for technical services; 10% for royalties.
54. The treaty entered into force on 7 March 2012 and is applicable as of the beginning of fiscal year of 2013.
55. The treaty was signed on 7 June 2011 and will not enter into force before 1 January 2013.

Tax administration

Taxable period

The standard tax assessment period in Austria is the calendar year. However, a company's financial year may deviate. When the tax and financial years deviate, the tax assessments for a year are based on the profits derived in the financial year(s) ending in the respective calendar year (e.g. if tax year is 1 June 2012 to 31 May 2013, then assessment is financial year 2013).

Tax returns

Generally, the CIT return has to be submitted electronically by 30 June of the calendar year following the year in which the fiscal year of the company ends. However, if the company is represented by an Austrian certified tax advisor, the tax return can be submitted by 31 March of the second following year at the latest (if the company will not be formally requested by the tax office to file it earlier). If the end of a tax year is 31 May 2012 for example, filing deadline is 30 June 2013 (without tax advisor) or 31 March 2014 (with tax advisor).

Electronic filing of annual CIT returns

The annual CIT return (as well as the annual VAT return) has to be filed by electronic means. In the case of a company that cannot reasonably be expected to file tax returns

electronically due to the lack of technical prerequisites, filing of the tax return is allowed to be done via pre-printed forms.

Payment of tax

CIT is prepaid in quarterly instalments during the calendar year, with a final settlement subsequent to the annual assessment. Prepayments of CIT generally are based on the most recently assessed tax year's tax burden (unless the taxpayer can show that its tax charge for the current year will be lower).

The difference between CIT as per the final assessment and the prepayments made is interest bearing from 1 October of the year subsequent to the year when the tax claim arose up to the date when the assessment is released (late payment interest). Interest at a rate of currently 2.38% is applied to underpayments (as well as overpayments) of tax.

Tax audits

Tax audits usually cover CIT, VAT and WHT. Separate audits are carried out in connection with payroll taxes and social security contributions.

In general, companies are audited every three to four years. The audit period usually covers three to four fiscal years, so generally each fiscal year is audited.

The duration of a tax audit depends on the number of years covered and on the complexity of topics (usually between 0.5 and 1.5 years). These topics usually cover ongoing compliance such as tax returns. Specific topics vary from company to company and can involve, for instance,:

- Business restructurings (applicability of Austrian reorganisation tax act, transfer of intangibles, etc.).
- Tax groups (all group members are audited together).
- WHT on dividends, licences, etc.
- Compliance with arm's-length principle in case of group transactions (tax auditors recently tend to focus on transfer pricing issues).

Statute of limitations

The right to assess CIT is subject to a general limitation period of five years after the end of the calendar year in which the fiscal year ends. Additionally, the limitation period can be extended for another two years in cases where certain interruptive events (e.g. tax audit, tax assessment) take place within the general limitation period.

The maximum limitation period in the case of tax evasion is ten years.

In certain cases, the maximum limitation period can be extended to 15 years.

Other issues

Choice of business entity

The most important types of companies in Austria are the limited liability corporation (GmbH), and the joint stock corporation (AG). Foreign investors generally choose the GmbH since it provides a higher degree of corporate law control and allows for lower equity provision.

Austria

As a legal entity, the GmbH exists upon registration with the Companies' Register. The application for registration must contain the notarised signatures of all managing directors. The articles of association must be drawn up in the form of a notarial deed (written document executed by a public notary) and must, as minimum requirements, include the name of the company as well as its seat, the business purpose, the amount of registered capital, and the capital contribution of each of the various owners.

A GmbH's minimum registered capital amount is EUR 35,000. Generally, one half of the registered capital must be raised in cash while the remainder may be contributed in the form of assets (contributions in kind). Of the original capital contribution, 25%, or at least EUR 17,500, must actually be paid in upon incorporation. Under certain conditions, the capital can be provided exclusively in the form of assets (incorporation in kind, in this case the contribution is subject to an audit verifying the market value of the assets contributed). The articles of association may provide for additional capital contributions payable by the owners on the basis of a resolution adopted by the shareholder meeting.

The minimum share capital of an AG is EUR 70,000. For an AG, the same payment regulations apply as for a GmbH, but the owners can agree upon a further capital contribution going beyond the nominal value of the shares (premium). The premium is shown on the company's balance sheet as a capital reserve.

Since 2004, the company type *Societas Europaea* (SE) can be chosen in Austria. The SE is a stock corporation based on community law. The advantages of this legal form are the simplification of organisational structures (in particular for international groups) and the possibility of cross-border transfers of corporation seats without loss of the legal identity. The SE allows the choice of a business location under an economic point of view as well as the choice of the most favourable legislation. The minimum share capital required for the incorporation of a SE is EUR 120,000 while the statutory seat of the corporation must be located in the same country where the place of management is located in.

Restructuring measures (M&A from a business perspective)

Transfers of assets and undertakings can be realised with retroactive effect and be tax neutral within the framework of the Austrian Reorganisation Tax Act.

The legislation administers the following areas (Article I-VI):

- Mergers (within EU also cross border) of corporations.
- Special conversion (from corporations to partnerships).
- Contribution of businesses and exchange of shares.
- Merger of partnerships.
- Demerger of partnerships.
- Demerger of corporations.

If the reorganisation qualifies for the application of the Austrian Reorganisation Tax Act, the reorganisation steps are realised tax neutrally and with a retroactive effect as of the reorganisation due date. Existing tax loss carryforwards can be transferred under certain conditions as well. Furthermore, several other tax privileges are granted under the Reorganisation Tax Act for stamp duties, capital transfer tax, etc.

Significant developments

There have been no significant corporate tax developments in Azerbaijan during the past year.

Taxes on corporate income

In Azerbaijan, resident taxpayers are subject to a profit tax on their worldwide income. A non-resident enterprise operating in Azerbaijan through a permanent establishment (PE) must pay tax on the gross income generated from Azerbaijan sources, less any related deductions attributable to the PE. Gross income of a non-resident enterprise generated from Azerbaijan sources and not connected with a PE will be taxed at the source of payment without any deductions allowed for expenses.

Taxable profits are defined to be the difference between a taxpayer's gross income and deductible expenses.

Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempted under the law.

Deductible expenses encompass all properly documented expenses that are incurred in the furtherance of a taxpayer's business activities.

Domestic enterprises and PEs of non-residents are subject to profit tax at the flat rate of 20%.

Simplified tax system

The Tax Code stipulates payment of taxes based on a simplified system for enterprises not registered as value-added tax (VAT) payers and whose annual gross revenue is less than 150,000 Azerbaijani manats (AZN), except for enterprises producing excisable goods, credit and insurance organisations, and investment funds and professional participants in the securities market. The simplified tax is imposed on gross revenue at a rate of 4% in Baku and at a rate of 2% in other regions of Azerbaijan. A special rate of simplified tax is set for enterprises involved in residential construction at a fixed amount of AZN 10 per square metre plus an applied co-efficient, which is determined by regional executive authorities.

Other special corporate tax regimes

There are other tax regimes applicable under special agreements concluded between the Azerbaijan government and foreign oil companies: production sharing agreements (PSAs) and host government agreements (HGAs). The PSA and HGA regimes apply to all enterprises involved in these agreements, including foreign oil companies

Azerbaijan

functioning as contractors and foreign service companies providing services to the contractor or the operating company.

Currently, there are 31 signed and ratified PSAs and two HGAs, each with its own separate tax regime. Each PSA and HGA contains a tax article that outlines the tax regime for that particular agreement. While there are several similarities with respect to tax terms in the various PSAs, there are some differences, other than merely differing tax rates (e.g. taxation of foreign subcontractors) or reporting requirements. Additionally, tax protocols for each PSA and HGA, which provide specific guidance regarding the procedures for payment of taxes and filing of reports, are negotiated with the Ministry of Taxes and other executive authorities.

Local income taxes

Local income taxes are paid only by companies and organisations that are in the property of municipalities. Tax rates do not exceed 20% for profit taxpayers and 4% for simplified taxpayers.

Corporate residence

A resident enterprise is any legal entity established in accordance with the legislation of Azerbaijan and performing entrepreneurial activity or any entity that is managed in Azerbaijan.

Permanent establishment (PE)

A PE of a foreign legal entity is subject to taxation with respect to the income attributable to such PE. A PE is an establishment of a foreign legal entity, through which it fully or partially performs commercial activities (for these purposes, a PE may be considered a management unit, office bureau, agency, construction site, etc.) for more than 90 cumulative days within any 12-month period. Activities of auxiliary or preparatory nature (e.g. exclusively storing or exhibiting goods or products belonging to a non-resident, purchasing goods, collecting data by a non-resident enterprise for its own purposes) do not create a PE.

Other taxes

Value-added tax (VAT)

VAT is levied on the supply of goods and services, and on the import of goods.

VAT rates

The standard rate of VAT is 18%.

Zero rating applies to the following:

- Exportation of goods and services.
- Importation under the PSA and HGA regimes.
- Importation of goods, the supply of goods, and the implementation of works and provision of services to grant recipients on the expense of financial aid (grants) received from abroad.
- International and transit cargo and passenger transportation, as well as the supply of works and services directly connected with international and transit flights.
- The supply of gold and other valuables to the National Bank of Azerbaijan.

Taxable persons

Any person who is, or is to be, registered as a VAT payer is regarded as a taxable person.

Companies are required to register for VAT if their taxable income exceeds AZN 150,000 for the previous 12 months.

Taxable amount

The taxable base is established by starting with the value of the goods and services without adding the VAT amount, but including any customs duty and excise duty, if applicable.

The value of taxable imports consists of the value of the goods determined in accordance with the customs legislation and taxes and duties (other than VAT) to be paid upon importation to Azerbaijan.

The amount of VAT to be paid is the difference between the amount of VAT received on taxable supplies of goods and services and VAT paid on the purchase of goods and services necessary to generate taxable supplies of goods and services.

The Cabinet of Ministers can grant exemptions for the import of goods and equipment used for production purposes or to provide advanced technology know-how. Such exemptions are granted for a specific period and in a specific area, and can only be granted if it is impossible to satisfy the respective needs from local resources.

Customs duties

In 2011, a new Customs Code was adopted effective from 1 January 2012.

The Customs Code sets out the rules governing all aspects of the regime, including:

- The establishment of bonded warehouses and duty-free zones.
- Temporary imports and the processing of foreign goods in Azerbaijan.
- The procedures for the re-import and re-export of goods.

Azerbaijan has adopted the internationally accepted classification system for goods. The valuation procedures for customs purposes are to be determined in line with the general principles of the World Trade Organization (WTO).

The rates of customs duties are contained in the list of customs duties for the goods to be imported to Azerbaijan. These rates vary between 0% and 15%, depending on the type of goods.

Full or partial relief from the duty on temporary imports (generally, for a period of up to one year) is also available.

Under the PSA regime, contractors, their agents, and subcontractors are entitled to import and re-export from Azerbaijan, free from any import duties and restrictions, goods used for hydrocarbon activities.

Excise duty

Excise duties are imposed on tobacco products, alcoholic beverages, light vehicles, leisure and sports yachts, petroleum, and lubricants.

Azerbaijan

Taxable persons

Excise duties are paid by companies and organisations, including companies with foreign investment, as well as branches, divisions, and other independent subdivisions of companies in Azerbaijan that render services and sell self-produced goods.

Taxable operations

The following operations are subject to excise duties:

- Release of excise goods produced in Azerbaijan outside the premises of the building in which they were produced.
- Import of excise goods pursuant to the customs legislation of Azerbaijan.

Tax rates

The relevant executive authority shall determine rates of excise tax for excise goods imported into Azerbaijan (with exception of light vehicles, leisure and sports yachts, and other floating transports stipulated for these purposes).

The following excise rates apply for the following items:

- Food alcohol (including ethyl alcohol non-denatured with alcohol content of not less than 80%; ethyl alcohol non-denatured with alcohol content of less than 80%): AZN 0.8 per litre.
- Vodka, strong drinks and strong beverage materials, liqueurs, and liqueur products: AZN 0.5 per litre.
- Cognac and cognac products: AZN 0.2 per litre.
- Sparkling wines: AZN 0.2 per litre.
- Wine and vineyard materials: AZN 0.1 per litre.
- Beer (with the exception of non-alcoholic beer) and other beverages containing beer: AZN 0.08 per litre.
- All types of tobacco products: 12.5%.

Excise rates on petroleum materials, light vehicles, leisure and sports yachts and other floating transports stipulated for these purposes produced in the Azerbaijan Republic shall be established by the relevant executive authority.

Property tax

Property tax is levied on both movable and immovable tangible assets owned by individuals and companies.

Property tax rates

Property tax is imposed on the average annual book value of the taxable property at the rate of 1%.

Taxable persons

Taxable persons are comprised of the following:

- Resident companies, including companies with foreign investment that are treated as residents under Azerbaijani law; international organisations engaged in economic activities; and other enterprise.
- Branches and affiliated companies of such taxpayers.
- Agencies and representative offices of foreign legal entities located in Azerbaijan.
- Non-resident companies performing activities through a PE in the territory of Azerbaijan.

Enterprises can combine their assets and cooperate as joint owners. Joint owners are liable to pay tax according to their interest in the property concerned.

Tax base

The property tax base varies according to the residency status of the taxpayer. Resident companies are subject to property tax on their tangible assets recorded on their balance sheet. Non-resident companies carrying out a business activity through a PE in Azerbaijan are only subject to property tax on their tangible assets connected with the PE.

The following assets are exempt:

- Facilities used for the purposes of the environment, fire protection, and civil defence.
- Product lines, railways and motorways, communication and power lines, and melioration and watering facilities.
- Automobile transport taxed for the road tax.
- Facilities of companies involved in education, health, culture, and sports that are used only for the purposes of such areas of activity.

Administration

Companies are required to report the average annual value of taxable property and pay property tax on a quarterly basis, subject to any necessary recalculations at the end of the year. Tax payments are due within 15 days of the second month of each quarter. The payment should be 20% of the previous year property tax amount.

The tax on water and air transport means is estimated on 1 January each year by the tax offices based on data provided by the organisations responsible for registration of means of transport. The tax is assessed on the person named in the registration document.

When an asset changes ownership during the tax year, the tax liability is defined as the liability of the new owner.

Land tax

Land tax is levied on Azerbaijan's land resources that are in the possession of or used by individuals or companies.

Land tax rates

The rate of land tax for agricultural land is AZN 0.06 per unit. The units are determined by the relevant authority on the basis of the purpose, geographical location, and the quality of agricultural land in the administrative regions.

The rate of land tax for industrial, construction, transport, telecommunications, trade and housing servicing, and other dedicated land varies from AZN 0.1 to AZN 10 per 100 square metres, depending on the city or region.

Taxable base

Land plots that are in ownership or used are subject to land tax. Exemptions apply to various types of land owned or used for public purposes by the state or other public authorities. The government may grant further tax exemptions and reliefs.

Assessment and procedure of payment

Companies must compute the exact amount of the land tax each year on the basis of documents evidencing the title of ownership, possession, and use. The computation

Azerbaijan

must be submitted to the tax authorities by 15 May of each year. The tax must be paid by 15 August and 15 November in equal amounts.

Transfer taxes

No specific transfer taxes are levied upon the transfer of immovable property. However, certain notary fees and other sale duties applicable to transfer of property may apply.

Stamp duties

There are no stamp duties. State notary fees are payable upon notarisation of certain transactions.

Road tax

Legal entities and foreign nationals are subject to road tax. The road tax rate varies depending on vehicle engine volume, number of axles, weight carried, and how long the vehicle will be in Azerbaijan (for foreign vehicles). The tax rate may be assessed at a maximum of AZN 2,800 per year.

Mining tax

Legal entities and individuals involved in the recovery of minerals in Azerbaijan are obligated to pay the mining tax. The rate depends on the type of mineral extracted and varies from 3% to 26% of its total wholesale price.

Branch income

In addition to profit tax paid by a PE of a non-resident, the amount transferred from the net profit of such PE to the non-resident is taxed at the source of payment at a rate of 10%.

Income determination

Profit tax is levied on an enterprise's taxable profits. Profits are defined as the difference between the gross income and deductions defined by law.

Inventory valuation

Inventory valuation is determined according to national accounting standards.

No inventory valuation method is stipulated for tax purposes.

Capital gains

There is no separate capital gains taxation in Azerbaijan. Proceeds from the disposal of capital assets are included in ordinary taxable income.

Dividend income

Dividends distributed to residents and non-residents are subject to withholding tax (WHT) (taxable at source upon payment). Therefore, the received dividend amounts of legal entities and physical persons are not taxable for profit (income) tax purposes.

Interest income

If income is received from an Azerbaijani source, interests paid by a resident or a non-resident's PE, or on behalf of such establishment, with the exception of interests paid on credits (loans), deposits (accounts) of resident-banks, including from loan interests

paid on financial leasing operations, to resident persons carrying out financial leasing or non-resident banks, or PE of a non-resident carrying out financial leasing, shall be taxed at the source of payment at a rate of 10%.

Foreign income

If a resident of Azerbaijan directly or indirectly holds more than 20% of shareholders' equity or possesses more than 20% of the voting shares of a foreign legal entity that, in turn, received income from a state with favourable taxation, then such income shall be included in the resident's taxable income.

A state with favourable taxation is considered a country in which the tax rate is two or more times lower than that determined under the Tax Code of Azerbaijan, or a country in which the laws on confidentiality of information about companies exist (which allow secrecy to be maintained concerning financial information, as well as the actual owner of property or receiver of income).

Anti-deferral measures

In order to avoid shifting of income from a taxpayer to a foreign subsidiary that may result in deferral or elimination of tax, the following limited anti-deferral measures are provided in the Tax Code:

The Tax Code provides that if a resident of Azerbaijan holds directly or indirectly more than 20% of share capital or voting rights in a foreign legal entity that derives income from a low-tax jurisdiction, then the proportionate share in income of the foreign entity must be included in the taxable income of the resident taxpayer.

A low-tax jurisdiction is considered to be (i) a country in which the tax rate is at least two times lower than the tax rate in Azerbaijan, or (ii) a country which has laws on confidentiality allowing secrecy of financial information, as well as information on the actual owner of property or recipient of income.

Deductions

All expenses connected with generating income, except for non-deductible expenses and expenses with limited deductibility, specifically defined by the law, are deductible from income.

Depreciation

Depreciation may be calculated at the following rates:

- Buildings and premises: up to 7%.
- Machines, equipment, and calculation appliances: up to 25%.
- Means of transportation: up to 25%.
- Working cattle: up to 20%.
- Expenses incurred for geological and exploration works, as well as for preparatory works for the production of natural resources: 25%.
- Intangible assets with an undetermined period of use: up to 10%. For those with a determined period of use, pro-rata amount as per the useful life, in years.
- Other fixed assets: up to 20%.

Goodwill

Azerbaijani tax legislation does not specify the definition of goodwill.

Azerbaijan

Start-up expenses

The cost of assets shall include expenses for their acquisition, production, construction, assembly, and installation as well as other expenses that increase their value with the exception of expenses for which the taxpayer is entitled to a deduction.

Interest expenses

Interest on loans received from overseas and/or from related parties may be deducted, limited to the interest rate on loans with similar currency and maturity at the interbank credit auction. In absence of such an auction, deductions for interest may not exceed rates of 125% of the interbank auction credit rates published by the Central Bank of Azerbaijan.

Bad debt

A taxpayer shall be entitled to a deduction for doubtful debts connected with goods, work, and services that have been realised where income from them was previously included in the gross income received from entrepreneurial activity. Doubtful debt deduction shall be allowed only if the debt is written off as worthless in the taxpayer's books.

Charitable contributions

Charitable contributions are non-deductible expenses in Azerbaijan.

Fines and penalties

No deduction is allowed for financial sanctions or interest calculated for delayed payment of taxes.

Taxes

Road, property, land, and mining taxes are deductible.

Other expenses deductible within certain limits

- The amount of repair expenses deductible each year is limited to the amount of the tax written down value of each category of fixed assets as of the end of the previous year. For buildings and premises, the limit is 2%; for machinery and equipment, the limit is 5%; and for other fixed assets, the limit is 3%. An amount exceeding these limits shall be taken as an increase of the residual balance value of the fixed assets in the appropriate category.
- Actual business trip expenses are deductible from income within the standards established by the Cabinet of Ministers.
- A legal entity engaged in insurance activities is entitled to deduct allocations to reserve insurance funds within the standards established by the legislation of Azerbaijan.
- Banks and credit entities engaged in certain types of banking activities shall be entitled to deduct from income the amounts assigned for establishment of special reserve funds, depending on the classification of assets in compliance with legislation and in accordance with procedures established by the relevant executive authority.

Non-deductible expenses

The following expenses are non-deductible:

- Capital expenses.
- Expenses connected with non-commercial activity.
- Entertainment and meal expenses, accommodation, and other expenses of a social nature incurred for employees.

Net operating losses

Taxable losses incurred by legal entities may be carried forward for five years to offset future taxable profit, without limitations.

Payment to foreign affiliates

Payment to charter capital in order to create an affiliate in a foreign country is not tax deductible and is instead treated as investment to subsidiary on the balance sheet.

Under local transfer pricing rules, payment for goods and services supplied by foreign affiliates is deductible up to the fair market price of such supplies.

Group taxation

Each taxpayer is liable to fulfil one's own tax liabilities. Azeri tax legislation does not have the concept of 'group taxation'.

Transfer pricing

The Tax Code provides that relations between associated (interrelated) entities must be based on the arm's-length principle.

Interrelated persons for the purposes of taxation are natural and/or legal persons, relations between which might have direct effect on economic results of their activities or the activities of persons they represent.

Thin capitalisation

There is no concept of thin capitalisation in Azerbaijani tax law. However, the Tax Code provides that interest on loans received from overseas and/or from related parties may be deducted, limited to the interest rate on loans with similar currency and maturity at the interbank credit auction. In absence of such an auction, deductions for interest may not exceed rates of 125% of the interbank auction credit rates published by the Central Bank of Azerbaijan.

Tax credits and incentives**Foreign tax credit**

Azeri legal entities are taxed on worldwide profit; however, any tax paid overseas, up to the tax amount that would be calculated under Azeri law, will be allowed to offset the Azeri profits tax. The tax credit may not exceed the tax that would be imposed on such income in Azerbaijan. This credit applies only to residents of Azerbaijan.

Incentive for agricultural producers

Taxpayers producing agriculture products are exempt from profit tax, VAT, and property tax until 2013.

Incentive for increasing nominal equity of banks and insurance companies

Banks, insurance, and re-insurance companies were exempt from profit tax on profit distributed for increasing their nominal equity (so called, charter capital) during the three years prior to 1 January 2012.

Azerbaijan

The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities

The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities was adopted in April 2009 and will remain effective for 15 years. This law avails the following tax incentives to contractors and subcontractors (excluding foreign subcontractors without PE in Azerbaijan):

- Local companies are permitted to choose between (i) profit tax at a rate of 20% or (ii) 5% WHT on gross revenues.
- Foreign subcontractors are taxable only by a 5% WHT.
- A 0% VAT rate.
- Exemption from dividend WHT and taxation on branch's net profits.
- Exemption from customs duties and taxes.
- Exemptions from property tax and land tax.

In order to derive these benefits, the relevant taxpayer should obtain a special confirmation certificate from the Ministry of Industry and Energy.

The Law on Special Economic Zones (SEZs)

The Law on Special Economic Zones (SEZ) became effective in June 2009. The companies operating in SEZs shall have the following tax benefits:

- A 0.5% tax levied on profits from supplied goods, performed services, or works.
- A 0% VAT rate.
- Customs exemptions.

In order to operate in a SEZ, a special residency certificate is necessary. However, the following companies may not apply for this certificate:

- Companies producing or processing oil and gas.
- Companies producing alcoholic beverages and tobacco.
- Television or radio broadcasting companies.

As of January 2012, no SEZs have yet been established in Azerbaijan.

Incentive for the employment of disabled persons

The rate of profit tax levied on production enterprises belonging to community organisations for disabled persons, and involving at least 50% of disabled persons, shall be reduced by 50%.

In determining eligibility for these privileges, disabled persons substituting permanent employees, contractors (i.e. who work under contractor agreements, civil legal contracts), or disabled persons till the age of 18 are not included into the average number of employees.

Withholding taxes

Income received from Azerbaijan sources not attributable to a PE of a non-resident in Azerbaijan is subject to WHT at the following rates:

- Dividends paid by resident enterprises: 10%.
- Interest paid by residents, PEs of non-residents, or on behalf of such PEs (except for interest paid to resident banks or to PEs of non-resident banks): 10%.

- Rental fees for movable and immovable property: 14%.
- Royalties: 14%.
- Leasing, risk insurance, or reinsurance payments: 4%.
- Telecommunications or international transport services: 6%.
- Other Azeri-source income: 10%.

If a resident enterprise or a PE of a non-resident receives interest, royalties, or rental fees taxable at the source of payment in Azerbaijan, it is entitled to consider the tax deducted from the source of payment, providing the documents supporting the tax deduction are in place.

Tax treaties

The following chart contains the WHT rates that are applicable to dividend, interest, and royalty payments by Azerbaijan residents to non-residents under the tax treaties in force as of 1 January 2012. If the treaty rate is higher than the domestic rate, the latter is applicable.

Recipient	WHT (%)

Tax administration

Taxable period

The tax year in Azerbaijan is the calendar year.

Tax returns

Resident enterprises and PEs of non-residents must file profit tax returns for a calendar year by 31 March of the following year. During liquidation of a legal entity or a PE of a non-resident, the tax return should be submitted within 30 days after the adoption of a decree on liquidation.

A non-resident that has no PE in Azerbaijan and receives income subject to WHT (except for dividends and interest) may file a tax return with respect to such income and expenses, connected with the generation of the income, for purposes of reassessment of profit tax at the rate of 20%.

If a taxpayer applies for an extension of time to file the profit tax return prior to the expiration of the filing deadline and at the same time settle the full tax amount due, the filing deadline may be prolonged for up to three months. The prolongation of the terms for filing the return will not modify the terms of tax payment.

Legal entities and entrepreneurs that withhold tax at the source of payment are obliged to file the WHT report with the tax authority within 20 days following the end of the quarter.

Payment of tax

Taxpayers must make advance quarterly tax payments of profit tax by the 15th day of the month following the end of the calendar quarter. Payments are determined either (i) as 25% of tax for the past fiscal year or (ii) by multiplying the amount of actual income through the quarter by a ratio of tax to gross income for the previous year.

The final payment of profit tax coincides with submission of the declaration of profit tax, i.e. 31 March.

Audit cycle

The on-site tax audit shall be conducted not more than once in a year. A tax audit may be performed at any time under the following conditions:

- If tax return documents that are necessary for tax calculation and payment are not submitted in time or not submitted at all upon the warning of tax authority.
- If incorrect information is found in the report made on the results of tax inspection.
- When exceedingly paid amount of VAT, interest and financial sanction is assigned for the payment of other taxes, interests, and financial sanctions or assigned as payments on future liabilities. In such cases, the out of turn tax audit can be conducted only on taxable VAT operations of the taxpayer.
- When application is submitted by the taxpayer to return exceedingly paid amounts of tax, interests, and financial sanctions.
- When tax authority obtained information from known source on hiding (decreasing) of incomes or object of taxation by the taxpayer.
- When, in accordance with criminal legislation, there is a decision of the court or law-enforcement agency on implementation of tax audit.
- In case of failure to provide the documents specified in the Tax Code.
- In the event of application for liquidation, reorganisation of the taxpayer legal entity, or seizure of business operations of the natural person operating without formation of legal entity.

Statute of limitations

Tax authorities are entitled to calculate and recalculate taxes, penalties, and financial sanctions of the taxpayer within three years after termination of the taxable reporting period and to impose calculated (recalculated) sums of taxes, penalties, and financial sanctions within five years after termination of taxable reporting period.

Topics of focus for tax authorities

The main issues challenged by tax authorities during a tax audit include, but are not limited to, the following:

- Application of the 20% profit tax on 'deemed profit'.
- Application of benchmarking principle for income of foreign employees subject to tax in Azerbaijan.
- Correctness of claim of input VAT from budget and identification of operations taxable to VAT.
- Taxes withheld on payments to non-resident suppliers in cases where income of non-residents is considered as Azerbaijani-source income.
- Application of VAT on market price of assets that were written off, disposed free of charge, or at discount rate.
- Challenging the transfer price.
- Grossed-up WHT paid at cost of the buyer disallowed for deduction.
- Deductibility of the head office costs.

Significant developments

There have been no significant corporate tax developments in Bahrain during the past year.

Taxes on corporate income

There are no taxes in Bahrain on income, sales, capital gains, or estates, with the exception, in limited circumstances, to businesses (local and foreign) that operate in the oil and gas sector or derive profits from the extraction or refinement of fossil fuels (defined as hydrocarbons) in Bahrain. For such companies, a tax rate of 46% is levied on net profits for each tax accounting period irrespective of the residence of the taxpayer.

Corporate residence

Income Tax Law No. 22 of 1979 (which only applies to oil and gas businesses) does not define residence.

Other taxes

Companies are subject to social insurance in respect of their employees, stamp duties, customs duties, as well as a series of corporate registration fees, licence fees, and certain municipal taxes (e.g. taxes on leases of property and registration of land title). There are currently no VAT or excise duties in Bahrain.

Branch income

Profit from branch income is taxable in Bahrain at 46% if it is derived from activities in the oil and gas sector.

Income determination

There are no specific rules in Bahrain with respect to the calculation of specific items of income, such as inventory valuation, capital gains, dividend income, interest income, or

foreign income. However, the income tax law requires that taxable profits be calculated using generally accepted accounting principles (GAAP).

Deductions

The law generally allows deductions for all costs associated with taxable activities in Bahrain, such as the cost of production, refinement, remuneration of employees associated with these taxable activities (including social insurance and pensions paid for the benefit of these employees), and other operational losses.

All reasonable and justifiable costs of production and exploration of products sold during the current taxable year are deductible for tax purposes, provided that these expenses have not been deducted elsewhere in calculating net taxable income.

Depreciation and depletion

Tax deductions may be claimed with respect to reasonable amounts for depreciation, obsolescence, exhaustion, and depletion incurred during the taxable year for properties used by the taxpayer in a trade or businesses from which income, taxable under the income tax law, is derived. Generally, such amounts may be claimed on a straight-line basis over the estimated remaining useful life of the properties, unless otherwise approved by the Minister of Finance.

Taxes

All taxes and duties not imposed by the Bahrain income tax law, including customs duties, may be deducted from taxable income as stipulated in Bahrain's income tax law.

Net operating losses

Unutilised losses may be carried forward and deducted up to an amount equivalent to the net income in future years as defined by the Bahrain income tax law. Carryback of losses is not permitted.

Payments to foreign affiliates

There are no specific restrictions in the income tax law pertaining to payments made to foreign affiliates.

Group taxation

There is no legislation or mechanism for group relief or the taxation of group activities in Bahrain. Additionally, there is currently no specific legislation regarding transfer pricing and thin capitalisation in Bahrain.

Tax credits and incentives

There are no tax incentives in Bahrain. There is also currently no legislation regarding foreign tax relief in Bahrain.

Withholding taxes

There are no withholding taxes (WHTs) on the payment of dividends, interest, or royalties in Bahrain.

Bahrain

Tax treaties

Bahrain has double tax treaties (DTTs) in force with various countries, including Algeria, Austria, Belarus, Brunei, Bulgaria, China, Egypt, France, Iran, Ireland, Isle of Man, Jordan, Lebanon, Luxembourg, Malaysia, Malta, Mexico, Morocco, the Netherlands, Pakistan, Philippines, Singapore, Sudan, Syria, Thailand, Turkey, the United States, Uzbekistan, and Yemen.

Tax administration

Taxable period

A company's accounting period should normally follow the (Gregorian) calendar year (i.e. 1 January to 31 December).

Tax returns

The law is silent on the due date for the filing of the final income tax statement. However, an estimated income tax statement must be submitted on or before the 15th day of the third month of the taxable year. Where applicable, a taxpayer may also be required to file an amended estimated income tax statement quarterly thereafter, unless a final income tax statement has been provided.

Approved accountants must prepare a certified tax return for the return to be acceptable to the authorities.

Payment of tax

Taxes (based on the initial estimated tax statement filed) are payable in 12 equal monthly instalments. Payments are due starting on the 15th day of the fourth month of the taxable year. Income tax as per the subsequent amended estimated income tax statements or the final income tax statement will form the basis of tax payments for the remainder of the 12 monthly instalments that are yet to be paid. The final payment is due on the 15th day of the third month after the end of the taxable year or the date the final income tax statement is filed, whichever is later.

Any excess income tax paid will be credited and used in the first invoice for income tax following the establishment of the credit by the Minister.

Statute of limitations

The Income Tax Law No. 22 of 1979 does not specify any statute of limitations.

B

Significant developments

Barbados currently has 21 double taxation agreements (DTAs) in force. In addition, three signed DTAs with the Czech Republic, Portugal, and the Republic of Ghana and five signed protocols to the existing DTAs with Canada, Finland, Norway, Sweden, and the United Kingdom (UK) are awaiting ratification. Treaties with Bahrain, Belgium, Italy, and Vietnam have been initialled, along with a new treaty with the United Kingdom, and await signature and subsequent ratification.

Tax information exchange agreements (TIEAs) with Denmark, Greenland, and the Faroe Islands are also awaiting ratification, and TIEAs with France and Germany have been initialled and are awaiting signature.

Effective 1 June 2012, the value-added tax (VAT) rates of 17.5% for standard rated supplies and 8.75% for short-term accommodation will remain in effect until further notice.

As of income year 2011, the offsetting of tax losses from business income against employment income is no longer permitted.

As of tax year 2011/12, the land tax bands have been adjusted upwards. Effective from tax year 2012/13, land tax rebates have also been extended to approved manufacturers and to companies engaged in the production of solar energy. A number of tax concessions have also been enacted with respect to the conservation of energy.

As of income year 2011, the penalty for the late filing of corporation income tax (CIT) returns has been increased from 100 Barbados dollars (BBD) to BBD 500.

Please note this information is current as of 1 June 2012. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2012.

Taxes on corporate income

Companies resident in Barbados are taxed on income earned from all sources, whether generated within or outside of Barbados, less expenses incurred for the purpose of producing assessable income in a fiscal period not to exceed 53 weeks. Non-resident companies are generally only taxed on income derived from sources and operations conducted within Barbados.

Barbados

Corporate income tax (CIT) rates

The following rates apply to taxes on corporate income:

Type of entity	CIT rate (%)
Regular companies	25
Small companies (1)	15
Manufacturing companies (2)	15
Approved developers in special development areas	15
International business companies, international banks, and international societies with restricted liability	2.5 to 1
Life insurance companies (computed on gross investment income)	5
Companies engaged in the construction of houses (3)	15
Exempt insurance companies (4)	0

Notes

1. This concessionary tax rate is available to any small company as defined in the Small Business Development Act.
2. This concessionary tax rate is available only to companies registered as manufacturers with the Barbados Customs & Excise Department.
3. Selling price of the houses must be less than BBD 400,000, including the house and land.
4. The exemption is available for a period of 15 years.

Corporate residence

A corporation is deemed to be resident in Barbados if its management and control is exercised in Barbados.

Other taxes

Value-added tax (VAT)

VAT is levied at the rate of 17.5% on the value of a wide range of goods and services imported or supplied in Barbados by VAT registered persons.

A number of services, including financial services, real estate, medical services, and education are exempt. Intergroup transactions are taxable.

Persons operating under Barbados' VAT regime must be registered for VAT. The threshold for VAT registration is BBD 80,000, but voluntary registration is permitted for persons whose annual turnover is less than BBD 80,000.

Certain supplies are zero-rated, including exports, basic food items, prescription drugs, crude oil, and the supply of certain items to the international financial services sector, e.g. legal and accounting fees. There is a concessionary rate of 8.75% as of 1 May 2011 applicable to the supply of accommodation by guest houses, hotels, inns, or any similar place, including a dwelling house normally let or rented for use as a vacation or holiday home.

Registered persons may deduct input tax from their output tax in calculating the tax payable for that VAT accounting period. Where input tax exceeds output tax, the registrant will be entitled to a refund of VAT.

Customs duties

Customs duty is levied on a wide range of imported goods at rates specified in Part 1 of the First Schedule of the Customs Act. Barbados' Customs Tariff is based on the Common External Tariff of the Caribbean Common Market (CARICOM) with special derogations for certain items, e.g. spirituous beverages. Customs duty is calculated on either an *ad valorem* basis or at specific quantitative rates. The *ad valorem* rates for most items vary between 0% and 20%, but certain goods regarded as luxury items are subject to higher rates (e.g. jewellery 60%). In addition, a select group of items that are produced within Barbados and CARICOM (including some agricultural products) are subject to a duty rate of 60% when imported from outside the region.

Manufacturers and agriculturists, including persons involved in fishing and horticulture, are exempt from the payment of duty on inputs (including packaging materials, machinery, equipment, and spares) imported for use in their businesses.

The various departments and institutions, international bodies, and organisations listed in Part II-B of the Customs Tariff are exempt from the payment of customs duty. Specific goods (e.g. computers), also mentioned in Part II-B, are exempt from customs duty.

Excise taxes

Four categories of goods (both locally manufactured, as well as imported) are subject to excise taxes. These are motor vehicles, spirituous beverages, tobacco products, and petroleum products. Most excisable goods are subject to the tax at a specific rate, with the exception of motor vehicles, which are subject to *ad valorem* rates.

A few persons and goods are exempt from excise taxes. These include motor vehicles imported by the diplomatic corps, and other organisations exempt from customs duty under Part II-B of the Customs Tariff, goods imported for temporary use or for a temporary purpose that will be re-exported within three months, and goods (other than spirits) intended to be used as raw materials for the manufacture or production in Barbados of other taxable goods.

Land tax

The following land tax rates are in effect as of tax year 2011/12:

Land	Land tax rate
On the improved value of each parcel of land on which there is a dwelling house that is used exclusively for residential purposes:	
On first BBD 190,000	0
On amounts between BBD 190,000 and BBD 500,000	0.10% of the improved value
On amounts between BBD 500,000 and BBD 1,250,000	0.45% of the improved value
On amounts exceeding BBD 1,250,000	0.75% of the improved value
On the improved value of each parcel of land on which there is a building other than a residence	0.65% of the improved value
On the site value of each parcel of unimproved land	0.60% of the site value

The following concessions have been granted for land taxes:

- For villas, as defined by the Tourism Development Act, land tax is calculated and payable on only 75% of the improved value of the property. It is proposed that the rebate be calculated on the land tax demanded.

Barbados

- For hotels, as defined by the Tourism Development Act, land tax is calculated and payable on only 50% of the improved value of the property. It is proposed that the rebate be calculated on the land tax demanded.
- For pensioners occupying their own homes, land tax is calculated and payable on only 50% of the improved value of the property in excess of BBD 150,000.

A 10% discount is granted if the land tax is paid within 30 days from the date of the tax demand notice or 5% if paid within 60 days. It is proposed that, as of tax year 2011/12, hotels and restaurants will be allowed to pay their land tax bills during January to March without losing access to the discount granted.

The following rebates have been proposed:

- Land tax rebates for income year 2012/13 will now be extended to approved manufacturers who can certify exports to a value of BBD 100,000 or more in any one calendar year.
- Any company certified by the Division of Energy to be engaged in the production of solar energy and/or the manufacturing sector of solar energy equipment will be entitled to the rebate of no more than 50% on the land tax demanded for that year.
- It is further proposed that the Department of Inland Revenue and/or VAT Division will be required to access rebates.

Property transfer taxes

Property transfer taxes are levied as set out in the following table:

Property	Transfer tax rate
Shares of companies listed on the Barbados Stock Exchange	Exempt
Shares of private companies*	2.5% of value or amount of gross consideration above BBD 50,000
Land with a building	2.5% of value or amount of gross consideration above BBD 150,000
Land with no building	2.5% of value or amount of gross consideration
Leases of 25 years or more or short-term leases that are continuously renewed for a period equal to 25 years or more	2.5% of value or amount of gross consideration

* Any transfer of shares to a person who is resident outside of Barbados, whether or not the transferor is resident in Barbados, where the assets of the company concerned consists of foreign assets and its income is derived solely from sources outside Barbados, will not be subject to transfer taxes in Barbados.

Land development duty

Where a person disposes of property situated in a specially designated development area within 15 years of the date specified by statute, duty may be charged. This may be at rates of up to 50% on the excess of the value of the consideration over the improved value at the specified base date, plus certain other expenses and an amount representing capital appreciation of the property.

Stamp duty

Barbados imposes a stamp duty tax on various instruments, including written documents. The rates imposed vary depending on the document. Stamp duties applicable to documents for the transfer of shares, real estate, and for mortgages are set out below:

Instruments	Stamp duty rate
On sale of shares of companies listed on the Barbados Stock Exchange	Exempt
On sale of real estate, leases, and shares in public companies*	BBD 10 per BBD 1,000 or part thereof
On mortgages	BBD 3 on each BBD 500 or part thereof

* Any transfer of shares to a person who is resident outside of Barbados, whether or not the transferor is resident in Barbados, where the assets of the company concerned consists of foreign assets and its income is derived solely from sources outside Barbados, will not be subject to transfer taxes in Barbados.

Life insurance premium tax

In addition to the CIT computed on the gross investment income of life insurance companies, a life insurance premium tax is levied on gross direct premium income earned by resident and foreign life insurance companies as set out in the following table:

	Resident life insurance companies (%)	Foreign life insurance companies (%)
New business written for the income year	6	6
Renewal business	3	5

As of income year 2012, the 20% withholding tax (WHT) on the remittance of payments of insurance premiums to foreign persons will no longer apply.

General insurance premium tax

In addition to the CIT computed on the taxable profits of general insurance companies, a general insurance premium tax is levied on gross direct premium income at a rate of 4.75% in respect of property insurance business and 4% for other general insurance business.

Branch income

Branches are taxed on the same basis as corporations. In addition, a 10% tax is assessed on the transfer or deemed transfer of the after-tax profits to the head office that are not reinvested in Barbados, unless a DTA overrides this.

Income determination

Inventory valuation

Inventory is generally stated at the lower of cost and net realisable value. First in first out (FIFO) or average values are generally used for book and tax purposes. Last in first out (LIFO) is not acceptable for tax purposes. The Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade. Conformity between book and tax values is expected.

Capital gains

Capital gains are not taxed in Barbados.

Barbados

Dividend income

Dividends between two companies resident in Barbados are not taxed in the hands of the recipient. Dividends received by a resident Barbados company from a non-resident entity where the equity interest owned is at least 10% of the non-resident company and the shareholding is not held solely for the purpose of portfolio investments are not subject to tax.

Interest income

Amounts received on account of, in lieu of, or in satisfaction of interest are included in the calculation of assessable income. In certain instances (to the extent specified by regulation) certain types of interest may be exempt from inclusion into the calculation of assessable income, including interest on bonds, debentures, or stock of the government of Barbados that is beneficially owned by a non-resident; interest on tax reserve and tax refund certificates; and interest on holdings (within certain limits) of National Development Bonds, National Housing Bonds, Savings Bonds, and Sugar Industry Bonds classified as non-taxable bonds, as well as interest income from some CARICOM countries.

Partnership income

Amounts received from a partnership or syndicate for the income year, regardless of whether or not these amounts were withdrawn during the income year, are included in the calculation of assessable income.

Foreign income

A Barbados corporation is taxed on foreign branch income as earned. Double taxation is avoided by means of foreign tax credits or an exemption where double taxation treaties exist.

Deductions

Business expenses that are reasonable and incurred for the purpose of producing assessable income are deductible for tax purposes unless disallowed by a specific provision of the Income Tax Act. Deduction of capital expenditures is specifically prohibited, but special provisions may allow tax depreciation on these expenditures.

Depreciation

Depreciation for tax purposes is computed on a straight-line basis at prescribed rates. The process is accelerated by additional initial allowances in the year of acquisition. Conformity between book and tax depreciation is not required. Gains on sales of depreciable assets are taxable as ordinary income up to the amount of tax depreciation recaptured, and losses on sales below depreciated value are deductible.

Capital allowance

Capital allowance	Rate
Initial allowance:	
Plant and machinery	20%
Industrial buildings	40%
Annual allowance:	
Plant and machinery	Various rates
Industrial buildings	4%
Intellectual property	10% of 50% of the amount expended

Capital allowance	Rate
Investment allowance (an incentive allowance limited by statute to entities operating in certain industries, claimed in lieu of initial allowances):	
Basic industry*	20%
Businesses or persons entitled to export allowance for exports outside of CARICOM countries	40%
Business engaged in the manufacture and refining of sugar	40%
Business engaged in the manufacture of clay and limestone products	40%

* as prescribed by the regulations to the Barbados Income Tax Act.

Note: This allowance is not deducted from the cost of the asset in calculating tax written down value.

Manufacturing allowance

Companies involved in the manufacturing sector are granted an additional 50% of the annual allowance claimed in an income year. Such companies are also often able to claim investment allowances.

Commercial building allowance

A deduction is available in respect of a commercial building. For each income year, the available allowance is calculated at 1% of the land tax improved value, or 10% of the land tax improved value if the building is registered with the National Trust.

Depletion

For oil and gas companies, depending on certain circumstances, a depletion allowance of 20% or 10% is given in addition to annual depreciation on prescribed types of capital expenditure.

Goodwill

Goodwill is not a depreciating asset, and tax amortisation is not available.

Start-up expenses

There are no specific provisions in relation to deductions for start-up expenses. However, some of these are treated as costs incurred on account of capital expenditure. Such costs are therefore not allowable deductions for tax purposes.

Interest expenses

A Barbados corporation can claim a deduction for interest expenses. However, where interest claimed as a deduction has not been paid within two years of being accrued (one year for related parties), it should be added back to assessable income.

Charitable contributions

Charitable contributions are generally deductible where they are made to entities that are specifically registered as charities or not-for-profit organisations with the Corporate Affairs and Intellectual Property Office.

Bad debt

Amounts representing debts owed that have been established as bad debts during the income year and have been previously included in calculating assessable income for that income year or a previous income year are deductible in calculating assessable income.

Barbados

Pension expenses

Contributions made by companies under registered pension schemes are deductible in calculating assessable income.

Fines and penalties

Fines and penalties imposed are generally not deductible.

Taxes

Taxes on income are not deductible.

Net operating losses

No carryback is allowed for CIT losses. Losses can generally be carried forward for nine years after the income year in which they are incurred and may be applied in full against future taxable profits. Notwithstanding this, a tax loss incurred by a person in respect of residential property can only be deducted against assessable income earned by that person in respect of residential property.

Losses of general insurance companies can only be carried forward for five years, and losses of life insurance companies cannot be carried forward at all.

Payments to foreign affiliates

A Barbados corporation can claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided that payments are no greater than what it would pay to an unrelated party.

Group taxation

Trading losses (i.e. the tax loss for the year, excluding capital allowances) incurred during an income year of a surrendering company may be set off wholly or partially against the profits of a claimant company, where both are members of the same group (defined as where one company is a 75% subsidiary of another, or both companies are 75% subsidiaries of a third company).

Group relief is not available to companies operating in the international business and financial services sector or any other company which is operating under concessionary legislation.

Transfer pricing

Although Barbados has no specific transfer pricing legislation or regulations in place, the Income Tax Act contains a section dealing with artificial transactions. This enables the revenue authorities to amend the assessable income of a person where they believe the main purpose of a non-arm's-length transaction is to artificially reduce that person's assessable income.

In such circumstances, the transaction is disregarded or modified to achieve the effect that it no longer results in the artificial reduction of that person's assessable income.

Thin capitalisation

Barbados does not have tax provisions relevant to thin capitalisation.

Controlled foreign companies (CFCs)

Barbados does not have tax provisions relevant to CFCs.

Tax credits and incentives

Foreign tax credit

Barbados allows a credit for foreign taxes (taxes paid in jurisdictions outside Barbados). The credit should not exceed the Barbados tax attributable to the income derived outside Barbados.

Agricultural cash rebate

The following rebates may be claimed on agricultural or agro-processing machinery or plant that is new or imported into the island for the first time:

- Sugar cane harvesters: 10% or 15%
- Other: 18%

Export allowance

There is a rebate of tax under the Income Tax Act in respect of income from export sales outside CARICOM. The maximum tax credit on eligible sales is 93%, which is available where eligible sales exceed 81% of total sales.

Exempt Insurance Act

The Exempt Insurance Act is applicable to companies in Barbados that insure risks and earn premiums outside the island and for companies that own or manage the former. Under the Act, all three types of companies are exempt from exchange control regulations. In lieu of standard CIT rates, exempt insurance companies are subject to tax at the rate of 0% for the first 15 years; thereafter, the rate is 8% on the first BBD 250,000 of taxable income and 0% on taxable income in excess of BBD 250,000. No WHT is levied on remittances of dividends or interest.

Exempt insurance companies are subject to an annual license fee of BBD 20,000.

Fiscal Incentives Act

The Fiscal Incentives Act provides to manufacturers of an 'approved product' a full exemption from taxes and duties for varying periods, up to a maximum of 15 years.

Foreign currency earnings credit

Persons carrying on business in Barbados may claim a tax credit of up to 93% of CIT on net profits from foreign currency earnings derived from construction projects or professional services undertaken outside of CARICOM international insurance business or services provided to the international business sector.

Employment tax credit

As of income year 2011, a tax credit of 10% of the actual amount of the expenditure incurred in respect of wages for the increase in employees is available where:

- there is an increase in profits directly attributable to the business
- there is an increase in the number of employees who are employed directly in the operations of the business by the amount of at least 10% of the total workforce employed during the previous year, and
- the increase in the number of employees referred to is maintained for a period of three years.

The credit is applied in the year in which persons meet the above mentioned criteria. Any unused credit can be carried forward for three years from the end of the income year in which the credit was obtained, and no cash refund shall be allowed.

Barbados

Productivity and innovation tax credit

As of income year 2011, entities incurring expenditure that is innovative in nature and leading to the development of a new manufacturing process, product, service, or organisation procedure will be granted a tax credit of 25% of the amount expended in that income year. The credit will only be granted if the innovation was successfully introduced to the market as evidenced by increases in sales, productivity, or organisational efficiency.

Any unused tax credit shall be carried forward for a maximum of three years from the end of the income year in which the credit was obtained, but no cash refund will be allowed. Certification from the Executive Director of the National Productivity Council is required.

Renewable Energy

As of income year 2011, a number of tax concessions have been enacted with respect to the conservation of energy. These measures include a 150% deduction of actual expenditure, not exceeding BBD 25,000, for each year for five years in respect of the following:

- energy audits and
- 50% of the cost of retrofitting premises or installing systems to produce electricity from sources other than fossil fuels.

The business must be current in the payments of its corporation tax, VAT, land tax, and national insurance contributions, or where not current, has entered into an agreement with the respective authorities to settle outstanding arrears.

Housing Incentives Act

The Housing Incentives Act provides CIT, import duty, WHT, and other concessions to developers who implement low income housing projects. Approved developers are subject to CIT at a rate of 15%.

International Business Companies (IBCs) Act

IBCs resident in Barbados but deriving income solely from sources outside Barbados are taxed at the following rates:

Taxable income (BBD)	Rate (%)
Up to 10 million	2.5
10 million to 20 million	2
20 million to 30 million	1.5
In excess of 30 million	1

Freedom from exchange controls is granted to IBCs, as well as duty-free concessions on certain imports. No WHT is levied on remittances of dividends, royalties, interest, management fees, fees, or other income paid by IBCs to persons outside Barbados. IBCs may also claim a credit for taxes paid outside Barbados, provided that this does not reduce the company's rate of CIT in Barbados to less than 1%.

IBCs are subject to an annual license fee of BBD 850.

International Financial Services Act (IFSA)

The IFSA provides for the establishment of international banking, trust administration, and other related or ancillary services by eligible companies incorporated in Barbados or branches of qualified foreign banks. An annual licence fee of BBD 100,000 is payable by IFSA licensees who are in the business of receiving foreign money deposits, while IFSA licensees who are not involved in deposit taking financial services are required to pay BBD 50,000.

International financial service entities are exempt from exchange controls and are granted duty-free concessions on certain imports. Profits and gains are taxed at the same rates as for IBCs. No WHTs are levied on remittances of dividends, interest, or fees. International financial service entities may also claim a credit for taxes paid outside Barbados, provided that this does not reduce the entity's rate of CIT in Barbados to less than 1%.

International Trust Act

The International Trust Act is aimed at facilitating the use of Barbados trusts for purposes previously made possible in many tax free financial centres. An international trust is taxed in Barbados as an individual that is resident but not domiciled in Barbados. This allows the trust to take advantage of a network of tax treaties while not subjecting its foreign earnings to Barbados tax unless they are remitted there. The Act exempts trusts from exchange control and WHT requirements. No registration is required.

Market development allowance for export sales or the tourist industry

150% of certain expenditure on research and development for export sales outside of CARICOM or on tourism development is deductible.

Shipping (Incentives) Act

The Shipping (Incentives) Act was enacted to encourage the development of Barbados' shipping activities by granting CIT, import duty, WHT and other concessions to approved shipping companies for a period of ten years.

Small Business Development Areas Act

Companies incorporated under the Companies Act with at least 75% of their shares owned locally and having share capital of not more than BBD 1 million, annual sales not in excess of BBD 2 million, and not more than 25 employees may obtain approval as a small business. Such companies pay CIT at a reduced rate of 15% and are exempt from the payment of import duties on equipment imported for use in the business and from stamp duty in some instances. In addition, 120% of certain expenditures directly related to the development of the business are deductible for tax purposes. Investors in such businesses are exempt from WHT on interest and dividends earned on their investment.

Societies with Restricted Liability (SRL) Act

An SRL is a hybrid entity that can be recognised as a corporation or partnership in certain jurisdictions depending on the nature of its organisational documents. The entity has limited liability, and membership units are known as quotas. Societies qualifying under this Act may apply for a license to operate as international SRLs and as such are taxed at the same rates as IBCs. No WHT is levied on any distributions, interest, or other income paid by an international SRL to non-residents. International SRLs are granted duty-free concessions on certain imports, and no exchange control requirements are applicable. Entity mobility is also a prominent feature of this legislation. Qualifying societies organised overseas can be continued into Barbados under the Act.

Barbados

Special Development Areas Act

The Special Development Areas Act provides relief for approved developers constructing or improving a building or structure in certain defined locations in Barbados and to persons financing such work (other than a commercial bank). Persons financing such work are exempt from income tax on interest received. Approved developers are exempt from import duties and VAT on inputs for the construction or renovation of buildings, WHTs on repatriation of interest (for a period of 15 years), land tax, and property transfer tax payable by vendors on the initial purchase of the company. An approved developer pays CIT at the rate of 15% and is granted initial and annual allowances on industrial buildings of 40% and 6%, respectively, and on commercial buildings of 20% and 4%, respectively.

Qualifying insurance companies

Companies registered under the Insurance Act that derive at least 90% of their premiums from sources outside of CARICOM and at least 90% of whose risks originate outside of CARICOM may obtain a certificate of qualification. Such companies are entitled to the same exemptions from WHTs and exchange controls as exempt insurance companies. They are also entitled to the foreign currency earnings credit, which may reduce their CIT rate from 25% to 1.75% for general insurance business. The rate of tax on gross investment income applicable to life insurers may fall from 5% to 0.35%.

Tourism Development Act

The Tourism Development Act provides that a qualifying owner of a tourism project or of a completed tourism product may offset expenditures on construction or the provision of certain amenities against its profits.

A tourism project includes the following:

- The construction of a new hotel.
- The alteration or renovation of an existing hotel.
- The conversion of an existing building or buildings into a hotel by reconstruction, extension, alteration, renovation, or remodelling.
- The furnishing and equipping of a building to be utilised as a hotel.
- The provision of tourist recreational facilities and tourism related services.
- The construction and equipping of a new restaurant.
- The alteration or renovation of an existing restaurant.
- The construction of a new attraction or the alteration or renovation of an existing attraction.
- The restoration, preservation, and conservation of natural sites.
- The establishment, restoration, preservation, and conservation of monuments, museums, and other historical structures and sites.
- The construction and furnishing of villas.
- The construction and furnishing of timeshare properties.
- The addition to a tourism product of any facilities or services intended to increase or improve the amenities that the tourism product provides.

Concessions extend to the following:

- The importation of building materials and supplies without payment of customs duty and an exemption from the payment of customs duties on specified supplies to be used for equipping the project.
- A refund of customs duty (including VAT) where the holder of a permit can satisfy the Comptroller of Customs that the building materials and supplies purchased for a

tourism product have been purchased in Barbados, or in the case of importation that the customs duty was paid by the holder of the permit.

- Income tax concessions with respect to the write-off of interest, accelerated deduction of expenditure, interest rate subsidy, equity financing, training, and marketing.
- The set off of approved capital expenditures against revenues for a period of 15 years where the owner of a qualifying tourism project (except restaurants), which has a project with a value of up to BBD 200 million. Hotels with capital expenditure over BBD 200 million are allowed one additional year to write off expenditure for each additional BBD 20 million expended, up to a maximum of 20 years.

Withholding taxes

WHTs are levied as follows:

Recipient	WHT (%)				Entry into force
	Dividends	Interest	Royalties	Management fees	
Non-treaty countries	15	15	15	15	
Austria	5/15 (1)	0 (2)	0 (2)	0	1 April 2007

Barbados

Notes

1. The rate is 15% for portfolio dividends and 5% for holdings of at least 10%.
2. Interest and royalties are only taxable in the country in which the beneficial owner of the dividends or interest is resident.
3. The rate is 12% for portfolio dividends and 5% for holdings of at least 25%.
4. This rate applies, provided that the interest is subject to tax in the other country.
5. This rate applies, provided that the royalties are subject to tax in the other country.
6. The rate is 10% for portfolio dividends and 5% for holdings of at least 25%.
7. The rate is 15% for portfolio dividends and 5% for holdings of at least 25%.
8. 5% of the gross royalties on any literary, artistic, or scientific work, including films or television broadcasting, and 10% on any patent, trademark, commercial, or scientific equipment, among others.
9. Interest is only taxable in the country in which the beneficial owner of the interest is resident.
10. Royalties are only taxable in the country in which the beneficial owner is resident.
11. The rate is 15% for portfolio dividends and 0% for holdings of at least 10% held for at least 12 uninterrupted months prior to dividend distribution.
12. The rate is 15% for portfolio dividends and 5% for holdings of at least 5%.
13. The rate is 10% for portfolio dividends and 5% for holdings of at least 10%.
14. The rate is 15% for portfolio dividends and 0% for holdings of at least 10%.
15. The rate is 75% of the statutory nominal rate at the time of distribution; 5% for companies with holdings of at least 25%.
16. The rate is 7.5% of the gross amount; 5% if the beneficial owner is a bank.
17. The rate is 15% for portfolio dividends and 5% for holdings of at least 25%.
18. The rate is 5% for portfolio dividends and 0% for holdings of at least 25%.
19. Agreement extended to Barbados by virtue of the agreement between Switzerland and the United Kingdom, on payments to non-residents from Barbados.
20. Dividends are exempt from WHT if they are subject to tax in the other country.
21. This rate applies, provided that the interest is subject to tax in the other country.
22. WHT applies only to royalties in respect of cinematographic or television films. All other royalties are exempt from WHT, provided that they are subject to tax in the other country.
23. The rate is 15% for portfolio dividends, 5% for holdings of at least 10%. Dividends paid by a regulated investment company will bear WHT at a rate of 15%, regardless of the percentage of shares held by the recipient. Dividends paid by a real estate investment trust (REIT) will qualify for the 5% WHT rate only if the beneficial owner is an individual holding less than 10% of the shares in the REIT, otherwise, a 30% WHT rate will apply.
24. The rate is 10% for portfolio dividends, 5% for holdings of at least 5%.
25. The rate is 5% if the recipient is a bank, 15% in all other cases.
26. International business companies (IBSs), international societies with restricted liability (ISRLs), exempt insurance companies (EICs), and qualifying insurance companies (QICs) are exempt from WHTs on payments to non-resident persons or international business entities. Specific legislation applies.
27. Protocol signed November 2011, awaiting ratification.
28. Protocol in force 9 June 2010.
29. Protocol in force 23 December 2010.
30. New treaty initialed.
31. General effective date 1 January 1984. First protocol in force 29 December 1993. Second protocol in force 20 December 2004.

Tax administration

Taxable period

CIT returns are prepared on a fiscal year basis.

Tax returns

Companies with fiscal years ending between 1 January and 30 September (both dates inclusive) are required to file a CIT return on or before 15 March in the year following the end of the fiscal period. Companies with fiscal years ending any time between 1 October and 31 December (both dates inclusive) are required to file a CIT return on or before 15 June in the year following the end of the fiscal period.

The Department of Inland Revenue has instituted an online filing system, which is optional.

Payment of tax

Companies with fiscal years ending between 1 January and 30 September (both dates inclusive) are required to make an instalment of CIT for the income year in which the fiscal period ends on or before 15 September of that year. The instalment is 50% of the net CIT payable for the preceding income year. The remainder of CIT due (if any) must be paid on filing of the CIT return by 15 March of the following year.

Companies with fiscal years ending between 1 October and 31 December (both dates inclusive) are required to make two instalments of CIT for the income year in which the fiscal period ends on or before 15 December of that year and 15 March of the following year. The instalments are each 50% of the net CIT payable for the preceding income year. The remainder of CIT due (if any) must be paid on filing of the CIT return by 15 June of the following year.

It is possible to apply for a reduction or waiver in the instalments if lower profits are anticipated in the current year when compared with those of the preceding year.

Audit cycle

A person authorised by the Commissioner may, at any reasonable time, audit the books and records, or other documents that may relate to the information that should be in the books or records, examine property, request reasonable assistance from the owner, or, as necessary, seize or retain any documents that may be relevant.

Statute of limitations

Every person required to deliver a return of one's assessable income for an income year shall keep adequate records and shall retain every such record or voucher for a period of up to five years after the end of the relevant income year, unless the Commissioner otherwise directs, before the disposal of such records.

Penalties

The penalties and interest for failing to file a return on time and pay the CIT due are as follows:

- Penalty for failing to file a CIT return by the due date is BBD 500 plus 5% of the tax assessed at the due date.
- Penalty for failing to pay CIT by the due date is 5% of the tax assessed and unpaid at the due date.
- Interest charge of 1% per month on the tax and penalties calculated for each month during which any amount of tax and penalties remain unpaid on the largest amount of tax and penalties that were due and unpaid at any time during that month.

The penalty for failing to make an instalment of CIT by the due date is 10% of the CIT instalment due, plus interest at 0.5% per month on the CIT instalment and penalty outstanding.

Significant developments

Effective 1 January 2012, the standard corporate income tax (CIT) rate has been reduced from 24% to 18%; consequently, a reduced 9% CIT is levied on capital gains from disposal of shares or stocks in a Belarusian entity.

As of 1 January 2012, amendments to the Tax Code introduced new rules related to:

- Transfer pricing (*see the Group taxation section for a description of the general rules*).
- Tax loss carryforward (*see the Deductions section for a description of the general rules*).
- Thin capitalisation (*see the Group taxation section for a description of the rules, which are effective from 1 January 2013*).

Also as of 1 January 2012, taxpayers are entitled to apply the so-called 'depreciation premium'. This benefit allows taxpayers to classify/record part of the initial value of fixed assets and intangible assets as deductible costs for CIT purposes as of the date when such assets were initially accounted for. The amount of a premium is limited to 10% of the initial value with regard to buildings and constructions and to 20% of the initial value with regard to machines, equipment, vehicles, and intangible assets.

As of 13 March 2012, the last in first out (LIFO) and weighted-average cost methods are no longer applicable in Belarus.

Taxes on corporate income

As of 1 January 2012, the standard CIT, also known as profits tax, rate is 18%. Prior to 1 January 2012, the CIT rate was 24%.

CIT is charged on taxable income (net profits). Taxable income is generally determined as revenues from sales of goods, works, and services, excluding value-added tax (VAT), less production and business related costs, less other deductible expenses, plus net results of non-operating income and expenses.

Resident companies are taxed on their worldwide income.

Non-resident companies are taxed on Belarus-sourced income derived through a permanent establishment (PE) with CIT (at the rate of 18%). Income of non-resident companies sourced in Belarus that is not related to the activities of a PE is subject to withholding tax (WHT) (at rates varying from 6% to 15%).

Local income taxes

There are no local taxes due on net profits. As of 1 January 2011, the 3% local area development tax on net profits has been repealed.

Corporate residence

A company is resident in Belarus if it is incorporated in Belarus.

Permanent establishment (PE)

According to local legislation, a non-resident company is deemed to have a PE in Belarus in cases where:

- it permanently carries out commercial activities in Belarus in whole or in part
- it carries out its activities through a dependent agent
- it uses a building site or construction, assembly, or equipment objects, or
- it provides services or performs works within a period of 90 days continuously or in the aggregate during a calendar year.

Double taxation treaties (DTTs) may establish different rules of PE recognition. According to domestic law: where there is a DTT, the provisions of the treaty shall prevail.

Notwithstanding the activities which create a PE in Belarus, a non-resident company must be registered with the local tax authorities controlling the territory where activities are carried out before starting a business in Belarus.

Any profits derived by a non-resident company via a PE in Belarus are subject to 18% CIT. Expenses incurred by a non-resident company either in Belarus or abroad that relate to a PE can be deducted, subject to local deductibility restrictions.

Other taxes**Value-added tax (VAT)**

The standard VAT rate is 20%, whereas the preferential rate is 10%.

The 10% preferential rate applies on:

- local supplies of crop products (excluding floriculture, cultivation of ornamental plants), beekeeping, livestock (except for fur production), and fisheries locally produced and
- import and/or local supplies of certain food products and goods for children.

In general, local supplies of goods, works, and services made by a taxpayer performing its economic activities in Belarus, as well as the importation of goods, are subject to VAT.

Place of supply rules established by the Tax Code of Belarus should be followed to determine whether goods, works, and services are supplied locally, and therefore subject to tax in Belarus.

When a non-resident company, which does not have a PE registered in Belarus, sells goods or provides works and services that are considered local supplies according to the

Belarus

place of supply rules, the VAT due on such supplies is paid by the purchaser registered with the local tax authorities from its own funds. This VAT could be deducted against output VAT, if any, or refunded from the budget in the established order.

Some exceptions apply to provision of construction and other similar works.

Exemptions with credit (zero-rated) include, but are not limited to, the following:

- Supply of goods exported outside of Belarus.
- Provision of works and services involving maintenance, loading, reloading, and any other similar works and services related to supply of exported goods.
- Transportation and any directly linked ancillary services related to the export or import of goods, including transit forwarding, as well as exported works for goods processing.
- Works and services related to repair (modernisation, conversion) of aircrafts (including engines and railway vehicles) and provided to non-resident companies or individuals.

In order to apply zero-rated VAT on goods carried out from Belarus, VAT payers must hold supporting documents as evidence that these goods were actually exported from Belarus to another country. Application of zero-rated VAT on respective works and services must be supported by the appropriate documents, which have to be provided to the local tax authorities where the taxpayer is registered for tax purposes.

Exemptions without credit include, but are not limited to, the following:

- Disposal of shares in resident legal entities.
- Supply of material rights for industrial property objects (e.g. inventions, utility models, industrial designs, breeding achievements, integrated circuits, know-how, trade names, trademarks, and service marks).
- Supply of securities, derivatives, and other similar financial instruments, certain limitations apply.
- Fiduciary management services related to funds and assets owned by an individual or an entity.
- Provision of all types of insurance and re-insurance (co-insurance) services rendered by insurance and re-insurance agents.
- Supply of medicines, medical equipment, instruments, medical products, as well as drugs, devices, equipment, veterinary products, under certain conditions.
- Personal or public health care services, under certain conditions.
- Social services supplied by institutions for children and young people care, nursing homes for the elderly and/or by care/guardianship institutions for disabled or by other non-profit entities.
- Supply of services in the field of culture and art, under certain conditions.
- Public services (services of barbers, baths, and showers; laundry and dry cleaning services; watch repairing; manufacturing and repair of clothing and footwear; repair and maintenance of household appliances; repair of personal and household goods).
- Services provided by religious organisations, if these services correspond to the purposes set out in their canons, statutes, and other documents.
- Funeral services, maintenance of the graves, tombstones, fences, and other objects associated with burial, as well as works on their production, under certain conditions.
- Supply of postage stamps, postcards, and envelopes marked, excise and control (identification) stamps for marking of goods at their nominal value, stamps which

can be used as a confirmation of fees and charges payable in accordance with the legislation.

- Supplies of jewels as well as related services, under certain conditions.
- Retail trade of goods in duty-free shops, under certain conditions.
- Communication services rendered to individuals.
- Legal services supplied by certified lawyers.
- Research and development, design, and technological works and services, under certain conditions.
- Education and training services.
- Lotteries and gambling, under certain conditions.
- Financial services supplied by the banks, under certain conditions.
- Goods and equipment imported into Belarus, under certain conditions.
- Transactions related to provision of loans.

In order to apply exemptions, taxpayers should ensure that the services and goods supplied meet the appropriate VAT exemption requirements.

VAT returns shall be submitted on either a monthly or quarterly basis, by the 20th day of the month following the reporting period. VAT shall be paid on either a monthly or quarterly basis, no later than the 22nd day of the month following the reporting period.

Customs payments

The Customs Union between Russia, Kazakhstan, and Belarus, with its unified trade regulations and customs code, has significantly affected administering, customs clearance, and payment procedures followed by Belarus in regards to exports and imports.

Indirect taxation issues within the Customs Union shall be administered in compliance with the International Agreement on Indirect Taxation and two Protocols signed by the Customs Union Member States.

The following charges are considered customs payments:

- Import duties.
- Export duties.
- Special anti-dumping and countervailing duties.
- VAT and excise taxes due upon importation of goods.
- Fees for customs processing/services.

Rates of import duties as well as description of goods subject to them are established by the Single Nomenclature of Goods of the Customs Union (HS Nomenclature) and Single Customs Tariff of the Customs Union.

However, for certain goods specified in Appendix 5 of HS Nomenclature, Belarus is allowed to apply specific rates of import duties different from the rates set in HS Nomenclature.

Export duties are not levied on exported goods, with the following exceptions: certain soft oil; light distillates; fuels and gasoline; wasted petroleum products; propane, butane, ethylene, propylene, and other liquefied gases; petroleum coke; petroleum bitumen, benzol, toluene, xylenes, potash fertilisers; etc. According to the Customs Union regulations, rates of export duties in regards to mentioned goods shall be established by Belarusian Government and shall be equal to the rates applied in Russia.

Belarus

Import and export duties are calculated on the customs value of the goods, which is defined pursuant to the price of transaction method established by the Customs Union regulations. Generally, the following components are considered when calculating the customs value of imported goods:

- Contract price of the goods.
- Rebates and discounts provided by a supplier, under certain conditions.
- Transportation related expenses to the border of the Customs Union (i.e. Belarusian border).
- Insurance premiums.
- Cost of containers and other packaging.
- Part of direct or indirect income to be derived by the seller from future resale, transfer, or other use of imported goods.

Special, anti-dumping, and countervailing duties could be imposed as a measure to protect economic interests of Belarus.

Tax base for VAT calculation due on imported goods includes the total amount of customs value, import duty, and excise tax paid, if any.

Generally, the taxpayer is required to pay customs duties before the customs clearance of the appropriate goods; however, under certain conditions, a taxpayer may be provided with an extension of payment deadlines or allowed to pay only part of customs duties. It is also possible to pay customs duties in advance.

In 2011, electronic customs filing was introduced. Electronic customs declaration is currently available for customs clearance of the goods declared in customs procedures of temporary exports, re-exports (exports) as well as re-imports, free circulation (imports), and free customs zones.

Excise taxes

Excise taxes are imposed on the following goods produced and sold in or imported to Belarus:

- Rectified ethyl alcohol and alcoholic drinks, including beer and wine.
- Alcohol-containing food products in the form of solutions, emulsions, suspensions, produced with the use of ethanol from all types of raw materials, other alcohol-containing products.
- Tobacco (excluding raw tobacco), including cigarettes, cigars, cigarillos, and smoking tobacco.
- Energetic products, including petrol, kerosene, diesel, and bio diesel, gasoline, fuel, marine fuel, oils for diesel engines, and engines with a carburettor and an injector.
- Liquefied hydro carbonated gas and compressed natural gas used as motor fuel.
- Vans and passenger cars, including those converted to cargo.

The tax rate depends on the type and quantity of goods. Rates of excise taxes are stipulated by the Appendix to the Tax Code of Belarus. Compared to the rates applicable in 2011, rates of excise taxes effective in 2012 have increased considerably. The Tax Code provides for a gradual increase of rates of excise taxes over the course of the year by establishing different rates effective during each following quarter.

As of 2012, the excise tax rate for cigarettes with filters is defined on the basis of (i) maximum retail price per pack of cigarettes of certain brands declared by a taxpayer

and (ii) reference of certain brands of cigarettes to one of three price groups defined in the Tax Code.

Generally, the following tax rates are applied (2Q 2012):

Description of tax object	Taxable item	Tax rate in BYR* per taxable item
Rectified ethyl alcohol and alcoholic drinks, including beer and wine	1 litre of 100% alcohol, or 1 litre of complete product	From 110 to 65,460
Tobacco (excluding raw tobacco), including cigarettes, cigars, cigarillos, and smoking tobacco	1 kg of raw tobacco, or 1 cigar or 1,000 cigarettes, cigarillos	From 5,500 to 114,540
Energetic products (petrol, kerosene, diesel, and biodiesel, gasoline, fuel, marine fuel, oils for diesel engines and engines with a carburettor and an injector)	1 ton	From 250,900 to 1,700,000
Liquefied hydro carbonated gas and compressed natural gas used as motor fuel	1,000 litres and 1,000 cbm	141,840 and 267,620
Vans and passenger cars, including those converted to cargo	1 hp (0.75 kw.)	From 1,820 to 18,120

* Belarusian rubles (BYR)

Excise taxes paid on the purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus are considered as deductible for CIT purposes, with certain exceptions.

The tax is reported and paid on a monthly basis, no later than the 20th day of the month following the reporting period.

Real estate tax (immovable property tax)

Real estate tax is levied at the annual rate of 1% on the residual value of buildings, including separated premises, and constructions, late construction in progress (if construction works take longer than the deadline established in technical documentation), owned by legal entities.

The tax base of buildings and constructions located in the territory of Belarus and leased by individuals to legal entities will be the contract value of the leased real estate not less than its value established by the evaluation. Evaluation can be made in the order approved by the President of Belarus as well as by a certified appraiser or local authority responsible for state registration of real estate.

When the real estate subject to taxation is located in Belarus and leased by a resident company to a lessee, the lessee is considered a real estate taxpayer provided that the leased real estate is accounted for in its balance sheet. The lessee is also obliged to pay the tax due on real estate leased from foreign companies that are not considered as having a PE in Belarus.

Belarus

The amount of tax, except the tax due on late construction in progress (if construction works take longer than the deadline established in technical documentation), is deductible for CIT purposes.

The tax reporting obligation must be fulfilled by a taxpayer before 20 March of the reporting year. The tax is paid on a quarterly basis by equal parts, no later than the 22nd day of the third month of each quarter.

Land tax

Belarusian and foreign entities are subject to land tax collected by the local tax authorities with respect to land that they own or use in Belarus.

The tax base depends on plot location and purpose and is normally determined pursuant to cadastral value of a land plot.

The Tax Code provides for a number of land plot categories that are exempt from, or not subject to, land tax in Belarus.

The tax is payable on an annual basis at the rates established by the Appendixes to the Tax Code of Belarus. Tax rates for agricultural plots vary from BYR 208 to BYR 56,661 per hectare. Tax rates on the land plots located in towns and rural areas range from 0.025% to 3% payable on the cadastral value.

Land tax is deductible, with some exceptions, for CIT purposes.

Land tax is reported annually, no later than 20 February of the current reporting year. Generally, the tax is paid quarterly by equal parts, before the 22nd of the second month of each quarter. Concerning payment terms for land tax due on agricultural plots, some exceptions can be applied.

State dues

State dues are payable by legal entities that apply to the state institutions for the issuance of documents having legal force or other deeds, bring the cases before the courts for consideration, use bills of exchange in their activities, etc.

State dues include the following payments and duties:

- State fees (payable on suits, applications, appeals, and other documents that are submitted to or claimed from the courts or prosecution authorities, payable on applications for state registration of a legal entity, notary public services, real estate registration services, etc.).
- Patent fees (payable for registration and use of intellectual property).
- Stamp fees (payable on activities with bills of exchange).
- Consular fees (payable on the activities of state consular and diplomatic departments performed under the request of any applicant).

Offshore charge

An offshore charge is levied upon the following activities of domestic entities:

- Any transfer of funds to an entity registered in an 'offshore jurisdiction', to a third party who is a creditor of that entity, or to the bank account of an offshore jurisdiction.
- In kind performance of obligation to an offshore entity, with some exceptions.

- Any transfer of material rights and obligations as a result of changes in commitment (cession or transfer of debt) between a domestic entity and an offshore entity.

According to Belarusian laws, an offshore jurisdiction is a territory which is included in the list of offshore territories established by the President, has a preferential tax treatment, and/or does not disclose the information related to financial transactions made by resident entities.

A list of 51 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any kind of work or services, commodities, interest on loans, insurance premiums, guarantees, etc. are subject to an offshore charge, which is deductible for CIT purposes.

Tax relief is granted to: (i) repayment of loans including interests on them, borrowed from entities located in offshore territories, (ii) payments due under international marine cargoes and forwarding services, and (iii) payments for bank operations under certain conditions.

An offshore charge is paid at a 15% rate and is deductible for CIT purposes.

The tax is reported and paid on a monthly basis, no later than the 20th day of the month following the reporting period.

Capital gains tax

Capital gains from disposal of shares/stocks in a Belarusian entity are taxed as part of the taxpayer's profits and are subject to a 9% tax (12% prior to 1 January 2012). No tax exemptions are provided by the Tax Code for the capital gains taxation.

Ecological (environmental) tax

Ecological (environmental) tax is imposed on pollutants discharged into the environment, storage and disposal of industrial wastes, wastewater discharges, and on importation of ozone-depleting substances, including those contained in the products.

The following are excluded from taxation, including but not limited to:

- Pollutants discharged into the air by mobile sources (e.g. cars, vehicles).
- Transit of ozone-depleting substances, including those contained in the products through the territory of Belarus.

The tax base of environmental tax is the actual quantity of respective pollutants used/discharged. Tax rates of environmental tax are stipulated by the Tax Code of Belarus.

Environmental tax paid, with certain exceptions, is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis, by the 20th and 22nd day of the month following the reporting quarter, accordingly. Certain exemptions are provided to legal entities effecting tax payments on the basis of established annual limits. These taxpayers will have to file an annual tax return and provide it to a tax authority no later than 20 April of the calendar year.

Tax on natural resources

A tax on natural resources is payable on the actual value of extracted natural resources. It depends on the kind and quantity of extracted resources.

Belarus

Tax rates are established by the Tax Code of Belarus and are applied on natural resources that have been extracted by a taxpayer within established limits. Natural resources extracted over established limits are taxed by a standard tax rate multiplied by ten.

Tax paid on resources extracted within established limits, or if the limits are not established (for certain type of resources), is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis. Those taxpayers who calculate the tax on the basis of annual limits for extraction fulfil tax reporting and payment liability on an annual basis.

Local tax on providers (suppliers)

The local tax on providers is levied on legal entities engaged in gathering/purchasing of wild plants (or parts thereof), mushrooms, and technical and medical raw materials of floral origin for their further industrial processing or resale.

Tax base is the cost of gathered items defined on the basis of procurement (purchasing) prices.

Tax rates do not exceed 5%. Tax on providers is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis.

Branch income

Non-resident legal entities pay tax on profits attributable to a PE. A PE is broadly defined as “a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Belarus”. Belarus’s various DTIs may define a PE differently, which could in some cases result in tax relief. Conducting business through an agent may also create a taxable PE in Belarus.

Taxation of a PE

A PE’s profits are computed on substantially the same basis as Belarusian legal entities, including the composition of tax deductible expenses. The Tax Code provides for the deductibility of expenses incurred abroad by a head office with respect to its PE in Belarus (including a reasonable allocation of administration costs).

To calculate a PE’s taxable income, a non-resident company is required to provide a tax authority with financial documents (i.e. accounting records, income statement, general ledger accounts, invoices, statements of services/works fulfilment, etc.) supporting the amount of revenue earned and expenses incurred. Generally, a PE’s taxable income is defined on a revenue less costs basis. Documentary support of each revenue and/or costs item is required.

When it is not possible to calculate a profit attributable to a PE, this profit can be calculated by the tax authority using one of the following methods:

- A profit sharing method (i.e. gross foreign profit is allocated to PE by using one of the following coefficients related to a PE: working time costs, expenses incurred, services/works performed).
- Benchmarking method (tax authority performs benchmarking study by collecting the respective ratios/indexes of other entities engaged in similar activities).

Head office expenses related to a PE are considered for calculation of taxable income in Belarus and require confirmation of an independent foreign auditor. Splitting of expenses is highly recommended in the audited financial statements of the parent company (head office).

If a non-resident company is deemed to have a PE in Belarus, it will have to register with a local tax authority and declare related profit. Profit related to a PE will be taxed by CIT at a rate of 18%.

Non-resident legal entities operating in Belarus through a PE are required to follow the filing and payment schedules established for Belarusian legal entities.

Representative office

Non-resident legal entities are also allowed to operate in Belarus via a representative office or to set up a resident legal entity.

A representative office of a non-resident company is defined as the structural subunit registered with the Ministry of Foreign Affairs, which is entitled either to engage in commercial activities in Belarus or not, conclude contracts, and undertake obligations according to the power of attorney issued to the management official of the branch by its head company (founder).

The representative office is not considered a legal person.

A representative office conducting commercial activities is taxed in the same manner as a PE or as a local resident company, with some exceptions.

A non-commercial representative office pays taxes due on its primary and auxiliary activities, such as real estate tax (with some exceptions), customs duties, input VAT, personal income tax, social security contributions due on employment of individuals, etc.

Income determination

Inventory valuation

Under domestic accounting legislation, stock used in the production and included in the cost of produced goods may be generally valued by the following methods:

- Cost of each unit.
- Average cost.
- First in first out (FIFO).

As of 13 March 2012, the LIFO and weighted-average cost methods are no longer applicable.

The inventory valuation method used for CIT purposes must be the same method established by the taxpayer's accounting policy.

Capital gains

Capital gains are subject to WHT. *See Capital gains tax in the Other taxes section for more information.*

Belarus

Dividend income

Dividends distributed by a resident company to another resident company are subject to 12% CIT, which is withheld by a paying company.

Dividends distributed by a foreign entity represent non-operating income of a receiving Belarus entity and are subject to 12% CIT payable by the receiving entity in Belarus, irrespective of the fact that the foreign entity has paid the WHT on dividends distributed.

Dividends received by venture companies are exempt from CIT.

Dividends received by taxpayers from Belarusian companies are exempt from CIT in hands of such taxpayers, since CIT on dividend income is withheld by a respective dividend-distributing entity.

Inter-company dividends

The Tax Code provides no exemptions for taxation of inter-company dividends.

Interest income

Interest on most types of bonds, including state, municipal, bank, and corporate bonds, is exempt from Belarusian CIT under certain conditions provided for in the Tax Code.

CIT at the standard rate of 18% is charged on interest income derived by a Belarus entity from another resident company.

Interest income derived by a Belarus entity from a foreign entity represents non-operating income of a receiving Belarus entity and is subject to 18% CIT payable by the receiving entity in Belarus, irrespective of the fact that the foreign entity has paid the WHT on interest income.

Other significant items

The following types of income are, *inter alia*, exempt from CIT:

- ‘Target financing’ received from the state or municipal budget. The taxpayer is required to hold separate accounting records of income and expenses derived and incurred within ‘target financing’.
- Amounts payable to a shareholder, whether in cash or in kind, not in excess of its contribution to the statutory capital of a legal entity in case of:
 - its liquidation
 - a shareholder’s withdrawal from a legal entity, or
 - if the shares are purchased by a legal entity from its shareholder.
- Payments to a shareholder in the value of its shares or as a result of an increase in their nominal value made by the legal entity’s sources, as long as such payments do not change the percentage of participation of either shareholder or change the percentage for less than 0.01%.
- Goods (works, services), material rights, and monetary means granted:
 - to the successors by a legal entity in case of its restructuring
 - as an inter-company transfer pursuant to corporate decision
 - to taxpayers engaged in crop production, animal husbandry, fish farming, and beekeeping, provided that this income is spent for the appropriate activities, or
 - as a foreign gratuitous help on conditions stipulated by the President.

- Monetary means or assets received by a taxpayer from its shareholders as their contributions to the statutory capital, not in excess of amounts provided by the statutory documents.

Foreign income

Foreign income of Belarusian resident legal entities is taxed, except for dividends, as ordinary business income at the standard 18% CIT rate.

There are no provisions in tax legislation that allow tax deferral with regard to foreign income.

Deductions

Deductible expenses include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit, unless the Tax Code of Belarus or presidential regulations provide otherwise.

Depreciation

Assets may be depreciated using the directly proportional (straight-line) depreciation method, indirect disproportionate depreciation method, production depreciation method, or a declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law.

Almost all types of fixed assets (buildings, premises, equipment, vehicles) are depreciated for tax purposes in accordance with the established procedures. Land plots are not depreciated. There are many different depreciation rates established for different types of fixed assets. Generally, fixed assets may be divided into five basic groups as follows:

Group of assets	Description of the assets	Annual depreciation rate (%)
1	Buildings and constructions, premises	1 and 2
2	Vehicles and equipment	10
3	Cars and vehicles	12.5
4	Inventories (furniture, tools, etc.)	10
5	Computers and other related devices	20

Application of depreciation premium is possible, i.e. taxpayers are entitled to classify/record part of the initial value of fixed assets and intangible assets as costs of production and supply of goods (works, services) for CIT purposes as of the date when such assets were initially accounted for. The amount of a premium is limited to 10% of the initial value with regard to buildings and constructions and to 20% of the initial value with regard to machines, equipment, vehicles, and intangible assets.

Fixed assets recorded on accounts of state-owned companies are obligatorily re-valued one time per year because of BYR inflation.

Starting from 1 January 2012, annual re-evaluation of fixed assets for companies other than state-owned is required only with regard to buildings, constructions, and transfer units. A particular company is entitled to re-evaluate fixed assets on its own initiative as of 1 January of the year following the reporting one.

Belarus

Goodwill

Goodwill and personnel experience cannot be recognised as intangible assets for CIT purposes.

Start-up expenses

Deduction of start-up expenses is possible only after registration of a business presence (i.e. respective resident entity) and starting from the first year of its operations, provided respective provisions for deductions of such expenses are outlined in the accounting policy of that resident entity.

Interest expenses

Interest expenses are generally deducted for CIT purposes unless interest is accrued on past-due loans. Moreover, from January 2013, thin capitalisation restrictions have to be considered (*see Thin capitalisation in the Group taxation section*).

Bad debt

Bad debts are deductible only if proved and specific criteria are met.

Charitable contributions

Amounts not exceeding 10% of an entity's gross profit granted to health, education, social welfare, culture, and sports state institutions; religious organisations; and public associations (i.e. 'Belarusian Society of Disabled Persons', 'Belarusian Society of Deaf Persons', 'Belarusian Fellowship of Visually Impaired Persons'), or spent for acquisition of goods, works, or services for the benefit of the named institutions, are deductible.

Taxes

Generally, the following taxes, dues, and other compulsory charges to the budget are deductible for CIT purposes:

- Excise taxes paid at purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus, with some exceptions.
- Environmental tax, with certain exceptions.
- Real estate tax, except the tax due on late construction in progress.
- Land tax, with some exceptions.
- Tax on natural resources, with some exceptions.
- State dues.
- Offshore charge.
- Tax on providers.
- Payments for social and other mandatory security.

The following taxes shall not be deducted for CIT purposes:

- VAT paid, with certain exceptions (*see below*).
- CIT.

VAT can be treated as deductible for CIT purposes only if acquired goods, works, or services are used for production or sale of goods, works, or services that are VAT exempt.

Other significant items

Limited deductible expenses also include the following:

- Modernisation and reconstruction of fixed assets. The value of modernisation or reconstruction is included in the acquisition costs.
- Business trips.
- Representation.
- Management fees payable to outsourcing companies, with restrictions.
- Natural losses, with certain exceptions.
- Cost of fuel and energy resources, with restrictions established for certain entities.
- Membership fees, contributions, and premiums, with restrictions.
- Premiums on certain types of voluntary insurance, with restrictions.
- Amounts of financial rebates granted by a supplier to a customer.

Non-deductible expenses also include the following:

- Expenses on provision or acquisition of works and services not related to the taxpayer's business activities.
- Construction, maintenance, and other works, including all types of repair of assets that are not used for the purpose of earning income or receiving economic benefit.
- Default interest (forfeit), fines, and other sanctions paid to the budget.
- Dividends paid and similar type of payments.
- Contributions made to the authorised share capital.
- Expenses incurred on purchase and/or creation of depreciable assets.
- Depreciation for tangible and intangible assets not used in business, as well as for tangible assets that are not in operation.
- Cost of assets or material rights transferred as advance or a pledge to a third party.
- Expenses covered by reserves for future expenses created by a taxpayer in the prescribed manner.
- Interest on overdue loans, as well as on loans related to the acquisition of tangible and intangible assets, other long-term assets.
- Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as expenses that are not considered as allowable deductions under the Tax Code of Belarus.

Net operating losses

As of 1 January 2012, procedures for carrying forward tax losses have been introduced in the Tax Code.

Belarusian companies are given the possibility to recognise in the current tax period the tax losses incurred in the previous tax periods. Taxpayers are entitled to carry forward losses incurred in 2011 and subsequent tax periods. Losses can be carried forward only for ten years after the tax period when the losses have occurred.

However, tax loss carry forward is not applied to losses:

- incurred as a result of the activities outside Belarus, if a company is registered as a taxpayer in a foreign state with regard to such activities, or
- incurred in a tax period when a company was entitled to apply CIT relief (tax exemption) established for several tax periods.

Tax losses may not be carried back in Belarus.

Payments to foreign affiliates

Payments to foreign affiliates of a Belarusian resident legal entity in amounts of financing aimed to cover ongoing costs thereof are deductible for CIT purposes in Belarus.

Belarus

Group taxation

Currently, group taxation legislation and regimes are not available in Belarus. Each Belarusian entity is regarded as a separate taxpayer and may not deduct tax losses of any other group entity. The Belarus Tax Code does not allow the deduction of foreign losses from domestic taxable income, or domestic losses from foreign taxable income.

Transfer pricing

Amendments to the Tax Code, effective from 1 January 2012, empower tax authorities to carry out transfer pricing control. Though Belarusian transfer pricing legislation is not as thorough as it is in the European Union (EU) member states, taxpayers should be aware of the following:

- In the course of the tax audit, tax authorities are entitled to check whether prices set by particular taxpayers are in line with market prices.
- Tax authorities can apply the market price of a transaction for taxation purposes in the following cases:
 - Selling of immovable property/real estate when the transaction price is 20% lower than the market price.
 - Entering into a foreign-trade transaction, including one with a related party, when the transaction price (price of a number of transactions with one person per year) is simultaneously higher than BYR 20 billion and 20% lower than the market price.
- The tax base for CIT purposes can be adjusted by the tax authorities on the basis of a market price only if the amount of CIT to be paid to the budget of Belarus goes up as a result of such adjustment.
- To determine the CIT base on the basis of a market price, the tax authorities are entitled to apply the following methods:
 - Comparable uncontrolled price method (CUP).
 - Resale price method.
 - Cost plus method.
- Before the tax audit has been carried out, a taxpayer who applied transaction prices not corresponding to market prices is entitled to independently adjust the CIT base according to market prices and pay the remaining CIT.

Moreover, there is a mechanism to control transfer pricing provided by the DTTs applicable for Belarus. When interests under the loan agreement between related parties exceeds the arm's-length rate/basis (the amount which will be agreed upon between independent parties under normal business circumstances), a 5% rate of WHT (provided by the DTT) will be charged on the arm's-length interest charge. Excess amounts, if any, will be taxed by WHT at a 10% rate.

Thin capitalisation

Starting from 1 January 2013, the amount of interest accrued on a loan granted to a taxpayer by a foreign company that can be deducted for CIT purposes will be limited if, in aggregate:

- a foreign company holds over 20% of shares in a statutory capital of a taxpayer or a foreign company and a taxpayer are treated related parties, and
- the amount of loan exceeds the value of a foreign company's share in a statutory capital of a taxpayer by more than three times.

Tax credits and incentives

Foreign tax credit

If a Belarusian legal entity derives income subject to taxation abroad, the tax paid abroad may be deducted from the calculated CIT.

In accordance with the Tax Code, the amount deducted from CIT may not exceed that part of the tax calculated in Belarus that is attributed to the income received in a foreign jurisdiction. If there is a valid DTT with the country in question, the provisions of the treaty regarding avoidance of double taxation shall apply.

Special tax treatments

The Belarusian Tax Code provides a more favourable tax environment for particular resident legal entities. Special tax treatments are available for certain taxpayers depending on their location, amount of revenue, number of individuals employed, types of business, etc. Special tax treatments include, but are not limited to, the following:

- Simplified taxation.
- Tax on farmers and other producers of agricultural products.
- Tax on gambling business.
- Tax on lotteries.
- Tax on electronic interactive games.
- Free economic zones.

In cases where activities fulfil the criteria of a special tax treatment, the taxpayer is not permitted to use the general taxation regime with regard to income deriving from those activities, with certain exceptions. Concerning simplified taxation and tax on farmers, the taxpayer is entitled to determine whether to apply such treatment or not.

Incentive for employing disabled persons

Entities employing disabled persons, if their number exceeds 50% of the average number of employees for the reporting period, are exempt from CIT due on taxable profit derived from production activity.

Exemption of CIT on profits derived from various activities

- Profit of entities engaged in baby food production is exempt from CIT.
- Profit derived by insurance companies from investments of insurance reserves under the contracts of voluntary life insurance is exempt from CIT.
- Entities engaged in manufacturing of prosthetic and orthopaedic devices (including dental prostheses), provision of rehabilitation, and disability services are exempt from CIT due on profit derived from sales of these items.
- Entities deriving profit from sales of plants (except for flowers, ornamental plants), livestock (except for farming), fish farming, and beekeeping, provided the entities raise them, are exempt from CIT.

Tax holidays

Profit from the services provided by hotels, sport complexes, ski complexes, touristic complexes, motels, campgrounds, etc. located at tourist sites established by the President of Belarus is exempt from CIT for three years starting from the commencement of its activities, with certain exceptions.

Profit derived by motels, hotels, campgrounds, maintenance stations, objects of trade and catering, cleaning, located on the roadsides of national highways is exempt from CIT for five years starting from the day when the permission for such activities

Belarus

was received. This privilege does not cover roadside objects located on land plots granted for construction of gasoline stations.

Scientific and Technological Association incentive

Entities that are members of the Scientific and Technological Association established by Belarusian State University, in accordance with legislation, are entitled to apply a 5% CIT rate on their profit derived from sales of information technology and provision of information technology development services.

Incentives for the production of innovative, high-technology goods and laser-optical equipment

Income derived from selling goods of one's own production included in the list of innovative goods approved by the Council of Ministers is exempt from CIT.

Income from selling goods of one's own production that are included in the list of high-technology goods approved by the Council of Ministers is exempt from CIT, provided revenue from selling of such goods comprises at least 50% of total revenue of a taxpayer. If revenue from selling high-technology goods is less than 50% of total revenue, such income is taxable at a reduced CIT rate of 10%.

Entities engaged in production of laser-optical equipment, accounting for at least 50% of the entity's total production, can benefit from a reduced CIT rate of 10% under certain conditions.

Free economic zones

Entities that are registered in Belarusian free economic zones are exempt from CIT for five years, starting from the date when the profits were declared, in relation to goods, works, and services of their own production that are either exported or included in the list of import-substituting goods and supplied in Belarus. After expiration of this term, the CIT rate is 9%.

Land plots within the borders of free economic zones, provided to free economic zone residents registered after 1 January 2012 for the purpose of objects construction, are exempt from land tax for the period of such objects' design and construction, but not more than for five years from the registration date. Free economic zone residents registered before 1 January 2012 can take advantage of this land tax exemption only during the period from 1 January 2017 till 1 January 2022, as long as design and/or construction works are performed.

Moreover, residents of free economic zones are granted, under certain conditions, a partial VAT relief and a relief for real estate tax on buildings and constructions located in free economic zones.

High Technologies Park (HTP)

The following tax privileges are granted to residents of the HTP:

- Full exemption from CIT.
- Full exemption from VAT when selling goods, works, or services in the territory of Belarus.
- Full exemption from VAT and customs duties when importing certain goods for the purpose of using them in activities connected with high technology.
- No land tax is applicable to land plots situated in the HTP on which a construction project is being carried out; however, this exemption will last no longer than three years.

- Full exemption from real estate tax on buildings and installations, including above-standard incomplete constructions that are situated in the territory of the HTP.
- 9% personal income tax (PIT) for employees of residents of the HTP.
- No social security contributions on the part of employees' income exceeding the average salary in Belarus.

Taxation of holding companies

A holding company is a group of companies where one company of the group is considered to be a management company by virtue of influence over decisions passed by other group companies (i.e. the subsidiaries) as a result of holding 25% and more of their ordinary stock (shares).

A management company is entitled to create a centralised fund by means of contributions of subsidiaries from net income thereof. Subject to certain conditions, monetary means received by a management company (Belarusian tax resident) from subsidiaries (Belarusian tax residents) for the purpose of a centralised fund formation as well as monetary means transferred from a centralised fund to subsidiaries are not considered taxable income for CIT purposes.

Free of charge transfer of assets within a qualifying holding group is exempted from CIT in Belarus, conditional on certain terms, in particular:

- A management company possesses more than 50% of shares (stock) of its subsidiaries receiving or transferring assets.
- Participants of a holding group receiving or transferring assets are not under special tax treatment and are not registered in any free economic zone.
- Participants of a holding group receiving or transferring assets do not participate in securities market and do not manufacture alcoholic and tobacco products; they are not banks, non-bank financial intermediaries, or insurance companies.
- Received assets are used to manufacture products, to perform works, and to render services.

Withholding taxes

The following income of a non-resident entity in Belarus that is not derived through a PE is deemed to be Belarusian-source income and is subject to WHT at the rates provided:

Income	WHT (%)
Freight charges, (including demurrage) and freight-forwarding services (excluding freight charges for marine transportation and forwarding services)	6
Interest on any type of debt obligations including securities	10
Royalties	15
Dividends and other similar income	12
Penalties, fines, and other sanctions received for breach of contractual liabilities	15
Income derived from sports, entertainment activities, or performers' activities	15
Income derived from innovative, design, research and development activities, design of technological documentation engineering design, and other similar works and services	15
Income from provision of guarantees	15
Income from provision of disk space and/or communication channel for placing information on the server and services for its maintenance	15

Belarus

Income	WHT (%)
Proceeds from the sale, transfer (with title), or lease of immovable property located in Belarus	15
Income derived by a foreign entity from the sale of an enterprise as a complex of assets located in Belarus	15
Capital gains (income from the sale of shares/stocks) in local companies	12
Income from the sale of securities (except shares)	15
Income derived from provision of works and services	15

In calculation of WHT due on certain types of income, a taxpayer is permitted to deduct related expenses following the rules specified by the Tax Code.

Generally, the tax is withheld and paid to the budget by a local entity, an individual entrepreneur, a branch, or a PE of a foreign company. When certain types of Belarusian-source income is received (e.g. capital gains, sale, transfer of title of ownership or lease of immovable property, provision of licenses for software, and other copyright objects), a WHT shall be paid directly by a foreign entity.

Currently, Belarus has over 60 DTTs with foreign countries. Where a treaty for the avoidance of double taxation with the country in question contradicts the local tax regulations, the treaty provisions prevail.

Reduction of or an exemption from WHT under a DTT may be obtained if a special residence certificate is completed and provided to the tax authorities before the payment is made.

If the payment that is covered by the DTT has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund. The claim for a refund must be filed with additional documents, such as a residence certificate, copies of the contract, and other documents related to the payment.

The following table indicates WHT rates stipulated in DTTs Belarus is a party to:

* In general, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the governments of contracting states.

** DTT with this country is in force since Belarus is a successor of the former USSR.

Tax administration

Taxable period

The taxable period for CIT is a calendar year. The taxable period for CIT withheld on dividends accrued by Belarusian companies is a month.

Tax returns

A CIT return shall be submitted on an annual basis, whether a company has taxable income or not, by the 20th day of March following the reporting year.

The above CIT reporting rule is also applicable on PEs of foreign companies as well as non-commercial representative offices. Since 2011, an annual CIT return filed by non-commercial representative offices does not have to be audited by a Belarusian certified auditor.

CIT withheld on inter-company dividends must be reported by a tax withholding entity no later than the 20th day of the month following the month in which the dividends were accrued.

A tax-withholding entity must submit a WHT return to the tax authorities no later than the 20th day of the month following the month when the payment was made.

Payment of tax

CIT must be paid via equal instalments, on a quarterly basis, before 22 March, 22 June, 22 September, and 22 December of a current tax period.

Remaining CIT, if any, shall be paid not later than 22 March following the expired tax period. The above deadlines shall also be followed by PEs of foreign entities.

CIT on inter-company dividends shall be paid no later than the 22nd day of the month following the month when dividends were paid.

WHT is to be calculated, withheld, and paid by a Belarusian company or a PE of a non-resident company no later than the 22nd day of the month following the month when the payment was made.

Belarus

Audit cycle

Subject to certain exceptions, tax authorities are not permitted to carry out scheduled audits within two years after the company's incorporation or representative office's (of a foreign company) registration. Subsequently, scheduled audits can be performed every one, three, or five years depending on whether a company is referred to as high-risk, middle-risk, or low-risk.

Tax authorities can perform off-schedule audits only on the grounds defined in legislation (e.g. reorganisation or liquidation of a taxpayer, information about tax violations).

Statute of limitations

Generally, a statute of limitations for tax liability is either three years after the date when violation was committed or six months after the date when violation was exposed by tax authorities.

B

Significant developments

At the end of November 2011, various new Belgian tax measures were proposed under the 2012 budget agreement. Some were enacted in the Miscellaneous Provisions Act of 28 December 2011. Parts of the other measures were adopted in the Program Act of 29 March 2012. Note that other proposed tax measures will, in principle, take statutory form later in 2012, e.g. carryforward restriction of excess notional interest deduction (NID).

Please note this information is current as of 1 June 2012. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2012.

Notional interest deduction (NID)

Belgian corporate income taxpayers can claim an NID, reflecting the economic cost of the use of capital (based on the cost of long-term, risk-free financing). The NID rate for a given tax year is, in principle, based on the ten-year government bond interest rate. The NID rate is 3.425% (3.925% for small and medium-sized enterprises [SMEs], see the *Tax credits and incentives section for the definition*) for tax year 2012 (financial year 2011). As of tax year 2013, the rate of the NID is capped at 3% (3.5% for SMEs). The effective NID rate for tax year 2013 (accounting years ending between 31 December 2012 and 30 December 2013, both dates inclusive) is 3% (3.5% for SMEs).

Note that the 2012 Belgian budget agreement provides that new excess NID (i.e. NID that exceeds the taxable basis to set-off) can no longer be carried forward (still to be enacted by the Belgian parliament), whereas, under the current rules, 'excess NID' (i.e. NID that cannot be claimed owing to the taxpayer having insufficient taxable income) can be carried forward for a maximum of seven years.

However, the 'stock' of excess NID (stemming from previous years, i.e. tax years 2012 and before) can, under the proposed rules, still be carried forward for a maximum of seven years (as is currently the case), though the excess NID that can be applied in a given year will, in principle, be limited according to the proposal (not yet enacted).

Anti-abuse rule

According to the old section 344 (1) of the Belgian Income Tax Code (BITC), the Belgian tax authorities could (under certain conditions) reclassify a legal deed (transaction) into a different transaction (with generally a higher tax burden), provided both transactions had the same or similar legal consequences. A similar provision existed for registration duties and inheritance tax purposes.

Belgium

Under the new anti-abuse section 344 (1) of the BITC (Act of 29 March 2012), a legal deed (or a whole of legal deeds) is not opposable towards the tax authorities if the tax authorities can demonstrate that there is tax abuse. For the purpose of the anti-abuse rule, 'tax abuse' is defined as:

- A transaction in which the taxpayer places oneself, in violation with the purposes of a provision of the BITC or related royal decree, outside the scope of this provision of the BITC or related royal decree, or
- a transaction that gives rise to a tax advantage provided by a provision of the BITC or related royal decree whereby getting this tax advantage would be in violation with the purposes of this provision of the BITC or related royal decree and whereby getting the tax advantage is the essential goal of the transaction.

In case the tax authorities uphold that a legal deed or a whole of legal deeds can be considered as tax abuse, it is up to the taxpayer to prove the choice for the legal deed or the whole of legal deeds is motivated by other reasons than tax avoidance (reversal of burden of proof). In case the taxpayer cannot prove this, the transaction will be subject to a taxation in line with the purposes of the income tax law, as if the tax abuse did not take place.

Entry into force: The new rule is applicable as of tax year 2013 and on legal deeds performed during a taxable period closing on or after 6 April 2012. Any change made as of 28 November 2011 to the closing date of the annual accounts will be disregarded. For inheritance and registration duties purposes, the new rule is applicable to legal deeds performed as of 1 June 2012.

Capital gains on shares

Capital gains realised by a Belgian company (or Belgian branch) on shares are 100% tax exempt (if certain conditions are met). Under the new rule (Act of 29 March 2012), an extra condition is introduced, being a minimum holding period of an uninterrupted period of one year in full ownership. If the capital gain is realised before the minimum holding period of one year is reached, the capital gain is taxed at a rate of 25.75% (25% plus a 3% crisis tax plus tax increase in case of insufficient prepayments). There are some exceptions (e.g. for financial institutions).

Capital losses on shares continue to be non-deductible.

Entry into force: The new rule is applicable as of tax year 2013 and on capital gains realised as of 28 November 2011 during a taxable period closing on or after 6 April 2012. Any change made as of 28 November 2011 to the closing date of the annual accounts will be disregarded.

Thin capitalisation rules

Before the Act of 29 March 2012, Belgian tax law did not have general thin capitalisation rules. A specific thin capitalisation rule existed for interest payments or attributions to (real) beneficiaries taxed at low rates on that interest. This was the so-called 7:1 debt-to-equity ratio.

The new thin capitalisation rule according to the Program Act of 29 March 2012 replaces the 7:1 rule with a new rule introducing a 5:1 debt-to-equity ratio. Note that the entry into force will be determined by a Royal Decree, no later than 1 July 2012.

For the purposes of the thin capitalisation rule, equity is defined as the sum of the taxed reserves at the beginning of the taxable period and the paid-up capital at the end of

the taxable period. For the purposes of this new rule, certain non-taxed reserves are deemed to be taxed reserves. It regards certain tax-free reserves created upon a merger/de-merger (e.g. as a result of merger goodwill).

For the purposes of the thin capitalisation rule, debt is defined as:

- all loans, whereby the beneficial owner is not subject to income taxes, or, with regard to the interest income, is subject to a tax regime that is substantially more advantageous than the Belgian tax regime, and
- all intra-group loans (whereby 'group' should be interpreted in accordance with section 11 of the Companies Code).

Bonds and other publicly issued securities are excluded, as well as loans granted by financial institutions.

Interest payments or attributions in excess of the 5:1 ratio are not tax deductible. The new thin capitalisation rule is not applicable to loans contracted by (movable) leasing companies (as defined by article 2 of the Royale Decree n° 55 of 10 November 1967) and companies whose main activity consists of factoring or immovable leasing and this within the financial sector and to the extent the funds are effectively used for leasing and factoring activities.

An anti-abuse rule is introduced stating that in case the loans are guaranteed by a third party or in case loans are funded by a third party that partly or wholly bears the risk related to the loans, the third party is deemed to be the beneficial owner of the interest, if the guarantee or the funding has tax avoidance as main purpose.

According to the draft program law of 15 May 2012, the proposed thin capitalisation rules will modify in order to safeguard companies having a centralised treasury function in Belgium. The amendment will introduce a netting for thin capitalisation purposes at the level of the interest payments and interest income related to the centralised financing function/cash pool function.

Company cars

Disallowed expenses

The Act of 28 December 2011 introduces an additional disallowed expense in relation to company cars.

The new disallowed expense is 17% of the new benefit in kind. This new disallowed expense cannot be offset against the NID, tax losses, or other tax deductions. Thus, the new disallowed expense results in a minimum tax base.

Entry into force: Benefits in kind attributed as of 1 January 2012.

Withholding tax (WHT) measures

Dividend WHT

- The current general WHT rate of 25% does not change.
- The current 15% rate (applicable in certain cases) becomes 21%.
- The WHT rate applicable to liquidation surpluses remains at 10%.
- The WHT rate on redemptions of own shares increases from 10% to 21%.
- The numerous WHT exemptions (specifically for payments to companies) are not affected.

Belgium

Entry into force: Income attributed or made payable as of 1 January 2012.

Interest WHT

The WHT on interest increases from (generally) 15% to 21%.

The numerous WHT exemptions (especially for payments to companies) are not affected.

Entry into force: Income attributed or made payable as of 1 January 2012.

Royalty WHT

The standard 15% WHT rate on royalties does not change. The numerous WHT exemptions are also not affected.

Taxes on corporate income

Corporate income tax (CIT)

In general, the tax base for CIT purposes is determined on an accrual basis and consists of worldwide income less allowed deductions. The rules are equally applicable to companies and permanent establishments (PEs). It is assumed that all income received by a company is, in principle, business income. The income tax base is based on the Belgian Generally Accepted Accounting Principles (GAAP) financial statements of the company.

General rate

CIT is levied at a rate of 33% plus a 3% crisis tax, which is a surtax, implying an effective rate of 33.99%. This rate applies to both Belgian companies (subject to Belgian CIT) and Belgian branches of foreign companies (subject to Belgian non-resident CIT). Capital gains on shares realised without meeting the one year holding requirement are taxed at 25.75% (25% plus a 3% crisis tax).

Reduced rates

A progressive scale of reduced rates applies to taxpayers with lower amounts of taxable income. If the taxable income is lower than 322,500 euros (EUR), the following rates apply (including the 3% crisis tax):

Taxable income (EUR)	CIT rate (%)
0 to 25,000	24.98
25,001 to 90,000	31.93
90,001 to 322,500	35.54

Even if their taxable income does not exceed the aforesaid ceilings, certain companies are excluded from the reduced rate and always subject to the normal CIT rate. These companies include, amongst others, companies that are owned 50% or more by one or more companies.

Surcharge

A surcharge is due on the final CIT amount upon assessment (including the crisis surtax). The surcharge can be avoided if sufficient advance tax payments are made (*see Payment of tax in the Tax administration section for more information*). For tax year 2012 (i.e. financial years ending between 31 December 2011 inclusive and 30 December 2012 inclusive), the surcharge is 2.25%.

Secret commissions tax

A special assessment of 309% (300% plus 3% crisis tax) is applicable to so called 'secret commissions', which are any expense of which the beneficiary is not identified properly by means of proper forms timely filed with the Belgian tax authorities. These expenses consist of:

- Commission, brokerage, trade, or other rebates, occasional or non-occasional fees, bonuses, or benefits in-kind forming professional income for the beneficiaries.
- Remuneration or similar indemnities paid to personnel members or former personnel members of the paying company.
- Lump-sum allowances granted to personnel members in order to cover costs proper to the paying company.

The secret commissions tax is not applicable if the payer demonstrates that the payments have been reported in the beneficiary's Belgian tax return. The 309% rate is also applicable to hidden profits that are not part of the property of the company, with the exception of certain specific hidden reserves. The special assessment of 309% and the expenses themselves are, however, fully deductible for CIT purposes.

Local income taxes

No tax is levied on income at the regional or local level. Note that immovable assets (land, building, and possibly machinery and equipment) situated within the Belgian territory are, in principle, subject to an immovable WHT that is levied locally.

Corporate residence

A company is considered to be a resident of Belgium for tax purposes if it has its registered office, its principal place of business, or its seat of management in Belgium. The seat of management has been defined by Belgian case law as the place from where directing impulses emanate or the place where the company's effective management and central administration abide, meaning the place where the corporate decision-making process actually takes place.

Permanent establishment (PE)

The definition of a Belgian establishment under Belgian domestic tax law corresponds, but is broader than, the definition of a PE under both either the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention (OECD MC) or Belgium's double tax treaties (DTTs). Since the latter prevail over domestic law, Belgium cannot levy tax if a non-resident has a Belgian establishment that does not constitute a PE under the relevant DTT. Although Belgium would not be entitled to tax the profit attributable to the Belgian establishment in such a case, the foreign company should still abide by certain formal tax requirements (e.g. filing a non-resident tax return, responding to requests for information).

Belgium

Other taxes

Value-added tax (VAT)

Scope of VAT

The following transactions are subject to VAT in Belgium:

- The supply of goods effected for consideration by a taxable person acting as such.
- The supply of services effected for consideration by a taxable person acting as such.
- The importation of goods.
- Intra-Community acquisition of goods for consideration by a taxable person acting as such or by a non-taxable legal person.

Intra-Community supply and intra-Community acquisitions

An intra-Community supply of goods is a supply of goods whereby the goods are moving from one European Union (EU) member state to another EU member state. In the member state of departure of the goods, the goods can be, under certain conditions, VAT exempt. As a result, the intra-Community acquisition of the goods (i.e. the arrival of the goods in the other member state) will be taxable.

Standard and other VAT rates

The standard VAT rate is 21%. This rate applies to all goods and services not qualifying for one of the reduced VAT rates.

The following supplies of goods and services have a 12% VAT rate:

- Restaurant and catering services, excluding beverages.
- Phytopharmaceutical products.
- (Inner) tubes.
- Certain combustible material.

The following supplies of goods and services have a 6% VAT rate:

- Works on immovable property (limited in time and with strict conditions).
- Basic necessities, such as food and pharmaceuticals.
- Some printed materials.
- Transport services of persons.
- Hotels and camping.
- Admission to cultural, sporting, and entertainment venues.

The following supplies of goods and services are VAT exempt with credit ('zero-rated'):

- Exports and certain related services.
- Intra-Community supplies of goods.
- Certain transactions on goods placed in a Customs or VAT warehouse.
- Cross-border passenger transportation by ship or aircraft.
- Supplies to diplomats and international organisations.
- Certain supplies of goods and services to certain vessels and aircrafts mainly involved in international passenger transport.

The following supplies of goods and services are VAT exempt without credit:

- Healthcare services.
- Social services.

- Education services.
- Sport services.
- Cultural services.
- Services of lawyers.
- Banking services.
- Interest charges.
- Financial services.
- Insurance services.
- Land and real estate sales.
- Property leasing and letting.

It should be noted that specific conditions may apply to the above two categories.

VAT grouping

VAT grouping came into effect in Belgium on 1 April 2007. Under a VAT group, independent legal persons are treated as one single taxable person for VAT purposes if they are closely linked financially, economically, and organisationally. Hence, for VAT purposes, all supplies of goods and services to or by the group members are deemed to be made to or by the group itself.

The application of a VAT group has, amongst other, the following consequences:

- No issuance of 'inter-company' invoices between companies in the VAT group.
- No charging of VAT between companies in the VAT group.
- Filing of one VAT return for all companies in the VAT group.
- No risks of incorrect VAT treatment of transactions between companies in the VAT group.
- No cascade of the limitation of the right to deduct VAT when on charging costs to companies in the VAT group.

Import duties

Goods coming from outside the European Union and imported into Belgium are subject to import duties. Import duties are calculated based on three main elements:

Classification

All products are classified based on the rules laid down in the Combined Nomenclature (CN). A single commodity code (CN-code) applies for every product. An import duty rate is linked to every CN-code.

Origin

Based on international trade agreements, a preferential import duty rate (read: a lower import duty rate) may apply to products imported in the European Union meeting the origin criteria in the country participating in the agreement.

Valuation

The customs value is determined based on one of the six rules laid down in the Community Customs Code. These valuation rules are harmonised on a global level through the General Agreement on Tariffs and Trade (GATT) valuation agreement.

Various economic customs regimes are available allowing optimisation schemes throughout the supply chain.

Excise duties

Excise products are divided into the following two groups:

Belgium

- Community excise products: These are defined as excise products at the EU-level, and the same procedures should apply in all EU member states. Products in scope are (i) alcohol, (ii) alcoholic beverages, (iii) energy products, and (iv) manufactured tobacco.
- National excise products: These are defined by the individual countries. Specific Belgian legislation applies to the national excise products, which are (i) non-alcoholic beverages and (ii) coffee.

The excise duty rates for community and national excise products are fixed at the national level and vary and change regularly. Excise legislation includes compliance.

Registration duties

Purchases and transfers of real estate located in Belgium, including buildings (except new buildings, which are subject to VAT as described above), are subject to registration duty at the rate of 12.5% of the higher of transfer price or fair market value (except in the Flemish Region, where the applicable rate is 10%).

In cases where the purchase or transfer of land is subject to VAT, no registration duties will be charged on the purchase or transfer.

In principle, no registration duty is due upon a capital contribution; only a fixed fee of EUR 25 is due.

Stamp duties

Stamp duties are due on transactions relating to public funds that are concluded or executed in Belgium, irrespective of their (Belgian or foreign) origin, to the extent that a professional intermediary intervenes in these transactions. Exemptions for non-residents and others are available.

Branch income

Branch profits are subject to the normal tax rate for Belgian corporations of 33.99% (or 25.75% for certain capital gains on shares not meeting the one-year holding period) plus the possible surcharge for absence/insufficiency of advance payments (*see the Taxes on corporate income section*). Transfers of branch profits to the head office abroad do not give rise to further taxation in Belgium. Branches can benefit from the reduced CIT rates under specific conditions (*see the Taxes on corporate income section*).

Capital gains realised on real estate located in Belgium by non-resident companies are subject to a professional withholding tax (WHT) at the normal CIT rate of 33.99%. The professional WHT is in fact an advance payment of the final Belgian non-resident CIT and can be offset against it. Any balance is refundable.

In general, taxable basis is the difference between the profits actually realised and the tax-deductible costs actually incurred in the hands of the Belgian branch as determined from the separate set of accounts of the Belgian branch. Please note, however, that no legal requirement exists to keep a separate set of accounts in the hands of the PE, in case no legal branch is deemed to exist in Belgium.

Should no separate set of accounts be kept, the taxable basis in the hands of the Belgian branch, in principle, will be determined on the basis of the Royal Decree implementing the BITC. As a result, the yearly taxable basis will be determined on 10% of the gross turnover realised in Belgium with a minimum of EUR 7,000 per employee and an

absolute minimum of EUR 19,000. Note that such determination of the taxable basis is often formalised in a written agreement with the local Belgian tax inspector without deviating from the tax law criteria as mentioned.

Income determination

Inventory valuation

Belgian accounting law provides for the following four methods of inventory valuation: the method based on the individualisation of the price of each item, the method of the weighted average prices, the last in first out (LIFO) method, and the first in first out (FIFO) method. All of these methods are accepted for tax purposes.

Capital gains

Capital gains are subject to the normal CIT rate. For tax purposes, a capital gain is defined as the positive difference between the sale price less the costs related to the disposal of the asset and the original cost of the acquisition or investment less the depreciations and write-offs which have been deducted for tax purposes.

Capital gains realised on tangible fixed assets and intangible assets can be subject to a deferred and spread taxation regime, provided that the following conditions are cumulatively met:

- The assets realised have been held by the company for more than five years, and depreciations have been claimed on them for tax purposes.
- The proceeds of the transfer are reinvested fully in tangible or intangible assets subject to depreciation in Belgium within three years (or five years in the case of reinvestments in buildings, vessels, or aircrafts).

If the above conditions are met, the taxation of the net capital gain is spread over the depreciation period allowed for tax purposes of the asset that is acquired to fulfil the reinvestment obligation. Deferred and spread taxation occurs at the normal CIT rate.

Net capital gains realised on shares are 100% tax exempt if dividends from such shares would meet the 'taxation conditions' under the dividends-received deduction regime (*see the Deductions section for more information*). The 'minimum participation condition' provided under that regime needs not be satisfied for capital gain exemption.

Recently, a minimum holding period of an uninterrupted period of one year in full ownership was introduced in order to qualify for the capital gain exemption on shares.

The minimum holding requirement is applicable as of tax year 2013 and on capital gains on shares realised as of 28 November 2011 during a taxable period closing on or after 6 April 2012. Any change made as of 28 November 2011 to the closing date of the annual accounts will be disregarded.

If the capital gain is realised before the minimum holding period of one year is reached, the capital gain is taxed at a rate of 25.75% (25% plus a 3% crisis tax plus tax increase in case of insufficient prepayments). There are some exceptions (e.g. for financial institutions).

Dividend income

Dividends received by a Belgian company are first included in its taxable basis on a gross basis when the dividends are received from a Belgian company or on a

Belgium

net basis (i.e. after deduction of the foreign WHT) when they are received from a foreign company.

Provided certain conditions are met, 95% of the dividend income can be offset by a dividends-received deduction (DRD).

Dividends-received deduction (DRD)

A DRD of 95% of dividend income can be applied under certain conditions (*see below*). Any unused portion of the DRD from dividends received from a European Economic Area (EEA) subsidiary or a subsidiary from a country with which Belgium has concluded a DTT with a non-discrimination clause on dividends can be carried forward to future tax years. The possibility of carrying forward the unused portion of DRD from qualifying non-EEA dividends has not been codified, but should continue to apply based on an October 2009 practice note. The same also applies for dividends from Belgian subsidiaries.

The DRD is subject to a (i) minimum participation condition and (ii) a taxation condition.

Minimum participation condition

According to the minimum participation condition, the recipient company must have, at the moment of attribution, a participation of at least 10% or an acquisition value of at least EUR 2,500,000 in the distributing company. However, that condition neither applies to dividends received or attributed by investment companies nor to dividends attributed by intra-municipal organisations. The beneficiary of the dividend must have been holding the full legal ownership of the underlying shares for at least one year prior to the dividend distribution or commit to hold it for a minimum of one year.

Taxation condition

The taxation condition, in summary, means that the dividend income received must have been subject to tax at the level of the distributing company and its subsidiaries if the former redistributes dividends received.

The taxation condition is based on five 'exclusion' rules and certain exceptions to these rules. Basically, the exclusion rules apply to the following:

- Tax haven companies, which are companies that are not subject to Belgian CIT (or to a similar foreign tax) or that are established in a country where the common taxation system is notably more advantageous than in Belgium. Countries in which the minimum level of (nominal or effective) taxation is below 15% qualify as tax havens for the application of the regime (a list of tainted countries has been published). The common tax regimes applicable to companies residing in the European Union are, however, deemed not to be notably more advantageous than in Belgium.
- Finance, treasury, or investment companies that, although are subject in their country of tax residency to a taxation system similar to that of Belgium as mentioned in the item above, nevertheless benefit from a taxation system that deviates from the one commonly applicable.
- Offshore companies, which are companies receiving income (other than dividend income) that originates outside their country of tax residency and in these countries such income is subject to a separate taxation system that deviates substantially from the common taxation system.

- Companies having branches that benefit globally from a taxation system notably more advantageous than the Belgian non-resident corporate taxation system. This exclusion is deemed not applicable to EU companies with an EU branch.
- Intermediary holding companies, which are companies (with the exception of investment companies) that redistribute dividend-received income, which on the basis of regulations mentioned under the items above would not qualify for the DRD for at least 90% of its amount in case of direct holding.

While this is a summary of the major exceptions, numerous exceptions to these exclusion rules exist and need to be analysed on a case-by-case basis.

Bonus shares (stock dividends)

Distribution of bonus shares to shareholders in compensation for an increase of the share capital by incorporation of existing reserves is, in principle, tax free. The situation may be different if the shareholder has the choice between a cash or stock dividend.

Interest, rents, and royalties

Interest that accrued, became receivable by, or was received by a company, and rents and royalties received by a company, are characterised as business profits and taxed at the general CIT rate of 33.99%. The income can be offset against available tax assets.

Foreign income

A Belgian resident company is subject to CIT on its worldwide income, and foreign source profits not exempt from taxation by virtue of a DTT (*see the treaty list in the Withholding taxes section*) are taxable at the normal CIT rate in Belgium (i.e. 33.99%, or 25.75% for certain capital gains).

A foreign tax credit may be available for foreign royalty income and foreign interest income. *See the Tax credits and incentives section for more information.*

Undistributed income of subsidiaries, whether or not they are foreign, is not subject to any Belgian income tax (i.e. no controlled foreign company [CFC] rules).

Deductions

As a general rule, expenses are tax deductible in Belgium provided that they are incurred in order to maintain or to increase taxable income, they relate to the taxpayer's business activity, they are incurred or have accrued during the taxable period concerned, and that evidence of the reality and the amount of such expenses is provided by the taxpayer.

Depreciation and amortisation

Depreciation of an asset is tax deductible to the extent that it results from a devaluation of the asset, and the devaluation effectively occurred during the taxable period concerned. The depreciation methods that are accepted by Belgian tax law are the straight-line method (linear method) and the double-declining balance method. In the latter case, the annual depreciation may not exceed 40% of the acquisition value. The double-declining method may not be used for intangible fixed assets, automobiles, minibuses and automobiles used for mixed purposes, and for assets, the use of which has been transferred to a third party (e.g. in the case of operational leasing).

Belgium

Depreciation rates are based on the estimated lifetime of the assets concerned, which are normally agreed upon by the taxpayer with the tax authorities. However, for certain assets, rates are set by administrative instructions as follows:

Assets	Depreciation rate (%)
Commercial buildings	3
Industrial buildings	5
Machinery and equipment (depending on the type)	20 or 33
Rolling stock	20

Intangible fixed assets have to be amortised over a period of at least five years for tax purposes (except research and development [R&D] expenses, for which the minimum amortisation period is three years).

For the year of acquisition of an asset, only the proportionate share of an annual depreciation calculation can be accepted as depreciation for income tax purposes (in principle to be computed on a daily basis). This provision, however, applies only to companies that cannot be considered as SMEs (*see the Tax credits and incentives section for the definition*). In contrast, SMEs can deduct a full year of depreciation in the year of acquisition.

Ancillary expenses incurred at the time of acquisition must be depreciated in the same way as the asset to which they relate (i.e. no full deduction in the year of acquisition, except for SMEs). Alternatively, ancillary expenses relating to the acquisition of land can be written down and such write-downs, if they are justified, may constitute a deductible expense.

Goodwill

Belgian accounting and tax laws allow amortisation of goodwill arising at the occasion of an asset deal. For Belgian tax purposes, the amortisation period, which depends on the elements included in the goodwill, is a minimum of five years, and the straight-line method must be applied. According to the Minister of Finance, '*clientele*' (client lists) should be amortised over a period of ten to 12 years. The aforesaid accounting and tax amortisation for goodwill is not available in the case of mergers or de-mergers that occur tax free (i.e. they, among other things, follow the continuity principle from an accounting perspective).

Start-up expenses

Incorporation costs, at the election of the taxpayer, may be deducted fully in the year of incorporation or can be depreciated over a maximum period of five years.

Interest expenses

Interest paid is not tax deductible to the extent that it exceeds an amount corresponding to the market rate, taking into account factual circumstances proper to the appraisal of the risk linked to the operation and particularly the financial situation of the debtor and the duration of the loan. The latter test, however, is not applied with respect to interest paid to a Belgian-based financial institution.

Provisions and bad debt reserves

Provisions and bad debt reserves are tax deductible provided that:

- they are set up to cover clearly identified losses and charges (i.e. not to cover 'general' risks that have been rendered probable by events) which took place during the taxable period concerned
- they are booked at the end of the financial year in one or more separate accounts on the balance sheet
- they are reported on a specific form enclosed with the tax return, and
- they relate to losses and charges that are deductible for Belgian tax purposes.

Charitable contributions

Charitable contributions may not be less than EUR 40 and may not exceed 5% of the total net income of the taxable period, with a maximum of EUR 500,000 to be tax deductible. The law includes an exhaustive list of gifts that are deductible, including gifts in cash to certain social, cultural, or scientific organisations. Gifts to other organisations are deductible if approved by a Royal Decree or by (mediation of) the Minister of the Federal Public Service of Finance.

Automobile costs

As of 1 January 2010, the deductibility rate of automobile costs in the hands of Belgian companies (and Belgian branches) varies in a range between 50% and 120% of the automobile costs, depending on the CO2 emission of the automobile.

Moreover, the deduction for fuel costs has been limited to 75% as of 1 January 2010.

An additional disallowed expense in relation to company cars entered into force as of 1 January 2012. The new disallowed expense is 17% of the benefit in kind. This new disallowed expense cannot be offset against the NID, tax losses, or other tax deductions. Thus, the new disallowed expense results in a minimum tax base.

Taxes, fines, and penalties

Belgian resident and non-resident CIT, including advance tax payments, any surcharge imposed in case of insufficient advance tax payments, any interest for late payment of the CIT, and any Belgian movable WHT, is not tax deductible in Belgium. Immovable WHT (i.e. real estate tax), secret commissions tax and foreign taxes, however, are considered as tax deductible.

Regional taxes and contributions, including penalties, increases, ancillary expenses, and interest for late payment, are not tax deductible in Belgium (certain exceptions apply).

Any administrative and judicial fines or penalties (except for VAT proportionate fines) are not tax deductible in Belgium.

Disallowed expenses

The following expenses are not tax deductible in Belgium (this list is not exhaustive):

- 31% of restaurant expenses.
- 50% of representation expenses and business gifts (there are exceptions).
- Advantages granted to employees for social reasons with certain exceptions (e.g. hospitalisation insurance premiums, gifts of a small value).
- Capital losses on shares (except in the case of liquidation, up to the amount of paid-up capital of the liquidated company).
- Brokerage, commissions, commercial discounts, or other payments allocated directly or indirectly to a person in the form of a Belgian public bribery.
- 17% of the benefit in kind of company cars.

Belgium

Net operating losses

Principle: carryforward without limitation in time

Tax losses can, in principle, be carried forward without any limitation in time.

Change of control

In case of change in control of a Belgian company (e.g. if the shares of the company are transferred and along with them the majority of the voting rights), the amount of tax losses and notional interest deduction carried forward available in that company (before the change of control) can no longer be offset against future profits unless the change can be justified by legitimate needs of a financial or economic nature in the hands of the loss realising company (i.e. evidence must be brought that the change is not purely tax driven).

The condition of legitimate needs of a financial or economic nature is considered to be fulfilled when the employees and activities of the company are maintained by the new shareholder or when the company's control is acquired by a company belonging to the same consolidated group of companies as the former controlling company.

A ruling can be obtained from the Belgian tax authorities to obtain upfront certainty on the Belgian tax treatment of the contemplated operation, so as to ensure the losses are not forfeited as a result of a change of control.

Tax-free merger or (partial) de-merger

In the case of a taxfree merger or (partial) de-merger, Belgian tax law provides for a partial transfer/maintenance of the rollover tax losses of the absorbed/absorbing company. The carried forward tax losses of the companies involved are then reduced based on the proportionate net fiscal value of the company (before the restructuring) compared to the sum of the net fiscal values of both the merging entities (before the restructuring).

No carryback

There is no tax loss carryback provision under Belgian tax law.

Payments to foreign affiliates

A Belgian corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length. However, when such payments are made, either directly or indirectly, to a foreign person, entity, or branch which is not subject to tax or is subject to a tax regime that is notably more advantageous than the Belgian tax regime on such income, there is a reversal of the burden of proof. Such charges will be disallowed unless the Belgian enterprise can prove that the payments are reasonable and that they correspond to genuine and real transactions.

Fees, commissions, etc. paid to beneficiaries located in foreign countries, which are not properly reported on Form 281.50 and Summary Form 325.50, will, in principle, be subject to the secret commissions tax (of 309%), unless the taxpayer can prove that the beneficiaries have declared this income in their Belgian tax return.

Payments to tax havens

Companies subject to Belgian CIT or Belgian non-resident CIT that make direct or indirect payments to recipients established in tax havens are obligated to declare them if they are equal to or exceed EUR 100,000 during the tax year. The reporting has to be made on a special form to be attached to the (non-resident) CIT return.

In the event of nonreporting, the payments will be disallowed expenses for CIT purposes. Where the payments have been reported duly and timely, their tax deductibility will be subject to the ability of the taxpayer to prove that (i) said payments were made as part of genuine, proper transactions and (ii) they were not made to an entity under an artificial construction.

A tax haven is defined as: (i) a jurisdiction regarded by the OECD as not being cooperative concerning transparency and international exchange of information or (ii) a jurisdiction where the nominal corporate tax rate is less than 10%. A royal decree containing the list of countries where the nominal corporate tax rate is lower than 10% is published. The countries which are mentioned in the royal decree are the following:

- Abu Dhabi
- Ajman
- Andorra
- Anguilla
- the Bahamas
- Bahrain
- Bermuda
- British Virgin Islands
- Cayman Islands
- Dubai
- Fujairah
- Guernsey
- Jersey
- Jethou
- Maldives Islands
- Isle of Man
- Micronesia (Federation of)
- Moldavia
- Monaco
- Montenegro
- Nauru
- Palau
- Ras el Khaimah
- Saint-Barthelemy
- Sark
- Sharjah
- Turks and Caicos Islands
- Umm al Qaiwain
- Vanuatu
- Wallis-and-Futuna

Group taxation

Belgium does not apply any tax consolidation mechanism with respect to corporate tax.

Transfer pricing

The arm's-length principle is formally codified in the BITC. In addition, the authorities can make use of other, more general, provisions in the BITC to challenge transfer prices (e.g. the general rules on the deductibility of business expenses). The BITC contains provisions that tackle artificial inbound or outbound profit shifting. These are the so-called provisions on abnormal or gratuitous benefits.

If a Belgian tax resident company grants an abnormal or benevolent benefit, the benefit should be added back to the taxable income as a disallowed expense unless the benefit was taken into account to determine the taxable basis of the beneficiary. Even if the abnormal or gratuitous benefit is taken into account for determining the taxable basis of the beneficiary, the tax deductibility of the related expenses can still be denied in the hands of the grantor. Notwithstanding the above exception, the abnormal or benevolent benefit should be added back to the taxable income when the benefit is being granted to a non-resident affiliated company. Such granted abnormal or benevolent benefits can be offset against any tax deductible items (e.g. tax losses carried forward, notional interest deduction).

If a Belgian tax resident company receives an abnormal or benevolent benefit, and to the extent that such benefit is received from a related company, the benefit received cannot be offset by the Belgian company against its current year or carryforward tax losses or other tax deductions (e.g. dividends-received deduction, patent income deduction, notional interest deduction, and investment deduction). According to the position of the tax authorities, the taxable basis of a Belgian company equals at least the amount of the benefit received.

Belgium

There are no specific transfer pricing documentation requirements or rules on the selection of transfer pricing methods included in the Belgian tax legislation. Nevertheless, the Belgian tax authorities adhere to the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and the EU Code of Conduct. In the administrative guidelines that were issued, taxpayers are urged to proactively compile a coherent and consistent documentation set, although there is no legal obligation to do so.

Belgium has a special transfer pricing investigation unit with a mission to (i) build up and share transfer pricing expertise and (ii) carry out transfer pricing audits of multinationals present in Belgium through a subsidiary or branch.

Thin capitalisation

Before the Act of 29 March 2012, Belgian tax law did not have general thin capitalisation rules. A specific thin capitalisation rule existed for interest payments or attributions to (real) beneficiaries taxed at low rates on that interest. This was the so-called 7:1 debt-to-equity ratio.

The new thin capitalisation rule according to the Program Act of 29 March 2012 replaces the 7:1 rule with a new rule introducing a 5:1 debt-to-equity ratio. Note that the entry into force will be determined by a Royal Decree, no later than 1 July 2012.

For the purposes of the thin capitalisation rule, equity is defined as the sum of the taxed reserves at the beginning of the taxable period and the paid-up capital at the end of the taxable period. For the purposes of this new rule, certain non-taxed reserves are deemed to be taxed reserves. It regards certain tax-free reserves created upon a merger/de-merger (as a result of merger goodwill).

For the purposes of the thin capitalisation rule, debt is defined as:

- all loans, whereby the beneficial owner is not subject to income taxes, or, with regard to the interest income, is subject to a tax regime that is substantially more advantageous than the Belgian tax regime, and
- all intra-group loans (whereby 'group' should be interpreted in accordance with section 11 of the Companies Code).

Bonds and other publicly issued securities are excluded, as well as loans granted by financial institutions.

Interest payments or attributions in excess of the 5:1 ratio are not tax deductible. The new thin capitalisation rule is not applicable to loans contracted by (movable) leasing companies (as defined by article 2 of the Royal Decree n° 55 of 10 November 1967) and companies whose main activity consists of factoring or immovable leasing and this within the financial sector and to the extent the funds effectively are effectively used for leasing and factoring activities.

An anti-abuse rule is introduced stating that in case the loans are guaranteed by a third party or in case loans are funded by a third party that partly or wholly bears the risk related to the loans, the third party is deemed to be the beneficial owner of the interest, if the guarantee or the funding has tax avoidance as main purpose.

According to the draft program law of 15 May 2012, the proposed thin capitalisation rules will modify in order to safeguard companies having a centralised treasury function in Belgium. The amendment will introduce a netting for thin capitalisation purposes

at the level of the interest payments and interest income related to the centralised financing function/cash pool function.

Excess profit rulings

The Belgian tax authorities have at their disposal instruments to make both upward and downward adjustments to a taxpayer's Belgian taxable basis in case of non-arm's-length dealings. Belgium will refrain from taxing profits that a Belgian tax resident company would not have realised if it had not been party to related-party dealings.

As the cost structure (or the profit potential) of a member of a multinational group of companies will normally differ from that of a stand-alone entity, its profit will normally also be higher. Applying the arm's-length principle, this profit differential, which does not result from the functions performed and risks assumed by the respective entities, should not be allotted to the Belgian group member. As such, Belgian tax law allows for unilateral adjustments of the Belgian tax base similar to the corresponding adjustments in Article 9 of the OECD Model Convention. The underlying assumption is that the 'excess profit' forms part of the profits of the foreign related party.

The part of profit that is deemed to derive from related-party dealings and that is exempted from taxation in Belgium and how the 'part-of-the-profits-of-the-foreign-related-party' condition should be interpreted will need to be submitted to the Belgian Ruling Office to obtain a ruling in advance. Such rulings are granted for renewable periods of five years and are based on a detailed functional, economic analysis of the relevant Belgian activities with a view to determining a profit level commensurate with the company's functional and risk profile.

Tax credits and incentives

Foreign tax credits (FTCs)

Unilateral relief from double taxation of foreign-source income may be provided in the form of an exemption, credit, or tax reduction, depending on the type of income. Where taxable, foreign income is subject to tax only on its net amount (i.e. after deduction of expenses and foreign taxes).

Dividend income FTC

Generally, no FTC is available for foreign dividends.

Royalty income FTC

Unless a more advantageous provision (e.g. a tax sparing provision) would apply based on a DTT concluded by Belgium (*see the treaty list in the Withholding taxes section*), a FTC is granted under Belgian tax law with respect to foreign royalty income, provided that this income has effectively been subject to taxation in its source country. This FTC is equal to 15/85 of the net frontier amount (i.e. after deduction of foreign WHT) of the royalty. The FTC is included in the taxable basis of the recipient company and is only creditable against Belgian income tax to the extent that said foreign income is included in the taxable basis of the Belgian company. Excess FTC, if any, is not refundable.

Interest income FTC

Unless a more advantageous provision (e.g. a tax sparing provision) would apply based on a DTT concluded by Belgium (*see the treaty list in the Withholding taxes section*), the Belgian beneficiary of foreign interest income is entitled to a FTC under Belgian tax law, provided that this income effectively has been subject to taxation in its source country. The computation of the FTC is based on the net frontier interest income (i.e. after

Belgium

deduction of foreign WHT) and adjusted with a ratio taking into account the financial cost. The FTC is included in the taxable base of the Belgian lender. It is creditable against the CIT due but is not refundable in case of excess.

Notional interest deduction (NID)

Belgian corporate income taxpayers can claim NID for tax purposes, reflecting the economic cost of the use of capital, equal to the cost of long-term, risk-free financing. The NID rate for a given tax year is, in principle, based on the ten-year government bond interest rate for the calendar year two years prior to the tax year (e.g. for tax year 2012, reference is made to 2010 government bonds). The NID rate is 3.425% (3.925% for SMEs) for tax year 2012 (financial year 2011). The NID rate for tax year 2013 is 3% (3.5% for SMEs).

An SME is a company that does not exceed more than one of the following criteria during the two foregoing financial years when evaluated on a consolidated level: a yearly average number of employees of 50, a turnover of EUR 7.3 million (excluding VAT), or total asset value of EUR 3.65 million.

A company that employs more than 100 employees on the basis of an annual average workforce is automatically considered to be a 'large' company.

As of tax year 2013, (accounting years ending between 31 December 2012 and 30 December 2013, both dates inclusive) the NID rate is capped at 3%.

Note that the 2012 Belgian budget agreement provides that new excess NID can no longer be carried forward (to be enacted by the Belgian parliament), whereas, under the current rules, 'excess NID' (i.e. NID that cannot be claimed owing to the taxpayer having insufficient taxable income) can be carried forward for a maximum of seven years.

However, under the proposed rules, the 'stock' of excess NID (stemming from previous years, i.e. tax years 2012 and before) can still be carried forward for seven years (as is currently the case), though the excess NID that can be applied in a given year will be limited to 60% of the taxable profit (i.e. the profit remaining after setting off carried-forward tax losses and other tax deductions). The 60% limit will only be applicable to the part of taxable profit exceeding EUR 1 million. The portion of excess NID that cannot be used due to the '60% rule' (i.e. 40% of taxable profit minus EUR 1 million) can be carried forward indefinitely.

As for determining the basis on which this deduction is calculated, the company's share capital plus its retained earnings, as determined for Belgian generally accepted accounting principles purposes and as per the last year-end date, will have to be taken into account.

Certain adjustments to the equity should be made in order to avoid double use. The accounting equity as per the last year-end date has to be reduced by, amongst others, (i) the fiscal net value of financial fixed assets qualifying as participations and other shares, and (ii) in case of a company that has a foreign PE, located in a jurisdiction with which Belgium has concluded a tax treaty, the positive difference between the net book value of assets attributable to the foreign PE and the liabilities (other than equity). Whether or not the latter adjustment is in violation with the EU freedom of establishment is currently being investigated by the European Court of Justice.

In addition, various adjustments should be made in order to avoid abuse.

Investment deductions

The investment deduction is a deduction from the tax base in addition to the normal tax depreciation on, amongst others, qualifying patents, environmentally friendly R&D investments, and energy-saving investments.

A company can benefit from a one-shot investment deduction of 15.5% (for tax year 2013, i.e. financial years ending between 31 December 2012 inclusive and 30 December 2013 inclusive) of the acquisition value of qualifying investments. With respect to environmentally friendly R&D investments, a company can also opt for a spread investment deduction of 22.5% (for tax year 2013) of the depreciation on qualifying environmentally friendly R&D investments.

In case of insufficiency or absence of taxable profits, the investment deduction can be carried forward without any limitation in time or in amount. Certain restrictions apply as to the maximum amount of investment deduction carried forward that is tax deductible in a given year.

Under certain conditions, the investment deduction carried forward can be lost after a change of ownership (*see Net operating losses in the Deductions section*).

Note that the investment deduction for patents and R&D cannot be combined with the tax credit for patents and R&D.

Patents and R&D tax credit

As an alternative for the above investment deduction for patents and R&D, a company may opt for a tax credit for which the advantage corresponds to the advantage of the investment deduction (i.e. 15.5% one-time and 22.5% for a spread investment deduction), multiplied by the normal CIT rate of 33.99%. The investment deduction implies a deduction of the taxable basis, while the tax credit is a reduction of the tax due. A key advantage of the tax credit for patents and R&D is that it is refundable if it has not been deducted for five subsequent tax years.

Note that the amount of the tax credit should be deducted from the basis of the notional interest deduction.

Reduced payroll tax for qualifying researchers

75% of the payroll tax withheld from wages of qualifying researchers by a Belgian company or establishment does not need to be remitted to the Belgian Tax Revenue provided that the researchers are employed in research and development programmes and have a qualifying degree (such as a degree in (applied) sciences, veterinary medicines, bio-technology, etc.). For the employee's personal tax liability, the Belgian Tax Revenue considers that the payroll WHT amount entirely was withheld.

Patent income deduction (PID)

The PID allows a taxpayer to deduct, as an extra tax deduction in the tax return, 80% of qualifying gross patent income. Therefore, only 20% of gross patent income will be taxable at the normal CIT rate (33.99%), resulting in a maximum effective tax rate of 6.8%.

Qualifying taxpayers are corporate taxpayers in Belgium that are involved in the development or further improvement of patents through an in-house R&D centre. They include both Belgian companies and Belgian PEs of foreign companies. The company must be the owner, licensee, or usufruct holder of the patents for which they claim the benefits of the PID.

Belgium

To benefit from the PID, the R&D centre should qualify as a 'branch of activity' or 'line of business', which means that it should be a division of an entity that is capable of operating autonomously. The Belgian company or PE should have relevant substance to perform and supervise research and development activities, but may use subcontractors, related or unrelated, in its development of the patents or extended patent certificates. The R&D centre can be located outside Belgium but must belong to a Belgian legal entity.

Belgian companies or PE's acting as 'contract R&D' service providers on behalf of another company cannot qualify for PID because they are not the owners, holder of beneficial rights to, or licensee of the patent.

Qualifying patents

The PID applies where patents or supplementary protection certificates are owned by a Belgian company or establishment as a result of its own patent-development activities (partly or fully) in an R&D centre in Belgium or abroad. The PID also applies where patents or supplementary protection certificates are acquired by a Belgian company or establishment from a related or unrelated party, in full ownership, joint ownership, usufruct, or via license agreement, provided it has further improved the patented products or processes in the company's R&D centre in Belgium or abroad.

Other intellectual property (IP), such as copyrights, know-how, designs, trade or marketing intangibles, are as such not eligible for the Belgian PID.

The Belgian company or establishment can license the patents to other parties. Alternatively, it can use the patents, which are owned by it or licensed to it, to manufacture and supply patented products or services.

For patents licensed by the Belgian company or establishment to any party, whether related or unrelated, the tax deduction amounts to 80% of the relevant patent income to the extent the income does not exceed an arm's-length price.

For patents used by the Belgian company or establishment for the manufacture of patented products, manufactured by itself or by a contract manufacturer on its behalf, the tax deduction is 80% of the license fee (known as 'embedded royalties') that the Belgian company would have received had it licensed the patents used in the manufacturing process to an unrelated party.

No advance ruling is required to benefit from this deduction since it is applicable generally and automatically. Only minor compliance formalities apply. The taxpayer should submit a special application form together with the CIT return.

Withholding taxes

Domestic corporations and branches of foreign corporations paying dividends, interest, royalties, and/or certain rentals are required to withhold tax. The standard rates applicable under Belgian tax law are fixed at 25% for dividends, 21% for interest, and 15% for royalties and certain rentals. However, some WHT reductions/exemptions are foreseen under Belgian domestic tax law.

- A reduced Belgian WHT of 21% applies to dividend distributions relating to non-preference shares subscribed in cash, issued as of 1 January 1994 and which, upon issuance, are nominative or have been deposited with a financial institution in

Belgium, on condition that the distributing company does not irrevocably renounce its right to benefit from the reduced rate of WHT.

- A reduced Belgian WHT of 21% is possible for dividend distributions relating to non-preference shares issued as of 1 January 1994 in the context of a public offering (i.e. shares quoted on the stock exchange) on condition that the distributing company does not irrevocably renounce its right to benefit from the reduced rate of WHT.
- Under certain conditions, a reduced WHT of 21% applies to dividend distributions made by companies (located in the EEA) quoted on a stock market or by companies whose capital has been (partly) contributed by a PRIVAK/PRICAF (located in the EEA), which must also be quoted on a stock market. A PRIVAK/PRICAF is a company with the sole objective of collective investment in non-quoted companies and in growth companies.
- A WHT exemption is foreseen for the distribution of profits made by a Belgian subsidiary to an EU parent company, if both the parent and subsidiary have a legal form that is mentioned in the Annex to the EU Parent-Subsidiary directive, if both are subject to CIT, and if the parent company holds during an uninterrupted period of at least one year a shareholding of at least 10% in the capital of the distributing company (implementation of the Parent-Subsidiary directive). If the one-year holding requirement is not fulfilled at the time of distribution, the distributing company provisionally should withhold the amount of WHT due (but it does not have to pay the tax authorities). Once the one-year holding requirement is met, the provisionally withheld tax amount can be paid out to the parent company. If the one year holding requirement eventually is not complied with (e.g. because the Belgian participation is disposed of by the parent company before the one year holding requirement is met) then the Belgian company has to pay the amount provisionally withheld increased by interest for late payment (at an annual rate of 7%) to the competent services of the Belgian tax authorities.
- The application of the Parent-Subsidiary directive to dividend payments has been extended towards non-EU-resident companies. Dividends distributed towards a country that has concluded a tax treaty with Belgium containing a qualifying exchange of information clause can be exempt from WHT, subject to the same conditions as laid down in the Parent-Subsidiary directive.
- A 21% tax is applicable to the redemption of its own shares by a company.
- A 10% tax is applicable to profits that are attributed or made payable as a result of the full or partial liquidation of a company. However, the exemption of Belgian WHT is maintained for liquidation proceeds distributed by a BEVEK (*Beleggingsvennootschap met veranderlijk kapitaal*)/SICAV (*Société d'investissement à capital variable*), for dividends resulting from tax-free mergers, and for liquidation proceeds resulting from the redemption of own shares by a company listed on a regulated stock exchange. If the conditions described above apply, an exemption is also available.
- There is a WHT exemption on interest on loans granted by professional investors to banks established in the EEA or in a country which has concluded a DTT with Belgium. For example, banks situated in France, the United Kingdom, or the United States should be able to benefit from this exemption.
- No Belgium interest WHT arises where two related companies with tax residence outside Belgium are involved in a financial transaction with the intervention of a Belgium based intra-group financial enterprise. Under these circumstances, the Belgium intra-group financial enterprise is not required to retain Belgium interest WHT if the entity merely intervenes as 'paying agent intermediary'.
- Belgian domestic tax law also provides for a WHT exemption on the following movable income sourced in Belgium (this list is not exhaustive):

Belgium

- Income from deposits allocated or attributed to non-resident savers by Belgian banks.
- Income from bonds, treasury bonds, or other similar instruments of which the beneficiaries are identified as financial institutions.
- Income from receivables (this includes income from commercial receivables) or loans of which the beneficiaries are identified as financial institutions or professional investors. Professional investors are defined as any Belgian resident company or branch not being a financial institution or any equivalent. As a result, interest payments between two Belgian companies are exempt from WHT. The applicability of this exemption has been extended. As a result, on transactions with banks situated in a country with which Belgium has concluded a DTT, no withholding will be due. In practice this means that on transactions with inter alia French, UK, and US banks no withholding will be due.
- Income from bonds paid by a Belgian resident financial institution or by a Belgian resident company to non-resident savers, provided that such bonds are registered on a nominal basis with the debtor of the income during the entire period to which the interest relates and that the foreign beneficiaries of the interest are not located in a tax haven country or held by more than 50% by Belgian residents.
- Income from bonds and loans granted by 'eligible quoted companies' and 'eligible intra muros financial companies' to non-residents (under certain conditions).
- Interest payments between a Belgian company and an EU tax resident company in case of direct or indirect shareholding of at least 25% for an uninterrupted period of at least one year (i.e. transposition of EU Interest & Royalty directive in Belgian tax law).

With respect to payments made to non-resident corporations or individuals, WHT exemptions and/or reductions can also be found in the double taxation treaties concluded by Belgium.

Notes

1. The treaty concluded with ex-Yugoslavia is still applicable to Bosnia-Herzegovina, Macedonia, Serbia, and Montenegro.
2. Not applicable to Hong Kong. Note that a new treaty with China has been signed (but not yet into force). The rates under the new treaty are 5% and 10% for dividends, 10% for interest, and 7% for royalties.
3. The treaty concluded with the former USSR is still applicable to Kyrgyzstan, Moldova, Tajikistan, and Turkmenistan.
4. It concerns an EU country or the treaty contains a qualifying exchange of information clause. Hence, the rate of 0% is applicable subject to the same conditions as invoked by the Parent-Subsidiary directive (see above). Where multiple rates apply, the difference is generally based on the percentage of participation the recipient holds (directly) in the capital of the company paying the dividends.
5. Under the Bilateral II agreement concluded between Belgium and Switzerland, a rate of 0% is applicable under certain conditions.
6. With respect to EU countries, a WHT exemption is applicable provided that the conditions laid down in the Interest & Royalty directive are met (see above).
7. Since the Belgian domestic rate for interest is maximum 21% and for royalties is maximum 15%, the higher treaty rate will in principle not be applicable on interest and royalties arising from Belgium.

The treaties which are currently in force are listed above. The following tax treaties are signed, modified, or under renegotiation but have not yet entered into force (including some for the exchange of information clause): Andorra, Anguilla, Antigua & Barbuda, Australia, Bahamas, Bahrain, Belize, China, Czech Republic, Denmark, Dominica, Isle of Man, Finland, France, Germany, Gibraltar, Greece, Grenada, Iceland, Italy, Japan, Korea, Luxembourg, Macao, Macedonia, Malaysia, Malta, Moldova, Monaco, Montserrat, the Netherlands, New Zealand, Norway, Oman, Qatar, Saint Kitts & Nevis, Saint Lucia, Saint Vincent & the Grenadines, San Marino, Seychelles, Singapore, Spain, Tajikistan, Uganda, and the United Kingdom.

Tax administration

Taxable period

The assessment is based on the taxable income of a financial year. For the application of the rules on statutory limitations and of new laws, an assessment year is related to each taxable period. If the financial year corresponds with the calendar year, the assessment year is the following calendar year (e.g. financial year closing 31 December 2012 corresponds with assessment year 2013). If the financial year does not correspond with the calendar year, the assessment year equals the calendar year during which the financial year ends (e.g. financial year closing 30 June 2012 corresponds with assessment year 2012).

Tax returns

As a general rule, the annual resident or non-resident CIT return cannot be filed less than one month from the date when the annual accounts have been approved and not later than six months after the end of the period to which the tax return refers. For instance, assuming that the accounting year has been closed on 31 December 2012, the corporate tax return needs to be filed, in principle, by 30 June 2013 at the latest (this deadline is often postponed).

Payment of tax

CIT is payable within two months following the issue of the tax assessment. Interest for late payment is charged at the (non-cumulative) rate of 7% per year.

The advance tax payments needed to avoid the CIT surcharge (*see the Taxes on corporate income section*) can be made in quarterly instalments. In the situation where the company's financial year ends on 31 December 2011, the due dates for the advance tax payments are 10 April 2012, 10 July 2012, 10 October 2012, and 20 December 2012. Advance tax payments give rise to a tax credit. The tax credit amounts to 3%, 2.5%, 2%, or 1.5% of the advance tax payment made, depending on whether such payment has been made respectively in the first, second, third, or fourth quarter (percentages applicable for tax year 2012). If the total amount of credits exceeds the surcharge, no surcharge is due, but the excess is not further taken into account for the final tax computation. The taxpayer can choose to either have the excess reimbursed by the tax authorities as the excess can be used as an advance tax payment for the next year.

Audit cycle

A tax audit normally begins with a written request for information from the tax inspector. The taxpayer must provide the data requested within (in principle) one month. Any documentary evidence considered relevant to the audit can be requested and reviewed by the authorities. Once the tax inspector has completed the analysis, any adjustment is proposed in a notification of amendment outlining the reasons for the proposed amendment. The taxpayer has 30 days to agree or to express disagreement.

Belgium

The tax inspector then makes an assessment for the amount of tax that the tax inspector believes is due (taking into account any relevant comments of the taxpayer with which the inspector agrees). Thereafter, the taxpayer has six months within which to lodge an appeal with the Regional Director of Taxes. The decision of the Regional Director of Taxes may be appealed and litigated. In a number of circumstances, the intervention of the courts can be sought prior to receiving the decision of the Regional Director of Taxes.

Statute of limitations

Based on the Belgian income tax statute of limitations, the period during which the tax authorities are authorised to perform a tax audit and adjust the taxable basis is three years (except in cause of fraud, where the statute of limitations is extended to seven years) starting from the first day of the assessment year, unless the company's financial year does not correspond to the calendar year. Note that with respect to payroll tax or movable WHT, the statute of limitations period is five years.

Belgian ruling practice

Belgium has a long tradition of providing formal and informal rulings. Currently, a taxpayer may request an advance tax ruling on a wide range of subjects including but not limited to: CIT, individual tax, non-resident income tax, legal entity income tax, VAT, customs, and registration duties. The request should cover a 'specific and concrete' operation, which effectively is envisaged to be realised in a foreseeable future. The ruling should be filed before the transaction takes place. In practice, the ruling decision should be granted prior to the filing of the CIT return of the year of the transaction. A ruling is binding upon the Belgian tax authorities for a renewable period of a maximum of five years. Delivery of a requested ruling takes, on average, three months.

The Ruling Office is autonomous from the Belgian tax authorities and has the legal authority to issue decisions, which are binding upon the Belgian tax authorities. The Ruling Office increasingly has adopted a constructive approach towards the taxpayer and is seen in the Belgian tax practice as a powerful insurance instrument ascertaining the Belgian tax treatment of contemplated operations.

Topics of focus for tax authorities

Topics of interest to Belgian tax authorities include:

- Significant increase in transfer pricing audits by the special transfer pricing investigation unit.
- Payments of management fees or technical support fees.
- The deductibility of interest payments (e.g. to tax haven companies).
- Transactions with entities based in tax havens.
- Lump-sum allowances.
- Substance.

B

Significant developments

The Bermuda government has extended the tax exemption granted to Bermuda companies under the Exempt Undertakings Act of 1976 from 28 March 2016 until 2035. The extended Undertaking provides protection to companies from any newly enacted taxes on income or capital gains until 2035. Existing companies are required to apply for the tax exemption extension.

Taxes on corporate income

Income tax and taxes on capital gains are not imposed on corporations in Bermuda.

Corporate residence

Entities that are incorporated in Bermuda are considered to be resident in the country.

Other taxes

Value-added tax (VAT)

There is no VAT or sales tax in Bermuda.

Customs duties

Customs duties are imposed on almost all goods arriving on the island at varying rates.

Excise taxes

There are no excise taxes imposed in Bermuda.

Property taxes

A land tax is imposed on all developed land throughout Bermuda, with certain exceptions. The tax is assessed on the annual rental value of each valuation unit, depending on whether such unit is a private dwelling or any other dwelling. The owner of the valuation unit is liable for the land tax.

Private dwellings are taxed on a progressive scale of tax rates that ranges between 0.6% and 19% based on the annual rental value of the unit, while commercial properties are taxed on a single rate of tax of 4.4%.

Transfer taxes

There is no transfer tax imposed in Bermuda.

Bermuda

Stamp taxes

Bermuda does impose a stamp duty on certain types of legal instruments; however, exempt companies are not subject to stamp duty.

Social insurance

If an employer has employees in Bermuda for 26 or more weeks in a calendar year, the employer will have to register and obtain an account number from the Department of Social Insurance (DSI) (unless previously registered) and pay social insurance tax for its employees. At the same time, the employer must also apply for and obtain from the DSI a social insurance number for each employee, which is required to pay social insurance. Once the employer has registered for a social insurance account number and the employees have obtained social insurance numbers, the DSI will automatically send an electronic print-out to the employer with an itemised list of employees as well as the amount of social insurance tax due for the month. Under certain facts and circumstances, the employer may also file an Employee Amendment Form, which shows any change in status (i.e. termination or unpaid leave) of employees that could affect the amount of social insurance tax due.

The amount of social insurance tax due is calculated as 60.80 Bermudian dollars (BMD) per employee per week (effective 1 April 2010), with the employer and employee each paying half of the liability (or BMD 30.40). The employer must pay and remit monthly (for all employees), to the DSI, the total social insurance tax due per employee. The amount of social insurance tax due per month is based on the number of Mondays in the month and must be paid by the end of the following month. Employed persons over the age of 65 are not required to pay their half (BMD 30.40). The employer continues to pay their half (BMD 30.40).

Payroll tax

Under Section 3 of the Payroll Taxes Act 1995, an employer (viewed as the entity that has control over an individual's remuneration) is required to remit payroll taxes (currently 14% on all remuneration paid or given, up to a maximum compensation of BMD 750,000) for each of its employees whose employment in Bermuda exceeds four consecutive weeks in a calendar year (whether or not with one or more employers). If an employee's stay in Bermuda is for a period of less than four consecutive weeks, the employer is not obligated to remit the payroll taxes.

Once an employee's service period in Bermuda has exceeded four consecutive weeks, the employer must register the employee with the Office of the Tax Commissioner (OTC). The employer must obtain a payroll tax account number by filing an application with the OTC, if no previous account exists for such employee. The application must be filed within seven days after the end of the quarterly tax period (the four quarters end on 1 January, 1 April, 1 July, and 1 October) in which the employee's stay exceeded four consecutive weeks. A payroll tax return and remittance of tax must be filed with the OTC 15 days after the end of each quarterly period (i.e. 15 January, 15 April, 15 July, and 15 October). A return is due only when an employee's stay exceeds four consecutive weeks in a tax period. The employer may recover from the employee a maximum of 5.25% of the 14% payroll tax, and the employer is allowed an exemption of BMD 600 (of remuneration paid) per employee for each quarterly tax period. Penalties for tax returns filed late are 5% of the payroll tax due for each month (or part thereof) that the tax return is late (with a maximum of 30%).

Compensation subject to the payroll tax under the Payroll Taxes Act includes all remuneration paid or given to the employee. Remuneration includes:

- Wages, salary, leave pay, commission, gratuity, fee, bonus, perquisite, or allowance.
- Money paid under a profit-sharing scheme.
- Money or anything of value paid or given to an employee or ex-employee in connection with the permanent termination of employment.
- Any amount paid with respect to a retirement or provident fund, scheme, or society, or under a hospital or health insurance scheme.
- The value of meals, boarding, lodging, or other benefit of any kind, whether provided in cash or otherwise.
- The rental value of any place of residence provided rent-free, or the difference between the rent paid and the rental value if the rent paid is lower than the rental value.
- Any gain on the exercise or right to acquire company stock based on services rendered.

All employers or self-employed persons are required to report remunerations up to a maximum of BMD 750,000 per annum per employee, deemed employee, or self-employed person. There is no payroll tax on remunerations above BMD 750,000.

Please note that the Payroll Taxes Act is extremely broad in its definition of remuneration. Therefore, a Bermuda employer should take caution when calculating the amount of remuneration paid to an employee.

Annual company fee

Every exempted company shall, in the month of January, forward to the Registrar of Companies a declaration, signed on behalf of the company, as to the company's principal business and its assessable capital together with the appropriate fee payable. For the purposes of the Companies Act 1981, an exempted company means a local company which does not comply with the requirements of the Companies Act 1981. Exempt companies are generally owned by non-Bermudans.

Assessable capital of the exempted company (BMD)	Annual company fee (BMD)
0 to 12,000	1,870
12,001 to 120,000	3,820
120,001 to 1,200,000	5,890
1,200,001 to 12,000,000	7,850
12,000,001 to 100,000,000	9,815
100,000,001 to 500,000,000	17,530
500,000,001 or more	29,220

Corporate services tax

A 4% corporate service tax is imposed on a provider of corporate services in respect of gross earned revenue derived from an exempted undertaking for taxable corporate services provided during a tax period. Corporate services include corporate administrative services, corporate management services, corporate secretarial services, the provision of a registered office, the performance of functions in the capacity of director or resident representative, and the provision of accounting and/or financial services.

Hotel occupancy tax

A 7.25% tax is imposed on revenue received from hotels and other forms of accommodation.

Bermuda

Betting duty

There is a betting duty charge of 20% imposed on all bets made, received, or negotiated by a person licensed under the Betting Act of 1975.

Branch income

Branches are treated the same as other corporations doing business in Bermuda.

Income determination

Since income taxes are not imposed on corporations in Bermuda, income determination is not relevant in the context of Bermuda taxation.

Deductions

Since income taxes are not imposed on corporations in Bermuda, deductions from income are not relevant in the context of Bermuda taxation.

Group taxation

Since income taxes are not imposed on corporations in Bermuda, group taxation is not relevant in the context of Bermuda taxation.

Tax credits and incentives

Bermuda offers no specific tax incentives.

Withholding taxes

There are no withholding taxes in Bermuda.

Tax administration

Since income taxes are not imposed on corporations in Bermuda, tax returns are not required to be completed for corporate income tax compliance purposes. *For information regarding tax returns, due dates, and the payment of tax for non-income taxes imposed in Bermuda (e.g. Social insurance and Payroll tax), please see the Other taxes section.*

Other issues

Foreign exchange controls

Exempt companies and permit partnerships are considered as non-residents for exchange control purposes. This allows these entities to make dividend payments, distribute capital, open and maintain foreign bank accounts, maintain bank accounts in any currency, and purchase securities.

There is a Foreign Currency Purchase Tax imposed at the rate of 1% on foreign currency purchased by a resident from a local bank.

Tax treaties

There are no tax treaties between Bermuda and other nations due to the fact that Bermuda does not impose direct taxes. However, Bermuda has a double taxation agreement (DTA) with the Kingdom of Bahrain and a limited tax treaty with the United States which only applies to 'enterprises of insurance'. Bermuda also has tax information exchange agreements (TIEAs) with the following 24 countries: Aruba, Australia, Canada, China, Denmark, Faroe Islands, Finland, Germany, France, Greenland, Iceland, India, Ireland, Italy, Japan, Mexico, Netherlands, Netherlands Antilles, New Zealand, Norway, Portugal, Sweden, the United Kingdom, and the United States.

Under certain circumstances, the United States-Bermuda Tax Treaty provides for relief from taxation of insurance business profits. The business profits of a Bermudian insurance company will not be taxed in the United States unless a company has a permanent establishment (PE) in the United States. The United States-Bermuda Tax Treaty also provides for mutual assistance on tax matters. The purpose of a mutual assistance provision is to prevent or decrease tax avoidance. The United States also believed that having a tax treaty with Bermuda would be beneficial for the United States-Bermuda diplomatic relations.

Bermuda's DTA with the Kingdom of Bahrain includes a provision for the full exchange of information on criminal and civil tax matters, consistent with the internationally agreed standard for transparency and the exchange of information for tax purposes set by the Organisation for Economic Co-operation and Development (OECD).

Significant developments

Law 154, passed July 2011, established that compliance of taxes is mandatory and that it is not subject to a 'statute of limitation' period. This is in line with the provisions set forth under the tax policy included in the Bolivian Constitution approved in February 2009. Note that the current Bolivia Tax Code does still establish a period of four years (five in practice) in which the tax authorities have the right to review and recalculate taxes determined by taxpayers. Further regulations are expected to understand how provisions of Law 154 will be applied.

The Bolivian government, through Law 169, passed in September 2011, has restricted the utilisation of accumulated tax losses to the following three fiscal years. Note that financial institutions cannot utilise tax losses accumulated through December 2010; however, tax losses generated starting from fiscal year 2011 can be utilised over the following three fiscal years, as stated above. In addition, Law 169 establishes that new entrepreneurial productive projects with a minimum capital of 1 million bolivianos (BOB) can utilise tax losses over the five fiscal years following the start-up of operations. Finally, tax losses cannot be restated due to inflation in any case.

In late 2011, the Bolivian government, through Law 211, approved an additional income tax for financial institutions (except for development banks) with a return on equity index higher than 13%. This additional income tax rate is 12.5% and is applicable as of fiscal year 2012. Its calculation procedure has not yet been regulated.

In late 2011, the Bolivian government, through Law 212, introduced the '*solve et repete*' instrument applicable to tax enquires above 15,000 *Unidad de Foremnto a la Vivienda* (UFV, which is a sort of local currency adjusted by inflation) (approximately 3,650 United States dollars [USD]) which will be appealed by taxpayers through a litigation process before a judicial court. This instrument states that taxpayers must first pay the tax enquiry (including restatement of the omitted tax by inflation, interest, and penalties) before starting the tax litigation process. If the result of the tax litigation process is in favour of the taxpayer, the Bolivian tax authorities will refund the taxpayer the wrongfully paid tax, including restatement by inflation calculated from the date of payment up to the date of the refund.

Taxes on corporate income

All companies in Bolivia are subject to CIT at a rate of 25%. The taxable base is the profit arising from financial statements prepared in accordance with Bolivian generally accepted accounting principles (GAAP), adjusted for tax purposes (i.e. by non-

deductible and non-taxable items) as per the requirements established in the tax law and regulations.

Bolivia taxes the income generated by corporations following the ‘income source’ principle (i.e. on a territorial basis). Therefore, income arising from goods and assets located or utilised economically within Bolivian territory and from any activity carried out within the country is considered Bolivian income source. Hence, such income is subject to CIT, regardless of the nationality/residence of the parties involved in generating such income or the place where the contracts were subscribed.

Additional income tax on certain financial institutions

Note that as of fiscal year 2012, financial institutions (except for development banks) with a return on equity index higher than 13% must pay an additional income tax of 12.5%. The procedure to calculate this additional tax has not yet been regulated.

Surtax on extractive activities

There is an additional CIT at a rate of 25%, which affects only extractive activities of non-renewable natural resources (mining and oil/gas). This additional tax is calculated on the same basis as the normal CIT, except that two additional deductions are allowed: (i) up to 33% of the accumulated investment as from 1991; and (ii) 45% of the gross revenue of each extractive operation (e.g. a field or a mining site) with a threshold of BOB 250 million for each extractive operation.

Special taxes on mining companies

In addition to the general CIT of 25% and the 25% surtax on extractive activities, all mining companies are also subject to an additional tax, calculated on the taxable net profits, at the following rates:

- 12.5%, if the mining company carries out exploitation activities.
- 7.5%, if the mining company carries out manufacturing activities with raw minerals that add value.

Mining companies are also subject to mining royalties at a rate of between 1% and 7% (depending on the kind of mineral), calculated on the total sales price. Note that there is a 60% discount on the rates of mining royalties if minerals are sold within the Bolivian market. Mining royalties can be offset against CIT if official mineral prices are lower than the prices established by the tax law; however, in this case, mining royalties paid will not be deductible for CIT purposes. On the contrary, if official mineral prices are higher than the prices established by the tax law, then mining royalties will be considered a deductible expense for CIT purposes.

Tax on gross income

The tax on gross income (also known as transaction tax) generally taxes gross income arising from the performance of any economic or commercial activity (including non-profitable activities) at a rate of 3% on a monthly basis. However, exceptions exist for the sale of investments (as defined by the Stock Exchange Law) and the sale of minerals, oil and gas within the local market, as long as such sales will ultimately be exported.

Corporations pay either CIT or transaction tax, whichever is higher. From an administrative perspective, CIT is due and paid at the end of each tax year and is considered an advanced payment of transaction tax, while transaction tax is due monthly. If during the year the cumulative monthly transaction tax due exceeds the CIT prepayment, the taxpayer will be subject to transaction tax on a monthly basis until the

Bolivia

end of the tax year. For example, a corporation pays CIT for the 2012 fiscal year in April 2013. This payment is considered a prepayment for the transaction tax due between May 2013 and April 2014.

Local income taxes

There are no local taxes on income in Bolivia.

Corporate residence

A corporation is considered resident in Bolivia if it has been incorporated in Bolivia.

Permanent establishment (PE)

Note that Bolivian commercial laws allow foreign corporations to carry out isolated commercial acts in Bolivia without the obligation to constitute a permanent representation in Bolivia; however, such corporations cannot carry out habitual commercial acts without fulfilling the requirements established to constitute a company in Bolivia (e.g. through either a subsidiary or a branch). Unfortunately, Bolivian legislation does not include provisions to regulate situations that could trigger PE nor does it define what should be understood by 'carrying out habitual commercial acts'.

Other taxes

Value-added tax (VAT)

VAT is levied on the sale of movable goods and provision of services carried out within Bolivian territory at a rate of 13%, including definitive importations. Since this tax is included in the final price, the effective tax rate amounts to 14.94% (13%/87%).

Customs duties

Definitive importations are also subject to customs duties at a rate of 10% and 5% for consumption goods and capital assets, respectively. Customs duties are calculated over the 'transaction value' of the merchandise valued as per Bolivian customs legislation, plus transportation and insurance costs.

Taxes on specific goods for consumption (excise tax)

Specific goods are taxed at the following rates:

Product	Tax rate (%)
Cigarettes and tobacco for pipes	50 to 55
Vehicles (except those of high capacity and weight, which will pay a 10% rate of excise tax)	18

Other specific products taxed by specific measure:

Product	Tax rate (BOB)
Soft drinks (except natural water and fruit juices)	0.31/litre
Energising drinks	3.50/litre
Maize liquor	0.62/litre
Alcohol	1.18/litre
Beers with 0.5% or more volumetric degrees	2.60/litre + 1%

Product	Tax rate (BOB)
Wines	2.40/litre + 5%
Ciders and sparkling wines (except maize liquor)	2.40/litre + 5%
Liquors and creams in general	2.40/litre + 5%
Rum and vodka	2.40/litre + 10%
Other brandies/liquors	2.40/litre + 10%
Whiskey	10.01/litre + 10%

Special tax on hydrocarbons and derived products

A tax is charged on the commercialisation of the following products within the local market, regardless of whether they are produced in Bolivia or imported:

Product	Tax rate (BOB)
Gasoline	1.23/litre
Premium gasoline	2.18/litre
Aviation gasoline	1.85/litre
Kerosene	0.29/litre
National jet fuel	0.32/litre
International jet fuel	4.28/litre
National diesel oil	0.00/litre
Agro fuel	0.00/litre
Fuel oil	1.25/litre

Direct tax on hydrocarbons

A direct tax on hydrocarbons (IDH) is applied on the production of hydrocarbons, measured at the wellhead point, at a rate of 32%. To determine the taxable base for this tax, production of hydrocarbons must be valued taking into account the average sales price and considering the market (internal/external) where such hydrocarbons were sold.

Property tax on real estate and vehicles

Real estate and vehicles are subject to a property tax calculated at different rates based on a scale value determined by the municipal government as follows:

Property value (BOB)		Property tax liability		
From	Up to	BOB	Plus (%)	over excess of (BOB)
0	200,000	0	0.35	0
200,001	400,000	700	0.50	200,000
400,001	600,000	1,700	1.00	400,000
600,001	Onwards	3,700	1.50	600,000

Vehicle value (BOB)		Vehicle tax liability		
From	Up to	BOB	Plus (%)	over excess of (BOB)
0	24,606	0	1.50	0
24,607	73,817	492	2.00	24,607
73,818	147,634	1,722	3.00	73,818
147,635	295,268	4,306	4.00	147,635
295,269	Onwards	10,949	5.00	295,269

Bolivia

Stamp taxes

There are no stamp taxes in Bolivia.

Financial transaction tax

A financial transaction tax is levied on bank transactions (deposit or transfer of funds), carried out within the domestic financial system, at a rate of 0.15%.

Special tax on lottery and gambling games

A specific tax on lottery and gambling games is applied in Bolivia. The tax is also applicable to business promotions that involve a raffle or random activities in providing awards in order to increase sales or attract clients. The tax rate for lottery and gambling games is 30%, whereas the tax rate for business promotions is 10%.

Social contributions

The Pension Law establishes employer social contribution obligations. Social tax charges for employers are equal to 16.71% of gross salary in general and 18.71% for the mining sector.

Branch income

Branch income is subject to the same tax applicable to other types of Bolivian corporations (i.e. CIT of 25%). However, note that net profits of Bolivian branches are deemed to be distributed to the head office at the annual filing due date for CIT (i.e. 120 days after the fiscal year end); hence, a Bolivian branch must withhold 12.5% on such deemed distributed profits. Note that this can be avoided as long as the head office decides to reinvest Bolivian branch's net profits.

Income determination

Taxable income is determined based on the financial statements prepared under Bolivian GAAP; then the income is adjusted for tax purposes in accordance with guidelines provided with respect to non-deductible and non-taxable items.

Inventory valuation

Inventories must be valued at replacement cost or market value for tax purposes, whichever is lower. Replacement cost is defined as the necessary costs incurred in acquiring or producing the assets as of the year-end, whereas market value is defined as the net value that the company would have obtained for the sale of assets in normal conditions as of the year-end, less commercialisation direct expenses.

Capital gains

Bolivian legislation does not include specific regulations for capital gains. Capital gains must be included in annual CIT if they are considered Bolivian-source income and hence will be taxed at a rate of 25%.

Dividend income

Dividend income obtained from domestic corporations subject to CIT must be excluded from the net taxable profits of the investor. Dividend income obtained from foreign corporations is not subject to CIT due to the fact that is not considered Bolivian-source income.

Interest income

Interest income is subject to annual CIT if loans have been economically utilised within Bolivian territory and hence associated interest is considered Bolivian-source income.

Rent/royalty income

Rent/royalty income is subject to annual CIT as long as the income comes from an asset situated or economically utilised in Bolivian territory.

Foreign income

Bolivian corporations are taxed only on income generated within Bolivian territory.

Deductions

As a general principle, expenses may be deducted for CIT purposes as long as they are necessary to generate Bolivian-sourced income and are properly documented.

Apart from the above, the Bolivian Tax Code (BTC) has established minimum amounts (BOB 50,000) for which taxpayers must document their economic transactions through documents of payments recognised by the Bolivian financial system and regulated by the *Autoridad de Supervisión del Sistema Financiero* (ASFI) (i.e. the bank regulator), including the possibility to document economic transactions through payments made via foreign financial institutions. Non-compliance with these requirements implies the lack of the possibility to compute input VAT and to deduct the associated expenses for CIT purposes.

Depreciation

Depreciation of fixed assets is permitted for CIT purposes if fixed assets contribute to generate taxable income. Depreciation must be calculated based on a straight-line method and considering useful lives included in tax law. Fixed assets which are not included in the tax law must be depreciated under a straight-line method in accordance with their useful lives, and this need to be communicated before the tax authorities within ten working days following the incorporation of the affected fixed assets.

Some of the assets included in the tax law are as follows:

Asset	Useful life (years)	Depreciation rate (%)
Building	40	2.5
Fixture and furniture	10	10.0
Machinery	8	12.5
Equipments and facilities	8	12.5
Vehicles	5	20.0
Computer equipment	4	25.0
Tools	4	25.0
Processing plants for the oil/gas industry	10	10.0
Pipeline	10	10.0
Aircraft	5	20.0
Ships and motorboats	10	10.0

Bolivia

Goodwill

Intangible assets (including goodwill) with a true cost can be deductible for tax purposes within a five-year period as long as taxpayers have paid a price for their acquisition.

Start-up expenses

Taxpayers may choose to deduct start-up expenses within the first fiscal period or distribute proportionally their amortisation within a four-year period, commencing the first year of operation. Note that start-up expenses cannot exceed 10% of paid-in capital.

Interest expense

Interest paid to owners or shareholders is not deductible to the extent the interest rate exceeds the London Interbank Offered Rate (LIBOR) plus 3% in the case of foreign owners/shareholders and to the extent the interest rate exceeds the official interest rate on loans published by the Central Bank of Bolivia for national owners/shareholders. Interest deductible on shareholder loans may not exceed 30% of the total interest paid to third parties.

Bad debt

Allowances for bad debt provisions are permitted if determined as required by law, which establishes an average method based on uncollectable receivables of the last three years. Uncollectable receivables are defined by current legislation as those which come from trade receivables and either: (i) remain unpaid for more than one year and have been sued without obtaining a seizure or (ii) when the receivables do not justify being sued due to the quantity of the receivables, remain unpaid for more than three years.

Charitable contributions

Donations are not deductible unless made to non-profit organisations that are not subject to CIT. These donations are deductible up to a maximum of 10% of the donor's net taxable profit.

Compensation expenses

Salaries, as well as associated compensations, paid to employees without the application of withholding taxes (WHT) (i.e. RC-IVA) are not deductible. Employees are subject to RC-IVA at a rate of 13%, which is calculated on the gross salary (including any other compensation in kind/cash) less social contributions and four minimum national salaries (approximately BOB 48,950). RC-IVA must be withheld and paid to the tax authorities by the employer on a monthly basis.

Provisions for employees' severance payments are deductible. Provisions of other bonuses (e.g. holiday, productivity bonuses) accrued on behalf of employees are tax deductible as long as they are paid prior to the annual CIT filing due date and the company demonstrates it has withheld taxes (if applicable).

Fines and penalties

Fines and penalties arising from late tax payments are not tax deductible (except interest and restatement by inflation associated with tax obligations).

Taxes

Taxes effectively paid by the corporation as a direct taxpayer, other than CIT, are deductible for tax purposes. Any transaction tax (tax on gross income) that has been offset against CIT paid is not deductible for CIT purposes.

Taxes paid in the acquisition of fixed assets are not deductible. These taxes must be included in the cost of the asset and depreciated accordingly.

Other significant items

In broad terms, the following additional items are not deductible for tax purposes, according to current legislation:

- Owners' or shareholders' personal withdrawals and living expenses.
- Fees paid to individuals (i.e. acquisition of goods and services) for which no WHT have been withheld.
- Amortisation of trademarks and other intangible assets, unless a price has been paid to acquire them.
- Provisions that are not specifically authorised by the tax law and regulations.
- Depreciation of fixed assets that include a revaluation reserve.
- Losses arising from illegal acts.

Net operating losses

Tax losses can be utilised over the following three fiscal years. New entrepreneurial productive projects with a minimum capital of BOB 1 million can utilise tax losses over the five fiscal years following the start-up of operations (including hydrocarbons and the mining sector).

Financial institutions cannot utilise tax losses accumulated through December 2010; however, tax losses generated starting from fiscal year 2011 can be utilised over the following three fiscal years, as stated above.

Tax losses cannot be restated due to inflation in any case.

Bolivian legislation does not envisage carryback provision for tax losses.

Payments to foreign affiliates

Payments to foreign affiliates are subject to a 12.5% WHT with no restriction if the Bolivian company is remitting Bolivian-sourced income (e.g. interest on loans, provision of any kind of services, royalties).

Group taxation

Bolivia does not include group taxation rules within its legislation.

Transfer pricing

Bolivian legislation does not include provisions for transfer pricing; however, transactions carried out between related companies must be performed at market value or as they were carried between third parties (i.e. sort of arm's-length principle) and any excess must be considered non-deductible for tax purposes. Note that there are not further regulations as regards to how taxpayers must demonstrate that transactions carried out between related parties were carried out at market value.

Thin capitalisation

Bolivian legislation does not include provisions for thin capitalisation apart from establishing restrictions on deductibility of interest when funding is provided by shareholders (*see Interest expense in the Deductions section*).

Bolivia

Tax credits and incentives

Investment incentives

No incentives are granted in Bolivia for domestic or foreign investment.

Export incentives

Export activities benefit from reimbursement of VAT and customs duties paid in the process of producing goods to be exported (with some limitations for oil/gas companies).

Other incentives

Foreign exchange transactions are legal in Bolivia, and a system of free-floating exchange rates exists.

Tourist and lodging services by hotels to foreign tourists without a residence or address in the country are exempt from VAT.

Regional manufacturing tax incentives

New investments in manufacturing in the states of Oruro and Potosi are entitled to the following tax exemptions:

Exemption	Conditions of exemption
Import tariffs and VAT on imported machinery	Machinery imported exclusively for the new industry until start-up of operations.
Import tariffs on imported inputs	They do not replace domestic inputs of the same kind and are destined to a transformation process. The exemption is granted for the first ten years of operation.
Transaction tax	For ten years from the start-up of operations.
CIT	For ten years from the start-up of operations if the amount exempt is reinvested in fixed assets in the following fiscal year.

Withholding taxes

Payments made to Bolivian residents

Dividends paid to Bolivian residents, either individuals or corporations, are not taxable.

Payments made by corporations to individuals with respect to the acquisition of goods or provision of services that are not supported with an invoice or fiscal receipt are subject to a WHT of 8% on goods and 15.5% on services.

Payments to non-residents

Dividend payments, distributions of profits to the head office by Bolivian branches, interest payments, royalty payments, and fees paid for any type of services made to non-residents are subject to a WHT of 12.5%.

Tax treaties

Bolivia currently has in force double tax treaties (DTTs) with the Andean Community (i.e. Colombia, Ecuador, and Peru), Argentina, France, Germany, Spain, Sweden, and the United Kingdom.

Beneficial WHT rates on dividend distributions are provided by DTT with Spain and Sweden at 10% and 0%, respectively, provided the Spanish or Swedish holding company demonstrates it is the ultimate beneficial owner and holds more than a 25% interest in the Bolivian company.

Tax administration

Taxable period

The taxable year is the fiscal year. The fiscal year varies according to the activity of the corporation. Banks and commercial and other service activities have a fiscal year end as of 31 December; industrial, oil, and gas companies as of 31 March; agribusiness and forestry companies as of 30 June; and mining companies as of 30 September.

Tax returns

CIT is assessed on a self-assessment basis every fiscal year, and the due date for submission is 120 days after the fiscal year-end. Tax returns must be accompanied by audited financial statements (if applicable) and ancillary tax information as requested by the tax authorities.

Payment of tax

CIT is payable in one annual payment 120 days after the fiscal year-end, except for mining companies which are obliged to make advance payments on a monthly basis with respect to the additional tax (i.e. 12.5% and 7.5% for exploitation and manufacturing mining companies, respectively).

Audit cycle

The tax audit process starts by a formal notification from the tax authorities where they indicate fiscal periods and taxes to be reviewed, together with a requirement of information. Tax inspection may generally take a 12-month period. Shortly after the provision of the finalisation of the tax inspection, a preliminary report of the tax audit's results is provided to the taxpayer in which the total tax debt is described (i.e. tax due, restatement, interests and penalties), together with the legal arguments supporting the tax enquires.

Taxpayers do have 30 days after receiving the preliminary report to present all supporting documentation and technical arguments if consider that the tax enquires do not have grounds to be claimed. Tax authorities do have 60 days to review all documentation/arguments provided by the taxpayer and then issue the final report, which is the formal document that could be subject to tax litigation, either via administrative process or by a judicial court.

Statute of limitations

According to the current Bolivian Tax Code, tax authorities do have a four year period (five in practice) to review and recalculate taxes determined by taxpayers. However, note that Law 154, approved in July 2011, establishes that compliance of taxes is mandatory and is not subject to a 'statute of limitation' period. This is in line with the provisions set forth under the tax policy included in the Bolivian Constitution approved in February 2009. Further regulations are expected to understand how provisions of Law 154 will be applied.

Bolivia

Topics of focus for tax authorities

There are not specific topics/taxes of focus in which the tax authorities address their review. This will generally depend on the nature of the taxpayer and the industry where they belong, e.g. a mining company could be more likely to be subject to tax inspections than an industrial company. There are no formal statistics to provide information in this regard.

B

Significant developments

Obligatory electronic filing of tax returns for companies in Republika Srpska (RS)

Companies operating in Republika Srpska that employ more than 15 employees are obligated to file electronic personal income tax and social security contributions returns.

The new Rulebook on submission of tax returns is published and applicable as from April 2012.

Tax incentive expected to be re-introduced in Republika Srpska

Taxpayers who invest in equipment used in their own production activity in the territory of Republika Srpska will be able to deduct the value of such investment from the tax base under a tax incentive expected to be adopted by the RS government. Only companies registered for production activity in accordance with the RS standard classification code will be allowed to use this tax incentive, and the tax incentive will need to be used in the tax period when the equipment is put to use.

Taxes on corporate income

Bosnia and Herzegovina consists of two entities: Federation of Bosnia and Herzegovina (FBiH) and Republika Srpska (RS), with a third region, the Brčko District (BD), being administered by both. Direct taxes are imposed at the entity/district level, while indirect tax regulations are imposed at the state level. Corporate income tax (CIT) systems in Bosnia and Herzegovina have been partially harmonised in the past few years, but significant differences remain.

The Federation of Bosnia and Herzegovina, Republika Srpska, and the Brčko District tax resident corporations on a worldwide basis. Non-residents are taxed on income realised in the FBiH, RS, and BD territories.

FBiH CIT

A CIT payer in the Federation of Bosnia and Herzegovina is a resident business association or other legal entity performing independent and permanent business activity through the sales of products and providing services on the market for the purpose of generating profit.

A CIT payer in the Federation of Bosnia and Herzegovina is also a non-resident who generates profits through business activity from a business unit in the territory of the Federation of Bosnia and Herzegovina.

Bosnia and Herzegovina

A non-resident whose registered seat or management is not in the Federation of Bosnia and Herzegovina and who does not have a business unit in the Federation of Bosnia and Herzegovina is subject to withholding tax (WHT) for income generated in the Federation of Bosnia and Herzegovina.

The CIT rate in the Federation of Bosnia and Herzegovina is 10%.

RS CIT

A CIT payer in Republika Srpska is:

- A legal entity from Republika Srpska that generates income from any source in Republika Srpska or abroad.
- A business unit of a legal entity that generates income in the territory of Republika Srpska.
- A non-resident legal entity that conducts business activity and has a permanent establishment (PE) in Republika Srpska, for income that is related to that PE.
- A non-resident legal entity that generates income from immovable property in Republika Srpska, for the income generated in Republika Srpska.
- A non-resident legal entity that generates income in Republika Srpska, not mentioned above, and is subject to WHT in accordance with the CIT law of Republika Srpska.

The CIT rate in Republika Srpska is 10%.

BD CIT

A CIT payer in Brčko District is:

- A legal entity from Brčko District that generates income from any source in Bosnia and Herzegovina or abroad.
- A business unit of a legal entity with headquarters in the Federation of Bosnia and Herzegovina or Republika Srpska, for income generated in Brčko District.
- A non-resident legal entity that conducts business activity and has a PE in Brčko District, for income that is related to that PE.
- A non-resident legal entity that generates income from immovable property in Brčko District, for the income generated in Brčko District.
- A non-resident legal entity that generates income in Brčko District, not mentioned above, and is subject to WHT in accordance with the CIT law of Brčko District.

The CIT rate in Brčko District is 10%.

Corporate residence

FBiH residency

Under FBiH CIT law, a resident is a legal entity whose headquarters (registration) is entered into a court registry or whose management and supervision over the business activities is located in the Federation of Bosnia and Herzegovina.

FBiH permanent establishment

A PE of a non-resident is a permanent place of business through which the non-resident performs activity in whole or partially throughout the territory of the Federation of Bosnia and Herzegovina.

A PE under FBiH CIT law is considered to be one of the following:

- Management headquarters.
- Branch office.
- Business office.
- Factory.
- Workshop.
- Location of natural resources extraction.
- Construction site (construction or mounting project) when the work is performed during a period exceeding six months.
- Providing consulting or business services lasting for a period exceeding three months consecutively over a 12-month period.
- A representative acting independently on behalf of a non-resident related to the activities of signing a contract or keeping supplies of products delivered on behalf of a non-resident.

RS residency

Under RS CIT law, a resident is a legal entity registered in Republika Srpska.

RS permanent establishment

A PE is considered to be a place of business of a non-resident in Republika Srpska (i.e. construction works, installation and assembly works, infrastructure used for research or exploitation of natural resources or supervisory of the same). A PE shall also be considered to be a place of business where an individual or legal person has the authorisation to conclude contracts for a foreign legal entity.

BD residency

The BD CIT law prescribes that a resident is a legal entity registered in Brčko District.

BD permanent establishment

A PE of a non-resident in Brčko District is considered to be:

- construction works, installation and assembly works, infrastructure used for research or exploitation of natural resources, or supervisory of the same, or
- a place of business where an individual or legal person has the authorisation to conclude contracts for a foreign legal entity.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 17%, and the VAT regime applies equally throughout the country of Bosnia and Herzegovina. There is no reduced VAT rate in Bosnia and Herzegovina.

Taxable persons are all individuals and legal entities registered, or required to be registered, for VAT. Any person making taxable supplies of goods and services that exceeds or is likely to exceed a threshold of 50,000 konvertibilna marka (convertible mark or BAM) (25,000 euros [EUR]) is required to register as a VAT payer.

The export of goods is zero-rated.

Taxable transactions include the supply of goods and services in Bosnia and Herzegovina by a taxable person, as well as the importation of goods to Bosnia and Herzegovina by any person. The following transactions are also taxable:

Bosnia and Herzegovina

- Transactions for no consideration or for a consideration less than the market value.
- The private use of taxable goods by a taxable person (self-supply).

The following services are exempt from VAT in Bosnia and Herzegovina:

- The leasing and subletting of residential houses, apartments, and residential premises for a period of longer than 60 days.
- The supply of immovable property, except for the first transfer of the ownership rights or the rights to dispose of newly constructed immovable property.
- Financial services.
- Insurance and reinsurance services.
- Educational services provided by private or public educational institutions.
- Postal services.

The VAT period is one calendar month.

Any tax credit that has not been used after a period of six months shall be refunded. Registered exporters are to be refunded within 30 days.

Customs duties

The customs policy law and the rates of customs tariffs to be applied exist and are largely based on European Union (EU) standards. Bosnia and Herzegovina has signed the Stabilisation and Association Agreement (SAA) and the Central European Free Trade Agreement (CEFTA).

Excise duties

There is a single excise regime throughout Bosnia and Herzegovina which levies excise tax on the following products:

- Petroleum products: BAM 0.3 to BAM 0.4 per litre.
- Tobacco products: 42% on retail price and an additional BAM 0.15 per pack of 20 cigarettes.
- Non-alcoholic drinks: BAM 0.1 per litre.
- Alcohol and alcoholic drinks: BAM 8 to BAM 15 per litre of absolute alcohol.
- Beer and wine: BAM 0.2 to BAM 0.25 per litre.
- Coffee (unroasted, roasted, and ground coffee and coffee extracts): BAM 1.5 to BAM 3.5 per kilogram.

Property taxes (real estate)

FBiH property taxes

FBiH property taxes are imposed at the cantonal level (ten cantons in total), and the rates as well as the taxpayers are different between the cantons. The taxes are paid in the range of BAM 0.5 to BAM 3 per square metre.

RS property taxes

RS property taxes are imposed at the entity level. The annual tax rate is between 0.05% and 0.5% of the market value of the property. The applicable tax rate is determined every year by the municipalities.

BD property taxes

BD property taxes are imposed by the BD assembly. The annual tax rate is between 0.05% and 1% of the market value of the property. The rate is adopted by the assembly for every year based on the proposed annual budget.

Tax on transfer of land and real estate

FBiH transfer taxes

The FBiH tax on transfer of land and real estate is imposed at the cantonal level. The rate differs by canton; however, it cannot be higher than 5%.

RS transfer taxes

The RS tax on transfer of land and real estate is imposed at the entity level. The rate is 3%.

BD transfer taxes

There is no tax on transfer of land and real estate in Brčko District.

Other taxes

There are several other taxes introduced at the entity, cantonal, and municipality level. The duties differentiate based on company location, business size, and type of business.

FBiH other taxes

FBiH other taxes include the communal tax, fire prevention contribution, tourist community contribution, forestry contribution fee, Foreign Trade Chamber of Bosnia and Herzegovina duty, Chamber of Commerce FBiH duty, and administrative stamp duties.

RS other taxes

RS other taxes include the special republic tax, communal tax, forestry contribution fee, fire prevention contribution, Foreign Trade Chamber of Bosnia and Herzegovina duty, Chamber of Commerce FBiH duty, and administrative stamp duties.

BD other taxes

BD other taxes include the communal tax, fire prevention contribution, forestry contribution fee, Foreign Trade Chamber of Bosnia and Herzegovina duty, and administrative stamp duties.

Branch income

Representative offices of foreign companies are permitted, although the concept of an international branch has not been recognised in Bosnia and Herzegovina.

Income determination

Taxable profit is profit determined by adjusting the accounting profit as stated in the profit and loss statement and determined in accordance with International Financial Reporting Standards/International Accounting Standards (IFRS/IAS) and accounting legislation, in accordance with the provisions of the CIT law.

FBiH income

Income for assessment of taxable profit in the Federation of Bosnia and Herzegovina is income from the sales of products, services, goods, and materials, as well as financial, extraordinary and other income calculated in the profit and loss balance in accordance with accounting regulations and IFRS/IAS.

Bosnia and Herzegovina

Income on the basis of collected written-off debt, in the event that it was included in income in a previous period and was not subject to tax allowable or recognised expenditure, shall not be included in the tax base.

FBiH inventory valuation

Expenses of production in accordance with accounting regulations and IFRS/IAS shall be recognised in the value of stocks of unfinished production, semi products, and finished products for the calculation of taxable profit.

The inventory is valued by using the average price method.

FBiH capital gains

The taxable base shall include profit from liquidation and capital gain from the balance sheet.

FBiH dividend income

Dividends realised based on participation in the capital of other taxpayers shall not be included in the tax base. Shares in the profit of a business association will be considered dividends.

FBiH interest income

Interest income is generally included in the taxable base. The exception, as per FBiH government decision, is for interest income realised from state bonds issued for war claims, which should not be included in the taxable base (the CIT law does not explicitly allow for this, which may be lead to discussion with the tax authority).

FBiH foreign income

The Federation of Bosnia and Herzegovina taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in the Federation of Bosnia and Herzegovina.

RS income

Taxable revenue for the purpose of computing the tax base in Republika Srpska includes all revenue (domestic and foreign) from whatever source derived whether in cash or in kind or whether related or unrelated to the legal person's economic activity.

In the event of revenue received in the form of property (other than cash) or services, the amount of revenue is equal to the market price of the property or services received.

RS inventory valuation

Inventory includes goods used for resale, final goods produced by the taxpayer, semi-final goods used for further production, as well as main and auxiliary materials for production.

Purchase value of inventories at the beginning and end of a fiscal year has to be expressed using the same method for determination of purchase value of inventories.

The purchase value of inventories can be determined by using the first in first out (FIFO) method or the weighted average cost method.

RS capital gains

Capital gain is realised through the sale or other type of transfer of capital or investment assets and represents a difference between the sales price and adjusted base of an asset. The sales price is the contracted price (i.e. the market price established by the competent tax authority in case it finds the contracted price to be lower than the market price).

Capital gains or losses realised during the fiscal year can be offset, and the realised net gain or loss is added or subtracted from the taxable base, if they are not already included in the income or expense.

RS dividend income

Income from dividends is not included in the taxable base.

RS interest income

Interest income is generally included in the taxable base.

Income from securities issued by or guaranteed by the state authority, Central Bank BiH, or local authority, as well as interest income from bank deposits, is excluded from the taxable base.

RS foreign income

Republika Srpska taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in Republika Srpska.

BD income

Taxable income in Brčko District includes all income from any source (domestic or foreign), whether in cash or in kind, independently of the fact of whether the income is related to the business activity of the legal person.

BD inventory valuation

The purchase value of inventories can be determined by using the first in first out (FIFO) method or the average cost method.

BD capital gains

Capital gain is realised by sale or transfer of capital and investment goods and represents positive difference between the sales price and adjusted property base.

Capital gains or losses realised during the fiscal year can be offset, and the realised net gain or loss added or subtracted from the taxable base, if they are not already included in the income or expense.

BD dividend income

Income from dividends is not included in the taxable base.

BD interest income

Income from securities issued by or guaranteed by the state authority, Central Bank BiH, or local authority is excluded from the taxable base.

BD foreign income

Brčko District taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in Brčko District.

Bosnia and Herzegovina

Deductions

FBiH deductions

Expenditures are deductible from revenue in computing the FBiH tax base if the expenditures directly relate to the realised revenue.

FBiH depreciation

Depreciation cost is deductible only if it relates to the property subject to depreciation and being used.

Depreciation of fixed assets is deductible up to the amount established by proportionate application of the highest annual depreciation rates using the linear method, prescribed by the FBiH government, as follows:

Assets	Rate (%)
Buildings, except	10
Management, administration, office, and other buildings for providing service activities	3
Apartment houses, hotels, restaurants	14.3
Roads, communal objects, upper railway rails machine	14.3
Equipment, vehicles, mechanicals except	20
Equipment for water management, water-supply, and canalisation	14.3
Computers and equipment for environment protection	33.3
Crops	14.4
Livestock units	40
Intangible non-current assets	20

Property being depreciated with a value of less than BAM 1,000 may be fully deducted in the purchase year, on condition that that the property was put in service.

The purchase value of computer hardware and software may be deducted fully in the year the purchase was made.

Depreciated assets, once depreciated, shall not be re-included in the depreciation calculation for the purposes of the tax balance.

Depreciation is allowed for increases in the value of fixed assets due to revalorisation in accordance with IFRS/IAS, up to the amount of calculated depreciation on the revalorisation base and by using the proportion method prescribed by law.

FBiH goodwill

Amortisation of goodwill is not tax deductible.

FBiH start-up expenses

Start-up expenses are tax deductible if the expenses occurred were necessary and related to the registered company and if original documentation in regard to those expenses are available for inspection.

FBiH interest expenses

Interest expense is generally tax deductible, except for interest that is not calculated at arm's length and interest on taxes, social security contributions, and other public revenue.

FBiH bad debt

The expenses occurring based on the write-off of doubtful debts are deductible. Debts are considered doubtful if one of the following is fulfilled:

- The debts have not been collected within 12 months from due date.
- The taxpayer has started court procedures in regard to the receivable or started the enforced collection procedure.
- The receivable is registered in the bankruptcy procedure.
- Agreement has been reached with the debtor in the bankruptcy or liquidation procedure.

FBiH charitable contributions

Costs of humanitarian, cultural, educational, scientific, and sports purposes (except professional sports) are deductible in the amount of up to 3% of total income.

FBiH tax reserves

Tax-deductible expenditures include expenditures to set up reserves for the following:

- Severance pay paid up to the prescribed amount.
- Expenditures of natural resources renewal.
- Expenditures in guaranteed time frames.
- Initiated court procedures.
- Potential credit losses of banks and microcredit organisations.

FBiH fines and penalties

Fines and penalties are not tax deductible.

FBiH taxes

Taxes are generally tax deductible expenses, except for paid CIT.

FBiH other significant items

Representation costs pertaining to business activity are deductible in the amount of 30% of representation costs.

Expenses of membership fees to the chambers are deductible in the amount not exceeding 0.1% of total income, with the exception of membership fees regulated by the law.

Expenses based on sponsorship are deductible in the amount of 2% of total income.

FBiH net operating losses

Tax losses may be offset against profits in a future tax period, not exceeding five years. Tax losses are utilised on a first in first out (FIFO) basis.

Tax losses cannot be carried back.

FBiH payments to foreign affiliates

Payments to foreign affiliates are generally allowed if they relate to realised revenue.

Bosnia and Herzegovina

RS deductions

Expenditures are deductible from revenue in computing the RS tax base if the expenditures directly relate to the realised revenue.

RS depreciation

Depreciation deductions are allowed only with respect to depreciable assets that are being used.

A depreciable asset is any tangible or intangible asset that is held for use in the production or supply of goods and services, for rental to others, or for administrative purposes. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

The assets are depreciated using the linear method of depreciation except for machines and equipment which can be depreciated with acceleration (first year at 40%, second year at 30%, and third year at 30%). The CIT Rulebook prescribes a wide range of accepted depreciation rates, depending on type of assets, ranging from 1% to 50% annually.

RS goodwill

Amortisation of goodwill is not tax deductible.

RS start-up expenses

Start-up expenses are tax deductible if the expenses occurred were necessary and related to the registered company and if original documentation in regard to those expenses are available for inspection.

RS interest expenses

Interest on loans used for business purposes are tax deductible. The exceptions are interest that is not at arm's length, interest on loans for private use, and interest on overdue tax payments.

RS bad debts and tax reserves

A legal person using the accrual form of accounting is allowed a deduction with respect to bad debts and reserves.

Legal persons, other than banks, authorised credit institutions, or insurance companies, are entitled to a bad debt deduction that arose in connection with a sale of goods or services but only if the revenue from the sale was previously included in the tax base of the legal person.

A loan or trade receivable is considered to be a bad debt only if the receivable has not been collected within 12 months from the due date and

- the taxpayer has started court litigation for the receivables or if enforced collection procedure is initiated
- the receivables are registered in the bankruptcy procedure of the debtor, or
- an agreement has been reached with the debtor who is not a physical or related person in the bankruptcy or liquidation procedure.

In the case of a bank or other authorised credit institution, a deduction is allowed for increases in the reserve account for customary losses due to unpaid loans, and the amount may not exceed 20% of the tax base.

In the case of an insurance or reinsurance company, a deduction is allowed for increases in reserves as registered in accounting documents and as authorised according to applicable law. For insurance contracts pertaining to reinsurance, reserves are to be reduced so that they cover only part of the risk remaining with the insurer, and the amount may not exceed 20% of the tax base.

The tax savings resulting from a reduction or cancellation of any reserve that is collected later on will be included in taxable revenue at the moment of collection in accordance with this law.

RS charitable contributions

Contributions to public institutions and humanitarian, cultural, and educational organisations are deductible in an amount not exceeding 3% of the fiscal year's total revenue. Any excess contribution may be carried forward three years.

RS fines and penalties

Fines and penalties are not tax deductible.

RS taxes

Taxes are generally tax deductible expenses, except for paid CIT.

RS other significant items

Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment, meals, and amusements related to the legal person's economic activity.
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year's total revenue.
- Scholarships to students in an amount of up to 75% of average monthly net salary per employee in Republika Srpska in accordance with the latest published data from the body in charge of statistics.

RS net operating losses

Losses may be carried forward and offset against income in the following five years. Tax losses are utilised on a FIFO basis.

Tax losses cannot be carried back.

RS payments to foreign affiliates

Payments to foreign affiliates are generally allowed if they relate to realised revenue.

BD deductions

Expenditures are deductible from revenue in computing the BD tax base if the expenditures directly relate to the realised revenue.

BD depreciation

Depreciation deductions are allowed only with respect to depreciable assets that are being used.

A depreciable asset is any tangible or intangible asset that is held for use in the production or supply of goods and services, for rental to others, or for administrative purposes. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

Bosnia and Herzegovina

The assets are depreciated using the linear method of depreciation except for machines and equipment which can be depreciated with acceleration (first year at 40%, second year at 30%, and third year at 30%). The CIT Rulebook prescribes a wide range of accepted depreciation rates, depending on type of assets.

The calculation of depreciation for newly purchased property starts the following month on the day when it was put to use. The calculation of depreciation for newly constructed buildings starts from the first day of the following year in which it was put to use.

BD goodwill

Amortisation of goodwill is not tax deductible.

BD start-up expenses

Start-up expenses are tax deductible if the expenses occurred were necessary and related to the registered company and if original documentation in regard to those expenses are available for inspection.

BD interest expense

Interest on loans used for business purposes are tax deductible. The exceptions are interest that is not at arm's length, interest on loans for private use, and interest on overdue tax payments.

BD bad debts and tax reserves

Legal persons, other than banks, authorised credit institutions, or insurance companies, shall be entitled to a bad debt deduction that arose in connection with a sale of goods or services but only if the revenue from the sale was previously included in the tax base of the legal person. For this purpose, a credit or trade receivable is considered a bad debt only if one of the following is true:

- It is more than 12 months past the due date for payment of the invoiced receivable and the creditor has sued for the receivables or an enforced collection procedure is initiated due to receivables.
- The receivables are registered in the bankruptcy procedure of the debtor or an agreement has been reached with the debtor who is not a physical or related person in the bankruptcy or liquidation procedure.

In the case of a bank or other authorised credit institution, a deduction is allowed for increases in the reserve account for customary losses due to unpaid loans, and the amount may not exceed 20% of the tax base.

In the case of an insurance or reinsurance company, a deduction is allowed for increases in reserves as registered in accounting documents and as authorised according to applicable law. For insurance contracts pertaining to reinsurance, reserves are to be reduced so that they cover only part of the risk remaining with the insurer, and the amount may not exceed 20% of the tax base.

BD charitable contributions

Contributions to public institutions and humanitarian, cultural, and educational organisations are deductible in an amount not exceeding 3% of the fiscal year's total revenue.

BD fines and penalties

Fines and penalties are not tax deductible.

BD taxes

Taxes are generally tax deductible expenses, except for paid CIT.

BD other significant items

Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment related to the legal person's economic activity.
- Awards to employees, up to the prescribed amount.
- Costs of business trips, meal allowance, transportation, and holiday allowance, up to the prescribed amount.
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year's total revenue.
- Scholarships to students in an amount up to 75% of average monthly net salary in Brčko District.
- Committee membership fees, up to 0.2% of total revenue in the tax year.
- Expenses for research and development (R&D) in accordance with the Rulebook.

BD net operating losses

Losses may be carried forward and offset against income in the following five years. Tax losses are utilised on a FIFO basis.

Tax losses cannot be carried back.

BD payments to foreign affiliates

Payment to foreign affiliates is generally allowed if it relates to realised revenue.

Group taxation

FBiH group taxation

A business association has the right to request tax consolidation on the condition that all businesses in the group are residents of the Federation of Bosnia and Herzegovina.

A headquarters company and its branches may form a business association when there is direct or indirect control between them with no less than 90% share.

A request for tax consolidation must be filed to the authorised branch office of the tax authorities by a headquarters company.

Each group member is required to file its tax balance, and the headquarters of the business association may file a consolidated tax balance for the group.

The consolidated tax balance may offset losses of one or more businesses against the profit of other businesses in the association.

Individual group members are liable for the tax calculated on the consolidated balance proportionately to the profit from the individual tax balance, and the headquarters is the payer of the tax calculated on the consolidated balance.

Once approved, tax consolidation shall be applied for the consecutive period of no less than five years.

Bosnia and Herzegovina

When one, several, or all the businesses in the association later opt for individual taxation, all group members shall be obliged to pay the difference proportionately on behalf of the tax privilege they have used.

RS group taxation

An affiliated group of legal persons located within Republika Srpska may elect to file a consolidated annual tax declaration.

An affiliated group of legal persons is a group of one or more legal entities from Republika Srpska that are connected through the ownership of stock with a common parent, provided that the common parent owns at least 80% of the stock in a legal person that is included in the affiliated group. If the common parent does not own at least 80% of the stock in a legal person that is included in the affiliated group, then the parent may file a consolidated tax declaration if one or more other legal persons in the affiliated group own at least 80% of the stock in such legal person.

BD group taxation

An affiliated group of legal persons located within Brčko District may elect to file a consolidated annual tax declaration.

An affiliated group of legal persons is a group of one or more legal entities from Brčko District that are connected through the ownership of stock with a common parent provided that the common parent owns at least 80% of the stock in a legal person that is included in the affiliated group.

Transfer pricing

Transfer pricing requirements are imposed at the entity level. The Federation of Bosnia and Herzegovina, Republika Srpska, and Brčko District have different regulations in place, including different rules in regard to applicable methods, related parties, and documentation. The regulations in place do not differ if the transactions are within one entity, cross-border, or international. Basically, this means that all transactions can fall under the transfer pricing scope.

With Bosnia and Herzegovina not being an EU or an Organisation for Economic Co-operation and Development (OECD) member, the local legislation does not have the same requirements with respect to transfer pricing documentation as in EU countries nor does the legislation refer to the OECD guidelines.

FBiH related parties

In the Federation of Bosnia and Herzegovina, a related party is considered to be an individual or legal person who has the possibility of control or significant influence on the business decisions of the taxpayer. Owning more than half or individually the most stocks or shares in a company is considered to be enabled control.

Significant influence is considered to be mutually high sales turnover, technical dependence, or otherwise gained control over the management.

FBiH prescribed methods

The FBiH CIT law recognises only two methods:

- Comparable price method (primary method).
- Cost plus method.

RS and BD related parties

As per the applicable RS and BD legislation, related parties of a legal person are considered to be physical or legal persons if those persons possess more than 10% of active shares with voting rights.

A legal person can be a related party if it possesses more than 10% active shares in the other person indirectly or directly. Indirect ownership is considered to be:

- If a legal person possesses more than 10% of a dependant company, and that dependant company possesses more than 10% in the other legal person.
- If both legal persons have a common shareholder who possesses more than 10% active shares with voting rights in both legal persons.

RS and BD prescribed methods

The RS and BD regulations prescribe the following five methods that can be used in order to establish whether the prices are in accordance with the arm's-length principle:

- Comparable price method (primary method).
- Cost plus method.
- Resale price method.
- Profit split method.
- Transactional net margin method.

Thin capitalisation

There are no thin capitalisation rules in Bosnia and Herzegovina.

Tax credits and incentives

FBiH tax incentives

FBiH foreign tax credit

When a taxpayer generates income or profit through business activities outside of the Federation of Bosnia and Herzegovina (directly or through a business unit) and pays the profit tax on such activities, the tax paid abroad shall be credited up to the amount of the profit tax that would have been paid for the income or profit generated by the same activities in the Federation of Bosnia and Herzegovina.

FBiH investment incentive

A taxpayer who invested in production within the territory of the Federation of Bosnia and Herzegovina for five consecutive years for a minimum fee of BAM 20 million will be relieved from taxation for a period of five years, starting with the first year in which it has invested at least BAM 4 million.

FBiH special needs employment incentive

A taxpayer who employs more than 50% of handicap or special needs individuals within its company for a period of time longer than one year is relieved from CIT for the year in which more than 50% of handicap or special needs individuals are employed within the company.

FBiH export incentive

A taxpayer who realises more than 30% of annual income by export will be relieved from CIT for that year.

Bosnia and Herzegovina

RS tax incentives

RS foreign tax credit

If a legal entity from Republika Srpska obtains revenue from a foreign state and the revenue is taxed both in Republika Srpska and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from RS CIT, unless such legal entity from Republika Srpska elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.

There are no other tax incentives available in Republika Srpska.

BD tax incentives

BD foreign tax credit

If a legal entity from Brčko District obtains revenue from a foreign state and the revenue is taxed both in Brčko District and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from the BD CIT, unless such legal entity from Brčko District elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.

BD investment incentive

For a taxpayer who invests in machines and equipment for performing its own registered business activity on the territory of Brčko District, a deduction is allowed for the amount of the investment.

BD employment incentive

For a taxpayer who employs new employees for an indefinite period of time during the tax period, a second deduction is allowed for the total amount of paid gross salaries for the new employees.

Withholding taxes

FBiH WHT

WHT in the Federation of Bosnia and Herzegovina is calculated on non-resident income generated throughout the territory of the Federation of Bosnia and Herzegovina.

The base for calculation of WHT is the gross amount paid by a resident of the Federation of Bosnia and Herzegovina to a non-resident for dividends, interest, royalties and other intellectual property rights, compensations for market research, tax consulting services, auditors' services, fun and sports events, premium insurance for insurance or reinsurance of risk in the Federation of Bosnia and Herzegovina, telecommunication services between the Federation of Bosnia and Herzegovina and other countries, as well as all other services performed on the territory of the Federation of Bosnia and Herzegovina.

WHT shall be paid at the rate of 5% on dividend payments and 10% for interest, royalties, and other, if not reduced under a tax treaty.

RS WHT

Any legal or physical person from Republika Srpska, as well as any non-resident legal or physical person with PE in Republika Srpska, who pays revenue to a non-resident legal person is to withhold tax from the total payment of revenue and is to remit the withheld tax to the Public Revenues Account of Republika Srpska.

Bosnia and Herzegovina

The WHT applies to the following revenue payments, regardless of whether the revenue is received in Republika Srpska or abroad:

- Payment of interest or its functional equivalent under financial instruments and arrangements from a resident.
- Payment for entertainment or sporting activities carried out in Republika Srpska, regardless of whether the revenue is received by the entertainer or sportsman or by another person.
- Payment for the performance of management, consulting, financial, technical, or administrative services, if the revenue is from a resident or if the revenue is paid by or included in the books and records of a PE in Republika Srpska or if such payment is deducted for the purpose of determining the tax base.
- Payment in the form of insurance premiums for the insuring or reinsuring of risks in Republika Srpska.
- Payment for telecommunication services between Republika Srpska and a foreign state.
- Payment of royalties.
- Payment of lease for movable property.
- Payment for the performance of other services in Republika Srpska.

WHT is not due on dividend payments.

The WHT rate in Republika Srpska is 10%.

BD WHT

Any legal or physical person from Brčko District, as well as any non-resident legal or physical person with PE in Brčko District, who pays revenue to a non-resident legal person is to withhold tax from the total payment of revenue and is to remit the withheld tax to the Public Revenues Account of Brčko District.

The WHT applies to the following revenue payments, regardless of whether the revenue is received in Brčko District or abroad:

- Payment of interest or its functional equivalent under financial instruments and arrangements from a resident.
- Payment for entertainment or sporting activities carried out in Brčko District, regardless of whether the revenue is received by the entertainer or sportsman or by another person.
- Payment for the performance of management, consulting, financial, technical, or administrative services, if the revenue is from a resident or if the revenue is paid by or included in the books and records of a PE in Brčko District or if such payment is deducted for the purpose of determining the tax base.
- Payment in the form of insurance premiums for the insuring or reinsuring of risks in Brčko District.
- Payment for telecommunication services between Brčko District and a foreign state.
- Payment of royalties.
- Payment of lease for movable property.
- Payment for the performance of other services in Brčko District.

WHT is not due on dividend payments.

The WHT rate in Brčko District is 10%.

Tax administration

FBiH tax administration

FBiH taxable period

The taxable period is considered to be the calendar month.

FBiH tax returns

An FBiH taxpayer is obliged to file correctly and accurately a completed tax return (declaration) with the tax balance to the authorised branch office of the tax administration by 31 March of the following year.

The deadline for submission of annual calculation of business results is 28 February of the following year.

FBiH payment of tax

A taxpayer shall pay FBiH CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the last day of the month for the previous month.

FBiH audit cycle

The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

FBiH statute of limitations

The statute of limitations is five years.

RS tax administration

RS taxable period

The taxable period is considered to be the calendar month.

RS tax returns

The RS tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.

RS payment of tax

A taxpayer shall pay RS CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the tenth day of the month for the previous month.

RS audit cycle

The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

RS statute of limitations

The statute of limitations is five years.

Bosnia and Herzegovina

BD tax administration

BD taxable period

The taxable period is considered to be the calendar month.

BD tax returns

The BD tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.

BD payment of tax

A taxpayer shall pay BD CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the tenth day of the month for the previous month.

BD audit cycle

The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

BD statute of limitations

The statute of limitations is five years.

B

Significant developments

Botswana implemented the following changes to its tax regime with effect as of 1 July 2011:

Corporate income tax (CIT)

- The two tier CIT system was replaced by a single CIT rate of 22% for resident companies.
- The CIT rate for non-resident companies (i.e. branch income) was increased to 30%.
- The tax rate for manufacturing companies and International Financial Services Centre (IFSC) companies remained at 15% in respect of approved activities for such businesses.
- Companies ceased generating Additional Company Tax (ACT) for the tax year ending 30 June 2012 and subsequent tax years.
- Utilisation of accumulated ACT ended on 30 June 2011, after which date all unutilised ACT fell away.
- Withholding tax (WHT) may no longer be offset against CIT.

Withholding tax (WHT)

The WHT on dividends was reduced to 7.5%.

All rent and commission payments to residents or non-residents are subject to WHT at 5% where the total payment is 36,000 Botswana pulas (BWP) per annum or more or the monthly payment is BWP 3,000 or more.

Capital gains

The exemption from tax on capital gains on the sale of certain shares, units, or debentures of a public resident company now only apply if the shares, units, or debentures were held by the taxpayer for a period of at least one year prior to the date of disposal.

Mines and minerals

The mining tax rate for non-diamond mining companies (derived in terms of the existing formula) shall not be less than the CIT rate of 22%.

Taxes on corporate income

Botswana has a source-based taxation system.

As of 1 July 2011 (i.e. during the 2012 tax year), CIT is charged at a single flat rate of 22%.

Botswana

Prior to 1 July 2011, CIT was imposed at a rate of 15% for non-manufacturing companies and 5% for manufacturing companies. ACT was also imposed at a rate of 10%, and the ACT amount could be carried forward up to five years to be offset against WHT payable on dividends paid. As of 1 July 2011, there is no ACT component. Any accumulated ACT not utilised before 1 July 2011 fell away.

International Financial Services Centre (IFSC) profits

IFSC companies are currently taxed at a flat rate of 15% and will continue to be taxed at that rate going forward. Companies must apply for a certificate to be classified as IFSC companies, which deal only in specified services and only with non-residents.

Mining profits

Mining profits, other than profits from diamond mining, are taxed according to the following formula:

Annual tax rate = 70 minus $(1,500/x)$, where x is taxable income as a percentage of gross income.

As of 1 July 2011, the tax rate shall not be less than the flat CIT rate of 22%. Prior to 1 July 2011, the tax rate was not less than the combined CIT and ACT rate of 25%.

Diamond mining

Diamond mining is usually taxed in terms of an agreement with the government of Botswana.

Corporate residence

If a company's registered office or place of incorporation is in Botswana or if the company is managed and controlled in Botswana, then the company is considered a resident of Botswana.

Permanent establishment (PE)

PE has been defined in the Income Tax Act only in the limited context of interest, commercial royalty, and management or consultancy fee. However, the PE is defined in all the double taxation agreements (DTAs) that Botswana has entered into with other contracting states. The definition of PE in the DTA follows the definition in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and Capital.

Other taxes

Value-added tax (VAT)

VAT is imposed on taxable supplies and the importation of goods into Botswana. The standard VAT rate of 12% applies to all supplies that do not qualify for an exemption or are not zero-rated.

Vocational training levy (VTL)

VTL is payable when submitting the VAT return, by every taxpayer who is registered for VAT. It is calculated as a percentage of turnover ranging from 0.2% to 0.05%, depending on the turnover of the company.

Capital transfer tax (CTT)

CTT is levied on the donee upon the transfer (by way of inheritance or gratuitous disposal of property) of tangible or intangible, movable or immovable, property, at 12.5%.

Transfer duties on immovable property

Transfer duty is levied at 5% of the value of immovable freehold and leasehold property. The first BWP 200,000 of such value is exempt from transfer duty in case of transfer to a Botswana citizen.

In the case of agricultural property, transfer duty is levied at the rate of 30% for a non-citizen. This duty is 5% in the case of a Botswana citizen.

Property taxes

There are no property taxes in Botswana.

Stamp taxes

There is no stamp duty in Botswana.

Branch income

As of 1 July 2011, CIT payable on branch profits was increased to 30% from 25%.

Income determination**Inventory valuation**

Inventories are valued at cost less such amounts, if any, that the Commissioner General believes are reasonable as representing the amount by which the value of such stock has been diminished because of damage, deterioration, obsolescence, or other cause. Although not expressly excluded by legislation, last in first out (LIFO) has not been accepted in practice by the tax authorities.

Capital gains

Gains from disposal of specified capital assets (immovable property and marketable securities, including shares in private companies) are included in taxable income in the hands of the corporate taxpayer. Acquisition costs of immovable property are subject to a 10% compound annual addition for inflation for the period from acquisition to 30 June 1982, and thereafter to an inflation addition based on the increase in the consumer price index to the date of sale. For other gains, no inflation allowances are granted, but the taxable gain is set at 75% of the total gain.

Currently, the sale of any shares, units, or debentures of a resident company is exempt from tax under any of the following circumstances:

- The resident company whose shares are being sold is a public company.
- The shares, units, or debentures are traded on the Botswana Stock Exchange.
- The company has released for trading 49% or more of its equity on the Botswana Stock Exchange.

As of 1 July 2011, this exemption only applies if the shares, units, or debentures were held by the taxpayer for a period of at least one year prior to the date of disposal.

Botswana

The aggregate amount of capital losses is offset against the aggregate amount of capital gains in the same tax year. Any excess of loss is deducted from aggregate gains over losses accruing in the succeeding tax year only. Capital losses cannot, in any circumstances, be deducted against other income.

Dividend income

Dividend income from local sources is not subject to tax.

Interest income

In case of a resident company, interest income is included in gross income and taxed at the CIT rate. In case of a non-resident company, interest income will be subject to WHT, which will constitute a final tax.

Royalty income

Royalty income is included in gross income and taxed at the CIT rate. In case of a non-resident company, royalty income will be subject to WHT, which will constitute a final tax.

Partnership income

Partnership income is taxed in the hands of the partners, in proportion to their share in the partnership.

Foreign income

Resident corporations are not generally taxed on a worldwide income basis. However, interest and dividend income from a foreign source is taxed in the hands of the resident company on an accrual basis. Prior to 1 July 2011, relief was given for any WHT imposed on such income. As of 1 July 2011, however, WHT may not be offset against CIT.

Deductions

Depreciation and depletion

Annual and capital allowances available are as follows.

Companies other than mining companies

Annual taxation allowances for expenditures incurred on machinery and equipment before 30 June 1982 can be claimed up to 100%. This allowance may be for any proportion of previously unclaimed expenditures. For expenditures incurred on machinery and equipment after 30 June 1982, annual allowances are granted, calculated on cost by the straight-line method on the basis of the expected useful lives of the individual assets. Guidelines are provided for expected useful lives of different categories of assets, which vary from four to ten years. Book depreciation is not required to conform to tax depreciation. The capital allowance claimable on a company motorcar is restricted to a maximum of BWP 175,000.

An initial allowance of 25% of cost is granted on certain industrial buildings. All industrial and commercial buildings (excluding residential properties) are granted a 2.5% annual allowance based on cost or, in the case of an industrial building on which an initial allowance has been claimed, the original cost less the initial allowance.

Balancing allowances and charges are brought to account on the disposal of assets on which allowances have been claimed. Where disposal value of an item of machinery or equipment exceeds the difference between expenditures incurred on the asset and allowances granted, the whole amount is taxable as corporate income or the balancing charge can be offset against further additions of new equipment, thus providing rollover relief. However, there is no rollover relief on motorcars except where the cars are used in a car rental or taxi service business.

Mining companies

In ascertaining the business income for any tax year from a business of mining, there shall be deducted from business income an allowance, to be known as a mining capital allowance, computed in accordance with 100% of the mining capital expenditure made in the year in which such expenditure was incurred, with unlimited carryforward of losses.

Taxes

Any taxes paid are specifically disallowed in computing a company's taxable income.

Other significant items

An allowance is granted for dwelling houses erected for employees by a business other than a mining business. The amount of the allowance is the lower of cost or BWP 25,000 for each dwelling house constructed.

A deduction of 200% of the cost of an approved training expenditure is allowed.

Companies with shareholders having 5% or more of equity, either directly or indirectly, are classified as close companies, and there are additional tax regulations in respect of these shareholders.

Small companies, that is resident private companies whose gross income does not exceed BWP 300,000, may elect that the company be taxed as a partnership.

Expenses incurred by the company for having its shares listed on the Botswana Stock Exchange are deductible in determining the chargeable income of the company.

Net operating losses

Losses may be carried forward for five years, with the exception of farming, mining, and prospecting operations, for which there is no time limit. There is no allowance for carrybacks.

Payments to foreign affiliates

Royalties, interest, and service fees paid to foreign affiliates are generally deductible, provided such amounts are at arm's length and WHT is paid.

In the case of a mining company, head office expenses allowed as a deduction in ascertaining gross revenue from mineral licence shall be limited to 1.5% of gross income for the year of assessment, and any excess of such expense above the limit shall be treated and taxed as a dividend.

Where the interest rate on a loan made by a foreign-based mining company to an affiliate mining company resident in Botswana is considered by the commissioner to be in excess of the market rate, such excess will be disallowed as a deduction and taxed as a dividend.

Botswana

Group taxation

There are no concessions for group taxation, other than for wholly-owned subsidiary companies of the Botswana Development Corporation Limited (BDC).

BDC was established in 1970 to be the country's main agency for commercial and industrial development. The Government of Botswana owns 100% of the issued share capital of the Corporation.

Where in any tax year a wholly owned subsidiary of BDC has incurred any assessed loss, such member may, during the current tax year, by notice in writing to the Commissioner General, elect that the whole or part of such assessed loss shall be deducted in ascertaining the chargeable income of one or more of the other wholly owned subsidiaries.

Transfer pricing

Botswana currently does not have any transfer pricing regulations, so transfer pricing is currently monitored through the anti-avoidance provisions contained in Section 36 of the Income Tax Act.

The arm's-length principle should always be followed in transactions between related parties. If such transactions have created rights or obligations that would not normally be created between independent persons dealing at arm's length, the Commissioner General may determine the liability in such manner as deemed appropriate. However, related party balances arising out of normal trading transactions (e.g. credit purchases with 30 days credit period) would not be subjected to these provisions.

Interest (at prime rate) should be charged/provided on loans from shareholders/ amounts due to related parties. If no interest has been charged/provided, in terms of the close company legislation, the Botswana Unified Revenue Service (BURS) may deem interest at the prime rate prevailing at the beginning of the tax year, as income in the hands of the lender without allowing the corresponding interest as a charge against the profits of the borrower. The borrower is obliged to deduct WHT at the prevailing rate on the deemed interest.

Amounts due from shareholders/directors may be deemed as dividend income and shall form part of the taxable income of the borrower, in which event these will be taxed at the prevailing dividend WHT rate in the hands of the borrower.

Thin capitalisation

Thin capitalisation rules can be found in the Income Tax Act, but only in relation to mining companies and IFSC companies.

Where a foreign controlled resident mining company has a foreign debt-to-equity ratio in excess of 3:1 at any time during the year of assessment, the amount of interest paid by the resident company during that year on that part of the debt that exceeds the ratio shall be disallowed as a deduction, and the amount so disallowed shall be treated and taxed as a dividend.

In case of an IFSC company, where an amount of foreign debt interest is allowable as a deduction in a particular tax year and, at any time during that tax year, the total foreign debt exceeds the foreign equity product for that year, then the amount of foreign debt interest ascertained in accordance with the following formula will be disallowed:

$I \times (A/B) \times (C/365)$

A = amount of the excess of the total foreign debt over the foreign equity product.

B = the total foreign debt.

C = the number of days in that tax year during which the total foreign debt exceeded the foreign equity product by that amount.

I = the foreign debt interest.

Tax credits and incentives

To encourage investment in Botswana, extra tax relief on revenue or capital accounts will be granted for specific business development projects if the government is satisfied that such projects are beneficial to Botswana.

Withholding taxes

WHT, at the following rates, must be deducted from payments to residents and non-residents unless a DTA exists.

Residents	WHT rate (%)
Interest	10
Dividends (15% prior to 1 July 2011)	7.5
Payments due under certain construction contracts	3
Non-residents	WHT rate (%)
Interest	15
Dividends (15% prior to 1 July 2011)	7.5
Payments due under certain construction contracts	3
Payments for royalties, management, or consultancy fees	15
Payments for entertainment fees	10

With effect from 1 July 2011 (tax year 2012), all rent and commission payments to residents or non-residents are subject to WHT at 5% where the total payment is BWP 36,000 per annum or more or the monthly payment is BWP 3,000 or more.

Botswana has tax agreements with the following countries, which provide for WHT at the rates shown.

Recipient	Dividends (%) (1)	Interest (%)	Royalties (%)	Management and consultancy fees (%)
Barbados	5/7.5 (2)	10	10	10
France	5/7.5 (2)	10	10	7.5
India	7.5	10	10	10
Mauritius	5/7.5 (2)	12	12.5	15
Namibia	7.5	10	10	15
Russia	5/7.5 (2)	10	10	10
Seychelles	5/7.5 (2)	7.5	10	10

Botswana

Recipient	Dividends (%) (1)	Interest (%)	Royalties (%)	Management and consultancy fees (%)
South Africa	7.5	10	10	10
Sweden	7.5	15	15	15
United Kingdom	5/7.5 (2)	10	10	7.5
Zimbabwe	5/7.5 (2)	10	10	10

Notes

1. The rate of WHT was reduced from 15% to 7.5% on 1 July 2011.
2. 5% rate of WHT is applicable if the beneficial shareholder is a company resident in the DTA country and holds at least 25% of the share capital in the company paying dividends. Otherwise, the other rate applies.

Tax administration

Taxable period

Botswana has a fiscal year ending on 30 June. However, a business may select its own accounting year, which may end on a date other than 30 June. This accounting year is accepted for the computation of the company's taxable income.

Tax returns

Botswana requires self-assessment, which means that the return submitted constitutes the assessment. The system is one that requires all taxpayers to file tax returns in standard format (providing information relating to taxable income earned) within four months after the financial year end of the company.

Payment of tax

Under the self-assessment tax procedures, if the tax payable for a tax year exceeds BWP 50,000, then estimated tax is required to be paid in equal quarterly instalments over the period of 12 months ending on the company's financial year-end date. Accordingly, the first quarterly payment should be made within three months of the beginning of the financial year and the balance quarterly payments at three monthly intervals thereafter. The final (balance) payment, if any, is to be made within four months from the end of the financial year, when submitting the return.

Where the tax is less than BWP 50,000, then the tax is payable within four months from the company's financial year-end date.

Significant developments

New incentives to boost competitiveness of national goods

In early August 2011, the Brazilian government announced several measures with the aim of benefitting local manufacturers and exporters of goods and services. Referred to as '*Brasil Maior*' (Greater Brazil), and the subject of much media attention, the government's plan was to augment national competitiveness through incentives for technical innovation, research, and added value in production, as well as provide clear advantages for exporters who were suffering from the continued appreciation of the Brazilian real (BRL).

The measures include incentives to increase financing lines; reduction of payroll costs in some industry sectors, which foresees the substitution of the 20% social security contribution with a 1.5% tax on gross revenue; cash refunds for exporters based on export revenue, potentially up to 4%; cash refunds of PIS/Cofins (federal contribution taxes) credits and their payment within 60 days; incentives for the automotive industry; and excise tax reductions, among others. Some of the benefits include the following:

- PIS/Cofins credits on the value of new capital assets may be offset at gradually reduced rates, allowing for a 1/11 offset for goods acquired in August 2011 to a full offset for goods acquired from July 2012. This applies to new assets bought or received as of 3 August 2011.
- Companies that qualify for the government's digital inclusion programme are exempted from income tax and surtax calculated based on the exploitation profit (i.e. the profit of activities relating to sectors and enterprises that benefit from special tax incentives). Further, costs incurred in scientific research conducted in private, non-profit, qualifying institutions are now deductible for calculating the profit and social contribution tax base.
- From December 2011 to December 2012, payroll costs are to be reduced in certain industries, including information technology, clothing, leather, footwear, and furniture manufacturers. In place of existing employer contributions to social security (20% on payroll), a fixed rate of 1.5% (2.5% for information technology services) applies to the companies' gross revenue.
- As a disincentive to imports of the aforementioned goods, the rate of Cofins on import has been increased from 7.6% to 9.1%.

Brazil

6% IOF tax rate is now applicable to foreign loans of less than five years

The Brazilian government has once again changed the tax on financial transactions (*Imposto sobre operações de crédito, câmbio, seguro e sobre operações relativas a títulos e valores mobiliários* or IOF) legislation applicable to foreign exchange transactions regarding foreign loans, within a period of less than two weeks.

As per Decree number 7,698, published on 12 March 2012, the applicable IOF tax rate of 6% applies to foreign currency exchange transactions (inflow of funds into the country only) related to cross-border loans (e.g. intercompany loans) subject to registration at the Brazilian Central Bank, with an average payment term of up to 1,800 days (five years). Conversely, if the average maturity date is longer than 1,800 days, the rate is reduced to 0%.

This new measure is applicable solely to loans signed on or after 12 March 2012.

Important changes to Brazilian transfer pricing rules

The Brazilian government published, on 4 April 2012, new legislation providing for important changes to Brazilian transfer pricing rules.

The following are worth mentioning:

- The resale minus method (PRL) shall be calculated based on a specific mark-up determined for some industries, and a mark-up of 20% for the industries/sectors that are not specified in the legislation.
- Taxpayers are no longer required to include custom duty and other customs expenses in the tested price, nor include freight and insurance contracted with third parties, provided they are not located in low tax jurisdictions/jurisdictions with privileged tax regimes.
- The use of the taxpayer's own transactions with third parties for purposes of the use of the PIC method (equivalent of the comparable uncontrolled price method) will be acceptable only to the extent the comparable transactions are equivalent to 5% of the tested transactions.
- Interest on related party loans, even if duly registered with the Brazilian Central Bank, will be deductible only up to an interest rate equal to the LIBOR dollar rate for six-month loans plus a spread to be annually determined by the Ministry of Finance, based on average market rate.
- Imports and exports of commodities, quoted in commodities exchange markets, must be tested through the use of the newly introduced methods PCI and PECEX, respectively; based on these methods, taxpayers shall compare the transaction amounts with the daily average quote for each product; the Federal Revenue Service shall issue instructions on how these methods shall be applied.

The changes above are included in a Provisional Measure (PM 563) and shall be effective for transactions to be carried out as of 2013.

As a general rule, a PM is issued by the executive branch of the federal government and has the effect of law while it is analysed by the Brazilian Congress, that can approve (with amendments or not) or reject it. This process should take place within a 60-day period, a term that may be extended for an additional 60-day period. If Congress does not act within this 120-day period, the PM expires and loses effectiveness.

Taxes on corporate income

Brazilian resident companies are taxed on worldwide income. Non-resident companies are generally taxed in Brazil through a registered subsidiary, branch, or permanent establishment (PE), based on income generated locally. Other than that, non-resident companies can be subject to withholding income tax on income derived from a Brazilian source.

Corporate income tax (*Imposto de Renda de Pessoa Jurídica* or IRPJ) is assessed at the fixed rate of 15% on annual taxable income, using either the 'actual profits' method or the 'presumed profits' method (*see the Income determination section*).

Surcharge

Corporate taxpayers are also subject to a surcharge of 10% on the annual taxable income in excess of BRL 240,000.

Social contribution on net income

All legal entities are subject to a social contribution to the federal government (*Contribuição Social sobre o Lucro Líquido* or CSLL) at the rate of 9% (except for financial and insurance institutions, which are taxed at the rate of 15%), which is not deductible for IRPJ purposes. The tax basis is the profit before income tax, after some adjustments.

Local income taxes

Corporate income taxes are levied only at federal level (i.e. there are no state or municipal income taxes).

Corporate residence

A corporation is considered resident in Brazil if it has been incorporated in Brazil, and its tax domicile is where its head office is located.

Permanent establishment (PE)

Brazilian tax law has yet to develop rules similar to those existing in other countries, which treat a non-resident as having a PE under various factual circumstances.

Currently, there are few rules to determine whether a foreign business constitutes a taxable presence in Brazil and the concept of 'permanent establishment' only appears in Brazil's treaties.

In general, a non-resident company may be treated as having a taxable presence if it operates in Brazil either through: (i) a fixed place of business or (ii) an agent who has the power to enter into contracts in Brazil in the name of or on behalf of the non-resident.

Other taxes

Value-added tax (VAT)

VAT is payable on imports, sales, and transfers of goods and products in the form of (i) a federal excise tax (*Imposto sobre Produtos Industrializados* or IPI) at various rates in accordance with the nature of the product (normally around 10% to 15%, but in certain cases ranging to over 300%) and (ii) a state sales and service tax (*Imposto sobre*

Brazil

as operações relativas à Circulação de Mercadorias, e sobre a prestação de Serviços de transporte interestadual e intermunicipal e de comunicação or ICMS) with rates ranging from 7% to 25%.

Except for services related to freight and transportation, communications, and electric energy, which are subject to ICMS, income from services rendered is normally subject to a municipal service tax (*Imposto Sobre Serviços de qualquer natureza* or ISS), which is not a VAT, with rates ranging from 2% to 5%.

Import tax

Import tax (*Imposto de Importação* or II) is levied on the cost, insurance, and freight (CIF) price of the imported good. The rates depend on the degree of necessity and are defined in accordance with the product's tariff code contained in the Mercosur Harmonised System (NCM/SH). The rates tend to be in the range of 10% to 20%, although there are many exceptions which are subject to higher or lower rates.

Property taxes

Imposto Predial e Territorial Urbano (IPTU) is a property tax levied annually based on the fair market value of property in urban areas at rates that generally vary according to the municipality and location of the property. In the municipality of São Paulo, the basic IPTU rate is 1% for residential properties or 1.5% for commercial properties (both rates may be increased or decreased according to the market value of the property).

Transfer taxes

Imposto de Transmissão de Bens Imóveis Inter Vivos (ITBI) is a property tax levied at the transfer of immovable property, with rates also varying based on the municipality where the property is located. The ITBI rate in the municipality of São Paulo is currently 2%, applied over the market value of the property.

Imposto sobre Transmissão Causa Mortis e Doações (ITCMD) is a state property transfer tax normally payable at rates varying from state to state on inheritances and donations of goods and rights. In the State of São Paulo, ITCMD is charged at the rate of 4%.

Tax on financial transactions (IOF)

IOF is a tax levied primarily on certain financial transactions, such as loans, foreign exchange operations, insurance, and securities, as well as transactions with gold (as a financial asset) and foreign exchange instruments. The applicable rate will vary depending on the transaction. The IOF rate may be reduced to 0% in some cases, such as: (i) exchange transactions relating to the inflow of revenues in Brazil deriving from the export of goods and services; (ii) exchange transactions relating to the inflow and outflow of resources in and from Brazil, stemming from foreign loans with average term exceeding 1,800 days; and (iii) remittances of interest on net equity and dividends relating to foreign investment.

Cross-border loans signed on or after 12 March 2012, with average payment terms of up to 1,800 days (five years), are subject to IOF tax at the rate of 6%, applicable on the foreign currency exchange transactions (inflow of funds into the country only).

Social assistance contribution (Contribuição para o Financiamento da Seguridade social or Cofins)

Cofins, a monthly federal social assistance contribution calculated as a percentage of revenue, is levied at the rate of 7.6%. A Cofins credit system is meant to ensure the tax is applied only once on the final value of each transaction. However, some taxpayers (such

as financial institutions, telecommunication companies, cooperatives, and companies which opt to calculate IRPJ and CSLL using a ‘presumed profits’ method) are still subject to the previous Cofins system, which applies a rate of 3% with no credit system.

Federal social contribution (*Programa de Integração Social or PIS*)

PIS, which is also a federal social contribution calculated as a percentage of revenue, is levied at the rate of 1.65%. A PIS credit system is meant to ensure the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives, and companies that opt to calculate IRPJ and CSLL using a ‘presumed profits’ method) are still subject to the previous PIS system, which applies a rate of 0.65% with no credit system.

PIS and Cofins on imports

Importation of goods and services are also subject to PIS and Cofins (in addition to all other taxes imposed on import transactions). PIS and Cofins are imposed on the Brazilian entity or individual (the importer of goods or services) and applied at the rates of 1.65% and 7.6%, respectively. The contributions paid upon import transactions may, in some instances, be creditable.

Contribution for the Intervention in the Economic Domain (*Contribuição de Intervenção no Domínio Econômico or CIDE*)

CIDE is a contribution levied at the rate of 10% on remittances made by corporate taxpayers for royalties and for administrative and technical services provided by non-residents. CIDE is payable by the local entity, and therefore, not creditable to the non-resident. CIDE does not represent a liability to the foreign recipient. CIDE is not applied on the payments relating to the license to use, market, or sublicense software, provided that it does not involve transfer of technology.

Branch income

Profits of branches of foreign corporations are taxable at the normal rates applicable to Brazilian resident corporations.

Income determination

Brazilian taxpayers have the option (subject to some restrictions) to calculate IRPJ and CSLL using an ‘actual profits’ method (*Lucro Real*), which is based on total taxable income (book results before taxes), adjusted by certain additions and deductions as determined in the legislation.

Brazilian taxpayers also have the option to calculate IRPJ and CSLL using a ‘presumed profits’ method (*Lucro Presumido*). Under the ‘presumed profits’ method, the income is calculated on a quarterly basis on an amount equal to different percentages of gross revenue (based on the entity’s activities) and adjusted as determined by the prevailing legislation.

Inventory valuation

Brazilian income tax regulations require that inventory may be valued at the actual average cost or by the cost of the most recently acquired or produced goods. Rulings to the effect that last in first out (LIFO) is not acceptable have been given.

Brazil

Capital gains

Capital gains derived from the sale of assets and rights, including shares/quotas, are taxed as ordinary income. However, profits on certain long-term sales of permanent assets may be computed for tax purposes on a cash basis. Profits on long-term contracts may be computed on a percentage-of-completion basis. When these contracts are entered into with the government or government-owned companies, the profit may be recognised on a cash basis for tax purposes.

Except during the year when incurred, capital losses may be offset only against capital gains. Unused capital losses are treated similarly to income tax losses with regard to limits on use and carryforward period.

Capital gains derived by non-residents (including transactions carried out abroad between two non-resident investors, involving assets or rights located in Brazil) are taxed in Brazil. The Brazilian source performing the remittance of capital gains to the non-resident (whether a Brazilian acquirer or the local solicitor of a foreign acquiring entity) must withhold the applicable income tax on such amounts on behalf of the latter at the rate of 15% (or 25% if the beneficiary is located in a tax haven jurisdiction).

Dividend income

No withholding tax (WHT) is payable on cash dividends or profits paid or credited to either corporate or individual local shareholders. Brazilian resident beneficiaries are not subject to further income tax.

Foreign-source dividend income is subject to Brazilian income tax.

Financial income

Fixed-rate interest income from short, medium, or long-term financial market transactions, including swap transactions, is subject to WHT at rates ranging from 15% to 22.5%. Non-fixed financial gains related to stock/commodities exchange and/or futures market transactions are taxed at the rates of 20% (day-trade) and 15% (all other cases). The total income or gain is considered taxable income, and the tax withheld may be offset against the total tax due by the corporate taxpayer.

Foreign currency exchange gain/loss

With respect to foreign currency exchange gain/loss, which may arise from receivables or liabilities denominated in foreign currency, Brazilian tax legislation allows the local company to elect to consider the related effect, for tax computation purposes, either upon accrual or cash basis (i.e. actual receipt/payment of funds).

Foreign income

Brazilian resident companies are taxed on worldwide income. Profits of foreign subsidiaries, affiliates, and controlled companies are taxed at the date of the financial statements in which the profits are calculated, regardless of remittance. Double taxation may be avoided by means of foreign tax credits.

Deductions

Depreciation and depletion

Depreciation is allowable on a straight-line basis over the useful life of the asset. The annual rates normally allowable are 10% for machinery, equipment, furniture, and installations; 20% for vehicles; and 4% for buildings. Accelerated depreciation is

allowed for companies with a two or three working shift operation by increasing normal rates by 50% and 100%, respectively.

Depletion allowances are allowed for natural resources on a useful-life basis. Special incentive depletion allowances are granted for mining operations.

The new Brazilian accounting rules determine that companies must obtain a useful life study for fixed assets in order to determine the acceptable depreciation rates. However, for tax purposes, depreciation rates established by the Brazilian tax authorities are still being accepted under the so called 'Transitional Tax Regime' (*Regime Tributário de Transição* or RTT).

Goodwill

Amortisation of goodwill that arises as a result of accounting for investments in subsidiary and associated entities by the equity pick-up method is deferred for taxation purposes until the related investment has been realised (e.g. sold, disposed). However, under certain requirements, goodwill paid upon the acquisition of the shares or quotas of a permanent investment may be amortised before this realisation occurs (e.g. after a merger or a spin-off). It is important to note that, although still applicable for tax purposes (under the RTT, and until further regulation is issued), the amortisation of goodwill is no longer accepted under Brazil's new accounting practices.

Amortisation of patents, trademarks, and copyrights, based on their legal limited life, is a deductible expense within approved limits.

Start-up expenses

As a general rule, and under the RTT, for tax purposes start-up expenses may be deferred and amortised on the straight-line basis over a period of not less than five years, beginning the month in which the business starts operating.

Research and development (R&D) expenditures

At the option of the company, R&D expenditures may be deducted when incurred or deferred until termination of the project and then amortised over a period of not less than five years.

Interest on net equity

Companies can pay interest (calculated on a pro rata basis and up to a given rate known as the 'long-term interest rate' (*Taxa de Juros de Longo Prazo* or TJLP), which is currently set at 6% in 2012) to partners and/or share/quotaholders, based on the company's net equity. Such interest, which may not exceed the highest of 50% of the annual profits or 50% of the accumulated earnings and profits, is deductible for both IRPJ and CSLL purposes and is subject to 15% WHT at the source (or 25% if the beneficiary is located in a tax haven jurisdiction). Whenever the beneficiary is a legal entity subject to normal income tax in Brazil, the tax withheld at the source may be taken by the recipient as a tax credit against the normal corporate income tax due or the tax due at the source on distributions of interest. If the beneficiary is a Brazilian resident individual, such interest will not become subject to any further taxation.

Interest and other payments to entities in a tax haven or under a privileged tax regime

Provisions similar to those for thin capitalisation (see the Group taxation section) are also applicable to interest paid or credited by a Brazilian entity to an individual or legal entity (whether or not a related party) resident or domiciled in a tax haven or

Brazil

in a jurisdiction under a privileged tax regime. In these cases, the interest expense is only deductible for Brazilian income tax purposes if it is viewed as necessary to the company's activities and the total amount of the Brazilian entity's debt with any foreign party resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime does not exceed 30% of the Brazilian entity's net equity.

The Law also provides that amounts paid, credited, delivered, used, or remitted under any title, directly or indirectly, to related or unrelated individuals or legal entities which are resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime will only be viewed as deductible for Brazilian income tax purposes if all of the following conditions are met: (i) the effective beneficiary of the payment is identified; (ii) there is evidence that the payment beneficiary has operational capacity (i.e. substance); and (iii) there is adequate documentation to support the relevant payments and the corresponding supply of goods, rights, or utilisation of services.

Tax havens and privileged tax regime lists

Normative Instruction (NI) n. 1,037/2010, issued by the Brazilian tax authorities, lists several jurisdictions that are considered not to tax income or to tax it at a rate lower than 20% or that deny access to information regarding shareholding and ownership of assets and rights.

The NI also enumerates jurisdictions that are considered to have 'privileged tax regimes', as set forth in Brazilian legislation. The following types of entities are included in the updated list:

- Holding Companies incorporated under the law of Denmark, which do not carry out substantial economic activity.
- Holding Companies incorporated under the law of the Netherlands, which do not carry out substantial economic activity. Note that inclusion has been temporarily suspended pending a review requested by the Dutch government.
- International Trading Companies (ITC) incorporated under the law of Iceland.
- Offshore Companies (KFT) incorporated under the law of Hungary.
- Limited Liability Companies incorporated under the state law of the United States, owned by non-residents and not subject to US federal income tax.
- Holding Companies (ETVE) incorporated under the law of Spain. Note that inclusion has been temporarily suspended pending a review requested by the Spanish government.
- International Trading Companies (ITC) and International Holding Companies (IHC) incorporated under the law of Malta.

It is generally understood that the concept of a privileged tax regime is subject to stricter transfer pricing, thin capitalisation, and tax deduction rules. As for the jurisdictions considered as tax havens, besides the tax consequences applicable for privileged tax regimes, the withholding income tax rate due on capital gains and cross-border payments such as services fees, royalties, and interest is increased from 15% to 25%.

Bad debt

Losses on bad debts are tax deductible, depending on the amounts, time overdue, and administrative and/or legal actions taken to recover losses. Losses arising from inter-company transactions are not tax deductible.

Charitable contributions

Donations are deductible up to certain limits if recipients are registered as charitable institutions.

Travel expenses

Travel expenses may only be considered deductible if they are duly documented and substantiated.

Medical and pension expenses

Expenses of group medical care and health insurance programmes for employees and contributions to private supplementary pension schemes are considered deductible if supplied to all employees indistinctly.

Fines and penalties

Punitive tax/contribution penalties are not deductible for tax purposes.

Taxes/contributions

Taxes, contributions, and related costs, such as late-payment interest, are deductible for tax purposes on the accrual basis. This rule does not apply to taxes/contributions being or to be challenged by the taxpayer at any level of litigation, which are deductible for tax purposes only on a cash basis.

Net operating losses

Tax losses may be carried forward without any time limitation. However, the tax loss may not reduce taxable income by more than 30% of its amount prior to the compensation of the tax loss itself. Tax loss is defined as the accounting loss adjusted for tax purposes.

There is no carryback of tax losses.

Payments to foreign affiliates and related companies

Royalties and technical service fees payable to foreign companies with a direct or indirect controlling interest in the Brazilian company are deductible for tax purposes (observing applicable deduction limits), provided the contract has been duly registered with the National Institute of Industrial Property (*Instituto Nacional da Propriedade Industrial* or INPI) and approved by the Brazilian Central Bank.

In addition to the thin capitalisation rules, which restrict the deductibility of interest expenses in Brazil, deductibility of interest is also conditioned to approval of the respective contract by the Brazilian Central Bank. However, on unregistered related-party loans, the deductible interest may not exceed interest calculated using the six-month US dollar deposit LIBOR (London Interbank Offered Rate) rate plus 3%. It is important to note that, based on Provisional Measure n. 563/2012, interest on related party loans, even if duly registered with the Brazilian Central Bank, will be deductible only up to an interest rate equal to the LIBOR dollar rate for six-month loans plus a spread to be annually determined by the Ministry of Finance, based on average market rate. This change shall be effective for transactions to be carried out as of 2013.

Group taxation

Consolidated tax returns are not permitted in Brazil.

Brazil

Transfer pricing

The Brazilian transfer pricing rules apply to import and export transactions of goods, services, and rights between related parties (the legislation provides a broad list of the parties considered as 'related' for transfer pricing purposes). Under such rules, the transfer price determined between related parties will be acceptable, for Brazilian tax purposes, if it is determined that such price is at arm's length according to one of the traditional methods established by the legislation (no profit methods available). Moreover, all operations with jurisdictions considered as tax havens will also be subject to transfer pricing rules whether involving related parties or not.

The statutory rules provide that interest on related party loans that are duly registered with the Brazilian Central Bank will not be subject to transfer pricing adjustments. However, interest paid on a loan contracted with a related party, not registered with the Brazilian Central Bank, will be deductible only to the extent that the interest rate equals the LIBOR dollar rate for six-month loans plus 3% per year (adjusted to the contract's period).

Notwithstanding the above, it is important to note that Provisional Measure n. 563/12 set forth new transfer pricing rules applicable to inter-company loans, as mentioned before. Accordingly to such rules, interest on related party loans, even if duly registered with the Brazilian Central Bank, will be deductible only up to an interest rate equal to the LIBOR dollar rate for six-month loans plus a spread to be annually determined by the Ministry of Finance, based on average market rate. This change shall be effective for transactions to be carried out as of 2013.

Operations involving royalty agreements will not be subject to the rules below if the related contract is registered with the Banco Central do Brasil (BACEN) and INPI.

Therefore, the adequacy of the price practiced between the related parties in any operations involving goods, services, and rights may be supported through the application of one of the following methods, as determined under the Brazilian transfer pricing regulations (the company may choose the most convenient method).

Methods used on import transactions:

- Comparable Independent Price Method (PIC).
- Resale Price Less Profit Method (PRL).
- Production Cost Plus Profit Method (CPL).

Methods used in export transactions:

- Export Sales Price Method (PVE_x).
- Resale Price Method.
- Acquisition or Production Cost Plus Taxes and Profit Method (CAP).

Please note that imports and exports of commodities, quoted in commodities exchange markets, must be tested through the use of the newly introduced methods PCI and PECEX, respectively. Based on these methods, taxpayers shall compare the transaction amounts with the daily average quote for each product; the Federal Revenue Service shall issue instructions on how these methods shall be applied.

Relief of proof rules for inter-company export transactions are available.

The referred Provisional Measure also introduced other relevant changes to Brazilian transfer pricing rules, such as:

- The resale minus method (PRL) shall be calculated based on a specific mark-up determined for some industries, and a mark-up of 20% for the industries/sectors that are not specified in the legislation.
- Taxpayers are no longer required to include custom duty and other customs expenses in the tested price, nor include freight and insurance contracted with third parties, provided they are not located in low tax jurisdictions/jurisdictions with privileged tax regimes.
- The use of the taxpayer's own transactions with third parties for purposes of the use of the PIC method (equivalent of the comparable uncontrolled price method) will be acceptable only to the extent the comparable transactions are equivalent to 5% of the tested transactions.

Thin capitalisation

The Brazilian thin capitalisation rules establish that interest paid or credited by a Brazilian entity to a related party (individual or legal entity), resident or domiciled abroad, not constituted in a tax haven or in a jurisdiction with a privileged tax regime, may only be deducted for income tax purposes if the interest expense is viewed as necessary for the activities of the local entity and the following requirements are met: (i) the amount of debt granted by the foreign related party (which has participation in the Brazilian entity) does not exceed twice the amount of its participation in the net equity of the Brazilian entity; (ii) the amount of debt granted by a foreign related party (which does not have participation in the Brazilian entity) does not exceed twice the amount of the net equity of the Brazilian entity; (iii) the total amount of debt granted by foreign related parties as per (i) and (ii) does not exceed twice the sum of participation of all related parties in the net equity of the Brazilian entity; and (iv) in case debt is only granted by related parties that do not have a participation in the Brazilian entity, the total amount of debt granted by all of these related parties does not exceed twice the amount of the Brazilian entity's net equity. If one of the mentioned 2:1 ratios is exceeded, the portion of interest related to the excess debt amount will not be deductible for Brazilian income tax purposes.

Normative Instruction 1,154, issued by the Brazilian Revenue Service on 13 May 2011, further regulated the concept of related party and the calculation procedures in connection with the thin capitalisation tests.

Tax credits and incentives

Foreign tax credit

Brazilian resident companies are taxed on worldwide income, but they may compensate the income tax paid in the country of domicile of the branch, controlled, or associated company, and the tax paid on earnings and capital gains, against the corporate income tax due in Brazil. The amount of tax effectively paid abroad, to be compensated, may not exceed the amount of income tax and surtax due in Brazil on the amount of profits, earnings, and capital gains included in the calculation of taxable income.

Investment project incentives

Total or partial exemption from duty, excise tax, and social contributions on imported equipment is granted on certain approved investment projects.

Brazil

Approved investment projects are also granted accelerated depreciation on nationally produced equipment and access to low-cost financing. Sales of some capital equipment are exempt from state sales tax.

Brazilian corporate taxpayers can apply a percentage of their income tax liability on deposit for reinvestment and investment in their own approved investment projects. These approved investment projects are normally granted total or partial income tax exemption.

The Brazilian legislation also provides tax incentives for projects focusing on technological innovation.

Greater Brazil Plan (*Plano Brasil Maior*)

In August 2011, the Brazilian government announced several measures with the aim to benefit local manufacturers and exporters of goods and services. Referred to as '*Brasil Maior*' (Greater Brazil), the government's plan focuses on increasing national competitiveness through incentives for technical innovation, research, added value in production, as well as providing clear advantages for exporters.

RECOPA

RECOPA is a special tax regime for the construction, expansion, reform, or modernisation of football stadiums, which will host the official matches of the 2013 Confederations Cup and the 2014 World Cup, to take place in Brazil. A specific licence is required prior to fruition of the associated benefits.

Legal entities that hold construction/reform projects approved by the Ministry of Sports may be entitled to the following benefits:

- Suspension of II, IPI and PIS/Cofins-import on the import of machinery, working instruments, equipments, and construction material to be used or incorporated in the construction of football stadiums.
- Suspension of PIS/Cofins and IPI on local acquisition of the abovementioned goods.
- Suspension of PIS/Cofins-import on import of services by the RECOPA beneficiary.
- Suspension of PIS and Cofins on local provision of services to RECOPA's beneficiaries.

These suspensions may be converted to a 0% tax rate (exemption) after the incorporation of such goods in the construction/reform process.

The Brazilian government also grants tax benefits to those involved with the organisation of FIFA's 2013 and 2014 Football Cups in Brazil, provided that such entities and events are previously licensed by the Brazilian tax authorities based on a list provided by FIFA.

These benefits include tax exemptions on import of several perishable goods or merchandise for use and consumption in the organisation of the events promoted by FIFA and its related entities.

Regional incentives

Income tax exemptions or reductions are also available for companies set up in specified regions within Brazil, primarily the north and northeast regions. These incentives are designed to accelerate the development of certain less-developed regions and industries considered to be of importance to the economy.

Other incentives

Excise and sales tax exemptions are granted to exporters of manufactured goods.

Withholding taxes

Profits/dividends distributed to resident or non-resident beneficiaries (individuals and/or legal entities) are not subject to WHT. This provision is also applicable to dividends paid to non-resident companies located in a tax haven jurisdiction.

The WHT rate applicable to payments for services rendered by non-resident companies or individuals is generally 15% but can be increased to 25% in certain cases.

Payments for services, royalties, and interest to non-resident companies located in a tax haven jurisdiction are subject to WHT at the rate of 25%.

Certain types of income paid by Brazilian companies to non-resident recipients are subject to WHT as follows:

Recipient	WHT (%) (3)		
	Dividends (1)	Interest	Royalties
Non-resident companies and individuals:			
Non-treaty:	0	15	15
Tax haven	0	25	25
Treaty (2):			
Argentina	0	15	15
Austria	15	15	10/15/25
Belgium	10/15	10/15	10/15/20
Canada	15	10/15	15/25
Chile	10/15	15	15
China, P.R.	15	15	15/25
Czech Republic	15	10/15	15/25
Denmark	25	15	15/25
Ecuador	15	15	15/25
Finland	10	15	10/15/25
France	15	10/15	10/15/25
Hungary	15	10/15	15/25
India	15	15	15/25
Israel	10/15	15	10/15
Italy	15	15	15/25
Japan	12.5	12.5	12.5/15/25
Korea, Republic of	10/15	10/15	10/15/25

Norway	15	15	15/25
Peru	10/15	15	15
Philippines	15/25	10/15	15/25
Portugal	10/15	15	15

Brazil

Recipient	WHT (%) (3)		
	Dividends (1)	Interest	Royalties
Slovak Republic	15	10/15	15/25
South Africa	10/15	15	10/15
Spain	10/15	10/15	10/15
Sweden	25	25	25
Ukraine	10/15	15	15

Notes

1. Note that the remittance of dividends is not subject to taxation in Brazil.
2. Treaty rates in excess of those in force for non-treaty countries are automatically reduced. The treaty concerned should be consulted to confirm that the tax reduction is applicable in each case.
3. For treaties with multiple WHT rates, the following rules generally apply:
 - Dividends: if there was WHT on dividends, which is not the case according to Brazilian legislation, the 10% (or 15%) rate would generally apply if the beneficial owner is a company which holds directly a certain minimum participation in the capital of the company paying the dividends; the 15% (or 25%) rate is considered for all other cases.
 - Interest: the 10% rate generally applies to loans with a certain minimum term granted for specific purposes (e.g. acquisition of capital goods); the 15% rate is considered for all other cases.
 - Royalties: the 10% rate generally applies to royalties arising from the use of, or the right to use, cinematograph films, and films or tapes for television or radio broadcasting, and any copyright of literary, artistic, or scientific work produced by a resident of a contracting state; the 25% (or 15%) rate generally applies to royalties arising from the use of, or the right to use, trademarks; and the 15% (or 10%) rate is considered for all other cases.

Tax administration

Taxable period

For tax purposes, a company's year-end is 31 December. A different year-end for corporate purposes is irrelevant.

Tax returns

With few exceptions, corporate entities, including those that are foreign-controlled, must file an annual adjusting tax return consolidating the monthly results of the previous calendar year. This tax return must normally be filed by the end of June following the tax year ending on 31 December.

Supporting documentation must be retained for at least five years.

Payment of tax

In the case of income tax, it is calculated monthly, and prepayments must be paid by the last working day of the subsequent month. Any amounts of income tax due for the year (exceeding the prepayments performed) must be paid by the last working day of March of the subsequent year.

There is an option to pay the tax due at the end of each quarter in three installments, the first one starting from the subsequent month to the end of the quarter. When income tax is calculated quarterly, the taxpayer must perform the applicable payment by the last working day of the month subsequent to the end of the quarter.

Statute of limitations

For corporate income tax purposes, the tax authorities may generally audit taxpayers up to five years after the close of the tax year (31 December). However, in case of alleged fraud or simulation, and if the taxpayer did not perform the payment of the corporate income tax for the relevant fiscal year, the statute of limitations of five years will begin as from the first day of the following year to the one in which the tax authorities could have assessed the taxpayer for the alleged fraud/simulation or unpaid tax.

As for other taxes, such as VAT (ICMS), excise tax (IPI) and import duty (II), the statute of limitations of five years begins as from the date of the taxable event.

Public digital bookkeeping system (SPED)

Brazil is currently implementing a new public system of digital bookkeeping known as SPED, which aims at gradually replacing paper copies of invoices and tax records for electronic files. SPED can be defined as an instrument that unifies the activities of reception, validation, storage, and legalisation of records and documents that are part of the commercial and tax bookkeeping of companies, through a single, computerised flow of data.

Comprised of three pillars (electronic invoice, digital fiscal bookkeeping, and digital accounting bookkeeping), the implementation of SPED requires adjustments to the relationship with tax authorities, clients, suppliers and, mainly, on the internal operational processes, which will demand an integrated action from different areas (tax, accounting, information technology, supplies, production, commercial, and others). On the other hand, occasional inconsistencies from databases, as well as operational errors related to tax and accounting information to be generated, usually unknown to the companies' administration, will be subject to an increased visibility and monitoring by the Brazilian tax authorities.

Topic of focus for tax authorities

It should be noted that, over the years, Brazil has applied a 'form over substance' approach. Nonetheless, as of 10 January 2001, Complementary Law 104/2001 has introduced a substantial modification in the Brazilian tax code (the so-called anti-avoidance rule). This law establishes a substance over form approach that, once regulated, may allow the Brazilian tax authorities to disregard tax-driven transactions.

In our local practice, we have seen that tax authorities are more and more keen on assessing taxpayers in relation to the economic substance of their operations (e.g. the use of special purpose entities to enable the amortisation of goodwill for tax purposes in Brazil).

Significant developments

There have been no significant corporate tax developments in Bulgaria during the past year.

Taxes on corporate income

Bulgarian tax residents are taxed on their worldwide income. Non-residents are taxed on their income from Bulgarian sources only, through a permanent establishment (PE) and/or via withholding tax (WHT), depending on the case (*see the Branch income section*).

In general, corporate income is subject to corporate income tax (CIT) at a flat rate of 10%.

Alternative tax

Income earned by organisers of games of chance is subject to 12% or 15% alternative tax, applied on a specific tax basis (e.g. the total value of the stakes made). A fixed-sum tax is applied to the operation of gaming machines.

Tonnage tax regime

A special alternative tax regime applies to the operation of commercial maritime vessels, as per their net tonnage, at a rate of 10%.

Local income taxes

There are no local government corporate income taxes in Bulgaria.

Corporate residence

A corporation is resident in Bulgaria for tax purposes if it is incorporated in Bulgaria.

Permanent establishment (PE)

PEs of foreign tax residents (e.g. branches) are treated as separate entities similar to Bulgarian residents for tax and accounting purposes.

The definition of a PE in the Bulgarian legislation follows, in general, the Organisation for Economic Co-operation and Development (OECD) model; however, it covers a broader scope of activities leading to a tax presence in Bulgaria. A PE is generally defined as a fixed place (own, rented, or otherwise used) through which a foreign entity partly or wholly carries out business activities in the country.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 20%. A reduced VAT rate of 9% applies to certain tourist services. Some activities are zero-rated, including intracommunity supplies, exports of goods to countries outside the European Union (EU), and international transport of goods (i.e. transport to or from countries outside of the European Union).

Some supplies are VAT exempt without the right to a VAT credit, including (but not limited to) certain land transactions; leasing of residential property to individuals; and financial, insurance, gambling, educational, and health services. Options to charge VAT exist for certain land transactions, leasing of residential property to individuals, and finance lease contracts.

The following statutory periods for VAT refunds apply:

- 30 days for persons that have performed supplies subject to zero-rate (e.g. exports) within the last 12 months exceeding 30% of the total value of all taxable supplies performed by them in the same period, as well as by large investors meeting certain specific conditions.
- Two months and 30 days in all other cases.

The following mechanism for VAT recovery applies to VAT-registered companies: the positive or negative difference between the output VAT charged by the company and the input VAT for the respective month for which recovery is claimed results, respectively, in VAT payable or refundable. The VAT payable should be remitted to the state budget not later than the 14th day of the month following the respective month. VAT refundable is offset against any VAT payable in the following two months, and any remainder is effectively recovered within 30 days thereafter.

It is possible to claim a refund for VAT paid with respect to assets acquired not earlier than five years prior to the VAT registration, under certain conditions. In the case of real estate, the term is 20 years.

Customs duties

Customs duties are calculated in accordance with the EU customs tariff and regulations.

Excise duties

Excise duties are charged as a percentage of the sales price or customs value or as a flat amount in Bulgarian lev (BGN) per unit, unless a suspension regime applies. For 2012, excisable products include petrol and diesel fuel, liquefied petroleum gas (LPG), heavy oil, kerosene, beer and spirits, tobacco products, and electricity.

The applicable rates are as follows:

- Unleaded petrol: BGN 710 per 1,000 litres.
- Diesel: BGN 630 per 1,000 litres.
- LPG: BGN 340 per 1,000 kg.
- Kerosene: BGN 630 per 1,000 litres.
- Natural gas: BGN 0 per gigajoule (as of 1 June 2012 the rate is BGN 0.85 per gigajoule if used as motor fuel and BGN 0.10 if used for production purposes).
- Heavy oil: BGN 600 per 1,000 litres.
- Electricity: BGN 2 per MWh (zero rate if used by households).
- Beer: BGN 1.50/hl/°Plato.

Bulgaria

- Wine: zero rate.
- Ethyl alcohol: BGN 1,100 per hectolitre.
- Cigarettes: 23% *ad valorem* + 101/1,000 pieces (min. BGN 148).

Lower rates may apply in certain cases (e.g. energy products used for heating purposes or mixed with bio fuels, beer produced by independent small breweries, etc.).

The Excise Duties and Tax Warehouse Act introduced the tax warehousing regime and regulates the production, storage, and movement of excisable products.

Property tax

The annual property tax rate is determined by each municipality and currently ranges from 0.01% to 0.45% of the tax value of property. Individuals and legal entities that are owners of immovable property (i.e. land and buildings) are liable for property tax. For individuals and residential properties of enterprises, the taxable base is the tax value as determined by the municipal authorities based on certain statutory criteria. The taxable base for properties of enterprises is the higher of the property's gross book value and its tax value determined by the respective municipal authorities.

A garbage collection fee is payable for immovable property at a rate determined by the local municipal council annually.

Transfer tax

A transfer tax is due on the value of transferred real estate or motor vehicles, subject to certain exemptions (e.g. contributions in-kind, acquisitions under the Law on Privatisation and Post-privatisation Control). The rate of the transfer tax ranges from 0.1% to 3% and is determined by each municipality.

Stamp taxes

There are no stamp duties in Bulgaria.

Insurance premium tax

A tax of 2% is levied on all insurance premiums paid after 1 January 2011 under insurance agreements covering risks insured in Bulgaria. Life insurance, reinsurance, aircraft, vehicle, and international transport insurance agreements are exempted from this tax. The taxable base is the insurance premium received by an insurance company under an insurance agreement.

Insurance companies and their tax representatives are liable to collect the tax and remit it to the budget monthly by the end of the month following the month when the insurance premium was collected.

Tourist tax

The tourist tax is levied with respect to the number of nights spent in hotels and other places for accommodation. The municipalities may determine the tax within a range of BGN 0.20 to BGN 3 per night depending on the type of accommodation facility.

The tax is payable on a monthly basis by the 15th day of the following month.

One-off taxes

The following corporate expenses are subject to a one-off tax:

- Representative expenses related to a company's business.

- Social expenses provided to employees in kind (monetary social expenses are subject to personal income tax).
- Expenses related to the exploitation and maintenance of cars where they are used for management activities (as distinguished from administrative activities).

The rate of the one-off tax with respect to the above expenses is 10%. Both the expenses and the related one-off taxes are deductible for CIT purposes.

Branch income

Although branches are not deemed to be separate legal persons, branches of non-resident companies have separate balance sheets and profit and loss accounts and are subject to CIT at the standard rate of 10% as well as other general taxes (e.g. VAT, property tax).

Representative offices of foreign entities are not allowed to carry out business activities and are not subject to CIT. A representative office registered under the Encouragement of Investments Act may perform only those activities that are not regarded as 'economic activities' (e.g. marketing activities normally carried out by a representative office and auxiliary to the activities of its head office). Representative offices do not constitute PEs of the non-resident entities, unless they engage in business activities in breach of the law.

Profits repatriated by a branch to its head office abroad are not subject to withholding tax (WHT). However, certain income payable by a Bulgarian branch or a PE to other parts of the enterprise abroad may trigger WHT (e.g. income from technical services, interest, royalties), unless the respective expenses are not deductible to the branch or the PE, or are recharged at cost.

Income determination

The taxable result is based on the statutory accounting principles relating to profit/loss and adjusted for tax purposes. Statutory accounting is maintained on an accrual basis in line with the applicable accounting standards.

Small and medium-sized companies may apply specific national standards for the financial statements of small and medium-sized companies, or optionally, International Financial Reporting Standards (IFRS). The principles provided by the Standards for the Financial Statements of Small and Medium-sized Companies are similar to those provided by IFRS. Certain types of companies, including banks and insurance companies, are obliged to apply IFRS.

Inventory valuation

The tax legislation follows the accounting rules for inventory valuation methods. The accounting rules may restrict the application of certain methods (e.g. last in first out [LIFO] is not allowed under IFRS).

Inventory valuation and revaluation methods applicable under accounting standards may be used for tax purposes. Companies may choose the method of inventory valuation but must apply the chosen method consistently throughout the accounting period. An inventory of assets and liabilities is carried out in each accounting period. Accounting gains and losses realised upon revaluation of inventory will not be

Bulgaria

recognised for tax purposes and will form a temporary tax difference. These gains and losses will be recognised for tax purposes in the period in which the inventory is disposed of.

Capital gains

Realised capital gains are included in corporate income and are taxed at the full CIT rate.

Note that capital gains from securities will not be subject to taxation if resulting from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/European Economic Area (EEA). Assets distributed as dividends are deemed realised at market value, and any capital gains arising from this will be subject to tax.

Dividend income

Dividends distributed by Bulgarian companies to foreign shareholders and resident individuals are subject to 5% WHT under the domestic legislation (*see the Withholding taxes section for exceptions for payments to EU/EEA tax residents and under double tax treaties [DTTs]*).

Inter-company dividends

Inter-company dividend payments between Bulgarian companies and dividends distributed by EU/EEA residents to Bulgarian companies (except for dividends from special purpose investment companies or in case of 'hidden distribution of profits') are not included in the tax base of the recipient company.

Stock dividends

No explicit regulation with respect to stock dividends exists in the Bulgarian CIT act. Rather, the tax treatment of stock dividends follows the accounting treatment.

Exchange rate gains/losses

Exchange rate gains and losses are reported in the profit and loss account and reflected in the assessment of taxable profit.

Foreign income

Income derived outside Bulgaria by resident legal entities and income derived in Bulgaria by Bulgarian branches of non-residents is included in the taxable base for the purpose of CIT, regardless of whether such income is subject to taxation abroad.

In instances where the provisions of a DTT are applicable, a tax credit or exemption for the foreign tax paid may be allowed. There is also a unilateral tax credit which may not exceed the amount of the tax that would be payable in Bulgaria for the same type of income.

Undistributed income of foreign subsidiaries of a Bulgarian resident company is not taxed.

Deductions

Depreciation and depletion

For accounting purposes, depreciation is calculated in accordance with the straight-line, progressive, or declining-balance methods of depreciation. Accounting regulations

permit Bulgarian companies to establish a depreciation schedule for each tangible and intangible fixed asset on the basis of the method chosen by the company.

For tax purposes, only the straight-line method is permitted. For machines and equipment that are part of the initial investment, accelerated depreciation may also apply, subject to certain conditions.

For tax purposes, fixed assets are divided into the following seven categories:

Category	Assets	Maximum rates (%)
I	Massive buildings, industrial constructions/equipment, transmission facilities/lines (including electricity)	4
II	Machinery, production facilities, apparatuses	30/50
III	Vehicles (except cars), coverage of roads and runways	10
IV	Computers, peripherals to computers, software and rights to use software, mobile phones	50
V	Cars	25
VI	Long-term intangibles with legal or contractual limitations on the period of use	33 ¹ / ₃
VII	Other assets	15

Under certain conditions, assets classified in Category II that are new may be depreciated at a maximum rate of 50% for tax purposes.

The depreciation rate for Category VI is determined by the period of limitations, but not more than 33 ¹/₃%.

Depletion is not specifically regulated for tax purposes.

Goodwill

Goodwill is not amortisable under Bulgarian tax law.

Start-up expenses

Start-up expenses may be recognised as deductible in the year of establishment of the company.

Interest expenses

Interest expenses are recognised as deductible expenses, subject to the thin capitalisation rules applicable in Bulgaria (see *Thin capitalisation in the Group taxation section*).

Bad debt

Bad debt impairment costs can be deducted upon expiration of the statute of limitation period. Also, the impairment costs can be recognised for tax purposes upon transferring the receivables. Such impairment costs are tax deductible for financial institutions in the year of recognition.

Charitable contributions

Generally, charitable contributions to certain organisations or persons, specified by law, can be deductible at up to 10% of a company's accounting profit.

Bulgaria

Fines and penalties

Expenses for fines and penalties for violation of the legislation are not deductible.

Taxes

CIT is not deductible for tax purposes. However, other taxes, such as one-off taxes on certain expenses (e.g. representative expenses, certain types of fringe benefits) or local taxes and fees may be recognised as deductible for CIT purposes.

Net operating losses

The taxpayer has the right to carry forward tax losses incurred in a given year over the following five years. The loss subject to carryforward is the negative amount of the financial result adjusted for tax purposes, with certain add-backs and deductions specified in the tax legislation.

Tax losses may be reversed up to the amount of the positive financial result after tax adjustments (without the effect of the loss subject to be carried forward itself).

Carryforwards of foreign-source losses may only offset income from the same source. However, EU/EEA-source losses may offset income from other sources, including Bulgarian sources.

Loss carryback is permitted in very specific cases.

Payments to foreign affiliates

Payments to foreign affiliates may be subject to recalculation by the tax authorities if such payments are not made at arm's length.

Group taxation

No group consolidation is permitted for tax purposes in Bulgaria. All companies must pay tax on the basis of individually assessable profits and losses.

Transfer pricing

Bulgarian law requires that taxpayers determine their taxable profits and incomes applying the arm's-length principle to prices at which they exchange goods, services, and intangibles with related parties (transfer prices). Bulgarian transfer pricing rules generally follow OECD Transfer Pricing Guidelines.

Transfer prices are not set in compliance with the arm's-length principle where:

- prices of the supply of goods or services differ from the market prices or
- loans are received or granted against an interest rate that differs from the market interest rate effective at the time the loan agreement is concluded.

The market interest rate is defined as the interest payable under the same conditions for a loan provided or received, notwithstanding the form of the loan, between non-related parties. The market interest is determined according to the market conditions.

The taxable person should be able to evidence that its relations with related parties are in line with the arm's-length principle.

For the purposes of transfer pricing rules, market prices are determined by the following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Transactional net margin method.
- Profit split method.

Preparation of transfer pricing documentation is not mandatory but is recommendable for material related party transactions. Recently, the revenue authorities tend to focus more on the transfer pricing area.

Currently, there is no possibility to obtain an Advance Pricing Agreement (APA). However, it is possible to obtain an opinion from the revenue authorities on a case-by-case basis. Such opinions are not binding, but they may provide protection from assessment of interest for late payment and penalties.

Thin capitalisation

Interest payable by local companies to local or foreign persons may be restricted by the thin capitalisation rules (which also apply to interest due to non-affiliated companies).

The tax deductibility for interest expenses that exceed interest income is restricted to 75% of the accounting result of the company, exclusive of interest income and expense. If the accounting result of the company before including the effect of the interest income and expenses is a loss, none of the net interest expense will be deductible for tax purposes. Interest on bank loans and interest under financial lease agreements are subject to thin capitalisation regulations only when the agreements are between related parties or guaranteed by or extended at the order of a related party.

The thin capitalisation rules do not apply if the debt-to-equity ratio does not exceed 3:1 for the respective tax period.

Interest expenses restricted in a given year under the thin capitalisation rules may be deducted from the financial result for tax purposes during the following five consecutive years. This reversal may be made up to the tax allowed interest expenses, as per the above formula.

Tax credits and incentives

Tax incentives may apply in certain circumstances, including:

- Partial granting of the CIT due for performance of agricultural activities.
- Additional tax deductions for hiring of long-term unemployed, handicapped, or elderly persons.
- Full granting back of the CIT due for investment in regions with high unemployment.

Foreign tax credit

See *Foreign income in the Income determination section for a description of the foreign tax credit regime.*

Withholding taxes

Bulgarian companies are required to withhold tax on payments of dividends and liquidation proceeds; interest (including that incurred under finance lease agreements

Bulgaria

and on bank deposits); royalties; fees for technical services; payments for the use of properties; payments made under operating leasing, franchising, and factoring agreements; and management fees payable to non-residents.

Capital gains from the transfer of shares in a Bulgarian company or immovable property located in Bulgaria realised by a non-resident are also subject to domestic WHT; however, the tax is payable by the non-resident. Capital gains from securities are not subject to WHT if they result from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/EEA.

Dividends and liquidation proceeds are also taxed where payments are made to resident individuals and non-profit organisations (*for details on dividend payments between domestic companies, see Dividend income in the Income determination section*). Dividends capitalised into shares (stock dividends) are not subject to WHT.

Interest and royalty payments payable to EU-based associated companies are subject to a reduced 5% WHT rate in Bulgaria. Associated company criteria are identical to those in the Interest and Royalty Directive and require holding of at least 25% for at least two years. Exemption from WHT on interest and royalties payable to associated companies will be introduced as of 1 January 2015.

Any fees for services and use of rights (in addition to technical services fees and royalties) accrued to entities in low-tax jurisdictions will attract 10% Bulgarian WHT unless there is proof of the effective provision of the supply. Subject to 10% WHT would also be any accruals for penalties or damages payments to entities in low-tax jurisdictions, except for insurance compensations. The tax legislation introduces a list of low-tax jurisdictions. These are certain off-shore territories which are explicitly listed, as well as countries with which Bulgaria has not signed a DTT and in which the applicable corporate tax rates are more than 60% lower than the applicable rate in Bulgaria.

Certain types of income (other than dividends) accrued by a PE of a foreign person to other parts of its enterprise located outside the country are subject to WHT (*except for that mentioned in the Branch income section*).

Dividends

When a dividend is accrued to a non-resident company or an individual (both resident and foreign), it is subject to WHT at a rate of 5%, unless the rate is reduced by an applicable DTT. No differentiation is made between portfolio and substantial holdings for purposes of this WHT on dividends.

Dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU/EEA member state are not subject to Bulgarian WHT.

Interest

A 10% rate applies to interest (including interest from bank deposits) payable to a non-resident, unless the rate is reduced by an applicable DTT.

Interest on borrowings by the government or the Bulgarian National Bank from international financial institutions is not taxable if the respective loan agreements contain relevant exemption arrangements (international treaties override domestic legislation).

Interest paid to an associated EU-based related company is subject to a 5% WHT unless reduced by a DTT (require at least 25% holding for at least two years).

Royalties

Royalties payable to foreign persons are taxed at a rate of 10% at source, unless the rate is reduced by an applicable DTT.

Royalty payments to an associated EU-based related company are subject to a 5% WHT unless reduced by a DTT (require at least 25% holding for at least two years).

Capital gains and technical services

Capital gains and technical service fees payable to foreign residents are subject to 10% WHT, unless the rate is reduced by an applicable DTT. As per the domestic legislation, technical services include installation and assembly of tangible assets as well as consultancy services and marketing research.

Application of DTT relief

Applying DTT relief is generally possible only after completing an advance clearance procedure with the Bulgarian tax authorities. Companies have to evidence that they satisfy the requirements for applying the DTT (e.g. tax residence, beneficial ownership, existence of contractual relationship, actual accrual/payment of the income). The procedure usually takes 60 days to complete.

The above procedure has to be followed only if the annual income payable by a Bulgarian resident exceeds BGN 500,000 (approximately 250,000 euros [EUR]). In all other cases, DTT relief can be applied directly, through submitting a tax residence certificate and a beneficial ownership declaration with the payer of the income.

Beneficial ownership is explicitly defined in Bulgarian legislation. A company is considered a beneficial owner of the income if it has the right to dispose of the income, has discretion over its use, bears the whole or a significant part of the risk of the activity from which the income is realised, and does not qualify as a conduit company.

A conduit company is a company which is controlled by persons who would not benefit from the same type and amount exemption if the income was realised directly by them, does not carry out any economic activity except for owning and/or administering the rights or the assets from which the income was realised, and does not own assets, capital, or personnel relevant to its economic activity or does not control the use of the rights or assets from which the income was realised.

The conduit company restriction does not apply to companies which have more than a half of their voting shares traded on a registered stock exchange.

The following is a summary of the main parameters of the Bulgarian DTTs as of 1 January 2012:

Recipient	WHT (%)			
	Dividends*	Interest**	Royalties**	Capital gains
Albania (3, 6, 9, 28)	5/15	0/10	10	0/10
Algeria (24)	10	0/10	10	0
Armenia (1, 2, 6, 28, 36)	5/10	0/5/10	5/10	0/10
Austria (6, 10, 35)	0/5	0/5	0/5	0/10

Bulgaria

Recipient	WHT (%)

Notes

* Under Bulgarian domestic legislation, dividends distributed to non-residents are subject to 5% WHT, unless the recipient is a resident of an EU/EEA member state.

** Under Bulgarian domestic legislation, interest and royalty payments to EU-resident companies satisfying the Interest and Royalty Directive requirements are subject to a reduced 5% WHT rate.

- The lower rate applies to dividends paid out to a non-resident that is the direct owner of at least the equivalent of 100,000 United States dollars (USD) forming part of the capital of the company making the payment.
- The reduced rate for royalties is available for the use of (or right to use) industrial, commercial, or scientific equipment.
- The lower rate applies to dividends paid out to a foreign company that controls directly at least 25% of the share capital of the payer of the dividends. In the specific cases of the different countries, more requirements may be in place.
- There is no WHT on royalties for the use of (or the right to use) scientific or cultural works.
- The lower rate applies to dividends paid out to a foreign company that controls directly at least 15% of the share capital of the payer of the dividends.
- There is no WHT on interest when paid to public bodies (government, the central bank, and, in several cases, certain governmental bodies).
- 5% royalties are applicable if the Netherlands applies WHT under its domestic law.
- Up to 10% branch tax may be imposed on PE profits.
- The 10% rate on capital gains from securities applies in specific cases that are described in the respective treaty.
- The zero rate on interest applies if the loan is extended by a bank and also for industrial, trade, and scientific equipment on credit.
- The zero rate on interest applies if the interest is paid to public bodies (government, municipality, the central bank, or any financial institution owned entirely by the government), to residents of the other country when the loan or the credit is guaranteed by its government, or if the loan is extended by a company for any equipment or goods.
- The Council of Ministers has stated its intention to renegotiate the DTTs with Austria, Malta, and Finland.
- A 5% rate on royalties applies if the Swiss Confederation introduces in its domestic law WHT on royalties paid to non-residents.
- The 10% rate on interest applies if the interest is received from a financial institution, including an insurance company.

Bulgaria

15. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art, or scientific work.
16. The lower rate applies to dividends paid out to a foreign company that controls directly at least 10% of the share capital of the payer of the dividends.
17. The zero rate applies to dividends payable by a Bulgarian resident entity to an entity resident in Malta. The 30% rate applies to dividends payable by a Maltese entity to a Bulgarian entity.
18. The 10% rate applies to dividends distributed by companies that enjoy a reduced or zero CIT by virtue of a tax incentive for investments. In all other cases, the rate is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%.
19. The 5% rate applies to interest payable to banks or other financial institutions. The zero rate applies to interest payable to certain public bodies (governments, municipalities, central banks) or to residents of the other country when the loan or credit is guaranteed, insured, or financed by a public body of that country or by the Israeli International Trade Insurance Company.
20. The rate on royalties is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%.
21. The rate on capital gains from securities is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%. However, capital gains from transfers of shares in entities whose real estate properties exceed 50% of their assets are taxed in the country in which the real estate is located.
22. The zero rate applies to dividends and interest paid to certain public governmental and local bodies as well as entities fully owned by the state.
23. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art, or scientific work as well as for the use of industrial, commercial, or scientific equipment.
24. There is no WHT on interest when paid to and beneficially owned by public bodies (government, local public authorities, the central bank, or any financial institution wholly owned by the government), as well as on interest derived on loans guaranteed by the foreign government or based on an agreement between the governments of the states.
25. The 7% rate on royalties applies if the royalties are paid for the use of, or the right to use, cinematograph films and films or tapes for radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process.
26. The zero rate applies for capital gains from shares in a Bulgarian resident company that are traded on the Bulgarian Stock Exchange.
27. In accordance with the EU Parent-Subsidiary Directive implemented in the Bulgarian legislation, dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU member state may not be subject to Bulgarian WHT.
28. Full WHT at source may be levied on capital gains from the sale of shares in companies, the main assets of which are directly or indirectly holdings in real estate situated in Bulgaria, and in some other cases (subject to the specifics stipulated in the respective treaty).
29. There is no WHT on interest when paid to public bodies (government, the central bank, governmental institutions) or any financial institution wholly owned by the government.
30. Pension funds and charities are considered resident persons.
31. The zero rate does not apply to dividends distributed to real estate investment trusts (REITs).
32. The zero rate does not apply to interest paid under a back-to-back loan.
33. The benefits of the treaty are limited to entities that satisfy certain criteria (Limitation of Benefits clause).
34. The 5% rate on royalties applies if the royalties are paid for the use of, or the right to use, any patent, design, model, plan, secret formula, process, or know-how.
35. The treaty provides for 10% WHT on capital gains unless shares were sold on a recognised stock exchange or seller owned at least 20% of the issuing company's capital.
36. The reduced rate for interest is available for bank loans (subject to specifics in the treaty).

Under some DTTs, technical service payments fall within the definition of royalty payments and are taxed accordingly.

Tax administration

Taxable period

The financial and tax years coincide with the calendar year.

Tax returns

Annual profit must be declared no later than 31 March of the year following the financial (tax) year. Along with their annual CIT returns, companies are required to file financial information for their business activities during the year in a standard statistical form not subject to a financial audit. The self-assessment principle is applied.

Payment of tax

If a company ended the preceding financial year with a taxable profit, it is liable for advance CIT payments each month in the current year at the rate of 10%. The monthly taxable base for the second, third, and fourth quarters is one-twelfth of the annual taxable profit for the preceding year multiplied by a coefficient determined in the State Budget Act for the current year. However, the taxable base for the advance payments during the first quarter is one-twelfth of the taxable profit of the company for the year before the preceding year multiplied by a coefficient defined in the State Budget Act for the current year.

Corporate taxpayers having a tax loss or zero taxable result in the previous year and companies established during the current year make quarterly advance payments during the current fiscal year. The base of the quarterly advance payments is the profit for the corresponding period accumulated from the beginning of the current year.

Companies with a net sales revenue below BGN 200,000 for the preceding year and newly incorporated companies (if not established as a result of a transformation of another entity) are not required to make advance payments of CIT.

Overpayment of CIT may be offset against advance and annual payments of the respective taxes due for the next period. The difference between the annual tax declared in the CIT return and the advance tax paid for the corresponding year must be paid by the deadline for submitting the tax return on 31 March of the following year.

Statute of limitations

The statute of limitations, i.e. the period within which the state authorities are entitled to collect the tax liabilities and other related mandatory payments, is five years from the beginning of the year following the year in which the tax liabilities became payable. The above periods can be extended in certain cases. However, the maximum period of the statute of limitations is ten years.

Audit cycle

Tax audits are usually performed every four to five years, corresponding to the period of the statute of limitations.

Topics of focus for tax authorities

Transfer pricing is likely to become an area of focus for the tax authorities.

Significant developments

Tax on immovable property (ToIP)

Further to the 2010 Law on Financial Management and Prakas No. 493 MEF/PrK on the ToIP, the Ministry of Economy and Finance has issued Prakas No. 371 MEF/PrK on the tax base of ToIP. The Prakas determines that the ToIP is effectively collected from year 2011 on immovable properties located in Phnom Penh and other cities of the provinces.

The ToIP base is 80% of the total value of immovable property (both land and buildings) stated in Appendix 1 of the Prakas less the threshold of 100 million Cambodian riels (KHR) (approximately 25,000 United States dollars [USD]).

Subsequent Notifications were issued that extended the deadline for the 2011 property tax payment to 31 December 2011.

Sub-Decree on tax incentives in securities sector

The Royal Government of Cambodia has issued Sub-Decree No.70 to provide tax incentives to companies listed on the Cambodian Stock Exchange (CSX) and public investors who hold and/or trade government, equity, and debt securities on the securities market. *See the Tax credits and incentives section for more information.*

Prakas on additional tax incentives for rice farming, paddy rice purchase, and export of milled rice

The Ministry of Economy and Finance has issued a Prakas to provide additional tax incentives to any enterprises in the business of rice farming, paddy rice purchase, and export of milled rice. *See the Tax credits and incentives section for more information.*

Prakas on charitable distribution

Under Prakas No. 656 SHV/KRB, dated 19 September 2011, the Ministry of Economy and Finance confirmed that donations made during the financial years 2010 and 2011 to support victims of the border dispute or the incident at Koh Pich through the CTN and Bayon Foundations can be deducted from taxable profit in the 2010 and 2011 tax on profit (ToP) returns. The taxpayers must have proper evidence supporting the payments.

Taxes on corporate income

Cambodia's taxation rules vary according to the taxpayer's regime, the classification of taxpayers under different tax collection and control procedures of the General Department of Taxation (GDT). Real-regime taxpayers include large or incorporated taxpayers duly registered with the Ministry of Commerce and the GDT. The majority of foreign investors will fall into the real regime. Unless otherwise stated, the focus of this summary is on real-regime taxpayers.

Resident taxpayers are subject to tax on worldwide income while non-residents are taxed on Cambodian-sourced income only. A permanent establishment (PE) is taxable on its Cambodian-source income only.

Corporate tax rate

The standard rate of corporate income tax, known as tax on profit (ToP), for companies and PEs is 20%.

Industry-specific tax rates

Oil and gas and certain mineral exploitation activities are subject to ToP at the rate of 30%.

Insurance companies are taxable at a rate of 5% on the gross premium income and at the rate of 20% on other income derived from non-insurance/reinsurance activities. Net interest income of insurance companies received after 4% or 6% withholding tax (WHT) is not taxable income.

Minimum tax

Real-regime taxpayers are subject to a separate minimum tax. The minimum tax is an annual tax with a liability equal to 1% of annual turnover inclusive of all taxes except value-added tax (VAT). However, an exemption has been provided for Qualified Investment Projects (QIPs) (*see the Tax credits and incentives section for more information*).

As a separate tax to the ToP, the minimum tax is due irrespective of the taxpayer's profit or loss position (i.e. the minimum tax will be liable if the 1% of total annual turnover exceeds the 20% ToP liability).

Additional ToP on dividend distribution

A dividend-paying taxpayer is required to pay an additional ToP at the time of dividend distribution if the profit was previously subject to a 9% or 0% ToP.

A shareholder is entitled to establish a special dividend account from which the relevant dividend that was already subject to 20% ToP may be on-paid without further additional ToP obligations.

A dividend will be exempt from tax in the hands of the shareholder if additional ToP and WHT for non-resident shareholders has been paid.

Local income taxes

Local income taxes are not applicable in Cambodia.

Corporate residence

Resident taxpayers include companies organised, managed, or having their principal place of business in Cambodia.

Permanent establishment (PE)

A PE may be determined if there is a permanent place or entity through which the non-resident persons carry on their business or if there is an exercise of the authority to conclude a contract on behalf of a foreign entity or if business activities exceed certain time periods in Cambodia.

Cambodia

Factors to be considered in determining a PE include a place of management, an agent or office, a warehouse or factory, a workshop, any place of extraction of natural resources, a plantation, etc. Carrying out projects (e.g. supervisory activities of construction project, provision of services) exceeding a time period of six months in any 12-month period may also be considered as having a PE.

Other taxes

Value-added tax (VAT)

VAT is applicable to real-regime entities and is charged at 10% on the value of the supply of most goods and services.

Exported goods and services rendered outside Cambodia are zero-rated. In addition, 0% VAT applies to the supporting industries or contractors who directly supply goods or services to the export-oriented garment manufacturers, textile, footwear industries, and domestic supplies of paddy rice.

Some supplies are VAT exempt, the main categories being public postal services, medical and dental services, electricity, transportation of passengers by wholly state-owned public transport systems, insurance services, and primary financial services.

VAT returns and payments are due within 20 days of the following month. Note that strict record-keeping requirements do exist.

Import and export duties

Import duties are levied on a wide range of products. Rates vary from 0% to 35%. Following Cambodia's entry into the Association of South-East Asia Nations (ASEAN) during 1999, the government is required to reduce import duties in accordance with the Common Effective Preferential Tariffs program.

Export duties are levied on a limited number of items, such as timber and certain animal products (including most seafood).

Specific tax on certain merchandise and services (SPT)

SPT is a form of excise tax that applies to the importation or domestic production and supply of certain goods and services. SPT on domestically produced goods is generally applied to the 'ex-factory selling price', which is defined as 65% of the selling price before VAT and any discount. For imported goods, SPT is due on the CIF (cost, insurance, and freight) value inclusive of customs duty. For hotel and telecommunication services, SPT is payable based on the invoice prices.

For local and international air transportation of passengers, SPT is 10%, payable based on the air ticket value issued in Cambodia for travel within and outside Cambodia. The SPT base is inclusive of all taxes other than SPT and VAT. For example, for return air tickets from Phnom Penh to Singapore costing USD 500, exclusive of airport tax, the SPT payable is USD 45.45 (USD 500/1.1 x 10%).

Accommodation tax

Accommodation tax is calculated at 2% of the accommodation fee inclusive of all taxes and other services except accommodation tax and VAT.

Tax for public lighting (TPL)

TPL is imposed on the distribution in Cambodia of both foreign made and locally produced alcoholic and tobacco products. TPL is levied at 3% of the value of such products at the time of each in-country sale. Value for these purposes includes all taxes other than TPL and VAT.

Tax on immovable property (ToIP)

ToIP is levied at 0.1% per annum of the ToIP base. The tax base is 80% of the market value of the immovable properties stated in Appendix 1 of Prakas No. 371 less the threshold of KHR 100 million (approximately USD 25,000). The immovable property valued below the threshold is not subject to ToIP. The Prakas also determines that ToIP is effectively collected, at the first phase, from year 2011 on immovable properties located in Phnom Penh and other cities of the provinces.

Immovable property is defined to include land, buildings, and other constructions on land (e.g. infrastructures built on land, regardless of having a wall or roof). Certain exemptions exist for government-owned property, agricultural land, property owned and used for cultural and religious purposes, property of foreign embassies and non-governmental organisations (NGOs), and property in the special economic zones.

The owners, possessors, and final beneficiaries of immovable property are required to register and obtain a Tax Identification Number for each immovable property valued above the threshold from the tax administration where the immovable property is located. Any changes in relation to the registered immovable property (e.g. a change of title) are also required to be reported.

The owners, possessors, and final beneficiaries hold responsibility for calculating ToIP, preparing and filing ToIP return, as well as remitting the ToIP liability to the tax administration once per year by 30 September. A ToIP return is required for every single immovable property and must be completed and filed separately. Since this is a self-assessment tax, the tax administration will perform tax audit on ToIP in the subsequent years.

Note that subsequent Notifications were issued that extended the deadline for the 2011 property tax payment to 31 December 2011.

Tax on unused land

Land in towns and other specified areas without any construction, or with construction that is not in use, and even certain built-upon land, is subject to the tax on unused land. The tax is calculated at 2% of the market value of the land per square metre as determined by the Commission for Valuation of Unused Land on 30 June each year. The owner of the land is required to pay the tax on 30 September each year.

Registration tax (property transfer tax)

Certain documents relating to the establishment, dissolution, or merger of a business, or the transfer of title in certain assets (such as land and vehicles), are subject to registration tax. The tax is imposed at the rate of 4% and is generally levied on the transfer value.

Fiscal stamp tax

Fiscal stamp tax is to be paid on certain official documents and, perhaps more importantly for foreign investors, certain advertising postings and signage. Amounts vary according to such factors as the location of the signage, illumination, and nationality of any scripted words.

Cambodia

Patent tax

Registered businesses must pay a (relatively nominal) patent tax on initial business registration and annually thereafter. Patent tax is levied with reference to turnover or estimated turnover.

In practice, the GDT imposes patent tax at the top band regardless of the level of turnover.

The annual patent tax return and payment are to be filed annually, within three months of calendar year-end.

Tax on means of transportation

The tax on means of transportation imposes a number of statutory fees on the registration of certain vehicles, including trucks, buses, motor vehicles, and ships.

Tax stamp

Domestic producers or importers of cigarettes have the obligation to buy and affix tax stamps on packets of cigarettes. No person is allowed to sell or display packaged cigarettes for sale without a tax stamp.

Tax on salary (ToS)/fringe benefits (ToFB)

Cambodia's ToS rules follow internationally familiar residency and source principles. A Cambodian resident taxpayer's worldwide salary will be subject to Cambodian ToS. For non-residents, only the Cambodian sourced salary will be subject to ToS. The place of salary payment is not considered relevant in determining source.

A distinction is made between cash and fringe benefit salary components. Different tax scales also apply.

ToS or ToFB is a tax on employees' income, but employers are held liable to these taxes if the employers fail to withhold.

Branch income

Income of a branch is taxable in the same way as those for corporate profits.

Income determination

Inventory valuation

Inventory can be valued at weighted-average cost, first in first out (FIFO), or current value at the close of the period, where this value is lower than the purchase price or production cost. Work-in-progress should be valued at production costs.

Capital gain

There is no specific provision on capital gain tax in Cambodia. However, capital gains form part of taxable profit.

Dividend income

Dividend means any distribution of money or property that a legal person distributes to a shareholder with respect to the shareholder's equity interest in such legal person, with the exception of stock dividends and distributions in complete liquidation of the company. Whether or not a distribution is a dividend shall be determined under the

preceding condition without regard to whether or not the legal person has current or accumulated income or profit or earnings.

Inter-company dividend

Inter-company dividends between residents are exempt from ToP (*see the Withholding taxes section for more information*).

Passive income

Designated passive income (such as interest, royalties, and rent) forms part of the taxable profit.

Foreign income

Resident entities are taxed on their worldwide income, and tax credits are available for foreign taxes incurred. Foreign income is taxable in the period it is earned; there is no provision allowing tax to be deferred on the income earned overseas.

Deductions

Depreciation and amortisation

Property should be depreciated at rates according to four classes of assets as specified in the tax legislation. Land is not considered a depreciable asset. The straight-line or the declining-balance method is specifically required to be used for each class of assets.

Assets	Method	Rate (%)
Building and structures	Straight line	5
Computers, electronic information systems, software, and data handling equipment	Declining balance	50
Automobiles, trucks, office furniture, and equipment	Declining balance	25
All other tangible property	Declining balance	20

Expenditures on intangible property are amortisable over the life of the property or at 10% per annum.

Special depreciation

A QIP will be entitled to a 40% special depreciation in the first year of purchase or, if later, the first year the assets are used. However, the special depreciation will only apply to assets used in 'manufacturing and processing' (still to be defined) and only if the taxpayer has elected not to use a tax holiday. A clawback provision exists for assets held for less than four years.

Goodwill

Purchased goodwill is a depreciable intangible fixed asset for ToP purposes. If the useful life of the intangible fixed assets can be determined, the annual depreciation charges shall be calculated on the useful life by using the straight-line method. If the useful life cannot be determined, the annual depreciation rate of 10% shall be used.

Start-up expenses

Preliminary and formation expenses are allowed to be fully deducted in the period in which the expenses arise, or they can be amortised over two years.

Cambodia

Interest expenses

Interest deductibility in any year is limited to the amount of interest income plus 50% of the net profits excluding interest income and interest expense. The excess non-deductible interest expense can be carried forward to the following tax years indefinitely.

Bad debt

A loss on a claim (i.e. bad debt) is deductible where the impossibility to recover the loss can be clearly shown and that claim has been written off from the accounting books, except where the giving up of the claim is an abnormal act of the management (still to be defined).

Charitable contributions

The charitable contribution expense is deductible to the extent the amount does not exceed 5% of taxable profit. Donations made during the financial year 2010 and 2011 to support victims in the border dispute or the Koh Pich incident through Cambodian Television Network (CTN) and Bayon Foundations are fully deductible on the 2010 and 2011 ToP returns. The taxpayer must have proper evidence supporting the payments.

Fines and penalties

Additional tax, late tax payment interest, and fines of all types incurred for the violation of various legal provisions are not deductible.

Taxes

Taxes that are not a charge to the enterprise (e.g. WHT, ToS, ToFB, ToP, and additional ToP on dividend distribution) are not deductible.

Loss between related parties

No deduction is available for certain losses incurred on dealings between 51% commonly owned parties.

Net operating losses

Taxpayers may carry forward their losses for five years. The carryback of losses is not permitted. There is no provision for any form of consolidated filing or group loss relief.

To be eligible to carry forward tax losses a taxpayer must not change its activities or ownership.

If a taxpayer received a unilateral tax reassessment from the GDT, a taxpayer will not be able to utilise the tax losses brought forward in the year of reassessment.

Payments to foreign affiliates

An expense payable to a related party that is not paid within 180 days of year end will not be deductible. A deduction can be claimed in the year in which the payments are made. This rule is not applicable for an outlay or expense for inventory, capital property, and depreciable property.

Group taxation

There is no specific provision for group taxation in Cambodia.

Transfer pricing

The GDT has wide powers to redistribute income and deductions between parties under common ownership in order to prevent the avoidance or evasion of taxes. Common ownership exists at a relatively low level of 20%.

Thin capitalisation

There is no provision for thin capitalisation in Cambodia.

Tax credits and incentives**Foreign tax credit**

Residents earning foreign-sourced income can receive credits for foreign taxes paid.

Inbound investment

The Council for the Development of Cambodia (CDC) may be approached for a one-stop service to register a project and obtain approval for a QIP status. CDC licensing is, however, not mandatory (except for certain large, politically sensitive projects) and is applicable to those projects that do not fall within the 'negative list'. Some of the projects in the 'negative list' include the following:

- All kinds of commercial activities, import and export activities, and transportation services (except the railway sector).
- Currency and financial services.
- Activities that relate to newspapers and media.
- Production of tobacco products.
- Provision of value-added services of all kinds of telecommunication services.
- Real estate development.

The current investment incentives which are applicable to the QIP registered with the CDC include a ToP exemption period of up to six years or special depreciation (*see Special depreciation in the Deductions section*), import duty exemptions, and exemption from minimum tax. Not all QIP will be entitled to all incentives.

Annually, a QIP is required to obtain a Certificate of Compliance (CoC) from the CDC to guarantee its investment incentives. The CoC is intended to provide confirmation that the QIP has acted in compliance with the relevant tax regulations.

Tax incentives in securities sector

The Royal Government of Cambodia has issued Sub-Decree No.70 to provide tax incentives to companies listed on the Cambodian Stock Exchange (CSX) and public investors who hold and/or trade government, equity, and debt securities on the securities market.

The listed companies are entitled to a 10% reduction on the annual ToP payable for three years, starting from the beginning of the current financial year if the share is issued within the first half of the fiscal year or the following financial year if the share is issued within the second half of the fiscal year. A QIP is not entitled to the tax reduction during the tax holiday period. Public investors are entitled to a 50% reduction on the WHT payable on interest and/or dividends received from the above securities for three years, starting from the launch of the securities market. However, there are various conditions under which the Ministry of Economy and Finance can forfeit the tax incentives granted to the listed companies.

Cambodia

Additional tax incentives for rice farming, paddy rice purchase, and export of milled rice

The Ministry of Economy and Finance has issued a Prakas to provide additional tax incentives to any enterprises in the business of rice farming, paddy rice purchase, and export of milled rice, as follows:

VAT:

- Domestic supplies of paddy rice: 0%.
- Domestic supplies of milled rice: 10%.
- Export of milled rice: 0%.
- Input VAT related to rice farming, paddy rice purchase, and export of milled rice is creditable or refundable.

ToP and minimum tax:

- Exempt from 1% minimum tax.
- Entitled to tax holiday period (i.e. trigger period plus three years plus three year priority period).
- Exempt from 1% prepayment of ToP during the tax holiday period.

Withholding taxes

WHT needs to be withheld on payments made by residents (and it seems only to those who fall under the real regime). The withheld tax constitutes a final tax when withheld in respect of resident and non-residents.

The types of payments caught are as follows.

WHT on payment to residents

- Rental: 10%.
- Interest: 15% (except payment to a Cambodian bank).
- Services: 15% (except payment to a registered taxpayer and supported by a valid VAT invoice).
- Royalties: 15%.

WHT on payment to non-residents

- Interest: 14%.
- Rent or right for use of property: 14%.
- Management or technical fees (not defined): 14%.
- Dividends: 14%.

Public investors invested on the Cambodia Stock Exchange (CSX) are entitled to a 50% reduction on the WHT payable on interest and/or dividends received from the government, equity, and debt securities for three years, starting from the launch of the securities market.

WHT is due when the amount is paid. An expense is considered 'paid' when it is recorded in the accounting records.

Tax administration

Taxable period

The standard tax year is the calendar year, although different accounting year-ends may be granted upon application.

Tax returns

The return for annual tax (i.e. ToP/minimum tax) is to be filed annually, within three months of tax year-end.

Returns for monthly taxes (e.g. 1% Prepayments of ToP, WHT, ToS or ToFB, SPT, PLT, and accommodation tax) are to be filed monthly, within 15 days of the following month.

Payment of tax

ToP or minimum tax is due for payment three months after tax year-end. The ToP or minimum tax liability can be reduced by prepayment of ToP payments.

Monthly taxes are due for payment by the 15th day of the succeeding month.

Prepayment of ToP

A prepayment of ToP equal to 1% of monthly turnover inclusive of all taxes, except VAT, is required to be paid on a monthly basis. The prepayment can be offset against the annual ToP liability and the minimum tax.

Where a taxpayer is in the period of ToP holiday, the taxpayer is also exempted from the prepayment obligations. However, a nil monthly return will need to be lodged.

Where a taxpayer is not subject to minimum tax, a monthly prepayment of ToP must still be made. However, unutilised prepayments from a prior year can be used to offset the current amount due, and no physical payment may be required.

Statute of limitations

The tax audit period (i.e. the limitation of within which period the tax authorities can perform tax audits) is as follows:

- Within three years of the date of submission of the tax returns.
- Within ten years of the date of submission of the tax returns if there is any evidence of 'obstruction of the implementation of laws'.
- Any time with the written consent of the taxpayers.

In practice, the GDT regularly extends the time limit for tax audit up to ten years.

Topics of focus for tax authorities

In practice, the tax authorities focus the tax reassessment on various matters ranging from payment to third parties overseas and fringe benefits provided employees to related party transactions (e.g. payment of management fee to head office, loans from shareholder).

Cambodia

Other issues

Statutory audit requirement

All enterprises (physical or legal persons) that meet two of the following criteria are required to have their financial statements audited by an independent external auditor registered with the Kampuchea Institute of Certified Public Accountants and Auditors (KICPAA):

- Annual turnover above KHR 3 billion (approximately USD 750,000).
- Total assets above KHR 2 billion (approximately USD 500,000).
- More than 100 employees.

QIPs registered with the CDC are required to have their financial statements audited by independent external auditors registered with the KICPAA.

The law does not state the deadline for the enterprises to submit their audited financial statements. However, the deadline for audited financial statements to be completed is six months after accounting year-end (i.e. for the financial year ended 31 December 2011, the deadline is 30 June 2012).

C

Significant developments

The following significant tax developments were part of the 2012 Finance Law that went into effect from 1 January 2012:

- Non-deduction of remunerations paid to individuals or entities located in tax havens.
- Application of 15% withholding tax (WHT) on capital gain resulting from transfer of shares. Shareholders located abroad are particularly targeted by this new provision.
- Application of WHT on software. It has been clearly highlighted that software acquired overseas shall be subject to 15% WHT.
- Obligation of presenting transfer pricing documentation at the beginning of tax audits.
- Expenses relating to remunerations of all kinds paid to liberal professionals exercising in violation of the regulations in force governing their respective professions shall not be deductible.
- Reduction of the number of tax regimes from four to three, and modification of the rates of corporate income tax (CIT) instalments.
- The value-added tax (VAT) shall be invoiced only by natural and legal persons who are assessed on the basis of actual earnings (i.e. whose turnover [taxes excluded] is equal to or above 50 million *Communauté Financière Africaine francs* (XAF)).

Taxes on corporate income

Resident corporations in Cameroon are taxed on their worldwide income; non-resident corporations are taxed only on Cameroon-source income.

The profits subject to the company tax are determined with sole regard to profits earned by entities located in Cameroon (for residents) or transactions effected in Cameroon (for non-residents having a permanent establishment [PE] in Cameroon).

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Cameroon.

The total Cameroon CIT rate is 38.5%.

Reduced CIT rate for newly listed companies

The basic CIT rate of 38.5% is reduced to 33% for companies during their first three years of listing on the national stock exchange of Cameroon.

Cameroon, Republic of

Minimum tax

There is a 1.1%, 3.3%, or 5.5% minimum tax in Cameroon that is based on turnover. This minimum tax is an instalment of CIT. As such, it shall be offset against CIT. It is the sole tax payable if it is greater than CIT.

Local income taxes

A local tax of 10%, called Additional Council Tax, generally applies to the following taxes:

- CIT
- Personal income tax
- WHT on income from stock and shares
- VAT

The rate of each tax above is therefore made up of a basic rate plus 10% surcharge.

Corporate residence

An entity is deemed resident if its registered office, centre of activity, or management is located in Cameroon, if it has resident employees in Cameroon that provide services to customers, or if it has a PE in Cameroon.

Permanent establishment (PE)

In Cameroon, the internal regulations do not provide for any definition of the concept of PE. For this reason, the tax authorities may refer to the definitions provided by the models of United Nations (UN) and that of Organisation for Economic Co-operation and Development (OECD) Tax Conventions, which constitute the basis of the double tax treaties concluded between Cameroon and France, Canada, and Tunisia.

According to these conventions, a PE is a fixed place of business through which an enterprise wholly or partly performs its activities.

Other taxes

Value-added tax (VAT)

VAT shall be levied on natural persons or corporate bodies which automatically, habitually, or occasionally carry out taxable transactions consisting of provisions of services or sales of goods.

The total VAT in Cameroon is 19.25%. Exports are zero rated. The VAT paid upstream is recoverable, except where otherwise stated.

As of 1 January 2012, VAT shall be invoiced only by natural and legal persons who are assessed on the basis of actual earnings (i.e. whose turnover [taxes excluded] is equal to or above XAF 50 million).

Custom duties

Customs duties of between 5% and 30%, depending on the nature of the goods imported, are levied based of the customs value.

Excise taxes

An excise duty of 25% is applicable to cigarettes, drinks, cosmetics, or luxury (e.g. jewels, precious stones). A reduced rate of excise duty (12.5%) shall apply to soft drinks and private vehicles with engine capacities of 2,000 cm³.

Real property tax

Cameroon property tax is payable annually on real estate with or without an ownership certificate or an administrative or judicial order issued. Tax is charged at 0.11% of the assessed property value.

Transfer tax

The sale of a business in Cameroon is subject to a transfer tax rate of 15%.

Registration duty

The registration duty applies to certain deeds listed by the General Tax Code. The assessment basis depends on the nature of transactions, and the rate varies from 1% to 15%.

The formation of a company and subsequent capital increases in Cameroon are not subject to registration duties.

Business licence tax

Any natural person or corporate body carrying on trade, industry, or profession in Cameroon shall be liable to a business licence tax. The business licence tax is paid annually according to a graduated scale and is assessed on turnover.

New enterprises shall be exempt from the payment of the business licence tax during the first two years of operation.

Social security contributions

Employer and employee must contribute on a monthly basis to Cameroon's National Social Insurance Fund at 11.2% and 2.8%, respectively. The basis of contribution is capped at XAF 300,000 per month. Employers in Cameroon must also contribute 1.75%, 2.5%, or 5% of total salaries to the National Social Insurance Fund for Industrial Accidents, depending on the risk category of activities performed by employees. The calculation basis in this category is the gross salary including the benefits in kind assessed for their actual amount.

Payroll tax

Employers in Cameroon are required to make monthly contributions of 2.5% of the total amount of salaries and fringe benefits of their employees to the Housing Loan and Employment Fund of Cameroon.

Branch income

The local branch of any foreign company is taxed at the same rate as a company. The net profits (after CIT) of entities having their residence or head office outside Cameroon (such as the branch of a foreign company) are assumed to be distributed each fiscal year to companies not located in Cameroon. Their net profits (after CIT) shall therefore be subject to the WHT on distributions at 16.5%.

Cameroon, Republic of

Income determination

Inventory valuation

For valuation purpose, the general tax code (GTC) only provides that stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory. No reference is made to the accounting method that shall be used (e.g. first in first out [FIFO], last in first out [LIFO]). Only FIFO and weighted average methods are allowed under the Organisation for the Harmonisation of Business Law in Africa (OHADA) Accounting Principles. Where there is any difference between the valuation method permitted by the GTC and the book valuation, the accounting result shall be modified accordingly.

Capital gains

Capital gains are normally taxed at full CIT rates.

As of January 2012, the net overall capital gains arising from the transfer of stocks, bonds, and other capital shares made by natural and legal persons, occasionally or habitually, either directly or through a financial establishment, shall be subject to the 16.5% WHT.

Dividend income

Dividends are subject to the WHT of 16.5%. However, dividends shall be treated as proceeds for the purpose of CIT, and the tax withheld at source is used as instalment for the payment of CIT.

Interest income

Interests are subject to the WHT of 16.5%. However, interests shall be treated as proceeds for the purpose of CIT, and the tax withheld at source shall be used as instalment for the payment of CIT.

Foreign income

As matter of both fact and law, revenue from abroad earned by corporate bodies situated in Cameroon shall be subject to CIT in Cameroon. There is no provision on tax deferral in Cameroon.

Deductions

Depreciation

Depreciation is generally computed on a straight-line basis over the useful life according to the rates provided for by the Tax Code, including those which might have already been deferred in times of deficit.

The following depreciation rates are generally accepted for tax purposes:

Assets	Depreciation rates (%)
Construction	5 to 20
Stationary equipment and tools	5 to 20
Portable equipment	10 to 100
Transport equipment	10 to 33.33
Railway lines	1 to 10
Engines	5

Assets	Depreciation rates (%)
Rehabilitation	5 to 25
Furniture fittings and other equipment	10 to 33.33
Fishing equipment and fishing vessels	15

The deduction of depreciation can be carried forward indefinitely.

Goodwill

With regards to rules governing the deduction of provision and depreciations, impairment of goodwill shall not be allowable for CIT purpose.

Start-up expenses

There is no specific provision in the GTC relating to start-up expenses.

However, the OHADA Accounting Principles effectively state that start-up expenses shall be capitalised and must be completely depreciated as early as possible: 2 to 5 years, except bond premiums, which are depreciated throughout the life of the loan.

No distribution of profit should be carried out before the complete depreciation of start-up expenses.

Interest expenses

Interest expenses are fully deductible.

However, interest paid to partners/shareholders in respect of the sums they leave with or place at the disposal of the company over and above their capital, irrespective of the type of company, shall be acceptable within the limits of those calculated at the rate of the central bank discount rate, raised by 2 points.

Bad debt

The deductibility of provisions for bad debts is subject to the following conditions:

- The debt must be specified (i.e. clarification is needed on the nature, amount, and the debtor).
- The company must show that it has unsuccessfully carried out actions for debt recovery (e.g. reminder letters, notice to pay, complaints).

For losses related to bad debts to be deductible, they shall have been subjected to all amicable or forced collection methods and means provided for by the OHADA Uniform Act on the Organization of Simplified Procedures for Collection and Enforcement Procedures. Otherwise, they shall not be deductible.

In this regard, the impossibility of recovering the debt must be evidenced by:

- a deficiency report prepared by a bailiff
- a bankruptcy decision duly passed by the judge, if necessary, or
- a decision passed by a judge, bearing out the debtor who disputed the debt.

Cameroon, Republic of

Charitable contributions

Acts of liberality, gifts, and subsidies shall not represent the charges deductible from profits.

However, payments made to research and development (R&D) bodies and to collective philanthropic, educational, sports, scientific, social, and family institutions and bodies, on condition that the latter are situated in Cameroon, shall be deductible as soon as there is proof of payment and as long as they do not exceed 0.5% of the turnover for the fiscal year. Similarly, gifts made on the occasion of a disaster shall be deducted in the form and conditions determined by order of the Minister of Economy and Finance.

Fines and penalties

Compounding fees, fines, confiscations, and any penalty concerning persons who violate the legal, economic, and fiscal provisions shall not be deducted from the profits subject to taxation.

Taxes

Only the professional taxes issued for collection during the fiscal year and which are to be borne by the firm in relation to the operations carried out in Cameroon shall be subject to deduction.

CIT, WHT, and personal income tax shall not be considered as deductible expenses for the levying of taxes.

Net operating losses

Any loss sustained in a given year can be carried forward up to the fourth year following the recording of the loss. The carryback of losses is not permitted in Cameroon.

Payments to foreign entities

Head office overhead expenses for operations carried out in Cameroon and the remuneration of certain effective services (studies, technical, financial, or accounting assistance) provided to Cameroonian firms by foreign natural persons or corporate bodies are not totally deductible. Fees paid are deductible up to a maximum of 10% of the taxable profit before deducting the expenses concerned.

According to the 2012 Finance Law, expenses linked to transactions with natural persons or legal entities resident or established in a territory or state considered to be a tax haven shall not be deductible. This rule shall not apply to imports of goods made in those countries. A tax haven is any state wherein the tax on the income of natural person or legal entity is less than a third of that paid in Cameroon, or any state or territory considered not to be co-operative in matters of transparency or of exchange of information required for fiscal purpose by international or financial organisations. The rate of the Cameroonian CIT to be considered for that purpose is 35%.

Group taxation

There is specific taxation of groups within the Economic and Monetary Community of Central Africa (CEMAC) area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This

percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 25% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company which undertakes to retain them for at least two consecutive years in registered form.

Transfer pricing

There are provisions in the General Tax Code that relate to transfer pricing, but audits from the Tax Administration are not yet aggressive.

According to the 2012 Finance Law, within the framework of a tax audit, the documents required for the justification of transfer pricing shall be presented to the tax inspectors at the start of the procedure. Items such as business transactions, payments in consideration for intangible rights, allocations of costs and expenses (head office costs, agreements to share costs, disbursements, etc.), financial transactions, etc. are particularly targeted for close scrutiny.

Thin capitalisation

There is no specific thin capitalisation rule in Cameroon.

Tax credits and incentives

Three major tax incentives are granted in Cameroon under the tax systems.

The system of reinvestment relief

Any corporate body reinvesting in Cameroon may be granted, under certain conditions, a reduction in CIT.

The reinvestment must take a form described by the General Tax Code as construction or extension of permanent buildings for industrial, agricultural, forestry, tourism, or mining purposes, including technical offices, housing salaried workers free of charges, etc.

Note that total investment less than XAF 25 million are not eligible for reinvestment relief.

The reinvestment relief consists of a deduction from the taxable basis in an amount equal to 50% of the investment effected by the undertaking and approved by the tax authorities. The rate is 25% for telecommunication companies.

The special fiscal regime for structuring projects

The special fiscal regime for structuring projects applies to major enterprises with annual turnover not less than XAF 1 billion and small and medium-sized enterprises with annual turnover of less than XAF 1 billion.

Cameroon, Republic of

The tax incentives consist of:

- Exemption from payment of the business licence tax for the first two years of operation.
- Fixed registration fee of XAF 50,000 for transfers of real estate which directly concern the establishment of the project.
- Exemption from payment of VAT on local purchases of building materials and on imports related to the establishment of the project.
- Extension of the carryover period for deficits from four to five years.

A taxpayer must apply, required conditions must be met, and authorisation must be issued for this tax incentive to be granted.

Incentives applicable to listed companies

Companies whose ordinary shares are listed on the Cameroon Stock Exchange shall be entitled to the following CIT reduced rates:

- 22% for a period of three years for capital increases that represent at least 20% of the share capital.
- 27.5% for a period of three years for transfers of shares that represent at least 20% of the share capital.
- 30.8% for a period of three years from the date of listing for capital increases or transfers of shares that represent less than 20% of the share capital.

Companies whose ordinary shares are listed on the bond market in Cameroon shall be entitled to pay basic CIT at a reduced rate of 33% for three years, effective from the date of listing.

Foreign tax credit

Taxes paid abroad are not considered as tax credits unless provided as such by international tax treaties.

Withholding taxes

A special tax is levied at an overall discharging rate of 15% on income paid to natural persons and corporate bodies domiciled outside of Cameroon by enterprises or establishments based in Cameroon for various services provided or used in Cameroon. The tax is withheld at source by the Cameroonian entity that pays the remuneration.

Within the 2012 Finances Law, it has been clearly highlighted that software acquired overseas shall be subject to the 15% WHT.

Dividends

A total WHT of 16.5% applies to dividends paid to both Cameroon residents and non-residents. The WHT rate may be reduced under an applicable tax treaty.

Interest

As of 1 January 2011, the interest from foreign loans is subject to 16.5% WHT. Prior to 1 January 2011, the payment of 16.5% WHT on interest from foreign loans had been suspended.

Royalties

Royalties paid to non-residents are subject to a 15% WHT (the 10% surcharge is not applicable). The tax rate may be reduced under an applicable tax treaty.

Tax treaties

Cameroon has tax treaties with Canada, France, Tunisia, and members of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad, and Central African Republic).

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Head office expenses and technical assistance (%)
CEMAC	16.5	16.5	N/A	N/A
Canada	16.5	16.5	16.5	15
France	15	15	N/A	7.5
Tunisia	12	15	15	15

Tax administration

Taxable period

The tax year in Cameroon is the calendar year.

Tax returns

On or before 15 March, taxpayers are expected to submit to the tax administration the annual return of revenue derived from their business venture during the period serving as tax base.

This return must be presented in conformity with the OHADA accounting system.

Payment of tax

An instalment representing the 1.1%, 3.3%, or 5.5% minimum tax of turnover realised during each month shall be paid to the tax authorities not later than the 15th day of the following month.

Advance payment of 5% on imports or purchases of goods for resale is withheld at source by the supplier.

The balance of CIT is paid, at the latest, on 15 March following the fiscal year-end, when submitting the CIT return.

Surplus tax payments

A surplus tax payment can be offset against future taxes of the same nature to be paid. For the specific case of VAT, a reimbursement process is provided for by the General Tax Code under certain conditions.

Audit cycle

There is no audit cycle in Cameroon.

Statute of limitations

The statute of limitations is four years.

Cameroon, Republic of

Topics of focus for tax authorities

The topics of focus for tax authorities include the following:

- Remunerations paid for services provided to local entities by providers located overseas.
- Transfer pricing.

C

Significant developments

Canada's corporate summary reflects all 2012 federal, provincial, and territorial budgets. Many of the tax changes continue what was started a year ago, tightening perceived loopholes or inequities in various aspects of the tax system. Notably, tax rules were proposed as part of the 2012 federal budget to curtail certain transactions seen as eroding the Canadian corporate tax base. Other proposals in the federal budget relate to secondary adjustments associated with international transfer pricing assessments and target the scientific research and experimental development (SR&ED) program, the first of many to come aimed at enhancing the effectiveness and efficiency of research and innovation in Canada. The summary is based on enacted and proposed legislation and assumes that the proposed legislation will become law.

Corporate income tax (CIT) rates

Federal general (and manufacturing and processing) CIT rates decreased from 16.5% to 15% on 1 January 2012.

Capital taxes

All provincial general capital taxes have been eliminated, except for Nova Scotia's, which will be eliminated by 1 July 2012.

Scientific research and experimental development (SR&ED)

Stemming from a 2010 federal budget proposal, an independent panel released a report, *Innovation Canada: A Call to Action*, that provides "advice in respect of the effectiveness of federal programs to support business and commercially oriented research and development (R&D), the appropriateness of the current mix and design of these programs, as well as possible gaps in the current suite of programs and what might be done to fill them". As a result, significant changes are expected to Canada's SR&ED program in the coming years. *For changes that were announced in the 29 March 2012 federal budget, see Scientific research and experimental development (SR&ED) credit in the Tax credits and incentives section.*

Tax avoidance

Draft legislation makes an 'avoidance transaction' meeting certain conditions a 'reportable transaction' that must be reported to the Canada Revenue Agency (CRA), generally for transactions entered into after 2010, and those that are part of a series of transactions completed after 2010. Quebec already has a provincial reporting regime for certain aggressive tax planning transactions, generally carried out after 14 October 2009.

Cross-border tax evasion

To facilitate and improve the exchange of tax information and combat cross-border tax evasion, Canada has signed a Protocol amending the Convention on Mutual

Canada

Administrative Assistance in Tax Matters. The member States of the Council of Europe and the member countries of the Organisation for Economic Co-operation and Development (OECD) are signatories.

Thin capitalisation

Proposed rules that modify the Canadian thin capitalisation rules reduce the debt-to-equity ratio from 2:1 to 1.5:1 and broaden the scope of these rules. *See Thin capitalisation in the Group taxation section for more information.*

Transfer pricing adjustments

The 29 March 2012 federal budget confirmed that all upward transfer pricing adjustments to a taxpayer's income will be treated as deemed dividends subject to withholding tax (WHT). The WHT can be eliminated, at the discretion of the Minister of Revenue, if the amount of the primary transfer pricing adjustment is repatriated to the Canadian corporation. *See Transfer pricing adjustments in the Group taxation section for more information.*

Foreign affiliate amendments

On 19 August 2011, the federal government released a significant package of proposed amendments to Canada's international tax rules applicable to Canadian corporations with foreign affiliates. The proposals significantly revise proposed amendments that were released at different times over the past decade and introduce new measures. *See Foreign affiliate amendments in the Income determination section for more information.*

'Foreign affiliate dumping' proposals

The 29 March 2012 federal budget introduced sweeping rules to curtail a variety of transactions it describes as 'foreign affiliate dumping' transactions. These transactions involve an investment in a foreign affiliate by a corporation that is (i) resident in Canada and (ii) controlled by a non-resident of Canada. When certain conditions are met, a dividend will be deemed to have been paid by the corporation to its foreign parent to the extent of any non-share consideration given by the corporation for the 'investment' in the foreign affiliate. The proposals generally apply to transactions occurring after 28 March 2012. *See 'Foreign affiliate dumping' proposals in the Income determination section for more information.*

Non-resident trusts (NRTs)

Draft legislation refines the NRT rules that generally apply to taxation years ending after 2006; trusts subject to these rules will be deemed resident for Canadian income tax purposes. A trust will be allowed to elect to be deemed resident for 2001 and subsequent years.

Offshore investment funds

Draft legislation maintains the enacted provision for investments in offshore investment funds, but increases the prescribed income percentage by 2%, and extends the statute-barred period for taxpayers that have invested in offshore investment funds by three years, for taxation years ending after 4 March 2010.

Specified investment flow-throughs (SIFTs), real estate investment trusts (REITs), and publicly traded corporations

Draft proposals that apply to SIFTs, REITs, and publicly traded corporations in respect of transactions involving certain stapled securities limit the deductibility of amounts paid or payable after 19 July 2011, in respect of those stapled securities, subject to a transitional period.

Partnership deferral

For corporate partners with taxation years ending after 22 March 2011, certain corporate partners with a significant interest in a partnership will be unable to defer taxation on the partnership income. Instead, they must accrue partnership income up to the end of the corporation's taxation year. An election may be available to change the partnership's fiscal period. Partnerships in multi-tier structures must adopt the same fiscal period (31 December, unless otherwise elected by the partnerships). Certain transitional reserves may be available for up to five years. The CRA has modified its administrative policy for joint venture fiscal periods to reflect similar rules (see *Joint venture deferral below*).

Joint venture deferral

Consistent with the new partnership anti-deferral rules (see *Partnership deferral above*), the CRA announced on 29 November 2011 that joint venture arrangements can no longer report income using a separate fiscal period. As a result, corporate participants must report their actual share of joint venture income or loss up to the end of their own year-end, for tax years ending after 22 March 2011. A transitional reserve, similar to that allowed under the partnership deferral changes, may be available for the additional income included in that year by a corporate participant.

New CRA risk assessment audit approach

The CRA has implemented a new 'risk assessment' model to select corporations, partnerships, income trusts, and private equity funds for audit. Large corporations and their affiliated entities are classified as high, medium, or low risk and are subject to either a full, restricted, or compliance audit depending on the entity's determined category. Factors that determine the risk category include the taxpayer's history with the CRA, the type of industry, and the internal controls in place. See *Audit cycle in the Tax administration section*.

Group taxation

The federal government has issued a consultation paper, *The Taxation of Corporate Groups*, which explores possible approaches for taxing corporate groups in Canada, and subsequently reaffirmed its commitment to consider this issue.

Provincial sales tax harmonisation

Although British Columbia's provincial sales tax (PST) was harmonised with the federal goods and services tax (GST) on 1 July 2010, a referendum in 2011 determined that the harmonised sales tax (HST) will be cancelled and replaced with a PST and GST regime on 1 April 2013.

Prince Edward Island will enter into formal negotiations with the federal government to implement an HST, effective 1 April 2013. The HST rate will be 14% (i.e. 9% provincial component plus the 5% GST), and will replace the current combined PST/GST rate of 15.5% (i.e. 10% PST, which applies on the 5% GST).

Quebec has agreed in principle to harmonise the Quebec sales tax (QST) with the 5% GST on 1 January 2013, at which time the harmonised rate will be 14.975%.

Taxes on corporate income

As a general rule, corporations resident in Canada are subject to Canadian CIT on worldwide income. Non-resident corporations are subject to CIT on income derived from carrying on a business in Canada and on capital gains arising upon the disposition

Canada

of taxable Canadian property (*See Capital gains in the Income determination section for more information*). The purchaser of the taxable Canadian property is generally required to withhold tax from the amount paid unless the non-resident vendor has obtained a clearance certificate.

Canadian CIT and WHT can be reduced or eliminated if Canada has a treaty with the non-resident's country of residence. *A list of treaties that Canada has negotiated and applicable WHT rates is provided in the Withholding taxes section.*

Federal income tax

The following rates apply for 31 December 2012 year-ends. For non-resident corporations, the rates apply to business income attributable to a permanent establishment (PE) in Canada. Different rates may apply to non-resident corporations in other circumstances. Non-resident corporations may also be subject to branch tax (*see the Branch income section*).

	Federal rate (%)
Basic rate	38.0
Less - Provincial abatement (1)	(10.0)
Federal rate	28.0
Less - General rate reduction or manufacturing and processing (M&P) deduction (2)	(13.0)
Net federal tax rate (3, 4)	15.0

Notes

1. The basic rate of federal tax is reduced by a 10% abatement to give the provinces and territories room to impose CITs. The abatement is available in respect of taxable income allocated to Canadian provinces and territories. Taxable income allocable to a foreign jurisdiction is not eligible for the abatement and normally is not subject to provincial or territorial taxes.
2. The general rate reduction and M&P deduction do not apply to the first 500,000 Canadian dollars (CAD) of active business income earned in Canada by Canadian-controlled private corporations (CCPCs), investment income of CCPCs, and income from certain other corporations (e.g. mutual fund corporations, mortgage investment corporations, and investment corporations), which may benefit from preferential tax treatment. The general rate reduction and M&P deduction increased from 11.5% to 13% on 1 January 2012.
3. Provincial or territorial taxes apply in addition to federal taxes. Provincial and territorial tax rates are noted below.
4. For small CCPCs, the net federal tax rate is levied on active business income above CAD 500,000; a federal rate of 11% applies to the first CAD 500,000 of active business income. Investment income (other than most dividends) of CCPCs is subject to the federal rate of 28%, in addition to a refundable federal tax of 6 2/3%, for a total federal rate of 34.7%.

Provincial/territorial income tax

All provinces and territories impose income tax on income allocable to a PE in the province or territory. Generally, income is allocated to a province or territory by using a two-factor formula based on gross revenue and on salaries and wages. Provincial and territorial income taxes are not deductible for federal income tax purposes. The rates given apply to 31 December 2012 year-ends and do not take into account provincial tax holidays, which reduce or eliminate tax in limited cases.

Province/territory	Income tax rate (%) (1, 2)
Alberta	10.0
British Columbia (3)	10.0
Manitoba (4)	12.0
New Brunswick (5)	10.0

Province/territory	Income tax rate (%) (1, 2)
Newfoundland and Labrador	14.0 or 5.0
Northwest Territories	11.5
Nova Scotia	16.0
Nunavut	12.0
Ontario (6)	11.5 or 10.0
Prince Edward Island	16.0
Quebec	11.9
Saskatchewan (7)	12.0 or 10.0
Yukon territory	15.0 or 2.5

Notes

1. When two rates are indicated, the lower rate applies to M&P income.
2. In all provinces and territories, the first CAD 500,000 (CAD 400,000 in Manitoba and Nova Scotia) of active business income of a small CCPC is subject to reduced rates that range from 0% to 8.0%, depending on the jurisdiction.
3. British Columbia's rate will increase from 10% to 11% on 1 April 2014. The increase is a temporary measure to be triggered only if the province's fiscal situation worsens.
4. Manitoba's rate will decrease from 12% to 11% at a date to be determined, subject to balanced budget requirements.
5. New Brunswick's rate decreased from 11% to 10% on 1 July 2011. New Brunswick's 2011 budget maintains the rate at 10%. The rate was to decline to 8% on 1 July 2012.
6. The lower Ontario rate applies to profits from M&P, and from farming, mining, logging, and fishing operations, carried on in Canada and allocated to Ontario.

Ontario's non-M&P rate decreased from 12% to 11.5% on 1 July 2011. Ontario's 2012 budget freezes the rate at 11.5% until the province returns to a balanced budget (scheduled for 2017/18). The rate was to drop to 11% on 1 July 2012 and to 10% on 1 July 2013. If this proposal is not enacted, the rate in the table will be 11.2%.

Corporations subject to Ontario income tax may also be liable for corporate minimum tax (CMT) based on adjusted book income. The CMT is payable only to the extent that it exceeds the regular Ontario income tax liability. The CMT rate is 2.7% and applies when total assets are at least CAD 50 million and annual gross revenue is at least CAD 100 million on an associated basis.

7. Saskatchewan's M&P rate is as low as 10% (reduced from the 12% non-M&P rate), depending on the extent to which the corporation's income is allocated to the province.

Corporate residence

Under the Income Tax Act, a corporation incorporated in Canada (federally or provincially/territorially) will be deemed to be resident in Canada. A corporation not incorporated in Canada will be considered to be resident in Canada under Canadian common law if its central management and control is exercised in Canada. Where a corporation's central management and control is exercised is a question of fact but typically is where the Board of Directors meets and makes decisions, provided the Board takes action.

A corporation incorporated in Canada or a corporation incorporated outside of Canada but with its central management and control situated in Canada will be deemed to be a non-resident of Canada if it qualifies as a non-resident of Canada under treaty tie-breaker rules.

A corporation incorporated in Canada will cease to be a Canadian resident if it is granted articles of continuance in a foreign jurisdiction or if it is a predecessor corporation in a cross-border amalgamation. Similarly, a foreign corporation will

Canada

become resident in Canada if it is continued in Canada or is a predecessor corporation of an amalgamated corporation that is resident in Canada.

Permanent establishment (PE)

Canada's tax treaties generally provide that the business profits of a non-resident corporation are not subject to Canadian tax unless the non-resident corporation carries on business in Canada through a PE situated in Canada and the business profits are attributed to that PE. Canada's tax treaties may also restrict the imposition of branch tax to situations when the non-resident corporation carries on business in Canada through a PE situated in Canada and/or limit the applicable branch tax rate. While the wording of tax treaties varies, a PE generally is defined as:

- a fixed place of business through which the business of the non-resident corporation is wholly or partly carried on
- a place of management, a branch, an office, a factory, and a workshop; a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources; a building site, construction, or assembly project that exists for a specified period of time, and
- a dependent agent or employee who has and habitually exercises an authority to conclude contracts in the name of the non-resident corporation.

The Canadian domestic definition of PE (federal and provincial/territorial) generally mirrors the above.

Other taxes

Consumption taxes

Federal goods and services tax (GST)

The federal GST is levied at a rate of 5%. It is a value-added tax (VAT) applied at each level in the manufacturing and marketing chain and applies to most goods and services. However, the tax does not apply to sales of zero-rated goods, such as exports and basic groceries, or to tax-exempt supplies, such as health care, educational services, and certain services provided by financial institutions.

Generally, businesses pay GST on their purchases and charge GST on their sales, and remit the net amount (i.e. the difference between the GST collected and the input tax credit for the tax paid on purchases). Suppliers are entitled to claim input tax credits on zero-rated goods and services, but not on tax-exempt supplies.

Harmonised sales tax (HST)

Five provinces have harmonised their sales tax systems with the GST and impose a single HST. The HST includes the 5% GST and a provincial sales tax component. It is imposed on essentially the same base as the GST. HST rates follow.

Province	HST rate (%)
British Columbia (1)	12
New Brunswick	13
Newfoundland and Labrador	13
Nova Scotia (2)	15
Ontario	13

Notes

1. British Columbia harmonised its 7% PST with the 5% GST on 1 July 2010. However, as a result of a provincial referendum that was held in 2011, the 12% HST will be cancelled and replaced with a 7% PST and 5% federal GST on 1 April 2013.
2. Nova Scotia will reduce its HST rate from 15% to 14% by 1 July 2014, and to 13% by 1 July 2015 (i.e. the provincial portion of the HST will decrease from 10% to 9% and 8%, respectively).

Prince Edward Island will enter into formal negotiations with the federal government to implement an HST, effective 1 April 2013. The HST rate will be 14% (i.e. 9% provincial component plus the 5% GST), and will replace the current combined PST/GST rate of 15.5% (i.e. 10% PST, which applies on the 5% GST).

In addition, Quebec has agreed in principle to harmonise the Quebec sales tax (QST) with the 5% GST on 1 January 2013. The harmonised rate on 1 January 2013 will be 14.975%.

Retail sales tax

Manitoba, Prince Edward Island, and Saskatchewan levy a retail sales tax at 7%, 10%, and 5%, respectively, on most purchases of tangible personal property for consumption or use in the province and on the purchase of specific services. As mentioned above, British Columbia will reinstate a retail sales tax on 1 April 2013, while Prince Edward Island intends to replace its retail sales tax regime with the HST on 1 April 2013.

Quebec's sales tax is structured in the same manner as the GST and applies to most goods and services that are subject to the GST. The general QST rate is 9.5% (8.5% in 2011). Quebec administers the GST in that province. However, as noted above, Quebec has agreed in principle to harmonise its QST with the GST on 1 January 2013; the effective harmonised rate will be 14.975%.

Only Prince Edward Island and Quebec levy sales tax on prices that include the GST.

Neither Alberta nor the three territories (the Northwest Territories, Nunavut, and the Yukon) impose a retail sales tax. However, the GST applies in those jurisdictions.

Customs duties

Customs duties generally are intended to protect Canadian industry from foreign competition and not as a source of revenue. The majority of most-favoured-nation (MFN) duty rates are below 10%; notable exceptions are footwear, textiles and apparel, and certain food products (the last may be subject to 'tariff rate quotas'). Goods imported from developed countries with which Canada does not have free trade agreements will attract the MFN duty rate. Many products, however, are duty-free regardless of their country of origin.

Qualifying goods that originate in the North American Free Trade Agreement (NAFTA) territory (Canada, the United States, and Mexico) can enter Canada duty-free. Canada has implemented free trade agreements (FTAs) with Chile, Colombia, Costa Rica, the European Free Trade Association countries, Israel, and Peru, and has signed or is negotiating agreements with several other countries. Like the NAFTA, these agreements set out rules of origin for determining whether the goods are eligible for preferential duty rates under the particular FTA.

Canada extends preferential duty rates to most (but not all) products imported from developing countries (the General Preferential Tariff) and has granted further concessions to goods originating in 'Least Developed Countries'. In either case, goods

Canada

must satisfy rules of origin and be shipped directly to Canada from the beneficiary countries to qualify for these rates.

Excise taxes and duties

Excise duties are levied at various rates on alcohol, alcoholic beverages, and tobacco products manufactured in Canada, while imports are subject to customs duties (*see above*).

Excise tax is imposed on petroleum products and automobiles. In addition, a 10% federal excise tax is imposed on insurance against a risk in Canada if it is placed by insurers through brokers or agents outside Canada or with an insurer that is not authorised under Canadian or provincial/territorial law to transact the business of insurance. Certain premiums are exempt, including those for life, personal accident, marine, and sickness insurance.

Property taxes

Property taxes are levied by municipalities in Canada on the estimated market value of real property within their boundaries and by provinces and territories on land not in a municipality. In most provinces and territories, a general property tax is levied on the owner of the property. Some municipalities levy a separate business tax, which is payable by the occupant if the premises are used for business purposes. These taxes are based on the rental value of the property at tax rates that are set each year by the various municipalities. School taxes, also generally based on the value of real property, are levied by local and regional school boards or the province or territory.

Land transfer tax

All provinces and territories levy a land transfer tax or registration fee on the purchaser of real property within their boundaries. These levies are expressed as a percentage, in most cases on a sliding scale, of the sale price or the assessed value of the property sold, and are generally payable at the time title to the property is registered. Rates generally range from 0.02% to 2%, depending on the province or territory, but may be higher if the purchaser is a non-resident. Some exemptions (or refunds) are available. Additional land transfer taxes apply for properties purchased in the municipalities of Montreal or Toronto. Other municipalities may also impose these taxes and fees.

Federal capital taxes

The federal government does not levy a general capital tax. It imposes the Financial Institutions Capital Tax (Part VI Tax) on banks, trust and loan corporations, and life insurance companies at a rate of 1.25% when taxable capital employed in Canada exceeds CAD 1 billion. The tax is not deductible in computing income for tax purposes. It is reduced by the corporation's federal income tax liability. Any unused federal income tax liability can be applied to reduce Part VI Tax for the previous three and the next seven years. The thresholds are shared among related financial institutions. In effect, the tax constitutes a minimum tax on financial institutions.

Provincial capital taxes

All provincial general capital taxes have been eliminated, except for Nova Scotia's, which will be eliminated by 1 July 2012. However, most provinces still impose a capital tax on financial institutions. Capital taxes are deductible for federal income tax purposes. The federal government had proposed to limit the deductibility of capital taxes, but has delayed implementing this proposal indefinitely. However, a proposed interim measure disallows a deduction for any increase in these taxes, with certain exceptions. The territories do not impose capital taxes.

Provincial capital taxes are imposed at the following rates for 31 December 2012 year-ends. Certain exemptions and reduced rates apply.

Province	General (%)	Banks, trust and loan corporations (%)
Alberta	-	-
British Columbia	-	-
Manitoba (1)	-	4
New Brunswick (2)	-	3.75
Newfoundland and Labrador	-	4
Nova Scotia (3)	0.025	4
Ontario	-	-
Prince Edward Island	-	5
Quebec (4)	-	0.25
Saskatchewan (5)	-	3.25

Notes

1. Manitoba's financial institutions capital tax was eliminated for financial institutions with taxable paid up capital under CAD 4 billion for taxation years ending after 12 April 2011. Manitoba's 2012 budget increases the financial institutions capital tax rate from 3% to 4% for taxation years ending after 17 April 2012.
2. New Brunswick's 2012 budget increased the financial institutions capital tax rate from 3% to 4% on 1 April 2012.
3. Nova Scotia's general rate decreased from 0.1% to 0.05% on 1 July 2011 and will decrease to 0% on 1 July 2012. The rate is doubled for corporations with taxable capital under CAD 10 million.
4. Quebec's 0.25% financial institution rate is the 0.25% compensation tax on paid-up capital. A compensation tax of 3.9% (2% for taxation years ending before 31 March 2010 or beginning after 31 March 2014) on payroll also applies.
5. Saskatchewan's rate for financial institutions that have taxable paid-up capital of CAD 1.5 billion or less is 0.7%. Financial institutions that qualified for the 0.7% capital tax rate in taxation years ending after 31 October 2008 and before 1 November 2009, will be subject to a 0.7% capital tax rate on their first CAD 1.5 billion of taxable capital, and a 3.25% capital tax rate on taxable capital exceeding CAD 1.5 billion.

Additional taxes on insurers

All provinces and territories impose a premium tax ranging from 2% to 4.4% on insurance companies (both life and non-life). In addition, Nova Scotia imposes a capital tax on all insurance companies (which will be eliminated on 1 July 2012), while Ontario and Quebec impose a capital tax on life insurance companies only. Quebec also levies a compensation tax on insurance premiums at a rate of 0.55% (0.35% for taxation years ending before 31 March 2010, or beginning after 31 March 2014).

Part III.1 tax on excess designations

Federal Part III.1 tax applies at a 20% or 30% rate if, during the year, a CCPC designated as eligible dividends an amount that exceeds its general rate income pool (GRIP), or a non-CCPC pays an eligible dividend when it has a positive balance in its low rate income pool (LRIP). A corporation subject to Part III.1 tax at the 20% rate (i.e. the excess designation was inadvertent) can elect, with shareholder concurrence, to treat all or part of the excess designation as a separate non-eligible dividend, in which case Part III.1 tax will not apply to the amount that is the subject of the election.

Eligible dividends are designated as such by the payor and include dividends paid by:

- public corporations, or other corporations that are not CCPCs, that are resident in Canada and are subject to the federal general CIT rate (i.e. 15% in 2012), or
- CCPCs, to the extent that the CCPC's income is:

Canada

- not investment income (other than eligible dividends from public corporations), and
- subject to the general federal CIT rate (i.e. the income is active business income not subject to the federal small business rate).

Non-eligible dividends include dividends paid out of either income eligible for the federal small business rate or a CCPC's investment income (other than eligible dividends received from public companies).

Social security taxes

For 2012, employers are required to pay, for each employee, government pension plan contributions up to CAD 2,306.70 and employment insurance premiums up to CAD 1,175.96. However, Quebec employers contribute, per employee, a maximum of CAD 2,341.65 in Quebec government pension plan contributions, CAD 944.62 in employment insurance premiums, and CAD 516.12 to a Quebec parental insurance plan.

Provincial/territorial payroll taxes

Employers in Manitoba, Newfoundland and Labrador, Ontario, and Quebec are subject to payroll tax. Maximum rates range from 1.95% to 4.3%. In addition, Quebec employers with payroll of at least CAD 1 million must allot 1% of payroll to training or to a provincial fund. Employers in the Northwest Territories and Nunavut must deduct from employees' salaries a payroll tax equal to 2% of employment earnings.

Branch income

A non-resident corporation will be subject to income tax at normal corporate rates on profits derived from carrying on a business in Canada. However, Canada's tax treaties generally restrict taxation of a non-resident's business income to the portion allocable to a PE located in Canada.

In addition, a special 25% 'branch tax' applies to a non-resident's after-tax profits that are not invested in qualifying property in Canada. The branch tax essentially is equivalent to a non-resident WHT on funds repatriated to the foreign head office. In the case of a company resident in a treaty country, the rate at which the branch tax is levied may be reduced to the WHT rate on dividends prescribed in the relevant tax treaty (generally 5%, 10%, or 15%). Some of Canada's treaties prohibit the imposition of branch tax or provide that branch tax is payable only on earnings in excess of a threshold amount. The branch tax does not apply to transportation, communications, and iron-ore mining companies. Nor does it apply to non-resident insurers, except in special circumstances.

Whether or not a treaty applies, a non-resident corporation that has a PE in Canada may be subject to federal and provincial capital taxes (i.e. financial institutions only). *See the Other taxes section.*

Income determination

Inventory valuation

In most cases, all property included in inventory can be valued at fair market value, or each item can be valued at its cost or fair market value, whichever is lower. Most well-established and reasonable approaches to inventory costing can be used for tax

purposes, except for the last in first out (LIFO) method. Conformity between methods used for book and tax reporting is not mandatory, but the method chosen should be used consistently for tax purposes. Inventory must be valued at the commencement of the year at the same amount as at the end of the immediately preceding year.

Capital gains

Half of a capital gain constitutes a taxable capital gain, which is included in the corporation's income and taxed at ordinary rates. Capital losses are deductible, but generally only against capital gains. Any excess of allowable capital losses over taxable capital gains in the current year can be carried back three years and carried forward indefinitely, to be applied against net taxable capital gains from those years, except in the case of an acquisition of control. No holding period is required. Intent is a major factor in determining whether the gain or loss is income or capital in nature.

Non-resident corporations are subject to CIT on taxable capital gains (50% of capital gains less 50% of capital losses) arising on the disposition of taxable Canadian property. Taxable Canadian property of a taxpayer includes, among other things:

- Real estate situated in Canada.
- Both capital and non-capital property used in carrying on a business in Canada.
- In general, shares in a Canadian-resident corporation that are listed on a stock exchange if, at any time in the preceding 60 months:
 - 25% of the shares of the corporation are owned by the taxpayer or persons related to the taxpayer, and
 - more than 50% of the fair market value of the shares are derived from real property situated in Canada, Canadian resource properties, and timber resource properties.
- In general, shares in a Canadian-resident corporation that are not listed on a stock exchange if, at any time in the preceding 60 months, more than 50% of the fair market value of the shares is derived directly from property similar to that described above for shares of a public corporation.

However, in specific situations, the disposition by a non-resident of a share or other interest that is not described above may be subject to Canadian tax (e.g. when a share is deemed to be taxable Canadian property).

The general requirement is that a non-resident vendor of taxable Canadian property must report the disposition to the CRA and obtain a clearance certificate in respect of the disposition. If no certificate is obtained, the purchaser is required to withhold and remit to the CRA 25% of the sales proceeds.

Relief from the reporting and 25% withholding requirements may be available if specified conditions are met (e.g. if the gain from the disposition is not taxable in Canada by virtue of a tax treaty Canada has with another country). However, if the parties to the transaction are related, the CRA must be notified to be exempt from these requirements.

Dividend income

Dividends received by one Canadian corporation from another Canadian corporation generally can be deducted in full when determining taxable income. However, dividends on certain preferred shares are an important exception and are taxed at full corporate rates. The intent is to allow preferred share investors to transfer benefits of accumulated deductions or losses from the entity that incurred the expense.

Canada

Dividends on most preferred shares are subject to a 10% tax in the hands of the recipient, unless the payer elects to pay a 40% tax (instead of a 25% tax) on the dividends paid. The payer can offset the tax against its income tax liability. The tax is not imposed on the first CAD 500,000 of taxable preferred-share dividends paid in a taxation year. Nor does it apply to dividends paid to a shareholder with a 'substantial interest' in the payer (i.e. at least 25% of the votes and value).

Dividends received by private corporations (or public corporations controlled by one or more individuals) from Canadian corporations are subject to a special refundable tax of 33 $\frac{1}{3}$ %. The tax is not imposed if the recipient is connected to the payer (i.e. the recipient owns more than a 10% interest in the payer) unless the payer was entitled to a refund of tax in respect of the dividend. When the recipient pays dividends to its shareholders, the tax is refundable at CAD 1 for every CAD 3 of dividends paid.

Stock dividends

If the payer is resident in Canada, stock dividends are treated for tax purposes in the same manner as cash dividends. The taxable amount of a stock dividend is the increase in the paid-up capital of the payer corporation because of the payment of the dividend. Stock dividends received from a non-resident are exempt from this treatment. Instead, the shares received have a cost base of zero.

Interest income

Interest that accrued, became receivable by, or was received by a corporation is taxable as income from a business or property, as the case may be.

Rental income

Rents received by a corporation are taxable as income from a business or property, as the case may be.

Royalty income

Royalties received by a corporation are taxable as income from a business or property, as the case may be.

Foreign exchange gains and losses

The foreign exchange gains and losses of a Canadian taxpayer that arise from business transactions (i.e. on income account), including the activities of a branch operation, are generally fully includable in income or fully deductible, as the case may be. Any method that is in accordance with generally accepted accounting principles (GAAP) may be used to determine foreign exchange gains or losses on income transactions, provided that the treatment is consistent with previous years and conforms to the accrual method of accounting.

A foreign exchange gain or loss that is on capital account is treated the same as any other capital gain or loss. The accrual method of accounting cannot be used for purposes of reporting gains or losses on capital account. This follows from the CRA's view that a taxpayer has not made a capital gain or sustained a capital loss in a foreign currency until a transaction has taken place. Therefore, paper gains and losses are disregarded.

Partnership income

For Canadian tax purposes, a partnership is treated as a conduit, and the partners are taxed on their share of the partnership income, whether or not distributed. A corporation is not restricted from being a member of a partnership. Income is determined at the partnership level and is then allocated among the partners according

to the terms of the partnership agreement. However, certain deductions, such as depletion allowances, exploration and development expenses, and donations, will flow through to be deducted by the various partners directly, as will any foreign tax credits, dividend tax credits, or investment tax credits. Partners generally may deduct expenses incurred directly, such as interest on borrowings to acquire partnership interests, in computing income from the partnership.

For corporate partners with taxation years ending before 23 March 2011, income earned by a corporation as a member of a partnership was included in the corporation's income for the corporate taxation year in which the fiscal period of the partnership ended. Therefore, if the fiscal year of a partnership differed from the taxation year of a corporate partner, income and tax could be deferred by up to one year (or longer, potentially, in the case of multiple 'tiers' of partnerships with different fiscal periods). Newly enacted legislation that applies to corporate partners with taxation years ending after 22 March 2011 generally prevents these partners from deferring taxation on partnership income in respect of partnerships in which they (together with related parties) hold a greater than 10% interest (share of income or entitlement to assets); income from these partnerships must be accrued up to the end of the corporation's taxation year.

The accrual is based on partnership income for the fiscal period ending in the corporation's taxation year (the 'formulaic amount'), unless a lower amount is designated by the partner. Penalties can apply if the designated amount reported is less than both the formulaic amount and the actual prorated income of the subsequent partnership fiscal period. An election may be available to change the partnership's fiscal period. Partnerships in multi-tier structures must adopt the same fiscal period (31 December unless otherwise elected by the partnerships). Certain transitional reserves may be available for up to five years.

Joint venture income

An unincorporated joint venture is not recognised as a separate legal entity, and no specific statutory rules govern the taxation of a joint venture in Canada. However, many business arrangements that are set up as a joint venture may be considered partnerships, and treated as such for Canadian tax purposes. Whether a partnership exists in a particular situation is a legal question based on the specific facts and circumstances.

Consistent with the new partnership anti-deferral rules (*discussed in Partnership income above*), the CRA announced on 29 November 2011 the cancellation of a previous administrative position allowing joint venture arrangements to report income using a separate fiscal period. As a result, corporate participants must report their actual share of joint venture income or loss up to the end of their own year-end for tax years ending after 22 March 2011. A transitional reserve will be allowed, in respect of the additional income included in that year by a corporate participant (i.e. any actual income of the participant for the stub period), using the same rules as for the partnership transitional reserve. However, to claim a reserve, the corporation must file an election with its tax return for that first year.

Non-resident trusts (NRTs) and offshore investment funds

Draft legislation changes Canada's approach to taxing NRTs and will affect NRTs that have (i) Canadian resident contributors or (ii) Canadian resident beneficiaries if certain current or former Canadian residents have contributed property to the NRT. The legislation deems these NRTs to be resident for Canadian income tax purposes. However, Canadian tax generally applies only to income or gains from the properties

Canada

contributed by Canadian residents. Many direct or indirect transfers or loans of property or services can be deemed to be contributions to the NRT. The NRT rules will apply commencing 2007. A trust can elect to be deemed resident for the 2001 and subsequent years if it was created from 2001 to 2006.

The offshore investment fund rules affect Canadian residents that have an interest as a beneficiary in these funds. The current legislation that applies to these funds is to be maintained with some modifications. For taxation years ending after 4 March 2010, draft legislation increases the prescribed income percentage by 2% and extends the statute-barred period for taxpayers who have invested in offshore investment funds by three years. Also, for certain non-discretionary trust funds in which a Canadian-resident person, and persons that do not deal at arm's length with the person, have interests in aggregate of 10% or more of the total fair market value of the total interests in the trusts, the trust is deemed to be a controlled foreign affiliate of the Canadian beneficiary and is thereby subject to the Canadian foreign accrual property income (FAPI) rules.

Earnings of specified investment flow-throughs (SIFTs)

Certain earnings of SIFTs (i.e. publicly traded income trusts and partnerships) are subject to a SIFT tax and are deemed to be a dividend when distributed, starting with the 2007 taxation year for SIFTs first publicly traded after 31 October 2006, and starting with the 2011 taxation year for other SIFTs. These rules are intended to discourage corporations from converting to income trusts and effectively force existing trusts to consider either restructuring or abandoning the income trust model. The rules do not apply to Real Estate Investment Trusts (REITs) that meet certain conditions.

Foreign income

Corporations resident in Canada are subject to Canadian federal income taxes on worldwide income, including income derived directly from carrying on business in a foreign country, as earned. In addition, resident corporations may be taxable currently on certain passive and active income earned by foreign subsidiaries and other foreign entities. Relief from double taxation is provided through Canada's international tax treaties, as well as foreign tax credits and deductions for foreign taxes paid on income derived from non-Canadian sources.

14 Tax Information Exchange Agreements (TIEAs) have already entered into force (one on behalf of five jurisdictions). Canada is currently negotiating 14 other TIEAs and has signed two that have not yet entered into force. Canada intends to sign more TIEAs with other non-treaty countries. To encourage non-treaty countries to enter into TIEAs:

- an exemption will be available for dividends received out of active business income earned by foreign affiliates resident in non-treaty countries that have agreed to a TIEA with Canada, and
- active business income earned by foreign affiliates in non-TIEA, non-treaty countries will be treated as FAPI, which is taxable in Canada on an accrual basis, if a TIEA with Canada is not concluded within a specified time period.

Foreign investment income earned directly, other than dividends, is taxed as earned, with foreign tax credits available in respect of foreign WHTs. Dividends received by private corporations from non-connected foreign corporations are subject to the special refundable tax of 33 $\frac{1}{3}$ % (see above), to the extent that the dividends are deductible in determining taxable income.

The tax treatment of foreign dividends depends on whether the payer corporation is a foreign affiliate of the recipient. Dividends received from foreign corporations that are not foreign affiliates are taxed when received, with foreign tax credits available in respect of foreign WHTs. Dividends received from foreign affiliates are permitted to flow tax-free between corporations, subject to certain limitations. These limitations pertain to the nature of the earnings from which the dividends were paid, the underlying foreign taxes paid and WHTs paid.

See Controlled foreign affiliates and foreign accrual property income (FAPI) in the Group taxation section for a discussion on foreign affiliates, controlled foreign affiliates, and FAPI.

Foreign affiliate amendments

On 19 August 2011, the federal government released a significant package of proposed amendments to Canada's international tax rules applicable to Canadian corporations with foreign affiliates. The proposals substantially revise proposed amendments that were released at different times over the past decade and introduce new measures. Some of the proposals have retroactive effect. Key proposed amendments include:

- New income inclusion rules for upstream loans made by foreign affiliates.
- The creation of a 'hybrid surplus' regime to track certain capital gains realised by a foreign affiliate on the disposition of certain shares or partnership interests.
- New rules dealing with distributions made by foreign affiliates (generally deemed to be dividends).
- New stop loss rules applicable to dispositions of foreign affiliate shares or partnership interests.
- New rules for the streaming of passive capital losses realised by foreign affiliates.
- New foreign affiliate reorganisation rules applicable to liquidations, dissolutions, and foreign mergers (including absorptive mergers) involving foreign affiliates.
- A new anti-avoidance rule targeting increases in the exempt earnings of a foreign affiliate that are considered abusive.

'Foreign affiliate dumping' proposals

The 2012 federal budget introduced sweeping rules to curtail a variety of transactions it describes as 'foreign affiliate dumping' transactions. These transactions involve an investment in a foreign affiliate by a corporation that is (i) resident in Canada and (ii) controlled by a non-resident of Canada. When certain conditions are met, a dividend will be deemed to have been paid by the corporation to its foreign parent to the extent of any non-share consideration given by the corporation for the 'investment' in the foreign affiliate. The proposals define 'investment' broadly to include:

- an acquisition of shares or contribution of capital
- transactions where the foreign affiliate becomes indebted to the corporation (or a related Canadian company), and
- an acquisition of certain options in shares or debt of the foreign affiliate.

Any deemed dividend will be subject to Canadian WHT (as reduced by the applicable treaty). As currently worded, the proposals do not provide for relief from additional WHT when funds invested in a foreign affiliate are actually repatriated to its foreign parent. In addition, the paid-up capital of any shares of the corporation that are given as consideration for the 'investment' is disregarded (including for purposes of the thin capitalisation rules). The proposals generally apply to transactions occurring after 28 March 2012.

Canada

Deductions

Business expenses that are reasonable and paid out to earn income are deductible for income tax purposes unless disallowed by a specific provision in the Income Tax Act. Some expenses are deductible subject to limitation, e.g. charitable donations, entertainment expenses, and the cost of providing an automobile to employees. Deduction of capital expenditures is specifically prohibited, but special provisions may allow depreciation or amortisation of these expenditures.

Because Canadian corporations are taxable on worldwide income, there are basically no territorial limits on the deductibility of related expenses. Payments to affiliates are deductible if they reflect arm's-length charges. Transfers of losses and other deductions between unrelated corporate taxpayers are severely limited after an acquisition of control.

Depreciation and amortisation

Generally, depreciation for tax purposes (capital cost allowance) is computed on a pool basis, with only a few separate classes (pools) of property. Annual allowances are generally determined by applying a prescribed rate to each class on the declining-balance basis. For example, the prescribed annual rate is 20% on most furniture and fixtures, 30% on automotive equipment, and 4% to 10% on most buildings. In the year of acquisition, only half of the amount otherwise allowable may be claimed on most classes of property. Generally, capital cost allowance may not be claimed until the taxation year the property is available for use. The taxpayer can claim any amount of capital cost allowance up to the maximum. Capital cost allowance previously claimed may be recaptured if assets are sold for proceeds that exceed the undepreciated cost of the class. Temporary incentives to accelerate depreciation for eligible manufacturing and processing machinery and equipment acquired after 18 March 2007, and before 2014, revise the rate and method from 30% declining-balance to 50% straight-line.

Three-quarters of capital expenditures for goodwill and certain other intangible properties can be amortised at a maximum annual rate of 7%, on a declining-balance basis. A portion of proceeds may be taxable as recapture or as a gain on disposition.

Mining and oil and gas activity

Generally, mining and oil and gas companies are allowed a 100% deduction for exploration costs and certain preproduction development costs. Other development costs are deductible at the rate of 30% on a declining-balance basis. Capital property costs are subject to the depreciation rules *noted above under Depreciation*. In addition, in certain cases, significant asset acquisitions and assets acquired for a new mine or major expansion benefit from accelerated depreciation of up to 100% of the income from the mine. For certain oil sands assets acquired after 18 March 2007, accelerated depreciation will be reduced gradually starting in 2011 and will be eliminated by 2015.

Provinces levy mining taxes on mineral extraction and royalties on oil and gas production. These provincial levies are mostly deductible.

Newly enacted legislation that brings the taxation of oil sands properties more in line with that of the conventional oil and gas sector, generally for acquisitions after 21 March 2011, reduces the deduction rate per year:

- for the cost of acquiring oil sands leases and other oil sands resource or oil shale property from 30% to 10% on a declining-balance basis, and

- for preproduction development expenses from 100% to 30% on a declining-balance basis (transitional relief is available).

Investment tax credits (ITCs) are available federally (and in some provinces) to individuals who invest in shares to fund prescribed mineral exploration expenditures. The federal credit in 2012 for qualified 'flow-through' share investments is 15% of qualifying mining grassroots exploration expenditures. Certain mining exploration and preproduction expenditures that are incurred by a Canadian corporation and not used for flow-through are eligible for a 10% ITC. These credits can be used to offset current taxes payable or carried over to certain previous or subsequent taxation years. The 10% corporate credit is phased out:

- for pre-production mining exploration expenses from 10% to 5% in 2013 and nil after 2013 and
- for pre-production development expenses from 10% to 7% in 2014, 4% in 2015, and nil after 2015 (transitional relief may be available).

Scientific research and experimental development (SR&ED)

Canada provides a generous combination of deductions and tax credits for SR&ED. Until 2013, current and capital expenditures on R&D can be deducted in the year incurred or carried forward indefinitely to be used at the taxpayer's discretion to minimise tax payable. *See Scientific research and experimental development (SR&ED) credit in the Tax credits and incentives section for information on the tax credits currently available and for changes to SR&ED incentives that were announced in the 29 March 2012 federal budget.*

Interest expenses

Interest on borrowed money used for earning business or property income, or interest in respect of an amount payable for property acquired to earn income, is deductible, provided the interest is paid pursuant to a legal obligation and is reasonable in the circumstances.

Doubtful accounts and bad debts

A reasonable reserve for doubtful accounts may be deducted for tax purposes. The reserve calculation should be based on the taxpayer's past history of bad debts, industry experience, general and local economic conditions, etc. Special rules apply for determining reserves for financial institutions. A taxpayer can deduct the amount of debts owing that are established to have become bad debts during the year, provided the amount has previously been included in the taxpayer's income or relates to loans made in the ordinary course of business. Recoveries of bad debts previously written off must be included in income in the year of recovery.

Business meals and entertainment

Deductions by a corporation for business meals and entertainment expenses are limited to 50% of their cost. This includes meals while traveling or attending a seminar, conference, or convention, overtime meal allowances, and room rentals and service charges, etc. incurred for entertainment purposes. If the business meal and entertainment costs are billed to a client or customer and itemised as such, the disallowance (i.e. the 50% not deductible) is shifted to the client or customer.

Insurance premiums

Insurance premiums relating to property of a business are generally deductible, but life insurance premiums are generally not deductible if the company is the named beneficiary. However, if a financial institution lender requires collateral security in the

Canada

form of life insurance, a deduction is allowed for the associated net cost of any pure insurance for the period.

Charitable contributions

Charitable donations made to registered Canadian charitable organisations are deductible in computing taxable income, generally to the extent of 75% of net income. A five-year carryforward is provided.

Fines and penalties

Most government-imposed fines and penalties are not deductible. Fines and penalties that are not government-imposed are generally deductible, if they were made or incurred by the taxpayer for the purpose of gaining or producing income from the business or property.

Taxes

Federal, provincial, and territorial income taxes are not deductible in determining income subject to tax. The tax treatment of federal capital taxes and provincial payroll and capital taxes is discussed in the *Other taxes section*.

Net operating losses

Net operating losses generally may be carried back three tax years and forward 20 (ten years if the loss was incurred in taxation years ending before 2006 and after 22 March 2004, seven years if before 23 March 2004). Special rules may prohibit the use of losses from other years when there has been an acquisition of control of the corporation.

Payments to foreign affiliates

Royalties, management fees, and similar payments to related non-residents are deductible expenses to the extent that they are incurred to earn income of the Canadian company and do not exceed a reasonable amount (fair market value in most cases). The receipt of these payments by a foreign affiliate of the Canadian taxpayer will, in certain cases, give rise to foreign accrual property income, which is taxable on an accrual basis in Canada.

Group taxation

Group taxation is not permitted. However, the federal government issued a consultation paper, *The Taxation of Corporate Groups*, which explores possible approaches for taxing corporate groups, and subsequently reaffirmed its commitment to consider this issue.

Transfer pricing

Canadian transfer pricing legislation and administrative guidelines are generally consistent with the OECD Guidelines. Statutory rules require that transactions between related parties be carried out under arm's-length terms and conditions.

Penalties may be imposed when contemporaneous documentation requirements are not met. A taxpayer will be deemed not to have made reasonable efforts if the taxpayer does not maintain complete and accurate documentation to evidence that it has determined and used arm's-length prices for its related-party transactions. The documentation must be prepared on or before the taxpayer's documentation due date, which is six months after the end of the taxation year.

The transfer pricing penalty is 10% of the transfer pricing adjustment, if the adjustment exceeds the lesser of CAD 5 million and 10% of the taxpayer's gross revenue for the

year. The penalty is not deductible in computing income, applies regardless of whether the taxpayer is taxable in the year, and is in addition to any additional tax and related interest penalties.

Canada has an Advance Pricing Agreement (APA) program that is intended to help taxpayers determine transfer prices acceptable to the local tax authorities and, when negotiated as bilateral or multilateral APAs, with tax authorities in other jurisdictions. Under this program, 253 APAs have been completed or are in progress.

Many of Canada's international tax agreements contain provisions concerning income allocation in accordance with the arm's-length principle. These include a Mutual Agreement Procedure, which is a treaty-based mechanism through which taxpayers can petition competent authorities for relief from double taxation resulting from transfer pricing adjustments.

Transfer pricing adjustments

When the Canadian transfer pricing rules have applied to adjust, for tax purposes, amounts related to transactions between a Canadian corporation and one or more non-arm's length non-residents (a 'primary adjustment'), the related benefit to the non-residents is generally treated by the CRA as a deemed dividend (a 'secondary adjustment'), subject to WHT. The 29 March 2012 federal budget confirms that the tax treatment of a secondary transfer pricing adjustment with a foreign affiliate will be a deemed dividend, subject to WHT, which can be eliminated, at the discretion of the Minister of Revenue, if the amount of the primary transfer pricing adjustment is repatriated to the Canadian corporation.

Thin capitalisation

Thin capitalisation rules can limit interest deductions when interest-bearing debt owing to certain non-residents (or persons not dealing at arm's length with certain non-residents) exceeds two times the corporation's equity.

Proposed rules have been announced that will modify the Canadian thin capitalisation rules as follows:

- Reduce the debt-to-equity ratio from 2:1 to 1.5:1, for taxation years beginning after 2012.
- Extend the rules to apply to debts of a partnership in which a Canadian-resident corporation is a member, for taxation years beginning after 28 March 2012.
- Treat disallowed interest as a dividend for WHT purposes, for taxation years ending after 28 March 2012.
- Prevent double taxation when a controlled foreign affiliate of a Canadian-resident corporation lends funds to the corporation and the interest would otherwise be both disallowed as a deduction in Canada and included in the foreign accrual property income of the affiliate, for taxation years ending after 28 March 2012.

Controlled foreign affiliates and foreign accrual property income (FAPI)

Under Canada's FAPI rules, Canadian corporations are taxed on certain income of controlled foreign affiliates (typically, certain income from property, income from a non-active business, and taxable capital gains) as earned, whether or not distributed. A grossed-up deduction is available for foreign income and WHTs paid in respect thereof. In general, a foreign corporation is a foreign affiliate of a Canadian corporation if:

Canada

- the Canadian corporation owns, directly or indirectly, at least 1% of any class of the outstanding shares of the foreign corporation, and
- the Canadian corporation and related persons (together) own, directly or indirectly, at least 10% of any class of the outstanding shares of that foreign corporation.

The foreign affiliate will be a controlled foreign affiliate of the Canadian corporation if certain conditions are met (e.g. more than 50% of the voting shares are owned, directly or indirectly, by a combination of the Canadian corporation, persons at non-arm's length with the Canadian corporation, a limited number of Canadian resident shareholders, and persons at non-arm's length with such Canadian resident shareholders).

Tax credits and incentives

Foreign tax credits

Taxpayers that have foreign-source income and are resident in Canada at any time in the year are eligible for foreign tax credit relief. Separate foreign tax credit calculations are prescribed for business and non-business income on a country-by-country basis. All provinces and territories also allow a foreign tax credit, but only in respect of foreign non-business income taxes.

Foreign business income or loss is computed for each foreign country in which a branch is located. Income or profit taxes paid to foreign governments generally are eligible for credit against a taxpayer's Canadian income taxes payable. The credit in respect of taxes paid on foreign income is restricted to the amount of Canadian taxes otherwise payable on this income. Excess foreign business income tax credits may be carried back three years or forward ten. Generally, foreign tax credits are available only to reduce Canadian tax on foreign-source income that is subject to tax in the foreign country.

The foreign non-business income tax credit applies to all foreign taxes other than those classified as business income tax. The credit is the lesser of:

- the foreign non-business income tax paid for the year on foreign non-business income, and
- Canadian federal tax otherwise payable for the year on the foreign non-business income.

The foreign non-business tax credit is available only to reduce Canadian income tax otherwise payable on foreign non-business income that is subject to income tax in the foreign country. No carryover is allowed with respect to the non-business income foreign tax credit. Unused foreign non-business income tax may be deducted in computing income.

Regional incentives

In specified regions of Canada (i.e. Atlantic provinces, the Gaspé region, and Atlantic offshore region), a 10% federal investment tax credit (ITC) is available for various forms of capital investment (generally, new buildings and/or machinery and equipment to be used primarily in manufacturing or processing, logging, farming, or fishing). The ITC is fully claimed against a taxpayer's federal tax liability in a given year. Unused ITCs reduce federal taxes payable for the previous three years and the next 20, or may be 40% refundable to CCPCs. Changes to the 10% federal ITC that generally apply to assets acquired after 28 March 2012:

- Phase out (subject to possible transitional relief) the ITC for certain oil and gas and mining activities, from 10% to 5% in 2014 and 2015, and nil after 2015.
- Ensure that ‘qualified property’ includes certain electricity generation equipment and clean energy generation equipment used primarily in an eligible activity (except oil and gas or mining activities).

The provinces and territories may also offer incentives to encourage corporations to locate in a specific region. Income tax holidays are available in Newfoundland and Labrador, Nova Scotia, Ontario, Prince Edward Island, and Quebec for certain corporations operating in specific industries (e.g. in Ontario and Quebec, commercialisation of intellectual property; in Prince Edward Island, bioscience or aviation) or meeting certain conditions (e.g. job creation for Newfoundland and Labrador).

Industry incentives

Canada offers many tax incentives at the federal, provincial, and territorial levels, for various industries and activities, including those related to:

- Research and development (*see below*).
- Film, media, computer animation and special effects, and multi-media productions.
- Manufacturing and processing.
- Environmental sustainability.

Scientific research and experimental development (SR&ED) credit

In addition to the R&D deduction, a taxpayer can benefit from an ITC, which is generally a 20% non-refundable credit on SR&ED expenditures that can be applied against taxes payable. Alternatively, this tax credit can be carried back three years or forward 20 to be applied against taxes owing.

A qualifying CCPC can qualify for a 35% refundable tax credit annually on its first CAD 3 million in expenditures. This enhanced credit is subject to certain income and capital limitations.

SR&ED ITCs have been extended to certain salary and wages (limited to 10% of salary and wages directly attributable to SR&ED carried on in Canada) incurred in respect of SR&ED carried on outside Canada.

In addition to the federal research and development incentives, all provinces (except Prince Edward Island) and the Yukon provide tax incentives to taxpayers that carry on R&D activities.

The Independent Panel on Federal Support to Research and Development released the report, *Innovation Canada: A Call to Action*, that provides “advice in respect of the effectiveness of federal programs to support business and commercially oriented R&D, the appropriateness of the current mix and design of these programs, as well as possible gaps in the current suite of programs and what might be done to fill them”. As a result, significant changes are expected to Canada’s SR&ED program in the coming years. Changes that were announced in the 29 March 2012 federal budget:

- Reduce the 20% SR&ED ITC rate to 15% for taxation years ending after 2013 (pro-rated for taxation years straddling 1 January 2014).
- Provide that capital property acquired generally after 2013 is not deductible as an SR&ED expenditure nor eligible for ITCs.
- Reduce the overhead proxy rate from 65% to 60% for 2013 and to 55% after 2013.

Canada

- Allow only 80% of SR&ED contract payments (net of SR&ED capital expenditures) to an arm's-length contractor incurred after 2012 to be eligible for ITCs.

In addition, the government will conduct a study to understand why taxpayers hire SR&ED consultants on a contingency-fee basis and determine actions needed to reduce taxpayer compliance costs to adhere to the SR&ED program.

Withholding taxes

Withholding tax at a rate of 25% is imposed on interest (other than most interest paid to arm's length non-residents), dividends, rents, royalties, certain management and technical service fees, and similar payments, made by a Canadian resident to a non-resident of Canada.

Canada is continually renegotiating and extending its network of treaties, some with retroactive effect. This table summarises WHT rates on payments arising in Canada. The applicable treaty should be consulted to determine the WHT rate that applies in a particular circumstance.

Notes

- Interest: Canada does not impose WHT on interest (except for 'participating debt interest') paid to arm's-length non-residents. Most treaties have an explicit provision for higher WHT on interest in excess of fair market value in non-arm's-length circumstances.
- Royalties: A zero royalty rate generally applies to:
 - copyright royalties and payments for a literary, dramatic, musical, or other artistic work (but not royalties for motion picture films, work on film or videotape, or other means of reproduction for use in television), and/or
 - royalties for computer software, a patent, or for information concerning industrial, commercial, or scientific experience (but not royalties for a rental or franchise agreement).

Different rates may apply in the case of immovable property (e.g. payments that relate to Canadian natural resources). Most treaties explicitly provide for higher WHT on royalties in excess of fair market value in non-arm's-length circumstances. A zero rate of tax may apply in certain circumstances.
- The treaty has been signed, but is not yet in force. In the absence of a treaty, Canada imposes a maximum WHT rate of 25% on dividends, interest, and royalties.
- The lower (lowest two for Vietnam) rate applies if or when the beneficial owner of the dividend is a company that owns/controls a specified interest in the paying company. The nature of the ownership requirement, the necessary percentage (10%, 20%, 25%, or higher), and the relevant interest (e.g. capital, shares, voting power, equity percentage) vary by treaty.
- If the other state (Canada for the treaty with Oman) concludes a treaty with another country providing for a lower WHT rate (higher rate for Kenya), the lower rate (higher rate for Kenya) will apply in respect of specific payments within limits, in some cases.
- Canada's treaty with China does not apply to Hong Kong.
- The treaty status of the republics that comprise the former USSR is as follows:
 - Azerbaijan, Estonia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Russia, Ukraine, and Uzbekistan: new treaties entered into force (*see table for rates*).
 - Other republics: no negotiations are underway.

- Belarus, Tajikistan, and Turkmenistan will not honour the treaty with the former USSR. As a result, Canada will impose a maximum WHT rate of 25% on dividends, interest, and royalties until a new treaty enters into force. For other republics that comprise the former USSR, the status of the former treaty with the USSR is uncertain. Because the situation is subject to change, Canadian taxpayers are advised to consult with the CRA as transactions are carried out.
8. The Canada-Italy treaty entered into force on 25 November 2011. Its provisions apply in Canada:
 - for purposes of non-resident WHT, to amounts paid or credited after 31 December 2010, and
 - for other taxes, for taxation years beginning after 2010.
 9. A new treaty and Protocol with New Zealand was signed on 3 May 2012. Upon ratification, its provisions will apply in Canada:
 - for purposes of non-resident WHT, to amounts paid or credited after the end of the first month after they enter into force, and
 - for other taxes, for taxation years beginning after the calendar year they enter into force.
 The rates in the table are from the new treaty and Protocol. Under the new treaty and Protocol, the WHT rate will be reduced from 15% to:
 - 5% on dividends paid to a company that owns at least 10% of the payor's voting stock (the rate will remain 15% on other dividends)
 - 10% on interest, but certain interest payments will be exempt, and
 - 10% on royalties, but certain royalties for the use of computer software, patents, and know-how, and certain copyright royalties, will be subject to a rate of 5%.
 10. A new treaty and Protocol with Poland was signed on 14 May 2012. Upon ratification, its provisions will apply in Canada:
 - for purposes of non-resident WHT, to amounts paid or credited after the calendar year they enter into force, and
 - for other taxes, for taxation years beginning after the calendar year they enter into force.
 The rates in the table are from the new treaty and Protocol. Under the new treaty and Protocol, the WHT rate will:
 - be reduced from 15% to 5% on dividends paid to a company that owns directly at least 10% of the payor's capital (the rate will remain 15% on other dividends)
 - be reduced from 15% to 10% on interest, but certain interest payments will be exempt, and
 - remain 10% on royalties, but certain royalties for the use of computer software, patents, and know-how will be subject to a rate of 5%, and certain copyright royalties will no longer be exempt and will be subject to a rate of 5%.
 11. The Canada/Republic of Turkey treaty entered into force on 4 May 2011. Its provisions apply in Canada:
 - for purposes of non-resident WHT, to amounts paid or credited after 31 December 2011, and
 - for other taxes, to taxable years beginning after 2011.
 Before that, the rates were 25%.
 12. For the United States, the zero rate applies, subject to the Limitation of Benefits article.

Tax administration

Taxable period

The tax year of a corporation, which is normally the fiscal period it has adopted for accounting purposes, cannot exceed 53 weeks. The tax year need not be the calendar year. Once selected, the tax year cannot be changed without approval from the tax authorities.

Tax returns

Both the federal and the provincial/territorial corporation tax systems operate on an essentially self-assessing basis. All corporations must file federal income tax returns. Alberta and Quebec tax returns must also be filed by corporations that have PEs in those provinces, regardless of whether any tax is payable. Corporations with PEs in other provinces that levy capital tax must also file capital tax returns. Tax returns must be filed within six months of the corporation's tax year-end. No extensions are available.

Certain corporations with annual gross revenues exceeding CAD 1 million are required to electronically file (e-file) their federal CIT returns via the internet. Also, information return filers that submit more than 50 information returns annually must e-file via the internet. Penalties are assessed for failure to e-file.

Canada

Payment of tax

Corporate tax instalments are generally due on the last day of each month (although some CCPCs can remit quarterly instalments, if certain conditions are met). Any balance payable is generally due on the last day of the second month following the end of the tax year.

Functional currency

The amount of income, taxable income, and taxes payable by a taxpayer is determined in Canadian dollars. However, certain corporations resident in Canada can elect to determine their Canadian tax amounts in the corporation's 'functional currency'.

Audit cycle

The tax authorities are required to issue an assessment notice within a reasonable time following the filing of a tax return. These original assessments usually are based on a limited review, if any, of the corporation's income tax return. However, the notice of assessment will identify any changes made (i.e. correcting discrepancies on any balances carried forward).

Traditionally, all corporations with gross income over CAD 250 million and their affiliates are assigned a large case file team and audited annually. Medium-sized corporations (gross income between CAD 20 million and CAD 250 million) generally are selected based on a screening process and identified risks. Smaller corporations, which are usually CCPCs with gross income under CAD 20 million, have been subject to compliance or restricted audits, selected based on statistical data and a screening process. Audits of CCPCs are generally restricted to covering the current and one previous taxation year.

However, the CRA announced in the fall of 2010 that, over the next five years, it will implement a new 'risk assessment' model to select corporations, partnerships, income trusts, and private equity funds for audit. Large corporations and their affiliated entities are to be classified as high, medium, or low risk, and their categorisation will dictate the scope of the audit undertaken. Factors that determine the risk category include the taxpayer's history with the CRA, the type of industry, and the internal controls in place. The CRA is implementing this new risk assessment approach in 2012 by subjecting 50 of approximately 1,100 large corporations to it.

In 2010, the CRA issued a policy paper describing the powers that CRA officials have to obtain information and supporting documentation from taxpayers, registrants, and third parties. It also discusses the CRA's policies and procedures for obtaining information, and how concerns with any specific information gathering process can be addressed by taxpayers or their representatives. The paper confirms that auditors determine what information is relevant for the review being conducted. It lists the compliance tools that can be used to obtain the information and the consequences for non-compliance. The CRA expects transparency and cooperation from the taxpayer, registrant, or third party to benefit the compliance process.

Statute of limitations

A reassessment of the tax payable by a corporation that is not a CCPC may be made within four years from the date of mailing of the original notice of assessment, usually following a detailed field audit of the return and supporting information. The limitation period is three years for CCPCs. The three-year and four-year limits are extended a further three years to permit reassessment of transactions with non-arm's-length non-residents. Reassessments generally are not permitted beyond these limits unless there

has been misrepresentation or fraud. Different time limits may apply for provincial reassessments.

Appeals

A taxpayer that disagrees with a tax assessment or reassessment may appeal. The first step is to file a formal notice of objection within 90 days from the date of mailing of the notice of assessment or reassessment, setting out the reasons for the objection and other relevant information. Different time limits may apply for provincial reassessments. Corporations that qualify as 'large corporations' must file more detailed notices of objection. The CRA will review the notice of objection and vacate (cancel), amend, or confirm it. A taxpayer that still disagrees has 90 days to appeal the CRA's decision to the Tax Court of Canada, and if necessary, to the Federal Court of Appeal and the Supreme Court of Canada. However, the Supreme Court hears few income tax appeals.

Topics of focus for tax authorities

Topics of interest to Canadian tax authorities include:

- The deductibility of:
 - royalty payments made by Canadian corporations to non-arm's-length non-residents
 - business restructuring expenses incurred by a group of corporations located in more than one country
 - interest paid on loans if the funds derived from the loans are used offshore, and
 - guarantee fees paid by Canadian corporations to related non-resident corporations.
- The offshoring of Canadian-source income by factoring the accounts receivable of Canadian corporations.
- Treaty shopping to reduce Canadian WHT and capital gains tax.
- Surplus stripping to reduce Canadian WHT by artificially increasing a Canadian corporation's paid-up capital and subsequently distributing the surplus as a return of capital.
- The generation of foreign tax credits by a corporation for foreign income taxes that have not been borne by the corporation.

Foreign reporting

Reporting requirements apply to taxpayers with offshore investments. The rules impose a significant compliance burden for taxpayers with foreign affiliates. Failure to comply could result in substantial penalties.

Tax avoidance

Draft legislation makes an 'avoidance transaction' meeting certain conditions a 'reportable transaction' that must be reported to the CRA, generally for transactions entered into after 2010, and those that are part of a series of transactions completed after 2010. Quebec already has a provincial reporting regime for certain aggressive tax planning transactions, generally carried out after 14 October 2009.

Cross-border tax evasion

To facilitate and improve the exchange of tax information and combat cross-border tax evasion, Canada has signed a Protocol amending the Convention on Mutual Administrative Assistance in Tax Matters. The member states of the Council of Europe and the member countries of the OECD are signatories.

Canada

Other issues

Forms of business enterprise

Canadian law is based on the British common-law system, except in Quebec where a civil-law system prevails. The principal forms of business enterprise available in Canada are the following.

- **Corporation:** A legal entity distinct from its shareholders, whether public or private, incorporated federally, provincially, or territorially.
- **Partnership:** A business relationship between two or more 'persons' (i.e. individuals, corporations, trusts, or other partnerships) formed for the purpose of carrying on business in common. Not treated as a legal entity distinct from its partners.
- **Sole proprietorship:** An unincorporated business operated by an individual that is carried on under the individual's own name or a trade name.
- **Trust:** A relationship whereby property (including real, tangible, and intangible) is managed by one person (or persons, or organisations) for the benefit of another. May hold commercial enterprises.
- **Joint venture:** Generally, the pursuit of a specific business objective by two or more parties whose association will end once the objective is achieved or abandoned. Not treated as a legal entity distinct from the participants.

Foreign investors usually conduct business in Canada through one or more separate Canadian corporations, although operation as a branch of a profitable foreign corporation may be preferable during the start-up period. In addition, foreign investors may participate as partners in partnerships carrying on business in Canada or as joint venturers.

Financial statement reporting

For fiscal years beginning after 31 December 2010:

- Most 'publicly accountable enterprises' must adopt International Financial Reporting Standards (IFRS).
- Private enterprises must adopt either IFRS or Accounting Standards for Private Enterprises (ASPE).

As a result, IFRS and ASPE have become Canadian GAAP. This could affect the measurement and reporting of income taxes for financial statement purposes and the calculation of Canadian taxes payable.

Significant developments

2012 State Budget Law

Cape Verde's 2012 State Budget Law (2012 State Budget) was published in the Official Gazette of 30 December 2011. Law Number 10/VIII/2011 entered into force on 1 January 2012. The main changes introduced to Cape Verdean tax law are the following.

Excise duties

The 2012 State Budget increased the excise duties rates to 40% in the case of beers, wines, vermouths, and other alcoholic drinks, and to 20% in the case of tobacco.

Vehicles used for transportation, up to 5 tons, will be subject to rates of up to 150%, according to their age.

Exemptions from Imposto Único sobre os Rendimentos (IUR)

Exemption applicable to small and medium-sized companies set up by young entrepreneurs
The exemption from IUR applicable for a three-year period will apply to more than one company owned by the same entrepreneur, provided that cumulatively the exemption does not exceed six years.

Tax benefits revoked

Incentives to pharmaceutical industry

The import of packaging materials of products produced by the national pharmaceutical industry will no longer be exempt from custom duties.

Taxes on corporate income

Cape Verde has a single tax on income, called *Imposto Único sobre os Rendimentos (IUR)*, which is levied on profits arising from business activities carried out in Cape Verde by resident companies or individual entrepreneurs and by Cape Verdean permanent establishments (PEs) of non-resident entities.

Taxable profit is computed according to the local accounting rules and adjusted for tax purposes. The taxation system in Cape Verde is based on a territorial principle; if the source of the income is located abroad, no Cape Verde taxation is imposed on it.

Income tax rates

The following IUR rates are applicable:

- Companies are subject to a tax rate of 25%, where taxable income corresponds to the profit less any tax benefits and any losses carried forward, as stated in the tax return.

Cape Verde

- Non-residents without a PE in Cape Verde are subject to a 20% withholding tax (WHT) on the amount of the invoice.

Surcharge

The IUR rate is increased by a fire brigade surcharge, called *Taxa de Incêndio*, of 2% on the tax due. This surcharge is levied in the municipalities of Praia (Island of Santiago) and Mindelo (Island of São Vicente).

Corporate residence

A company or entity is deemed to be resident in Cape Verde if its registered head office or its place of effective management is in the Cape Verde territory.

Permanent establishment (PE)

Non-resident companies deemed to have a PE in Cape Verde are also subject to tax in Cape Verde. Under Cape Verdean tax law, a non-resident company is deemed to have a PE if the non-resident company:

- has any fixed installation or permanent representation located in Cape Verde through which, among others, activities of commercial, industrial, or agricultural nature, or fishing and rendering of services are carried out (including agricultural, fishing, and cattle raising explorations, or other quarries or any other places of natural resources extraction) or
- carries out its activity in Cape Verde through employees, or any other personnel hired for that purpose, for a period (continuous or not) of not less than 90 days within a 12-month period.

Other taxes

Value-added tax (VAT)

The VAT system in Cape Verde closely follows the European Union (EU) VAT system, and it is assessed at the standard rate of 15% and at a reduced rate of 6%.

The standard VAT rate of 15% is a general tax on consumption, applicable to the import and sale of goods and services in Cape Verde territory.

The 6% reduced VAT rate applies to lodging and restaurants, due to the important role they assume in the Cape Verde economy.

The VAT regulations establish two types of exempt transactions: exempt transactions without credit and exempt transactions with credit (i.e. zero-rated transactions). VAT incurred is recoverable in as far as the goods and services are used for the purposes of the taxed transactions of a taxable person or for zero-rated transactions.

Exempt transactions without credit include the following:

- Hospital and medical care and closely related activities undertaken by bodies governed by public law, or comparable activities undertaken by other hospitals and centres for medical treatment.

- The provision of medical care through the exercise of the medical and paramedical professions, as well as the supply of transport services for sick or injured persons, and the supply of human organs, blood, and milk.
- The supply of services and goods closely linked to welfare and social security work.
- The supply of services and goods closely linked to the protection of children and young people by bodies governed by public law.
- The provision of children's or young people's education, school or university education, including the supply of services and goods closely related thereto.
- The supply of services, and goods closely linked thereto, by non-profit-making organisations.
- The supply of copyright and art objects by the original creators or their heirs.
- The supply by the public postal services of stamps and stamped paper.
- The supply of certain cultural, educational, technical, and recreational services.
- Garbage removal.
- Burial and cremation supplies.
- Banking, financial, insurance, and reinsurance transactions, including related services performed by insurance brokers and insurance agents.
- Immovable property transactions (excluding the provision of accommodation in the hotel sector or in sectors with a similar function, the granting of facilities for collective parking of vehicles, the leasing of permanently installed machinery and equipment, and the granting of facilities for exhibitions and advertising).
- Specified basic foodstuffs and pharmaceutical products.
- Goods used in agriculture, stockbreeding, forestry, and fisheries.

Exempt transactions with credit (i.e. zero-rated transaction) on imports include the following:

- Import of goods whose supply qualifies for exemption.
- Re-import of goods by the person who exported them, in the state in which they were exported, where they qualify for exemption from customs duties.
- Services in connection with the import of goods where the value of such services is included in the taxable amount.
- Import of gold by the central bank.
- Import into ports by sea fishing undertakings of their catches, unprocessed or after undergoing preservation for marketing but before being supplied.
- Import of goods under diplomatic and consular arrangements that qualify for exemption from customs duties.
- Import of goods for the fuelling and provisioning of sea-going vessels and aircraft.

The most important exemptions with credit (i.e. zero-rated) for exports and connected transactions include the following:

- Supply, modification, repair, maintenance, chartering, and hiring of aircraft used by airlines operating both on domestic and international routes, and the supply, hiring, repair, and maintenance of equipment incorporated or used therein.
- The supply of goods for the fuelling and provisioning of such aircraft.
- Services meeting the direct needs of such aircraft or their cargoes.

Customs duties/Import tariffs

Customs duties are levied at rates ranging from 0% to 50% on the customs value of most imported goods. Since Cape Verde imports the majority of the goods it consumes, a 50% tariff protection applies for certain domestically produced goods.

Cape Verde

Raw materials or capital goods can be imported with an exemption from custom duties or at a low rate.

Special consumption tax

A special consumption tax is imposed at rates ranging from 10% to 150% on goods which are deemed superfluous, luxurious, or undesirable for economic, social, or environmental policy reasons.

The 2012 State Budget increased the excise duties rates to 40% in the case of beers, wines, vermouths, and other alcoholic drinks, and to 20% in the case of tobacco.

Vehicles used for transportation, up to 5 tons, will be subject to rates of up to 150%, according to their age:

- Up to four years: not applicable.
- More than four and up to six years: 40%.
- More than six and up to ten years: 80%.
- More than ten years: 150%.

Property taxes

A property tax, called *Imposto Único sobre o Património* (IUP), is levied at the rate of 3% in Cape Verde.

IUP is due on the ownership of immovable property on an annual basis by the owner of the real estate, registered as such on 31 December of the relevant year. The taxable basis corresponds to 25% of the value attributed by the Evaluation Commission.

IUP is also due on the transfer (gratuitously or for a consideration) of real estate, based on the value of the contract declared by the transferee.

Exemption of IUP due on the acquisition is granted to:

- Cape Verdean emigrants who own saving bank accounts.
- Retired individuals.
- Projects with Touristic Utility Status (*see the Tax credits and incentives section for more information*).

In taxable transfers (not exempt), IUP is payable by the transferee.

IUP is also due on the capital gains arising from the sale of:

- plots of land for construction, if the sales price is more than double the purchase price, and
- buildings or other real estate, if the sale price exceeds the purchase price by more than 30%.

IUP on capital gains is normally paid by the transferor, on the highest of the declared price and the official value of the property concerned.

Capital gains obtained by companies that are in the business of buying real estate for resale are not subject to IUP.

Stamp duty

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis.

Stamp duty rates:

Item	Stamp duty rate
Loans	
With determined term, over one year	0.5%
With undetermined term or under one year (for each month)	0.05%
Bank interest and fees/commissions	3.5%
Guarantees	0.5%
Insurance	3.5%
Promissory notes, securities	0.5%
Corporate structuring operations	0.5%
Real estate purchases and sales	1%
Sale of a business as a going concern	5%
Letting of immovable property	10%
Property leasing	1%
Emoluments, registrations acts	15%
Contracts	CVE 1,000 *

* Fixed exchange rate 1 euro (EUR) = 100.265 Cape Verdean escudos (CVE) under an exchange agreement between Cape Verde and Portugal.

Ecologic charge

Cape Verde's ecologic charge, in force since August 2010, is applied to packing material, whether empty or full, imported or produced internally, non-biodegradable or made out of metal, glass, or plastic.

The ecologic charge varies from CVE 2 to CVE 100 per item, depending on the quantity or weight of the goods.

This fee is due by the local producer or the importer.

Exemptions are available in the case of packing material used in medicine, essential food (e.g. corn, rice, sugar, flour, and milk), and construction (e.g. cement). Packing material that is exported, reutilised, or recycled is also exempt.

Branch income

A branch is not considered a separate legal entity distinct from the foreign head office. It is governed by the domestic law of Cape Verde.

From a tax perspective, branches are subject to corporate income tax, if considered a PE under Cape Verde law.

Cape Verde

Income determination

Taxable income is computed on the basis of the accounting income, adjusted by deducting from taxable profits the prior years' losses and any deductions under the tax (incentive) legislation.

Inventory valuation

The tax law does not foresee any mandatory inventory valuation method that should be adopted by Cape Verdean taxpayers. For tax purposes, accepted inventory methods should be consistent with the accounting rules in force and with local business practice generally accepted, if and when such methods are applied in a consistent way during the financial years and were also based on the prices effectively paid or under regulated prices established by official documents.

Capital gains

Capital gains are not subject to a separate capital gains tax and are treated and taxed as ordinary business income.

The gain corresponds to the amount by which proceeds from disposal exceeds the cost of asset acquisition.

Capital gains realised from the sale of shares and part of the capital of companies with a registered head office or place of effective management in Cape Verde, if owned for at least one year, are not subject to taxation.

Dividend income

Dividend income is currently fully exempt from taxation in Cape Verde.

Interest income

There is no special tax provision regarding interest income. Interest income is treated and taxed as ordinary business income.

Foreign income

Resident companies and PEs of non-resident companies are taxable on a territorial base principle, meaning that income obtained outside Cape Verde is not subject to taxation therein.

Deductions

Depreciation

Depreciation is considered a deductible cost with respect to all fixed assets (except land), up to the limits determined by the applicable tax law.

As a general rule, depreciation must be computed by using the straight-line method. Tax authorities may allow other depreciation methods on the basis that the actual depreciation is higher than the one calculated at regular rates or according to the taxpayer's accounting practice.

Under the straight-line method, the maximum depreciation that is deductible is calculated by applying the general depreciation rates set out in a Ministerial Decree of 28 January 1984 to the adjusted purchase cost or production cost.

Land is not depreciable.

Main depreciation rates:

Group	Asset	Depreciation rate (%)
1	Plantations, land for exploration, other land and natural resources	To be determined on a case-by-case basis
2	Buildings and other constructions	
	Residential, commercial, and industrial buildings	4
	Light structures (fibreglass wood, wood, metal) and other constructions	10
	Quays, docks, and similar harbour infrastructure	2
	Walls, silos, parks, roads, adornments, runways	5
3	Basic equipment, machines, and other installations	
	Fishing gear	25
	Electronic, sound, laboratory, telephone, and radar equipment	20
	Telecommunication stations and installations	12.5
	Water installations	6.66
	Machines	16.66
	Oil pipelines, fuel and gas reservoirs	8.33
	Transformation stations, air networks, equipment, and underground cables for communications and transport of energies	5
	Other equipment and machines	10
4	Tools (for industries / others)	20/25
5	Cargo and transport material	
	Animals and lightweight motor vehicles	12.5
	Aircrafts	14.28
	Ships and boats	10
	Cranes, barges, etc.	7.14
	Trucks	20
	Other cargo and transport material	16.66
6	Administrative and social equipment and furniture	
	Furnishings and decorative items	16.16
	Calculating machine, typewriter, and accounting machine	20
	Metallic furniture	8.33
	Non-metallic furniture	12.5
	Clothes, tableware, and glasses	50
	Others administrative and social equipment and furniture	25
7	Packing material (wood/metal/other)	14.28/20/33.33
8	Other tangible fixed assets	10
9	Intangibles	
	Patents, trademarks, licences, concessions and other rights	10
	Formation and organisation of the company	33.33
	Other intangibles	33.33

Goodwill

Goodwill is an asset subject to impairment tests. The goodwill's impairment is not a deductible cost for tax purposes.

Cape Verde

Start-up expenses

Start-up expenses include, among others, cost incurred with set-up and organisation of companies, projects, and increase of capital. Start-up expenses are considered a deductible cost up to the limits derived from the applicable tax law, 33.33% per year being deductible over a period of three years.

Interest expenses

Interest expenses are deductible if considered indispensable for the realisation of taxable profits/gains.

There are no thin capitalisation rules.

Bad debt

Provision regarding bad debts is accepted as a deductible cost within the following limits: 4% of accounts receivable per year with a cumulative maximum of 5%.

Charitable contributions

Charitable contributions granted to certain entities whose main activity consists in the execution of initiatives in the social, cultural, environmental, scientific or technologic, sports, and educational areas are considered as cost for tax purposes (within certain limits, and in certain circumstances, with an additional deduction).

Fines and penalties

Tax (and fines) penalties are not deductible for tax purposes.

Taxes

Taxes paid in connection with the activity of the company are tax deductible, excluding IUR and the IUP due on an annual basis. However, under the current tax law, the annual IUP can be deducted from the IUR assessed.

Net operating losses

Income tax losses can be offset against taxable profit and can be carried forward for three years. Carryback of tax losses is not allowed in Cape Verde.

The tax losses incurred by a company are not transferable to another company unless previously accepted by the tax authorities.

Payments to foreign affiliates

Currently, there are no special restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided that the payments are regarded as indispensable to generate taxable profits and gains and to maintain the business of the company.

Group taxation

There is no special tax regime for groups of companies in Cape Verde.

Transfer pricing

There is no special tax regime regarding transfer pricing in Cape Verde.

Thin capitalisation

There is no special tax regime regarding thin capitalisation in Cape Verde.

Tax credits and incentives

Foreign Investor Status (Estatuto do Investidor Externo)

Direct foreign investments in Cape Verde made in any business sector by entities with the Foreign Investor Status benefit from an exemption from WHT on distribution of profits, as well as interest derived from the financing of the investment, paid to foreign investors. Currently, dividends are not taxed in Cape Verde under a domestic exemption. The benefit applies for the first five years of the investment or whenever the profits are reinvested in Cape Verde, in the same or another economic activity. This benefit is granted following a request filed with the Cape Verdean Agency for Foreign Investment.

Industrial Activity Law

The following tax and custom benefits are provided for industrial activity:

IUR benefits

Industrial Entrepreneurs benefit from a five-year exemption from IUR on the income generated by each industrial establishment. Under this regime, 'Industrial Entrepreneurs' are individuals and/or companies that solely or jointly declare the intention to develop an industrial project.

This exemption is renewable for the same period in the case of reinvestment, via a tax deduction corresponding to the total sum of the profits reinvested in the same or in other industrial unit.

The exemption period is increased to seven years in the case of industrial projects set up in less-developed areas (yet to be defined), which contribute to job creation or to diversify the production of goods and services.

IUP benefits

Industrial Entrepreneurs benefit from a ten-year exemption from IUP on the ownership of real estate used exclusively for industrial purposes. There is also an exemption on the acquisition of real estate for the same purpose and on cargo and passenger transport vehicles used exclusively for the purposes of the industrial activity.

VAT benefits

Industrial Entrepreneurs benefit from a VAT exemption on the acquisition of equipment and vehicles (not more than five years old) for the transport of goods and workers of the industrial establishment.

Custom duty benefits

Industrial Entrepreneurs benefit from an exemption from custom duties on the import of construction material, machines, utensils, semi and finished materials, and products used exclusively in the production of goods within a new industrial product.

The law also provides for an exemption from custom duties on the acquisition of fuel and lubricants (except gasoline) used in the production of energy and desalinated water for consumption by the industrial establishment.

International Business Centre (IBC) of Cape Verde

The IBC regime is in force as of 2 March 2011. The Cape Verdean Agency for Foreign Investment is the entity responsible for granting the licences to operate within the IBC,

Cape Verde

upon previous proposal of the Zona Franca Comercial S.A.. The following tax benefits are applicable to entities licensed to operate in the IBC on income from industrial or business activities and services in respect of operations carried out with other IBC licensed entities or with non-residents entities (without a PE in Cape Verde).

Note that these tax benefits are not applicable to entities engaged in tourism, banking and insurance, real estate, or construction.

IUR benefits

From 1 January 2011 through 31 December 2018, the IUR rate is reduced by 90% to an effective rate of 2.5%.

From 1 January 2019 through 31 December 2025, the IUR rate is reduced by 85% to an effective rate of 3.75%.

Under current IUR law, foreign-sourced income is not subject to taxation in Cape Verde.

VAT and custom duty benefits

All the exemptions foreseen in the VAT Regulation apply.

An exemption from custom duties applies with respect to certain goods used within the scope of the activity developed and licensed under the IBC.

WHT benefits to shareholders of entities licensed to operate in the IBC

An exemption from WHT applies with respect to distributed profits which have been taxed at the reduced IUR rates applicable within the IBC. Currently, besides the foreign income not being subject to taxation in Cape Verde, distributed dividends are not subject to taxation.

An exemption from WHT applies with respect to interest, and other income, from shareholders loans or other capital entries.

Tax and financial incentives for internationalisation of Cape Verdean companies

A regime that provides for tax and financial incentives for investment projects in order to promote the internationalisation of Cape Verdean companies is in force as of 23 March 2011.

The following incentives, to be granted under a contract of not more than three years, apply to internationalisation projects of companies with head office and place of effective management in Cape Verde, which are undertaken before 31 December 2020.

IUR benefits

The IUR rate is reduced by 50% to an effective rate of 12.5% throughout the duration of the investment contract.

An additional deduction of 30% of costs incurred in training young (i.e. not older than 30 years of age) people is available, as is an additional deduction of 30% of costs incurred in hiring young people or long-term unemployed people.

An additional deduction of 50% or 80% of the costs of non-fixed term labour agreements is available, provided there is creation of net employment (respectively more than ten or more than 50 jobs).

IUP benefits

An exemption from IUP is available on the acquisition of real estate for the establishment or expansion of the activity of the investor.

VAT and custom duty benefits

Exemptions provided for in the VAT Code apply, as well as custom duties incentives as provided for in the applicable legislation.

Stamp duty and other benefits

An exemption from stamp tax is available on the incorporation of companies and increase of share capital of existing companies. An exemption from stamp duty is also available on financing transactions.

An exemption from notary and registration fees is available on the incorporation and registration of companies.

Tax benefits for social housing

Entities responsible for the construction of social housing, duly authorised by the competent regulatory authority (*Comissão de Coordenação e Credenciação do Sistema Nacional de Habitação de Interesse Social* or CCC-SNHIS), may benefit from the following:

- Only 30% of the income derived from the activity carried out within the scope of the social housing project is subject to IUR, under certain conditions.
- A refund of 80% of the VAT incurred in the Cape Verdean market is available in cases where those entities carry exclusively exempt operations without the right to deduct input VAT.
- A reduction of 75% of custom duties levied on construction material listed in an annex to the diploma is available.

Development promotion entities, provided they are also authorised by CCC-SNHIS, are also eligible for VAT benefits.

Touristic Utility Status (*Estatuto de Utilidade Turística*)

Cape Verde may grant Touristic Utility Status to certain touristic projects. Touristic Utility Status is granted to the following types of touristic projects:

- Installation: Granted to new touristic projects.
- Functioning: Granted to touristic projects starting to operate.
- Refurbishment: Granted to touristic projects in case of refurbishment projects with a value of at least 25% of the initial investment.

Touristic Utility Status generally allows for the following tax incentives and benefits:

- Exemption from IUR: 100% in the first five years of activity, 50% in the following ten years.
- Exemption from IUP on the acquisition of real estate used for construction and installation of touristic projects.
- Exemption from custom duties on the importation of materials and equipment used in the touristic project, capped at 15% of the total amount of the investment.

Cape Verde

Tax incentives for renewable energies

A regime for promotion, encouragement and access, licensing, and exploitation inherent to the exercise of independent production and self-production of electricity based on renewable energy sources is in force as of 1 January 2011.

Water, wind, solar, biomass, biogas or industrial, agricultural or urban waste, oceans and tides, and geothermal are to be considered sources of renewable energy. Under the regime, renewable energy producers may benefit from the following.

IUR benefits

The IUR rate is reduced by 100% during the first five years of production of energy (per project) and by 50% during the next five years production of energy (per project). The IUR rate is reduced by 25% during another five years (years 11 through 15) of production of energy (per project), provided the reinvestment accumulated in the last three years exceeds 50% of the initial investment.

Custom duty benefits

An exemption from custom duties and other custom charges (except stamp duty, charges, and fees due for the provision of services) applies on the importation of capital goods, raw materials and supplies, finished and semi-finished products, and other materials which are incorporated or used in the production of goods or services involved in the production of electrical energy from renewable sources.

Shipping transport industry incentive

A five-year income tax exemption, beginning in the year of activity, is available to Cape Verde individual entrepreneurs and domestic companies engaged in shipping transport as well as to shipping transport companies which are owned at least 25% by Cape Verde citizens and/or companies.

Job creation incentives

Companies are entitled to an increased payroll expense deduction with respect to the net permanent job increase related to newly hired workers who are not older than 30 years of age or have been unemployed for one year or more. The total deduction allowed corresponds to 130% or 150% of the payroll costs, depending on whether the net job increase that year is between five and ten or more than ten, respectively.

A deduction equal to 180% of the payroll cost is available to companies that hire, for six months or more, workers with a disability between 50% and 66%. The deduction is 130% in case of workers with a disability of less than 50%. In case of disabled workers hired for less than six months, the deduction is reduced to 140% and 115%, respectively.

Companies are entitled to a deduction equal to 130% of expenses incurred for scholarships granted to students who are not older than 25 years of age.

Employers are entitled to a deduction equal to 150% of expenses incurred for training workers who are not older than 35 years of age in official training centres.

Industries of production and importation of sand

Exemption of custom duties and other custom charges are granted to companies on the importation of machines, equipments, accessories, and other materials that are incorporated or used in the production of sand, as well as materials related to the transportation and shipping of goods exclusively for the production and importation of

sand. Companies that perform activities related to extraction of sand in Cape Verde are not entitled to benefit of such incentives.

Transportation of passengers companies

Exemption on custom duties on the importation of new vehicles (bus) with the purpose of transportation of passengers is granted to companies engaged in the activity regarding the urban transportation of passengers.

Cargo transportation companies

The import of vehicles aged until five years is exempt from custom duties.

Healthcare and pharmaceuticals

The importation of raw materials, goods, and semi-finished goods to be incorporated in the production or sale of the national pharmaceutical industry are exempt from custom duties.

Media, telecommunications, and internet

Importation of good, materials, equipment, vehicles, and other equipment exclusively for the purpose of telecommunications and media are exempt from custom duties.

Bonds

Bonds listed on the stock market, which do not represent public debt, are taxed under a reduction IUR rate of 5%.

Withholding taxes

WHT of 15% is due on payments of interest and royalties made between resident companies.

Payments of services between resident companies are generally not subject to WHT.

Rental payments due by resident companies are, however, subject to WHT of 10%.

For a Cape Verde-based recipient, tax withheld is a payment on account against the final single income tax due.

Any non-Cape Verdean resident entity carrying out an economic activity in Cape Verde is subject to a final 20% WHT, applied on interest, royalties, rents, services, and fees. Note that the inclusion of payments for services to non-residents was explicitly added to the Cape Verdean tax law as part of the 2011 State Budget Law, retroactive to 1 January 2011. Prior to this, the Cape Verdean Tax Authorities considered that the payment for services to non-residents was subject to WHT even though this understanding did not fully adhere to the wording of the Cape Verdean tax law at the time.

Dividends are not subject to WHT, irrespective of the residence status of the recipient.

Tax treaties

The only tax treaty that Cape Verde has in force is with Portugal. Under the Cape Verde/Portugal tax treaty, WHT is limited as follows:

- Royalties: 10%.
- Interest: 10% (0% applies to interest paid by public bodies).

Cape Verde

Note that WHT on dividends under the Cape Verde/Portugal tax treaty is limited to 10%. However, dividends are currently not taxed in Cape Verde.

A new tax treaty was signed between Cape Verde and Macao, which is not yet in force.

Tax administration

Taxable period

As a general rule, the tax year is the calendar year. A different tax year may be applied, subject to authorisation from the Ministry of Finance, in the case of non-resident companies with a PE in Cape Verde and in other situations duly justified by economical reasons.

Tax returns

Taxpayers are required to file a tax return by 31 May of the year following the end of the tax year.

Payment of tax

Corporate taxpayers must make a prepayment of their income tax liability for the current tax year. The prepayment is calculated as 30% of the preceding tax year's income tax liability and should be paid by 20 January of the following year.

Taxpayers are required to self-assess the tax due by 31 May of the year following the end of the tax year.

The tax authorities will verify the tax return and raise a final assessment of tax liability by 20 July of the same year. The taxpayer must then pay the remaining tax due by 31 July.

Audit cycle

There are no specific rules regarding the tax audit cycle in Cape Verde.

Statute of limitations

The statute of limitations period in Cape Verde is for five years.

Topics of focus for tax authorities

The main topics of focus for Cape Verdean tax authorities regard cost incurred for assets considered of mixed use (e.g. vehicles, communications), personnel costs, management fees, and payments to non-residents.

C

Significant developments

Since the introduction on 1 January 2011 of the new tax system that replaced the corporate profit tax with a new real estate tax and a revenue tax, no further changes have been made.

Taxes on corporate income

Income from immovable property is subject to real estate tax. The real estate tax is levied based on the value of real estate. As is the case at present, the value is established for five years each time. The income is deemed to be 4% of the value of the real estate and the tax rate is 25%. Therefore, effectively 1% of the value is taxed.

Exemptions apply for the dwelling that serves as the principal residence, real estate with a value not exceeding 50,000 United States dollars (USD) (the '*kunuku*' house), and land that is being commercially operated for agricultural or forestry purposes.

A revenue tax is levied on the revenues from shares and profit-sharing certificates, as well as on distributions from foundations, special purpose funds, or a closed-end common fund. The rate of the revenue tax is 5%.

There are no other taxes on income or capital gains.

The revenue tax and the real estate tax only apply if certain requirements of residency have been met. A corporation that is established in the Caribbean Netherlands that does not meet certain criteria will, for the purpose of the revenue tax and the real estate tax, be deemed to be established in the Netherlands and will be taxed accordingly. That means that instead of revenue tax and real estate tax, the Dutch corporate income tax of 25.5% will apply, as well as the Dutch dividend tax of 15% (*see the Corporate residence section for more information*).

Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in the Caribbean Netherlands is considered to be a resident.

For the purposes of the revenue tax and the real estate tax, however, a resident corporation is deemed to be established in the Netherlands unless specific criteria have been met, the purpose of which is to guarantee commercial ties with the Caribbean Netherlands.

Caribbean Netherlands

An entity is deemed to be established in the Caribbean Netherlands, not the Netherlands, based on the following criteria:

- It has been admitted to a bonded warehouse for commerce and services, or
- It obtained a declaration from the Inspector of Taxes that one of the following conditions applies:
 - It is not active in financial services or insurance, turnover is not more than USD 80,000, and assets are not more than USD 200,000.
 - The assets usually consist of less than 50% of investments, participations, liquidities, and assets that are made available for use to persons outside the Caribbean Netherlands, as well as assets, directly or indirectly, used for financing persons outside the Caribbean Netherlands.
 - It usually provides permanent work to at least three persons living in the Caribbean Netherlands who engage independently in activities relating to the assets mentioned above and whose responsibility is in line with their job position, and it has, at its disposal, real estate situated in the Caribbean Netherlands for a period of at least 24 months with a value of at least USD 50,000 for the activities, and this real estate is used as an office with facilities that are customary in the financial sector.
- It holds, at a minimum, 95% of the shares of an entity as mentioned above.

Resident corporations that do not meet these criteria are deemed to be established in the Netherlands, which causes them to be subject to the Dutch corporate income and dividend withholding taxes (WHT). This does not apply to foundations, special purpose funds, or a closed-end common fund.

Other taxes

Sales tax

A general expenditure tax (*Algemene Bestedings Belasting* or ABB) has replaced the levy of import duties, as well as the former sales tax (*Omzetbelasting* or OB and *Belasting op Bedrijfsomzetten* or BBO), of the former Netherlands Antilles. The rate is 8% in Bonaire and 6% in Saba and St. Eustatius. The rate for insurances is 9% and 7%, respectively.

As of 1 October 2011, the rate for restaurants and bars is 6% and 4% respectively.

A rate of 25% applies to cars, unless it concerns a very low energy car, in which case the rate is 0%.

ABB is levied in respect of:

- Sale of goods by manufacturers.
- Delivery of services within the levy area.
- Import of goods.

Therefore, the sale of goods will only be subject to tax once, at the manufacturer or at the time of import. The sale of bread has been exempt. In addition, the supply of grain, potatoes, and rice will also be exempt. Other exemptions that apply, similar to the former OB and BBO legislation, are:

- Public transportation.
- Medical services and hospitals.
- Water and electricity.

- Fuels and other products, including supplies, for international transportation.
- Renting of houses.

Excise taxes

Excise tax is due on gasoline. On Bonaire, excise tax is also due on alcohol, with different tariffs for liquor, wine, and beer, as well as for tobacco. This does not apply to Saba and St. Eustatius.

The excise rates are:

- USD 41.86 per hectolitre of gasoline or approximately USD 1.60 per gallon on Bonaire (USD 1.30 on Saba and St. Eustatius).

Only on Bonaire:

- USD 67.04 per hectolitre of beer.
- USD 128.50 per hectolitre of wine.
- USD 12.85 per volume percent of alcohol per hectolitre of distilled products.
- USD 5.34 per 100 cigarettes.
- USD 9.78 per 100 cigars.
- USD 4.89 per 100 cigarillo's.
- USD 30 per kilogram of smoking tobacco.

Property taxes

There is an annual property tax of 0.3% on the value of real estate.

Transfer taxes

The transfer of immovable property on the islands of the Caribbean Netherlands is subject to a 5% transfer duty.

Stamp tax

No stamp tax is levied in the Caribbean Netherlands.

Branch income

Entities not established in the Caribbean Netherlands are only taxed on the fixed income of local real estate (i.e. 25% real estate tax on 4% of the value of the property the corporation owns in the Caribbean Netherlands). The revenue tax does not apply to the remittance of profits from the permanent establishment (PE) to the head office of the corporation. No other taxes are levied.

The criteria for deemed residency in the Caribbean Netherlands do not apply to PEs, except for a PE of a corporation that is a resident of Aruba, Curaçao, or St. Maarten. In cases where the activities of such a PE would not qualify for deemed residency in the Caribbean Netherlands if it had been a corporation, this PE is liable to taxation in the Netherlands.

Income determination

In the Caribbean Netherlands, there is a tax on the fixed income of local real estate (real estate tax) and on profits distributed to the shareholders (revenue tax). As long

Caribbean Netherlands

as income is not distributed, profits other than from real estate are not subjected to tax. Therefore, there are no regulations with regard to income determination.

Deductions

No deductions are allowed on the fixed income with regard to real estate tax or the distributions of profit for revenue tax purposes.

Group taxation

Distribution of profits to another corporation on one of the islands of the Caribbean Netherlands is exempt from revenue tax if the other corporation holds, at minimum, a 5% interest in the corporation that is making the distribution.

Tax credits and incentives

A corporation that has been designated as a bonded warehouse for commerce and services is exempt from ABB and excise tax. As a result, goods in transshipment remain tax free. However, if goods that have been admitted to a bonded warehouse are sold within the Caribbean Netherlands, this will be considered importing these goods and ABB and excise tax will be due.

Withholding taxes

A revenue tax of 5% is levied on distributions from corporations as well as distributions from foundations, special purpose funds, or a closed-end common fund.

Tax treaties

The Caribbean Netherlands currently has a tax treaty in effect with Norway. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. Furthermore, tax information exchange agreements (TIEAs) have been signed with several countries, including Australia, Canada, Denmark, Mexico, New Zealand, Spain, Sweden, and the United States. As a result, the Caribbean Netherlands, as part of the former Netherlands Antilles, has been moved to the white list of the Organisation for Economic Co-operation and Development (OECD) Global Forum.

Tax arrangement for the Kingdom of the Netherlands (TAK)

As part of the Kingdom of the Netherlands (TAK), the Caribbean Netherlands is party to a federal tax agreement with Aruba, Curaçao, and St. Maarten as well as a tax agreement for the Netherlands (TAN) with regard to the attribution of tax between the Netherlands and the Caribbean Netherlands. Subject to the TAK and the TAN, dividends, interest, and royalties paid to a company resident in the Caribbean Netherlands may qualify for reduced rates of WHTs in the subject countries or in the Netherlands.

Dutch dividend WHTs are 15% if the Caribbean Netherlands company owns less than 10% of the Dutch company. If the Caribbean Netherlands company's interest is 10% or more, Dutch WHT can be reduced to 0%. Aruban dividend tax will be reduced from the statutory rate of 10% to 5%. In the Caribbean Netherlands, the dividends will not be

taxed when they are received. However, at the time the dividends are distributed to the shareholder, they will be subject to the 5% revenue tax.

The TAN came into force on 1 January 2011. The TAK is to be revised. Negotiations have already started between Aruba and Curaçao each with the Netherlands. In the end, the existing TAK will then be replaced by separate tax agreements between two countries (e.g. between Aruba, Curaçao, and St. Maarten each with the Netherlands [and including the Caribbean Netherlands]). The aim is to have the new agreements in place in 2013.

Tax administration

Tax returns

Revenue tax returns must be filed and the amount due must be paid at the end of the quarter of the year in which the distribution has been made.

The real estate tax is levied by way of a tax assessment.

Payment of tax

Revenue tax must be paid at the time of filing and in a lump sum on the basis of the self-assessment.

The real estate tax must be paid within two months of the date of the tax assessment.

Statute of limitations

A reassessment can be imposed until five years after the tax year.

Significant developments

There have been no significant corporate tax developments in the Cayman Islands during the past year.

Taxes on corporate income

Corporate income, capital gains, payroll, or other direct taxes are not imposed on corporations in the Cayman Islands.

Corporate residence

Since no corporate income, capital gains, payroll, or other direct taxes are currently imposed on corporations in the Cayman Islands, corporate residency is not relevant in the context of Cayman Islands taxation.

Entities engaged in 'scheduled' trade and business in the Cayman Islands (as defined in the Trade & Business Licensing Law) are required to have a trade and business licence. Effecting and concluding contracts in the Cayman Islands and exercising, in the Cayman Islands, powers necessary for the carrying on of a business outside the Cayman Islands is generally not considered to be engaging in trade and business in the Cayman Islands.

Other taxes

Value-added tax (VAT)

There is no VAT imposed in the Cayman Islands.

Import duties

Import duty is paid, at various rates, on importation of most goods.

Excise taxes

There are no excise taxes in the Cayman Islands.

Property taxes

There are no property taxes in the Cayman Islands.

Stamp taxes

Stamp duty is paid, at various rates, on transfers of land/property and execution of certain documents.

Branch income

Branches are treated the same as other corporations doing business in the Cayman Islands.

Income determination

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, income determination is not relevant in the context of Cayman Islands taxation.

Deductions

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, deductions from income are not relevant in the context of Cayman Islands taxation.

Group taxation

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, group taxation is not relevant in the context of Cayman Islands taxation.

Tax credits and incentives

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, tax incentives are not relevant in the context of Cayman Islands taxation. However, Cayman entities carrying on business outside the Cayman Islands can register as 'exempted companies' (i.e. a company formed primarily to do business outside of the Cayman Islands and subject to certain requirements) and can apply under the Tax Concessions Law for an undertaking to be issued by the Governor-in-Council (i.e. the Cayman Islands government) exempting such company from any tax on profits, income, gains, or appreciation which might be introduced in the period of 20 years following the grant of such concessions. The concession is extendable for a further ten years after expiry. 'Exempted limited liability partnerships' (i.e. certain partnerships formed primarily to do business outside of the Cayman Islands) can apply under the Exempted Limited Partnership Law for a similar concession which is for 50 years (rather than 20 years).

Withholding taxes

Currently, no withholding taxes are imposed on dividends or payments of principal or interest.

Cayman Islands

Tax administration

No tax returns, forms, or procedures are required to be completed for tax compliance purposes in the Cayman Islands.

While there are no tax treaties, there are tax information exchange agreements (TIEAs) between the Cayman Islands and a number of countries. Please refer to the Cayman Islands Tax Information Authority's website (<http://www.tia.gov.ky/html/assistance.htm>) for the latest list.

The Cayman Islands agreed with the United Kingdom government to implement the Savings Directive, and so the Reporting of Savings Income Information (European Union or EU) Law (2007 Revision) came into force, setting out a reporting regime whereby Cayman paying agents making interest payments to individuals who are tax resident in a EU member state may have to report interest paid. The Cayman Tax Information Authority receives or facilitates submission of such information reporting.

C

Significant developments

There have been no significant corporate tax developments in Chad during the past year.

Taxes on corporate income

The profits subject to the company tax are determined with sole regard to profits earned by businesses carried out or transactions conducted in Chad.

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Chad. As income from other countries is not liable to tax, foreign charges and losses are not deductible either.

The corporate tax rate in Chad is 40%.

Minimum tax

There is a minimum tax of 1.5% based on the turnover and an additional 1 million Central African CFA francs (XAF) as the minimum/floor rate.

Corporate residence

Registered entities (i.e. companies, branches, and subsidiaries) conducting economic activities in Chad are liable to pay corporate tax. Specifically:

- Limited companies.
- Limited partnership with shares.
- Limited liability companies.
- Cooperative societies and their unions.
- Public institutions.
- Agencies of the state with financial autonomy.
- Municipal bodies and any other legal entity engaged in an operation for gain.
- Real estate companies, regardless of their form.
- Civil companies, other than real estate companies, involved in industrial, commercial, or agricultural activities.
- The limited partnerships, on the share of profits relating to the rights of sponsors.
- Associations in participation, including financial syndicates, on the share of profits relating to the rights of sponsors.

Chad

- Co-owners of ships companies, on the share of profits relating to the rights of sponsors of associated co-owners other than those with unlimited liability or whose names and addresses are not listed with the administration.

Other taxes

Valued-added tax (VAT)

The standard VAT in Chad is 18%.

An operation performed in Chad which constitutes an economic activity and for which payment is made, unless included in the list of exemptions in the law governing VAT, is liable for VAT, even if the residence of the natural person or the registered office of the legal entity is located outside Chad.

The VAT law provides a list of transactions exempted from VAT that includes the following:

- Sales of products that are directly made by farmers, cattle farmers, or fishermen to consumers, farming, and fishing operations.
- Imports, operations, and sales of newspapers and periodicals, other than the advertising revenues.
- Exports and related international transportation.

There are no specific rules relating to refunds to non-residents.

There are no refunds of the excess in practice. If the amount paid exceeds the VAT payable, the credit can be offset against the VAT payable until the end of the second financial year following the birth of this credit. After that, it becomes a loss, which is deductible under corporate tax.

Customs duties

The tax base of customs duties corresponds with the customs valuation, namely the selling price of the goods plus cost of delivery to Chad (costs of insurance, transportation, etc.).

The rates of customs duties depend on the nature of the goods and range from 5% to 30%. These rates can be summarised as follows:

- Goods of first need (basic necessities): 5%.
- Raw materials and goods of equipment: 10%.
- Intermediate and miscellaneous goods: 20%.
- Consumer goods: 30%.

Excise duty

Excise duty applies to goods of great consumption: cigarettes, drinks (water, beers and wines), cosmetics, and luxury products. Excise duty rates depend on the nature of the goods and range from 5% to 25% of the value of the good.

This value differs depending on the origin of the good. If the good has been manufactured in the Economic and Monetary Community of Central Africa (CEMAC) zone, the value corresponds with the selling price charged by the manufacturer. If the good is imported into the CEMAC zone, the value is the sum of the freight value plus insurance costs and custom duties.

The rates are as follows:

- Water: 5%.
- Beer under 6.5% alcohol: 15%.
- Tobacco, perfume, jewelry, electronic devices (except computers and telephones etc.), private vehicle with an engine capacity above 1600 cm³, and weapons: 20%.
- Other alcoholic drinks: 25%.

Real property tax

The annual real property tax differs according to whether it is a built or an unbuilt property and whether it is located in N'Djamena or elsewhere.

The tax rate on built property is 10% in N'Djamena and 8% elsewhere.

The tax rate on unbuilt property is 21% in N'Djamena and 20% elsewhere.

The calculation base is the potential revenue of that property. The potential revenues correspond to 4/5 of the rental value, the rental value being 10% of the market value. For rural unbuilt property, the market value is fixed to XAF 50,000 per hectare.

Accommodation tax

The person occupying a building (owner or tenant) has to pay the following amount as accommodation tax annually:

Type of construction	N'Djamena (XAF)	Elsewhere (XAF)
For constructions in local material	3,000	1,500
For hard or semi-hard constructions	10,000	5,000
For R+ hard constructions	10,000 and a supplement of 10,000 per level	5,000 and a supplement of 5,000 per level

Transfer tax

Fixed or proportional transfer duties must be paid on the transfer of ownership of estates, personal property, and real property. Transfer duties are also due on contributions to companies and divisions of property.

Stamp duties

Stamp duties must be paid on each civil or judicial document intended to be used as evidence. Stamp duty is generally XAF 1,000 per page.

There is no stamp duty greater than XAF 2,000 or less than XAF 900, whatever the size of the paper.

Registration duty

The registration duty applies to certain deeds listed by the general tax code. The assessment basis depends on the nature of transactions, and the rate varies from 1% to 15%.

Business licence tax

Any natural person or corporate body carrying on a trade, industry, or profession in Chad shall be liable to a business licence tax. The business licence tax is paid annually and is assessed as follows:

Chad

- A determined duty based on 0.1% of the first XAF 2 billion of turnover; above that, only 1/10 of the turnover is taxed.
- 10% of the rental value of the premises.
- 10% of the determined duty for the Social Security Fund.
- 7% of the determined duty for the consular commercial chamber.
- XAF 480 per year for the rural intervention fund.
- 10% of the annual rental value of business premises.

For a new company, the determined duty is calculated based on the projected turnover estimated by the taxpayer as compared to similar activities or those achieved during the first 12 months of activity.

The business licence tax is due 31 December of the tax year.

Capital gains and dividends tax

Capital gains and dividends are taxed at 20%.

Social security contributions

The monthly contribution to Chad's Social Security Fund is 16.5% of total salaries for the employer (upper limit: XAF 82,500 per month) and 3.5% for the employee (upper limit: XAF 17,500 per month), withheld by the employer.

Payroll tax

Employers in Chad are required to make monthly contributions of 7.5% of the total amount of salaries and fringe benefits paid to permanent employees.

Apprenticeship tax

Employers in Chad are required to make monthly contributions of 1.2% of the total amount of salaries and fringe benefits of their employees (permanent and temporary) to the National Professional Training Fund (FONAP).

Branch income

In Chad, there is a presumption of distribution of profits realised by branches. These profits are deemed distributed to their headquarters and are therefore subject to tax on income from capital gains at the rate of 20%.

However, this presumption of distribution is simple. Branches can provide evidence that the profits they have made have not actually been transferred but remained in the accounts of the branch.

Income determination

Inventory valuation

Stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

Capital gains

Capital gains are taxed at 20%.

Dividend income

Dividends are taxed at 20%.

Interest income

The interest paid to associates or shareholders in respect of sums paid by them in the social fund in addition to their share of capital are taxable within the limit of those calculated at the advance rate of the bank of emission and increased by two points.

Foreign income

Income from other countries is not liable to tax in Chad.

Deductions

Expenses are deductible under the following conditions:

- They must lead to a reduction of the assets.
- They must be incurred in the interest of the enterprise.
- They must be regularly included in the accounts of the entity and justified by receipts.
- They must be related to the present fiscal year or a former fiscal year.
- They must not be considered as non-deductible by the law.

Depreciation

According to accountancy principles, depreciation is calculated based on the probable length of use of the asset. The straight-line system of depreciation is applicable, and rates vary according to the nature of the business activity concerned and the normal useful life of the assets involved.

From an accountancy point of view, it is possible to depreciate whatever amount seems corresponding to the above mentioned principles. However, from a tax point of view, depreciation (i.e. enabling a deduction of the depreciated amount from the taxable income) is only possible under one condition and within certain limits.

Deduction of depreciation is only possible under the condition that the depreciation has been entered into the statement of accounts. Therefore, only a legal entity in Chad owning the assets is able to depreciate its assets.

In addition, a 1997 order sets a yearly limit of depreciation. As a consequence, if depreciation in the statement of accounts is higher than the depreciation authorized, the difference is not deductible and has to be reinstated in the taxable income.

The starting point for depreciation is the day of first use. If this date is not the first day of the financial year, the first year's depreciation is reduced pro-rata.

It should be noted that, despite the above, goods that are leased are depreciated at the rate that they are paid for.

Depreciation of goods that are made available for free to managers and supervisors of the business are deductible if the corresponding benefit in kind is declared.

The sum of depreciation applied to the acquisition or creation of an asset cannot, at the end of each financial year, be less than the amount of depreciation calculated on the linear system and spread out over the normal usage period.

Depreciation in loss-making years may be carried forward to the first profitable financial year, and to subsequent years if necessary.

Chad

Goodwill

There are no provisions for goodwill.

Start-up expenses

There are no provisions for start-up expenses.

Interest expenses

Interests paid for the depositing of funds by a shareholder are deductible within the base rate of the Central Bank plus two points, calculated on the basis of the share capital.

Bad debt

Provisions for credit customers are deductible once they meet the conditions for deductible expenses mentioned above.

Charitable contributions

Donations and liberalities are deductible within a 0.5% limit of the annual turnover, net of tax, when they are duly justified. However, a decision from the Minister of Finances is required.

Fines and penalties

Tax and customs penalties are not deductible.

Taxes

Income taxes are not deductible.

Other significant items

The following expenses are not deductible:

- Provisions for laying off employees.
- Provisions for self insurance.
- Insurance premiums paid for a third-party.

The following expenses are not fully deductible:

- Foreign social security contributions are deductible only within 15% of the base salary of the expatriates when related to a compulsory retirement plan. Nonetheless, Chad's social security contributions are fully deductible.
- Restaurants, hotels, receptions, and related costs are deductible within a 0.5% limit of the turnover, net of tax.
- Travel expenses for expatriates and their families for vacation are deductible, limited to one trip per year.

Net operating losses

Losses arising from normal business activities of the company are deductible and may be carried forward for up to three years.

Carryback of losses is not permitted.

Payments to foreign affiliates

There is a specific regulation relating to head office and foreign technical assistance costs that are subject to a 10% limitation of deductibility.

The scope of the 10% limitation covers study expenses, technical assistance, and other expenses, including commercial and industrial royalties, paid to the head office of an enterprise established outside Chad and outside the CEMAC zone.

Duly justified, these costs are only deductible within 10% of the intermediary fiscal profit (accounting profits plus non-allowable charges/costs) prior to their deduction.

Group taxation

There is a specific taxation of groups within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 25% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company that undertakes to retain them for at least two consecutive years in registered form.

Transfer pricing

The Tax Code acknowledges that dependant or controlled companies may transfer benefits indirectly to their company abroad if it is dependant of or to the company abroad it is controlled by.

In order to calculate the real benefit, the indirectly transferred benefits (by means of increase of purchase price or decrease of sales price to the controlling company or by any other means) are incorporated into the result established by the accounts.

If the tax administration does not have enough precise elements to determine the benefit, it will establish the taxable benefit by way of comparison to companies normally operated in Chad.

The Tax Code provides further, in accordance with CEMAC regulation, that interest paid to shareholders on sums that they lend over and above their share capital is deductible at the rate for loans allowed by the central bank increased by two percentage points. This deduction is only possible if the amounts lent do not exceed 50% of the share capital.

Thin capitalisation

Chad applies Organisation for the Harmonization of Business Law in Africa (OHADA) regulations with regards to thin capitalisation rules.

In cases where the equity capital gets, due to the recorded losses in the summarising financial statement, below 50% of the share capital, a shareholder consultation has to

Chad

be organised within four months to decide upon a potential anticipated dissolution of the company.

If the dissolution is excluded, the company has to reconstitute its equity capital up until it equals 50% of the share capital within the two years following the date of the end of the loss-making financial year.

Otherwise, provided it stays above the legally required share capital minimum, the company has to reduce its share capital of an amount at least equal to the losses that it has not been able to charge against reserves.

In cases where no decision has been taken regarding dissolution, any interested person may claim dissolution of the company in front of a court. Any interested person is allowed to bring a legal action if the reconstitution of the equity capital has not taken place within the legal timeline.

This action ceases to exist the day the cause for dissolution ceases to exist or if the court has ruled on the grounds.

Tax credits and incentives

Chad does not offer any tax incentives.

Withholding taxes

Withholding tax (WHT) on commerce of retail goods

A 4% WHT rate applies to natural persons and legal entities that purchase or sell wholesale or retail goods. This WHT also applies to imports.

According to the 2004 Finance Act, companies with more than one shareholder that regularly pay their taxes may apply for a suspension of payment of WHT (renewable every three months).

WHT on capital gains

WHT on capital gains is 20% and applies to residents and non-residents.

WHT on income of non-residents

WHT on income of non-residents is 25%. It applies to income of any legal or natural person that is not resident in Chad.

WHT on personal income

The employer withholds tax on personal income every month.

WHT on income from public procurement contracts financed from outside of the country and income from petroleum projects.

Chad's lowest WHT rate on income is of 12.5%. It applies in either of the following two cases:

- On income of agents, consultancy firms, and corporations executing a contract within the framework of public procurement contracts financed from outside of the country.
- On income of companies working within the petroleum projects.

WHT on interests of bonds, certificates, and notes

Bonds and notes are subject to a WHT of 20% of the interests for registered bonds and 30% of the interests for bearer participation certificates.

WHT on rent

WHT on rent is 15% for residents and 20% for non-residents.

Tax treaties

Chad has one tax treaty with the member states of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad, and Central African Republic).

Tax administration**Tax returns**

Corporate tax returns are due on 15 April.

Payment of tax

Certain taxes are considered instalment payments of corporate tax. Once the amount of corporate tax is known, these payments are deductible from the amount and only the balance has to be paid. These taxes include the minimum corporate tax, the quarterly instalment payments, and the 4% discharge for retail goods, if applicable.

Minimum corporate tax (monthly)

The minimum corporate tax payment must be made prior to the 15th day of the month following the month of achievement of the turnover. However, for the payment of the floor rate, payment may be made in four installments of XAF 250,000 each, 15 days after the end of the quarter.

If this instalment payment exceeds the annual corporate tax, the remainder is lost.

One third instalment payments (paid three times quarterly)

Corporations which fulfil the following conditions are subject to quarterly instalment payments:

- Liable to corporate tax.
- Made a profit during the prior fiscal year.
- The amount of the corporate tax of the prior fiscal year is superior to at least XAF 100,000.

The quarterly instalment payments are equal to one-third of the difference between the corporate tax due during the prior fiscal year and the minimum income tax paid during the same period.

The payment must take place before the 10th day of April, July, and October.

Audit cycle

The tax audit exercise of the *Direction Générale des Impôts* (Directorate General of Taxes), Chad is completed in the following manner:

Tax officials having at least the rank of an inspector and with their professional card and a copy of the audit notice perform spot checks on the accounting documents that taxpayers are required to submit.

Chad

Accounts are audited at the head office of the enterprise or at the place of its main establishment. Where this is not possible in either of these two places, the taxpayer must expressly request that it be conducted either in the accountant's office or in the offices of the tax authority.

The operations include confronting the accounts presented with certain facts or material to control the accuracy of returns filed and to proceed, where necessary, to the establishment of the taxes and the taxes evaded.

At least eight days before the date of the first intervention, the taxation administration shall send to the taxpayer a verification notice by personally delivered registered mail with acknowledgement of receipt or discharge slip to inform the taxpayer of the date of the first intervention and the possibility of getting a tax consultant of the taxpayer's choice to assist the taxpayer. It must, under pain of rejection, be mentioned in the verification notice.

In case of postponement of the original date of the first intervention, on the initiative of the administration, the tax authorities must imperatively send the taxpayer a notice of correction.

The taxpayer may also request a postponement of control by writing, giving reasons for his request within 48 hours of receipt of the notice. This report must be expressly accepted by the administration.

The administration may conduct unannounced inspections; it then sends an audit notice personally to the taxpayer, who acknowledges receipt, at the first intervention.

Where the notice bears no indication as to the taxes, duties, or years or periods of assessment, the items to be audited shall be all the taxes owed by the taxpayer for the period still due for payment. In such case, the audit is called a 'general audit'.

However, where it is specified in the audit notice, the administration may limit the scope of the audit to one or more taxes due on all or part of the period still due for payment or on a group of operations over a period less than one fiscal year, in which case a spot check is done.

The verification can, nevertheless, go up to one or more years beyond the prescribed period when these exercises are in deficit, as long as the deficits made under a year are carried forward and are deducted from the profits of the non-specified first year which constitute charges.

The verification can also go up to one or more years beyond the prescribed period when these exercises show a tax credit of a VAT carried over the first statement of the non-barred period.

Where the tax service intends to extend the audit to a period or a tax that is not indicated on the initial audit notice, it shall forward another notice following the same manner and deadline laid down in Article R. 13 et seq. of this Book, indicating the new period or new tax to be audited.

Where the accounts auditing or adjustment procedure require special technical knowledge, the tax authority may hire the consultants appearing on a list drawn up by Order of the Minister of Economic and Finance. Such consultants shall be professionally liable in case of damage resulting from their work.

When the accounts are kept using computerised systems, the tax administration is empowered to require, in accordance with Article L 18 above, the technical advice from experts for carrying out tests on the hardware that hosts the operation and to check:

- the accounting operating system
- all information, data, and processes that contribute directly or indirectly in the formation of accounting or tax results and the elaboration of documents mandated by the General Tax Code, and
- the documentation, relating to analysis, programming, and the execution of processing.

The civil and military authorities lend support and assistance to Tax Officers for the exercise of their functions, whenever they are needed.

Statute of limitations

According to Article R. 33 of the General Tax Code of Chad:

“The total or partial omissions found in the tax base, the inadequacies and inaccuracies, or the taxation errors, can be repaired by the tax administration until the end of the third year following that in which the tax or fee is payable.

Furthermore, any omission or insufficiency of tax revealed by a proceeding before the criminal courts or by a contentious claim may, without prejudice to the general period of repetitions established above, be repaired until the end of the third year following the revelation of the facts.”

Topics of focus for tax authorities

Topics of focus for tax authorities include the following:

- Obligation to file a return.
- The verification of the return filed.
- Taxation of office/Arbitrary Assessment.
- The right of access to taxpayers' documents.
- Obligation to pay tax.
- Procedure for the abuse of control.
- Limiting the right of control.
- Tax collection procedure.
- Prosecution measures.

Significant developments

First Category tax

For income received or accrued during calendar year 2012, the First Category tax (i.e. corporate income tax) rate decreased from 20% to 18.5%. Income received or accrued during calendar year 2013 and subsequent years will be subject to a 17% tax. The monthly income tax prepayments must be adjusted accordingly.

Derivative instruments

On 22 October 2011, the tax treatment of derivatives instruments was published in the Official Gazette Law N°20.544. Among others, the most significant amendments include:

- Income borne by derivatives instruments is treated as Chilean-sourced income when perceived or accrued by a Chilean resident or when they settled by the delivery of shares or quotas of a Chilean company.
- The distinction between derivative instruments agreed for hedging and speculation purposes is eliminated. This was relevant for withholding tax (WHT) and also for deductibility purposes.
- As a general rule, profits and losses should be recognised on a cash basis. The taxpayers carrying full accounting records should recognise them on an accrual basis considering the difference between the fair value of the underlying at the moment of the acquisition of the derivative and the fair value at year end.

Mine closure plans

On 11 November 2011, a special tax treatment regarding Mine Closure Plans was published in the Official Gazette Law N°20.551. In this regard, the Law makes reference to the tax treatment of the disbursements incurred during the closure process. This Law provides that they can be deducted from taxable income as an expense but only in the last third of the mine's useful life and limited only to the amount of the compliance guarantee (required of any mining project, in order to guarantee the compliance of the mine closure obligations).

Regarding the value-added tax (VAT) borne in the acquisition of goods or provision of services in order to execute the Mine Closure Plan, the Law establishes that the mining companies that have ceased on their activities and thus are not able to offset the VAT credit borne on the execution of the Mine Closure Plan against VAT debit or to obtain its refund through the exporter's VAT refund mechanism are able to obtain a refund of this VAT credit.

Finally, it is necessary to point out that these new regulations are not in force until 11 November 2012.

Research and development (R&D) improvement

Among other modifications, the most significant R&D improvements include:

- Extension of the benefit to intramural tax incentives, encouraging the investment on R&D performed by companies through internal capacities. The former Law only allowed tax benefits on contributions to extramural R&D contributions.
- The maximum cap on the amount of the tax credit was increased from UTM 5,000 to UTM 15,000 (approximately 1,200,000 United States dollars [USD]), and also removing the threshold with respect to the taxpayer's gross taxable income.
- The restriction of the tax benefits regarding related parties was eliminated.
- As established in the former Law, CORFO is the public authority in charge of the R&D projects certification. This certification is needed in order to use the tax benefits settled in this Law. However, Law N°20.570 introduces an important modification, allowing contributors to use part of the tax benefits even before they applied for CORFO's certification. In this case, 65% of the expenses incurred by the R&D project can be deducted immediately. Moreover, once the CORFO's certificate is issued, the contributor is allowed to use the complete tax benefit, even for the period prior to the certificate's issue, amending its previous tax returns.
- The tax benefits of R&D investments are extended from the original 31 December 2017 deadline to 31 December 2025.

Finally, it is necessary to point out that this new regulation will become enforceable six months after its publication in the Official Gazette.

Taxes on corporate income

First Category tax

The basic tax on income of a Chilean legal entity domiciled or resident in Chile and engaged in commerce, mining, fishing, or industry is the First Category tax, which is assessed at a rate of 18.5% on the entity's worldwide income during calendar year 2012. Prior to 2012, the rate was 20%. Income received or accrued during calendar year 2013 and subsequent years will be subject to a 17% tax.

Non-domiciled and non-resident shareholders and partners are subject to an 'additional' WHT of 35% on their Chilean-source distributions or remittances, with a credit granted for the First Category tax paid on the underlying profits. This results in an effective tax rate of 35%.

Local income taxes

Chilean legislation does not establish any local income taxes.

Corporate residence

Companies incorporated in Chile are considered to be domiciled in the country.

Permanent establishment (PE)

An entity may be considered as a PE under double taxation treaty (DTT) terms but not under the local legislation. In this case, in principle, the correspondent WHT should apply over the gross basis of the remittance.

However, Chilean Internal Revenue Service (IRS) rulings have interpreted the relation between the two different PE concepts in the sense that, notwithstanding the local

Chile

requirements are not met, the taxpayer can choose to be treated as a local PE in order to be allowed to deduct the expenses that are incurred for the purpose of the PE.

Other taxes

Value-added tax (VAT)

VAT is payable on transfers and services at a rate of 19%. In general terms, this tax is levied over the price of the following goods and services:

- Sales and other contracts used to transfer ownership of tangible goods, or real estate owned by a construction company, provided that said operations are customary. The law assumes that all sales made within the ordinary course of business are customary.
- Services that are commercial, industrial, or financial, or that are connected to mining, construction, insurance, advertising, data processing, and other commercial operations.
- Imports, customary or not.

Normally, the sale of fixed assets is not subject to VAT, unless the assets are sold before the end of their useful lives or within four years from the date of acquisition. The sale of immovable property as fixed assets is subject to VAT only when the sale takes place within 12 months from the date of acquisition.

VAT works on a credit-debit system. The tax borne by a company or business in the acquisition of goods or services is called the 'VAT credit'. The VAT charged on the goods and services sold to customers is called the 'VAT debit'. As a general rule, the seller or service provider is obligated to withhold and pay the VAT. The tax amount is added to the invoice for goods or services, as the final consumer is the economic taxpayer.

Exceptionally, when a seller or service provider is not domiciled in Chile or when, for other reasons, it is difficult for the IRS to supervise the correct payment of VAT, the responsibility to withhold and pay the tax is transferred to the buyer or beneficiary of the service.

The tax is paid every month by deducting the VAT credit from the VAT debit. The balance due to tax authorities (when the debit is larger than the credit) must be paid no later than the 12th of the following month.

If on a given month the VAT credit is larger than the VAT debit, the balance may be kept and carried forward in the following months.

Custom duties

The rate of custom duty is, in general, 6%.

Chile has an extended network of Free Trade Agreements (e.g. with China, United States, Mexico, Japan, European Union, Canada, Panama, Central America, and South Korea). Therefore, reduced or non-existing customs duties rates are available.

Duties on goods are imposed on the cost, insurance, and freight (CIF) price, without deducting special discounts.

In general, Chile has a very open economy and there are no significant barriers to foreign trade.

Excise taxes

Alcoholic and non-alcoholic beverages and certain luxury items, such as jewels, are subject to additional sales taxes ranging from 13% to 50%.

A variable gasoline tax is also levied on the difference between a fixed amount and the sales price of gasoline and diesel oil.

Real Estate Tax

Real Estate Tax is levied over an official valuation of real estate at an annual rate of 1.2% in case of non-farming real estate, and 1% for farming real estate. Some real estate is exempt from this tax.

For purposes of financing the plan for reconstruction of the country after the 2010 earthquake, a temporary increase in the Real Estate Tax rate of 0.275% per year was enacted for non-farming real estate with an official valuation equal to or superior to 96 million Chilean pesos (CLP) (approximately USD 205,000) during 2011 and 2012.

Transfer taxes

Currently, Chilean regulations do not state that there are any transfer taxes.

Stamp tax

Stamp tax is payable mainly on documents that evidence money lending operations, and its rate varies depending on the document being executed.

The maximum stamp tax rate is 0.6%.

Branch income

Branches of foreign corporations that are operating in Chile are taxed on their Chilean-source income. Branches are subject to the First Category tax, which is assessed at a rate of 18.5%.

Branches are also subject to a 35% 'additional' tax on amounts remitted or withdrawn during a given calendar year, less a credit for the First Category tax paid, which is payable in April of the year following the distribution. Thus, the tax burden for a branch is 35%.

Income determination

For purposes of the First Category tax, as a general rule, corporate revenue must be determined on an accrual basis.

Inventory valuation

Inventories must be valued in accordance with monetary correction provisions, basically by adjusting raw material content and direct labour to replacement cost (which is generally the most recent cost), but excluding indirect costs. No conformity is required between book and tax reporting for income determination. Last in first out (LIFO) is not allowed.

Chile

Capital gains

Capital gains are subject to normal taxation unless special provisions, such as those pertaining to gains on the sale of shares or monetary correction on capital repayments, establish exemptions.

Under domestic laws, in certain circumstances, the capital gains derived from the following securities will be subject to a preferential tax treatment:

- Stock of listed local companies.
- Investment fund quotas, listed on an authorised stock exchange.
- Mutual funds quotas, if the fund invests in stock trade values.
- Investment funds quotas with no stock exchange participation or mutual funds, where at least a 90% of the investment portfolio is in a stock market.

Dividend income

Dividends received from Chilean corporations are exempt from the First Category tax.

Stock dividends

Stock dividends are not taxed.

Foreign income

Resident corporations are subject to taxes on their worldwide income. In general, foreign income and dividends received by a domestic corporation are subject to Chilean taxation in the financial year when received (i.e. on a cash basis). A tax credit for taxes paid abroad is granted, subject to the regulations of the Income Tax Law.

Branches of foreign corporations are taxed on their income without regard to the results of the head office.

Deductions

Net taxable income of a taxpayer is arrived at by deducting from gross income the expenses incurred to generate the income that have not been already deducted from gross revenue as costs.

As a general rule, expenses are not deductible for income tax purpose if they are not incurred to generate taxable income.

Depreciation and depletion

Depreciation rates are calculated based on the estimated useful life of the assets. The normal periods of depreciation for new assets under normal conditions are as follows: heavy machinery, 15 years; trucks, seven years; factory buildings, in general, 20 years to 40 years. At the request of the Foreign Investment Committee or the taxpayer, the IRS may reduce the normal useful life.

Annual depreciation is taken by the straight-line method. However, taxpayers may recover capitalised costs by using the accelerated depreciation method for up to one third of the normal useful life with respect to new or imported fixed assets, provided that the normal period of depreciation is at least three years.

Accelerated depreciation may be used only to reduce the taxable basis of the First Category tax. For the purpose of the tax applicable to distributions of dividends, accelerated depreciation is not considered.

No conformity is required between book and tax depreciation.

For tax purposes, depletion for natural mineral resources is allowed on a unit-of-production basis.

Goodwill

The amortisation of tax goodwill is not regulated by Law but only in the context of IRS interpretations. In this sense, goodwill should be allocated proportionately among the non-monetary assets of the absorbed entity.

Keep in mind that under current Chilean IRS interpretations, there is no threshold with respect to the goodwill amount to be allocated among the absorbed entity non-monetary assets.

Provided there are no non-monetary assets in the absorbed entity, goodwill will be considered as an intangible that can be amortised as a necessary expense in a period of up to six years.

Start-up expenses

Start-up expenses must be capitalised and be considered as an asset for tax purposes. They can be amortised over a six year period counted from the year when they were incurred or starting from commercial exploitation.

Furthermore, they are usually deducted when the income is generated.

Interest expenses

As long as the interest paid complies with the general requirements set forth by the Law, interest expenses can be deducted.

Bad debt

In general, bad debts are deductible only if they are a consequence of operations related to the business purpose, if they have been opportunely written off into accounting, and the company has prudentially exhausted all reasonable means to collect them.

Determination of whether the company has prudentially exhausted all reasonable means to collect the bad debts varies according to the total amount of the debts. Therefore, a simple estimation or general provision for bad debts is not allowable.

Charitable contributions

Charitable contributions may be deducted provided they are made to the institutions named by varied Laws (i.e. primary and secondary educational institutions; universities, professional or technical educational institutions, National Fire Brigade, National Solidarity Fund, etc.).

In case of charitable contribution, the total annual tax deduction for this purpose is limited. The deductible amount for this purpose may not exceed 5% of the company's net taxable income.

Fines and penalties

Fines and penalties imposed for breaking the law or a contract are not deductible, although a deduction is usually available for legal cost incurred in defending such an action.

Chile

Taxes

Taxes imposed by Chilean laws are deductible, provided they are related to the normal activities of the company. However, income taxes and special contributions for promotion or improvement are not deductible.

Net operating losses

An indefinite carryforward of losses is allowed. Consistent with monetary correction, losses are carried forward, adjusted by a cost-of-living increase. No carrybacks are allowed, except in a case where a taxpayer has retained tax profits and has a subsequent tax loss.

Payments to foreign affiliates

The deductibility of payments made abroad for the use of trademarks, patents, formulas, and consulting and similar services is limited to a maximum of 4% of the income derived from sales and services in the corresponding year, unless the royalty is subject to income tax of greater than 30% in the country of the beneficiary.

Transfer pricing regulations are in line with general Organisation for Economic Co-operation and Development (OECD) principles.

Group taxation

Consolidated returns are not allowed in Chile.

Transfer pricing

Special provisions of the Income Tax Law regulate the prices charged between related companies located in Chile and companies located in other jurisdictions.

The rules contained in the Income Tax Law on transfer pricing matters apply to both operations between a branch and its head office, and operations between a foreign company and a Chilean company in which the former participates (directly or indirectly) in the conduction, control, or capital.

These rules allow the IRS to challenge the prices paid by the Chilean company branch to its head office or to a foreign related company when the prices agreed are not adjusted to those applicable in operations between unrelated parties.

In order to contest the prices, the IRS may take into account a reasonable profit, bearing in mind the characteristics of the operation, or else the production costs plus a reasonable profit margin.

The same rules will apply with regard to prices paid or owed for goods or services provided by the head office, or by any of its branches or related companies, when those prices are not adjusted to the normal market prices charged in operations between non-related parties.

If the branch (or the local company) only has operations with related companies, the IRS will be allowed to challenge those prices taking into consideration the values of the respective goods or services in the international market.

Although domestic legislation regulating transfer pricing aspects of related-party transactions is broad and general, the fact that Chile became an OECD member in 2010 has been of great relevance from a tax perspective in the Chilean local market.

The IRS has made public its intention to ensure its assessment policies and general practices are adequate and consistent with international OECD approaches to corporate restructuring, general tax planning, and in particular transfer pricing.

To date, new transfer pricing legislation has not been approved in Chile. However, based on public communications made by key tax officials in the local media, a new tax bill is due to be tabled before the parliament, and it is expected that this bill will introduce the main principles and pricing methodologies established by the OECD Guidelines.

Thin capitalisation

Thin capitalisation rules apply in case of related party loans at a 3:1 debt-to-equity ratio. In this regard, the total annual amount of such loans is deemed to exceed the 3:1 ratio if the monthly average value of the sum of all related party loans and financial liabilities that the debtor has at the end of the taxable year in which the loan was granted exceeds three times the debtor's adjusted tax equity.

Tax credits and incentives

Foreign tax credit

In order to avoid double taxation, the Chilean Tax Law recognises a tax credit mechanism in which the tax effectively paid abroad may be deducted from the taxes to be paid in Chile.

In order to regulate this matter, the Chilean Tax Law distinguishes between those countries with which there is a DTT in force with Chile and those that do not have a DTT in force with Chile.

Investment incentives

The principal investment incentives are the following:

- Tax benefits and other incentives for companies operating in the northernmost and southernmost parts of the country.
- Tax benefits to forestry companies, contracts for oil operation, and nuclear material operations.

Inbound investment incentives

The principal incentives to encourage foreign capital contributions are statutory guarantees covering the repatriation of capital, remittance of profits, non-discrimination toward foreign investment, and access to the foreign exchange market for remittance purposes. In general, foreign investors are subject to the same legislation as national investors. A guaranteed income tax rate of 42% may be granted for ten years or, provided the capital investment project exceeds USD 50 million, 20 years for the development of industrial or extractive projects.

The overall rate is comprised of the corporate tax on profits and WHT on dividend or branch profit distributions. The tax rate on dividend or profit distributions is the difference between 42% and the underlying tax paid at a corporate level. The option to be subject to an overall effective tax rate of 42% without change for ten or 20 years is usually not exercised by foreign investors, because the current combined effective tax rate on profits and dividend distribution is 35% under the general tax regime.

Chile

Under the Foreign Investment Contract, a foreign investor may petition for tax stability with respect to VAT and customs duty regimes. With respect to customs duties, however, stability is granted only for the importation of certain machinery and equipment not available in Chile.

Export incentives

The principal incentives for exports can be summarised as follows:

- Taxes paid in the importation or acquisitions of goods required in the export activity are reimbursed.
- VAT on exports is zero-rated.
- Chile has signed free-trade agreements with Australia, Bolivia, Canada, Central America (i.e. Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua), China, Colombia, the European Union (EU), Mexico, Panama, Peru, Republic of South Korea, Turkey, and the United States. All these agreements provide for reduced customs duties.

Withholding taxes

Dividends paid to a non-resident recipient are subject to a 35% withholding of 'additional' tax, with a credit available that is equivalent to the income tax effectively paid at the corporate level, corresponding with the First Category tax paid by the corporation. This credit is added to the amount that is distributed to form the taxable base for the 'additional' tax. Consequently, the tax burden for a non-resident recipient of dividends, including taxes at the company level, is 35%. Branches are subject to a 35% 'additional' tax on amounts remitted or withdrawn, less the First Category tax credit. *See the Branch income section for more information.*

In the case of a foreign investor that has applied for the 42% tax invariability, the effective tax burden is also 42%.

Interest paid to non-residents is subject to additional WHT at a general 35% rate. Interest on loans granted by foreign banking or financial institutions is subject to a sole 4% additional WHT. Thin capitalisation rules requesting a 3:1 debt-to-equity ratio become applicable when the debt generating interest subject to the 4% rate is secured by related entities.

Royalties paid to non-residents are subject to additional WHT at a 30% rate. Royalty payments in connection to software are subject to additional WHT at a 15% rate. Such rate is increased in case the beneficiary of the payment is resident in a tax haven or in case the payment is made to a related entity.

Tax treaties

Chile has in force DTTs with the following countries: Argentina, Belgium, Brazil, Canada, Colombia, Croatia, Denmark, Ecuador, France, Ireland, Malaysia, Mexico, New Zealand, Norway, Paraguay, Peru, Poland, Portugal, Republic of South Korea, Spain, Sweden, Switzerland, Thailand, and the United Kingdom.

Please note that Chile has signed DTTs with Australia, Russia, and the United States that are not yet in force.

The following table shows the higher and lower rates on WHT applicable by Chile and the countries with which DTTs exist. The application of one or the other rate will depend on the specific provisions of each treaty.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Belgium	15	5/15 (1)	5/10 (2)
Brazil	10/15 (3)	15	15
Canada	5/15 (4)	10/15 (5)	10
Colombia	0/7 (6)	5/15 (7)	10
Croatia	5/15 (8)	5/15 (7)	5/10 (2)
Denmark	5/15 (4)	5/15 (9)	5/10 (10)
Ecuador	5/15 (4)	5/15 (10)	10
France	15	5/15 (1)	5/10 (2)
Ireland	5/15 (4)	5/15 (1)	5/10 (2)
Malaysia	5/15 (8)	15	10
Mexico	5/10 (11)	5/10/15 (12)	10
New Zealand	15	10/15 (13)	10
Norway	5/15 (4)	5/15 (9)	5/10 (2)
Paraguay	10	10/15 (14)	15
Peru	10/15 (3)	15	15
Poland	5/15 (8)	5/15 (9)	5/10 (2)
Portugal	10/15 (3)	5/10/15 (15)	5/10 (2)
South Korea	5/10 (16)	5/15 (9)	5/10 (2)
Spain	5/10 (11)	5/15 (1)	5/10 (2)
Switzerland	15	5/15 (1)	5/10 (2)
Sweden	5/10 (11)	5/15 (7)	5/10 (2)
Thailand	10	10/15 (14)	10/15 (17)
United Kingdom	5/15 (11)	5/15 (1)	5/10 (2)

Notes

- 15% as a general rule. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipments are taxed at a 5% tax rate.
- 10% as a general rule. 5% is applicable for the use or the right to use some equipment.
- 10% if the beneficiary owns at least 25% of the company's shares. 15% in all other cases.
- 5% if the beneficiary owns at least 25% of the company's shares. 15% in all other cases.
- 15% as a general rule. 10% if the most favoured nation clause applies.
- 0% if the beneficiary owns at least 25% of the company's shares. 7% in all other cases.
- 5% if the beneficiary is a bank or an insurance company. 15% in all other cases.
- 5% if the beneficiary owns at least 20% of the company's shares. 15% in all other cases.
- 15% as a general rule. It could be 5% by the application of the most favoured nation clause.
- 5% for the use of, or the right to use, some equipment. 10% by the application of the most favoured nation clause.
- 5% if the beneficiary owns at least 20% of the company's shares. 10% in all other cases.
- 15% as a general rule. If the most favoured nation clause applies, 10% as a general rule, 5% if interest are paid to a bank.
- 15% as a general rule. 10% if interest are paid to banks or insurance companies, or if the most favoured nation clause applies.
- 10% if the beneficiary is a bank or an insurance company. 15% in all other cases.
- 15% as a general rule. 10% or 15% depending on the interest source.
- 5% if the beneficiary owns at least 25% of the company's shares. 10% in all other cases.
- 15% as general rule. 10% for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.

Chile

Tax administration

Taxable period

The tax year coincides with the calendar year.

Tax returns

The tax system is one of self-assessment by the taxpayer, with occasional auditing by the tax authorities. Tax returns must be filed with the IRS before 30 April of each year with respect to the income of the previous calendar year.

Note that there are many other sworn statements with different deadlines, from March until June of each year.

Payment of tax

Taxes are payable when the annual tax return is submitted in April of each year. Taxpayers, in general, are subject to monthly advance payments on account of their yearly income taxes. The difference between the advance payments and the final tax bill is payable in cash at the time the tax return is filed. If prepayments exceed the final tax bill, the excess is reimbursed by the Treasury.

Statute of limitations

As a general rule, the statute of limitations is three years. However, it can be extended to six years if no tax return was filed or if the tax return was maliciously false.

C

Significant developments

Pilot Program of indirect tax reform in Shanghai

In order to mitigate the multiple taxation issue associated with goods and services and to support the development of 'modern service industries' in China, the State Council resolved in early 2011 to introduce a Pilot Program in the city of Shanghai to expand the scope of value-added tax (VAT) to cover selected industries that were originally subject to business tax (BT).

The Pilot Program in Shanghai started from 1 January 2012. This earmarks the official kick off of the long-awaited transformation of BT to VAT for service industries in China. The industries selected for the Pilot Program and the applicable VAT rates (for general VAT-payers) are set out in the following table.

Pilot industries	Applicable VAT rate (%)
Transportation service industry	11
Certain modern service industries:	
Research, development, and technical services	6
Information technology services	6
Cultural creative services	6
Logistic auxiliary services	6
Certification and consulting services	6
Tangible movable property leasing services	17

Small-scale VAT-payers in the above Pilot Industries are subject to the VAT rate of 3%.

Enterprises (including foreign enterprises) providing Pilot Services in Shanghai are subject to VAT instead of BT from 1 January 2012.

There are some other cities, including but not limited to Beijing, expressing interest to run similar Pilot Programs in the near future. It is possible that after the Pilot Programs in different localities, the Chinese authorities will collect the experience and modify the Pilot Programs before the transformation is implemented nationwide. It is generally contemplated that the transformation will need to be completed within China's 12th Five Year Plan (2011 to 2015).

China, People's Republic of

Taxes on corporate income

Tax resident enterprises (TREs) are subject to corporate income tax (CIT) on their worldwide income. A non-TRE that has no establishment or place in China is taxed only on its China-source income. A non-TRE with an establishment or place in China shall pay CIT on income derived by such establishment or place from sources in China as well as income derived from outside China that effectively is connected with such establishment or place.

Under the CIT law, the standard tax rate is 25%.

A lower CIT rate is available for the following sectors/industries:

- Qualified new/high tech enterprises are eligible for a reduced CIT rate of 15%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a new/high tech enterprise.
- Integrated circuit (IC) production enterprises with a total investment exceeding 8 billion renminbi (CNY), or which produce integrated circuits with a line-width of less than 0.25 micrometre, are eligible for a reduced CIT rate of 15%.
- Key software production enterprises are eligible for a reduced CIT rate of 10%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a key software production enterprise.
- From 1 January 2009 to 31 December 2013, qualified technology-advanced service enterprises in 21 cities (e.g. Beijing, Shanghai, Tianjian, Guangzhou, and Shenzhen) are eligible for a reduced CIT rate of 15%. This incentive is only available to certain technology-advanced service sector members, and an enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a technology-advanced service enterprise.
- Qualified small and thin-profit enterprises are eligible for a reduced CIT rate of 20%. An enterprise has to fulfil certain conditions in order to qualify as a small and thin-profit enterprise.
- From 1 January 2011 to 31 December 2020, encouraged enterprises in the Western Regions are eligible for a reduced preferential CIT rate of 15%.

Local income taxes

There is no local or provincial income tax in China.

Corporate residence

Enterprises established in China are always TREs. A foreign enterprise with a place of effective management in China is also regarded as a TRE.

Permanent establishment (PE)

An 'establishment or place' is defined in the CIT regulations as an establishment or place in China engaging in production and business operations, including the following:

- Management organisations, business organisations, and representative offices.
- Factories, farms, and places where natural resources are exploited.
- Places where labour services are provided.
- Places where contractor projects, such as construction, installation, assembly, repair, and exploration are undertaken.
- Other establishments or places where production and business activities are undertaken.

- Business agents who regularly sign contracts, store and deliver goods, etc. on behalf of the non-TRE.

Other taxes

China has a turnover tax system consisting of the following three taxes: value-added tax (VAT), business tax (BT), and consumption tax.

Value-added tax (VAT)

The sales or importation of goods and the provision of repairs, replacement, and processing services are subject to VAT. VAT is charged at a standard rate of 17%, and the rate for small-scale taxpayer is 3%. The sales of certain necessity goods may be subject to VAT at a reduced rate of 13%, as specified in the VAT regulations.

The VAT system is a consumption-based VAT system, which means that input VAT on fixed assets is fully recoverable except for situations specified in the VAT regulations.

Export of goods from China may be entitled to a refund of VAT incurred on materials purchased domestically. The refund rates range from 0% to 17%. There is a prescribed formula for determining the amount of refund, under which many products do not obtain the full refund of input VAT credit and suffer different degree of export VAT costs.

In order to mitigate the multiple taxation issue associated with goods and services and to support the development of 'modern service industries' in China, the State Council resolved in early 2011 to introduce a Pilot Program in the city of Shanghai to expand the scope of VAT to cover selected industries that were originally subject to BT.

The Pilot Program in Shanghai started from 1 January 2012. This earmarks the official kick off of the long-awaited transformation of BT to VAT for service industries in China. The industries selected for the Pilot Program and the applicable VAT rates (for general VAT-payers) are set out in the following table.

Pilot industries	Applicable VAT rate (%)
Transportation service industry	11
Certain modern service industries:	
Research, development, and technical services	6
Information technology services	6
Cultural creative services	6
Logistic auxiliary services	6
Certification and consulting services	6
Tangible movable property leasing services	17

Small-scale VAT-payers in the above Pilot Industries are subject to the VAT rate of 3%.

Enterprises (including foreign enterprises) providing Pilot Services in Shanghai are subject to VAT instead of BT from 1 January 2012.

China, People's Republic of

Business tax (BT)

A BT is imposed on services, transfer of intangible assets, and immovable property taking place within China. Services taking place within China refers to situations where the service provider, the service recipient, or both are in China. This may make services even being rendered outside China subject to BT in China. BT rates are 3% or 5%, except for the leisure and entertainment industry, which may be subject to a rate of up to 20%. BT is not recoverable but is deductible for CIT purposes.

As indicated above, under the Pilot Program of the indirect tax reform in Shanghai, enterprises providing Pilot Services in Shanghai will be subject to VAT instead of BT from 1 January 2012.

Customs duties

In general, a customs duty is charged in either specific or *ad valorem* terms. For specific duty, a lump sum amount is charged based on a quantitative amount of the goods (e.g. CNY 100 per unit or per kg). For *ad valorem* duty, the customs value of the goods is multiplied by an *ad valorem* duty rate to arrive at the amount of duty payable. The applicable duty rate generally is determined based on the origin of the goods.

An exemption from customs duty applies to machinery and equipment imported by a foreign investment enterprise within the amount of its total investment, for its own use if the project falls within the encouraged category of the 'Catalogue for the Guidance of Foreign Investment Industries', and the imported machinery or equipment is not within the list of commodities that are not exempted from customs duty.

A customs duty and VAT exemption may be allowed on importation of raw materials for contract processing or import manufacturing. Goods may be imported into, and exported out of, designated Free Trade Zones and Bonded Logistics Zones without liability to customs duty or VAT.

Consumption tax

A consumption tax is imposed on 14 categories of goods, including cigarettes, alcoholic beverages, and certain luxury and environmental unfriendly items. The tax liability is computed based on the sales amount and/or the sales volume depending on the goods concerned. It is not recoverable but is deductible as an expense for CIT purposes.

Real estate tax

A real estate tax, which is based on the value of the property or rental received, is assessed annually on land and buildings used for business purpose or leased. The tax rate is 1.2% of the original value of buildings. A tax reduction of 10% to 30% is commonly offered by local governments. Alternatively, tax may be assessed at 12% of the rental value. Real estate tax is deductible for CIT purposes.

Urban and township land-use tax

An urban and township land-use tax is levied on taxpayers who utilise land within the area of city, country, township, and mining districts. It is computed annually based on the space of area actually occupied by a taxpayer multiplied by a fixed amount per square metre that is determined by the local governments.

Arable land occupation tax

Arable land occupation tax is levied on companies and individuals who build houses or carry out non-agricultural construction on arable lands. It is computed based on the space of area actually occupied by a taxpayer multiplied by a fixed amount per square that is determined by the local governments and is settled in a lump sum.

Land appreciation tax

A land appreciation tax is levied on the gain from the disposal of properties at progressive rates from 30% to 60%. Land appreciation tax is deductible for CIT purposes.

Stamp tax

All enterprises and individuals who execute or receive 'specified documentation', including 11 types of contracts and a few specified documents, are subject to stamp tax. The stamp duty rates vary between 0.005% on loan contracts to 0.1% for property leasing and property insurance contracts. A flat amount of CNY 5 applies to certification evidencing business licences and patents, trademarks, or similar rights.

Deed tax

A deed tax, generally at rates from 3% to 5%, may be levied on the purchase or sale, gift or exchange of ownership of land use rights or real properties. The transferee/assignee is the taxpayer.

Urban construction and maintenance tax

Urban construction and maintenance tax is imposed at a certain rate on the amount of China's indirect taxes (i.e. business tax, VAT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of urban construction and maintenance tax. It is charged at three different rates depending on the taxpayer's location, 7% for urban areas, 5% for county areas, and 1% for other areas.

Educational surcharge

Educational surcharge is imposed at 3% on the amount of China's indirect taxes (i.e. business tax, VAT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of educational surcharge.

Local educational surcharge

Local educational surcharge is levied at 2% on the amount of China's indirect taxes (i.e. business tax, VAT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of local educational surcharge.

Note that the local educational surcharge is not levied in many places in China. On 7 November 2010, the Ministry of Finance (MOF) released a circular requesting all the local governments to unify/resume the collection of local educational surcharge. However, as the circular does not specify the effective date, the current local practice varies.

Motor vehicle acquisition tax

A motor vehicle acquisition tax at a rate of 10% of the taxable consideration will be levied on any purchase and importation of cars, motorcycles, trams, trailers, carts, and certain types of trucks.

Vehicle and vessel tax

A vehicle and vessel tax is a tax that is levied on all vehicles and vessels within China. A fixed amount is levied on a yearly basis. Transport vehicles generally are taxed on a fixed amount according to their own weight, with passenger cars, buses, and motorcycles being taxed on a fixed unit amount. Vessels are taxed on a fixed amount, according to the deadweight tonnage.

China, People's Republic of

Vessel tonnage tax

Vessel tonnage tax is levied on any vessel entering into a port inside the territory of China from overseas and is collected by the General Customs. The tax payable is computed based on the net tonnage multiplied by the applicable tax rate that is determined depending on the net tonnage and the term of tonnage tax license.

Resource tax

The exploitation of crude oil and natural gas is subject to resource tax on a sales turnover basis. The exploitation of other natural resources, including coal, other raw non-metallic metals, raw ferrous metals, non-ferrous metallic minerals, and salt (including solid and liquid salt), is subject to resource tax on a tonnage or volume basis. The range of tax rates are specified by the State Council.

For Sino-foreign joint ventures exploiting crude oil or natural gas established before 1 November 2011, mine area usage fees are levied in lieu of resource tax.

Tobacco tax

Tobacco tax is levied on taxpayers who purchase tobacco leaves within the territory of China. The tax is assessed at the rate of 20% on the purchasing value and shall be settled with the local tax bureau at the place of the purchase.

Branch income

Under the CIT law, a branch of a non-TRE in China is taxed at the branch level. If there is more than one branch, they may elect to file their tax at the main office in China on a consolidated basis. There is no further tax upon remittance of branch profits.

Income determination

Taxable income is defined as “gross income in a tax year after deduction of non-taxable income, tax exempt income, various deductions, and allowable losses brought forward from previous years”. The accrual method of accounting should be used.

Gross income refers to monetary and non-monetary income derived by an enterprise from various sources, including, but not limited to, the sales of goods, provision of services, transfer of property, dividends, interest, rentals, royalties, and donations.

Non-taxable income refers to fiscal appropriation, governmental administration charges, governmental funds, and other income specified by the central government.

Inventory valuation

Inventory must be valued according to costs. In computing the cost of inventories, the enterprise may choose one of the following methods: first in first out (FIFO), weighted average, or specific identification.

Unrealised gain or loss due to changes in fair value

An unrealised gain or loss due to changes in the fair value of financial assets, financial liabilities, and investment properties held by an enterprise is not taxable/deductible for CIT purpose. The gain/loss is taxable/deductible only when the asset/liability actually is disposed or realised.

Capital gains

Capital gains are treated in the same way as ordinary income of a revenue-nature for a TRE.

Dividend income

An exemption exists for CIT on dividend derived by a TRE from the direct investment into another TRE except for where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

Interest income

Interest income is treated as ordinary income.

Rental income

Rental income is treated as ordinary income.

Royalty income

Royalty income is treated as ordinary income.

Partnership income

Partnerships registered in China are not subject to CIT. The income of a partnership is taxable at the partners' level.

Unrealised exchange gains

Unrealised exchange gain (loss) from the year-end translation of assets (liabilities) denominated in foreign currency generally is taxable (deductible).

Foreign income

The worldwide income of a TRE and its branches both within and outside China is taxable. There are no provisions in the CIT law that allow foreign income directly earned by the TRE to be deferred for tax purposes. The CIT law contains a controlled foreign company (CFC) rule under which the unremitted earning of a foreign company controlled by Chinese enterprises may be taxable in China (*see the Group taxation section for more information*). A foreign tax credit is allowed for foreign income taxes paid on foreign-source income.

Deductions

Generally, an enterprise is allowed to deduct reasonable expenditures which actually have been incurred and are related to the generation of income.

Depreciation of fixed assets

Fixed assets with useful lives of more than 12 months must be capitalised and depreciated in accordance with the CIT regulations. Generally, depreciation is calculated by the straight-line method. Shorter tax depreciation life or accelerated depreciation may be allowed due to advancement of technology or suffering from constant vibration or severe corrosion. Production-nature biological assets, such as livestock held for breeding and commercial timber, also have to be capitalised and depreciated using the straight-line method.

Under the straight-line method, the cost of an item, less its residual value, is depreciated over the useful life of the asset. Residual value should be reasonably determined based on the nature and usage of the asset. The CIT law provides minimum useful lives for the following assets:

China, People's Republic of

Assets	Years
Buildings and structures	20
Aircrafts, trains, vessels, machinery, mechanisms, and other production equipment	10
Appliances, tools, and furniture etc. related to production and business operations	5
Means of transport other than aircrafts, trains, and vessels	4
Electronic equipment	3
Production-nature biological assets in the nature of forestry	10
Production-nature biological assets in the nature of livestock	3

Amortisation of intangibles and goodwill

A deduction is allowed for amortisation of intangible assets, such as, but not limited to, patents, trademarks, copyrights, and land use rights. Generally, intangible assets have to be amortised over a period of not less than ten years. For an intangible asset obtained through capital contribution or assignment, it can be amortised according to the useful life prescribed in the laws or agreed in the contracts, if any. However, acquired goodwill is not deductible until the invested enterprise is entirely transferred or liquidated.

Organisational and start-up expenses

Organisational and start-up expenses are tax deductible fully in the first year of operation.

Research and development (R&D) expense

For R&D expenses incurred for new technology, new products, or new craftsmanship, an extra 50% of the actual expenses incurred are also tax-deductible as an incentive.

Asset loss

Asset loss (including bad debt loss) may be deductible in the tax year during which such loss is incurred, provided that supporting documents are submitted to and accepted by the in-charge tax bureau before annual income tax reconciliation filing.

Interest expenses

Interest on loans generally is tax-deductible. For interest expenses on borrowings from non-financial institutions by a non-financial institution, the portion that does not exceed the commercial rate is deductible. The tax deduction of interest paid to related parties is subject to the thin capitalisation rule under the CIT law (*see the Group taxation section for more information*).

Reserves and provisions

Provisions for asset impairment reserves (e.g. bad debt provisions) and risk reserves generally are not tax-deductible unless otherwise prescribed in the tax rules. Financial institutions and insurance companies may deduct certain provisions and reserves subject to the caps specified in the relevant tax circulars.

Contingent liabilities

The CIT law does not specifically address the deductibility of contingent liabilities. According to the general principle of the CIT law, contingent liabilities are liabilities that an enterprise has not actually incurred and thus shall not be tax-deductible.

Charitable donations

Charitable donations are tax-deductible at up to 12% of the annual accounting profit. Non-charitable donations, as well as sponsorship expenditures that are non-advertising and non-charitable in nature, are not deductible.

Wages and staff welfare expenses

Reasonable wages and salaries of employees incurred by an enterprise are tax-deductible. Directors' fees are also tax-deductible.

Basic social security contributions, including basic pension insurance, basic medical insurance, unemployment insurance, injury insurance, maternity insurance, and housing funds, that are made by an enterprise in accordance with the scope and criteria as prescribed by the state or provincial governments are deductible.

Commercial insurance premiums paid for investors or employees shall not be tax-deductible unless it is paid for safety insurance for workers conducting special types of work.

Staff welfare expenses, labour union fees, and staff education expenses are tax-deductible up to 14%, 2%, and 2.5% of the total salary expenses, respectively.

Entertainment expenses

Entertainment expenses are tax-deductible to the lesser of 60% of the costs actually incurred and 0.5% of the sales or business income of that year. The excess amount must not be carried forward to and deducted in the following tax years.

Advertising expenses and business promotion expenses

Advertising expenses and business promotion expenses are deductible up to 15% of the sales (business) income of that year unless otherwise prescribed in the tax regulations. Any excess amount is allowed to be carried forward and deductible in the following tax years. Advertising expenses and business promotion expenses incurred by the tobacco industry are entirely not tax-deductible.

Fines and penalties

Fines, penalties, and losses arising from confiscation of property are not deductible for CIT purposes.

Taxes

CIT payments and tax surcharges are not deductible for CIT purposes.

Net operating losses

Tax losses can be carried forward for no longer than five years starting from the year subsequent to the year in which the loss was incurred. Carryback of losses is not permitted.

Payments to affiliates

Management fees for stewardship are not deductible, but services fees paid for genuine services provided by affiliates in China or overseas and charged at arm's length should be deductible. Other payments to affiliates, such as royalties, are also tax-deductible provided that the charges are at arm's length.

Group taxation

Group taxation is not permitted under the CIT law unless otherwise prescribed by the State Council.

China, People's Republic of

Transfer pricing

All enterprises are required to conduct transactions with related parties on an arm's-length basis. The Chinese tax authorities are empowered to make adjustments to transactions between related parties which are not conducted at arm's length and resulting in the reduction of taxable income of the enterprise or its related parties using the following appropriate methods: comparable uncontrolled price method, resale price method, cost plus method, transactional net margin method, profit split method, and other methods which are consistent with the arm's-length principle. China also adopts stringent requirements on the disclosure of related party transactions in the filing of the annual tax return. In addition, there is also a requirement to prepare contemporaneous transfer pricing documentation if the amount of related parties' transactions with an enterprise exceeds a certain prescribed threshold.

The CIT law also contains transfer pricing provisions relating to cost sharing arrangements and advance pricing arrangements. In addition, it also contains a few tax avoidance rules such as a CFC rule, a thin capitalisation rule, and general anti-avoidance rules.

Thin capitalisation

The CIT law has a thin capitalisation rule disallowing interest expense arising from excessive related party loans. The safe harbour debt/equity ratio for enterprises in the financial industry is 5:1 and for enterprises in other industries is 2:1. However, if there is sufficient evidence to show that the financing arrangement is at arm's length, these interests may still be fully deductible even if the ratios are exceeded.

Controlled foreign companies (CFCs)

Under the CFC rule, the undistributed profits of CFCs located in low-tax jurisdictions with an effective income tax rate of less than 12.5% may be taxed as a deemed distribution to the TRE shareholders. The Chinese tax authorities have published a list of countries (i.e. a 'white list') that they do not regard to be low-tax jurisdictions.

Tax credits and incentives

The CIT law adopts the 'Predominantly Industry-oriented, Limited Geography-based' tax incentive policy. Key emphasis is placed on 'industry-oriented' incentives aiming at directing investments into those industry sectors and projects encouraged and supported by the state. The tax incentive policies mainly include the following and are applicable to both domestic and foreign investments.

Tax reduction and exemption

CIT may be reduced or exempted on income derived from the following projects:

Projects/industries	CIT incentive	Valid period
Agriculture, forestry, animal-husbandry, and fishery projects	Exemption or 50% reduction	All years, as long as it is engaged in these projects
Specified basic infrastructure projects	3 + 3 years tax holiday (2)	Starting from the first income-generating year
Environment protection projects and energy/water conservative projects	3 + 3 years tax holiday (2)	Starting from the first income-generating year

Projects/industries	CIT incentive	Valid period
Qualified new/high tech enterprises established in Shenzhen, Zhuhai, Shantou, Xiamen, Hainan, and Pudong New Area of Shanghai after 1 January 2008	2 + 3 years tax holiday (1)	Starting from the first income-generating year
Newly established software production enterprises	2 + 3 years tax holiday (1)	Starting from the first profit-making year
Integrated circuits design enterprises	2 + 3 years tax holiday (1)	Starting from the first profit-making year
Integrated circuits production enterprises with a total investment exceeding CNY 8 billion or which produce integrated circuits with a line-width of less than 0.25um, provided that its operation period exceeds 15 years	5 + 5 years tax holiday (3)	Starting from the first profit-making year
Integrated circuits production enterprises which produce integrated circuits with a line-width of less than 0.8um	2 + 3 years tax holiday (1)	Starting from the first profit-making year
Qualified energy-saving service enterprises	3 + 3 years tax holiday (2)	Starting from the first income-generating year
Encouraged enterprises in underprivileged areas of Xinjiang	2 + 3 years tax holiday (1)	Starting from the first income-generating year

Notes

1. '2 + 3 years tax holiday' refers to two years of exemption from CIT followed by three years of 50% reduction of CIT.
2. '3 + 3 years tax holiday' refers to three years of exemption plus three years of 50% reduction of CIT.
3. '5 + 5 years tax holiday' refers to five years of exemption plus five years of 50% reduction of CIT.

For income derived from the transfer of technology in a tax year, the portion that does not exceed CNY 5 million shall be exempted from CIT; and the portion that exceeds CNY 5 million shall be allowed a 50% reduction of CIT.

A CIT exemption applies to the dividend derived by a TRE from the direct investment into another TRE except where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

A CIT exemption also applies to the income derived by recognised non-profit-making organisations engaging in non-profit-making activities.

Reduced tax rate

The CIT rate may be reduced under certain conditions for different industries (*see the Taxes on corporate income section for more information*).

Reduction of revenue

Where an enterprise uses resources specified by the state as its major raw materials to produce non-restricted and non-prohibited products, only 90% of the income derived is taxable.

China, People's Republic of

Offset of certain venture capital investment

For a venture capital enterprise that makes an equity investment in a non-listed small to medium-sized new/high tech enterprise for more than two years, 70% of its investment amount may be used to offset against the taxable income of the venture capital enterprise in the year after the holding period has reached two years. Any portion that is not utilised in that year can be carried forward and deducted in the following years.

Investment tax credit

Enterprises purchasing and using equipment specified by the state for environmental protection, energy and water conservation, or production safety purposes are eligible for a tax credit of 10% of the investment in such equipment. Any unutilised amount can be carried forward and creditable in the following five years.

Other incentives

There are also tax incentives in relation to the deduction of expenses and cost (e.g. 50% additional R&D deduction, shorter tax depreciation period, and accelerated depreciation). *See the Deductions section for more information.*

Foreign tax credit

A TRE is allowed to claim foreign tax credit in relation to foreign income tax already paid overseas in respect of income derived from sources outside China based on a country-basket principle. The creditable foreign tax also includes foreign income tax paid by qualified CFCs. However, the creditable amount may not exceed the amount of income tax otherwise payable in China in respect of the foreign sourced income. In addition, there is a five-year carryforward period for any unutilised foreign tax.

Withholding taxes

Foreign enterprises without establishments or places of business in China shall be subject to a unilaterally concessionary rate of withholding tax (WHT) at 10% on gross income from dividends, interest, lease of property, royalties, and other China-source passive income unless reduced under a tax treaty. Nevertheless, dividends distributed by a foreign investment enterprise out of its pre-2008 profit are still exempted from WHT.

WHT rates under China's tax treaties with other countries/nations are as follows (as of 1 June 2012):

Recipient	Dividends (%)	Interest (%) (1)	Royalties (%) (2)
Albania	10	10	10
Algeria	5/10 (3a)	7	10

Notes

- This table is a summary only and does not reproduce all the provisions relevant in determining the application of WHT in each tax treaty/arrangement.
- The former Czechoslovak Socialist Republic is divided into Czech Republic and Slovak Republic.
- The former Yugoslavia is divided into Bosnia, Croatia, Macedonia, Serbia, Slovenia, and Yugoslavia.

China, People's Republic of

- There is no tax treaty signed between China and Bosnia and Serbia.
- 1. 0% is due on interest paid to government bodies except for Australia, Brunei, Cyprus, Israel, Slovenia, and Spain. Reference should be made to the individual tax treaties.
- 2. The lower rate on royalties applies for the use of or right to use any industrial, commercial, or scientific equipment.
- 3. The following notes apply to dividend WHT:
 - a. The lower rate applies where the beneficial owner of the dividend is a company (not a partnership) that directly owns at least 25% of the capital of the paying company.
 - b. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the voting shares of the paying company.
 - c. The lowest rate (i.e. 0%) applies where the beneficial owner is a company that owns directly or indirectly at least 50% of the capital of the paying company and the investment exceeding 2 million euros (EUR). The lower rate (i.e. 5%) applies where the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the paying company and the investment exceeding EUR 100,000.
 - d. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the capital of the paying company.
 - e. The lower rate applies where the beneficial owner of the dividend is a company that directly or indirectly owns at least 25% of the capital of the paying company.
 - f. The lower rate applies where the beneficial owner of the dividend is a company that owns at least 10% of the voting stock of the paying company.
 - g. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 10% of the capital of the paying company.
 - h. The lower rate applies where the beneficial owner is a company (other than a partnership) which directly owns at least 10% of the capital of the paying company.
- 4. The following notes apply to interest WHT:
 - a. The lower rate applies to interest payable to banks or financial institutions.
- 5. The following notes apply to royalties WHT:
 - a. The higher rate applies to trademarks.
 - b. The higher rate applies to copyright of literary, artistic, or scientific work, including cinematograph films or tapes for television or broadcasting.
 - c. The lower rate applies to royalties paid for technical or economic studies or for technical assistance.
- 6. These tax treaties have not yet entered into force as of 1 June 2012.

In addition to the above tax treaties, China has also entered into tax information exchange agreements (TIEAs) with the following countries:

- Argentina.
- Bahamas.
- Bermuda.
- British Virgin Islands (BVI).
- Cayman Islands.
- Guernsey.
- Jersey.
- Isle of Man.

Tax administration

Taxable period

The tax year commences on 1 January and ends on 31 December.

Tax returns

Enterprises are required to file their annual income tax return within five months after the end of the tax year, together with an audit certificate of a registered public accountant in China. Information on related party transactions must be filed with the annual income tax return.

China, People's Republic of

Payment of tax

Enterprises are required to file and pay provisional income taxes on a quarterly or monthly basis within 15 days following the end of each month/quarter. Three options are available to the taxpayer in computing the provisional tax: (i) actual profits of the month/quarter, (ii) average monthly or quarterly taxable income of the preceding year, or (iii) other formulas approved by the local tax authorities.

Settlement of tax payment is due, in conjunction with the annual income tax return, within five months after the end of the tax year.

Statute of limitations

For unintentional errors (e.g. calculation errors) committed by the taxpayer in its tax filing, the statute of limitation is three years and extended to five years if the amount of tax underpaid is CNY 100,000 or more. For transfer pricing adjustments, the statute of limitation is ten years. There is no statute of limitation for tax evasion, refusal to pay tax, or defrauding of tax payment.

Audit cycle

There is no fixed audit cycle in China. Tax audit targets are selected pursuant to certain criteria.

Recent focus of Chinese tax authorities

Since 2009, the Chinese tax authorities have strengthened their tax administration on transfer pricing and income derived by non-TREs. The State Administration of Taxation (SAT) has released a number of tax circulars addressing the tax administration of transfer pricing, foreign contractors and service providers, WHT on passive income, etc.

In particular, the Chinese tax authorities have geared up their efforts in recent years to scrutinise investment structures involving intermediate holding companies incorporated in low tax jurisdictions. One of their focuses is on the indirect equity transfer of Chinese companies by non-TRE. The income derived by a non-TRE from the disposal of a non-Chinese company is not taxable under China's domestic income tax law. However, if the Chinese tax authorities are of the view that the non-TRE transferor has used an abusive arrangement to indirectly transfer the equity of the Chinese company (i.e. interposing and disposing of the special purpose vehicle for no reasonable commercial purpose, but just for avoidance of China withholding income tax), it may re-characterise the equity transfer based on the 'substance over form' principle and disregard the existence of the special purpose vehicle. Once the special purpose vehicle is disregarded, the transfer would be effectively a transfer of the underlying Chinese company's equity, and the transfer gain would be China source and subject to China withholding income tax.

In addition, the SAT has also released circulars relating to the claiming of treaty benefits by non-TREs and interpretation of certain articles and terms in the tax treaties, such as dividends, royalties, beneficial ownership, etc. Aggressive tax planning (including, but not limited to, tax-avoidance and treaty-abusive arrangements) not supported by reasonable commercial purposes and substance will be subject to scrutiny by the Chinese tax authorities.

On 26 July 2010, the SAT issued a Departmental Interpretation Note (DIN) for the tax treaty concluded between China and Singapore. It is the first time the SAT has introduced a set of technical views, interpretation, and practice guidelines for the implementation of a tax treaty in such a comprehensive manner. More importantly, this set of interpretation is also applicable to other tax treaties concluded by China if

the provisions of the relevant articles in those tax treaties are the same as those in the China/Singapore tax treaty. Thus, it is likely to have a wide impact to tax residents of other countries/regions which have entered into tax treaties with China.

General anti-avoidance rules (GAAR)

There is a GAAR provision in the CIT law allowing the Chinese tax authorities to make adjustments to taxable revenue or taxable income where business arrangements, structures, or transactions are entered into without reasonable commercial purpose and result in a reduction, exemption, or deferral of tax payment. The Chinese tax authorities may initiate GAAR investigation if they suspect that an enterprise undertakes any of the following arrangements: abuse of preferential tax treatments, abuse of tax treaties, abuse of corporate structure, use of tax havens for tax avoidance purposes, or other arrangements that do not have a reasonable commercial purpose.

C

Other issues

Choice of business entity

Foreign companies, enterprises, or individuals may, subject to approval from the Ministry of Commerce or other relevant ministries, establish equity joint ventures, contractual joint ventures, wholly foreign-owned enterprises, or representative offices in China. Certain foreign financial institutions, including banks and insurance companies, may, subject to approval, set up branches in China. Foreign investors are allowed to establish foreign invested partnerships in China.

Exchange controls

Foreign exchange transactions are administered by the State Administration of Foreign Exchange (SAFE) and its branches. The regulatory administration on foreign exchange transactions of an enterprise depends on whether the transaction is a current account item or a capital account item. Current account items refer to ordinary transactions within the context of international receipts and payments, including, but not limited to, balance of payments from trade, labour services, and unilateral transfers. Capital account items refer to items of increase or decrease in debt and equity due to inflow or outflow of capital within the context of international receipts and payments, including, but not limited to, direct investment, all forms of loans, and investment in securities. If a transaction falls under the category of capital account items, generally prior approval from the SAFE should be obtained. Generally, a payment that falls under the category of a current account may be remitted to overseas if supported with proper contracts, invoices, and tax payment/exemption certificates.

Intellectual properties

Patents, trademarks, and copyrights are governed by separate laws and administered by separate governmental bodies. The government encourages the development and transfer of intellectual properties. The transfer of technology and technical services are currently exempted from business tax.

Mergers and acquisitions (M&A) activities

Both Chinese domestic and foreign investors increasingly are using M&A transactions to establish or expand their Chinese operations.

The MOF and the SAT jointly released a tax circular that addresses the CIT treatments for six forms of restructuring transactions, namely, change in legal form, debt restructuring, equity acquisition, assets acquisition, merger, and spin-off. The general principle is that enterprises undergoing corporate restructuring should recognise the

China, People's Republic of

gain/loss from the transfer of relevant assets/equity at fair value when the transaction takes place. However, if certain prescribed conditions are satisfied, the parties involved could opt for special tax treatments, which are essentially tax deferral tax treatment. In other words, recognition of gain/loss of the transferor from transfer of assets/equity can be deferred with respect to the equity-payment portion; and the transferee may take over the transferor's tax basis of the acquired assets/equity. Such special tax treatments are only available to a very few specific types of cross-border transactions.

C

Significant developments

Colombia has signed double taxation treaties (DTTs) with Spain, Chile, Switzerland, Canada, and Mexico, the first three are in force, while the others are still being finalised or awaiting ratification. In addition, negotiations for DTTs with China, Korea, and Germany have recently commenced.

No tax reform occurred in 2011; only formal changes to the tax regulation (Decrees 4907, 4908, 4919, and 4963).

We expect an important tax reform in 2013.

Taxes on corporate income

National companies (i.e. incorporated in Colombia under Colombian law) are taxed on worldwide income. Foreign non-resident companies and local branches of foreign companies are taxed on their Colombian-source income only. The current general corporate income tax (CIT) rate is 33%, which is applied on taxable income, with taxable income being generally defined as the excess of all operating and non-operating revenue over deductible costs and expenses. The current general capital gains tax rate is also 33%. However, qualifying businesses located in free trade zones (FTZs) enjoy a reduced rate of 15% (while subject to capital gain tax at 33%)

The customary costs and expenses of a business are generally acceptable as deductible expenditure for CIT purposes provided they are necessary, reasonable and have been realised during the relevant tax year under the accrual or cash method of accounting, as the case may be.

In Colombia, as a general rule, there are no industry-specific income tax rates, dual income tax rates, or hybrid tax systems relating to corporate income or tax consolidation. The only material deviation from the statutory CIT rate that is worth mentioning is the special income tax rate that applies for certain FTZ users, which is 15% (as opposed to the statutory 33% CIT rate).

Minimum presumptive tax

Corporate income taxpayers are required to pay a minimum amount of income tax, which is determined based on the so-called presumptive income method. Under this method, presumptive taxable income is measured as 3% of net assets (or tax equity) as of 31 December of the prior tax year as reported by the taxpayer on the corresponding CIT return. The CIT rate is then applied to the greater of regular taxable income (revenue less allowable costs and expenses) or presumptive taxable income (exempting certain business activities).

Colombia

In order to determine the taxable base for presumptive income purposes, it is necessary to subtract from the total amount of net assets, which is the base to calculate presumptive income, the following amounts:

- The net asset value of the shares owned in national companies.
- The net asset value of the assets affected by *force majeure*.
- The net asset value of assets associated with operations in unproductive periods.

Each year, taxpayers must compare the value resulting from the application of the foregoing two systems. The income tax for the taxable year will be calculated on the higher value resulting from this comparison. If presumptive income is higher than the ordinary net income, the difference constitutes an excess of presumptive income, which can be carried forward (adjusted for inflation) to any of the following five taxable years and offset against the net income determined by the taxpayer.

Stability Agreement Regime

In an effort to continue to attract local and foreign investments, a 2005 law created a Stability Agreement Regime whereby taxpayers can, upon satisfaction of several requirements, agree with the government on a contract that any future adverse tax changes may (direct taxes only) not apply. However, to the extent changes are for the benefit of the taxpayer (i.e. CIT rate reduction), they will apply. In order to obtain a legal stability contract, an investor has to satisfy certain requirements, which include the payment of a premium of 0.5% or 1% on the investment commitment, the definition of which is a new investment or enhancement of an existing investment that is worth over 3,907,350,000 Colombian pesos (COP) (150,000 Tax Value Units [TVU]).

Note that the Tax Office, by means of ruling 98797 of 28 December 2010, interpreted that: “The Legal Stability, applied in connection with tax regulations, is primarily directed to maintain incentives (such as the special deduction for investment in real productive fixed assets), subject to the possibility of stabilising other general provisions as those related to taxable rates and tax bases that are being applied at the moment of executing the agreement (...) In this regards this office considers that there is a legal impossibility to stabilise rules that are non-existent at the moment of executing the agreement”.

Corporate residence

Corporate residence is determined by the place of incorporation of any given company.

For CIT purposes, companies incorporated under foreign laws and which have their main domicile abroad are considered ‘foreign companies’, whereas any company incorporated in Colombia under Colombian law qualifies as a ‘national company’ even if fully owned by foreign shareholders.

Permanent establishment (PE)

The concept of PE is not included under Colombian internal legislation for CIT laws. This concept is only relevant in the context of DTTs, and therefore, its applicability varies between one DTT to another one.

The concept of PE, in the case of the DTTs, follows the Organisation for Economic Co-operation and Development (OECD) criteria. In the case of Spain, Chile, and Switzerland, the concept of PE therefore means a fixed place of business throughout which an entity carries out its activity, whether partially or in its whole.

Regarding the above, each DTT has exemptions for the incorporation of a PE.

Other taxes

Value-added tax (VAT)

The Colombian VAT taxes the sale in the country of any items of tangible personal property that are not fixed assets and are not covered by an exemption, the provision of services within the national territory (certain services supplied outside Colombia but imported also attract VAT), and the importation of tangible personal property that is not covered by an exemption.

The Colombian VAT is based on a credit-debit system throughout the entire chain of a business. However, certain products are only taxed at the manufacturer level (one-phase VAT). For purposes of VAT calculation, the VAT taxpayer may credit the VAT (input) paid to vendors (certain limitations apply) against any VAT (output) collected from customers.

The general VAT rate is 16%. However, certain services and goods are taxed at 10% (i.e. coffee, rice) and 20% (i.e. mobile phone services). Luxury goods attract higher rates within the range between 20% and 35%. Wines and other alcoholic beverages are not considered as luxury goods, but the applicable VAT rate is higher (ranging between 20% and 25%) than the general rate.

Under current law, there are VAT exemptions available for the following items, among others:

- Equipment and materials for the construction, installation, assembly, and operation of environmental monitoring and control systems.
- Imports of raw materials and supplies made under the so-called Vallejo Plan for further processing and incorporation into products that are to be subsequently exported (*see the Tax credits and incentives section for more information on the Vallejo Plan*).
- Temporary importation of heavy machinery and equipment for basic industries (mining, hydrocarbons, heavy chemistry, the iron and steel industry, metallurgy, power generation and transmission, and the water industry).
- Importation of machinery and equipment, which is not produced in the country, for recycling and processing of waste and refuse.
- Regular imports by major exporters of industrial equipment, which is not produced in the country, for the transformation of raw material.
- Freight transportation.
- Public transportation of passengers in the national territory by water or land.
- Transportation of gas and hydrocarbons.
- Interest and other financial income from credit operations.
- Financial leasing.
- Medical care services.
- Public utilities.
- Internet services for low to mid-income residential customers.

A non-resident supplier of VAT-subject services does not require VAT registration. Rather, it is the locally-based recipient that must apply a reverse-charge. No VAT fiscal representation is allowed.

As of 2011, no VAT filings are required for periods where no inputs or outputs exist.

Colombia

Customs duties

Imports, according to customs rules, consist of the entry of goods to the 'national customs territory' from the rest of the world, or from an FTZ, with the purpose of remaining permanently or temporarily in it for the achievement of a specific purpose.

The importation processes before the Colombian Internal Revenue and Customs Service (DIAN) can only be carried out by users registered in the Customs Information System, either Customs Agencies (previously called Customs Intermediation Companies) or Permanent Customs Users (UAPs). The latter may file their own customs declarations, as long as the value of the imported goods exceeds the sum of 1,000 United States dollars (USD); otherwise, they must do it through the Customs Agencies.

According to the Harmonized System of Designation and Coding of Goods approved by the World Trade Organization (WTO), imported goods are classified into subentries composed of six digits. Also, two digits are added, which are for exclusive use of the Andean Community (CAN), and two final digits, which correspond to the digits for use of Colombia. The custom subentry, which is the ten-digit result, is exposed in the Colombian Customs Tariff, which is governed by Decree 4589 of 2006, which also reflects the applicable tariff of each duty. VAT, which is also part of the customs duties, is regulated in the Colombian Tax Code.

The general VAT rate for the importation of goods is 16% and the general rate for custom duties is 5%.

Excise taxes

There are some excise taxes for the consumption of beer and its derivatives, wine, liquor and its derivatives, and cigarettes and similar products.

The excise taxes are of municipal in nature. Therefore, the tax rates and applicable laws vary from one municipality to another.

Property tax

The property tax is a municipal tax that is imposed annually on real estate property located in urban, suburban, or rural areas. It is levied on both improved and unimproved real estate. Therefore, the taxpayers of this tax are the owners or holders of the real estate property.

The taxable base of this tax is the current cadastral value of the property, as adjusted for inflation. In some cities, such as Bogotá, the taxable base is the value of the property as appraised by the taxpayer directly.

Property tax rates depend upon the nature and usage of the property, and generally range between 0.4% and 1.2%.

This tax is fully deductible for CIT purposes, provided the same has a causal nexus with the income producing activity of the taxpayer (for example, where the tax is paid on rental property).

Stamp tax

The stamp tax rate was reduced to 0% for documents executed as of 1 January 2010.

Capital gains tax

The general capital gains tax rate is 33%.

Equity tax

The life of the former equity tax (2007 through 2010) was extended to 2011 for those taxpayers who held an amount of tax equity that was equal to or greater than COP 3 billion but less than COP 5 billion as of 1 January 2011, with the tax rate being 2.4% of the entire tax equity amount. Where the tax equity was equal to or greater than COP 5 billion, a 4.8% rate applied to the entire tax equity amount.

The 2011 equity tax is payable in eight equal instalments, starting in 2011 and ending in 2014. The 2011 equity tax is not deductible for CIT purposes and cannot be offset against any tax receivables. However, the law authorises taxpayers to charge this tax against the asset revaluation account, without affecting the income statement for the year.

The third and fourth instalments are to be paid in 2012.

Financial transactions tax

The financial transactions tax is a permanent tax on financial transactions, the collection of which is the responsibility of regulated financial institutions and the Central Bank (*Banco de la República*).

The tax rate is 0.4%, and the taxable event is the carrying out of financial transactions that involve the disposal of resources deposited in checking or savings accounts as well as in deposit accounts with *Banco de la República*, and the issuance of cashier's checks.

25% of the total tax paid is deductible for CIT purposes, regardless of whether or not the transactions have a causal nexus with the income producing activity of the taxpayer.

The law establishes a series of operations and transactions that are exempted from this tax.

The 2010 tax bill established that the financial transactions tax will be reduced to 0.2% for year 2014 and 2015, to 0.1% for years 2016 and 2017, and to 0% for year 2018 and onwards. Currently, 25% of this tax is deductible for CIT purposes; however, 50% of this tax will be deductible from 2013 onwards. Planning strategies such as payment to third parties using overdrafts, repos, buy/sell back transactions, or portfolio investments that did not trigger this tax, are not permitted.

Industry and trade tax

The industry and trade tax is a municipal tax that is imposed on revenue obtained from the exercise of industrial, commercial, or service activities in any Colombian municipal jurisdiction. It can be viewed as a special form of a turnover tax.

The industry and trade tax rates are determined by each municipality, and as a rule they range between 0.2% and 1%. All of this tax can be deducted for CIT purposes when effectively paid.

Branch income

Branch income is taxed at the same rate as corporate income, which is 33%. A 7% remittance tax on branch profits was eliminated in 2007 but still applies to retained profits incurred prior to 2007.

Colombia

Income determination

Inventory valuation

The value of inventories, which includes all expenses and direct and indirect charges necessary to put an item in a position to use or sell, must be determined using one of the following methods: first in first out (FIFO), last in first out (LIFO), specific identification, or weighted average. Special rules may authorise the use of other methods of recognised technical value.

Capital gains

Capital gains are taxed separately from income. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

The so-called double income taxation on corporate earnings was eliminated from the Colombian tax system many years ago. This means that shareholders of Colombian companies are, as a rule, not required to pay any income taxes on dividend distributions, but only to the extent that dividends are paid out from earnings that were taxed at corporate level prior to distribution. When the dividends are paid out from earnings that went untaxed at the corporate level, a foreign shareholder is required to pay income taxes on the dividends at 33% via a withholding tax (WHT) collected by the distributing company. Certain DTTs offer limited or full relief for the 33% CIT on dividends.

Interest income

Interest income derived from activities in Colombia is considered part of the CIT base for Colombian entities; however, if interest is paid to a non-resident that is not compelled to file CIT in Colombia, a WHT is accrued over the payment or deposit at a rate of 33%, if the loan term does not exceed of one year, or 14%, if the loan term does exceed of one year.

Note that there are some special conditions derived from DTTs that decrease the WHT rate.

Royalties

Royalties paid in favour of a Colombian entity are subject to taxes in Colombia; consequently, such royalty payments are part of the CIT base. If royalties are paid in favour of a non-resident (i.e. in favour of an entity that is not compelled to file CIT in Colombia), WHT is accrued over the payment or deposit at a rate of 33%.

Foreign income

The following cases, among others, qualify as foreign-source income:

- Income obtained from external debt, if it complies with some requirements provided by law. Interest produced by this external debt is not taxed via CIT, and there is no WHT liability. Additionally, the expense derived from this concept will be 100% deductible.
- Income derived from technical services of repair and maintenance of equipment carried out abroad.

There are no tax deferral provisions in Colombia.

Deductions

In Colombia, the customary costs and expenses of a business are generally acceptable as deductible expenditure for CIT purposes, provided they are necessary, reasonable, and have been realised during the relevant tax year under the accrual method of accounting. Examples of common (and not so common) deductions include the items below.

Depreciation

As a general rule, the acquisition cost of tangible fixed assets is fully depreciable for CIT purposes. The normal estimated useful lives are as follows:

Asset	Useful life (years)
Buildings and pipelines	20
Machinery and equipment, office furniture, and fixtures	10
Vehicles and computer equipment	5

The acceptable methods for the depreciation are:

- **Straight-line:** The straight-line method is the easiest and most commonly used method of depreciation by companies; it is calculated by dividing the value of the asset by the asset's useful life.
- **Declining-balance:** The reducing-balance method allows one to consider a certain depreciation percentage to depreciate the alignment machine rate annually. This method takes into consideration an accelerated rate of depreciation. This is useful for those assets in which a higher value is lost during the beginning years of usage.
- Any other method of recognised value in accordance with the opinion of the tax authorities.

Depreciation rates can be increased by 25% for each additional eight-hour shift of asset use (and pro rata for fractions thereof). When tax depreciation exceeds book depreciation, the taxpayer is required to establish a reserve equivalent to 70% of the difference. Recapture of depreciation on the sale of depreciated property is taxed at 33%.

Depletion

Depletion is available under certain specific circumstances.

Amortisation of intangible assets

Taxpayers can amortise, for CIT purposes, the cost of any acquired intangible asset over a period of five years, at a minimum, unless the taxpayer is able to prove that the amortisation period should be less because of the specific nature or conditions of the business.

Goodwill

Goodwill is deductible for CIT purposes, provided it is related to the business purpose or income producing activity. In order for such goodwill to be deductible, the intangible (goodwill) must fit the definition of an asset subject to be amortised. Amortisable investments are ones that, under the normal accounting rules, are subject to demerit and should be recorded as assets subject to be amortised in a period exceeding one year.

Goodwill cannot be amortised in a period of less than five years.

Colombia

Start-up expenses

Start-up expenses are deductible for CIT purposes, provided they are necessary, reasonable, and have been realised during the relevant tax year under the accrual method of accounting.

Interest expenses

Taxpayers are generally entitled to deduct any interest paid to financial institutions or to third parties.

Bad debt

Bad debt is deductible for CIT purposes, provided the company keeps its accounting books under the accrual method, the debt is originated as a result of the development of an income producing activity, and the following requirements are met:

- The debt is due for over a year.
- The company is able to prove that the debt has a nature of bad debt.
- The company has registered the provision, related to the bad debt, within the same fiscal period.
- The debt does exist at the moment of the registration of the provision.
- The company has included the debt in the calculation of its CIT of previous fiscal periods.

Charitable contributions

Some specific charitable contributions are allowed as deductions, provided they are made to certain institutions dedicated to development of health, education, culture, religion, sports, scientific and technological research, ecology and the protection of the environment, or to social development programs of general interest. Most of these charitable contributions are limited with respect to their deduction.

Expenses incurred abroad

As a general rule, the deduction of expenses incurred abroad that are not subject to WHT are limited to 15% of the taxpayer's net income.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Taxes

It is important to mention that the current tax regulations state the following as the only taxes that can be claimed as a deductible expense:

- 100% of the industry and trade tax.
- 50% of the financial transactions tax.
- 100% of the property tax.
- The VAT that cannot be treated as output.
- Some local stamp taxes.

Special deductible items

Colombian income tax laws have established certain special deductible items, which include the following:

- 100% of the industry and trade tax and real property tax actual payments and 50% of the financial transactions tax actual payments are deductible.
- 100% of acquisition costs are available as a tax amortisation or depreciation base.

- 125% of the investments made in certain scientific and/or technological projects or in professional training projects of governmental, public, or private institutions of higher education are deductible. This deduction cannot exceed 20% of the taxpayer's net income as determined before subtracting the amount of the investment.
- 100% of the investments made for the control and improvement of the environment are deductible. This deduction cannot exceed 20% of the taxpayer's net income as determined before subtracting the amount of the investment.

Net operating losses

Net tax losses (adjusted for inflation) incurred in 2007 or thereafter may be carried forward without limitation. There is no loss carryback provision. Certain limitations apply to the offset of losses transferred on merger reorganisations.

Payments to foreign related parties

Royalties and similar charges

Royalties and the costs of exploitation or acquisition of all kinds of intangible property that are charged by foreign related parties are allowable as CIT deductions, provided that the corresponding WHT is collected at generally 33% (10% in the case of most DTIs). Other types of payments are subject to the general rules for expenses incurred abroad.

Management overhead expenses

Management overhead expenses paid to a foreign related party (e.g. the parent company) are deductible provided they meet the arm's-length test under transfer pricing regulations and provided the management services are real and are specifically related to the income producing activity of the local subsidiary that pays them. These expenses must also be carefully documented such that the local subsidiary can provide evidence to the authority of the fact that they are specifically related to its Colombian operations: to the planning and direction of the operations, the setting and implementation of management controls, the measurement of progress made toward specific business goals, the related financial results, etc. Where these services are supplied inside Colombia, a 33% WHT is also required to ensure deductibility.

Interest

Interest and related financial costs (including foreign exchange losses) paid to foreign related parties are deductible provided they meet the arm's-length test under transfer pricing regulations. Furthermore, interest and the related financial costs paid on short-term financing relating to imports of merchandise and raw materials directly supplied by foreign related parties are also deductible for CIT purposes. Interest paid to non-resident triggers WHT over the payment or deposit at a rate of 33%, if the loan term does not exceed of one year, or 14%, if the loan term does exceed of one year.

Financial and non-financial institutions registered with the Colombian Central Bank are permitted to extend loans into Colombia.

Group taxation

Group taxation or group consolidation is not allowed for CIT purposes in Colombia.

Transfer pricing

In Colombia, transfer pricing rules are applicable to the transactions performed by local taxpayers with foreign related parties. Thus, for CIT purposes, Colombian taxpayers

Colombia

must determine their income, costs, expenses, assets, and liabilities on the basis of prices and profit margins used in comparable transactions entered into with or between independent or unrelated parties.

In general terms, the rules related to comparability criteria, supporting documents, and advanced pricing agreements (APAs) follow international transfer pricing standards. However, they introduce a wide definition of 'related companies' for transfer pricing purposes, including subordination and individual or joint control exercised by a foreign parent company or by individuals located in Colombia or abroad.

The law presumes that transactions with foreign non-domiciled entities located in the so-called 'tax havens' are transactions performed with related parties and are subject to transfer pricing rules. However, the Colombian government has not yet issued the list of tax havens for these purposes, nor further regulations applicable to the payments made to such jurisdictions. Therefore, the Colombian tax rules related to tax havens are not yet applicable.

If (i) the gross equity (assets) of the local taxpayer on 31 December of each year is equal to, or higher than, the equivalent to TVU 100,000 (COP 2,604,900,000 or approximately USD 1,450,000) or (ii) the gross income obtained by the local taxpayer in a given year is equal to, or higher than, the equivalent to TVU 61,000 (COP 1,588,989,000 or approximately USD 883,000), it shall be required to prepare transfer pricing supporting documents (i.e. a transfer pricing study) and to file with the tax authority an informative return in connection with the transactions performed, during the corresponding year, with the foreign related parties.

If the local taxpayer does not file the supporting documents, it may be subject to fines equivalent to 1% of the total value of the transactions performed with related parties. This fine would not exceed the equivalent to TVU 39,000 (COP 1,015,911,000 or approximately USD 565,000).

Thin capitalisation

There are no thin capitalisation rules applicable in Colombia.

Tax credits and incentives

Foreign tax credit

Foreign income taxes are creditable, subject to certain limitations. Generally, the amount of the credit cannot exceed the Colombian CIT rate. DTT's provide for more comprehensive credit systems as well.

The foreign tax credit on dividend income is enhanced to include a third-tier of credit availability subject to specific ownership requirements. A third-tier of credit means that Colombian entities can claim a tax credit not only for taxes paid by a company in which it has a direct investment, but also for taxes paid by a company in which it has an indirect investment.

CIT exemptions

As items of exempt income, the law has established the following:

- Income obtained by publishing companies from the publication of scientific and cultural books, until year 2013.

- The principal and interest (as well as related commissions and fees) paid pursuant to public foreign debt operations.
- Income from the sale of electric power generated from wind, biomass, or agricultural waste, for a period of 15 years, provided the seller issues and negotiates Greenhouse Gas Reduction Certificates.
- Income obtained from slow yield crops and plantations, including cocoa, rubber, palm oil, citrus, and other fruits.
- Income obtained from river transportation services with shallow draft vessels and barges, for a period of 15 years, starting in 2003.
- Income obtained from hotel services offered in new hotels that are built within 15 years counted from 2003, for a term of 30 years, until 2032.
- Income obtained from hotel services offered in refurbished or enlarged hotel facilities, where the related work is started within 15 years counted from 2003, for a term of 30 years.
- Income obtained from ecotourism services, for 20 years starting in 2003.
- Income obtained from investment in new forestry plantations, sawmills, and plantations of timber-yielding trees.
- Income obtained from new medicinal and software products developed in Colombia and protected under new patents registered with the authorities, with a high content of national research and technology, until 2013.
- As of 2011, the gain in trading derivatives that are qualified as securities will not be subject to CIT, provided that the underlying asset is stock traded in the Colombian stock exchange, indexes, or participations in funds tracking such stock.

Special CIT rate for free trade zones (FTZs)

FTZ industrial users enjoy a special CIT rate. The so-called FTZ industrial goods users and industrial service users pay CIT at a reduced rate of 15% on income earned from their FTZ operations.

Note that capital gains are still taxed at the standard CIT rate of 33%.

Reduction to the statutory CIT rate for small companies

Small companies (not exceeding USD 1,575,000 in total assets or 50 employees) initiating activities after 1 January 2011 are subject to CIT at the following reduced rates: 0% of the statutory CIT rate for the first two years, 25% of the statutory CIT rate for the third year, 50% of the statutory CIT rate for the fourth year, and 75% of the statutory CIT rate for the fifth year.

Reduction of payroll fees for small companies

Small companies (not exceeding USD 1,575,000 in total assets or 50 employees) initiating activities after 1 January 2011 are subject to payroll fees at the following reduced rates: 0% of the payroll fees for the first two years, 25% of the payroll fees for the third year, 50% of the payroll fees for the fourth year, and 75% of the payroll fees for the fifth year.

Tax credit on payroll fees paid

A tax credit is granted to employers hiring employees under 28 years old; women above 40 years old that have not been legally employed in the previous year; low-income workers earning less than 1.5 times the minimum monthly wage (approximately USD 475); and disabled, reintegrated (from armed conflict), or displaced (as victims of armed conflict) workers, subject to certain requisites and time limitations (two to three years).

Colombia

Vallejo Plan for raw materials

The Vallejo Plan allows for the total or partial suspension of customs duties upon receipt, within the national customs territory, of specific goods destined to be totally or partially exported within a certain period of time, after having undergone transformation, manufacture, or repair, including the materials needed for these operations. Under the Vallejo Plan, machinery, equipment, and spare parts may also be imported, to be used partially or entirely in the production and sale of goods and services destined for export. The goods so imported remain under restrictions of sale.

Withholding taxes

The Colombian tax system provides for WHT as a general mechanism of advance tax collection. Under the law, as a general rule, all corporate entities are required to collect or withhold taxes from payments made to third parties. The WHT collection agents must collect the applicable WHT amounts, deposit the withheld amounts with the authority, file monthly WHT returns, and issue WHT certificates to the payees. The payees who are also CIT return filers credit the withheld taxes against the annual CIT liability computed on their returns.

As noted above, foreign non-resident persons are taxed on their Colombian-source income only. Generally, the full tax liability accruing on payments made to foreign non-resident persons is satisfied via the collection of the applicable WHT. The WHT rate on payments made to foreign non-resident persons for taxable dividends, royalties, and taxable interest is 33%. On payments made for consulting, technical assistance, and technical services, the WHT rate is 10% (whether supplied inside or outside Colombia). On payments made for software licences, the WHT rate is 26.4%.

On other types of payments that give rise to Colombian-source income, the general WHT rate is 14%, with the foreign non-resident payee being required to file a CIT return in Colombia to report the final CIT liability, at 33% of net income (and being entitled to a refund where the final liability is less than the amount withheld at the 14% rate or being required to pay the deficit should the case be the opposite).

As of 2011, WHT returns do not need to be filed where there are no taxes to declare or pay. An amnesty is granted for taxpayers who failed to file such returns in the past, such that they will not be subject to late failing penalties if making the delinquent filings within six months following the enactment of the law.

Offsetting of WHT

WHT returns filed on a non-payment basis will be treated as not filed, except if the filer has a refundable tax credit balance over USD 1,185,000 to offset the outstanding payment. A six-month deadline applies for the taxpayer to apply the offsetting of the credit balance. Otherwise, late filing penalties will apply.

Self-withholding on some exports

The tax reform granted an authorisation to the government to establish up to a 10% self-WHT on exports for the mining, oil, and gas industry. The self-withholding would be creditable against the CIT liability.

Exempt interest

As of 2011, the interest payments abroad on loans or cross-border leasing agreements, formerly not subject to WHT if the debtor's activities were deemed of interest for the economic and social development of the country, are now subject to a 14% WHT, if

the loan term exceeds one year. If the loan or cross-border agreement has a term not exceeding one year, a 33% WHT is triggered.

A grandfather rule was provided for loans and leasing agreements executed before 31 December 2010.

Summary WHT chart

Type of payment	WHT rate (%)
Dividends	33
Taxable interest	14 or 33
Royalties	33
Royalties on software licences	26.4
Technical assistance, consulting, and technical services	10
Other types of payments	14

DTT rates

Recipient	Dividends (%)	Taxable interest (%)	Royalties (%)
Non-treaty	33	14/33	33
Treaty:			
Chile	0/7	0/15	0/10
Spain	0/5	0/10	0/10
Switzerland	0/15	0/10	0/10

Tax administration

Taxable period

For CIT purposes, the taxable period is the calendar year, with no exceptions being admissible.

Tax returns

Income tax return filing due dates are set by the government every year. Usually, they fall in the month of April; but in the case of large taxpayers, the filing due dates are usually in February.

Payment of tax

For CIT purposes, corporate taxpayers are divided into 'large taxpayers' and 'other taxpayers'. Large taxpayers pay their estimated outstanding CIT liability (outstanding after deducting applicable WHT from the estimated final liability) in five instalments over the year in which they file their annual CIT return. The due date varies according to the last digits of its NIT (Number of Tax Identification).

Other taxpayers pay their estimated outstanding CIT liability in two instalments over the year in which they file their annual CIT return. The due date varies according to the last digit of its NIT (Number of Tax Identification).

Please be aware that the final CIT due dates for fiscal year 2011 were between 11 April 2012 and 24 April 2012.

The specific CIT due dates for fiscal year 2012 will be determined by a Decree issued by the government at the end of 2012.

Colombia

Audit cycle

The audit cycle corresponds to the taxable period, which for the case of CIT is one year.

Statute of limitations

The statute of limitations is generally two years following the actual filing of the return (a longer or shorter statute of limitations applies in certain cases).

A method to reduce the statute of limitations was due to expire in 2010 but was rolled over into years 2011 and 2012. This benefit enables one to reduce the statute of limitations of a CIT return if the CIT liability increases by a given number of times inflation with respect to the former year. The ordinary two years statute of limitations may be reduced to: 18 months if the CIT liability increases by five times inflation, 12 months if the CIT liability increases by seven times inflation, and 6 months if the CIT liability increases by 12 times inflation.

Topics of focus for tax authorities

While there are no specific topics to be observed by the tax authorities when performing an audit, usually they look at the formal compliance requirements and the correct application and deductibility of cost and expenses.

Other issues

Choice of business entity

The most common type of company used in Colombia is the so-called simplified stock company or simplified corporation, known as a SAS (*sociedad por acciones simplificada*). Besides SAS, foreign investors also use branch offices of an offshore entity as their investment vehicles in Colombia.

As a general rule, from a high-level perspective, there are no mayor differences between a branch office and a subsidiary (such as a SAS), as far as Colombian taxation is concerned, other than the taxation regarding dividends or profits.

However, the following is a chart explaining the main differences between a branch and a subsidiary in Colombia.

Tax	Subsidiary in Colombia	Branch of a foreign entity
CIT	<p>Colombian companies are subject to CIT on their worldwide income at a rate of 33%. The CIT base applicable to Colombian companies is, as a general rule, the ordinary net taxable income determined by subtracting from the gross income of the corresponding taxpayer the cost and expenses allowed by the tax laws; however, Colombian law establishes a minimum taxable base called 'presumptive income' which is equivalent to 3% of the net equity (i.e. the result of subtracting the liabilities from assets) of the taxpayer on 31 December of the previous taxable year. The CIT of a taxpayer must be determined based on the presumptive income if the ordinary taxable income of the corresponding year, determined according to the ordinary or normal rules, is lower than the presumptive income. In addition, please bear in mind that related party liability is not allowed, except when a DTT applies.</p>	<p>Branches of foreign companies are taxed only on their Colombian-source income. The rate at which branches pay income taxes is the general CIT rate of 33%. The presumptive income rule applicable to Colombian companies is applicable to the branches of foreign entities as well.</p>
Income tax on dividends or profits	<p>Dividends received by foreign non-domiciled entities (which would be the case of the foreign shareholders of the local company) are not subject to income tax withholding, provided that such dividends correspond to profits subject to income tax at a corporate level. If such dividends correspond to profits that would have been subject to taxation if distributed to a Colombian resident (profits not taxed at the corporate level), they shall be subject to a 33% income tax withholding on the amount paid. In addition, please bear in mind that Colombia has DTTs with Spain and Chile that are currently in application. Under these treaties, the dividends or profits shall not be levied in Colombia or will be levied with a lower WHT rate. The taxes applicable to dividends received by foreign non-domiciled entities must be withheld on the basis of the total amounts distributed or accrued. Please be advised that foreign non-domiciled entities are not required to file income tax returns in Colombia if their entire income was subject to the withholdings provided in articles 407 to 411 of the Colombia Tax Code (which refer to dividends, among other concepts). Therefore, if the entire income obtained by the foreign shareholders of the local company corresponds to dividends remitted by the company, and the applicable withholdings are duly performed, they would not be required to file income tax returns for the relevant periods.</p>	<p>In the case of profits obtained through a branch, please note that such profits are not considered as dividends and Colombian law does not provide for an income or remittance tax applicable to the transfer of profits from a branch to its main office. Therefore, if the profit obtained by a branch is not subject to income tax in Colombia at the branch level, the profit may be remitted abroad to the home office without the payment of any additional tax in Colombia.</p>

Colombia

Tax	Subsidiary in Colombia	Branch of a foreign entity
WHT	As a means to collect income taxes in advance, the Colombian law establishes a system of tax withholdings that requires every person making payments to a taxpayer to withhold a certain percentage depending on the concept being paid. For those who must file an income tax return, all amounts withheld are a prepayment of the final tax liability and, as such, are credited on their return. The withholding agent must file every month a WHT return. Please bear in mind that technical services, technical assistance services, and consultant services rendered by a foreign non-domiciled entity are subject to 10% income tax withholding, regardless of the place in which the service is rendered, in Colombia or abroad.	Applies exactly the same WHT described for a subsidiary as for the branch of a foreign entity.

In conclusion, as per Colombian law, there are no substantial differences between the fiscal treatment of a subsidiary or a branch, apart from the tax implications for the payment of dividends and territorial source of taxation.

All the taxes discussed in this summary would apply equally to a branch operation or a subsidiary operation. However, from a commercial perspective, and specifically from the perspective of corporate liability, operating through a branch office means that the head office is exposed to direct liability for all the obligations of the branch, tax obligations included. Operating through a subsidiary means that only the subsidiary is liable for its obligations as a general rule, that is to say that the shareholders are not liable for company obligations. Of corporations, the advisable choice would be a SAS, which is very flexible in nature, easy to incorporate, and can be held by one single shareholder (regular corporations require a minimum of five shareholders).

C

Significant developments

On 25 August 2010, the Value Added Tax (VAT) Ordinance Law No 01-001 was promulgated in the Democratic Republic of the Congo (DRC) Official Gazette, indicating that the VAT would become effective within 18 months from its date of signature. Some implementing regulations were passed in November and December 2011 that confirm that VAT has become effective as of 1 January 2012. The standard rate of VAT is 16%, with a 0% rate on exports. VAT replaces ICA (sales tax) that was levied on supply of taxable goods and services manufactured or provided in the Democratic Republic of the Congo by a taxable person in the course or furtherance of a business carried out by that person, and on the importation of goods and services in the Democratic Republic of the Congo. A deduction mechanism existed under the ICA regime, but it was limited and exclusively applicable to industrial businesses.

Taxes on corporate income

Corporate income tax (CIT), known as *impôt sur les bénéfices et profits* (IBP) in the Democratic Republic of the Congo, is paid on profits realised by a company which carries out any operational activity in the country.

The Democratic Republic of the Congo taxes resident corporations on a territorial basis or source basis of taxation. Foreign-sourced profits (e.g. dividends received from a foreign subsidiary, for instance) are thus exempt from CIT.

Non-resident companies that carry out an activity in the Democratic Republic of the Congo are taxable on profits they realise through permanent establishments (PEs) or fixed establishments located in the Democratic Republic of the Congo.

The CIT rate is currently 40% (30% for mining companies).

Minimum income tax

There is a minimum tax of 0.1% of the yearly turnover. Note that the minimum tax cannot be less than 2,500 United States dollars (USD). Also note that turnover includes all profits and interest received, as well as exception profits, in essence any credits on the income statement that have the nature of income or gain.

Tax on rental income

Rental income related to buildings, houses, offices, premises, warehouses, etc. is taxed in the Democratic Republic of the Congo at the rate of 22%.

In order to secure the payment of this tax, the tax code has put into practice a withholding tax (WHT) system. The tenant is liable to withhold 20% of the rentals paid

Congo, Democratic Republic of the

and to remit this tax to the authority. The tax authority may challenge rentals that are not at arm's length by referring to similar houses rented.

Corporate residence

Permanent establishment (PE)

A non-resident company is deemed as having a PE in the Democratic Republic of the Congo in either of the following cases:

- It has a material place of business (e.g. head office, branch) or any other fixed or permanent installations producing revenues in the Democratic Republic of the Congo.
- Without having a material place of business, it carries out a professional activity under its own name during a period of at least six months, insofar as such an activity cannot be considered as a technical assistance rendered to a local company.

Other taxes

Value-added tax (VAT)

Mechanisms of VAT

An entrepreneur is entitled to offset VAT paid on purchase of goods and services used for business purposes against VAT charged on sales of goods and/or services. Businesses exempted from VAT on part of their sales are, in principle, entitled to deduct VAT paid either on a *pro rata* basis or by splitting their activity into taxable and exempted sections.

No VAT credit is allowed for expenditures not necessary for business purposes, nor on some specific expenditure (i.e. accommodation or entertainment for directors and employees, gifts, company cars).

VAT returns must be filed by the 15th day of each month in respect of transactions made the previous month. The net amount of VAT payable must be remitted to the tax authorities together with the return. If VAT paid exceeds VAT charged, the resulting VAT credit can be carried forward.

VAT rates

VAT is calculated on the net invoice price of the goods or services concerned, excluding the tax itself. For imports, VAT is normally charged on the customs value of the goods concerned, plus the customs duty and import-related expenses. There are two rates:

- A standard rate of 16%.
- A rate of 0% on exports and assimilated transactions.

VAT exemptions

The main exempted activities include some banking and financial services, education, medical services, charitable and social activities, and transactions that are subject to a specific taxation.

Application to non-residents

A non-resident having no PE in the Democratic Republic of the Congo must appoint a representative in the Democratic Republic of the Congo who will be responsible for

Congo, Democratic Republic of the

the non-resident's VAT payments and collections. If no representative is appointed, the authorities will require the DRC customer to pay VAT due.

Customs duties

Customs duty on imports

Customs duty on imports is calculated on the CFA franc value of the goods. The customs tariff on imports is the following:

Example of goods	Customs tariff rate (%)
Chemical products	
Machine tools	5
Material for transport of merchandise	
Flour	
Aggregate	10
Petrol, diesel, kerosene	
Clothing	
Furniture	20
Cigarettes	

Imported goods are also subject to the following levies at the time of border crossing:

- VAT on imports.
- For certain goods, consumption and excise duties.
- Various para-fiscal levies.

Customs regulation also allows for certain suspensive rates, such as temporary admission.

Customs duty on exports

Customs duty on exports applies to certain categories of products produced locally, which are:

- Green coffee.
- Electric current.
- Mineral products and their concentrates.
- Mineral oils.
- Logs.
- Scrap metal.

The bond value on exports of the said goods is fixed either by ministerial decree upon suggestion of the customs administration, or in the absence of a decree, by reference to the value of the goods when they leave the Democratic Republic of the Congo.

The rates of customs duties on exports are the following:

Example of goods	Customs duty rate (%)
Coffee	1.0
Electrical energy	
Diamond (small-scale mining)	1.5
Gold (small-scale mining)	

Congo, Democratic Republic of the

Example of goods	Customs duty rate (%)
Diamond (industrial mining)	
Gold (industrial mining)	3.0
Minerals (copper, nickel, lead, etc.)	5.0
Timber	6.0
Silver	
Platinum	10.0

Consumption and excise duties

Scope

The following goods are affected by consumption and excise duties:

- Alcohol and alcoholic drinks.
- Carbonated drinks.
- Mineral oils (petrol, oil, jet A1, diesel, etc.).
- Tobacco.
- Sugar.
- Hydraulic cement.
- Matches.
- Alcohol-based liquid perfume.

Reason for existence and tax base

The reason for the existence of consumption and excise duty is:

- the production in the Democratic Republic of the Congo of consumer goods subject to duty and
- the import of these products to the Democratic Republic of the Congo.

Consumption and excise duties accrue on imports, as well as customs duties and ICA.

On imports, the tax base on consumption and excise duties is the raised CFA franc value of the customs duties, except for mineral oils for which the tax base is the average fiscal threshold price.

Rates

The rates of consumption and excise duties vary from 5% to 40% according to the products concerned.

Para-fiscal taxes

Various para-fiscal taxes shall be received at the time of the import and/or export of goods in the Democratic Republic of the Congo.

The main applicable levies include the following:

- Administrative payment: 5% of the cost, insurance, and freight (CIF) value.
- Congolese Audit Office (OCC) payments: 1.5% of the CIF value, plus various other administrative charges (De Tally charge: 5 United States dollars (USD)/tonne; Laboratory and analysis charges: USD 30 maximum per test).
- *Office de Gestion du Fret Maritime* (OGEFREM) payment: 0.59% of the CIF value.
- Funds for the Promotion of Industry (FPI) charge: 2% of the CIF value.

Congo, Democratic Republic of the

Property tax (IF)

Scope

IF is applicable to constructions and land located in the Democratic Republic of the Congo.

Construction means villas, apartments, and other buildings.

The person owing this tax is the owner (bearer of title deed, holding, long leasehold, mining) of the construction on 1 January of the tax year.

The following are exempt from IF:

- The state, regions, towns, and public businesses disposing of no other resources than those coming from budgetary grants.
- Recognised religious, scientific, or philanthropic institutions.
- Private non-profit making organisations involved in religious, scientific, or philanthropic works and having obtained civil personality.
- Foreign states as far as embassy offices, consulates, or lodgings of diplomats or consuls are concerned (upon condition of reciprocity).

Certain constructions and land are, notwithstanding, exempt from IF, notably depending on the status of their owner. In this way, the following are exempt from the property tax on goods:

- Constructions and land allocated by the owner exclusively for agriculture or farming, including constructions serving to prepare agricultural or farming products, on the condition that at least 80% of these derive from the farming of the property owner concerned.
- Constructions and land allocated by the owner for non-profit purposes:
 - for the execution of a public service, teaching, scientific research, the setting up of hospitals, hospices, clinics, free clinics, or other similar charitable institutions
 - for chambers of commerce having obtained civil personality, or
 - for social activity of mutual companies and professional unions (syndicates) having obtained civil personality, with the exception of locales providing accommodation, a public house, or any business.

Tax determination

The tax rates vary according to the nature of the goods (villas, buildings of more than one floor, flats, and other buildings) and locality ranks.

For villas, rates are fixed per square metre of area (between USD 0.3 and 1.5), while for other taxable items the contribution is determined on an inclusive basis (by floor, by flat, by unused land - in Kinshasa, the rate for one floor is USD 75).

Transfer tax

The transfer of a building in the Democratic Republic of the Congo gives rise to the payment, by the purchaser, of a registration duty amounting to 3% of the building's value.

Stamp taxes

There are no stamp taxes in the Democratic Republic of the Congo.

Congo, Democratic Republic of the

Branch income

Tax rates on branch profits are the same as on corporate profits. However, the costs incurred abroad by the head office of the branch are not deductible in the Democratic Republic of the Congo, and the branch is liable for taxation of deemed distributed profits on top of the CIT. On profits realised, a branch will pay both the 40% CIT and a 20% tax based on 50% of the net profits after deduction of CIT.

Income determination

Taxable income consists of profits from any industrial, commercial, agricultural, or real estate operations entered into by the taxpayer in the Democratic Republic of the Congo, as well as any increases of assets invested as a result of such activities and any increases derived from capital gains either realised or not, of any nature and origin.

Inventory valuation

The following three inventory valuation methods are permitted under DRC law:

- Average cost of goods in stock at time of issuance, multiplied by the number of object or quantity output (i.e. weighted average cost method).
- Last in first out (LIFO).
- First in first out (FIFO).

Deductions

To arrive at taxable income, a taxpayer may deduct all costs actually incurred and which have served in the production of income of the company during the year.

Depreciation

Depreciation of fixed assets used in the company's operations may be deducted. Depreciation rates are as follows:

Nature of the good	Depreciation rate (%)
Buildings	2 to 5 (depending on the materials used)
Machinery and equipment	10
Vehicles	20 to 25 (depending on its use)
Fixtures, facilities	10

Item's nature	Useful lives adopted (years)
Building - general purpose or heavy equipment	20 to 25
Building - specific purpose	8
Computer equipment	3 to 5
Software	3 to 5
Motor vehicles	4 or 5
Furniture and fittings	8 or 10
Office equipment	10

Congo, Democratic Republic of the

Interest expenses

Interest costs on funds borrowed from third parties and invested in the company's operations are deductible.

Please note that if the borrower is a private limited company (*Société Privée à Responsabilité Limitée* or SPRL) and if the lender is one of its shareholders, the interest on loans paid are not deductible from the CIT basis.

Fines and penalties

Legal or administrative fines of any nature are not deductible.

Taxes

Income taxes are not deductible.

Other significant items

The following are examples of other expenses that may be deducted to arrive at taxable income:

- Rents actually paid and rental expenses linked to buildings or parts of buildings used in the exercise of the activity and any overheads derived from their maintenance, lighting, etc.
- Overheads costs, from maintenance of furniture and equipment used in connection with the company's activities.
- Wages, salaries, bonuses, and allowances of employees and workers used in the operation, as well as benefits in kind if these have been added to remunerations paid.
- Professional expenses directly related to the acquisition of income.

The following are examples of other expenses which may not be deducted to arrive at taxable income:

- Expenses of a personal nature, such as accommodation, school fees, leave indemnities, and any other expenses not necessarily incurred in the business.
- Expenses linked to rental properties as a landlord as well as related depreciation expenses.
- Any kind of provisions (e.g. for taxes, for bad debts).

Net operating losses

Tax losses can be carried forward for the next five years following the tax loss year; however, the losses must be deducted from the first year of tax profits of the company.

There is no carryback loss regime in the Democratic Republic of the Congo.

Payments to foreign affiliates

In respect of payments made by a local company to a foreign company for services (e.g. management services, technical assistance services), such expenses are deductible provided that:

- the services rendered can be clearly identified
- the services cannot be rendered by a local company, and
- the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

Technical assistance/management services must be clearly formalised in an agreement, including the modalities of calculation of the corresponding fees payable.

Congo, Democratic Republic of the

Group taxation

There is no group taxation regime per the DRC tax legislation.

Transfer pricing

Transfer pricing rules are limited to the following provisions:

- Interests on loans are not considered as deductible expenses for the borrower, provided that it is an SPRL (private limited company) and that the lender is a shareholder.
- Where a local company is directly or indirectly controlled by a foreign company, any abnormal advantage given to the latter is considered as an indirect distribution of profits and is then added back to the profits of the local company.
- In respect of payments made by a local company to a foreign company, for services (management services, technical assistance services), the Tax Code provides that such expenses may be deductible if (i) the services rendered can be clearly identified, (ii) the services cannot be rendered by a local company, and (iii) the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

Thin capitalisation

There are no thin capitalisation rules in the DRC tax legislation. However, mining companies are required to observe a capital-to-equity ratio of 75:25 (i.e. 3:1).

Tax credits and incentives

The Investments Code allows for a certain number of tax, customs, and general order measures designed to favour direct investments. The preferential tax treatment measures of the Investments Code apply to direct investments and/or to entities that carry them out.

The regime of the Investments Code does not apply to numerous sectors, notably:

- Mining and hydrocarbon.
- Banking and insurance.
- Trade.

In order to take advantage of the provisions of the Investments Code, the following conditions must be fulfilled by the investor:

- The investor must be a Congolese legal entity.
- The investment must be at least USD 200,000.
- The investing company must comply with the rules and regulations relating to environment.
- The investing company must undertake to train local personnel in technical and executive duties.
- The investing company must undertake to create an added value of 35% of its initial investment (within a stipulated time period to be agreed).

The application file is examined by the National Agency for the Promotion of Investments in the Democratic Republic of the Congo (ANAPI) and then sent to the Minister of Finance, who decides on the grant of the advantages foreseen in the Investments Code to the applicant, by the way of a Ministerial Order.

Congo, Democratic Republic of the

Tax holiday

The Investments Code grants appointed investors an exemption from CIT during the investment period, depending on the location of the investments: three years in Kinshasa, four years in Lubumbashi or Kolwezi, and five years in Katanga.

Withholding taxes

The following payments are subject to a WHT in the Democratic Republic of the Congo:

- Dividends paid by a local company to its shareholders.
- Royalties.
- Interest on funds borrowed for business purposes. Note that if the interest is paid to a local company, the WHT does not apply since the interest is included in the taxable income of the company charging such interest.

The Democratic Republic of the Congo has not entered into a double tax treaty with any other nation, so it is impossible to get any WHT reimbursed.

WHT rate and payments

The rate of WHT is 20%, which is based on the gross amount of sums paid.

If the payee does not withhold the tax from the amount invoiced and pays the tax of 20% directly, then the tax authorities consider that the basis of the 20% tax is composed of the amount invoiced plus the amount of the tax.

Consequently, in the case that the DRC company takes in charge the corresponding WHT, the WHT rate will be 25% (20/80) and the amount of tax will not be tax-deductible.

For royalties, the WHT is charged on the net amount of the royalties paid. The tax authorities consider that the net amount of royalties is calculated by deducting 30% from the royalties invoiced (i.e. the taxable basis will be 70% of the royalties invoiced).

Mining companies are, under certain conditions, exempt from WHT on interest paid and are subject to just a 10% WHT on dividends paid to their shareholders.

Tax administration

Taxable period

The taxable period is 1 January to 31 December.

Tax returns

The yearly CIT return is due by 31 March of the following year.

Payment of tax

Final payment of CIT is required when submitting the yearly tax return, which is due by 31 March of the following year.

CIT is payable in local currency through a DRC bank account by a wire transfer to the bank account of the Public Treasury. Consequently, in order to operate in the Democratic Republic of the Congo, the opening of a bank account in a DRC bank is

Congo, Democratic Republic of the

mandatory. Moreover, the tax authorities require the bank account number of the applicant in order to grant a taxpayer number.

The collection of CIT is on an instalment basis or by way of prepayments (depending on taxpayer type).

Instalments of corporate tax

Instalments, in respect of CIT, apply to taxpayers who come under the supervision of two specific kinds of tax departments: the Directorate General (DGE), the department of the tax authorities in charge of the most important taxpayers, and the *Centre des Impôts* (CDI), tax centres.

These taxpayers have to pay two instalments each representing 40% of the CIT paid during the previous fiscal year (including the amounts assessed by the tax authorities). This, therefore, totals 80% of the CIT actually paid in the previous year. The first instalment must be paid before 1 August, and the second instalment before 1 December. Both payments are offset against the final CIT due for the fiscal year. The balance is paid when the tax return is submitted.

Prepayments of corporate tax (Précompte BIC)

Prepayments of CIT are to be paid by taxpayers (excluding those under the supervision of DGE and the CDI) in respect of import and export activities by wholesalers and on the settlement of invoices relating to provisions of services or for building works.

Prepayments of CIT are withheld at source and collected by:

- the customs authorities, *L'Office des Douanes et Accises* (OFIDA), for imported and exported goods
- local manufacturers, wholesalers or semi-wholesalers, and beneficiaries for services rendered, and
- customers or contracting authority for building works on the settlement of the invoices.

Amounts withheld at source must be remitted monthly to the tax authorities and are creditable against the final CIT to be paid at the end of the fiscal year by the importer, exporter, service provider, etc.

The prepayment rate is 1%, which is based on the invoice value.

Audit cycle

In practice, there is a tax audit every year.

Statute of limitations

A company may get audited up to five years after submission of a tax return.

Topics of focus for tax authorities

The tax authorities shall discuss any relevant topic.

C

Significant developments

Further to the promulgation of the 2012 Finance Act on 29 December 2011, the following new tax measures for companies have been introduced and are effective as of 1 January 2012.

- The corporate income tax (CIT) rate is now at 34% (previously 35%).
- The act constituting liability for the simplified tax regime for CIT purposes is now the execution of services or delivery of goods (previously the issuance of invoice).
- The request for deferment of the payment of the lump sum tax between the legal deadline and the end of the current month where the tax is due is now subject to the payment of a fine of 500,000 Central African CFA francs (XAF) (previously XAF 100,000 for a longer period).
- A fixed fee of XAF 1 million is now charged for the obligatory registration of every oil contract with foreign companies and their subcontractors before the execution of the contract (previously free of charge).
- Transfer pricing rules have been reinforced, and companies can now agree on a transfer pricing method with the tax administration before execution of this method.
- A new tax for pollution has been implemented at the rate of 0.2% on the annual turnover of hydrocarbon and mining companies in the production phase and not deductible for CIT purposes (its application is subject to a Tax Circular yet to be published).
- The withholding tax (WHT) for persons carrying out activities at the unitization zone is now at 5.75% (previous 7.7%).
- The deduction to be made on the taxation basis for real estate contributions of built-on property has been increased to 75% (previously 25%).
- The tax on rental value of commercial buildings has been reduced from 15% to 10%.
- All petroleum fittings are now subject to tax on rental value of commercial buildings at a fixed tax of XAF 5 million per exploration permit.
- Companies benefiting from special tax exemptions may now lose their tax exemptions in a financial year if they fail to file their summary financial statements.
- All tax claims are now subject to a prior deposit of 10% of the sum contested (previously 20%).
- The treatment of all tax litigation files are now subject to the payment of 5 per thousand of the sum contested (previously 2 per thousand).
- For purposes of incorporation of companies, the registration of all deeds is free of charge.
- All insurance policies carried out by oil, mining, and telephone companies are subject to registration free of charge; failure to register will result in penalties at the rate of 25%.
- Reduction of registration fee on lease of movables and immovables used for habitation or commercial purposes at the rate of 3% (previously 5%).
- Reduction of the registration fee on the transfer of rights in a lease from 15% to 10%.

Congo, Republic of

- 70% of the net profits made by branch offices and foreign companies carrying out business are automatically considered as distributed profits and subject to tax on dividends.
- No value-added tax (VAT) deduction of VAT resulting from a tax audit.
- Funds resulting from exportation activities not repatriated to Congo are now subject to tax on transfer of funds at the rate of 1%.
- Pre-existing laws have been codified. This relates to the tax regime of the code on state property, the mining code, forestry code, and hydrocarbons code.
- A unique tax on salaries has been implemented at the rate of 7.5% on the gross salary to replace the lump sum tax on salaries, apprenticeship tax, National Housing Fund contribution, and National Employment Office contribution.

Taxes on corporate income

Congolese registered companies are taxed on the territoriality principle. As a result, Congolese companies engaged in business outside of the Republic of Congo are not taxed in the Republic of Congo on the related profits.

In the absence of a tax treaty stating otherwise, a non-resident company is liable for CIT on income realised in the Republic of Congo or derived from or resulting from work/services of any nature supplied or used in the Republic of Congo.

Corporate income tax (CIT) rates

The standard CIT rate in the Republic of Congo is 34%, with certain exceptions.

The minimum tax payable is 1% of the annual turnover and cannot be less than 1,524.49 euros (EUR) (EUR 762.25 if annual turnover is less than EUR 15,244.90).

A 2% minimum tax is payable by companies showing losses during two consecutive fiscal years. The 2% rate is applied to the sum of gross turnovers and products and benefits realised by the company in the most recent year in which it earned a profit. The 2% tax is not deductible for CIT purposes. However, in a company's first profit-making year after incurring the losses, half of the 2% tax is deductible.

A 20% WHT is imposed on income sourced in the Republic of Congo that is derived by foreign companies not necessarily engaged in activities in the Republic of Congo.

Industry specific rates

A CIT rate of 25% applies for:

- agricultural companies
- microfinance companies, and
- private schools organised as a company.

A CIT rate of 30% applies for:

- mining companies and
- real estate companies.

The minimum CIT rate for oil companies is 34%.

A CIT rate of 35% is applied on a deemed profit equal to 22% of the total gross remuneration (i.e. an effective tax rate of 7.70% of the taxable turnover made in the Republic of Congo) derived from services rendered by:

- foreign companies that qualify for this simplified tax regime and
- local companies and branches that realise more than 70% of their annual turnover with oil companies and oil services companies (in this case, the deemed profit tax is regarded as an advance payment of CIT levied at the rate of 35% on net profits).

Note that these companies would revert to the general taxation regime the year after which the turnover realised with oil and gas sector companies became less than 70%.

Headquarters operations of foreign companies

The headquarters operations of foreign enterprises taxation regime is subject to prior approval by the tax authorities.

If enacted, headquarters operations of foreign enterprises and international groups will be granted a favourable tax status in the Republic of Congo. For those that qualify, CIT is charged on a deemed profit equivalent to a prescribed percentage of headquarters expenses. The percentage of which is currently unknown.

To qualify, the headquarters must be registered under the form of a public limited company or branch and must act solely for the benefit of the group in the area of management, control, or coordination.

Global flat taxation

The global flat tax is at 10%. It is calculated on the annual turnover of small and medium-size enterprises taxable under the flat rate regime, whose turnover does not exceed EUR 60,980.

Corporate residence

A company is considered resident in the Republic of Congo if it has its registered office or principal office for all its activities in the Republic of Congo.

Permanent establishment (PE)

There is no general definition for a PE. However, a PE has been defined by the double tax treaties (DTTs) signed between Congo and France, the Common Organisation for Africa and Madagascar (OCAM), and the Customs and Economic Union of Central Africa (UDEAC) to include a place of management, a branch, an office, a factory, a workshop, and a mine, oil or gas well, quarry, or other place of extraction of natural resources.

Other taxes

Value-added tax (VAT)

The Congolese VAT rate is 18%. In addition to VAT, there is a sales tax (surtax) calculated at the rate of 5%, applied to the amount of VAT, which must be invoiced and paid at the same time as the VAT. Therefore, the VAT rate is globally 18.9%. The surtax is not deductible (final cost).

Congo, Republic of

Under the provisions of the VAT law, all economic activities conducted in the Republic of Congo are subject to VAT, regardless of their purpose, profitability, or the legal status of the business performing them, and irrespective of whether these activities are habitual, occasional, or originate in the Republic of Congo or from a foreign country. Therefore, any person, natural or legal, engaged in an industrial, commercial, or professional activity is subject to VAT unless specifically exempt by law.

Section 8 of the VAT law states a service is considered as provided in the Republic of Congo when the service is used or exploited in the Republic of Congo.

In principle, an entrepreneur is entitled to credit the VAT paid on purchases of goods, equipment, and services for use in business (input VAT) against the total of the tax charges to one's customers for deliveries made and services rendered (output VAT).

Taxpayers not exclusively carrying out transactions giving rise to a VAT deduction shall deduct VAT proportionally on the portion of the income pertaining to taxable transactions and not a flat rate, as was previously the case.

VAT resulting from tax assessment is not deductible.

A VAT return must be filed on a monthly basis before the 15th day of every month.

Customs duties

When applicable, import duties are payable at rates ranging from 5% to 30% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight level (CIF).

Customs duties rates

Group	Rates (%)
Basic necessities	5
Raw materials and capital goods	10
Intermediate and miscellaneous goods	20
Consumer goods	30

Additional entry taxes

Additional entry taxes apply on the importation of goods, such as:

- Economic and Monetary Community of Central Africa (CEMAC) integration tax: 1% on CIF value.
- Statistic tax: 0.20% on CIF value.
- Organisation for the Harmonisation of Business Law in Africa (OHADA) contribution: 0.05% on CIF value.
- Economic Community of Central African States (CEEAC) contribution: 0.04% on CIF value.

Computer royalty

The 2003 Finances Act instituted a 2% computer royalty, to cover expenses incurred by the Customs Administration on computer data processing, applicable without exception or exemption to all importation and exportation of goods. The royalty applies on the customs taxable value of any imported or exported goods in the Republic of Congo.

Excise taxes

Excise duties on locally made products are at the rate of 10% while imported goods are subject to excise duty at the rate of 25%.

Land tax on built properties

Land tax is payable annually on built properties and is due from the owner. However, properties built for the purpose of accommodation are exempt for ten years, and properties built for business purposes are exempt for five years. The effective rate is determined every year by the local council.

The land tax is levied on the rental value after a deduction of 75% (decline, maintenance, and repair expenses) for properties built for business purposes. The land tax is levied on the cadastral value after a deduction of 75% (decline, maintenance, and repair expenses) for properties built for accommodation purposes.

Land tax on non-built properties

Land tax is payable annually on non-built properties and is due from the owner. However, properties intended for plantations and breeding are temporarily exempt for a three to ten year range. The effective rate is determined every year by the local council.

The land tax is levied on 50% of the cadastral value, determined every year by the Ministry of Finances. The land tax is arbitrarily assessed by hectares in rural areas according to the nature of the plantations.

Rent tax

Rent tax is payable annually on the rental of built property. It also applies on non-built property for business purposes. The rent tax is imposed on the occupant of the premises (whether the occupant is the owner, a tenant, or a subtenant).

The rent tax, which is equal to one-twelfth of the rents due within a year, is due annually on or before 28 February. For new lease agreements, the rent tax is due within three months of the effective date of the lease agreement and is calculated as a proportion of the rents due until the end of the year.

The rent tax is paid by the tenant on behalf of the owner, or by the subtenant on behalf of the tenant. The tenant/subtenant has the legal obligation to pay this tax on behalf of the lessor. Tenant and subtenants make a once-a-year deduction between 1 January and 30 April of the same year from all the rents due to the owner.

A 50% fine, assessed on the amount of the tax, is due for any late payment of the rent tax.

Registration fees and stamp duties

Lease agreement registration fees amount to 3% of the value of the annual rent paid during the tax year, including premises charges if any. 'Additional centimes' also apply at a 5% rate of the registration fees. Stamp duties and registration fees should be paid for the total duration of the lease agreement. In the case where the lease agreement is renewed, stamp duties and registration fees should be paid for the renewable period.

Stamp duty ranges from XAF 200 to XAF 20,000 on certain documents.

Examples of documents that are subject to stamp duty include:

Congo, Republic of

- Letters of agreement and other letters, which are prepared for use as evidence of act, fact, or condition of civil nature.
- Notarial deeds and their copies.
- Visas and flight tickets.

The following fees for the registration of contracts are due within three months from date of signature:

- Private commercial contracts (as opposed to public commercial contracts) at the rate of 1% on the estimated amount of the transaction.
- Purchase orders for public contracts at the rate of 2% for contracts with a value exceeding EUR 15,240.
- Subcontracts in building construction and public work sector at a fixed fee of EUR 155.44.
- Insurance contracts are registered free of charge.

Insurance contracts shall be registered and tax on insurance paid on the 15th day of the month following the insurance subscription.

Transfer of company shares are subject to a 5% registration fee.

Oil and gas

Specific rules and caps apply for the upstream (production) oil and gas industry.

Tax on pollution

The tax on pollution is payable by petroleum and mining extracting companies in the production phase, at the rate of 0.2% on the annual turnover.

This tax constitutes a non-deductible expense for the extracting mining/hydrocarbon company in the production phase.

This tax is due in the course of the year and payable quarterly by instalment, proportionally to the production realised during the just ended quarter and not later than the 20th day of the month following the end of the quarter.

Business tax and accessory taxes

The business tax (*'patente'*, in French) is a tax collected by local communities. This tax, paid during the first three months of every year, includes both a fixed and variable fee depending on the specifications of the profession. The principal amount of the tax is increased with 'additional centimes', 'communal centimes', and 'contributions to the National Investment Fund' (accessory taxes).

Business tax is paid by traders and professionals. It is imposed on most commercial, industrial, and professional enterprises (including branches of foreign enterprises), although some traders are exempt. The business tax is charged on the actual or deemed annual rental value of the tangible assets of the enterprise, on the power of the machines, and on the average number of employees.

Any new taxpayer undertaking an activity requiring a trading licence must declare it in writing to the tax administration within 15 days following the start of the business. For the first tax year, the business tax is paid based on the date on which the business started (i.e. the tax is due from the first day of the quarter during which the business started).

Oil sub-contracting companies are now subject to business tax and accessory taxes under a specific nomenclature. The business tax and accessory taxes are made up of a fixed tax of EUR 422.89 and variable taxes of EUR 1.83 and EUR 3.05 following the power of the equipment and the number of employees.

Tax on company-owned cars

The tax on company-owned cars applies to the previous fiscal year company-owned cars and is due on 1 March at the latest.

With the exception of estate cars, private cars of companies falling into the category of own use cars for the issuance of vehicle registration documents are subject to tax.

The tax rates vary from EUR 304.89 for engine ratings not over 9 horsepower, to EUR 762.24 for the rest.

Cars registered more than ten years ago are exempt from tax.

Branch income

Tax rates on branch profits are the same as for domestic corporations. No tax is withheld on transfers of profits to the head office.

Income determination

Taxable income is based on financial statements prepared according standard statements of the OHADA treaty.

Business expenses are generally deductible, unless specifically excluded by law.

Inventory valuation

Stocks are valued at cost price. However, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

Capital gains

Capital gains are treated as ordinary business income and are taxed at the standard CIT rate of 34%. However, a capital gain realised on the disposal of a fixed asset in the course of trading is excluded from income for a period of three years if the taxpayer reinvests the gain in new fixed assets for the business.

If the business is totally or partially transferred or discontinued, only half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business and only one-third of the gain is taxed if the event occurs five years or more after the business is started or purchased. However, the total gain is taxed if the business is not carried-on in any form.

Dividend income

Dividends are treated as ordinary business income and are taxed at the standard CIT rate of 34% for resident corporations.

After three years, profits credited to the non-compulsory reserve are considered to be dividends and are accordingly subject to the 20% WHT on dividends.

Congo, Republic of

Inter-company dividends

Dividends received from a Congolese company (DivCo) by a commercial company incorporated in the Republic of Congo (HoldCo) are exempt from CIT and subject to a final 20% WHT if the following conditions are met:

- HoldCo and DivCo are incorporated in the CEMAC.
- HoldCo holds 25% of the capital of DivCo.
- HoldCo holds the shares for at least two years from the date of purchase.

However, 10% of dividends that are deemed to represent the share of cost and expenses are included in the taxable profits of HoldCo and liable for the CIT.

If the above conditions are not met, dividends received from a Congolese company by another Congolese company are subject to a 20% WHT, which is an advance payment of the recipient's CIT.

Deductions

Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain business profits. To be deductible, expenses should be incurred necessarily for the normal purposes of the business and be supported by suitable evidence.

Depreciation and depletion

In general, all types of fixed assets, except land, are depreciable for tax purposes as long as they can be shown to have been acquired for business purposes of the corporation. Depreciation must be calculated on the original purchase price. The straight-line method is used, and the Congolese General Tax Code sets forth maximum rates of depreciation. Goods costing less than EUR 152.44 per item may be written-off at purchase as expenses.

Depreciation recorded when the company is in a loss position may be carried forward without limitation and deducted from the first available taxable profits, provided it was appropriately disclosed in the annual CIT return.

Recoverable and identifiable packaging are regarded as fixed assets. They are recorded in a fixed asset account at the time of purchase. This packaging is regarded as returnable packaging when the supplier intends to act as the sole owner of the packaging.

Unrecoverable packaging is recorded as an expense and is deductible for tax purposes.

Exceptional accelerated depreciation may be authorised in certain circumstances for heavy equipment with a value of more than EUR 60,979.60. This special accelerated depreciation does not apply to private vehicles owned by the enterprises.

The following list contains maximum rates of depreciation as set forth in the General Tax Code:

Assets	Rates per year (%)
Construction	5 to 20

Assets	Rates per year (%)
Fixed devices and equipment	5 to 25
Movable equipment	10 to 100
Transport materials	5 to 33.33
Furniture, fittings, and other equipment	10 to 33.33
Fishing equipment	10 to 20
Hotels, bars, and restaurants	10 to 50
Plastic equipment (moulding)	10 to 33.33
Equipments subject to chemical action	20

Exceptional depreciation method

The exceptional depreciation method is an accelerated depreciation method.

Companies may elect the accelerated depreciation method for heavy materials and equipments that:

- are purchased new for a value higher than EUR 60,979.60
- have a useful life of at least three years
- are used for manufacturing, processing, transport, and handling, and
- are bound to an intensive use.

The application for the accelerated depreciation must be submitted to the head office of taxes within three months of the purchase of the assets to be depreciated. The option is granted upon approval of the ministry in charge of finances. If the administration fails to respond to the application for accelerated depreciation within three months, the application is tacitly granted.

Under the exceptional depreciation method, a 40% deduction may be taken in the year of acquisition of the previously mentioned assets, increased with the normal rate calculated on the residual value after application of the accelerated depreciation. These assets are depreciated on a straight-line basis thereafter.

Start-up expenses

There is no specific provision in the Congolese General Tax Code on the deduction of start-up expenses. Start-up expenses that occurred in the first year of incorporation (N) are deductible in the second year of operation (N+1).

According to the OHADA Uniform Act relating to Accounting Systems and Accountancy, start-up expenses can be amortised either in one year (in such case, they are booked in the deductible expenses during the first fiscal year) or in two years (50% during the first fiscal year and 50% during the second fiscal year).

Interest expenses

Interests are deductible subject to the following conditions:

- General limit: Regardless of the form under which a legal entity is registered, the deduction is allowed with an interest rate limited to the rate of the advances in current accounts on states funds of the Bank of the States of Central Africa (BEAC) raised by two points. Currently, the ceiling for the deduction of interests is 7.25%.
- For private limited companies and public limited companies, the deduction is allowed according to the status of control over the management of the enterprise, as follows:

Congo, Republic of

- For shareholders who have control over the company *de facto* or *de jure*, the deduction is allowed only to the extent that the sums paid do not exceed, for the shareholders as a whole, half of the paid-up capital and are within the limit sets forth in the 'general limit'.
- For other shareholders, the 'general limit' applies.

Charitable contributions

The maximum amount of deductible donations is limited to 0.5 per thousand of the net turnover when these charitable contributions are made to beneficiaries situated in Congo and are justifiable.

Fines and penalties

Penalties relating to violation of regulations are not deductible.

Taxes

Taxes, other than income taxes, are usually deductible. Examples of deductible taxes include customs duties, excise duties, payroll taxes, business tax and accessory taxes, registration taxes, and unrecoverable VAT.

CIT itself is not deductible, nor is the special tax on company-owned cars.

Taxes withheld on remuneration, paid to third parties (third parties taxes), and remitted to the tax office by a Congolese enterprise are not deductible.

Net operating losses

For tax purposes, losses may be carried forward to offset profits earned in the three succeeding fiscal years. Carry back losses are not permissible.

As mentioned above, depreciation recorded when the company is in a loss position may be carried forward without limitation.

Payments to foreign affiliates

Allowable deductions include sums paid abroad to foreign companies for:

- actual services, notably overhead for the operations made for the benefit of a company based in the Republic of Congo, including costs of studies; technical, financial, and accounting assistance; commissions and fees; and interests, and
- use of patents, licences, trademarks, drawings, manufacturing processes, patterns, and similar rights to the extent the payer proves they correspond to actual operations, and they are neither abnormal nor excessive.

Subject to the provisions of tax treaties (France, CEMAC, OCAM), the deduction is allowed within a limit of 20% of taxable profits before deduction of the expenses in question.

In the event of losses, the rate is applied on the results of the last profit period, which is not statutory limited. In the absence of profits during the period out of statutory limitation, the sums paid are not allowed as tax deductions.

When the sums are not allowed, as a whole or in part, in the deductible expenses, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 20%.

Royalties for the transfer or concession of patents, trademarks, drawings, and other similar titles are deductible to the extent the payer proves they are still valid. When these royalties benefit an enterprise contributing in the management or share capital of an enterprise in the Republic of Congo, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 20%.

Commission or brokerages, relating to goods purchased on behalf of enterprises based in Congo, are allowable tax deductions up to 5% of the purchase amount made by the central purchasing office, the head office, or the intermediaries. The reductions shall benefit enterprises based in the Republic of Congo. An original supplier's invoice must be attached to the intermediary's invoice.

The payer shall prove that:

- the purchases necessitated the interventions of a broker or intermediary
- the commissions provided better supply conditions compared with the actual situations on the market, and
- the commissions are not excessive compared with the nature of the services.

Group taxation

There is specific group taxation within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of all the following conditions are met:

- The stocks or shares owned by the parent company represent at least 25% of the capital of the subsidiary company.
- The parent company and subsidiary companies have registered office in the CEMAC state (Cameroon, Central Africa Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company, which undertakes to retain them for at least two consecutive years in registered form.

Transfer pricing

For companies under the control, *de facto* or *de jure*, of companies or groups situated outside the Republic of Congo, payments made by whatever means are considered as transfer of profits and subject to CIT and tax on income from securities if the transfer includes:

- Increase in the purchase price or decrease in the sale price.
- Payment of excessive royalty or without a consideration.
- Loans without interest or at an unjustifiable rate.
- Reduction of debts.
- Benefits that are out of proportion in relation to the service rendered.

Thin capitalisation

There are no specific thin capitalisation rules in the Republic of Congo.

Congo, Republic of

Tax credits and incentives

The current investment regime in the Republic of Congo was set out by Law No. 6-2003 of 18 January 2003, which established the investment charter. The charter's application, Decree No. 2004-30 of 18 February 2004 established modes of business registration.

- Scope: The following may be registered under the investment charter:
 - Businesses wishing to pursue an activity in the Republic of Congo, except for activities such as brokerage, trade, import and production of arms, and import or processing of toxic waste and by products.
 - Under certain conditions, commercial activities linked to collection, storage, distribution, and export of locally produced products, except alcoholic beverages and tobacco.
 - New activities (as opposed to pre-existing activities).
 - Forestry businesses benefiting from a forestry permit called the forestry development unit.
 - New companies coming from the redemption of a registered company.
- Conditions of eligibility for the investment charter: To be eligible, a company must satisfy the following conditions:
 - Be registered with the Trade and Personal Credit Registry in the Republic of Congo.
 - Create permanent employment, to be carried out over a minimum of 280 days per year.
 - Maintain company share capital equal to or greater than 20% of investments.
 - Primarily use local principal materials necessary for the production of the finished or semi-finished product, when available, with equal conditions concerning price, quality, and time of delivery to outside, in the case of industry.
 - Primarily use local business services, when available, with equal conditions concerning quality, price, and time of realisation regarding payments to external businesses, for the case of service businesses.
 - Be registered at the Congolese National Welfare Fund.
 - Open an account at a local bank or any other financial, savings, or credit establishment.
 - Primarily use a local workforce, when available, with the same expertise as the foreign workforce.
- Registration procedure: Entitlement to the benefits prescribed by the charter is subject to obtaining a registration agreement, provided by the National Investment Commission.
- Fiscal and customs benefits set out by the Investment Charter: These benefits vary according to privileged regimes, motivation measures, and in a general manner.

Privileged regimes

The charter sets out three privileged regimes:

- General regime (G).
- Special regime (S).
- Preferential development zone regime.

General regime (G)

The general regime applies to businesses that fulfil the aforementioned general requirements, and carry out investments greater than or equal to EUR 152,450.

Special advantages are conferred according to the period of activity of the registered business.

During the set-up period and the first three exploitation tax years, the company receives several benefits, as follows:

- In customs matters, the company benefits from the provisions of the CEMAC customs code relative to asset improvement mechanisms for export activity and from the suspension of customs duty in the form of temporary admission or franchise for natural resource research activities.
- In fiscal matters, the company benefits from the 50% reduction of registration fees for business foundation, increases in capital, company mergers, and transfer of company stocks and shares.

For the three first exploitation tax years and until the first year of sale or first service, the following fiscal benefits are added with the aforementioned reduction of registration duties:

- Total exemption from the tax on company earnings.
 - Companies that are subject to CIT because of their size or activity will be exempt from CIT.
 - Businesses that are subject to personal income tax because of their size or activity will be exempt from personal income tax.
- The authorisation to proceed to accelerated depreciation.
- The authorisation to carry forward losses for the first three tax years.
- The application of zero-rate VAT on exported products.

Special regime (S)

The special regime applies to businesses that fulfil the aforementioned general requirements and carry out investments between EUR 45,734 and EUR 152,450.

In addition to the advantages of the aforementioned (G) regime, businesses registered under the (S) regime benefit during the set-up period and the first three exploitation tax years from the moderation of registration duties for the incorporation of the business, increases in capital, company mergers, and transfer of company stocks and shares.

This moderation of registration duties is granted exclusively by decree of the Minister in charge of the Economy and Finances upon a decision of the National Investment Commission.

Preferential development zone regime

All exporting businesses registered under the investment charter are eligible for the preferential development zone system, including free-trade zones.

The institution, organisation, and function of the preferential development zone are fixed by a specific text.

Incentives to set up in remote areas

All new businesses registered under (G) or (S) regimes, which are located in a remote area, benefit from a reduction of 50% on the tax on company earnings in the fourth and fifth year following the first three tax years for which the business benefited from total exemption from the tax on earnings or personal income tax.

Congo, Republic of

The business is considered as belonging to a remote area from the moment its production units are set-up and 90% of the production unit workforce is working in the remote location.

The appraisal of a zone's location results from the exclusive competency of the National Investment Commission.

Incentives for social and cultural investment

All new businesses registered under (G) or (S) regimes, carrying out investments of a social and cultural character, may benefit from a fiscal reduction by ministerial decree of the Minister in charge of Finance and the Economy, upon the decision of the National Investment Commission.

These benefits may not, however, be added to those mentioned above and allocated to remote areas, even if the business concerned is set-up in such a location.

General measures

For the duration of the privileged regime, and subject to current texts, the company shall enjoy fiscal stability in terms of local and state taxes.

Privileged regimes (G) and (S) are allocated only once and are not renewable. The business may receive fiscal and customs advantages pertaining to the set-up period.

Fiscal advantages concerning the exploitation period are applicable only after the set-up period.

The end of the set-up period is certified by decision of the Minister in charge of Economy and Finance after the adoption of the verification report by the National Investment Commission.

Respect of the aforementioned general requirements set out by the charter is a prerequisite for benefiting from these motivation measures.

Export incentives

This measure is reserved for businesses that export at least 20% of their production.

The benefits are as follows:

- The provisions of the CEMAC customs code, relating to asset improvement mechanisms.
- Exemption from customs duties and taxes on manufactured products, except computing fees and statistic tax.
- Application of a zero-rate VAT on exported products.

Non-manufactured goods remain subject to the common law export system.

Incentive to reinvest earnings

This measure is reserved for businesses that carry out new investments of at least one-third of existing assets.

The benefit conferred consists of a 50% reduction of the tax on company earnings for the three years following the realisation of the investment.

Notwithstanding, this benefit is granted upon the following conditions:

- The business declares to the permanent secretary of the National Investment Commission its investments, planned investment, and the state of existing capital assets.
- The National Investment Commission, on the report of checking teams, verifies if the new investments correspond to one-third of the preceding capital assets.
- All investments are realised within one year.
- Investments generate new employment.
- Investments increase capacity of production by at least 10%.
- The business has sound ethical concerns.

Withholding taxes

Services, dividends, and attendance fees

Services

The tax regime set forth for foreign suppliers is defined in Section 185 of the Congolese General Tax Code. According to the provisions of Section 185, as well as the wide interpretation made by the Congolese Tax Authorities, the services rendered by the foreign suppliers should be subject to a 20% WHT.

In addition, Section 185 provides that companies which have no tax residence in the Republic of Congo are subject to a 20% WHT if they earn revenues realised in the Republic of Congo or coming from the Republic of Congo, and which come from works or services of any nature performed or used in the Republic of Congo.

The provisions of the Section 185 do not apply to resident suppliers of a country that has signed an international tax treaty with the Republic of Congo, provided certain conditions are met.

Dividends

Dividends distributed by a Congolese company are subject to a 20% WHT unless a different rate applies under an international tax treaty (e.g. France, CEMAC, OCAM). The same rate applies for dividends distributed to a resident shareholder.

Under the tax treaty between France and Congo, the applicable WHT rate is 15%. There is no specific rate defined in the CEMAC and OCAM tax treaties.

Attendance fees

Attendance fees are subject to a 22% WHT unless a different rate applies under an international tax treaty (e.g. France, CEMAC, OCAM).

Payments to local independent contractors

Payments to local independent contractors (self-employed contractors, i.e. those not registered with the Congolese Trade Registry) are subject to a WHT at the rate of 5% from such payments, to be remitted to the Public Treasury.

Late remittance of the WHT is subject to a late payment penalty of 50% within the first two months and 100% if the late payment exceeds two months.

Congo, Republic of

WHT rates summary

Tax treaties

The Republic of Congo is a member of CEMAC, which unites the following six states: Cameroon, Central African Republic, Republic of Congo, Gabon, Equatorial Guinea, and Chad.

The Republic of Congo has signed the following tax treaties.

The tax treaty of the Common Organisation for Africa and Madagascar (OCAM)

The member states of this organisation adopted a tax cooperation agreement 29 January 1971, which was ratified by the Republic of Congo on 3 September 1971. The OCAM, which initially had 14 members, had 17 members when it was dissolved by the Conference of Heads of State in 1985. Those members were Cameroon, Central African Republic, Chad, Congo, Ivory Coast, Dahomey, Gabon, High Volta, Madagascar, Mauritius, Niger, Rwanda, Senegal, Togo, and the Democratic Republic of Congo. The Republic of Congo has not denounced the application of this tax treaty.

The tax treaty of the CEMAC Convention

The Republic of Congo signed the UDEAC Convention of 13 December 1966, which was designed to avoid or to limit double taxation among the member states: Cameroon, Central African Republic, Congo, Gabon, Equatorial Guinea and Chad. This tax treaty remains significant to companies interested in affiliate creation in Central Africa countries.

The tax treaty between the Republic of Congo and the French Republic

This tax treaty, which concluded on 27 November 1987, was designed to avoid double taxation and to prevent tax evasion related to income tax, inheritance tax, registration law, and stamp duty.

Tax administration

Taxable period

The taxable period is the calendar year.

Tax returns

Taxable business profits are computed on the basis of normal accounting principles as modified by certain tax adjustments.

The annual CIT return is a specific form (*Document Statistique et Fiscal* or DSF) which should be prepared in accordance with OHADA accounting principles. The form cannot be completed electronically.

The books must be maintained in French and in XAF. This accounting system must follow the OHADA chart of account. All entries have to be booked under OHADA standard throughout the year.

The annual CIT return must be filed within four months following the end of the fiscal year of the company (i.e. before 30 April).

Payment of tax

Resident companies are required to pay quarterly instalments of tax (15 February, 15 May, 15 August, and 15 November), and these quarterly instalments are generally calculated with reference to the most recent CIT return. Special calculations of instalments apply to new taxpayers.

Based on the self-assessment system, when submitting annual tax returns due by 30 April every year, taxpayers must pay the amount of tax calculated in the annual tax return to the extent this amount exceeds tax instalments paid during the year.

Non-resident companies and individuals shall appoint tax representatives in the Republic of Congo. The Congolese resident shall be considered as tax representative if the non-resident person fails to appoint a tax representative.

Statute of limitations

Generally, the statute of limitations period for CIT is four years following the year in which the tax was due. However, this rule does not apply in the case of fraudulent acts reported by the tax administration.

Significant developments

In December 2011, a law was published that enforced a new registration tax on every corporation/company that is registered in the Costa Rican Mercantile Registry and every new corporation that is formed after the creation of this law. *See Registration tax in the Other taxes section for more information.*

Taxes on corporate income

The Costa Rican tax system is based on the principle of territoriality, according to which all incomes earned by the taxpayer in virtue of lucrative activities carried out in the national territory, as well as those produced from the use of assets, goods, or rights used or invested in the country and those arising from civil, commercial, banking, financial, industrial, agricultural, forestry, fishing, mining or other exploitations of natural deposits, those originating in the rendering of public services, the exercise of professions, offices, arts, and all sorts of remunerated labour, the rendering of personal services, or the performance of functions of any kind, carried out or negotiated within the territory of Costa Rica, will be considered to be Costa Rican-source income and subject to Costa Rican income tax.

Under the Costa Rican income tax law, income from transactions carried out abroad may be regarded as non-Costa Rican-source income and is not subject to income taxes.

In addition, it is important to bear in mind that Costa Rican income tax applies specifically to those incomes that directly originate in the lucrative activities carried out by the taxpayer within the country's territory.

Corporate income is taxed at a 30% rate. However, the law establishes special regulations for small companies whose gross income does not exceed 91,573,000 Costa Rican colones (CRC). For this category, the following rates apply:

- 10% for companies with gross income up to CRC 45,525,000.
- 20% for companies with gross income of more than CRC 45,525,000, but not more than CRC 91,573,000.
- 30% for companies with gross income over CRC 91,573,000.

Please note that these corporate income tax (CIT) brackets are adjusted yearly, effective 1 October to 30 September of the following year. The tax brackets listed are for the 2012 fiscal year.

Corporate residence

In most cases, the place where a company is incorporated is regarded by Costa Rican authorities as the corporate residence.

Permanent establishment (PE)

According to Costa Rica's tax system, a PE of non-domiciled persons in the country is every office, factory, building, or any other real estate; plantation, mining, forest, agricultural, and farming development; warehouse or any other permanent business center, included the temporary use of warehouse facilities as well as the ones destined to the purchase and sell of merchandise and products inside the country; and any other company property of non-domiciled persons that develops commercial and lucrative activities in Costa Rica.

The Costa Rican Tax Administration has manifested that the essential characteristic of a PE is given by a territorial criteria, according to which are taxable the income and earnings generated in Costa Rica as well as the assets located in it, not taking into consideration the nationality or domicile of its owner.

The Tax Administration also applies the criteria of the Organisation for Economic Co-operation and Development (OECD) to determine when a person can be considered a PE of a company in determined state. Accordingly, the Tax Administration takes into consideration the following conditions to determine the existence of a PE:

- The existence of a business center (i.e. facilities such as an office or business center or, in certain cases, machinery).
- Said business center must be permanent (i.e. must be established in a determined place with a significant level of permanence).
- The company has to develop its essential activity through this permanent center (i.e. the persons who depend in a way or another on the company (the staff) must develop the company's business inside the country on which the permanent center is located).

Note that the Costa Rican Tax Administration uses these OECD criteria to support and base its administrative resolutions; therefore, they hold a significant importance for the Costa Rican tax system. Regarding these criteria, the OECD has established as a generally accepted principle that a company will be treated as the owner of a PE in a determined state if a person acts on behalf of that company under certain circumstances, even if they are not in the presence of a permanent business centre in said state. These circumstances are as follows:

- The person has to be an agent on account of the non-domiciled company: A dependent agent, individual, or company, under an employment regime or outside of this, that, due to the nature of its activities or to the scope of its faculties, involves the non-domiciled company in commercial activities of certain significance.
- The person or local company has to be a dependent agent with enough faculties to celebrate and subscribe agreements on behalf of the non-domiciled company. The faculties of the person or local company have to be sufficient to involve the non-domiciled company in business activities inside the country on which the person or local company are situated.
- The agent has to be authorised to negotiate all elements and details of agreements on which the non-domiciled company is involved and obligated, even if said agreement is signed by another person in the country on which the non-domiciled

Costa Rica

company is located. In other words, it isn't simply a mere authorisation to sign the agreement.

- The faculty to subscribe agreements must include those agreements that are part of the main commercial activity of the company. It is irrelevant the fact that the person has the faculty to celebrate agreements exclusively related to internal operations of the company.
- The agent has to take risks on behalf of the abroad domiciled company.
- The agent has to act accordingly to detailed instructions or general control of the abroad domiciled company.
- The concept of PE under this context implies that this agent uses its authority on a repeatedly basis and not only on isolated cases. The faculties must be exercised regularly in the country on which the agent is located, a characteristic that is determined according to the real commercial situation.

A person or company whose activities are limited to the following conditions and circumstances is not considered a PE:

- Its activities consist only in storage, expose, or delivery of goods and merchandise that belong to the company domiciled in another country.
- Its activity consists only in purchase of goods or merchandise or compiling information for the abroad domiciled company.
- Its activity consists only in developing any other auxiliary or preparatory activity for the company.
- To consider a person as a PE of a company in a state, it has to be determined if the activities that this person develops are, by themselves, an essential and significant part of the activities of the company as a whole, which is why every case must be studied and analysed according to its own particular circumstances.

Other taxes

Sales tax

A fixed sales tax rate of 13% is applied at all stages of the sale of merchandise or the invoicing of certain limited services. The tax is levied on (i) sales of merchandise within the national territory (except sales of land, buildings, exports, and certain basic necessity items, such as basic foodstuffs, certain medicines, and veterinary products); (ii) the value of services performed by restaurants, bars, motels, printing companies, social and recreational clubs, painting and repair shops, and others; and (iii) imports consisting of merchandise for personal use or consumption or to satisfy commercial needs.

Selective consumption tax

The selective consumption tax may be applied at a rate of up to 100% and is levied on goods that are considered non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items or the sales value for items produced in Costa Rica. The tax is levied at only one stage in the sale of merchandise. Payment of the tax is required at the time of importation or, for articles produced in Costa Rica, within 15 days of the month of the sale.

Customs duties/import tariffs

In Costa Rica, all importation of goods and merchandise, with certain exemptions, are liable for corresponding import tariffs and customs duties. Other taxes (e.g. sales tax, selective consumption tax) are also levied on the importation of said goods and merchandise.

The most important legal instruments for customs regulations are the Central American Uniformed Customs Code, the Customs Law and its rulings, and other administrative rulings that are periodically issued by the Customs Authority.

Property tax

Each local municipal government is in charge of real estate appraisal. The annual property tax to be applied throughout the Costa Rican territory is 0.25% of the appraised value, registered in the respective municipality where the tax liability originates.

Real estate transfer tax

Real estate transfer tax is calculated as 1.5% of the selling price of the real estate or its property tax value, whichever is greater.

Stamp duties

Stamp duties in Costa Rica are determined according to the transaction that is carried out (e.g. property transactions, service contracts, movable assets transactions).

Registration tax

In December 2011, a law was published that enforced a new registration tax on every corporation/company that is registered in the Costa Rican Mercantile Registry and every new corporation that is formed after the creation of this law.

The rate of this new tax is approximately 300 United States dollars (USD) for commercially active companies and USD 150 for inactive ones (commonly known as shelf companies). The taxable event happens every 1 January and affects all companies, corporations, and branches that are registered in the Mercantile Registry to that date. For existing companies, the tax will be paid during the 30 calendar days following 1 January; for new companies, the tax will be paid at the moment of their registration.

Franchise tax

The payments realised abroad for the use of a franchise will be subject to remittances abroad, with a 25% withholding tax (WHT).

Branch income

Branch income is subject to tax at the same rates as corporate income. There is a WHT of 15% on dividends distributed within the country and a 15% tax, in lieu of a dividend WHT, on profits transferred abroad.

Income determination**Inventory valuation**

Inventories are generally stated at cost and can be valued using the compound average-cost method, first in first out (FIFO), last in first out (LIFO), retailer method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from different methods of inventory valuation for tax and financial purposes should be recorded.

Costa Rica

Capital gains

Capital gains and losses on the disposition of non-depreciable fixed assets or shares of other companies are excluded for income tax purposes if such dispositions are not a habitual activity.

Capital gains are taxed, at the regular CIT rate, on the sale of depreciable assets when their sale price is higher than their adjusted basis (book value).

Dividend income

Dividends between domestic subsidiaries and other domestic corporations are not subject to taxes. There are no ownership requirements to qualify for this exclusion.

Stock dividends

Stock dividends are subject to CIT at 15% if the stock is not listed in an officially recognised stock exchange or 5% if the stock is registered in a stock exchange officially recognised by the Costa Rican government.

Dividends paid in the form of stock of the distributing company are allowed and are exempt from taxes.

Interest income

Interest income coming from sources related to normal business activities is taxable. Interest income coming from investments on financial entities included in the National Banking System is subject to an 8% withholding on the source as definitive tax.

Interest coming from investments abroad is considered non-Costa Rican-source income and is not taxable.

Foreign income

Foreign-source income is not taxable in Costa Rica.

Deductions

In general, any costs and expenses that are useful, necessary, and pertinent for the production of actual or potentially taxable income will be deductible from the company's gross income, as long as they are duly supported by documentation authorised by the law and they comply with the following requirements:

- That they are necessary expenses to obtain actual or potential income, taxed under the law.
- That any withholding obligations, as stated in other sections of the law, have been carried out.
- That the supporting documentation has been authorised by the Tax Administration.

However, the Tax Administration may reject or disregard, in whole or in part, any expenses that it considers excessive, inadmissible, or not indispensable to obtain taxable income.

Depreciation

The straight-line and sum-of-the-years-digits methods of depreciation are allowed over the following useful lives:

Assets	Useful life (years)
Buildings	50
Machinery and equipment	10
Furniture and fixtures	10
Vehicles	10
Agricultural plantations	3 to 20

The Tax Administration, at the request of the taxpayer, can adopt technically acceptable special depreciation methods in cases duly justified by the taxpayer. In addition, the Tax Administration can authorise, through general resolution, accelerated depreciation methods on new assets acquired by corporations with monetary activities requiring constant technological updates, higher installed production capacity, and productive reconversion processes in order to maintain and strengthen their competitive advantage.

Start-up expenses

Companies organisational expenses may be deducted in the tax year in which they are paid or credited, or, if they accumulate, in five consecutive tax years, starting from the date of start of productive operations, until the balance is exhausted. Organisational expenses will be considered to be those costs and expenses that are necessary to initiate the production of taxable income, that, in accordance with the law, are deducted from gross income.

Interest expenses

Interest and other financial expenses paid or incurred by the taxpayer during the fiscal year directly related to the management of their business and the creation of taxable income are deductible from gross income, as long as those interest expenses are not capitalised.

Note that those interest expenses with rates that exceed the usual market rates will not be considered deductible expenses by the Tax Administration.

Bad debt

Manifestly uncollectible unpaid debt will be deductible as long as this debt is originated in habitual operations from the taxpayer's business and all legal actions towards its collection have been exercised.

Charitable contributions

All donations duly supported by documentation that are given to the government, public institutions, municipal corporations, public universities, to the Social Protection Board, to the Educational Boards, to the Costa Rican Red Cross, and other institutions, such as those foundations and associations with non-charitable, goodwill, scientific, and cultural ends that are authorised by the Tax Administration to receive deductible donations, among other entities, will be deductible from gross income.

Taxes

With the exception of sales tax, selective consumption tax, specific taxes over consumption and special duties established by law, penalties and interest paid over any tax obligation, and the income tax itself, all other taxes that affect the goods, services, and negotiations of the company's habitual commercial activity will be considered deductible.

Costa Rica

Net operating losses

Losses incurred by industrial and agricultural enterprises may be carried forward and deducted from the taxable profits for the following three years for industrial enterprises and five years for agricultural enterprises. Loss carrybacks are not allowed.

Payments to foreign affiliates

Corporations may claim deductions for royalties, technical and management service fees, and interest charges paid to foreign affiliates, provided that a tax of 25% for royalties, franchises, and other services, and a tax of 15% for interest is withheld. However, the deductions for technical, management service fees, and royalties may not exceed 10% of gross sales in the aggregate if paid to the parent company.

Group taxation

There is no group taxation in Costa Rica.

Transfer pricing

Costa Rican legislation makes no mention of transfer pricing as such, and any attempt to govern transfer pricing is the product of interpretation and precedents and not strictly the product of the law or its rules and regulations. Although the law and its regulations do not specifically mention the phenomenon of transfer prices in its texts, the Tax Administration has attempted to approach the subject by means of an official interpretation of the law, as regards its application to transfer pricing among related companies.

By means of Interpretive Guideline No. 20-03 of 10 June 2003, the Tax Administration has applied the Principle of Economic Reality, regulated in Articles 8 and 12 of the Costa Rican Code of Tax Rules and Procedures, to transfer pricing.

The Tax Administration's argument basically states that the tax laws must be interpreted in accordance with their objectives, their economic meaning, and the facts, as they actually occurred. The Tax Administration will therefore apply the arm's-length principle, as understood by the OECD, which compares the conditions of a transaction between related parties with transactions that are carried out by independent companies; in other words, said prices must be equivalent to prices corresponding to those of transactions that are similar to operations carried out by independent entities, in order to grant them the appropriate fiscal treatment, particularly in light of the fact that the norm between related entities is the application of transfer prices.

Thin capitalisation

In Costa Rican legislation, there is no mention of thin capitalisation rules. However, as with transfer pricing, the Tax Administration applies general rules and principles for the treatment of these types of situations. For instance, the Income Tax Law gives the Tax Administration the faculty of reviewing and rejecting all expenses that it may consider excessive, not proportional, or unreasonable. Additionally by means of Interpretive Guideline No. 20-03 of 10 June 2003, the Tax Administration has applied the Principle of Economic Reality, regulated in Articles 8 and 12 of the Costa Rican Code of Tax Rules and Procedures, to thin capitalisation, limiting related companies to market value prices for their transactions.

Tax credits and incentives

Free zones

Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, selective consumption tax, real estate transfer tax, and WHT on payments abroad, as well as the discretionary use of foreign currency generated abroad. However, these incentives will be affected by the rules established by the World Trade Organization (WTO) in force in the year 2015.

Drawback industries

Special benefits exist for industries that import semi-manufactured materials for assembly in Costa Rica and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

Tourism development

The Incentive Law for Tourism Development grants several tax benefits, such as exemption from import duties on certain tourism service-related goods and from property tax for companies dedicated to tourism, but only for those with a signed tourism agreement.

Withholding taxes

Payments to non-domiciled foreign corporations or individuals

Regarding payments to non-domiciled foreign corporations or individuals, taxes are withheld as follows:

Payment	WHT rate (%)
Dividends (1)	15
Interest and other financial expenses (2, 3)	15
Royalties, patents, trademarks, franchises, and formulas	25
Technical service and management fees	25
Personal services from a Costa Rican source:	
Employees	10
Directors	15
Others	30
Transportation and communication services	8.5

Notes

- Withholding depends on the origin or source of the retained earnings. Total or partial exemption will be authorised by the Tax Administration to the extent that a foreign tax credit is totally or partially disallowed to the taxpayer in the taxpayer's country of residence. This exemption will not be allowed, however, if this type of income is not taxable to the taxpayer in the country of residence.
- No tax is withheld if the recipient is a bank or a financial institution recognised as a first-class bank by the Central Bank of Costa Rica or a supplier of merchandise. Interest or financial expenses paid to parties other than those aforementioned are subject to a 15% WHT. An 8% WHT applies to interest on bearer documents issued by financial entities registered at the Central Bank's General Auditor's Office or stock exchange. No WHT applies to interest paid on securities issued by the Workmen's Bank or the Mortgage Housing Bank and its authorised institutions or on foreign currency securities issued by the state banks.
- Banks or non-resident financial entities that are part of a local financial group are payers of a special tax. The taxpayers mentioned in Note 2 must pay, in lieu of tax on remittances abroad, a local currency tax equivalent to USD 125,000 per annum. The tax period will run from 1 January to 31 December of each year.

Costa Rica

Tax treaties

Free-trade bilateral treaties

Costa Rica is a full member of the Central American Common Market, which guarantees free trade among the countries of the area. It also has a free-trade bilateral treaty in force with Mexico (1994), the Dominican Republic (1998), Chile (1998), Canada, and Panama. The US-Central American-Dominican Republic Free Trade Agreement (CAFTA-DR) entered into force on 1 January 2009. These agreements aim to provide favourable conditions for the exchange of merchandise between contracting parties.

Tax information exchange agreements (TIEAs)

The only tax treaty in force between Costa Rica and the United States, effective since 12 February 1991, is a TIEA, whereby both countries agree to exchange information, from and/or in relation to public and private entities and individuals, at the request of the party's corresponding authority, in relation to any tax relevant issue.

Double taxation treaties (DTTs)

Law No. 8888, regarding the DTT between Costa Rica and Spain, was published in the Official Gazette on 6 December 2010. This treaty entered into force on 1 January 2011 with the purpose of avoiding double taxation and tax evasion between the two countries.

Tax administration

Taxable period

The tax year in Costa Rica is a 12-month period from 1 October to 30 September. Current legislation contemplates that other fiscal year-ends may be adopted with the prior approval of the Tax Administration.

Tax returns

With certain exceptions, all corporations must file a tax return by 15 December on the basis of a fiscal year-end of 30 September. Entities with an operating period of less than four months may present a return together with the following year's tax return.

The tax system is one of self-assessment with occasional auditing by the Tax Administration.

Payment of tax

In March, June, and September, all corporations and taxpayers must prepay instalments that total 75% of the average income taxes paid in the past three fiscal years, or the amount paid in the prior year, whichever is greater. Failure to pay on these dates results in the accrual of interest unless the taxpayer has requested, on a timely basis, that the Tax Administration eliminate the corresponding payments. Any amount owed in excess of the instalments should be paid by 15 December.

Audit cycle

For a tax audit to begin, it is necessary that the Tax Administration send a notification to the taxpayer to be audited. The taxpayer is selected according to one of the selection criteria previously established, and this should be indicated in the communication at the beginning of the tax audit. The Tax Administration must start the audit within two months of the communication to the taxpayer.

Once the audit is completed, the auditors hold a meeting with the company and invite them to correct the issues found.

If the company does not accept the correction, then the Tax Administration will present a tax assessment with the issues and tax adjustment. The taxpayer has 30 days to respond to the assessment as well as to pay it. An appeal may be requested to the Tax Administrative Court, where the administrative section finishes. Further appeals are handled by the judicial court.

Statute of limitations

The statute of limitations is three years starting from 1 January of the year following the income tax return filing. For taxpayers with an ordinary tax period with a due date to file their 2011 period return on 15 December 2011, the statute of limitations starts counting on 1 January 2012; however, for taxpayers with a special period of January to December with a due date to file their 2011 period return on 15 March 2012, the statute of limitations starts counting on 1 January 2013.

Topics of focus for tax authorities

Important topics for tax audits are sales tax credits, gross margin on sales, employee benefits, and income tax.

Significant developments

Croatia introduced some changes in tax regulations starting from 1 March 2012.

Corporate taxation

A tax deduction is introduced for the amount of realised profit used to increase the founding capital of the company. After submitting the annual tax return, taxpayers have six months to obtain proof of registering the increase of their share capital, as per the Companies Act. This provision shall apply to submissions of the annual tax return for the year 2012.

The impairment arising from adjustments in customer's receivables is a tax deductible expense, if the maturity of debts by the end of the tax period is more than 60 days (before 120 days). This decision applies to receivables created from 1 March 2012 onwards.

Taxation of dividends and profit shares

Changes to the legislation introduced taxation of dividends and shares in profit at the rate of 12%. The withholding tax (WHT) will apply on payments of dividends and profit shares when they are made to:

- a foreign shareholder or
- an individual (natural person).

Changes in the Value-added Tax (VAT) Act

The general VAT rate has increased from 23% to 25%.

The following goods are taxed at a preferential 10% VAT rate:

- Eatable oils and fat of animal and vegetable origin.
- Children's food and processed cereal based foods for infants and small children.
- Water delivery, except for water in bottles and other packaging on the market.
- White sugar from cane or beet.

Input VAT is not deductible for:

- the purchase of goods and services for entertainment purposes or
- purchase and rental of cars and other means of personal transport, vessels for leisure, and airplanes, including purchase of all goods and services related to those goods. However, this provision does not apply if the cars, vessels, and aircrafts are used for performing business activity of transportation of goods and passengers, rent, or further sales.

Fines imposed for the responsible person of the taxpayer are increased up to the amount of 50,000 Croatian kuna (HRK), depending on the type of breach.

Taxes on corporate income

Profit tax is paid at a flat 20% rate by enterprises engaged in independent activities on a long-term basis for the purpose of deriving profit, branches of foreign enterprises, enterprises that control shares in capital (unless the object of investment itself pays profit tax), and natural persons who choose to pay profit tax instead of personal income tax.

The profit tax base is the accounting profit adjusted for deductions and disallowed items. Croatian residents pay profit tax on profit derived in Croatia and abroad, and non-residents (e.g. branches) pay profit tax only on profits derived in Croatia. The tax base also includes gains arising from liquidation, sale, change of legal form, and division of the taxpayer where it is determined at the market rates.

Payments into voluntarily pension funds paid by an employer for an employee under certain conditions prescribed by Corporate Income Tax Act are also considered expenditures.

Expenditures are not considered to be expenditures if they are not related to the taxpayer's business activity.

The profit tax base is reduced by the following items:

- Income from dividends and profit sharing.
- Unrealised profits from value adjustments of shares (increase of financial asset value), if these were included as profit in the profit and loss (P&L) account.
- Income from collected written-off claims that were included in the tax base in the previous tax periods, but not excluded from the tax base as recognised expenditure.
- The amount of depreciation not recognised in previous tax periods, up to the amount prescribed by the Corporate Income Tax Act.
- The amount of tax relief or tax exemption in line with special regulations (i.e. costs of education, costs of research and development (R&D), costs of a new employee's salary).
- For reinvested profit, other than that earned in the banking or the financial non-banking sector.

The profit tax base is increased by the following items:

- Unrealised losses from value adjustments of shares (decrease of financial asset value), if these were included as expenses in the P&L account.
- The amount of depreciation in excess of the amounts prescribed by the Corporate Income Tax Act.
- 70% of entertainment costs (food and drink, gifts with or without the printed firm logo or product brand, and expenses for vacation, sport, recreation and leisure-time, renting cars, vessels, airplanes, and holiday cottages). Entertainment costs do not include the costs of goods and merchandise adapted by a taxpayer for business entertainment purposes, labelled 'not for sale', and other promotional objects with the name of the firm or merchandise or other advertising objects (e.g. glasses, ashtrays, table cloths, mats, pencils, business diaries, cigarette lighters, tags) put to

Croatia

use in the selling area of the purchaser and given to consumers, provided that their value does not exceed HRK 80 per item.

- 30% of the costs, except insurance and interest costs, incurred in connection with owned or rented motor vehicles or other means of personal transportation (e.g. personal car, vessel, helicopter, airplane) used by managerial, supervisory, and other employees, provided that the use of means of personal transportation is not defined as salary.
- Asset shortfalls exceeding the amount prescribed by the Croatian Chamber of Economy or Croatian Chamber of Trades and Crafts, in accordance with the VAT Act and on the basis of which no personal income tax was paid.
- The costs of forced collection of tax and other levies.
- Fines imposed by competent bodies.
- Late payment interest charged between associated persons.
- Privileges and other economic benefits granted to natural or legal persons for the purpose of causing or preventing a certain event in favour of the company (generally related to commissions paid to parties acting on behalf of the taxpayer).
- Donations in excess of the amounts prescribed by the Corporate Income Tax Act.
- Expenditures identified during tax authority's audit, including VAT and contributions related to hidden profit payments and withdrawals from shareholders, company members, and physical persons performing independent activities taxable by profit tax.
- Any other expenditure not directly related to profit earning, as well as other increases in the tax base, which were not included in the tax base.

Local income taxes

A legal entity that is liable to pay profit tax and is registered for the performance of the business activity may be subject to tax on trade name at the amount of up to HRK 2,000, depending on the decision of the municipality or city.

Corporate residence

In terms of Corporate Income Tax Act, residents are legal or natural persons whose seat is recorded in the Register of Companies or other register in Croatia, or whose place of effective management and control of business is in Croatia. Residents are also entrepreneurs/natural persons with domicile or habitual residence in Croatia, whose business activity is recorded in a register or other records.

A non-resident is any person who does not satisfy one of the requirements referred to above.

Permanent establishment (PE)

Definition of a business unit of a non-resident is based on the Organisation for Economic Co-operation and Development (OECD) guidelines, which provides that a non-resident's business unit is a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources or construction site or project for a period longer than six months, including agents acting in its name, having the right to conclude contracts or hold stock of products which it distributes on the Croatian market in the name of a foreign entrepreneur. The business unit of a non-resident also includes the performance of services (i.e. advisory and business consulting services) for the same or a related project, which lasts for more than three months in a 12-month period.

Other taxes

Value-added tax (VAT)

The general VAT rate is 25%.

VAT is a consumption tax and has a neutral effect on enterprises by operation of the input and output mechanism. Accordingly, the tax burden is borne by the final consumer.

VAT returns and payments

A VAT-registered entity must calculate its VAT liability or refund and submit a monthly (by the end of the following month) VAT return to the relevant Tax Authority Office or a quarterly VAT return (by the end of month following the quarter) if the taxpayer is classified as small (annual turnover below HRK 300,000). An annual VAT return must be submitted by 30 April of the following year.

Where the amount of input tax credits exceeds the entity's VAT liability, a taxpayer is entitled to a refund of the difference or may choose to use the difference as a VAT prepayment.

VAT paid to the customs office at the time of import can be credited to the taxpayer's VAT account and offset against any domestic VAT liability. A VAT entity must self-assess VAT on imported services provided by a foreign entity. This VAT can be reclaimed through the VAT return as described above.

Determination of VAT taxpayers

VAT taxpayers are defined as entrepreneurs that deliver goods or perform services in Croatia. An 'entrepreneur' is a legal entity or a natural person that continuously and independently performs an activity for the purpose of deriving profit. In addition to those that may be regarded as 'normal' taxpayers, domestic enterprises receiving imported services from foreign enterprises and legal entities and individuals that issue invoices or receipts including VAT without authorisation are also liable to pay VAT.

A taxpayer is required to register for VAT where turnover in the previous year exceeded HRK 85,000. Voluntary registration is also possible.

Foreign entrepreneurs may also become VAT registered in Croatia through a tax representative. This will entitle them to reclaim input VAT incurred in Croatia.

In addition to foreign individuals, foreign legal entities are now also entitled to claim a VAT refund under reciprocity agreement terms.

Determination of VAT base

The VAT base for goods and services supplied domestically is the consideration received. Where no consideration is provided, for instance where goods are exchanged, the VAT base is the market value of the good or service. The VAT base of imports is the customs value as prescribed by customs regulations, increased by customs duties, import duties, special taxes, and other fees paid during customs clearing.

VAT-exempt supplies

VAT-exempt supplies are similar to those contained in the European Union's (EU's) Sixth Directive and include rental of residential property (with some exceptions); granting of credits and credit guarantees; transactions related to bank accounts, interest, winnings from special games of chance in casinos, slot machine clubs, and

Croatia

other forms of gambling; supplies of domestic and foreign legal tender, securities and shares, and supplies of gold by the central bank.

Other exemptions include the following:

- Services and deliveries of goods by public institutions in the field of culture, such as museums, galleries, archives, libraries, theatres, religious communities and institutions, primary and secondary schools, universities, and student catering and boarding institutions.
- Medical services, including services conducted by doctors, dentists, nurses, physiotherapists, and biochemistry laboratories engaged in private practices; services of medical care performed in healthcare institutions; and services performed by social care institutions and child and adolescent care institutions.
- Supplies (transfers) of real estate (land, buildings, parts of buildings, housing premises, and other structures) with the exception of newly built buildings.
- Temporary imports of goods which are exempt from customs duty.

Zero-rated supplies

The following supplies are zero-rated or 'VAT free' under the Croatian VAT legislation:

- Bread and milk, including baby food used as a substitute for mother's milk.
- Books of a scholarly, scientific, artistic, cultural, and educational character as well as school textbooks (primary, secondary, and tertiary education, including materials printed on paper and other media, such as CD-ROMs, video cassettes, and audio tapes).
- Certain medicines and surgical implants.
- Scientific journals.
- Services rendered by cinemas.

Reduced-rate services

There is a reduced rate of 10% for services related to the following:

- Organised stays (accommodation or accommodation with breakfast, full or half board, in all kinds of commercial hospitality facilities) and agency fees with respect to the above mentioned services.
- Daily and periodic newspapers and magazines (with the exception of those that consist entirely of advertisements or are used mainly for advertising purposes).
- Eatable oils and fat of animal and vegetable origin.
- Children's food and processed cereal based foods for infants and small children.
- Water delivery, except for water in bottles and other packaging on the market.
- White sugar from cane or beet.

Electronic invoices

An electronic invoice is defined as an invoice issued in a form of electronic document, provided that there is consent from the receiver to accept such invoice. An electronic invoice is also deemed to be the electronically issued document signed with the electronic signature.

An electronic invoice is also an invoice issued by one of the following methods:

- Via electronic data exchange, if the contract on exchange enables the use of procedures guaranteeing the authenticity of invoices and integrity of data content on the invoice.

- Using any method of business control that enables a link of invoice with deliveries of goods and services and with other business documents; and authentication of origin and integrity of the contents by an agreed process of issuing and receipt of an invoice.

The above mentioned methods have to meet the following conditions:

- Ensured authenticity of origin of the invoice so that the recipient can unambiguously determine who it was sent by.
- Ensured integrity of the contents of the invoice in a way that applied technologies and processes that make it impossible to change the data.
- Ensured authenticity of origin and integrity of the invoice contents during the transfer of accounts electronically from the issuer to the recipient.
- Ensured readability and visual accounts and user-friendly display of issued invoice on a computer screen or other electronic devices as well as on paper.
- Visible timing and the address of dispatch and receipt of such invoice.

Issuance, receipt, or any other action related to an electronic invoice can be performed through an information agent/intermediary.

Electronic invoices have to be stored in a genuine electronic form as they have been issued; they should not be modified, and the taxpayer has to provide insight into them upon the Tax Authorities' request.

Provisions of VAT legislation relating to physical invoices also apply to electronic invoices.

Custom duties

The general customs duty rate is 10%. However, it varies depending on the type and the origin of imported goods, as prescribed by the Customs Tariff. The Customs Tariff is based on the Harmonized Commodity Description and Coding System (HS Nomenclature).

Excise duties

There are a number of excise duties levied on specific products. They are levied at a fixed amount and are payable by the producer or importer. VAT is applied first, after which the fixed amounts are added.

- Oil derivatives: Tax ranging from HRK 110 to HRK 3,600 per 1,000 litres.
- Tobacco products: Tax on cigarettes may reach up to HRK 180 per 1,000 pieces plus 30% proportional special (excise) tax from retail price; for cigars HRK 1,100 per 1,000 pieces; for cigarillos HRK 220 per 1,000 pieces; and HRK 234 per kilogram for tobacco (HRK 136 prior to 1 January 2011).
- Beer: HRK 40 per 1% volume fraction of the actual alcohol contained in one hectolitre of finished product.
- Soft drinks: HRK 40 per hectolitre for domestically produced brands and imported soft drinks. Some soft drinks, including mineral water and natural fruit juices, are exempt.
- Alcohol:
 - Excise duty on products with the volume of actual alcohol content at 15% and higher is paid in the amount of HRK 800 per hectolitre of finished product.
 - Excise duty on products with the volume of actual alcohol content of less than 15% is paid in the amount of HRK 500 per hectolitre of finished product.

Croatia

- Excise duty on ethyl alcohol is to be paid in the amount HRK 5,300 per hectolitre of pure alcohol.
- Imported coffee: HRK 5 to HRK 20 per kilogram.
- Passenger cars and motor cycles: from 13% to HRK 177,500 plus 63% of the amount exceeding HRK 500,000.
- Imported boats and aircrafts: from 5% to HRK 445,000 plus 16% of the amount exceeding HRK 4 million.
- Luxury products: 30% of the sales value of the product without VAT.
- Liability and comprehensive road vehicle insurance premiums: for obligatory motor vehicle insurance premium, 15% of the contractual amount; and for comprehensive motor vehicle insurance premium, 10% of the contractual amount.

Property taxes

There are no property taxes in Croatia.

Real estate tax

The acquisition of real estate is subject to taxation. 'Real estate' includes agricultural, construction, and other land as well as residential, commercial, and other buildings. Transactions include the sale, exchange, and any other means of acquiring real estate for consideration.

Tax is charged at 5% of the market value of the real estate on the contract date and is paid by the acquirer.

Stamp tax

There are no stamp taxation provisions in Croatia.

Chamber of Commerce contribution

Employers pay a mandatory contribution to the Croatian Chamber of Commerce. The amount varies between HRK 55 to HRK 5,500 depending on company size and 0.0056% of total income.

Branch income

Foreign corporations carrying on business in Croatia are taxed on their Croatian-source income at a 20% rate.

Income determination

Inventory valuation

Inventories are generally valued at the lower of their acquisition cost or net realisable value. Taking into consideration the accounting principles set out in the Accounting Act and the International Accounting Standards (IAS), a company can choose to adopt the most favourable method.

Capital gains

Capital gains or losses are covered by the profit tax regime. They are either an increasing or decreasing item to the profit tax base.

Dividend income

Dividends and profit shares are taxed at the WHT rate of 12%. This applies to all non-residents until Croatia becomes a part of the European Union.

Dividend and profit shares payments made to resident companies are not taxable.

Interest income

Interest income is taxable at the rate of 20% as a part of total income stated in the P&L account.

Deductions

Depreciation

Most companies depreciate assets on a straight-line basis; this is because depreciation calculated this way, at the prescribed rates, is recognised for tax purposes. Companies are, however, free to use any depreciation method defined in the IAS and to estimate the useful lives of all fixed assets in accordance with their accounting policies.

Prescribed annual depreciation rates are as follows:

Assets	Depreciation period (years)	Depreciation rate (%)
Buildings and ships of over 1,000 gross registered tonnage (GRT)	20	5
Basic herd and personal cars	5	20
Intangible assets, equipment, vehicles (except personal cars), and machinery	4	25
Computers, computer hardware and software, mobile telephones, and computer network accessories	2	50
Other non-mentioned assets	10	10

However, depreciation expenses in excess of the amount allowed for tax purposes are taxable. The value adjustment of tangible fixed assets rarely occurs in practice, except in the case of financial assets and claims.

The Corporate Income Tax Act no longer allows taxpayers to wholly write off plant and equipment acquired or built during the tax period. The cost of depreciation of assets which are not used for business purposes is not deductible.

Plant and equipment are taken to be acquired in the period in which it is installed or ready for use. Plant and equipment includes: tools of trade, information technology infrastructure including software, furniture and fittings, and motor vehicles (excluding vehicles for personal use).

If the taxpayer writes off a portion of a depreciable asset, the remaining undepreciated portion will be depreciated at the rate prescribed by law. According to the Corporate Income Tax Act, the taxpayer can double the depreciation rates.

Land and forests (renewable resources) are not depreciated.

Financial assets, cultural monuments, and art work are not depreciated.

Depreciation of vessels, aircrafts, condominiums, and vacation houses can be tax deductible only if certain conditions are met.

Croatia

Goodwill

Goodwill paid on the acquisition of a business must be amortised over five years. It is usually the difference between the estimated statistical value of assets and liabilities and their book value.

However, the amortisation of goodwill arising from mergers and acquisitions is not recognised for taxation purposes.

Start-up expenses

When establishing a business in Croatia, start-up expenses consist of minimum of share capital of EUR 2,500 and other administrative and lawyer's costs up to EUR 1,500. The start-up expenses depend on the amount of share capital. Start-up expenses are included in operating costs for profit tax purposes.

Interest expenses

According to the Corporate Income Tax Act, late payment interests are tax deductible, unless those interests are due to related companies transactions, no matter if the late payment interests are charged by resident of non-resident related parties.

Interest on loans is also deductible, up to the amount prescribed by the Ministry of Finance or Croatian National Bank (prescribed interest rate in Croatia is 7%) and if compliant with thin capitalisation rules (4:1).

Bad debt

Value adjustments arising from the adjustment of the value of claims against customers for goods delivered and services rendered are recognised as deductible expenditures if more than 60 days elapsed between the maturity of the claim and the end of the tax period, and if the claims were not paid up to 15 days before filing the tax return. The claim needs to be recorded in the business books as revenue, and all measures for debt collection have to be taken (legal actions) in accordance with best management practices.

Charitable contributions

Donations in a form of gifts in kind or cash for cultural, scientific, educational, health, humanitarian, sports, religious, environmental, or other socially beneficial purposes are tax deductible by 2% of the revenues generated in the previous year. Exceptionally, the amount may exceed 2% of the revenues generated in the previous year, provided that it is granted pursuant to the decisions of competent ministries on the financing of special programs and activities.

Fines and penalties

Fines and penalties prescribed by Croatian administrative and judicial authorities are considered to be non-deductible expenses.

Net operating losses

Tax losses may be carried forward and utilised within five years following the year in which the losses were incurred and must be utilised in the order in which they occurred. The losses may not be transferred to any third entity except in the case of merger, de-merger, or acquisition. Tax losses cannot be carried back.

Utilisation of tax losses from previous years in case of statutory changes of legal entities is prescribed in detail in the Corporate Income Tax Act, limiting the entitlement where the legal predecessor is inactive and in case of a significant change in business activity or ownerships structure.

Payments to foreign affiliates

The treatment of payments made to foreign affiliates is dealt with through the mechanism of the profit tax base. The profit tax base is increased for any concealed profit payments made. The Tax Administration may audit the expenditure of non-resident taxpayers, examining expenditure on goods and services abroad as well as management, intellectual property, and other fees and payments that may have the character of a profit transfer. If the Tax Administration discovers that transactions have been used to conceal profit transfers, the difference between the declared price/fee and the average market price/fee will be added back into the taxpayer's tax base.

Group taxation

There are no group taxation provisions in Croatia.

Transfer pricing

Prices between a Croatian entity and its foreign related parties must be set at fair market value (the arm's-length principle). Provisions on transfer pricing and interests are also introduced in transactions between resident related parties if one of the parties has:

- beneficial tax status (i.e. reduced tax rates) or
- entitlement to carry forward tax losses from previous years.

If the prices between related entities are different than those between non-related resident and non-resident entities, the tax base must be calculated with prices that would be charged between unrelated companies. In order to determine the market value of the related party's transaction, the following methods can be used:

- Comparable uncontrolled price.
- Resale price.
- Cost plus.
- Profit split.
- Net-profit.

Thin capitalisation

Interest on loans from a shareholder or a member of a company holding at least 25% of shares or voting power of the taxpayer will not be recognised for tax purposes, if the amount of the loan exceeds four times the amount of the shareholder's share in the capital or their voting power. Interest on loans obtained from financial institutions is exempt from this provision. A third-party loan will be considered to be given by a shareholder if it is guaranteed by the shareholder.

Tax credits and incentives

The Investment Incentive Act provides the following relief and incentives for taxpayers.

Investment incentives

Investment incentives are usually organised as corporate tax credits applicable for up to ten years upon completion of various conditions.

General incentives apply for investors profit earned as a result of an investment under the following conditions:

Croatia

Investment amount (EUR*)	Tax benefit rate (%)	Period (years)	Necessary to employ (employees)
From 300,000 to 1.5 million	50	10	10
More than 1.5 million	65	10	30
More than 4 million	85	10	50
More than 8 million	100	10	75

* euros

Tax benefits cannot exceed investment amount.

Incentives for investments in technological development and innovation activities and strategic business support activities

A non-refundable money subsidy in the amount of up to 5% of justified costs related to investment in technological development and innovation activities and strategic business support activities (maximum amount of up to EUR 500,000) can be granted to a company, provided that equipment bought is high technology equipment.

Also, for opening new work places as part of investments in technological development, there is an increase of the subsidy in the amount of 50% related to costs for opening new work places, or 25% concerning investments in strategic business support activities (maximum amount of EUR 3,000 per employee).

Incentive for investment in significant projects

A non-refundable money subsidy in an amount of up to 5% of justified costs related to investment in significant projects (maximum amount of up to EUR 1 million) may be granted to a company, providing that certain conditions are met.

A significant project investment consists of high economic activity, such as the construction of a new plant or industrial facility, initiation of a new economic activity, or new technology development, with investment in assets greater than EUR 15 million. At least 100 workplaces must be opened upon expiration of one year of investment.

Custom free zones

Taxpayers in custom free zones can take advantage of incentives prescribed in the Investment Incentives Act. Taxpayers that were engaged in or participating in the building of infrastructure within a zone, in projects with a value exceeding HRK 1 million before July 2008, and that did not fully utilise the incentive prescribed by the Investment Incentive Act, are exempt from paying profit tax until the full amount has been used, but no later than 31 December 2016.

Employment incentives

Employment benefits occur in a form of non-refundable money subsidy in relation to justified costs according to the unemployment rate of the county as follows:

Unemployment rate	Non-refundable cash subsidy (%)	Maximum costs per employee (EUR)
Up to 10%	10	1,500
10% to 20%	15	2,000
More than 20%	20	3,000

Research and development (R&D) incentives

Registered scientific organisations, centres of scientific excellence, individual scientists, and groups of scientists are entitled to apply for the state subsidies and tax incentives for scientific research, basic research, applied R&D research.

Depending on the type of research (e.g. scientific, basic, applied research, or technical feasibility) and size of entrepreneur (i.e. small, medium, or large entrepreneur, according to the Accounting Act), the percentage of the costs covered by state subsidy can vary between 25% and 100%. Additionally, the profit tax base can be decreased (depending on the same criteria) by up to 150% of the amount of the costs covered by the state subsidy, where the profit tax liability decrease is granted up to the amount of the percentage of the costs covered by state subsidy.

Foreign tax credit

If a domestic taxpayer has paid tax abroad on profit derived abroad, the tax paid can be included in its profit tax return, up to the profit tax rate in Croatia. The amount of paid tax abroad, which can be offset with the domestic tax, is calculated in the following way:

- The domestic tax rate is charged on the revenues/profit derived from abroad, and the result represents the highest amount of tax which can be offset with the domestic tax.

If the amount of paid tax abroad was charged at the rate lower than 20%, the actual amount of foreign tax paid can be offset with the domestic tax.

Withholding taxes

Taxpayers who pay fees for the use of intellectual property rights (the right to reproduction, patents, licenses, copyrights, designs or models, manufacturing procedures, production formulas, blueprints, plans, industrial or scientific experience, and such other rights); fees for market research services, tax consulting services, legal, auditing, or such other services; or interest to foreign legal entities, natural persons excluded, shall, when making the payment, calculate and withhold tax at a rate of 15%. Exceptionally, WHT on dividends and shares in profit are taxed at the rate of 12%

If a country has a double tax treaty (DTT) signed with Croatia, WHT rate are lowered. There is specific application that needs to be fulfilled in order to benefit from a DTT between countries.

The following countries have a DTT with Croatia:

Recipient	Royalties (%)	Interest (%)	Dividends and shares in profit	
			% of shares	Tax rate (%)
Albania	10	10	Regardless of the share	10
Armenia	5	10	up to 25	10

United Kingdom	10	10	up to 25	15
			25 and more	5

In addition to the current WHT rates of 15% and 12%, an increased rate of 20% applies to all services paid to foreign entities whose place of seat or management is in a country with a profit tax rate below 12.5%. This provision does not apply to EU member countries.

The following countries have a profit tax below 12.5%:

- Andorra
- Anguilla
- Antigua and Barbuda
- Aruba
- Bahamas
- Bahrain
- Belize
- Bermuda
- British Virgin Islands
- Cayman Islands
- Cook Islands
- Dominica
- Gibraltar
- Grenada
- Guernsey
- Isle of Man
- Jersey
- Liberia
- Liechtenstein
- Marshall Islands
- Monaco
- Montserrat
- Nauru
- Netherlands Antilles
- Niue
- Panama
- Saint Kitts and Nevis
- Saint Lucia
- Saint Vincent and the Grenadines
- Samoa
- Seychelles
- Turks and Caicos Islands
- US Virgin Islands
- Vanuatu

Note that tax is not withheld from interest payments on the following:

- Commodity loans for the purchase of goods used for carrying out a taxpayer's business activity.
- Loans granted by a non-resident bank or other financial institution.
- To holders of government or corporate bonds who are non-resident legal persons.

Tax administration

Taxable period

The profit tax shall be assessed for a period which is normally a calendar year. The tax administration may agree, at the request of a taxpayer, that the tax period should not correspond with the calendar year, where the tax period may not exceed 12 months. The chosen tax period cannot be changed for five years.

Tax returns

All profit tax taxpayers are obliged to submit an annual profit tax return to the tax authorities no later than four months after the end of the tax period for which profit tax is assessed.

The Ministry of Finance administers taxation matters through the Tax Administration and the Financial Police. These organisations have responsibilities and powers defined by law.

Payment of tax

Every taxpayer is required to make monthly profit tax instalments (on the last day of each month) on the basis of the previous year's tax return.

In the first year of operation, taxpayers are not obliged to pay any profit tax advances.

Profit tax is assessed at the end of the calendar year, and the assessed amount, less any instalments made, is payable by the day of submission of the tax return.

Statute of limitations

The Croatian tax authority is entitled to review the tax returns of a company within three years following the end of the year in which the tax return is submitted. This period may be extended to a maximum of six years where the three-year period has been interrupted by actions taken by the tax authority, such as a tax audit. Where the tax authority considers that there may be a significant impact from the results of the investigation, earlier years may be examined. This means that, in theory, even the closed years can be reopened and additional taxes can be imposed.

Topic of focus for tax authorities

Tax authorities are focusing on business relations with related parties.

Significant developments

Recent tax developments

On 1 January 2012, the corporate profit tax rate was reduced from 34.5% to 27.5%.

The rate of the turnover tax increased from 5% to 6% on 1 January 2012.

It is now also possible for corporations established according to Curaçao law to opt for a transparent status. A transparent company will be treated as a partnership for tax purposes, and the shareholders will be treated as partners in that partnership.

These changes are part of an overall plan to reduce the corporate profit tax rate in a shift from direct to indirect tax and to broaden the tax base in general. Further changes are expected to enter into force in 2013, which may simplify the requirements to apply for certain investment incentives and incentives that comply with international fiscal standards and will improve the competitiveness of the financial services sector of Curaçao.

Transitional legislation

While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

Taxes on corporate income

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following Curaçao-source income:

- Income attributable to a permanent establishment (PE).
- Income from real property situated on Curaçao.
- Interest on loans secured by a mortgage on property situated on Curaçao.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 27.5%. The tax rate for the years prior to 2012 was 34.5%.

Special minimum rates apply to the taxable income of certain companies:

Type of company	Rate (%)
E-zone companies	2
New industries and hotels	2
Land development companies	2

Shipping business

Shipping companies are subject to the general profit tax rate of 27.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates provided in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general profit tax rate of 27.5%.

Over (tons)	Not over (tons)	Profit per net ton (ANG*)
0	10,000	2.00
10,000	25,000	1.35
25,000		0.60

* Antilles guilders

Exempt companies

Please see the *Tax credits and incentives section for information on tax exempt companies.*

Companies under transitional offshore rules

The transitional rules distinguish three types of offshore companies.

- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and which had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in

Curaçao

a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management on Curaçao is considered to be a resident. A company that has been established on Curaçao will always be considered a resident of Curaçao.

Offshore entities on Curaçao must have a local managing director. This function is easily provided by one of the many trust companies established on Curaçao.

Permanent establishment (PE)

The definition of a PE on Curaçao is generally in line with the Organisation for Economic Co-operation and Development (OECD) model.

Transfer of legal seat

Legislation has been enacted under which a Curaçao company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction), and a foreign company is allowed to migrate to Curaçao.

Other taxes

Turnover tax

A 6% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company on Curaçao. Prior to 1 January 2012, the turnover tax rate was 5%.

On 1 January 2012, two amendments were made to the turnover tax:

- In addition to services rendered on Curaçao, if a foreign entrepreneur performs a service from abroad to a customer on Curaçao, this service will now also be subject to turnover tax.
- The business concept has been extended. Non-commercial rental of property will now also be subject to turnover tax. Rental of a dwelling that is the principal residence of the tenant is exempt from tax.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Electricity and water.
- Certain services to non-residents.
- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.

An entrepreneur liable to turnover/sales tax must file a declaration, with the Tax Inspectorate before the 16th day of the month following the month concerned, at the Tax Collector's office.

Customs duties/import tariffs

Import tariffs vary in general between 5% and 27%. There is also a range of products that may be imported without import duties. Below, we provide some examples, but we note that in each category there may be specific exemptions to the general tariff.

- Basic food products are tax exempt.
- Other food products are generally taxed at a rate of 5.5% up to 13%.
- Books, computers: 0%
- Furniture: 22%
- Cars: 27%

Excise taxes

Excise tax is due on gasoline; alcohol, with different tariffs for liquor and beer; and tobacco.

Some examples include:

- ANG 0.4725 per litre of gasoline.
- ANG 23 per volume percent of alcohol per hectolitre of distilled products.
- ANG 14.55 per 100 cigarettes (imported).

Land tax

A land tax is levied on real estate located on Curaçao at an annual rate of 0.3% on the value of the land.

Transfer taxes

The transfer of immovable property located on Curaçao is subject to a 4% transfer duty.

Stamp taxes

A stamp tax is levied in two ways, in the form of stamps and as stamped paper.

Stamp tax applies to documents such as government licences, leases, agreements, and court documents. The rate depends on the type of document. As an example, the stamp tax for bank checks is ANG 0.25. The general rate for each page of a legal document is ANG 5.

Branch income

Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks on Curaçao. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

Curaçao

Income determination

Inventory valuation

Both the last in first out (LIFO) and first in first out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

Capital gains

Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation (*see Dividend income below*).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired asset. The reserve may be maintained for a maximum of four years. If the reserve has not been fully applied, the remainder will be liable to taxation in the fourth year.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

Dividend income

In general, a full participation exemption applies to all local as well as foreign participations for dividends as well as for capital gains. However, it is now required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax on Curaçao.

Non-portfolio investment clause

A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

Subject-to-tax clause

A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 63% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.17% (37% x 27.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

Immovable property

The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

Definition of dividend

A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

Minimum cost-price threshold for participations

The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

Interest income

There is no specific regime for interest received. Interest income is therefore taxed at the same rate as other income.

Foreign income

A Curaçao corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

Curaçao has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE in Aruba, St. Maarten, or the Netherlands, including the Caribbean Netherlands, are tax exempt on Curaçao based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

The profits of a branch with more than 50% low-taxed passive investment income will only be 63% exempt. In case of a loss, 63% of the loss will not be deductible. The branch profit is in line with the treatment of participation profits and losses.

Foreign real estate is always deemed to be part of a PE and, as such, is fully tax exempt.

Deductions**Depreciation and amortisation**

Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets' depreciable basis may be taken. The assets' remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

The tax department has issued the following estimated depreciation table.

Curaçao

Assets	Rate (%)	Residual value (%)
Buildings	2-2.5	10
Renovation	10	0
Inventory	10-20	10
Computer		
Hardware	33-50	0
Mainframe	10-12.5	0
Machinery and installations	10	10
Transportation		
Cars	20	10
Rental cars	33	15
Trucks and buses	10	15
Start-up costs	20	0
Goodwill	20	0

Start-up expenses

Start-up expenses should be capitalised and may be depreciated, comparable to goodwill, over five years.

Anti-abuse rules regarding interest and loans

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction, or in case the interest in the hands of the recipient is taxed at an effective tax rate that is considered adequate by Curaçao standards, the interest may be deductible.

In case of intra-group financing, for profit tax purposes the amount of interest paid or received should be based on arm's-length principles.

In case of profit participating loans, the interest will be qualified as dividend and will not be deductible. Interest received on such loans may meet the definitions of the participation exemption if the creditor also holds a qualifying participation in the debtor.

A write-down of an intra-group loan may be denied in case of a profit-participating loan, or if at the time of issuance it was foreseeable that the loan would never be repaid fully.

Charitable contributions

Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

Fines and penalties

Fines and penalties are not deductible in cases where they have been imposed by a criminal court in Curaçao, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a Government agency in Curaçao.

Taxes

Taxes, other than the corporate profit tax itself, incurred in the course of doing business are deductible.

Bribes, kickbacks, and illegal payments

Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

Net operating losses

Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

Payments to foreign affiliates

The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

Group taxation**Fiscal unity**

The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries could qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of Curaçao, the Netherlands, Aruba, or St. Maarten. The companies which invoke this relief must have their place of management on Curaçao.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident on Curaçao.

Transfer pricing

There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm's length.

Thin capitalisation

In cases where a company receives a loan from an associated exempt private limited liability company (*Besloten Vennootschap* or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.

Tax credits and incentives

Foreign tax credit

A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the Curaçao profit tax that is attributable to that foreign income.

Inward investment and capital investment

There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

Investment allowance

For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (for new buildings, 12%) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year, for businesses operating on Curaçao.

Accelerated depreciation and tax rollover reserve

An accelerated deduction of one-third of the assets' depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

Tax exempt company

It is possible to elect tax-exempt status for a BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights and other comparable property and usage rights have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of Curaçao. A profit tax regime is comparable to that of Curaçao if the foreign tax regime provides for a profit tax rate of at least 13.75% (50% of the Curaçao tax rate).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all EU and OECD member states and all jurisdictions with which Curaçao has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

Independent expert

Currently, an independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of Curaçao, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.

Ocean shipping companies

Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of Curaçao. As a result, the overall effective tax rate is 9.66%.

E-zone companies

An e-zone is an area designated for international trade and services. The activities of companies established in an e-zone must be focused on trading or providing services to companies located outside of Curaçao. There are two types of e-zones:

- Designated areas where, amongst others, goods can be stored, processed, machined, assembled, packaged, displayed, and released or handled in any other way. On Curaçao, there are two of this type of e-zone that are dedicated to goods, one located at the harbour, and the other at the airport.
- E-zones where international trade and trade supportive services may be performed, supported by electronic communication and information equipment (e-commerce). There are several e-commerce zones on Curaçao.

E-zone companies are subject to a minimum 2% corporate profit tax until 1 January 2026. They will be granted special facilities regarding turnover tax.

New industries and hotels

New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

Land development companies

Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of Curaçao.

Private foundations

Private foundations are exempt from Curaçao profit tax, and their distributions are exempt from Curaçao gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor's country may be applicable.

The 'private' foundation is a variant of the long-existing 'common' foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. If, however, a private foundation does realise profits from a business or enterprise, that profit will be taxed at the normal tax rate of 27.5% (as of 1 January 2012). Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

It is possible to opt for a taxable status for a private foundation. In that case, its profits, other than those arising from active business activities, will be taxed at a rate of 10%.

Curaçao

Transparent companies

As of 1 January 2012, it is now possible to opt for a transparent status. This option is only available to a BV or a limited liability company (*Naamloze Vennootschap* or NV) established according to Curaçao law. It is, however, possible to convert a corporation that has been established elsewhere to a BV or NV, at which time the transparent status can be requested. Newly established companies can request the status from the start, if the request is filed with the Inspectorate within three months. Existing companies can request the status as of the next following year.

A transparent company will be treated as a partnership for tax purposes, and the shareholders will be treated as the partners in that partnership.

Withholding taxes

Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time on Curaçao.

Tax treaties

Curaçao currently has tax treaties in effect with Aruba, the Netherlands, Norway, and St. Maarten. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. Furthermore, tax information exchange agreements (TIEAs) have been signed with several countries, including Australia, Canada, Denmark, Mexico, New Zealand, Spain, Sweden, and the United States. As a result, Curaçao, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

Tax arrangement for the Kingdom of the Netherlands (TAK)

As part of the Kingdom of the Netherlands (TAK), Curaçao is party to a federal tax agreement with the Netherlands, Aruba, and St. Maarten. Subject to this treaty, dividends, interest, and royalties paid out to a Curaçao company may qualify for reduced rates of WHT in the subject countries.

Dutch dividend WHT is 15% if the Curaçao company owns less than 25% of the Dutch company. On Curaçao, only 5% of these dividends are taxed, at a rate of 34.5%, which results in an effective profit tax rate of 1.725%.

If the Curaçao company's interest is 25% or more, Dutch WHT can be reduced to 8.3%. This tax is then paid, under a special procedure, to the Curaçao tax authorities. These dividends are fully exempt from profit tax on Curaçao.

Capital gains derived from shareholdings in Netherlands' corporations are fully exempt from profit tax on Curaçao, provided that the shareholding amounts to at least 25% interest in the corporation. If the shareholding amounts to less than 25%, the capital gain is tax exempt for 95%.

The WHT regime in the TAK also applies to the old Curaçao offshore companies.

The TAK is to be revised. Negotiations have already started between Aruba and Curaçao each with the Netherlands. In the end, the existing TAK will then be replaced by separate tax agreements between two countries (e.g. between Aruba, Curaçao, and St. Maarten each with the Netherlands), as well as separate agreements between the three

islands Aruba, Curaçao, and St. Maarten. The aim is to have the new agreements in place in 2013.

Tax administration

Taxable period

Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar year basis or on a different book-year. On request, this may also apply, for example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year-end).

Tax returns

A provisional return must be filed within three months after the end of the book-year. A final return must be filed within six months after the end of the book-year.

For the provisional return, no extensions are granted. For the final return, an extension may be requested. In general, no extensions will be granted for more than 12 months after the book-year.

Payment of tax

Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment. This means that if the book-year equals the calendar year, the provisional return is due before 1 April of the following year, and the final return before 1 July of the following year.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2011 was 100, then at the time of filing the provisional return for 2012, which is due before 1 April 2013, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2012 will be lower than for 2011, upon request, the estimated lower amount may be paid at the time of filing the provisional return.

At the time of filing the final return for the year 2012, which is due before 1 July 2013, the balance due must be paid, or if the total amount is less than the amount already paid up, a repayment will follow.

Audit cycle

As the profit tax is levied based on self-assessment, the tax department does not issue a final tax assessment. There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

Statute of limitations

A reassessment can be imposed until five years after the tax year. In cases where the tax payer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

Curaçao

Topics of focus for tax authorities

There are no specific topics of focus. In case an audit is started, each aspect may be investigated. Often the audit will not only focus on the profit tax, but also the other tax obligations, such as sales tax, wage tax, and social security premiums.

Other issues

Exchange controls

In general, exchange control regulations are very liberal for offshore companies. Offshore companies established on Curaçao can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.

Business combinations

The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

Significant developments

The Cyprus income tax office has recently given clarity on the minimum acceptable spreads of interest on related-party, back-to-back financing transactions involving Cyprus companies. *See The Cyprus financing company in the Tax credits and incentives section for a table of acceptable spreads.*

Further, the income tax law itself has been amended to provide generous exemptions from tax on income related to intellectual property (IP) (*see the Intellectual property [IP] regime in the Tax credits and incentives section for more information*), as well as accelerated tax depreciation on certain assets (*see Depreciation and amortisation in the Deductions section for more information*).

Arm's-length rules have also been relaxed (*see Transfer pricing in the Group taxation section for more information*).

As of 1 March 2012, the standard VAT rate in Cyprus increased from 15% to 17%.

Taxes on corporate income

All companies that are tax residents of Cyprus are taxed on their income accrued or derived from all sources in Cyprus and abroad. A non-Cyprus tax resident company is taxed on income accrued or derived from business activity which is carried out through a permanent establishment (PE) in Cyprus and on certain other income arising from sources in Cyprus.

The corporate income tax (CIT) rate in Cyprus is 10% on taxable income.

However, the Cyprus income tax law provides explicitly for a number of exemptions for many and varied types of incomes, profits, and gains of Cyprus-based corporations (*see the Income determination section for more information*).

Special contribution for defence

Special contribution for defence is imposed on certain income earned by Cyprus tax residents. Non-tax residents of Cyprus are exempt from this special contribution for defence.

Dividends generally are exempt from special contribution for defence, subject to certain rarely applicable limitations (*see Dividend income in the Income determination section*).

Cyprus

Interest received by close-ended or open-ended collective investment schemes (CIS) is never subject to special contribution for defence. Such interest is only taxed under CIT after deducting expenses at the standard CIT rate of 10%.

Interest received by other companies in the ordinary course of business, including interest closely connected to the ordinary course of business, is also only taxed under CIT after deducting expenses at the standard CIT rate of 10%.

When companies receive interest that does not satisfy the conditions prescribed immediately above, the interest is subject to special contribution for defence without expense deduction at the rate of 15%. Such 'passive' nature interest would, however, be exempt from CIT.

In addition to CIT of 10%, gross rental income reduced by 25% is subject to special contribution for defence at the rate of 3%.

Companies, partnerships, the government, or any local authorities that pay rents to Cyprus tax resident landowners should withhold special contribution for defence at source.

Tonnage tax

For ship-owning companies, the profits derived by the owner of a ship registered in the European Union (EU) or European Economic Area (EEA) (as well as other foreign jurisdictions, subject to conditions) from its operation are fully exempt from all direct taxes. The term 'owner' includes a bareboat charterer of a non-Cyprus flag vessel parallel registered in Cyprus. A similar exemption applies to charterers and ship managers.

Instead of CIT, ship owners, charterers, and managers pay tonnage tax on the net tonnage of the ships they own, charter, or manage. In addition, there is no tax on dividends paid at all levels of distribution by the above persons out of profits subject to tonnage tax and related capital gains on the sale of the ship and no capital gains tax on the sale or transfer of a ship, share in a ship, or shares in a ship-owning company. The same legislation also provides for income tax exemption of the salaries and benefits of the captain, the officers, and the crew aboard a Cyprus flag vessel.

This treatment applies until 2020 and is compulsory for Cyprus flag ship owners, but optional for other ship owners, charterers, and ship managers.

Local income taxes

There are no local government taxes on income in Cyprus.

Corporate residence

Only companies managed and controlled in Cyprus are treated as tax resident of Cyprus.

Permanent establishment (PE)

Cyprus domestic income tax legislation also explicitly provides for the determination of a taxable PE of a non-Cyprus tax resident company in Cyprus. These specific legislative provisions are in line with the relevant article of the Organisation for Economic Co-operation and Development (OECD) model treaty.

Other taxes

Value-added tax (VAT)

VAT is imposed on the provision of goods and services in Cyprus as well as on the acquisition of goods from the European Union and the importation of goods into Cyprus. Taxable persons charge VAT on their taxable supplies (output tax) and are charged with VAT on goods or services which they received (input tax).

As of 1 March 2012, the standard VAT rate in Cyprus is 17% (15% through 29 February 2012). Two reduced VAT rates, an 8% rate and a 5% rate, apply in Cyprus:

- The reduced VAT rate of 8% applies on accommodation, restaurant and catering services, as well as on certain local passenger transport services. As of 10 January 2011, the term 'restaurant and catering services' includes the supplies of prepared and unprepared foodstuffs and beverages that are accompanied by sufficient support services that enable the immediate consumption of the foodstuffs and beverages supplied.
- The reduced rate of 5% applies on foodstuffs, pharmaceutical products, books and newspapers, as well as on a variety of other goods and services which are beyond the scope of this summary. The reduced rate of 5% also applies, subject to conditions, on the sale of new buildings/houses to individuals/eligible persons, who will use them as their primary and main residences, provided the contract has been signed after 1 October 2011.

Exports from Cyprus are zero-rated (i.e. no VAT must be charged on the export, and the company is entitled to recover the relevant input VAT suffered). The services for the international transport of passengers as well as the transportation of goods either from or to countries outside the European Union are also zero-rated.

Supplies of goods to businesses resident in other EU member states are outside the scope of Cyprus VAT.

Certain education services, as well as the majority of financial, insurance, and medical services, are exempt from Cyprus VAT. Supplies of land and buildings also are exempt from VAT, unless the supply relates to new buildings before first use.

VAT registration

VAT registration is compulsory for business with:

- turnover in excess of 15,600 euros (EUR) during the 12 preceding months or
- an expected turnover in excess of EUR 15,600 within the next 30 days.

Business with turnover of less than EUR 15,600, or with supplies that are outside the scope of VAT but for which the right to claim the amount of the related input VAT is granted, have the option to register on a voluntary basis.

An obligation for registration also arises for businesses which make acquisition of goods from other EU member states in excess of EUR 10,251.61 during any calendar year.

In addition, as of 1 January 2010, an obligation for VAT registration arises for businesses engaged in the supply of intra-Community services for which the recipient must account for VAT under the reverse charge provisions. Furthermore, an obligation for VAT registration arises for businesses carrying out economic activities from the receipt of services from abroad for which an obligation to account for Cyprus VAT under

Cyprus

the reverse charge provision exists, subject to the registration threshold of EUR 15,600 per any consecutive 12-month period.

No registration threshold exists for the provision of intra-Community supplies of services.

Exempted products and services, and disposals of items of capital nature, are not taken into account for determining annual turnover for registration purposes.

Registration is effected by completing the appropriate application form.

VAT declaration and payment/return of VAT

VAT returns must be submitted quarterly, and the payment of VAT must be made by the tenth day of the second month that follows the month in which the tax period ends.

VAT registered persons have the right to request for a different filing period. Approval of the VAT authorities is required. The VAT Commissioner also has the right to request for a taxable person to file one's VAT returns for a different period.

Where in a quarter input VAT is higher than output VAT, the difference is refunded or is transferred to the next VAT quarters.

Immovable property tax

Immovable property is subject to property tax, which is levied on the market value of the property as of 1 January 1980, and is payable by the end of September each year.

The 2012 tax rates and bands vary as follows:

Property value as of 1 January 1980 (EUR)	Tax rate (%)
Up to 120,000	0
120,001 to 170,000	0.4
170,001 to 300,000	0.5
300,001 to 500,000	0.6
500,001 to 800,000	0.7
Over 800,000	0.8

Public property, buildings under preservation order, buildings of charitable organisations, and agricultural property are generally exempt.

Stamp duty

The general rule is that Cyprus stamp duty is imposed only on written contracts relating to assets located in Cyprus or to matters that will take place in Cyprus. The applicable rates are based on the value of each document and are 0.15% for the first EUR 170,860 and 0.20% thereafter, subject to an overall maximum of EUR 17,086 per contract.

Capital duty

Upon incorporation of the company

Upon incorporation of the company, capital duty is due on the authorised share capital at EUR 102.52 plus 0.6% of the authorised share capital.

As for the issued share capital, there is no stamp duty payable if the shares are issued at their nominal value. There is a flat duty of EUR 17.09 if the shares are issued at a premium.

Upon subsequent increases

Upon subsequent increases, capital duty is due on the authorised share capital at 0.6% of the nominal value of the additional share capital.

As for the issued share capital, EUR 17.09 is due on every issue batch, whether the shares are issued at a premium or not and irrespective of the number of shares issued every time.

Capital gains tax

Capital gains tax is imposed at the rate of 20% on gains arising from the disposal of immovable property situated in Cyprus and of shares in companies (other than companies whose shares are listed in any recognised stock exchange) that own immovable property situated in Cyprus. Liability is confined to gains accruing since 1 January 1980. The costs deducted from gross proceeds on the disposal of immovable property are its market value at 1 January 1980, or the costs of acquisition and improvements of the property, if made after 1 January 1980, as adjusted for inflation up to the date of disposal on the basis of the consumer price index in Cyprus.

Other expenses which are related to the acquisition and disposal of immovable property also are deducted, subject to certain conditions (e.g. interest costs on related loans, transfer fees, legal expenses).

Social security contributions

Employed persons are compulsorily insured under a state-administered social insurance fund. Contributions to the fund are borne by both employer and employee. The employer's contributions are made as a percentage of earnings to the following funds:

Funds	Employer contribution (%)
Social insurance fund	6.8
Redundancy fund	1.2
Training development fund	0.5
Social cohesion fund	2.0
Holiday fund (option for exception)	8.0

With the exception of the social cohesion fund, the maximum amount of monthly earnings on which the contributions are made is EUR 4,442 as of 1 January 2012. This maximum is usually adjusted for inflation annually at the beginning of each calendar year.

Special Contribution

As of 2012, the following Special Contributions are payable on the gross monthly incomes of individuals working within Cyprus:

Gross monthly emoluments from employment/pension (EUR)	Contribution (%) (1)
0 to 1,500	0
1,501 to 2,500	0

Cyprus

Gross monthly emoluments from employment/pension (EUR)	Contribution (%) (1)
2,501 to 3,500	2.5
	(minimum EUR 10)
3,501 to 4,500	3.0
Over 4,500	3.5

Notes

1. In the case of employed individuals, the recipient of the remuneration is liable for half the Special Contribution and the employer for the other half.

Branch income

The rate of tax on Cyprus branch profits is the same as on corporate profits. No further tax is withheld on transfers of profits on funds to a foreign head office.

Income determination

Inventory valuation

Inventories generally are stated at the lower of cost and net realisable value. Last in first out (LIFO) is not permitted for taxation purposes. First in first out (FIFO) is permitted. Conformity between book and tax reporting is not required.

Capital gains

Profits from disposals of corporate titles are unconditionally exempt from CIT. 'Titles' is defined as shares, bonds, debentures, founders' shares, and other titles of companies or other legal persons incorporated in Cyprus or abroad, and options thereon, as well as futures/forwards on titles, short positions on titles, swaps on titles, depositary receipts, repos, units in close-ended or open-ended CIS, international collective investment schemes (ICIS), undertakings for collective investments of transferable securities (UCITS), investment trusts and funds, mutual funds, real estate investment trusts (REITS), and units in stock exchange indices.

Capital gains on immovable property are taxed at a separate rate in Cyprus. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

All dividends received from other Cyprus companies are excluded from all taxes at all times, unless they are declared after the lapse of four years from the end of the year in which profits generated.

Dividends earned from foreign investments are exempt from income tax in Cyprus. Such dividend income is also exempt from special contribution for defence unless:

- more than 50% of the foreign paying company's activities result directly or indirectly in investment income and
- the foreign tax is significantly lower than the tax burden in Cyprus (i.e. less than 5%).

Note that where the Cyprus participation exemption on foreign dividend income is not available, then any foreign withholding tax (WHT) imposition on dividends paid to the

Cyprus company will be credited against the Cyprus flat special contribution for defence rate of 20% on such dividends. Furthermore, in some cases, an underlying tax credit will also be granted.

Stock dividends

A Cyprus corporation can distribute tax-free dividends of common stock (bonus shares) proportionately to all common stock shareholders.

Interest income

See *Special contribution for defence in the Taxes on corporate income section for a description of the tax treatment of interest income.*

Rental income

See *Special contribution for defence in the Taxes on corporate income section for a description of the tax treatment of rental income.*

Foreign income

Resident corporations are subject to tax on their worldwide income. However, foreign-branch income, as well as dividend income from abroad (*see above*), is exempt from taxation in Cyprus.

Where foreign income is taxed in Cyprus, double taxation is avoided through unilateral relief, by giving credit for foreign taxation, or by treaty relief. This credit may not exceed the Cyprus taxes imposed on the same income.

Profits from a PE abroad are exempt from CIT. This exemption is always applicable, unless:

- more than 50% of the foreign PE's activities result directly or indirectly in investment income and
- the foreign tax on the income of the foreign PE is significantly lower than the tax burden in Cyprus (i.e. less than 5%).

Deductions

All expenditure wholly and exclusively incurred for the generation of taxable income is deductible against the company's taxable income. All such expenditure should be supported by invoices and relevant receipts or other supporting documents.

Depreciation and amortisation

Depreciation is computed on a straight-line basis at rates that vary, depending on the life and type of asset. Tax depreciation is not required to conform to book depreciation. Gains on the sale of depreciated property are taxable as ordinary income to the extent of depreciation allowed.

Property and equipment acquired during the tax years 2012, 2013, and 2014 will be eligible to claim accelerated tax depreciation at the rate of 20% (excluding assets that are already eligible for a higher annual rate of tax depreciation).

In case of industrial and hotel buildings that are acquired during the tax years 2012, 2013, and 2014, tax depreciation at the rate of 7% per annum may be claimed.

Cyprus

Any expenditure of a capital nature for the acquisition or development of IP will be claimed as a deduction in the tax year in which it was incurred and the immediate four following years on a straight-line basis (*see Intellectual property [IP] regime in the Tax credits and incentives section*).

Goodwill

Any amounts paid for the acquisition of trading goodwill should be deductible upon the subsequent sale of such trading goodwill.

Research and development (R&D) expenses

Any expenditure on scientific research of a capital nature for which no capital allowance is granted is deductible from taxable income and spread equally over the year in which it has been incurred and the five subsequent years. Scientific expenditure of a revenue nature is deducted in the year incurred.

Interest expenses

Any interest expenses incurred by the company for the generation of its taxable income should be deductible in the company's tax computation.

Bad debt

Bad debts of any business should be deductible, provided they are provided against specific trading receivables and the taxpayer can evidently prove that all necessary steps were taken beforehand to recover them.

Charitable contributions

Charitable donations or contributions made for educational, cultural, or other charitable purposes to Cyprus, or to approved charitable institutions, are wholly deductible, provided that these expenses are supported with relevant vouchers.

Taxes

Taxes that are deducted in computing profits for CIT purposes include VAT not recovered and the employer's share of contributions to the social insurance and other funds.

Net operating losses

Tax losses can be carried forward indefinitely and set-off against taxable profits of future years. Carrybacks are not permitted.

Payments to foreign affiliates

A Cyprus corporation can claim a deduction for royalties and interest charges paid to foreign affiliates, and a reasonable amount of head office expenses of an overseas company, provided such expenditures can be justified as having been incurred in the production of the income.

In the case of insurance companies, the amount of head office expenses should not exceed 3% of the net premiums in Cyprus for the general insurance business and 2% for the life insurance business.

Group taxation

Group relief provisions allow, subject to certain conditions, companies of the same group to transfer losses from the loss-making companies to profitable companies. A

group includes only Cyprus resident companies with at least a 75% direct or indirect holding relationship.

Transfer pricing

Cyprus tax law does not contain any transfer pricing provisions. However, transactions between related parties should be carried out at pure commercial terms (i.e. at arm's length).

Arm's-length rules may not apply to transactions between a Cyprus tax resident parent company and its 100% direct Cyprus tax resident subsidiary company in certain circumstances.

Tax credits and incentives

Foreign tax credit

See *Foreign income in the Income determination section* for a description of the foreign tax credit regime.

The Cyprus holding company

The exemptions for dividends received from abroad, foreign PE trading profits, and profits from transactions in titles (see *Capital gains in the Income determination section for a description of titles*), together with the fact that Cyprus does not withhold taxes on dividend, interest, and royalty (unless right is used in Cyprus) payments made abroad, and its extensive double tax treaty (DTT) network as well as full adoption and access to all EU Directives, makes Cyprus an ideal 'holding company' EU jurisdiction.

The Cyprus financing company

The low CIT rate of 10% imposed on interest incomes coupled with acceptable thin spreads on related-party, back-to-back financing arrangements make Cyprus a very competitive 'financing company' EU jurisdiction.

The minimum acceptable spreads are as follows:

Amount of loan (EUR)	Spread (%)
Less than 50 million	0.35
50 to 200 million	0.25
Greater than 200 million	0.125

Intellectual property (IP) regime

As of 1 January 2012, the income tax law provides for generous exemptions from tax of income related to IP.

More specifically:

- 80% of any income generated from IP owned by Cypriot tax resident companies (net of any direct expenses) is exempt from income tax
- 80% of profit generated from the disposal of IP by Cypriot tax resident companies (net of any direct expenses) is exempt from income tax
- the definition of IP includes all intangible assets, including copyrights, patents, and trademarks, and

Cyprus

- any expenditure of a capital nature for the acquisition or development of IP can be claimed as a deduction in the tax year in which it was incurred and the immediate four following years on a straight-line basis.

The Cyprus international collective investment schemes (ICIS)

The ICIS law, enacted in 1999, provides the required legal framework for the registration, regulation of operations, and supervision of ICIS. The sole objective of ICIS is the collective investment of funds of the unit-holders.

ICIS can take the following legal forms:

- International fixed capital company.
- International variable capital company.
- International unit trust scheme.
- International investment limited partnership.

ICIS are exempt from tax on profits arising on disposal of titles. Dividend income also is exempt (with minor limitations), whereas interest income is taxed at the rate of 10%.

ICIS set-up in Cyprus can utilise the DTT network of Cyprus.

Withholding taxes

The following tables give a summary of the WHT provided under the DTTs entered into by Cyprus.

Paid from Cyprus

Notes

- Under Cyprus legislation there is no WHT on dividends, interests, and royalties paid to non-residents of Cyprus.
- Royalties earned on rights used within Cyprus are subject to WHT of 10%.
- A WHT rate of 5% is applicable on film and TV royalties.
- 0% if paid to a government or for export guarantee.
- 0% on literary, dramatic, musical, or artistic work.
- 0% if paid to the government of the other state.
- This rate applies for patents, trademarks, designs or models, plans, secret formulas, or processes, or any industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
- A rate of 15% if received by a company controlling less than 10% of the voting power.
- A rate of 15% if received by a person controlling less than 10% of the voting power.
- 0% if paid to a government, bank, or financial institution.
- A WHT rate of 5% is applicable on film royalties.
- A WHT rate of 5% is applicable if received by a person controlling less than 50% of the voting power.
- This rate applies to individual shareholders regardless of their percentage of shareholding. Companies controlling less than 10% of the voting shares are also entitled to this rate.
- A WHT rate of 10% is applicable for payments of a technical, managerial, or consulting nature.
- Treaty rate is 15%, therefore restricted to Cyprus legislation rate.
- A rate of 10% if a dividend is paid by a company in which the beneficial owner has invested less than 100,000 United States dollars (USD)/EUR 100,000 as of 1 January 2013.

17. If investment is less than EUR 200,000, dividends are subject to 15% WHT, which is reduced to 10% if the recipient company controls 25% or more of the paying company.
18. No WHT is applicable for interest on deposits with banking institutions.
19. Kyrgyzstan, Tajikistan, and Ukraine apply the USSR/Cyprus treaty.
20. A WHT rate of 10% is applicable on interest received by a financial institution or when it relates to sale on credit of any industrial, commercial, or scientific equipment or of merchandise.
21. This rate applies for any copyright of literary, dramatic, musical, artistic, or scientific work. A 10% rate applies for industrial, commercial, or scientific equipment. A 15% rate applies for patents, trademarks, designs or models, plans, secret formulas, or processes.
22. This rate applies to companies holding directly at least 25% of the share capital of the company paying the dividend. In all other cases the WHT is 10%.
23. This rate does not apply if the payment is made to a Cyprus international business entity by a resident of Bulgaria owning directly or indirectly at least 25% of the share capital of the Cyprus entity.
24. A WHT rate of 7% is applicable if paid to a bank or financial institution.
25. Serbia and Montenegro apply the Yugoslavia/Cyprus treaty.
26. This rate applies if received by a company (excluding partnerships) that holds directly 25% of the shares. A rate of 10% applies in all other cases.
27. Applies to any consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work (including cinematograph films and films, tapes or discs for radio or television broadcasting), computer software, any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience.
28. This rate applies if received by a company (excluding partnership) which holds directly at least 10% of the shares for an uninterrupted period of no less than one year. 5% applies in all other cases.
29. 10% for patent, trademark, design or model, plan, secret formula or process, computer software or industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
30. A WHT rate of 5% is applicable if a dividend is paid by a company in which the beneficial owner has invested less than EUR 150,000.
31. The provisions of the Parent-Subsidiary EU directive are applicable.
32. A WHT rate of 15% is applicable if received by a company controlling less than 10% of the share capital of the paying company or the duration of any holding is less than one uninterrupted year.
33. The new treaty between Russia and Cyprus will come into effect as of 1 January 2013. There will be no change to the rates appearing on the tables above.

Tax administration

Taxable period

In Cyprus, the tax year is the calendar year.

Tax returns

Business organisations are required to prepare audited accounts based on International Financial Reporting Standards (IFRS). Tax returns are completed based on these accounts on a calendar-year basis. The tax return normally needs to be submitted to the tax authorities by 31 December of the year following the relevant tax year.

Electronic submission

Companies should be registered online and submit their tax returns for the tax years 2011 onwards electronically. In this respect, the submission deadline of the corporate tax returns has moved to three months later, i.e. 31 March 2013.

Payment of tax

Corporate entities must pay provisional tax on the current year's income in three equal instalments on 1 August, 30 September, and 31 December. A final payment must be made on or before 1 August of the following year on a self-assessment basis to bring the total payments of tax to the total actually due according to the tax return.

Statute of limitations

The Cyprus tax authorities have six years from the end of the relevant tax year to enquire and examine the tax affairs of the taxpayer. However, if fraud has been established, the statute of limitations extends to 12 years.

Cyprus

Other issues

Business combinations

Transfers of assets and liabilities between companies can occur without tax consequences within the framework of a tax-exempt qualified reorganisation. Reorganisations include mergers, demergers, partial divisions, transfers of divisions of activities, and exchanges of shares.

C

Significant developments

The 2012 year brought the following significant changes to the value-added tax (VAT):

- The reduced rate of 10% has been raised to 14%.
- The reverse charge mechanism has been extended for construction or assembly work (under the product classification code number of CZ-CPA 41 to 43). The application of the reverse charge mechanism is mandatory for this work when provided between taxable persons (i.e. between businesses).

There are a few changes in the corporate income tax (CIT) effective from 2012. These changes include the following:

- Income from lotteries and similar game business is now fully taxable (previous tax exemption was abolished together with previous obligatory contribution paid by the lottery administrators instead of the CIT).
- The remuneration of members of statutory bodies (i.e. board of directors of joint stock companies and cooperatives) is now tax deductible.
- Possibility to utilise tax loss carried forward is extended even to cross-border mergers (subject to certain limitations).
- Deadlines for filing a tax return in the course of mergers (both cross-border and domestic) have been slightly amended.
- Minor changes in taxation of investment companies.

Substantial changes are planned from 2014 or 2015, when a one-stop-shop system for collection of taxes and social security contributions will be introduced (amendment to the tax legislation has been approved, but changes are expected even prior to the law becoming effective).

Hand in hand, exemption of dividend income and liquidation surplus will be introduced. However, the exemption should not apply to profit shares from collective investment vehicles (both Czech and foreign).

Collective investment vehicles are planned to be subject to 0% taxation; however, 19% withholding tax (WHT) should be introduced on profits from these vehicles flowing to corporations. The new rules on taxation of profit shares should apply only to profits generated after the effective date of the change.

Czech Republic

Taxes on corporate income

CIT applies to the profits generated by all companies, including branches of foreign companies. Corporate partners in general partnerships (i.e. unlimited) and corporate general partners (i.e. unlimited) in a limited partnership are subject to CIT on their share of the profits in the partnership.

Czech resident companies are required to pay CIT on income derived from worldwide sources. Non-resident companies are required to pay CIT on income sourced in the Czech Republic.

The 19% CIT rate applies to all business profits, including capital gains from the sale of shares (if not exempt under the participation exemption regime).

There is a special tax rate of 15% levied on dividend income of Czech tax resident entities from non-resident entities (unless subject to participation exemption).

Local income taxes

There are no local income taxes in the Czech Republic.

Corporate residence

A company is resident in the Czech Republic for CIT purposes if it is registered in, or has a place of management located in, the Czech Republic.

Permanent establishment (PE)

Under domestic law, the creation of a PE of a foreign tax resident in the Czech Republic is triggered by a fixed place available for carrying out business activities, long-term provision of services (for more than six months in any 12 consecutive months), or presence of a dependent agent unless an applicable double tax treaty (DTT) stipulates otherwise. For interpretation purposes, the Organisation for Economic Co-operation and Development (OECD) Model Tax Commentary is followed. The Czech Republic tends to have a service PE clause included in its DTTs.

Other taxes

Value-added tax (VAT)

VAT is charged at 20% on the supply of goods and services within the Czech Republic, but certain supplies (such as groceries) are taxed at a rate of 14%. While only one unified VAT rate of 17.5% should apply from 2013 onwards, the possibility of increasing the unified rate is being discussed due to the state budget deficit.

Exports are generally exempt from VAT with a credit. Some supplies are exempt without a credit, including the lease of real estate (with certain exceptions), financial and insurance services, radio and TV broadcasting, education, health, and welfare.

VAT registration

A company must be registered for VAT if its taxable supplies exceed CZK 1 million for a period of 12 consecutive months or purchases of goods from other European Union (EU) countries exceeds CZK 326,000 per calendar year. A company can register voluntarily even if its turnover fails to reach the threshold if it renders taxable supplies

in the Czech Republic. These are general rules applicable to entities established in the Czech Republic. Different rules apply to non-Czech entities.

VAT returns and payments

The VAT return must be filed and tax paid within 25 days after the end of the taxable period. The taxable period is a calendar month or calendar quarter depending on taxpayer turnover. Tax overpayment should be returned to the taxpayer by the tax office within 30 days after the request for the tax overpayment refund.

Customs duties

The Czech Republic is an EU member state, therefore the EU customs code applies.

Excise taxes

Excise tax is charged on the production or import of tobacco and tobacco products, wines, semiproducts, spirits and pure ethanol beer, fuel, and mineral oils.

Excise tax on cigarettes amounts to 28% of the price for final consumer plus CZK 1.12 per piece; however, the duty cannot be less than CZK 2.10 per piece. Excise duty on cigars and cigarillos is CZK 1.25 per piece and on tobacco for smoking is CZK 1,400 per kilogram.

Excise tax on still wine is CZK 0 and CZK 2,340 per hectolitre in case of sparkling wine and semiproducts. Excise tax on spirits and pure ethanol amounts to CZK 28,500 per hectolitre of pure ethanol. The basic rate of excise tax on beer is CZK 32 per hectolitre for each whole percentage of the original primary brew; however, lower rates for small independent breweries apply. The rates of excise duty on fuels and other mineral oils vary from CZK 0 and CZK 3.933 per ton in case of liquefied petroleum gases and their mixtures and from CZK 10.950 to CZK 13.710 per thousand litres in case of motor and other petrols, aviation petrol-type fuels, and their mixtures.

Energy taxes

Energy tax is charged on natural gas and certain other gases, solid fuels, and on electricity sold to final customers in the Czech Republic.

The tax rates applied on gases vary from CZK 30,60 per MWh of gross energy (combustion heat) to CZK 264,80 per MWh of gross energy (combustion heat). The tax rates amount to CZK 8.50 per GJ according to the original sample in case of solid fuels. The tax rate on electricity amounts to CZK 28.30 per MWh.

Real estate tax

Real estate tax is payable annually by the owner of land or buildings. The amount of the tax is dependent on area, location, and usage of the land or buildings. As of 2012, paved areas used for business purposes (such as concrete areas in logistics centres) are taxable, with taxpayers obliged to self-assess the tax. However, some areas (e.g. publicly accessible parking lands in shopping malls) are not taxable.

Real estate transfer tax

Real estate transfer tax is levied on the transferor of real estate at a rate of 3% on the greater of the transaction price or the officially appraised value. The taxpayer is the transferor; transferee acts as tax guarantee.

Stamp duties

There are no stamp duties in the Czech Republic. Certain business operations in which a notary has to be involved by operation of law are subject to notarial fee.

Czech Republic

Road tax

Road tax is payable annually with respect to vehicles (including private vehicles) used for commercial purposes. Foreign vehicles are also liable to road tax while in the Czech Republic. Rates vary depending on engine capacity and vehicle size.

Environmental taxes

Environmental taxes are imposed on electricity and natural gas, and on certain solid fuels. The environmental taxes have a character similar to excise taxes.

Social security and health insurance contributions

Employers contribute 34% of the employee's gross salary to the state health and social security funds. A cap on the premium is available.

Branch income

A foreign company can trade in the Czech Republic through a Czech branch. A branch usually creates a Czech permanent establishment (PE) of the foreign entity for CIT purposes (depending on the character of the activities carried out through the branch). The basis of taxation is the same as for corporations (i.e. tax base is calculated as taxable revenues less tax-deductible costs). In some cases, it may be possible for taxpayers to negotiate with the tax authorities regarding the basis on which profits are attributed to the branch.

A branch is liable for tax on its attributable profits at the standard CIT rate.

Income determination

Inventory valuation

Stock (i.e. inventory) is valued at cost. Czech legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) and the replacement-cost methods (except for livestock) may not be used.

Capital gains

No separate capital gains tax is levied in the Czech Republic. Capital gains are included in the CIT base and taxed as ordinary income in the year in which they arise.

Capital gains from the sale of shares may be exempt from Czech taxation if all of the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months.
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive.

If the subsidiary is not a tax resident of the Czech Republic or another EU member state, the exemption may be applied, provided that the subsidiary is a tax resident of a country where there is a DTT in place with the Czech Republic, it has a legal form similar to a limited liability company or a joint stock company, it is subject to CIT at the nominal rate of at least 12% in a year when dividends are paid, and the time test of 10%

for at least 12 calendar months is met. The time test may be met both prospectively and retrospectively.

Dividend income

Dividends received by Czech tax resident corporations from non-resident entities are subject to a special tax rate of 15%, unless exempt under the participation exemption regime *described below*.

Dividends paid by Czech tax resident corporations to Czech resident entities are subject to 15% final WHT, unless exempt under the participation exemption regime.

Dividends paid by Czech tax resident corporations to Czech non-resident entities are subject to 15% final WHT, unless exempt under the participation exemption regime or decreased under the relevant DTT.

Participation exemption regime

Dividend income may be exempt from Czech taxation (i.e. WHT, when a Czech company is paying dividends and CIT, when a Czech company is receiving dividends) if all of the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months.
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive.

Regarding dividends paid, provided that conditions above are met, the exemption also applies when dividends are paid by a Czech subsidiary to Switzerland, Norway, or Iceland.

Regarding dividends received, if the subsidiary is not a tax resident of the Czech Republic or another EU member state, exemption on dividends received by a Czech resident may be applied, provided that the subsidiary is a tax resident of a country where a DTT with the Czech Republic is in place, it has a legal form similar to a limited liability company or a joint stock company, it is subject to CIT at the nominal rate of at least 12% in a year when dividends are paid, and the time test of at least 10% for at least 12 consecutive calendar months is met.

Interest income

Interest received by Czech tax residents is included in the standard tax base subject to the 19% CIT rate.

Czech source interest income received by Czech tax non-residents is subject to 15% WHT unless subject to domestic exemption or a DTT stipulates otherwise.

Under domestic law, interest income is exempt if it is paid by a Czech payer or a Czech PE to an EU resident recipient who is a beneficial owner of the interest income, provided that for at least 24 months before the payment:

- the payer is in at least a 25% parent-subsidiary or at least a 25% sister relation to the recipient of the income and
- the interest is not attributable to a Czech PE of the recipient.

The exemption is applicable subject to approval by the tax authorities.

Czech Republic

Exchange gains and losses

Realised foreign exchange gains and losses are accounted for in profit and loss accounts and represent taxable revenues or tax-deductible costs, respectively. The same treatment applied to unrealised foreign exchange differences. However, recently, the Supreme Administrative Court concluded in a particular case that unrealised foreign exchange gains do not represent taxable income. Therefore, the treatment of unrealised foreign exchange differences may change in the future.

The default functional currency is the Czech koruna. A Czech company cannot opt for any foreign currency to be the functional currency for tax purposes.

Foreign income

Companies resident in the Czech Republic are taxed on their worldwide income. A Czech corporation is taxed on its foreign branch income when earned (accrual basis) and on foreign dividends when approved by general meeting.

The participation exemption regime *described above* may be applicable.

There is no controlled foreign company (CFC) legislation in the Czech Republic.

Deductions

Depreciation and amortisation

Methods of tax depreciation are prescribed by tax legislation and are independent from depreciation methods for accounting purposes. Tax depreciation is calculated on an asset-by-asset basis, applying the straight-line or accelerated basis methods of depreciation at statutory rates. Under both methods, depreciation expense in the first year is lower than for subsequent years. The company may choose which method to apply to a new asset, but once the choice is made, it cannot be altered. All assets are classified into six groups, which determine the number of years over which the asset will be written off, as follows:

Assets	Depreciation group	Minimum depreciation period (years)
Office machines and computers, tools	1	3
Engines, motor vehicles, machines, audio-visual equipment	2	5
Elevators, escalators, turbines, air conditioning equipment, electric motors, and generators	3	10
Buildings made of wood and plastic, long-distance lines, and pipes	4	20
Buildings (except for those listed in groups 4 and 6), roads, bridges, tunnels	5	30
Administrative buildings, department stores, historical buildings, and hotels	6	50

'Tangible assets' (i.e. assets which are subject to tax depreciation) are defined by tax legislation generally as assets with economic useful lives of greater than one year and acquisition prices higher than CZK 40,000. Certain assets, such as buildings, are always considered tangible assets.

Taxpayers are generally not obliged to depreciate a tangible asset for tax purposes every year. Depreciation may be interrupted in any year and continued in a later year without a loss of depreciation potential.

Tangible assets are generally depreciated by the taxpayer with ownership title. Certain exceptions apply, for instance, technical appreciation of a rented asset carried out by a tenant may be depreciated by that tenant, subject to certain conditions.

Depreciation can start only once the assets are put into use and comply with the requirements of specific laws.

Certain assets have special depreciation methods (e.g. moulds are depreciated based on expected life or number of products).

The value to be used as the basis for tax depreciation depends on how the asset is acquired, for example:

- Acquisition cost (construction and equipment costs, architect fees, legal fees, notary's fees, etc.), if the asset is acquired for consideration.
- Internal costs incurred, if the asset is acquired or produced internally.

'Intangible assets' are defined by tax legislation as software, valuable rights, intangible results of research and development (R&D), and other assets regarded as assets for accounting purposes, provided that they:

- were acquired from a third party or developed internally for the purpose of trading with them
- have an acquisition price of more than CZK 60,000, and
- have a useful life of greater than one year.

Intangible assets are amortised for tax purposes based on the number of years that the taxpayer has a licence for the assets, if the licence is for a limited number of years. Otherwise, amortisation for tax purposes will vary depending on the asset (e.g. software is amortised over 18 months, results of R&D is amortised over 36 months).

Goodwill

Goodwill arises as result of purchase of business (or its part) as a going concern may be evenly amortised for 180 months. Any other goodwill (e.g. arisen within a merger) is disregarded for tax purposes.

Start-up expenses

Start-up expenses exceeding CZK 60,000 with a useful life of more than one year accounted in line with Czech generally accepted accounting principles (GAAP) should be amortised evenly for a period of 60 calendar months.

Interest expenses

Interest as accrued and duly accounted for under Czech GAAP is generally tax deductible, with the following exceptions:

- Interest disallowed based on the thin capitalisation restriction (*please refer to Thin capitalisation in the Group taxation section*).
- Interest disallowed for its relation to income that is tax exempt or taxed outside the standard tax base.
- Interest disallowed due to its relation to holding a subsidiary.

Czech Republic

Bad debt

Doubtful or bad receivables may be provisioned for under special rules. Generally, provisions may be created for trade receivables overdue for more than six months. Provisions of 100% may be created to debts duly registered in bankruptcy proceedings. For receivables, banks, insurance companies, and defined financial institutions have their specific system for provisioning.

Charitable contributions

Certain charitable donations are deductible. The minimum deductible donation is CZK 2,000 and the maximum deductible donation is 5% of the tax base (a maximum of up to 10% of the tax base is possible if gifts are granted to universities or R&D centres).

Travel expenses and meal allowances

Payments for travel expenses and meal allowances that are made to employees are tax-deductible, but only within the statutory limits.

Fines and penalties

Contractual fines and penalties are generally tax deductible on a cash basis.

Taxes

Road tax, real estate tax, and most other taxes, with the exception of income taxes, are deductible, as are social security contributions paid by an employer with respect to employees.

Other significant items

As of 2012, fees paid to members of other statutory bodies of companies (i.e. board of directors of joint stock companies and cooperatives) for their services are deductible for tax purposes.

Net operating losses

Losses incurred in a tax year may be carried forward to offset taxable profits generated in the following five tax years. Losses may not be carried back. From 2012, the possibility to utilise tax loss carried forward is extended even to cross-border mergers (subject to certain limitations).

Payments to foreign affiliates

Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length.

Group taxation

Currently, the Czech Republic does not permit group taxation. Each company in a group is taxed individually. Consolidated tax base applies only for the general partners and their shares in profit of their general partnership.

Transfer pricing

For tax purposes, prices agreed between related parties have to meet the definition of the arm's-length principle, and these prices are often subject to tax audits by tax authorities. The consequences of incorrect transfer pricing adjustments are tax exposure and penalties. In the case of companies receiving investment incentives, incorrect transfer pricing can cause a loss of the investment incentives. Generally, pricing methods as described in OECD guidelines should be followed.

Although there is no legal requirement to keep transfer pricing documentation, in practice it is strongly recommended to keep it as the taxpayer bears the burden of proof upon challenge of prices by tax authorities.

Taxpayers may request the tax administrators to issue an advance pricing agreement (APA) regarding progressing or future transactions between related parties.

Thin capitalisation

Thin capitalisation rules apply in the Czech Republic and may limit the tax deductibility of interest payments on debt financing from related parties as well as from third parties.

Below is a brief summary of the thin capitalisation rules:

- The tax-deductibility test applies not only to interest but also to all so-called 'financial costs' on loans (e.g. interest plus other related costs, such as bank fees).
- Thin capitalisation applies only to related-party loans.
- The debt-to-equity ratio for related-party loans is 4:1.
- Unrelated-party loans (e.g. bank loans) guaranteed by a related party are not considered related-party loans for thin capitalisation purposes. If, however, a bank provides a back-to-back loan to a Czech entity where the loan is provided to the bank by a related party, such a bank loan to the Czech entity is considered a related party loan.
- Interest on profit-participating loans is not deductible for tax purposes.

Controlled foreign companies (CFCs)

There is no CFC legislation in the Czech Republic.

Tax credits and incentives

Foreign tax credit

Foreign tax credits are available only under tax treaties. If credit is not available under a treaty, CIT paid abroad may be deducted as an expense in the following year provided it is imposed on the income included in Czech taxable income.

Investment incentives

Investment incentives are available only to Czech entities (including Czech subsidiaries of foreign companies) engaged in the manufacturing industry. Incentives include income tax relief, financial support for the creation of new jobs, financial support for training or retraining of employees, and a transfer of land at a specially reduced price.

The former programmes for the support of business support service centres and for the development of technology centres, which were focused primarily on investments in human capital as well as the training or retraining of skilled staff, were abolished based on the decision of the Ministry of Industry and Trade in July 2008. However, these activities currently are supported by the EU structural funds, especially under the operational programmes Enterprise and Innovation.

Research and development (R&D) allowance

Up to 100% of specific R&D expenses (or costs) incurred in a given tax year may be deducted from the tax base as a special tax allowance. These costs are deducted twice for tax purposes: once as a normal tax-deductible cost and then again as a special tax allowance.

Czech Republic

The following costs can be included in the R&D tax allowance:

- Direct costs (e.g. personnel costs of R&D engineers, consumed materials).
- Tax depreciation of fixed assets used for R&D activities.
- Other operational expenses directly related to the realisation of R&D activities (e.g. telecommunications fees, electricity, water, gas).

Only qualifying expenses are deductible for tax purposes and must be separately identified from other expenses (or costs). This allowance does not apply to costs of purchased services or intangible results of R&D acquired from other entities, except for expenses (or costs) incurred in connection with the certification of the results of R&D projects. In addition, expenses that were supported from public sources are also excluded.

Any non-utilised R&D allowance may be carried forward for three subsequent years.

A taxpayer may request a binding ruling with respect to R&D costs from the respective Tax Office in the event that the taxpayer is unsure of whether certain R&D costs are eligible for the allowance.

Withholding taxes

Czech corporations are required to withhold tax on payments of dividends, interest, and royalties as follows:

Recipient	Dividend (%) (1)	Interest (%) (2)	Royalties (%) (3)
Resident corporations	15	0	0
Resident individuals	15	0	0
Non-resident corporations and individuals:

Yugoslavia (former)	5/15	0	10

Notes

1. The lower rate applies if the recipient is a company that owns at least a certain amount of the capital or a certain amount of the voting shares of the company paying the dividend directly.
2. The lower rate applies mostly in situations when the interest is received by the government or a state-owned institution or is paid by the government.
3. The lower rate applies mostly to cultural royalties.

Tax administration

Taxable period

A corporation may choose between the calendar year or an accounting year as its tax year.

Tax returns

Returns must be filed within three months of the end of the tax period.

A three-month extension of the filing deadline is available if a taxpayer is represented by a registered tax advisor or if the taxpayer is subject to a statutory accounting audit.

In some special cases, a filing deadline of less than three months may apply (e.g. upon merger or liquidation). This shorter deadline may, however, be extended if approved by the tax office.

Payment of tax

Tax payments are due on the same day as the filing deadline.

A company is obliged to make CIT advances based on its last known tax liability. The tax advances are paid semi-annually or quarterly, depending on the amount of the last known tax liability.

Upon filing a tax return, tax advances paid during the year for which the tax return is filed will offset the tax liability declared in the tax return. Any outstanding amount must be paid on the date the tax return is due. Any overpayment will be refunded upon request or may be credited against future tax liabilities.

Audit cycle

There is no statutory tax audit cycle. Entities are picked by the tax authorities based on selected criteria (e.g. tax loss position, huge marketing costs) or randomly.

Statute of limitations

The tax may be assessed within three years after the deadline for regular tax return filing. In certain cases (e.g. filing of supplementary tax return), such assessment period may be prolonged by one year, maximally up to ten years. Tax liability arisen as result of criminal action may be assessed any time within two years after the year of the relevant penal court decision becoming effective.

Topics of focus for tax authorities

The tax authorities seem to focus on marketing costs, intra-group relations, entities in tax loss position, and entities with tax investment incentives. In 2012, the Czech Republic introduced a so-called specialised tax authority for large businesses with turnover of over CZK 2 billion and financial institutions. It is expected that the specialised tax authority will be responsible for about 1,000 entities.

Significant developments

Taxation of dividends and interest paid by Danish entities to foreign group companies has been a hot topic in Danish taxation in the last few years. One of the main issues seems to be whether holding companies incorporated in the European Union (EU) can qualify as the beneficial owner of dividends and interest payments received from Danish group entities and, consequently, whether these payments can be remitted from Denmark without source taxation (withholding taxes).

Five cases have been publicly disclosed, of which the Danish tax authorities have prevailed in two. The remaining three, of which one was decided by the Danish High Court in December 2011, were won by the taxpayer.

The Danish tax authorities brought up these issues when they started to enquire into the tax implications related to intercompany payments and, more specifically, whether Danish entities have complied with the withholding tax (WHT) requirements regarding dividends and interest. After these enquiries, numerous Danish entities belonging to international groups have been asked to pay substantial amounts of non-withheld taxes to the Danish tax authorities. Many of the Danish companies involved in these cases have disputed the claims.

The main focus of the Danish tax authorities seems to be private-equity-owned Danish groups, a number of which have been subject to the enquiries by the Danish tax authorities. However, industrial groups have also been subject to enquiries from the Danish tax authorities.

Several cases are currently being appealed through both the administrative and court system, and a final position regarding both interest and dividend therefore remains unclarified.

In addition to the cases involving WHT, the Danish tax authorities have increased their focus on tax deductions for costs related to the creation of tax exempt income, such as dividend from and capital gains on certain shares.

In November 2011, a landmark case regarding tax deductions for management fees was decided by the Danish Supreme Court. The taxpayer, a venture company, was allowed a deduction only because the fees generated income that, in great majority, was taxable in the hands of the venture company.

Laying down a condition that costs must be connected to taxable income in order to be deductible for tax purposes seems to be a novelty in Danish tax law, which may have a severe impact on venture funds etc. and even 'ordinary' holding companies. However, the exact fallout from this case depends on how liberal an interpretation the Danish tax authorities put on the ruling over the next year or two.

Taxes on corporate income

According to Danish tax law, a territoriality principle prevails. Hence, a Danish company is not taxed on its worldwide income. Instead, income from a permanent establishment (PE) outside Denmark or from real estate located abroad is excluded from taxable income. Non-resident companies are taxed only on profits distributed from income sourced in Denmark.

The corporate income tax (CIT) rate is 25%.

Hydrocarbon income tax

A special CIT is levied on profits from the exploration and extraction of oil and gas on the Danish continental shelf at a rate of 52% under the new system applicable for licences granted after 1 January 2004. CIT (25%) is deductible in computing the hydrocarbon tax.

Tonnage Tax Scheme

Danish tax law provides for a special tax scheme for shipping entities.

The main principle of the Tonnage Tax Scheme is that qualifying shipping entities are not taxed on the basis of their actual income derived from their business but on a fictitious income based on the net tons carrying capability of their fleet used for purposes covered by the Tonnage Tax Act.

The Tonnage Tax Scheme is available to Danish shipping entities organised as limited liability companies (*Aktieselskab* [A/S] or *Anpartsselskab* [ApS]), foreign shipping companies with the place of management and control in Denmark, and European Union (EU) shipping companies with a PE in Denmark.

The scheme is available upon application to the Danish tax authorities. A decision to enter into the scheme is binding for a period of ten years.

As a general rule, group related shipping companies based in Denmark must make the same choice regarding the Tonnage Tax Scheme. However, shipping companies that do not have the same management or operating organisation and do not conduct business in related fields may be exempt from the joint decision provision.

The Tonnage Tax Scheme is restricted to certain types of business activities. The entity must carry out commercial transportation of passengers or cargo between different destinations. The ships must be owned or chartered on a 'bareboat' or time-charter with a call/buy option by the company' basis and have a minimum gross tonnage of 20 tons. Certain restrictions apply for ships chartered on a time charter basis without a call/buy option. The ships must be strategically and commercially run from Denmark.

Income from activities that are carried out in close connection with this business, such as the usage of containers and loading facilities, etc. may also be included in the Tonnage Tax Scheme. Ships used for exploration, diving, fishing, towing, sand dredging, etc. are specifically exempt from the scheme. The same applies for certain types of ships, such as barges, floating docks, etc. However, EU or European Economic Community (EEC) registered ships used for towage activities at sea (i.e. not in and around ports) during at least 50% of its operating time during the income year may be included in the tonnage tax system.

Denmark

Ship operating companies may also use the Danish Tonnage Tax Scheme. A ship operator is defined as a company doing business with crew management and technical management of ships qualified for use in the tonnage tax system. It is a requirement that the ship operator has taken over the full operating responsibility and all obligations and responsibilities according to the International Safety Management codex.

Taxable income

The taxable income for the part of the business that qualifies for the Tonnage Tax Scheme is determined for each ship as a fixed amount of Danish kroner (DKK) per 100 net tons (NT) per day according to the following:

Ship net ton	Fixed amount per day (DKK per 100 NT)
0 to 1,000 NT	7.80
1,001 to 10,000 NT	5.60
10,001 to 25,000 NT	3.35
Over 25,000 NT	2.20

The income is taxed at the ordinary corporate tax rate (25%). No deductions relating to shipping income will be allowed. Special rules apply for financial income and financial expenses, and in relation to so called 'thin capitalisation'. Income that does not qualify for the tonnage tax scheme is taxed according to the general tax provisions in Denmark.

Depreciation

Shipping entities that apply the Tonnage Tax Scheme from the time of their establishment may not deduct depreciation for tax purposes. Special rules apply for shipping entities that were already in existence when they elected to become subject to the scheme and for entities that elect to include certain other assets at a later point in time that were not previously subject to the scheme.

Gains on the sale of ships

Gains on the sale of ships that have not been used in the scheme prior to 1 January 2007 are tax exempt. The same applies to gains on the sale of contracts on the delivery of ships, provided that the ship was destined to be delivered after 1 January 2007. Gains on the sale of ships used in the scheme in prior years are taxable. The taxable gain is calculated as the sale price minus the purchase price plus improvements. Any losses on ships acquired and sold within the same income year as the income year in which a gain is realised may be offset against the gain.

Local income taxes

There is no local CIT or similar surcharge.

Corporate residence

A corporation is resident in Denmark for tax purposes if it is incorporated in Denmark and registered in the Companies Register as having a Danish place of business. Further, foreign companies having their actual place of management in Denmark are also tax resident in Denmark. The actual place of management is typically the place where the management decisions concerning the company's day-to-day operations are made.

Permanent establishment (PE)

Non-resident companies are only liable to tax in Denmark on business profit if derived through a PE in Denmark. The existence of a PE is determined according to Danish tax law, which makes either a reference to a specific double taxation treaty (DTT) or to text similar to Article 5 of the Organisation for Economic Co-operation and Development (OECD) Model Convention.

Other taxes**Value-added tax (VAT)**

The general VAT rate is 25% of the price charged (exclusive of VAT).

Exemption or a special reduced rate of 0% applies to a limited range of supplies (e.g. newspapers; hospital treatment; insurance and reinsurance services; most financial activities, including deposits of money, loans, and provision of loans).

Denmark was one of the first countries to introduce a VAT system. Since the first VAT Act came into force on 3 July 1967, the VAT legislation in Denmark has undergone several changes. The most important changes have been modifications to bring the legislation in line with the Council Directive 2006/112/EC on the common system of Value Added Tax.

Compared to the Directive, the Danish VAT legislation includes minor deviations and the use of various discretionary provisions.

All supplies of goods and services by so-called 'taxable persons' (entrepreneurs who independently carry out economic activity) are subject to VAT, unless specifically exempted. The VAT exemptions are restricted to a limited range of services and goods but are nonetheless subject to discussions and complications in the Danish VAT jurisprudence. Transactions are subject to Danish VAT only when they are deemed to take place in Denmark. For the sake of tax neutrality, VAT is also levied on (i) imports (i.e. receipt of goods from non-EU territories), (ii) intra-Community acquisitions (i.e. receipt of goods from EU member states), and (iii) purchase of most types of services from abroad.

In order to avoid VAT being borne by any other than the final consumer, those who qualify as taxable persons can, with some exceptions, recover VAT charged by their suppliers according to the invoice/credit method, provided that the purchases relate to VAT taxable transactions. VAT is recovered either via the periodical VAT return (as a deduction in VAT payable) or by filing a special application.

In general, it is the supplier's responsibility to collect and report VAT on supply of goods or services.

Customs duties

Denmark is a member state of the European Union, and, according to EU's Common Customs Tariff, many goods imported into Denmark from outside the European Union are subject to customs duties. The rates of duty vary widely between goods.

Excise duties

According to Danish tax law, several excise duties are levied. Some of the excise duties are enacted based on EU regulations while others are enacted according to domestic law only.

Denmark

Excise duties are chargeable on a long list of goods, including hydrocarbon oil products, packaging, alcoholic drinks and tobacco, chocolate and products containing sucker, coffee/tea, etc.

The excise duty rates depend on the type of goods (e.g. chocolate, packaging) as well as, in some cases, the category of the goods (e.g. plastic bags, paper bags).

Only goods sold in Denmark (or taken into Denmark) are liable to the Danish excise duties. Companies importing goods into Denmark or companies producing goods in Denmark must be registered with the Danish tax authorities to settle the excise duties. This also applies even though the goods are taken out of Denmark again. If goods are taken from Denmark to another country, difficulties may appear regarding the reimbursement of excise duties paid.

Property taxes

Owners of non-residential property must pay land tax annually. The land tax rate is set by the municipalities and must be between 1.6% and 3.4% of the value of the land. Municipalities may also levy a special coverage charge on certain properties at a maximum of 1% of the value minus the value of the land. Land tax and coverage charge are deductible from CIT.

Stamp tax

Stamp tax is payable on a few documents, such as a deed of transfer of real estate (0.6% of the transfer sum). There is no stamp duty on transfer of shares.

Employer's tax (social security charges)

The employer's contribution to *Arbejdsmarkedets Tillægspension* (ATP) (i.e. old-age pension) charges is DKK 2,160 per annum for a full-time employee.

Companies that provide VAT-exempt services are liable to pay the employer's tax, which is calculated on the total annual salary cost. The rate can be as high as 9.13%, which is the rate for banks and other financial institutions, the most significant sector paying the employer's tax. This tax is deductible for income tax purposes.

Other than these taxes, an employer's obligation for social security taxes is minimal. The main social security charge is an additional income tax of 8% on salaries and wages, which is borne by employees.

Environmental taxes

Danish companies must pay environmental taxes, which were introduced to reduce companies' energy consumption, discharges of fluids with an environmental impact, and emission. The tax is paid to the company that provides the energy, who pays the tax to the Danish tax authorities.

In general, almost all VAT registered companies in Denmark can receive a reimbursement of some of the environmental taxes. From 2010, the environmental taxes have increased, the possibilities to get a reimbursement have decreased, and the majority of companies will likely suffer a significant increase in tax costs.

Branch income

Danish branches and PEs of foreign companies are taxed under the same rules and rates as Danish resident companies. There is no branch remittance tax or other similar tax on branch profits.

Income determination

Taxable income generally is calculated as income determined for accounting purposes that is adjusted and modified for several items, as prescribed by the tax laws. Typical timing differences include reserves, work in progress, and depreciation.

Inventory valuation

Inventory is valued at either acquisition costs, current market value, or manufacturing costs (if manufactured by the company itself) according to a first in first out (FIFO) principle. The company may opt for different principles for each category of goods and may furthermore change principle from income year to income year, provided certain conditions are met.

Capital gains

Gains and losses realised on the sale of tangible and intangible assets, including goodwill, are generally included in taxable income. However, gains realised on the sale of shares are tax-exempt if the shares qualify as either 'subsidiary shares' or 'group shares'.

'Subsidiary shares' are shares held by a corporate shareholder that holds a minimum of 10% of the share capital in a subsidiary that is located in the European Union, European Economic Area (EEA), or a country with which Denmark has a DTT. A special anti-avoidance rule applies, which is targeted at Danish shareholders joining their shareholdings in order to reach the 10% threshold.

'Group shares' are defined as shares in companies with which the shareholder is jointly taxed or might be jointly taxed. The definition of a group is therefore the same as in the joint taxation rules and generally corresponds to the definition of a group for accounting purposes. The location where the companies are registered is irrelevant, as long as the companies are affiliated.

If the shares do not constitute group shares, subsidiary shares, or treasury shares, they constitute portfolio shares. Gains on portfolio shares are fully taxable regardless of holding period. Losses on the sale of portfolio shares generally are tax-deductible. However, special rules may apply for losses on unlisted shares.

Gains realised on the sale of real estate property are taxable whereas losses are not tax-deductible unless the property is a building qualifying for tax depreciation. A loss realised on the sale of land and other buildings may be utilised only against taxable profits on the sale of real estate properties in the same year or may be carried forward infinitely.

A capital gain may, under certain conditions, be deferred if the capital gain is reinvested in properties. Reinvestment must be made no later than the income years following the income year of disposal.

Denmark

Gains and losses on financial instruments generally are included in taxable income, according to the mark-to-market principle, which is required. There are special rules for losses on certain share-based contracts.

Dividend income

Dividends received on 'subsidiary shares' or 'group shares' are tax exempt regardless of the length of the ownership period, whereas dividends received on portfolio shares are fully included in taxable income.

Regardless of whether the shares qualify as 'subsidiary shares' or 'group shares', dividends are fully taxable if received from a foreign company that can deduct the dividends paid, unless a tax exemption is provided for in the EU parent/subsidiary directive.

Stock dividends

Stock dividends may be distributed to shareholders free of tax, provided that the dividends are in proportion to the existing shareholdings (i.e. bonus shares).

Interest income

Interest income is generally included in the determination of taxable income.

Foreign income

As a general rule, foreign-source income, such as interest, is included in taxable income. However, income from a PE or real estate outside Denmark is excluded from taxable income.

The income of a foreign subsidiary may be taxed in the hands of its Danish parent company if the subsidiary constitutes a controlled foreign company (CFC). *See the Group taxation section for more information.*

Deductions

Depreciation, amortisation, and depletion

Tax depreciation need not be in conformity with book depreciation.

Annual depreciation allowances on machinery and equipment may be claimed under the diminishing-balance method at up to 25%. The depreciation base is the cost of fixed assets less sales proceeds from disposals and depreciation allowances previously claimed.

For ships, the depreciation rate is 20% in the year of construction and a 12% declining-balance basis in subsequent years.

Depreciation allowances on buildings (other than residential buildings and office buildings not adjoining an industrial building) may be claimed at up to 4% on the straight-line basis.

Airplanes, trains, and utility plants can be depreciated only at a 15% declining balance (presently subject to phasing-in rates).

Rails, telecommunications facilities, and certain other long-life plant and equipment can be depreciated only at a 7% declining balance.

Depreciation allowances that are recaptured as part of a capital gain on the sale of an asset generally are fully taxable.

Acquired goodwill and other intangible property rights can be amortised at up to one-seventh per year on a straight-line basis. Costs related to the purchase of patents or know-how (including rights/licences to utilise patents or know-how) can either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

Certain restrictions regarding the depreciable value of goodwill apply in the case of group transactions. Goodwill on the purchase of shares cannot be amortised for tax purposes.

Depletion of the cost of acquisition or exploitation of natural resources is subject to special rules.

Starts-up expenses

No specific rules in Danish tax law govern the treatment of start-up expenses. Instead, these expenses are treated according to general tax law.

As per 1 January 2012, companies may, under certain conditions, benefit from a new scheme allowing for a cash payment equal to the tax value (25%) of negative taxable income, provided the negative income is created from research and development (R&D) costs (*see the Tax credits and incentives section*).

Interest expenses

See Thin capitalisation and interest relief limitations in the Group taxation section.

Bad debt

Companies may deduct loss on bad debt.

The main rule for calculation and taxation of companies' gains and losses on receivables for tax purposes will be the inventory principle (i.e. taxation based on the difference in value at the beginning and end of the assessment year). Use of the inventory principle means that recognition of losses on these types of receivables for tax purposes is not conditional on a final loss having been ascertained.

Special rules apply to gains and losses on trade and inter-company receivables, as these, as a main rule, should be calculated according to realisation principles. Companies may, however, opt for the inventory principle for each category of receivables.

Charitable contributions

Companies may deduct a small amount in gifts to certain organisation approved by the Danish tax authorities and mentioned in the Danish tax authorities' guidelines. The deduction cannot exceed DKK 14,500 per year.

Furthermore, companies may deduct gifts to cultural organisations that receive a maintenance grant for operating expenses from either the government or the municipality. According to these rules, there is no limitation in terms of value, but certain restrictions regarding the use of the gift are applicable.

Finally, gifts to certain charitable organisation within Denmark or the European Union may be deducted, provided the recipient uses the funds for research. Deductibility is

Denmark

conditioned upon the organisation being approved by the Danish tax authorities. No limitation in regards to amount is applicable.

Fines and penalties

Fines and penalties are, in general, not deductible, as these are not considered operational expenses.

Bribes, kickbacks, and illegal payments

Even if considered economically reasoned and custom in certain jurisdictions, amounts used for bribery are not deductible.

Taxes

Taxes are non-deductible for CIT purposes, except for employer's tax, non-recoverable VAT, land tax, and coverage charge (*see the Other taxes section*).

Net operating losses

Tax losses may be carried forward indefinitely.

Certain restrictions on the right to carry tax losses forward apply when more than 50% of the share capital or 50% of the voting rights at the end of the financial year are owned by shareholders different from those that held control at the beginning of the income year in which the tax loss was incurred.

Similarly, under certain circumstances, tax losses are cancelled if a Danish company receives a debt forgiveness or comparable transaction. However, there are numerous exceptions (e.g. inter-company transactions).

Tax losses may not be carried back and utilised in previous income years.

Payments to foreign affiliates

A Danish corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction but is subject to very complex thin capitalisation and interest relief limitation rules.

Group taxation

Mandatory Danish tax consolidation

A mandatory tax consolidation regime obliges all Danish resident companies and Danish branches that are members of the same domestic or international group to file a joint group tax return. The definition of a group generally corresponds with the definition of a group for accounting purposes. The tax consolidated income is equal to the sum of the taxable income of each individual Danish company and branch that are a member of the consolidated group.

The top parent company participating in the Danish tax consolidation group will be appointed the role of a so-called management company; this company is responsible for settling advance and final corporate tax payments of all group members.

Elective cross-border tax consolidation

A non-Danish subsidiary may be included as a member to a Danish tax grouping, provided that the group includes all of its foreign companies and branches in the Danish

tax grouping. In effect, this all-or-nothing provision rules out the possibility for major international groups to have their Danish subgroup file a Danish group tax return that includes only certain hand-picked (typically loss-making) foreign group members.

If a general cross-border tax consolidation is established, it will be binding for ten years; however, there are certain possibilities of 'breaking' the ten-year period (e.g. in connection with takeovers).

The comments under Mandatory Danish tax consolidation with respect to the calculation of the tax consolidation income, 'management' company, etc. generally also apply to international tax consolidation.

Transfer pricing

Danish transfer pricing rules apply to transactions between related parties (e.g. intergroup transactions) whether the transactions are made between residents or non-residents. The rules apply when a company or person directly or indirectly owns at least 50% of the share capital or 50% of the voting rights in another company.

Companies are obliged to disclose in the annual tax return certain information regarding type and volume of intra-group transactions. Companies also are obliged to maintain detailed and extensive transfer pricing documentation to substantiate that intra-group transactions are conducted in accordance with arm's-length principles. A company is subject to fines for failure to comply with the documentation rules.

Thin capitalisation and interest relief limitations

Danish resident companies and Danish branches of foreign companies are subject to three sets of restrictions, each of which may seriously limit or disallow Danish tax relief for financing costs. There is no recharacterisation of interest as dividends.

Firstly, there is the thin capitalisation rule. This rule works to disallow gross interest costs and capital losses on related party debt to the extent the overall debt to equity ratio exceeds 4:1. Related party debt is defined so as to include external bank debt if group member companies or shareholders have provided guarantees to the bank. This rule does not apply if the controlled debt is less than DKK 10 million. When calculating the 4:1 ratio, a special consolidation rules applies if two or more companies are considered affiliated (note that the definition of affiliated companies differs from the definition under the Danish rules on joint taxation).

Secondly, there is an asset-based rule. To the extent a Danish company on a stand-alone basis or, if part of a joint tax group, together with group companies has net financing costs in excess of DKK 21.3 million, tax relief may be obtained only within an amount equal to 4.5% (rate applicable for 2011) of the tax basis of certain assets of the group (rate applicable for 2012 is 3.5%). Net financing costs consist of, among other things, interest income/expenses, taxable gains/losses on debt, receivables and financial contracts, taxable gains/losses on shares, and taxable dividend.

Thirdly, there is an earnings before interest and tax (EBIT) based rule that works to limit interest relief to an amount equal to 80% of the Danish company's/tax group's taxable EBIT income. This rule applies the same definition of net financing costs as the asset-based rule, and it also allows for a minimum deduction of DKK 21.3 million in cases where EBIT is too low or negative.

Denmark

Controlled foreign companies (CFCs)

According to the Danish CFC rules, a Danish company has to include in its taxable income the total income of a subsidiary, foreign or Danish, if such subsidiary qualifies as a CFC. A subsidiary qualifies as a CFC if all of the following criteria are met:

- The Danish company, together with other group member companies, directly or indirectly owns more than 50% of the capital or controls more than 50% of the voting rights in the subsidiary.
- More than half of the subsidiary's taxable profits, as hypothetically assessed under Danish tax laws, are predefined CFC income types (mainly interest, royalty, capital gains, etc.).
- During the income year, the subsidiary's CFC assets (assets, where the return is characterised as a CFC income type) make up more than 10% of the subsidiary's total assets.

There is no black or white list that exempts subsidiaries resident in certain countries.

Tax credits and incentives

Foreign tax credit

According to Danish tax law, relief is generally available to credit foreign tax paid on non-Danish source profits against the Danish tax on the same profits. As Danish companies are not taxed on income from foreign PEs or properties, the rules have limited application.

For share holdings of 10% or more of the share capital in foreign companies, Denmark has further rules allowing 'underlying' tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved where dividends flow to Denmark via a chain of companies. As Danish tax law, as a main rule, exempts dividends from companies resident in countries with which Denmark has a tax treaty in which the Danish recipient company holds 10% or more, this rule, as well, has a limited application.

Capital expenditure incentives

A small variety of tax incentives are available in the form of deductions for capital expenditures.

Danish tax law allows for an immediate write-off of capital expenditures for R&D. Alternatively, the taxpayer may choose to take tax depreciation in the same year and the following four years on a straight-line basis. Costs incurred in connection with the exploration for raw materials may also be fully deducted in the same year.

Companies in a loss making situation may not benefit from an immediate write-off of capital expenditures. As of 1 January 2012, companies have been granted the opportunity to apply to the Danish tax authorities for a payment equal to the tax value (25%) of negative taxable income. It is a condition that the negative taxable income relates to R&D costs. The rule does not cover costs incurred in connection with exploration for raw materials.

Tax payment according to this rule cannot exceed an amount of DKK 1.25 million (tax value of DKK 5 million). For companies participating in joint taxation, the limit of DKK 1.25 million applies for all companies in total.

Costs related to purchase of patents and know-how (including rights/licences to utilise patents or know-how) may either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

Withholding taxes

WHTs on payments to foreign corporations and non-resident aliens

D

Dividends

Dividends paid to a parent company in another EU member state or a state with which Denmark has a DTT are exempt from WHT provided that the shares qualify as subsidiary shares. The same applies for dividends paid on group shares (that are not also subsidiary shares, i.e. holdings below 10%), provided that the recipient company is resident within the EU/EEA.

Dividends paid on portfolio shares to a foreign shareholder are levied WHT of 27% (28% prior to 2012). If the portfolio shareholder is situated in a country with which Denmark has a Tax Information Exchange Agreement (TIEA), the tax rate on the dividend is reduced to 15% and the difference between the higher WHT rate and the lower WHT rate may be reclaimed. However, the reduced rate does not apply if the shareholder is resident outside the European Union and together with related entities owns more than 10% of the capital in the Danish distributing company.

Interest

Interest generally is not subject to WHT unless paid to a foreign group member company that is tax resident outside the European Union and outside any of the states with which Denmark has concluded a tax treaty. In this situation, interest WHT is levied at 25%. Certain other exemptions apply, mainly relating to CFC taxation.

Royalties

Royalties are subject to a 25% WHT. In most cases, the payer may reduce its withholding in accordance with the tax treaty applicable to the payee. Also, the EU Interest/Royalty Directive may provide an exemption from WHT if the payee is an immediate parent, sister, or subsidiary company resident in the European Union.

Notes

- Denmark does not operate a system of WHT on dividends when the parent company holds:
 - at least 10% of the share capital of the distributing Danish company, provided the receiving company is resident in a EU/EEA member state or a state with which Denmark has entered a double tax treaty (subsidiary shares) or
 - less than 10% of the share capital in the distributing company, provided that the receiving company is an EU/EEA-resident and the distributing and the receiving company are affiliated companies (group shares).
- Interest generally is not subject to WHT unless paid to a foreign group member company that is tax resident outside of the European Union and outside of any of the states with which Denmark has concluded a tax treaty. In this situation, interest WHT is levied at 25%.
- Exemptions apply if the receiving company is directly or indirectly controlled by a Danish parent company or if the receiving company is controlled by a company resident in a state with which Denmark has a double tax convention and that company may be subject to CFC taxation. Finally, an exemption applies if the receiving company establishes that the foreign taxation of interest is not less than three-quarters of the Danish corporate taxation and that the interest is not paid to another foreign company subject to taxation less than three-quarters of the Danish corporate taxation.
- Denmark has terminated its treaty with Spain and France with effect from 1 January 2009. The termination means that each country will tax the relevant income according to its domestic tax rules. New treaties are not expected to be agreed in the near future. Companies in Spain and France receiving dividends from a Danish company may, however, qualify for tax exempt dividends since they are EU member states.
- The EU Interest/Royalty Directive may provide an exemption from WHT if the payee is an immediate parent, sister, or subsidiary company resident in the European Union.
- Serbia has succeeded in the treaty between Denmark and Yugoslavia.
- Different rates apply depending on the characteristics of the assets on which royalty is paid.
- The 10% rate is applicable for royalties, whereas the 5% rate is applicable to fees for technical support.

Denmark

Tax administration

Taxable period

Danish corporate taxpayers are taxed on an annual basis. Corporate taxpayers may choose a tax year that is different from the calendar year.

Tax returns

Tax returns are completed on the basis of audited financial accounts with adjustments for tax. Tax returns should be filed no later than six months following the end of the accounting year. Corporations with an accounting year-end that falls in the period from 1 January to 31 March must file a tax return no later than 1 August in the same calendar year.

The tax system, in practice, is based on self-assessment. Tax assessments are made automatically by the tax authorities on the basis of the tax return. However, the tax authorities may subsequently audit the tax return.

Payment of tax

CIT must be paid on a current year basis in two equal instalments due on 20 March and 20 November. The authorities request payments of 50% of the average of the last three years' final income tax. In addition, voluntary additional payments may be made at the same dates; such voluntary payments are adjusted by 0.7% when set against the final tax bill.

The final tax bill is settled by 20 November in the following year. Underpaid tax is then payable by 20 November with a surtax of 4.8% of the tax amount (for the 2011 tax year). Overpaid tax is refunded by November of the following year with interest of 1.3% (for the 2011 tax year).

Audit cycle

The Danish tax system is based on self-assessment. Companies are, in general, subject to audit on a random basis, but some large companies/groups are subject to annual audit by the Danish tax authorities.

Statute of limitations

The general statute of limitations is 1 May in the fourth calendar year after that of the end of the relevant accounting period. This limitation is extended for another two years with respect to inter-company (transfer pricing) issues.

Topics of focus for tax authorities

Once a year, the Danish tax authorities publish a list of topics subject to increased focus by the tax administration during their audit. Transfer pricing issues figures on top of this list.

In general, all aspects of transfer pricing are in focus. However, specific topics certainly seem to have caught the tax authorities' attention. These are mainly transactions with group companies resident in countries with which Denmark does not have a tax convention, use and transfer of intangible assets, restructurings, and companies making continuous losses.

As described in the *Significant developments* section, attention has also been drawn to whether Danish entities have complied with the WHT requirements regarding dividends and interest.

Last but not least, the tax authorities have increased their focus on tax deductions for costs related to the creation of tax exempt income, such as dividend from and capital gains on certain shares.

Other issues

Tax-free restructuring

Restructuring (e.g. mergers, demergers, share exchanges, drop-down of assets) can, in many cases, be carried out tax-free under the provisions of the EU Mergers Directive as implemented into Danish law. These types of restructuring can be carried out in a tax-exempt manner without prior approval from the tax authorities. However, several objective conditions must be fulfilled. Formation, merger, reorganisation, and liquidation expenses are mostly non-deductible.

Significant developments

There are no significant developments during the past year, other than the reduction of stamp duty on land transfer between parent and child, which is now reduced from 4% to 2%, and the removal of transferor's fees.

Taxes on corporate income

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in and out of Dominica, and are subject to tax at a flat rate of 30%.

Non-resident companies are taxed on Dominican-source income. The gross amount of such income is liable to 15% withholding tax (WHT).

Associations of underwriters are taxed at 30% on 10% of the gross premium arising in Dominica, and life insurance companies are taxed at 30% on 20% of the gross investment income arising in Dominica.

Corporate residence

Companies are regarded as resident if they are incorporated in Dominica or managed and controlled through a permanent establishment (PE) in Dominica.

Permanent establishment (PE)

A PE is defined in Dominica as a fixed place or premises through which the business is wholly or partly carried on. A PE includes:

- A place of management.
- A branch or office.
- A factory or workshop.
- Premises used as a sales outlet.
- A building site or construction or assembly project.
- The maintenance of plant and machinery for rental.

Other taxes

Valued-added tax (VAT)

VAT came into effect on 1 March 2006. VAT replaced the Consumption Tax, Sales Tax, Hotel Occupancy Tax, and Entertainment Tax.

VAT applies to practically all supply of services and import of goods or import of services, other than an exempt import. The tax is imposed at a rate of 15% of the value of every taxable supply by a taxable person in Dominica, except if the supply is classified as accommodations and diving activity, which carries a rate of 10%.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-exempt.

Certain supply of services is exempt from VAT, including services provided by financial intermediaries, schools, and medical practitioners. Exempt imports include goods imported by Dominicans returning home for permanent residence, motor vehicles imported by natural persons on change of permanent residence, unconditional gift of goods to an approved charitable organisation, other than for purposes of re-sale, etc.

Every registered person is required to file a tax return for each tax period with the Inland Revenue Division (IRD) within 20 calendar days after the end of the period, whether or not tax is payable in respect of that period. This return should be in the form prescribed by the IRD and should state the information necessary to calculate the tax.

Customs duties

Custom duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

Excise taxes

Excise tax is imposed on taxable goods (other than taxable goods previously imported into Dominica) removed for consumption in Dominica from a warehouse of a manufacturer registered or required to be registered and taxable goods imported into Dominica.

For both importers and local manufacturers, the due date for payment is the 20th day of each calendar month.

Taxable goods include alcohol, cigarettes, petrol, and vehicles.

Stamp taxes

Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped, denoting the payment of taxes, which may be either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property transferred.

For a conveyance or transfer on sale of any property (except stock and debentures), a stamp duty of 6.5% on the value of the property, real or personal, transferred shall be paid of which 2.5% shall be paid by the transferor and 4% by the transferee. Provided that on any stock or shares of a company or corporation whose assets to the extent of 50% or more consists of real property, stamp duty as set out above shall be paid.

Branch income

The tax rate on branch income is the same as that on income earned by resident companies. Every non-resident company carrying on business in Dominica is liable to

Dominica, Commonwealth of

WHT of 15% on such part of the profits of the business for any year of assessment as is remitted out of Dominica.

Where a controlled company fails to make a sufficient distribution in relation to any year of assessment, it is liable to pay tax on the undistributed profits of that year of assessment at the rate of 15%. A 'controlled company' means a resident company that is owned by not more than five shareholders, excluding the government and any company that is not itself a controlled company.

In determining the amount of a sufficient distribution, the Comptroller of the IRD shall have regard to the nature of the sources of its income and the financial resources available to it and may, where satisfied that it would be detrimental to the business of the company to regard the whole of its chargeable income after deduction of the tax payable thereon as a sufficient distribution, direct that such proportion thereof as the Comptroller may specify (hereinafter referred to as 'a retention allowance') may be retained for the purpose of the business without liability to tax.

Income determination

Inventory valuation

Stocks generally are valued at the lower of cost or market value. Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

Capital gains

There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.

Dividend income

Dividends are subject to tax at a rate of 30%. However, there is a tax credit given that is equal to the amount by which the tax payable of a company has been increased by the inclusion of such dividend in its taxable income.

Interest income

The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and any income accruing to the buyer, seller, or issuer from any transfer of securities which are listed on the Eastern Caribbean Securities Exchange through the facilities of that Exchange is tax exempt.

Any expenditure incurred for the purpose of producing exempt income is not deductible.

Deductions

Depreciation and amortisation

Capital allowance is available in Dominica.

Annual allowances for wear and tear, ranging from 3% to 20%, are granted on the acquisition of industrial and commercial buildings; on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.

The Comptroller of the IRD may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Goodwill

Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

Start-up expenses

All expenditures incurred in connection with incorporation costs for the establishment of a company are deductible unless considered as capital expenditure.

Interest expenses

Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

Bad debt

Bad debt expense is deductible provided it has been brought to account in generating the company's assessable income for any income year.

Charitable contributions

Charitable contributions are an allowable deduction when the contributions are made by way of subscription or donation to a business or professional organisation approved by the Comptroller of the IRD where the Comptroller is satisfied that the organisation is a non-profit body established with the object of maintaining and advancing the standards of the business or profession.

Fines and penalties

Fines and penalties are not allowable deductions.

Taxes

Taxes are not allowable deductions except taxes imposed on any immovable property used for the purpose of producing assessable income.

Net operating losses

Net operating losses may be carried forward up to a maximum five years. In carrying losses forward, the amount that can be claimed in any subsequent year is the full amount of the available loss.

Payments to foreign affiliates

There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm's length and at commercial rates. However, deduction for management charges, which is subject to 15% WHT, is restricted to the lesser of such charges or 5% of all allowable deductions, excluding such charges and capital allowances.

Group taxation

Group tax filing is not allowed in Dominica.

Dominica, Commonwealth of

Transfer pricing

Related party transactions are accepted if they are made on an arm's-length basis. The Comptroller of the IRD has the power under the Income Tax Act to make any adjustment deemed necessary to place such transaction at arm's length.

Thin capitalisation

No provision exists for thin capitalisation in Dominica.

Tax credits and incentives

Foreign tax credit

Where income has accrued to a resident and has been taxed in a foreign country with which there is no double tax agreement (DTA), or is income to which a DTA, if there is one, does not relate, credit for tax on such income is allowed for the lesser of the tax payable in the foreign country or the tax charged under Dominican tax law.

Tax holidays

Tax holidays are available for manufacturing companies. The incentives are aimed at increasing the manufacturing base of Dominica, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise will be granted a tax holiday up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

Investment incentives

Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act, and other concessions granted by the Cabinet of Ministers. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment generating activities, for periods of up to 15 years.
- Whole or partial waivers of stamp duties, Alien Landholding License fees, and WHT with respect to investments in specific areas, or in specific industries and activities.
- Export allowances for goods manufactured in Dominica and exported. Companies who engage in such activity are given tax exemption on the export of such goods up to a maximum of 10 to 15 years.

Withholding taxes

Resident corporations and persons that make certain payments of an income nature to residents or non-residents are required to withhold tax on these payments:

Payment	WHT (%)
Dividend	15

Dominica, Commonwealth of

Payment	WHT (%)
Interest or discounts	15
Rental, lease, premium, or licence in relation to immovable property	15
Rental of plant, machinery, equipment, or other movable property	15
Royalty	15
Management charge	15
Commission or fee, not being in respect of employment	15
Annuities or other periodic payments	15
Distribution of income of a trust	15
Any other payment of an income nature	15
Profits of a non-resident company from carrying on business in Dominica that is remitted out of Dominica	15

Tax administration

Tax returns

Tax returns must be filed within three months of the company's fiscal year-end. An extension of the filing date may be obtained. Returns must cover a 12-month period, which may be changed only with the Comptroller's permission.

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

The system is one of self-assessment. Upon receipt of the returns, the IRD examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The IRD may also issue assessments in the absence of returns.

Payment of tax

Tax is payable in instalments on 31 March, 30 June, and 30 September in each income year, based on the preceding income year. Any remainder is payable on or before 31 March of the subsequent year.

Audit cycle

The IRD carries out audits of a selection of tax returns, usually at the taxpayer's place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The IRD has wide powers in determining the information it requires for these audits.

Appeals

Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the IRD on any matters in such assessment or reassessment. If the IRD confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises four persons appointed by the Cabinet. A decision by that body may be further appealed to the High Court. An appeal against an order from this Court may be made to the Court of Appeal.

Statute of limitations

Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

Significant developments

General Norm 04-11 of 2 June 2011

General Norm 04-11 of 2 June 2011 established the rules for transfer pricing determination on transactions between related parties. It applies to any transaction between local entities of foreign equity and:

- related parties abroad
- residents or persons domiciled in tax havens or in jurisdictions of low tax rates, and
- related parties classified as a Free Trade Zone (FTZ) entity.

This rule established the obligation of taxpayers to file an annual Informative Tax Return of transactions between related parties, which shall contain detailed information of each transaction and the related party's identification. Furthermore, tax authorities have the faculty to challenge these transactions if the price or amount stated by the taxpayer differs from those established in the market.

Law No. 139-11 of 29 June 2011 on income tax increase to allocate funds to education

Law No. 139-11, effective on 29 June 2011, introduced the following important modifications:

- The corporate income tax (CIT) rate increased from 25% to 29% for a two-year period.
- The following withholding tax (WHT) rates increased for a two-year period:
 - Payments abroad: from 25% to 29%.
 - Interest paid to non-financial institutions abroad: from 25% to 29%.
 - Dividends paid or credited in cash: from 25% to 29%.
 - Fringe benefits tax: from 25% to 29%.
- An additional tax of 1% (.083% monthly) was introduced on net financial assets, which will constitute a deductible expense for CIT purposes. The annual tax amount should not exceed the net taxable income (before the deduction of this tax), determined for the CIT return. The base of this tax is the total average interest-earning financial assets for the year, and the tax applies to the amount of assets exceeding 700 million Dominican pesos [DOP]). The application of this tax was established for a 24-month period and affects for multiple banks, savings and loans associations, savings and credit banks, and credit corporations.

Companies under the financial assets tax must make a monthly advance payment equivalent to one-twelfth the rate of 1% (.083%) over the productive assets of the month.

- A 2.5% tax was created on the gross sales of goods and services by companies in Dominican FTZs to individuals and legal entities in the local market.

General Norm 07-11 of 1 July 2011

General Norm 07-11 of 1 July 2011 establishes a 1% WHT on the value of the transfer of shares paid to the seller. Foreign entities are not exempt from this obligation.

Such WHT is a payment on account against capital gain tax, payable by the seller through the Form IR-2 (legal entities) or Form IR-1 (individuals), as applicable. However, if they can substantiate that the transaction will generate a capital loss, they may request from the tax authorities, no later than 30 days prior to withholding filing/payment's due date, to be exempt from this obligation.

General Norm 13-11 of 5 September 2011

General Norm 13-11 of 5 September 2011 appoints financial institutions as 1% WHT agents on the value paid or credited on account for interest payments of any nature to legal entities.

The interests paid by financial institutions will constitute a deductible expense for tax purposes, provided the WHT was made.

In addition, this rule obliges financial institutions to provide a monthly electronic file, directly to the tax authorities or through the Banks Superintendency, containing all the information related to the interest payment, including the date, value, and identity of the beneficiary.

Taxes on corporate income

The Dominican Republic follows a territorial concept (i.e. resident companies, branches, and permanent establishments [PEs] are generally subject to taxation on Dominican-source income only); therefore, the tax treatment for corporations, partnerships, and limited liability companies is similar in most aspects.

As of 29 June 2011, the current CIT rate is a flat rate of 29%. Prior to 29 June 2011, the CIT rate was 25%. After 29 June 2013, the CIT rate will return to 25%. Please note that the asset tax is an alternative minimum tax that is payable when it is higher than a company's CIT liability (*see Asset tax in the Other taxes section*).

Dividends remitted abroad or paid locally by Dominican entities (not applicable to branches or PEs) are subject to a WHT of 29% (25% prior to 29 June 2011 and after 29 June 2013). This WHT may be used as a credit against the company's CIT of the same tax year as long as the dividends were paid out of profits which had already been subject to CIT.

Local income taxes

In the Dominican Republic, local government income taxes do not apply.

Corporate residence

A company is resident when it is registered or incorporated under the laws of the Dominican Republic. Foreign entities are considered as domiciled when they

Dominican Republic

are registered in the Dominican Republic as a branch or PE, and they are subject to local tax in the same manner.

Permanent establishment (PE)

According to local tax legislation, which follows the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, a PE is defined as a fixed place of business where a foreign entity or individual performs all or part of its activities, such as:

- An address in the Dominican Republic.
- Office.
- Branches.
- Workshop.
- Mine.
- Petroleum or gas well.
- Quarry or any other natural resource extraction place.
- Assembly projects, including supervision activities of such projects.
- Construction/supervision activities derived from the sale of machinery and equipment when its cost exceeds 10% of the sale price of such equipment.
- Consulting services, provided these exceed six months within the same fiscal period.
- Representatives or dependent or independent agents, when these act on behalf of the entity.

Other taxes

Tax on the Transfer of Industrialised Goods and Services (ITBIS)

ITBIS is a value-added tax (VAT) applied to industrialised goods (movable) and services at a rate of 16%, with exemptions established by law to certain goods and services.

Exempt goods include a wide variety of goods, among which are basic products (eggs, milk, grains, live animals, frozen meats), seeds for planting, fruits and vegetables, sausages and canned sardines, chocolate/cacao, infant foods, medicine, insecticide and pesticides, books/magazines, educational material, wheelchairs, and prosthesis.

Exempt services include educational, health, financial (including insurance), pensions, ground transportation of people and cargo, electricity, water and waste pick-up, housing rental and personal care, and exported services.

A 0% rate applies to exports, including sales to FTZs.

Tax on gross sales made by FTZs to local market

A 2.5% tax was created on the gross sales of goods and services made by companies in Dominican FTZs to individuals and legal entities in the local market.

Customs duties

Customs duties are assessed at various rates depending on the nature of the goods and their country of origin. Free trade agreements exist (e.g. Central America-Dominican Republic-US Free Trade Agreement [DR-CAFTA]) which decrease the custom duty rates for goods imported from the member countries.

Selective consumption taxes (Impuesto Selectivo al Consumo or ISCs)

ISC is applied to the acquisition or import of certain goods and services.

There is an ISC for alcoholic goods and cigarettes, adjusted by inflation annually:

- Alcohol: ranges from DOP 356.84 to DOP 437.56 for every litre of pure alcohol.
- Cigarettes: DOP 33.24 for a 20 pack and DOP 16.62 for a 10 pack.

There are ISCs that vary based on the product, which range from:

- 7.5% on the transfer of alcoholic beverages, applied on the retail price. Imports and transfers made by local manufacturers are accountable for this tax.
- 20% on the transfer of tobacco products, applied on the retail price. Imports and transfers by local manufacturers are accountable for this tax.
- 19.5% to 130% on the consumption of certain imported goods (listed in the law) that are considered to be non-essential.
- 10% on telecommunications services.
- 16% on insurance services.
- 0.0015% on the value of cheques or wire transfers made through financial entities (this tax does not apply to cash withdrawals or credit card use).

Asset tax

Asset tax/Law No. 557-05 imposes a 1% tax on total assets, net of depreciation, amortisation, and bad debt reserves. Share investments in other companies, land in rural areas, immovable property pertaining to livestock and agriculture, asset revaluations, and tax advance payments are excluded from this tax base.

The asset tax is a minimum tax filed and liquidated through the annual CIT return (Form IR-2) and paid applying the following rules:

- CIT is allowed as a credit against the asset tax.
- If CIT is greater than the asset tax, the obligation to pay the asset tax is cancelled and CIT is paid instead.
- If CIT is less than the asset tax, the difference (in order to complete the asset tax value) shall be paid in two equal instalments as follows:
 - First instalment shall be paid during 120 days subsequent to closing date.
 - Second instalment shall be paid within six months after first quote's due date.

Entities may request a temporary exemption from the asset tax. Entities that require large capital (among other requirements established by General Ruling 3-06) may make such a request, which should be submitted at least 90 days before the filing due date. The local internal revenue service shall evaluate the merits of the request and approve or deny, as appropriate.

If the entity has an income tax credit arising from excess advance payments, it may request the refund of such balance be applied against the asset tax.

In the case of financial institutions, power generation and distribution companies, pension fund entities, and stock brokerage companies, the tax is calculated based on the fixed assets book value.

According to Rule 07-2007, construction companies may seek exemption from the asset tax, provided that such entities meet the requirements established in this rule.

Real Property Transfer Tax

The Real Property Transfer Tax is assessed at a basic rate of 3% on any transfer of ownership of real estate.

Dominican Republic

Stamp taxes

Stamp taxes have been abolished in the Dominican Republic.

Financial assets tax

A 1% tax per year on net financial assets (which should not exceed net taxable income before expenses generated by this tax, calculated on the total average interest-earning financial assets for the year, and applies to the net financial assets over DOP 700 million) was established on 29 June 2011 for a two-year period (until 29 June 2013) for multiple banks, savings and loans associations, savings and credit banks, and credit corporations. The amount paid for this tax will constitute a deductible expense for tax purposes if the tax is paid in the fiscal year.

Companies under the financial assets tax must pay a monthly payment equivalent to one-twelfth the rate of 1% over the productive assets of the month.

Branch income

Branch profits are taxed at the same rate as corporate profits (29% as of 29 June 2011; 25% prior to 29 June 2011 and after 29 June 2013). There is no WHT on branch profit remittances to the company's headquarters, provided that the corresponding annual CIT has been paid.

Income determination

Inventory valuation

The last in first out (LIFO) method of inventory valuation is established for tax purposes. Other methods may be authorised upon request.

Conformity between book and tax reporting is not required.

Capital gains

Capital gains are added to ordinary taxable income and subject to the CIT rate. Capital gains are defined as the difference between the sale price of an asset and the acquisition or production price, adjusted for inflation.

Dividend income

Dividend distributions in cash are subject to a 29% WHT, which should constitute a tax credit for the distributing entity against the annual CIT corresponding to the same taxable year in which the distribution was made. Dividends are tax exempt, provided they were subject to WHT.

Stock dividends

Stock dividends are not subject to taxation.

Interest income

Interest income is considered as part of taxable income; in the case of non-resident non-domiciled taxpayers, the tax should be paid through WHT.

Foreign income

Dominican-resident companies, branches, and PEs are subject to taxation on income from Dominican sources and on income from foreign sources arising from investments and financial gains. Tax determined on income from foreign source is subject to a credit

mechanism. Taxes paid in the country where the income is originated can be credited up to the amount of the tax payable in the Dominican Republic on the same income.

Deductions

Depreciation and amortisation

Depreciation allowances on fixed assets are determined by the declining-balance method at the following rates:

Assets	Depreciation rate (%)
Buildings	5
Office furniture, fixtures, computers, light vehicles, etc.	25
Other assets not specified	15

The fiscal book value is adjusted by the annual inflation rate.

Amortisation of intangible assets (e.g. patents, author's rights, drawings, franchises, and contracts without set expiration date) is not deductible.

Goodwill

Goodwill is not deductible.

Start-up expenses

The Dominican tax legislation does not establish specific provisions regarding the deduction of start-up expenses. The general deductions rule is the accrual method.

Interest expenses

Interest expenses are deductible, provided they are associated with the acquisition, maintenance, and/or exploitation of taxable income-generating assets.

Bad debt

Bad debts are deductible only in the year the loss is suffered. Authorisation may be obtained to use an alternative method, which consists of creating a provision allowing the deduction only in the year the bad debts qualify as doubtful, up to 4% of the balance of the accounts receivable at year-end.

Charitable contributions

Donations made are not tax deductible in the Dominican Republic.

Fines and penalties

Fines and penalties are considered non-deductible expenses.

Taxes

Income taxes are not deductible. Other taxes can be deductible; however, interest and surcharges imposed on taxes are not deductible in general.

Other significant items

For tax purposes, the following significant items should be considered:

- Changes in methods are not allowed without prior approval.

Dominican Republic

- Bonuses paid to employees within 120 days after the end of the taxable year are deductible for the year just ended.

Net operating losses

The carryforward of losses of legal entities can be used to offset profits up to the fifth year following the year in which the losses were generated, with a maximum amortisation of 20% in each year. For the fourth year, the deduction allowed should not exceed 80% of the net taxable income. In the fifth year, the percentage is 70%.

There is no carryback loss mechanism in the Dominican Republic.

Payments to foreign affiliates

Payments to foreign affiliates for royalties, interest, or service fees are deductible, provided that the 29% WHT was paid.

Payments of interest on loans abroad to foreign financial institutions are subject to a WHT of 10%.

Group taxation

Group taxation is not permitted in the Dominican Republic.

Transfer pricing

General Norm 04-11 of 2 June 2011 established the rules for transfer pricing determination on transactions between related parties. It applies to any transaction between local entities of foreign equity and:

- related parties abroad
- residents or persons domiciled in tax havens or in jurisdictions of low tax rates, and
- related parties classified as a Free Trade Zone (FTZ) entity.

This rule established the obligation of taxpayers to file an annual Informative Tax Return of transactions between related parties, which shall contain detailed information of each transaction and the related party's identification. Furthermore, tax authorities have the faculty to challenge these transactions if the price or amount stated by the taxpayer differs from those established in the market.

Thin capitalisation

Thin capitalisation rules do not exist in the Dominican Republic.

Tax credits and incentives

In the Dominican Republic, tax incentive laws exist for the following.

Tourism incentives

Law 158-01 on the Promotion of Tourist Development for New or Low Development Locations in Provinces and Areas with Great Tourist Potential, and for the Creation of the Tourist Promotion Official Fund, enacted on 9 October 2011, establishes special incentives and benefits to individuals or companies, residing in the Dominican Republic, that promote or invest capital in any tourist activity described in said Law. In order to benefit from said Law, a special Resolution shall be obtained from the Council for the Promotion of Tourism.

Alternative energy incentives

Law 57-07 provides significant incentives for the use and development of renewable sources of energy. The renewable energy sources subject to this law include bio-fuel, bio-diesel, ethanol, and wind, solar, and other renewable energy.

Industrial renovation and modernisation incentives

The main objective of Law 392-07 about competitive development and local industrial manufacture is to promote policies and support programs for industrial renovation and innovation so to diversify local production, create industrial parks, and link the country to international markets. Main benefits include VAT exemption on import of machinery and materials, priority on imports granted at customs, and accelerated depreciation.

Industrial FTZ operations

Law 8-90 about Export Free Trade Zones was created to promote employment, production, and economic growth. Entities that would like to benefit from said Law shall be engaged in manufacture/service within a confined space (FTZ park). Call centre activities are allowed to be provided outside the FTZ parks. Benefits include 100% exemption on CIT and VAT, custom duties, construction taxes, transfer taxes, etc.

Border development incentives

Law No. 28-01, dated 1 February 2001, creates a special development frontier zone for industrial, agro-industrial, agriculture/livestock, metalmechanic, free zone, tourism, metallurgical, and energy companies that exist at the time of promulgation of said law, and those that may be installed in the future within the border of the Dominican Republic and Haiti. Main incentives include 100% exemption on CIT and VAT, as well as custom duties.

Foreign tax credit

Taxes paid abroad on foreign income taxed in the Dominican Republic may be credited up to the amount of the Dominican tax liability generated by such income. The credits should be determined on a case-by-case basis.

Withholding taxes

WHT on dividends

Dividends paid in cash to resident and non-resident individuals or corporations are subject to a WHT of 29% (25% prior to 29 June 2011 and after 29 June 2013).

The WHT on payments to foreign corporations, which are not permanently established in the Dominican Republic, are as follows:

Recipient	WHT (%)			
	Dividends and interest	Royalties	Technical assistance	Other services
Non-treaty, basic	29 (1, 2)	29 (2)	29 (2)	29 (2)
Treaty (Canada)	18	18	29 (2)	29 (2)

Notes

1. Payments on interest (loans) to foreign financial institutions are subject to a WHT of 10%.
2. 29% WHT rate to be reduced to 25% on 29 June 2013.

Dominican Republic

WHT on transfers of shares

General Norm 07-11 of 1 July 2011 establishes a 1% WHT on the value of the transfer of shares received by the seller. Foreign entities are not exempt from this obligation. In this case, WHT may be made by a person appointed as WHT agent by the tax authorities.

Such WHT is a payment on account against capital gain tax, payable by the seller through the Form IR-2 (legal entities) or Form IR-1 (individuals), as applicable. However, if they can substantiate that the transaction will not generate a capital gain or that the 1% WHT would generate a capital loss, they may request the tax authorities, no later than 30 days prior to withholding filing/payment's due date, to be exempt from this obligation.

This 1% WHT should be filed and paid to the tax authorities through the monthly WHT return (IR-17 Form) within the first ten days of the month following the payment to the seller. In case the purchaser is an individual, the 1% WHT is not applicable.

WHT on interest payments

General Norm 13-11 of 5 September 2011 appoints financial institutions as 1% WHT agents on the value paid or credited on account for interest payments of any nature to legal entities.

The interests paid by financial institutions will constitute a deductible expense for tax purposes, provided the WHT was made.

In addition, this rule obliges financial institutions to provide a monthly electronic file, directly to the tax authorities or through the Banks Superintendency, containing all the information related to the interest payment, including the date, value, and identity of the beneficiary.

Tax administration

Taxable period

Corporate bylaws should establish as year-end one of the following: 31 December, 31 March, 30 June, or 30 September. Once the year-end is selected, any change should be authorised by the tax authorities.

Tax returns

The Corporate Annual Tax Return (Form IR-2) must be filed within 120 days after year-end. Tax authorities may allow extensions of up to 60 days, upon request.

Tax returns are based on self-assessment and must be filed on electronic forms supplied by the internal tax department.

Payment of tax

The balance of any tax due must be paid no later than the due date for filing the return. Corporations domiciled in the country and PEs of foreign enterprises shall be obliged to make advance payments on the 15th day of every month for tax related to the period in progress.

Audit cycle

The audit cycle is not established by law or practice. During the statute of limitations, tax authorities select the taxpayers subject to audit based on internal criterion.

Statute of limitations

The statute of limitations is three years, and five years if the entity has been notified of a tax audit, counting from the filing due date.

Topics of focus for tax authorities

Among the topics of focus are: non-deductible expenses, withholdings, VAT, and proportionality of VAT credits.

Significant developments

According to the tax reform introduced in the Production Code at the end of 2010, corporate income tax (CIT) rates will be reduced from 23% in 2012 to 22% in 2013.

As of 24 November 2011, the Law of Environmental Development and Optimization of State Revenues is in force. This Law intends to promote environmental-friendly behaviour from taxpayers and levies taxes on the acquisition and maintenance of certain vehicles and on goods contained in plastic bottles. Additionally, a new increase of the remittance tax was introduced (from 2% to 5%) including the taxation on transfer of funds located in foreign bank accounts.

International Financial Reporting Standards (IFRS) are in force for all entities. Local tax authorities have established that, for CIT purposes and its corresponding pre-payments, companies are obligated to follow these accounting principles.

Taxes on corporate income

Resident entities are taxed on their worldwide income. Non-resident entities are subject to tax on Ecuadorian-source income only.

Taxes on corporate income are levied at the following rates for fiscal year 2012:

Type of income	CIT rate (%)
Distributed or undistributed profits of local corporations and branches	23
Reinvested profits of local corporations and branches	13

Note that these rates will be reduced by 1% in 2013 in order to reach 22% and 12%, respectively.

Local income taxes

No other government taxes on income are imposed on companies.

Corporate residence

Corporate residence is determined by the place of incorporation. For foreign branches, it is the place stated in the domiciliary deed.

Permanent establishment (PE)

According to the tax legislation, a company can be deemed to have a PE in Ecuador if it maintains any place or fixed centre within the country, in which a foreign company develops all or part of its activities.

The corresponding regulations point out that a PE also exists when a foreign company maintains, within the country, a person or an entity that acts on its behalf and habitually exercises an economic activity. It contemplates several instances where this is applicable, among them:

- A person with legal representation, which is normally granted through a power of attorney or through a legalised decision by the company and includes the capacity to legally act on behalf of the company.
- A person working under a contractual relationship for a foreign company to carry out economic activities on behalf of that company.
- A centre for the direction of the activities of the foreign company.
- A branch, agency, or office that acts on behalf of the foreign company.
- An office for the provision of technical consultancy services related to contracts that are executed in the country.

Other taxes**Value-added tax (VAT)**

VAT is levied at the rates of either 12% or 0% on the transfer of goods, import of goods, and the rendering of services, as well as on services rendered within the country or imported. Royalties and intangible property imported or locally paid are also levied with a 12% VAT.

The following are transactions exempt from VAT:

- In-kind contributions to capital of companies.
- Inheritance and assets obtained from liquidation of companies.
- Transfer of business as a whole, amalgamations, mergers, takeovers, and spin-offs.
- Donations to public entities and non-profit organisations.
- Transfers of shares and securities.

Goods and services which are subject to 0% rate are explicitly listed in the law.

Among others, the following goods are taxed at a 0% rate upon either importation or local transfer of ownership:

- Most agricultural goods and foodstuff, when these remain in their natural state; this includes refrigerated or packaged goods that have not undergone further processing. Also included in this category are milk, meats, sugar, salt, bread, butter and margarine, flour, and cooking oil.
- Drugs, medicines, and other pharmaceutical products, including raw materials for their production.
- Fertilisers, insecticides, animal foods, and similar products, including the raw materials required for processing such goods.
- Agricultural machinery and equipment.
- Goods that are exported.
- Paper, books, magazines, and newspapers.

Ecuador

Among others, the following services are taxed at a 0% rate:

- Transportation of persons and cargo, except air transportation of persons and local air transportation of cargo.
- Book printing services.
- Housing rental.
- Water, electric, sewage, and other public services, including garbage collection.
- Financial services.
- Exported services.

The 12% VAT paid on imports and local purchases can be deducted from the 12% VAT charged on sales or services rendered. VAT paid on raw materials, fixed assets, or components required for the production of goods or rendering of services is also creditable when the final product is considered taxable at 12%. On the other hand, VAT paid on raw materials, services, components, or fixed assets necessary for production of export goods is recoverable.

The 12% VAT paid in the acquisition of goods and services utilised for the production or rendering of services levied at 0% VAT is not creditable. Therefore, it will be considered as part of the cost.

Companies designated as 'special taxpayers' (qualified as such by the tax authorities, which, in recognition of its economic importance defined in special parameters, contributes to the effective collection of taxes, subject to special regulations regarding the compliance of their formal duties and payment of taxes) are required to withhold 30% of VAT applicable on their purchases of goods taxed at 12%, and 70% of VAT applicable on their purchase of services taxed at 12%, except with respect to services rendered by professionals, in which case 100% of VAT charged must be withheld.

In the importation of services, VAT at 12% must be self-determined and withheld at 100% by the local entity. This VAT is creditable.

Customs duties

Since Ecuador is a member of the Andean Community, goods to be imported are classified under the Common Nomenclature of the Andean Countries participating in the Cartagena's Agreement (NANDINA) Pact, which is based on the Customs Cooperation Council Nomenclature (also known as the Brussels tariff nomenclature). Most consumer good imports pay 25%, while intermediate goods are usually imported at a 10% or 15% rate. Raw materials and capital goods generally pay 0% to 5%. Ecuador has negotiated exceptions under the Andean common tariff that allow lower duties on certain capital goods and industrial inputs. There is duty-free import of agricultural goods and equipment.

The price listed on the commercial bill or invoice is the basis for the assessment of duties, except when the Central Bank of Ecuador (CBE) considers the listed price unreasonable, in which case market prices in arm's-length transactions will be used. The burden of proof lies with the importer.

In addition to import duties, all imports are subject to 12% VAT and other minor taxes that do not exceed 1%. Charges are based on the cost, insurance, and freight (CIF) value of the merchandise.

All Ecuadorian imports and exports are subject to inspection by authorised international verification companies operating in the country (there are some imports

exempt from verification). Goods are appraised for value, quantity, quality, and weight at the port of origin.

Special consumption tax (*Impuesto a los Consumos Especiales or ICE*)

ICE is imposed on domestic and imported goods which are explicitly listed in the law. This tax is levied at a progressive rate from 5% to 35% on certain automobiles and 15% on airplanes, helicopters, and boats. The taxable basis on cigarettes and alcoholic beverages is obtained by the number of produced or imported cigarettes or degrees of alcohol, respectively. It must be paid monthly and is collected upon sales. The ICE tax base for imported goods is the *ad valorem* value.

E

Foreign assets tax (*Impuesto a los Activos en el Exterior*)

The tax base for the foreign assets tax is the average monthly balance of cash deposits held in foreign entities by private entities registered in the stock market and regulated by the Superintendent of Banks and Companies. The monthly tax rate is 0.084%.

Remittance tax (*Impuesto a la Salida de Divisas*)

Remittance tax is imposed on the transfer of money abroad in cash or through cheques, transfers, or courier of any nature carried out with or without the mediation of the Ecuadorian financial system. As of 24 November 2011, the applicable rate is 5%. Dividends are exempt from this tax, under certain considerations.

Stamp taxes

No stamp taxes are levied in Ecuador.

Redeemable Tax on Non-Returnable Plastic Bottles

A tax is levied on the bottling of beverages in non-returnable plastic bottles utilised for containing alcoholic and non-alcoholic drinks, beverages, soft drinks, and water. In the case of imported beverages, this tax is levied upon their customs clearance for home use.

For each plastic bottle levied with this tax, the rate is up to two cents of a United States dollar (USD 0.02). This amount is fully reimbursed to whoever collects, delivers, and returns the bottles.

Taxpayers of this tax will be the bottlers of drinks contained in plastic bottles and importers of drinks in plastic bottles.

Milk products and medicines filled in plastic bottles are exempt from this tax.

This tax will not be considered as a deductible expense for CIT purposes.

Environmental Tax on Vehicle Pollution (ETVP)

ETVP is levied to offset environmental pollution caused by the use of ground transportation motor vehicles.

Taxpayers of ETVP are individuals, undivided inheritances, and national or foreign corporations who are proprietors of ground transportation motor vehicles.

There are several vehicles exempt from this tax, including government vehicles, public transportation of passengers, school buses, taxis, ambulances, moving hospitals, vehicles regarded as 'classical', electric vehicles, and those destined for the use and transportation of handicapped individuals.

Ecuador

The taxable base of the ETVP corresponds to the cylinder capacity of the vehicle motor, expressed in cubic centimetres, and a percentage related to the potential level of environmental pollution provoked by motorised vehicles in connection with the vehicle 's motor 's years of antiquity.

Social Security contributions

Employers and employees pay contributions to the Social Security at the rates of 11.15% and 9.35%, respectively, on the minimum monthly taxable wages as established for the different contributing categories by the Social Security. Such categories are revised annually.

Labour profit sharing

Although it is not considered a tax, companies are obligated to pay 15% of their pre-tax earnings to their employees. This payment is considered a deductible expense for CIT computation purposes.

Municipal taxes

Municipal asset tax

The municipal asset tax is levied on all individuals and companies required to keep accounting records in accordance with Ecuadorian tax legislation. This tax is levied annually at a rate of 1.5 per thousand (or 0.15%) of total assets less current and contingent liabilities, as shown on the balance sheet.

Municipal real estate tax

The city governments assess an annual municipal property tax , which ranges between 0.25 per thousand and 5 per thousand (0.025% to 0.5%) of the commercial value of the property, as determined by valuation carried out by the city government, for both urban and rural properties (rural property is taxed at a maximum of 0.3%).

Municipal tax on capital gain in the transfer of real estate (Plusvalía)

The real estate transfer tax applies to the transfer of real estate. It is taxed at 10% of profits.

Branch income

Distributed or retained branch profits are taxed at a 23% rate. No further taxes are payable when profits are remitted to headquarters, except if located in a tax haven country. Re-invested profits are levied at a 13% CIT rate. Companies must increase their share capital within the following fiscal year to be beneficiaries of the CIT rate reduction. There is not a branch remittance tax in Ecuador, except for payments to tax haven countries, which are subject to a withholding tax (WHT) of 12%.

Income determination**Inventory valuation**

The valuation of inventories is not specifically treated in the tax law, IFRS must be applied.

Capital gains

Occasional gains from stock sales are tax exempt, and gains from investment funds and investment trusts are CIT exempt, as long as the income has been taxed at source. Gains on the sale of fixed assets are added to the taxable base and levied at regular CIT rates, except gains derived from occasional sales of real estate, which are tax exempt.

Dividend income

Dividends received by a resident company or foreign company, not domiciled in a tax haven, from a resident company are tax exempt.

Interest income

In general terms, interest income is considered as part of the CIT base for Ecuadorian entities.

Ecuador

Foreign income

Foreign-source income is considered exempt for tax purposes if the company demonstrates that the income tax was paid abroad. Income generated in tax haven jurisdictions is not considered to be part of this exemption and should be added to regular income.

Deductions

As a general rule, payments on operations that exceed USD 5,000 should be made through an institution of the financial system; otherwise, such operations will become non-deductible.

Depreciation and amortisation

Straight-line depreciation applies, at rates specified by law. The director of the Internal Revenue Service of Ecuador can authorise higher rates of depreciation in cases such as obsolescence, excessive use, and faster than expected wear-out of assets.

Annual depreciation rates are as follows:

Asset	Depreciation rate (%)
Real estate (except land), aircraft, naval crafts, and similar property	5
Facilities, machinery, equipment, and furniture	10
Vehicles, trucks, and tractors used for construction	20
Computer equipment and software	33.33

Depreciation rates apply to the cost of assets.

In the case of vehicles, if at the time of purchase of the vehicle its appraisal exceeds USD 35,000, the deductibility on the excess will not apply, unless it is an armoured car or a vehicle exempt from the tax on vehicles. The limitation on the deductibility will also not apply in the cases of taxpayers that have as their only activity the car rental business.

Intangible assets are amortised either within the terms specified in the contract or over a 20-year period.

Goodwill

There are no specific rules in Ecuador about goodwill. However, it can be amortised as an intangible asset.

Organisational and start-up expenses

Organisation, experimentation, and preoperational expenses are to be amortised over five years at the rate of 20% per year.

Interest expenses

Interest on debts incurred for business purposes are deductible.

In general, foreign loan interests are deductible for CIT purposes, to the extent that the credits are registered before the CBE, and the interest rates do not exceed the referential rates established by the CBE.

Interest paid for loans granted by a related party are subject to WHT at 23%.

Thin capitalisation rules apply: Interest payments for foreign loans granted by a related party are deductible only if the foreign debt does not exceed 300% of the entity's equity. In case of branches, the ratio applies considering the total of the assigned equity. Credits granted by the head office to its branch are not considered as loans; therefore, any financial cost related to it is non-deductible.

If the above mentioned criteria are not met at the moment of the registration of the loan before the CBE, the excess will not be deductible for CIT purposes. This does not eliminate the obligation of the WHT on the total amount of the interests.

Interest paid on loans obtained from non-resident financial institutions is deductible and not subject to WHT unless the interest rate is higher than the referential interest rate established by the CBE. In such cases, any excess is subject to a 23% WHT. The above mentioned rules do not apply for financial entities domiciled in tax haven countries; in such cases, interest expense is non-deductible.

Bad debt

If the bad debt provision is less than 1% of the portfolio granted in the year, it will be deductible. Any excess will be non-deductible.

Charitable contributions

Payments for charitable contributions are non-deductible for CIT purposes.

Fines and penalties

Interest and fines paid as penalties imposed on late payments of tax obligations and on CIT payments are not deductible for CIT calculation purposes.

Taxes

Taxes, rates, and levies related to the generation of taxable income, as well as contributions to the social security system, are deductible.

Net operating losses

The carryforward of losses is allowed to a maximum of five years, with an amortisation limit of 25% per year over the taxable base. There is no loss carryback.

Payments to foreign affiliates

In most cases, payments made abroad are deductible, as long as income taxes have been withheld (at the rate of 23% over the taxable base). Professional fees, royalties, commissions, or any payment made abroad is subject to WHT at a rate of 23% over the taxable base. Payments on imports are deductible and are not subject to WHT.

Group taxation

Group taxation is not permitted in Ecuador.

Transfer pricing

The transfer pricing regime in Ecuador is based on the Organisation for Economic Co-operation and Development (OECD) guidelines. Related party transactions must be carried out at arm's length. Formal documentation requirements exist.

Ecuador

Thin capitalisation

A thin capitalisation rule on foreign loans granted by related parties at a 3:1 ratio over equity must be considered. For branches of a foreign corporation, only capital must be taken into account.

Tax credits and incentives

Foreign tax credit

There are no provisions in Ecuador for a foreign tax credit. In general terms, income taxed abroad is considered as exempt income, with some special exceptions.

Handicapped employee and new employee increases

An amount equivalent to 150% and 100% remunerations of handicapped and new employees, respectively, can be considered an additional deduction for income tax calculation purposes. New employees must be working with the company for at least six months.

CIT exemptions

Investments made by new companies located outside the cities of Quito and Guayaquil, in specific sectors determined by law, will have a five year CIT exemption.

Tax credit on remittance tax paid

5% remittance tax paid on imports of raw material and goods with a 0% custom duty rate and used for the production of other goods and services can be considered as a tax credit for CIT computation purposes.

Withholding taxes

Prepaid dividends are subject to a 23% WHT.

Dividends paid to non-resident entities generally are not subject to WHT. However, dividends paid to non-resident entities in tax haven countries are subject to 12% WHT at source.

Interest paid on loans obtained from non-residents is subject to a 23% WHT unless reduced by tax treaty. Royalties paid to a non-resident are subject to 23% WHT unless reduced by tax treaty.

Revenues from occasional services provided by non-resident individuals are levied at 23% WHT. Payments made abroad to non-resident individuals and companies are subject to a 23% WHT. Other payments made abroad, other than dividends or profits, are subject to a 23% WHT.

Periodically, the Internal Revenue Service of Ecuador establishes WHT percentages on local payments, which are not greater than 10%. Current rates are 1%, 2%, 8%, and 10% withholding.

Tax treaties

As a member of the Andean Community, Ecuador has adopted Decision 578, which provides relief from double taxation for individual or company members. Furthermore, Ecuador has similar tax treaties with Belgium, Brazil, Canada, Chile, France, Germany, Italy, Mexico, Romania, Spain, Switzerland, and Uruguay.

WHT rates may vary from 0% to 15%, depending on the nature of the payment.

Tax administration

Taxable period

The fiscal year is the calendar year.

Tax returns

The tax system operates on the basis of self-assessment, with subsequent inspection by the tax authorities.

Tax filing deadlines begin on 10 April and continue up to 28 April. The tax return due dates are determined by the ninth digit of the company's Tax Identification Number (TIN).

Payment of tax

Local tax authorities have established that for CIT purposes and its corresponding prepayments companies are obligated to follow IFRS accounting principles.

Corporations are required to keep accounting records and must make CIT prepayments, in two equal instalments in July and September, based on the following calculation:

The sum of 0.4% of the taxable income, 0.4% of total assets, 0.2% of total equity, and 0.2% of deductible expenses from the last fiscal year.

The final CIT obligation cannot be lower than the total amount of the tax prepayment calculated; there are minimum exceptions to this rule. The final CIT payment is due between 10 April and 28 April.

Statute of limitations

Fiscal authorities have three years from the date of filing to start proceedings for tax audits or assessment and collection of taxes.

The statute of limitations is extended from three to six years if the corresponding tax returns have not been filed or are incompletely filed. A tax audit can be reopened, verified, or amended within one year from the date of completion.

Significant developments

Law no. 51 of 2011 was issued by the Supreme Council of the Armed Forces (SCAF) in July 2011 as a part of the 2011/12 Budget (effective 1 July 2011 and thus affecting all fiscal periods ending after that date), imposing a new corporate tax bracket of 25% on annual net income equaling or exceeding 10 million Egyptian pounds (EGP). Accordingly, the 20% corporate tax applies to the first EGP 10 million of annual net income only, with any income exceeding this threshold subject to the 25% rate.

On 16 January 2012, SCAF issued Law no. (11) for the year 2012, regarding the provision of tax incentives for settling taxes due. In addition, Ministerial Decree no. (38) for the same year was issued by the Finance Minister, detailing the procedures of the implementation.

According to the above-mentioned Law and Decrees, a taxpayer is entitled to obtain an incentive, which is a discount on corporate tax due balances as well as the associated delay fines and additional dues, as follows:

- 25% on the amounts to be paid from 17 January 2012 (the effective date of this law) till 31 March 2012.
- 15% on the amounts to be paid from 1 April 2012 till 30 June 2012.
- 10% on the amounts to be paid from 1 July 2012 till 31 December 2012.

Regarding the application of the withholding tax (WHT) on payments to non-residents and the refund of the differences of the rates between the Egyptian Income Tax rate and the rate of the double tax treaty (DTT), a special unit responsible for interest and royalty WHT refunds was established in January 2012. This unit is tasked with reviewing each refund case and with issuing refund letters (subject to compliance with the requirements of the 2009 Ministerial Decree). A refund letter is required to be able to get a refund of excess WHT from the tax office to which the taxes were actually paid.

The monthly social insurance thresholds have increased from EGP 900 to EGP 912 for basic salaries and to EGP 1,050 for variable salaries. This is effective as of 1 July 2012.

Taxes on corporate income

Resident companies are taxed on worldwide income. Non-resident corporations and partnerships pay tax on income derived from their permanent establishments (PE) in Egypt.

The corporate tax rates in Egypt are 20% for annual net income that does not exceed EGP 10 million, and 25% for any income that equals or exceeds the EGP 10 million threshold. The tax is calculated at two brackets rather than a lump sum amount subject to the 25% rate. The 25% rate is applicable as of 1 July 2011.

The above rates apply to all types of business activities except for oil exploration companies, whose profits are taxed at 40.55%. In addition, the profits of the Suez Canal Authority, the Egyptian Petroleum Authority, and the Central Bank of Egypt are taxable at a rate of 40%.

Local income taxes

In Egypt, there are no other local income taxes for corporate income other than those mentioned throughout this summary.

Corporate residence

Foreign corporations and partnerships are classified as residents of Egypt if they meet one of the following conditions:

- The entity is established according to the Egyptian law.
- The government or a public authority owns more than 50% of the capital of the entity.
- The effective place of management is in Egypt.

The executive regulations of the law indicate that Egypt is considered as the effective place of management if the entity meets any two of the following conditions:

- Daily managerial decisions take place in Egypt.
- Members of the board of directors hold their meetings in Egypt.
- At least 50% of the board members or managers reside in Egypt.
- The major shareholders (owners of more than 50% of the shares or voting rights) reside in Egypt.

Permanent establishment (PE)

The PE concept is defined in the income tax law as follows:

- Headquarters.
- Branch.
- Building used as sale outlet.
- Office.
- Factory.
- Workshop.
- Places of extraction of natural resources.
- Farms.
- Building site, construction or assembly point, installations, supervisory activities of the same.
- An agent who has the power to ratify contracts on behalf of a foreign company.
- An independent broker or agent who is proved to have dedicated most of one's time during the year in the interest of a foreign company.

A foreign company that is deemed to have a PE risk, according to the Egyptian Companies Law, should incorporate a legal entity in Egypt.

Egypt

There are several legal forms existing under the Egyptian Companies Law from which a foreign company can choose to incorporate, and these are: joint-stock company, limited liability company, branch, or a representative office.

Other taxes

Sales tax

The standard sales tax rate is 10% of the value of commodities (except for those referred to in special schedules of the law) and 5% to 10% for specific services. Some examples of the commodities subject to sales tax rates other than the standard 10% rate are as follows:

- Cement: 5%.
- Specific types of televisions and fridges: 25%.
- Air conditioners: 25%.

The Sales Tax Department is responsible for assessing the tax on the sales of locally produced goods and imported goods, except for those exempted by a special decree.

Consequently, all natural persons and legal entities are required to collect general sales tax and remit it to the Sales Tax Department. This includes manufacturers and providers of taxable services and every importer of commodities or taxable services.

The Ministry of Finance (MOF) has previously announced its intention to introduce a full-fledged Value Added Tax (VAT) Law to be applicable starting January 2013.

Customs duties

The liability for customs duty rests with the person who is importing the goods from abroad.

Customs duty rates on imported goods range from 5% to 40%, with the exception of vehicles for which different rates apply.

Where entities import machines and equipment as capital assets, and to establish the company's project, the machines and equipment will be charged customs duty at 5%.

Component parts, which are imported to be assembled in Egypt, are assessed customs duty based on the complete product. Then, it is reduced by a percentage ranging from 10% (if the local content of the final product is less than 30%) to a maximum of 90% (if the local content exceeds 60%).

Machines, equipment, and similar capital assets (with the exception of private motor cars) imported on a temporary basis, are subject to fees at 20% of the original customs duty for each year or fraction of a year during which they remain in Egypt until they are exported.

There is also a proposed new law regarding this issue, which is currently at the draft stage.

Excise taxes

There are no excise taxes in Egypt.

Real estate taxes

The real estate tax law takes into consideration the different variables that can affect the value of a property, such as location, value of similar buildings, and the economic situation of the district in which the property is located. This is to be updated every five years.

Real estate tax is levied annually on all constructed real estate units. This covers land and building, excluding plant and machinery.

Such tax is assessed based on the rental value of the land and building, and these value assessments are set by the committees, after approval of the Minister or whomever the Minister delegates, and published in the Official Journal. Based on the announcement, any taxpayer can appeal the rental value assessment.

The real estate tax rate is 10% of the rental value, and the calculation of the rental value differs for residential units and non-residential units. Specific percentages of deductions are provided by the law to account for all the expenses incurred by the taxpayer, including maintenance costs.

Law no. 118 of 2011 was issued by the SCAF amending the Real Estate Tax Law no. 196 of 2008, whereby the implementation of the 2008 Law should be effective starting from 1 January 2012. So starting from that date, taxpayers should start remitting the real estate taxes due. However, the MOF has recently confirmed that it intends to revisit such Law to amend the following and to be effective January 2013 instead:

- Increase the threshold for Real Estate Tax application.
- Exempt owner occupied houses from this tax.

It is worth noting though that the above amendments are still being considered and therefore cannot be guaranteed.

Stamp tax

There are two distinct types of stamp tax, which are imposed on legal documents, deeds, banking transactions, company formation, insurance premiums, and other transactions, as follows:

- The nominal stamp tax is imposed on documents, regardless of their value. The tax rate for items such as contracts is EGP 1 for each paper.
- Percentage or proportionate stamp tax is levied based on the value of transactions.

A proportional tax at the rate of 0.4% is imposed on the balances of credit facilities and loans and advances provided by Egyptian banks or branches of foreign banks during the financial year, with the bank paying 0.1% on the balance at the end of each quarter of the year. The bank and the customer each bear half of the tax.

Loans from other establishments are not subject to this tax.

Social insurance (employer's contribution)

The contribution of the employer is 26% of the basic salary (up to EGP 912) and 24% of the variable salary (up to EGP 1,050).

Egypt

Branch income

Branches of foreign corporations operating in Egypt receive tax treatment identical to that of corporate entities for the results of their activities in Egypt.

A branch, but not a subsidiary, may deduct a 'head office charge' of an amount up to 7% of its taxable income.

Income determination

Inventory valuation

Egyptian generally accepted accounting principles (GAAP) should be applied to inventory valuation, and all methods that are acceptable by Egyptian GAAP can be used.

Capital gains

A foreign company is taxed on all capital gains realised in Egypt. However, capital gains on the sale of Egyptian securities listed on the Egyptian Stock Exchange are not taxable.

Capital gains are not taxed separately; they are considered as part of the company's income and taxed accordingly (i.e. at the 25% corporate tax rate) after deducting all tax deductible expenses.

Dividend income

Dividends distributed by a company residing in Egypt are not subject to corporate taxes. Conversely, dividends that non-resident companies distribute are subject to the Egyptian corporate tax, after deducting foreign taxes paid abroad.

Stock dividends

Stock dividends receive the same treatment as ordinary dividends.

Interest income

Interest expenses are deducted from interest income when calculating the interest income to be included in taxable income.

Rent/royalties income

Rent/royalties income are not taxed separately; they are considered as part of the company's income and taxed accordingly (i.e. at the 25% corporate tax rate).

Foreign income

Income from any source, domestic or foreign, received by a corporation within Egypt is subject to corporate tax. The scope of tax covers the activities carried out inside and outside Egypt, which are administered or managed within Egypt.

There is no provision for deferring income earned abroad.

Deductions

In order for expenses to be acceptable for tax deduction, such expenses must be:

- actual and supported by documents
- business related, and
- necessary for performing the company's activity.

Depreciation and amortisation

The tax law set the depreciation and amortisation rates for tax purposes to the following:

- 5% of the cost of purchasing, establishing, developing, and renovating buildings and establishments is deductible based on the straight-line method.
- 10% of the cost of purchasing, developing, and improving intangible assets is deductible based on the straight-line method.
- Computers, information systems, software, and data storage sets are depreciated at a 50% rate on a declining-balance method.
- All others assets are depreciated at a rate of 25% of the depreciation basis for each fiscal year, on a declining-balance method.

Accelerated depreciation

A company may deduct 30% accelerated depreciation from the cost of new or used machines and equipment used in industries during the first fiscal year of their employment.

Goodwill

According to Article 25 of the Egyptian Income Tax Law, goodwill is amortised at the rate of 10% using the straight-line method.

Start-up expenses

Start-up expenses are tax deductible, and the whole amount can be amortised for the first year.

Interest expenses

Interest expenses are deductible for tax purposes after offsetting any tax-exempt interest income.

Interest expense deductions are only allowed if the following conditions are fully met:

- The interest rate does not exceed twice the discount rate as determined by the Central Bank of Egypt at the beginning of the calendar year in which the tax year ends.
- The interest expense is in return for loans complying with the local thin capitalisation rule: 4:1 debt-to-equity ratio.
- The Egyptian transfer pricing rules (i.e. arm's-length principle) must be followed (*see Transfer pricing in the Group taxation section for more information*). In case of a tax audit, if the interest rate wasn't proven to be at arm's length, the Tax Authority would have the right to adjust this price to arrive at a 'neutral price' and re-calculate the taxes due accordingly.
- The loan is business related.

Bad debt

According to Article 28 of the Egyptian Income Tax Law, deduction of bad debts shall be allowed, subject to submitting a report from the external auditor indicating the fulfillment of the following conditions:

- The company is maintaining regular books and records.
- The debt is related to the company activities.
- That debt value should have been previously included within the company accounts and records.

Egypt

- The company shall have taken serious procedures for settlement of such debt and has been unable to collect it after 18 months from its due date.

Charitable contributions

Donations to the government are tax deductible. Donations to Egyptian charities are also deductible, but only up to 10% of taxable income.

Fines and penalties

Financial fines and penalties paid by the taxpayer because they or one of their subordinates has committed a deliberate felony or misdemeanor are not deductible.

Taxes

Income tax payable according to the income tax law is not deductible.

Other significant items

The following other items are not deductible:

- Reserves and appropriations of all different types.
- Profit shares, distributed dividends, and the attendance fees paid to shareholders for attending the general assembly's meetings.
- Compensation and allowances obtained by the chairmen and board members.
- Workers profit share to be distributed according to the law.

Net operating losses

A company may carry losses forward for a period not to exceed five years. Nevertheless, if a change occurs in the ownership of its capital exceeding 50% of the shares, stocks, or the voting rights, if the company is either a Joint Stock Company or a Company Limited by Shares whose shares are not listed on the Egyptian Stock of Exchange, and if the company changes its activity, the company cannot carry the losses forward.

In general, companies cannot carry losses back, except for contracting companies, which are allowed a loss carryback period of five years.

Payments to head office

A branch may deduct head-office charges up to 7% of its taxable income. Moreover, the branch or subsidiary should withhold taxes before the payment of interest, royalties, and service fees to non-resident foreign corporations or affiliates.

Group taxation

The Egyptian tax law treats every company in a group of companies as a separate legal entity. Thus, affiliated companies or subsidiaries cannot shift the profits/ losses within the group.

Transfer pricing

Transfer pricing rules follow the arm's-length principle, specifying that any transaction between related parties should be at arm's length (i.e. market value).

The law does not specify penalties with regard to transfer pricing. However, the law states that the Egyptian tax authorities may adjust the pricing of transactions between related parties if the transaction involves elements that would not be included in transactions between non-related parties, and whose purpose is to shift the tax burden to tax exempt or non-taxable entities. Where this is the case, the tax authorities may

determine the taxable profit on the basis of the neutral price. The acceptable methods for determining such neutral price, according to the rule of the law, are as follows:

- Comparative free price same as Comparable Uncontrolled Price method (CUP).
- Total cost with an added margin of profit (same as Cost Plus method).
- Resale price.

On 29 November 2010, the Egyptian Tax Authority launched the Transfer Pricing Guidelines ("TP Guidelines"). The TP Guidelines are being issued as a series of parts, the first part of which was issued in final version to the public and provides guidance on the arm's-length principle, how to establish comparability, choosing the most appropriate transfer pricing method(s), and documentation requirements. The coming parts should cover more complex transfer pricing topics, specifically transactions involving intellectual property, intra-group services, cost contribution arrangements, and advanced pricing agreements.

Taxpayers are required to prepare contemporaneous documentation studies to support the arm's-length nature of their controlled transactions. The Egyptian Tax Authority does not require the submission of transfer pricing documentation studies with the tax return; rather, they are required to be available upon request in a tax audit. Studies are acceptable in English, but a translation may be requested from the taxpayer.

The Egyptian Tax Authority explained that TP Guidelines will be utilised as a practical guide to assist taxpayers and tax inspectors in understanding how to implement and examine transfer pricing transactions. Egyptian TP Guidelines were compared to the Organisation for Economic Co-operation and Development (OECD) by an OECD representative and were found to be similar.

Thin capitalisation

The Egyptian thin capitalisation rule provided by the Egyptian income tax law dictates that the debt-to-equity ratio is 4:1. Accordingly, the law disallows the deductibility of debit interests of Egyptian companies on loans and advances if such loans and advances are in excess of fourfold the equity average (which is calculated according to the financial statements prepared pursuant to the Egyptian accounting standards).

The debit interest includes all amounts chargeable by the company in return for the loans; advances of any kind obtained thereby, bonds and bills. The loans and advances include, for purposes of this item, bonds and any form of financing by debts through securities with fixed or variable interest.

For determining the equity, the following items represent the basis for the calculation: the paid up capital in addition to all reserves and dividends reduced by retained losses, provided that the differences of the adjusted account is not included in the reserves account and is determined to be non-taxable. In case of retained or carry-forward losses, they must be used to reduce retained profits and reserves solely; the percentage is calculated on basis of total loans and advances in proportion to the remaining equity amount, after deducting the retained losses with a minimum of the paid up capital.

Tax credits and incentives

Egypt offers no specific tax incentives.

Egypt

Foreign tax credit

The foreign tax paid by a resident company on its profits earned abroad is deductible from the tax payable in Egypt; however, losses incurred abroad are not deductible.

Withholding taxes

A corporation paying invoices must withhold 0.5% to 5% of payments, depending on the services and commodities, to local taxpayers and remit them quarterly to the Tax Department.

Payments of interest, royalties, and services by a domestic corporation to foreign or non-resident bodies are subject to WHT as follows.

Interest

Interest on loans with a three-year term or more entered into by private sector companies are exempt from WHT, while loans of less than three years are subject to 20% WHT on interest. However, an applicable DTT between Egypt and the foreign country may result in the reduction of such tax rate. *Please see below for the ministerial decree affecting the treatment of interest and royalty payments.*

Royalties

Royalty payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in a reduction in this rate. *Please see below for the ministerial decree affecting the treatment of interest and royalty payments.*

Service payments

Service payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in the exemption of these payments if the services are performed abroad and not through PE in Egypt.

Tax treaties

Egypt has concluded DTTs with about 50 countries, which could change the tax treatment of transactions carried out between Egyptian entities and residents of a treaty country.

Procedures for applying the WHT on payments to non-residents

A ministerial decree declared that the reduced rate of WHT on interest or royalties provided by an applicable DTT should be ignored when withholding the tax. However, under certain conditions, the foreign recipient of payments would be able to get a refund for the amount resulting from the variance between the normal rate of 20% and the reduced treaty rate.

A special unit responsible for interest and royalty WHT refunds was established in January 2012. This unit is tasked with reviewing each refund case and with issuing

Egypt

refund letters (subject to compliance with the requirements of the 2009 Ministerial Decree). A refund letter is required to be able to get a refund of excess WHT from the tax office to which the taxes were actually paid.

Tax administration

Taxable period

The tax year is the financial year of the taxpayer.

Tax returns

The taxpayer is required to assess taxes due for every financial year and settle them with the tax return.

The corporate tax return is due within four months from the end of the financial year; so if a company's financial year ends 31 December, then the tax return has to be filed before the end of April of the following year.

Payment of tax

Advance payments are deducted from taxes assessed per the tax return, and the balance is payable in a lump sum at the date of submitting the tax return.

The advance payment (i.e. WHT) is submitted on a quarterly basis.

Audit cycle

The audit cycle proceeds as follows.

Inspection

The tax authority inspects the company based on its documents and records in order to assess the total tax dues on the company and determines the difference in tax dues as per the company declaration and the tax authority assessment. The authority issues an assessment including the total tax due on the company. If the company objects the inspection result, the dispute is transferred to the Internal Committee.

Internal Committee

The dispute is transferred to the Internal Committee to discuss the dispute points that arose from the inspection further to issue a modified assessment based on its opinion. If the company objects to the Internal Committee result, the dispute is transferred to the Appeal Committee to review the dispute points arising from the Internal Committee.

Appeal Committee

The Appeal Committee's decision is final and binding on the company and the tax department, unless a case is appealed by either of them at the court within 30 days of receiving the decision. Based on the fact that the total taxes due on the assessment as per the Appeal Committee are considered final, if they are not paid within the appropriate period, there will be penalties for the late payment.

Court

If the decision of the Appeal Committee is not satisfactory for either party, the case will be transferred to the court system, which is considered the final stage of the disputes. Normally, the court will appoint an expert witness to investigate the case and prepare a report. The court process usually takes a long period of time.

Statute of limitations

The statute of limitations is five years according to the Egyptian Income Tax Law and is extended to be six years in case of tax evasion.

Topics of focus for tax authorities

The most important topic for tax authorities is transfer pricing.

El Salvador

Significant developments

The following amendments were made to the Income Tax Law and Tax Code, effective 1 January 2012:

- The corporate income tax (CIT) rate was increased to 30% for entities with revenues of 150,000 United States dollars (USD) or above.
- The income tax advance payment monthly rate was increased to 1.75%.
- Profits distributed to shareholders, partners, trustees, participants, investors, or beneficiaries are subject to withholdings of 5%. This withholding also applies to headquarter (HQ) representatives, affiliates, branches, subsidiaries, agencies, and others who pay or credit dividends to subjects not domiciled in El Salvador.
- A definite minimum payment is established at 1% of gross income, with the following specific exceptions:
 - Subjects that are exempt of the obligation of payment of CIT.
 - Taxpayer companies during their three first years of operation, proving that the related operations are new investments and that there are not acquisitions, assets, or rights related to investments that previously existing.
 - Subjects that had losses in only one fiscal year.
 - Taxpayers that in a determined sector of the economy have been affected in their operations for exceptional situations generated by natural disasters duly declared as that by the Legal Assembly or the President of the Republic.
 - Taxpayers that in the fiscal year have a gross profit margin below 2%.
 - Taxpayers that have incomes of USD 150,000 or less.

Taxes on corporate income

As of 1 January 2012, the CIT rate is 30% for entities with revenues above USD 150,000, and this rate is applicable on the total amount of the mentioned revenues. For those companies that have revenues of USD 150,000 or less, the applicable rate is 25%. The 25% rate was the rate that applied to all companies prior to 1 January 2012.

CIT is based on the principle of territoriality, and, by general rule, taxes are paid on goods located, activities realised, and capital invested in El Salvador as well as on services rendered or utilised in the country. Nevertheless, there is a special rule regarding securities and financial instruments, since income is considered to be obtained in El Salvador if the issuing entity is domiciled in El Salvador.

Taxable income is equal to gross income net of costs and expenses considered necessary for generating and maintaining the related source of income and other deductions allowed by law. Gross income is comprised of income or profits collected or accrued, either in cash or in kind, from any sources in El Salvador.

Corporations are required to follow the accrual method of accounting, and income is computed for 12-month periods beginning on 1 January and ending on 31 December of each year.

Income tax advance payment

As of 1 January 2012, a 1.75% tax is applied to gross revenues accrued. This tax is paid monthly as an advance payment which is applied against the CIT at the end of the year. Prior to 1 January 2012, the advance payment rate was 1.5%.

Local income taxes

There is a municipal tax related to taxpayers' income. This tax depends on the location of the operations where the taxpayer performs its activity.

Corporate residence

A company incorporated in El Salvador is a resident entity in the country for tax purposes and subject to CIT on Salvadorian source income. Also, branches from foreign companies authorised in El Salvador and entities operating as a permanent establishment (PE) are considered resident entities for tax purposes and subject to CIT on Salvadorian source income.

The general rule for the determination of the corporate domicile is that it will be the one established on the incorporation document.

Permanent establishment (PE)

The PE for a company is determined by a fixed place of business with installed infrastructure owned or leased by the company, with employees hired in the country, and where the taxpayer performs its activity.

Other taxes

Value-added tax (VAT)

VAT (i.e. *Impuesto al Valor Agregado* or IVA) is levied at a rate of 13% over the taxable amount. As a general rule, the taxable amount is the price or remuneration agreed upon by the parties. For imports, the taxable amount is the customs value.

The following transactions are subject to VAT when performed within the Salvadoran territory:

- Transfer/sale of tangible movable goods.
- Withdrawal of tangible movable goods from the inventory made by the company for self-consumption by its partners, directors, or personnel.
- Import of goods and services.

El Salvador

- The supply of services of any type whether permanent, regular, continuous, or periodic, including technical advice and project designs; lease and sublease agreements over tangible goods; lease and sublease agreements over real estate for commercial purposes; lease of services in general; construction of real estate properties or building contracts; auctions; freight, whether inland, air, or maritime; and lease, sublease, and any form of use regarding trademarks.

The following imports are exempt from VAT:

- Imports made by diplomats and consulate representatives of foreign nations with presence in the country according to international agreements adopted by El Salvador.
- Imports made by international organisations to which El Salvador is a party.
- Traveller's luggage according to customs regulations.
- Donations to non-profit organisations.
- Imports made by municipalities, if the goods imported are for the public benefit of the community.
- Imports of machinery by taxpayers duly registered for this purpose, which will be part of the taxpayer's fixed assets.
- Vehicles for public transportation, which can only be transferred after five years.

The following services are exempt from VAT:

- Health services rendered by public institutions.
- Lease and sublease of real estate properties for housing.
- Services rendered under a labour relationship, as well as those rendered by public and municipal employees.
- Cultural public performances authorised by competent authorities.
- Educational services rendered by authorised entities, i.e. *Ministerio de Educación* (the Ministry of Education).
- Interest on deposits and loans provided by local financial institutions or entities registered at the Salvadoran Central Bank (BCR).
- Interest on securities issued by the government and/or private entities traded through a stock exchange.
- Water supply by public institutions.
- Public transportation.
- Insurance premiums covering individuals, and reinsurance in general.

VAT is levied on exports at a rate of 0%. Foreign-source income is not subject to VAT.

VAT paid by a registered taxpayer company on its purchases (tax credits) is credited against VAT charged to its customers (tax debits) on a monthly basis.

VAT returns are filed on a monthly basis within the first ten working days of each month following the period under taxation.

Customs duties

In El Salvador, the *Arancel Centroamericano de Importación* (Central America Import Duty) is applied, which is constituted in the *Sistema Arancelario Centroamericano* (SAC) (Duty Central American System) and its correspondent duties for import.

All duties for import are *ad valorem* and are applied at the cost, insurance, and freight (CIF) value of the merchandise. The duty is common for all the countries in Central America.

Excise taxes**Tax on simple or sweetened soft drinks**

An *ad valorem* tax on simple or sweetened soft drinks is levied at the rate of 10% over the selling price to the public as suggested by the manufacturer, importer, or distributor, excluding VAT and returnable bottle taxes.

Tax on the production and importation of alcohol and spirits

A tax is levied on domestically produced or imported alcohol and spirits at rates ranging from USD 0.0825 to USD 0.15 for each 1% of alcohol volume per litre or in proportion thereof. Spirits and alcohol also have an *ad valorem* tax levied at the rate of 5% over the suggested selling price to the public, excluding VAT.

Tax on tobacco products

A tax is levied at USD 0.005 per cigarette, cigar, little cigarette, or other tobacco product. Also, an *ad valorem* tax is levied at the rate of 39% over the suggested consumer selling price to the public, excluding VAT.

Tax on transfer of real estate property

A 3% tax is applied to transfers of real estate property. This tax is applied to the amount by which the value of the real estate exceeds USD 28,571.43.

Stamp taxes

No stamp taxes are assessed as the pertinent law was abrogated in 1992.

Capital gains tax

Capital gains are taxed at a flat rate of 10% of net profits, except when gains are realised within 12 months following the purchase date, in which case they are taxed as ordinary income. Capital losses can only be offset against capital gains. Whenever capital losses exceed capital gains, the remaining balance may be carried forward to future capital gains within a five-year period.

Annual business tax

Companies are required to register themselves with the Registry of Commerce and pay an annual business licence fee assessed on the company's assets, as follows:

Assets (USD)	Fee (USD)
2,000 to 57,150	91.43
57,151 to 114,286	137.14
114,287 to 228,572	228.57
An additional charge for each office, branch, or agency property of a company	34.29

If the assets exceed the amount of USD 228,572, there is an additional duty of USD 11.43 for each additional USD 100,000 in assets or fraction thereof. In any case, the relevant duties are limited to USD 11,428.57.

Social security contributions

Social security contributions (ISSS) are mandatory for both employee and employer and are destined to public health services. The employee's contributions are withheld from the employee's monthly salary and are transferred by the employer to the Salvadorian Institute of Social Security through monthly payrolls. The contribution amounts are summarised in the table below:

El Salvador

Monthly employee's salary (USD)	Employee's rate (%)	Employer's rate (%)
0 to 685.71	3	7.50

Note: For individuals who have salaries above USD 685.71, the social security contribution applicable is USD 20.57 for the employee, and USD 51.49 for the employer.

Contributions to pension fund (AFP) are mandatory for both employee and employer. The employee's contributions are withheld from the employee's monthly salary and are transferred by the employer. The employer's contributions are paid to the AFP. Both contributions are reported to the Pension Fund Administrator through a monthly payroll. The percentages are summarised below:

Monthly employee's salary (USD)	Employee's rate (%)	Employer's rate (%)
0 to 5,311.52	6.25	6.75

Note: For individuals who have salaries above USD 5,311.52, the pension fund contribution applicable is USD 331.97 for the employee, and USD 358.53 for the employer.

Entities with more than ten employees must also pay a payroll tax which is destined to the National Institute of Professional Development (INSAFORP), which promotes professional development through courses and complementary studies. The percentages are summarised below:

Monthly employee's salary (USD)	Employer's rate (%)
0 to 685.71	1
Over 685.71	0

Municipal taxes

Municipal taxes are assessed according to a progressive tariff list issued by each municipality. The taxes are applicable to the company's assets located in each municipality, and are paid on a monthly basis. The tariff lists are applied separately to commercial, industrial, and financial sectors.

Branch income

In El Salvador, tax rates on branch profits are the same as for domestic corporations. Dividends and profits paid or credited by HQ representatives, affiliates, branches, subsidiaries, agencies, and others not domiciled in El Salvador are subject to 5% WHT.

The law does not provide separate treatment for administrative offices located in El Salvador.

The general regulations indicate that branches, agencies, and/or establishments permanently operating in the country, with owned or leased installed infrastructure, employing domestic staff, and performing their economic activities in a material and perceptible manner in the country, are subject to the same taxes as companies duly incorporated.

Income determination

In El Salvador, income is considered taxable if it is obtained from goods located in the country, activities undertaken within the national territory, or services rendered or utilised in the country.

Inventory valuation

For tax purposes, taxpayers are authorised to use any one of the following inventory methods, provided they are technically appropriate for the particular business, consistently applied, and easily audited:

- Purchase or manufacturing costs.
- Last purchase costs.
- Direct average allocation costs.
- Average costs.
- Last in first out (LIFO).
- First in first out (FIFO).
- Specific methods for fruits and farm products.
- Specific method for cattle.

Other than the methods enumerated above, taxpayers are not permitted to use other methods for valuing their inventories except with prior authorisation of the tax office, provided that in the latter's judgement the method in question contains clear determination and *bona fide* elements available to the office. Once an inventory valuation method is adopted, the taxpayer may not change it without the tax office's prior authorisation.

Capital gains

Capital gains are subject to capital gains tax, except when gains are realised within 12 months following the purchase date, in which case they are taxed as ordinary income. See *Capital gains tax in the Other taxes section for more information.*

Dividend income

Cash profits or dividends remitted or credited to shareholders are subject to a 5% WHT.

Stock dividends

Stock dividends (different from the ones generated from shares) for companies are treated as ordinary income obtained for these companies in the correspondent fiscal year. These revenues are taxable according to the 30% rate on gross income.

Interest income

Interest income is taxable in El Salvador when the entity paying the interest is resident in El Salvador, when the capital is invested in the country, and when the risk is assumed in El Salvador.

Partnership income

Partnership income is taxable if it is Salvadorian-source income; nevertheless, no specific provisions exist in El Salvador regarding partnership income.

Rent/royalties income

Rent and royalties income is taxable if it is Salvadorian-source income; nevertheless, no specific provisions exist in El Salvador regarding rent and royalties income.

El Salvador

Condoned debts

Condoned debts are considered taxable income and must be included as part of the income generated in that fiscal period.

Foreign income

Under the territoriality source of income principle, extraterritorial income is not taxable in El Salvador, with the exception of income and other benefits from securities and other financing operations. In this case, interest arising from loans granted to a resident of El Salvador is considered as taxable income, and the person or entity paying the loan must withhold 10% of the interest. If financial services are rendered between related parties, the withholding must be at 20%.

Deductions

All business expenses considered necessary to produce taxable income and/or maintain income sources (e.g. freight, marketing, power, telecommunications, water, salaries, lease contracts, merchandise and transport insurance, fuel, and interest paid on loans used by income generating sources) are deductible for income tax purposes.

Depreciation and amortisation

Depreciation is calculated using the straight-line method, which results in the following maximum annual rates for determining depreciation deductions.

Assets	Rate (%)
Buildings	5
Machinery	20
Vehicles	25
Other movable assets	50

Depreciation of new software is permitted at a rate of 25% of purchase or production costs.

Amortisation of goodwill, trademarks, and other similar intangible assets are not deductible for income tax purposes.

Start-up expenses

In El Salvador, there is not a special regulation for expenses related to the starting up of a company.

Interest expenses

Interest expenses are deductible if the amount of the loan is invested in a source that generates taxable income.

Bad debt

In El Salvador, bad debt is deductible if the following requirements are presented:

- The debt is generated from the business activity.
- The debt had been registered as taxable income.
- The debt is registered in the accounting system.
- The debt has been expired for 12 months.

Charitable contributions

The deductibility of charitable donations is limited to 20% of the donor's net income after deducting the donation amount.

Fines and penalties

In general, penalties, late payment charges, and fines of that type are not deductible.

Taxes

Taxes paid are not deductible.

Net operating losses

Operating losses cannot be carried forward to future years or carried back. Capital losses, however, may be carried forward to offset capital gains for five years.

Payments to foreign affiliates

Remittance of royalties, interest income, and service fees to foreign affiliates are deductible provided proper contracts are in place, a 20% WHT is applied, and these services have actually been received. Note that payments to entities located in tax haven regimes are subject to a 25% WHT.

Group taxation

There are no grouping rules in El Salvador between independent entities. Each entity, even if related, is treated separately and must report and pay their taxes independently.

Transfer pricing

In El Salvador, it is mandatory for entities that have operations with related parties or with entities resident in tax havens to undertake these operations according to the rules of market prices.

Local tax authorities can establish the value of the operations according to market prices rules if, according to their point of view, these operations have not been undertaken according to the arm's-length principle.

Thin capitalisation

No specific provision for thin capitalisation exists in El Salvador.

Tax credits and incentives

El Salvador offers a wide range of incentives to attract foreign investment and drive new commercial and industrial developments. There are also no restrictions on foreign ownership or on mergers, acquisitions, or joint ventures.

There are three specific laws in El Salvador that seek to encourage foreign investment by improving the country's competitiveness in all areas involving the granting of tax incentives. These laws are the Industrial and Commercial Free Zone Law, the Law of International Services, and the Export Reactivation Law.

The Industrial and Commercial Free Zone Law No. 405, dated 3 September 1998, grants companies the following incentives:

- CIT exemption.

El Salvador

- VAT exemption.
- Municipal tax exemption.
- Exemption from real estate transfer taxes when land is intended to be used for productive activities.
- Exemption from duties for imports on machinery, raw materials, equipment, and intermediate goods used for production.
- An option to sell merchandise or services linked to international trade produced in the free zone in the Salvadoran market as long as the corresponding import taxes, CIT, VAT, and municipal taxes are paid on the final goods or services.

Any foreign company may establish and function in a free zone or bonded warehouse and benefit from these incentives if they are engaged in production, assembly, manufacturing, processing, transformation, or commercialisation of goods and services and/or rendering of services linked to international or regional trade, such as gathering, packaging and repackaging, cargo consolidation, distribution of merchandise, and other activities connected or complementary to them.

The Law of International Services No. 431, dated 11 October 2007, grants the same benefits as the Free Zone Law, but the beneficiaries are companies operating in Service Centres specially created according to this law and dedicated to international services as defined therein.

The Export Reactivation Law No. 460 (i.e. *Ley de Reactivación de las Exportaciones*), dated 15 March 1990, grants reimbursement of 6% free on board (FOB) value of exports destined outside the region.

Withholding taxes

Payments or amounts credited to non-residents arising from income obtained in El Salvador are subject to a 20% WHT. Income earned in El Salvador covers income from assets located in the country, from any activities performed or capital invested in the land, and from services rendered or used in the national territory, regardless of whether they are provided or paid outside the country. Income from services used in the country is income earned in El Salvador by the service provider, irrespective of whether the relevant income generating activities are performed abroad. Note that payments to foreign entities located in tax haven regimes are subject to a 25% WHT.

Payments to resident individuals with respect to services rendered, other than under a labour relationship, are subject to a 10% WHT.

The acquisition of intangible goods among resident entities in the country is subject to a 10% WHT.

Certain transactions are subject to a reduced WHT rate of 5%, such as the following:

- International transport services paid to non-residents.
- Insurance services, re-insurances, and bondings paid to non-residents.
- Payments for transfer of intangible assets or use of the rights to intangibles and tangible assets related to films, movies, music records, cable TV, satellite, etc.

Moreover, a treaty to avoid double taxation exists between El Salvador and Spain, this treaty established reduced WHT, such as the following:

- 12% WHT made to dividend payments.
- 10% WHT made to interest payments.
- 10% WHT made to rent and royalties payments.
- 10% WHT made to payments for services.

Tax administration

National taxes, fees, and other contributions on all types of goods, services, and income in El Salvador are levied by the National Congress. Local governments (municipalities) may suggest contribution rates and propose their approval to the National Congress by way of a specific law.

The Ministry of Finance (*Ministerio de Hacienda*) controls the State's finances and defines and guides the government's financial policy. It also harmonises, directs, and implements its policies on taxation through its agencies.

Taxable period

In El Salvador, the fiscal year is from 1 January to 31 December.

Tax returns

CIT annual returns must be filed each year no later than 30 April, following the end of the year under taxation.

Payment of tax

Taxes are due on the date established for filing the tax returns. In El Salvador, tax payments are made together with the filing of tax returns, and payments must be made at the banks of the local financial system.

In addition, public and private legal entities resident in the country for tax purposes, other than farm and cattle concerns, are required to make advance income tax payments at 1.75% of gross revenues. These advance payments are due, together with the corresponding return, within ten working days following the corresponding calendar month and are ultimately applied against the CIT at the end of the year.

Audit cycle

In El Salvador, the audit cycle is constituted by the following steps:

- Tax administration issues a resolution of an auditor designation.
- The requirement of financial information of the company.
- The requirement of complimentary documentation to verify possible issues.
- The tax administration issues an audit report where the issues are expressed.
- A resolution hearing is issued by the tax administration, which gives the taxpayer the right to provide evidence to refute the issues made by the mentioned authority.
- Final resolution is determined regarding the complimentary tax or the penalties to be paid.

Statute of limitations

In El Salvador, the statute of limitations for the compliance of the payment of tax debts is ten years.

El Salvador

The tax administration's power to perform a tax audit is for three years in the case of tax returns presented on time by the taxpayer; three years in the case of tax returns presented in a delay way, but this time is going to start from the day after the extemporary presentation; and five years in cases where the taxpayer has not presented the tax return.

Topic of focus for tax authorities

In El Salvador, when the tax administration performs a tax audit, it focuses on the following topics:

- Compliance of the transfer pricing rules, this can be considered as the main element for the tax authorities.
- Compliance of the obligations held with non-domiciled subjects, especially those domiciled in tax havens.

Significant developments

There have been no significant tax regulatory developments regarding corporate taxation in the past year in Equatorial Guinea.

Taxes on corporate income

The corporate income tax (CIT) must be paid by any resident entity.

Taxable profit is determined by deducting from gross income all expenses tied to the performance of taxable activities in Equatorial Guinea. In principle, all expenses are deductible, but the Tax Code provides rules of deductibility for some of them.

Resident companies are subject to CIT on their worldwide income. Non-resident entities are subject to a 10% withholding tax (WHT) on gross income derived from sources in Equatorial Guinea.

The CIT rate is 35% on taxable profits.

Minimum income tax

Minimum income tax is 1% of the turnover of the company for the previous year.

This amount cannot be lower than 800,000 Central African CFA francs (XAF) (even if the company does not have revenues). The minimum income tax can be totally or partially deducted from the CIT to be paid.

Local income taxes

There are no local income taxes in Equatorial Guinea.

Corporate residence

A legal entity present in Equatorial Guinea more than three months within a calendar year, or more than six months within two consecutive calendar years, and performing an economic activity or providing paid services in the country is considered as a resident for taxation purposes.

The notion of residence applies equally to any kind of activity (even if there is some specificity in the oil and gas sector).

Permanent establishment (PE)

The notion of 'permanent establishment' is not defined in the Tax Code. The authorities mainly refer to the notion of residence as defined above.

Equatorial Guinea

Other taxes

Value-added tax (VAT)

VAT is an indirect tax on consumption based on turnover.

All operations performed in Equatorial Guinea are subject to VAT, unless they are included in the list of exemptions provided by the Equatorial Guinea Tax Code or a specific tax regime.

VAT is generally chargeable on the following:

- Goods sold or assigned for valuable consideration.
- Services provided.
- Self-consumed goods and services.
- Imports.
- Other operations carried on by individuals or legal entities in their sphere of business, professional, and individual activities, including extraction activities.

The standard VAT rate is 15%.

A rate of 0% is applicable to a specific list of products and equipment provided in the Tax Code (e.g. certain medical products, some equipment for construction).

A reduced rate of 6% is applicable to a limited list of basic consumables and books.

Custom duties

The customs duties are based on the categories of goods as follows:

- Category I: Primary necessity goods: 5%.
- Category II: Raw material and materials: 10%.
- Category III: Intermediary goods and miscellaneous: 20%.
- Category IV: Current consumption goods: 30%.

Excise taxes

Excise taxes are applicable on specific goods, such as alcoholic drinks and tobacco. The rates are from 20% to 50% plus a special Economic and Monetary Community of Central Africa (CEMAC) contribution from 0% to 35%.

Real property tax

A 1% urban property tax applies annually to 40% of the value of the land and the buildings on such land. Urban property is defined by the Tax Code as “any land with or without buildings and the buildings built thereon, whenever located in urban areas”.

Transfer tax

For the transfer of goods between residents and non-residents, and between non-residents, there is a 3% tax on the value of the goods.

Real estate transfers between residents are taxed at the rate of 5% on the value of the real estate. The rate increases to 25% on real estate transfers between residents and non-residents, and between non-residents.

Stamp duties

Stamp duties are payable on a variety of instruments and transactions and vary depending on the concerned legal act.

Social security contributions

Employers contribute 1% of gross salary to the Work Protection Fund (*Fondo de Protección al Trabajo*) and 21.5% to the National Social Security Fund (INSESO) on a monthly basis.

Employees contribute 0.5% of net salary to the Work Protection Fund and 4.5% to the INSESO on a monthly basis.

Branch income

Branch income is subject to CIT. We understand that there is no branch remittance tax, even if the tax authorities sometimes try to apply this tax.

Income determination

Inventory valuation

Inventory is evaluated at cost price for tax purposes. The tax method generally matches the book method.

Capital gains

Capital gains are, in principle, subject to CIT.

Some exemptions and specific tax regimes can apply, as follows:

- The capital gains that come from the assignment, in the ongoing operation, of the components of the fixed assets will not be included in the taxable profit of the fiscal year in the course of which they have been obtained if the taxpayer puts them in a special account named 'capital gains to be reused' and is committed to reinvesting in new fixed assets in the company before the expiration of a period of time of three years, starting from the close of this fiscal year, an amount equal to the amount of these capital gains plus the cost of the assigned components.
- The capital gains different from those obtained on goods, resulting from free assignment of stock, corporate portions, or liabilities, as a consequence of the merger of corporations, limited partnerships by shares, or limited companies, will be exempt from the tax regarding the profits made by those corporations, on condition that the take-over company or the new company has its corporate headquarters in Equatorial Guinea.

Dividend income

All dividends received by a resident company are subject to CIT.

A personal income WHT of 25% is applicable on dividends paid to individuals or companies not having their usual domicile or headquarters in Equatorial Guinea. This tax is a final tax for those taxpayers.

The net products of the shares owned and earned by the parent company from its subsidiary can be deducted from the total net profits of the parent company after offsetting from this amount 25% (expenses and charges lump sum amount) if the:

- shareholder holds at least 25% of shares of the subsidiary and

Equatorial Guinea

- shareholder guarantees the shares have always been registered in the name of the participating company and commits it will hold these shares for at least two consecutive years.

This proportional part is established at 10% of the amount of these products and represents the management expenses already deducted from overhead costs.

Interest income

Interest earned by companies is subject to CIT at a 25% rate.

Foreign income

Resident companies are subject to CIT on their worldwide income.

There is no tax deferral in Equatorial Guinea.

Deductions

Depreciation

A straight-line method of computation of depreciation should be applied to fixed assets according to the normal useful lives of the assets involved, as provided by the Tax Code.

Goodwill

Goodwill is, in principle, not deductible.

Start-up expenses

Start-up expenses can be amortised.

Interest expenses

Interest expenses are deductible if they do not exceed the limit for loans set up by the Central Bank.

Bad debt

Bad debts are deductible, given they are supported.

Charitable contributions

Charitable contributions are deductible, given they are for philanthropic, sport, educative, scientific, social, or family purposes and do not exceed 0.5% of the turnover for the fiscal year of the company.

Fines and penalties

Fines and penalties are not deductible.

Taxes

Only professional taxes are deductible.

Net operating losses

Net operating losses can be carried forward for three years. Losses cannot be carried back. Losses of one entity cannot be transferred to another entity in a reorganisation.

In theory, when the results of a company, no matter the kind of the company, are negative during a maximum period of three consecutive years, this company will immediately be removed from the register by the Tax Administration for the practice of the activity for which it was registered, except when the company is newly created.

Payment to foreign affiliates

The deductibility of the technical assistance made by the parent company to its subsidiary is limited to 50% of the intermediary tax result (accounting result plus potential fiscal reintegration).

In case of a deficit, the relevant basis for the evaluation of the foreign technical assistance amount to be reintegrated will be the intermediary result of the last beneficiary fiscal year.

Group taxation

Equatorial Guinea law does not provide specific provisions for taxation of groups.

Transfer pricing

There are no specific rules regarding transfer pricing, even if there are indirect references in the Tax Code.

Thin capitalisation

According to the Tax Code:

“Interest paid to the partners for amounts made available to the company, in addition to their capital contributions, no matter the form of the company, will be admitted within the limits established for the advances of the Central Bank.

In the incorporated or limited companies, the deduction of interest will not be allowed for partners or shareholders that have the right to hold, or actually hold, the company management except to the extent that the amounts deposited do not exceed the combination of the contributions of these partners or shareholders.”

Tax credits and incentives

Some tax and customs exemptions can be granted by the government for some specific economic sectors (e.g. oil and gas sector, public work sector). These exemptions shall be negotiated in the contract signed between the company and the administration (e.g. Production Sharing Contract, Public Work Contract).

Foreign tax credit

There is no foreign tax credit in Equatorial Guinea.

Withholding taxes

WHT in the non-oil and gas sector

There is a 10% tax withheld on the gross incomes obtained in Equatorial Guinea by non-residents.

There is a 25% WHT on royalties for non-CEMAC residents.

Dividends and interests paid to non-residents are subject to 25% WHT.

Equatorial Guinea

WHT on the oil and gas sector

In Equatorial Guinea:

- a 6.25% WHT is imposed on payments made to a resident entity within the oil and gas sector and
- a 10% WHT is imposed on payments made to a non-resident entity within the oil and gas sector.

In practice, the tax authorities consider this tax only applies to sales of services.

The tax basis is composed of the gross amount paid to the provider.

Tax administration

Taxable period

The taxable period is from 1 January to 31 December for CIT purposes.

Tax returns

CIT returns must be filed within the first four months of the year following the taxable fiscal year.

Payment of tax

Payment of CIT must be made within 15 days from the day following the date of receipt of the tax liquidation issued by the Ministry of Finance and Budget.

The minimum company tax of 1% of the previous year's turnover is payable by 31 March.

Penalties

Penalties of XAF 200,000 per month late, up to 75% of the tax owed, apply for late filing of CIT returns.

A penalty of 50% to 100% of the undeclared amount applies in case of shortfall in the return and in case of arbitrary settlement, 50% of the total amount if the good faith of the taxpayer is established or assumed and 100% wherever the taxpayer does not prove good faith.

Audit cycle

There is no specific provision related to the tax audit cycle in Equatorial Guinea.

Statute of limitations

The statute of limitations is generally five years from the date the tax is due.

E

Significant developments

Estonia is regarded as offering a relatively favourable income tax regime, as all undistributed corporate profits are tax exempt. Estonia levies a corporate income tax (CIT) only on profits that are distributed as dividends, share buy-backs, capital reductions, liquidation proceeds, or deemed profit distributions. Distributed profits are generally subject to 21% corporate tax (21/79 on the net amount of the profit distribution). According to the law amendment passed by the Parliament on 16 June 2011, the CIT rate will be reduced to 20% in 2015.

On 1 January 2012, the tax treaty with Jersey became effective. During 2011, tax treaties with India, Turkmenistan, and the United Arab Emirates were signed, but these treaties are not yet effective.

Local sales and boat tax were abolished effective from 2012.

As of 1 April 2012, the value-added tax (VAT) reverse charge mechanism has also been extended to gold.

Taxes on corporate income

All undistributed corporate profits are tax exempt. This exemption covers both active (e.g. trading) and passive (e.g. dividends, interest, royalties) types of income. It also covers capital gains from the sale of all types of assets, including shares, securities, and immovable property. This tax regime is available to Estonian resident companies and permanent establishments (PE) of non-resident companies that are registered in Estonia.

The taxation of corporate profits is postponed until the profits are distributed as dividends or deemed to be distributed, such as in the case of transfer pricing adjustments, expenses and payments that do not have a business purpose, fringe benefits, gifts, donations, and representation expenses.

Distributed profits are generally subject to the 21% CIT at 21/79 of the net amount of profit distribution. For example, a company that has profits of 100 euros (EUR) available for distribution can distribute dividends of EUR 79, on which it must pay CIT of EUR 21.

According to the law amendment passed by the Parliament on 16 June 2011, the CIT rate will be reduced to 20% in 2015.

Estonia

From the Estonian perspective, this tax is considered a CIT and not a withholding tax (WHT), so the tax rate is not affected by an applicable tax treaty. Certain distributions are exempt from such tax (*see the Income determination section*).

In Estonia, resident companies are taxed on profits distributed from their worldwide income, while PEs of non-residents are taxed only on profits distributed from income derived from Estonian sources. Other Estonian-source income derived by non-residents may be subject to final WHT or CIT by way of assessment.

Local income taxes

There are no local income taxes in Estonia.

Corporate residence

A legal entity is considered resident in Estonia for tax purposes if it is established under Estonian law. There is no management and control test for the purpose of determining corporate residency. Most tax treaty tie-breakers for legal entities are based on competent authority procedures.

Permanent establishment (PE)

A PE (including a branch registered in the Commercial Register) of a foreign entity is deemed to be a non-resident taxpayer. Under the domestic law, which deviates from the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, a PE is defined as an enterprise through which the permanent business activities of the non-resident are conducted in Estonia. A PE is deemed to be created as a result of the business activities conducted in Estonia which are geographically linked or having movable character or as a result of the business activities of an agent which is authorised to conclude contracts in the name of the non-resident.

Other taxes

Value-added tax (VAT)

The following transactions are subject to Estonian VAT:

- Taxable supplies of goods and services (the place of supply of which is Estonia).
- Taxable imports of goods.
- Taxable intra-community acquisitions of goods.

The standard VAT rate is 20%. A reduced rate of 9% is applied to books, periodicals with few exceptions, hotel accommodation services, and listed pharmaceuticals.

The VAT rate on the export of goods and certain services is 0% (i.e. exempt with credit). Some services, such as health care, insurance, certain financial, and transactions with securities, are exempt (i.e. exempt without credit).

Transactions in real estate are generally exempt from VAT, but there are certain significant exceptions (e.g. transactions in new and significantly renovated buildings). Taxpayers can elect to add VAT to real estate transactions if certain conditions are met.

As of 2011, the reverse charge mechanism has been extended to the supply of waste metal and real estate, under which VAT is accounted for by the VAT liable purchaser and not by the supplier. For real estate, the reverse charge applies only when the seller has

opted for taxation of real estate. As of 1 April 2012, the reverse charge mechanism is also extended to gold.

If the taxable supplies of Estonian resident businesses or a PE of a non-resident business in Estonia exceed EUR 16,000 in a calendar year, VAT registration is required. Voluntary registration is also possible. Certain transactions of non-resident businesses require Estonian VAT registration without any threshold.

The VAT accounting period is generally a calendar month, and VAT should be declared and paid on or before the 20th day of the following month.

Under certain conditions, a European Union (EU) taxable person that is not registered for VAT in Estonia will be entitled to a refund of input VAT paid in Estonia. Non-EU taxable persons are entitled to claim VAT refunds based on reciprocity.

Estonia has implemented a system that allows, under certain conditions, a company to account for VAT on imports on the VAT return without paying VAT to the customs authority.

Customs duties

After becoming a member of the European Union, Estonia also became a member of the Customs Union. The Community Customs Code and related implementation regulations apply, meaning that:

- trade between Estonia and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Estonia.

Excise duties

Excise taxes are levied on tobacco, alcohol, electricity, some packaging materials, and motor fuel.

Land and property taxes

Land is subject to an annual land tax, which is calculated on the assessed value of land at rates between 0.1% and 2.5%, depending on the municipality. The tax is paid by the owners of land, or sometimes by the users of land, in two instalments, by 31 March and 1 October (amounts not exceeding EUR 64 are paid in one instalment by 31 March).

There is no property tax (i.e. tax on the value of buildings).

Property transfers are generally subject to state and notary fees.

Transfer taxes

There are no transfer taxes in Estonia.

Stamp taxes

Certain transactions may be subject to insignificant stamp taxes (i.e. state fees).

Social security and unemployment insurance

Employers operating in Estonia (including non-residents with a PE or employees in Estonia) must pay social tax on certain payments to individuals at the rate of 33% (where 20% is used for financing public pension insurance and 13% is used for financing public health insurance). Social tax paid by employers is not capped and

Estonia

mainly applies to salaries, directors' fees, and service fees paid and fringe benefits granted to individuals. According to the new program of the coalition government, it is expected that the monthly social tax (except its public health insurance component) will be capped at EUR 4,000 per individual from the year 2014.

In addition to social tax, employers are also required to pay and withhold unemployment insurance contributions. Employers must pay 1.4% and employees must pay 2.8% (collected by employers through payroll withholding). The contributions mainly apply to salaries and service fees paid to individuals.

Compulsory accumulative pension scheme

Employers' payroll withholding includes 2% contributions to the compulsory accumulative pension scheme, if the employee has joined that pension scheme.

Heavy goods vehicle tax

The heavy goods vehicle tax is paid for the following classes of vehicles that are registered with the Estonian National Motor Vehicle Register and are intended for the carriage of goods:

- Lorries with a maximum authorised weight or gross laden weight of not less than 12 tons.
- Road trains composed of trucks and trailers with a maximum authorised weight or gross laden weight of not less than 12 tons.

The tax is paid by the owners or users of the vehicles. The quarterly tax rates range from EUR 0 to EUR 232.60 per heavy goods vehicle.

Gambling tax

Gambling tax is imposed on amounts received from operating games of skill, totalisator, betting, lotteries, and promotional lotteries. Tax is also charged on gambling tables and machines used for games of chance located in licensed premises. The tax is paid monthly by authorised operators.

Local taxes

Local taxes can be imposed by rural municipalities or city councils; however, the fiscal significance of local taxes is almost nonexistent. Local taxes include advertisement tax, road and street closure tax, motor vehicle tax, tax on keeping animals, entertainment tax, and parking charges. Note that the sales tax and boat tax were abolished from the list of local taxes effective from year 2012.

Branch income

Registered PEs of non-residents, much as with resident companies, are subject to CIT only in respect of profit distributions, both actual and deemed, as defined in domestic law.

Transactions and dealings between a head office and its PE(s) should be conducted on arm's-length terms. Thus, such profits should be attributed to a PE of a non-resident taxpayer that the PE would be expected to make if it were a distinct and separate taxpayer engaged in the same or similar activities, and under the same or similar conditions, and dealing in a wholly independent manner with its head office.

Income determination

Distributable profits are determined based on financial statements drawn up in accordance with Estonian Generally Accepted Accounting Principles (GAAP) or International Accounting Standards (IAS)/International Financial Reporting Standards (IFRS), and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation, tax loss carryforward or carryback).

The CIT liability associated with the distribution of dividends is accounted for as an expense at the time the dividends are declared, regardless of when the profits were generated or distributed.

Dividends paid by Estonian companies are generally subject to 21/79 CIT at the level of the distributing company. However, dividends distributed by Estonian companies are exempt from CIT if the distributions are paid out of:

- dividends received from Estonian, EU, European Economic Area (EEA), and Swiss tax resident companies (except tax haven companies) in which the Estonian company has at least a 10% shareholding
- profits attributable to a PE in the EU, EEA, or Switzerland
- dividends received from all other foreign companies in which the Estonian company (except tax haven companies) has at least a 10% shareholding, provided that either the underlying profits have been subject to foreign tax or if foreign income tax was withheld from dividends received, or
- profits attributable to a foreign PE in all other countries provided that such profits have been subject to tax in the country of the PE.

In addition, stock dividends (bonus shares) distributed to stockholders are exempt from 21/79 CIT charge.

Certain domestic and foreign taxes can also be credited against the 21/79 CIT charge under domestic law or tax treaties.

Deductions

Distributable profits are determined based on financial statements drawn up in accordance with Estonian GAAP or IAS/IFRS, and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation, tax loss carryforward or carryback).

Fringe benefits

Employers operating in Estonia (including non-resident companies that have a PE or employees in Estonia) are liable to Estonian taxation on any fringe benefits granted to their employees (including directors).

Fringe benefits are subject to an exceptional tax treatment in Estonia, as only the employer is obliged to pay taxes on the fringe benefits furnished to the employee. Taxable fringe benefits received by a resident employee are generally not included in the taxable income of the employee for Estonian tax purposes. Fringe benefits are subject to 21/79 CIT and 33% social tax. For example, where the amount of the benefit is EUR 100, the CIT due by the employer would be EUR 26.58 (21/79 x 100) and the social tax due EUR 41.77 (0.33 x 126.58), for a total fringe benefit tax charge of EUR 68.35.

Estonia

Gifts, donations, and representation expenses

The 21/79 CIT is generally due on gifts and donations. Gifts and donations made to certain qualifying recipients are only subject to 21/79 CIT if such expenses exceed one of two limitations:

- 3% of the calculated social tax base for the existing calendar year or
- 10% of the profit of the last financial year according to statutory financial statements.

Representation expenses, those expenditures whose character and primary purpose is for representational or entertainment related activities, are generally subject to 21/79 CIT only if they exceed the threshold of EUR 32 per month plus 2% of the calculated social tax base of the calendar month in which the expenses are paid.

Taxes

All taxes paid are deductible for CIT purposes. In certain circumstances, domestic or foreign taxes may be creditable against the 21/79 CIT charge under domestic law or an applicable tax treaty.

Other significant items

The 21/79 CIT is generally due on expenses and payments that do not have a business purpose and that are regarded as deemed profit distributions. These may include, for example, late payment interest on tax arrears, penalties imposed by law, bribes, purchase of services, or settlement of obligations not related to taxpayer's business and acquisition of assets not related to taxpayer's business.

Furthermore, there are specific anti-tax haven rules treating certain transactions and dealings with tax haven companies as deemed profit distributions, which are therefore subject to 21/79 CIT. These include the following:

- Acquisition of securities issued by a tax haven entity (exception for certain listed securities).
- Acquisition of an ownership interest in a tax haven entity.
- Payment of fines or penalties to a tax haven entity, unless settled by court or arbitration.
- Granting loans or making prepayments to a tax haven entity or otherwise acquiring a claim against a tax haven entity.

Payments to foreign affiliates

Payments to foreign affiliates are deductible for tax purposes (i.e. not subject to 21/79 CIT as deemed profit distributions) if the payment serves a business purpose, provides a benefit to the payer, is at arm's length, and is substantiated by sufficient documentation.

Payments to foreign affiliates may also be subject to various WHT. Certain payments to affiliates located in tax haven countries are always subject to 21/79 CIT or a 21% WHT rate.

Group taxation

There is no form of consolidation or group taxation for CIT purposes in Estonia.

Transfer pricing

Transfer pricing rules are applicable to all types of transactions between related parties. Both domestic and cross-border transactions with related parties must be conducted at arm's length. Estonian tax legislation includes a relatively broad definition of related parties. Under the present corporate tax system, if the transactions between related parties do not follow the arm's-length principle, then the subsequent transfer pricing adjustments are treated as hidden profit distributions subject to 21/79 monthly CIT.

As a general rule, Estonian group companies and PEs of foreign companies are obliged to prepare transfer pricing documentation to prove the arm's-length nature of the inter-company transactions with all related parties.

However, this documentation requirement does not apply to small and medium-size enterprises (SME), unless they have conducted transactions with entities located in low-tax territories. A company or PE is deemed to be an SME provided that the consolidated results of the previous financial year of an Estonian company or a PE together with its associated enterprises or head office (i.e. at the group level) are below all of the following criteria:

- Annual sales below EUR 50 million.
- Balance sheet below EUR 43 million.
- The number of employees below 250.

Apart from the formal transfer pricing documentation and general requirement to disclose the transactions with the related parties in the annual reports, there are no additional reporting requirements related to transfer pricing in relation to inter-company transactions.

Thin capitalisation

There are no thin capitalisation rules in the Estonian tax legislation.

Controlled foreign companies (CFCs)

Estonia has no CFC rules for corporate taxpayers.

Tax credits and incentives

There are no special tax incentives in Estonia. However, the entire Estonian corporate tax system, which provides for an indefinite deferral for taxing corporate profits, may be viewed as a tax incentive that promotes reinvestment of profits and thus stimulates economic growth.

Foreign tax credit

In certain circumstances, domestic or foreign taxes may be creditable against the 21/79 CIT charge under domestic law or an applicable tax treaty. *See the Income determination section for more information.*

Withholding taxes

Withholding agents must withhold CIT from certain payments. Withholding agents include resident legal entities, resident individuals registered as sole proprietorships or acting as employers, and non-residents having a PE or acting as employers in Estonia. The tax must be reported and paid by the tenth day of the month following

Estonia

the payment. CIT is not withheld from payments to resident companies, registered sole proprietorships, and registered PEs of non-resident companies. The following rules are in place with respect to payments that are subject to WHT:

- There is no WHT on dividends.
- There is no WHT on interest payments to non-residents on the condition that the interest charged does not significantly exceed the arm's-length rate at the time the debt is incurred and the interest payments are made. A 21% Estonian WHT rate will thus apply only to the part of interest that significantly exceeds the arm's-length amount.
- Royalties (including payments for the use of industrial, commercial, or scientific equipment) paid to non-residents are generally subject to a 10% WHT rate under domestic law, but reduced rates may be available under double tax treaties (DTT). Certain royalty payments to associated EU and Swiss companies that meet certain conditions are exempt from WHT.
- Rental payments to non-residents for the use of immovable property located in Estonia and movable property subject to registration in Estonia (excluding payments for the use of industrial, commercial, or scientific equipment) are subject to a 21% WHT rate under domestic law, but DTTs may exempt payments for the use of movable property from WHT.
- Royalties and rental payments to resident individuals are subject to a 21% WHT rate.
- Payments to non-resident companies for services provided in Estonia, including management and consultancy fees, are subject to a 10% WHT rate under domestic law, but may be exempt under DTTs. Service fee payments to tax haven entities are always subject to a 21% WHT rate.
- Salaries, directors' fees, and service fees paid to individuals are subject to a 21% WHT rate under domestic law, but DTTs may exempt service fee payments to non-resident individuals from WHT.
- Payments for the activities of non-resident artistes or sportsmen carried out in Estonia are subject to a 10% WHT rate.
- Certain pensions, insurance benefits, scholarships, prizes, lottery winnings etc. paid to non-residents and resident individuals are subject to a 21% WHT rate under domestic law.

For non-residents without a PE in Estonia, the tax withheld from these payments at domestic or treaty rates constitutes final tax in terms of their Estonian-source income and they do not have any tax reporting requirements in Estonia.

For certain types of Estonian-source income, non-residents are liable under Estonian domestic law to self assess their Estonian tax and submit a tax return to the Estonian tax authorities. These types of income include:

- Taxable capital gains.
- Profits derived from business conducted in Estonia without a registered PE.
- Other items of income from which tax was not withheld but should have been withheld.

Estonia has effective tax treaties with: Albania, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bulgaria, Canada, the People's Republic of China, Croatia, the Czech Republic, Denmark, Finland, France, Germany, Georgia, Greece, Hungary, Iceland, Ireland, Isle of Man, Israel, Italy, Jersey, Kazakhstan, the Republic of Korea, Latvia, Lithuania, Luxembourg, Macedonia, Malta, Moldova, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Singapore, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine, the United Kingdom, and the United States. Treaties have also been concluded

with India, Russia, Turkmenistan, and the United Arab Emirates, but these are not yet effective.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (3)

United States	0	0/21	5/10 (4)

Notes

1. Under the domestic law, the rate is nil for all non-resident individual and corporate shareholders.
2. The rate is nil on the condition that the interest paid to a non-resident does not significantly exceed the arm's-length rate at the time the debt is incurred and the interest payments are made. Estonian WHT at the domestic rate of 21% will thus apply only to the part of interest that significantly exceeds the arm's-length amount. This WHT could be reduced under tax treaties.
3. The rate is nil for arm's-length royalties paid to an associated EU or Swiss company if certain conditions are met.
4. The lower 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower 5% rate applies to royalties paid for the use of copyright royalties, excluding software royalties.

Tax administration

Taxable period

The tax period is a calendar month.

Tax returns

The combined CIT and payroll tax return (form TSD with appendices) must be submitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. Tax returns may be filed electronically via the Internet.

Payment of tax

CIT and payroll taxes must be remitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. No advance CIT payments are required.

Advance rulings

An advance ruling system became available in Estonia on 1 January 2008. The aim of the procedure is to provide certainty on the tax consequences of specific transactions or combination of transactions taking place in the future. The ruling is binding on the authorities (and not on the taxpayer) if the transaction was made within the deadline and the description provided in the ruling and the underlying legislation has not been substantially changed in the meantime. Estonian legislation specifically excludes obtaining rulings when the interpretation of the legislation is objectively clear, the situation is hypothetical, or the main purpose of the planned transaction is tax avoidance. In addition, transfer pricing valuation issues are excluded from the scope of the binding ruling system.

Audit cycle

There is no statutory tax audit cycle in Estonia.

Statute of limitations

As a general rule, the statute of limitations is three years. In case of intentional tax evasion, it is six years.

Topics of focus for tax authorities

The main topics of focus for tax authorities are 'envelope wages', VAT fraud, and transfer pricing.

E

Other issues**Company restructurings**

In accordance with the EC Directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different member states, the mergers, divisions, and re-organisations of companies are generally tax-neutral in Estonia. The principle of going concern is applied in taxation of referred restructuring transactions.

Significant developments

The following changes to the Fiji Income Tax Act became effective for tax years commencing on 1 January 2012:

- The corporate income tax (CIT) rate has been reduced from 28% to 20%.
- Telecommunication levy of 1% is imposed on all voice call charges.
- Credit card levy of 2% is imposed on the monthly credit card balance, including interest and other bank charges.
- Third party insurance levy of 20% is imposed on the total third party insurance premium collected in a month.
- Only 50% of the employer's statutory Fiji National Provident Fund (FNPF) contribution paid by the employer shall be allowed as a deduction for tax purposes in the year the contribution was paid.
- 40% of capital expenditure of not less than 50,000 Fijian dollars (FJD) incurred by any existing business located in Vanua Levu shall be allowed as a deduction for tax purposes, subject to certain conditions.
- Tax losses for all business activities will only be allowed to be carried forward for four consecutive years, except for tax losses in relation to certain hotel business, which will be allowed to be carried forward for eight years.
- Transfer pricing provisions of the Fiji Income Tax Act have been amended.
- Company advance tax payment requirements have been changed, with 90% of the income tax due being payable on or before year-end.

The following changes became effective from 1 January 2012:

- Fringe benefit tax (FBT) of 20% on the grossed-up value of fringe benefits provided has been introduced (effective rate of 25%).
- Hotel turnover tax of 5% has been replaced by the service turnover tax (STT) of 5%. The STT is applicable on certain services in addition to hotel services.
- The value-added tax (VAT) threshold has been increased from FJD 50,000 to FJD 100,000.
- The Tax Administration Decree (TAD) is now applicable to FBT and STT.
- The penalties for tax offences have been increased substantially (*see Penalties in the Tax administration section for more information*).

Taxes on corporate income

Resident corporations are taxed on their worldwide income. Non-resident corporations may only be taxed on their Fiji-sourced income.

Normal tax is payable and assessed on the chargeable income of the business calculated by subtracting deductible expenses from all assessable income specified under Section 11 of the Fiji Income Tax Act.

Normal tax is payable on taxable income at the following rates:

Type of company	Rate (%)
Non-resident shipping companies in respect of outgoing business from Fiji	2
All other companies, including non-resident companies carrying on business in Fiji (e.g. branch profits)	20 (effective for tax years commencing on 1 January 2012; previously 28)

F

Corporate residence

A company incorporated in Fiji is considered a 'resident' in Fiji. A company not incorporated in Fiji is resident in Fiji if it carries on business in Fiji and either its practical management and control are in Fiji or its voting powers are controlled by shareholders who are residents of Fiji.

Permanent establishment (PE)

PE is determined based on the applicable tax treaty. There is no specific definition of 'permanent establishment' under the Fiji Income Tax Act. However, generally a PE may be defined as a fixed place of business and would include the following:

- A place of management, branch, office, factory, warehouse, or workshop, but does not include a liaison office.
- A mine, oil or gas well, quarry, or other place of extraction of natural resources.
- A building site, or a construction, assembly, or installation project, or supervisory activities connected with such site or project, but only if the site, project, or activities continue for more than six months.
- The furnishing of services by the person, including consultancy services, through employees or other personnel engaged by the person for such purpose, but only if activities of that nature continue for the same or a connected project for a period or periods aggregating more than six months in any 12-month period.
- A person, referred to as an 'agent', acting on behalf of another person, referred to as the 'principal', if the agent:
 - has and habitually exercises an authority to conclude contracts on behalf of the principal or
 - habitually maintains a stock of trading stock from which the agent regularly delivers trading stock on behalf of the principal but does not include an agent of independent status.

Other taxes

Value-added tax (VAT)

VAT of 15% generally applies on the supply of goods and services in Fiji by a registered person in the course or furtherance of a taxable activity carried on by that person. Effective 1 January 2012, the threshold amount for VAT registration is FJD 100,000 (previously FJD 50,000) for the supply of goods and/or services.

Fiji Islands

The supply of financial services (except for certain insurance services), residential accommodation, and education by an approved institution is exempt.

The sale of edible oil, tin fish, rice, flour, tea, powdered milk, and kerosene are zero-rated. Exports of goods and services and international transportation are also zero-rated. The export of services, however, is zero-rated only under certain conditions.

The due date for lodgement of VAT returns and payment of any VAT payable is the end of the month following the taxable period. Where an entity's supplies do not exceed FJD 300,000, it may opt to lodge VAT returns and pay any VAT payable on an annual basis.

VAT refunds can no longer be transferred or assigned to another registered entity.

Under certain conditions, directors of companies with insufficient funds may be held liable for any outstanding VAT or CIT liability of the company and may be sued in their personal capacity.

Customs duties/import excise taxes

Import excise tax (from 5% to 15%) applies to selected goods (in addition to the fiscal duties imposed on importation), including:

- Alcohol and tobacco.
- Used or second hand liquefied petroleum gas (LPG) powered motor vehicles.
- New or used licensed mini buses.
- Some goods that are also locally manufactured.
- Certain white goods and luxury items.

Excise taxes

Excise tax is payable on tobacco, alcohol products, and carbonated soft drinks manufactured in Fiji based on quantities produced.

Property taxes

There are no property taxes at the national level. However, the municipalities may charge property rates in their respective area.

Stamp duties

Under the Fiji Stamp Duties Act, stamp duty is payable in respect of instruments, including, but not limited to, declaration of trusts, leases, mortgages, transfer of property (or interest therein), and shares.

Capital gains tax (CGT)

Effective 1 May 2011, the capital gains made from the following assets may be subject to CGT of 10%:

- Land or an interest therein.
- Vessel of over 100 tonnage.
- Yacht.
- Share, security, equity or other financial asset (except shares listed in the South Pacific Stock Exchange).
- Intangible asset.
- Interest in a partnership or trust.
- Aircraft.
- Option, right, or other interest in an asset referred to above.

A capital gain made on disposal of an asset that is used solely to derive income exempt from tax under the Income Tax Act shall be exempt from CGT.

Foreign tax paid in respect of the disposal of a capital asset may be allowed as a tax credit against the CGT payable.

There is no carryforward of capital losses in calculating CGT.

Service turnover tax (STT) (formerly hotel turnover tax)

Effective 1 January 2012, STT at the rate of 5% is imposed on turnover of a person conducting a business involving the provision of a prescribed service, which includes the following:

- Provision of accommodation, refreshments, and other services by a hotel.
- Any services provided in a vessel that is principally or wholly engaged in the carriage of tourists in Fiji.
- Provision of meals and drinks in a bar.
- Provision of services in a nightclub.
- Provision of in-bound tour services.
- Live entertainment provided by artists for a fee.
- Provision of services for recreational activity for gain.
- Provision of services relating to exhibition of films to the public or section thereof by an exhibitor where a charge is made for admission, including services provided by cinema operators.
- Provision of services by rental car operators.
- Provision of meals and beverages by bistros or coffee shops with an annual gross turnover over FJD 1.5 million.
- Provision of meals on sale by restaurants with annual gross turnover over FJD 1.5 million.
- Provision of charter flight services by an aircraft or helicopter with an annual gross turnover over FJD 300,000.
- Provision of all water sports, including underwater activities and river safaris, with an annual gross turnover in excess of FJD 300,000.
- Provision of accommodation in a private residence or property that accommodates tourists, international students, or overseas visitors who are paying guests.

The due date for payment is aligned with the VAT Decree requirements (i.e. end of the month following the taxable period).

Fringe benefit tax (FBT)

Effective 1 January 2012, FBT of 20% is payable on the grossed-up value of certain fringe benefits provided (the effective tax rate is 25%).

Telecommunication levy

Telecommunication levy of 1% is imposed on all voice call charges.

Credit card levy

Credit card levy of 2% is imposed on the monthly credit card balance, including interest and other bank charges.

Third party insurance levy

Third party insurance levy of 20% is imposed on the total third party insurance premium collected in a month.

Fiji Islands

Gambling turnover tax (GTT)

Under the Gambling Turnover Tax Decree of 1991, GTT is imposed on the value of consideration paid or payable in respect of the provision of prescribed gambling services (i.e. acceptance of bets and provision of tickets for any lottery) at the rate of 15%.

Branch income

The profits of a foreign company's branch operating in Fiji are subject to the same tax rate as the tax rate levied on profits of a resident corporation (i.e. 20% for tax years commencing on 1 January 2012; previously 28%).

Income determination

Normal tax is payable and assessed on taxable income of the business. Taxable income is calculated by subtracting allowable deductions from all assessable income (i.e. all sources of income).

Inventory valuation

Inventories are normally valued at the lower of cost and net realisable value. While the first in first out (FIFO) method is acceptable, the last in first out (LIFO) method is not, for either book or tax purposes. Conformity between book and tax reporting is not required, and there are no special provisions for valuing inventories or determining inventory flows.

Capital gains

Any profit or gain accrued or derived from the sale or disposal of real or personal property, or any interest therein, shall be subject to income tax when:

- the business of the company comprises dealing in such property
- the property is acquired for the purpose of selling or otherwise disposing thereof, or
- any profit or gain is derived from the carrying on or carrying out of any undertaking or scheme entered into or devised for the purpose of making a profit.

Notwithstanding the above, the profit or gain derived from a transaction that does not form part of a series of transactions and that is not itself in the nature of trade or business shall not be included.

In such a case, the capital gain may be subject to CGT of 10% (*see Capital gains tax [CGT] in the Other taxes section for more information*).

Dividend income

Transfers of property by private companies to shareholders and associates may be deemed to be a dividend paid by that company.

Dividends received from a company incorporated in Fiji by resident corporations are exempt from tax.

Interest income

Interest income over FJD 200 derived by a resident from a financial institution shall be subject to resident interest withholding tax (WHT) of 31%, which may be claimed as a tax credit against income tax payable on income.

Partnership income

The income of the partners from a partnership for any income year is equal to each partners' respective share of income from that partnership. Each partner declares income separately and is individually liable for filing a tax return for each applicable year.

Liability of directors/shareholders

Directors/shareholders of companies in liquidation or with insufficient assets to satisfy tax liabilities may be held liable for any outstanding tax liability of the company, under certain conditions.

Other significant items

Where a foreign-controlled business in Fiji produces less income than might be expected, the revenue authorities may determine the income for tax purposes.

An entity normally residing outside Fiji, which disposes of an interest in land in Fiji held directly or through a shareholding in a company, may be assessed for income tax on the profit on that disposal.

Foreign income

Resident corporations are taxed on their worldwide income. Foreign income derived from a treaty country is taxed according to the treaty. Foreign income sourced from a non-treaty country is subject to income tax in Fiji. A credit is allowed in Fiji for foreign tax paid on foreign income. The tax credit is limited to the lesser of the Fiji tax payable or the foreign tax paid on such income. There are no special provisions for taxing undistributed income of foreign subsidiaries.

Deductions

Generally, expenses wholly and exclusively incurred in deriving assessable income are allowable deductions. Expenditures that are capital or domestic in nature are generally not deductible.

Depreciation and depletion

Depreciation is calculated on the cost of an asset on a straight-line basis. The prescribed rates of depreciation are based on the estimated life of the asset. Upon disposal of an asset, either recoupment of depreciation claimed is taxable or the excess of tax written-down value over sale proceeds is deductible. The taxpayer has an option to set-off recoupment of depreciation against the cost of replacement assets. Conformity between book and tax depreciation is not required.

There are seven broad bands of depreciation rates for assets acquired after 1 January 1998, and the prescribed effective life of the asset is used to determine the relevant depreciation rate. The seven broad bands and the depreciation rates are as follows:

Band	Effective life (years)	Standard rate (%)	Maximum rate (%)
1	2 to less than 3	50	60
2	3 to less than 5	33 $\frac{1}{3}$	40
3	5 to less than 6 $\frac{2}{3}$	20	24
4	6 $\frac{2}{3}$ to less than 10	15	18
5	10 to less than 20	10	12

Fiji Islands

Band	Effective life (years)	Standard rate (%)	Maximum rate (%)
6	20 to less than 40	5	6
7	40 and over	2.5	3

An optional 20% loading, which applies on the broadband rate, may be claimed. Assets acquired before 1 January 1998 continue to be depreciated at the former rates.

Subject to certain conditions, accelerated depreciation is available for (i) buildings constructed between 1999 and 2014 that are to be used for agricultural, commercial, or industrial purposes; (ii) multi-storey, multi-unit residential buildings; and (iii) other capital expenditure considered of benefit for the economic development of Fiji. Up to one-fifth of the expenditure may be claimed in each of any five years of an eight-year period.

Certain renewable energy plant and water storage facilities also qualify for a 100% write-off.

Capital expenditure aimed at economising on the consumption of fuel, electricity, or its derivatives, or on an asset using energy sources indigenous to Fiji, may be eligible for accelerated depreciation at varying rates.

The cost of the acquisition of a mining lease or tenement and the cost of development of mines may be written off in equal instalments in any five of the first or last eight years of a nine-year period, commencing with the year in which the expenditure was incurred.

A deduction for depletion of other natural resources is not available.

Goodwill

Goodwill, and the amortisation thereof, is generally not deductible for income tax purposes.

Start-up expenses

Start-up expenses are generally not deductible for income tax purposes.

Interest expenses

Interest expenses that are revenue expenditure wholly and exclusively incurred in deriving taxable income are deductible in calculating taxable income.

Provisions

Provisions for expenses not yet incurred (e.g. bad debts) are not tax-deductible. Deductions are generally permitted in respect to amounts that are actually paid or written off.

Charitable contributions

Contributions to approved charitable organisations of up to FJD 100,000 are deductible.

There are certain other specific donations that qualify for varying levels of deductions, including:

- Donations to the Fiji Heritage Foundation, which qualify for a deduction of 150%.
- Cash donations exceeding FJD 50,000 to the Poverty Relief Fund for education, which qualify for a deduction of 200%.

- Cash donations exceeding FJD 100,000 to a Sports Fund (as approved by the Commissioner of Inland Revenue) for purposes of sports development in Fiji, which qualify for a deduction of 150%.

Fines and penalties

Generally, fines and penalties are not deductible for income tax purposes.

Taxes

Taxes levied on income are not deductible. Effective 1 January 2012, only 50% of the employer's statutory FNPF contribution paid by the employer shall be allowed as a deduction for tax purposes in the year the contribution was paid.

Net operating losses

From 2012, losses may be carried forward for four consecutive years (previously eight years), provided the company can demonstrate a minimum 51% continuity of shareholding between the year of loss and the year of claim. Notwithstanding the change in ownership, losses may also be carried forward where a company carries on the same business in the carried forward year as it did in the loss year.

In relation to certain hotel business, tax losses may be carried forward for eight years (previously 13 years). *Please refer to the Hotel industry incentives in the Tax credits and incentives section.*

Loss carrybacks are not permitted.

Payments to foreign affiliates

Subject to the normal rules of deductibility, a deduction may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates. However, any deductions claimed by any company carrying on business in Fiji (whether incorporated in Fiji or not) in respect of head office charges or any other like payments shall not exceed 3% of total gross Fiji income.

Group taxation

Group taxation is not available in Fiji.

Transfer pricing

Effective 1 January 2012, the Income Tax Act has been amended to include new transfer pricing provisions. The provisions state that the tax authority may allocate income and expenses between associates (related entities) to reflect income and expenses on an arm's-length basis.

The Income Tax (Transfer Pricing) Regulations have also been issued. The Regulations provide that the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing guidelines may be used in interpreting the provisions of the Regulations in determining income or expenses on an arm's-length basis.

Thin capitalisation

There are no thin capitalisation rules in Fiji.

Fiji Islands

Tax credits and incentives

The tax incentives in Fiji are designed primarily to promote export sales and to encourage the development of industries that are considered of benefit to the economic development of Fiji.

Export income deduction

A deduction for export income is allowed in accordance with the following:

Year of assessment	Percentage of export income to be deducted (%)
2011	50
2012	40
2013	30
2014	20
2015	10

‘Export income’ means net profit derived by a taxpayer from the business of exporting goods and services; and the Commissioner of Inland Revenue may, where separate records for export income are not maintained, determine such income on the basis of a formula as set out in the legislation.

The 5th Schedule of the Fiji Income Tax Act, ‘Export Incentives’, has been repealed. However, the existing beneficiaries are expected to continue to enjoy the incentives under this schedule until the expiry of the incentives granted.

Information communication technology (ICT) tax incentives

The income of an information communication technology operator may be exempt from CIT, provided that the business employs 50 employees or more for six months within the income year and 60% or more of the total value of its services in that income year is exported, if it is:

- operating on or before 1 January 2009 in the declared Kalabu Tax Free Zone (exempt from 1 January 2007 to 31 December 2016) or
- granted a licence after 1 January 2009 (exempt for a period of 13 years from the date of issue of the licence).

The following tax incentives are available to taxpayers engaged in new ICT business and for existing taxpayers so engaged who are able to show a significant increase in capacity and number of employees:

- 80% tax exemption for businesses employing more than 101 employees.
- 60% tax exemption for those that employ between 60 and 100 employees.
- 40% tax exemption for those employing 10 to 59 employees.

A 150% deduction is available for costs incurred for the development of an ICT business by any taxpayer employing 500 or more employees. This deduction is available until 31 December 2012.

‘Information communication technology business’ means an entity engaged in software development, call centres, or internet service provision. It does not include an internet café, any retail or wholesale of information technology products, or the repair, sale, or service of any such products.

Employment incentives

Salary and wages paid to first-time employees for the first 12 months of employment qualify for a 150% deduction. This deduction is available until 31 December 2012.

Hotel industry incentives

Approved capital expenditure incurred in building, renovating, or expanding a hotel is subject to an investment allowance of 55% of the approved expenditure, in addition to normal depreciation.

Under the Short Life Investment Package (SLIP) the following concessions are available to a company:

- Exemption from CIT for a period of ten years, provided that the capital investment in the hotel is more than FJD 7 million.
- Duty-free entry of certain capital equipment, plant, and machinery upon receiving provisional approval from the Minister.
- Permission to generate own electricity, the excess to be sold to the Fiji Electricity Authority.

Any tax losses incurred by an entity granted approval for the investment allowance or SLIP may be carried forward for eight years, but may only be set off against income of the hotel business or from the hotel premises.

The recipients of provisional approval for hotel investment tax incentives are required to commence implementation of the hotel projects within one year from the date provisional approval is granted.

Filmmaking and audiovisual incentives

A tax exemption or reduced tax rate is available on the income of non-resident employees of an approved non-resident company engaged or intending to be engaged in making a film in Fiji.

A resident entity (excluding an entity holding a broadcast license in television or radio in Fiji or with substantial shareholdings in the same) may deduct up to 150% of expenditure on audio-visual production in respect of income in the year of the expenditure. 'Audio-visual productions' include production for exhibition or sale of theatrical films, broadcast television, direct-to-video and video disk programme, audio recording, computer software, and interactive websites.

A tax exemption is available on the income derived by a taxpayer from the commercial exploitation of a copyright until the taxpayer has received from the commercial exploitation a return of up to 60% of the expenditure. The expenditure must be of capital nature and in relation to the audio-visual production costs in respect of a qualifying audio-visual production.

Tax concessions are also available for residents of areas declared as studio city zones by the appropriate government minister.

Other tax incentives

An investment allowance of 55% is available for the construction or refurbishment and renovation of a vessel, in addition to normal depreciation, subject to certain conditions.

Fiji Islands

An approved mining company may, for a specified period, be exempt from CIT or taxed at a lower rate. The holder of a valid prospecting licence may write off approved expenditure on prospecting for minerals against income from all sources.

A 150% deduction is available for direct capital expenditure incurred by commercial banks in rural banking programmes.

Investors engaged in value adding processes in the food processing, agricultural processing, fisheries, or forestry business may be able to claim a 100% deduction with respect of amounts invested or re-invested (for expansion), provided that the businesses meet the 50% local content rule.

A CIT exemption may be available to a taxpayer engaged in the following commercial agricultural farming and agro-processing activities, subject to certain conditions:

- Any new activity approved and established between 1 January 2009 and 31 December 2009, for a period of four to ten consecutive fiscal years, depending on the level of capital investment.
- Any new activity with a capital investment of at least FJD 2 million approved and established between 1 January 2010 and 31 December 2014, for a period of ten consecutive fiscal years.

Income derived by a taxpayer from a new activity in processing agricultural commodities into bio-fuels may be exempt from CIT for a period of ten years under certain conditions.

An exemption from CIT for a period of five years may be available to a taxpayer engaging in renewable energy projects and power cogeneration.

Entities in the agriculture, fisheries, and tourism industries, with a maximum turnover threshold of FJD 300,000, may also be exempt from CIT.

An investment allowance equal to 60% of the qualifying expenditure is available as a deduction for investment in Fixed Line Next Generation Networks. A qualifying expenditure means an expenditure of FJD 50,000 or more incurred for the purpose of acquiring a capital asset in any of the years from the 2009 year of assessment to the 2012 year of assessment.

A 150% deduction is available on expenses incurred in reorganising a company for the purpose of listing on the South Pacific Stock Exchange.

Effective for tax years commencing on 1 January 2012, 40% of capital expenditure of not less than FJD 50,000 incurred by any existing business located in Vanua Levu is allowed as a deduction for tax purposes, subject to certain conditions.

Foreign tax credit

A credit is allowed in Fiji for foreign tax paid on foreign income, limited to the lesser of the Fiji tax payable or the foreign tax paid on such income.

Withholding taxes

WHTs are levied as follows:

Recipient	WHT (%)				
	Dividends	Interest	Royalties	Know-how, management fees	Professional fees
Resident corporations	0	31 (1)	0	0	0
Non-resident corporations:					
Non-treaty	15	10	15	15	15
Treaty:					
Australia	15	10	15	15	0 to 15 (4)
Japan	0 to 15 (4)	10	10	10	0 to 15 (4)
Korea, Republic of	10/15 (2)	10	10	10	0 to 15 (4)
Malaysia	15	15	15	15	0 to 15 (4)
New Zealand	15	10	15	15	0 to 15 (4)
Papua New Guinea	15	10	15	15	0 to 15 (4)
Singapore	5/15 (3)	10	10	10	0 to 15 (4)
United Kingdom	15	10	15	15	0 to 15 (4)

Notes

1. Applies to interest (over FJD 200) on savings and deposits with commercial banks and other financial institutions.
2. 10% of gross amount of dividends if beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 15% in all other cases.
3. 5% of gross amount of dividends if beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 15% in all other cases.
4. Depending on the provisions of the applicable double taxation agreement.

Tax administration

The Tax Administration Decree (TAD) was promulgated with the stated intention of harmonising the administration of the various tax laws, including CIT and VAT. FBT and STT are now also covered by the provisions of the TAD.

If a due date falls on a Saturday, Sunday, or holiday, the due date is the last working day before the due date.

Taxable period

Tax is assessed on income derived during the calendar year preceding the year of assessment. Returns are therefore generally accepted on a calendar-year basis, although approval is also given to use an alternative fiscal-year basis. For purposes of assessment of returns completed on a fiscal-year basis, the calendar year in which more than one-half of the fiscal year falls is deemed to be the calendar year in which the income is derived.

Tax returns

The Fiji tax system is not based on self-assessment. Returns of income contain information on the basis of which assessments are raised by the tax authorities.

The due date for lodgement of CIT returns is three months after the end of the income year. However, under the Tax Agent Lodgement Programme, an extension of time may be granted to lodge the CIT returns.

Fiji Islands

Payment of tax

Effective for tax years commencing on 1 January 2012, advance tax payments are required in four instalments, as follows:

- First advance: Due on the last day of the sixth month of the current fiscal year (30% of the estimated tax payable).
- Second advance: Due on the last day of the ninth month of the current fiscal year (30% of the estimated tax payable).
- Third advance: Due on the last day of the fiscal year (30% of the estimated tax payable).
- Fourth advance: Due two months after the fiscal year-end (10% of the estimated tax payable).

The TAD provides for various ways to ensure the collection of taxes including, but not limited to, the following:

- Departure prohibition order: A departure prohibition order may be used by the tax office to prevent taxpayers from leaving the country without settling outstanding taxes.
- Garnishee orders: The tax office may garnish bank accounts for outstanding taxes.
- Registration of charges on personal and real properties of the taxpayer.
- Distress and sale of personal property.
- Temporary closure of business.

Penalties

Administrative penalty provisions have been amended and increased under the TAD. Some of the penalties are as follows:

- Failure to register: Every person who fails to apply for registration as required pursuant to the Decree, commits an offence against the Decree, and will, on conviction, be liable to a fine not exceeding 50% of the tax payable, where the delay does not exceed six months; or a fine not exceeding the tax payable, where the delay exceeds six months.
- Late filing of a return: A registered person who fails to lodge a tax return is liable for a penalty of 20% of the tax payable in the case where tax is payable and, effective 1 January 2012, a penalty of 5% of the tax payable for every month of default.
- Late payment of tax payable: Where any tax remains unpaid on the expiry of the due date, a penalty of 25% of the tax payable in respect of that taxable period will apply.
- Failure to comply with the late payment penalty: Every person who fails to comply with the late payment penalty is liable for penalty of 5% of the unpaid tax for each month of default.
- Failure to maintain proper records: A registered person who fails to keep, retain, or maintain account, documents, or records is liable for a penalty of 75% (knowingly or recklessly made) or 20% (in other cases).
- Insufficient payment of advance taxes: Effective 1 January 2012, a taxpayer who makes insufficient advance payment of taxes on the third and fourth instalments is liable for a penalty of 40% (previously 10%).

Topics of focus for tax authorities

The TAD has introduced a binding ruling system. However, the provisions will only apply after the Minister of Finance has appointed a date by notice in the Gazette.

The tax authorities may void any transaction, agreement, or arrangement made or entered into for the purpose of altering the incidence of tax; relieving any person from tax liability; or defeating, evading, or avoiding any tax imposed.

Significant developments

As of 1 January 2012, the corporate income tax (CIT) rate decreased from 26% to 24.5%. The new tax rate applies to tax years ending on 1 January 2012 or later (i.e. tax year ended 31 December 2012 for calendar year end companies).

In addition, there have been some changes with respect to withholding taxation. The domestic withholding tax (WHT) on dividends, royalties, and interest paid to foreign entities has been reduced to 24.5%, and the special WHT on certain dividends has decreased to 18.38%.

At the moment, there is no thin capitalisation legislation. However, in April 2012, the Ministry of Finance sent the draft Government Bill concerning intra-group interest deduction limitations out for comments. According to the draft, the rules would be effective from the beginning of 2013.

The Ministry of Finance has also nominated a work group mentioned in the government programme to evaluate the current CIT system and the possibilities to reform it in order to ensure Finland's competitiveness and tax base. The targets of the group's work include e.g. the following:

- Group taxation reform.
- Possibilities to remove the separation of different income sources.
- Expanding possibilities to carry forward net operating losses.

The transfer tax on shares may also be partly increased in 2013.

Taxes on corporate income

Finnish resident companies are subject to Finnish CIT on their worldwide income (i.e. unlimited tax liability). Also, Finnish permanent establishments (PE) of non-resident companies are subject to Finnish CIT on their worldwide income attributable to the PE.

The CIT rate is 24.5%.

Local income taxes

No local income taxes are levied in Finland on the income of a company.

Corporate residence

A company is deemed to be resident on the basis of incorporation. Consequently, a company is deemed to be resident in Finland if it is incorporated (registered) in Finland.

Finland

Permanent establishment (PE)

A PE is, in general, formed in line with the Organisation for Economic Co-operation and Development (OECD) Model Convention.

Other taxes

Value-added tax (VAT)

The general VAT rate is 23%. A reduced rate of 13% is applied to food and animal feed. The reduced VAT rate of 13% also applies to restaurant and catering services. A reduced VAT rate of 9% is applied to books, subscriptions of newspapers and magazines lasting one month or longer, accommodation, and passenger transport.

A zero rate applies in certain instances (e.g. intra-Community supplies of goods and exports of goods). Additionally, certain services (e.g. financial services, insurance services, and certain educational services) are exempted from VAT.

Customs duties

Many goods imported into Finland from outside the European Union (EU) are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

Excise duties

Alcohol and alcoholic beverages, tobacco products, liquid fuels, electricity, natural gas, and coal are subject to EU harmonised excise duties. National excise duties are levied in Finland on waste delivered to landfill sites, lubricating oil, oil imported into or through Finland, ice cream, sweets, soft drinks, beverage containers, and tall oil.

Real estate tax

Municipalities impose an annual real estate tax. The tax is levied on the taxable value of buildings and land. The municipal council determines the applicable tax rates, although the minimum and maximum tax rates are set by tax legislation (e.g. 0.32% to 0.75% for permanent dwellings, 0.6% to 1.35% for other real estate). The tax is deductible from taxable business income if the real estate is used for business purposes. The tax is deductible from taxable income of the so-called other source of income if the real estate is used to acquire other taxable income than business income.

Transfer tax

A transfer tax of 4% of the sales price is payable on the transfer of real estate situated in Finland. The transfer of shares in Finnish companies and other domestic securities is subject to a transfer tax of 1.6% (*see the Significant developments section*). Generally, the transfer tax is payable by the transferee.

No transfer tax is payable on the transfer of securities made through the stock exchange. Similarly, no transfer tax is payable if both the seller and the transferee are non-residents. Transfer tax is, however, always payable on transfers between non-residents if the transferred shares are shares in a Finnish housing or real estate company.

Stamp tax

No stamp taxes are levied in Finland.

Social security contributions

According to the Finnish social security legislation, both Finnish and foreign employers have a liability to pay several social security payments in Finland in cases where an employee performs one's tasks partly or wholly in Finland. The liability concerns all employers, regardless of the form of the company and whether the foreign company has a PE in Finland. The percentage rates for the employer's (and employee's) social security contributions are revised on an annual basis.

Compulsory social security contributions payable by the employer in 2012, according to the paid salaries, are as follows:

- Employer's social security charge: 2.12% (no cap).
- Employer's pension insurance contribution: 17.35% (on average, no cap).
- Employer's unemployment insurance contribution: 0.80% for the first 1,936,500 euros (EUR) of gross salaries and 3.20% for the portion of the gross salaries exceeding EUR 1,936,500 (no cap).
- Group life insurance premium: 0.07% (on average, no cap).
- Accident insurance premium: 1.00% (on average, no cap).

The new rates for employer's social security charge are applicable to salaries paid as of 1 January 2012. The employer's social security charge is paid to the regional tax office, and the other contributions are paid to the insurance company. All of these contributions are tax deductible as salary cost.

Compulsory social security contributions payable by the employee in 2012 are as follows:

- Employee's pension insurance contribution: 5.15% or 6.50% used for employees of age 53 or over (no cap).
- Employee's unemployment insurance contribution: 0.60% (no cap).

Abovementioned contributions are tax deductible for the employee. These contributions are withheld from the gross salary at the time of salary payment and remitted by the employer to the appropriate insurance company together with the employer's pension and unemployment contributions.

- Employee's sickness insurance contribution: 2.04% (no cap)

The sickness insurance consists of two payments, daily allowance contribution 0.82% and medicare contribution 1.22%. From these two contributions, only the daily allowance contribution is tax deductible for the employee. The medicare contribution is not tax deductible. Unlike other employee's social security contributions, the sickness insurance contribution is included in the WHT rate of the employee's personal WHT card and, thus, withheld and remitted to the tax authorities together with the withheld income taxes and is finally settled in the final assessment.

If an employee is regarded as a foreign-posted employee and has an A1 certificate or a certificate of coverage from one's home country, neither the aforementioned employer's social security contributions nor the employee's social security charges are payable in Finland.

Finland

Branch income

As a general rule, a branch is taxed like a corporation (tax rate 24.5%) on the profits attributable to it, provided the branch constitutes a PE in Finland. No tax is withheld on transfers of (taxed) profits to the head office.

Income determination

Companies and other legal entities may have income from three different sources: income from business activities, agricultural income, and personal source income. The net taxable income is calculated separately for each source. The expenses of one source of income cannot be deducted from the taxable income of another source, and a loss from one source of income cannot offset taxable income from another source. All taxable income received by a company is taxed at the CIT rate of 24.5% irrespective of the source to which it is attributable.

Income from business and professional activities falls into 'business source' income (taxed in accordance with Business Income Tax Act or BITA), while income from non-business activity is 'personal income'. Typically, personal income is passive income derived, for example, from investments. As an example, rental income from real estate let to non-related companies is usually regarded as 'personal source' income. The same can apply to a dividend received from stock exchange quoted companies, where the recipient of the dividend is a passive holding company. Farming and forestry income are, as a main rule, treated as agricultural source income.

In general, Finland has a very broad income concept, and taxable income includes all income derived from a company's activities, though there are some significant exceptions, including (among others):

- Capital contributions by shareholders.
- In most cases, dividends from unlisted companies (*see Dividend income below*).
- Liquidation gains and capital gains qualifying for the participation exemption (*see Capital gains below*).
- Proceeds from disposal of company's own shares.
- Merger gain.

There is no general distinction between capital gains and other income; capital gains of a company are taxed as part of its general income either in the 'business income' basket or the 'other income' basket. No rates other than the general CIT rate of 24.5% are applied to any part of taxable income of a company.

Taxable income of a company generally is computed on an accrual basis (i.e. income is taxable in the year it is earned). However, exemptions to this main rule do exist, including unrealised exchange gains and losses, which are taxable/deductible in the year of the rate change.

Inventory valuation

Inventories may be written down to the lower of direct first in first out (FIFO) cost, replacement cost, or net realisable value. Conformity between book and tax reporting is required.

Capital gains

Capital gains and losses are generally included in the taxable business income (i.e. sales proceeds are included in the taxable income, and the undepreciated balance of the asset sold is deducted in the sales year) and treated as ordinary income. However, the entire stock of machinery and equipment is treated as a single item, and the capital gain on machinery and equipment is entered as income indirectly by deducting the selling price from the remaining value of the stock of machinery and equipment.

Capital gains arising from the sale of shares are tax exempt via a participation exemption, under certain circumstances. Specifically, capital gains arising from the sale of shares are tax exempt if:

- the seller is not a company carrying out private equity activities (as defined by BITA)
- the seller has owned continuously, for a period of at least one year, at least 10% of the share capital of the target company, and
- the shares are part of the seller's fixed assets and the shareholding is included in the seller's business income source for tax purposes.

For the participation exemption to apply, the target company cannot be a real estate company, a housing company, or a company the activities of which mainly include owning of real estates. The target company must also be a Finnish company, a company referred to in the European Commission (EC) Parent-Subsidiary Directive, or a company resident in a country with which Finland has concluded a tax treaty that applies to the target company's dividend distribution.

Note that a capital gain is taxable to the extent that the gain corresponds with a previous tax-deductible write-down or provision made in connection with the acquisition cost of shares, subsidies received for acquiring shares, or previous capital losses deducted for Finnish tax purposes from intra-group transfer of the shares.

Capital losses are non-deductible in situations where capital gains are exempt from tax.

Dividend income

Dividends received by a Finnish company are tax exempt in most cases. However, dividends received are partly (75%) taxable if:

- the dividend is received on shares belonging to 'investment assets' and the receiving company does not own at least 10% of the equity of the distributing company that is resident in another EU member state and covered by the EC Parent-Subsidiary Directive (note that only financial, pension, and insurance institutions may have assets which are considered as 'investment assets')
- the dividend is received from a company other than a Finnish or EU resident, and
- the dividend is received from a publicly quoted company, the receiving company is not a publicly quoted company, and the shareholding is less than 10% of the equity of the distributing company.

Dividends that a Finnish company receives from other than a company resident in Finland or another EU member state are, however, fully taxable (100%) if there is no applicable tax treaty. Note that most of the Finnish tax treaties include provision enabling tax-exempt dividends from the tax treaty country in case of at least a 10% shareholding.

Finland

Stock dividends

Stock dividends (bonus shares) may be distributed to stockholders, which are corporations and other legal entities with some exceptions, free of tax on the shareholder (*see Dividend income above*).

Interest income

Interest income of a company is taxed as part of its general income, thus the regular CIT rate of 24.5% is applied.

Foreign income

A Finnish corporation is taxed on foreign dividends when the decision to distribute dividends is made and on foreign branch income and other foreign income (e.g. interest and royalties) as earned. The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties (*see the Tax credits and incentives section for more information*).

Deductions

As with taxable income, the concept of deductible costs is wide and covers, in general, all costs incurred in the pursuance of taxable income. Significant exceptions to this rule include (among others):

- Income taxes (*see below*), tax late payment interests, and punitive tax increases.
- Fines and other punitive payments.
- 50% of entertainment costs.
- Capital losses and liquidation losses if capital gains from the sale of shares of a target company would qualify for the participation exemption (*see Capital gains in the Income determination section*).
- Losses from the disposal of a company's own shares.
- Merger losses.

As the accrual method is applied to calculation of taxable income, expenses are usually deductible in the year they are realised (i.e. the year the obligation to pay has arisen).

Depreciation, amortisation, and depletion

Maximum annual rates of depreciation calculated on net book value (declining-balance method) are 25% for machinery and equipment and from 4% to 20% for buildings and other constructions, depending on the type and estimated life of the asset. Net book value is defined as cost less accumulated depreciation and, in the case of machinery and equipment, proceeds on disposal of the assets. The straight-line method is applied to certain intangible assets and capitalised expenditures and to assets with long economic use, such as dams. Tax depreciation is limited to the cumulative charges made in the books.

Costs related to qualifying intangible property are usually amortisable over a period of ten years or a shorter period if the economic life is proven to be less than ten years.

The capital cost of mines, sandpits, quarries, and peat bogs is written off in proportion to the quantities extracted. Short-lived items (the economic life of which is three years or less) may be written off immediately.

Land is not a depreciable asset.

Goodwill

Acquired goodwill is amortisable for tax purposes over its economic life, up to a maximum of ten years.

Start-up expenses

Start-up expenses are generally deductible expenses when determining taxable income.

Interest expenses

As a general rule, interest expenses are fully deductible. However, the Ministry of Finance has sent the draft Government Bill concerning intra-group interest deduction limitations out for comments (*see the Significant developments section*).

Bad debt

In general, bad debts incurred from sales receivables, etc. are tax deductible. It is also required that the debt is deducted for accounting purposes. Also, loan receivables may be tax deductible in cases where external loans or ownership of less than 10% is in question.

Charitable contributions

Donations are deductible for CIT purposes in certain cases.

In order to be tax deductible, the amount of a donation should be at least:

- EUR 850, but not more than EUR 250,000. In addition, it is required that the donation is made to a European Economic Area (EEA) member state or to a publicly financed university or other higher educational institution of Finland or any other EEA country, to benefit the sciences, the arts, or the Finnish cultural heritage.
- EUR 850, but not more than EUR 50,000. In addition, it is required that the donation is made to an association, foundation, or other institution in the EEA nominated by the Tax Administration and to benefit the sciences, the arts, or the Finnish cultural heritage.

Donations of not more than EUR 850 (e.g. to charitable purposes) are, in general, tax deductible.

Taxes

No income taxes are deductible when determining taxable income. However, the real estate tax is deductible.

Net operating losses

Losses may be carried forward for ten subsequent years. However, the right to carryforward may be forfeited in certain instances, such as in cases where there is a direct or indirect change in the ownership of the company operating at a loss. Loss carrybacks are not allowed.

Payments to foreign affiliates

A Finnish corporation may claim a deduction for royalties, service fees, and interest charges paid to foreign affiliates, provided the underlying transaction is beneficial to it and the amounts paid are at arm's length.

Finland

Group taxation

Companies within a group are not consolidated for CIT purposes. However, via group contributions (i.e. lump sum payments of cash based on annual taxable profits), group companies may even out their taxable profits and losses, which leads effectively to the same result as consolidation would. A group contribution is a deductible cost for the granting company and taxable income for the receiving company, provided that all of the following are true:

- Both companies belong to a structure where there is a direct or indirect common ownership of at least 90%, and the structure has existed for the entire tax year.
- Both companies are Finnish resident for tax purposes.
- Both companies are limited liability companies or co-operatives with business activities (i.e. have a source of income from business activities, *see the Income determination section*) and are not financial, insurance, or pension institutions.
- The contribution is recorded in the annual statutory accounts of both companies involved and must affect their annual net income.
- The accounting period for both companies ends at the same date.
- The amount of contribution does not exceed the taxable business income of the granting company.
- The contribution is not considered a capital investment.

Based on case law, the ownership chain may also be traced via foreign entities, provided there is a tax treaty between Finland and the country wherein the ultimate parent for the group is resident.

Transfer pricing

All transactions between related parties must happen at arm's length. The requirement is imperative even in relation to purely domestic transactions. If the arm's-length requirement is not followed, income or deductions of a company may be adjusted for tax purposes, in addition to which a risk for substantial penalties exists.

A Finnish company is obliged to prepare transfer pricing documentation to support transactions between its non-Finnish related parties. Documentation is subject to statutory requirements regarding content, which vary depending on the volume of related party transactions. The documentation requirement does not concern small and medium-sized companies that have less than 250 employees and feature a turnover of no larger than EUR 50 million or a balance sheet of no more than EUR 43 million.

Thresholds are calculated at the group level. Failure to present appropriate documentation may lead to a punitive tax increase.

Thin capitalisation

There is no special legislation governing thin capitalisation. A Finnish company may deduct interest payments to affiliates provided that the amount of debt and rate of interest are at arm's length. If not, a possibility for application of the general anti-avoidance provision may exist.

Note that the Ministry of Finance has sent the draft Government Bill concerning intra-group interest deduction limitations out for comments (*see the Significant developments section*).

Controlled foreign companies (CFCs)

The Finnish CFC regime was amended in 2009 for the purpose of bringing the regime into compliance with European Community law.

The CFC rules are applicable with respect to foreign entities in low tax jurisdictions controlled by Finnish residents. The undistributed profits of such foreign entities may be taxed as profit of the Finnish resident direct or indirect shareholders. The entity is deemed to be controlled by Finnish residents if at least 50% of the capital or total voting rights are directly or indirectly held by Finnish residents or if Finnish residents have the right to at least 50% of the profits of the entity. The taxable person in such a case is the Finnish resident shareholder who owns directly or indirectly at least 25% of the capital of the corporate body or have right to at least 25% of the profits of the entity. A foreign entity is considered to be low taxed if the actual income tax burden of the foreign corporation in its country of residence is lower than three-fifths of the tax burden of a comparable Finnish corporation (i.e. an effective rate of less than 14.7%, which is three-fifths of the Finnish tax rate of 24.5%).

Foreign PEs of non-resident companies can be regarded as equal to foreign companies provided that the PE's profits are not taxed in the head office state. Due to the transitional period, the PE provision would be applicable to PEs of foreign entities only as of 1 January 2015.

Certain types of businesses are excluded from the scope of the CFC rules (e.g. income principally from industrial, manufacturing, or shipping activities, as well as sales or marketing activities related to such activities, if they are directed principally to the country of residence of the sales or marketing company). Also, companies resident in a country with which Finland has a double tax treaty (DTT) generally are outside the scope of the CFC rules if the company does not benefit from any special tax incentives in that treaty country. Tax treaty countries that are not covered by this rule are exhaustively mentioned in a specific 'black list' provided by the Ministry of Finance. These countries are Barbados, Bosnia-Herzegovina, Georgia, Macedonia, Malaysia, Moldova, Montenegro, Serbia, Singapore, Switzerland, United Arab Emirates, and Uzbekistan.

In addition to these two mentioned exclusions, the Finnish CFC rules are not applicable in cases of genuine economical establishment in a foreign country, which is either an EU/EEA member state or a tax treaty state not on the 'black list'. The genuine economical establishment is evaluated in light of the requirements of the business in question and paying special attention to capable personnel and office space located in the low tax jurisdiction.

Tax credits and incentives**Foreign tax credit**

The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties. Foreign tax can be credited against taxes payable in Finland on the same income over the same period on a pro-rata basis. The credit is given for taxes paid to a foreign state and covered by the relevant double tax treaty. The maximum credit is the lesser of either the amount of the foreign tax or an amount equal to the Finnish tax payable on the income from a foreign state. This maximum is calculated on a source-by-source basis. Unused credit of foreign tax paid may be carried forward for five years on an income basket basis.

Finland

Research and development (R&D) activities

Qualifying R&D related costs may be deducted annually under certain circumstances, despite the fact that they should be capitalised under general rules.

Withholding taxes

Finnish corporations paying certain types of income are required to apply a 24.5% or 18.38% WHT on payments to foreign corporations and a 30% WHT on payments to non-resident individuals or other than corporate entities.

According to domestic legislation, interest paid to a non-resident is usually tax exempt in Finland.

Dividends paid to a company referred to in the EC Parent-Subsidiary Directive, owning at least 10% of the capital of the dividend distributing company, are also tax exempt.

No WHT is levied on dividend payments received by companies resident in the EU/EEA area (other than in Liechtenstein), which would have been tax-free if paid to a Finnish corporate body, if the WHT cannot be credited in the company's country of residence.

The domestic WHT rate is 18.38% if the requirements for WHT exemption listed above are not met and

- the non-resident recipient is a financial, insurance, or pension institution resident in the EU/EEA area (other than Liechtenstein)
- the shares belong to its investment assets, or
- the non-resident recipient is a non-listed company or a private company resident in the EU/EEA area (other than Liechtenstein) receiving dividends from a resident listed company in which it holds less than 10%.

See the table below for WHT rates on dividends and other payments from Finland to non-residents.

For countries not included in table, the WHT rate is 24.5% (corporate entity) and 30% (individual or other than corporate entity).

Note that each tax treaty should be studied carefully because there are often exceptions to general rules.

Recipient	WHT (%)			
	Dividend (portfolio)/interest on cooperative capital	Dividend (direct investment) *	Investment fund profit share	Royalties

Notes

* The recipient is a company whose share in the company making the payment is at least the percentage indicated in brackets.

- Tax is not levied on literary, scientific, or artistic royalties (*for film royalties see text of treaty*).
- If corporate entity, then:
 - no tax if these dividends were tax free under Business Tax Act and if the recipient does not receive a full credit for the Finnish tax in the country of residence, and
 - no tax on dividend paid to a company meant in the EC Parent-Subsidiary Directive owning at least 10% of the capital of the paying company.
- The tax rate is 15% on films, tapes used in television or radio broadcasts, use of copyright of literary, artistic, or scientific works, or royalty paid for usufruct.
- The tax rate is 10% on literary, scientific, artistic, and film royalties.
- The tax rate for an individual is 30% if income is tax-exempt in the country of residence.
- A lower tax in certain cases.
- Foreign capital greater than 100,000 United States dollars (USD) when dividend becomes due and payable.
- See the treaty for additional requirements.
- The tax rate is 7% on industrial, scientific, and commercial royalties.
- The tax agreement does not apply if the recipient is a special holding company.
- The tax rate is 5% on royalties from films and tapes.
- The tax rate is 5% on royalties paid for the use of industrial, commercial, or scientific equipment.
- The tax rate is 15% if the payer is also an industrial enterprise.
- The 10% is calculated on the total voting stock.
- There is no tax on profit shares meant in EC Directive 2003/48/EC.
- The tax rate is 1% for finance lease of equipment, 5% for operating lease of equipment and computer software.
- The tax rate is 5% for the use of secret process or for know-how, no tax for computer software, or patent.

18. The tax rate is 10% on industrial royalty, 3% on royalties to news agency, and 5% on artistic royalty to the author or the author's *mortis causa* successor.
19. The tax rate is 2.5% on royalties paid for the use of industrial, commercial, or scientific equipment or computer software.
20. The tax rate is 15% if the recipient is a company.
21. No tax on dividends to qualified parents-subsidiaries and pension funds.
22. No tax, if the recipient proves that one has domicile (individual) or is incorporated in the United Arab Emirates.
23. If corporate entity tax is 18.38% or 24.5%.
24. No tax on royalties between associated companies meant in EC Directive 2003/49/EC.

Non-treaty areas include Andorra, Antigua and Barbuda, Bahama Islands, Bahrain, Belize, Cayman Islands, Channel-Islands, Cyprus, Gibraltar, Grenada, Greenland, Hong Kong, the Spitsbergen, Jan Mayen, Liberia, Macao, Mauritius, Monaco, Panama, Samoa, San Marino, Vanuatu, and Virgin Islands.

Tax administration

Taxable period

The tax year is generally the calendar year. A company having an accounting period other than the calendar year is taxed for the accounting period or the accounting periods ending during the calendar year.

Tax returns

A company must file a CIT return within four months from the end of the accounting period.

Payment of tax

Income taxes are levied as prepayments during the tax year. Advance tax payments for companies are collected in two or 12 instalments during the tax year. If the total amount to be paid is not more than EUR 1,700, the instalments are due in the third and the ninth month of the accounting period. If the total amount to be paid exceeds EUR 1,700, the instalments are due monthly (due date is the 23rd day of each month).

If the final taxes exceed the advance payments, the difference is payable in the form of a supplementary payment due on the 25th day of the month following the month during which the final assessment is completed (ten months after the end of accounting period). Interest is payable on the supplementary amount if paid after the filing deadline of the CIT return (*see above*).

After the assessment of the taxes, any excess prepayments are refunded without application.

Audit cycle

Tax audits are performed at irregular intervals by tax auditors who are entitled to examine the accounts of a company and to request additional information necessary to the examination. Generally, the taxpayer receives an advance notice of an audit from the tax authorities.

Statute of limitations

Tax assessment must be completed within ten months from the end of the last month of the accounting year. After the assessment, a tax office can change an incorrect assessment. A correction for the benefit of the taxpayer has to be made in five years, calculated from the beginning of the year following the assessment year.

Any correction disadvantageous for the taxpayer must be made within the following time limits, calculated from the beginning of the year following the assessment year:

Finland

- One year: All errors.
- Two years: Writing errors made by the administration, calculation errors, and other comparable errors, as well as errors caused by erroneous or inadequate information given by third parties.
- Five years: If the taxpayer has failed to file one's return or e.g. has filed an incomplete, false, or misleading return.

Topics of focus for tax authorities

Current issues in special focus of tax audits are transfer pricing and permanent establishments.

The Tax Account system

As of the beginning of 2010, a new system for reporting and paying unprompted taxes (e.g. VAT and employer's social charges) was introduced. The Tax Account system is a taxpayer-specific information system under which unprompted taxes are declared on a monthly basis. There are changes in the existing system of monthly returns, due dates, payments, and refunds. Payments are made through regular payment channels.

Tax types not covered by the Tax Account system are income tax, real estate tax, inheritance tax, gift tax, forestry fees, and transfer tax. It is important to note that WHTs are henceforth declared through the Tax Account system.

Other issues

Company restructurings

In accordance with the EC directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different EU member states, it is possible to carry out the said restructurings tax neutral, if statutory conditions are met. In cross-border situations, both parties should be resident in the European Union. The principal of going concern is applied in taxation (i.e. the receiving company receives the assets with the values the transferring company had for those assets in its taxation).

Significant developments

New French Financial Transaction Tax

The first amended Finance Act for 2012 introduced a financial transaction tax (FTT). The FTT applies to transactions consisting of acquiring equity securities or similar securities. This also includes instruments giving access to capital or voting rights in the company and includes securities issued under foreign law.

These transactions will be in the scope of the FTT if the following criteria are met:

- foresaid securities are issued by listed companies that have their head office in France and whose market capitalisation exceeds 1 billion euros (EUR) on 1 January of the year during which the transfer occurs
- foresaid securities are listed on a regulated market
- the acquisition of the above specified French listed equity securities arises from a direct sale, the exercise of a physically settled option, a forward sale with physical delivery, an exchange, or an acquisition of said securities as consideration for a capital contribution, and
- the transactions result in a transfer of ownership of said securities for consideration.

The FTT does not apply, in particular, in the following situations: primary market, clearing house/central depository, market making activities, intra-group transaction, and temporary transfers.

The FTT applies to securities issued by entities that have their registered head office in France, regardless of whether the transaction is executed inside or outside France.

The tax amounts to 0.1% of the acquisition price of the shares and is due by the financial intermediary that has executed the purchase order or the custodian, irrespective of its place of establishment.

Date of implementation: acquisitions made as from 1 August 2012 will be subject to the FTT.

Transfer taxes on the disposal of listed shares

Finance Act for 2012

Article 3 of the Finance Act for 2012 has introduced new provisions regarding transfer taxes. Amongst others, the new Finance Act has amended the provisions regarding the disposal of listed shares. The new provisions are applicable to transfers realised as of 1 January 2012.

France

This Article removed the transfer duties cap (EUR 5,000) applicable to the sale of shares of French companies and introduced the following new rates:

- 3% for the portion of the value below EUR 200,000.
- 0.5% for the portion of the value between EUR 200,000 and EUR 500 million.
- 0.25% for the portion of the value above EUR 500 million.

The Finance Act extended the territorial scope of this tax to all sales of listed shares issued by listed companies having their head office in France and that are documented by a written deed, irrespective of whether that deed is executed in France or outside of France.

The Finance Act introduced specific tax exemptions to existing ones, notably share buy-backs by the issuing company, transfer of shares in companies placed under a safeguard or receivership procedure, sale of shares between companies that are members of the same tax consolidated group, and share-for-share exchanges that fall within the scope of roll-over relief under the EU Merger Directive, as implemented in France.

Amended Finance Act for 2012

The French Parliament finally decided to maintain the regime amended in December 2011 but has reduced the rate applicable to listed shares to 0.1% and let the cap of EUR 5,000 be removed.

The territorial scope of the transfer duties is unchanged.

Several exemptions were added to the list of transactions that are not subject to transfer duties:

- Transactions subject to the FTT.
- Repurchase by companies of their own shares intended to be sold to the subscribers of a company employee saving plan.
- Transactions between companies in the same group within the meaning of article L233-3 of the French Commercial Code.
- Transfer of ownership resulting from a merger, a contribution, or a spin-off made under the provisions of article 210 A and 210 B of the French Tax Code and acquisition shares of a company by its employees.

Conversely, some share-buy-back operations will no longer benefit from the exemption provided by the Finance Act for 2012.

The changes introduced by the Amended Finance Act for 2012 will be applicable to sales realised as of 1 August 2012.

The text as amended by Finance Act for 2012 is applicable until then.

Temporary corporate income tax (CIT) surcharge

Article 30 of the fourth amended Finance Act for 2011 introduced a new CIT surcharge of 5%.

This tax is applicable to companies that (i) are liable to CIT and (ii) have a turnover higher than EUR 250 million.

Regarding French tax groups, the turnover to be used corresponds to the aggregate of the turnover of each company member of the tax group.

The amount of the contribution is determined by applying a rate of 5% to the foresaid tax base.

The global CIT rate is therefore raised to 36.10%.

This temporary tax is applicable to fiscal years ending on or after 31 December 2011 until 30 December 2013.

Corporate tax losses

The second amended Finance Act for 2011 has restricted the mechanism to use corporate tax losses.

The new rules regarding tax losses are applicable starting from fiscal years ending on 21 September 2011.

Carryforward of tax losses

The new provisions set out that tax losses carried forward are available to offset the first EUR 1 million of taxable profits arising in future periods and 60% of taxable profits in excess of this.

Carryback of tax losses

Tax losses will now only be available for carryback to the fiscal year immediately preceding that in which the losses arise and up to a maximum of EUR 1 million. Any unused surplus will be carried forward and used as set out above. In addition, the election to carry back tax losses must be filed prior to the deadline for submission of the tax return for the loss-making period.

Tax groups

The overall tax losses of a French tax group, as well as pre-election tax losses of the individual members of the group will be attributed, whether carried forward or carried back, in the same manner and within the same limits as those set out above.

New limitation on interest expense deductibility

In accordance with Article 40 of the fourth amended Finance Act for 2011 (i.e. 'Carrez Amendment'), interest expenses incurred by a French company for the acquisition of participation or shareholding acquisitions will not be deductible for CIT purposes if the French acquiring company is not in a position to demonstrate that it actually:

- makes decisions relating to the acquired participation and
- exercises an actual control or influence over the participations.

The purpose of the legislation is to prevent the interest deduction for the participation acquisition by a French entity when the acquired participation is effectively managed outside of France.

This new rule will not apply where:

- the total fair market value of the participations owned by the French acquiring company does not exceed EUR 1 million
- the participation acquisition has not been financed by debt at the level of the French acquiring company or at the level of a company of the same group, or
- the debt-to-equity ratio of the group is equal to or higher than the acquiring company's debt-to-equity ratio.

France

Transfer taxes on the disposal of shares in real estate companies

According to the Article 5 of the Finance Act for 2012, in case of disposal of shares held in real estate companies, the taxable basis for transfer tax purposes is equal to the fair market value of the real estate assets or rights reduced by the debt contracted for the acquisition of such assets or rights.

Other kinds of debts are not taken into account to compute the taxable basis of the transfer tax.

Capital gains and losses on shares sold to a related company

In accordance with the Article 41 of the amended Finance Act for 2011, capital gains deriving from the disposal of shares held in subsidiaries for less than two years are immediately taxable at the common rate of CIT.

Capital losses deriving from such disposal are not immediately deductible. In such a case, the loss will be deducted if, before a period of two years (as from the date of acquisition by the purchaser):

- the vendor stops being subject to CIT
- the shares are, after a restructuring of the transferee company, held by a company that is not related to the vendor, or
- the shares stop being held by the related company (notably further to a new sale).

If no event mentioned above arises within a period of two years starting from the acquisition by the vendor, the capital loss that has not been immediately deducted is treated in accordance with the long-term regime (i.e. the capital loss is therefore not deductible).

Otherwise, the vendor has to join to its corporate tax return a specific form mentioning capital losses that are not immediately deducted.

These new rules apply to fiscal years that open starting from 1 January 2012.

Limitation on royalty deductions

Article 11 of the Finance Act for 2012 restricts the conditions for deducting licensing royalties where the licensor and the licensee are related parties. A full deduction for the royalty expense may only be allowed if the licensee can demonstrate, and properly document, that:

- the use of the licence results in added value for the licensee over the entire licensing period and
- such use is real (i.e. does not consist in an artificial scheme).

Turnover taxes

Increase of the common rate of 19.6% to 21.2%

As of 1 October 2012, the common rate of 19.6% will be increased to 21.2%.

Introduction of a second reduced rate of 7%

According to Article 13 of the amended Finance Act for 2011, a second reduced rate of 7% is applicable, as of 1 January 2012, to most products formerly subject to a turnover tax rate of 5.5% (i.e. transport of persons, sales of certain kinds of medicines, book sales, etc.).

The following products remain subject to the rate of 5.5%:

- Alimentary products.
- Subscription to gas and electricity (under certain circumstances).
- Products and services provided to disabled persons.

Contributions on certain beverages containing added sugar or synthetic sweeteners

Articles 26 and 27 of the Finance Act for 2012 introduced new contributions on (i) beverages containing added sugar and (ii) drinks containing artificial sweeteners.

The amount of each of these contributions is EUR 7.16 per hectolitre.

F

.....
Taxes on corporate income

France levies CIT at a rate of 33.33%.

A resident company is subject to CIT in France on its French-source income. In that respect, income attributable to foreign business activity (if there is no treaty in force between France and the relevant foreign country) or to a foreign permanent establishment (PE) (if a tax treaty applies) is excluded from French tax basis.

A non-resident company is subject to CIT in France on income attributable to French business activity or to a French permanent establishment (PE), as well as on income from real estate located in France.

Social contribution tax

Concerning large size companies, a social contribution tax amounting to 3.3% is assessed on the CIT amount from which a EUR 763,000 allowance is withdrawn.

Temporary CIT surcharge

A CIT surcharge of 5% assessed on the CIT amount is due by companies whose turnover exceeds EUR 250 million.

This temporary surcharge is applicable to fiscal years ending on or after 31 December 2011 until 30 December 2013.

Patent box regime

Under certain conditions, income derived from the sale or license of patents or patentable inventions is taxed at a reduced 15% rate.

Capital gains

A reduced tax rate of 15% applies to certain capital gains. *See Capital gains in the Income determination section for more information.*

Local income taxes

No tax is levied on income at the regional or local level.

France

Corporate residence

France is defined as metropolitan France (excluding Monaco, but including the continental shelf), Corsica, and the overseas departments (French Guyana, Guadeloupe, Martinique, Reunion).

As a general rule, a resident company is a company that is incorporated under French commercial laws.

Permanent establishment (PE)

The notion of PE is not defined by the French Tax Code and has been specified by a case law of the French Administrative Supreme Court (i.e. '*Conseil d'Etat*'). The notion of PE refers to an enterprise exploited in France that can be materialised in one of the three following situations:

- Business activity conducted through an establishment, that is, a fixed business installation operating with some degree of autonomy (e.g. a branch, sales office, etc.).
- Business conducted in France by a dependant agent.
- Existence of a complete commercial cycle in France.

Other taxes

Turnover taxes

Turnover taxes are assessed on goods sold and services rendered in France, and operate much like a value-added tax (VAT). The normal rate is 19.6% (increased to 21.2% as of 1 October 2012). Sales of certain kinds of medicines, transports of persons, and sales of books are taxable at a 7% reduced rate. Food products, subscription to gas and electricity (under certain circumstances), and products and services provided to disabled persons are taxable at a 5.5% rates. Other specific sales and services are taxable at a 2.1% reduced rate. Exports and certain specific services invoiced to non-French residents are zero-rated.

Business-to-business (B2B) suppliers of services are taxable at the location of the customer and not at the location of the supplier. For business-to-consumer (B2C) suppliers of services, the place of taxation is where the supplier is established.

Turnover taxation applies only to taxable persons, partly taxable persons, and non-taxable legal persons that are registered for turnover taxes.

Specific turnover taxation rules apply to leases of transportation equipment; cultural, arts and sports services; electronic and telecommunication services; and transportations of goods.

Real estate tax

All properties located in France are subject to a 3% real estate tax. The tax is assessed annually on the fair market value of the real estate, in proportion to the direct or indirect interest held. All entities in the chain of ownership are jointly liable for the payment of the tax.

Automatic exemptions apply in three situations. First, to entities whose French real estate assets represent less than 50% of their total French assets. Second, to entities listed on a regulated market whose shares, units, or rights are significantly traded on a

regular basis. Third, to entities having their registered office in France, in a European Union (EU) member state, or in a country that has concluded a double tax treaty (DTT) with France providing for an administrative assistance or a non-discrimination clause, where:

- their direct or indirect interest in the French real estate is less than either EUR 100,000 or 5% of the fair market value of the French real estate
- they are pension funds or public charities recognised as fulfilling a national interest whose activities justify the need to own French real estate, or
- they are non-listed French real estate funds (*société de placement à prépondérance immobilière à capital variable* [SPPICAV] or *fonds de placement immobilier* [FPI]) or foreign funds subject to equivalent regulations.

Where an automatic exemption does not apply, a claim may be submitted for conditional exemption.

Territorial economic contribution

The territorial economic contribution (*Contribution Economique Territoriale* or CET) is comprised of two different taxes: the companies' land contribution (*Cotisation Foncière des Entreprises* or CFE) and the companies' added value contribution (*Cotisation sur la valeur ajoutée des entreprises* or CVAE). Although they have a similar scope, the taxes are subject to very different rules.

The CFE tax is based on the rental value of assets that are subject to the real estate tax, excluding movable goods and equipment. For industrial plants, the taxable base is reduced by 30%. There is a specific rental value for each town and an upgrading ratio is set forth at the national level each year.

The CVAE is based on a company's added value. Only taxpayers which are not exempt from the CFE and whose turnover is greater than EUR 152,500 are subject to CVAE. However, tax relief equal to the amount of the tax is provided for companies whose turnover is below EUR 500,000. The tax rate for companies whose turnover ranges from EUR 500,000 to EUR 50 million is assessed according to a progressive scale, which ranges from 0% to 1.5%.

There is an upper ceiling on the added value that applies to the CET. As a consequence, tax relief applies and is equal to the excess of the sum of CFE and CVAE over 3% of the added value of the company.

Registration duties

Registrations duties mentioned hereafter are imposed on the purchaser. However, the seller may be liable for these duties in case of non-settlement by the purchaser.

Transfer of goodwill

The transfer of goodwill is subject to a registration duty at a rate of 3% on the part of the transfer price amounting from EUR 23,000 to EUR 200,000 and at a rate of 5% on the part exceeding EUR 200,000.

Transfers of shares

Regime applicable until 31 December 2011

Until 31 December 2011, the transfer of shares of *Société anonyme* (SAs, which are corporations) and *Société par Actions Simplifiées* (SASs, which are simplified

France

corporations) was subject to registration duty at a rate of 3%, with a maximum of EUR 5,000 per transfer.

Regime applicable as of 1 January 2012 until 1 August 2012

The transfer duties cap (EUR 5,000) applicable to the sale of shares of French companies is removed, and the following new rates are introduced:

- 3% for the portion of the value below EUR 200,000.
- 0.5% for the portion of the value between EUR 200,000 and EUR 500 million.
- 0.25% for the portion of the value above EUR 500 million.

The territorial scope of this tax is extended to all sales of listed shares issued by listed companies having their head office in France and that are documented by a written deed, irrespective of whether that deed is executed in France or outside of France.

Specific tax exemptions are introduced, notably share buy-backs by the issuing company, transfer of shares in companies placed under a safeguard or receivership procedure, sale of shares between companies that are members of the same tax consolidated group, and share-for-share exchanges that fall within the scope of roll-over relief under the EU Merger Directive, as implemented in France.

Regime applicable as of 1 August 2012

As of 1 August 2012, the transfer of shares will be subject to registration duty at a rate of 3% with no cap.

The transfer of listed shares recorded by a deed will be subject to registration duty at a rate of 0.1%.

Several exemptions are added to the list of the transactions that are not subject to transfer duties:

- Transactions subject to the FTT.
- Repurchase by companies of their own shares intended to be sold to the subscribers of a company employee saving plan.
- Transactions between companies in the same group within the meaning of article L233-3 of the French Commercial Code.
- Transfer of ownership resulting from a merger, a contribution, or a spin-off made under the provisions of article 210 A and 210 B of the French Tax Code and acquisition shares of a company by its employees.

Conversely, some share-buy-back operations will no longer benefit from the above mentioned exemption applicable as of 1 January 2012.

Transfer of interest or quotas in legal entities whose capital is not divided into shares

The transfer of interests or quotas in legal entities whose capital is not divided into shares (e.g. *Société à responsabilité limitée* or SARLs, which are a form of private limited liability corporate entity) is subject to a registration duty of 3%.

Transfer of shares in non-quoted real estate companies

The transfer of shares in non-quoted companies whose assets consist principally of immovable property is subject to a registration duty of 5%. According to Article 5 of the Finance Act for 2012, in case of disposal of shares held in real estate companies, the taxable basis for transfer tax purposes is equal to the fair market value of the real estate assets or rights reduced by the debt contracted for the acquisition of such assets

or rights. Other kinds of debts are not taken into account to compute the taxable basis of the transfer tax.

Transfer of real estate

The sale of land and buildings is subject to registration duty at a rate of 5.09% on the transfer price, including expenses.

Systemic risk tax

As of 2011, a bank tax known as a systemic risk tax has been implemented to prevent excessive risk behaviour by banks. The new tax is payable by certain financial institutions (including credit institutions).

It should be noted that 'fund' entities (e.g. hedge funds or securitisation vehicles) are outside the scope of the tax.

French banks are subject to the bank tax on their worldwide business activities. The equity requirements that are used as the taxable basis for the calculation of the bank tax are calculated on a consolidated basis. Therefore, institutions that fall within the scope of the tax and that belong to a consolidated group are not subject to the tax on an individual basis. Where they are not part of such a group, institutions pay a contribution calculated on their individual position. The taxable basis is made up of the minimum equity required of the institution, as set out by the Prudential Control Authority to meet reserve ratio requirements in accordance with Basel II standards and specified during the previous calendar year.

The rate of the bank tax amounts to 0.25% of the taxable basis, and any amounts paid in that respect will be deductible for CIT purposes.

A tax return must be filed by 30 June every year, and the tax due must be settled at the same time.

Subject to the principle of reciprocity, it should be noted that taxpayers, for which the registered office or the group parent company is located in a country that has enforced a similar tax on systemic risk, can benefit from a tax credit. This tax credit can be used to settle the tax due or can be reimbursed.

Contributions on certain beverages containing added sugar or synthetic sweeteners

Articles 26 and 27 of the Finance Act for 2012 introduced new contributions on (i) beverages containing added sugar and (ii) drinks containing artificial sweeteners.

The amount of each of these contributions is EUR 7.16 per hectolitre.

Branch income

Tax rates on branch profits are the same as on corporate profits. As a principle, branch profits are deemed to be distributed to the head office. A withholding tax (WHT) is levied on French branches of non-resident non-EU corporations at the rate of 30%, or a reduced tax treaty rate (e.g. for the United States, 5%) on net profits. Refund (limited or full) of tax may be claimed to the extent that the taxable amount exceeds the dividend(s) actually distributed by the foreign corporation during the 12 months following the close of the fiscal year concerned, or to the extent the dividends are distributed to residents of France.

France

Profits realised in France by non-resident corporations whose head offices are located in an EU country are not subject to branch WHT, provided that certain conditions are met (e.g. effective head office in an EU country or non-resident corporation subject to corporate taxation).

Income determination

Inventory valuation

Inventories must be valued at the lower of cost or market. Cost must be determined in accordance with the first in first out (FIFO) or the average-cost method. The last in first out (LIFO) method is prohibited.

Capital gains

Capital gains generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%, regardless of the duration of ownership of the assets sold.

However, a reduced rate of 15%, increased by the social contribution tax, is applied to capital gains on the disposal of patents or patentable inventions, as well as on income from the licensing of patents or patentable inventions.

Gains on the sale of shares in subsidiaries held for at least two years benefit from significant relief (90% of such capital gains are excluded from CIT, with the remaining 10% portion being taxed at the standard 33.33% rate).

Capital gains and losses on shares sold to a related company

In accordance with the Article 41 of the amended Finance Act for 2011, capital gains deriving from the disposal of shares held in subsidiaries for less than two years are immediately taxable at the common rate of CIT.

Capital losses deriving from such disposal are not immediately deductible. In such a case, the loss will be deducted if, before a period of two years (as from the date of acquisition by the purchaser):

- the vendor stops being subject to CIT
- the shares are, after a restructuring of the transferee company, held by a company that is not related to the vendor, or
- the shares stop being held by the related company (notably further to a new sale).

If no event mentioned above arises within a period of two years starting from the acquisition by the vendor, the capital loss that has not been immediately deducted is treated in accordance with the long-term regime (i.e. the capital loss is therefore not deductible).

Otherwise, the vendor has to join to its corporate tax return a specific form mentioning capital losses that are not immediately deducted.

These rules apply to fiscal years that open starting from 1 January 2012.

Capital gains of non-residents

As a general rule, non-resident companies are not taxable in France regarding capital gains which derive from the disposal of French assets unless these are part of a PE.

There are two main exceptions to this principle:

- Capital gains derived from the disposal of real estate assets located in France or derived from the disposal of French real estate non-listed companies are subject in France to WHT at a 33.33% rate.
- Capital gains deriving from the disposal of shares held in a French company subject to CIT are subject in France to WHT at a 19% rate in the specific case where the seller has owned, at any point in time during the five years preceding the sale, at least 25% of the rights in the profits of the French company.

Note that in the specific case where the non-resident company is located in a non-cooperative state or territory (NCST), all capital gains deriving from the disposal of French assets are subject to WHT in France at a specific rate of 50%.

Dividend income

Dividends generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%.

Inter-company dividends

For information on the taxation of inter-company dividends, see Participation exemption regime in the Group taxation section.

Interest income

Interest income generally is taxable as ordinary income and subject to CIT at the standard rate of 33.33%.

Foreign income

Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches and foreign PEs. Other foreign income is not taxable until actually repatriated to French resident corporations. As a result, undistributed income of foreign subsidiaries is not taxable. The only exception to the territoriality principle is provided by Article 209 B of the Tax Code, known as the Controlled Foreign Company (CFC) rules (*see the Group taxation section for more information*).

Deductions

Depreciation

The depreciation of fixed assets has to be carried out component by component. The components of a fixed asset have to be depreciated separately according to their own lifetime.

Declining-balance depreciation is allowed for certain new and renovated assets whose useful life is in excess of than three years.

For assets bought or manufactured between 4 December 2008 and 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.75, if the useful life of the asset is three or four years
- 2.25, if the useful life of the asset is five or six years, or
- 2.75, if the useful life of the asset is more than six years.

For assets bought or manufactured after 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

France

- 1.25, if the useful life of the asset is three or four years
- 1.75, if the useful life of the asset is five or six years, or
- 2.25, if the useful life of the asset is more than six years.

Goodwill

Under French tax rules, goodwill (e.g. *clientele*, trademarks) cannot be amortised.

Research and development (R&D) and software expenses

Concerning R&D and software expenses, a business may elect to immediately deduct costs incurred in R&D of software or to amortise their cost straight-line over a maximum period of five years.

The cost of acquiring software may be written off straight-line over 12 months.

The cost of patents acquired can be amortised over a five years period.

Interest expenses

In principle, interest expenses are tax deductible.

Thin capitalisation

Please see comments regarding thin capitalisation in the Group taxation section.

Carrez Amendment

In accordance with Article 40 of the fourth amended Finance Act for 2011 (i.e. ‘*Carrez Amendment*’), interest expenses incurred by a French company for the acquisition of participation or shareholding acquisitions will not be deductible for CIT purposes if the French acquiring company is not in a position to demonstrate that it actually:

- makes decisions relating to the acquired participation and
- exercises an actual control or influence over the participations.

The purpose of the legislation is to prevent the interest deduction for the participation acquisition by a French entity when the acquired participation is effectively managed outside of France.

This new rule will not apply where:

- the total fair market value of the participations owned by the French acquiring company does not exceed EUR 1 million
- the participation acquisition has not been financed by debt at the level of the French acquiring company or at the level of a company of the same group, or
- the debt-to-equity ratio of the group is equal to or higher than the acquiring company’s debt-to-equity ratio.

Bad debt

Bad debts that are definitively non-recoverable are treated, from a tax point of view, as losses.

Under certain conditions, a tax-deductible reserve can be established for debts whose collection is uncertain.

Charitable donations

Charitable donations made by companies to certain foundations or societies are deductible up to 60% of their amount (limited to EUR 5,000 of the turnover before taxes).

Taxes

Most taxes, including unrecoverable turnover taxes, registration duties, and CET, are deductible. The major exceptions are CIT and tax penalties.

Corporate tax losses**Carryforward of tax losses**

Tax losses carried forward are available to offset the first EUR 1 million of taxable profits and 60% of taxable profits in excess of this.

Carryback of tax losses

Tax losses are available for carryback to the fiscal year immediately preceding that in which the losses arise and up to a maximum of EUR 1 million. Any unused surplus will be carried forward and used as set out above. In addition, the election to carry back tax losses must be filed prior to the deadline for submission of the tax return for the loss-making period.

Tax groups

The overall tax losses of a French tax group, as well as pre-election tax losses of the individual members of the group will be attributed, whether carried forward or carried back, in the same manner and within the same limits as those set out above.

Payments to foreign related parties

Payments to foreign affiliates are allowed, as long as they meet the arm's-length test. If they do not, Article 57 of the French Tax Code provides that income directly or indirectly transferred to the foreign related parties, through either the increase or the reduction of the purchase or sales price of goods and services, or through any other means, must be added back to taxable income. For the purpose of this provision, foreign related parties are defined as parent subsidiaries or sister companies.

Where the payments are made to companies located in a country with a privilege tax regime, the French taxpayer must prove that the transaction is bona fide and that the amount due is not exaggerated (*see the Group taxation section for more information on countries with a privilege tax regime*).

Royalties

Article 11 of the Finance Act for 2012 restricts the conditions for deducting licensing royalties where the licensor and the licensee are related parties. A full deduction for the royalty expense may only be allowed if the licensee can demonstrate, and properly document, that:

- the use of the licence results in added value for the licensee over the entire licensing period and
- such use is real (i.e. does not consist of an artificial scheme).

France

Group taxation

Tax consolidation regime

French corporations and their 95% owned domestic subsidiaries may elect to file one single tax return, thus allowing offset of losses of one group corporation against the profits of a related corporation. CIT is then levied on the aggregate income after certain adjustments for intra-group provisions (e.g. debt waivers, dividend distributions) have been made.

When shares in a company that will be integrated into the group are acquired by a group company from individuals or legal entities that control this group, either directly or indirectly, a portion of the group's overall financial expense incurred by the members of the group is progressively added back to the group's taxable income on a straight-line basis over a nine year period.

A French subsidiary can be included in a tax consolidated group even if its parent company is not located in France. However, at least 95% of the share capital of the foreign company must be held, directly or indirectly, by the French company that is head of the tax consolidated group. In addition, the foreign company must be subject to CIT, be located in the European Union or in a member state of the European Economic Area (EEA) whose tax treaty with France includes a mutual administrative assistance clause to fight tax fraud and tax evasion, and hold 95% of the lower-tier subsidiary's shares.

A PE of a foreign company subject to French CIT can be a member of a French tax consolidated group if the shares of the foreign company are held by other French companies, which are members of the consolidated group.

Provisions on the tax neutrality of intra-group transaction flows (e.g. dividends, provisions, waivers of debts, interest, and capital gains on the sales of shares) have been modified to treat tax consolidated groups with an intermediate foreign company the same as other tax consolidated groups.

Allocation of the tax charge within a tax consolidated group

In an important decision dated 12 March 2010 ('Wolseley Centers France'), the French Supreme Court disagreed with the French Tax Authorities by ruling that the tax charge of the group can be freely allocated between members of the consolidated tax group.

Following this decision, group companies are free to enter into a tax consolidation agreement stating the conditions for the allocation of the group tax charge or, where applicable, the tax savings arising from the group arrangement.

The Supreme Court concludes that since the terms of an agreement to allow a re-allocation taking into account the specific results of each of the group companies, the terms of this re-allocation cannot be regarded as an indirect subsidy. However, this allocation should not undermine the corporate benefit of each group member nor the minority shareholders rights otherwise this will result in an abnormal act of management.

Underpriced sale of asset between two entities of a same tax consolidated group

In a decision dated 10 November 2010 ('Société Corbfi'), the French Supreme Court has specified that an underpriced sale of an asset between two members of the same tax

group must be neutralised at the group level only after the computation of the entities results on a standalone basis.

First, on a standalone basis, the seller has to add back the advantage given to the buyer (i.e. the difference between the fair market value and the amount paid) and the buyer adds back this advantage as if it was a dividend. Second, when reprocessing the different entities results, the advantage added back by the buyer has to be neutralised at the group level.

Other group consolidation systems

Other group consolidation systems were available with the prior authorisation of the Ministry of Finance, as follows:

- *Bénéfice consolidé*: The 50% owned subsidiary consolidation system allows the combined reporting of profits and losses of all controlled branches, subsidiaries, and partnerships, whether French or foreign.
- *Bénéfice mondial*: Worldwide tax consolidation allows French corporations to include in their French tax return the results of their foreign activities carried out by branches.

Those regimes no longer apply regarding fiscal years that end as of 6 September 2011.

Participation exemption regime

French parent companies (i.e. companies incorporated in France and holding qualifying shares that represent at least 5% of the issued capital of subsidiaries, French or foreign) have the option of excluding 95% of the subsidiaries' net dividends from CIT (5% of charges and expenses must be added back to the parent company's taxable results). The French parent-subsidiary regime extends to certain shares without voting rights. There is no formal commitment to hold the shares for at least two years, and companies can benefit from this regime from the acquisition date of the shares. However, the obligation remains to hold the shares over this period of time. Certain shares of listed real estate companies are not eligible to the French parent-subsidiary regime.

Regarding fiscal years ending on or after 31 December 2010, the taxation of dividends received by a parent company from its subsidiary cannot be capped at the amount of the expenses actually incurred by the parent company. Thus, the tax liability will be equal to 5% of the dividends received, tax credits included.

As of 1 January 2011, the French parent-subsidiary regime is no longer applicable to dividends paid from entities located in an NCST.

Distribution followed by absorption or sale of subsidiary

The rules abolish the possibility for a company to accumulate the exemption of dividends received from its subsidiaries (under the participation exemption regime or the tax consolidation regime) and the deduction of a loss in value resulting from the dividends' distribution due to previous distributions at the time of the securities exchange or sale of shares.

In principle, the subsidiary's shares must be kept by the parent company for at least two years in order to benefit from the participation exemption regime. However, some operations lead to a break of the two-year holding period. In that case, the exchanged shares are deemed withheld until the sale of the securities received in exchange.

France

For fiscal years ending after 31 December 2010, the exchanged shares will be deemed kept for the application of the participation exemption regime only if the gain or loss is not taken into account in the result of that exchange. If the gain or loss is included in the result, the dividends received may not benefit from the participation exemption regime and will be taxed.

Transfer pricing

Transfer pricing documentation

Large corporations located in France (i.e. with annual turnover or amount of gross assets in excess of EUR 400 million) are required to provide documentation containing general information regarding the relevant group of companies, including main activities, operational and legal structures of the related companies, functions performed and risks borne, main intangible assets, and group transfer pricing policy, amongst others.

Individual advanced pricing agreements (APAs)

APAs are available for taxpayers only on the basis of international agreements entered into in accordance with Article 25 of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention. Currently, taxpayers are allowed to enter into APAs with the French tax authorities on a unilateral basis. In practice, taxpayers are entitled to submit their transfer pricing policy to the French tax authorities. Agreement of the tax authorities to the APA precludes a later challenge.

Thin capitalisation

Under current rules, the tax deduction of interest paid by a French company to its foreign controlling shareholders is subject to the following three restrictions:

Interest rate limitation

Under the amended Article 212 of the French Tax Code, tax deduction of interest paid to related parties is limited to the higher of (i) the average annual interest rate applied by credit institutions to companies for medium-term variable rate loans or (ii) the interest that the borrowing company could have obtained from independent banks under similar circumstances. This rate is 3.99% for financial years ending on 31 December 2011. Having passed this interest rate test, French indebted companies have to pass a second test: the debt ratio.

Debt ratio

That part of interest paid to related parties which is deductible under the rate limitation test is disqualified if it exceeds all of the three following limitations during the same financial year:

- Interest relating to financing of any kind granted by related parties, within the limit of 1.5 times the net equity of the borrower.
- 25% of adjusted net income before tax (*'résultat courant avant impôt'*, defined as the operating income, increased by certain items).
- Interest income received from related parties (i.e. there is no limitation on thin capitalisation grounds when the borrowing company is in a net lending position vis-à-vis related entities).

The portion of the interest which exceeds the three above limits is not deductible, except if it is lower than EUR 150,000.

Carryforward of excess interest

That part of the interest which is not deductible immediately by the borrowing company can be carried forward, without time limit, for relief in subsequent years, provided there is an excess capacity during such years. The amount in excess is, however, reduced by 5% each year, from the second financial year following the financial year in which the interest expense has been incurred.

Exceptions

The thin capitalisation rules do not apply to interest payable by banks and credit institutions, and also to certain specific situations such as interest in connection with intra-group cash pools or with certain leasing operations.

The thin capitalisation rules do not apply if the French indebted company can demonstrate that the debt-to-equity ratio of the worldwide group to whom it belongs exceeds its own debt-to-equity ratio.

Deductibility is also facilitated within a French tax consolidated group. The thin capitalisation rules apply to each company member of the group taken on a stand-alone basis. Any excess interest incurred by such company is, however, not carried forward by it. Instead, it is appropriated at group level.

Extension of the thin capitalisation mechanism to loans granted by related parties

In the specific case where the repayment of a loan granted by a third party (including banks) is guaranteed by a related party or by a third party whose commitment is itself secured by a related one, then the proportion of interest that is payable on that part of the loan that is secured in this way is potentially subject to thin capitalisation rules.

The provisions will not apply where the loan:

- takes the form of a bond issued by way of a public offering or under equivalent foreign regulations, although this excludes private placements
- is guaranteed by a related party solely by way of a pledge of shares in the debtor, security over the debtor's receivables, or shares in a company directly or indirectly owning the debtor so long as the holder of such shares and the debtor are members of the same tax group; as a result, this exception will not apply where a foreign company grants a pledge of shares in its French subsidiary to guarantee the bank loan granted to it
- is obtained in the context of a refinancing to allow the debtor to complete the mandatory repayment of a pre-existing debt, which is required as a result of a direct or indirect takeover of the debtor (allowed up to the amount of the loan principal repaid and accrued interest to that date), or
- has been obtained prior to 1 January 2011 in connection with an acquisition of securities or the refinancing of such acquisition debt.

Controlled foreign companies (CFCs)

The CFC rules provide that:

- French corporations are required to include in their taxable income profits made by their more than 50% owned foreign subsidiaries and branches. The 50% holding is determined by direct and indirect control of shares and voting rights.
- The minimum holding threshold has to be reduced to 5%, if over 50% of the share capital of the foreign entity is indirectly held through French or foreign companies controlled by the French parent company. However, if the shares in the foreign entity

France

are listed on a regulated market, the French tax authorities will have to demonstrate that the French parent company, together with other entities holding shares in such foreign entity, is acting in concert.

- The CFC rules are only applicable if the foreign legal entity or PE in which the French company owns the requisite percentage of shares is in a country with a privileged tax regime. A privileged tax regime is defined by the French tax code as a tax regime in which a foreign jurisdiction subjects taxable income of a foreign entity to at least 50% or lower of the income tax liability which would be incurred in France, had the activity of the foreign entity been performed in France.
- Profits of the foreign entity which fall under the CFC rules are no longer taxed separately. They are now aggregated with the other taxable profits of the French parent company. Consequently, any tax losses incurred by the French parent company may be offset against the foreign entity's profits.
- The French parent company can avoid the application of the CFC rules if it demonstrates that the foreign entity carries an effective trading or manufacturing activity, conducted from its country of establishment or registered office. Furthermore, the CFC rules, in principle, are not applicable with respect of foreign branches or subsidiaries located in another EU country. However, this exception is not applicable if the French tax authorities can demonstrate that the foreign entity located in another EU country constitutes an artificial arrangement, set up to circumvent French tax legislation. This concept is similar to the 'abuse of law' concept, although it does not have all the same characteristics.

Tax credits and incentives

R&D tax credit

The R&D tax credit is determined on the basis of the eligible R&D expenses incurred during the calendar year.

Currently, the R&D credit equals 30% of the R&D eligible expenses incurred during the year, up to EUR 100 million in eligible R&D expenses, and 5% beyond this amount. In addition, eligible R&D expenses incurred by the company can be included in the basis for computation of the tax credit at up to 100% of that amount.

Moreover, the 30% 'standard' rate is increased to 40% and 35% for the first and the second year, respectively, during which the company incurs eligible R&D expenses, or after the expiration of a period of five consecutive years during which the company did not benefit from the tax credit, provided, in both cases, that the concerned company is not affiliated with another company which benefited from the R&D tax credit within the same time period.

The tax code classifies eligible technical and scientific research operations in three areas: fundamental research, applied research, and experimental development.

The eligible expenditures include the following:

- Tax deductible depreciation expenses relating to fixed assets, created or acquired newly, assigned to eligible R&D works/projects, including patents acquired.
- Costs relating to staff qualifying as scientists and/or engineers (staff costs relating to 'young graduate doctors' are retained at up to 200% during the 24 months following their hiring by the company).
- Expenses resulting from outsourced R&D works/projects.

- Expenses incurred for patent registration and/or in connection with the defence of patents.
- Expenses relating to the monitoring of technical developments.
- Premiums paid in connection with insurance contracts relating to the legal defence of patents.

Operating costs are now taken into account by retaining 50% of the R&D staff costs plus 75% of the depreciation on the assets allocated to the research. Also, spending on outsourcing to private research organisations now is included in the limit of three times the total amount of other research expenses qualifying for the tax credit.

The use of patented or patentable technologies in manufacturing

Companies that are involved in the manufacturing of products in France containing patented or patentable technologies, or companies that incorporate such technologies into goods that are manufactured in France, benefit from a reduced effective rate of tax.

In the case of a licensing arrangement between connected French companies, the licensor will benefit from a reduced 15% tax rate on royalty income, whereas the licensee company will benefit from a tax deduction at 33.33%.

In order for a licensee company to benefit from full deductibility for royalties paid, the rules require that the licensee company 'effectively exploits' the rights available to it.

Inbound investment incentives

No particular incentives are available to foreign investors in France. However, the government offers a comprehensive programme of tax incentives and development subsidies to encourage investment in underdeveloped areas.

Capital investment is encouraged through the declining-balance method of depreciation as well as through exceptional depreciation for certain capital expenditures.

Withholding taxes

Payments to resident corporations and individuals are not subject to WHT.

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

Explanation of columns

Column 2: Individuals and companies not qualifying as parents are subject to the WHT rates for dividends as indicated in this column.

Columns 3 and 4: Column 3 indicates the WHT rate for dividends paid to a foreign 'parent' company. To be considered as a parent company, the foreign company must hold a specified percentage of the French company's share capital or voting rights. These minimum percentages range from 0% to 50%, as indicated in Column 4, and certain other conditions must be met (*see each treaty*). If no percentage is indicated, either no minimum shareholding is required, or the tax treaty does not reduce the WHT rate of 30%.

No WHT is levied on dividends paid to an EU parent company by a French company that is subject to CIT, provided all the following conditions are met:

- The EU parent company has held a minimum percentage of the share capital of the distributing company, directly and continuously, for at least two years. As of 1 January 2009, the participation required is 10%.
- The EU parent company is the effective beneficiary of the dividends.
- The EU parent company has its effective seat of management in an EU State and is not deemed to be domiciled outside the EU under an applicable tax treaty.
- The EU parent company is one of the legal forms enumerated by the relevant Directive.
- The EU parent company is subject to CIT in the member state where it has its effective seat of management.
- There is an anti-avoidance rule.

Column 5: The tax mechanism has been changed so as to exempt the interest from WHT in France except where the interest is paid to a financial institution established in a non-cooperative state or territory (WHT at a rate of 50% applicable). The payer can, however, be exempt if one proves that the main purpose and effect of such a payment is not to take advantage of locating the income in such a jurisdiction.

These provisions apply to income paid as of 1 March 2010. A special provision applies to loans entered into outside of France by French companies and some investments funds prior to this date. Interest paid on these loans and on related loans after 1 March 2010 will continue to be exempt.

France

Column 6: There is no requirement to withhold income tax on royalties paid to EU companies if all the following conditions are met:

- The taxpayer is a French resident company or a French PE of a company resident in another EU member state.
- The recipient of the income is an EU resident company.
- The taxpayer and the recipient are at least 25% associates, which means that either one holds directly 25% or more of the share capital or voting rights in the other, or a third party holds directly 25% or more of the capital or voting rights in them both.

Column 7: WHT is automatically imposed on after-tax profits of a PE unless certain conditions are met. The rate is 25% or the reduced tax treaty rate.

Notes

1. See explanation of Columns 3 and 4.
2. Exceptions where the dividends are excluded from the taxable income of the company which has received the dividends.
3. A rate of 15% is applicable for dividends distributed by certain companies. The dividend WHT rate can be eliminated if the recipient owns 15% or more of the share capital.
4. The 1929-type Luxembourg holding companies are not entitled to any of the benefits of the France-Luxembourg tax treaty.
5. A 25% rate applies if dividends are not included in the income taxed to either corporate or income tax.
6. No WHT applies if dividends are taxable in Morocco.
7. The 5% rate applies to dividends when three conditions are fulfilled, as follows: (1) the effective recipient of the dividends must have invested at least EUR 76,224.51 in the company that pays these dividends; (2) the recipient must be a company liable for corporate tax; and (3) the latter company must be exempt from corporate tax. The rate is 10% when only condition (1) or conditions (2 and 3) are fulfilled. In all other cases, the rate is 15%.
8. An addendum signed on 22 July 1997 modifies the provisions of the French-Swiss tax treaty relating to dividends, interest, and royalties, and provides for the removal of the 5% WHT on profits realised by French PE of Swiss resident companies.
9. The rate indicated applies to Swiss resident companies controlled by Swiss residents.
10. The rate indicated applies to Swiss resident companies that are controlled by non-Swiss residents (non-UE) (Article 11.2.b ii) and meet the conditions of Article 14 of the tax treaty. In the case of column 3, the 15% rate applies to these companies, provided both the recipient and the distributing company are not quoted on a stock exchange. If these conditions are not met, the tax exemption applies.
11. The rate indicated applies to Swiss resident companies controlled by non-Swiss residents but not complying with Article 14 of the tax treaty.
12. The 5% rate applies to gross dividends if the effective recipient is a Ukrainian company that holds directly or indirectly at least 10% of the French company's capital. The rate is 0% if the participation exceeds 50% and EUR 762,245. It is 15% in all other cases.
13. Non-treaty recipients of royalties and management fees are subject to a 33.33% withholding rate. Where a treaty exists, management fees are exempt from WHT unless they are included in the definition of royalties subject to WHT.
14. In France, the WHT is levied on a provisional basis at 25% of the net profit. This amount is reduced to the extent it exceeds the dividends actually paid by the company during the previous 12 months, and the amount of dividends paid to residents of France. Consequently, if the foreign head office undertakes not to distribute dividends in a given year, the after-tax profits of its French branch are not subject to WHT, even when they are transferred abroad.
15. WHT on interest on loans with a contract is 0%, while withholding on other interest is in a range from 15% to 50%. For treaty rates, consult the individual entry in the table.
16. The WHT rate can be 60% for certain securities if the investor's identity is not disclosed.
17. The WHT is levied on the following amount: French net profit divided by the total foreign company net profit, multiplied by the amount of the distribution.
18. The rate of 10% is applicable on royalties for the use of literary, artistic, or scientific works, including films, 25% on royalties for the use of trademarks, and 15% otherwise.
19. No WHT is applicable on a royalty arising from the use of or the right to use literary, artistic, or scientific works (excluding film).
20. WHT is reduced to 6% for royalties paid for the lease of industrial, commercial, or scientific equipment.
21. A rate of 5% (Cyprus) and 10% (Israel) is applicable on royalties paid for the use or the right of the use of films.
22. Profits realised in France by foreign corporations whose head offices are located in a European country are not subject to WHT if certain conditions concerning the foreign corporation are met (effective head office in a European country; foreign corporation subject to corporate taxation).

23. No WHT is applicable on a royalty arising from the use or the right to use literary, artistic, or scientific works.
24. The rate of 25% is applicable on royalties paid for the use of trademarks.
25. No WHT is levied on certain royalties paid in the field of audiovisual techniques.
26. The rate of 15% is applicable on royalties paid for the use of industrial property and trademarks.
27. A rate of 33.33% is applicable on royalties paid for the use of or the right to use films.
28. The rate of 5% is applicable on royalties paid for the use of literary, artistic, or scientific works, excluding films.
29. The rate of 33.33% is applicable on royalties paid for the use of literary and artistic works, including films, and for information concerning commercial experience.
30. No WHT is levied on royalties paid for the use of or the right to use literary or artistic works, excluding films and recordings.
31. No WHT is levied on royalties paid for the use of or the right to use copyrights or films.
32. No WHT is levied on royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.
33. The rate of 20% is applicable on royalties paid for the use of trademarks, 15% for the use of industrial property, and 5% for the use of literary, artistic, or scientific works.
34. The rate of 5% is applicable on royalties for the use of literary, artistic, or scientific works, not including films.
35. The rate of 5% is applicable on royalties for the use or the right to use industrial, commercial, or scientific equipment.
36. The reduced rate is applicable if the beneficial owner is a company (other than a partnership).
37. Voting shares solely.
38. French domestic law decreases the WHT rate from 30% to 21% concerning individuals who are resident in another EU member state, in Iceland and in Norway.
39. See explanation of Column 6.

Anti-avoidance rules applicable to Non-Cooperative States or Territories (NCST)

The French parent-subsidiary regime is not applicable to dividends paid from entities located in an NCST.

WHT on passive income is 55% for transactions with an NCST person or entity. This rate was 50% prior to 1 January 2012.

For French tax purposes, a state or territory is considered non-cooperative if it meets at least one of the following criteria:

- It is not a member of the European Community.
- It has been reviewed and monitored by the OECD Global Forum on Transparency and Exchange of Information.
- It has not concluded at least 12 administrative assistance agreements/treaties that allow a complete exchange of information for tax purposes.
- It has not concluded an administrative assistance agreement/treaty with France.

Payments (e.g. interests, royalties, payments for services) made to an NCST person or entity are, as a general rule, not tax deductible. In addition, it is not possible to offset WHT in France with any foreign WHT borne by the entity located in a NCST.

Moreover, concerning shareholders (individuals and companies) located in a NCST, a tax amounting to 55% is levied on capital gains derived from the disposal of shares in French companies whatever the level of shareholding.

France

Tax administration

Tax returns

Regarding fiscal years that end on 31 December, CIT returns are due by the end of April of the following year.

Payment of tax

Payment of tax is made during the fiscal year by way of four instalments totalling 33.33% of the taxable income of the preceding year. Regarding fiscal years that end on 31 December, final CIT payment is due on 15 April of the following year.

Currently, for companies that have gross income in excess of EUR 500 million, the last down-payment is now assessed on the basis of the estimated taxable income of the present year (in case of significant increase of the taxable profits in comparison with the previous fiscal year). This modification leads to an anticipated payment of CIT.

Late payment interest

For a reassessment after a tax audit, late-payment interest is currently 4.8% per year or 0.4% per month.

Statute of limitation

Regarding CIT, the general statute of limitation expires at the end of the third year following the one that has triggered the tax liability.

Under certain circumstances, the statute of limitation can be extended (e.g. fraud, undisclosed/hidden activity); statute of limitation can also be interrupted (e.g. notification of a notice of reassessment).

The ruling system

To secure the tax status of a situation, foreign companies and individuals can request a private ruling from the French tax authorities as to whether their activities constitute a PE or fixed base.

The French tax authorities have to provide an answer within three months after the receipt of the request. In the absence of response from the French tax authorities within this period of time, the foreign company or individual will be deemed not to have a PE in France.

APAs are also provided by the French tax authorities for transfer pricing purposes.

Other issues

The recent election of a new President is likely to lead to new tax regulations impacting companies operating in France, including changes to existing legislations.

Significant developments

Further to the promulgation of the 2012 Financial Act on 2 January 2012, the following new tax measures have been introduced:

- Possibility for companies investing in the tourism sector to be exempted from corporate income tax (CIT) during the first three years of existence, provided that the amount of the investment equals or exceeds 800 million Central African CFA francs (XAF).
- Possibility to benefit from a 5% tax credit for companies investing in the tourism sector for an amount inferior to XAF 800 million.
- Possibility for companies benefiting from the specific regime applicable to small and medium-sized companies and manufactures to be exempted from CIT during the five first years of existence.

The Financial Act for 2012 also provides new provisions pertaining to the accounting obligations applicable to oil subcontractors as well as some amendments on the provisions of the Gabonese Tax Code, notably the provisions dealing with value-added tax (VAT) rates, VAT deductibility, registration duties, and penalties for late payment of taxes.

Finally, the Financial Act for 2012 provides tax and customs incentive measures for wood and cement industries.

Taxes on corporate income

Subject to the provisions of double tax treaties (DTTs), profits subject to CIT in Gabon are those obtained by companies exploited in Gabon or those relating to operations carried out in this country.

The CIT rate is fixed at 35%.

CIT is assessed on profits minus deductible expenses and charges. Profits are composed of all operations carried out in Gabon by companies during the period of taxation, including notably fixed assets capital gains.

Non-resident companies shall be taxed via withholding tax (WHT) at the rate of 10% for income raised in Gabon if they have no permanent establishment (PE) in Gabon.

In cases where non-resident companies have PE in Gabon, they shall be subject to CIT on the income raised in Gabon via the Gabonese PE.

Gabon

Impôt Minimum Forfaitaire (IMF)

The IMF is a lower limit to the CIT and is calculated as 1% of the global turnover carried out during the fiscal year of taxation. Note that the IMF cannot be less than XAF 1 million, even in the case of a negative turnover.

New companies are exempt from this minimum tax during the first two fiscal years of their existence.

Local income taxes

There are no local government taxes on income in Gabon.

Corporate residence

As a general rule, a resident company is a company that is incorporated under commercial laws in force in Gabon.

Permanent establishment (PE)

From a general treaty perspective, PE designates a permanent business installation through which a company carries out the whole or part of its activity.

The expression 'permanent establishment' notably includes the following:

- Head office.
- Branch.
- Office.
- Plant.
- Workshop.
- Mine, oil or gas shaft, quarry or other place of natural resources extraction.
- Building site or assembly line.

Other taxes

Value-added tax (VAT)

VAT is a cumulative tax levied on the sale of goods and the provision of services rendered or used in Gabon.

There are four rates of VAT:

- Standard rate: 18%, which applies to all transactions unless otherwise provided for by the law.
- Reduced rates:
 - 10%, which applies to manufacturing operations and sales of products mentioned in a limitative list provided by Article 221 of the new Gabonese Tax Code, including mineral water, chicken, and sugar.
 - 5%, which applies to sales and services relating to cement.
- Zero-rate: 0%, which applies to exports and international transports.

Customs duties

Gabon is member of the Central African Economic and Monetary Community (CEMAC), a customs union that comprises countries from Central Africa.

Merchandise entering into the CEMAC customs territory is subject to importation duties registered into the Customs Tariff.

Four customs regimes are available in Gabon, notably one standard regime and three specific regimes (an exemption regime, a temporary admission regime, and a reduced tax regime).

Apart from customs duties, the importation of merchandise in Gabon is subject to the community tax of integration (CCI) at rate of 0.4% and to the Organisation for the Harmonisation of Business Law in Africa (OHADA) withholding (duty) at rate 0.05% of the customs value of the imported merchandise.

Excise duty

Excise duty principally applies to luxury goods, such as alcoholic drinks, perfume and cosmetic products, caviar, salmon, cigars, and cigarettes.

The rates of the excise duty are comprised between 20% and 32%.

Tax on property

Tax on buildings (*Contributions Foncières des Propriétés Bâties* or CFPB) is levied annually at the rate of 15% of the rental value of the building after deduction of 25% for deterioration and maintenance. Tax on non-built property is levied annually at the rate of 25% of the taxable revenue corresponding to 4% to 5% of the rental value or 10% of the purchase value.

Transfer tax

The tax on funds transfer is due on remote transfer operations carried out in Gabon at destination of countries outside the Central Africa Monetary Union (UMAC) countries.

The tax is calculated on the amount of the funds to be transferred except related fees and commissions paid by the giver.

The rate of the transfer tax is 1.5%.

Stamp duty

A stamp duty is levied on all paperwork relating to civil and judicial actions and to documents that could be produced in court as evidence.

All signatories for mutually binding contracts, lenders and borrowers for loans, and ministerial officials who receive or modify deeds announcing unstamped deeds or books are jointly responsible for the payment of stamp duties and fines.

Business licence tax

The business licence tax applies to both individuals and entities, Gabonese and foreign, engaged in a profession, business, or industry in Gabon.

Business licence tax corresponds to a professional tax borne annually. It is deductible from the taxable income for CIT purposes.

The rates of this tax vary according to the profession, business, and location within Gabon territory (this tax may vary between XAF 15,000 and XAF 540,000).

The head of the group of companies is exempted from the payment of the business licence tax.

Gabon

Franchise tax

The franchise tax is a fixed annual duty varying from XAF 10,000 to XAF 500,000, according to the size, nature, and location of the company. Each company that carries on a trade, business, or activity that is not expressly exempted is liable for franchise tax.

Activities that are expressly exempted from franchise tax are those carried out by companies of provident, craftsmen, teachers and professors, lyrical and dramatic artists, farmers, cattle-breeders, fishers, etc.

Registration duties

Registration duties in Gabon are fixed, proportional, or progressive, depending on the nature of the acts and transfers in question.

Tax on insurance premiums

Insurance or annuity agreements made with insurance companies or any other Gabonese or foreign insurer are subject to an annual obligatory tax.

The tax is levied on the sums charged by the insurer and on any accessory payments made to this party by the insured party according to the following rates:

Nature of the policies	Rate (%)
Marine policies	5
Life policies	Exempt
Fire policies	30
Other (e.g. personal liability, transportation)	8
Reinsurance	Exempt

Social security contributions

Employers must contribute to the social security system (National Social Security Fund or CNSS).

The taxable basis for social security contributions is made up of gross salaries including indemnities having the function of a salary and any benefits in kind. However, there is an annual ceiling of XAF 18 million (or XAF 1.5 million per month).

The social security contributions are determined according to the following rates:

Contribution	Rate (%)
Family allowances	8
Industrial accidents (work injuries)	3
Retirement pensions	5
Health evacuation funds	0.6
Medication distribution	2
Hospitalisations	1.5
Total	20.1

Branch income

Taxation of branch income is the same as for corporate income. However, a 10% WHT on profit is due at the time the profit is taken by the head office of the branch located abroad.

Simplified tax regime for oil subcontractors

There is a simplified tax regime specific to the oil sector which is a lump-sum tax regime granted for a triennial period. The rates for the 2012, 2013, and 2014 fiscal years is 8.75%, corresponding to CIT (5.95%) and personal income tax for expatriate employees (2.80%). Features of this specific regime are as follows:

- The option for this regime is irrevocable.
- The option is granted by the Director of the General Tax Office to foreign companies.
- The subcontractor must have signed, with an oil company, a temporary agreement for the provisions of services to this company.
- The option is no longer granted to companies that have been in Gabon for more than nine years. The duration of nine years is calculated from the year during which the company started its activities in Gabon.
- The subcontractor must constitute a Gabonese branch office.

Specific regime for regional offices (*quartiers généraux*)

A regional office is a company or a branch that renders various administrative services such as management or accounting exclusively to other companies of the same group based in a given geographical area (usually a group of countries).

Taxation is based on the expenses of the regional office. A rate, between 5% and 12%, is applied to operating expenditures to determine the tax basis. The CIT rate is then applied to that basis.

Income determination

Capital gains

Capital gains arising from the transfer of assets must be used for the calculation of taxable profits. However, the tax on capital gains can be deferred if a company reinvests an amount equal to the capital gain and the sale price of the transferred asset back into its fixed assets within three years.

Dividend income

The rate of transferable securities income tax (IRCM) is 15% on distributed dividends when the beneficiary is a company and 20% when the beneficiary is an individual.

IRCM, charged on the beneficiaries of the earnings, is withheld at source by the distributing company. It is paid over to the Registration Officer within 30 days from the payment of the dividends.

Inter-company dividends

Inter-company dividends are taxed at a reduced rate in full discharge of the 10% WHT if paid and received by or from companies with their registered office in a CEMAC country, shares were allotted at the time of issue or kept for two years, and the Gabonese company owns more than 25% of the share capital of the subsidiary.

Gabon

Foreign income

Foreign interest, royalties, and dividends are included in taxable income, subject to international tax treaties. Note that tax treaties provide that certain/all types of income are not includable in Gabon taxable income. Gabon has tax treaties with France, Belgium, the other countries of CEMAC, and the African and Malagasy Common Organisation (OCAM).

The concept of deferred tax is not applicable in Gabon.

Deductions

Depreciation

The straight-line method and an accelerated depreciation method are permitted in Gabon. Tax and book conformity is obligatory (i.e. annual depreciation must be booked to preserve tax deductibility).

The main depreciation rates provided by the Gabonese tax code are the following:

Asset	Rate (%)
Buildings	8
Machinery, equipment	8 to 20
Office furniture	15
Office equipment	20
Vehicles	20 to 33.3
Computing equipment	25 to 33.3

Interest expenses

Interests paid to shareholders with respect to the sums made available by them to the company are only deductible within the global limit amounting to half of the share capital and within the limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States raised by 2%, provided that the share capital is fully paid up.

Bad debt

Bad debt can be deducted from the result of the fiscal year during which the debt became completely unrecoverable, subject to the irrecoverable character of the compromised debt being justified due to the situation of the debtor.

Provisions

To be tax deductible, provisions must relate to existing liability or loss. General provisions are not deductible.

Charitable contributions

Charitable contributions do not, in principle, constitute expenses deductible from the taxable result. However, contributions for charity can be deducted, provided that the donation is made to the profit of organisms of public interest located in Gabon and that the donation is justified.

The deduction is limited to 1/1,000 of the company's turnover for the considered fiscal year.

Fines and penalties

Fines and third-party taxes borne by companies are not tax deductible.

Taxes

Only professional taxes for which the recovery proceeding has started in the current fiscal year and for which the company is effectively liable due to operation carried out in Gabon can be deducted.

Net operating losses

The Gabonese Tax Code does not provide the possibility to carry back losses. It does, however, provide for a three-year carryforward for net operating losses.

Regarding depreciation deferred in the accounts, they can be carried forward indefinitely.

Payments to foreign affiliates

Management fees paid to a foreign parent company are deductible if they meet all of the following conditions:

- They reflect real transactions.
- They do not present an abnormal characteristic.
- They are not exaggerated.

Management fees determined in a lump sum basis are not deductible.

Interests paid to shareholders are deductible only within the limit of the Central Bank's (BEAC) normal rate for advances plus two percentage points, on the condition that the registered capital is entirely paid. The portion exceeding the ceiling is not deductible and is thus subject to taxation.

Group taxation**Specific group tax regime**

The Financial Act of 2011 has instituted a specific tax regime derogatory to the common law tax regime that is applicable, under conditions, to groups of companies.

According to the provisions of Article 11 b. of the Law No. 44/2010, groups of companies are those that are organised around a head of the group of companies having its head office located in Gabon and having the control of companies located in Gabon and/or abroad.

To be eligible for this specific tax regime, and without any prejudice of other activities performed to the profit of third parties, the head of the group of companies must perform to the profit of other companies of the group an activity relating exclusively to the following fields:

- Provisions of services of any kind notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial corresponding to functions of management, coordination, and control of the group's companies.
- Research and development (R&D) to the sole profit of the group.
- Management of the finance intra-group.

Gabon

Each company subject to CIT that is a member of the group and fulfils the conditions provided by the law will be subject to a separate taxation of its results according to the rules of common law and subject to amendments expressly provided by the law for the determination of the taxable result.

The express amendments provided in the scope of the specific tax regime applicable to groups of companies are the following:

Capital gains

Net capital gains are taxed at a reduced rate of 20% when they are realised in the scope of intra-group operations.

Expenses deductible from the taxable result subject to CIT

The following expenses are deductible within the group:

- Head office fees and management fees determined in a lump sum basis, according to the conditions of allocation of the expense between the companies members of the group defined in a previous ruling with the Tax Authorities.
- The whole of the interests on partners' current accounts (i.e. on the sums put, by the partners, at the disposal of a company of the group) within the sole limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States (equivalent to 4%) raised by 2%.
- Rentings of movables carried out within the group by the mother company or between companies of the same group.

10% WHT

Sums subject to CIT according to the provisions of Article 206 of the Gabonese Tax Code paid by a Gabonese debtor member of a group of companies to a foreign company member of the same group are exempted from the 10% WHT even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of residence of the beneficiary of the remunerations.

Transferable securities income tax (IRCM)

Companies of the group which benefit from transferable securities income originating from Gabon are exempted from IRCM when the said revenues are paid by a company member of the group.

In return, payments carried out by the head of the group of companies to the profit of its partners (individuals or legal entities) are subject to IRCM at a unique and at source rate of 10% (instead of 20% for individuals and 15% for legal entities).

It is to be noted that the transferable securities incomes having their source abroad and which gave rise to taxation in their country of origin give the right in Gabon to a tax credit of the amount of the taxation which is deductible from the CIT of the fiscal year of perception of the incomes. The aforesaid tax credit applies even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of origin of the incomes.

VAT

The head of the group of companies is liable for VAT.

Members of a group of companies could, however, on option, consider the following provisions of services performed within the group as being out of the scope of application of VAT.

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial.
- Fees relating to studies.
- Putting at disposal of personal.
- Management of finance.

The option for the subjection of the abovementioned operations must be formulated by the concerned taxpayers on express request addressed to the General Tax Manager.

Registration duties

Deeds relating to incorporation, increase or reduction of share capital, breaking up with or without clearance, merger, scission, partial contribution of assets, and transfer of shares of a company member of a tax group, are subject to a fixed duty of XAF 20,000.

In the absence of a more favourable duty provided by the common law of registration, the changes of ownership and use which are not provided at Article 6 of the Gabonese Tax Code are subject to a proportional rate of 1% when carried out by members of the same tax group.

Requirements relating to declaratory obligations

The adherence to the group tax regime must be notified in writing by the head of the group of companies to the General Tax Manager accompanied by the list of the companies included in the tax perimeter of the group.

Each company remains liable for the periodical returns applicable to its activity.

For the purpose of calculation and verification of the returns, each tax return relating to the CIT of each company of the group will be gathered and filed at the same time by the head of the group of companies before the Tax Office.

Transfer pricing

The Gabonese Tax Code provides rules regarding transfer pricing issues.

According to these rules, any payment considered to be a result of mismanagement will be subject to the CIT rate at 35% plus penalties.

Indeed, Article 12 of the Code provides that “By virtue of law or in fact, for companies which are dependent of companies or groups of companies located outside the CEMAC area, or for those which possess the control of companies located outside the CEMAC area, payments or expenses realised by any mean whatsoever, comparable to abnormal act of management, constitute transfer of profits subject to corporate income tax”.

It is applicable for the following:

- Payments constituting increase or decrease of purchases or sales.
- Payments of excessive royalties or royalties without compensation.
- Relinquishment of revenues (underestimated sale price, free of charge service provision, granting of a free loan or a loan with low interests).

The abnormal act of management is not limited to expenses; it also includes any form of advantages or allowances granted to third parties without any equivalent compensation for the company.

Gabon

Article 13 of the Gabonese Tax Code provides that “The advantages or assistance granted by companies belonging to the same group can only be considered as resulting from a normal management if the company which grants these advantages or assistance demonstrates the existence of its own interest in acting as such. The general interest of the group is not sufficient to justify such practices”.

Thin capitalisation

There is no specific tax rule under Gabon legislation related to thin capitalisation.

Tax credits and incentives

Foreign tax credit

DTIs include provisions relating to the attribution of foreign tax credits. Such tax credits aim to limit the double taxation of profits that are subject to taxation in both Member States of the treaty.

Tax credits for job creation

There is a mechanism in place for granting corporate tax credits for any salaried appointments of Gabonese personnel.

This tax credit is equal to 20% of the gross salary paid to new employees and is subject to the creation of a minimum number of jobs, according to the size of the company as follows:

- Two jobs, for companies with less than 20 employees.
- Three jobs, for companies with 20 to 50 employees.
- Five jobs, for companies with more than 50 employees.

Note that the tax credit is granted only on newly created jobs since the preceding fiscal year. Contracts concluded with the employees must also be for an undetermined duration, and the new jobs must not result from the diminution of existing jobs.

Inbound investment incentives

Due to the provisions of the Investments Law, any private investment in Gabon can benefit from:

- A common law framework.
- Privileged frameworks.
- Specifically agreed frameworks.

Depending on the frameworks it is eligible for, a company can benefit from customs privileges and tax breaks.

Industrial companies already set up in Gabon and wishing to increase their production capacity can be admitted to a preferential tariff framework. This entails the application of a global reduced rate of 5% for duties and taxes paid on imports of equipment (excluding materials, furniture, and spare parts) provided that these correspond to an investment schedule and their value is in excess of XAF 100 million.

New industrial companies can also benefit from this framework, if they are not subject to any of the other privileged frameworks outlined by current legislation.

The granting of this privileged tariff framework occurs on the basis of a decision by the Minister of Finances, following a proposal from the Director of Customs and Indirect Taxes.

Capital investment incentive

New companies are exempt from the IMF, the minimum taxation of CIT, during the first two years of operations.

Social housing incentive

The Financial Act of 2011 provides some exemptions of taxes applicable exclusively to authorised companies during the performance of a social housing investment project.

The concerned companies are those authorised for the planning of urban lands intended for social habitat and the building of housings of a socio-economic nature and industrial units of manufacturing of materials and other inputs used for the building of social housings. The above mentioned tax exemptions relate to CIT, VAT, and business licence tax.

G

Withholding taxes

10% WHT

When they are paid by a debtor established in Gabon to individuals or companies subject to CIT or personal income tax (PIT) that do not have a permanent professional base in Gabon, the following amounts are subject to a 10% WHT:

- All amounts paid pursuant to the practice of an 'independent profession' in Gabon.
- Payments received by inventors, payments relating to copyrights, and all payments relating to intellectual and commercial property as well as assimilated rights.
- All amounts paid for services materially rendered or effectively used in Gabon.
- Interest, arrears, and all others fixed-income investment-products, pertaining to income declared as professional revenue of the beneficiary.

Net profits carried out by branches of foreign companies having their head offices abroad are also subject to a 10% WHT in Gabon before they are taken into account by the foreign companies.

Transferable securities income tax (IRCM) at rate 15%

IRCM is due on revenues from stocks and shares paid to legal entities. It is due by beneficiaries of these revenues and must be withheld by the distributing company.

Tax administration

Taxable period

Companies are required by law to have a 31 December closing of any fiscal year.

Tax returns

Returns for the previous calendar year are to be filed before 30 April of each year.

Payment of tax

Tax is payable to the General Tax Office in two instalments on 30 November and 30 January. The balance of the tax due must be paid by 30 April. The first instalment must

Gabon

equal one-quarter of the tax assessed in the previous year and the second instalment must equal one-third of this tax.

Audit cycle

There is no a specific audit cycle in Gabon.

Statute of limitations

The tax administration can proceed to tax audit until the fourth year following the year for which the tax is due.

Topics of focus for tax authorities

The tax administration shall particularly focus on the following aspects:

- Compliance of deductibility of management fees.
- Compliance of deductibility of corporate expenses.
- Compliance of WHT on payments made to foreign services providers.
- Payment of VAT on behalf of third parties.

Other issues

Legal reserve

According to the provisions of the OHADA Uniform Act relating to commercial companies and economic interest groups, one-tenth of the year's profits, reduced, if applicable, by any previous losses, must be put into a reserve account named 'Legal Reserve'.

The endowment of this reserve ceases to be obligatory when its value reaches one-fifth (20%) of the company share capital.

Significant developments

To attract foreign investment, the Georgian government is gradually reducing withholding tax (WHT) rates on passive income as follows:

- The 5% WHT rate on dividends paid to non-residents will be reduced to 3% on 1 January 2013 and to 0% on 1 January 2014.
- The 5% WHT rate on interest paid to non-residents will be reduced to 0% on 1 January 2014.
- The WHT rate on all other types of income received by non-residents was changed to 15% in 2011 but has since decreased to 10%.

Taxes on corporate income

Corporate income tax (CIT) in Georgia is applied to taxable profit at a rate of 15%. Taxable profit is defined as gross income minus deductible expenses.

Resident enterprises are subject to CIT on worldwide income.

Non-resident enterprises carrying out economic activities in Georgia through a permanent establishment (PE) are subject to CIT with respect to gross income earned from Georgian sources, which can be reduced by deductions attributable to such income.

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to WHT (*see the Withholding taxes section for more information*).

Local income taxes

There are no local income taxes imposed on the profit of legal entities.

Corporate residence

A resident enterprise is any legal entity that is established under the laws of Georgia or has its place of effective management in Georgia.

Permanent establishment (PE)

The domestic definition for a PE essentially adopts the definition for PE found in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Georgia

Local legislation provides the definition for economic activity to be any activity undertaken with the intent to gain profit, income, or compensation, regardless of the results of such activity, unless otherwise provided by the tax code.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 18% and applies to the sale of all goods and services supplied in Georgia. Goods are considered to be supplied in Georgia if they are transferred in or their shipment originates in Georgia. Services generally are considered to be supplied in Georgia if they are performed in Georgia. However, special rules apply for services relating to immovable property and certain services provided to non-residents.

The export and re-export of goods is exempt from VAT with the right to credit input tax (formerly referred to as zero-rated). VAT-exempt supplies include financial services, goods and services required for oil and gas operations, and medical services.

Reverse-charge VAT applies to services provided to Georgian taxpayers by a non-resident entity.

A VAT payer is a person who is registered or required to be registered as a VAT payer. Any person whose annual taxable turnover exceeds 100,000 Georgian lari (GEL) in any continuous period up to 12 months or who produces or imports excisable goods must register as a VAT payer. In addition, an enterprise that expects to perform one-off taxable transaction of more than GEL 100,000 must also register as a VAT payer before effecting the transaction.

Customs duties

Import tax is levied on the goods that crossed the economical borders of Georgia (except export). Depending on the types of products, general rates on imported goods are: 0%, 5%, and 12%. Imported cars (listed in the section # 8703 of warehouse nomenclature) are taxed at GEL 0.05 * by volume of engine, plus 5% of import tax on each additional year of ownership.

Excise tax

Excise tax is levied on specified goods that are produced in Georgia or imported into Georgia. Excise tax generally is calculated with reference to the quantity of goods (e.g. volume, weight), or in the case of automobiles, on the basis of the engine capacity and vehicle age. Excise tax rate varies from GEL 0.15 to 400 for one unit.

Excise tax applies to the following goods:

- Alcoholic drinks (i.e. GEL 5 per litre of whiskey).
- Condensed natural gas, except for pipeline.
- Oil distillates.
- Goods produced from crude oil.
- Tobacco products.
- Automobiles.

The export of excisable goods is exempt from excise tax with the right to credit.

Property tax

Property tax is payable at the rate of 1% on the annual average residual value of fixed assets (except for land) on the balance sheet as well as on leased out property of Georgian entities or foreign entities with taxable property in Georgia. For property acquired before 2005, the average residual value must be multiplied by a coefficient of between 1.5 and 3, depending on the acquisition date.

Land tax

The annual land tax rate for agricultural land varies according to the administrative unit and the land quality.

The base tax rate per 1 hectare of agricultural land varies from GEL 1.50 to GEL 100. The tax is further adjusted by a territorial coefficient of up to 150%, depending on the location.

The base tax rate payable on non-agricultural land is GEL 0.24 per square metre, which is further adjusted by a territorial coefficient not exceeding 150%.

Transfer taxes

There are no transfer taxes in Georgia.

Stamp taxes

There are no stamp taxes in Georgia.

Branch income

Branch income is taxed at the general rate of 15%. There is no tax on branch profit remittances.

Income determination

Taxable income is determined as the difference between the gross income of a taxpayer and the relevant deductions granted under the Georgian tax code.

Inventory valuation

A taxpayer is required to record the value of goods produced or acquired as the outlays (except for depreciation charges) or the purchase price in tax accounting. Furthermore, the taxpayer shall include the storage and transportation expenses into the value of such goods.

A taxpayer is entitled to record the cost of inventory using the individual accounting method, the average weighted cost method, or first in first out (FIFO).

Capital gains

The Georgian tax code does not define any separate tax for capital gains. Capital gains are taxable as normal business income at the general CIT rate.

Dividend income

Dividends received by local legal entities (except for the sole enterprises and entrepreneur partnership) are not subject to taxation at the source and shall not be included in gross income.

Georgia

Dividends received by non-resident enterprises from resident enterprises are subject to WHT at source (*see the Withholding taxes section for more information*).

Interest income

Resident legal entities and PEs of non-residents that received interest income that was taxed as source in Georgia are entitled to a credit tax paid to the state budget.

Interest income received from a licensed financial institution is not subject to WHT at source, and it should not be included in the gross income of a recipient unless the recipient is another licensed financial institution.

Rent/royalty income

Rent and royalty income received by resident companies and/or PEs of non-resident enterprises should be included in the gross income of the enterprise and taxed at the CIT rate of 15%.

Foreign income

Resident legal entities are subject to CIT on their worldwide income. Foreign income is subject to CIT at 15%.

Deductions

Expenses connected with the receipt of income generally are deductible from income, provided sufficient primary documentation is available.

Depreciation

The declining-balance method of depreciation applies to fixed assets for tax purposes. The maximum rate of depreciation is 20% for most fixed assets, though buildings and construction are subject to depreciation at the rate of 5% (please contact us for additional information regarding other groups and rates).

A taxpayer is entitled to fully deduct costs of fixed assets (excluding those contributed to capital) in the year when the fixed assets are put into operation (a form of capital allowance). In case the taxpayer employs the right of full deduction in this manner, this method may not be changed for five years.

Amortisation of intangible assets

Intangible assets (e.g. goodwill) are amortisable in proportion with the period of beneficial use. However, intangible assets of value less than GEL 1,000 are fully deductible from gross income.

If the period of beneficial use of an intangible asset cannot be defined, it is amortisable at the rate of 15%.

Start-up expenses

Expenses incurred before registration of an entity as a taxpayer (e.g. public registry fee) are not deductible under Georgian tax legislation.

Interest expenses

Interest paid on loans is deductible within the limits established by the Finance Minister. The annual deductible interest rate limitation established by the Minister of Finance of Georgia for the year 2012 is 24%.

Bad debts

A taxpayer is entitled to deduct bad debts only if all of the following conditions are met:

- The bad debt is related to the taxpayer's goods or services sold.
- Income receivable from the sale of goods or services was previously included in taxable gross income.
- The bad debt has been written off and recorded as such in the taxpayer's accounting records.

Charitable contributions

Charitable contributions are deductible, up to 10% of taxable profit.

Fines and penalties

Fine and penalties paid to the state budget are not deductible.

Taxes

CIT is disallowed for deduction.

Other significant items

The following other expenses are not deductible:

- Expenses not related to the generation of income.
- Expenses related to the receipt of income exempted from CIT.

The deduction of certain expenses is subject to limitations, including:

- Representation expenses, up to 1% of gross income.
- Repair expenses, up to 5% of the book value of the relevant asset at the end of the year. Any excess must be capitalised and deducted through depreciation.

Net operating losses

Losses may be carried forward for five years but may not be carried back.

A taxpayer may elect to extend the carryforward period to ten years. However, this also results in the statute of limitations period being extended from six to 11 years.

International financial companies, international enterprises, and Special Trading Companies are not entitled to carry forward losses.

An international financial company is a financial institution that, on behalf of the application of plenipotentiary representative, gets state registered, is granted as 'international financial company', and is given a status confirming certificate. These are resident companies that, after application, were granted the status of international financial company.

An international enterprise is an enterprise operating in the free industrial zone, which, for the purposes of tax exemption, is granted the status of international enterprise.

Group taxation

Georgian law does not provide for taxation of groups.

Georgia

Transfer pricing

The transfer pricing rules introduced in the tax code are broadly based on the OECD arm's-length principle adopted in tax treaties and by most countries when they implement domestic transfer pricing rules.

The law recognises the five OECD transfer pricing methods for evaluating whether prices are at arm's length:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Net profit margin method.
- Profit split method.

The tax code stipulates that in accordance with the Ministry of Finance instructions, the tax authority may recalculate the taxes if they can prove that the prices applied by related parties of transactions differ from the market prices.

The following general penalties, determined by tax legislation, apply for non-compliance with the arm's-length principle or failing to prepare or submit transfer pricing documentation:

- An understated tax liability (e.g. VAT, CIT) is subject to a penalty of 50% of the understated tax.
- Late payment of taxes is subject to interest at a rate of 0.07% per overdue day.
- Failing to submit a required document is generally subject to a penalty of GEL 400 (approximately 220 United States dollars [USD]).

Thin capitalisation

With the introduction of the tax code, thin capitalisation rules became effective on 1 January 2011. Interest expense may be disallowed if a company's debt-to-equity ratio exceeds 5:1. The thin capitalisation rules will not apply to financial institutions, entities that have gross income of less than GEL 200,000, and entities with interest expense that is less than 20% of their taxable income before deducting such interest expense.

Tax credits and incentives

Foreign tax credit

Income tax or profit tax paid on income earned from outside Georgia may be credited against CIT payable in Georgia. The amount of credited taxes may not exceed the Georgian tax payable on the foreign income.

CIT exemptions

The following are exempt from CIT (the list is not exhaustive):

- Income of budgetary, international, and charitable organisations (including grants, membership fees, and donations), except for the profit from commercial activity.
- Profit received from financial services conducted by international financial companies.
- Gains on sales of securities issued by international financial companies.

Free industrial zone (FIZ)

The following rules apply for enterprises located in a FIZ:

- Income received by an international enterprise from its permitted activities conducted in a FIZ is exempt from CIT.
- The importation of foreign goods into FIZ is free of customs duties and VAT-exempt.
- Operations carried out in FIZ are VAT-exempt without the right to credit.
- Property located in FIZ is exempt from property tax.
- The personal income tax of employees is paid by those individuals through self-reporting.

Withholding taxes

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to WHT at the following rates:

Income	WHT (%)
Dividends (reducing to 3% on 1 January 2013)	5
Royalties	10
Interest (reducing to 0% on 1 January 2014)	5
Oil and gas subcontractor income	4
International transportation/communication	10
Income from services rendered in Georgia	10
Other Georgian-source income	10
Insurance and re-insurance	0

Tax administration

The tax departments under the Ministry of Finance are responsible for tax administrative matters in Georgia.

Taxable period

The tax year is the calendar year in Georgia.

Tax returns

A CIT return should be submitted before 1 April of the year following the reporting period.

Payment of tax

CIT is paid in advance in four equal instalments, before 15 May, 15 July, 15 September, and 15 December. The advance instalments are estimated according to the previous year's annual tax. A taxpayer with no prior-year CIT obligation is not required to make advance payments.

Final payment is due by 1 April of the year following the reporting period. Excess CIT payments may be offset against other tax liabilities.

Statute of limitations

The statute of limitations is six years in Georgia. For those taxpayers who decide to increase the loss carryforward to ten years, the statute of limitations is 11 years.

Significant developments

At the start of the year, the political intention was to proceed through to the end of 2013 without substantial changes to the corporate tax system. This was still the intention at the end of 2011. Tax revenue collection has, however, been better than expected, but the government's first priority is to relieve individuals, rather than corporations. The current thinking is a modest reform of the progression scale of income tax rates in two stages, in 2013 and 2014.

The 2013 Annual Tax Bill has recently been published. Noteworthy is a radical change in approach to the taxation of permanent establishments (PEs). Henceforth, these are to be treated as though they are separate entities dealing with their own head office and other parts of the company on arm's-length terms. This conforms to the approach as authorised by the Organisation for Economic Co-operation and Development (OECD).

The European Court of Justice has recently rejected the withholding tax (WHT) on dividends to foreign companies as an unacceptable hindrance on the free movement of capital. The case concerned a portfolio dividend to a corporate recipient in another European Union (EU) member state. The Supreme Tax Court has followed the ruling in another case on a dividend to a sole-shareholder French corporation, but the impact on inter-corporate dividends paid outside the EU/European Economic Area (EEA) is not yet clear. The finance ministry has not yet announced its position.

Taxes on corporate income

Germany taxes its corporate residents on their worldwide income. However, most double tax treaties (DTTs) exempt income attributable to a foreign PE. Non-residents with PE or property income are taxed by assessment on German-source income; those earning royalties and dividends are taxed by withholding at source. Interest paid abroad is, in most cases, free of German tax altogether.

German business profits are subject to two taxes, corporation tax and trade tax.

Corporation tax (*Körperschaftsteuer*)

Corporation tax is levied at a uniform rate of 15% and is then subject to a surcharge of 5.5% (solidarity levy).

Trade tax (*Gewerbesteuer*)

The effective rate of trade tax varies by location from a minimum of 7%, which is the legal minimum and applies in a few small villages in depressed areas, to the Munich rate of 17.1%. The local rates in most cities range between 14% and 16%, whilst those

in small towns can be as low as 12%. The basis for this tax is the adjusted accounting profit: in particular, 25% of all financing costs over 100,000 euros (EUR), including the implicit financing costs in leasing, rental, and royalty payments, are added back to taxable income.

If the basis for the two taxes is identical (unlikely in practice), the overall burden on corporate profits earned in Munich would be 33%. In Frankfurt, the burden would be 31.9%. In Berlin, the burden would be 30.2%.

Corporate residence

A corporation is resident in Germany for tax purposes if either its place of incorporation or its main place of management is in Germany. A corporation meeting neither of these criteria will be regarded as non-resident with tax obligations limited to its income from German sources. These include active business activities through a PE or the letting of property, as well as investment income, royalties, and equipment rental (leasing). Income of the first two categories is generally taxed by assessment on the actual net earnings. That of the last three is usually taxed at source by withholding from the gross amount payable. Interest paid abroad is generally tax-free. However, interest on convertible or profit-sharing bonds is taxed as a dividend; interest on a German property or ship mortgage is seen as property or shipping income respectively.

Permanent establishment (PE)

Domestic law defines a PE as any fixed business facility serving the corporate purpose. 'Fixed' is not defined further, but is generally taken to imply a duration of at least six months. A permanent representative is someone who 'habitually' deals on behalf of the instructions of the principal, again without any specific time limit. Germany consistently follows the OECD model in her tax treaty PE definitions; thus purchasing activities, delivery stores, and independent agents acting in the ordinary course of their business are regularly excluded from the PE concept.

Other taxes

Value-added tax (VAT)

Proceeds of sales and services effected in Germany are subject to VAT under the common system of the EU at the standard rate of 19% (7% on certain items, such as food and books). The taxpayer generally is entitled to deduct the VAT charged on inputs from that payable on outputs.

VAT is administered by the tax office responsible for the corporation tax assessment of a company. It is based on returns filed monthly or quarterly by the tenth of the following month (monthly where the output tax in the previous year was more than EUR 7,500) drawn up on the basis of the actual transactions during the filing period as shown in the books of account. A permanent filing extension of one month is available against an advance payment of one-eleventh of the total net tax due during the previous year. Otherwise, payment is due when the return is filed.

Legally, VAT is an annual tax. Each taxpayer must file an annual return for each calendar year, regardless of the actual accounting date for the business. The VAT return is filed together with the corporation and trade tax returns. If the annual return does not agree with the total of the monthly or quarterly returns, the tax office can be expected to ask for a detailed explanation and to penalise any irregularity.

Germany

Customs duties

Customs duties are levied under a common system on imports into the European Union. The rate is set at zero on most imports from EU candidate countries and on many imports from countries with which the European Union has an association agreement.

For manufactured products from other countries, the rates generally lie within the range of 0% to 10%. The basis is the import value of the goods and thus includes uplifts for royalty or other payments associated with their use but not apparent from the transit documents.

The European Commission also sets 'countervailing' duties from time to time on specific imports from specific countries in order to counter dumping attempts. The countervailing duty rate is set to fully absorb the dumping margin and is therefore usually much higher than 10%.

Excise taxes

Excise taxes on fuel, electric power, insurance, and some other products are not a compliance issue for businesses other than dealers in bonded goods and insurance companies, although they can be a significant additional cost factor for business users. These excise taxes also have an environmental element in as much as the rates are set to discourage excessive use of pollutants. However, an air passenger duty is the only tax on pollution as such. Energy producers (such as power stations) can claim a refund of the excise tax borne in the cost of the energy products used in the production process.

Property taxes

There are no taxes on wealth or capital employed. There is a minor local authority tax on property, but the effect of this is largely offset by an additional trade tax deduction.

Stamp taxes

The only significant German stamp tax is the real estate transfer tax of, in most parts of the country, 3.5% of the consideration on conveyances of German property.

This tax is also levied on indirect transfers from the acquisition of at least 95% of the shares in property owning companies. This applies to shares in the shareholder throughout the corporate chain. If the transfer is indirect, and therefore without its own specific consideration, the basis for the tax is 12.5 times the annual rentable value. This value is derived from rents actually achieved over the past three years or estimated from statistics maintained by the local authority.

The tax is not levied on direct or indirect transfers without consideration in the course of a corporate reorganisation under the laws of a member state of the European Economic Area, provided at least 95% of the ultimate interest in the property remains unchanged for five years before and after the transaction.

Real estate transfer tax is currently under attack before the Constitutional Court.

Social security contributions

All employers are required to account for social security contributions on wages and salaries paid, up to set monthly limits. There are four separate types of insurance: for old-age pensions, unemployment benefits, health care, and invalidity care. Employees regularly earning more than EUR 4,125 per month can opt out of the health and invalidity insurances provided they take out appropriate coverage with a private insurance company. The pension and unemployment insurances are compulsory for all employees. The upper monthly salary limits are EUR 5,500 (EUR 4,800 in the eastern

part of Germany) for the pension and unemployment insurances and EUR 3,712.50 for the health and invalidity insurances. The rates are as follows:

- Pension insurance: 19.6%, of which the employee's share is one half.
- Unemployment insurance: 3.0%, of which the employee's share is one half.
- Health insurance: 15.5%, of which the employee's share is 8.2%.
- Invalidity insurance: 1.95%, of which the employee's share is one half.

Branch income

Both corporation tax and trade tax are imposed on the taxable income of a foreign company's German branch. The rates are the same for branches as for resident German companies, although the WHT on dividend distributions by German companies is not deducted from profits transferred by a German branch to its foreign head office.

G

Income determination

Strict conformity between book and tax reporting is no longer required. Rather, a company must draw up its financial statements according to the dictates of fair presentation, but may exercise all valuation and other options in the tax acts in its own best tax interest without regard to the accounting treatment for the item concerned. It must keep a register of all variances between the financial statements and the tax computation showing the basis on which each arose and its reversal. IFRS financial statements are not accepted as a basis for computing taxable income.

Inventory valuation

Inventories normally are valued at the lower of actual cost, replacement cost, and net realisable value. However, any write-downs below actual cost must be for specific reasons. If specific identification of the inventories is not possible, valuation at either standard or average cost is acceptable. The last in first out (LIFO) method is accepted as an option. First in first out (FIFO) is not accepted unless its assumption accords with the facts, although this condition is often fulfilled in practice.

Long-term liabilities and accruals

Non-interest bearing long-term liabilities, other than advance payments received, must be discounted at 5.5% per year. A similar provision applies to refurbishment (to restore an asset to its original condition) and other accruals which accumulate over time.

Capital gains

Generally, capital gains realised by a corporate entity from a disposal of business assets are treated as ordinary income. It is possible to postpone the taxation of part or all of the gain on real estate by offsetting the gain against the cost of a replacement property.

Capital gains from the sale of investments in other companies are exempt from corporation and trade taxes. Corresponding losses are not deductible. However, 5% of the capital gains are added back to taxable income as non-deductible directly related expenses.

Dividend income

Dividends received are exempt from corporation and trade taxes, regardless of the level of shareholding and the length of time it has been held. However, portfolio dividends

Germany

(on holdings of less than 15%) are subject to trade tax. 5% of the tax-free gross dividend is added back to taxable income as non-deductible business expenses.

Note that banks do not enjoy this exemption on dividends from securities held for trading.

Stock dividends

In principle, a declaration of stock dividends (by converting reserves to capital stock) by a company will not lead to taxable income for the shareholder or to other tax effects. Subsequent capital reductions, however, will be treated as cash dividends in most circumstances. There is no German tax reason for distributing a stock dividend as opposed to merely leaving accumulated profits on the books to be carried forward. The decision, therefore, depends upon the situation in the investor's home country.

Interest income

Interest received is taxed as part of a company's ordinary trading income. There is no exemption corresponding to the trade tax disallowance of 25% of the interest expense or to the general tax disallowance of net interest expense in excess of 30% of EBITDA under the interest limitation rule. However, since the interest limitation is based on the net interest margin, a company can benefit from earning income as interest as opposed to an interest substitute.

Foreign income

Foreign income, except dividends, received by a German corporation from foreign sources is included in taxable income for corporation tax unless a tax treaty provides for an exemption. Foreign PE income, in most cases, is exempt from corporation and trade taxes, while double taxation on most items of passive income (e.g. interest and royalties) is avoided by foreign tax credit or, at the taxpayer's option, by a deduction of the foreign taxes as an expense.

Irrespective of any tax treaty, income from a foreign branch or partnership is not charged to trade tax.

A Foreign Tax Act sets anti-avoidance (including controlled foreign company [CFC]) rules with respect to subsidiaries in certain lines of business subject to a low-tax regime. A low tax regime is one in which the rate applicable to the income in question is less than 25%. Most forms of passive income fall under the CFC rules, which essentially attribute the income to the German shareholder as though it had been earned directly. Active business income is not generally caught where the business operates from properly established facilities.

Investment income held in an EU/EEA subsidiary (except Liechtenstein) is also exempt from attribution, provided the subsidiary is commercially active in its country of operation and maintains at least a minimum establishment.

Other provisions give the tax office the right to insist on full disclosure of all the facts and circumstances surrounding a transaction as a condition for the deduction of a business expense incurred within an essentially tax-free environment for the supplier. This rule operates independently of ownership or shareholding considerations.

Deductions

Depreciation and amortisation

Depreciation on movable fixed assets is calculated on the straight-line method over the asset's anticipated useful life. The declining-balance method was available for assets capitalised in 2009 and 2010 at a maximum of two and a half times the straight-line rate, but in no case to exceed 25%. If this option was taken, it may be continued within subsequent years. On the other hand, a taxpayer is free to change from declining-balance to straight-line at any time. This election is by individual asset and cannot be reversed later. Depreciation takes the residual value of the asset into account only if it is material, with any gains on a sale being treated as normal business income.

Buildings are depreciated on a variety of straight-line or reducing rate systems designed to reach a full write-down between 25 and 50 years, depending on the age of the building and on whether the taxpayer was its first owner.

In addition to normal depreciation, special depreciation is deductible for tax purposes in certain limited circumstances (e.g. small businesses, ancient monuments, buildings in designated renovated city zones).

Intangibles are amortised straight-line over their estimated useful lives with goodwill amortised over 15 years.

Start-up expenses

Start-up and formation expenses are deductible as incurred.

Interest limitation

Annual net interest expense (the excess of interest paid over that received) of group companies is only deductible up to 30% of 'earnings before interest, tax, depreciation, and amortisation' (EBITDA) for corporation and trade tax purposes. The 30% limitation applies to all interest, whether the debt is granted by a shareholder, related party, or a third party.

This limitation does not apply where the total net interest expense for the year is less than EUR 3 million or where the net amount paid to any one shareholder of more than 25% (or a related party) is no more than 10% of the total. However, this latter concession is dependent on the demonstration that the equity to gross assets ratio of the company is no more than two percentage points below that of the group as a whole. Unused EBITDA potential may be carried forward for up to five years to cover future excess interest cost. This carryforward is otherwise subject to the same principles as the loss carryforward, including curtailment on change of shareholder(s).

It is emphasised that the interest limitation is additional to, and not a substitute for, the transfer pricing requirement that related party finance be at arm's length.

Bad debts

Bad debts incurred on trading with unrelated parties are deductible once irrecoverability is apparent and all attempts to pursue the debt have failed or been abandoned. Provision for future bad debts may be made; general provisions must reflect the past experience of the business; specific provisions require specific justification based on the actual circumstances. Loans to shareholders of more than 25% or to their related parties may not be written down or off with tax effect, unless a third party creditor would have granted the loan or allowed it to remain outstanding in otherwise similar circumstances.

Germany

Charitable contributions

Donations to recognised charities in cash or in kind are deductible, up to the higher of 20% of otherwise net taxable income or 0.4% of the total of sales revenue and wages and salaries paid during the year. Donations to charities registered in other EU/EEA member states also qualify for deduction if the recipient charity meets the German requirements for recognition.

Fines and penalties

Fines and other penalty payments levied by a court, or by an authority, with an intent to punish are not deductible. By contrast, those levied to confiscate ill-gotten gains or income, or to relieve damage to the victims or to the public good, are. Penalty payments levied for attempted tax evasion are not deductible, but late payment surcharges are, if the tax itself is, for example VAT.

Taxes

All taxes borne are deductible except for corporation tax, trade tax, and VAT on non-deductible expenses.

Net operating losses

Net operating losses are carried forward without time limit. For corporation tax (but not trade tax), there is an optional carryback to the previous year of up to EUR 511,500.

The loss relief brought forward claimable in any one year is limited to EUR 1 million plus 60% of current income exceeding that amount. The remaining 40% of income over EUR 1 million is charged to trade and corporation taxes at current rates. This is referred to as 'minimum taxation'.

The loss carryforward ceases if a single (immediate or ultimate) shareholder acquires more than 50% of the issued capital (voting rights) within a five year period. An acquisition of between 25% and 50% leads to a corresponding reduction in the loss carryforward.

Under the statute, these forfeiture rules do not apply to share acquisitions in connection with the recovery of a troubled business, where the change is part of a group internal reorganisation without effect on the single ultimate shareholder, or inasmuch as the loss carryforward is covered by hidden reserves in the company's assets that, on realisation, will lead to German taxation. This excludes the appreciation in value of shareholdings in other companies as well as business assets held in foreign PEs. However, the European Commission has recently decided to view the exemption from the forfeiture rules for share acquisitions within the context of a corporate recovery bid as unlawful state aid. Application of the provision has been suspended since April 2010; the government is contesting the Commission's finding before the European Court of Justice.

Payments to foreign affiliates

A German corporation can claim a deduction for royalties, management service fees, and, subject to the interest limitation, interest charges paid to foreign affiliates, provided the amounts are at arm's length. Detailed provisions covering both form and substance define this. In particular, all services must be covered by prior written agreement, and it is also necessary to conclude agreements for the purchase and sale of goods in writing where this would be usual between third parties (e.g. for quantity rebates on sales). The substance tests must be satisfied, both as to value for money and as to business relevance. Thus, the manager of a German subsidiary must be able to show both an adequate business benefit from a related party transaction and that

the company could not have obtained a better deal on the open market. These and all other aspects of inter-company (related-party) trading fall under strict and extensive documentation requirements, breach of which can lead to serious penalties.

Special features for trade tax

There are a number of differences between the income subject to trade tax and to corporation tax.

The most significant is the trade tax disallowance of one-quarter of the interest costs, including interest included implicitly in leasing, rental, and royalty charges. Banks have an exemption from this interest disallowance.

Group taxation

If a German parent holds more than 50% of the voting rights in a domestic subsidiary, the two may conclude a formal, five-year, court-registered profit pooling agreement. The ensuing relationship is then referred to as an *Organschaft*. Effectively, the annual results of an *Organschaft* are pooled in the accounts and tax returns of the parent. Profits and losses within a group can therefore be offset, but there is no provision for the elimination of intra-group profits from the total tax base.

Transfer pricing

Extensive rules on transfer pricing in respect of all transactions with foreign related parties are in force. The basic principle is that all trading should be at arm's length, but the documentation requirements go far beyond the level of documentation normally found sufficient to demonstrate a conscientious approach to true third party business. Failure to meet these rules exposes the company to serious risk of penalties as well as unfavourable estimates by the authorities with the right to exercise every possible leeway or margin to the taxpayer's disadvantage.

Thin capitalisation

There are no thin capitalisation rules as such; their substitute is the 'interest limitation' to, basically, 30% of EBITDA discussed in the *Deductions* section.

Controlled foreign companies (CFCs)

Germany operates a CFC regime aimed at passive income sheltered abroad and taxed at less than 25%. Essentially, the income is added to that taxable in Germany in the regular manner against a credit for the foreign tax actually paid and not recoverable by either the foreign entity or its shareholder. Active business income, except from tourism and the arms trade, is generally exempt from the CFC net, provided it is earned through a properly established facility of a scale appropriate to the activity concerned and treaty (or EU directive) rules exempting foreign income from German taxation are respected. However, taxpayers will have to demonstrate their treaty entitlement.

Tax credits and incentives

Germany does not offer tax incentives except in very limited circumstances, not usually of direct business relevance (e.g. special depreciation for buildings under a conservation order). Partly, this is a question of the state budget, and partly, it reflects the constitutional requirement for equal treatment of all taxpayers.

Germany

Other incentives

Investment grants of 5% or 10% are available on capital investment in new manufacturing facilities or hotels in the eastern part of Germany. The system is to be phased out by 2013.

Local authorities may offer facilities on favourable terms, such as the provision of cheap land on industrial estates.

Foreign tax credit

If foreign-source income is not exempt from German taxation, a credit will be given for the foreign tax actually paid and not otherwise recoverable. However, the credit is limited to the corporation tax (including the solidarity levy) on the net income after deducting the related expense. Unused credit is lost, as there are no provisions for carryforward or for offset against other taxes, such as trade tax. There are still a few cases of fictitious foreign tax credits under tax treaties with developing countries (to protect the treaty partner's investment incentives), but German treaty policy is to abandon such provisions at the first opportunity.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as shown in the following tables. There is also a solidarity levy of 5.5% on the tax due.

General

Recipient of German-source income	WHT (%)			
	Dividends (1)	Interest (1, 2, 3)	Royalties	Movable asset rentals (4)
Resident corporations and individuals	25	25	0	0
Non-resident corporations and individuals (1):				
EU corporations (5, 6)	0	0	0	0
Non-treaty corporations	25	25	15	15
Non-treaty individuals	25	25	15	varies

Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15% regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
5. Where the European Commission (EC) Parent/Subsidiary Directive applies, dividends paid by a German company to a qualifying parent company resident in another EU member state are exempted from German WHT. The minimum shareholding is 10%, to be held continuously for at least one year.
6. The EC Interest and Royalties Directive exempts payments from WHT if made to an associated company in another EU member state. The association must be through a common shareholding of at least 10%, to be held continuously for at least one year.

Treaty rates

Recipient of German-source income	WHT (%)			
	Dividends (1)	Interest (1, 2, 3)	Royalties	Movable asset rentals (4)
Albania	5/15	5	5	0
Algeria	5/15	10	10	0

Notes

- Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15% regardless of any further relief available under a treaty.
- Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
- Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
- Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
- The treaty does not (effectively) limit the taxation of profit-based interest income; thus, the domestic rate (plus solidarity levy) applies.
- The USSR treaty continues in force with Armenia, Moldova, and Turkmenistan.
- The lower royalty rate applies to commercial and industrial royalties, as opposed to cultural royalties.
- Mortgage interest to a Belgian business is exempt unless the recipient holds at least 25% of the voting rights in the payer.
- The Yugoslav treaty continues in force with Bosnia-Herzegovina, Kosovo, Montenegro, and Serbia. Croatia, Macedonia, and Slovenia have their own treaties.
- The higher royalty rate applies to film and television (TV) royalties, licences to use trademarks and names, and to franchises.
- The Czechoslovak treaty continues to apply to the Czech Republic and to Slovakia. Interest on profit-sharing bonds is taxed as a dividend.
- 25% on trademark royalties.
- The higher royalty rate of 5% applies to commercial, industrial, and scientific royalties.
- Interest to banks is exempt. Otherwise, tax is levied at the domestic rate (including solidarity levy) without treaty relief.
- Cultural royalties are exempt.
- Interest on convertible and profit-sharing bonds is taxed as a dividend; mortgage interest is exempt.
- The 15% royalty rate applies to copyrights.
- Treaty relief on interest, royalties, and rentals is conditional on taxation in country of receipt.
- The 5% royalty rate applies to copyrights.
- Royalties for copyrights, except for films and TV, are exempt.
- The 10% interest rate applies in certain circumstances where the recipient is a bank.
- The 15% royalty rate applies to patents, trademarks, films, and TV.
- The dividend exemption applies to corporate shareholders with at least 80% throughout the previous 12 months.
- The 5% royalty rate applies to industrial, commercial, film, and TV royalties.
- The 10% royalty rate applies to access to industrial, commercial, or scientific experience.
- This treaty is not yet in force pending ratification. If ratified, it will have retroactive effect from 1 January 2011.

Treaties signed, but awaiting ratification: Ireland, Luxembourg, Mauritius, South Africa, Spain, Taiwan, and Turkey.

Tax administration

Taxable period

The tax year in Germany is the calendar year.

Germany

Tax returns

Returns are filed for each calendar year and reflect the financial statements for the business year ending in that calendar year. Assessments are issued once the tax office has reviewed the return.

In principle, returns are due by 31 May of the following year. However, there is a virtually automatic extension to 31 December for those filing with professional assistance. A further extension to 28/29 February is possible, if justified under the circumstances. Known late-filers and those with a record of other irregularities can be asked to submit their returns before these extension dates, though not before 31 May.

Electronic returns

Monthly or quarterly returns for WHT from employee salaries, dividends, interest, royalties, and other payments, and for VAT must be submitted electronically. Electronic filing of the annual returns for trade tax and VAT is encouraged, but is not yet required. For corporation tax, electronic filing was not available in 2011 but is required in 2012 for 2011 returns. There is also an electronic filing requirement for the financial statements supporting the return. In principle, this applies to business years beginning in 2012, although the finance ministry has announced that no objection will be taken to paper filings of financial statements for the first year of the new system.

Payment of tax

Taxes are payable in quarterly instalments during the year, with a final settlement when the assessment is issued (usually five to six weeks afterwards). The quarterly instalments are based on the estimated ultimate liability. Usually, this is the total tax due shown by the last assessment issued, as adjusted by any rate changes. The corporation tax instalments are due on the tenth day of March, June, September, and December. For trade tax, the due dates are the 15th day of February, May, August, and November. Failure to pay by the due date followed by a three day grace period leads to a penalty of 0.5% per month.

Corporation and trade tax assessments bear interest on the net amount payable after deduction of all credits and previous payments. The rate is 0.5% per month simple interest, and the period runs from 1 April of the second year following the year of assessment. The interest period is independent of the actual date of assessment. It thus runs in retrospect on assessments issued later, for example following a tax audit.

Rulings

Tax offices are able to issue binding rulings in respect of planned transactions, provided the taxpayer can show a particular interest in the tax consequences of the intended action. The fee varies between EUR 121 and EUR 91,456, depending upon the amount of tax involved.

Advance pricing agreements (APAs)

A taxpayer can request the Central Tax Office to negotiate an APA on related-party transactions with a foreign tax authority on one's behalf. The vehicle is the mutual agreement procedure under the treaty, and the fee is a lump sum EUR 20,000 for each new agreement.

Audit cycle

Germany relies heavily on tax audits as a means of ensuring taxpayer discipline. Audits of small businesses are carried out at random, although those for larger operations and for the local subsidiaries of foreign groups tend to be regular. With some district

variations, audits are usually conducted at four to five yearly intervals, though not always with equal intensity for the entire period since the auditors' previous visit.

Statute of limitations

The statutory limitation period for the issue or correction of assessments is four years from the end of the year in which the return was filed. If no return was filed, the period runs from the end of the third year following the end of the year of assessment. The four-year period is extended to five in cases of taxpayer negligence and to ten in the event of evasion.

The statutory limitation period for the collection of tax debts is five years from the end of the year in which payment became due.

Topics of focus for the tax authorities

Tax office reviews of tax returns prior to issuing the assessment notice and payment demand are often rather superficial. Audits, though, are intense, being field reviews on site often lasting for several weeks or even months. Companies with an international focus can expect significant audit emphasis on all aspects of their dealings with their foreign business partners. If the company is a member of an international group, its most important audit component will usually be its transfer pricing on its dealings with foreign related parties and the relevant documentation. It is emphasised that these two topics are separate fields, as documentation deficiencies can lead to unfavourable estimates on the taxpayer, even if the taxpayer is able to justify the taxpayer's group company pricing in terms of overall result.

Significant developments

2012 budget proposals

In keeping with its commitment to improve tax administration, the government made the following proposals in the 2012 budget, which have been assented to by the President. The purpose of these amendments, amongst others, includes strengthening the Ghana Revenue Authority (GRA) by harmonising and organising the administrative procedures and processes for effective revenue mobilisation.

- Tax Administration Bill, which seeks to consolidate the common procedures of all the tax laws.
- The Internal Revenue Bill, which is expected to include the following provisions:
 - Increase the tax holiday for the Ghana Stock Exchange (GSE) for a further five years and extend the capital gains tax (CGT) exemption for five years on capital gains of shares traded on the GSE.
 - Reduce the corporate income tax (CIT) rate for the hotel industry.
 - Raise the CIT rate for mining companies to 35%.
 - Provide a uniform regime for capital allowances for plant and machinery used in the mining sector at 25% per annum.

Expiration of National Fiscal Stabilisation Levy (NFSL)

Originally set at a rate of 5% for two years from 2009 to 2010, the NFSL was extended to the end of 2011. We are not aware of any current proposed amendment to extend the NFSL to 2012.

NFSL was chargeable on the profit before tax of businesses and was applicable only to banks (excluding rural and community banks), non-bank financial institutions, insurance companies, communications companies, mining companies, and breweries.

Taxes on corporate income

A resident is taxed on income accruing in, derived from, brought into, or received in Ghana. The income of a resident is treated as accruing in or derived from Ghana unless attributable to a permanent establishment (PE) of the resident outside Ghana.

A non-resident is taxed on income accruing in or derived from Ghana. The income of a non-resident is treated as accruing in or derived from Ghana if the income is attributable to a PE of the non-resident in Ghana.

National CIT is payable on the following:

- Income accruing in, derived from, brought into, or received in Ghana in respect of gains or profits from a trade, business, profession, or vocation.
- Dividends, interest, or discounts.
- Any charge or annuity.
- Royalties, premiums, and any other profits arising from property, including rents.
- Receipts, including royalties and deferred payments of any kind.

The general CIT rate is 25%. Companies listed on the GSE are subject to a reduced CIT rate of 22% (this rate is applicable for only a three year period for companies that listed on the GSE after 1 January 2004).

The CIT rate for companies engaged in non-traditional export is 8%, while bank lendings to the agricultural and leasing sectors pay a CIT rate of 20%.

G

Corporate residence

Corporate residence is determined by the place where the trade, business, profession, or vocation is carried on. A company is resident if it is incorporated under the laws of Ghana or has its management and control exercised in Ghana at any time during a year of assessment.

Where a non-resident corporate body carries on any trade, business, profession, or vocation in Ghana (part of the operations of which may be carried on outside Ghana), the full gains or profits of the trade, business, profession, or vocation are deemed to be derived from Ghana.

Permanent establishment (PE)

A PE is determined under the tax law as the place where a person carries on business, as well as a place where a person:

- carries on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such
- has, is using, or is installing substantial equipment or machinery, or
- is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such project.

A non-resident carrying on business in Ghana through a PE is subject to tax in Ghana only on that income attributable to the PE in Ghana.

Other taxes

Value-added tax (VAT)

Other than exempt goods and services, VAT of 12.5% and the National Health Insurance Levy (NHIL) of 2.5% are charged on the following:

- Every supply of goods and services made in Ghana.
- Every importation of goods.
- Supply of any imported service.

The VAT and NHIL is charged on the supply of goods and services where the supply is a taxable supply and made by a taxable person in the course of business.

Ghana

VAT and NHIL are payable:

- in the case of taxable supply, by the taxable person making the supply.
- in the case of imported goods, by the importer, and
- in the case of imported services, by the receiver of the service.

Most professional services are also subject to the same VAT and NHIL rates, including the following:

- Management services.
- Insurance brokerage and other services.
- Financial, tax, and economic consulting.
- Engineering and technical services.
- Accounting services.
- Courier services.
- Legal services.
- Provision of satellite television.
- Architectural services.
- Mobile cellular phone services.
- Services rendered by surveyors.

Exports of goods and services are zero-rated. Unless specifically exempt, supplies of all goods and services are subject to VAT.

There is a VAT Flat Rate Scheme (VFRS) under which traders who meet certain thresholds are expected to pay 3% of their annual turnover as VAT without recourse to input VAT.

All businesses with an annual turnover between 10,000 Ghana cedi (GHS) and GHS 90,000 are currently obligated to operate the VFRS charging a rate of 3%. All businesses whose annual turnover exceeds the GHS 90,000 threshold are obligated to charge and account for charged VAT at 15%. Businesses whose designation has changed due to the amendment are to convert to the appropriate system which they now qualify for.

Customs and excise duties

Customs and excise duties are imposed on the importation of goods at the port of entry and certain manufactured goods produced or imported into Ghana.

The current rates of excise duties range from 150% on tobacco products, to 22.5% on wines, to 17.5% on water.

Some significant changes made in 2011 to excise duties included a 2.5% reduction in *ad valorem* excise duty rates on all excisable goods, except spirits and cigarettes, and a revocation of the concessionary duty rate for the inputs of the tourism industry. In addition to these, the government imposed a 20% environmental excise duty on polythene bags and other plastic packaging materials covered under the harmonised system and customs tariff schedules, effective from 1 February 2011. This excludes the plastic packaging materials for water and mineral water.

Capital gains tax (CGT)

CGT is payable by every person, including a corporate body, on any capital gain accruing or derived from the realisation of any chargeable asset situated in Ghana. These chargeable assets include buildings of a permanent or temporary nature;

business and business assets, including goodwill; land other than agricultural land; and any assets declared as chargeable by legislative instrument made under the law.

Capital gains in excess of GHS 50 are subject to tax at 15%. However, gains resulting from a merger, amalgamation, reorganisation, or reconstruction are exempt from CGT under certain conditions, as are gains accruing to or derived from a venture capital financing company.

A 20-year exemption that was granted on gains from the sale of securities of companies listed on the GSE and that ended in January 2011 has been proposed to be extended for five additional years to encourage transactions on the stock exchange and, in the long term, to make the securities market more vibrant and fluid.

Details of further exemptions can be found in the income tax laws of Ghana.

Communications service tax (CST)

CST of 6% is levied on charges payable by both individual and corporate consumers for the use of communication services provided by Communications Class 1 licensees as defined in the National Communications Authority Act. This essentially covers national fixed and mobile cellular network operators and internet service providers (ISPs). CST has also been proposed to be extended to cover the following:

- Public/corporate data operators.
- Providers of radio (FM) broadcasting services.
- Providers of free-to-air and pay-per-view television service.

Airport taxes

Ghana's airport taxes, as of 1 January 2011, are as follows:

Type of travel	Airport tax rate
Domestic travel (DT)	GHS 5
International travel (IT): Within West Africa (WA)	USD 60
IT: Outside WA (Economy class)	USD 100
IT: Outside WA (Business class)	USD 150
IT: Outside WA (First class)	USD 200

There are indications that an additional levy may be introduced to fund the government's planned expansion aimed at reducing the congestion and pressure on existing infrastructure and facilities at the airport.

Branch income

The tax rate on branch profits is the same as on corporate profits.

Branch profit tax at a rate of 10% will be triggered when profits are repatriated or are deemed to have been repatriated by the permanent establishment (PE). Repatriated profits, or deemed repatriated profits, is determined by a formula under the tax law that computes the movements of the accumulated profits and net assets.

Note that the profits for the period deemed to arise in connection with the operations of the branch may, at the discretion of the tax authorities, be computed by reference to the

Ghana

total consolidated profits of the entire group, taking into account the proportion that the turnover of that branch bears to the total consolidated turnover of the group.

Income determination

Inventory valuation

The Internal Revenue Act 2000 (Act 592), under Section 31, provides general guidance on the principles of stock (inventory) valuation for income tax purposes. A company that accounts for tax on an accrual basis is required to account for inventory using the absorption-cost method. A company accounting for tax purposes on a cash basis may calculate the cost of stock using a prime-cost method or absorption-cost method. The closing value of inventory is valued for tax purposes at the lower of cost or market value.

Capital gains

Capital gains are taxed at a separate rate in Ghana. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

A dividend paid to a resident company by another resident company is exempt from tax where the company receiving the dividend controls, directly or indirectly, 25% or more of the voting power in the company paying the dividend.

Stock dividends

The issue of stock dividends is permitted under Section 74 (1) of the Ghana Companies Code 1963, Act 179. It is, however, subject to income tax at the dividend withholding tax (WHT) rate of 8%.

Interest income

Interest received by a resident company from another resident company is subject to WHT at a rate of 8%.

However, no WHT applies on any interest paid by an individual person, on government of Ghana bonds, or on interest received by a resident financial institution.

In addition, interest of an approved unit trust scheme or mutual fund is exempt from tax.

Exempt income

Specific exemptions from tax include the following:

- Income of a local authority.
- Income of a statutory or registered building society.
- Income of a charitable or an educational institution.
- Income of organisations formed for the purpose of promoting social or sporting amenities.
- Income accruing from a farming enterprise, for a limited period.
- Income of a registered trade union.
- Income of rural banks, for the first ten years of operations.
- Gain or profit from the business of operating ships or aircraft by non-resident persons if an equivalent exemption is granted by the person's country of residence to persons resident in Ghana.
- Investment income of a pension or provident society.

- Income or profit of any registered cooperative society.

Foreign income

Resident corporations are taxed on their foreign income as and when it is brought into or received in Ghana. Foreign income is taxed together with other income derived in Ghana, and double taxation is avoided through treaties or foreign tax credits. No special rules exist for taxing undistributed income of foreign subsidiaries.

Deductions

Depreciation and depletion

Depreciation of depreciable assets in the accounts of a business is not an allowable deduction in computing taxable profits. It is replaced by capital allowances at statutorily prescribed rates, as follows:

Class	Comments	Rate
1	Assets pooled (allowance calculated on a reducing-balance basis). Mainly computers and data handling equipment.	40%
2	Assets pooled (allowance calculated on a reducing-balance basis). Mainly automobiles, buses, mini buses, construction and earth-moving equipment, trailers and trailer-mounted containers, plant and machinery used in manufacturing.	30%
3	Assets not pooled (allowance calculated on a straight-line basis). Mainly mining and petroleum rights assets, such as exploration and development costs, buildings, structures and works of a permanent nature related and plant and machinery.	20%
4	Assets pooled (allowance calculated on a reducing-balance basis). Mainly railroad cars, locomotives and equipment, vessels and similar water transportation equipment, aircraft, public utility plant, equipment, office equipment and fixtures, and any other depreciable asset not elsewhere classified.	20%
5	Assets not pooled (allowance calculated on a straight-line basis). Mainly other building structures and works of a permanent nature.	10%
6	Assets not pooled (allowance calculated over the useful life of the asset). For other intangible assets.	Useful life

Allowances are granted only on the following conditions:

- The taxpayer must own the asset.
- Capital expenditure must be incurred.
- The asset must be used in the trade.
- The asset must be in use up to the end of the basis period.

Capital allowances are granted for every year in which the asset is in use. Balancing allowances and charges are made, as the case may be, on disposal of the asset.

For intangibles, such as goodwill, patents, trademarks, and copyrights, the law allows for capital allowance deduction over the useful life of the asset.

Start-up expenses and pre-operating costs

Although the tax law does not specifically mention start-up expenses or pre-operating costs, generally a deduction is allowed for start-up and pre-operating costs incurred by

Ghana

a business, provided such expenses are wholly, exclusively, and necessarily incurred in the production of income of the taxpayer.

Interest expenses

Any sum payable by way of mortgage or debenture interest by any company to a non-resident, except where tax has been deducted and accounted for, is considered non-deductible.

Bad debt

A deduction is allowed for bad debt incurred in the normal course of business, other than advances made on capital accounts. A bad debt will be allowed as a deduction if the taxpayer has taken all reasonable steps to pursue payment and the person reasonably believes payment will not be made.

Any amounts recovered in respect to a bad debt previously written off should be included in income and subject to tax accordingly.

An existing debt that becomes a bad debt after a 50% or more change in underlying ownership is not allowed as a bad debt deduction after the change in ownership has taken place.

Charitable contributions

The following contributions/donations are allowable as deductions in ascertaining the taxable income of a person:

- Contributions made to a charitable institution or fund approved by the government.
- Payments towards a scholarship scheme approved by the government for a technical, professional, or other course of study.
- Donations made for the purpose of any rural or urban area and approved by the government.
- Donations for the purpose of sports development approved by the government.
- Donations to the government for worthwhile government causes approved by the Commissioner.

Fines and penalties

Fines and penalties arising as a result of non-compliance with the provisions of the tax law are generally not allowable deductions.

Taxes

Taxes are not deductible in determining taxable income.

Other significant items

No other special deductions are allowed. Principal non-deductible items include the following:

- Domestic or private expenses, including cost of travel between residence and place of business or employment.
- Any disbursement or expense not being wholly and exclusively paid or expended for the purpose of acquiring income.
- Capital withdrawn or any sum employed or intended to be employed as capital.
- Capital employed in improvement.
- Any sum recoverable under an insurance contract of indemnity.
- Rent of or any expense in connection with premises or a part of premises not occupied or used for the purpose of producing business income.

- Any payment to a provident, savings, or other society or fund unless specifically allowed by the tax Commissioner General (CG); this may change under tiers 2 and 3 under the new Pensions Act.

Net operating losses

Tax losses can be carried forward and deducted from assessable income for the five years immediately following the year in which the loss was incurred. This provision covers the following industries: farming and agro-processing, mining, manufacturing (mainly for export), tourism, and information communications technology (ICT) (i.e. software development) industries.

Carryback of losses is permitted for persons deriving income relating to a long-term contract, except this is not allowed where there has been a change in ownership of 50% or more compared with the prior year. A long-term contract of a business includes a contract for manufacture, installation, or construction that is not completed within the company's accounting year in which it is commenced.

Payments to foreign affiliates

No special restrictions are imposed on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided they are expenses incurred wholly, exclusively, and necessarily in the production of the income. However, the CG may disallow certain transactions if they are deemed artificial or fictitious.

Group taxation

No form of combined reporting of results of operations by a group or affiliates is permitted.

Transfer pricing

Currently, there is a transfer pricing regulation yet to be passed into law in Ghana. The transfer pricing regulation is currently under review by the Parliament of Ghana and is expected to be released before the end of June 2012.

The draft transfer pricing regulation is expected to follow the internationally accepted guidelines published by the Organisation for Economic Co-operation and Development (OECD) but with a much broader perspective on the nature of entities and transactions that would be governed under the transfer pricing rules of Ghana.

Until the detailed transfer pricing regulations are passed, the general anti-avoidance provisions under the Internal Revenue Act shall continue to apply.

Thin capitalisation

Interest expenses and foreign exchange currency losses incurred by an exempt-controlled resident entity are not allowed as a deduction in arriving at the chargeable income of the entity if the entity is thinly capitalised. An exempt-controlled entity is deemed to be thinly capitalised if its exempt debt to exempt equity ratio exceeds the ratio 2:1.

A resident entity is deemed to be exempt-controlled if at least 50% of the underlying ownership or control is held by a non-resident person, either alone or together with an associate or associates.

Thin capitalisation provisions do not apply to resident financial institutions.

Ghana

There are currently no thin capitalisation provisions in the Petroleum Income Tax Laws, and, as such, the provisions are deemed not to apply to petroleum licence holders.

Tax credits and incentives

Foreign tax credit

A resident is entitled to a credit in respect to any foreign income tax paid to the extent to which the tax paid is in respect to the resident's foreign taxable income. The foreign tax credit available on specific income type should not exceed the average rate of Ghanaian income tax of the resident for a year.

Inward investment

Under the Ghana Investments Promotion Centre Act 1994, various incentives are available to encourage investments in the country, particularly in the areas of agriculture; manufacturing industries engaged in export trade or using predominantly local raw materials or producing agricultural equipment, etc.; construction and building industries; mining; and tourism.

Incentives generally include exemption from customs import duties on plant and machinery; reduced CIT rates; more favourable investment and capital allowances on plant and machinery; reduction in the actual CIT payable, where appropriate; retention of foreign exchange earnings, where necessary; guaranteed free transfer of dividends or net profits, foreign capital, loan servicing, and fees and charges in respect of technology transfer; and guarantees against expropriation by the government.

Capital investments

Venture capital tax incentives include the following:

- Relief from stamp duty in each year on subscriptions for new equity shares in venture capital funds.
- Full tax exemption from CIT, dividend WHT, and CGT for five years.
- Carryforward of losses from disposal of shares during the tax-exempt period to the post-exempt period, up to five years.
- Chargeable income tax deduction equal to 100% of their investment, for financial institutions which invest in venture capital subsidiaries.

Tax holidays

Until January 2011, the income of a company engaged in the construction and sale or letting of residential premises was exempt from tax for a period of five years. This was abolished in the 2011 national budget. The tax holiday is now limited to companies that partner with the Minister responsible for Works and Housing in the construction and sale or letting of low cost affordable residential premises and are certified as such by the Minister responsible for Works and Housing.

Tax holidays are also extended to entities in agro-processing, farming business, and for venture capital financing entities.

* Final tax.

Tax administration

Taxable period

The tax year runs from 1 January to 31 December. Corporations with financial periods other than the calendar year are taxed on their financial period ending during the calendar year.

Tax returns

Companies are expected to submit a tax return not later than four months after the end of the financial year. They may file an application for extension of filing time for not more than two months.

Assessments

The CG publishes in the Gazette or print media a list of persons who are under the Large Taxpayer Office and are under the self assessment scheme. Companies under the self assessment scheme are required to make an estimate of their annual chargeable income to be derived for the year and the tax to be payable thereon. The annual tax estimated by the taxpayer is paid in quarterly instalments on or before the last day of the third, sixth, ninth and 12th months of the period. These tax instalments are an advance payment deductible against the actual tax payable at the end of the year.

The CG may also serve a provisional assessment on a taxpayer's chargeable income and estimated tax payable. Taxpayers are required to proceed to make advance quarterly tax instalment based on the provisional assessment.

Payment of tax

Where an assessment has been finalised, the tax is payable within 30 days after service of the notice. At the discretion of the CG, the time for payment may be extended.

Ghana

In instances where the CG does not issue a notice or demand, a taxpayer is required to pay not less than the total of the tax paid or payable in respect of the preceding year of assessment. This may be paid by equal quarterly instalments at the end of March, June, September, and December in each year of assessment, but such payments are not deemed to be the actual tax payable.

Where tax is not paid by the due date, a penalty is assessed at 10% of the tax payable in addition to the tax unpaid up to three months after the due date; thereafter, the penalty is 20%.

Tax amnesty

The government has proposed to offer a tax amnesty to individuals and companies that have may not be up to date on their tax compliance. This exercise is intended to run for nine months from 1 January 2012 to 30 September 2012.

During this period, the GRA also intends to conduct a registration and re-registration of taxpayers as part of its efforts to increase the tax base. This exercise will be done in conjunction with the upcoming e-registration of taxpayers. This is not only expected to offer a good opportunity for businesses to reassess and regularise their tax affairs to ensure compliance but also to increase the GRA's revenue prospects.

Other issues

Double tax treaties (DTTs)

Ghana has, for the relief from double taxation on income arising in Ghana, double tax treaties with Belgium, France, Germany, Italy, the Netherlands, South Africa, Switzerland, and the United Kingdom.

Significant developments

Budget summary

Below is a summary of the taxation changes to existing legislation as a result of the Chief Minister's budget speech on 4 July 2011. These changes are effective as of 1 July 2011.

Changes in import duty rates

The import duty rate for the following goods has been halved to 6%:

- Televisions.
- Hi-fi and other electrical audio or visual equipment.
- Tableware and kitchenware.
- Other household goods.
- Sunglasses or spectacles.
- Lamps and lighting.
- Paints and varnishes.
- Tools.
- Toys.
- Porcelain goods, statues, and ornamental pieces.
- Glassware objects (excluding sheet glass).

The duty on cigarettes increased to 1.20 British pounds (GBP) per carton of 200, and the duty on rolling tobacco increased to GBP 2.50 per 250 gram pouch.

Commercial property rate incentives

The early payment discount on property tax rates for the wholesale and retail sector (including bars and restaurants) increased to 20%.

Bars or restaurants implementing and enforcing a 'no smoking policy' are entitled to a 10% refund of the property tax rate paid.

Pending legislation

Please note this information is current as of 1 June 2012. Proposed amendments to tax legislation are announced by the Chief Minister in his budget speech, which is annual and is usually during the month of June. These amendments are usually effective as of 1 July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after this date.

Gibraltar

Taxes on corporate income

Companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

The standard rate of corporate income tax (CIT) is 10%, with utility and energy providers and companies that abuse a dominant position paying a higher rate of 20%.

Corporate residence

A company will be considered resident in Gibraltar if the management and control of its business is exercised from Gibraltar.

The location of central management and control will be established under legal principles laid down in the United Kingdom and is the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business.

Permanent establishment (PE)

Gibraltar has not entered into any double tax treaties (DTTs); consequently, there are no provisions on PE from a general treaty perspective.

Other taxes

Value-added tax (VAT)

There is no VAT in Gibraltar.

Customs duties

Goods imported into Gibraltar from outside are, with some exceptions, generally subject to import duty at the applicable rate of 6% or 12%.

The duty on cigarettes is GBP 1.20 per carton of 200, and the duty on rolling tobacco is GBP 2.50 per 250 gram pouch.

Property tax

A general business property rate is levied annually on all businesses in Gibraltar. The amount varies depending on the property and is subject to an annual review.

Stamp duty

Stamp duty is payable on the transfer or sale of any Gibraltar real estate or shares in a company owning Gibraltar real estate (on an amount based on the market value of said real estate) at the following rates:

- GBP 200,000 or less: 0%.
- Between GBP 200,001 and GBP 350,000: 2% on the first GBP 250,000 and 5.5% on the balance.
- Over GBP 350,000: 3% on the first GBP 350,000 and 3.5% on the balance.

Stamp duty is also payable on mortgages secured on Gibraltar real estate at the rate of 0.13% for mortgages less than GBP 200,000 and 0.20% for mortgages over GBP 200,000.

Gaming tax

Gaming tax is levied at 1% of the gaming income. The tax paid is subject to a minimum of GBP 85,000 and maximum of GBP 425,000.

Capital duty

Capital duty of GBP 10 is payable on the initial authorisation of share capital or any subsequent increase thereto.

Social insurance

Employers are obliged to pay social insurance for every person in their employment.

Employers' social insurance contribution for employees paid weekly is calculated as 20% of gross earnings, subject to a minimum of GBP 15.00 and a maximum of GBP 32.97 per week.

Employers' social insurance contribution for employees paid monthly is calculated as 20% of gross earnings, subject to a minimum of GBP 65.00 and a maximum of GBP 142.87 per month.

Branch income

The basis for taxation of branches of foreign enterprises is the same as for corporations.

Allowable head office charges or expenses incurred by a Gibraltar branch for the common purpose of the company and its branches, or for the purpose of the head office or another branch exclusively, are limited to 5% of turnover of the Gibraltar branch.

Income determination

Generally, companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. The last in first out (LIFO) method is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains

Capital gains are not subject to tax in Gibraltar.

Dividend income

There is no charge to tax on the receipt by a Gibraltar company of dividends from any other company.

Interest income

Except in the case of companies with a banking or money lending licence, interest receivable is not taxable in Gibraltar.

For companies where interest is taxable, no tax shall be charged on the net interest receivable from deposits received from related parties to the extent that these funds do not themselves generate interest income from money lending activities to third parties.

Gibraltar

Royalty income

Income from royalties is not taxed in Gibraltar.

Foreign income

Where a taxpayer seeks to reduce their liability to tax by creating an artificial split between activities in Gibraltar and outside of Gibraltar, the Commissioner shall use anti-avoidance provisions to defeat such an attempt.

Deductions

For the purpose of ascertaining the assessable income, all expenses wholly and exclusively incurred in the production of the income shall be deducted.

Capital allowances

The first GBP 30,000 of qualifying expenditure on plant and machinery (including fixtures and fittings) and the first GBP 50,000 of qualifying expenditure on computer equipment is fully deductible in the first year as a 'first year allowance'.

Thereafter, qualifying assets are pooled and are subject to an annual capital, or wear and tear, allowance. Allowances are available for plant and machinery (including fixtures and fittings), computer equipment, and motor vehicles at the rate of 15% (20% for companies that are obliged to pay the higher CIT rate - *see the Taxes on corporate income section*) and are calculated on a reducing balance basis. Capital allowances for industrial buildings are deductible at the rate of 4% per annum on a straight-line basis.

Capital payments for leases which are for periods of less than 12 years qualify for capital allowances on a straight-line basis over the remaining period of the lease.

Goodwill

Amortisation of goodwill is not a deductible expense.

Start-up expenses

Expenditure incurred with a view to carrying on a trade is treated as incurred on the first day on which the trade is carried on for the purposes of computing the profits or gains of the trade.

Interest expenses

Full deduction is available in respect of interest expenses, subject to anti-avoidance rules (*see the Group taxation section for more information*).

Bad debt

Only specific bad debts or specific bad debt provisions are deductible to the extent that they are respectively estimated to be bad during the said period, notwithstanding that such bad debts were payable prior to the commencement of the period. General doubtful debt provisions are not an allowable expense.

Charitable contributions

A charitable donation is not considered as having been wholly and exclusively expended for the purposes of the production of the income of the trade and is therefore not allowable as a deduction for tax purposes.

Fines and penalties

Fines and penalties, including those resulting from late payment of taxation or from failure to make the necessary tax submissions, are deemed to be a tax and therefore are not a deductible expense.

Taxes

No deduction is allowed for any tax charges under the Income Tax Act.

Other significant items

Additionally, no deduction is allowed in respect of the following:

- Domestic or private expenses.
- Expenses not incurred wholly and exclusively in the generation of income.
- Any expenses of a capital nature.
- Any sum recoverable under an insurance contract or contract of indemnity.
- Property expenses not incurred for the purposes of producing income.
- Depreciation of assets (although capital allowances are available, *see above*).
- Employee remuneration not accompanied by a certified statement of name, address, and amount of remuneration.
- Certain business entertainment expenditure falling within guidelines published by the Commissioner.
- Interest paid to a non-Gibraltar resident that is more than a reasonable commercial rate.

In the case of a company that has income, some of which is chargeable to tax and some of which is not, the deductions allowed shall be apportioned on a pro-rata basis between the chargeable and non-chargeable income.

Net operating losses

A trading loss incurred in an accounting period may be offset against trading income arising in the same period or subsequent period, provided that within a period of three years there has not been both a change in the ownership of the company and a major change in the nature or conduct of the trade.

There is no provision for the carrying back of losses.

Payments to foreign affiliates

In the case of branches, the amount of general head office expenses incurred that would be deductible would be limited to 5% of its turnover.

The Income Tax Act 2010 includes anti-avoidance provisions. These provisions state that if the amount charged for goods or services by a connected person is not at 'arm's length', then the expenses that would be allowed would be subject to a maximum of:

- the expense
- 5% of the gross turnover of the company, or
- 75% of the pre-expenses profit of the company.

Group taxation

Companies are assessed on an individual basis, and trading losses of group members may not be offset against profits of other members of the group.

Gibraltar

The Income Tax Act contains a generic anti-avoidance clause which allows the Commissioner to disregard an arrangement which the Commissioner believes is fictitious or artificial. In addition, it includes the following specific anti-avoidance measures.

Transfer pricing

The amount of interest payments to connected persons which is in excess of that payable at arm's length will be deemed to be a dividend. Where the amount charged for goods and services by connected persons is not at arm's length, this will be disallowed as a taxable expense. Any expenses allowed will be subject to the lesser of (i) the expense, (ii) 5% of the gross turnover of the company, and (iii) 75% of the pre-expense profit of the company.

Thin capitalisation

Interest paid on a loan to related parties which are not companies (or loans where security is provided by related parties) where the ratio of the value of the loan capital to the equity of the company exceeds five to one will be considered as dividend payments and thus not a deductible expense for tax purposes. This provision is not applicable to Gibraltar banks or money lenders.

Back-to-back loans

Since interest income is not taxable on back-to-back loans, the interest expense is not deductible.

Dual employment

Income from dual employment contracts is taxed in Gibraltar if both employers are connected persons.

Transfer of assets abroad

Where assets are transferred abroad with the purpose of avoiding tax and the taxpayer has the power to enjoy these assets either now or in the future, then any income or benefits received from these assets will be deemed to be income chargeable to tax.

Tax credits and incentives

Development aid

In order to encourage private development in Gibraltar, promoters and developers of approved projects are offered certain incentives such as tax relief, import duty relief, and rates relief.

In order to qualify for the above reliefs, the project needs to be a new project which is for the economic benefit of Gibraltar and the aim of which is:

- to create a tangible immovable asset in Gibraltar that will remain in existence after the applicant has ceased to derive the benefits under the licence
- to provide more than two additional units of housing accommodation in Gibraltar
- to contribute materially to the development of the tourist industry in Gibraltar
- to afford any new employment opportunities or career prospects in Gibraltar, or
- to improve materially the economic or financial infrastructure of Gibraltar.

The project needs to be completed within a specified time (dependent on the type of project) following the issue of the licence, and the applicant must not expend less than the prescribed amount for the project.

Applications for development aid must be made to the Minister for Trade.

Deduction of approved expenditure on premises

For taxpayers with an interest in a building situated in Gibraltar, an allowance is available for approved expenditure on the painting, decorating, repair, or enhancement of the frontage of that building.

The approved amount will be available as a deduction against the taxpayer's income. This deduction is in addition to any deduction, relief, or allowance given in accordance with any other provision of the Income Tax Act in respect of the same expenditure.

The claim for the deduction must be made within two years after the end of the year of assessment with respect to which the deduction is claimed.

Commercial property rate incentives

There is an early payment discount of 20% available on property tax rates payable by the wholesale and retail sector (including bars and restaurants).

In addition, any bar or restaurant implementing and enforcing a 'no smoking policy' is entitled to a 10% refund of property tax rates paid.

G

Withholding taxes

There are no WHTs in Gibraltar, except in the following cases:

- Payments to subcontractors in the construction industry. Unless the subcontractor is in possession of an exemption certificate, tax is withheld at the rate of 25% of the amount which relates to the labour and profit element of the contract.
- Payments to employees under the Pay As You Earn (PAYE) system. Under the PAYE regulations, employers are obliged to deduct an amount of tax in accordance with the employee's tax code.

Tax administration

Taxable period

The taxable period is the accounting period of the company, which begins on the later of the beginning of the accounting period and the date when the company first receives a source of taxable income and ends on the earlier of the end of the accounting period, 12 months from the beginning of the accounting period, or the date on which trade ceased.

Tax returns

Companies are required to file returns and calculate their tax liability for the year. The return, together with the estimated liability, needs to be accompanied by payment of the tax due six months after the date of the company's financial year end.

Companies with turnover of less than GBP 500,000 are obliged to file accounts accompanied by an Independent Accountant's Report together with the tax return within six months of the company's financial year end.

Gibraltar

Companies with turnover of GBP 500,000 or more may submit unaudited accounts together with the tax return but are required to file audited accounts within nine months of the company's financial year end.

Payment of tax

Companies are required to make payments on account of future liabilities on 28 February and 31 August in each calendar year. Each payment should be equal to 50% of the tax based on the previous year's tax liability.

The balance of tax due (i.e. the actual liability less payments on account) is due on the date of filing of the return.

Audit cycle

The Gibraltar tax system is based on self assessment. However, the Income Tax Office has powers to make an enquiry into the tax return of a company within a period of 12 months from the date when the return is due to be filed or, if filed later than the deadline, 12 months from the date it was filed. If the Commissioner of Income Tax believes a return to be fraudulent, the above time limits will not apply.

Statute of limitations

The Commissioner has up to six years following the date of assessment to revise any incorrect assessments. There is no limit where the incorrect assessment is as a result of fraud, willful default, or neglect.

Appeals

A taxpayer may appeal against a disputed assessment by notice in writing addressed to the Commissioner within 28 days of the date of service of the notice of the assessment.

Fines and penalties

The following penalties and fines are applicable:

- For the late payment of tax, there is a penalty of 10% of the amount of tax due on the day immediately after such payment was due. If unpaid for 90 days, a further amount of 20% of the tax due is charged; and if still unpaid after this period, then a 10% per annum surcharge will be added which is compounded on a daily basis until the amount of the tax and penalties are fully paid.
- Failure to file a return by the due date will result in a penalty of GBP 50 with a further penalty of GBP 300 if the return is not submitted within three months after the due date.
- Failure to respond to a notice or request to submit information or documentation will result in a fine of GBP 200 on the day the failure occurs and a penalty of up to GBP 500 per day thereafter. Failure to comply beyond a three month period, if convicted, can result in imprisonment.
- For fraudulently, recklessly, or negligently delivering to the Commissioner an incorrect return, accounts, or information, there is a fine of up to 150% of the difference between the actual tax due and the tax due as per the original declaration. The amount of the penalty will depend on:
 - the amount of the tax lost and/or delayed
 - the gravity of the offence (i.e. if deliberate or an honest mistake), and
 - the level of cooperation in the investigation.
- Failure to pay to the Commissioner PAYE or social insurance which has been withheld or should have been withheld will become a criminal offence leading to imprisonment and/or a fine.

- If an amount of PAYE and/or social insurance exceeding GBP 5,000 is outstanding for over three months, the Commissioner will, after giving 14 days notice, publish in the Gibraltar Gazette the name of the person whom the Commissioner has reason to believe has failed to comply with the PAYE regulations.
- Failure to notify the Commissioner of an arrangement, the main benefit of which is to avoid the payment of tax, will result in a fine of GBP 100 on the day the failure occurs and a penalty of GBP 200 per day thereafter.

Significant developments

Tax law 4072/2012, adopted by the Greek Parliament, amended the Greek tax and legal regime by introducing new provisions. The most significant amendments are the following:

- Capital gains derived by legal entities maintaining double entry accounting books from the sale of shares listed on the Athens Stock Exchange, which are acquired from 1 January 2013 onwards, will be taxed based on the general income tax provisions.
- The introduction of a new corporate form, the 'Private Company' (PC).
- Improvement of the investment law using 'fast track' procedures.
- Extension of the possibility of establishment of 'free zones' and customs warehouses (e.g. allowing the commercial and industrial activities therein).

A more radical tax reform is expected, but is being delayed until a new government is formed.

Taxes on corporate income

The corporate income tax (CIT) rate of legal entities is set at 20%.

Resident corporations are taxed on their worldwide income. Non-resident corporations are taxed in Greece on any Greek-source income they derive. Such tax may take the form of a withholding tax (WHT), depending on the nature of the income, or of permanent establishment (PE) taxation, if the criteria for establishment of a PE in Greece are met.

Local/state/provincial tax rates

No local taxes on income are paid at a local level. However, it should be noted that the aforementioned rates are reduced by 40% for profits of companies derived from activities carried out on islands with less than 3,100 inhabitants.

Corporate residence

Corporate residence is determined primarily by place of incorporation. However, based on the effective management criterion under the corporate law rules, the place of legal seat could be relevant.

Permanent establishment (PE)

Subject to related tax treaty provisions, foreign corporations are subject to Greek taxation if they maintain a PE in the country. Such PE may arise in cases of foreign

companies maintaining inventories from which orders are filled; maintaining offices, warehouses, factories, etc.; carrying out any other operations for the purposes of exploiting natural resources; processing raw materials or agricultural products in their own factories or through third parties; or providing services of a technical or scientific nature (surveys, designs, or research).

Note that the local definition of a PE is generally broader than the standard Organisation for Economic Co-operation and Development (OECD) definition; however, where a double tax treaty (DTT) applies, its provision will override the domestic definition.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 23%. The reduced rate on basic necessities is 13%. A super reduced rate of 6.5% for accommodation in hotels or similar establishments (including holiday accommodation and letting of places in camping or caravan sites), medicines of CN3003 and 3004, and vaccines of CN3002 intended for human consumption is applicable. The aforementioned rate is also applicable for children's books, colouring, and drawing books.

Supplies of goods and services to individuals and legal entities subject to VAT and established in European Union (EU) countries (intra-Community supplies) are exempt from VAT (zero rated). Exports of goods and certain services to non-EU countries are also exempt (zero rated).

With the following exceptions, real estate leases are generally exempt from VAT. Lease contracts for shopping centres and logistics centres may also be subject to VAT, on condition that the taxable person opts for the submission to taxation of the leasing right.

Customs duties

Many goods imported into Greece from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff.

Excise taxes

Excise taxes are imposed on energy and electricity products (e.g. petrol, natural gas, electricity), manufactured tobacco, and alcoholic products. The tax rates vary depending on the category of products.

Real estate tax

An annual real estate tax is imposed on real estate located in Greece, which is owned on 1 January of the tax year by individuals or legal entities, regardless of nationality or residence.

The applicable tax rate for legal entities amounts to 0.6%, 0.3%, or 0.1% depending on their profit or non-profit making character and the use of the properties. The tax rate remains reduced at 0.33% for real estate owned by hotel enterprises and used for their business activities.

An exemption from real estate tax is provided for buildings built within three years from the issuance of the initial building permit, unless these have been leased or in any other way used.

Greece

Extraordinary special duty on built surfaces supplied with electricity (special duty on real estate)

An extraordinary special duty, in favour of the Greek state, is imposed on commercial or residential real estate property to which electricity is supplied and which, on the 17th day of September of every year, will fall within the ambit of the real estate duty (in favour of Local Administration). Subject to said special duty is the legal owner or the beneficial owner of the real estate property, whereas the payment liability will be borne by the tenant of the property. In the event that such person is a lessee (i.e. tenant for consideration), that individual can offset payment of the special duty against future or owed leases.

The determination of the payable duty will be calculated as follows: the square metre built surface of the property (as identified by the relevant electricity bills in the context of determining the real estate duty for Local Administration) will be multiplied by the applicable rate of the area where said property is located (designated value zones) and further multiplied by the surcharge rate (deriving from the building age).

Various exceptions from said special duty are provided, in particular, communal areas of apartment blocks and buildings that have been designated as preserved structures.

The special duty on real estate will be collected by the Public Electricity Company (DEH) or alternative suppliers of electricity through the utility bills for electricity sent to consumers.

Special real estate tax

A special real estate tax of 15% is applicable on legal entities owning real estate property in Greece on the objective value of such property. This tax is mainly directed against property held, directly or indirectly, by offshore companies for the purpose of tax avoidance of transfer and inheritance taxes by the real owners. In this context, exemptions apply to listed companies, companies with registered shares up to the individual shareholder (provided such shareholder holds a tax registration number in Greece), companies for which the income derived from the real estate property does not exceed the income from other activities, EU banks, insurance companies, investment funds, etc, on the condition, however, that these are not established in non-cooperative states (*see the Deductions section for more information on non-cooperative states*).

Real estate transfer tax

Each transfer of real estate, which is not subject to VAT, is subject to real estate transfer tax. The tax rates of the real estate transfer tax amount to 8% for the value up to 20,000 euros (EUR) and 10% for the exceeding value of the real estate.

Exemptions from real estate transfer tax for the acquisition of primary residences are determined according to the value of the property.

Stamp taxes

Rentals of non-residential properties are subject to 3.6% stamp duty (with the exception of shopping centres and logistics centres subject to VAT).

In general, loans and interest may be subject to a 2.4% stamp duty. However, there are a number of exemptions, the main one covering bank loans and bond issues.

Other stamp duties may apply, in certain limited cases.

Contribution tax on capital accumulation

A 1% tax contribution is imposed on capital accumulation by:

- business companies and joint ventures
- associations of all degrees and any other form of company, legal entity, or union of persons or society aiming to make profits, and
- branches of foreign companies (unless of EU origin).

For *Societe Anonymes* (SA) companies, an additional 0.1% duty is payable on capital to the competition committee.

Branch income

Profits of branches of foreign companies are subject to CIT at a rate of 20%.

Note that the equivalent of a dividend WHT is also imposed on profit repatriations from the branch to its head office or other foreign branches of the legal entity.

Income determination**Inventory valuation**

Inventories are stated at the lower of cost or market (replacement value). The Greek tax system recognises various valuation methods such as first in first out (FIFO), last in first out (LIFO), weighted average, etc.

Capital gains

In general, capital gains are included in the taxable profits of Greek companies. Certain special rules apply in the case of sales of shares in listed or non-listed entities.

Capital gains tax on sale of listed shares

The sale of listed shares that were acquired up to 31 December 2012, and irrespective of the time of sale of those shares, is subject to a transaction duty at a rate of 0.2%. The capital gains derived from the sale of such listed shares shall be exempt from CIT, on the condition that the capital gain is booked in a special tax-free reserve.

Capital gains derived by legal entities maintaining double entry accounting books from the sale of listed shares, which are acquired from 1 January 2013 onwards, will be taxed based on the general CIT provisions. Any loss, arising within the same year and for the same reason, shall be offset with capital gains. Moreover, if losses arise following the offset, reference is made to the provision on the carrying forward of losses. The law includes details in relation to the specification of profits. Similar provisions are introduced with regard to profits realised by individuals or legal entities keeping income-expenses accounting books. The transaction duty of 0.2% is abolished for such shares.

Transfer tax on sale of non-listed shares

The sale of Greek shares non-listed on the Stock Exchange triggers a 5% tax calculated on the transfer value as either agreed by the parties or determined on the basis of a 'minimum-value' formula set forth by law, whichever is the higher. The aforementioned 5% tax is also due in the case of transfer of foreign non-listed shares by a Greek tax resident, calculated on the consideration agreed. In the case where the seller is a Greek corporation, the payment of the 5% tax does not exhaust the transferor's tax liability.

Greece

Any capital gains arising thereof, are further subject to tax at the standard CIT rate (i.e. they are included in the taxable profits of the company). It should be noted that the 5% tax paid at the time of the transfer may, under certain conditions, be provided as a credit against the company's annual corporate liability.

Moreover, gains arising from the sale of parts of limited liability companies (LLCs) are subject to a 20% tax rate. In cases where the seller is a Greek entity, the tax liability is not exhausted and the respective capital gain is taxed according to the general tax provisions with the 20% tax being credited against the final CIT liability.

Dividend income

Profits distributed from Greek companies are not included in the taxable profits of their shareholders.

A participation exemption is applicable also on dividends received by Greek SAs and LLCs from subsidiaries that have their registered seat in another EU member state, in which they participate, on the condition that these profits are booked in an untaxed reserve account.

Other foreign dividends are included in taxable profits, but a foreign tax credit may be obtained under certain conditions.

Stock dividends

Stock dividends are treated as cash dividends for CIT purposes.

Interest income

Interest income is generally taxable. There are certain special rules that govern the receipt of interest income from bonds by banks and insurance companies.

Partnership income

Both general partnerships (*Omorrythmi Etairia* or OE) and limited partnerships (*Eterorythmi Etairia* or EE) are not tax transparent. They are generally taxed at a rate of 25%, but there are special rules on income determination or cases where partners are individuals.

Rents/royalties income

Income derived from rents and royalties is taxed as ordinary income.

Foreign income

Resident corporations are taxed on their worldwide income. Foreign income received by a domestic corporation is taxed together with other income. If related income tax is paid or withheld abroad, a tax credit is generally available up to the amount of the applicable Greek income tax. Losses incurred abroad can only be offset against foreign profits.

There are no special anti-deferral regimes or controlled foreign company (CFC) rules in Greece.

Deductions

Depreciation

Depreciation of tangible assets is compulsory for financial years ending after 30 December 1997 (not compulsory for financial years ended within the period from 1

January 1992 through 30 December 1997). Fixed assets with acquisition value of up to EUR 1,200 each may be written off to profit and loss in the year acquired or when used in operations. Depreciation is computed on the basis of the straight-line method or, in some cases, the declining-balance method on the acquisition value, increased by any additions and improvements. The straight-line method or the declining-balance method must be used consistently. However, new companies, for the three consecutive financial years that follow the financial year in which their productive operation commenced, are permitted to depreciate all their fixed assets either at 0% or at a rate equal to 50% of the applicable rate, provided that the selected rate will not change from year to year. If the declining-balance method is used, the straight-line method rates increase three times.

For each category of assets, maximum and minimum annual depreciation rates are determined by a presidential decree. Companies may select any rate within this range, provided that this is consistently applied.

Goodwill

There are some court cases which support the deductibility of goodwill as a start-up expense, but the specifics of each case must be carefully considered.

Organisational and start-up expenses

The amount of start-up expenses (including costs for acquisition of real estate) is amortised, either as a lump sum during the year of its realisation or in equivalent instalments within a five year period. Specifically, expenses realised by financial leasing companies in relation to the acquisition of real estate, which will constitute the object of an agreement of the same law, may be depreciated in equivalent amounts, in analogy to the years of duration of the agreement.

Interest expenses

Accrued interest from loans or credits of a company is generally deductible, with the exception of interest on arrears due to the debt of taxes, duties, contributions, and fees to the state and other legal entities governed by public law; interest on loans for the purchase of shares in any type of company, to the extent that this participation is transferred within a two-year period; interest on loans used for the purchase of shares in a legal entity established in non-cooperating states or states with preferential tax regime; and interest paid to companies established in such states.

Bad debt

Tax-deductible bad debt provisions are calculated at 0.5% on the stated value of invoices for sale of goods or provision of services, after a reduction for discounts, sales to the state or other entities governed by public law and the special consumption tax imposed in certain cases. Special restrictions and rules apply to certain transactions, while there is a recapture system for provisions which are not realised.

Charitable contributions

Donations and sponsorships paid to charitable institutions, non-profit making foundations, churches and monasteries, and various other welfare institutions may be deductible up to 10% of the total net profits or income arising from the balance sheet of the legal entity.

Pension expenses

Group life insurance premiums, which include pension plans, may be deducted at up to EUR 1,500 per employee.

Greece

Payment for directors

Fees of board members are taxed at source at a rate of 35%. Such amounts are tax-deductible.

Bonuses (benefits in cash, on top of regular remunerations and overtime payments) paid to executives of credit institutions up to financial year 2013 are subject to special increased taxation. Taxation is based on the general progressive tax scale applicable to individuals provided the total annual income of the executive does not exceed EUR 60,000 and the amount of the bonus does not exceed 10% of the total annual regular remuneration. For amounts exceeding the outlined limitations, taxation at source based on a progressive tax scale is provided as follows:

- Up to EUR 20,000: 50%.
- EUR 20,001 to EUR 40,000: 60%.
- EUR 40,001 to EUR 60,000: 70%.
- EUR 60,001 to EUR 80,000: 80%.

Fines and penalties

Fees received from activities constituting a criminal offence, from penal clauses, fines, and penalties are not recognised as deductible expenses.

Taxes

Taxes, other than income tax and real estate tax, are recognised as deductible expenses if supported by related tax returns and payment receipts and borne by the company.

Other significant items

In general, expenses are deductible subject to certain conditions. The following is a list of certain key conditions or restrictions on expense deductibility:

- The deductibility of hotel expenses, expenses for corporate gifts, education of personnel, special clothing of personnel, and mobile telephone expenses are subject to specific conditions.
- Payroll expenses are not deductible when they are not paid through professional bank accounts or cheques paid through the same accounts.
- The value of raw and ancillary materials and other goods (plus processing thereon), which is paid to a legal entity whose role consists exclusively of the invoicing of the transactions, while the delivery of goods or provision of services is conducted by a third party, is not deducted from the gross profits of companies.
- Car expenses are generally deductible up to 70% for motor vehicles up to 1,600 cc and 35% for motor vehicles exceeding 1,600 cc.
- Expenses concerning transactions realised between Greek companies and entities established in preferential tax regimes may be deductible for Greek companies, on the condition that satisfactory evidence is provided that the transactions are real, usual, and do not result in the transfer of profits, income, or capital for the purpose of tax evasion or tax avoidance.

Accrued expenses are, in principle, non-deductible until they become final and settled, supported by respective invoices.

Net operating and capital losses

Losses can be carried forward five years. Carrybacks are not permitted.

Payments to foreign affiliates

Royalties, interest, and service fees paid to foreign affiliates are deductible expenses under certain requirements and conditions.

Special restrictions on transactions with non-cooperative states and states with preferential tax treatment

Greek tax law has established rules in relation to non-cooperating states and states with preferential tax treatment.

Non-cooperating states are defined as states that are not EU member states and which have not concluded agreements of administrative assistance in the tax sector with Greece or with, at least, 12 other states. Non-cooperative states are enumerated in a Ministerial Decision to be issued annually.

Pursuant to the Ministerial Decision for 2012, the non-cooperating states for 2012 are specified as follows:

- Andorra
- Anguilla
- Antigua & Barbuda
- Aruba
- the Bahamas
- Bahrain
- Barbados
- Bermuda
- Belize
- British Virgin Islands
- Brunei
- Cayman Islands
- the Cook Islands
- Costa Rica
- Dominica
- former Yugoslav Republic of Macedonia (FYROM)
- Gibraltar
- Grenada
- Guatemala
- Guernsey
- Hong Kong
- Isle of Man
- Jersey
- Lebanon
- Liberia
- Liechtenstein
- Malaysia
- Marshall Islands
- Mauritius
- Monaco
- Montserrat
- Nauru
- Netherland Antilles
- Niue
- Panama
- Philippines
- St. Lucia
- St. Kitts and Nevis
- St. Vincent and the Grenadines
- Samoa
- Seychelles
- Singapore
- Turks and Caicos
- Uruguay
- US Virgin Islands
- Vanuatu

An individual or legal entity, irrespective of its legal form, is considered located in a preferential tax regime, even if its residence of registered office is located in an EU member state, in cases where it is not subject to taxation in this state or is *de facto* not subject to taxation, or is subject to tax on income or capital at an amount which is lower than 60% of the tax that would have been due, in accordance with Greek tax legislation, if such entity were resident or were maintaining a PE in Greece.

Expenses concerning transactions realised between Greek companies and entities established in non-cooperative states or preferential tax regimes may be deductible for Greek companies, on the condition, however, that satisfactory evidence is provided that transactions are real and usual and do not have as a result the transfer of profits or income or capital with the purpose of tax evasion or tax avoidance.

Group taxation

Group taxation is not permitted in Greece.

Greece

Transfer pricing

Article 26 of L.3728/2008 on 'Monitoring the Markets and other provisions' of the Ministry of Development introduced, for the first time in Greece, rules on the documentation of prices of intergroup transactions with the intention of "detecting possible overpricing of intergroup transactions, expanding artificially the cost of sold products and services, having as a consequence the reduction of the gross profit of enterprises in Greece, picturing the increase of sale prices to the final consumers as necessary and justified".

In accordance with the relevant transfer pricing rules, companies operating in any form in Greece are obliged to apply to their transactions with companies that are connected to them, terms in accordance with the arm's-length principle.

For this purpose, companies must document the prices for all their inter-group transactions with a complete and standardised study of documentation of prices. The study consists of the 'basic documentation file', concerning groups in which the parent company is Greek and the 'Greek documentation file', with regard to Greek subsidiaries of foreign groups and foreign companies operating in any form in Greece.

These files must be made available when requested by the competent authorities of the Ministry of Development within 30 days from the notification of the relevant request. Moreover, companies that have inter-company transactions must submit annually, within four months and 15 days from the end of the accounting period, to the Ministry of Development a catalogue in which the data of their intergroup transactions, and specifically the number and their value, are documented. In case of non-compliance with these obligations, an independent fine is imposed, equal to 10% of the value of the transactions for which the relative documentation was not submitted or the foreseen catalogue was not submitted timely.

If an infringement of the arm's-length principle is established, the competent tax authorities are immediately informed in order for the provisions of tax legislation and the imposition of the relevant tax penalties to apply.

In parallel to the aforementioned regimes, transfer pricing is also regulated by the Income Tax Code (ITC). Specifically, the ITC expanded the frame of application of the provision to leases of movable or immovable property, while the condition of (direct or indirect) tax avoidance taxes for the application of the provision was abolished. Moreover, the provisions provide for a 20% fine on the surplus net profits arising on behalf of enterprises in case of infringement of the arm's-length principle, as well as a fine equal to 20% on the value of the transaction in case of non-compliance, faulty compliance, or overdue filing of the required documentation. With reference to the obligation of documentation, the deadline within which enterprises are obliged to present the file is 30 days and the minimum amount of transactions for which documentation is required is EUR 100,000 annually.

Thin capitalisation

According to the relevant thin capitalisation rules, accrued interest on loans paid to affiliated companies are deductible on the condition that the debt to equity ratio is 3:1.

There are certain exceptions from the application of the thin capitalisation rules, applicable to banks, factoring companies, leasing companies, investment service companies, and securitisation special purpose vehicles (SPVs). Loans assumed by third companies, and for which any kind of guarantee has been issued by the afore

mentioned connected companies, are added to the total amount of loans undertaken by the connected companies.

Controlled foreign companies (CFCs)

There are currently no CFC rules in Greece.

Tax credits and incentives

Foreign tax credit

Tax paid abroad for income taxable in Greece is credited but is limited to the amount of Greek tax due.

Incentives for the maintenance of workplaces

Legal entities, which suffer a reduction of turnover for two consecutive accounting periods without reducing their workforce, can enjoy a reduction of the tax rate by three percentage units. However, a revocation of the granted benefit and imposition of further tax in case of reduction of personnel or increase of the turnover within the three-year period is provided.

Other tax incentives

Apart from the aforementioned tax incentives, L. 3908/2011 on 'Bolstering of Private Investments for Economic Growth, Entrepreneurship and Regional Sustainability' (the new Investment Incentive Law) includes the following tax incentives:

- Any investment plan in any sector of the economy may receive benefits under the law. Only certain cases explicitly specified in the law are exempt (e.g. power generation from photovoltaic arrays).
- The types of subsidised expenditures for tangible and intangible assets are indicatively mentioned, whereas the expenses that may not be subsidised are exhaustively enumerated. Especially the subsidy percentage for the expenditure of intangible assets may not exceed 50% of the total eligible expenditure of the investment plan.
- The term of 'new' enterprises is specifically defined for the new law's purposes. An enterprise is considered as 'new', if the establishment procedures have not been completed before the enterprise applies for aid according to the new law or if it has been established within the past 24 months prior to filing the application.
- There are three types of aid: (i) tax exemption, (ii) subsidy, and (iii) leasing subsidy.
- The new law lists three categories of General Investment Plans and specifies the type of aid for each of them: (i) General Entrepreneurship which only the tax exemption may be granted for, whereas for the (ii) Technological Development and the (iii) Regional Sustainability investment plan, the subsidy and/or the leasing subsidy may be granted in principle, with different percentages for the existing and the new enterprises. The remaining percentage may be covered by tax exemption.
- The law also lists four categories of Special Investment Plans: (i) Youth Entrepreneurship, (ii) Major Investment Plans, (iii) Integrated Long-Term Investment Plans, and (iv) Synergy and Networking. The aids granted are further specified by type, volume, and/or percentage for each of them.
- The percentages of aid available are specified in conjunction with the division of the country into three zones (A, B, and C) and are the following:

Greece

Zones	CIT aid available (%)		
	Large enterprises	Medium-sized enterprises	Small and micro enterprises
ZONE A (<i>Prefecture of Attica, Prefecture of Viotia</i>)	15	20	25
ZONE B (Prefectures with GDP per capita > 75% of the average GDP of the country)	30	35	40
ZONE C (Prefectures with GDP per capita < 75% of the average GDP of the country)	40	45	50

In any case, the above percentages should comply with the ceiling set by the Regional State Aid Map (RSAM) approved by the European Commission.

- An additional 5% aid percentage, up to the ceiling set by the RSAM, is granted for investment plans in Industrial Entrepreneurship Zones and Innovation Zones. Benefits are also granted up to the ceiling set by the RSAM, by enterprise size and up to 50% of the eligible expenditure, for investment plans on islands and regional units of islands that belong administratively to the regions of the mainland.
- The new law sets a ceiling for each aid (EUR 10 million to 15 million in principle, but graduated according to various criteria).
- The period for filing the application (April and October, with the exception of large investment projects) and the conditions for approval are further specified.
- The law specifies the conditions and evaluation criteria for each investment project and determines, in general, the procedure for evaluation, approval, and monitoring of implementation of investment projects (further specification by ministerial decisions).
- The mode of payment of each type of aid is further determined. Especially for the aid of tax exemption, the law stipulates that the amount of tax exemption aid is annually formed with the following restrictions:
 - The enterprise is entitled to the use benefit of the incentive from the fiscal year in which the decision on the completion and beginning of the productive operation of the investment has been published. In this fiscal year, the ceiling of tax exemption to be used is set at $\frac{1}{3}$ of the approved amount of the tax exemption aid.
 - In the following fiscal year, the ceiling of tax exemption to be used, including the aid for the first fiscal year, is set at $\frac{2}{3}$ of the approved amount of the tax exemption aid.
 - The remaining amount of the approved tax exemption aid may be covered within ten fiscal years for new enterprises and within eight fiscal years for existing enterprises following the fiscal year in which the decision on the completion and beginning of the productive operation of the investment has been published.
- The amount of the tax exemption aid shall be shown as a tax-free reserve in a special account in the enterprise's accounting books and shall consist of the income tax on the net profits reported in the initial timely income tax return which shall not be paid based on the tax exemption granted.
- Where the equipment is acquired through leasing, the tax exemption to which the enterprise is entitled in each fiscal year is calculated on the part of the purchase price of the equipment which is included in the rents already paid by the end of this fiscal year.
- The law stipulates that the amounts of subsidies and leasing subsidies as well as of tax exemption shall be shown as tax-free reserves in special accounts. Said reserves may not be distributed or capitalised and shall be returned in case of dissolution

of the enterprise. In case of distribution or capitalisation, certain penalties shall be imposed.

- The law stipulates that any aid to be paid is exempt from any tax, stamp duty, right, and any other charge in favor of the state or any third party.
- Finally, the new law specifies the obligations of the beneficiary enterprises and penalties in case of non-compliance.

The above rules are very detailed, and analytical and careful advices needs to be sought before making any decision in respect thereof.

Withholding taxes

Profits distributed by Greek SAs or LLCs (and also some associations) in the form of dividends, Board and Directors fees, profits distributed to personnel, as well as interim dividend payments made to individuals or legal entities, Greek or foreign, and independent of whether the payments are made in cash or in kind (shares), are subject to 25% WHT.

Tax is withheld by Greek SAs, LLCs, and associations with exhaustion of tax liability of the beneficiaries. An exception is provided with regard to individuals that are taxed on their total income at a tax rate lower than the WHT rate, in which case, income derived from dividends or the aforementioned participations shall be taxed based on the general provisions with a credit on the tax withheld.

WHT shall not be imposed on dividends paid to a legal entity established in another member state of the European Union, subject to the conditions of L.2578/1998 (Parent-Subsidiary Directive).

25% WHT shall also be applicable on the distribution of profits remitted or credited by a PE of a foreign legal entity in Greece to its registered seat or to another PE located abroad.

The dividend WHT is equally applicable for distributed or capitalised profits of previous fiscal years.

The following table provides a summary of the WHT applicable under the respective DTT entered into by Greece:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident individuals and companies	21/25 (1)	10/20 (2)	0

Notes

- The 21%/25% WHT applies to distribution of dividends by Greek SAs and Greek LLCs. The rate is 21% for distributions within 2011 and 25% from 2012 onwards.
- Interest earned on deposits with banks operating in Greece, as well as on any kind of bonds, is subject to WHT at the rate of 10% withheld at source. WHT on interest payable to non-Greek residents is 40%.
- Payments of royalties and service fees to foreign residents are subject to a WHT at the rate of 25%.
- It should be taken into account that such rates are based on a new DTT applicable as of 1 January 2011, whilst other rates have been applicable in the past.
- The rate of 5% will apply if the beneficial owner is a company which holds directly at least 25% of the voting power of the company paying the dividends.
- The rate of 5% applies in case the beneficiary is a company (excluding a partnership) and directly holds at least 25% of the capital of the paying company.
- The rate of 5% is applicable only for the right to use cinematograph films.
- Rate of 5% applies to loans not incorporated into negotiable instruments and granted by banks.
- A rate of 5% is applicable to shareholders of 25% and above.
- The rate is 5% applies if the royalties consist of payments of any kind received as a consideration for the use of or the right to use any copyright of literary, artistic, or scientific work, including cinematograph films.
- Exemption ('0' rate) applies to payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films and films or tapes for television or radio broadcasting.
- Interest (on bonds, securities, notes, debentures, or on any other form of indebtedness) received from sources within Greece by a resident or corporation of the United States (US) not engaged in trade or business in Greece through a PE therein, shall be exempt from Greek tax but only to the extent that such interest does not exceed 9% per annum; but such exemption shall not apply to such interest paid by a Greek corporation to a US corporation controlling, directly or indirectly, more than 50% of the entire voting power in the paying corporation.
- The 5% rate is applicable if the royalties consist of payments of any kind received as a consideration for the use of industrial, commercial, or scientific equipment, and the 10% rate is applicable for all the other cases.
- The 8% rate is applicable when the beneficiary of the interests is a bank or a financial institution, 10% rate is applicable for all the other cases.
- Exemption ('0' rate) applies to copyright royalties and other like payments in respect of the production or reproduction of any cultural or artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on films or videotapes or other means of reproduction for use in connection with television broadcasting).

In general, it should be noted that certain DTTs may include specific clauses in specific cases that are not all captured in the table; therefore, a careful review of each DTT is highly advisable.

Tax administration

Taxable period

The taxable period is the financial year, which can end either on 30 June or 31 December.

Tax returns

CIT returns of Greek SAs, LLCs, and branches of foreign companies are filed on a special form within four months and ten days from the end of their financial year. By a decision of the Minister of Finance, the filing date for SAs may be extended a few days, depending on the last digit (figure) of their tax registration number (known in Greece as the *arithmos phorologikou metroou* or AFM). Branches and subsidiaries (at least 50% participation) of foreign companies may follow the financial year of the parent company. A Greek company that is at least 50% held by another Greek company that is in turn a subsidiary of a foreign company that has participation with the same or higher

Greece

percentage may also follow the financial year of the foreign parent company. The CIT return constitutes the basis for assessment.

Tax returns are required to be submitted electronically from 2011 onwards.

Payment of tax

CIT and tax prepayment (80% [100% for banks operating in Greece] of the current year's CIT less tax withheld at source) based on the tax return are paid in eight equal monthly instalments, the first of which should be paid upon filing. Therefore, for companies whose financial year ends on 31 December, the final instalment is payable in December. For newly established companies, the pre-payment is reduced to 50% for the first three years of their operating. A deduction of 1.5% is granted in case of a lump sum payment of CIT liability.

Audit cycle

Tax audit procedures

The tax audit commences with the issuance of an audit order for tax open years, usually not more than five. The order concerns the audit of all tax issues (CIT, VAT, WHT, capital gain tax, etc.). The duration of the audit may vary from a few weeks to a few months, in certain cases.

A regular or temporary audit may also be conducted from the office of the audit authority. Such audit from the office is based on the data of the file, the sheets of information, the audit reports of the Financial Crime Prosecution Unit and other authorities of the Ministry of Finance, the books and records that the taxpayer may be required to submit, the data and information of the entities stipulated in article 17 of L. 3842/2010, and the data accruing from the electronic data processing at the General Secretariat for Information-Security Systems. The possibility of issuing from the office an act of partial tax determination for one, or more, fiscal years, without auditing all the books and records and without requiring the audit of other taxes, also applies, in case where it is derived from other data at the disposal of the audit authority (i.e. information sheets, reports of the Financial Crime Prosecution Unit, electronically processed data of the General Secretariat for Information-Security Systems) that the liable entity omitted to declare, or inaccurately declared taxable income, or even miscalculated the percentages, or deductions.

However, the ability of conducting an audit at the registered seat of the legal entity, specifically with regard to cases that are explicitly stipulated in the law, is in parallel applicable.

Following the audit and the notification of tax audit findings, the company may in turn:

- Negotiate with the tax authorities with a view to reducing the tax burden and achieve an 'out of court settlement'. The out-of court settlement offers the possibility to reduce additional taxes (not the principal amount of tax) at the rates provided now under the provisions of L.2238/94 (reduction of the additional tax to $\frac{3}{5}$ or $\frac{1}{3}$ depending on the case). The conclusion of such a settlement presupposes that the company accepts the findings of the audit (e.g. of expenses) for the audited years and is likely to face the same issues in the following years as well.
- Take the case to court (filing of a recourse), which necessitates an advance payment (50% of the taxes and penalties assessed). The first decision normally takes two to three years and another six to eight years until a decision by the Court of Appeal and

Supreme Court is issued. There are several measures being currently implemented in an attempt to reduce this time.

- There is also a possibility to take the case to a Fiscal Arbitration Body, competent to arbitrate over dispute resolution arising from tax assessments exceeding EUR 150,000, by filing an application and subject to the consent by the Minister of Finance. The commencement of operation of the Fiscal Arbitration Body is to be determined by a Presidential Decree to be issued following the suggestion of the Ministers of Finance and Justice; to date (May 2012), such Presidential Decree has not been issued.

Criminal sanctions are also imposed on the company's representative under certain conditions, which are waived in the case of settlement on the amount of taxes assessed.

Tax auditors' practice

The complexity of the Greek tax legislation and the vagueness of its requirements enable the tax auditors to dispute either the company's results reflected in its accounting records or to disallow expenses. This is true in all tax audits and in spite of companies' endeavours to comply with the tax requirements, tax audits always result in assessment of additional taxes and penalties.

The amount of additional taxes depends mainly on the following:

- Company's vulnerability because of nature of business and transactions.
- Taxes already paid on the basis of the company's income tax returns.
- Profits declared by competitors.
- Weaknesses and shortcomings which the tax auditors might reveal, if a full audit is carried out.

The amount of additional taxes is capped and cannot exceed:

- 60% for the submission of a delayed tax return and
- 120% for the submission of an inaccurate submission or non-submission of a tax return.

In respect of deductible expenses, the legislation prescribes, among other requirements, that such expenses must be of a 'business' nature, without defining what a business expense is. Consequently, the tax auditors dispute the deductibility of various items arguing that, in their opinion, they are not contributing to the company's business.

In a worst-case scenario, if serious violations are detected that make the audit verifications impossible, then the validity of the accounting books may be contested, resulting in the deemed (out-of-books) profit calculation and the imposition of heavy penalties and additional taxes.

Specifically, the validity of the books may be contested on the basis of the kind and gravity of infringements, which are divided in two categories:

- Infringements determining the books as 'inadequate'.
- Infringements determining the books as 'inaccurate'.

In the extreme cases, where the accounting books are treated as 'inadequate' or 'inaccurate', the taxable income and the tax due by the company will not be calculated according to book figures; but instead, the out of books determination method is applied, according to which the company's gross income of each financial year will be

Greece

multiplied by the net profit rates defined by the Greek Ministry of Finance. These rates have been defined on the basis of the business activities of each company. In cases where the books are deemed to be 'inaccurate', these rates would be surcharged by 40% to 80%, depending on the kind of infringement from which the inaccuracy of the books has resulted.

Greek SAs and LLCs whose annual financial statements are subject to a statutory audit by individual Certified Auditors and audit firms are required to obtain an 'annual tax certificate' from their certified auditors upon the completion of a tax audit conducted, confirming compliance with Greek tax legislation. The tax audit is conducted on specific tax areas as defined by a special audit program issued by the Ministry of Finance in cooperation with the Committee of Accounting Standardization and Auditing (ELTE). The audit program will be updated annually and is in accordance with the provisions of International Standard on Non-Audit Assurance Engagements 3000.

Statute of limitations

The right of the Greek state to seek to collect unpaid taxes is normally five years starting from the end of the year in which the relevant tax return should be filed. For example for taxes due in 2011, the clearance VAT return should be filed in 2012 and the statute of limitation expires on 31 December 2017. However, in the case where a return is not filed, then the statute of limitation is extended to ten years. Furthermore, it should be noted that the statutes of limitation may be extended by law. This has happened many times in the past.

Other issues

Choice of business entity

The main differences between a subsidiary (i.e. SA or LLC) and a branch of a company from the law/establishment perspective are as follows:

- A subsidiary is a separate legal entity from its parent company, whereas a branch does not form a separate legal entity, does not have its own shareholders, and consequently the funds needed for its operation are transferred from the overseas parent company.
- The parent company of a branch must be either the equivalent of a Greek SA or an LLC, whereas there is no such restriction for subsidiaries.
- The day-to-day management of a branch is exercised by the legal representative, a person appointed by the parent company, whereas an SA is represented by its board of directors (BoD) and an LLC is administered and directed by the administrator(s).
- No minimum capital is required for the establishment of a branch, nevertheless the share capital of the parent company should be at least EUR 60,000 if it is an SA and EUR 4,500 if it is an LLC.
- An SA appears to be a more prestigious type of company than a branch and an LLC. This has a mainly psychological effect. Certain investors still tend to opt for the establishment of an SA company, particularly if they would like to participate in public tenders, etc.

The main legal differences between an SA and an LLC in Greece from a company law/establishment perspective are as follows:

- An SA is managed by a BoD consisting of at least three members, whereas an LLC can be managed by only one individual, the administrator (legal entities are permitted to be appointed as BoD members or administrators). Both BoD members

and administrators have to acquire a Greek tax registration number and a Greek residence permit before the establishment of the companies. Obtaining a residence permit for non-EU citizens is a time consuming procedure.

- The shareholders of an SA are not required to be registered with the Greek tax authorities, whereas the partners of an LLC have to be registered with the Greek tax authorities and this may prove to be a time consuming procedure.
- An SA is established by virtue of registration or approval (in case the company's share capital is higher than EUR 3 million as well as in special cases) of the notarial deed which embodies the company's Articles of Association (AoA). The announcement of the Ministry of Development, containing a summary of the AoA, must be published in the 'Bulletin of *Societes Anonymes* and Limited Liability Companies' of the Government Gazette. Generally, the registration of a SA requires approximately one to two working days after submission of relevant documentation. However, the time period may be extended to ten working days, in the case that a special approval by the Ministry of Development is required. Whereas an LLC is established by a notarial deed, which incorporates the company's AoA, filed with the relevant authority (Registry with the Court of First Instance). A summary of the AoA must be published in the 'Bulletin of *Societes Anonymes* and Limited Liability Companies' of the Government Gazette. Such registration usually takes three to five working days after the signature of the notarial deed.
- An SA company is supervised by the Greek Ministry of Development (Prefecture), which necessitates certain filings to be performed (e.g. minutes of BoD, general announcements, financial statements). Whereas, at least at this stage, no supervising authority exists for an LLC and thus its filing requirements are less restrictive.

New corporate form: the 'Private Company' (PC)

- The PC constitutes a legal entity and is commercial in nature, even if its object is not per se commercial. The PC should have a capital of at least EUR 1, whilst its partners participate in the PC by means of capital, non-capital, and guarantee contributions.
- The participation in the PC presupposes the acquisition of one or more capital parts. The capital parts should have a nominal value of at least EUR 1. The PC is not entitled to acquire, either directly or indirectly, its own capital parts.
- The PC has its registered seat in the municipality referred to in its articles of association, whilst the transfer of the registered seat of the PC in another country of the European Economic Area (EEA) does not necessarily result in the dissolution of the PC, provided that the recipient country recognises the transfer and the continuity of legal personality. The PC is not obligated to have its actual seat in Greece, whilst the PC is capable of establishing various types of secondary establishments either in Greece or abroad.
- The term of the PC is definite; if not otherwise stipulated in the articles of association of the PC, the PC has a term of 12 years following its establishment.
- The PC is administered and represented by one or more administrators.
- The administrator represents the PC and conducts in its name all actions pertaining to the administration of the PC, the management of its assets, and, in general, the pursuit of its objects. Actions of the administrator, even if falling outside the corporate objects, bind the PC vis-à-vis third parties, unless the PC proves that the third party knew or ought to have known the violation of the company's objects.
- The provisions of One Stop Shop Authority are accordingly applied to the establishment of the PC. The establishment of the PC is effected by means of registering the PC with the General Electronic Commercial Registry (GEMI).
- The PC drafts: (i) the balance sheet, (ii) the profit and loss account, (iii) the appropriation account and (iv) the appendix incorporating all required information for the comprehension of the financial statements, as well as the report of the administrator in relation to the corporate activity for the ending fiscal year.

Greece

- The PC is dissolved: (i) at any time following a resolution of the partners, (ii) when its definite term has expired, unless the term of the PC is extended by virtue of a resolution of the partners, (iii) if the PC defaults, and (iv) in all other circumstances contemplated by the law or the articles of association.
- As the PC was only introduced in April 2012, no practical experience is yet available as to its implementation and use.

Significant developments

In 2012, the Congress of the Republic of Guatemala approved Decree No. 4-2012, which came into effect on 25 February of the same year, and Decree No. 10-2012, which will come into force starting 1 January 2013. These amendments have been incorporated into the appropriate sections of this summary.

Taxes on corporate income

The tax system of Guatemala is a unitary system, whereby income of all kinds, other than capital gains, is lumped together and subject to a single tax. The components of gross income subject to tax are usually business income, interest, dividends, rent, salaries, and services. Companies are subject to income tax only on their Guatemala-source income. Dividends and other income payable abroad are taxed separately by way of withholding taxes (WHTs).

During 2012, there are two income tax regimes in Guatemala: general and optional.

Starting 1 January 2013, the income tax systems shall be the following: the system on earnings from lucrative activities, replacing the optional 31% system, and the simplified optional system on income from lucrative activities, which replaces the general 5% income tax system.

These systems are disclosed below.

General income tax regime

For 2012, a rate of 5% is applicable to a company's gross income from Guatemalan sources (less exempt income).

A rate of 5% is applicable on gross revenue of juridical entities performing mercantile and non-mercantile activities, resident in Guatemala.

The tax is payable under flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date.

Starting 1 January 2013, this system will be named the simplified optional system on income from lucrative activities, and the tax rate will be 6% on income.

Guatemala

Optional income tax regime

For 2012, a rate of 31% is applicable to a company's taxable income from Guatemalan sources.

A rate of 31% is applicable on net income of juridical entities and individuals resident in Guatemala.

Under this system, the tax is determined and paid at the end of each quarter, without prejudicing the end-of-period final tax liquidation.

Starting 1 January 2013, the optional income tax system shall be replaced by the income on earnings from lucrative activities system, and the tax rate shall remain at 31%. This shall vary starting from 2014, when the tax rate shall be 28%.

Corporate residence

The place of incorporation determines corporate residence. Entities incorporated under Guatemalan laws are required to have their fiscal and corporate residence in Guatemalan territory.

Permanent establishment (PE)

For 2012, there are no specific provisions that determine PE.

Starting 1 January 2013, Decree No. 10-2012 includes PE, i.e. activities conducted in the country in a continuous manner, either in a fixed business place or facilities conducting work of any kind, except for insurance and refinancing activities, brokers, independent agents, etc. acting in the normal turn of events.

Other taxes

Value-added tax (VAT)

A 12% VAT is levied on the sale or transfer of merchandise and on non-personal services rendered or effected in Guatemala. The tax is payable to the government by way of the invoice method, whereby the tax charged to the customers is offset by the VAT paid over purchases, and the government collects the net resulting amount. The issuance and circulation of credit titles is VAT-exempt.

Sale of goods

The taxable amount on the sale of goods includes the sales price, less any discounts provided under sound commercial practices, plus other charges shown on the invoice.

Services

The taxable amount of services includes the price of the service, less any discounts provided under sound commercial practices, plus financial charges and products used to render the services.

Imports and leases

The tax base for imports is the value declared for import duties computation purposes.

The tax base for leases of movable or immovable property is the value of the lease.

Exempted sales and services

The following items are exempt from VAT:

- Importations made by:
 - cooperatives legally constituted as registered on imported machinery, equipment, and other goods relating to the activity or service of the cooperative
 - individuals and juridical entities under temporary importation regulations, and
 - diplomatic and consular missions accredited before the Guatemalan government.
- Banking institution services and their agents.
- The issuance, circulation, and transfer of credit bonds, value bonds, and stocks of any kind.
- Interest accrued by credit bonds and other obligations issued by mercantile partnerships, negotiated through an authorised stock exchange.
- Exports of goods and services.
- Contributions and donations to educational, cultural, assistance, or security service partnerships, constituted as not-for-profit entities.

VAT return

The amount payable to the *Superintendencia de Administración Tributaria (SAT)*, Guatemala's tax authority, is the difference between the debits and credits accrued during the tax period (one month) and is paid monthly by filing a tax return in the following calendar month at the end of each tax period.

Refunds of VAT

The VAT credit can be claimed on monthly, quarterly, or semiannual tax periods. The refund of VAT credit corresponds to exporter taxpayers who cannot offset the VAT credit with VAT debts.

In addition, the VAT credit can be claimed by those taxpayers who have a high percentage of sales to entities exempt from VAT.

Import duties

The Customs Duties on Imports (DAI) are contained in the Central American Tariff System (SAC), which contains the tax rates applicable to goods imported into the Guatemalan Territory, ranging from 0% to 20%.

The import duties apply to the customs value declared by the importer.

Real estate tax

Real estate taxes are assessed annually at 2 Guatemalan quetzales (GTQ) per thousand on declared property values of from GTQ 2,000 to GTQ 20,000, at GTQ 6 per thousand on values from GTQ 20,000 to GTQ 70,000, and at GTQ 9 per thousand on values in excess of GTQ 70,000 (e.g. property valued at GTQ 1 million will pay real estate taxes of GTQ 9,000).

Transfer of property

VAT is payable on each transfer of title to real estate; however, as of 25 February 2012, only the first sale of real estate is taxable under this regime, and the subsequent sales are taxed under the stamp tax regime.

Stamp taxes

Other than sales invoices, contracts, and documents subject to VAT, and other minor exemptions, a stamp tax must be paid on all documents covering commercial and legal

Guatemala

transactions (e.g. collection of dividends), either by preparing the document on *papel sellado*, which is special stamped paper, or by affixing stamps on the documents. This tax is also assessed on documents issued abroad, other than drafts or promissory notes and commercial invoices from foreign suppliers. Letters of credit and acceptances involving international transfers of funds are generally exempt from stamp taxes.

The normal tax rate is 3% and is calculated on the face value of the documents or on the gross value of the related transaction.

It should be noted that as of 1 January 2013, the stamp tax on dividends payment or credits will be repealed, since on that date, book I of Decree No. 10-2012 will enter into force, which states that a 5% income tax should be paid on dividends payments or credited in account equity.

Solidarity tax (*Impuesto de Solidaridad or ISO*)

The ISO tax rate of 1% is assessed on the net assets of a corporation, or on the gross income of a corporation, whichever is higher, and there is no limit on the amount to be paid. Tax paid may be credited against the corporation's income tax. If the annual business tax exceeds the income tax, no reimbursement is possible.

The tax is to be paid quarterly on the basis of the corporation's opening balance sheet for each fiscal period.

Social security contribution

Corporations contribute 12.67% of their monthly payroll and employees contribute 4.83% of their monthly salary to social security.

Branch income

In Guatemala, branches are taxed as any other legal entity. There are no specific taxes for branches.

Income determination

Inventory valuation

For tax purposes, taxpayers are authorised to use any of the following methods for valuing stocks (i.e. inventory), provided they technically fit the taxpayers' business and are consistently applied through 31 December 2012:

- Industrial, commercial, or service concerns:
 - Cost of production or purchase.
 - Asset value.
 - Sales prices less selling expenses.
 - The lower of cost of production or purchase and market.
- Farm-cattle outfits:
 - Cost of production.
 - Estimated cost at fixed prices.
 - Selling price for the taxpayer.
 - Purchase costs.

Under the provisions of Decree No. 10-2012, the inventory valuation methods to be used from 1 January 2013 are as follows:

- Cost of production.
- First in first out (FIFO).
- Weighted average.
- Historical price of assets.
- Estimated cost at a fixed price (additional for livestock activities).

Capital gains

Capital gains are taxed at 10% in the general income tax regime and at 31% in the optional income tax regime. Capital losses can be netted only against capital gains, up to a maximum of five years. This provision will be in force up to 31 December 2012.

Under the provisions of Decree No. 10-2012, in force as of 1 January 2013, the regime of capital income, capital gains, and capital losses is established with the following tax rates:

- Real estate equity income: 10%
- Income from trading movables: 10%
- Capital gains and losses: 10%
- Incomes from lotteries and raffles: 10%

Dividend income

Dividends from domestic subsidiaries and other domestic corporations are not subject to income tax withholdings if Guatemalan income tax has been paid. This provision is in force up to 31 December 2012.

According to the provisions of Decree No. 10-2012, in force as of 1 January 2013, dividends earnings and profits are subject to a 5% income tax.

Interest income

As of 31 December 2012, interest earned by residents other than banks are subject to a WHT of 10%; such interest shall be treated as exempt income in the annual tax return.

As of 1 January 2013, pursuant to Decree No. 10-2012, all interest income will be subject to a 10% income tax.

Foreign income

Foreign-source income received by a domestic corporation is generally exempt from Guatemalan income tax.

Deductions

Deductions apply only under the optional income tax regime for taxpayers registered under the income tax optional regime (Decree No. 26-92 in force until 31 December 2012).

As of 1 January 2013, taxpayers under the system of earnings of lucrative activities regime may deduct costs and expenses, including the following, from gross income.

Guatemala

Depreciation

Depreciation is calculated annually using the straight-line method. The tax authority may authorise a different method on request of the taxpayer. The annual maximum rates allowed as deductible expenses are the following:

Asset	Rate (%)
Building and improvements	5
Machinery and equipment	20
Furniture and fixtures	20
Vehicles	20
Tools	25
Tree and vegetable species	15
Computer equipment and software	33.33
Any other depreciable asset	10

Goodwill

Intangible assets, such as goodwill, trademarks, manufacturing processes, patents, etc., may be deductible under the straight-line method of amortisation over a period that depends on the conditions of the acquisition or creation of the intangible asset concerned, and cannot be less than five years.

Interest expense

The deduction of interest expense is limited to the maximum interest rate used by the National Bank annually (to date approximately 12% to 13%) in excess of the authorised rate for commercial banks.

Uncollectible accounts

Uncollectible accounts arising in normal business operations can be deducted individually or, alternatively, via an allowance for doubtful accounts, which shall not exceed 3% of the debit balances of accounts and notes receivable.

Charitable contributions

Duly proven donations made to the government, the municipalities, and their agencies, as well as to duly authorised not-for-profit welfare, social service, and scientific associations and foundations, universities, political parties, and guild entities are deductible. The maximum deductible amount for income tax purposes of each period shall not exceed 5% of the donor's net income up to a maximum of GTQ 500,000 per year.

Employee pension/retirement funds

The deduction of provisions to establish or increase employee pension and retirement funds or reserves is allowed, provided the government approves the related plans.

Severance compensation payments

Severance compensation payments are allowed as deductible expenses as well as limited allocations (not to exceed 8.33% of total annual salaries and wages) to a reserve for severance compensation. Provisions pertaining to actual liability for severance compensation per year are also allowed, provided the related plans, based on collective bargaining agreements, are approved by the employer and employees.

Fines and penalties

Charges, penalties, and interest charged by any government institutions are not deductible.

Taxes

All taxes other than income tax and VAT are deductible.

Net operating losses

Operating losses may not be carried forward for deduction from otherwise taxable profits. Guatemalan laws also do not permit carryback of losses.

Payments to foreign affiliates

Deduction for royalties will be allowed, up to 5% of gross income. Charges for technical service fees are deductible, up to 1% of gross income or 15% of total salaries paid to Guatemalans, whichever is larger.

Expenses incurred abroad by non-residents in connection with income earned from Guatemalan sources cannot be deducted for income tax purposes by merely having the supporting receipts, as the regulations to the law do not permit such a deduction for these purposes, unless these expenses are related with the Guatemalan company operations and these expenses are needed for generating taxable income.

Effective from 1 January 2013, pursuant to Decree No. 10-2012, the deductible expenses for technical services rendered from abroad shall not exceed 5% of gross income.

Group taxation

No consolidation for tax purposes is permitted as each group entity is treated as an independent taxpayer, which shall file its own tax return.

Transfer pricing

For 2012, there is no specific transfer pricing legislation. Nonetheless, on 1 January 2013, under the provisions of Decree No. 10-2012, rules regarding transfer pricing will be introduced.

From a Guatemalan transfer pricing perspective, the scope of application of the rules of valuation of transactions between related parties reaches any operation that has been carried out between a person living in Guatemala with a resident abroad.

According to the Decree mentioned above, local legislation allows the selection of traditional methods and profit-based methods consistent with the Organisation for Economic Co-operation and Development (OECD) guidelines.

Advance pricing agreements (APAs) are permitted, and it is also stated that the tax authority can reclassify activities according to its true nature in accordance with Tax Code statements.

Thin capitalisation

As of 2012, there is no specific legislation in force regarding thin capitalisation in Guatemala. Notwithstanding, from 2013 and onwards, thin capitalisation applies regarding deductible expenses for interest paid.

Guatemala

On this matter, Decree No. 10-2012 states that without prejudice to other rules on deduction of interest, the deductible amount for such costs may not exceed the value of multiplying the annual maximum simple interest rate determined by the Guatemalan Monetary Board for tax purposes multiplied by three times the amount of average total net assets submitted by the taxpayer in the annual income tax return.

In addition, the Decree mentioned above defines average total net assets as the sum of total net assets of the previous year with total net assets at the end of the year in force, both values must correspond to the amounts filed in the annual income tax return of each period of final settlement, divided by two. Total net assets are defined by law to correspond to the book value of all goods that are actually the property of the taxpayer.

Tax credits and incentives

Drawback industries (Maquila)

The Law of Promotion and Development of Exports Activities and Drawback Industries is known in Guatemala as *maquila*. This law seeks to promote, encourage, and develop the manufacture of products within areas controlled by the Customs Authority for export to countries outside the Central American region, as well as to regulate exporting and drawback activities.

The exporter may apply for authorisation to operate under any of the following three systems provided by the law:

- Export under a temporary admission system.
- Export under the reimbursement of duties system.
- Export under the total added national component system.

Tax incentives and benefits of the law include the following:

- Exemption of taxes, import duties, and other charges on imports of machinery and equipment, including VAT.
- Discontinuance of VAT payments on temporary raw material imports.
- Exemption of income tax for ten years on profits obtained under this law.

Free Trade Zones Law

The Free Trade Zones Law seeks to encourage and regulate the establishment of free trade zones that promote domestic development by activities carried out within certain zones, particularly those that tend to strengthen export activities, generate employment, and transfer technology.

Tax incentives and benefits of the law include the following:

- Import duties exemption.
- Income tax exemption as follows:
 - Ten-year period for the administrative agency.
 - Ten-year period for industrial & service permit holders.
 - Five-year period for commercial permit holders.
- Exemption of real estate taxes for a five-year period.
- Exemption of tax stamps on the conveyance of title over properties.
- Dividends or profits distributed by the administrative agency and permit holders shall also be considered tax-exempted income.

- Exemption of custom duties and any other charges on import and consumption of fuel oil, bunker, butane, and propane gas used exclusively in the free trade zone.
- Foreigners working in the free trade zone are subject to the provisions of the immigration law and the Labour Code.

Withholding taxes

For 2012, the following WHT rates apply on payments to non-resident corporations or individuals:

Payment	WHT (%)
Dividends, profit participations, earnings, and other benefits (1)	10
Commissions, salaries	10
Interest (2)	10
Professional fees, royalties, technical service fees	31

Notes

1. For taxpayers that already paid corporate income tax, there is no WHT regarding dividends.
2. Interests will not be taxed (i.e. no withholding applies) when:
 - These interests are paid to a legal bank or financial institution.
 - The interests are in connection with a loan registered in the Guatemalan banking system.
 - The loan was used in taxable activities.

Decree No. 10-2012, in force from 1 January 2013, introduces the tax residence figure, which states that non-residents can operate in Guatemala with or without PE; accordingly, income tax treatment depends of the circumstance as follows:

- Non-residents with PE will be subject to income tax, choosing one of the two methods of payment established for residents.
- Non-residents without PE will be subject to WHT, applying specific rates according to the nature of the services rendered.

Tax treaties

Guatemala has no tax treaties in force.

Tax administration

Taxable period

General income tax regime

For 2012, under the general income tax regime, taxes are paid on a monthly basis.

From 1 January 2013 and onwards, the general income tax will no longer exist, but taxpayers who are registered under this regime before the tax authority must continue filing and paying income tax on a monthly basis under a new regime called the simplified optional system on income from lucrative activities.

Optional income tax regime

Under the optional income tax regime, the annual final tax liquidation period begins on 1 January and ends on 31 December of each year.

Guatemala

As of 1 January 2013 and onwards, the optional income tax regime will be replaced by the system on earnings from lucrative activities, and taxpayers registered under this regime will continue to be subject to the same taxable period.

Tax returns

General income tax regime

Under the general income tax regime, there is an obligation to file an annual informative tax return, which is due on 31 March of each year.

As of 1 January 2013 and onwards, the general income tax regime will be replaced by the simplified optional system on income from lucrative activities, and taxpayers registered under this regime will be subject to file an informative annual tax return with the same due date.

Optional income tax regime

Under the optional income tax regime, returns are due after the end of the fiscal period (31 December) but no later than 31 March of each year.

The income tax return shall be accompanied by the documents required by the regulations, which might include a:

- balance sheet
- statement of results of operations
- statement of cash flows, and
- statement of cost of production.

Documents must be duly certified by a professional or an independent accounting firm. The financial statements that accompany the return shall agree with both those recorded in the financial statements ledger and those destined for publication.

Both the income tax return and exhibits thereto shall be signed by the taxpayers, their agent, or their legal representative or by any other responsible persons so determined by this law and the tax code.

As of 1 January 2013, the optional income tax regime will be replaced by the system on earnings from lucrative activities, and taxpayers registered under this regime will be subject to file an annual tax return with the same due date.

Payment of tax

General income tax regime

Under the general income tax regime, tax is payable via flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date.

Taxes on income are governed by the income tax law, Ley del Impuesto sobre la Renta, and its related regulations. Administration of the law is vested with the SAT.

Under the provisions of Decree No. 10-2012, in force from 1 January 2013, the general income tax regime will be replaced by the simplified optional system on income from lucrative activities, and taxpayers registered under this regime will be subject to file monthly tax returns.

Taxpayers registered before the tax administration under this regime will settle and pay the tax through the withholding system. Persons or entities obligated to withhold are those taxpayers who pay or credit into account for the acquisition of goods and services to the taxpayers registered under this regime.

Optional income tax regime

Under the optional income tax regime, taxpayers are required to prepay their estimated annual income tax liability in quarterly instalments. The balance is due upon filing the return.

Taxpayers may choose one of the following procedures for computing estimated quarterly tax liability:

- Tax on income shown by partial closure of accounts or computation of presumed liquidation of operations at the end of each quarter.
- Tax on 5% of overall gross income earned during the corresponding quarter of the preceding year (5% of the 30% income tax rate equals 1.5%).
- Tax equivalent to one-fourth of the tax paid for the immediately preceding tax year.

Under the provisions of Decree No. 10-2012, in force from 1 January 2013 and onwards, the optional income tax regime will be replaced by the system on earnings from lucrative activities, and taxpayers registered under this regime are required to prepay their estimated annual income tax liability in quarterly instalments. The balance is due upon filing the return. According to the mentioned above Decree, the tax rate in force for years 2013, 2014, and 2015 onwards will be 31%, 28%, and 25%, respectively.

Statute of limitations

The right of the tax administration to checks, adjustments, corrections, or determinations of tax liabilities; settle and enforce interest and penalties; and enforce payment of taxpayers must be brought within four years. In the same period, taxpayers must exercise their right of recourse for overpaid or unduly charged taxes, interest, penalties, and fines.

Other issues

Accurate and current information regarding taxation in Guatemala is often difficult to obtain as the country lacks reporting services such as those available in other countries. It is also difficult to determine how the tax laws will be applied in practice in complex situations. The laws and regulations are limited and ordinarily cover only the most common situations. The system of legal precedent resulting from court decisions is narrowly used, and each issue is resolved by reference to the respective codes. Guatemala has shown little interest in tax planning, but it is possible to have informal consultations with the tax authorities and to obtain authoritative rulings in many cases. Discrepancies between government and management criteria are commonly brought to judgment by the Constitutional Court, whose binding sentences generally abrogate the laws in dispute.

Significant developments

The zero/ten income tax regime is currently under review by the European Union (EU) Code of Conduct Group. At present, the key features of any revised Guernsey corporate tax regime have yet to be determined. Implementation of any new tax regime is not anticipated to come into effect prior to 2013 at the earliest.

Taxes on corporate income

Resident corporations are liable to tax on their worldwide income. Non-resident corporations are subject to Guernsey tax on the Guernsey-source income.

Companies pay income tax at the current standard rate of 0% on taxable income.

Income derived from a banking business is taxable at 10%. 'Banking business' is broadly defined as income that arises as a result of the provision of credit facilities by any type of company and the utilisation of customer deposits. Relief is available for eligible expenses that are allocated against different streams of income.

Any income derived from the exploitation of property located in Guernsey or received by a publicly regulated utility company is subject to tax at the higher rate of 20%.

Exempt companies

Some collective investment schemes and unit trusts may qualify for exempt status, which would place them completely outside the Guernsey tax regime. For each year for which exempt status is sought, a charge of 600 pounds sterling (GBP) is levied.

One of the following conditions, among others, must be met for the company to be considered exempt:

- The company is beneficially owned outside of Guernsey.
- No Guernsey resident individual or company has a beneficial interest in the company (with the exception of shareholders, loan creditors, or nominees/trustees).

It is anticipated that the definition under which entities may qualify for exempt tax status will be broadened in the near future.

Loans to participators

If a company makes loans with preferential terms to an individual or entity connected with the company, this will be deemed to be income in the hands of the debtor, and the

creditor company will be required to account for, withhold, and pay the tax. Certain exemptions apply.

Local income taxes

Guernsey does not operate any local government taxes.

Corporate residence

All Guernsey-registered companies are regarded as tax resident in the island unless granted exempt company status. In addition, a company will be treated as a resident in Guernsey (regardless of where it is incorporated) if shareholder control is exercised by persons resident in the island.

Permanent establishment (PE)

The Income Tax (Guernsey) Law, 1975 defines PE as including:

- a branch
- a factory, shop, workshop, quarry or building site, or
- a place of management.

Note that the fact that a body's directors regularly meet at a particular place does not, in itself, make that place a PE of that body.

Other taxes

Value-added tax (VAT)

Guernsey does not operate a VAT or goods and services tax (GST).

Customs and excise duties

In accordance with the European Community (EC) Customs Code and the Implementing Regulation, Customs Import Duty is liable on all goods arriving in the Customs territory of the Community. The rates of duty are set by the European Community and are the same in all countries of the European Community.

The rates vary according to the commodity. Some may be as high as 22% while for other goods the rate may be free.

The Channel Islands are not within the fiscal territory of the European Union, and, as such, the Community Regulations that concern excise duties do not apply. Excise duty is classed as an internal tax.

The rates are reviewed annually by the States of Guernsey and set at budget time, which is usually in November. These cover Guernsey and Alderney, while Sark have their own rates set by the Chief Pleas.

With effect from 1 May 2011, an additional 15% rate of duty is applicable on some goods originating in the United States (US).

Property taxes

Income from Guernsey land and buildings is subject to Guernsey income tax at 20%, no other property taxes apply.

Guernsey, Channel Islands

Transfer taxes

Guernsey does not levy transfer taxes.

Stamp taxes

Guernsey does not levy any stamp duties.

Branch income

Branch income is taxed in the same manner as companies, at the appropriate rate according to the activity being undertaken.

No further tax is withheld on the transfer of profits abroad to group companies, provided no Guernsey resident individual has an interest in the company.

Income determination

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. Use of last in first out (LIFO) is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains

Capital gains are not subject to tax in Guernsey.

Dividend income

All dividends paid by a standard tax-paying company (0%) are deemed to have been paid from income arising after 31 December 2007 (i.e. after the introduction of the new zero/10 tax regime), unless the company elects to have them treated otherwise.

Stock dividends

Stock dividends may be treated as income.

Foreign income

Resident corporations are liable to tax on their worldwide income. Income tax is levied on foreign branch income when earned, and on investment income from foreign dividends, interest, rents, and royalties. Double taxation is mitigated either through unilateral relief (by giving credit for foreign taxation of up to three-quarters of the effective Guernsey rate) or by treaty relief.

Deductions

Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of the trade.

Depreciation

Annual allowances are granted for income tax purposes in respect of the following:

Assets	Basis	Rate (%)
Buildings:		

Guernsey, Channel Islands

Assets	Basis	Rate (%)
Stone, brick, concrete or other substantial structures	Reducing-balance	1.25
Buildings of a less substantial construction	Reducing-balance	5
Farm Buildings	Straight-line	5 or 10 (depending on material utilised)
Machinery and plant	Reducing-balance	20
Glasshouses:		
Expenditure in respect of initial allowance*	Straight-line	10
Other expenditure	Straight-line	5

* Section 123 (3) of the Law defines expenditure and circumstances on which initial allowances can be claimed in respect of glasshouses.

Goodwill

The amortisation of goodwill is not a deductible expense in Guernsey.

Start-up expenses

Pre-trading expenditure incurred within the 12 months prior to the commencement of trade, which would have been allowable had it occurred on the first day of trading, may be allowed as a deduction in computing the profits of the first accounting period.

Interest expenses

Interest is a deductible expense where it is incurred wholly and exclusively for the purposes of the trade.

Bad debt

Bad and doubtful debts discovered in the accounting period to have become bad or irrecoverable may be deducted from taxable profits, but the deduction may not exceed the amount written off as such in the books of the business.

Charitable contributions

Charitable donations by companies are not deductible for Guernsey tax purposes.

Fines and penalties

Fines or penalties incurred are not deductible for Guernsey income tax purposes.

Taxes

Local income tax paid is not deductible in computing taxable income.

Net operating losses

Losses from one class of income may be used to offset the profits from another class of income if both classes are subject to tax at the same rate. Unrelieved trading losses may be carried forward to offset future trading income.

Upon cessation of trade, operating losses arising from balancing allowances may be carried back to the previous two years of charge to be relieved against past trading profits.

Guernsey, Channel Islands

Payments to foreign affiliates

Guernsey-source royalties and long-term interest are subject to taxation at source. Relief is obtained by the retention of the tax deducted. Short-term interest, unless owed to an authorised bank, is not deductible, unless the advance in respect of which it is paid is used wholly and exclusively for the purposes of the trade. Other fees must be paid on an arm's-length basis.

Group taxation

Group loss relief may be claimed when both companies are members of the same group and the companies are either carrying on business in Guernsey through a PE or incorporated in Guernsey. Loss relief is available only against income taxed at the same rate.

A claim for group loss relief must be made by the claimant company within two years after the end of the calendar year in which the relevant accounting period ended, and the claim must be accompanied by a declaration by the surrendering company that it consents to the surrender.

Transfer pricing

Guernsey does not currently have specific transfer pricing legislation in place. However, the general anti-avoidance provisions do apply.

Thin capitalisation

Guernsey does not currently have specific thin capitalisation legislation in place. However, the general anti-avoidance provisions do apply.

Tax credits and incentives

In view of the low rate of tax, no special incentives are available to local businesses in Guernsey.

Foreign tax credit

Guernsey has double taxation agreements (DTAs) in place with Guernsey and Jersey and tax information exchange agreements (TIEAs) with 17 other jurisdictions.

If no bilateral agreement exists, relief available to Guernsey resident companies is the lesser of the other territory's effective rate or three-quarters of the Guernsey effective rate.

Withholding taxes

Deemed distributions

A company will be required to withhold tax on any distributions made to or in reference to any Guernsey resident individual shareholders. The rate at which WHT will apply (0%, 10%, or 20%) is dependent upon the rate at which the company is subject to Guernsey tax (i.e. if the company is subject to Guernsey tax at 0%, then tax will be withheld on distributions at 20%; if the company is subject to Guernsey tax at 10%, then tax will be withheld on distributions at 10%; and if the company is subject to Guernsey tax at 20%, then no tax will be withheld on distributions).

Furthermore, following certain trigger events (e.g. the sale of shares, death of the beneficial member), the company is deemed to have distributed the Guernsey resident shareholder's entire share of the company's undistributed profits accumulated since 1 January 2008. All investment income is deemed to be distributed as it arises.

Although the liability to tax is the shareholder's, the company is obligated to account for, withhold, and pay tax to the Income Tax Office and may then claim this back from the shareholder.

Agency

A company also is required to withhold tax when it is acting as an agent and making payments to a non-resident liable to Guernsey tax.

Guernsey does not levy any other forms of withholding tax (WHT).

G

Tax administration

Taxable period

The tax year runs from 1 January to 31 December, although companies can adopt a year-end of their choice.

Tax returns

Historically, an income tax return was required to be filed one year and 15 days after the end of the calendar year in which the accounting period ends. As of 2012, however, a new filing deadline of 30 November is in place. Should a company meet the conditions below, a simplified return may be filed without either a computation or financial statements.

In order to qualify for a simplified return, a company must have none of the following:

- Guernsey employees (other than directors).
- Guernsey resident individual beneficial owners.
- Income from utilities (e.g. Guernsey water or electricity companies).
- Income from Guernsey properties.
- Income from a banking business.
- Loans to Guernsey participators.
- Distributions made to Guernsey resident individuals.

Should a company have Guernsey resident individual beneficial members and/or make loans to participators, it will be required to submit quarterly returns accounting for distributions, deemed distributions, and loans advanced.

Payment of tax

In Guernsey, tax is payable in two instalments, on 30 June and 31 December in the year of charge (calendar year). If liabilities have not been determined, this may necessitate initially raising estimated assessments based on prior year figures and raising a final assessment when the figures are agreed. Once the Income Tax Office has received the company's income tax return, they will issue an assessment detailing the final balancing income tax payment due. This amount will be due to be paid within 30 days of the issuing of the final assessment.

Guernsey, Channel Islands

Audit cycle

The Guernsey tax system requires companies to file tax returns prior to 30 November each year (with effect from returns relating to the 2011 year of charge onwards). The Income Tax Office will assess each company tax return as and when it is received, and the turnaround time from submission of a return to the issue of a final assessment varies dependent upon the workloads of the Income Tax Office but is generally dealt with in around three months.

Statute of limitations

The Director can raise an assessment in respect of any income that has not been assessed at any time no later than six years after end of the year of charge in which the income arose.

Significant developments

Effective 1 January 2012, Guyana changed its corporate tax rates to:

- 40% for a commercial company, other than a telephone company, and
- 30% for all other companies.

The rate of 45% was retained for telephone companies.

Taxes on corporate income

Resident companies are liable to tax on their worldwide income. Non-resident companies that carry on a trade or business in Guyana are subject to tax on the income that is derived from Guyana.

The current rates of corporate tax are as follows:

Type of company	Corporate tax rate (%)
Telephone companies	45
Commercial companies *	40
Other companies (non commercial)	30

* A commercial company is one that derives at least 75% of its gross income from goods not manufactured by it or if it is engaged in telecommunication, banking, or insurance (other than long-term insurance).

Minimum Corporation Tax (MCT)

In addition to the standard corporate tax rates, MCT of 2% of turnover is payable by commercial companies (other than insurance companies).

Corporate residence

Corporate residence is determined by reference to the location of the central management and control of the business of a company. There are no specific provisions within the law, and, as such, common law principles established by the courts are generally applied in determining residence. The place of incorporation is regarded as merely one of the factors to be taken into account in determining where central management and control are located.

Permanent establishment (PE)

There are no specific provisions in the legislation dealing with PE, so common law principles are applied.

Guyana

Other taxes

Valued-added tax (VAT)

VAT is charged at the rates of 16% or 0% on the taxable supply of goods and services within Guyana by a registered person.

Zero-rated supplies include goods for export, electricity supplied by Guyana Power and Light, water supplied by Guyana Water Incorporated, and international travel. Exempt supplies include educational services, residential rent, and financial services.

Customs duties

Customs duty is paid on all goods imported into Guyana. The rates of duty vary between 5% and 150%, depending on the classification of the item in question. Rates of duty are highest on 'luxury items', which include perfumes.

Excise taxes

Excise tax is imposed on specific imported or home produced products. These products include alcoholic beverages, tobacco products, petroleum products, and motor vehicles.

Property taxes

Property tax is an annual tax charged on the net property of a person at the end of each year. 'Property' for the purpose of this tax refers to movable or immovable, rights of any kind, and effects of any kind. Net property is the amount by which the total value of the property exceeds the total value of all debt owned by the person at that time.

The tax is payable on 30 April at the following rates:

Net property of a company (GYD *)	Property tax rate (%)
On the first 1.5 million	0
On every dollar of the next 5 million	1/2
On every dollar of the remainder	3/4

* Guyanese dollars.

Stamp taxes

Stamp duty is levied at various rates on several instruments, including affidavits, statutory declarations, deeds of conveyance, mortgages, share transfers, awards of arbitrator, powers of attorney, agreements, bills of exchange, receipts, and policies of insurance.

Branch income

A branch is subject to tax in Guyana on all income directly or indirectly accruing in or derived from its operations in Guyana. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporate tax and reinvestments, are subject to withholding tax (WHT) at the rate of 20%. The position noted may be varied by the provisions of any applicable double tax treaties (DTTs).

Income determination

Inventory valuation

Inventory is valued at the lower of cost and net realisable value. Cost is generally determined using the average cost method for accounting and tax purposes, but the first in first out (FIFO) method is also acceptable.

Capital gains

Capital gains tax is imposed at the rate of 20% on the net chargeable gains derived from the disposal of capital assets. Gains derived from the disposal of an asset within 12 months of its acquisition are treated as ordinary income and subject to corporate tax at the applicable rates. Gains derived from the disposal of assets held for more than 25 years are exempt from tax.

Dividend income

Corporate tax is payable on dividends received by resident companies from non-resident companies. However, dividends paid by resident companies to other resident companies are exempt from tax.

Interest income

Interest income is taxed at the applicable rate of corporate tax.

Foreign income

Income earned by a non-resident company in Guyana is subject to tax in the year the income was earned. There is no deferral regime in Guyana.

Deductions

All revenue expenses wholly and exclusively incurred in the production of income are generally deductible.

Depreciation

Tax depreciation rates (wear and tear allowances) apply to the following classes of assets, as follows:

Class of assets	Depreciation rate (%)
Aircraft	33 $\frac{1}{3}$
Boats	10
Buildings (housing and industrial)	5
Furniture and fittings	10
Motor vehicles	20
Office equipment, including computers and computer software	50
Other	15
Plant and machinery	20

Buildings that house machinery are depreciated using the straight-line method. Other assets may be depreciated using the declining-balance or straight-line methods.

Goodwill

Goodwill expense is generally not allowable in arriving at chargeable income.

Guyana

Start-up expenses

No specific rules exist in respect of start-up expenses, but such expenses are generally not deductible.

Interest expenses

Interest expense incurred in the production of income is deductible. There is no restriction to the deductibility of this expense.

Bad debt

A bad debt is deductible where it has been incurred in the trade in which the company is engaged and has been respectively estimated to the satisfaction of the tax authority to have become bad in the year of income when the claim is made.

Charitable contributions

Charitable donations are not deductible unless these are made under a deed of covenant.

Fines and penalties

Fines and penalties are not generally deductible.

Taxes

Taxes are not generally deductible in arriving at taxable profit.

Net operating losses

Companies may carry forward losses for an unlimited number of years, but the losses may not reduce the taxable income in any year by more than 50%. Loss carrybacks are not permitted.

Payments to foreign affiliates

A corporation engaged in business in Guyana may claim a deduction for royalties and interest charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted. Deductions for administrative, technical, professional, or other management services fees paid to a non-resident company or branch, referred to as 'head office expenses', are restricted to 1% of the annual turnover.

Group taxation

There is no provision under the legislation for group taxation in Guyana. All companies are taxed separately.

Transfer pricing

There is no transfer pricing legislation or rules in Guyana, although the issue has been discussed and is expected to be more formally considered in the future. However, the current Act contains a general anti-avoidance provision, and the tax authority monitors multinationals to ensure that their transactions are conducted at arm's length and in conformance with the applicable tax legislation.

Thin capitalisation

There are no thin capitalisation rules in Guyana.

Tax credits and incentives

Various tax incentives are available, depending on the nature of the industry that the companies are engaged in, including the following:

- Customs duty and VAT exemption on most plant, machinery, and equipment.
- Customs duty and VAT exemption on raw materials and packaging materials used in the production of goods by manufacturers and small businesses.
- Unlimited carryover of losses from previous years.
- Accelerated depreciation on plant and equipment.
- Full and unrestricted repatriation of capital, profits, and dividends.
- Tax deduction for scientific research expenses.
- Initial and annual allowances.
- Tax holidays.

Tax holidays are granted in respect of pioneering activities, that is, to companies whose trade or business are wholly of a developmental and risk-bearing nature and likely to be instrumental to the development of the resources of and beneficial to Guyana.

This does not include trade or business carried on by a gold or diamond mining company or a company carrying on petroleum operations.

Tax holidays are granted for a period of up to ten years.

Foreign tax credit

Foreign tax relief is available under DTTs with Canada, the United Kingdom, and Caribbean Common Market (CARICOM) countries.

Unilateral relief is also available for foreign taxes paid in non-treaty countries with tax systems and legislation similar to those in Guyana. For British Commonwealth countries, the relief is 50% of the relief that would be available if the foreign country were a treaty country. For other countries, the relief is 25% of such available relief. The available relief is the lower of the tax rate in Guyana and the tax rate in the other country.

Withholding taxes

WHT is chargeable on gross payments to non-residents and must be remitted to the tax authority within 30 days of making the payment. In cases where the treaty rate is higher than the statutory rate, the lower statutory rate applies. The rates of WHT for various payments are shown in table below.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non Treaty	15	15	10
Treaty:			
Canada	15	15	10
United Kingdom	10	15	10
CARICOM	0	15	15

Guyana

Tax administration

Taxable period

The tax year is the calendar year. Tax is assessed during a tax year on income earned during the year of assessment, which is generally the calendar year preceding the tax year. Companies with an accounting year other than a calendar year may, however, be allowed to account for taxes by adopting their accounting year as their income year.

Tax returns

Tax returns must be filed by 30 April of the tax year.

Payment of tax

Corporate tax is payable in advance quarterly instalments on the preceding year's tax liability. Advance tax payments are due on 15 March, 15 June, 15 September, and 15 December of the calendar year prior to the tax year. However, the Commissioner of Inland Revenue may require the company to calculate the payments based on estimated income for the current year.

Any balance of tax due must be paid by 30 April of the tax year.

Penalties

Failure to file a tax return and pay the balance due by 30 April of the tax year incurs a further charge of 45% on the outstanding tax for the first year and 50% thereafter.

Audit cycle

Companies are generally selected randomly for audits, and the frequency is usually every three years. Companies are generally required to provide financial information and supporting documentation to the tax personnel.

The tax authority is the Guyana Revenue Authority.

Statute of limitations

A company carrying on business in Guyana is required to keep proper accounts and records and is required to retain these accounts for a period of at least eight years after the completion of the transactions, acts, or operations to which they relate.

The Commissioner is empowered to raise an assessment for tax or additional tax within seven years after the expiration of the year of assessment.

Other issues

Foreign investment restrictions

There are no restrictions on the repatriation of capital and investment income, and residents and non-residents have unlimited access to foreign exchange markets and to repatriate funds.

Exchange controls

There are no exchange control rules in place in Guyana.

Choice of business entity

Businesses operating in Guyana may establish a local company or register an external company. Additionally, companies may operate through a joint venture.

Honduras

Significant developments

Effective 1 June 2011:

- Corporate taxpayers were subject to a 1% (i.e. 0.5% for taxpayers subject to regulated prices) tax on gross income if the income tax calculation for the fiscal year was lower than 1% of gross income. This tax was applicable to taxpayers with income over 10 million Honduran lempiras (HNL).

This reform was declared unconstitutional on 1 February 2012 and is, therefore, no longer applicable.

Effective 1 July 2011:

- The tax authority is empowered to withhold 1% from import operations as an advance payment to income tax, with some exceptions to the rule according to section 7 of the Income Tax Law. This provision was approved in July 2011; however, as of May 2012, its application by the tax authority is in suspense.
- In instances where a transaction is subject to the capital gains tax and a non-resident is involved, the buyer has an obligation to withhold 2% of the transaction amount as an advance payment to this tax and must pay it to the government within ten business days of the date of the transaction.

Effective October 2011:

- Under the Special Temporary Security Contribution on Financial Transactions (*Contribución Especial por Transacciones Financieras Proseguridad Poblacional*), financial transactions are subject to 0.2% withholding tax (WHT), with some exceptions.
- Companies providing mobile communication services will pay a Special Temporary Contribution of 1% on gross monthly income.
- Under the Special Temporary Contribution for the protection of the environment from the Mining Sector, there is a 2% contribution on the freight on board (FOB) value of the exports filed.
- Special Temporary Contribution from the food and beverages business under special tax regimes is 0.5% on gross monthly income.
- Cooperatives Special Contribution is 3.6% on annual net surplus.

Honduras

Taxes on corporate income

Honduran resident companies are taxed on their worldwide income. Non-resident companies are subject to corporate income tax (CIT) only on income derived from Honduran sources.

The CIT rate for a resident company is 25% of its net taxable income.

Temporary Solidarity Contribution

The Temporary Solidarity Contribution is a non-deductible surcharge levied on all companies on taxable income over HNL 1 million. The Temporary Solidarity Contribution tax rate is 6% for 2012, 5% for 2013, 4% for 2014, and 0% for 2015.

Municipal income taxes

Industry, commerce, and services tax

Companies doing business in Honduras are levied the following municipal tax on annual gross income:

From (HNL)	To (HNL)	Range (HNL)	Tax per '000
1	500,000	500,000	0.3
500,001	10,000,000	9,500,000	0.4
10,000,001	20,000,000	10,000,000	0.3
20,000,001	30,000,000	10,000,000	0.2
30,000,001	And over		0.15

Corporate residence

The place of incorporation is regarded by Honduran authorities as the corporate residence. Non-resident companies are companies incorporated/registered outside of Honduras.

Permanent establishment (PE)

There is a provision in the transfer pricing rules approved on December 2011 that provides the following definition of PE:

“Permanent establishment is a fixed place of business where a natural or juridical person resident or domiciled in another state performs part or all of its activities in Honduras. Likewise, a foreign resident will be considered to have a permanent establishment in Honduras when it acts in the national territory through an independent agent that is not acting under the regular framework of its activity.” There are some exceptions to the rule.

There is no treaty definition of PE since, at the present time, Honduras is not a signatory of any double taxation treaty (DTT) with another jurisdiction in the world.

Other taxes

Sales tax

Sales tax is charged on all sale and purchase transactions of goods and services made in Honduran territory.

The general tax rate is 12%. It applies to most goods and services, with the exception of machinery and equipment, basic grains, pharmaceutical products, raw materials for the production of non-taxable goods, petroleum products, school supplies, and insecticides, among others.

The import and sale of beer, other alcoholic beverages, cigarettes, and other tobacco products are subject to 15% sales tax.

There is a 15% sales tax applicable to some PCS, cellular, internet broad band, cable TV, and energy services, depending on the amount of consumption billed by the supplier.

There is an 18% sales tax levied on first class and business class air tickets.

Customs duties

The duty assessed by the Honduran government at the time of customs clearance ranges between 0% and 15% for most items.

Honduras is a member of the Central American Common Market (CACM), which also includes Costa Rica, El Salvador, Guatemala, and Nicaragua. Honduras' rates on most goods from outside CACM are currently within the 0% to 15% range. Under the Dominican Republic-Central America Free Trade Agreement (CAFTA-DR) with the United States (US), about 80% of US industrial and commercial goods can now enter the region duty-free, with the remaining tariffs to be phased out over ten years. Nearly all textile and apparel goods that meet the Agreement's rules of origin are now duty-free and quota-free, promoting new opportunities for US and regional fiber, yarn, fabric, and apparel manufacturing (the Agreement's tariff treatment for textile and apparel goods was made retroactive to 1 January 2004).

It is necessary to first obtain the appropriate Harmonized System (HS) classification number for determining when a particular product can enter the CAFTA-DR region duty-free. With this number, it is then possible to check the country and product-specific tariff elimination schedule.

Ad valorem import taxes can be as high as 20%. In addition, imports are subject to the sales tax of 12% or 15% that applies to the sum of the cost, insurance, and freight (CIF) value; the *ad valorem* duty; and the customs fees.

Excise taxes

There is an excise tax levied on the production and importation of cigarettes, sodas, beer, and alcoholic beverages.

Cigarettes are levied at HNL 350 per unit.

Excise tax on sodas, beer, and alcoholic beverages are levied according to the following table:

Honduras

Description	Tax rate per litre (HNL)
Soda/other prepared drink	0.58
Beer	4.12
Wine	5.17
Brandy, cognac, vermouth	27.92
Whisky	27.92
Rum 40°	17.00
Rum 38°	16.15
Rum 36°	15.30
Gin, vodka, tequila, etc.	27.92

Net assets tax

The net assets tax is an annual 1% tax on the net asset value of the company. It applies to the gross value of assets less reserve for accounts payable and any accumulated depreciation allowed under the income tax law and other deductions allowed by law. The law also allows a special deduction of HNL 3 million.

The net assets tax is in lieu of CIT when CIT is less than the amount due for net asset tax. Resident companies during their preoperative period (i.e. the period in which the company started operations but has not issued its first invoice) and companies operating in free zones, among others, are exempt from the net assets tax.

Non-resident companies are not liable for the net assets tax.

Transfer taxes

Transfer taxes are levied on real estate transactions at HNL 1.5 per every HNL 1,000.

Stamp taxes

There are no provisions for stamp taxes in Honduras.

Capital gains tax

In general, a 10% tax is applied on capital gains, regardless of the person's residence status. Under the Zolitur law territory, a special regime, the tax rate is a 4% flat tax on capital gains.

The payment of capital gains tax must be made within ten business days after the agreed amount of the transaction has been determined.

In instances where a transaction is subject to the capital gains tax and a non-resident is involved, the buyer has an obligation to withhold 2% of the transaction amount as an advance payment to this tax and must pay it to the government within ten business days of the date of the transaction.

Payroll taxes and contributions

Payroll taxes and contributions are paid by employers at the following rates:

- Social security: 7.2%, with a ceiling of HNL 4,800.
- *Instituto Nacional de Formación Profesional* (INFOP): 1%.
- Housing fund (*Régimen de Aportaciones Privadas* or RAP/*Fondo Social para la Vivienda* or FOSovi): 1.5%.

Special temporary contributions

For the term of five years:

- Under the Special Temporary Security Contribution on Financial Transactions (*Contribución Especial por Transacciones Financieras Proseguridad Poblacional*), financial transactions are subject to 0.2% WHT, with some exceptions. This contribution started to be applied in April 2012.
- Companies providing mobile communication services will pay a Special Temporary Contribution of 1% on gross monthly income.
- Under the Special Temporary Contribution for the protection of the environment from the Mining Sector, there is a 2% contribution on the FOB value of the exports filed.
- Special Temporary Contribution from the food and beverages business under special tax regimes is 0.5% on gross monthly income.
- Cooperatives Special Contribution is 3.6% on annual net surplus.

Municipal taxes

Companies doing business in Honduras are also subject to the rules and regulations of the respective municipalities. Taxes and obligations are ruled by the '*Plan de Arbitrios*'. Some of these tax obligations include the following:

- Industry, commerce, and service tax, which is based on gross income per year (*see the Taxes on corporate income section*).
- Public services tax, which is paid for services such as waste management.
- Real estate tax, which is a tax on assets and asset gains.
- Sign tax, which is a tax on public advertising.

Branch income

Branch income is subject to income tax at the rates applicable for corporate income.

Income determination

Income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the tax law.

Inventory valuation

Inventories are generally valued using the first in first out (FIFO), last in first out (LIFO), and weighted-average cost methods.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

The income from dividends is considered 'other income', thus non-taxable under the general income tax rates.

Stock dividends

Stock dividends are also not taxable.

Honduras

Interest income

Honduran Bank interests are subject to a 10% WHT at the moment the interest is given, when the sum is over HNL 50,000. Interests from abroad are considered as normal income.

Royalty income

Royalties are taxed in the same manner as general income if the recipient is a local company or branch.

Foreign income

Deferral and anti-deferral of foreign income are not regulated in Honduras.

Deductions

The net taxable income of an enterprise is determined by deducting all the ordinary and necessary expenses incurred in the generation of income, including amortisation and depreciation; municipal taxes; donations made in favour of the state, the central district, the municipalities, and legally recognised educational institutions, charities, and sporting facilities; mandatory employer-employee contributions to the social security system; and 'reasonable' charges for royalties and management services.

In general, all expenses incurred in the generation of taxable income are considered as deductible for income tax purposes. However, there are some 'non-deductible' expenses, even if incurred in the generation of income (e.g. interest paid to owners or shareholders, capital losses).

Depreciation

Depreciation may be computed using the straight-line method. Companies may also obtain authorisation from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, it must apply the method consistently thereafter. The following are the applicable straight-line method rates for some common assets.

Asset	Rate (%)
Buildings	2.5 to 10
Plant and machinery	10
Vehicles	10 to 33
Furniture and office equipment	10
Tools	25

Goodwill

Goodwill can be amortised over a period of five years.

Start-up expenses

Organisation or reorganisation expenses are deductible for the total amount as long as they do not exceed 10% of the initial capital stock. These expenses can be amortised over five years.

Interest expenses

Interest expenses are deductible as long as they are incurred in order to generate income. Interest paid to stockholders, owners, or spouses are not deductible.

Bad debt

Taxpayers can record a bad debt provision of 1% of the total credit sales, which will not exceed 10% of the accounts receivable balance.

Charitable contributions

Contributions to organisations legally recognised by the government are deductible.

Capital losses

Capital losses are not deductible to determine the net taxable income. Capital losses can only be netted against capital gains, which are subject to a tax rate of 10% (*see Capital gains tax in the Other taxes section*).

Contingent liabilities

Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes; actual payments during the fiscal period, for those liabilities, are considered to be deductible expenses.

Fines and penalties

Fines and penalties are not deductible.

Taxes

With the exception of the Temporary Solidarity Contribution, net asset taxes, CIT, and sales tax (i.e. if sales tax paid is used as a credit to net the sales tax payable to the government), taxes and contributions paid to district or municipalities are deductible expenses when determining taxable income.

Net operating losses

Companies engaged in agriculture, manufacturing, mining, and tourism may carry forward losses for three years. However, certain restrictions apply. Losses may not be carried back.

Payments to foreign affiliates

Payments to foreign affiliates are deductible as long as the service is effectively received.

Group taxation

No provisions exist for group taxation in Honduras.

Transfer pricing

The new Transfer Pricing Law for Honduras was published in the *Diario Oficial La Gaceta* in December 2011. This law establishes the transfer pricing regulations applicable in Honduras which will become effective January 2014. There is a period of two years to adopt the transfer pricing policies and to negotiate with the tax authority the corresponding advance pricing agreements (APAs).

Thin capitalisation

At the present time, there are no provisions for thin capitalisation in Honduras.

Honduras

Tax credits and incentives

Companies operating under a special tax regime are exempted from CIT, sales tax, customs duties, and some municipal taxes. These special tax regimes are the following:

- Free zone.
- Industrial processing zone ('Zona Industrial de Procesamiento' or ZIP).
- Temporary import regime ('Régimen de Importación Temporal' or RIT).
- Tourism incentive law.
- Law of the Tourism Free Zone of the Bay Islands ('Ley de la Zona Libre Turística de las Islas de la Bahía').
- Law promoting the generation of electric energy with renewable resources ('Ley de Promoción a la Generación de Energía Eléctrica con Recursos Renovables'), which provides tax exemptions for projects generating 50MW and over.
- Law for the Promotion and Protection of Investment ('Ley para la Promoción y Protección de Inversiones'), which provides special tax treatment (i.e. partial CIT rate reduction of up to 50%) for some types of investments.
- In the regulations for the free zone there is a consideration for international service companies (the business processing operations, call centres and contact centres, shared service centres) which will have the same tax exoneration provided by this regime.

Companies must comply with some governmental requirements to operate under one of the above mentioned special regimes.

Drawback industries

Special benefits exist for industries that import semi-manufactured materials for assembly in Honduras and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

Withholding taxes

WHT for residents

Distribution or payment of dividends or any other form of distribution of retained earnings or reserves to resident or domiciled individuals is taxed via WHT at 10%.

The tax authority is empowered to withhold 1% from import operations as an advance payment to income tax, with some exceptions to the rule according to Section 7 of the Income Tax Law. This provision was approved in July 2011, but its application by the tax authority is still in suspense as of May 2012.

WHT for non-residents

For non-residents in Honduras, any income derived from Honduran sources is taxable under the following table of the Income Tax Law:

Income source	WHT (%)
Real estate and movable property rent, except dividends and interest	10
Royalties from mining operations and other natural resources	10
Salaries paid for services and other remuneration for rendering of services within national territory or abroad	10
Profit transfers from branch office to head office	10

Income source	WHT (%)
Dividends	10
Royalties	10
Interest paid on commercial operations, bonds, securities or negotiable instruments, and other types of obligations	10
Income from operation of airplanes, ships, and vehicles	10
Income from operation of telecommunication companies	10
Insurance premiums	10
Income obtained from public shows	10
Films and video tapes for cinemas, TV, video clubs, and cable TV	10
Any other income not mentioned previously	10

Tax treaties

Honduras has not signed any tax treaties with foreign jurisdictions.

H

Tax administration

The 'Dirección Ejecutiva de Ingresos' (DEI) is the tax authority in Honduras. It is responsible for the administration of the tax and customs system. Taxpayers may request approval from the DEI regarding direct or indirect taxes (e.g. accelerated depreciation methods on new assets acquired by corporations with monetary activities requiring constant technological update, higher installed production capacity and productive re-conversion processes in order to maintain and strengthen their competitive advantage).

Taxable period

The statutory tax year runs from 1 January through to 31 December. However, taxpayers may apply to use a special tax year by requesting an authorisation from the DEI.

Tax returns

Companies must file a CIT return on 30 April every year.

Payment of tax

Mandatory advance tax payments are payable each quarter, based on the income tax paid for the preceding tax year. Final tax is due with the CIT return on 30 April every year.

Audit cycle

The audit cycle can begin after (i) the date the tax return should have been filed or (ii) sometime after the taxpayer made a request before the tax authority (e.g. tax credit, loss carryforward).

Statute of limitations

The statute of limitations is five years.

Significant developments

Developments in tax treaty network

Hong Kong's treaty network has expanded at an unprecedented pace since March 2010, with 19 comprehensive double tax agreements (CDTAs) signed by Hong Kong with various Asian and European countries during the period from March 2010 to end of April 2012. All these CDTAs adopt the more liberal 2004 Organisation for Economic Co-operation and Development (OECD) version of the Exchange of Information (EoI) article. In addition, the EoI articles of the CDTAs previously signed with Mainland China and Luxembourg were updated to the 2004 OECD version by means of a protocol signed in May and November 2010 respectively. Accordingly, Hong Kong has concluded 21 CDTAs that adopt the latest international standard of EoI as of the end of April 2012.

Of the 19 newly signed CDTAs, the ones concluded with Austria, Brunei, the Czech Republic, France, Hungary, Indonesia, Ireland, Japan, Liechtenstein, the Netherlands, New Zealand, Spain, and the United Kingdom were ratified and entered into force. However, the agreements with the Czech Republic, Indonesia, and Spain will only have effect in Hong Kong from year of assessment 2013/14 (i.e. from 1 April 2013). The CDTAs signed with Jersey, Kuwait, Malaysia, Malta, Portugal, and Switzerland have not yet entered into force, pending completion of the ratification procedures on both sides.

For more information about Hong Kong's existing treaty network, please see the Withholding taxes section.

Developments in profits tax

In December 2011, a piece of tax legislation was enacted to expand the scope of tax deduction for capital expenditure incurred on the purchase of intellectual property (IP) rights. Before the new legislation, tax deduction was available for qualified capital expenditure incurred on purchase of patent or know-how rights only, provided that certain specified conditions are met. The new legislation expands the scope of tax deduction to qualified capital expenditure incurred on the purchase of copyrights, registered trademarks, and registered designs (collectively known as 'specified IP rights'), as far as the conditions specified in the new legislation are satisfied.

However, the new legislation also introduces a number of specific anti-avoidance provisions that guard against possible abuse of tax deduction of both patent/know-how rights and the specified IP rights. In addition, sale proceeds from a subsequent disposal of these IP rights will be deemed as taxable trading receipts to the extent of the amount previously allowed as deduction.

In April 2012, an advance pricing arrangement (APA) program was officially launched in Hong Kong whereby any resident enterprise or non-resident enterprise with a permanent establishment (PE) in Hong Kong may apply for an APA in respect of its transactions with associated enterprises under a CDTA. At the initial stage of the program, only bilateral or multilateral APA applications will be accepted, although a unilateral APA may be considered in some limited exceptional circumstances. The Hong Kong Inland Revenue Department (HKIRD) had issued Departmental Interpretation and Practice Notes No. 48 'Advance Pricing Arrangement' in March 2012 to provide details about the APA program.

Other developments

The capital duty levied on local companies has been abolished, effective as of 1 June 2012.

Taxes on corporate income

H

Hong Kong adopts a territorial basis of taxation. Profits tax is payable by every person (defined to include corporation, partnership, and sole proprietorship) carrying on a trade, profession, or business in Hong Kong on profits arising in or derived from Hong Kong from that trade, profession, or business. However, capital gains and receipts that are capital in nature are not subject to tax. Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to tax in Hong Kong. The tax residence of a person is generally irrelevant for profits tax purposes. The tax treatments of public and private companies are the same.

Certain income that would not otherwise be subject to Hong Kong profits tax is deemed to arise in or be derived from Hong Kong from a trade, profession, or business carried on in Hong Kong and thus becomes taxable in Hong Kong. This includes royalties received by a non-resident for the use of or right to use a patent, design, trademark, copyright material, secret process or formula, or other property of a similar nature in Hong Kong, or for the use of such intellectual properties outside Hong Kong, but the royalties paid can be claimed as a deduction by a person for profits tax purposes.

The tax rates are 16.5% for corporations and 15% for unincorporated businesses for year of assessment 2012/13.

There are special rules for determining the tax liabilities of certain industries such as shipping, air services, and financial services.

Incomes from certain qualifying debt instruments (QDIs) are either tax exempt or subject to a concessionary tax rate (i.e. 50% of the regular profits tax rate). A specific anti-avoidance provision was recently introduced whereby the concessionary tax rate/tax exemption does not apply to incomes derived from QDIs by a person who is an associate of the issuer of the QDIs.

Offshore funds having Hong Kong fund managers and investment advisors with full discretionary powers are exempt from Hong Kong profits tax on profits derived in Hong Kong from six types of 'specified transactions' which are carried out or arranged by 'specified persons'. However, there are also specific anti-avoidance provisions in the Inland Revenue Ordinance (IRO) deeming certain resident persons to be subject to profits tax on their share of the non-resident person's tax exempt profits.

Hong Kong

Corporate residence

In general, for Hong Kong profits tax purposes, corporate residency is not important in determining taxability of an entity. The decisive factors for taxability are (i) whether a corporation is carrying on a trade, profession, or business in Hong Kong, and (ii) whether the profits are arising in or derived from Hong Kong.

However, where it is necessary to determine the corporate residence, such as for the purpose of a comprehensive double tax agreement (CDTA), companies incorporated in Hong Kong and companies that are normally managed or controlled/centrally managed and controlled (depending on the provisions of the relevant CDTA) in Hong Kong are generally considered as a Hong Kong tax resident.

Permanent establishment (PE)

For Hong Kong profits tax purposes, whether a foreign corporation is carrying on a trade, profession, or business in Hong Kong and the source of profits, rather than whether there is a PE in Hong Kong, are the decisive factors in determining taxability.

Other taxes

Value-added tax (VAT)

Hong Kong does not have a VAT, goods and services tax, or sales tax.

Customs duties

There is no tariff on general imports in Hong Kong.

Excise tax

Duties are levied on limited categories of dutiable commodities (i.e. tobacco, liquor, methyl alcohol, and hydrocarbons), regardless of whether they are imported or locally manufactured.

Property tax

Property tax is charged annually to the owner of any land or buildings (except government and consular properties) in Hong Kong at the standard rate of 15% on the net assessable value of such land or buildings. Net assessable value of a property is the consideration payable to the owner for the right to use the land or buildings less rates paid by the owner and a 20% notional allowance.

Rental income derived by a company from a Hong Kong property is subject to profits tax. The company that is subject to profits tax may apply for an exemption from property tax in respect of the property. If no exemption is applied, the property tax paid can be used to offset against the profits tax payable by the company.

Transfer tax

Hong Kong does not have a transfer tax.

Stamp duty

Stamp duty is charged on transfer of Hong Kong stock by way of sale and purchase at 0.2% of the consideration (or the market value if it is higher) per transaction. Hong Kong stock is defined as stock the transfer of which must be registered in Hong Kong.

For conveyance on sale of immovable property in Hong Kong, the stamp duty payable depends on the property consideration and ranges from a flat rate of 100 Hong Kong

dollars (HKD) (for property consideration of up to HKD 2 million) to the highest rate of 4.25% of the consideration of the property (for property consideration exceeding HKD 20 million), with marginal relief upon entry into each higher rate band.

For lease of immovable property in Hong Kong, stamp duty is calculated at a specified rate of the annual rental that varies with the term of the lease. Currently, the applicable rate ranges from 0.25% (for lease period of not more than one year) to 1% (for lease period of more than three years).

Exemption is available to certain transactions, such as transfer of shares between associated corporate bodies and certain stock borrowing and lending transactions, provided that the specified conditions for exemption are satisfied.

Special Stamp Duty (SSD)

There is an SSD on resale of residential property within 24 months from the date of acquisition. The SSD is imposed on top of the *ad valorem* stamp duty payable on conveyance on sale or agreement for sale of residential property, with a few exemptions. The SSD payable will be calculated based on the stated consideration or the market value (whichever is higher) of the resold property at the regressive rates indicated below.

- 15% for residential properties held for six months or less.
- 10% for residential properties held for more than six months but for 12 months or less.
- 5% for residential properties held for more than 12 months but for 24 months or less.

Business registration fees

Every person who carries on a business in Hong Kong is required to apply for business registration with a fee within one month from the date of commencement of the business. The business registration certificate has to be renewed either on an annual basis or every three years with a payment of a business registration (renewal) fee. Special registration and licence fees are applicable to banks and deposit-taking companies.

Capital duty

The capital duty has been abolished, effective as of 1 June 2012.

Prior to 1 June 2012, a fee of HKD 1 for all or part of HKD 1,000 of the nominal share capital, or increase in nominal share capital, was payable as capital duty by a Hong Kong company at its incorporation or when there was an increase in its nominal share capital. The fee was capped at HKD 30,000 per case, counted on a company (rather than group) basis. When a company allotted shares at a premium, a capital duty of HKD 1 for every, or part of, HKD 1,000 of the aggregate amount of the premiums was payable.

Government rates and rent

Rates are an indirect tax levied on properties in Hong Kong. Rates are charged at 5% of the rateable value, which is the estimated annual rental value of a property at the designated valuation reference date of 1 October.

Privately owned land in Hong Kong is normally held by way of a government lease under which rent is payable to the Hong Kong SAR Government in return for the right to hold and occupy the land for the term (i.e. duration) specified in the lease document.

Hong Kong

Currently, government rent is calculated at 3% of the rateable value of the property and is adjusted in step with any subsequent changes in the rateable value.

Branch income

The tax rate for branches is the same as that for corporations. The Hong Kong profit of a foreign corporation with a branch in Hong Kong is determined according to the accounts maintained for the Hong Kong operation (or business). If the Hong Kong accounts do not disclose the true profits arising in or derived from Hong Kong attributable to the Hong Kong operation, the Hong Kong profit will be computed according to the ratio of turnover in Hong Kong to total turnover (or the proportion of Hong Kong assets over total assets) on the worldwide profits. Alternatively, the HKIRD tax assessor may estimate the profits of the Hong Kong branch. In certain situations, the profits of the Hong Kong branch could be estimated based on a fair percentage of the turnover in Hong Kong.

Income determination

Inventory valuation

Inventory may be stated at the lower of cost or market value. Last in first out (LIFO) may not be used for tax purposes. First in first out (FIFO) must be consistently applied.

The prevailing accounting standards require financial assets and liabilities held for trading purpose (e.g. shares and securities held as trading stock) to be carried at market value, with fluctuations in values of such assets and liabilities taken to the profit and loss accounts, irrespective of whether the profits or losses are realised. The HKIRD requires that this accounting treatment be followed in computing the assessable profits for tax purposes.

There are special tax provisions for valuation upon cessation of a business under which inventory is valued at market value, unless it is sold to a person carrying on business in Hong Kong, who may deduct a corresponding amount as the cost of the inventory in computing the assessable profits.

Capital gains

Gains from realisation of capital assets or receipts that are capital in nature are not taxed.

Dividend income

Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to Hong Kong profits tax. Hong Kong corporations may declare bonus issues (i.e. stock dividends), which are not taxable in the hands of the recipients.

Interest income

Interest income received by or accrued to a corporation carrying on a trade or business in Hong Kong is subject to profits tax. Exemption is provided to interest income derived from any deposit placed in Hong Kong with a financial institution, unless the deposit secures a borrowing the interest expense of which is deductible. This exemption, however, does not apply to interest accruing to a financial institution.

Interest accruing to a bank or financial institution will be deemed to be sourced and taxable in Hong Kong if the interest arises through or from the carrying on of business in Hong Kong by the bank or financial institution.

Royalties

Royalties paid or accrued to a non-resident for the use of or right to use in Hong Kong or outside Hong Kong (if the royalties are deductible in ascertaining the assessable profits of a person for Hong Kong profits tax purposes) a trademark, patent, design, copyright material, secret process, or other property of a similar nature, or for the use in Hong Kong of cinema or television tape or any sound recording, are deemed to be taxable in Hong Kong.

A total of 30% of the sum receivable is deemed to constitute profits subject to tax in normal situations. Where such royalties are received by or accrued to an associated corporation, however, 100% of the sum is deemed to constitute profits under certain circumstances.

Partnership income

Partnership business is taxed as a single entity though an individual partner can use its share of losses incurred by a partnership to offset against the assessable profits of its other business. In general, there is no special registration requirement other than business registration for a partnership. The assessable profits of a partnership are basically determined in the same way as those of a corporation, with certain special rules (e.g. salaries or other remunerations paid to a partner or a partner's spouse are not deductible).

Unrealised exchange gains/losses

In general, unrealised exchange gains/losses are taxable/deductible if they are recognised in the profit and loss accounts in accordance with the generally accepted accounting principles (GAAP), provided that they are revenue in nature and with a Hong Kong source. The nature and source of exchange gains/losses are determined by the nature and source of the underlying transactions. Exchange gains/losses arising from ordinary business transactions (e.g. trade receivables or payables) are taxable/deductible whereas exchange gains/losses arising from capital transactions (e.g. sale of capital assets) are non-taxable/non-deductible.

Foreign income

Hong Kong resident corporations are not taxed on their worldwide income. Foreign-sourced income, whether or not remitted to Hong Kong, is not taxed. As such, there is no specific tax provision dealing with deferral or non-remittance of foreign earnings. Nor does Hong Kong have any controlled foreign company (CFC) legislation.

Deductions

Expenses that are incurred for producing profits chargeable to tax and that are not capital in nature are generally tax deductible. In addition, special tax relief is available for certain capital expenditure. There are special rules for deduction of certain expenses (e.g. interest expenses).

Accounting treatments are usually followed in determining the assessable profits except when there is an explicit rule in the IRO. Accrued expenses recognised in the profit and loss accounts in accordance with the GAAP are usually deductible if they are incurred for producing profits chargeable/subject to tax and are not capital in nature.

Hong Kong

Expense items of which a tax adjustment is necessary in determining the amount of taxable profits from the accounting profits include: tax depreciation allowance vs. accounting depreciation, expenses that are capital in nature, general provisions that are non-deductible, and non-deductible interest expenses on borrowings used to finance non-income producing assets.

Set out below are the Hong Kong profits tax treatments of some common expense items.

Tax depreciation of fixed assets

Tax depreciation allowances/deductions are available for capital expenditure incurred on the construction of buildings or structures and in the provision of machinery and plant for trade or business purposes, as follows:

- Industrial buildings and structures: An initial allowance of 20%, in addition to an annual allowance of 4%, of the cost of construction or cost of purchase from a developer is granted for an industrial building or structure occupied for the purpose of a qualifying trade. Provision is made for balancing allowance or charge in the year of assessment in which the building is disposed of to adjust the written-down value of the building to the disposal price. Balancing charges are restricted to the total of initial and annual allowances previously given.
- Commercial buildings and structures: An annual allowance of 4% of the capital expenditure incurred on the construction is applicable. A balancing allowance or charge applies upon disposal. Balancing charges are restricted to the total annual allowances previously given.
- Plant and machinery: An initial allowance of 60% of the capital expenditure on plant and machinery is given for the year of assessment during the basis period in which the expenditure is incurred. An annual allowance is also given for depreciation at three prescribed rates on the reducing value of each of the three depreciation rate 'pools'. The three prescribed rates are 10%, 20%, and 30%, and the reducing value of each of the three depreciation rate pools is original cost less initial and annual allowances and sales proceeds. Provision is made for balancing charges when plant and machinery within one of the three depreciation rate pools is sold or disposed of and the reducing value of that pool is less than the sale price, which is capped at the original amount incurred in the pool. In addition, balancing allowances or charges may be applicable upon cessation of business. Otherwise, sales proceeds are deducted in calculating the reducing value on which the annual allowance is calculated.

Book depreciation is adjusted for tax purposes in accordance with the above depreciation allowances granted under the IRO.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is not deductible as they are capital in nature.

Organisational and start-up expenses

In general, company formation/start-up expenses that are incurred before the commencement of a trade, profession, or business and that are for the establishment of the overall income producing structure are capital in nature and not tax deductible.

Research & development (R&D)

There is a specific provision allowing the deduction of expenditure incurred on R&D (including payments made to an approved research institute and in-house expenditure), provided that certain specified conditions are met.

Interest expenses

There is no thin capitalisation rule in Hong Kong. However, deduction of interest expense is subject to stringent and complicated rules which are designed to guard against loan arrangements with an intention to avoid Hong Kong profits taxes.

Bad debt

A bad or doubtful debt incurred in any trade, business, or profession, proved to the satisfaction of the HKIRD to have become bad during the basis period for a year of assessment, is deductible. The deduction is limited to debts which were included as a trading receipt in ascertaining the taxpayer's assessable profits or debts in respect of money lent in the ordinary course of a money-lending business in Hong Kong.

If any bad or doubtful debt which has previously been allowed as a deduction is ultimately recovered, it will be treated as taxable profits of the basis period in which it is recovered.

Charitable contributions

A deduction is allowed for cash donations to approved charities made in the basis period for a year of assessment if the aggregate of such donations is not less than HKD100. The deduction is limited to 35% of the assessable profits of the year of assessment.

Pension expenses

A deduction is allowed for regular/ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme made by an employer in respect of an employee to the extent that the contributions do not exceed 15% of the employee's total emoluments for the period to which the contributions relate.

Special payments other than the ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme are capital in nature but can be deducted evenly over a five-year period under a specific provision of the IRO.

There are also specific rules for deduction of provisions for contributions to a mandatory provident fund scheme or recognised occupational retirement scheme.

Payments for directors

Director fees or other remunerations paid by a corporation to its directors are generally deductible under the normal deduction rule. Nevertheless, no deduction is allowed on salaries or other remunerations paid to a sole proprietor or any partners or partners' spouses of a partnership business.

Contingent liabilities

Generally speaking, general provisions for expenses are not deductible whereas specific provisions are deductible if the HKIRD is satisfied that the amount has been incurred (i.e. the taxpayer has a legal/contractual obligation to pay such amount in future) and that the provision represents a reasonably accurate estimate of the future liability.

Special deductions

There are special deduction rules for expenditures incurred (i) for refurbishment of a building or structure, other than a domestic building or structure; (ii) on environmental protection installation and machinery; (iii) on environment-friendly vehicles; (iv) on machinery or plant used specifically and directly for any manufacturing process, computer hardware (other than that which is an integral part of machinery or plant), computer software, and computer systems (collectively known as prescribed fixed

Hong Kong

assets); (v) for registering trademarks, designs, or patents used in the production of taxable profits; and (vi) on the purchase of patent/know-how rights and specified intellectual property (IP) rights (i.e. copyrights, registered trademarks, or registered designs), provided certain specified conditions are met.

Fines and penalties

Fines and penalties are generally not deductible as the HKIRD does not consider them to be expenses incurred for producing profits chargeable/subject to tax.

Taxes paid

Taxes paid on corporate profits are generally not deductible for the purpose of calculating the assessable profits. However, the HKIRD generally accepts that a foreign tax that is an expense that must be borne regardless of whether or not a profit is derived (e.g. a foreign withholding tax levied on the gross amount of interest or royalties received), as opposed to a charge on the profits themselves, is deductible under the general deduction provision. Where interest income or gains from the sale of a certificate of deposit or bill of exchange are deemed to be subject to profits tax, a deduction is allowed for foreign taxes of substantially the same nature of Hong Kong profits tax paid in respect of the same income, provided that the taxpayer is not eligible for double taxation relief under a CDTA.

Net operating and capital losses

Net operating losses incurred in an accounting year can be carried forward indefinitely to offset future profits of the business. A corporation carrying on more than one business may have losses in one business offset profits of the others, with any balance being carried forward. Net operating losses cannot be carried backward.

Capital losses are not tax deductible.

Payments to foreign affiliates

Royalties and service fees paid/payable by a Hong Kong corporation to foreign affiliates are deductible provided they are incurred for the production of profits chargeable/subject to tax. There is no special restriction on the deductibility of these payments. Interest payable to a foreign affiliate is not deductible if the recipient is not chargeable/subject to Hong Kong profits tax on the interest income received.

Group taxation

Hong Kong does not have a consolidated or group taxation regime.

Transfer pricing

Strictly speaking, there is no comprehensive transfer pricing legislation in Hong Kong. While a few existing provisions in the IRO may be employed by the tax authority to tackle non-arm's-length transactions, such provisions are primarily aimed at transactions with closely connected non-residents or tax avoidance transactions rather than specific legislation on transfer pricing.

In 2009, the HKIRD issued two Departmental Interpretation and Practice Notes (DIPNs) to address the transfer pricing issues in Hong Kong. DIPN 45 focuses on the administrative/procedural issues involved in providing double tax relief in a treaty context such as when such relief is available and what are the procedures for claiming such relief. DIPN 46 outlines the HKIRD's view on the legislative framework for transfer pricing in Hong Kong (including the statutory provisions in the IRO and the articles

in a CDTA that are relevant to transfer pricing) and provides guidance on numerous transfer pricing related issues such as the application of the arm's-length principle, the acceptable transfer pricing methodologies, which are largely in line with the OECD transfer pricing guidelines. The DIPN also spells out the documentation that taxpayers should consider retaining to support their transfer pricing arrangements and explains the interaction between the transfer pricing and sourcing rules in Hong Kong.

In general, the HKIRD adopts the arm's-length principle and would seek to apply the OECD transfer pricing guidelines except where they are incompatible with the express provisions in the IRO.

An APA program was launched in Hong Kong in April 2012. The objectives of the APA program are to help taxpayers obtain tax certainty on their complex or significant transfer pricing arrangements and reduce the risk of double taxation arising from related-party transactions. Resident enterprises or non-resident enterprises with a PE in Hong Kong may apply for an APA in respect of their transactions with associated enterprises under a CDTA, provided that certain conditions (including the threshold for an APA application) are met.

At the initial stage, the HKIRD is primarily focused on bilateral APA or multilateral APA applications in respect of cross-border related-party transactions involving countries that are CDTA partners with Hong Kong.

Departmental Interpretation and Practice Notes No. 48 - Advance Pricing Arrangement (DIPN 48), which set out the details of the APA program, was issued by the HKIRD in late March 2012. DIPN 48 provides guidance on various aspects of the APA regime, such as the timeframe and threshold for an APA application, the various stages involved in the APA process, an audit involving years covered by a concluded APA, and possible rollback of the transfer pricing methodology agreed under an APA to prior years. The appendices of the DIPN include various sample documents for use in an APA application.

Thin capitalisation

Hong Kong does not have thin capitalisation rules.

Controlled foreign companies (CFCs)

Hong Kong does not have a CFC regime.

Tax credits and incentives

Foreign tax credits

Foreign tax credits are available if foreign taxes are payable/paid on income derived from a jurisdiction which has entered into a CDTA with Hong Kong and the same income is subject to tax in Hong Kong. *See the Withholding taxes section for a list of jurisdictions that have entered into a CDTA with Hong Kong.*

Tax holidays

Hong Kong does not have a tax holiday program.

Foreign investment incentives

Hong Kong does not have any specific incentives for foreign investment except that offshore funds may be exempt from profits tax under certain circumstances.

Hong Kong

Withholding taxes

There is no withholding tax (WHT) on dividends, interest, or royalties. However, the 4.95%/16.5% (for corporations) or 4.5%/15% (for unincorporated businesses) tax on royalties received by non-residents (*see Royalties in the Income determination section*) is in effect similar to a WHT.

Resident consignees are required to furnish quarterly returns to the HKIRD showing the gross proceeds from sales on behalf of their non-resident consignors and to pay to the HKIRD Commissioner a sum equal to 0.5% of such proceeds. The HKIRD normally accepts this as satisfying the Hong Kong tax obligations of the non-resident.

Hong Kong has so far entered into a CDTA with Austria, Belgium, Brunei, the Czech Republic, France, Hungary, Indonesia, Ireland, Japan, Jersey, Kuwait, Liechtenstein, Luxembourg, Malaysia, Malta, the Netherlands, New Zealand, the People's Republic of China (PRC), Portugal, Spain, Switzerland, Thailand, the United Kingdom, and Vietnam.

The CDTAs with Jersey, Kuwait, Malaysia, Malta, Portugal and Switzerland have not yet entered into force, pending the completion of the ratification procedures of the governments concerned. The CDTAs with the Czech Republic, Indonesia, and Spain have been ratified but will only become effective in Hong Kong from year of assessment 2013/14 (i.e. from 1 April 2013).

The following table shows the applicable WHT rates for payments made from Hong Kong payers to non-treaty and treaty country corporate recipients. The rates shown in the table are the lower of the domestic and treaty rates. For WHT rates on payments received by Hong Kong recipients from treaty country payers, please refer to the summaries of the respective treaty countries.

Recipient	Dividends (%) (1)	Interest (%) (1)	Royalties (%)
Non-treaty	0	0	4.95 (2)
Treaty:			
Austria	0	0	3
Belgium	0	0	4.95 (3)
Brunei	0	0	4.95 (3)
China, the People's Republic of (PRC)	0	0	4.95 (3)
Czech Republic	0	0	4.95 (3)
France	0	0	4.95 (3)
Hungary	0	0	4.95 (3)
Indonesia	0	0	4.95 (3)
Ireland	0	0	3
Japan	0	0	4.95 (3)
Jersey	0	0	4
Kuwait	0	0	4.95 (3)
Liechtenstein	0	0	3
Luxembourg	0	0	3
Malaysia	0	0	4.95 (3)
Malta	0	0	3
The Netherlands	0	0	3
New Zealand	0	0	4.95 (3)

Recipient	Dividends (%) (1)	Interest (%) (1)	Royalties (%)
Portugal	0	0	4.95 (3)
Spain	0	0	4.95 (3)
Switzerland	0	0	3
Thailand	0	0	4.95 (3)
United Kingdom	0	0	3
Vietnam	0	0	4.95 (3)

Notes

1. Hong Kong IRO does not impose WHT on dividends and interest currently. However, the treaties provide for a maximum WHT rate on dividends and interest should Hong Kong IRO impose such WHT in the future. Some of the treaties also provide for a reduced WHT rate on dividends and interest if conditions specified in the treaties are met.
2. Generally, royalties paid to non-resident corporations that are not otherwise chargeable to Hong Kong profits tax are subject to WHT at 4.95%. The 16.5% rate applies if the royalties are received by or accrued to a non-resident from an associate, unless the Commissioner is satisfied that no person carrying on business in Hong Kong has at any time wholly or partly owned the property in respect of which the royalties are paid.
3. Since a higher rate is specified in the treaty, the lower domestic/non-treaty rate of 4.95% will apply.

Tax administration

Taxable period

A year of assessment (or tax year) begins on 1 April of a year and ends on 31 March of the following year. The period that is used to compute the taxable profits for a year of assessment is called the basis period, which is normally the financial year ended in the year of assessment.

Tax returns

Tax returns are issued on the first working day of April each year. The filing deadline is usually within a month from the date of issue. However, corporations whose financial year ended after 30 November and are represented by a tax representative are normally granted with an extension for filing their returns. The exact filing due date depends on the accounting year end date of the taxpayer.

The basis of assessment is the accounting profits of the financial year ending within the year of assessment, with appropriate adjustments for tax purposes. A tax return is usually filed together with a tax computation showing the tax adjustments to the accounting profits in arriving at the taxable profits or allowable tax losses for a given year of assessment.

Corporate taxpayers are also required to attach their audited accounts as supporting documents when filing a profits tax return, unless they qualify as a small corporation as defined by the HKIRD (i.e. mainly those with gross income for a basis period of not exceeding HKD 2 million plus a few other conditions). Small corporations are not required to attach supporting documents with their profits tax returns but are still required to keep those documents and submit them upon request. A branch of a foreign corporation doing business in Hong Kong is required to file a profits tax return annually, and the HKIRD may require audited accounts of the foreign corporation to support the Hong Kong branch's profits tax return.

Hong Kong

Notice of assessment will be issued after the tax return has been examined by the HKIRD. Taxpayers may be subject to post-assessment investigation or field audit under the computerised random selection procedures of the HKIRD at a later date.

Payment of tax

The dates of payment of tax are determined by the HKIRD Commissioner and specified in the assessment notice. A system of provisional tax payments applies whereby estimated tax payments are made during the current year. The provisional profits tax payable is normally estimated based on the previous year's profits tax liability. The provisional profits tax already paid is credited against the final profits tax assessed for a year of assessment, which is determined after filing of the return.

Tax audit cycle

There is no specific tax audit cycle in Hong Kong. Tax audit targets are selected with reference to certain criteria determined by the HKIRD.

Statute of limitations

An additional assessment may be made by a HKIRD tax assessor if a taxpayer chargeable to tax has not been assessed to tax or has been assessed at less than the proper amount. The assessment must be made within the relevant year of assessment or within six years after the end of that year of assessment. The time limit for making additional assessments is extended when a taxpayer either has not been assessed, or is under-assessed, due to fraud or wilful evasion. In that case, an additional assessment may be made up to ten years after the end of the relevant assessment year.

A statement of loss is not an assessment, and the above six-year time limit does not apply to issue or revision of a statement of loss. A tax loss year remains technically open until the sixth year after the first year in which the taxpayer has an assessable profit after utilising all the tax losses brought forward.

Topics of focus for tax authorities

Profits tax issues that are often subject to close scrutiny of the tax authority include offshore claim of profits, capital claims of income, transactions with related parties and closely connected non-residents, and deductibility of expenses (e.g. interest expenses, share-based payments, and intra-group management/service fees).

General anti-avoidance rules (GAAR)

The IRO includes a GAAR (i.e. section 61A) allowing the HKIRD to disregard a transaction or counteract the tax benefit conferred by a transaction if the sole or dominant purpose of entering into such a transaction is to obtain a tax benefit. Whether the sole or dominant purpose of entering into a transaction is for obtaining a tax benefit will be assessed according to a set of factors stipulated in section 61A. Another GAAR in the IRO is section 61, which empowers the HKIRD to disregard a transaction that reduces or would reduce the amount of tax payable by any person if that transaction is considered artificial or fictitious. Although both GAARs could be used, in practice, section 61A is more often invoked by the HKIRD in tackling tax avoidance schemes.

Specific anti-avoidance provision for related party transactions

In addition to the general anti-avoidance provisions described above, there is a specific anti-avoidance provision dealing with transactions with closely connected non-residents. Under the specific provision, if a resident person carries on a business with a closely connected non-resident person such that no profits or less than the ordinary profits are derived by the resident person in the course of such business, the non-

resident person can be assessable and chargeable to tax in respect of his profits derived from such business in the name of the resident person.

Other issues

Foreign investment restrictions

In general, Hong Kong does not impose restriction to foreign investors to make investments in Hong Kong; and wholly foreign owned companies are allowed. The only exception is the restriction on foreign ownership of Hong Kong's licensed television/sound broadcasters, of which the collective foreign ownership ceiling is 49% of the voting power. In addition, an approval from the Broadcasting Authority must be obtained for holding, acquisition, or exercise of voting control by a foreign investor of more than 2% of a licensee.

Exchange controls

Hong Kong does not have any foreign exchange control. There is no restriction on entry or repatriation of capital or remittance of profits from investments. Funds can be freely remitted to persons outside Hong Kong by various means such as dividends, interest, royalties, service fees, and branch profits, etc.

Choice of business entity

The principal forms through which a business can be conducted in Hong Kong are as follows:

- Company incorporated in Hong Kong (either private or public via listing on the Stock Exchange of Hong Kong).
- Branch of a foreign company.
- Representative or liaison office of a foreign company.
- Joint venture (can be set up either as a company or partnership).
- Partnership.
- Sole proprietorship.

Of the above, privately incorporated companies and branches of a foreign companies are most commonly used by foreign investors, as limited liability is usually desirable.

Intellectual property (IP) regulations

The Intellectual Property Department is responsible for monitoring the IP regime and ensuring the protection and enforcement of IP rights in Hong Kong. The Department is also responsible for investigating complaints against infringements and has extensive powers of search and seizure. Registration and protection of patents, copyrights, trademarks, and registered designs are each governed by a separate ordinance.

Merger and acquisition (M&A) activities

There are no specific restrictions on M&A activities in Hong Kong. The following tax considerations are relevant in the M&A context:

- Dividends or other forms of distribution of profits (e.g. distribution of branch profits to the head office) are generally not taxable.
- Capital gains arising from an M&A transaction is not taxable in the hands of the transferor, whereas amortisation of the goodwill in the transferee's accounts is not tax deductible due to its capital nature.

Hong Kong

- For a share deal, stamp duty is payable on the transfer of Hong Kong shares at 0.2% unless an exemption applies; for an asset deal, stamp duty is payable on conveyance of immovable property in Hong Kong at progressive rates of up to 4.25%
- Gains derived from transfer of revenue items (e.g. trade receivables) in an asset deal would be subject to profits tax.
- There is no special tax concession/incentive relating to M&A transactions.
- Tax losses in the acquired company can generally be carried forward indefinitely to set off against future assessable profits. However, there are specific anti-avoidance provisions in the IRO that prevent the transfer of shares of a company with accumulated tax losses to owners of a profitable company for the sole or dominant purpose of utilising the tax losses i.e. offsetting the tax losses against the profits generated from other trade, profession, or business of the transferee.

Significant developments

As of 1 January 2012, the following significant changes were introduced to the Hungarian tax system.

Corporate income tax (CIT)

- The CIT rate is now 10% on the first 500 million Hungarian forint (HUF) (approximately 1.58 million euros [EUR]) of a positive CIT base. The tax base above this limit is subject to 19% CIT.
- Significant changes to the loss carryforward legislation.
- Introduction of the sport support scheme, which enables companies supporting sport organisations to realise up to 119% tax savings on the support provided.
- Introduction of 'registered intangible assets'.
- The thin capitalisation rule now covers non-interest bearing loans as well.

Value-added tax (VAT)

- The general VAT rate increased to 27%.
- The VAT payable on the lease of vehicles for taxable activities is also deductible.
- The opportunity to request a more frequent filing of VAT returns remains available for taxpayers who are constantly in a VAT reclaimer's position.
- Changes in the rules on the so-called supply chain transactions: it is possible only for the intermediary participant to disprove the legal presumption according to which it participated in the transaction as the buyer, and to prove that it took the position of the seller.
- The rules on subsequent tax base modification change:
 - The tax base also decreases in cases when the parties have invoiced higher amounts than they had agreed on by mistake and when the prepayment given before the supply is only partially paid back due to the lack of supply.
 - The number of cases when there is no need for self-revision has increased. Therefore, in case in which the amount of taxes due has been decreased due to an erroneously used higher tax rate, and not because of a tax rate reduction, taxpayers do not need to conduct a self-revision to determine the correct amount of tax.
- The rules on the period of limitation has to be applied again to the reclaimable VAT carried forward (the deductible VAT can be carried forward only within the period of limitation).
- Information in whether a taxpayer has opted for the taxation of the supply of real estate will be available on the official website of the Hungarian Tax Authority.
- The VAT treatment of certain transactions during the VAT warehousing procedures has changed.
- Extension of the invoicing obligation.
- Refinement of the rules on electronic invoicing.

Hungary

- The market price applicable between related parties has to be taken into account in the apportionment calculations.
- As of 1 February 2012, the deadline for VAT refund increased to 75 days. As an exception, the authorities still have 30 days, or 45 days in the case of a refund that exceeds HUF 1 million, if all the invoices that are affected in the reclaim are cleared.

Excise duty

- Excise duty rates of alcohol and tobacco products increased as of 1 November 2011 and again as of 1 February 2012.
- A new duty rate was introduced for beers, abolishing the distinction between regular beers and flavoured beers.
- Companies with an Authorised Economic Operator (AEO) certificate qualify as a reliable debtor, which may enable the reduction of the amount of excise guarantee.

Public health product tax

Legislation was introduced on 1 September 2011 under which the first domestic distributor of certain products is liable to pay a product tax. The products which fall under this new product tax are beverages, energy drinks, cocoa powder with added sugar, other pre-packaged product with sugar, salty snacks, seasonings, flavoured beer and alcoholic beverages, and fruit jam. The rates vary depending on tariff number and salt, sugar, cocoa, methyl-xanthine, or taurin content.

Environmental protection product fee

A new regulation replaced the previous legislation on 1 January 2012.

This new legislation abolished the tax exemption system through coordinating organisations. This will mean that the total tax amount will be payable to the state.

Packaging materials, instead of packaging, will be subject to the product fee. This means that the first distributor of packaging materials (e.g. packaging material producers) or the company that uses packaging materials for its own purposes will have to pay the tax.

Registration taxes

The registration tax rates decreased significantly from 1 January 2012. The applicable rates are as follows:

- Passenger cars: HUF 45,000 to HUF 4.8 million (approximately EUR 143 to EUR 15,225), depending on the technical features of vehicles (cc, engine type) and environmental classification.
- Hybrid or electrical cars: HUF 0 to HUF 76,000 (approximately EUR 241).
- Motorcycles: HUF 20,000 to HUF 230,000 (approximately EUR 70 to EUR 900), depending on technical features of the motorcycles (cc).

The registration tax is also payable by fleet operators.

Food chain supervision fee

Under the amendment to Act XLVI of 2008 on the Food Chain and its Official Supervision adopted at the end of 2011, certain players in the food chain (e.g. food producers and distributors) are required to pay a supervision fee from 2012. The fee is 0.1% of the net sales revenue (excluding excise duty and the public health product tax) derived in the preceding year from activities that fall within the scope of the Act.

Disaster management contribution

The new rules of the 'disaster management contribution' entered into force on 1 January 2012.

The purpose of the contribution is to facilitate the acquisition, upgrading, and renewal of technical equipment and tools used for disaster management; to cover expenses related to disaster prevention, training, and equipment for civil protection organisations; and to provide support to volunteer emergency services.

The following taxpayers will be required to pay the contribution:

- Natural or legal persons and organisations without legal personality engaged in the operation of a plant or other facility dealing with hazardous substances or exercising a controlling influence on the operation of such a facility.
- Economic operators, other than those listed above, that store, manufacture, or process goods subject to the provisions of the European agreement (known as ADR) that regulates the international carriage of hazardous goods by road.

The amount of the contribution will be 0.1% of the annual net sales revenue deriving from the hazardous activity (minus the amount of excise duty and energy tax paid) or the net value of the hazardous goods used.

According to the recent statements of the Hungarian government, it could be possible that the disaster management contribution will be abolished before its first collection in 2012.

Taxes on corporate income

Resident taxpayers are subject to all-inclusive or unlimited CIT liability. Non-residents are subject to CIT on their income from their Hungarian branch's business activities.

The CIT rate is 10% on the first HUF 500 million (approximately EUR 1.58 million) of a positive CIT base without any further preconditions. The tax base above this limit is subject to 19% CIT.

Minimum tax base

If a company's CIT base or the pre-tax profit, whichever is higher, is less than 2% of its total revenues reduced by the cost of goods sold, the value of mediated services, and the income of the foreign permanent establishments (PE) (i.e. the 'minimum tax base'), the company can choose to file a declaration and pay CIT either according to the general provisions or on its minimum tax base.

Special income tax

Companies with the following activities are liable to pay a special 'austerity' tax:

- Retail sales in stores.
- Telecommunications activity.
- Business activity of energy suppliers.

The special 'austerity' tax base is the net sales revenue and not the pre-tax profit. The tax rates are progressive and depend on the company's business activity, as follows:

Hungary

Retail sales in stores

Tax base is the net sales plus revenue on services provided to retail supplier and revenue from discount.

Tax base (HUF)	Rate (%)
0 to 500 million	0
500 million to 30 billion	0.1
30 billion to 100 billion	0.4
above 100 billion	2.5

Telecommunications activity

Tax base is the net sales revenue of the activity of telecommunication.

Tax base (HUF)	Rate (%)
0 to 500 million	0
500 million to 5 billion	4.5
above 5 billion	6.5

Business activity of energy suppliers

Tax base is the net sales revenue of the activity of supplying energy.

Tax base (HUF)	Rate (%)
0 to 5 billion	0.3
500 million to 5 billion	1.05

Financial organisations are also subject to an industry specific special tax, the rate and base of which depend on their scope of activities.

Local taxes/local business tax

All municipalities are entitled to levy local taxes. Local taxes are deductible for Hungarian CIT purposes and are not normally treated as 'income tax' in the application of the tax treaties.

The local business tax base is the net sales revenue reduced by the cost of goods sold, subcontractors' work, the costs of materials, mediated services, and research and development (R&D) costs. General service fees, depreciation, and labour costs are typically not deductible for local business tax purposes. 100% of royalty, interest, or dividend income and the local business tax base of a foreign PE of a Hungarian company are exempt from local business tax. The local business tax rate may differ from municipality to municipality but is capped at 2% by law.

A special tax base allocation method is applicable for companies in the telecommunications sector. The allocation is based on the net revenues a company realises in the municipalities where its clients' billing addresses are located.

Innovation contribution

Companies defined as such in the Accounting Act, except for small and medium-sized enterprises and branches, are also subject to an innovation contribution. The tax base of the innovation contribution is the same as the local business tax base. The tax rate is 0.3%. Additionally, the direct costs of R&D are deductible from the tax payable

(not the tax base). As of 1 January 2012, the definition of R&D is included in the Hungarian domestic legislation as opposed to the earlier practice of referencing the Frascati Manual.

Corporate residence

Corporations are residents for CIT purposes if they are incorporated in Hungary, although foreign corporations may also be deemed to be Hungarian residents for CIT purposes if their place of effective management is in Hungary.

Foreign entities may carry out business through resident corporations or through PEs (branches). Commercial representative offices may be opened for auxiliary activities which do not create a taxable presence.

Permanent establishment (PE)

Hungary treats PEs as separate and distinct entities, and profit is attributed to a PE based on the principles set out in the Organisation for Economic Co-operation and Development (OECD) guidelines.

In the Corporate Income Tax Act a PE is defined as fixed business premises (machinery or equipment) through which the entrepreneurial activity of an enterprise is partly or wholly carried on, regardless of the title of the taxpayer to those premises. A PE may consist of any of the following: a place of management; offices, including representative offices, registered in Hungary; factories and workshops; and mines, crude oil or natural gas wells, quarries, or other places from which natural resources are extracted.

Construction sites (including assembly) and related supervisory activities constitute a PE if they last, in the aggregate, for at least three months in a calendar year. All activities carried out at the same construction site qualify together as a single PE, regardless of whether they are based on separate contracts or were ordered by different persons. Construction sites are defined as sites which represent a unit for economic, business, and geographical purposes.

PEs are also created by the direct utilisation of natural resources by a foreign person. A foreign person is deemed to have a PE in Hungary if it utilises natural resources or immovable property for consideration, including the alienation of any rights related to the immovable property or natural resources.

A non-resident enterprise is considered to have a PE with respect to activities undertaken on its behalf by another person if its agent is authorised to conclude contracts in Hungary on behalf of the non-resident entity and the agent regularly exercises this right or maintains a stock of goods and products from which it regularly makes deliveries in the name of the non-resident entity.

The insurance of risks occurring in Hungary and insured on behalf of the non-resident person by another person constitutes a PE of the foreign insurer, except for reinsurance activities.

Furthermore, as mentioned above, a foreign taxpayer must also be treated as having a PE if it has a Hungarian branch.

The definition of a PE does not include the following:

Hungary

- Establishments used solely for the purpose of storing and presenting the goods or products of a non-resident person.
- The stockpiling of goods and products solely for the purpose of storing, presenting, or processing by another person.
- Establishments used for collecting information, or purchasing goods and products, exclusively for the non-resident person.
- Establishments used for other activities of a preparatory or auxiliary nature.
- Activities of independent agents, provided they are acting in their ordinary course of business.

Note that a different definition of a PE is applicable for local business tax, and no definition is available for special 'austerity' tax.

Other taxes

Value-added tax (VAT)

VAT is payable on sales of goods and the provision of services. VAT is also payable on the importation of intra-Community acquisitions of goods and on the purchase of certain services provided to Hungarian companies by foreign suppliers.

The general VAT rate is 27%.

A reduced VAT rate of 18% is applicable for some products, such as milk, certain dairy products, bread and other bakery products, and hotel and holiday accommodation.

A reduced VAT rate of 5% is available for most medicines and books.

Certain services are exempt from VAT, including, but not limited to, medical, cultural, sporting, and educational services provided as public services; and financial and insurance services. Intra-Community supplies of services and exports are also treated as exempt transactions. For the rental of real estate and for the sale of real estate and land (except building land), VAT exemption is optional. In the case of the sale of residential property, the exemption does not include the sales before it was put into usage and the sales within two years from the date when the usage permit becomes effective.

VAT deduction is available for the business-related element of purchases made partially for non-business purposes.

Under the new general VAT liability regulations, VAT is also chargeable if an invoice is issued but the supply is not carried out.

Place-of-supply rules

The general rule for business to business (B2B) services is that the place of supply is where the customer is established. Some exceptions to this rule have been introduced (e.g. for facilitating entry to cultural, artistic, scientific, educational, entertainment, and sports events and catering services, the place of supply is where the service is physically carried out; for short term hire [not longer than 30 days, 90 days for vessels] of transport, the place of supply is where the asset is put at the disposal of the customer; for services connected to immovable property, the place of supply is where the property is located).

The general rule for business to consumer (B2C) services is that the place of supply is where the supplier is established. Some exceptions to this rule have been introduced

(e.g. for passenger transport and non-EU transport of goods, the place of supply is where the transport takes place; for services relating to cultural, artistic, sports, scientific, educational, entertainment, or similar activities, the place of supply is where the activities are physically carried out; for restaurant and catering services, the place of supply is where physically carried out).

Reverse charge mechanism

A domestic reverse charge applies between Hungarian taxable persons for a variety of activities in addition to the sale of waste materials, including construct and install services and services related to real property (repairs, maintenance).

VAT recovery

If a taxpayer has a negative VAT balance in a return period, this amount can be recovered provided that the tax balance reaches or exceeds an absolute value of HUF 1 million for monthly filers, HUF 250,000 for quarterly filers, or HUF 50,000 for annual filers. The condition that only the VAT content of financially settled invoices is reclaimable has been repealed as of 27 November 2011.

Directive for refunds of foreign European Union (EU) taxable persons

EU-registered non-Hungarian taxable persons can recover local VAT. In the new system, refund applications have to be submitted electronically, and the rules governing the time available/deadlines for tax authorities in certain phases of the procedure have changed. Reclaim requests should be submitted to the Tax Authority of the country where the taxable person is established.

Reporting obligations for cross-border transactions

A new requirement is that suppliers of cross-border services must submit full statements for each VAT return period of all the services supplied to taxable and non-taxable legal persons where the latter are liable for VAT in their own country. Please note that purchase lists are required in Hungary in addition to European Community (EC) sales.

Group taxation

The VAT Act allows all companies that have established business presences in Hungary and qualify as related enterprises to form a VAT group. The essence of a VAT group is that its members act under a single VAT number in their transactions (i.e. they issue invoices under a shared VAT number and submit a single, joint tax return), and product and service supplies between the members do not qualify as business transactions from a VAT perspective.

Customs duties

Hungarian customs legislation and policies have been fully harmonised with EU legislation.

The EU customs legislation is comprised of the following main regulations:

- Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 2454/93/EEC laying down provisions for the implementation of Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 1186/2009/EEC setting up a Community system of reliefs from customs duty.
- Council Regulation 2658/87/EEC on the tariff and statistical nomenclature and on the Common Customs Tariff.

Hungary

Excise taxes

The following goods are subject to excise duty:

- Mineral oils.
- Alcohol and alcoholic beverages. Any product with an alcohol content of 1.2% or more by volume qualifies as an alcohol product.
- Beers.
- Wines.
- Sparkling wines.
- Intermediate alcoholic products.
- Tobacco products.

As of 1 January 2012, the excise duty rates are as follows:

- Petroleum products: HUF 110,350 to HUF 124,200 (approximately EUR 350 to EUR 394) per thousand litres or HUF 4,425 to HUF 116,000 (approximately EUR 14 to EUR 368) per thousand kilograms, depending on the type of petroleum product.
- Alcohol products: HUF 289,900 to EUR 414,150 (approximately EUR 920 to EUR 1,313) per hectolitre of pure alcohol.
- Beer: HUF 1,470 (approximately EUR 4.6) per alcohol degree and per hectolitre.
- Wines: HUF 0 for grape wines; HUF 9,870 (approximately EUR 31) per hectolitre for wines made from other types of fruit.
- Sparkling wines: HUF 14,960 (approximately EUR 47) per hectolitre.
- Intermediate alcoholic products: HUF 23,200 (approximately EUR 73) per hectolitre or HUF 735 (approximately EUR 2.3) per alcohol degree and per hectolitre for beer produced in a micro-brewery.
- Cigarettes: HUF 11,500 (approximately EUR 39) per thousand cigarettes plus 30% of the retail sale price, but a minimum of HUF 21,100 per thousand cigarettes. The tax base per cigarette also depends on the length of the cigarette (without filter). It is double if the length of the cigarette is 8 cm to 11 cm, triple if the length is 11 cm to 14 cm, and so on.
- Cigars and cigarillos: 28.5% of the retail price.
- Fine-cut tobacco: 52% of the retail price, but a minimum of HUF 10,150 (approximately EUR 34) per kilogram.
- Other tobacco: 32.5% of the retail price, but a minimum of HUF 10,150 (approximately EUR 34) per kilogram.

The Customs Body of the National Tax and Customs Authority is responsible for excise duty. The European Union's excise duty rules apply in Hungary.

Property and land taxes

Hungarian municipalities can levy property tax and land tax at their own discretion.

Property tax

The owner of a building is subject to property tax liability annually on the first day of the calendar year.

The local government can determine the tax base in either of the following ways:

- The net floor space of the building expressed in square metres, with a maximum tax rate of HUF 1,100/m².
- The adjusted market value of the building, with a maximum tax rate of 3.6% of the adjusted market value.

Land tax

The owner of the land is subject to land tax liability annually on the first day of the calendar year. Undeveloped plots of land situated within the area of jurisdiction of a local government, including peripheries, are subject to this tax. The local government can determine the tax base in either of the following ways:

- The actual area of the plot expressed in square metres, with a maximum tax rate of HUF 200/m².
- The adjusted market value of the plot, with a maximum tax rate of 3% of the adjusted market value.

Stamp duty

Stamp duty has to be paid on the acquisition of a direct or indirect participation of at least 75% in a company that owns real estate (even if the real estate is a minor part of its total assets). Exceptions may be available if certain criteria are met.

There is no transfer tax in Hungary, but transfers of direct or indirect participations in companies that own real estate may be subject to stamp duty.

Transfers of real estate-owning companies' shares between related parties are exempt from real estate transfer tax.

CIT

A company and its related parties are defined as real estate holding companies if at least 75% of the market value of their assets is domestic real estate and if they have a foreign shareholder that is not resident in a country that has a double tax treaty (DTT) with Hungary or the treaty allows capital gains to be taxed in Hungary.

The tax base of real estate holding companies in cases of share transfers and share capital decreases is the positive amount of the consideration minus the acquisition price of the shares less the costs of acquisition and of administration. The tax rate is the same as is mentioned in the *Taxes on corporate income* section.

Please note that the definition of the payer for CIT purposes is very different from the definition used for stamp duty purposes.

Stamp duties

The most common types of stamp duty are gift duty and duty on transfers of property for consideration. Stamp duty is levied on movable and immovable property and property rights if they were acquired in Hungary, unless an international agreement rules otherwise.

Gift duty

Gift duty arises on the date when a contract concerning a gift is concluded.

Transfers of movable property, immovable property, and property rights without consideration are subject to gift duty. In these cases, however, gift duty is only incurred if the transaction was formally documented; except for immovable property with a market value of more than HUF 150,000 (approximately EUR 475), where gift duty must be paid in any event.

The base of gift duty is the net value of the gift, which is the market value minus any liabilities related to the gift. The general duty rates vary, depending on the base, as follows:

Hungary

- 21% for a base of up to HUF 18 million (approximately EUR 58,000).
- 30% on the part of the base exceeding HUF 18 million, up to HUF 35 million (approximately EUR 111,000).
- 40% on the part of the base exceeding HUF 35 million.

Transfers of movable assets without consideration and acquisitions of claims without consideration including waivers of claims and assumptions of debts are exempt from gift duty, provided that the recipient is a company.

Furthermore, if a company is 100% owned by the other company in the transaction, or both companies are 100% owned by a third party, a reduced rate on transfer of assets, including immovable property without consideration, should be applied as follows:

- 11% for a base of up to HUF 18 million (approximately EUR 58,000).
- 15% on the part of the base exceeding HUF 18 million, up to HUF 35 million (approximately EUR 111,000).
- 21% on the part of the base exceeding HUF 35 million.

Duty on transfer of property for consideration

The obligation to pay duty on the transfer of movable and immovable property for consideration arises on the date when the contract is concluded.

For acquisitions of real estate, the stamp duty is 4% of the market value of the property. For acquisitions of direct or indirect participations (stocks, shares, co-operative shares, investor shares, converted investor shares) in a company that owns real estate, the duty base is the part of the market value of the company's properties held that represents the percentage of the participation, except when the transaction is between related parties. The stamp duty for real estate company sales is 4% up to HUF 1 billion and 2% of the amount exceeding HUF 1 billion (approximately EUR 3.2 million) up to a maximum of HUF 200 million (approximately EUR 635,000).

There are special rules for real estate trading companies and credit institutions. Under certain circumstances, exemptions are available more generally.

Stamp duties are also levied on certain court procedures (e.g. Court of Registration) and on submissions to certain authorities (e.g. appeals to the Tax Authority). Stamp duty is, for instance, levied in an amount of:

- HUF 100,000 (approximately EUR 320) on the registration of a private stock company or a limited liability company
- HUF 600,000 (approximately EUR 1,920) on the registration of a public stock company or a European Company
- HUF 100,000 (approximately EUR 320) on the registration of any other entity with legal personality
- HUF 50,000 (approximately EUR 160) on the registration of a branch office, and
- HUF 50,000 (approximately EUR 160) on the registration of a representative office.

Registration taxes

Registration tax is charged on passenger cars, motor homes, and motorcycles before they can be registered and put into service in Hungary. The registration tax is also payable by fleet operators. The duty is payable with the first domestic registration or in the case of a conversion.

The registration tax rate from 1 January 2012 is applied as follows:

- Passenger cars: HUF 45,000 to HUF 4.8 million (approximately EUR 143 to EUR 15,225), depending on the technical features of vehicles (cc, engine type) and environmental classification.
- Hybrid or electrical cars: HUF 0 to HUF 76,000 (approximately EUR 241).
- Motorcycles: HUF 20,000 to HUF 230,000 (approximately EUR 70 to EUR 900), depending on technical features of the motorcycles (cc).

The registration tax is levied by the Customs Body of the National Tax and Customs Authority.

Public health product tax

Legislation was introduced on 1 September 2011 under which the first domestic distributor of certain products is liable to pay a product tax. The duty rates from 1 January 2012 are as follows:

- Beverages (depending on sugar content and tariff number): HUF 7 (approximately EUR 0.02) or HUF 200 (approximately EUR 0.63) per litre.
- Energy drink (depending on tariff number, methyl-xanthine and taurin content): HUF 250 (approximately EUR 0.79) per litre.
- Cocoa powder with added sugar (depending on tariff number, sugar and cocoa content): HUF 70 (approximately EUR 0.22) per kilogram.
- Other pre-packed product with sugar (depending on tariff number, sugar and cocoa content): HUF 130 (approximately EUR 0.41) per kilogram.
- Salty snacks (depending on tariff number and salt content): HUF 250 (approximately EUR 0.79) per kilogram.
- Seasonings (depending on tariff number and salt content): HUF 250 (approximately EUR 0.79) per kilogram.
- Flavoured beer and alcoholic beverages (depending on tariff number and sugar content): HUF 20 (approximately EUR 0.06) per litre.
- Fruit jam (depending on tariff number and sugar content): HUF 500 (approximately EUR 1.58) per kilogram.

Environmental protection product fee

The following products are subject to the environmental protection product fee: other crude oil products, tyres, packaging materials, batteries, commercial printing paper, and electrical and electronic products (based on customs tariff numbers applicable on 1 January 2010).

The following entities are liable to pay the product fee:

- The first domestic distributor or user for own purposes.
- In the case of domestically manufactured other crude oil products, the first buyer from the first domestic distributor.
- In the case of toll manufacturing, the party that orders the toll manufacturing.

Product fee rates from 1 January 2012 are as follows:

- Tyres: HUF 52 (approximately EUR 0.16) per kilogram.
- Packaging materials: HUF 17 to HUF 50 (approximately EUR 0.05 to EUR 0.16) per kilogram.
- Commercial packaging materials (packaging of beverages, plastic shopping bags): HUF 17 to HUF 1,800 (approximately EUR 0.05 to EUR 5.7) per kilogram.
- Oil: HUF 112 (approximately EUR 0.35) per kilogram.

Hungary

- Batteries: HUF 60 (approximately EUR 0.19) or HUF 80 (approximately EUR 0.25) per kilogram.
- Paper-based advertisement materials: HUF 64 (approximately EUR 0.20) per kilogram.
- Electrical and electronic products: HUF 50 to HUF 500 (approximately EUR 0.16 to EUR 1.58) per kilogram.

The Customs Body of the National Tax and Customs Authority controls the payment and reporting of the product fee and carries out product fee inspections. The Customs Authority registers taxpayers by customs number. The product fee is self-assessed. The product fee return must be submitted quarterly to the Customs Authority via its electronic system. An advancement payment is payable for the fourth quarter.

The product fee penalty is generally 100% of the product fee shortfall in cases of non-payment or underpayment.

Environmental load charges

Environmental pollution charges were introduced to protect the natural environment, to reduce its impairment, to encourage the users of the environment to engage in activities aimed at the preservation of the natural environment, and to provide funding from the central budget for environmental protection and nature preservation.

Emitting entities liable to pay charges include those who operate point-source emitters subject to registration, pursue activities subject to a water right permit, or who do not use available public drainage systems and dispose of their sewage under a water right permit or a permit from the local water management authorities.

Qualifying materials include sulphur dioxide, nitrogen oxides, mercury, phosphorous, cyanides, and others.

The load charge is calculated on the basis of the quantity of emitted materials multiplied by the fee rate. Basically, the amount of the fee payable depends on the hazard level of the emitted material, e.g. HUF 50 (approximately EUR 0.2) per kilogram for sulphur dioxide and HUF 220,000 (approximately EUR 846) per kilogram for mercury.

Energy tax

Goods are subject to energy tax at the following rates:

- Electricity: HUF 295 (approximately EUR 1) per megawatt hour.
- Coal: HUF 2,390 (approximately EUR 9) per thousand kilograms.
- Natural gas: HUF 88.5 (approximately EUR 0.3) per gigajoule.

The following entities are subject to energy tax:

- Energy traders.
- End-users.
- Producers.

The tax is self-assessed, except in the case of imports, and the Customs Body of the National Tax and Customs Authority is responsible for the related customs administration procedures.

Food chain supervision fee

The purpose of the new food chain supervision fee is to raise revenue for the operation of a regulatory body tasked with the official supervision of the food chain.

The supervision fee is payable by the following natural persons or economic operators:

- Persons who place animals on the market that are kept for food production, breeding, or experimental purposes.
- Persons who place food or fodder crops, seeds, plant products, and planting material on the market.
- Food businesses.
- Registered or authorised feed businesses.
- Persons who manufacture or place on the market veterinary medicines or veterinary medicinal products.
- Persons who manufacture or place on the market 'EEC fertiliser' or other products subject to authorisation.
- Persons involved in the handling, use, further processing, and transport of animal by-products or placing derived products on the market.
- Businesses engaged in the transport of live animals.
- Persons operating facilities for the cleaning and disinfection of vehicles used for transport of live animals, isolation facilities for receiving animals from different stocks, livestock loading ramps, assembly centres, trading sites, feeding and watering stations, rest stations and livestock fairs.
- Persons manufacturing and storing plant propagation material.
- Persons operating a registered or authorised laboratory.
- Persons placing devices on the market that are used for marking animals.

The fee is 0.1% of the net sales revenue (excluding excise duty and the public health product tax) derived in the preceding year from these activities.

The taxpayers concerned will have to comply with their reporting obligation by 31 May. The annual supervision fee is payable in two equal instalments: the first by 31 July, and the second by 31 January. The supervision fee will first have to be paid in full by 31 July 2012.

Branch income

Foreign companies may establish branch offices in Hungary. A branch office is an organisational unit of a foreign company without legal personality, vested with financial autonomy, and registered in the Hungarian companies register as a branch office of the foreign company. The provisions of the Hungarian Accounting Act apply to branch offices, which must prepare reports using double-entry bookkeeping. Statutory audits are obligatory, except for the branches of corporations whose registered office address is in the European Union.

A branch office is regarded as established when it has been entered into the companies register. A branch office may start operating once the application for registering the branch office has been submitted to the Court of registration, provided that it indicates 'under registration' on its corporate correspondence. Until a branch has been registered, it cannot carry out any activities that are subject to official permission. A branch office is considered dissolved upon its removal from the companies register.

Hungary

Branch offices are treated as PEs for taxation purposes. They must determine their tax base according to the general rules applicable to Hungarian companies. The profit for the year (calculated on the basis of the Hungarian accounting system and adjusted by specific provisions of the Corporate Tax and Dividend Tax Act or CDTA) is subject to CIT of 10% on the first HUF 500 million of the positive CIT base. The tax base above this limit is subject to 19% CIT. The definition of PE is similar to that in the tax treaties but somewhat broader. For treaty countries, the respective treaty definition applies.

A foreign company's CIT base is determined for all its domestic PEs (except for branches) collectively and for its branches separately. A branch should account for costs and revenues as if it were independent from its foreign parent company.

For a Hungarian PE, earnings before taxes are reduced by cumulated administrative costs incurred proportionately at the headquarters and any of its PEs, with the maximum proportion defined as the revenues of the PE compared to all revenues of the foreign company.

The increasing items for a Hungarian PE are the administrative costs accounted by the PE plus 5% of the revenue earned by the PE's activities but accounted elsewhere.

However, if there is a treaty between Hungary and the other country, the provisions of the treaty have priority over domestic law. Therefore, the provisions of the treaty have to be followed in the first instance, and all costs related to the activity of the branch have to be allocated to the branch, without the above restrictions in domestic law, and all profit realised with respect to the branch must also be allocated to the branch. The allocation method must be consistent from year to year, unless there is a good reason for changing it.

The foreign parent must continuously provide the assets and funds required for the operation of the branch office and the settlement of its liabilities. The employees of a branch office are in a legal relationship with the foreign company, and the foreign parent exercises employer's rights. A branch is considered to be related to its parent company/headquarters. Therefore, the prices used in inter-company transactions have to be at arm's length, and transfer pricing documentation has to be prepared.

Income determination

The CIT base should be calculated by modifying the accounting pre-tax profit by adjustments and deductions as provided by the CDTA.

Inventory valuation

Inventories are generally valued at their historical cost unless their fair market value is significantly lower than their book value, in which case, the fair market value should be recorded. Cost may be determined on the basis of first in first out (FIFO) or average cost.

Capital gains

Capital gains (losses) are treated as ordinary income (losses) for tax purposes. The gain on the sale of depreciable assets equals the sales revenue reduced by the net value of the asset for CIT purposes.

If a participation (of at least 30%) or an intangible asset is registered within 60 days of acquisition and held continuously for at least one year, capital gains from the sale or

contribution in kind of the participation is exempt from CIT in general. Any additional acquisitions in the case of a registered participation may also be registered, provided that the 30% participation was already registered.

Stock transactions

Shareholders of a real estate holding company are also subject to CIT on their income from the sale of the shares in the real estate holding company. Transfers of direct or indirect participations in companies that own real estate may be subject to CIT.

Dividend income

Except in the case of controlled foreign companies (CFCs) (*see the Group taxation section*), dividends received and accounted for as income in the given tax year are tax-free. As of 1 January 2012, a definition of dividend is given in the CDTA.

Interest income

No specific provision exists in Hungary for interest income. Therefore, interest income is taxable for CIT purposes.

Royalty income

50% of royalty income is deductible for CIT purposes, up to 50% of pre-tax profit. Royalties as revenues are derived from (i) permission for the exploitation of patents, from the industrial design of assets under industrial law, and from know-how; (ii) permission to use trademarks, business names, and business secrets; (iii) permission to use copyrights and similar rights attached to protected work; (iv) transfers of the property described above (except for trademarks, business names, and business secrets).

Unrealised exchange gains/losses

Tax deferral may be chosen for unrealised exchange gains/losses.

Foreign income

Taxpayers resident in Hungary and foreign entrepreneurs must calculate their CIT base exclusive of any income that is subject to taxation abroad, if so prescribed by an international treaty. In any other case, a foreign tax credit is available for income taxes paid abroad (*see Foreign tax credit in the Tax credits and incentives section for more information*).

In Hungary, there are no provisions under which income earned abroad may be tax deferred.

Deductions

In general, costs and expenses incurred in relation to the taxpayer's income-generating business activity are deductible for CIT purposes.

Accrued expenses are recognised for taxation purposes in the tax year they affect.

Depreciation and amortisation

Accounting depreciation that is accounted as expenditure, and thus included in the accounting profit, should be added to the CIT base. Tax depreciation calculated according to the CDTA reduces the tax base, even if the tax depreciation is higher than the accounting depreciation. The tax depreciation of tangible assets should be

Hungary

calculated using the straight-line method, on the basis of the historical value from the time when the asset was first used for business purposes.

Examples of tax depreciation rates include the following:

Assets	Depreciation rate (%)
Computers and other high-tech machinery	33 or 50
Vehicles	20
Other tangible assets	14.5
Buildings (long-life structure)	2
Rented buildings	5

Assets newly acquired since 2003 can be depreciated at 50% annually; these instruments include, among other items, machinery and intellectual property (IP).

There is no prescribed amortisation rate for intangibles. The historical value, the residual value, and the useful life should be considered.

Additionally, goodwill cannot be amortised either for accounting or tax purposes if it does not lose its value during its use. However, if extraordinary amortisation is accounted on goodwill, the extraordinary amortisation will also be recognised for CIT purposes. In the case of transformations, specific amortisation rules apply.

Organisational and start-up expenses

Companies are not obliged to capitalise the costs of formation/reorganisation. The capitalisation of these costs is at the company's discretion, but the company should comply with its accounting policy. Furthermore, only the direct costs of formation/reorganisation that are not classified as investments or renovations and are likely to be recovered ultimately can be capitalised.

Bad debt

Under the Accounting Act, bad debts are only deductible for CIT purposes if they are supported by legally valid third-party documents that the receivable cannot be collected. Expenses claimed that cannot be enforced in court and expired claims are not deductible for CIT purposes.

In addition to the above, 20% of eligible bad debts are deductible from the CIT base if the debt was not settled within 365 days from the due date.

Charitable contributions

Grants made or assets that are transferred without consideration, as well as liabilities assumed or services provided free of charge, will qualify as business expenses if the taxpayer has a declaration from the recipient stating that the recipient's profit will not be negative without the income received.

Grants will always qualify as non-business expenses if they are provided to a foreign person or foreign resident company.

In the case of film and sports (football, basketball, handball, ice-hockey, and water polo) sponsorship grants, the amount of support is deductible both from the CIT base (as an expense) and from the CIT amount, provided that an official sponsorship certificate is available.

Development reserve

50% of pre-tax profit may be assigned as development reserve. The maximum value of the reserve is HUF 500 million (approximately EUR 1.58 million); however, it has increased from four years to six years for development reserves included in the 2008 financial statement. For other development reserves, the period remains four years.

Intellectual property (IP) reserve

Further, there is a possibility to create an IP reserve, from income from sales of intangible assets which generate royalty income, deeming that income non-taxable. The IP reserve should be shown as part of the tied-up reserve in the companies' books. The IP reserve may be used to buy intangible assets which generate royalty income at the company within three years from its creation; otherwise, CIT and late payment penalty should be paid on the amount.

Tax base allowance regarding R&D

A tax base allowance is only applicable for R&D activities if the taxpayer carries out basic research, applied research, or experimental research activities for its own purposes. The direct cost of the basic research, the applied research, and the experimental research, or the amount of depreciation on the research activity (if the cost of R&D activity is capitalised), is deductible from the tax base.

300% of the direct costs of research activity (up to a maximum of HUF 50 million [approximately EUR 158,000]) are deductible from the tax base if the research activity is carried out jointly with a higher education institution, the Hungarian Academy of Sciences, or a research institute established by them.

Employee benefit expenses

Employee benefits and the fringe benefit tax payable on them are tax-deductible.

Bribes, 'kickbacks', other illegal payments

Bribes, 'kickbacks', and illegal payments are not recognised as business costs for CIT purposes and are non-deductible from the tax base.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Net operating losses

Losses can be carried forward indefinitely, and the Tax Authority's approval is not required. However, the Tax Authority may later audit whether a company has exercised its rights in accordance with the intended purpose of these rights when carrying losses forward. Furthermore, from 2011, financial institutions can also carry losses forward.

The main changes regarding losses carried forward for 2012 are as follows:

A company's tax losses carried forward cannot be utilised if:

- the majority of the company's shares is directly/indirectly acquired by an independent entity (an entity who was not one of the company's owners in the preceding two financial years)
- the activity of the company changes significantly in the two years following the transformation, or
- the successor company does not generate any revenue from at least one activity of the predecessor.

Hungary

Losses carried forward may only be used to offset up to 50% of the tax base calculated without losses carried forward.

Note that earlier tax losses must be used first (FIFO principle), and the losses of predecessors are also deductible from the successor company's CIT base.

Losses cannot be carried back (except for agricultural companies, who may account deferred losses by self-revision or by correcting the amount of tax paid in the previous two tax years).

Payments to foreign affiliates

There is no general restriction on the deductibility of a consideration due to a foreign entity provided the payment is a justifiable business cost. General anti-avoidance provisions (abuse of law, substance-over-form) may also result in non-deductibility. If the parties are considered to be related parties under the definition of the CDTA, the Hungarian tax office is entitled to adjust the Hungarian party's tax base to reflect the market price (arm's-length price) if the parties did not make the adjustment themselves.

Considerations due for services are only deductible if the actual performance of the services is supported and the Hungarian taxpayer can prove that it benefits from the service.

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity (*see Thin capitalisation in the Group taxation section*).

The consideration paid to a CFC is not deductible for CIT purposes unless the taxpayer is able to prove and keeps documentation that it serves the purposes of business operations. *For further details on the CFC rules, see the Group taxation section*

Group taxation

Group taxation is not available for CIT purposes in Hungary. *See Value-added tax in the Other taxes section for a description of group taxation for VAT purposes.*

Transfer pricing

If parties qualify as related parties (as defined in the Hungarian CDTA) and the price applied differs from the arm's-length price, the CIT base should be modified by a proper transfer pricing adjustment. In addition, the foreign PEs of a Hungarian company and the Hungarian head office also qualify as related entities and are subject to transfer pricing regulations.

Taxpayers are obliged to prepare transfer pricing documentation on intra-group transactions. The documentation has to be prepared for every contract between related parties (including in-kind contributions made at the time of establishment).

As of 2011, when determining the transfer prices applied between related companies, in addition to the traditional methods (comparable uncontrolled price, resale-minus, and cost-plus methods), it is also possible to use the transactional net margin method and the profit-split method. In addition to these methods, companies may continue to use other methods if the traditional methods are inadequate.

Taxpayers are allowed to prepare two types of documentation (as opposed to the previous practice): country-specific documentation or consolidated transfer pricing documentation. Taxpayers may prepare consolidated transfer pricing documentation if this does not jeopardise comparability, and the contracts:

- have the same subject matter and all their terms and conditions are identical or only slightly different or
- closely relate to each other.

Taxpayers are required to make a declaration in their CIT returns as to which type of documentation they choose.

In summary, the requirements of the country-specific documentation have not changed as of 2012 compared to previous documentation requirements. This type of documentation must include, for example, the following:

- A functional analysis.
- Industry and company analyses.
- An economic analysis.
- A financial analysis.
- An account of the process of selecting the transfer pricing methodology.

Consolidated transfer pricing documentation must consist of two main parts:

- The core documentation, which includes the standard data for each company within the group which is resident in any EU member state.
- Country-specific documentation, which describes the agreements between the taxpayer and its related parties.

The documentation has to be available no later than the filing deadline for the CIT return in any given year; otherwise, the Tax Authority may assess a default penalty of up to HUF 2 million (approximately EUR 6,300) for each case of missing or deficient documentation. In the case of a repeat offence, it is up to HUF 4 million (approximately EUR 12,600) for each missing or deficient documentation. For the repeat lack or deficiency of the same documentation, the penalty may go up to four times the original penalty levied. Note, however, that this documentation only has to be prepared and kept in the company's files, rather than being filed with the Tax Authority.

Thin capitalisation

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity.

Where debt means the average daily balance of outstanding loans, outstanding debt securities offered privately and bills payable (with the exception of bills payable on account of suppliers' debts), and any other liability other than loans, debt securities, and bills payable shown in the balance sheet that entails the payment of interest from the taxpayer's profit (with the exception of debts of credit institutions and financial companies incurred in connection with and for the purposes of financial service activities); and equity means the average daily balance of subscribed capital, capital reserve, retained earnings, and tied-up reserves (or own funds of the like). As of 1 January 2012, debt includes non-interest bearing loans as well, with the exception of back-to-back arrangements.

Hungary

Controlled foreign companies (CFCs)

CFCs are foreign persons or entities established abroad and/or foreign resident entities if, among other conditions, they are owned by a resident private individual/entity who is deemed to be the beneficial owner (i.e. has a certain ownership share or voting ratio or dominant influence in the enterprise) or if the majority of their income derives from Hungarian sources and, in both cases, the effective tax rate of the persons/entities is lower than 10%. Certain exceptions may be available (for companies in EU member states, OECD member states, and treaty countries, if a real economic presence can be proved). From 2012 on, it is the taxpayer's obligation to provide proof on the (lack of) CFC status.

Tax credits and incentives

Foreign tax credit

Foreign tax credit is available for income taxes paid abroad, up to the Hungarian tax payable on the creditable income (at a maximum of 90% of income tax paid abroad).

The foreign income has to be classified by country of origin and revenue type. The deducted tax may not exceed the lesser of either the applicable foreign tax or the applicable tax based on the taxation treaty between Hungary and the given country.

If there is no taxation treaty, 90% of the tax payable abroad is credited against the tax liability up to a hypothetical tax liability calculated by using the average Hungarian tax rate. Full tax credit is applicable if so described by a tax treaty. The average tax rate is the CIT rate, reduced by the applicable tax allowances, divided by the tax base. Indirect costs should be allocated in proportion to the revenue of the branch office to the total revenue of the whole company, as per Section 28 (4) of CDTA.

Development tax incentive

Each development tax incentive may be claimed for a ten-year period (beginning on the completion of the development) on the CIT returns over a maximum period of 14 years from the original application for the incentive. In any given tax year, the tax incentive is available for up to 80% of the tax payable but in total up to the state aid intensity ceiling. Applications for the tax incentive only have to be submitted to the Ministry for National Economics if the aggregated eligible costs of the investment exceed EUR 100 million (approximately EUR 320,000). If the investment is below this threshold, taxpayers only need to notify the Ministry for National Economics before starting the investment. Tax incentives are available for investments if:

- the current value of the investment is at least HUF 3 billion (approximately EUR 9.5 million) or
- the current value of the investment is at least HUF 1 billion (approximately EUR 3.2 million) in certain designated areas and provided that:
 - the investment results in the creation of new facilities or the extension of existing facilities, or
 - the investment results in substantially changed products or production processes (excluding investments in basic research, applied research, and experimental development), and
 - in the four years following the year in which the tax incentive is first used against the tax base:
 - the annual average number of employees has increased by at least 150 compared with either the year before the investment was made or the average

- number of employees for the three years preceding the investment (by 75 in certain designated areas) or
- the annual wage costs have increased by 600 times the minimum wage effective on the first day of the tax year (by a multiple of 300 in certain designated areas) compared with either the annual wage costs of the year before the investment was commenced or the average annual wage cost for the three years preceding the investment.

Provided that the investment results in the creation of new facilities or the extension of existing facilities, or substantially changed products or production processes, the Ministry may also grant incentives to companies that invest:

- at least HUF 100 million (approximately EUR 320,000) in equipment for zoogenic food production
- at least HUF 100 million (approximately EUR 320,000) in environmental protection projects
- at least HUF 100 million (approximately EUR 320,000) in broadband internet services
- at least HUF 100 million (approximately EUR 320,000) in the production of films and videos
- at least HUF 100 million (approximately EUR 320,000) in basic research, applied research, and experimental development projects
- at least HUF 100 million (approximately EUR 320,000) in projects financed by an issue of stock market-quoted shares, if (i) the project is started before the last day of the third calendar year following the date of issue, (ii) the total nominal value of the shares issued by the fifth year following the start of the project continuously reaches 50% of the value of the registered shares, (iii) the total issue price reaches 50% of the eligible costs, and (iv) at the date of the application for the incentive the company has at least 25 shareholders or at least 25% of the issued shares are owned by shareholders where each of them does not have more than 5% of the issued shares' nominal value, and
- at least HUF 500 million (approximately EUR 1.6 million) in projects initiated by small and medium-sized enterprises, if certain criteria are met.

Tax incentives may also be granted for projects that create new jobs. The restrictions prescribed in the CDTA regarding the headcount of staff and the percentage of new entrants to the labour market that may be claimed for such investments have been abolished, although the conditions prescribed in the relevant decree must still be met.

Tax holidays

Tax holidays may be granted in relation to film and theatre subsidies, developments, and small and medium-sized entities (SMEs).

Other tax incentives

Film production companies that receive a state subsidy for their activity may deduct the amount of the subsidy from their CIT base.

A tax incentive is available for small and medium-sized enterprises (basically, those with a maximum of 250 employees; annual net revenue of a maximum of EUR 50 million; or a maximum annual balance sheet total of EUR 43 million). Taxpayers that take a loan from a financial institution for the acquisition or production of tangible assets may deduct 40% of the interest paid on the loan from their tax due, up to a maximum deduction of HUF 6 million (approximately EUR 19,000). However,

Hungary

taxpayers engaged in certain business sectors cannot use this tax incentive (e.g. transportation, agricultural activity).

In order to be eligible for the above tax incentives, the wages and salaries need to be kept at a certain required level, according to relevant regulations.

In addition, a new type of tax allowance may be used in the future to support team sports (football, basketball, handball, ice-hockey, and water polo). The relevant government decree provides detailed rules on the application of this tax incentive.

Withholding taxes

Under the domestic rules, there is no withholding tax (WHT) on dividends, interest, or royalties.

As of 1 January 2011, foreign organisations are no longer subject to 30% WHT on interest, royalties, and service fees received from Hungarian resident companies.

Hungary has an extensive treaty network with maximum WHT rates as follows:

Payer (1)	Dividends (%)	Interest (%)	Royalties (%)

Notes

- List of the DTTs Hungary is a party to and the highest rates of WHT a foreign-source country may charge on (the gross) income paid to Hungarian residents.

Hungary

2. The lower rate applies if the recipient has a stake of at least 25% in the distributing company.
3. Interest is exempt if paid in respect of (i) commercial claims (including claims represented by negotiable instruments) and instalment payments for the delivery or supply of goods and/or services, (ii) current accounts or registered loans placed by a financial institution, and (iii) funds and deposits not represented by bearers' securities placed at any of the financial institutions (including public credit institutions).
4. 10% applies to bank loans used for industrial purposes, R&D, or public works.
5. 25% applies to royalties paid for the use of or the right to use trademarks.
6. The lower rate applies if the recipient has control, directly or indirectly, of 25% of the voting rights in the distributing company.
7. 10% is applicable if a non-resident owned investment corporation pays dividends to a recipient that has control, directly or indirectly, of 25% of the voting rights in the distributing company.
8. The China-Hungary Treaty does not apply to Hong Kong.
9. The lower rate applies if the recipient has a stake of at least 40% in the distributing company.
10. The lower rate applies to royalties for the use of industrial, commercial, or scientific equipment, or for transmission by satellite, cable optic fibre, or similar technology.
11. The same rate applies to technical service fees.
12. The lower rate applies if the recipient has a stake of at least 10% in the distributing company.
13. Cultural royalties are exempt.
14. The lower rate applies if the recipient (other than a partnership) has a stake of at least 25% in the distributing company.
15. The lower rate applies if the recipient has a stake of 25% in the distributing company that carries out industrial activities.
16. 10% applies if the recipient of the interest is a financial institution, including an insurance company.
17. The lower rate applies if the recipient has voting stock of at least 10% in the distributing company.
18. 10% applies to technical service fees.
19. If a lower rate is set in a treaty or agreement or minutes between India and any OECD country (excluding Hungary), then this lower rate should also be applied for India-Hungary.
20. 5% applies for the use of industrial, commercial or scientific facilities or for transmissions by means of satellite, cable, optical fibre, or any similar technology.
21. 5% for commission.
22. 0% on interest paid on inter-bank loans.
23. Interest arising in a contracting state and beneficially owned by a resident of the other contracting state (a) shall be exempted from tax in the state in which interest arises if it is paid (i) to the government of the other contracting state or a local authority thereof, to the central bank of that other state, or to any financial institution owned or controlled by the government of the other state, or (ii) in connection with a loan or a credit guaranteed or insured by the government of the other contracting state, the central bank of that other state, or any financial institution owned or controlled by that government; or (b) shall be taxable in the contracting state in which it arises at a rate not exceeding 5% of the gross amount of the interest if the interest is paid in connection with a loan or a credit of whatever kind granted by a bank.

Tax administration

Taxable period

CIT must be calculated by reference to the accounting year, which is either the calendar year or, for group companies, the group's accounting year.

Tax returns

Returns must be lodged within 150 days following the last day of the accounting year (31 May for a calendar year taxpayer). The tax payable is determined by self-assessment.

Tax returns may be submitted either electronically or in paper format. However, those who are legally obliged to submit monthly tax and contribution returns (e.g. employers and payers) may only submit tax returns electronically.

Payment of tax

CIT instalments must generally be reported and paid quarterly or monthly (above HUF 5 million [approximately EUR 16,000] tax payable). In the case of taxpayers with net sales revenues of over HUF 100 million (approximately EUR 320,000), 100% of the expected final payment is due by the 20th day of the last month of the accounting year (i.e. so-called 'top-up payment'). However, a late payment penalty is only levied if the

company fails to pay at least 90% of the expected final payment by the above deadline. The late payment penalty is 20% of the difference between the tax advances paid (including the top-up payment) and 90% of the actual CIT liability.

Statute of limitations

In general, the statute of limitation is five years from the end of the calendar year in which the tax return should be filed. Self-revision interrupts the term of limitation.

Topics of focus for tax authorities

The tax authority will take more stringent measures against 'aggressive tax planning' (tax planning that takes advantage of unintended administrative or legal loopholes) using its international experience and cooperation agreements.

Generally, the following categories of taxpayers may expect to be scheduled for tax audits:

- Taxpayers whose records show frequent changes in registered address or ownership.
- Businesses that have operated for several years with substantial loans from their shareholders.
- Taxpayers that declared significant amounts of payable and deductible VAT during their pre-company period.
- Taxpayers that have been in continuous operation despite continuing losses.
- Taxpayers that spend a significant portion of their sales revenues on services.
- Taxpayers that have significant tax base decreasing items, tax allowances, and subsidies related to investments.
- Taxpayers that deduct R&D expenses.

The tax authority will also pay more attention to the actual content of transactions conducted between related parties and to the methods companies use to determine the arm's-length price.

Other issues

Principal forms of doing business

- Branch.
- Partnership.
- Limited liability company.
- Private company limited by shares.
- Public company limited by shares.

Mergers and acquisitions (M&A) from a business and tax perspective

Mergers in Hungary are tax-free transformations provided that they qualify under the definition of preferential transformation. Preferential transformation means that a company, without going into liquidation, transfers all its assets and liabilities to another company in exchange for the issue to its shareholders of securities representing the capital of that other company, and a cash payment not exceeding 10% of the nominal value, or, in the absence of a nominal value, of the accounting par value of those securities.

In a preferential transformation, the predecessor company does not have to amend its tax base by the difference between the adjusted book value and the book value. The adjusted book value means the historical value of assets less any depreciation deducted from the tax base plus the readjusted amount of extraordinary depreciation.

Hungary

Furthermore, for shareholders, the income accounted in excess of the historical value of the shares they acquire in the preferential transformation is also not taxable for CIT purposes for as long as the shareholder holds its participation.

In any other case, if two companies merge, the difference between the market value and the book value of the assets and liabilities is taxable for the successor company. Furthermore, the predecessor company may decrease its tax base by the amount of the difference between the adjusted book value of its assets and their book value if the adjusted book value is the higher of the two. The company will increase its tax base if the book value is higher than the adjusted book value.

International Financial Reporting Standards (IFRS) adoption

Companies defined in Section 4 of Decision no. 1606/2002/EC (mainly companies listed on the stock exchange) have to prepare their consolidated annual reports according to the IFRS. However, non-listed subsidiaries of EU-listed entities are exempt from the preparation of IFRS consolidated financial statements. If a company chooses IFRS, Hungarian Accounting Rules (HAR) financial statements must also be prepared and filed with the Court of Registration.

Significant developments

Additional bank tax

Financial services permitted to operate as banks and savings banks are subject to 0.041% tax on total debt at year end.

In 2012 and 2013, an additional special 0.0875% tax will be collected from financial services permitted to operate as banks and savings banks.

Financial Activities Tax (FAT)

A new tax on financial institutions, including insurance companies, will be levied on all salary payments. The tax will be collected monthly as of 1 April 2012 (for January, February, and March). *See the Other taxes section for more information.*

A special addition to FAT

In assessment year 2013, an addition of 6% to FAT will be collected on total salary payments that exceed 1 billion Icelandic krónur (ISK). This tax is paid by the same entities that are subject to the general FAT.

Accommodation tax

An accommodation tax was introduced on 1 January 2012. Those who sell accommodation and are subject to value-added tax (VAT) are liable to collect and return a tax of ISK 100 for each sold night.

Tax on pension funds

In 2012 and 2013, a 0.0814% tax will be levied on the net wealth of all pension funds. The tax for 2012 was pre-collected on 31 December 2011, and the next due date is 1 November 2012 for assessment year 2013.

Deduction for dividends and capital gains from sales of shares - ownership requirements and other requirements abolished

Until 1 January 2012, received dividends and gains from sales of shares could only be deducted if the ownership of the company paying dividends or being sold was at least 10%. Also, all operating loss carryforward was required to be offset before any deduction was allowed. Those requirements have been abolished as of 1 January 2012.

Forgiveness of debt

Temporary rules stating that forgiveness of debt is not implicitly to be treated as taxable income were introduced. The rules also include a possibility to distribute a part of forgiven debt over the period of 2015 to 2019.

Iceland

Taxes on corporate income

Resident corporations pay tax on their worldwide income less operating expenses. Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income.

Corporate income tax (CIT) for limited liability companies and limited partnership companies is assessed at a rate of 20%.

CIT for other types of legal entities (e.g. partnerships) is assessed at a rate of 36%.

Non-resident corporations receiving payments for services or business operations carried out in Iceland, as well as corporations operating a permanent establishment (PE) in Iceland or receiving a profit from such establishments, are subject to CIT for their Icelandic income at the same rate as applies to resident corporations.

Corporate residence

In general, all corporations incorporated and registered in Iceland are considered to be tax residents in Iceland. The same applies to corporations which have their home address in Iceland according to their articles of association or if the management of the company is carried out in Iceland.

Foreign corporations are regarded as Icelandic tax residents if the effective management is carried out in Iceland.

The Internal Revenue Directorate can decide with a ruling whether a corporation's residence is in Iceland. The ruling can be appealed to a court of law.

Permanent establishment (PE)

Apart from the above mentioned, when defining whether a business activity in Iceland constitutes a PE, definitions in tax treaties are taken into consideration as well as commentaries to the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Valued-added tax (VAT)

VAT is a consumption tax levied on all stages of domestic business transactions. VAT is levied on all goods and services, as well as on the imports of goods and services, unless specific exemptions apply.

VAT rates

The general VAT rate is 25.5%.

The following goods and services are subject to a reduced VAT rate of 7%:

- Rental of hotel and guest rooms and other accommodation.
- Subscription to radio and television.
- Newspapers, periodicals, and magazines.

- Books, both Icelandic and translated, musical notation as well as their audio recordings. Same applies to compact discs and other similar media as well as electronic media.
- Geothermal hot water, electricity, and fuel oils used for heating houses and swimming pools.
- Food and other consumables for people as detailed in an addendum to the VAT Act.
- Access to roads and other transport related constructions.
- Compact discs, records, audio cassettes, and other equivalent mediums for music only and not videos. Same applies to electronically published music without video.

Certain services and goods are zero-rated, which means that there is, in fact, no VAT charge. All VAT information for zero-rated services and goods must be shown on invoices, and the transactions, as well as input VAT which can be reclaimed, must also be included in VAT returns. Zero-rated VAT mainly applies to exported goods and services provided abroad. As per Article 12 of the VAT Act, the following are zero-rated:

- Export of goods and services. Output tax is not levied on goods exported from the country nor on and services provided abroad.
- Transport of goods between countries. The same applies to domestic transport of goods when the transport is part of a contract for the transport of goods between countries.
- Production of goods at the expense of a foreign party when the production company exports the goods upon completion, as well as the processing and formation of goods at the expense of a foreign party when the production takes place abroad.
- The design, planning, and other comparable services related to construction and other real property abroad.
- Provisions, fuel, instruments, and other equipment delivered for use on board of inter-country vessels, as well as the service provided to such vessels. This exemption does not cover fishing vessels selling their catch abroad, pleasure boats, or private aircraft, only vessels used for the transport of freight.
- The sale and leasing of aircraft and ships. This exemption does not cover boats less than six metres in length, pleasure boats, or private aircraft.
- Shipbuilding and repair and maintenance work on ships and aircraft and their fixed equipment, as well as materials and goods used or provided by the company providing the repair work. This exemption does not cover boats less than six metres in length, pleasure boats, or private aircraft.
- Contractual payments from the Treasury related to the production of milk and sheep farming.
- Services provided to foreign fishing vessels related to the landing or sale of fish catches in Iceland.
- A service of refunding VAT to parties domiciled abroad.
- Sales of services to parties neither domiciled nor having a venue of operations in Iceland, provided that the services are wholly used abroad. A taxable service provided in connection with cultural activity, arts, sports, education, and other similar activity taking place in Iceland, and is tax-exempt cf. Paragraph 3, Article 2 of this Act, is always deemed as being used here. Sales of services to parties neither domiciled nor having a venue of operations in Iceland are, in the same manner, exempt from taxable turnover, even if the service is not wholly used abroad, provided the purchaser could, if its operations were subject to registry in Iceland, count the VAT on the purchase of the services as part of the input tax, cf. Articles 15 and 16. The following services come under this point:
 - The sale or lease of copyright, patent rights, registered trademarks and copyrighted designs, and the sale or lease of other comparable rights.
 - Advertising services.

Iceland

- Services of consultants, engineers, lawyers, accountants, and other similar specialised services as well as data processing and delivery of information, except for labour or services related to liquid assets or real property in Iceland.
- Electronic services; these services are considered used where the buyer is domiciled or having a venue of operations. The same applies to data centres' sale of mixed services to buyers neither domiciled nor having a venue of operations in Iceland.
- Obligations and duties related to business or production activity or the use of rights listed under this point.
- Employment agency services.
- The rental of liquid assets, except for means of transport.
- The services of agents acting on behalf of others and for their account as regards the sale and delivery of services listed under this point.
- Telecommunications services.

VAT-able entities

Businesses engaged in the trade of taxable goods and services for business purposes must register and collect VAT.

Services exempt from VAT

The VAT Act details certain services that are exempt from the tax, such as healthcare services, social services, the operation of schools, various education services, cultural activities, athletic activities, passenger transportation, postal services, sale of real estate (not including the rental of hotel and guest accommodation), rental of car workshops, insurance activity, services of financial banks as well as securities trading, lotteries and betting pools, artistic activities, services of travel agencies, funeral services, and all services of ministers of the church.

Those selling taxable goods and services totalling less than ISK 1 million per year are also exempt from paying VAT.

Agents for non-resident parties

Non-residents who are engaged in taxable transactions in Iceland but are neither domiciled nor have permanent residence in Iceland must appoint VAT agents with residence in Iceland to report on their behalf. Both parties are liable for the VAT payments (responsible for ensuring remittance of VAT). If a non-resident does not appoint a VAT agent, the purchaser of the services/goods is responsible for paying the VAT (reverse charge).

Tax base

Tax base is the price the buyer pays for goods or services before VAT is added and before any costs or service expenses are deducted from the price. VAT is therefore added to the sales price.

VAT accounting periods and due dates

VAT is generally filed and paid on a bi-monthly basis for the following periods: January and February; March and April; May and June; July and August; September and October; November and December. The due date for payment of VAT is one month and five days after the end of the settlement period. For example, the due date for the January and February payments is 5 April.

If the VAT is not paid on the due date, a 1% penalty charge is added for every day up to a total of 10%. Late penalty interests also apply.

Should the total input tax exceed the total output tax, the Treasury will refund the difference within 15 days from the due date.

Those selling goods and services totalling less than ISK 3 million during a full calendar year can return the VAT payments on a yearly basis. The due date for filing and paying is 5 February each year.

Parties that do not file a VAT report within the required deadline will have their VAT estimated. The tax authorities are allowed to deregister parties of VAT register if they have had their VAT estimated for two years or longer.

If a VAT report is submitted after the tax authorities have estimated VAT, a penalty of ISK 5,000 is imposed.

VAT reimbursement

Under the provisions of Regulation no 288/1995, issued by the Ministry of Finance, foreign enterprises, which are neither residents of Iceland nor have a PE here, may obtain reimbursement of VAT paid on goods and taxable services which have been purchased or imported for the commercial purposes of such enterprises in Iceland after 1 March 1995.

Such reimbursement can be effected to foreign enterprises that would be subject to registration in Iceland according to Article 5 and Article 6 of the VAT Act if the enterprises in question were engaged in such business in Iceland. This means that such enterprises as travel agencies, insurance companies, banks, and other financial institutions cannot obtain such reimbursement.

Another prerequisite shall be that the enterprise shall have sold neither goods nor taxable services in Iceland during the period to which the application refers.

Any reimbursement of VAT to foreign enterprises shall be only to the same extent as Icelandic enterprises can include the VAT on purchases of a corresponding nature in the tax on purchases according to Article 15 and Article 16 of the VAT Act.

No reimbursement shall thus be granted in respect of VAT on purchases relating to meals for the owners and employees of the enterprises or relating to entertainment expenses and presents.

Parties domiciled abroad can get partial VAT reimbursement on goods they have bought in Iceland if they take them abroad with them within three months from the date of purchase. They then must provide the goods, along with any necessary documents, to the appropriate reimbursement company or to the customs authorities on the date of departure, and the purchase price must amount to at least ISK 4,000.

Customs duties

The Directorate of Customs controls import, transit, and export and also collects duties, taxes, and various state revenue. The general rule is that import duties are to be paid on imported goods (customs, excise duties, VAT, and various other charges), unless otherwise stated in the law. For import of some products, other conditions, such as an import licence, may need to be submitted.

Iceland, Liechtenstein, Norway, and Switzerland are members of the European Free Trade Association (EFTA). The EFTA Convention established a free trade area among its member states. In addition, the EFTA states have jointly concluded free trade

Iceland

agreements with a number of countries in Central and Eastern Europe as well as in the Mediterranean region, Mexico, and Singapore. Also the EFTA states entered into the Agreement on the European Economic Area (EEA) in 1992. The current contracting parties are, in addition to the three EFTA states, the European Community (EC) and the 15 EC member states. Iceland also has a bilateral agreement with its two neighbouring countries, Greenland and Faeroe Islands.

Excise taxes

An excise duty is levied on a variety of goods specified in the Icelandic Excise Tax Act. They include goods, new and second-hand, that are imported from abroad or manufactured, processed, or packed in Iceland. There is no excise duty on exports.

The excise duty is either a quantity-based or a price-based charge. The quantity charge is based on each kilogram or litre of the relevant goods. The price charge is based on the duty-added import price for imported goods or on the factory price of goods produced in Iceland. Several rate brackets apply to each, but the system has been greatly simplified in recent years.

The excise tax based on quantity ranges from ISK 16 to ISK 800 per kg or litre. The excise tax based on manufacturing price is in general 15%, 20%, or 25%.

Property taxes

A municipal property tax is applied annually on the assessed value of real estate in Iceland.

Stamp taxes/transfer taxes

Stamp duty is levied on the execution of various documents at rates ranging from 0.4% to 2%.

A stamp duty of 0.5% is levied on the nominal value of all new share certificates issued to shareholders in a public limited liability company. Private limited companies are not required to issue share certificates and, therefore, are not subject to stamp duty.

The endorsement of documents is generally not subject to stamp duty.

When issuing deeds and purchase agreements of real estate and land, a 0.4% stamp duty is levied on the officially registered value of the real estate. The same applies to the deeds and purchase agreements of ships. Lease agreements are subject to a 2% stamp duty of the rental price.

Turnover taxes

There is an agricultural charge of 1.20% of agricultural turnover.

Taxes on natural resources

Carbon tax

A carbon tax for liquid fossil fuels is paid to the treasury. Liquid fossil fuels are gas and diesel oils, petrol, aircraft and jet fuels, and fuel oils. All importers of fossil fuels are liable for the carbon tax regardless of whether it is for retail or personal use. The tax rate is:

- ISK 5.75 per litre of gas and diesel oils.
- ISK 5 per litre of petrol.
- ISK 4.10 per litre of aircraft and jet fuels.

- ISK 7.10 per kilo of fuel oil.

Tax on electricity/hot water

A special tax is collected from parties that sell electricity and/or hot water to end users.

Carbohydrate tax

Corporations licensed for carbohydrate investigations, research, and/or processing, as well as anyone who directly or indirectly participates in the processing or distribution of carbohydrates, must either pay a processing tax, which is independent of processing performance, or a carbohydrate tax, which is collected after the processing starts making a profit.

Bank tax and an additional bank tax

Financial services permitted to operate as banks and savings banks are subject to 0.041% tax on total debt at year end.

In 2012 and 2013, an additional special 0.0875% tax will be collected from financial services permitted to operate as banks and savings banks.

Financial Activities Tax (FAT)

A 5.45% tax will be levied on all salary payments made by financial institutions, including insurance companies. The tax will be collected monthly, on 1 April 2012 for the first time (for January, February, and March).

A temporary addition to FAT

In 2013, an addition of 6% to FAT will be levied and collected on total salary payments that exceed ISK 1 billion. This tax is paid by the same entities that are subject to the general FAT.

Accommodation tax

An accommodation tax was introduced on 1 January 2012. Those who sell accommodation that is subject to VAT are liable to collect and return a tax of ISK 100 for each sold night.

Tax on pension funds

In assessment years 2012 and 2013, a 0.0814% tax will be levied on net wealth of all pension funds. The tax for 2012 was pre-collected on 31 December 2011, and the next due date is 1 November 2012 for assessment year 2013.

Other taxes

There is a National Broadcasting Fee of ISK 18,800 per year.

Branch income

A branch is treated as an extension of a trading activity of the overseas parent company incorporated in another jurisdiction and is not a separate legal entity.

Due to the fact that a branch acts in the name of the overseas parent company, a branch's income is taxable in accordance with the parent company (i.e. if the parent company is a limited liability company, the branch is subject to a CIT rate of 20%).

Tax treaties may allow Icelandic CIT as a credit against foreign income tax imposed on the parent company.

Iceland

There is no branch profits remittance tax on the repatriation of profits to the parent company.

Income determination

Resident corporations pay tax on their worldwide income less operating expenses.

Inventory valuation

The valuation method of raw materials and finished goods is on a first in first out (FIFO) basis or via the average cost method. When computing the value of produced goods, both direct and indirect production cost must be taken into account. For tax purposes, inventories can be further written down at a rate of 5% of calculated value.

Last in first out (LIFO) is not permitted.

Capital gains

Capital gains are treated as taxable income in the year that transfer of ownership occurs and, as such, taxed as part of the general corporate income. Capital gains are generally not subject to withholding tax (WHT). There are rules that allow full deduction of net capital gains from the sale of shares, so, in general, corporations are not subject to taxation on capital gains from sale of shares.

Dividend income

Dividend income is treated as taxable income and taxed as a part of corporate income. There are extensive rules that allow full deduction of the dividend, so, in general, corporations are not subject to taxation on dividends. Dividends are subject to WHT (currently 20%), which is a temporary payment towards the final tax assessment.

Interest income

Interest income derived from bank deposits, mutual and investment funds, bonds, or other financial deeds; any kind of exchange rate profit; and any other income from monetary assets are subject to 20% tax.

Interest income of foreign parties is subject to 10% WHT in Iceland.

Foreign income

Income earned abroad is generally taxed as a part of corporate income since a resident company is subject to CIT on its worldwide income.

Controlled foreign company (CFC) rules stipulate that profits of companies in low-tax jurisdictions must pay income tax of such a profit in direct proportion to shares, regardless of distribution. A low tax jurisdiction is defined as a jurisdiction where the CIT rate is less than two-third of the Iceland's tax rate (i.e. 13.3%, being two-thirds of 20%). *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Double taxation of foreign income is avoided either through tax treaties or domestic tax provisions.

Deductions

Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income (e.g. interest expense, employee expense, travel expense, insurance expense).

Depreciation

Assets	Depreciation rate (%)
Ships, ship equipment, and personal vehicles	10 to 20*
Aircraft and accessories	10 to 20*
Heavy machinery, industrial machinery, and equipment	10 to 30*
Rigs, pipeline systems, and more for the use of research and production of hydrocarbons	10 to 30
Office equipment	20 to 35*
Machinery, equipment, and vehicles that are not covered in the above categories	20 to 35*
Residential, commercial, and office accommodation	1 to 3
Factory buildings, garages, warehouses, etc.	3 to 6
Purchased proprietary rights for ideas and trademarks, such as copyrights, publishing rights, information rights, patents, and logos	15 to 20
Purchased goodwill	10 to 20

* The depreciation base for these assets is their purchase value less earlier depreciations (book value).

Goodwill

Purchased goodwill can be written down at 10% to 20% per year.

Start-up expenses

Purchased fishing rights (quotas) cannot be depreciated.

Start-up costs for agricultural production rights can be depreciated without revaluation over five consecutive years. The following assets can be depreciated in full in the year they are initiated or paid with steady payments over five years:

- Start-up costs, such as enterprise registration and obtaining operation licences.
- Cost of research, developments, marketing, obtaining patents and trademarks. If the use of individual assets does not fall into the same depreciation category, the depreciation base will be dependent on how much of it is used, so that if an asset is used for three-quarters or more for the same operation, the whole asset will have the same depreciation percentage.

Interest expenses

Interest expenses are deductible, provided that the loan was taken for business purposes.

Bad debt

As a general rule, 5% of bad debt can be written off. Certain conditions must be met in order to write off a higher percentage of bad debts.

Temporary provisions in Icelandic tax law allow corporations to make a credit entry for only 50% of debt write-off totalling ISK 50 million and 75% of debt write-off for

Iceland

amounts over ISK 50 million in income years 2009 through 2012. The requirement for the provision is that the debt is business-related and operating loss and transferable loss has been offset.

The debt write-off can be carried forward from the income year 2010 to the income year 2014. The transferrable amount that can be carried forward on a yearly basis is the amount that exceeds the transferable operating losses and the possible operating loss, tax depreciation, and write-down each year. All assets that can be depreciated have to be depreciated and all possible write-downs on receivables and stock have to be done to fulfil the requirements of the provisions. No dividend can be distributed for the income years 2010 through 2014, and the company can also not be merged, wound up, or be jointly taxed with another company during the period. At the end of this five year period (i.e. at the end of the income year 2014), it will be possible to transfer any debt write-off that exceeds ISK 500 million as profit with an equal amount each year from the income year 2015 to the income year 2019. If the write-off does not exceed ISK 500 million, the amount will not be subject to taxation.

Charitable contributions

Charitable contributions up to 0.5% of total income are deductible.

Pension expenses

Payments to obligatory pension funds for employees at a minimum of 8% of wages are deductible.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and other illegal payments are not deductible.

Fines and penalties

Fines and penalties are not deductible.

Taxes

Taxes levied on business profit are not considered to be deductible. Therefore CIT is not deductible. However, social security contributions and other labour taxes are deductible.

Net operating losses

Operating losses may be deducted from income from business and independent economic activity. Tax losses can be carried forward ten years and utilised over ten years from the year that the loss was incurred.

No carryback of losses is allowed.

Payments to foreign affiliates

An Icelandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction conditional though that the loan terms are comparable to those that would have been agreed upon by unrelated parties.

Group taxation

Companies may opt for consolidated taxation if a company owns at least 90% share in another company. Consolidated taxation means, among other things, that losses of one company can be offset against profits of other companies. Consolidated taxation cannot be extended to non-resident companies or PEs of foreign companies.

Transfer pricing

The statutory authority for addressing transfer pricing issues is found in the application of general legal concepts, such as the anti-avoidance rule.

Article 57 of the Icelandic Income Tax Act No. 90/2003 (originally included in the tax code in 1971) includes a general anti-avoidance rule that states that business transactions between all parties should be based on the arm's-length principle. With reference to the general concept of this Article, tax authorities can, in cases where transfer prices are not at arm's length, adjust the taxpayer's revenues and expenses in order to reflect market value. These adjustments can be performed only within the domestic statute of limitation period, i.e. six years. Authorities have thus based their transfer pricing conclusions on Article 57.

The Income Tax Act includes several separate rules that can be identified as transfer pricing rules, but those rules generally concern transactions between individuals and not companies, including a rule that obligates employees who receive their wages in kind to account for them on their tax return based on market value.

Thin capitalisation

There are no specific rules regarding thin capitalisation in Iceland, but anti-avoidance principles can be applied (*see Transfer pricing above*).

Controlled foreign companies (CFCs)

Any individual who either directly or indirectly owns a share in any kind of a company, fund, or organisation domiciled in a low-tax jurisdiction must pay income tax on the profit of such corporations in direct proportion to one's own share, regardless of distribution.

The same applies to taxpayers chairing companies, funds, organisations, or associations in a low-tax jurisdiction from which they receive direct or indirect benefits. In order for the above to apply, the foreign party must be domiciled in the low-tax jurisdiction, half the ownership of the foreign party must be directly or indirectly in the hands of Icelandic taxpayers, or they must have effective management and executive control during the income year.

CFC regulations do not apply if a fund or an organisation is protected by a double taxation treaty (DTT) between Iceland and the low-tax country or if such entities are registered in another EEA member country where they have legitimate business operations and the countries have assigned a DTT between them.

Tax credits and incentives

Foreign tax credit

The Income Tax Act offers a foreign tax credit to mitigate the potential for double taxation. The credit applies only to taxes of a nature similar to the tax being reduced

Iceland

by the credit (i.e. taxes based on income). This credit is limited to the amount of tax attributable to foreign-source income.

Temporary Reimbursements in Respect of Filmmaking in Iceland

On account of Act no 43/1999 on Temporary Reimbursement in Respect of Filmmaking in Iceland, it is possible to have 20% of production expenses incurred in the production of films or television material in Iceland reimbursed. When more than 80% of the total production cost of a motion picture or television programme is incurred in Iceland, the reimbursement shall be calculated from the total production cost incurred within the EEA. Production costs refer to all costs incurred in Iceland deductible from the revenues of enterprises pursuant to the provisions of the Act on Income Tax. Payments pertaining to employees and contractors are only to be included in production costs if they are verifiably taxable in Iceland.

Application for reimbursement of production costs shall be submitted to the Ministry of Industry. The application, with supporting documentation, shall be submitted before production commences in Iceland.

In assessing whether a proportion of the production costs of a motion picture or television programme shall be reimbursed, the following conditions must be fulfilled:

- The production shall be suitable for promoting Icelandic culture and the history and nature of Iceland.
- The production shall be suitable for enhancing the experience, knowledge, and artistic ambition of the parties involved. A specific company shall be established in Iceland for the production; an Icelandic branch or agency of a company registered in another member state of the EEA shall be considered a specific company.
- Information about the subject of the production or programme shall be made available.
- An itemised estimate of the production costs and sources of funding shall be made available, together with confirmation by the funding parties and a declaration by the applicant to the effect that the production conforms to the aims of the Act.
- Information about the content of the proposed production of a motion picture or a television programme shall be made available, such as a script and information about filming locations.
- A statement shall be made available to the effect that the material to be produced is intended for general distribution to cinemas or television stations.
- The subject matter of the film or television programming should not violate the provisions of law relating to film inspection and the ban on violent films, nor the provisions of the General Penal Code concerning pornography.
- A confirmation that all taxes and debts in Iceland have been paid.

Act No. 43/1999 on Temporary Reimbursements in Respect of Filmmaking in Iceland expires at year end 2016. All projects approved by that date will be reimbursed in accordance with the law.

Research and development (R&D)

Innovative companies are entitled to a special deduction from CIT amounting to 20% of expenses incurred on the projects, provided certain conditions are met.

The maximum amount on which the deduction is calculated within each company shall not exceed ISK 100 million for each operating year. In the case of purchased R&D services, maximum expenses shall not exceed ISK 150 million.

Withholding taxes
